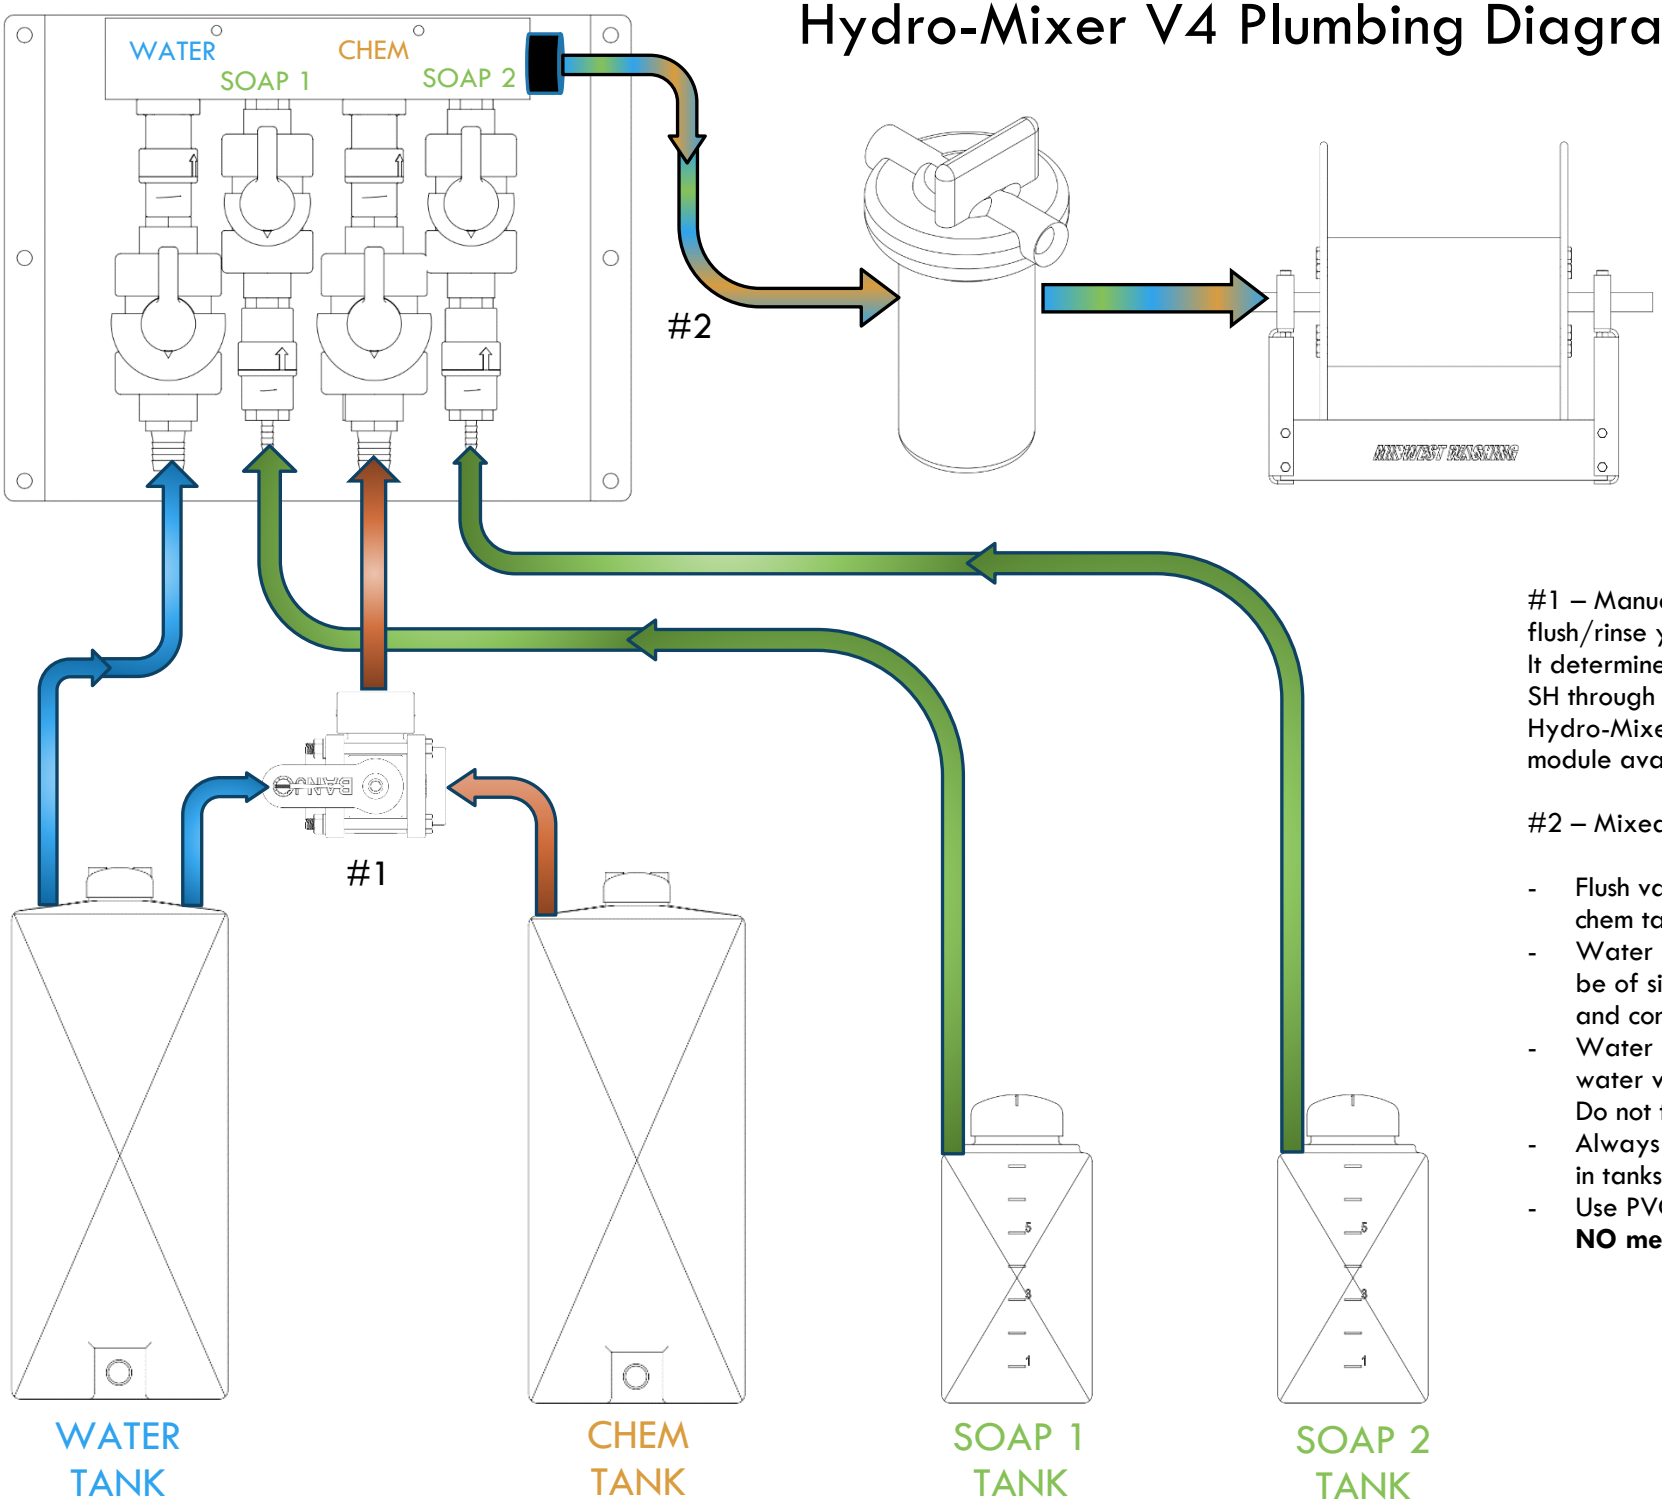
Hydro-Mixer V4 Plumbing Diagram



#1 – Manual flush valve, allows you to flush/rinse your system w/ fresh water. It determines whether you pull water or SH through the CHEM valve on the Hydro-Mixer. (Optional remote rinse module available in lieu of manual)

#2 – Mixed solution through into pump

- Flush valve can mount directly to chem tank or remotely
- Water & chem supply lines should be of similar length for accurate and consistent metering
- Water supply for flush valve and water valve should be dedicated. Do not tee into other lines
- Always use strainers on pickup lines in tanks
- Use PVC slotted filter in Chem tank, **NO metal except titanium**
