

IntellaView Enterprise

CENTRALIZED MULTI-SWITCH MANAGEMENT WITH ADVANCED CAPABILITIES

KEY BENEFITS:

Advanced New Dashboard
Dashboard includes widgets that provide a graphical, high-level overview of activity.

Graphical Statistics
Real-time and historical data are accessible topically and graphically, and workflows are completed navigationally.

Management for Certificates and Licenses
Major improvements and automation in managing all SSL certificates and licenses.

Alert Management:
Users can acknowledge and mask (dismiss) an active alarm for a specific instance on the network, as well as receive mobile notifications.

OTHER BENEFITS:

- **New and Intuitive UI**
- **Robust Scheduler**
- **Run Health Check**
- **New Device Selector**
- **Single Login**
- **New Connection Views**
- **New IntellaTap-VM**
- **In-depth Switch Details**

INTRODUCING INTELLAVIEW ENTERPRISE

APCON's newest software product, IntellaView Enterprise, represents a modern solution in multi-switch management capabilities.

Controlling multiple switches is easy and efficient with a new, intuitive, and user-friendly design with a variety of enhancements and new features. The new streamlined navigation and workflows enable quick access to concise system information and frequently used tools and features.

COMPREHENSIVE MANAGEMENT SOFTWARE FOR NETWORKS OF ALL SIZES

APCON's IntellaView Enterprise is a secured HTML5-based graphical user interface that enables switch access via a single device — the epitome of “centralized” switch management — that empowers network packet visibility through every APCON switch on the market today, as well as virtual servers. Centralized switch and connection data make system configuration and control conveniently available at a glance.

The redesigned user interface of IntellaView Enterprise fulfilled customers' requests to make processes easier and faster while delivering a more intuitive, fresh look as a follow-up to the TITAN platform. The new features-based design enables quick and ready access to critical statistical information vital to the business while mitigating downtime. When you add the IntellaView Enterprise Mobile App to your device, on-the-go switch management is at your fingertips.

COMPARING MULTI-SWITCH MANAGEMENT SOFTWARE

IntellaView Enterprise delivers an expanded palette of features to give users complete switch management control. Some of these enhancements beyond the TITAN platform include advanced scheduling options, Connection Statistics, and automated SSL Certificate and License Management, as well as significant updates to Health Checks, Dashboard configurations, and IntellaTAP-VM controls.

Features	TITAN	IntellaView Enterprise
Switch Firmware Management	✓	✓+
Dynamic Dashboards (New)	Static Only	✓+
Alarm & Event Management (New)	View Only	✓+
Connections - Advanced Views	Basic Only	✓
HyperEngine Services	✓	✓+
