### CHAPTER I: FORMATIVE AFFIXES

394. Hoernle's discussion of the NIA. suffixes in his 'Gaudian Grammar' remains the most thorough study of the scope and origin of these, although some of his derivations are more or less speculative. The Bengali formative affixes have been discussed in some detail by Rai Bahadur Yōgesh Chandra Vidyānidhi in his Bengali grammar (published by the VSPd., pp. 147-191), but the arrangement is capable of improvement, and some of the etymologies can be questioned. There is no doubt as to the source of most NIA. affixes, but there are a few which have not been satisfactorily explained.

The OIA. affixes, primary or secondary, became disguised, or simply dropped off in NIA., through either assimilation or phonetic decay. But a number of OIA. affixes have been preserved, and occur in NIA. as living forms, although in their present shape they are widely removed from their OIA. originals (*e.g.*, « -pan » < « -tvana- » ; « -ab, -ib, -iv » < « -tavya- » ; « -ī » < « -ika, -ikā » ; etc.). The NIA. speeches preserve only the relics of some OIA. affixes, which as a result of phonetic decay now form integral and indivisible parts of the words, and have, so far as the speech-feeling of the NIA. speaker is concerned, no separate existence, and are not recognisable or analysable any more as an affix. Thus, for example, the OIA. primary affixes « -ā, -ā, -as », in noun and adjective formations, are no longer living ones in Bengali, as they are lost in all inherited words ; but the affix « -ana », to form verbal nouns, continues to be in full force as অন, ওন « -anঁ, -onঁ » ; and in words like কাম, কাম « cāma, kāma », the -ম « -ma » is only partially representative of the original OIA. affix « -man » ; but it is no longer possible to analyse the Bengali words as being made up of a root *p/n*s an affix, and neither can -স

« -mঢ » be distinguished from the -ম « mঢ » in words like জাম « jāmঢ » (jambu) and আম « āmঢ » (āmra). The words in Bengali have become to all intents and purposes root-words, or primitive words, the sense of their being composed forms being long lost, from the beginning of MIA. So in words like রাতি « rāti » (rātri), পাতি « pāti » (pagkti), সেতা « sōtā » (MIA. sōntā-, OIA. srōtas), কাজ « kājঢ » (kārya), the OIA. affixes « -tri, -ti, -tas, -ya » are present, but they are no longer alive. These relics or fragments of dead forms are not necessary to consider, unless the subject of study were the history of the OIA. suffixes down to NIA. through MIA.

Below are given in a rough alphabetical order all the living affixes, primary as well as secondary, which are found in Bengali, Old, Middle and New, with indications of their origin.

### [A] SUFFIXES

#### [I] TADBHAVA SUFFIXES

(1) অ « -ঢ, ষ » : masculine, feminine and neuter noun affix.

**395.** Representing the primary affixes of OIA., masculine « -ঢ », feminine « -ঢ », neuter « -am », also « -as », with or without « guna » of the root-vowel, this affix may be said to have existed in Old Bengali and Early Middle Bengali, but was lost from Late Middle Bengali times with the loss or assimilation of the final vowel: e.g., চার « cāra » (cāra), সান « sāna » (saīññā), মণ « manā » (manas), সাঙ্কম « sāṅkama » (saṅkrama) bridge; but cf. Late MB. দে « dē » (dēha), মন « mānঢ » (manas), বাত « bātঢ » (vārtā), বোল « bōlঢ » speech (MIA. \*bōlla), চাল « cālঢ » way, style (cāla), etc.

(2) অ « -ঢ », also written ও « -ঠ ».

**396.** This is the pleonastic suffix, found in a number of nouns and adjectives—e.g., ভাল, ভালো « bhālā, bhālō » good; কাল, কালো « kālā, kālō » black; ধল « dhālā » white; etc. It comes from the pleonastic or pejorative « -কা » of OIA., added to nouns in « -ঢ » = « -ঢ-কা » > MIA. « -ঢ়া- » > « াঁও »: see ante, pp. 302, 346, 347, 348. The affix is thus of secondary origin. The employment of the pleonastic « -ka », giving, with the

preceding « -a » of the word, the MIA. forms « -aga, \*-aga, -aw/ya », is quite a note-worthy thing from the Second MIA. stage; and in Skt. as written in that period, as well as in later times, this vernacular habit is fully reflected: in the Skt. of inscriptions, this is very much in evidence. (Cf. Damodarpur Copper Plates of the Gupta Period, Ep. Ind., XV, pp. 130, 138.) The combination of « -āā » > « āwā » seems to have begun to be altered to an « ā » (long [ə:]) sound in the OB. period; and it was accomplished by the 14th century. (See pp. 260, 302, 346.) In MB., it is frequently found in personal names, where it is commonly written as « -ō »: e.g., শিবো « Śibō » (OB. \* Śibawa = /s. Śiva + ka), রুদো « Rudō » (\*Rūdāwā < Rudra + ka), বিভো « Bibhō » (\*Bibhāwā < \*Vibhu = Vibhu + ka), সিধো « Sidhō » (\*Siddhāwā < Siddha [= Siddhēśvara] + ka), etc. These common contractions of personal names in MB. are thus on the basis of a form in « ā- », shortened from the full names (e.g., জনো « Jānō » < « Janārdana »), পিথো « Pithō » < « Pṛthvidhara », etc.), with the pleonastic « -kā » added. Forms like the above are very common in MB. genealogical works (*kula-grantha*, *kulajī=kulāpañjikā*): which shows that they were much in use.

There is another affix, also (occasionally) written -অ « -ং », indicating the sense of *about to do something*: e.g., কান্দ-কান্দ « kādā-kādā », beside কান্দে-কান্দে « kādō-kādō » *ready to burst into tears*. This is a primary affix forming verbal adjectives and is derived from ও « -ō » < উ « -u », which see, *infra*.

(3) Affixes derived from the OIA. Active Present Participle « -ānt- »: অস্ত « -āntā »; অৎ > অতা, অলৈ (অতি) « -ātā » > -ātā, -āti (-āti) », অত « -ātā ». (Cf. also আইত, ইত « -ait, -it- », and আস্ত « -āntā ».)

**397.** অস্ত « -āntā »: this is a stereotyped form, which occurs only in a few adjectives used attributively: e.g., জীৱস্ত « jīāntā » > জ্যাস্ত « jyāntā » [jʒānto] *livino* (jivant-); চলস্ত « cālāntā » *moving* (calant-); বাঢস্ত « bāḍāntā » *prospering* < বাঢ়স্ত « bāḍhāntā » (vṛdh>\*vardhant-); ঘূমস্ত « ghumāntā » *sleeping* (ঘূম/ghum); ভাসস্ত *floating* (ভাস/bhās float); etc. It occurs in a feminine form অষ্টী « -āntī » = « -ant- + -ikā » used with sentient feminine nouns: নাচষ্টী < নাচষ্টী « nācūntī < nācāntī » (nṛtyant- + -ikā); দেখষ্টী < দেখষ্টী « dēkhāntī » *seeing, seer* (MIA. dēkkhanti), etc. অস্ত « -āntā »

is not the regular development in Bengali of the OIA. affix « -ant- », but it became established in some forms, which were set apart in MB., because of their adjectival force, from the regular MB. and NB. change which made ইত « -it » out of MIA. « -anta, -enta » < OIA. « -ant- » (see p. 335).

অং « -ংত », found commonly in its extended form অতা « -ংতা », feminine অতী, অতি « -ংতি, -ংতি ». This affix seems to be borrowed from the Bihārī dialects, and Hindōstānī: « -anta >-at ». The feminine force is lost to Bengali. Examples: ফেরত ডাক « phērāt̪ dāk̪ » *return post*, also ফিরতী ডাক « phirāt̪i dāk̪ » (ফির  $\checkmark$  phir); চলতী ভাষা « cālāt̪i bhāṣā » *current speech, colloquial* ( $\checkmark$  cal), cf. Hindī « calt̪i cakkī » *the moving wheel (quern-stone = the world)*; বহতা জল « bāhāt̪ā jāl̪ » *running water* (বহ  $\checkmark$  bāh <  $\checkmark$  vah *flow*); উঠতি বয়স « ut̪hāt̪i bāyās̪ » *growing age, youth* (উঠ  $\checkmark$  ut̪h < ut+sthā); সব-জান্তা « sābāt̪-jānt̪ā » *all-knowing*; বিলাত-ফেরত, or ফেরতা « bilāt̪-phērāt̪, -phērāt̪ā » *returned from Europe*; দেখতা « dēkhāt̪ā » *seeing*, as in the idiom আমার দেখতা « āmārāt̪ dēkhāt̪ā » (for আমি দেখতা « āmi dēkhāt̪ā » ?) *with me looking on*; বড়তি পড়তি « jhārāt̪i pāṛāt̪i » *things that are scattered and fallen, remainder ; etc.*

Another form of this affix is অত « -ংত », which seems to be a blend of অং « -ংt » + অন্ত « -ন্তা »: e.g., জানত « jānāt̪a », পারত « pārāt̪a », করত « kārāt̪a », etc. Forms with this affix, however, are rather rare, and they have a special employ. জানত « jānāt̪a » is used as an absolute with the subject in the genitive, e.g., আমার জানত « āmārāt̪ jānāt̪a » *me knowing, with my knowledge* (cf. আমার দেখতা « āmārāt̪ dēkhāt̪a » *above*); and it is frequently confused with the *ts.* passive part. adjective in ত « -t̪a », and used as an adjective: e.g., আমার জানত লোক « āmārāt̪ jānāt̪a lōk̪ » *a man known to me beside* আমার জানিত লোক « āmārāt̪ jānīt̪a lōk̪ » (where « jānīt̪a » = জান «  $\checkmark$  jān » + *ts.* affix « -ita »). পারত « pārāt̪a », also « pārāt̪ā » is commonly used in the phrase পারত-পক্ষ « pārāt̪(ā)-pāks̪ē » *on condition of being able*, which is frequently altered to a Skt. পারগ-পক্ষ « pārāgā-pāks̪ē ». করত « kārāt̪a » *doing*, is used as a conjunctive participle = *having done*, and sometimes a Sanskrit colour is given to this form by adding a « visarga », which helps to preserve the final « -ং » in the word: করতঃ [kɔrɔtɔ] *having done, after doing*.

In onomatopoetic formations in আঁ <-āt> like পট্টাঁ <pāṭṭāt> with a cracking noise, ঝপ্পাঁ <jhāpāt> with a dashing or splashing sound, কপাঁ, গপাঁ <kāpāt, gāpāt> with a gulp, ছলাঁ <chālāt> with a splash, which are used with the conjunctive করিবা, ক'বৈ <kāriyā, kōrē>, we have also possibly this <-anta> affix of MIA. and OIA.

(4) অতী, তী (অতি, তি) <-āti, -tī (-āti, -tī)>.

**398.** This forms abstract nouns of action or manner: e.g., পড়তি <pāṛati> fall; উঠতি <ut̄hātī> rise; চুকতি <cuk̄ṭati> settlement, fixing up; বাড়তি <bāṛati <bāṛhātī> rise, increase; ঘাটতি <ghāṭātī> decrease; by analogy, the hybrid কমতি <kām-ti> decrease, from Persian, <kam>; খাকতি <khākātī> greed (cf. onomatopoetic খাঁখা <khākhā> the sense of emptiness and hunger); গন্তি <gunṭati> counting; ভরতি <bhāṛātī> filling-up, etc.

Hoernle explains this affix ('Gaudian Grammar,' § 325) as being a Sanskrit (or OIA.) <\*-āptikā>, from the causative affix <-āp->+<-ti>+pleonastic <-kā>: e.g., বিনতি <bināti> (vijūñāptikā = vijñāptikā > viññattia), বাড়তি <bāṛātī> (\*vardhāptikā > \*vaḍḍhāttia); etc. But this derivation is rather problematical. Cases like ডাকাইত <dākā(i)tī> robber (ডাক <√dāk> shout: cf. under আইত <-āit> below), ডাকাইতী <dākā(i)tī> robbery, ঢাঙা(ই)ত > ঢাঙা(ই)জী <dhang(g)ā(i)tī> dhangā(i)tī > rowdy > rowliness (dhangā), etc., with the জী (ই) <-i (-i)> affix of abstraction (for which see *infra*), show that in examples like উঠতি <ut̄hātī>, ভরতি <bhāṛātī> etc. above, we have an extension of the অঁ <-āt> affix (< present participle <-anta>) by addition of the abstract জী, ই <-i, -i>: উঠতি <ut̄hātī> = <ut̄hā(n)tī + -i> the state of rising = a rise.

The change of <-anta> to <-āt->, and not to <-it->, would show that this affix is not native to Bengali, but borrowed, with cognate loan-words, from its western neighbours.

It seems also that in the formation of this affix, there was the influence of the Skt. nominal affix <-ti> as well, through the presence of a large number *ts.* as well as *s/s.* forms in <-ti>, like <yukti (jugati), bhakti (bhakati), mati, gati, pranati> etc. In post MB. times,

the Perso-Arabic loan-words in « -at », with the Indian or Persian « -I » added, re-inforced this affix: e.g., « wakālat » > ওকালতী « ūkālāt-i » *a pleader's profession*; and by analogy, it was extended to other foreign words, e.g., জজ « jāj » = English *judge* > জজিয়তী « jājiyāt, jājiyāt-i » *the work of a judge*.

(5) অন ( ওন, এন ) « -ān় (-ōn়, -ēn়).

**399.** This is a living suffix in Bengali, forming abstract verbal nouns, some of which have acquired a concrete sense. It is the OIA. « -ana ». Examples: কান্দন « kādān় » (krandana); কুন্দন « kūdān় » (kūrdana); খান্দন, থাওন « khādān়, khāōn় » (khādana); গায়ন, গাঘেন « gāyān়, -yēn় » singer (gāyana: \*gāthayana ? cf. Khaskurā « gāhinē » singer < « gāhiniyā »); ঘূরন « ghurān় » turning round and round (ঘূর √ghur < ghūrn-); চাহন, চাওন « cāhān়, cāōn় » gaze, look (চাহ √cāh); ছাড়ন « chārān় » leaving (ছাড় √chār); ছাদন « chādān় » binding (chandana); জ্বলন « jwālān় » [fʒələn] (jvalana); ঝাড়ন « jhārān় » dusting, a duster, ঝোঁটন « jhōṭān় » crest, top-knot (see p. 479); ঝুলন « jhulān় » swing (see p. 479); ঢাকন « dhākān় » covering > a coverer (ঢাক √dbāk); থাকন « thākān় » staying (থাক √thāk); দেখন « dēkhān় » sight; ধরণ « dhārān় » manner (< ৳ > through Skt. influence) (dharana); নাচন « nācān় » dance (নাচ √nāc); পড়ন « pārān় » fall (paḍana < \*paṭana < patana); পাঅন, পাওন « pāān়, pāōn় » (prāpana); পাড়ন « pārān় » (pātana); পোড়ন « pōrān় » burning (পুড় √pur < √put); ফোড়ন « phōrān় » spices, chatter (√sphut); বাধন « bādhān় » (bandhana); বাজন « bājān় » music (বাজ √bāj < vādyā); বাড়ন « bārān় » broom (vardhana); বেধন, বিধন « bēdhān়, bīdhān় » piercing (viddha < √vyadh); মরণ « mārān় » (maraṇa); শুনন « śunān় » hearing (শুন √śun < śr-ṇō-ti); হান, হওন « hā(w)ān়, hāōn় » being (\*ahana = as-ana + bhav-ana); etc., etc.

This affix is now becoming a little archaic in the Standard Colloquial, which prefers the other verbal noun in আ « -ā »: but it is a very living form in the East Bengali dialects.

The affix « -ān় » has two extensions :

(5a) অনা > -না < -ନା > -ଣନା : this is simply অন < -ଣନ୍ତି > extended with the আ < -ା > affix. The < -ା- > in this affix drops when inter-consonantal ; when after a vowel, it becomes < e > or < o > and forms a diphthong. The original force of this < -ା > was to denote simply a coarser or biggish aspect of the action, or to indicate a connected object, but this has been to a considerable amount modified, so that অনা, না < -ଣନା, -ଣନା > in many cases is not different from অন < -ଣନ୍ତି >. Examples : কান্দা < কাঁদনা, কান্দনা < kāñnā < kādñnā, kāndānā > (see p. 360), beside কাঁদন < kādāññ > (kāndana-) ; কুটনা < kutñnā > *slicing* > *sliced vegetables* (কুট  $\checkmark$ kut̪) ; কাটনা < kātñnā > *spindle* (কাট $\checkmark$ /kāt spin) ; খেলনা < khēlñnā > *playing* > *toy* beside খেলন < khēlññ > *playing* (খেল $\checkmark$ /khēl) ; গহনা, গয়না < ḡahñnā, ḡayñnā > *jewels* (grahanya-) ; গাহনা > গাওনা < \*ḡahñnā > ḡāonā > *singing* (গাহ  $\checkmark$ ḡāh <  $\checkmark$ ḡathaya-) ; ছাকনা < chākñnā > *strainer* (ছাক  $\checkmark$ chāk) ; ঝরনা < jhārñnā > *water-fall* (ঝর  $\checkmark$ jhār : see p. 478) ; ঢাকনা < dhākñnā > *largish lid* (ঢাক  $\checkmark$ dhāk) ; দোলনা < dōlñnā > *swing* (তুল  $\checkmark$ dul) ; দেনা < dēnā > *giving* > *debt*, beside দেন < dēññ > *giving* (দে $\checkmark$ /dē give =  $\checkmark$ dā) ; so লেনা < lēnā > beside লেন < lēññ > *taking* (লে $\checkmark$ /lē take <  $\checkmark$ lah = labh +  $\checkmark$ nī) ; পাওনা < pāonā > *receiving*, dues (prāpāñña-) ; পিটনা < pitñnā > *mallet to beat with* (পিট  $\checkmark$ pit̪) ; বাজনা < bājñnā > *musical instrument*, see বাজন < bājāññ > *above* ; বাটনা < bātñnā > *paste of pounded spices* (বাট  $\checkmark$ bāt pound, mash) ; মাগনা, মাঞ্জনা < māgñnā, māñ(g)ñnā > *asking* > *gratis* (mārganya-) ; রান্না < rāññnā < rāññhñnā > *cooking* (randhana-) ; শুখনা < śukhñnā > *dry, dry-land* (শুখ $\checkmark$ /sukh < śuṣka) ; etc. There are some formations from nouns as well : ছানা < chāñnā > *youngling (of animals)* (beside ছা < chā >, = < śāba- >) ; পাখনা < pākhñnā > *wings* (beside পাখ pākhañ < pakṣa).

(5b) অনী > নী, উনী (নি, উনি) < -ନି > -ଣନି, -ଣି (-ñni, -uni) >. Originally feminine in form (-ଣନ୍ତି+ି), indicating a diminutive or petty aspect of the action or object. All grammatical connexion with the feminine form is now lost, except where the word indicates a woman. The change to <-uni> is by Vowel Harmony (see p. 398). কাঁচনী < কাঁদনী < kāduni < kādñnī > *weeping, petty fit of weeping, supplication* ; ŠKK. নাচনী < নাচনী < nācunī < nācāññī > *danseuse* ; ছেনী < chēnī >< \*chēanī > *a cutting instrument* (chēdana, chēdanikā) ; ছাউনী < ছানী < chāunī < chāññnī > *awning, camp* (chādanikā) ;

ছাকনী < chākṣṇī > *small strainer* (ছাক  $\checkmark$ chāk); MB. পোড়নী < pōṛānī > *burning* (পুড়  $\checkmark$ pur); কুরনী > কুকনী < kurānī > *scraper* (কুর  $\checkmark$ kur *scrape*); মণী < māṇī > < \*mā(h)āṇī > *churning stick* (\*mathanikā); etc., etc. The word রাধুনী < রাধনী < rādhunī < rādhanī > *cook* is now both masculine and feminine, but originally it seems to have been only feminine (< randhanikā >: or a masc.=< \*randhanikā > ?); when it means a kind of flavouring spice, it is the feminine form undoubtedly. So MB. বেচনী < bēcāṇī > *a seller* (বেচ  $\checkmark$ bēc).

Causative forms of this affix, in আন < -ānṣ >, আন, আনা < ānā, -ānā > আনী, উনী < -ānī, -uni > also occur: see *infra*.

In the word দাতন < dātāṇ > *twig used as tooth-brush* we do not have the < -ānṣ > affix (unlike in formations from nouns like পাখনা < pākhāṇā >, বাজনা < bājāṇā >, etc.): the Maithili < datamani >, Bhōjpuriyā < datuan >, and Hindostānī < datwan, dataun, datūn > show that the word is a compound of < danta > + < vana > (?).

(6) আ < -ā > (i) : Definitive, Pejorative, Connective, Agentive, Pleonastic.

**400.** This affix is a very characteristic one of Bengali. It indicates definiteness (this definitive force is now considerably weakened); it implies coarseness or biggishness in the object; it means reference or connection; it forms agentive adjectives; and frequently it is also pleonastic. In all its various forces, the < -ā > affix of Bengali can be compared with the pleonastic affixes giving rise to the strong, long and redundant forms of the Bihāri dialects (see p. 96). The source of Bengali < -ā >, as an OIA. < \*-āka >, has been indicated at pp. 302, 348-349. Cf. Sanskritised forms like < Nāgāka, Dhamāka, Visiāka, Bhaluāka, Pappāka (beside Pappā), Rudāka, Chitarāka >, all representing vernacular names in < -ā >, in the Siyadoni Inscription (10th century: Lalitpur District, U.P.; Kielhorn, Ep. Ind., I, pp. 162 ff.) Where no special force of the < -ā > is present, as in a noun like ঘোড়া < ghōṛā > (beside ঘোড়- < ghōṛ- > in compounds), that is, where it is merely a pleonastic extension, it is not unlikely that the < -ā > represents only the termination of an oblique case (see p. 349). Examples: OB. (Caryā 41) হথা (hasta-); (Caryā 49)

পটজা « pāūā = pañuā » (\*paduma-, padma-) ; (Caryā 8) মাগা « māgā » (mārga-) ; (Carya 2) পিটা « pītā » pail ; (Caryā 3, 20) পসারা « pasārā », নিসারা « nisārā » (prasāra-, nihsāra-) ; (Caryā 4) বীরা « bīrā » (vīra-) ; (Caryā 6) হরিণা « harinā » (harina-) ; MB. নেহা « nēhā » (snēha-) : MB., NB. নেতা « nētā » rag (nētra>nētā=fine stuff) ; কাসা « kāsā » (kānsya-) ; ŠKK. কনঘা « kānāyā » (kanaka-) ; পাতা « pātā » (patra-) ; কুঘা, কুঞ্জা « kūā » (kūpa-) ; গোঘা « gōrā » (gāura-) ; উঁচা « ūcā » (ucca-) ; চো঱া « cōrā » (cāura-) ; বাঘা « bāghā » (vyāghrā) big tiger>tiger-like, ferocious, strong (e.g., বাঘ a common name for a dog, বাঘ তেঁতুল « bāghā tētulā » kind of tamarind with strong acid taste) ; খাঁড়া « khāñā » sacrificial sword (khanḍa-) ; বকরা « bākārā » goat (barkara-) ; ঝুঁকড়া > ঝুঁকড়ে « kūkūrā > kūkārā, kūkārī » (kukkuṭa-) ; রামা « Rāmā » contemptuous for « Rāmā » ; চাঁদা « cādā » big round moon, beside চাঁদ « cādā » moon (candra-) : cf. চাঁদা মাছ « cād-ā māchā » a kind of roundish fish, pomfret ; থালা « thālā » plate beside থাল « thālā » (sthāla) ; ধূঁআ, ধূঁঁই « dhūā » (dhūma-) ; রাঙা, রাঙ « rāj(g)-ā » red in colour (raṅga-) ; তেলা « tēl-ā » oily (tāila-) ; লোনা « lōnā » salty (lavaṇa-) ; হাতা « hātā » handle (hasta-) ; তাওয়া « tāwā » pot for heating or dry cooking (tāpa-) ; বামনা « bāmñānā » a low Brāhmaṇ (brāhmaṇa-) ; sts. পশ্চিমা « paścimā » western (paścima-) ; দক্ষিণা, by Vowel Harmony দ'খনে (see pp. 400-401) « dākkhinā » > [dokhne] southern (dakṣiṇa->dākkhīnā-) ; একা « ēkā » [ækā], একলা « ēkālā » alone (ēka-, \*ēkāka ; ēka-la-) ; মুহা « muh-ā » with a face (mukha-) ; ভৱষা « bhāyṣā » belonging to a buffalo (bhāiṣā< mahiṣa+-ā) ; খেয়া « khēyā » ferry (ksēpa-) ; etc.

In compounds with active meaning : ছেলে-ধরা « chēlē-dhār-ā » child-stealing = kidnapper ; চাল-ধোয়া « cālā-dhōā » rice-washing ; কাপড়-কাটা « kāpārā-kāc-ā » cloth-washing ; কলম-কাটা ছুরী « kālāmā-kāt-ā churi » pen-(cutting)-knife ; ভাত-ঝাঁঘা হাঁজী « bhātā-rādh-ā hārī » pot that boils rice, etc.

This affix is added to both *tatsama* and foreign words : রোগা « rōg-ā » sick, sickly, lean and thin (rōga-) ; সফেদা « saphēd-ā » rice-powder (Pers. safēd white) ;

Other affixes of Bengali, like « -āṭa, -uṭa, -i(-i) -ū(-u), -āla, -āra » etc., are extended by addition of this « -ā » : for which see below.

(7) **আ < -ā >** (ii) : Passive Participle and Verbal Noun Affix.

**401.** This suffix is derived from the OIA. affix **< -ta, -ita >** > MIA. **< -a, -ia >** plus the preceding pleonastic affix **আ < ā >**. The following examples illustrate the line of development : **< yāta > jāā + -ā > OB. \*jāā, NB. যাওয়া \*jāwā > gone > a going ; < kṛta > \*karita (a non-Māgadī formation : cf. p. 375) > karia + ā > OB. kariā > করা kārā > done > doing, as in New Bengali. So রাখা < rākhā > kept > keeping (rakṣita + ā) ; খাওয়া, খাওয়া < khāwā > (khādita + ā), etc.** We have the loss of the **< -i- >** already in OB. : e.g., Caryā 20 **< saṅghārā > struck** ; but it is the **< -i- >** forms, with or without the pleonastic **< -ā >**, that are common in the Caryās (when without **< -ā >**, the final **< -a >** is found to have assimilated with the preceding **< i >**, as follows : **< -ita > -ia > -i, -i- >** : e.g., in Caryā 19 **< uchaliā > (ucchalita + ā)**, **< caliā > (calita + ā)**; Caryā 13 **< muniā > (=jñāta-)**; Caryā 17 **< sunjā > (=śruta-)**, **< miliā > (milita + ā)**, guniā (**=ganita + ā**) ; beside **< pahāri > (prahārita)**, **< ahāri > (āhārita-)**, etc. ; and cases are found with the Western Apabhrāṣṭa modification of the **< -itāḥ >** to **< -iu >** (**< -itāḥ > -idō > -iō > -iu >** : cf. p. 115 *supra*). The affix seems to have come into prominence only after the Early MB. period : in the ŠKK. it is non-existent. The **< -i- >** as in **< -iā >** of OB. probably first became **< -ē- >** and then was dropped, following the forms in simple **< -ā >** like **< yāta + -ā > যাওয়া jāwā >, < \*dita + ā > দেওয়া dēwā >** etc. ; and possibly also through an attempt to distinguish this passive participle affix from the conjunctive participle in **< -i(-ī), -iā >** (e.g. রাখী, রাখি, রাখিআ **< rākhī, rākhi, rākhīā > having kept**, with or without **< -ā >** < MIA. **< rakkha >** < OIA. **< -rakṣ-ya >**). The OB. forms of the passive participle in **< -iā >** show that **< -ita + -ā >** is the source of this passive participle affix of MB. and NB. In Panjabī, in the Old Western Hindī dialects and in Modern Hindostānī we find a parallel development with loss of **< -i- >** : e.g., **< calita-, calitaka > > MIA. (Śauraseni) < cali(d)a-, cali(d)aa- >**, nominative **< cali(d)ō, cali(d)aō > > Śaur. Apabhrāṣṭa < caliu, caliaū >**, whence Brajbhākhā **< calyu, calyau >**, Early Hindī or Hindostānī **< calyā >** (beside Panjabī **< caliā, cālēā >**), but Modern Hindostānī **< calā >**, Bundelī and Kanaujī **< calō >**. Ōriyā has this affix also : e.g., **< jāṇ-ā > known, < kār-ā > done, < dēkh-ā > seen, etc.**

It has been attempted to connect this <-ā> affix in its nominal employ with the verbal noun affix ইব, ইবা <-ibā, -ibā> << itavya + ā>>; but that is hardly tenable.

In OB. and MB., there was a feminine form of this affix, with the জৈ <-i> (<-ikā>); e.g., ŠKK. (p. 381) জড়ী <jārī> jewelled qualifying চূড়ী < curī> bracelet (jadīta + -ikā).

#### (8) আই <-āi> (i): Verbal and Abstract Nouns.

**402.** This is a Late MIA. formation, being a feminine verbal noun from the causative stem of the root: an OIA. <-āp-ikā> (as in Skt. <jñ-āp-ikā> *information*, which would be the basis of a possible NIA. <\*jāñāi>) would give <-āviā, -āviā, -āwī, ai> আই ai>. The causative in <-āpa> > -āva> became established in MIA., and on the model of the nouns in <-āpana-> -āvāna-> (see *infra*, § xxx, under আন <-ānā>), formation of abstract and verbal nouns in <-ikā> from the <-āpa-> -āva-> base would be a matter of course. Examples: যাচাই <jācāi> *enquiry* (যাচ √yāc : OIA. \*yācāpikā); বাছাই <bāchāi> *selection* (বাছ √bāch); লড়াই <lārāi> *fight* (লড় √lār); খোদাই <khōdāi>, also খোদাই <khōdāi> *engraving* (খোদ, খোদ √khōd, khōd); দোলাই <dōlāi> *a hood or shawl fastened round the neck and covering the ears and head, and hanging on the back* (হুল, দোল < √dul, dōl>: possibly influenced by <dukūlikā> > হুলী <dūli> [see p. 352], also meaning the same thing); ঝালাই <jhālāi> *soldering* (ঝাল √jhāl); বাধাই <bādhāi> *binding (of a book)* (বাধ √bādh); ঢালাই <dhālāi> *founding (in metal)* (ঢাল √dhāl pour); etc.

This affix is not found with all roots, and is but restricted in use. Abstract nouns from noun and adjective bases are also formed, the nouns and adjectives being treated like denominative verbs: e.g., চোরাই <cōrāi> *theft* > *stolen property* (<cōra>); বামনাই <bāmṇāi> *the way of a Brāhmaṇ, the pride of a Brāhmaṇ* (<bāmāṇḍ <brāhmaṇa>); MB. রাজাই <rājāi> *kingship, reign* (rājā); মিঠাই <mīṭhāi> *sweetness* > *sweetmeat* (<mīṭhā <mīṣṭa->); পালাই <pālātāi> *exchange, returning* (pālātā = paryasta); ভালাই <bhālāi> *well-being* (< bhālā = bhadra->); সাচাই <sācāi> *honesty* (sācā = satya-); বড়াই <bārāi> *pride, boasting* (বড় bārā = great);

খোলতাই « khōlātāi » *dazzle, beauty* (< khōlā *open, clear*, \*khōlāt- *opening*) ;  
পোষ্টাই « pōṣtāi » *nourishing (sts.* < puṣṭi) ; and even with foreign words,  
*e.g.*, সাফাই « sāphāi » *clear* (Pers. « sāf » *pure*), MB. সাজাই « sājāi » *punishment* (Pers. sazā).

There are a few borrowings from Hindostānī also, showing this affix :  
*e.g.*, চড়াই « cāṛāi » *ascent* ; উতরাই « utrāi » *descent* ; সেলাই « sēlāi » *sewing* ;  
ধোলাই « dhōlāi » *washing, washing charges* ; and চোলাই « cōlāi » *distilling,*  
*preparing liquor* (< « √cū » = « eyav » : may be native Bengali).

In one or two words, through dialectal influence (see *supra*, p. 407), « -āi » occurs as ই « -i » in the Standard Colloquial : *e.g.*, বানী « bānī »  
for বানাই « bānāi » *making, charges for making jewellery* (probably from  
Hindostānī « banāi »). It would be seen that there is semantic alteration  
in this affix, making its force that of *cost or wages* for the *work* indicated  
by it.

Hoernle's derivation of this suffix from the OIA. affix « -tā » *plus*  
pleonastic « -ka » (< -tikā » in the feminine) is not convincing (see  
'Gaudian Grammar,' § 223).

#### (9) আই « -āi » (ii) : Diminutive.

**403.** Affectionate diminutives like কানাই « Kānāi » (< Kāna, Kan̤ha, Kṛṣṇa),  
বলাই « Bālāi » (< Bala-rāma), সোমাই « Sōmāi » (Sōma-), দনাই  
« Dānāi » (Janārdana ; Danuja-?), রামাই « Rāmāi » (Rāma), জগাই « Jāgāi »  
(Jagat-), মাধাই « Mādhāi » (Mādhava), ছিরাই « Chirāi » (Śrīpati), etc.,  
which are very common in MB. and fairly frequent in NB., are formed  
with this affix. It is of pleonastic origin, coming from an OB. « -\*āi »  
from Late MIA. « -āia, -āiā » = OIK. « -ākika, -akika (i.e. -āka, -āka +  
-ika) » : « Kānāi < \*Kān(h)āi < \*Kanhāia, \*Kanhāia < \*Kṛṣṇākika, \*Kṛṣṇāk-  
ika ». This affix is found in various forms in Hindostānī and in Eastern  
Hindi and Bihārī. (Cf. Hoernle, *op. cit.*, pp. 100-101.) The suffixes ইয়া  
« -iā », উয়া « -uā » (as well as ঈ « -ī, -i » and ঊ « -ū, -u ») are  
connected : see *infra*.

It is likely that in Bengali the আই « -āi » affix as an affectionate  
diminutive was influenced by the MB. word আই « āi » *long life* < « āyus ».

(10) আইত, আত < -āit<sup>‡</sup>, -āt<sup>‡</sup> >, with extensions.

**404.** Causative and denominative present participle base: OIA. < -āp-ant-, -āy-ant > MIA. < -āvant-, -āant- > OB. < -āy/wanta > MB. আইত < -āit<sup>‡</sup> >: ডাকাইত, ডাকাত < dākāit<sup>‡</sup>, dākāt<sup>‡</sup> > *robber* < shonter (ডাক *yell*) ; MB. বাইতি < bāiti > *player on a musical instrument* (vādayant- + -ika). This is a rare affix in Bengali. There are a few instances of this affix with nouns: সাঙ্গং, সাঙ্গে < sāŋ(g)āt<sup>‡</sup> > ([ʃanjat, ŋenjat] ; for [æ], see p. 322) *companion, bosom friend* (*sangga*) ; সেবাইত < sēbāit<sup>‡</sup> > *temple-priest* (*sēvā*) ; পোআতী, পোৱাতী, পোহাতী < pō(b)āti > *pregnant woman, a recent mother* (< pōta > : for intrusive < h >, see p. 341 : this form has the feminine affix টী < -i > < -ikā>). Cf. Oriyā খণ্ডাইত < khāndāit<sup>‡</sup> > *a military caste* (*in Orissa and S. W. Bengal*) (*khanda sword*) ; Hindostānī < ḍhalait<sup>‡</sup> > *shield-bearer* (*ḍhāl*), etc.

Abstract nouns are formed from this affix by adding ঈ, ই < -i, -i > (see p. 655, *supra*) : ডাকা(ই)তী < dākā(i)tī > *robbery* ; MB. ঢাঙ্গাতী < ḍhāŋ(g)ātī > *rowdiness* (*ḍhangga*).

(11) \*আউ>আও < \*-āū>āo >: Verbal Noun Affix.

**405.** This affix is now confined to a limited number of words ; and in those cases where it is found, it seems there is reinforcement from similar Hindostānī forms. It is connected with আই < -āi > (i) above. The source is apparently a verbal noun from the causative base: < -āpa >, with an extension < \*-āp-uk-ā (-āpa + -u-ka + -ā) >, corresponding to < \*-āpikā > the source of আই < -āi >. The affix, as < -āw, -āō, -āū > is a common one in Hindostānī. Hoernle traces it (*op. cit.*, §227) to OIA. < -tva >: < -tva > -tta > -a >, a derivation which is inadmissible. Examples: চড়ও < cārāo > *aggression, attacking* (চড় < √cār > : also used as an adjective, through influence of a form like উধাও < udhāo > *running out of one's sight* = < uddhāvuka >: cf. also ও়া < -ōā > in next paragraph) ; ঢালও < dhālāo > *abundance, 'galore'* (ঢাল √dhāl *pour*) ; পাকড়ও < pākāṭāo > *arrest, seizure* (পাকড় < √pākāṭā > *to seize*) ; ঘাবড়ও < ghābāṭāo > *fright* (ঘাবড় < √ghābāṭā > *to be checked, to fear*) ; ছাড়ও < chāṭāo > *separation, release* ;

ফালাও « phālāo » *spreading, abundance*, from Hind. « phailāw » ; বনাও in বনি-বনাও, beside বনি-বনা « bāni-bānāo, -bānā » *amity, harmony*, cf. Hind. « banāw » *preparation, concord*.

(11a) আউআ, (আওআ) > ওয়া « -āuā>-ōā » : Adjectival as well as Abstract.

**406.** This affix is an extension of the preceding one with the adjectival or pleonastic আ « -ā » (see *ante*, § 400) = e.g., ঘরোয়া « ghārōā » *homely, domestic* [ghīroa] = « ghārāo, \*ghārāū + -ā » (this word shows extension of the affix to a noun); জড়োয়া « jārōā » *jewelled, adorned with precious stones* = « jārāo, \*jārāū + -ā »; বাঁচোয়া « bācōā » *safety, safe state* = « bācāo, \*bācāū + -ā »; চড়োয়া « cārōā » *aggressive* = « cārāo, \*cārāū + -ā ».

(12) আট, আটি (আট), « -āṭ, -āṭi, (-ati) ».

**407.** This is not so much an affix as an independent word, phonetically decayed, and forming part of a disguised compound. It is from কাঠ, কাঠি « kāth, kāthi » = « kāṣṭha, \*kāṣṭhikā », *wood, beam, stick*. গাৰাট « gābṛāṭ » *lintel* (garbhāgārakāṣṭha); পাকাটি « pākāṭi », see p. 492; MB. ধৰাট « dhārāṭ » *a nautical term = special deck in a boat*; OB. চাৰাটি « cāmāṭhi » *whip* as in Sarvānanda, is explained by that scholar as meaning « carma-yāsti », but it may be equally from « carma + kāṣṭhikā », which is also found in Sanskrit.

(13) আন, আন (আনো) « -āṅ, -āṅ, (-ānō) » (i).

**408.** The affix, forming verbal nouns from causative and denominative bases, is from OB. « -āna, -ānāwa, -āwāna, āwānāwa » (OIA. « -āp-ana, -āp-ana-ka »). The forms without the final « -a » in New Bengali have in most cases obtained a concrete or definite sense. Examples: আচান « ācānā » *washing mouth after meals* (\*ācamāpana=ācamana); জানান, জানান « jānāṅ, jānānā » *making to know, information, intimation* (\*jānāpana=jñāpana-); চালান « cālāṅ » *invoice, send-up*, চালান « cālānā » *sending forward* (\*cālāpana-=cālana); মানান « mānāṅ » *harmony, agreement, beauty* (\*mānāpana < mānaya-); উজান « ujāṅ » *flow-tide, up-stream* (\*udyāpana-); উড়(ঠ)ন « urāṅ, urāṅ » *causing to fly away, extravagance*,

*wasteful expenditure* (\*uḍḍāpana-) ; † ছোড়ান् < chōṛān&gt; > separating, freeing, disclosing > a key ( ছোড় / chōṛ = ছাড় / chāṛ) ; শোনাৰ < śonānā > causing to hear (MIA. \*suṇāvāṇa = śrāvāṇa) ; গড়ান্ < gāṛān&gt; > slope, গড়ান < gāṛānā > a rolling, to roll (MIA. \*gadd̄) ; etc. There are old and recent formations from nouns also : জুতান, জুতানো < jutānā, jutānō >, also in Calcutta জুতানো, জুতুনো < jutōnō, jutunō > shoe-beating (জুতা < jutā > shoe) ; sts. যোগান < jōgān&gt; > aiding with materials, যোগান < jōgānā > act of supplying (yōga) ; লাঠানো < lāṭhānō > kicking (< লাঠ lāṭh, লাঠি lāthi kick) ; হাতানো < hātānō > obtaining, fishing (হাত < hāṭ > hand) ; পেচানো < pēcānō > twisting, moving to and fro (পেচ < pēc > twist from the Persian) ; কমান < kāmānā > lessening (Pers. \* kam > less) ; জমান < jāmānā > gathering (Pers. jam<sup>9</sup>) ; etc.

The affix has a feminine form, from OIA. <-āpana+-ikā> = OB., eMB. <-āwāṇī, -āni>, which gives in NB.

(13a) আনী (আনি) <-ānī (-āni)>, উনী (উনি) <-uni (uni)>.

This affix possesses only a vague diminutive force. OB. <\*-āwāṇī> would normally be contracted to MB. and NB. <-āni> (see p. 349), and this <-āni> by Vowel Harmony becomes <-āni> and <-uni> (p. 398). But in the transformation of the affix from <\*-āwāṇi> to <-āni, -uni>, it seems that there was some influence of the glide <-w-> in bringing about the <-ā-, -u->; dialectally at least, the < w > was pronounced in MB.: the word ভয়ানী < bhayānī > *frightful* (\*bhayāwania = \*bhayāpanikā), beside the other regular forms in <-āni>, would indicate that. Examples: শুনানী < śunānī > hearing (of a case) ; পারানী < pārānī > *ferrying* > fare paid in crossing (\*pārāpanikā) ; ঝাকানী < jhākānī >, beside ঝাকনী, ঝাকুনী < jhākānī, jhākuni > a shaking ; দেখানী < dēkhānī > sight > money paid for a sight (=darśani) ; তোলানী as in শেজ-তোলান < śej- tōlānī > money paid for making or clearing the bed (তুল / tul raise) ; নিকানী < nikānī > beside নিকুনী < nikuni > wiping, mopping the floor (নিক / nik < / nij, nikta) ; নিরানী < nirānī > hoeing (in agriculture) (? ni + dru, drāv) ; উড়ানী, উড়ুনী < urānī, uruni > sheet, light shawl may be a blend of < \*uḍḍāpanikā > that which flies or flaps + ওড়নী < ḍṛhānī > = < ava-vēṣṭanikā > (see p. 398) ; অলুনী < অলনি < j(w)aluni, j(w)alānī > from \*জ্বলনি < \*j(w)alānī > burning, beside জ্বলনী < j(w)alānī >

*causing a burning = firewood* (see p. 408); ŠKK. মাথানী < māthānī > *churn-stick* (\*manthāpanikā); etc., etc.

(14) আন (আনো) < -ānā (-ānō) > (ii).

**409.** The passive participle affix for causative and denominative roots = OIA. < -māna-ka, -y-āna-ka >. (See *infra*, under Verb: 'Causatives.') Examples: করান < kārānā > *done, caused to be done* (< \*kārāwāṇā > for < \*kārāpana-ka, \*kāra-yāna-ka >); দেখান < dēkhānā > *shown*; ঠেঞ্জান < ṭhēñgānā > (*caused to be beaten with a stick* (ঠেঞ্জা ṭhēñgā); etc., etc. It is sometimes difficult to determine whether the form with < -ānā > is the verbal noun (p. 664), or the passive participle: e.g., শোনান হইয়াছে < sōnānā hāiyāchē > *it has been reported*, which may be either (a) *a-causing-to-be-heard has-taken-place*, or (b) *caused-to-be-heard it-has-been*.

(15) আনী (আনি) < -ānī (-āni) >.

**410.** This is a Bengali formation, from an earlier পানী < pānī > *water* (= pāniya) in compounds: < -pānī > becomes < -wānī > and then there is dropping of < w >. Examples: এঁধানি (see p. 349); ঢোআনি < cōāni > *water that leaks out* (ঢো, ঢো √cō, cō = cyav); চোৰানি < cōbāni > *sousing water, a sousing* (চোৰ √cōb *to cause to dash into water, to plunge, duck into water*) ; চোখানি < cōkhāni > *water from the eye, tear* (চোখ cōkh < চউখ cāukh < eakṣuh>); ধোঃনি < dhōāni > *washings* (ধো √dhō=dhāv); নোকানি < nōkāni < nākhāni > *water stirred by the finger-nails (and so not fit for drinking)* (nakha+pāniya-); নাকানি < nākāni > *rheum or water from the nose, water reaching to the nose* (নাক < nākā > nose); ছিটকানি < chit̄kāni > *water scattered about* (ছিটকা < chit̄kā > scatter; there is another ছিটকানি meaning *bolt to a door*, which shows the < -āni > affix under [13a] *supra*).

(16) আম, আম, ম, ম, আমী (আমি), অমি, ওমি, উমি, মি < -ām̄, -ām̄, -m̄, -m̄, -ām̄i (-āmi), -āmi, -ōmi, -umi -mi >.

**411.** A common affix to form abstract nouns, or nouns indicative of a characteristic or profession. It has been confused or connected wrongly

with the *ts.* affix « -iman » > ইম, ইমা < -imā, -imā >, which is found in Bengali, as in other NIA. The source of this affix is an OB. কাম < kāma- > *work* (karma), with extensions : « karma >-kamma > -kāmā > -āmā > আম -ām̪ ; karma-ka >-kamma-a > \*-kāmawa > -āmā > আম -āmā ; karmika, karmikā > -kammia > \*-kāmī > -āmī > আমি -āmi ». The strong initial stress, as well as MB. mutation, has brought about the loss of the « -ā- » in IMB. and NB., and reduced the form to ম, ম, মি < -m̪, -mā, -mi > etc. In MB., the word কামিনা, কামিন্তা = কামিনিয়া < kāminā, -inyā <-iniyā > occurs, meaning *a labourer*, and a form আমিনী, আমিনি < āminī, āmini > also is found (as in the ‘Śūnya-Purāṇa’) : the latter word, explained as meaning a *female devotee of Dharma*, may be connected with কাম < kām̪ > *work, service*. Examples : ঠকাম < ṭhakāmā > *cheating, robbery* (ঠক < ṭhak̪ > *cheat, 'thug'*) ; পাকাম, পাকামি < pākāmā, -mi > *behaving like a ripe (i.e. aged) person, precocity* (পাকা < pākā > *ripe*) ; so জেঠাম < jēṭhāmā > *behaving like a respected elder uncle = impertinence on the part of a boy or youth* (জেঠা < jēṭhā > *father's elder brother*) ; নেকাম, -মি < nēkāmā, -mi > *playing a fool* (নেকা < nēkā > *idiot, fool*) ; ছেলেম, -মি < chēlēmā, -mi > *childishness* (ছেলে=ছালিয়া < chēlē, chāliyā > *child*) ; বড়াং < বড়াম < bārāŋ < bārām̪ > *playing a big man, boasting* (বড় < bārā > *big*) ; বৃড়াম, বৃড়মি < burāmā, burām̪ā, burāmi > *behaving like an old man*; গিন্নাম, গিন্নমি < ginnāmā, ginnām̪ā > *matronly talk and ways* (গিন্নি < ginni > = গৃহিণী < gṛhiṇī > *mistress of the house*) ; টেটাম, -মি < (dhē)tāmā, -mi > *perversity* (টেটা < dhētā >< dhṛṣṭa- >) ; বান্দরাম, -মি < bāḍārāmā, -mi > *trickishness (used of children)* (বান্দর = বানর < bāḍār̪ = bānār̪ > = < vānara >) ; ফচকেমি, ফচ্কাম < phac̪kēmi, phac̪kāmā > (ফচ্কিয়া < phac̪kīyā > *chatterbox, over-smart fellow*) ; ফিচ্লামি, ফিচ্লামি < phic̪lāmā, -lāmā, -lāmi, -limi > *acuteness, trickery* (কিচাল < phic̪al̪ > *an acute one*) ; পেজোমি, পেজোমি < pējōmā, pējōmi > *viciousness* (পাজী < pājī > *mischievous character* > পাজুয়া+আমি < pājuā+ -āmi >) ; গৌরার্তামি, -তমি < gōārātāmī, -tāmī > *churlishness, rashness, brusqueness* (\*গৌরারত < gōārāt̪ > *one behaving like a churl* [see p. 668], with « -āt̪ » affix, see §397, + « -āmi ») ; ছেটলোকমি < chōṭā-lōk̪-mi > *meanness*; etc., etc.

The word ঘরামি < ghārāmī > *house-builder, maker of a hut* (=ঘর+কাম > আম+ঈ < ghār̪ + (k)ām̪ + i >) comes under this.

(17) আৱ, আৱী (আৱি) < -ār̥, -ārī (-āri) >, অৱি, ইৱি, উৱি < -āri, -iri, -uri >,  
ৱা < -rā > (i).

**412.** From < -kāra, -kārin (-kārika) >, forming agent nouns : দোহাৱ,  
দোহাৱ < dō(h)ār̥ > < \*dhūāra > member of a chorus (dhruva-kāra); পূজাৱী  
< pūjārī > worshipper (pūjā-kāri-); কাসাৱী < kāśārī > brass or bell-metal  
worker (kānsya-kārika); কুমাৱ < kumār̥ > potter, by Vowel Harmony কুমোৱ  
< kumōr̥ > (kumbha-kāra); চামাৱ < cāmār̥ > (arma-kāra); শাখাৱী  
< sākhārī > (śaṅkha-kāri-); ভিধাৱী, ভিধিৱি < bhikhārī > bhik(b)iri > beggar  
(bhikṣa-kāri-); জুয়াৱী < juārī > (dyūta-kāri-), beside জুয়াড়ী < jūārī > (dyūta-  
+ √vṛt); M.B. বাণিজাৱ < bāñijārā > (vāñijya-kāra); কুশাৱী < kuśārī > a class  
of Brāhmaṇas (kuśa-kāri-); M.B. চূণাৱী < cūṇārī > lime-worker (cūrṇa-kāri-);  
MB. খেঘাৱী < khēyārī > ferrymen (ksēpa-kāri-): ডুবাৱী < dubārī >, by Vowel  
Harmony ডুবুৱী < duburi > diver (ডুব √dub = MIA. budḍa); ধুনাৱী < dhun-  
ārī >, beside ধুনুৱী < dhunuri > cotton-carder (ধুন √dhun shake); পিয়াৱ  
< piyār̥ >, fem. পিয়াৱী < piyārī > beloved (priya-kāra, -kārikā); ছুতাৱ  
< chutār̥ > carpenter seems to be a blend of < sūtra-dhāra > and < \*sūtra-  
kāra >; সেকৱাৱ < sēkārā > gollsmith, see pp. 194-195; উআৱী < uārī >, বাৱ-  
উয়াৱী < bār-uārī >, see p. 325; গৌঁগাৱ < \*গাঁওঁজাৱ < gōār̥ < gāwāra > boor  
(grāma + kāra); etc.

The word কামাৱ < kāmār̥ > black-smith, in Pali < kammāra >, represents  
the Vedic < karmāra > (which is probably connected with the Dravidian  
[Tamil] < karumā > smith, smelter: cf. P. T. Srinivas Iyengar, 'Life in  
Ancient India, etc.' Madras, 1912, p. 15); and the Skt. কৰ্ম্মকাৱ < karma-  
kāra > is an artificial formation, which is now used by members of the  
black-smith caste as a surname.

(18) আৱ, আৱী (আৱি) < -ār̥, -ārī (-āri) > (ii).

**413.** From < -ākāra- >, slightly modifying or altering the sense of  
the word. It occurs only in a very few words. প্ৰায়াৱ < pāyār̥ > a metre  
(= padākāra, see pp. 285, 288); ঝিয়াৱী < jhiyārī > daughter (ঝী < jhī > <  
-dhitā, duhitā>: the affix has only a pleonastic force here: probably through  
analogy of বহুৱাৱী bāhuārī > = বৈহাৱী < bauhārī > [for which see p. 345],  
which is wrongly connected with বহু < bāhu > = < vadhu >, after the

metathesis of the « h » took place); মাঝাৰ « mājhārə » *middle*, মাঝাৰী « mājhārī » *middling-sized* (« madhyākāra », pleonastic; « \*madhyākārika »).

(19) আৱ, আৱী (আৱি) « -ārə, -ārī (-āri) » (iii).

**414.** From « -āgāra, -āgārin (-āgārika, -ikā) » : ভাড়াৱ « bhāṛārə » *store* (*bbāṇḍāgāra*) ; MB. কাড়াৱ, beside কাণ্ডাৱ « kāṛārə, kāṇḍārə » *keel of boat* (*kāṇḍāgāra*) ; সাভাৱ « sābhārə » *place-name* (? *sabhvāgāra*) ; মেহাৱ « mēhārə » *place-name* (? *mahāgāra*) ; ভাড়াৱী « bhāṛārī » *store-keeper* (*bbāṇḍāgārika*) ; কাণ্ডাৱী « kāṇḍārī » *helmsman* (*kāṇḍāgārika*) ; মেহাৱী « mēhārī » *palace* (? *mahāgārikā*) ; etc.

(20) আৱ « -āru ».

**415.** Found in a few MB. words, seems to be from « -āra » (i), with addition of « -u » (i.e. « -ū <-uka») : দিশাৱ « diśāru » *pilot* beside দিশাৱী « diśārī » (*diśa* = *dik-* + *kāra-*) ; ডুবাৱ « dубāru » *diver* beside ডুবাৱী « дубарі » ; *sts.* বন্দাৱ « bāndāru » *bard, panegyrist* (<*vand*) ; *sts.* বাগাৱ « bāgāru » *talkative person* (*vāg=vāc*).

(21) আল, আল « -ālə, -ālā » (i), modified to অল, ওল « -ālā, -ōlā ».

**416.** The OIA. source of this is « -ā-l-a », also probably « -ā-l-u », both of which are found in Sanskrit, the sense being ‘possessing,’ ‘pertaining to.’ It has the « -l-a » affix (for which see *infra*) as its base. Examples : বাঙাল, বাঙাল « bāñ(g)ālə » *man of East Bengal* (*vāñga* + *-ālə*) ; পাকাল « pākālə » *belonging to mul* > *a fish* (*pājkāla*) ; ধাৰাল « dhārāl(ā) » *sharp-edged* (*dhāra edge*) ; দুধাল « dudhāl(ā) » *yielding milk* (*dugdha* + *-āla*) ; মাথাল « māthālə » *with a head, prominent, chief* (*mastaka* + *-āla*) ; আড়াল « āṛālə » *obstruction* (আড় « āṛə » *slanting*) ; তেজাল « tējālə » *spirited* (*tejas*) ; পেঁচাল « pēčālə » *with twists* (পেঁচ « pēčə » < Pers. « pēc ») ; ভাটীয়াল « bhāṭīyālə » *belonging to the down-country* > *a folk-melody* (< ভাটী « bhāṭī » *flow of water=South Bengal*) ; বাচাল « bācālə » (*vācāla*) ; দাতাল « dātāl(ā) » *with (big) teeth* (*danta* + *-āla-*) ; ছিনাল « chinālə » *characterless woman* (MIA. *chinnāla-*) ; MB. পাক্যাল « pākālā » *heroism* (< *pākə* > *soldier*, see p. 333).

This affix has the usual extensions : আল > লা « -āl-ā > -lā » : e.g., বাঙালা, বাঙলা, বাংলা « bāñ(gā)lā » *Bengali (speech, land)* (*vāñgāla* + *-ā*) ; আলী

**< -āl-i >**, feminine and masculine (-i < -ikā, -ikā), as well as abstract : e.g., বাঙালী, বাঙালী < bāñ(g)ālī > (Old Bengali = feminine = *a woman of East Bengal* ; N.B. = masculine = *a man of Bengal, belonging to Bengal*) ; নগরালী < nāgār-āl-i > *city manners* ; নাগরালী < nāgār-āl-i > *gallantry, refined ways* (*nāgara gallant*) ; ঠাকুরালী < thākurālī > *ways of a god, divinity* ; চতুরালী < cātūrālī > *smartness* ; মেয়েলী < mēyēlī < \*māiālī > *belonging to women* ; ছিনালী < chinālī > *coquetry* ; রূপালী, রূপোলী, রূপ্সনি < rupālī > rupolī > rupuli > *silvery* ; সোনালী < sōnālī > *golden* ; নিদালী, নিন্দালী < ni(n)dālī > *sleepiness* ; স্তুতালী < sutālī > *thin as a thread* ; etc.

(22) আল < ālɸ > (ii).

**417.** This affix, like the preceding one, denotes connexion. It is also used to form words indicative of trade or profession. It comes from OIA. < pāla > *keeper, guardian* by the dropping of < -p- > -w- > : < -pāla > -wālā > -ālɸ >. Examples : রাখাল < rākhālɸ >, MB. রাখোআল < rākhōālā > *herdsman*, (rakṣā-pāla) ; কেশেল < কাশীয়াল < Kēśelɸ < Kāśiyālɸ > *low class Brāhmaṇ from Benares* (Kāśi-pāla) ; কোটাল < kōṭālɸ >, Hind. < kōṭwāl > *head of the police, holder of a fort* (kōṭa-pāla) ; ঘাটীয়াল < ghāṭiyālɸ > *holder of a pass or passage* (< ghāṭi) ; কৃষ্টাল, বাটোআল < ghāṭālɸ, ghāṭoālā > *man in charge of a 'ghāṭ'* (ghāṭta-pāla) ; কুঠিয়াল < kuṭhiyālɸ > *belonging to an office* > a *clerk* (kuṭhi kōṭhi < kōṣṭhikā) ; ঘড়ীয়াল < ghāṛiyālɸ > *man in charge of a clock* > ঘ'ড়েল < ghōṛēlɸ > *acute one* (ghāṭikā) ; etc.

There is an extension to আলা < -āl-ā > : গোয়ালা, গোয়লা < gōālā > gāylā > (gōpāla-) ; বাড়ীআলা < bāṛīālā > *landlord, owner of a house* ; কাপড়আলা < kāpṛ-āl-ā > *cloth seller* ; চূড়ীআলা < cūṛīālā > *bangle seller* ; পাহারালা < pāhār-ālā > *watchman* (prahara). Also to আলী < -āl-i >, masculine and feminine (= -ikā, -ikā) : গয়ালী < gāyālī > *Brāhmaṇ from Gayā* (Gayā-pāl-ikā) ; পেটেলী < pēṭēlī > < পাটিয়ালী < pāṭiyālī > *maid-servant* (pāṭa, pāṭi *order, arrangement, domestic work*) ; বাড়ীআলী < bāṛīālī > *land-lady* ; etc. Abstracts are formed from < -ālɸ > by adding the < -i > of abstraction, e.g., রাখালী < rākhālī > *the work of a herdsman* ; কেঁড়েলী < kēṛēlī > *impertinence, roughness* < \*কাঢ়িয়াল < kāṛiyālɸ > *rough* < soldier, archer (? kāṛḍa *arrow*) ; etc.

The « -älā, -äl-ā » of Bengali has within recent times been influenced by the cognate form in Hindostānī, which is « -wälā » : the latter is substituted in many Bengali words in « -älā », and ordinarily « -wälā » is reduced to ওলা « -ölā » : e.g., কাপড়ওলা  $\leftarrow$  kāpār-ölä (-wälā), -ölā » ; so গাড়ীওলা « gäṛi-ölā » *cabby*, পাহারওলা « pāhār-ölā » *constable*, etc. The feminine of « -wälā » is « -wälī », which, by Vowel Harmony, is reduced to উলী « -ulī » in Bengali : e.g., বাড়িউলী « bāṛi-ulī » = native Bengali বাড়ীআলী « bāṛi-älī ».

Through Bihārī or Hindi influence, we have also ওরাৱা « -öärā = -wälā » in মাতোৱাৱা « mātōärā (mātwārā) » *wild, mad, elated, pleased (e.g., with perfume)* = « mātwārā » : the Bengali forms are মাতাল, মাতল, মাতলা « mātālā, mātālā, mātālā » *drunk* = Hind. « mātwāl ». The name বনওয়াৰী « bānwārī » (see p. 521), from the Hindostānī, can be equally from « vana-mālī » *garlanded with wild flowers* or « \*vana-pālika » *dweller in woods*.

(23) ই < ঈ < -i < -I > (i),

**418.** A secondary affix, forming nouns and adjectives. Three separate affixes of OIA. seem to converge into this single NIA. form : (i) « -i < -in » : « mālin > NIA. mālī » *gardener* : but the force of the nominative form seems to have been only of secondary importance in the evolution of the NIA. affix ; (ii) « -jya » : « dēsiya > NIA. dēsi » *native* ; and (iii) « -ika » : « grāmika » > গাঁই gāi » *village name, clan name* : the feminine form of this « -ikā » is also ঈ, ই « -i, -i », which is the most popular feminine affix of NIA., for which see below. Later in NIA. this affix was strengthened by the « -i » of Persian.

Examples : « -i > -i » with the sense of ‘ possessing, having ’ : ভাৰী « bhār-i » *heavy* ; *sts.* রাগী « rāg-i » *full of passion* > *choleric* ; দামী « dām-i » *costly* (*dramma* < Gk. drakhmē) ; দাগী « dāg-i » *stained* (Pers. dāg) ; গুণী « gun-i » *man of parts, artist* (cf. Skt. gunin) ; ঢাকী « ḍhāk-i » *drummer* (ḍhakkā) ; বেগুনি « bēgun-i » *purple* (= bāigān-i < vātingana- ) ; OB. নোবাহী « nau-bāh-i » *boat-man* ; গাঠী জাল « gāṭh-i jāl » *net with knots* (granthi-) ; গোলপী « gōlāp-i » *rose-coloured* (Pers. gul-āb = gul) ; হিসাবী « hisāb-i » *careful, attentive to details* (Perso-Arabic « hisāb ») ; *sts.* মৰমী « mārām-i »

*with a heart* (*sts.* mārāmṛ < marman); */s.* আলাপী < ālāp-i > *courteous talker, acquaintance* (cf. Skt. ālāpin); দরদী < dārād-i > *sympathetic* (Pers. dard);

With the sense of ‘pertaining to, coming from’: দেশী > দিশি < dēśi > dīśi > *belonging to the country, country-born or made, native* (cf. Skt. dēsiya); রাঠী < Rāṭhī > *belonging to Rāṭha*; MB. কানঢ়ী, কানঢ়ী < kāṅḍī, -nāḍī > (Karnāṭīya); মাৰহাটী < Mārāṭhāṭī >, মাৰাটী, -টী < Mārāṭ(h)i > (Mahārāṣṭriya); গুজৱাটী < Gujārāṭī > as if from < \*Gūrja-rāṣṭriya > (গুজৱাট < Gujārāṭ >), for গুজৱাত < Gujārāṭ > < Gūrja-trā >, through influence of < rāṣṭra >; কটকী < Kāṭakī > *of Cuttack* (Kāṭakīya); বনারসী, বেনারসী < Bānārāsī, Bēnārāsī > (Vārāṇasiya); ব্ৰিন্দাবনী < Brindābānī > *of Brindāban*; ঢাকাই < Dhākāi > *of Ducca*; ক'লকাতাই < Kālākātāi > *of Calcutta*; etc.

With the sense of ‘connected with,’ generally forming names of professions: হাড়ী < hāṛī > *a low caste* (haḍḍika); কেৱানী < \*কৰাণী < kērānī < \*kārānī > *clerk* (karanīka + kīraka); MB. গারুড়ী < gārūrī > *snake-charmer* (gārudīka); বেহাই < bēhāi > *son's or daughter's father-in-law* (vāivāhīka), an inherited word, affix and all; শুণ্ডী < śūṇī > *wine-dealer* (śuṇḍīka, śāunḍīka); রঁধুনি, রঁধুনি < rāḍhbānī, -dhuni > *cook* (see *ante*, p. 658); *sts.* নখকুণি < nākha-kuṇī > *cut or sore in the nails* (nakha-kōṇa+i); etc.

It occurs also as অই < -ī > > উই < -ui > : বাড়ই, বাড়ুই < bāṛāi > bāṛui > *carpenter* (cf. Skt. vardhakin); বাৱই > বাৱুই < bārāi > bārui >, OB. বাৱঘী < bārāyī >, (see p. 188) *grower of the betel vine* (cf. Skt. < vāru-jivin >: \*বাৱ < bārā- >, \*বাৰু < bāru > *betel*, an Austric word : cf. J. Przyluski in the BSLP., XXIV, p. 257). It is pleonastic in ভাৰই < bhārui < \*bhārāī > *a bird* (bharata: \*bhāratīka); চড়ই < cārui < cārāi > *sparrow* (cāṭaka, \*cāṭakīka), beside চড়া, চড়াই < cārā, cārāi > (\*cāṭaka, \*cāṭakīka); etc.

(24) ই < ঈ < -i- < -i- > (ii): Feminine, Diminutive, Abstract.

**419.** Presents an < -ikā > of OIA., and is the most common feminine affix of NIA. Examples: রাই < Rai >, MB. রাধী < Rāṭhī > *a name* (Rādhikā); ঘৃড়ি < \*ঘোড়ী < ghurī < \*ghōṛī > *mare* (\*ghōṛīka); মাৰী < māmī > *maternal uncle's wife* (māmā+-i); কাকী < kākī > *father's younger brother's wife* (kākā+-i); খুড়ী < khudī > *a tiny girl* > *name for girls* (kṣudrikā); বুড়ী < burī > *old woman* (\*vṛddhikā=vṛddhā); পাগলী < pāgṛī >

*mul woman* (pāgāl<sup>da</sup> + -i) ; बामनी « bāmānī » (\*brāhmaṇīkā = brāhmaṇī) ; *sts.* बष्टमा, बष्टमी « bāṣṭāmī, -umī » (\*vāiṣṇavikā = vāiṣnavī).

A number of *sts.* forms show this « -i » of Bengali, e.g., सुबचनी « subacānī » *a form of Durgā*; अप्सरौ « āpsarī » (apsaras); दिगम्बरी « digambarī » *a name of Kālī*; सुनयनी « sunayānī » *with beautiful eyes*, etc., with are solecisms from point of view of Skt.

The Skt. feminine affixes « -inī, -ānī » had an influence in restricting the Bengali द्वि, इ « -i, -ī » < « -ikā » : see *infru*, under « -nī ».

With names of inanimate objects, the original feminine force is lost in Bengali. In Western Hindi, Panjābī, Rājasthānī etc., the grammatical gender, however, is preserved in the « -i < -ikā » forms. The feminine « -ikā » also expressed a diminutive or petty aspect of an action or an object. The diminutive has become obscure in many words in Bengali, so that « -i < -ikā » has been reduced to a mere pleonastic affix. Examples: बुली « bulī » *talk* (bolla + -i) ; रुटी « ruṭī » *bread* (cf. rōṭikā); चूसी « cuṣī » *baby-soother* (cuṣa + -i); मटी « māṭī » (mṛttikā); गलूइ < \*गलही < gālūi < \*gālāhī > *prow of a boat* (gala-vahikā); छुरी, छुरि « churī, -ri » *knife*, beside छोरा « chōrā » *dagger* (churikā); राहि « rāi » *mustard* (rājikā); पाइ « pāi » *a fourth, piece* (pādikā); पुथी « puthī », पृथि « pūthi » *Indian MS., book* (pustikā), beside M.B. পোখা « pōthā » (pustaka-); बाती « bātī » *candle, light* (vartikā); लाठी « lāṭhi » (\*yaṣṭikā = yaṣti); काठी « kāṭhī » *a thin stick* (kāṣṭhikā); छाती « chātī » *umbrella* (\*chatrīkā), beside छात « chāt<sup>da</sup> » *roof*, छाता « chātā » *umbrella* (chattrā-); धुती « dhutī » (\*dhōtrikā = dhōtra); याती « jātī » *small double knife to cut betel-nuts* (yantrikā), beside याता « jātā » *mill, quern* (yantra-); बड़मानसी, बड़मानसी « bāṛā-māu(u)s-i » *liring like a rich man, high style* (-mānu-sa + -i); राखली « rākhāl-i » *work of a herdsman* (rakṣāpala + -ikā); डाका(हि)ती « dākā(i)t-i » *robbery* (see *supra*, p. 655); केढेली < काडियाली « kēḍeli < kāriyālī » *impertinacity, rowdiness* (< kāriyāl<sup>da</sup> » *archer*? [*< kānda-*] > *soldier, rough* + -i); पण्डिती « pāṇḍit-i » *belonging to a Pundit* > *a Pundit's character or ways, scholasticism*; etc. Cf. Hindī « lāl-i » *redness*, « harijāl-i » *green colour, greeness*, « rakhwāl-i » *work of a herdsman*, etc. In Late NIA., the Persian « -i » affix of abstraction or connexion greatly reinforced this suffix.

In some stereotyped words, < -ī > represents the OIA. < -ī > : e.g., रानी, rāṇī < rānī > (< rājñī > : or < \*rāṇṇīa < \*rājñikā > ?).

(25) ই < -i > : Verbal Noun.

**420.** This affix, occurring in OIA., is practically lost to NB. It is found only in some epenthetic forms in dialectal Bengali, and it has practically become a dead suffix; only some Skt. words in < -i > help to perpetuate it. Examples : গাঁট, গাঁইট < gā(i)t > (granthi); মার, মাইর < mā(i)r > a beating < māri > (\*mār-i); সারি > সা(ই)র < sā(i)r > sā(i)r > row (sār-i); MB. হাস < hāsā > (< hās-i >, which occurs as a ts. in NB.); গাল, গাইল < gā(i)l > abuse (\*garh-i ? cf. Skt. garh-ā); শা(ই)ল < śā(i)l > a kind of paddy (śali), also occurs in the ts. form in < -i >; etc. Cf. also the OIA. suffix < -ti > in ষা(ই)ট < śā(i)t >, MB. ষাঠি < śāṭhi > (ṣas-ti), সত্তর < sattār > (sapta-ti), পাঁত, পাঁইত beside the full form পাঁতি < pā(i)t, pāti > row (pank-ti), etc.

(26) ইআ, ইয়া, এ < -iā (-iyā) > -ē >.

**421.** This is a compound affix, being from the OIA. < -ikā > > MIA. < -ia > + the affix < -ā >, as in § 400. It is used in forming adjectives with the sense of 'pertaining to' or 'possessing'; and frequently it is used with a slightly disparaging sense; as well as pleonastically. In NB., it is contracted to এ < -ē >, with accompanying modification through the < -i >, of connected vowels. Examples : কালিয়া, কেলে < kāliā > kēlē > the black one (contemptuous) (kāla black); হলিদিয়া, হলুদিয়া > হ'লুদে হ'ল্দে < hālādiā, hāludiā > hōlude, hōldē > yellow (হলুদ < hāludha > turmeric); বাইগণিয়া > বেগুনে < bāigāniyā > bēgūnē > purple, of egg-fruit (vātingara) colour; জালিয়া > জেলে < jāliā > jēlē > fisherman (jāla net); হালিয়া, হেলে < hāliyā > hēlē > farmer (hāla = hala plough); নগরিয়া > নগুরে < nāgāriyā > nāgurē > man of the city; বানিয়া > বেনে < bāniā > bēnē > merchant (\*vāñika- = vanik); মাটিয়া > মেটে < mātiā > mētē > earthen (māti < mṛttikā + -ika + -āka); (in the word মেটে as in মেটে ফিরিঙ্গী < mētē phiringī > a Eurasian, a half-caste, we have, however, the French word < métis >, approximated to the Bengali word by folk-etymology); উত্তরিয়া > উত্তরে

« uttāriyā > utturē > *northern*; দখিনিয়া > দখিনে, দ'খনে « dākhiniyā > dōkhinē, dōkhnē > *southern*; পূর্বিয়া < পূবে « pūbiyā > pūbē > *eastern*; পশ্চিমিয়া > পশ্চিমে « pāscimiyā > pōscimē > *western*; MB. আভাগিয়া « abhāgiyā » > NB. আবাগে « abāgē » *luckless*; পাড়াগাঁইয়া > পাড়াগাঁওয়ে « pārāgāiyā < -gāyē » rural (pātaka + grāma + -ika + -āka); কাদনিয়া > কাটনে « kādāniyā > kādunē » ready to weep; MB. \*নেয়ার-আকড়িয়া « \*nēyār-ākāriyā » > NB. নেই-আকড়ে « nēi-ākurē » one who clings to argument (nyāya) > obstinate; নাগপুরিয়া > নাগপুরে « Nāgāpuriyā > Nāgapurē » of Nāgpur; ওড়িয়া > উড়িয়া, উড়ে « Ḷriyā > Uriyā > Uriē » Oriyā, of the Odra country; MB. (SKK.) নাতিয়া « nātiyā » = নাতী « nātī » grandson (naptr-); কহনিয়া > কহনে, কউনে « kāhāniyā > kō(h)unē » talker; জাগানিয়া > জাগানে « jāgāniyā > jāgānē » one who wakes; দেষনিয়া, দিষনিয়া > দিউনে « dēṣniyā, diyāniyā > diunē » a giver; etc.

Although one of the most common affixes in Bengali, it is frequently disguised in the Standard Colloquial by contraction and by mutation of vowels.

(27) ইঁএ, ইঁয়ে « -ie, -iyē ».

**422.** This NB. affix denotes 'one who is accustomed to do a thing, a habitué.' Typical words are খাইয়ে « khāiē » a (good) eater, গাইয়ে « gāiē » a good singer, a professional singer, বাজিয়ে « bājīē » a clever musician, নাচিয়ে « nāciē » a good dancer, খেলিয়ে « khēliē » a clever player, করিয়ে « kāriē » an adept, বলিয়ে « bāliē » a conversationalist, কহিয়ে > কইয়ে « kā(h)iē » a good talker. Forms like the above are used as adjectives or predicatives, and in some cases they have become nouns. They recall Western Hindi forms like « khawaiyā, gawaiyā, kahaiyā » etc. Earlier Bengali forms, not attested, would be « \*khāāiyā, \*gā(h)āiyā, \*bājāiyā, \*nācāiyā, \*khēlāiyā, \*kārāiyā, \*bōlāiyā, \*kāhāiyā » etc. The Hindi affix « -aiyā, -awaiyā », and the source of the NB. « -iē » are apparently identical; and it is not unlikely that the affix in NB., which is found mainly in the colloquial, is a recent borrowing from Hindi, with the usual West Bengali contraction. There is no corresponding affix in Oriyā and in Assamese. Maithili has the pleonastic « -aiyā », which, however, is different in meaning.

Hoernle takes this suffix to be « -awaiyā » and thinks that « -aiyā » is a contracted form of it; and « -awaiyā » he derives from an « -āw » from MIA. « -avva » (< OIA. « -tavya ») + a pleonastic « -aiyā » (< -aka + -ika + -ka) (Gaudian Grammar, §314). But it would be more reasonable to regard the suffix to be « -aiyā », and the « -w- » only as a euphonic insertion (cf. J. T. Platts, 'Grammar of the Hindūstānī or Urdū Language,' London, 1873, p. 208). The OIA. basis of it apparently is an agentive in « -aka » (khādaka > khāaa, khāwaa, gāyaka > gāaa, gāwaa [\*gāthayaka > \*gāhaaa, \*gāheaa], \*vādyā-ka [=vādaka] > \*vajjaa > \*bājaa, etc.), to which the « -ika > -ia » and then the « -āka > -āa, -ā » affixes were added, pleonastically, in the Early NIA. stage: « \*kathaka + -ika + -āka » > « \*kahāyā » > « \*kāhāiyā » (Hindūstānī « kahajyā ») > কহিয়ে « kāhiē » > কইয়ে « kāiyē » [koie].

(28) ইত « -it- ».

**423.** The affix ইত « -it- » is derived from the OIA. present participle base « -ant- » (see *supra*, pp. 653-4). In Bengali, it forms the present participle in an adverbial or conditional sense, with the locative affix « -e »: e.g., মেঘ চাঁতে জল « mēgha cāitē (< \*cāhantahi) jāl » (*on one*) *asking for the cloud, (there is) rain*; or করিতে কারতে « kāritē kāritē » (< \*karantahi) *while doing*; and it gives the base for the past habitual or past conditional (and in some East Bengal dialects, for the future) tense.

See also *supra* p. 663, under আইত, আত « -aitʃ, -ātʃ ».

(29) ইব « -ibā ».

**424.** Base for the future, and for a verbal noun, with an extended form ইবা « -ib-ā ». From OIA. « -itavya- » > MIA. « -iabba- » > « \*-ebba, -ibba ». See *infra*, under 'Verb.'

(30) ইল « -ila » (i).

**425.** In MIA. « -illa », from OIA. pleonastic and adjectival affix « -i-la » (cf. Pāṇini, V, iii, 79), forming nouns and adjectives in Bengali, from nouns. It is not a living affix in NB., but is fairly common in MB. Cf. Hindi « chail » *handsome, accomplished* (chailla, chavila).

Examples: পাতিল « pātila » *an earthen-pot for cooking* (patta, pātra); কুচিল « kūcīla » *crooked* (কুচ /kūc< √kuñe); etc. †আঞ্জিল « ḥāñjila » *strong one, chief* (an̄ja + -illa); MB. s/s. আৰতিল « ārāti-lā » *filled with a great desire* (ārati + -ila); পাকিল « pākilā » *ripe* (pakva + -ila); etc. Cf. t/s. কুটিল « kutīla » *crooked*. The t/s. word « śarīra » is vulgarly pronounced as শৰীল, শৱিল [ʃoril], as if it had the « -ilə » affix.

(31) ইল « -ilā » (ii).

**426.** Past base, also (specially in OB. and MB.) passive participle adjective. From OIA. « -(i)ta » + pleonastic affix « -i-la- » whence Late MIA. « \*-iailla- > \*-illa- », in Eastern Magadhan. (OIA. « -(i)ta + -alla » probably gave « \*-alla- > -alə », in Central and Western Magadhan). See below, under 'Verb.' This « -ilā » occurs also in a few nouns and adjectives in Bengali, although the adjectival and nominal use of « -ilā » forms from verb roots is almost obsolete in the language. Examples: MB. ভুখিল « bhukhilā » *hungry* (bubhukṣita + -ila); সুতিল « sutilā » *sleeping* (supta + -ila); ভাঙ্গিল « bhāṅgilā » *broken* (\*bhāṅgita + -ila); OB. (Caryā 33) দুহিল হৃষু « duhila dudhu » *milk that has been milked off* (\*dubita + ila); NB. গেল « gēlā » *last* < gone (gata + ila); etc.

The affix ইলে « -ilē » forming the conjunctive, is the old locative form of it: চলিলে « cālilē » *on having walked* (\*calillahi).

(32) উ < উ < -u < -ū > (i).

**427.** From an OIA. « -u » (adjectival and nominal) + « -ka ». It implies a pettiness and lovable ness of the object indicated, and is found in familiar and affectionate forms, specially of names: e.g., s/s. ছুঁ « duṣṭu » *the little naughty one* (duṣṭa-); s/s. ধূতু « dhuttu » *the little sly one* (dhūrta); বালু « Bālu » *affectionate for* « Balarāma »; খুকু « khuku » *tiny little baby, darling of a child* (< খোকা « khōkā » *baby*); পাঁচু « Pācū » (Pāñcānana *a name*); so নরু « Nāru » (Narēndra), হক « Hāru » (Harēndra, Hara-nātha, etc.), রাধু « Rādhū » (Rādhā-kānta, etc.), কানু « Kānu » (Kṛṣṇa-); বড়ু « Bāru » *title for a Brāhmaṇ* (vatuka = ?vṛta + -u + -ka); etc., etc. It occurs also (peonastically in some cases) in the formation of nouns

and adjectives, like গাড়ু  $\leftarrow$  gāru  $\rightarrow$  water-jar with spout (\*gaḍḍuka); নাড়ু, নারু  $\leftarrow$  lāru, nāru  $\rightarrow$  sweetmeat (lākūuka); নৌরু  $\leftarrow$  nīcu  $\rightarrow$  down, in a low position (nīca); উচ্চ  $\leftarrow$  ūcu  $\rightarrow$  high (ucca-), etc. The  $\leftarrow$ -u $\rightarrow$  affix of Śaurasēnī Apabhrañśa, from OIA.  $\leftarrow$ -ah̄ $\rightarrow$ , seems to have influenced this affix in the formative period of Bengali (see *supra*, p. 311).

(33) \*উ, উ > ও > অ  $\leftarrow$ \*-ū > -u > -ō > -ā > (ii).

**428.** This is a primary affix, and the forms with it are generally repeated in NB. the meaning is 'about to do something,' 'on the point of doing.' E.g., ডুব-ডুবু  $\leftarrow$  dubu-dubu  $\rightarrow$  about to sink; উড়ু-উড়ু  $\leftarrow$  uru-uru  $\rightarrow$  about to fly away, filled with a longing; নিবু-নিবু > নিবো-নিবো  $\leftarrow$  nibu-nibu > nibō-nibō  $\rightarrow$  on the point being extinguished (also নিভ-নিভ  $\leftarrow$  nibhā-nibhā $\rightarrow$ ); কাদো-কাদো  $\leftarrow$  kādō-kādō, kādā-kādā  $\rightarrow$  about to burst into tears; পাকো-পাকো  $\leftarrow$  pākō-pākō  $\rightarrow$  nearly ripe; দাউ-দাউ ক'রে জলা  $\leftarrow$  dāu-dāu kōrē jwālā  $\rightarrow$  to burn fiercely, etc. The form হবু  $\leftarrow$  hābu  $\rightarrow$  [fiobu] about-to-be, future (e.g., হবু-জামাই  $\leftarrow$  hābu jāmāi  $\rightarrow$  the son-in-law to be, হবু-রাজা  $\leftarrow$  hābu-rājā  $\rightarrow$  the future king) seems to be for \*হো-উ  $\leftarrow$  \*hō-u $\rightarrow$ , with euphonic insertion of  $\leftarrow$ b $\rightarrow$ : similarly খাউ-খাউ > খাবো-খাবো করা  $\leftarrow$  khāu-khāu > khābō-khābō kārā  $\rightarrow$  to be eager to eat, etc. (Cf. আদোবে  $\leftarrow$  ādōbē $\rightarrow$ , p. 511).

In Hindostānī, there is an affix  $\leftarrow$ -ū $\rightarrow$  which appears to be the same as the Bengali one:  $\leftarrow$  bēc-ū  $\rightarrow$  seller,  $\leftarrow$  kīn-ū  $\rightarrow$  buyer,  $\leftarrow$  dāk-ū  $\rightarrow$  robber,  $\leftarrow$  jāg-ū  $\rightarrow$  watcher,  $\leftarrow$  urā-ū  $\rightarrow$  causer to fly  $>$  spendthrift,  $\leftarrow$  bigār-ū  $\rightarrow$  spoiler,  $\leftarrow$  jhagṛ-ū  $\rightarrow$  quarrelsome person, etc. Hoernle connects it with the Skt.  $\leftarrow$ -tr $\rightarrow$  + pleonastic  $\leftarrow$ -ka $\rightarrow$  (*op. cit.*, § 333). But a likelier derivation would be from an OIA.  $\leftarrow$ -u-ka $\rightarrow$  (cf. J. T. Platts, Hindustani Grammar, p. 209). This affix is found in Skt., in words like  $\leftarrow$  ghāt-uka, kām-uka, bhāv-uka  $\rightarrow$  etc., 'having the meaning and construction of a present participle' (see Whitney, Skt. Grammar, § 1180). There was also an  $\leftarrow$ -ūka $\rightarrow$  rather rare, in OIA.: cf. Skt.  $\leftarrow$  jāgar-ūka $\rightarrow$ .

Oriya has the present participle affix  $\leftarrow$ -u $\rightarrow$  ( $\leftarrow$ kār-u, khā-u, jā-u  $\rightarrow$  etc.), which seems to be the same affix as the Bengali and Hindostānī ones (Hoernle derives the Oriya  $\leftarrow$ -u $\rightarrow$ , however, from the present participle  $\leftarrow$ -anta $\rightarrow$ , *op. cit.*, § 301: this is precluded phonologically).

(34) উআ > উও, ও < -uā > -uō, -ō >.

**429.** This is an extension of the preceding with the < -ā >, used, like < -iyā > (p. 674), to indicate relation or connexion. It is also added to proper names, to indicate contempt. When affixed to an ordinary noun, it turns the latter to an adjective. There is the usual mutation of the vowels, and this fact often disguises this affix in the NB. Standard Colloquial. Examples: জল়ুয়া > জ'লো < jäl-uā > jolō > watery ; ঘর়ুয়া > ঘোৱেৱ < ghár-uā > ghôrō > domestic ; হাতুয়া > হেটো < hât-uā > héto > of the market ; জুতুয়া > জ'বেৱ < j(w)âr-uā > jôrō > suffering from fever ; MB. শকুয়া < sâr-uā > like a reed > slender (NB. সক, শক < sâru, sâru > lean and thin < \*sârə + -ū >) ; ধানুয়া > ধেনো < dhân-uā > dhêno > (i) (land) growing rice, (ii) rice-brer ; কাঠুয়া > কেঠো < kâth-uā > këthô > made of wood ; দানুয়া > দেনো < dân-uā > dêno > given as a gift ; \*দীরাখুয়া > দেৱখেৱ < \*diâ-râkh-uā > dêrkhô > a wooden or earthen lamp-stand ; \*কাঠকুআ > কেটকো < \*kâthâk-uā > këtkô > a wooden vessel ; টাকুয়া > টেকো < tâk-uā > têkô > bald-pate ; so মেছো < mëchô > fishmonger ; বাটুয়া > বেটো < bât-uā > bëtô > belonging to the road (bâta < vartman) > a hack ; পানুয়া > পেনো < Pânuā > Pénô > contemptuous or familiar form of a name (= Prâna-nâtha, Pânnâ-lâl, etc.), কালুয়া > কেলো < Kâluâ > Kelô > (Kâla-), রেমো, শেমো < Rêmô, Sêmô > (Râma, Syâma) ; যতুয়া > য'দো < Jâduâ > Jôdô > (Yadu), etc., etc. ; \*মাউশুয়া > মেসো < \*mâus-uā > mësô > mother's sister's husband (< mâusî = mâtṛśvasî- > : cf. \*পিউসিয়া > পিসে < \*piusiâ > pisê > father's sister's husband) ; etc., etc.

(35) ক, অক < -kâ (-kâ), -âkâ >, ইক < -ikâ >, উক < -ukâ > (i).

**430.** This affix is quite a common one in Bengali, and is employed primarily to form nouns (abstract, concrete, or onomatopoetic), generally from verb roots: e.g., মোড়ক < môr-âkâ > packet (মুড় / mur, full) ; টনক < tân-âkâ > jerk, blow, striking > remembrancer (টন tân sense of tightness, টান / tân pull) ; চড়ক < cár-âkâ > a raising aloft > swinging by hooks from a high post, the hook-swinging festival (চড় / cár rile) ; ছলক < châl-âkâ > splash, spill of water (ছল châl onomatopoetic for splashing of water) ; so চলক < cal-âkâ > spilling of water ; মড়ক < mâr-âkâ > pestilence (< maðâ = mfta) ; সড়ক < sâr-âkâ > road, highway (\*sâda = spta) ; ফটক < phât-âkâ, phät-âkâ >

*gate* (cf. ফটি  $\sqrt{\text{phāt}}$  *split*) ; আটক  $\leftarrow \text{āt-āk}$   $\rightarrow$  *confinement* (cf. আড়  $\text{āṛ}$  *obstruction*) ; ঘলক  $\leftarrow \text{jhāl-āk}$  *flame* (ঘল  $\sqrt{\text{jhāl}}$ , p. 479) ; চটক  $\leftarrow \text{cāt-āk}$   $\rightarrow$  *brilliance* ; জমক  $\leftarrow \text{jām-āk}$   $\rightarrow$  *pomp* ; বৈঠক  $\leftarrow \text{bāīṭh-āk}$   $\rightarrow$  *a stand* ( $\text{baīṭha}$  < upavi- $\dot{\tau}a$ ) ; ফুক, ঝুক  $\leftarrow \text{phuk}$ ,  $\text{phūk}$   $\rightarrow$  *puffing, blowing* (cf. phutkāra) ; ঝিলিক  $\leftarrow \text{jhil-ik}$   $\rightarrow$  *sparkle* ; ছিলিক  $\leftarrow \text{chil-ik}$   $\rightarrow$  *spilling or scattering of water* ; চুক  $\leftarrow \text{cuk}$   $\rightarrow$  *mistake* ; শৃঙ্খুক  $\leftarrow \text{sur-uk}$   $\rightarrow$  *sound of quick motion* ; etc.

The MIA. forms of the affix would be  $\leftarrow \text{-akka} \rightarrow$  :  $\leftarrow *mōḍakka, *ṭanakka, *maḍakka, *jhalaṭkka, *uvaīṭhakka \rightarrow$ , etc. In Śaurasēni Apabhrañśa, as a matter of fact, we find such forms as  $\leftarrow sāsānala-jhalakkaü \rightarrow$  (= śvāsanala-jhalat-kṛta),  $\leftarrow khudukkaü \rightarrow$  (= salyayatē),  $\leftarrow ghuḍukkaü \rightarrow$  (= garjati),  $\leftarrow cavēda-caḍakka \rightarrow$  (= capēṭa-caṭat-kṛta),  $\leftarrow \text{phukkij-janta} \rightarrow$  (= phut-kriyamāṇa) (in the Apabhrañśa verses in Hēma-candra : cf. Pischel, ‘Materialen zur Keuntnis des Apabhramśa,’ Berlin, 1902). Following the indication of the Prakrit grammarians, the NIA.  $\leftarrow \text{-ak}$   $\rightarrow$  and the MIA.  $\leftarrow \text{-akka} \rightarrow$  can be well affiliated to an OIA. compounding of a root or its participle base in  $\leftarrow \text{-a(n)t-} \rightarrow$  with  $\leftarrow kṛta, \sqrt{kṛ} \rightarrow$  : থমক  $\leftarrow cāmāk$   $\rightarrow$  (also ঢোক  $\leftarrow cāūk$   $\rightarrow$ , ঢঙক  $\leftarrow cāwāk$   $\rightarrow$  in MB., the proper *tbh.* forms)  $<$  MIA.  $\leftarrow \text{camakka, *camakkaa, camakkia} \rightarrow$   $<$  OIA.  $\leftarrow \text{camat-kṛta} \rightarrow$ ; so চুক  $\leftarrow \text{cuk}$   $\rightarrow$  (eyut-kṛta) ; থক, থাক  $\leftarrow \text{thāk}$ , thāk  $\rightarrow$  *remain, be arrested* (stabh-kṛta), beside থমক  $\leftarrow \text{thāmāk}$   $\rightarrow$  *sudden stop* ( $\leftarrow *thambhakk[i]a < \text{stambha} + \text{kṛta} \rightarrow$  : here apparently we have a generalised  $\leftarrow \text{-akka} \rightarrow$  added to a noun form in MIA.). A connexion with OIA.  $\leftarrow \text{-a-ka} \rightarrow$ , apparently introduced as a *ts.* in Second and Late MIA. (the phonetics of which changed it to  $\leftarrow \text{-akka} \rightarrow$ ) can also well be inferred : e.g., MIA. (Māgadhi)  $\leftarrow \text{hadakka} = *hṛd-a-ka$  ; haggē = \*abakkē = ahakaṁ < aham ; lēḍ(h)ukka = lēṣtuka ; nāakka = nāyaka  $\rightarrow$ , etc. (See  $\leftarrow \text{-ka} \rightarrow$  [ii] below. Cf. Pischel, § 194; Hoernle, Gaudian Grammar, § 338; JASB., 1880, I, p. 37, ‘Hindi Roots’; also cf. Jules Bloch, ‘Langue Marathe,’ § 94). It has also been suggested, by Bloch, that the affix in part goes back to the OIA. adjectival and pleonastic  $\leftarrow \text{-kyā} \rightarrow$ , as in  $\leftarrow \text{pārakya} < \text{para} \rightarrow$  (cf. also  $\leftarrow \text{māṇikya} < \text{mani} \rightarrow$ ). Further, Bloch draws our attention to the  $\leftarrow \text{-kk-} \rightarrow$  (also  $\leftarrow \text{-k-, -g-} \rightarrow$ ) affix which is such a common one in the Dravidian languages, in which, apart from other functions, it is used in forming verbal nouns from

roots : e.g., «  $\sqrt{\text{na}d}$  » *to walk* > « nad-akk-ai, nad-akk-al, nad-akk-udal » *walking* ; «  $\sqrt{\text{iru}}$  » *to be* > « iru-kk-ai » *being* ; «  $\sqrt{\text{sēy}}$  » *to do* > « sēy-gai » *doing*, etc., as in Tamil, and «  $\sqrt{\text{unñu}}$  » *to eat* > « unñike » *eating*, as in Kannada (Bloch, ‘Langue Marathe,’ p. 105; Caldwell, ‘Comparative Grammar of the Dravidian Languages’, 1916, pp. 542-543).

In its origin, it would thus seem that this affix is derived from « kṛta » and other forms of «  $\sqrt{\text{kṛ}}$  ». There seems also to have been present the influence of the Skt. affix « -a-ka », which was Prakritised into « -akka ». And it is not improbable that in MIA. times a « -kk-, -g-, -k- » affix existed in North Indian Dravidian dialects (now superseded by IA.), and this affix of Dravidian was not without its influence in the establishment of « -akka » in MIA. of the Second and Third stages.

The ইক, উক « -ik়, -uk় » forms seem to be due to Vowel Harmony, the « -ā- » changing to « -i-, -u- » when the root or base form had these vowels, by attraction.

Extensions of ক, অক « -k়, -ak় » in Bengali :

(অ)কা « -kā », i.e. « -k় + -ā » : adjectival and pleonastic, with an implication of biggishness or coarseness : পটকা « pāṭkā » *cracker, squib*, beside পটক « pāṭk় » *a throwing down with crackling noise* ; চল্কা « cālākā » *a dash and a fall of liquid through overflowing* ; ফটক « phāṭkā » *dry, making a crackling noise when broken* ; হেঁকা « hōṭkā » *grunting, ugly, rude person* ; হড়ক « huḍkā » *a bar, a bolt* ; etc.

অকী, (অ)কি « -kī, -ki » : with adjectival « -i » : বৈঠকী « bāithakī » *polite, of good society* < belonging to the drawing room.

(অ)কী, (অ)কি « -kī, -ki < -kī » : feminine > diminutive > pleonastic in NB., generally names of concrete objects : সড়কী « sāṛkī » *jarelín* (*that which moves quickly and strikes*: < sṛta <  $\sqrt{\text{sṛ}}$  ) ; হেচকি « hēcākī » *jerk* > *yawn, hiccup* (cf. হেড়ান « hēc-়-rā-nā » *pull*) ; কুচকি « kūcākī » *groin* (cf. কুচকান « kūcākānā » *to be curled up*) ; ছিটকি « chitṭaki », beside ছিটকিনী « chitṭakinī » *bolt, latch* ; etc.

The affix আক « -ā-k় », in forms like তড়াক « tārāk় » *with a sudden bound* (< tṛta), পড়াক « pārāk় » *with a crack*, সড়াক « sāṛāk় » *with a quick glide*, কড়াক « kārāk় » *with a crackling sound*, etc., which are mostly

used with the indeclinable conjunctive করিয়া, ক'বে « kāriyā, kōrē » *having done* (see *supra*, p. 655, for a similar formation in আঁ « -āt় »), to indicate quick and abrupt movement or sound, is undoubtedly connected with the « -াক় » affix, the base apparently being a strong form in « -ā ».

Bases in « -াক়, -ঘকা » (the latter preferably in NB.) are used for the denominative in Bengali: e.g., MB. চমকে, চঙকে « cāmākē, cāñākē », NB. চমকাৰ « cāmākāy » *is startled*; ছিটকাৰ « chitākāy » *sprinkles*; etc.

(36) ক « -াক় » (ii) > কা « -ঘকা », কৌ « -ঘকী », কিয়া « -কিয়া », কুঘা « -কুাব ».

**431.** This is an adjectival affix, also used pleonastically: it is also found in the strong form in কা « -কা », with its feminine কৌ, কি « -কী, -কি », and also in its extensions formed by superposing other affixes, ইয়া « -িয়া », উয়া « উাব » etc. Examples: ধনুক « dhanuk় » *bow* (dhanukka, dhanuṣka); ডোলক « dholak় » (*small*) *drum* (MIA. dholla-); শামুক « sāmuk় » (\*sambukka=śambu-ka); দোফৱকা « dō-phāṛ়-kā » *with two blades* (phala-); dialectal Bengali আমকা, তোমকা « āmākā, tōmākā » *of us, of you = our, your*; গদকা « gadākā » *Indian club, cudgel* (< ts. gadā); দমকা « dāmākā » *a rush of wind, a strong puff of wind, beside* দমক « dāmāk় » *puff, jerk* (Pers. « dam » *breath*); বড়কৌ « bārākī » *eldest daughter-in-law* (=wife of the eldest one); so মেজকৌ « mējākī » < « mājhua+ki », ছোটকৌ « chōṭākī », etc.; কেটকো < \*কাঠকুয়া « kēṭākō < \*kāṭh-āk-ū » *a wooden vessel*; পুটকে « pūṭākē < \*pūṭ-āk-iyā » *a tiny one* (cf. পুটু « pūṭi » *a tiny girl, a small fish*); মুনকে « munākē » < মণকিয়া « māṇ-āk-iyā » *a maund in weight, one who can eat food-stuffs weighing a maund*; so সেৱকে « sērākē < \*sēr-āk-iyā » *weighing a seer*; শতকে « sāṭākē » < \*স্টকিয়া « sāṭāk-iyā » *plain numeration table upto 100* (from \*স্টক, সডক « \*sāṭāk়, sāḍāk » *plain movement?* seems wrongly to be connected with শত « sāṭā » *hundred*, and turned into শতকিয়া « sāṭā-k-iyā » as a « sāḍhu-bhāsā » equivalent); কড়াকিয়া « kāṭā-k-iyā » *numeration table by fours and quarters* (কড়া kāṭā) *upto 100*; গণকিয়া « gāndā-k-iyā » *numeration table by fours* (গণা gāndā) *and eighties, upto 400*; so বৃড়কে < বৃড়িকিয়া « buṛkē < buṛi-k-iyā » *numeration table by twenties* (buṛi বৃড়ি) *upto 2000*; পণকে < পণকিয়া « pāṇākē < pāṇā-k-iyā » *numeration table by eighties* (পণ pāṇā) *upto 8,000*; etc.

This affix would seem to be the Skt. pleonastic and adjectival « -ka » (see Whitney, Sanskrit Grammar, § 1222), introduced into Second and Late MIA. as a *ts.* form, and normally becoming « -kka ». In Magadhan, it seems to have been used for the genitive, as, *e.g.*, in Maithili « ghōrā-k » *horse's*, in Oriyā « puruṣāñ-kā » *men's*, and in early and dialectal Bengali as well. In the other NIA. languages, like Western Hindi, however, the genitive affix « -kā, kau » etc. seems to have come from « kaa < kṛta » ; but it is not unlikely that there was some influence of this very common and resuscitated OIA. affix. An adjective-genitive use of « -kka » is found also in Śaurasēnī Apabhrātiśa as in Hēma-candra : *e.g.*, « bappi-kī bhūmhaḍi » (= pāitṛkī bhūmiḥ). In the Avahattha of the 'Prākṛta-Paingala,' the « -ka » for the adjective genitive figures largely.

There is a pleonastic use of this « -kṛ », mainly after verbs, in Bengali and in other Magadhan languages (see *infra*, Verb : 'Pleonastic Affixes') : *e.g.*, হইবেক « hāibē-kṛ » *it will be* ; কৰক « kār-u-kṛ » *let him do* ; তথালেক « khālē-kṛ » *he ate* ; নাহিক « nāhi-kṛ », MB. নাহিকয় « nāhi-k-āy » *is not*, beside Early Assamese নাহিকস্ত « nāhi-k-āntā » *they are not* ; and Magahi « √hī-k », Maithili « chi-k » *to be*. These last instances would show that « -kṛ », like the « -ṛ- » affix (iii) below, was added to the root : probably here was some confusion with « -kṛ » (i) (< √kr), as in তথা « thā » (< √sthā) beside থক, থাক « √thāk, thāk », Maithil « √thik » (< √stabh + √kr). But « -ka » was used after other words also : *e.g.*, কিন্তুক « kintu-kṛ » *bnt* (*kintu*) ; etc.

See *infra*, under 'Tatsama Suffixes : « -ka »'.

(37) কর « -kār ».

**432.** Found in দোকৰ, তেকৰ « dō-kār », tē-kār » *two-fold, three-fold*, is the Skt. noun « kara », which is also partly the source of the genitive, and of one of the dative affixes of Bengali, as well as of the common plural affix « -rā ».

(38) গোছ, গোচ « -gōc(h)ṛ » < গোছের « gōch-ēr ».

**433.** This is compounded with adjectives and nouns, and is used, like the English *-ish*, to mean 'like, resembling, of the group of.' The

word is the Skt. « guccha » *bundle*; and গোছ(!) « gōchā » (gōchā) » occurs as a numerative in Bengali. The use of the genitive form is apparently the older one: লংগাগোছের মানুষ « lāmbā-gōchērā mānuṣā » lit. *a man of the 'tall-group'* = *a tallish man*, which was shortened to লংগোছ মানুষ « lāmbā-gōchā mānuṣā »; so মাঝারী-গোছের > -গোছ « mājhārī-gōchērā », -gōchā » *about middling-sized*; ছোত্তা-গোছের > -গোছ « chōtārā-gōchērā » > -gōchā » *rather like a lad, youngish*.

(39) চ, আচ « -eṣ, -ācə ».

**434.** In a few words like কানাচ « kānācə » *belonging to the edge, edge, corner* « kōṇācə » *belonging to a corner, aslant, prickly heat*,—the « -e- », or « -āc- » affix seems to be from the OIA. « -tya » forming adjectives (= karṇa-, kōṇa-, gharma- + -tya).

(40) জ « -jā ».

**435.** From « jāta », found in some familiar forms of surnames: = 'son of.' E.g., ঘোষজ « Ghōṣṭ-jā » *of the Ghosh family*; বোসুজ « \*বসুজাত » < Bōṣṭ-jā < Bāsu-jāta » *of the Bose or Basu (Vasu) family*; মিত্রজ « Mittirā-jā » *of the Mitter (Mitra) family*.

(41) ট « -(ঃ)t̪- » (i), and its extensions.

**436.** This affix, found in other NIA. speeches, forms quite an important group with its extensions, and indicates either some resemblance, connexion or modification in a general way, or trade or habit. In some cases it has become merely pleonastic, like the « -d- > -r- » suffixes (see below, §§449, 450), which seem to have influenced it in its pleonastic use. It represents a MIA. « \*vat̪- », from the OIA. formations « varta, vartika, vartikā ; vṛtta, vṛttika, vṛttikā » from « √vṛt ». This affix occurs in Hindostāni as « -āwaṭ, -āhaṭ », and in other forms of NIA. also.

ট « -t̪- » < « vartta » : abstract or concrete nouns: দাপট « dāpāṭṭə » *power, puissance, rule, high-handedness* (darpa-varta); সাপট « sāpāṭṭə » *being in a fury, indulging in heroic gestures, seizing boldly* (sarpa-varta); ঝাপট « j(h)āpāṭṭə » *gripping, splashing, struggling, dashing as with wings*

(\*jhampa-varta); আঙট, আঙট < āŋ(g)at̪ > *entire, not torn (as of a plantain leaf)* (< aŋga-varta > : আঙটা < aŋ(g)at̪a > *ring of a vessel*, আঙটী < āŋt̪i > *finger ring represent < aŋguṣṭha >*); মাথট < māthāt̪ > *capital levy* (\*masta[ka]-varta), etc.; and other words like উচট, হেঁচট < ucāt̪, hōcāt̪ > *stumble* (? ava-tya+varta) also seem to have this affix. Cf. কেওট, ক্যাওট < kēot̪ > [kēoṭ] (kēvat̪ta < kāivarta).

ট < -t̪ > from < vṛ̪ta >, forming adjectives and nouns: ধোঁয়াট < dhōāt̪ > *smoky, mass of smoke* (dhūma- > dhūā, dhōā + t̪ < vṛ̪ta); ঘোলাট < ghōlāt̪ > *muddy, muddiness* (< ghōlā > *muddy, turbid* < ghūrṇa + vṛ̪ta); ভরাট < bhārāt̪ > *filled-up, well-filled, a filling-up* (bhara- + vṛ̪ta); জমাট < jāmāt̪ > *congealed, frozen, compact* (< jāmā > < Perso-Arab. < jam̪ > + < vṛ̪ta >); etc.

টি < -t̪ā > (= < -at̪ > above + < ā >): forms adjectives and nouns, and denominative bases from forms with < -t̪- >: চেপটা < \*cīpṭā < cīpāt̪ā < \*cīpāt̪ā > *flat* (< √cīp > *press, flatten* + < vṛ̪ta > : cf. MIA. < civīdaa >, Skt. < cīpiṭaka > = চিড়া, চিড়া < cīrā, cīrā > *flattened rice, with the affix < -d- >-r->, see p. 689*); ঝাপটা < jhāpāt̪ā > *spray of water, an ornament for the head with tassel of pearls* (cf. < jhāpāt̪ > above); নেওটো by Vowel Harmony নেওটো < nēōt̪ā > < [næoṭo] *affectionate, attached* (\*nēhāt̪-ā < nēha-vat̪ta-, snēha-vṛ̪ta-); ঘষ্টা < ghāṣṭā > *getting rubbed, or rubbing continuously, as opposed to ঘষ < √ghāṣ > to rub (gharsā-varta-); শুটকা < \*śūkhṭā < sūkhaṭā < \*śūkhāt̪ā > *lean and thin, dried up, shrivelled* (śuṣka + vṛ̪ta); উকটা < ukāt̪ā > *rummage, eagerly search* (\*utka-varta-); কস্টা, কচটা < kāṣṭā, kācāt̪ā > *rinse* (karṣa-varta-); খেমটা < khēmāt̪ā > *a kind of style in dancing and singing* (? + varta); নেঁজ্টো < nēñṭā >, তনেঁজ্টো [næn̄ṭo], লেঁজ্টো < lēñṭā > *naked* (\*nañgāvāt̪ta-, nañgavat̪ta-, nagna-vṛ̪ta-); পাঁশ্টা < pāñṣṭā > *ashen or grey in colour* (pāñśu-vṛ̪ta-); চিম্টা < cīmāt̪ā > *tough, piucers* (MIA. ? \*cimma+vṛ̪ta); etc.*

টী, টি < -t̪i, -ti >, generally = the feminine form of the < -t̪- > affix (< -vat̪ta = vartikā, vṛ̪tikā). In MB. and NB., the feminine force is absent, and < -ti, -ti > has become either merely pleonastic, or vaguely diminutive: e.g., ঘাপটী, ঘূপটী < ghāpāt̪i, ghupāt̪i > *lying in wait to waylay* (? MIA. \*ghappa, \*ghuppa = ghōppa- + vṛ̪tikā; cf. dialectal Bengali

କ୍ଷେପ(୧) < ghōp(ā) > corner, nook); ଚିମ୍ଟି < cimṭī > (MIA. \*cimma + vṛttikā); ଗୁମ୍ଫଟି < gumḍī > bastion, sentry-box, tower (gulma + vartikā); \*ଶୁଖଟି > ଶୁଖକୀ < \*śūkhātī > śūṭākī > dried fish (? śuṣka-vṛttikā); ଛିପଟି < chipṭī > whip (kṣipra-); similarly we have this affix in words like ଖୁନ୍ଦୁଟି < khunḍ-sutī > bickering, picking up a quarrel ; etc.

ଟା < -tā > and ଟି, ଟି < -tī, -ti > have given the so-called post-fixed ‘Definite Articles,’ or ‘Enclitic Definitives’ of Bengali,—< -tā >, the original strong masculine base, implying biggishness or crudeness of the object, and < -tī, -ti >, originally feminine, implying smallness or daintiness. Thus, we have ଏକଟା < ēkātā > one piece, a big or ungainly article, ଏକଟି < ēkātī > one piece, a small and nice one (= \*ēkka-vatṭa-, \*ēkka-vatṭia < ēka-vṛtta, -vṛttikā): so ହ(ଇ)ଟା > ହଟୋ, ହ(ଇ)ଟି > < du(i)-tā > dutō, -tī >; ତିନଟା > ତିନଟେ, ତିନଟି < tinṭā > tinṭē, -tī >, etc. The affix has gradually become a distinct definitive in Bengali, being added to names of persons and things and to adjectives: e.g., ଗାଛଟା < gāchātā > that tree, that big tree, but ଗାଛଟି < gāchātī > that tree, that nice little tree; ରାମଟା < Rāmātā > that ungainly, awkward, or bad fellow of a Rāma, but ରାମଟି < Rāmātī > our good fellow Rāma; so ଭାଲଟା, ଭାଲଟି < bhālā-tā, bhālā-tī >; etc. ଟା, ଟି also occur dialectally as ଡା, ଡି < -dā, -dī >. The source of this ଟା, ଟି < -tā, -tī > has been suggested as being ଗୋଟି, ଗୁଟି < gōṭā, guṭī > piece: but the latter is a different word. See *infra* : under ‘Numeratives or Enclitic Definitives.’

ଟିଆ > ଟେ < -tiyā > -tē > (-t- + -i- + -ā < -vṛtta + -ika- + -āka), indicating ‘habit’ or ‘nature,’ or ‘resemblance’: e.g., ଆସଟେ < āhiṣṭitā > < āṣṭē < \*ā(w)isātiyā > smelling of rank fish and flesh (āmisa-vṛttika + āka); ଘୋଲାଟେ < ghōlātē > muddy-like (see ଘୋଲାଟ < ghōlāṭa >, p. 685); ଭାଡ଼ାଟେ <�ାଡ଼ାଟିଆ < bhārātē < bhārātiyā > tenant, (cab) plying for hire (bhāṭaka-vṛtta + -ika + -āka); ଧୋଗାଟେ < dhōgātē > smoking-like (see ଧୋଗାଟ < dhōgāṭa >, p. 685); ତାମାଟେ < tāmātē > copper-red in colour (tāmā < tāmra-); ରାଙ୍ଗାଟେ < rāŋ(g)ātē > reddish (ରାଙ୍ଗା rāŋgā red); ପାଶୁଟେ < pāśutē > greyish (see ପାଶୁଟା < pāśūṭā >, p. 685); ରୋଗାଟେ < rōgātē > sickly, lean and thin like (< ରୋଗା < rōg-ā > sick, see p. 659); ବଗଡ଼ାଟେ < jhāgḍātē > quarrelsome (< jhāgḍā); ହିଂସ୍କୁଟେ < \*ହିଂସୁକଟିଆ < hīṣukūṭē < /s. \* hīṣuka + -tiyā >, beside ହିଂସ୍କୁଟେ < hīṣutē > envious and spiteful; etc., etc.

Connected with this « -t- » affix is डे « -ः॒- > -रे- » (i) below.

(42) टे « -ः॒ते » (ii).

**437.** In a few words, which may be called disguised compounds : from Skt. or OIA. « patṭa ». Examples : लेङ्टे, लाङ्टे « lēṅgāt̪, lāṅgāt̪ » (\*laṅga-patṭa, linga-patṭa), see p. 347 ; मलाटे « mālāt̪ » *cover of a book*, literally *dust-board* (मला « mālā » + पाटे « pāt̪a » < \*patṭa »); a feminine > diminutive-pleonastic extension as in कषटी « kāṣṭāt̪i, kāṣṭāt̪i < kāṣṭāt̪i » *assaying stone* (karṣa-patṭikā, Hind. kasauṭī) ; etc.

(43) टे « -ः॒- » (iii) > अटे « -ः॒ते », also आटे « -ः॒ते », उटे « -उ॒ते », इटे « -िते », टि « -ति ».

**438.** Like some of the other suffixes noted above, this is really a decayed word figuring in a number of disguised compounds. The source of it is « \*mr̪ta, mr̪ttikā » *earth*, Beng. मट, मटी « māṭa, māṭī ». Examples : धोलाटे « dhōlāt̪ » *soil washed down by rains*; धराटी « dhārāt̪i » *earth heaped up for an embankment* (dhārā + māṭī < mr̪ttikā); फेटेटे, पेटुटे « pēṭōt̪i, pēṭuṭi » *earth and bits of jute mixed, for plastering mud huts* (pāṭa + māṭī > \*pāṭāwāṭī, \*pāṭānāṭī); तुखाटे, तुखूटे « tuṣāṭī, tuṣuṭī » *chaff and earth mixed* (tuṣā- + mr̪ttikā); खडिटे « khāṛīt̪i » *chalk and earth* (khaṭikā chalk).

(44) डे « -रे- » (i) > -डी « -रू- », डी « -री- », डिया > डे « -रिया- » > -रे- ».

**439.** The « -रे- » affix in a number of words indicates habit or profession, or some sort of connexion : e.g., बासाडे < बासाडिया « bāsārē » > bāsāriyā » *dweller in a lodging house or hired apartments* (< bāsā *lodging house*, < vāsa-) ; योगाडे « jōgārē » *arrangement, supply* (< ts. yōga) ; योगाडे < योगाडिया « jōgārē <-riyā » *an organiser, a man clever at arranging things* ; तुखडे < \*तिखडे « tukhārē » *sharp one, clever one* (< tikkha=tikṣṇa) ; बाकुडे Bākuṛā » *name of a person in MB.* « bāṅka, vaṅka, vakra » : when the place name, = *Bankurah*, the affix would seem to be of different origin : see under « -रे- » [ii] below ; आगडे « āgārē » *basket-work door of hut* (agra-) ; \*फासडिया > फासडे « \*phāsāriyā > phāsūrē » *one who strangles and robs*

*travellers* (*phāṣṭ halter-rope with loop*) ; ঘাসিয়াড়ী > ঘেসেড়া < *ghāsiāṛā* > *ghēṣēṛā* > *grass-cutter* (*ghāṣṭ, \*ghāśī grass*) ; নাউড়ে < *nāuṛē* < \*nāwāṛiā > *a boat-man* ; MB. ধাউড়, ধাউড়িয়া < *dbāuṛṭ, dhāuṛiyā* > *a runner* ; খেলোয়াড় < *khēlōāṛṭ* > *a player, an expert* > *a smart and sharp person (slang)* ; জুয়াড়ী < *juāṛī* > *gamester*, see p. 668 ; \*সাপড়িয়া < *sāpūḍe* < \*sāpāriyā > *sāpurē* > *snake-churmer* ; লুঠেরা < \*লুঠিয়াড়ী < *luṭhērā* < \*luṭhiāṛā > < √*luṭh* > *plunder*, cf. Hindi < *luṭerā* > *robber* ; ভাঙড় < *bhāṅ(g)āṛṭ* > *one who indulges in 'bhāṅ'* ; কেওড়া < *kēōṛā* > *a low caste* (\**kēvāṭa-*), beside কেওট < *kēoṭṭ* > (< *kēvāṭa, kāivarta*) ; etc.

The source of this < -ṛ- > would seem to be the OIA. < √*vṛt* >, in a form like < *vṛtā* > = *work, labour, movement*, found in the Rig-Veda, which would give a MIA. < \**vatā* > \**vadā* > \**vaḍā* > By extension with < -ā, -iyā, -i < -ika > etc., we get the ড়, ডিয়া, ড়ী etc.

(45) ড < -ṛ- >, ড় < -ṛā >, ড়ী < -ṛi > (ii).

**440.** This occurs in some place-names, and it comes from a Late OIA. and Early MIA. < *vāṭa* > *enclosure* which is found in Sanskrit as a < *guṇa* > formation from < *vāṭa* < *vṛ-ta* >, < < √*vṛ* > *to cover, to enclose*. ড়ী, ডিং < -ṛi, -ṛi > as an affix in Bengali would therefore represent < *vāṭikā* > compounded with words. Examples: আখড়া < *ākhaṛā* >, Hind. \* *akhāṛā* > *enclosed ground for physical exercise, club* (*akṣa-vāṭa-*) ; ভাগড় < *bhāṅgāṛā* > *place outside village where dead cattle are cast away* (? \* *bhagna* + *vāṭa* : connexion with হাড় < *hāṛṭ* > *bones* is popularly suggested) ; গোয়াড়ী < *goāṛi* > *place-name = Gowari near Krishnagar in Nadia* (*gōpa-vāṭikā*) ; খোঁয়াড় < *khōāṛṭ* > *pig-sty* (? Persian < *xug* > *swine* > Bengali < \**khōgā, khō, khō* > + < *vāṭa* >). The Sanskritised < *nāu-vāṭa* > *a fleet of boats or ships, a dock*, met with in old Bengal inscriptions, represents an Old Bengali < \**nāwa-wāḍa* >, which was Persianised into < *nawwārah* > by the Mohammedans: < \**nāwa-wāḍa* > may be connected with the dialectal word নাউড়ে above (§449).

The word < *vāṭa* > may equally be the source of ড় < -ṛā > in place names, although a non-Aryan origin, Kōl or Dravidian, for that affix is not unlikely (see *supra*, p. 66).

The word वाटोऽर्डृ « bāṭōāṛḍ » *high-way robber* (*bāṭa* < *vartman*) has nothing to do with « r », (i) or (ii), although « -ṛ- » (i) might have been confused with it: it comes from MB. वाटपाडृ « bāṭā-pāṛḍ », in which form it still occurs in NB. (< causative root *pāṭaya-* »).

(46) ड « -ṛ- », डा « -ṛā », डी « -ṛī » (iii).

**441.** Pleonastic affix, derived from « -da- », which was widely used in Late MIA.: *e.g.*, « vaccha-da (*yatsa*), diaha-da (*divasa*), gōra-d-i (*gāurī*), nēha-d-ā (*snēha*), hiya-d-ā (*hṛdaya*), dōsa-d-ā (*dōṣa*), pārakka-d-ā (*parakīyā*), bhūmha-d-i (*bhūmi*), tēva-d-u (*tadvat*), bh(r)anta-d-i (*bhrānti*), nidda-d-i (*nindrā*), dēsa-dā (*dēśa*), sandēsa-dā (*sandēśa*) », as in the Apabhraṇa fragments in Hēma-candra; « dukkha-d-ā (*duḥkha*) », as in the 'Samjama-mañjari'; etc. The « -da- » affix seems to have come into special prominence in the *spoken dialects* of Northern India in the closing centuries of the 1st millennium A. C. It is also very likely that it was largely used in the spoken language in the earlier stages of MIA., but the remains of First, Transitional and Second MIA. do not use it lavishly; and in Third MIA. literary remains, where the style is exclusively artificial and is modelled on the Prakrit *kāvyas* (as in the Jaina works like the 'Bhavisatta-Kaha'), it is not so common either. The Ap. verses in Hēma-candra's grammar form specimens of genuine popular poetry, and hence the « -d- » words are so much in evidence there. All NIA. speeches show numerous forms with « -da- > -ṛ- »; and some kinds of NIA., *e.g.*, the Rājasthānī dialects, employ it more lavishly than the rest, affixing it to passive participles quite freely.

The Second and Third MIA. « -da » rests on a First MIA. « -ṭa- », which would normally represent an OIA. « -ṭa- » (or a dental « -ta- », with or without a « r » or « ṣ » to cerebralise it). (Cf. Pischel, §599.) In Skt., we have a number of words with a « -ṭa- » affix, words which are mostly late, but a few like « marka-ṭa » undoubtedly go back to pre-Buddhic times: *e.g.*, « marka-ṭa (regarded as being Dravidian in origin: cf. Tamil « maram » *tree*); kajka-ṭa, karka-ṭa (see p. 368); karpa-ṭa *rug* (< \*√[s]karp); parka-ṭī; karva-ṭa; kukku-ṭa; lak-u-ṭa > lag-u-ḍa;

muk-u-tā (?) ; cip-i-tā *flattened rice* ; vadhu-tī ; kula-tā (explained as being from « kula + √at ») ; barba-tā » ; etc. This « -tā » is not found in Vedic. There is nothing in the non-Aryan languages, Dravidian and Kōl, to warrant any influence from that side. And such a characteristic IA. suffix, so persistent in all the forms of NIA., can reasonably be expected to have an OIA. source. It seems quite possible that this « -ra < -da < -ta » is only a form of a « -ta », undoubtedly the same as the passive participle affix, which was used as a secondary affix in some noun and adjective formations in Vedic (cf. Whitney, Sanskrit Grammar, § 1176, § 1245 ; Macdonell, Vedic Grammar, § 209) : e.g., \*eka-tā, dvi-tā, tri-tā ; muhūr-tā ; ava-tā *well* ; raja-tā ; párva-ta ». Some sense of connexion with or modification of the original idea is implied by this « -ta », which also is not absent in the NIA. « -ra ». By spontaneous cerebralisation (see *supra*, pp. 487-488), « -ta- » can very well give « -tā » in dialectal OIA. and in Early MIA. Thus we have OIA. « vibhi-ta-ka (beside « vibhidaka » : < « √bhid » ?) > \*vibhi-tā-ka » > MIA. « bahēdaa- » > NIA. « bahērā » ; OIA. « āmrā-ta-ka » > \*āmrā-tā-ka » > MIA. « ambādaa- » > NIA. আমড়া « āmṛā » ; and OIA. « śṛngā-ta-ka-, śṛngā-tā-ka- » > NIA. « sīgārā ». Throughout the whole history of IA., « -ta- » > -tā > -da > -ra » would seem to have been fairly common in the *spoken* language ; and after phonetic decay had put an end to most of the characteristic OIA. affixes in the Second NIA. stage, the « -da » affix, with its strong cerebral sound, seems to have become quite a prominent and a popular one. The large number of names in « -da », Sanskritised to « -tā » during the Second and Third MIA. periods (see *ante*, p. 89), would also indicate its popularity in the Indo-Aryan speech from the early centuries of the first millennium A.C.

Hoernle's derivation of this affix from a Skt. « -dṛśa » (Gaudian Grammar, § 218) is phonologically inadmissible ; there is also the fact that the earlier form of « -ra < -da » was « -tā ».

Examples of « -ra- » from Bengali : OB. (Caryā 38) « nāva-r-i » (nāva, nāu) ; (Caryās 10, 20) « bāp-u-r-ā » a *Kāpālika* (cf. Śaurasēni Ap. vappudā) ; (Caryā 10) « pākh-u-r-i » *petal* (pakṣa = parva) ; MB. (SKK.) মুদ্ৰା « mudrā » beside মুদি « mudi » *ring* (mudrā) ; MB. দিবড় «

« diyārī » *lamp* (< dipa); মাকড় « mākāṛī » (markata); কাপড় « kāpāṛī » (karpaṭa); রাজড়া « rājāṛī » *king, rich men as in* রাজ-রাজড়া « rājā-rājāṛī » *kings and swells; so* গাছ-গাছড়া « gāchā-gāchāṛī » *plants and herbs* (gaccha), কাঠ-কাঠড়া « kāṭhā-kāṭhāṛī » *wood and timber* (kāṣṭha); পাতড়া « pāṭhāṛī » *leaves and sticks* (< patra); আকড়ী « ākāṛī » *loopin writing* (anjka); শাশড়ী < \*শাশড়ী < \*śāśurī < \*śāśāṛī » *mother-in-law, beside* শাশ « śāśā » *in compounds* (śvaśrū); চামড়া « cāmāṛī » *hide, skin* (carma); পাখড়ী « pākhāṛī » *scapular-bone* (pakṣa); খাগড়া « khāgāṛī » *reed, marsh plant with sharp edge* (khaḍga); বাগড়া « bāgāṛī » *obstruction* (sts. < vyāghāta + -ṛā); বহড়া « jhāgāṛī » *quarrel* (see p. 478); আত্তড়ী « āt(u)ṛī » *entrails* (antra); বহুড়ী « bā(h)uṛī » (vadhūti, vadhuṭi, vadhuṭikā); ঝিউড়ী < \*ঝিউড়ী « jhiūṛī < \*jhiāṛī » (< dubhitṛ); মোহড়া « mōhāṛī < muhāṛī » *vanguard* (mukha); কেওড়া « kēōṛī » (kētaka-); চিড়া, চিড়ী « cīrā, cīrā » *flattened rice* (cipita-); চুমকুড়ী « cumkuṛī » *making the sound of kissing > assuring (as a horse)* (cumba-); ফুসকুড়ী « phuskuṛī » *a small boil beside* ফোস্কা « phōskā » *a large boil or sore*; মামড়ী « māmāṛī » *crust on the surface, as on a healing sore* (marman sensitive or exposed part); চুপড়ী, চুবড়ী « cupāṛī, cubāṛī » *basket* (from a dēśī root meaning to cover? cf. চুপ « cupa » *quiet, hidden*; চাপ « √cāp » *press*); চানড়া « cān(g)aṛī » *large basket*; হিজড়া « hijāṛī » *hermaphrodite* (< Pers. « hiz »); etc.

The « -ṛ » affix also figures in verb-roots: দৌড় « √dāu-ṛ- » *run* (dava-dā, drava- < dru); see *infra*, under 'Verb : Roots.'

In some cases, « -ṛ- » figures as র « -r- » apparently through originally dialectal pronunciation: e.g., কাঠরা « kāṭhāṛā », see *supra*; গাঠরী *beside* গাঠড়ী « gāṭhāṛī, -ī » *baggage* (granthi); টুকরা « tukāṛā » *a piece, beside* Hindostāni « tukṛā » (see p. 489); ছোকরা « chōkāṛā » *a boy* (conn. with « sāba » > ছা « chā » ?); চান্দরী « cān(g)aṛī » *little basket, beside* চানড়া « cān(g)aṛī » *above*; পেটরা « pēṭāṛā » *box* (\*pēṇṭa = pēṭa-); বাশরী « bāśāṛī » *bamboo flute* (vanśa); ছায়রা « chāyāṛā » *shade* (see p. 342); ভাসরা « bhāyāṛā < bhāi » *wife's sister's husband*; etc.

(47) ত « -tā », তৌ « -ti » (i).

**442.** Found in a few words, in the abstract sense. From MIA.

« -tta » < OIA. « -tva » : e.g., MB. আইহত > আয়ত > NB. এওঁ « āihatā > āyyatā > ēōtā > (avidhavatva), also with তৈ « -ti » with « -i < -ikā » ; sles. †« raizot » (=rājya + tva) in the ‘ Crepar Xaxtrer Orthbhed.’ This affix was later reinforced by the Perso-Arabic affix noted at p. 656.

(48) ত « -tā », তৈ « -tā », তৈ « -ti » (ii).

**443.** From « patra- » as well as « pātra- », a decayed word figuring in some disguised compounds in which it has acquired the force of an affix: e.g., নামতা « nāmṛtā » multiplication table (nāma-patra-) ; রাঙ্গতা « rāŋ(g)ṛtā » tinsel, copper-foil (rāŋga-patra-) ; চাকতি « cākṛti » some flat or mashed object cut into a ring (cakra-patra + -ikā) ; ছুনাতি « cūnāti » lime-box (for betel) (cūrṇa-patra + -ikā) ; MB. চামাতি « cāmāti » thong (carma-patra + -ikā) : cf. also করাত « kārātā » saw (kara-patra).

(49) ত « -tā », ত « -tā », তৈ « -ti », উতি « -uti » (iii).

**444.** From « -putra, -putrika, -putrikā » : a decayed word in disguised compounds: e.g., জেতুত, খুডুত, মাসুত, পিসুত « jēthut(ং), khurut(ং), māsut(ং), pisut(ং) » respectively, = son of father's elder brother, father's younger brother, mother's sister, father's sister, also with তৈ « -tā » (see p. 503) ; MB. (SKK) একুইতি « ēkāuiti » (ēka-putrikā) ; বালতি « bālati » as in « rāṛī bālātī » widow, and having small children only (bāla-putrikā) ; চাটুতি « cātuti » a surname=Chatterji (« cattā-putra- » : see p. 409).

(50) নৌ, নি « -nī, -ni », ন « -nā » ; ইনি « -i-ni » ; আনৌ, অনি, উনি « -ānī, -āni, -uni ».

**445.** In OIA. « -nī » and « -ānī » are two feminine suffixes which occur with a number of forms, e.g., « pat-nī » (< pat-i) ; « parus-nī » (parusa) ; « rōhi-nī » (fem. of « rōhi-ta » : may be from « \*rōh-in ») ; asi-k-nī, har-i-k-nī » ; and « indr-ānī, varuṇ-ānī, rudr-ā-nī, bhav-ānī, upādhyāy-ānī, mātul-ānī » , etc. (Cf. Whitney, § 1176 d, § 1223 b, c.) Here « -i » is the proper feminine-indicating affix, and the « -n-, -ān- » apparently belonged to the base of the noun. Practically no form in NIA. has come down with

this < -nī, -ānī > of OIA. (cf. the word সৎ, সত্তা < sāt̄, sātā >, Hind. < saut > < MIA. < savattī > < OIA. < sa-patnī >).

The OIA. feminine affix < -ā > was lost (see *supra*, pp. 305 ff.), and < -i > also has generally not come down to NIA.,—it was weakened to < -ī > in Late MIA., and when not after a vowel, it has dropped off in Bengali (see *supra*, pp. 307 ff.). OIA. < -ikā > gave, through Late MIA. < -iā >, the most common, it may be said the most characteristic feminine affix of NIA., namely < -ī, -i > (cf. pp. 307, 672).

But there was the large class of nouns in OIA. with the attributive suffix < -in >, giving in the masculine nominative singular < -ī > (< mālī, yōgī > etc.), and feminine nominative singular < -in-ī > (mālinī, yoginī). This supplied to MIA. numerous feminine forms differentiated from the masculine only by < -inī, -inī >, especially when the nominative came to be used for all the cases in the masculine, the < -in- > of the base being totally lost. Some common isolated words like < rāṇī >, NIA. < rānī > (rājñī), fem. of < rāa, rāja > (rājan, rājā) also helped to establish this < -nī > as a feminine affix. So that in Late MIA., < -iū (-nī, -anī, -nī) > also was a well-marked feminine affix, side by side with < -ia < -ikā >. Moreover, < -inī (inī) > was partly generalised, and came to be attached to nouns to which it did not properly belong ; and when added to masculine nouns in < -ā >, the < -i- > was dropped, making it < -ā-nī >. NIA. thus inherited this < -inī, -a-nī (-inī, -a-ṇī) >, although more restricted than < -i >, from Late MIA. In most NIA. of the recent period ('New' NIA.), the final vowel < -ī, -i > has dropped, leaving the affix at < -n (-ṇ) >; and when in a language like Bengali, we have the full form in < -nī, -ni >, it is due only to the influence of *ts.* feminine words in < -inī, -ānī >.

The < -i-nī, -a-nī > affix in the older periods of NIA. was not so common, and its improper use (that is, in the < -a-nī > form with original OIA. vowel bases) was less frequent ; in the older periods we have commonly < -i >. Gradually the < -n- > form, as more distinctive, came to dispute the field with < -i >, and to oust it from many words, and now it may be said to be equally important with < -i > in most NIA. speeches ; and in some, it is even more important. The loss of the gender sense

in the *adjective* in Bengali is also partly responsible for the curtailment of « -i », and « -nī » is becoming more prominent in distinctive feminine nouns.

Examples : cases of « -nī <-in-i » in OB. : « jōinī » (yōginī) ; « karinī », mase. « kariṇā » (karinī), cf. « harinī », mase. « harinā » (hariṇā) ; « gharinī », MB., NB. দৱণী ghārāṇī > (ghārāṇī) ; « śunḍini » (< śunḍin-i > ; also « śāunḍika > \*śonḍia, \*śunḍī >, fem « śunḍī-ñī >) ; MB. and NB. examples : NB. গোালিনী, গয়লানী « goālinī, gaylāñī », fem. of গোালা, গয়লা « goālā, gaylā » *milk-man* (the old feminine from is গোআলী « goāl-i », which occurs 15 times in ŠKK., whereas the new form গোআলিনী « goālinī » is found in the same work 12 times) ; MB. (ŠKK.) কালিনী রাতি « kālinī rāti » *black night* ; চোরনী, চুরনী « cōrāñī > curāñī », ŠKK. চুরণী, চুরিনী « curāñī, curiñī » *woman thief* ; NB. টাঙ্গালনী « cāṅgālāñī » *Cāṅgālā woman* (OB.=চঙ্গালী cāṅgālī) ; NB. *sts.* অভাগিনী « abhāgīnī », besides the older আভাগী, আবাগী « ābh(h)āgī » (< abhāgya) ; MB. টেটনী « tēṭāñī », *bad woman* beside older টেটি « thāṭ-i » (< dhṛṣṭa ?) ; NB. ডোমনী, ডুমনী « dōmñī-ñī, dum-nī » *Dōm woman* (=OB. ডোমী dōmbī) ; NB. পাগলিনী « pāgālinī » beside older পাগলী « pāgālli » *mad woman* (the first is a literary word, the second commoner, and is used also affectionately—পাগলিনী would be regarded as being from পাগল *mad, mad one*, and পাগলী from পাগল *the mad one, mulcup*) ; NB. মেছনী « mēchunī < \*māchuā-ñī » *fish-wife* ; NB. বেহাইন, বেহান, বেয়ান « bēhāin, bē(h)āñ » (vāivā-hika>বেহাই bēhāi + -ñī) ; NB. বাঙালিনী « bāṅgālinī » *Bengali woman*, a new, literary form, beside বঙ্গালী « bāṅgālāñī-ñī » *woman from East Bengal* (but OB. বঙ্গালী « bangāli » *woman from East Bengal*, as in the Caryās, < বঙ্গাল « bangāla » *East Bengal people, or land*) ; সোহাগিনী « sōhāgīnī » *woman beloved by her husband*, beside older সোহাগী « sōhāgī » (< sāubhāgya-) : ননদিনী « nānādīnī » , a new formation, literary, beside the proper word ননদ « nānādī » (nanandī) ; সতিন « sātīn » *co-wife* (sapatnī + -ñī), also সতিনী « sātīnī » : cf. Bihāri « sawatiniyā », Hind. « sautin » beside Bengali সৎ, সতা « sātā », sātā » and Hind. « saut » ; নাতিন « nātīn », MB. (ŠKK.) নাতিনী « nātīnī », also নাতনী « nātnī », *grand-daughter* feminine of নাতী « nātī » (naptr-) : here we have NB. loss of final « -i » of MIA. ; so মিতিন « mitin » *girl friend* (< mitra), ঠাকুর(ঠ)ন, ঠাকুরুন, ঠান < ঠাকুরাণী « thākrāṇi, thākrāṇ, thākrun, thān < thākur-āṇī » *Madam, Lady* (< « thākura +

-ānī >; the wife of a < ṭhākur&gt; *a cook*, or a *Rajput* would be ठाकुरनी < ṭhākur&-nī >, a modern formation); চিত্তগঙ্গানী > শুনি (Chittagong) < ghuṛ-nī > gunni > = < \*ghōḍā-nī > *mare*, beside older শুঁড়ী < \*শোড়ী < ghurī < \*ghōṛī > (= \*ghōṭ-ikā); বাঘিনী < bāghinī > *tigress* (< vyāghra); সাপিনী < sāpiṇī > *female snake* (< sarpa); সিংহিনী < siṅhinī > (< siṅha); etc.

(আ)নী < -ānī > has become the common affix to denote a woman of a particular caste or profession: সেকরানী < sēkṛānī > *woman of the goldsmith caste* (< \*sēkyakārā >, see pp. 194-195); ধোবানী < dhōbānī >, *woman of the washerman caste*; কায়েতানী < kāyetaṇī > *a Kāyastha woman*; বাণিনী < bāyi-nī > *woman of the Vaidya caste*; কুমোরনী < kumōṛ-ṇī < kum(h)āṛ-ṇī > *woman of the potter caste* (< kumbha-kāra); চামারনী < cāmāṛ-ṇī > *woman of the leather-worker caste* (< carmakāra); মেথরনী < mēthāṛ-ṇī > *sweeper-woman*, beside মেথরণী < methāṛ-ṇī > (< Persian < mihtar > *prince*, by euphemism, commonly spelt like রাণী < rāṇī > with the cerebral < ṣ >); চৌধুরানী < caudhūrānī > *lady of the Chaudhuri family*; ডাক্তারনী < dāktār-ṇī > *Lady Doctor*; মাষ্টারনী < māṣṭār-ṇī > *school-mistress*.

A great many common forms, however, have retained the old < -i > and have not taken up the < -nī >: e.g., মামী < māmī > *mother's brother's wife* has not been ousted by MB. (SKK.) মাউলানী < māulānī > (mātulānī); কাকী < kākī >, খুঁড়ী < khuṛī > *father's younger brother's wife*; জেঠী < jēṭhī > (= jyēṣṭhikā), জেঠাই < jēṭhāi > (= jyēṣṭhāryikā) *father's elder brother's wife*; শালী < śālī > *wife's sister*; খুকী < khukī > *girl baby* (< khōkā); রামী < Rāmī > (< Rāma), শামী, শামী < S(y)āmī > (< Śyāma), বামী < Bāmī > (Vāmā + -i), forms of women's names among the lower classes; দুলানী < dulali > *darling*, etc. In many feminine adjectives, the MB. < -i > has now been dropped with the weakening of the gender-sense, as in MB. (SKK.) বিতপনী < bitāpānī > (= vitapanā), পাতলী < pāṭalī > *slim* (< patra-la-), বিকলী < bikalī > (= vikalā), দারুণী < dāruṇī > (= dāruṇā), কঁওলী < kōḍali=kōṣḍali > (= kōmalā), আনাথী < ānāthī > (= anāthā), etc. In Late MB. and in NB., when through the influence of Sanskrit, the < -ānī, -ini > affix was regarded as an elegant form, *tbh.* formations like নবদিনী, পাগলিনী, etc., etc., were evolved by the dozen in the literary language, as well as *sts.* ones like মাগিনী, চওলিনী and চওলনী, বিহঙ্গনী, চাতকিনী, কামস্তিনী, প্রেতিনী (> colloquial

(পেত্নী), পঁওতানী, অনাধিনী, হতভাগিনী, রজকিনী, নাপিতানী (colloquial নাপিংনী, নাপিনী), ভিক্ষুণী (< MIA. Pali < bhikkhuni >), শুণ্যানী (Śūnya-Purāṇa), etc., and quite a host of others, some of which are not Sanskrit at all (e.g., বন্দিনী < bāndinī > *woman prisoner* from Persian < bandī >); but they are very freely used. (See Lalit-Mōhan Banerji, ‘Vyākaran-Vibhāṣikā,’ Calcutta, San 1320, pp. 40 ff.)

The < -nī > affix is not be confused with < -āni > (13a, 14) discussed before, and also with the < -nī > in some isolated words, like রানী < rānī > (see p. 674), কাহিনী < kāhinī > *tale* (< \* kathinikā=kathānikā), etc.

(51) পনা < pānā >.

**446.** This well-known NIA. affix, indicating state or function, is from OIA. < -tvana- >. From the change of < tv- > -pp-, it would seem to have originated in the South-western IA. region during the First MIA. stage, whence it spread elsewhere (see p. 508, *supra*). Examples; টিপনা < dṛ̥ṣṭa-pānā > (dṛ̥ṣṭa+tvana-); গিন্নীপনা < gṛ̥hiṇī-pānā < gṛ̥hiṇi-pānā >; etc.

There is an affix পানা, পনা < -pānā, -pānā > meaning ‘like,’ ‘resembling,’ ‘similar to,’ which seems to be a blend of পনা < -pānā > (in an extended, adjectival use) and the *sts.* word পারা < pārā > *like* < < \*parā < prāya- >: e.g., চাদপনা < cāḍa-pānā > beside চাদ-পারা < cāḍa-pārā > *moon-like*; কুলাপনা, কুলাপনা < kulā-pānā, kulā-pānā, kulō-pānā > (*flat and broad*) *like a winnowing fan*; লালপনা < lālā-pānā > *reddish*; etc.

(52) মত < -māṭṭa, -māṭṭa >, মন < -māṇḍa > < মস্ত < -mānta >.

**447.** Occurring in some pronominal adjectives and adverbs, like এমত < ē-māṭṭa > *like this* যেমত < jē-māṭṭa > *like that*, etc. The form in < -nā > is due to influence of MB. < kēhāṇā, jēhāṇā > etc. See *infra*, under the ‘Pronoun.’ It is used as an independent word as well, e.g., আমার মত < āmārāṭṭa māṭṭa > *like me, of my sort*. A blend মতন < māṭṭanā > = < māṭṭa + māṇḍa > is also found. It is from MIA. < -manta > (< OIA. < -mant- >), which figures also as a stereotyped form in some adjectives and some names, e.g., শ্ৰীমস্ত < śrī-mānta > *prosperous*, পয়স্ত < pāyāṭṭa-mānta > *lucky*,

*luck-bringing* (pada *status, position*), হনুমত(ঃ) « Hānumānt(ā) » Hanuman ; etc.

The MIA. affix « -vanta », influenced by the Skt. form of it, also gave the Bengali বন্ত « -bāntā » in words like গুণবন্ত « gunā-bāntā », ভাগ্যবন্ত « bhāgya-bāntā », etc.

Persian « -mand », cognate with the Indo-Aryan « -mant- », reinforced these affixes in Late MB., e.g., « aql-mand, dāniś-mand », etc.

(53) ক্র > ক > উর < \*-rū > -ru, -urʃ >.

**448.** Originally implying ‘similarity, intensity,’ from OIA. « rūpa » *form, shape* > MIA. « -rūva », this affix is generally used pleonastically in NIA. in which it occurs in only a few words: e.g., \*গোক্র > গোক্র, « \*gō-rū > gō-ru » *ox, cow, cattle*, wrongly spelt গুক্র in Bengali: cf. Hindī गोक्ख « gō-rū » (< « gō-rūpa », originally meaning *buffalo*) ; সাত্ত্বক « sājā-ru » *porcupine*, beside the simple form ফেঁক্ষি, হেঁজা « sējā, bēzā » (śalyaka- + rūpa : p. 476); বাছুর < \*বাছক্ষ « bāch-urʃ < \*bācha-rū » (cf. Hindostānī « bach-rū », Marāṭhī « vās-rū »), beside MB. বাছা « bāchā » *calf* (vatsa-rūpa); MB. শশাক্ষ « śaśā-ru » *hare* (śaśa- + rūpa); MB. ঘোড়াক্ষ « ghōṛā-ru » *a kind of deer* (ghōṛaka- + rūpa); also MB. তুলাক্ষ « tulā-ru » *a kind of deer* (<?); ফারুর, গাহুর, MB. গাভক « gāb(h)-urʃ < gābhā-ru » (cf. Hindostānī « gabh-rū ») *young person* (« garbha-rūpa » *children, young persons* as in the ‘Divyāvadāna’); MB. (SKK.) জিঙালক্ষ « jingālā-ru » *the ‘Jingini’ or ‘Jiger’ tree*; MB. কাউর, কাওুৰ « Kā-urʃ, Kāw-urʃ » < OB. কামক « Kāmaru = \*Kāwa-rū » (as in Caryā 2 : « Kāma-rūpa » i.e. West Assam: see *supra*, p. 299). Cf. also Marāṭhī « pākh-rū » *bird* (pakṣa-rūpa), Bhōjpuriyā « meherā-rū » *wife*, beside « meher » (mahilā-rūpa, mabilā), Skt. « hr̥ṣṭa-rūpa » *exceedingly glad*.

(54) ল < -lʃ >, লা < -lā >, লী < -lī >.

**449.** A common OIA. affix (with a variant « -ra »), « la » is found in the adjectival sense, meaning also ‘possessing.’ The pleonastic (svārthē) value also is very common; as well as a slightly modifying sense. The affixes « -ila » (see pp. 676-71) and « -ula » (< MIA. « -ulla », Bengali

« -ula », as in MB. লাজউলী « lājāuli » = « lajjā-sīlā », and রাতুলু « rātula » *red* < MIA. « \*rattulla » = OIA. « rakta + -ula ») are forms of this affix, with « -i- » and « -u- » themes. The affix is in some cases found in the form of « -r- », due probably to Bihāri influence, original Māgadhi « -l- » becoming « -r- » in Bihāri (see *supra*, pp. 536-538). Examples: আদল « ādala » *resemblance (as of one face to another)* (OB. ādaa < advaya + -la), beside আদরা « adarā » ; আধলা « ādhala » *half, half-piece*, beside আধেলা « ādhēla » (ardha) ; MB. উতরলী « utarali » (fem. in « -i < -ikā »), NB. উতরোল, উতরল « utarol » < utaral » *anxious (uttvara-la)* ; ছাওয়াল « chāwāla » *child, child, ছাওয়ালিয়া* > ছালিয়া, ছেলে « chāwāliyā » > chāliyā, chēlē » *boy (sāba- + -la + -iyā)* ; পোলা « pōlā » beside পো(য়া) « pō(ā) » *son, child (pōta-la-)* ; MB. ছেলি « chēli » Bhōjpuriyā « chēri » *she-goat (chagalikā < chaga)* ; গাড়ল, গাড়ৱ « gāṛal », gāṛar » *sheep (cf. Late Skt. « gadḍalikā < gadḍala » *rolling animal, as in the entire flock*)* ; দীঘল « dīghal » *long (dīrgha-la)* ; OB. fem. আগলি « āgali » *advanced (Caryā 32 : < agra-la-)* ; পাকল « pākala » *ripe, well-ripened (pakvala)* ; হাড়ল « hāṛala » *big, open-mouthed pot (cf. হাড়ী, হাড়ী « hāṛi, hāṛā » *large pot*)* ; পাতলা « pāṭala » *lean and thin < like a leaf (patra-la-)*, MB. fem. পাতলী « pāṭali » ; MB. নহলী=নঅলী « nā(h)āli », fem. *fresh, new (\*naval-ikā)* ; MB. (KKC.) সোহাগলী « sōhāgāli » *wife beloved by her husband (sāubhāgya + -li)* ; MB. বিজলী, NB. বিজলী « bijuli » > bij(ā)li », also বিজুরী « bijuri », beside Hindostāni « bij, bijli » (MIA. vijjulia, OIA. vidyut + -la + -ikā) ; ফাটল « phāṭala » *crack (on a wall, on the roof)* (ফট্চ /phāṭ/ *split*) ; \*সহলী > সহেলা > সহলা, সহিলী > সহিলি, সইলি « \*sāhilā > sāhēlā > sāyāla, sāhili > sāhili, sāili » *friend (among women) (sakhī + -la, -likā)* ; MB. মাতল « māṭala » (matta-la) ; ধকল « dhakala » *strain (cf. ধাকা « dhākkā » push)* ; বাঁধুলী « bāḍhuli » *a flower (bandhuka + -likā)* ; দাঁদলান « dāḍdālāna » *to be on the aggressive, to be fighting and quarrelling, to oppress (dvandva-la-)* ; ফাঁদল « phāḍala » *circumference (< ফাঁদ « phāḍa », cf. Late Skt. « phaṇḍa < \*phandra » *belly*)* ; হাতল « hāṭala » *handle (hasta-)* ; পয়রা « pāyrā » *liquid (as of treacle) (< payas)* ; etc., etc. We have this affix apparently in বাদল, বাদলা « bāḍala, bāḍalā » *cloud, rainy weather (Late Skt. vardala-)*, মাদল « māḍala » *a deep-toned drum (mardala)*, কাতল, কাতলা « kāṭala, kāṭalā » *carp fish* ; etc.

(55) স « -*sā* », সী « -*sā* », ছা, চা « -*chā*, -*cā* ».

**450.** This affix, meaning 'likeness, similarity, resemblance,' is derived by Hoernle from OIA. « *sadr̥śa* » (Gaudian Grammar, § 292); but this derivation is not tenable phonologically. As a source of this NIA. affix, I suggest the OIA. affix « -*śa* », as in a limited number of words in Skt., e.g., « *lōma-śa*, *kapi-śa*, *karka-śa*, *yuva-śa*, *arva-śa*, *ēta-śa*, *lōpa-śa*, ? *giri-śa*, ? *kala-śa* ». This « -*śa* » affix was both pleonastic and adjectival, with an implication of similarity : e.g., « *kapi-śa* » *tawny*, 'monkey-like,' « *karka-śa* » *harsh*, *grating*, 'gravel-like.' (This « -*śa* » is derived from an Indo-European « -*ko* [-*kō*] » : cf. Brugmann, 'Vergleichende Grammatik der idg. Sprachen<sup>1</sup>', II, Strassburg, 1889, § 83.)

Examples : « -*a* + -*śa* > -*śas* », feminine « -*śas-i* » : খোলস « *khōl-śas* » *covering, slough of snake* (< *khōl* cover) ; মুখস *ts.* « *mukha* » + « -*śa* » *mask* ; তাড়স « *tāṛā-s* » *force, influence, sympathy, as in fever due to a pain or wound* (< তাড় √*tāḍ* *drive, beat*) ; ধেঢ়স « *dhēṛā-s* » *a vegetable, 'lady's fingers,' beside টেঢ়ি, ধেঢ়ি « *dhēṛi*, *dbēṛi* » *a kind of ear-ornament* ; আপস « *āpā-s* » *friends, people of the same group or family* (*appā* < *ātman*, \**ātma-śa*) ; *sts.* রূপসী « *rūpāśi* » *a beautiful woman* (\**rūpa-śa-* + -*ikā*).*

« -*ś-śa* + -*āka* > -*śas-ā* > -*śasā* » : also altered to the affricates ছ « -*chā* », চা « -*cā* », in the feminine, সী, চী « -*sī*, -*ci* » : e.g., পায়সা « *pāyśā* » *pice* (< *pāi-sā*, Hind. *paisā*) ; আলিসা > অলসা, আলসে « *āli-sā* > *āiſsā*, *ālsē* » *parapet on a terrace* (< *āli*, *āiſl* *embankment*) ; চিপসা, চুপসা « *cipśā*, *cupsā* » *lean, pressed* (√*cip* *press*) ; ভাপসা « *bhāpśā* » *foetid, rank, dank (like vapour) with a bad odour* (\**bāspa-śa-*) ; পান্সে « *pāni-sā* > *pānsē* » (by Vowel Harmony) *watery* (*pāniya* + -*śa*-) ; চামসা « *cāmśā* » *like untanned hide in smell* (\**carma-śa*) ; চকসা « *cākśā* » *clearing of the sky* (cf. চকচক « *cāk-cāk* » reduplicated form = *to be bright*) ; ফরসা « *phārśā* » *light, dawning, beside Chakma dialect* « *pār* = *phār* » *light* (see p. 512) ; ঝাপসা, ঝাপসা « *jhāpśā*, *jhupśā* » *hazy* (cf. ঝোপ « *jhōp* » *wood, grove*) ; আবছা « *ābchā* » *hazy, < cloudy* (cf. আভ « *ābh* » = « *abhra* » *thin cloud*) ; লেঙ্চা « *lēṇgā* » *to limp, to be like a lame man* (cf. লেঙ্গড়া « *lēṇgḍā* » *lame man*, লেঙ « *lēŋ* » *kick, foot, shin*) ; ভেংচা, ভাঙচা « *bhēŋ-cā*, *bhāŋ(g)ā-cā* » *make faces or wry-*

*mouth* (cf. *bhangi*) ; কপচা < kāpṭacā > *to chatter* ( $\sqrt{k}lp$ , *kalp*) ; ঘূঁমসী, ঘুঙসী < ghumṣ-sī, ghunj-sī > *waist-string, winding thread* (<  $\sqrt{ghum}$  *to wander about*) ; আলগোছা < alaṅgōchā > *without touching, from a distance* might be from < \*alaṅgā-sā > *distinct-like* (*alagna* + -sā) : cf. however আলগোছে at p. 551 ; একসা < ēkṣ-sā > *rolled or united into one* seems to have been influenced by, if not actually derived from, the Persian < yak-sān >.

There are extensions of this affix : অসিয়া > চে < -ā-s-iyā > -cē >, and অসিয়া > আসে < -ā-s-iyā > -āsē > : লালচে < lālācē = \*lālā-siyā > *reddish* ; so কালচে < kālācē > *blackish* ; ফাকাসিয়া > ফেকাসে < phākāsiyā > phēkāsē > (also without nasalisation) *pale, colourless*, cf. Hindostānī < phakk > *colourless*.

In the words সাতাসে, আটাসে < sātāsē, ātāsē > *a child prematurely born after seven months or after eight months*, the < -āsē > represents মাসিয়া < mās-iyā > < māsa > *month*. In a few onomatopoeics, however, we have an আস < -āsঁ > and উস < -usঁ > which seem to be connected with this < -sঁ > affix : e.g., ধপাস < dhāpāsঁ >, ধড়াস < dhārāsঁ > *with a loud thud, a bang*, পটাস < pātāsঁ, kātāsঁ > *with a crack*, ঝুপস < dhupus > *with a gentle thud etc.* Cf. < -ātঁ > (p. 655) and < -ākঁ > (pp. 681-682).

(56) সই, সহি < sāi, sāhi >.

451. OB. < \*sahī >, from OIA. < sahitā >, as in জলসই < jālṣ-sāi > *immersed in water*, বৃক্ষসই < bukṣ-sāi > *reaching up to the breast*, রূলসই < rūlṣ-sāi > ('Hutōm-Pēcār Naksā,' 1862, p. 74) *belabouring with a cudgel* (< rulṣ < English *ruler*) : etc. This is confused with another সই < -sāi > from the Perso-Arabic, for which see below.

(57) সর, সরা < -sārঁ, -sarā >.

452. From OIA. < sara <  $\sqrt{s}$ r > *moving*. This affix forms ordinals, and a few other adjectives and nouns : e.g., MB. একসর < ēkṣ-sārā > *alone, by one self* (wrongly Sanskritised in MB. to একেশ্বর, also একশ্বর < ēkēśwārā, ēkāśwārā >) ; দোসর < dōsārঁ > *a second, a supporter, a double, second*, দোসরা < dōsārā > *second, second day of the month* ; তেসর, তেসরা < tēsārঁ, tēsārā > *third (day of the month)* ; চোসর < cōsārঁ > *fourth, square* ; MB. সোসর < sōsārā > *equal, lit. moving along with (= sama-sara)* ; etc. Hoernle

derives this from « s̄ta » (Gaudian Grammar, §271), but in MIA. this would give either « saṭa >sada », or « sata, sita > sa(d)a, si(d)a ».

(58) সোঁআ « -sōā ».

453. Found in MB., as in (ŚKK.) কানাসোঁআ « kānā-sōā » *reaching the brink* (=karna- + -sama-).

(59) হাৰ, হাৱা « -hār̄, hāra ».

454. It occurs in a few words like একহাৰা, দোহাৰা, তেহাৰা, চৌহাৰা « ēkhaṛā, dōhārā, tēhārā, cāuhārā », to mean 'fold.' (দোহাৰা « dōhārā » also means *stout, robust, 'double-sized'*). The source seems to be the Skt. « hāra » *division, portion* (Yōgesh Chandra Vidyānidhi, Bengali Grammar, VSPd., p. 178). Cf. MB. শাঠিহাৰ « śāṭhi-hāra », \*শাঠিহাৰ « śāṭhihārā » > NB. ষেটেৱা « śēṭerā » *sixth-day ceremony and worship after child-birth*. The affix occurs in Hindōstānī also, where it is agentive: e.g., « sirjan-hār » *Creator*, « dēnē-hārā » *giver*, « pālan-hār » *one who maintains*, etc. The Hind. « hār(ā) » is commonly derived from « kāra- » *doer*: but the aspiration in this case would be difficult to explain. There seems to have been a confusion between « kāra > -āra » and « hāra » in Early NIA.: cf. Bengali জোকাৰ, জ়াকাৰ « jōkāṛ, jākāṛ » *shout or song of triumph*, beside জোহাৰ « jōhāṛ » *salutation*, Hind. « juhār », found also in Kōl as « juhar » *salutation*; দোহাৰ « dōhāṛ » < « \*dhuāṛā » *singer in a chorus* (< dhruva-kāra).

In দেহাৰ « dēhārā » < দেহৱা « dēhāṛā » *temple*, we have « għara, għra »; and দোহাৰ « dōhāṛ » *of two* is from « dōṇha, dōṇṇa + (k)ara ». Hoernle derives « hār̄ » from Skt. « vidha + ra » (Gaudian Grammar, §412), but this derivation offers phonological difficulties.

455. There are in addition a number of affixes which are in most cases mutilated forms of words forming parts of compounds, and these are found mainly in place names (e.g., আম, মা, সী « -āṣ, -sā, -sī » < « āvāsa, -vāsa- », as in ইন্দ্ৰাস, « Indāṣ » = « Indrāvāsa », পাকড়াশী « Pākṣrāśi » *a surname* = « Parkatāvāsa + -ika »; -দৌ, দৌ়শা > দে « -dī, -diyā < -dē » as in ন’দে < নদৌশা « Nōdē < Nādiyā », from « dvipa- »; etc.).

but as these are not found in derived verbal or nominal forms of the language, and have long lost all force of affixes, they are not considered here. (See Y. C. Vidyānidhi, Bengali Grammar, VSPd., pp. 188-199). Affixes like ভৱ, ভৱা < -bhār̥, -bhārā > (e.g., পেট-ভৱা < pēṭ-bhārā *belly-full*, দিন-ভৱ < din-bhār̥ > *all day long*), কৰা < -kārā > (as in শত-কৰা < śat-kārā > *by the hundred, per cent*, where < kārā = Bengali passive participle of কৰ < √kār >, corresponding to < kṛta > : Hindostānī has < kāda- > as in < sai-kārā, sai-kārō >, where < kāda > curiously enough preserves the old Māgadhi equivalent of < kṛta > which is lost to Bengali) are but compounded words, and are self-explaining ; and they need no further discussion.

### [II] TATSAMA SUFFIXES.

**456.** From the large and ever-increasing *tatsama* element in Late MIA. and in NIA., a number of common Sanskrit affixes were familiarised, and gradually these have been adopted into the language, their naturalisation being indicated by the formation of hybrids with *tbh.* or foreign roots or words. There seems, moreover, always to have been present in the minds of speakers of Late MIA. and Early NIA. a sense of some vague connexion between the < -ā, -ä > of nouns and adjectives and Skt. < -ākā, -ākā >, and between the < -a-, -ia- > of the passive participle with < -ta, -ita > : a connexion which the scholars have always noted and indicated.

In Second and Late MIA., as a single unvoiced stop would not be allowed intervocally (at least in orthography), the < -k- > or < -t- > of the *ts.* affixes would be written < -kk-, -tt- >, and free use of this device would be made for purposes of metre or rime. This practice was continued to the Early NIA. stage: the ' Prākṛta-Paijgala ' has spellings like < rūakka (rūpaka), Mēṇakkā (Mēnakā), Sārangikkā (Sārangikā), ghitta (ghṛta), āatti (āyati) >, and in Old Hindi, Old Rājasthani, etc. we find instances where this tradition is carried on, like < matti (mati), Sarasatti (Sarasvati), Manmaththa (Manmatha), sukkha (sukha), hayaggaya (haya-gaja), jagga (jagat), uṛaggana (uda-gaṇa), saddāi (sadā) > etc., and even in foreign borrowings like < surattāna (sultān),

**Arabī** (Perso-Arabic « 'arabī »), **Turakī** (Turkī), etc. There are, however, also cases of doubling of other consonants than stops and aspirates in Late MIA. and Early NIA. In OB. of the Caryās we find also a few cases (see below, under « -ta, -ita »).

(1) ইমা < -imā >.

457. From OIA. « -iman », with the force of the English *-ness*: found also in MIA., e.g. « munisima (=manusyatva), gahirima (gabhīratva), vadḍhimā (vṛddhi-bhāva) », etc. OB. (Caryā 34) « pārima » (=pāra); MB., NB. वक्रिमा « bāṅkimā » (vakra-tva), लालिमा « lālimā » *redness*, रातिमा « rātimā » *redness* (raktiman), beside कालिमा « kālimā » *blackness*, नीलिमा « nīlimā » *bluish tinge*, चादिमा « cādimā » *moon-light, moon-sheen*. This affix is found in other NIA. languages, but it is literary rather than popular. In Bengali, « -imā » has also a slightly diminutive force.

(2) ঈয় < -iy় > [io, io].

458. This is affixed to foreign and other names, forming adjectives: রুশীয় « Ruṣiy় » *Russian*, আরবীয় « Ārabiyy় » *Arabian*, মিসরীয় « Misāriyy় » *Egyptian*, ক্রিষ্টীয় « Khr̥istiyy় » *belonging to Christ, Christian*, ইটালীয় Italiyy় « Italian », ডেনীয় « Dēniyy় » *Danish*, হেগেলীয় « Hēgēliyy় » *Hegelian*, etc.

(3) ক < -ka >.

459. It is sometimes difficult to decide whether the pleonastic « -ka » of Bengali comes from MIA. « -kka » (see p. 683), or is an OB. or MB. employ of the *ts.* affix. The Skt. « -ka » undoubtedly sustained in Bengali this MIA. borrowing from it, and helped to extend its use. When it is in connexion with *ts.* words, the « -ka » might be regarded as the *ts.* affix: e.g., राजनोतिक « rājñ̥nōtik় » beside -নैতিক « -nāitik় » *political*; आदि « -ādi-ka- » >দিগ « -dig় » in the oblique plural base of nouns; Skt. words with « -ka, -ika », like « bāla-ka, pañca-ka, sahāya-ka, mās-ika, pāks-ika, dain-ika, dōla-ka, sthāpa-ka, māpa-ka, jñāpa-ka, pāy়-ka, vāsiy-ika, lāuk-ika, sāgni-ka, tīrth-ika, māukh-ika », etc., etc. form a whole host in Bengali,

and since many of these words are freely used in the colloquial, « -ka, -ika (with modification of root vowel) » have become quite familiar as adjectival affixes.

In a few words like পেটুক « pēṭ-ukṣ » *glutton*, মিশুক « miś-ukṣ » *sociable*, লাজুক « lāj-ukṣ » *shy*, মিথুক « mithy-ukṣ » *liar*, we have probably the Skt. affix « -uka »; cf. also হিংসুক « hiñs-ukṣ » *envious*.

See also below, under 'Verb : Pleonastic Affixes.'

#### (4) ত, ইত « -t(ঃ), -it(ঃ) ».

**460.** The passive participle affix of OIA. (Skt.), it is in very common use. It was apparently re-introduced in the Late MIA. period, in which it was written « -tta, -itta ». This affix is frequently used with *tbh.* and *sts.*, as well as foreign roots and words, showing its complete naturalisation. Examples: OB. (Caryā 8) ভৱিতী « bharitī » *filled*, fem. in « -ita » + « -i »; (Caryā 9) নিবিতা « nibitā » (*nirvṛta*, MIA. \*nivvitta-); so (Carya 12) পরিনিবিত্ত « parinibittā »; (Caryā 30) উইত্তা « uittā » (MIA. « \*uitta- » for « uia » = « udita »); MB., NB. ধ্বক্ত « th̄kit(ঃ) » *astonished* (*thakka* < \*stabh-kṛta + -ita), ধ্বলিত « khālitā » *slipped* (✓*skhal*), লখিত « lākhitā » *seen, noticed* (✓*laks*), জানিত « jānitā » *known* (see p. 654), করিত « kār-it(ঃ) » as in করিত্ত-কর্মী *kāritā-kārmā* *experienced* (=kṛta-karmā), জন্মিত, জন্মিত « jānmit(ঃ) », jāmmit(ঃ) *begotten*, উজলিত « ujalitā » *brightened* (< *ujjvala*), অবিস্ত *« abiyatā »* *unmarried* (< অ- + *biyā* < *vivāha* + -tā »: cf. Hindi « byāh-it » *married*); আলারিত « ēlāyitā » *dishevelled* (where « ēlā » < আলা, আউলা « aillā, aulā » = « akula- », see p. 383, + « -itā »); etc.; নিকাহিতা স্ত্রী « nikāh-itā stri » *woman or wife married in the nikāh form* (< Perso-Arabic « nikāh »); বাপ্তাইজিত « bāptāij-itā » *baptised*; and even আইনানুসারে রেজেষ্ট্রিত « aīnānusārē rējēṣṭrikrtā » *registered in accordance with law* (Perso-Arabic « aīn »: রেজিষ্ট্রি কৃত « rējēṣṭrikr̄ta » is more common, however). A number of wrong forms in « -i-tā », created by Bengali writers, have become well-established in the language, like ধনিত « khānitā » (=kṛta), ইচ্ছিত « icchitā » (=iṣṭa), দংশিত « dānsitā » (daṣṭa), অনুবাদিত « ḥanubādītā » (anūdita), সিক্ষিত « siñcītā » (« sikta », causative « sēcīta »), নমিত « nāmitā » (nata), আহরিত « āhāritā » (āhṛta, āhārita), একত্রিত « ekātritā » (= ēkatra), নিঃশেষিত « niḥsēsita »

(< *nihśesa*), etc., etc. The « *sēt* » and « *an-iṭ* » bases of the Sanskrit grammarians have been entirely ignored. (See *supra*, p. 201).

(5) তব্য « -tābyā » [-tobbo].

**461.** The Skt. « -tavya » is combined in the colloquial rather than in the literary speech with a few *tbh.* roots, through an extension of its employ in *ts.* forms : বলতব্য « *bälā-tābyā* », কহতব্য « *kāhā-tābyā* » (*√bäl*, *kāh*=*brū*, *kathaya*-), সহতব্য « *sāhā-tābyā*, *sāh-i-tābyā* » for « *sōdhabavya* » ; rarely with other roots, as e.g., like খাতব্য « *khātābyā* » (*khāditavya*), imitating « *dātavya* ».

(6) তা « -tā ».

**462.** The affix of abstraction, used mainly with *ts.* and *sts.* words, often wrongly : e.g., সখ্যতা « *sakhya-tā* » *friendship*, অধিক্ষেত্র « *ādhikyā-tā* », colloquially among women আদিক্ষেত্র « *ādhikyētā* » *excess, effusive or gushing affection*, জাতীয়তা « *jātiya-tā* » *nationalism*, রোমান্টিকতা « *rōmāntikā-tā* » *Romanticism*, মানবিকতা « *mānāvikā-tā* » *human character*, ভদ্রতা « *bhādrā-tā* », সৌজন্যতা « *sāujñyā-tā* » *beside* সৌজন্য « *sāujñyā* » *courtesy*, etc.

(7) ত্ব « -twā » [-tto].

**463.** Quite common in Bengali with *tbh.* and even foreign words : e.g., নতুনত্ব, নোতুনত্ব « *nātunā-twā*, *nōtunā-twā* » *newness* (< *nātunā* : p. 345); হিন্দুত্ব « *hindu-twā* » *Hinduism, Hindu ideas and practices* (Persian « *hindū* »); বামুনত্ব « *bāmunā-twā* » *Brahmanism, Brahmanishness*; মুসলমানত্ব « *musāl-mānā-twā* » *Mohammedan notions and ways*; ছোটত্ব « *chōṭā-twā* » *smallness*, বড়ত্ব « *bāṛā-twā* » *bigness*; একবেশেত্র « *ēkāghēyē-twā* » *monotony* (< « *ēkā-ghā-iyā* » *with the same beat*); কর্তৃত্ব, কর্তাত্ব « *kārtā-twā*, *kāttā-twā* » *domineering manner* (« *kārtā* », *sts.* « *kāttā* » = 'boss' + « -twā »), which, through influence of words ending in consonant + « -yā » changing the final syllable into « -i » (like সত্যি « *sātyi* » [ʃotti], পথ্য « *pāthyi* » [potthi], অবিশ্বি « *abiṣyi* » [obiʃʃi]=« *satya, pathya, avaśya* », see p. 406), is frequently found as কর্তাত্বি [kottatti] in the Standard Colloquial.

(8) ପାରା < -pārā >.

**464.** A *st̄s.* form, form Skt. < prāyah > > < \*parāa >, meaning 'like,' 'almost as': see under ପନ୍ଦ < -pānā >, p. 696. In Oriyā, this appears as < pārā >. Example: ପାଗଲ-ପାରା < pāgālā-pārā > *like a mad person*, also ପାଗଲେର ପାରା < pāgālērā-pārā >; < pārā > is thus used as a separate word, as it is also in Oriyā.

(9) ମସ < -māya >.

**465.** In the sense of 'full of,' 'spread about in or with': ଜଳମସ < jāla-māya > *covered with water*, ପଥମସ < pātha-māya > *throughout the street*, କାନ୍ଦାମସ < kādā-māya > *all covered with mud*, ଦେଶମସ < dēśa-māya > *all over the land*, ଇୱରୋପମସ < Iurōpa-māya > *all over Europe*, etc.

(10) ସହ < -sāhā >.

**466.** The Skt. particle is loosely compounded with nouns to indicate inclusion: କାପର୍ତ୍ତ-ସହ < kāpār̄t-sāhā > *with the garments on*, ବାହୁର-ସହ ଗୋର < bāhūra-sāhā gōru > *a cow together with the calf*, ଢାକୀମହ ବିସର୍ଜନ < dhākī-sāhā bisarjana > *casting the image (of Durgā or other goddess or god, after the annual worship) into water, with the drummers and all-making a thorough end of an affair*; also ଢାକୀଶୁଦ୍ଧ < dhākī-suddhā >, see below; etc.

(11) ଶୁଦ୍ଧ < -suddhā >, ଶୁଦ୍ଧା < -suddhā >.

**467.** Also used in the inclusive sense: ଆମି-ଶୁଦ୍ଧ < āmi-suddhā > *including me*, ମର-ଶୁଦ୍ଧ(ଅ) < sābā-śuddhā, -ā > *including all*, ମାଜଶୁଦ୍ଧ ଘୋଡ଼ା < sajā-śuddhā ghōrā > *horse with harness and all*, etc. This usage apparently originated from the sense of *entire, complete* which the Skt. word has. The word is also spelt with a dental ଶ < s- >, and a *st̄s.* or *tbh.* from ଶୁଦ୍ଧ or ଶୁଦ୍ଧୁ < sudhu, śudhu > also occurs, meaning 'only.' In Hindostāni we have the same word in < suddhā >, also < sūdhī >; in Sindhi it occurs as < sūdhā > *along with*. Hoernle derives it from a MIA. < \*saūddha, \*saśaddha >, from Skt. < sam-ā-dhā > (*Gaudian Grammar*, p. 226), but does this not look likely.

See also under 'Post-positions,' *infra*, under 'Noun.'

## [III] FOREIGN SUFFIXES: PERSIAN.

468. Persian suffixes, and some words which have almost become like suffixes in Bengali, are given below.

(1) আন, ওয়ান < -ān, -wān > *possessing* (< <-wān, -bān >): গাড়ীআন, গাড়ী-ওয়ান, গাড়ওয়ান, গাড়আন < gārīān, gārīwān, gārwān, gārbān > *cab-man*; বাগান < বাগোরান < bāgān < bāgwān > *garden* (=bāgwān); the word কোচুয়ান < kōcuān > *beside* ক্রেচমান < kōc-mān > *coachman* seems to be the English word, with influence of the Persian < -wān >, found in দরওয়ান < dārwān > *gate-keeper* (darwān, darbān).

(2) আনী < -ānā > *pertaining to, having the nature of* (= -ānah): with an extension আনী, আনি < -ān-i, -ān-i > (= -ānah + -i), indicating abstraction: e.g., বড়-বরানী < bāṛā-ghār-ānā > *pertaining to rich or high families*; হিন্দুআনী < hindu-ān-i >, হিংস্তানী < hīdu-ān-i > *Hindu ways*; বাবুআনী < bābu-ānā >, বাবুয়ানী < bābu-ān-i > *the ways of a gentleman, luxury and dressiness*; সাহেবিরানী < sāhēbi-ānā > *Europeans ways, extravagance and haughty ways*, etc., etc. See p. 592 for the intrusive < -i- >, giving rise to the form < -iānā >.

(3) খানা < khānā > *place, abode* (=xānah): শুভৌখানা < śūrī-khānā > *vintner's shop*; মুদীখানা < mudī-khānā > *grocer's shop, oilman's store*; ডাক্তারখানা < dāktār-khānā > *dispensary*; ছাপাখানা < chāpā-khānā > *printing establishment*; বৈঠকখানা < bāiṭhākṣṭ-khānā > *drawing-room*; etc.

(4) খোর < khōr > *eater* (=xōr): গুলিখোর < guli-khōr > *opium-smoker*; আপিম-খোর < āpim-khōr > *opium-eater*; ঘৃষ-খোর < ghusṭ-khōr > *bribe-taker*; etc.

(5) গর < gār > *maker* (=gar), frequently altered to an Indian কর < -kār >: কারিগর < kārigār > *artisan, craftsman* (Skt. < kāru > *maker* + Pers. < gar >) beside কারিকর < kārikār >; বাজীগর, -কর < bājī-gār, -kār > *magician, acrobat*.

(6) গিরি < giri > *business, craft, trade; manners, ways* (=Pers. < gar-i >; also < gīr > *taking, holding, seizing* > *taker, holder* + nominal affix < -i >): মুটিয়া-গিরি < muṭiyā-giri > *the calling of a porter*; মুচিগিরি < muci-giri > *a shoe-maker's calling*; বাবুগিরি < bābu-giri > *the ways of a gentleman=soft living*; কেরাণীগিরি < kērāṇī-giri > *the profession of a clerk*; etc.

(7) চী, চি < -eī, -ci >, a diminutive affix, a modification of the Persian < -cāh > > চী < cā > with feminine or diminutive < -ī >: ধূনাচী < dhūnācī > small incense-burner; পাতাঁচী < pātāñcī > a carpet or mat, from words like দেগচী, ডেকচী < dēgčī, dēkčī > a caldron < < dēgcah > ; বাগিচী < bāgicā > small garden < < bāgicah > ; চামচী, চামচে < cāmcā, -cē > spoon, etc.

(8) তর < -tārā > like (< Perso-Arabic < tarāh > plan, mode, manner): এমনতর < ēmāñđ-tārā > such (beside এমন-ধাৰা < ēmāñđ-dhārā); কেমনতর < kēmāñđ-tārā > in a peculiar way; যেমনতর < jēmāñđ-tārā > like that; etc. After some ts. words it has an intensive force, as in শুক্রতর < guru-tārā > in a very excessive way, ঘোৰতর < ghōrā-tārā > in a very terrible manner, বহুতর < bāhu-tārā > manifold, etc., where it seems this suffix of foreign origin has been confused with the Skt. comparative affix < -tara >. The affix is found mainly in some pronominal adjectives and adverbs, and this use seems to be modelled on Hindostāni (Urdu) forms like < is-tarāh, jis-tarāh, kis-tarāh >, etc.

(9) দান, দানী < -dān, -dāu-i > receptacle: নস্তদান < nāsyā-dān > snuff-box, পিকদানী < pikā-dānī > spittoon, on the model of কলমদান < kālām-dān > penstand (qalam-dān), আতরদান < ātār-dān > scent-bottle (ītr-dān), etc.

(10) দার < -dār < holder, one in charge of: বাজনদার, extended to বাজন-দারিয়া > বাজনদেরে < bājāñđ-dār, bājāñđ-dār-īā > bājundērē > musician; চৌকীদার < cāukī-dār > watchman > চৌকীদারী < cāukidār-ī > work of a watchman: চড়ন্দার < cārāñđ-dār > passenger (✓ cār ride); ফ়াঢ়ীদার < phāřī-dār > person in charge of a police station; ছড়িদার < chāřī-dār > rod-bearer; সমবদার < sāmāđhā-dār > possessing discrimination; অংশদার < āñśī-dār > for অংশ-দার < āñśā-dār > shareholder in a firm; etc.

(11) নবিশ < -nābiś > writer (=navīs): নকশনবিশ < nākāl-nābiś > copyist (naql-navīs). In the word শিক্ষানবিশ < śiksā-nābiś > apprentice (especially in some learned trade), we have the influence of the English word novice. নবিশ < nābiś-i > is the abstract form of the above.

(12) বন্দ < -bandā > > বন্দি < bāndi > shut, enclosed (=Pers. < band >): চিঠাবন্দি < cithā-bāndi > entered in a ledger, পেটোৱন্দ, -বন্দি < pēṭārā-bāndā, -bāndi > shut inside a chest, বাক্সবন্দ, বন্দি < bāksā-bāndā, -bāndi > locked in a box.

(13) বাজ < -bāj > *one accustomed to do a thing* (< bāz), an abstract formation from which is বাজী < bāj-i > : রঁড়বাজ < rāṛḍ-bāj > *one who associates with courtesans* (slang); ধড়ীবাজ < dhāṛī-bāj > *acute fellow, swindler*; ধোকা-বাজ < dhōkā-bāj > *a swindler*; গলা-বাজী < galā-bājī > *speech-making*; etc.

(14) সহি, সই < -sāhi, -sāi > *proper, attached to* (Perso-Arabic < šāhiḥ >) : as an affix, this has been confused with the similar *tbh.* affix (p. 700); e.g., মানন-সহি, -সই < mānāñ-sā(h)i > *agreeable, suitable*; প্রমাণ-সহি < prāmāñ-sāhi > *of full size*; চলনসই < cālāñ-sāi > *serviceable*; মাপসই < māpā-sāi > (*article*) *to measure*; টেক্সই < tēkā-sāi > *durable*; etc.

Some Persian words, being cognate with Sanskrit ones, are so very similar to the latter that their Indian or Indianised forms are employed: e.g., Persian < -istān > in names of countries occurs in Bengali in the Sanskrit form < sthāna > : e.g., হিন্দুস্থান < Hindu-sthānā >, আফগানিস্থান < Āphagāni-sthānā >, তুর্কীস্থান < Turkī-sthānā >; Persian < -mand > often becomes মন্ত < māntā >, e.g., দৌলতমন্ত < dāulat-māntā > beside শ্রীমন্ত < śrī-māntā >, and Persian < nāmah > is hardly felt to be foreign in the Bengali নাম < -nāmā >.

Other Persian affixes or words like < -yandah, -andāz, pōś > appear only in Persian words borrowed in the language, and as they are not used with native words, they cannot be said to have as yet become naturalised.

## [B] PREFIXES

### [I] PREFIXES OF NATIVE ORIGIN: TADBHAVA AND TATSAMA.

**469.** Bengali has a few prefixes which are living ones, employed in forming words. The following are the *tbh.* and *ts.* prefixes found in use.

(1) অ, আ < ḣ-, ā- >, অনা < ḣnā- > : Privative, Pejorative.

OIA. initial < ḣ- > normally became < ā- > in Bengali (see *supra*, p. 314), but the influence of Skt. restored the < ḣ- > [=ə] in most cases. This prefix অ [ə] is not mutated to [o] even when the following syllable has [i] or [u] (see p. 396). Examples: আনুনি < ā-luni < \*ā-lōṇi-I > not

*salted (as of curry)* (a-lavaṇ-ika); আকাচা < ā-kācā > *not washed (as a dhōtī)*; অবন্তি < ḡ-bānṭ-i > *disagreement* (বন  $\sqrt{bān}$  *to make up*); আকঁড়া < ā-kāṛā > *not cleaned (as of rice)* (a-kaddhia, \*a-kaṇḍia = a-kṛṣṭa); MB. st̄s. আবৃদ্ধিয়া < ā-buddhiyā > *without intelligence*; অশুধ < ḡśudhə >, *mourning, ceremonial uncleanliness, often written ওয়ুধ < ḡśudhə >* (a-śuddha); MB. (SKK.) আদেখ < ā-dēkhā > *not seen*, আদিবস < ā-dibāsə > *bad day*, আবেলা < ā-bēlā > (NB. অবেলা < ḡ-bēlā >) *bad time*; আধোয়া < ā-dhōā > *not washed*; অকেজো < ḡ-kejō < \*ā-kāj-uā > *good-for-nothing*; MB. আকারণে < ākāraṇē > *without any reason*; আজান(ি), অজানা < ā-jān(ā), ḡ-jānā > *unknown*; অবর < ḡ-ghārə > *bad family*; আঘাট < ā-ghāṭə > *a bad 'ghāṭ'*; অবিষ্ট < ḡ-biyā-tā >, see p. 704; etc.

We have also hybrids like অহিন্দু < ḡ-hindu > *non-Hindu, un-Hindu*, অপুষী < ḡ-khuśi > *displeased* (Persian < xūši >), অহিসাবী *unmethodical* (Perso-Arabic < ḡnisāb > *accounts*).

OIA. < ān- >, before vowels, is the source of the Bengali অনা < ḡnā >, through the occurrence of forms like < an-āgata, an-āvṛṣṭi > etc.: st̄s. অনামুখ < anā-mukhə > *evil-face*, অনাছিষ্ট, অনাস্থিষ্ট < anā-chiṣṭi, anā-sṛṣṭi > *extraordinary (in a pejorative sense)*.

(2) অ, আ < ḡ-, ā- >: Intensive > Pleonastic.

**470.** It is found in some MB. and dialectal NB. words. See *supra*, p. 378. Possibly it is a semantic development of the negative অ, আ above. The OIA. particle (later prefix) < ā > could not continue its force in NIA., as it was assimilated through phonetic decay in MIA. Examples: অমন্দ < ḡ-māndā > *bad*; অবৃথা, আবৃথা < ḡ-bṛthā, ā-bṛthā >, < obretha > in the ‘Crepar Xaxtrer Orthbhed’ (see p. 234)=< vṛthā >; অবোর নিদ্রা < ḡ-ghōṛḍa nindrā > = < ghōṛā nindrā > *deep sleep*; অবঙ্গা, আবঙ্গা < ḡ-rāṅgā, ā-rāṅgā > *coloured*; অকুমারী, আকুমারী < ḡ-kumārī, ā-kumārī > *virgin*, < ocumari > in the ‘Orthbhed’.

Connected with the above would seem to be an আ < ā- > prefix, indicating ‘similarity’ or ‘resemblance’: e.g., আকাঠ, -ট < ā-kāṭ(h)ə > *like a log* > *idiotic*; আখ(ই)ভা < ā-khāmbhā, -khāmbhā > *like a pillar (slang)*;

আভজা « *ā-bhājā* » *slightly fried* < *not properly fried* (here = the privative or pejorative « *ā-* » ?).

(3) কু « *ku-* ».

**471.** Pejorative, from OIA. « *ku-* ». This prefix also is used as a noun in Bengali, meaning 'something bad.' Examples: কুকাজ « *ku-kāj* » *bad deed*, কুচাল « *ku-cāl* » *bad ways*. There are also hybrids—কুনজর « *ku-nājṛ* » *bad sight* > *eye of displeasure* (or of sensuality) (Perso-Arabic « *nazr* »), কুকেচ্ছা « *ku-kecchā* » *scandal* (Perso-Arabic « *qissah* »), etc. (The OIA. « *dus-*, *dur-* » *bad* has not been naturalised in the same way.)

(4) দৰ « *dār*- ».

**472.** A diminutive preffix, meaning *half, a little*, from MIA. « *dara* » (cf. Pischel, 'Grammatik der Prakrit-sprachen,' § 222) from OIA. « *√dr* » *to break*: e.g., দৰকাচা « *dār*-kācā » *half-unripe*, also † দৰকচা, দৰকোচা « *dār*-kācā, *dār*-kōcā », *not properly matured*; দৰপাকা « *dār*-pākā » *half-ripe*. It is a rare and practically an obsolete affix.

(5) নি « *ni-* », *sts.* নিৰ « *nir-* ».

**473.** Privative affix, from OIA. « *nih*, *nir* ». Through Skt. influence this affix also occurs as নিৰ « *nir* ». Examples: নিভুল « *ni-bhul* » *faultless, without a mistake* beside নিৰ্ভুল, 'নিৰ্ভুল' « *nir-bhul* », *nibbhul* ; নিৰ্খৃত « *ni-khūt* » *without a blemish*; নিৰ্গাহ, নিৰ্গান্তি « *ni-gāh*, *nir-gāñi* » *without any village home*; নিৰ্ধান্তি, নিৰ্ধাউন্তি « *ni-khā-(u)nti* », feminine from « \*ni-khā-wantā » *one who does not eat*; নিৰাই, নিৰাস, নিৰাও « *ni-nāi*, *ni-nāy*, *ni-nāo* » *one without a boat*; *sts.* † নিৰুদ্বিশ « *ni-uddis* » *beside* নিৰুদ্বেশ, নিৰুদ্বিশ « *nir-uddes* », *nir-uddis* (= *nir-uddēśa*); † নিৰাইক « *ni-khāik* » *one who does not eat*; MB. (SKK.) নিৰাধি, নিৰাধিতী « *ni-māthi*, *ni-māthiti* » *woman without protector* (*ni* + *māthā* < *mastaka-* + *ikā*, etc.); নিৰাজ « *ni-lāj* » *shameless*; নিৰয় « *ni-dāy* », নিৰকৃণ « *ni-kāruṇa* » *pitiless*; etc., etc.

It is found also in verbs and other forms, like নিৰা « *nibā* » *to extinguish* (*nir-vā*), where its force as a prefix is now lost.

(6) বি « bi- », rarely বে « bē- ».

474. Privative and pejorative = OIA. « vi- »: e.g., বিশোড় « bi-jōṛ় » without a *match*, *odd*; MB. বিবুধি « bi-budhi » (=dur-buddhi); বিকরণ « bi-kāruny় » (=niṣ-karuṇā); বিহৃত « bihār় » to turn wrong (=vi-ghāta-); etc. বেজম্মা « bē-jāmmā » beside বিজন্মা « bi-jānmā » *bastard* (=vi-janman); etc. Cf. OB. (Caryā 32) « khāla-bikhālā » = « khāta- + vikhāta ».

(7) স « sa- ».

475. Skt. « sa- », *along with*, is used in Bengali in an intensive or ameliorative sense: e.g., সঠিক « sā-ṭhik় » beside ঠিক « ṭhik় » *true, correct*; সকাল « sā-kāl় » *early, morning* (as opposed to বিকাল « bi-kāl় » *afternoon, evening*); so সবের « sā-bēṛ় » *morning, early*, as opposed to অবের « ḥ-bēṛ় » (< vēlā); etc. সাবকাশ « sābākāś় » (=avakāśa), সক্ষম « sā-kṣām় » (= kṣama); etc. From the Persian « nābālig » > নাবালক « nābalāk় » *minor*, a form সাবালক « sā-bālāk় » *major*, as if with this prefix, has been formed.

The old sociative or instrumental use of « sā- » has been partly revived in Bengali, and we have even a hybrid form like সবুট « sā-but় » *with boots on* (< English *boot*, as in সবুট পদাঘাত « sā-but় padāghāṭ » *a kick with the boot on*), সজোরে « sā-jōrে » *with force* (Persian « zōr »), on the model of ts. forms like « sa-vastra, sa-bala, sa-daya », etc.

(8) স্ব « su- ».

476. Ameliorative affix, used also as a noun = *something good*, (like « ku »). Examples: সুচাদ « su-chāḍ় » of *good-shape*; সুজন « su-jān় » *good man*; সুমন « su-mān় » *good-minded* (predicative adjective), *good mind* (su-manas); সুদিন « su-din় » *good day*; সুনাম « su-nām় » *good repute*; সুড়োল « su-dōl় » of *good shape*; etc. Hybrids—সুনজর « su-nājār় » *good glance, kindly glance* (Perso-Arabic « nazr »), সুখবর « su-khābār » *good news* (xabr), etc.

(9) হা « hā- ».

477. Explained as the interjection হা « hā » *alas*, which is a very likely source. It might have, however, originated from a MIA. « haa »

(=hata). Used with a few words to indicate absence of something, and a consequent yearning for it: e.g., হাপুতি < hā-puti > *a woman who mourns or longs for children*; হাতাতিয়া > হাবাতে < hā-bhātiyā > hābātē > *a beggar for bread* (lit. rice); হাঘরিয়া > হাঘ'রে < hā-ghāriyā > hāghorē > *homeless vagrant*; হাপুস as in হাপুস নয়নে কাদা < hā-pus̩ nāyānē kādā > *weep with flooded eyes*, where হাপুস may be from \*হাউস < hā-wus̩ > from < hā, ha(t)a > + < √vṛ̥ṣ > *rain*; etc.

Some independent words like ভর < bhār̩ >, as in ভর-সংক্ষি or -সক্ষণ < bhār̩-sājha, -sāndhyā > *in the middle of the evening*, আধ < ādh̩ > (ardha) as in আধ-ফোটা < ādh̩-phōṭā > *half-open (flower)*, etc., occur in compounds, and these strictly speaking are not prefixes.

### [II] FOREIGN PREFIXES: PERSIAN.

478. (1) গর < gār- >, from Perso-Arabic < qair > *without*; গরমিশ < gār-mil̩ > *disagreement*; cf. গৰহাজিৰ < gār-bājir > *absent* (qair-ḥāzir).

(2) দৰ < dār- > *under, within*; দৰপতনী < dār-pattanī > *sub-tenancy*.

(3) না < nā- > *not*: e.g., না-পায়মানে < nā + pāyamānē > nā-pājjimānē < nā + pāryamānē > *when one is not able*, on the model of নাহক < nā-hāk > *without reason, without right* (nā-ḥaqq), নাবালক < nābālāk > *minor* (nā-bālig), etc. In forms like না-টক না-মিষ্টি < nā-tak̩ nā-miṣṭi > *neither sour nor sweet*, we have, however, the native Bengali negative particle rather than the Persian affix.

(4) ফি < phi- >, from Perso-Arabic < fī >, used in Bengali to mean *each*: ফি-লোক < phi-lōk̩ >, ফি-জন < phi-jāṇ̩ > (*for*) *each man*, ফি-হাত < phi-hāt̩ > *at each hand, at each step*, etc.

(5) বদ < bād- > *evil* (Persian < bad >): বদ-ৱীত < bād-rit̩ > *bad ways*, বদ-রাগী < bād-rāgī > *one who flies into a passion*, বদ-গংক < bād-gāndhā > *bad odour*, etc.

(6) বে < bē- > *without*: also used pejoratively. This affix is assimilated to the cognate Skt. < vi- >> বি < bi- >. Examples: বেহাত < bē-hāt̩ > *out of reach*; বেচল < bē-cāl̩ > *evil ways, waywardness*; বেরসিক < bē-rāsik̩ > *one who is impervious to witticism*; বে-ছেড < bē-hēd̩ > (*slang*) *off one's head, losing control over oneself* (< hēd̩ > < English *head*); বে-টাইম, -টাইম

« bē-tāim, -tāin » *in improper time* (< English *time*) ; etc. The word বেশাড়া « bēārā », of course, represents the native « vikāṭa ».

(7) হৰ « bār- » *each*, from Persian « har » : হৰবোলা « hār̥-bōlā » *ventriloquist* ; হৰ-দিন « hār-dīn » *daily* ; etc.

There are other Persian words like « bar-, sar-, kam- », but these have not as yet acquired the force of an affix, at least so far as native words or roots are concerned.

#### ENGLISH.

**479.** The English words *head*, *full*, and *half* are used in a number of compound forms with Bengali words, and have almost become affixes : e.g., হেড-পণ্ডিত « hēd-pāṇḍīt » from the Anglo-Indian *Head Pundit*; so হেড-বাবু « hēd-bābu » *chief Indian clerk in an office*; হেড-মুহূরী « hēd-muhūrī » (Pers. « muharrir », see p. 610); হেড-গোমস্তা « hēd-gōmāstā » (Pers. « gumāstah »); হেড-মৌলবী « hēd-māulabī » *Head Moulvi*; ফুলবাবু « phul-bābu » *a fop, a 'Full Babu'*; ফুল-আখড়াই and হাফ-, হাপ-আখড়াই « phul-ākhṛāī, hāp(h)-ākhṛāī » *two styles of poetical and singing contest much in vogue in mid-19th century Bengal (full, half + « ākhṛāī » gathering < « ākhṛā=akbārā » club)*. The prefix *sub-* (as সব, সাৰ « sāb-, sāb- ») is quite well-known through the occurrence of words like *sub-division*, *sub-deputy*, *sub-assistant*, *sub-overseer*, *sub-inspector*, *sub-registrar*, etc., etc., which are familiar to Bengali speakers everywhere, but it has not yet been used with an Indian word.

## CHAPTER II

### DECLENSION OF THE NOUN

#### [A] STEMS.

**480.** Bengali like most NIA. languages may be said to have started *de novo* in its morphology, having preserved but very little of the declinational system of OIA.; and the little that it has preserved consists of a few inflexions which have been generalised. MIA. considerably curtailed the elaborate declension of the noun of OIA. The various vowel and consonant stems of OIA. (as in Vedic), considerably over a dozen, were reduced to a bare six (< -ă, -ĭ, -ű; -ā, -ī, -ū > stems) in Early MIA., when < r > became < -ă, -ĭ, -ű >, and final consonants dropped off; and there were just a few relics of the other stems. They were further simplified in Late MIA., when the final long vowels were shortened (see *supra*, p. 301), and there was a general tendency to bring all declensions under the < -ă > type. Stems in < -i, -u > were gradually approximated to the < -ă > declension; < -i, -u > nouns were often extended to < -ia, -ua > by adding of < -ă < -kă, -kā > ; and new affixes in < -a > replaced older ones in < -i, -u >, like < -ira > in literary Apabhrañśa of Gujarat removing affixes like < -in, -ālu > (cf. R. G. Bhandarkar, 'Wilson Lectures,' pp. 111-114; Jacobi, 'Bhavisatta-kaha,' pp. 30\* ff.; C. D. Dalal and P. D. Gunē, 'Bbavisayatta-kahā,' Baroda, 1923, Introduction, pp. 17 ff.). Final < -i, -u > even tended to disappear from the stem, giving place to < -ă >: so that Early NIA. could inherit from Late MIA. (and from MIA. changing to NIA.) many stems in < -ă > like < rāsă (=rāsi); mună (=muni); dhună (=dhvani); gură (=guru); sāhă (=sādhu); bāhă, bābhă (= bāhu); sūdhă (= śuddhi); dēvă, dē (dēvī < dēvi >), etc. The OIA. stems were in this way reduced to the bare < -ă, -ĭ, -ű > stems in Early NIA., with < -i, -u > taking up the affixes of the < -ă > stem and at times even being suppressed in favour of the < -ă >. This is what happened in all OIA. words inherited through MIA. Late MIA. < -ă, -āă, -iă (-iă),

-uā (-ঁ) > became the long vocalic stems « -ā, -ā, -i, -ū » of Early NIA., and these long stems are preserved in most MIA. In Bengali, however, these final long vowels became weakened : « -ā » of course remained as আ « -ā » in writing (as the original short « ā » sound had become a vowel of a different quality, অ = [ɔ]), but it was not, and is not pronounced fully long ; and « -i, -ū » became « -i, -u », indifferently written long or short.

In MB., we have frequent examples of this levelling of the « -i, -u » stems to « -ā ». The nominative, through the influence of Sanskrit, may preserve or may even have restored the original vowel ; but the stem, forming the basis of the other cases, is plainly an « -ā » stem. Even ts. words follow this tendency. Thus, we have commonly ধূলি « dhuli » beside ধূল « dhūlā, dhūla » *dust*, nominative and accusative, but in locative it is ধূলে « dhūlē » (= dhūla + -ē) ; দিঠি « dīthi » *sight*, nominative, but locative দিঠে « dīthē » (= dītha + -ē) ; বেলি « bēli < \*bēli > *time of the day*, (= \*vēlikā) (beside বেল « bēla », as well as বেলা « bēlā » with « -ā » from Skt.), locative বেলে « bēlē » ; ts. nominative বুদ্ধি « buddhi », locative বুদ্ধে « buddhē », genitive বুদ্ধের « buddhēra » ; ts. অপমৃত্যু « āpa-mṛtyu », locative and instrumental অপমৃত্যে « āpa-mṛtyē » (as in the ‘Caitanya-bhāgavata’ of Vṛndāvana-dāsa) ; so in the ‘Crepar Xaxtrer Orthbhed,’ we find « xotro » = শক্ত « śātru », but locative « xotre » = শক্তে « śātrē » ; etc. Such modifications of « -i, -u » to « -ā » in the oblique are fairly common in MB. In MB., epenthesis no doubt gave to original « -i, -u » nouns (tbh. or sts. and ts.) the appearance of being « -ā » nouns in the inflected forms : e.g., চক্ষু « cākkhu, cākhu » *eye* > চক্ষ « cākh, cālkha », genitive চক্ষের « cāk-khēra », চক্ষের, চক্ষের, চোখের « cāukhēra, cālkhēra, cōkhēra » ; সাধু « sādhu », genitive সাধের « sāidhēra », instrumental সাধে, সেধে sīdhē, sēdhē », etc., which would suggest as stems \*চক্ষ \*cākkha », \*সাধ « \*sāidhā » ; so শাঠী « Sāthī » *the Goddess of children* (sāṣṭhi, cāṣṭhikā) gives শাইঠের, ষেঠের, ষাঠের « sāithēra, sēthēra, sāthēra » as if from \*ষাঠ « sāthā » : and quite a number of similar cases.

**481.** The inflexions of the seven (or eight, including the vocative) cases of OIA. tended to disappear in NIA., but some occur as survivals. Although we have in NIA. here an old instrumental or there an old

locative affix preserved, the two characteristic forms from point of view of most NIA. are (i) the nominative, and (ii) the oblique. The former roughly represents the old nominative, and the latter, frequently the sole representative of other case inflexions of OIA., rests on the original genitive or dative, locative or instrumental inflexion, to which the new case-forming post-positions are added. The juxtaposition of these two stems, nominative and oblique, is the regular rule in Western and Central NIA., in Marāthī, in Gujarātī and Rājasthānī, in Western Hindī, in Panjabī, in Lahndī, in Sindhi, and in Western and Central Pahārī. It is much confused in Eastern Pahārī. In Eastern Hindī, it has fallen into disuse in the singular noun; and it is absent in the Eastern languages, Bihārī, Bengali, Orīyā and Assamese. The declension of the noun has thus become considerably simplified in the last group.

Distinction between masculine and feminine forms is absent in Bengali and other Magadhan languages. The same inflexions serve for both masculines and neuters as well as feminines. Thus the instrumental « -ē, -ē » is found in feminine nouns like « ghaḍiē, āliē, kāliē » in the Old Bengali of the Caryās; and the old feminine inflexions (although at times found in a form like « samāhia » [= samādhyā], which is a sporadic survival in the literary language) are entirely lost.

**482.** Bengali nouns thus have come to have one declension only, irrespective of stem and gender. There are in the NB. Standard Colloquial just a few phonetic modifications in the inflexions, and these are noted below. We have in Bengali—

(1) Consonantal stems = mainly « -ā (-ā) » bases of Early MB. and OB., and Late MIA., and partly also OIA. « -i, -ī, -u, -ū » bases (see pp. 301, 305, 307, 308, 310); and ts. words with quiescent « -ā »; and also foreign words ending in a consonant.

So long as the final vowel was pronounced, the genitive affix was « -rā < -ārā » (kārā), as e.g., MB. হাতৰ, রামৰ < hātārā, Rāmārā », as well as « -ērā < -kēra » (kārya), as in হাতেৰ, রামেৰ < hātērā, Rāmērā »; but NB., which has dropped the final vowel, now does not use « -ārā > র -rā », but only « -ērā > এৰ -ērā ».

## (2) Vowel stems, simple and diphthongal:

[i] <-ā> or <-o, -ō> stems, in *tbh.* forms, representing an earlier <-āwā>; and in *ts.* and *sts.* forms, the Sanskrit <-ă> (see *supra*, pp. 302, 304, 347);

[ii] <-ā> stems, in *tbh.* nouns representing <-āă, -ăā, -ăă> of MIA. (see *ante*, pp. 302, 307); in *ts.* nouns, representing Skt. <-ā>; and in foreign nouns ending in vowels [-ă, -ə], etc., normally changing to <-ă> in Bengali (see *supra*, under 'Phonology of the Foreign Element');

[iii] <-i, -ī> stems, representing, in *tbh.* words, the MB. <-i> after a vowel or after <-h-> (=OIA. <-i, -ī>: see pp. 308-309), or the OB. <-i> <<-ikă, -ikā> of OIA. (see pp. 302, 303, 852); in *ts.* stems, the Skt. <-i, -ī, -in> are properly represented by <-i, -ī>; and in foreign words, <-i, -ī> remain as <-i, -ī> (see *supra*, 'Foreign Element');

[iv] <-ū, -ū> stems, the history of which is parallel to that of the <-i, -ī> stems: they represent in *tbh.* words the MB. <-u>, after a vowel or after <-h-> (=OIA. <-ū, -ū>: see p. 310), or the OB. <-ū> < OIA. <-ukă, -ūpă, -ukā, -upā> (see pp. 310, 311, 352); in *ts.* words, Skt. <-ū, -ū> remain <-ū, -ū>, pronounced [u] in Bengali, as well as foreign <-ū, -ū>;

[v] a few <-ē> nouns; and

[vi] <-ō> nouns; both in *tbh.* forms representing the contracted <-ă> bases of Late MIA. (cf. pp. 311, 852, 353).

Foreign words with <-ē, -ō> bases are also found.

In addition, there are [vii] diphthong stems, in *tbh.*, *ts.* as well as foreign words (see *supra*, pp. 415 ff., under 'Bengali Diphthongs').

N.B. *tbh.* vowel stems in <-ā, -ā, -ē, -ō> as a rule take the *ৰ* <-r̥> affix for the genitive, and not *এর* <-er̥>: e.g., ভালুর, পনেরু, ঘোড়াৰ, কালোৰ, আলোৰ, দেৱ ( =the surname, <-dēva>) <*bhālā-r̥*, *pānērā-r̥*, *ghōrā-r̥*, *kālō-r̥*, *ālō-r̥*, *dē-r̥*>; but monosyllabic words in <-ā> can take both <-r̥> and <-er̥>: e.g., মাঝেৰ, খৌমেৰ, ঘারেৰ <*mā-ēr̥*, *jhi-ēr̥*, *ghā-ēr̥*> (*of a blow or sore*) beside মাঝ, খৌৰ, ঘাৰ <*mā-r̥*, *jhi-r̥*, *ghā-r̥*>. OB. and MB., of course, used both <-ār̥=r̥>, <-ēr̥=r̥>, the <-r̥> form being found compounded with Late MIA. bases in <-ă>. In OB. and

MB. (unlike NB.) « -ér় » seems to have been preferred with *tbh.* as well as *ts.* forms in « -i, -I, -u, -ū »: e.g., *Caryā* 19 « dōmbiēra » = NB. ডুম্বীর « dumññir় » of a *Dōm* woman; মুনিরের beside মুনির « muni-ér়, muni-r় » of a sage; বহুরের beside বহুর « bāhu-ér়, bāhu-r় » of many; etc. Except in the case of diphthongs ending in « -i, -u », and in the diphthongs « -ao, -āo » with which euphony in NB. demands that « -ér় » is to be used, all NB. « -i, -I, -u, -ū, -ē, -ō » words take « -r় ». *Tatsama* or foreign words in « -় », however, can use either « -ér় » or « -r় ».

The instrumental-locative in Old and Early Middle Bengali was « -ē, -ē় », in the case of all nouns ending in « -ā » or in any other vowel. NB. continues the « -ē » in what were originally « -ā » nouns (now nouns with a consonant ending through loss of the « -ā »); and in the case of nouns originally ending in other vowels, it uses the post-positional affix তে « -tē » rather than the organic one « -ē » for the instrumental and locative cases, to avoid the hiatus, always after « -i, -u, -ō » vowels, and optionally after « -ā »<sup>1</sup>: e.g., লোকে « lōk-ē < lōk় » on, by or with a man; but ঘোড়ায়, ঘোড়াতে « ghōṛā-ē > ghōṛāy, ghōṛā-tē » on or with a horse; মাতে কৌয়ে « mātē jhiē » mother and daughter both (instrumental and nominative), beside মাতে কৌতে and মাতেতে কৌয়েতে « mātē jhi-tē, mā-ē-tē jhi-ē-tē »; Early Bengali বাবুরে « bābu-ē », NB. বাবুতে « bābu-tē » on or by a gentleman; Early Bengali মুনির « muni-ē », NB. মুনিতে « muni-tē » on or by a sage, etc. Assamese, and numerous dialectal forms of Bengali as well, stick to the instrumental, and avoid this further confusion between the locative and the instrumental by importing the « -tē » which has now come in the « sādhu-bhāṣā » and the Standard Colloquial.

The above are the slight alterations which are noticed in the use of some of the inflexions with the Bengali noun stems, and being recent, and essentially phonological, they cannot be said to mark out any distinction in the stem of the noun in Bengali.

<sup>1</sup> One may compare the importation of [t] in the popular French of Paris to avoid the hiatus (cf. Henri Banche, 'Le Langage populaire,' Paris, 1920, p. 58). See *infra*, under Cases—Nominative, Instrumental, Locative.

## [ B ] GENDER.

**483.** It has been noted above that the tendency in Apabhrañña was to generalise the inflexions of the masculine « -ā » stem. This considerably weakened the grammatical distinction between masculine and feminine nouns, and this distinction has been entirely dropped in Bengali, in its *tbh.* element. Adjectives qualifying feminine nouns (grammatical or natural) are sometimes furnished with an « -ā » or « -ikā » (*tatsama*) or an « -I, i » or « -ni, -ni » (*tatsama* or *tadbhava*) affix, e.g., পৰমা সুন্দৱী « pārāmā sundārī », তক্ষণী স্ত্রী « tāruṇī strī », বৎসহারা গাভী « bātsā-hārā gābhī » *a cow which has lost her calf*, † ভাণ্যিমানী মেয়ে « bhāgyimānī mēyē » *a woman happy in her husband's love* (a form used by women in the Standard Colloquial, « =bhāgyavatī strī »); but these feminine forms are confined to *ts.* and *sts.* words, and are entirely against the spirit of the language. (Cf. Lalit Mohan Banerji, 'Vyākaran-Vibhāsikā,' pp. 27 ff., for examples of wrong use of the Skt. feminine affixes in Bengali). In the Western Magadhan dialects, predicates referring to nouns or pronouns in the feminine gender have the feminine affix « -I, -i », but in the declension there is no distinction, such as we find for instance in Western Hindi and Marāthī.

Grammatical gender may be said to be preserved in all NIA. except Magadhan. In most of them, however, the neuter has merged in the masculine: in some, like Marāthī, Gujarāti and Sinhalese, the neuter is preserved. Thus in Western Hindi, « pōthī, bāt » are feminine, as they represent the earlier « potthiā, vattā = pustikā, vārtā », and verbal predicates referring to them (in the past participle or future) as well as genitive and other adjectival forms qualifying them must be put in the feminine. This is thus a survival of MIA. conditions; and there is no survival of this kind now in the Eastern Magadhan speeches, Bengali, Assamese and Oriyā, although it exists in the older phases of the above speeches, and is still found to some extent in the Central and Western Magadhan speeches. We have in OB., and to some extent also in Early MB., a state of things almost identical with that obtaining in Western Hindi or in Apabhrañña. In the Caryās, there are numerous cases showing that nouns in « -I, -i < -ikā » and in « -ā = ts. -ā » preserved their grammatical gender, and were in the

feminine: e.g., « diṭi (=diḍhī < \*dṛḍhikā) tāṅgī » *strong axe* in Caryā 5 ; « sōnē bharitī nāwī » *boat filled with gold* (Caryā 8) ; « mēlili kācchi » *the hawser was loosened* (Caryā 8) ; « tōhōri kudjā » *thy little hut*, « tōhōra antarē mōś ghalili hādēri māli » *for thy sake the chaplet of bones has been cast away by me* (Caryā 10) ; « tōhōri bhābhariālī » *thy coquetry*, « dombi-ta āgalī nāhi echinālī » *before the Dōm woman there is no (greater) wanton* (Caryā 18) ; « maī dibi piricchā » *a question (or statement) is to be rendered by me* (29) ; « tuṭi gēli kañkhā » *the desire was destroyed* (37) ; « lāgēli āgi » *the fire caught* (47 : āgi=āgi < aggia=agnikā) ; « nia gharinī candālī lēlī » *as (thy) own wife, a Candāla woman has been taken (by thee)* (49) ; « phitili Śabarālī » *the Śabara's nature was destroyed* (50) ; etc. These would indicate that the sense of grammatical gender was quite strong in the language. Inanimate nouns, abstract, material or concrete, like « kañkhā, piricchā, nāwī, āgi, māli, tāṅgī » etc., are feminine only because of their affixes,—as much as names of persons of the female sex like « echinālī » and « candālī » ; and they as a matter of course take feminine forms of the genitive-adjective (tōhōr-i, hād-ēr-i) or attributive adjective (āgal-i, diḍh-i), or verbal predicate of participial and adjectival origin (dib-i, gēl-i). But in Early MB., this is changed, and names of inanimate objects cease to have any grammatical gender, inspite of the affix. Grammatical tradition yields to reason. In Early MB. (SKK.) there are cases like গেলী or চলিনী রাহী « gēlī, cālīnī Rāhī » *Rādhā went, Tārā pisī নির্মোজিলী « tārā pisī niyōjilī » her aunt was appointed, রোবিশী রাধিকা « rōshilī Rādhikā » *R. angered*, etc., where predicates take the fem. affix « -i, -i » when they qualify feminine nouns, names of sentient beings. In other MB. and NB., occasional cases of similar use crop up : e.g., VSP., p. 166, ব্রাহ্মণের নারী « brāhmāṇ-ēr-i nārī » *a Brāhmaṇ's wife*; and there are also in MB. stray relics of grammatical gender, like SKK. (p. 381) ছুঢ়ী « curī » *bracelet* being qualified by the feminine adjective জড়ী « jāṛī » *encrusted with gems* (jaḍita+ -ikā), and বরণে উজনী কনক বউনী « bārāṇē ujali kānaka-bāuli » *a floret of gold shining in its lustre* (KKC., p. 64).*

This early abandoning of grammatical gender in the eastern speeches has been regarded as a heritage from the non-Aryan languages current in the East, and has been connected with conditions in Tibeto-Burman, which

does not possess grammatical gender (cf. Jules Bloch, 'Langue Marathe,' § 180). The dropping of the neuter affix « -am » for the masculine « -ē < -ah » characterises the eastern Aryan speech at least as early as the time of Asōka, and in literary Māgadhi of the Second MIA. period (« phalē < phalaṁ », like « dēvē < dēvah »). The differentiation of the grammatical feminine from the grammatical masculine, or masculine-neuter, as we can see from the relics of OB. and eMB., continued in full force to the 12th century, and was even existent in the 14th. Postulating a specific Tibeto-Burman influence in doing away with the grammatical distinction of the feminine from the masculine-neuter in Late Middle Bengali and other Eastern Magadhan speeches therefore appears rather problematical. Although Assamese and East Bengali are within the sphere of Tibeto-Burman influence, West Bengali and Oriyā are removed from it. The Kōl speeches were to a large extent current in Bengal and in Northern India, and Kōl does not differentiate between masculine, neuter and feminine nouns by means of affixes. It is quite likely that in the tendency towards the elimination of the gender affixes in grammar there was the influence of Kōl speakers adopting the Aryan speech in North-eastern India from very early times. It is equally likely that the simplification was a normal development in the Aryan speech of the East, apart from questions of outside influence. On the other hand, differentiation of masculine, feminine and neuter nouns by means of affixes is characteristic of Dravidian : Marāṭhi and Gujarāṭī thus in this respect agree with Dravidian, while at the same time they preserve an OIA. conservatism. There are relics of the neuter in Western Hindi also.

Magadhan speeches including Bengali preserved the common NIA. differentiation between animate and inanimate nouns in the accusative case. This peculiarity is undoubtedly derived through contact with Dravidian (see p. 172 ; Caldwell, 'Comparative Gram. of the Dravidian Languages' 3, p. 271).

#### [ C ] NUMBER.

**484.** The dual of OIA. fell into disuse by the First MIA. period. The distinction between the singular and the plural has been maintained

intact up to Late MIA., and it continues down to the present day in a number of NIA. speeches. It is through phonetic decay (loss of final vowels) that the old plural inflexions could not be preserved everywhere in NIA. The Western languages, Marāṭhī, Gujarātī, Rājasthānī, Sindhī, Labndī, Panjabī and Western Hindī, have to a greater or lesser extent retained the plural affixes, nominative or otherwise, inherited from MIA. and OIA. Thus in Marāṭhī, in masculine nouns originally ending in « -ă », the nominative plural has lost its affix through phonetic decay and has become identical with the singular (« dēvāḥ, dēvāḥ > MIA dēvō, dēvā > dēvu, dēvā » > NIA. Marāṭhī « dēv », both sg. and pl.), but the feminine and neuter nouns preserve their affixes in the plural nominative, although in an attenuated form (*e.g.*, « iṣṭā, iṣṭāḥ > MIA. iṣṭhā, iṣṭhāo » > Marāṭhī sg. « iṭ », pl. « iṭā »; « mālā, mālāḥ > MIA. mālā, mālāo » > Marāṭhī « māl, mālā »; so Marāṭhī sg. « rāt », pl. « rātī »; neuter singular « sūtram > sūt », plural « sūtrāni > sūtē »; Sindhī nom. sg. « d'ēhū=dēśāḥ », nom. pl. « d'ēha=dēśāḥ »; nom. sg. « piu=pitā », nom. pl. « piura = pitaraḥ »; Western Hindī sg. « bāt < vārtā », pl. « bāt-ē », where « -ē » is explained as being from the neuter pl. affix « -āni », transferred to feminine nouns; etc.). The nominative affix is entirely lost in most other NIA. languages, and plural oblique cases in some instances are extended to the nominative (*e.g.*, Western Hindī « ghōṛē=ghōṛahi= \*ghōṭebhiḥ », instrumental > nominative plural). Instrumental plural and genitive plural are the two forms which survived in NIA., and these two were used for the nominative plural. (The accusative, dative, and ablative plural forms were lost in Late NIA., although Literary Apabhraṇa used the locative plural.) Typical NIA. started, therefore, with three forms to indicate the plural number: the original nominative plural, which had weakened considerably and was fast disappearing in most places; the instrumental plural in « -hi, -hī < -bhiḥ »; and the genitive plural in « -ṇa, -na ».

**485.** In most NIA. languages there is no confusion between the nominative and the genitive plurals, the latter being kept distinct as the oblique form: *e.g.*, W. Hindī « camār » (= carma-kārāḥ, carma-kārāḥ) sg. and pl., but oblique plural, never nominative, is « camārō, †camārā »

(=carma-kārānām). The instrumental supplies the nominative plural affix <-ē> of W. Hindi, as noted above ; but the genitive plural never invades the domain of the nominative plural. This distinction is preserved in Marāthī, Sindhī and other Western speeches, and also in the Eastern speeches ; although in the latter, the old genitive>oblique is found in some cases to encroach into the domain of the nominative ; e.g., Eastern Hindi nom. sg. <ghōrā>, nom. pl. <ghōrawan=ghōtakānām>, beside <ghōrawē=ghōdā(w)abi= \*ghōtakēbhīh>; Maithili <lōkani> pl. genitive originally, is commonly used as plural affix ; however, it may be said that the plural oblique is used for the oblique only. Thus in Oriyā, we have <puruṣā>, plural <puruṣē < \*puruṣahi=puruṣebhīh> but <puruṣāṇ-kā(rā)> where the form <puruṣān- <puruṣāṇām> retains its genitive function.

Evidence of Western Hindi and the Eastern languages would show that in Northern India, from the Panjab and the Midland eastwards, the instrumental assumed the place of the lost nominative, at least in masculine <-ā> nouns, from the Early NIA. or Late Apabhrañśa stage. But in Bengali, this instrumental <-ahi, \*-ai, -ē> no longer figures as an affix, although it is found in its immediate neighbour and relation Oriyā, as well as in forms of the Bihārī speeches. It is just possible that in a NB. expression like লোকে বলে <lōk-ā; bālē> people say we have in Bengali the plural <-ē <-ahi>. Cf. also expressions like চল সবে <cālā sāb-ē> come all ; সবে মিলি ভারত সন্তান <sāb-ē mili Bhāratā-sāntān> all united Sons of India ; দশে মিলি করি কাজ, হারি জিতি নাহি লাজ <dās-ē mili kāri kaj, hāri jiti nāhi lāj> ten people united we do the deed, we lose or we win there is no shame ; ŠKK., p. 192, সবে কহিব আইহনের মাে <sāb-ē kāhibā Āihānērā māē> we shall all tell Ā.'s mother. But this form can also be explained as a sg. instrumental-nominative <-ē <-ē <-ēna>. Cases of instrumental nominative like the above can thus be regarded as representing both <-ēna> >-ē >-ē, -ē> in the singular and <-ēbhīh> >-ahi >-ai >-ē> in the plural. In the ŠKK. there occur two cases সবই, সবহী <sābāi, sābhāi> (pp. 66, 336), which may represent the <\*-a(h)i> stage, rather than the emphatic particle <hi> (saba+hi) ; for in MB. the latter is commonly preserved as <hi>. Relics of the instrumental plural are found in the pronoun (see *infra*) ; but

in general, it can be said that the plural instrumental affix of OIA. is lost to Bengali and Assamese.

486. The genitive plural affix <-ānām > -nā, -nā > is better preserved in Bengali. It is found (though as a rare form) in nouns in dialectal MB. and NB., and also occurs in the pronouns ; but in the noun, its proper genitive force is now lost. It is used mainly as a secondary affix added to the nouns of multitude which are used to form the plural : e.g., Standard Bengali গুলিন, গুলান <-gul-i-n<sup>g</sup>, -gul-ā-n<sup>g</sup>> beside গুলি, গুলা <-gul-i, -gul-ā>, plural affix (< Skt. kula-); dialectal (East Vanga) Bengali আইন <আনি <-ān<-āni> as in সকলাইন, হক্কালাইন <sakkāl-āin, hāl-> all, হোলাইন <hōl-āin <\*pōlāni> sons ; Western Bengali (LSI., V, I, pp. 89, 100) মিতান-রা-কে <mit-ān-rā-kē> to friends, সাংগানগার <sāŋg-ān-gā-r<sup>g</sup>> of friends, etc. We have also in MB. সভান <sābhā-n<sup>g</sup>> all, gen. সভানের <sābhān-ēr<sup>g</sup>>. The genitive force is preserved in the pronoun : e.g., তান <tān> his (honorific), but even in the pronoun, the genitive in <-nā> has supplied the (honorific) nominative, as তিনি <tin-i>. The forms <-n-i> and <-ān-i> -āin > have their <-i> apparently from the old instrumental plural <-hi> which in this way modified the genitive before being itself lost. Maithili, Magahi and Bhōjpuriyā as well as Western Hindi also show this <-n-i> for the plural. We have another modification of <-na> in Bengali, viz. <\*-nha > -hā, -hā > as in pronominal forms like যেহ, তেহ, ঈহ <jēhā, tēhā, iħā> who, he, this (honorific), দোহ <dōhā> as in দোহে <dōhē> two (nominative), দোহার <dōhār<sup>g</sup>> of two, which may be compared with the Eastern Hindi <-nha, -nhi> as in Tulasi-dāsa. The <-ha, -hi> is difficult to explain : but it can well be due to contamination with the instrumental plural <-hi>, or the singular locative <-hi> which became the accusative (oblique) in Bengali (see under 'Locative' below).

The <-na, -n-i, -nha > -hā, -hā > form is practically obsolete in Bengali as a plural affix for the noun, agglutinated words of multitude having taken its place. In the respectful form of the verb, which represents an original plural, we have ন <-n<sup>g</sup>> : করেন, গেলেন, দিবেন, বলিতেছেন <kārēn<sup>g</sup>, gēlēn<sup>g</sup>, dibēn<sup>g</sup>, bālitēchēn<sup>g</sup>> gives or give, went, will give, is or are telling : this <-n<sup>g</sup>> represents the OIA. <-anti>, but phonologically it

cannot be the Bengali development of « -anti », we would expect « -āt » or « -āt̄ » or « -it » (*supra*, p. 502); it is certainly the genitive plural « -na » extended from the noun to the verb to indicate the plural or the honorific. In certain forms of MB. (as for example in the ‘Padmā-Purāṇa’ of Bañśī-dāsa), this verbal affix occurs as অঁই, অঁফি « -āi, -āñi », e.g., দিলাফি « dilāñi », করিলাই « kārilāi »: here it is unmistakably a modification of the nominal « -nā > -ni » as added to the verb.

The genitive « -na, -na » certainly existed in OB., but no sure example is found in the Caryās. (Cf. Caryā 18, « kājana kārana » = « kāryāñām kāraṇam » ?). So far as NB. is concerned, it occurs only sporadically, in some stereotyped plural forms, like « gulā-nā, guli-nā », and it figures in a few forms like নানান् « nānā-nā » *many, several* (nānā). Words like ভোটান « Bhōṭānā » *Bhotan country* (< ‘Bhōṭ’ or *Tibetan people*, কোলহান « Kōlhānā » *tract inhabited by the Kōls* (see *supra*, p. 2) are instances of this « -nā < -ānām »; phonetically a form like ভোটান « Bhōṭānā » cannot represent a Skt. « Bhōṭānta » *Bhōṭa frontier*, as it has been suggested by some.

**487.** In the word সবাই « sābāi » *all* (MB. সক্ষাই, সক্ষাফি « sāmbāi, -āñi », as in the ŠKK.) beside an emphatic সবাই « sābbāi » (see *supra*, p. 448), we have possibly a unique relic of the OIA. nominative plural affix: « sarvē hi > sabbā hi (generalised « -ā ») > sab(b)āi ». The force of the « -hi > -i » is no longer present. The form সবে « sābē » noted above (p. 724), may be a contracted form of it, rather than « \*sabahi ».

In the ŠKK. (p. 176) we have the following: মারস্তাক যেনা মারে। তাৱ  
পাণী না লএ পীতৱে॥ « mārṣṭā-kā jē nā mārē, tārā pāṇī nā lāe pitārē »  
*the fathers do not accept the water (offered in the Śrāddha) of him who does not strike an aggressor.* Here of course পীতৱে is merely a *sts.* form from the Skt. « pitaraḥ », familiar in many a ślōka current among the people.

**488.** Original nominative plural affix was lost to OB. Original plural instrumental certainly was used for the nominative, but it also became obsolete in OB. itself. Original genitive plural had only a very restricted use for the plural of all cases down to Early MB. To indicate the plural, which had come to be indistinguishable from the singular, some new devices came in. Of these, the most noteworthy was the affixing of

some noun of multitude to the noun. This method of indicating the plural by composition is already found in OB. as in the Caryās. Where the noun was qualified by a plural numeral, there was no necessity of compounding with a noun of multitude : e.g., « pañca vi dāla » (*with*) *five branches indeed* (Caryā 1) ; « bēni pakhā » *two wings or sides* (pakṣa- : Caryā 4) ; « cauṣat̄hi pākhuḍī » *sixty-four petals* (Caryā 10) ; « pāñca janā » *five men* (Caryā 12 : « janā=jana+ā », see pp. 658-659 ; it is not the MIA. plural nominative « -ā » : cf. NB. একজনা « ēkঘ janā » *one man*, সে জনা « sē jānā » *that man*, and পাঁচ জনা « pāñcঘ jānā ») ; « pañca tathāgata » (Caryā 13) ; « pāñca kēduāla » *five oars*, « duī māga » *two ways* (Caryā 14) ; « batisa tāntī » *thirty-two strings* (Caryā 17) ; « tini bbuana » *the three worlds* (Caryā 18) ; « tia dhāu » *three natures* (dhātu) (Caryā 28) ; etc. But in the other cases, where it was felt necessary for the plural idea to be specified, we have compounding or periphrasis : e.g., « mandala-saēla bhājai » *all the maṇḍalas are broken* (Caryā 16) ; « kulinā-jana » *people of good family*, « bidujaṇa-lōa » = « vidvajjana-lōka » (Caryā 18).

« Saēla=sakala, jana=jana, lōa=lōka » seem to have been established as plural-forming words in OB. In MB. we find গৃণ « gṛṇā », সকল « sākāla », সব, সভ, সঙ্গ « sābhā, sābā, sāṁhā » (see p. 319), আদি(ক) « ādi(ka) » and কুল « -kulā », among others. The last is the source of the common pan-Bengali affix for the plural, গুল « -gulā » (-kula-ka > MB. -kulā, -gulā), extended to গুলা « gulā » < (\*-kulāka) : by Vowel-Harmony গুলো « gulō »), গুলান « gulā-nā » < (\*-kulāka) : by Vowel-Harmony গুলান « gulā-nā » < (\*-kulāka) : by Vowel-Harmony গুলাইন « gulāin < \*gulā-n-i » with the « -na » from the old genitive (see p. 725), and গুলি « -guli » (to denote prettiness, loveliness or prettiness of the object whose plural it indicates is really the feminine : < \*-kulikā » : see pp. 672, 673, 686), and we have further an extension গুলিন « -gul-i-nā ». In addition, we have extensions of « -gulā » with the pleonastic ক « -kā » (গুলাক « -gul-ā-kā », গুলিক « -gul-i-kā ») which are found mostly in West Rāḍha. This *sts.* form with the « -k- » in an intervocal position softened to « -g- », seems to have been quite common from Early MB. times ; but literary Bengali preserves the *ts.* « -kulā » > *kulā* as well, as in অলিকুল « alī-kulā » *bees*, কামিনীকুল « kāminī-kulā » *ladies*, ধেনুকুল « dhēnu-kulā » *cows*, পাখীকুল « pākhī-kulā » *birds*. In dialectal

Bengali, « -gulā, -gulā, -gulān » become গুনো « -gunō » (Calcutta and surrounding tracts), গিলা, গ্লা « -gilā, -glā » (North Bengali), and উন, গিন « -un, -gin » (Chittagong).

**489.** There is in NB. the affix দিগ « -dig় », genitive দিগের « -digের » which is used with names of animate, preferably sentient and intelligent beings, in the plural forms of the *oblique* cases. The affix is never used for the nominative. দিগ, দিগের « -dig়, -digের » are « sādhu-bhāṣā » forms; in the specimens of prose in the Late MB. and Early NB. periods, a form দিগৰ « digার » also occurs side by side with দিগ « -dig় ». The equivalents of দিগ, দিগের « -diga, -digের » are common in West Bengali, specially in the Standard Colloquial, and are দি, দিপ্য and দেৱ « -di, -dig-, -dēr » . The affix seems to have been of Central Rādhā origin: it is not found in East and North Bengali dialects, where its occurrence at the present day can without difficulty be explained as being due to the influence of the « sādhu-bhāṣā » as well as of the Standard Colloquial. The use of this affix, both with organic inflexions and with post-positions, is indicated below, with the word মানুষ « mānus় » *man*.

*Accusative and Dative :* Sādhu-bhāṣā মানুষদিগকে « mānus়-dig়-kē », মানুষদিগেরে « mānus়-dig-ēr-ē », archaic মানুষের দিগবে « mānus-ēr-ēr » digār-ē », মানুষের দিগৰকে « mānusēr-ā-digār-ā-kē » ; Standard Colloquial মানুষদিগকে « mānus়-di-kē », মানুষদিগে « mānus়-dig-ē », মানুষদগকে « mānus়-dig(়)-ke », also « mānus়-dikkē », beside the genitive মানুষদেৱ, মানুষদেৱে « mānus়-dēr », mānusেdēr », and the genitive plus the dative or accusative post-position কে—মানু(়)ষদেৱকে « mānus(়)-dēr-ā-kē » ;

*Instrumental :* Sādhu-bhāṣā মানুষদিগ-ঘারা, -কর্তৃক « mānus়-dig়-dwārā, -kārtṛk় » মানুষ, মানুষের দিগৰ (দিগের) ঘার « mānus(়)-digār-(-digের) dwārā », etc.; Standard Colloquial মানুষদেৱ দিয়ে < দিয়া, -ঘারা < mānus়-dēr-ā-diyē < diyā, -dwārā », etc.;

*Ablative :* Like instrumental, with হইতে, হ'তে « hāitē, hōtē », থাকিয়া, থেকে « thākiyā, thēkē » etc., in the place of instrumental post-positions.

*Genitive* : Sādhu-bhāṣā মানুষদিগের, মানুষেরদিগের < mānus(ēr) -digēr >, মানুষদিগর < mānusā-digār >, archaic and rare মানুষের দিগরের < mānusēr digārēr >; Standard Colloquial মানুষদের, মানুষদের < mānus-ēdēr, mānusā-dēr >, মানুষেরদের < mānusērā-dēr, mānusēddēr >;

*Locative* : Sādhu-bhāṣā মানুষদিগতে, -'দিগতে' < mānusā-digā-tē, -digē-tē >, archaic মানুষের দিগতে, মানুষের দিগরেতে < mānusēr digār-ē, -digār-ētē >; Standard Colloquial মানুষদেরতে < mānusā-derā-tē >, মানুষদিগতে < mānusā-digētē > (rather uncommon for the locative: the Standard Colloquial would prefer the form মানুষ-গুলিতে, গুলাতে < mānusā-gulī-tē, -gulā-tē > etc.)

The affix is thus in three forms, -দি -দ <-di-, -d->, দিগ <-dig(ā)-> and দিগর <-digār >. The last form apparently has a র <-r > which is not the genitive affix. It is frequent in letters and documents and in prose generally from the 18th century onwards, but it became obsolete by the middle of the 19th century. This দিগর <-digār > is only an artificial form built on the proper genitive দিগের or দিগর <-dig-ēr, -dig-ār >. It came to be established through a confusion with the Persian < digar > another, more, and the rest, etc. Persian < digar > occurs frequently in the highly Persianised Bengali of the law courts: a form like মানুষের দিগরকে < mānusēr digār-kē > to men arose probably in the early 18th century in the law courts; and when a prose style came into being in Bengali about that period, it had to be based as a matter of course on the only prose that was current, viz., in legal and epistolary documents. The curious form দিগর < digār >, which is thus merely the native দিগ-র, দিগের <-dig-ār, -dig-ēr > mistaken for the Persian word, in this way came to be accepted in the < sādhu-bhāṣā > in its formative and early periods. The confusion between the native affix দিগ <-digā > and the Persian < digar > is plain: we have তাহাদিগকে, তাহাদিগের < tāhā-digā-kē, tāhā-dig-ēr > to them; and a Persianised expression তাহার দিগবকে < tāhār digār-kē = to the others of his (group) > to them could easily be evolved when the form <-dig-ār > was handy in the language. With the decay of Persian influence upon Bengali, the form দিগর < digār > has become obsolete.

The persistent use in many Late MB. and Early NB. prose documents of the form দিগৰ < digār̥ > as a separate plural forming post-position, like সব, সকল < sāb̥, sākāl̥ > and the rest, has thrown some Bengali scholars off their guard, and has been responsible for the assumption that দিগৰ < digar̥ > and -দিগ, -দিগের, -দি, -দেৱ, < -digā, -dig-ēr̥, -di, -dēr̥ > etc. are derived from the Persian word.

There is no affix corresponding to -দিগ, -দিগের, -দি, -দেৱ < -digā, -di, -dig-ēr̥, -dēr̥ > in any other NIA. language. It does not occur in OB. There has been some speculation about the origin of this group of affixes. (Cf. Beames, 'Comparative Grammar of the Modern Aryan Languages of India,' II, London, 1875, p. 200, Bengali Grammar, Oxford, 1894, p. 20; R. G. Bhāṇḍārkar, Wilson Philological Lectures delivered in 1877, Bombay, 1914, pp. 238-239; A. F. R. Hoernle, Gaudian Grammar, pp. 190-191; Chintāmanī Gāṅguli, Bengali Grammar, Bengali year 1288, p. 40; Rabindranath Tagore, 'Śabda-tattwa,' pp. 85-90.) But there is nothing in MB. to warrant an affiliation to an obsolete genitive affix < -dā > (Hoernle), to a plural form < \*-nhi-kēra > \*-ndigēra > -digēr̥ > (Rabindranath Tagore), or a derivation from a Skt. < diś, dik > *direction* (Beames and Bhāṇḍārkar), or from a Skt. < dīrgha > (Gāṅguli).

The proper source of -দিগ, -দি < -digā, -di > is undoubtedly the *ts.* word < ādi > which came into wide use in Eastern Rādhā from the Second MB. period. Rai Bahadur D. C. Sen suggested < ādi, ādi-ka >, so commonly found in MB. literature from the 16th century onwards (and certainly earlier still) as having developed into the NB. affix. (Cf. 'Vāṅga-bhāṣā Ū Sāhitya<sup>4</sup>', pp. 33, 34, 235, 332). It would be noted that in MB., আদি < ādi > and its extension আদিক < ādi-ka > are used for the nominative as well. The words are used in MB. mainly after proper names, but they are found with other nouns, masculine as well as neuter. The sense is not exactly of the plural, but of 'and the like,' 'and the rest.' Thus, in the 'Narottama-Vilāsa' of Narahari Cakravarti (c. 1614-1625), we have—

ঐছে কত কহি অধ্যাপকে হিৱ কৈলা।

প্রাতঃকালে মানাদিক করি সজ্জ হৈলা॥

বিনা যানে রাজা অধ্যাপকাদি সনে ।

গেলেন খেতরি শীঘ্ৰ গৌৱাম প্ৰাঙ্গণে ॥.....

মহাবিজ্ঞ রামচন্দ্ৰ গোবিন্দাদি তথি ।

কৈল সৰাদৰ সবে হৈলা হষ্ট অতি ॥ (VSP., II, pp. 1244-1245)

*In this way saying a great deal, he made the scholars quiet ;*

*In the morning-time, having finished his bath and other duties, he was dressed ;*

*Without a vehicle the king, with the scholars and the rest,*

*Went quickly to Khetari, to the courtyard of Gaurāṅga ;*

*The very wise Rāma-candra, and Gorinda and the rest there*

*Did honour, and all were very glad.*

In some cases, we find the phrase আদি করি সবে « *ādi kāri sābē* » all with so-and-so at the head=so-and-so and others, rather than the simple আদি or আদিক « *ādi, ādi-ka* ». This « *ādi-kāri* » must have had something to do with the evolution of দিগৰ « *digārā* » discussed above.

As yet the more common plural-affix is গণ « *gāṇa* », at least in literature ; but the « *ādi, ādi-ka* » > « *-dā, -digā* », for the plural oblique seems to have been well-established by the end of the 15th century : তোমাদের « *tōmādērā* » your, for instance, is found in Kṛttivāsa’s ‘Rāmāyaṇa, Ayodhyā-kāṇḍa’ (pp. 29, 30, VSPd. edition, MS. of c. 1602 A. C.) as well as in ‘Uttara-kāṇḍa’ (e.g., p. 194 ; MS. of c. 1580 A.D. ; the MSS. are late, and it cannot be ascertained whether « *-dērā* » was actually in use in Kṛttivāsa’s time, 15th century, but in all probability it was).

MB. ts. « *ādi* » would naturally become « *āidā, āid* » by epenthesis : মানুষাদি « *mānuṣādi* » would become মানুষোদি « *\*mānuṣāid* », genitive মানুষোদেব « *\*mānuṣāidērā* », whence N.B. মানুষদেব « *mānuṣēdērā* », which is still common, and then by dropping of the « *-ē* », মানুষদেৱ « *mānuṣā-dērā* ».

We even now invariably say রামদের « Rāmēdēr় » of *Rāma and his people* = « \*Rāmādērā < Rāmādi, Rāmāid + -ērā »; and রামদের « \*Rām-dērā » is not heard at all: the old full form is preserved in this case, where we have a proper name, and the sense too is the old one of a group rather than of the plural. The « ā » of « ādi, ād » came to be linked with the preceding word, and gradually « -di, -d » alone had the force of an affix. Then it came to be used with nouns ending in vowels like « -i, -u »: e.g., পাখীদের « pākhi-d-ērā » of *birds*, গোকুলের « gōru-d-ērā » of *cows*. The intermediate stages are not preserved in MB. literature, as the literary language scorned to have colloquial forms as yet not fully established. The form দি « -di » without epenthesis, is found, but it is rather rare in the Standard Colloquial (see under accusative above, p. 728). আদিক « ādi-kā » became আদিগ « ādigā » by voicing, as in the case of গুল « কুল- « -gulā < kula- ». The « ā » was assimilated with the ending of the preceding word, and there was not much scope for epenthesis here (to a possible « \*ādgā »): and the « -kā » form seems to have been rather a learned and artificial one than colloquial—the result of an attempt to give a respectable look with the all-useful « -ka » to a vernacular form in « -di, -ādi ». দিগ « digā » also came to be generalised, like দি, দ « -di, -d় » with words in « -i-, -u » vowels. The genitive form of দিগ is দিগের « digērā=digā+-ērā »; and দিগাৰ « digārā=digā+-ārā » also is found. It would not be correct to derive দিগেৰ form আদি-কেৱ « ādi-kēra », regarding the case as one of retention of the older MIA. form of the common Bengali genitive affix « -ērā »; the occurrence in MB. of আদিক « ādi-kā » is against such a derivation. Rai Bahadur Y. C. Vidyānidhi, while accepting « ādi » as the source of the Bengali affix, suggests that « ādi + kāra » > দিগাৰ « \*digārā » was the original form of দিগেৰ « digērā » (Bengali Grammar, VSPd., p. 196), which has the « -ā » changed to « -ē- » through Vowel Harmony (see pp. 400 *supra*); but the need to postulate a MB. « \*digārā » is equally unnecessary.

**490.** The *tbh.* word সব « sāb় », strengthened in MB. by the *sts.* সভ « sabhā < sabhā < sabhā », the *tbh.* or *ts.* words কুল- > গুলী « kulā- > gula- », জন « jān় » and গণ « gān় », and the *ts.* or *sts.* আদি, আদিক > দি, দিগ « ādi, ādi-ka > -d-, -digā », have thus furnished to Bengali a set of new

agglutinated plural affixes. There are other *ts.* words of multitude loosely agglutinated to indicate the plural in the « sādhu-bhāṣā »—e.g., « samasta, sakala, samūha, varga, lōka, caya, nicaya » etc. The Perso-Arabic « māḥal » is also similarly used, though in a restricted way, e.g., বন্ধু মহল « bāndhu-māḥal » *society of friends=friends*, ৰাজনৈতিক মহলে « rājñātik-*māḥal-ē* » *among politicians*, etc.

The case affixes and post-positions are placed after the noun of multitude agglutinated, and this system has its parallel in the agglutinative system of Dravidian, e.g., மாணு-ஞா-கே « māṇus-*gulā*-kē » *to men*, cf. Tamil « manidañ-gaḷ-ukku ». Here of course we have only a fortuitous resemblance, there being no genetic connexion whatever between the very late Indo-Aryan « -gulā, -kē » and the Dravidian « -gaḷ, -ukku ».

Of the above nouns of number, সব « sābā », সকল « sākāl » sometimes সমস্ত « sāmāstā », and অনেক « ānēk » (MB. আণেক « āṇēkā ») which indicate merely number and not grouping, are loosely compounded with nouns as attributives to express the plural. This is found from the oldest period of Bengali: e.g., Caryā 1, « saala-samāhia » *with (all)* *samādhīs*; ŠKK., p. 1, সব দেৱেঁ মেলি সভা পাতিল আকাশে « sābā-dēbē mēli sābhā pātilā ākāsē » *the Gods having met held a gathering in the sky*; ibid., p. 1, ব্ৰহ্মা সব দেৱ লাঁজা গেলান্তি সাংগৰে « Brāhma sābā-dēbā lāyā gēlānti sāgārē » *B. taking the Gods went to the sea*. In NB., the noun qualified can optionally take a second word at the end, or the affix « -ērā, -rā » (see *infra*).

Other forms of periphrasis are found from the Early MB. period: the pronominal adjective জত, যত « jātā » *as much* is used attributively, singly or with সব « sābā », গৰ « gānā » etc.: e.g., Early MB. (ŠKK. p. 19), বত নানা ফুল পান কৰপুৰ সব পেলাইল পাএ « jātā nānā phulā, pānā kārāpurā, sābā pēlāiilā pāē » *all the various flowers, betel-leaves, and camphor she scattered with her foot*. ibid., p. 237, কাহানিক দেখি যত গোপগোপীগণে। হৱে হয়লা কর্বে সজল নয়নে॥ « Kānhāñikā dēkhi jātā gōpā-gōpi-gānē, hārāshē hāyilā tābē sājālā nāyānē » *Seeing Kṛṣṇa, all the herdsmen and herdswomen through joy then had moistened eyes*. The loss of a genuine plural-forming affix had placed the language in this difficulty.

Plural nouns qualified by demonstratives solve the difficulty by adding the noun of multitude to the pronoun: e.g., সে-সব কাজ « sē-sāb় kāj় » *those works*, এই-সমস্ত কথা « ēi-sāmāstā kāthā » *these talks*, etc. This usage is found in the ŚKK.: e.g., p. 18, এতেকে এ সব কাজের প্রকার জান্ব আশ্বে বিশেষে « etekē ē-sābā kājērā prākārā jānghā āsēshē bisēshē » *in this way know thoroughly and in detail the method of these works*; p. 33, এ সব গোপবধূজন লঞ্চা কথা না ধার্স বড়ান্নি « ē-sābā gōpā-bādhū-jānā lāyā kāthā nā jāsi bārāyi » *taking all these wires of the herdsmen, where indeed dost go, old mother!* p. 56, এ সব চরিতে « ē-sābā cāritē » *with these deeds*; etc., etc.

**491.** The commonest N.B. affix for the plural is রা or এরা « -rā, -erā » which is now organic or inflexional in its nature, although in origin it is post-position. রা, এরা « -rā, -erā » are only extensions of the genitive bases in ৰ, এৱ « -rā, -erā » by means of the আ « -ā » affix. Originally, there was a noun of multitude after the strengthened genitive in « -ā ». This stage is still found in the Maithili « hamarā-sabh, tōharā-sabh » *we, ye*; and in Bengali, the noun of multitude can be optionally used, and as a matter of fact is still frequently used in the colloquial as well as in the literary language (of both prose and poetry); e.g., আমৰা সব « āmrā-sāb় » *we*, তোমৰা সব « torā-sāb় » or তোমৰা সব « tōmrā-sāb় » *ye*, বামুনেরা সব « bāmunerā-sāb় » *Brāhmans*, রাজাৰা সব « rajārā-sāb় » *kings*, পাখীৱা সব « pākhīrā-sāb় » *birds*, etc. It is like « mama gaṇāḥ » or « māmakāḥ sarvē » for « vayam ». In N.B., however, the noun of multitude is ordinarily felt to be superfluous. The genitive form with its « -ā » of definitiveness (see *ante*, pp. 658-659) could be easily distinguished from the ordinary genitive of connexion which does not have the « -ā ».

The use of the strong genitive with the noun of multitude came into being with the pronouns of the first and second person, when the old plurals আঙ্কি, আক্ষে, আমি « āmhi, āmhē, āmi » and তুঙ্কি, তুক্ষে, তুমি « tumhi, tumhē tumi » first became honorific singular and then ordinary singular. New plurals were found out; either by mere juxta-position, as nominative আঙ্কি সব, আমি সব « ām(h)i-sābā », তুঙ্কি সব, তুমি সব « tum(h)i-sābā », oblique আক্ষা (আমা) সব « ām(h)ā-sābā », তোক্ষা (তোমা) সব « tōm(h)ā-sābā », the case affixes

and post-position being added to সব « sâbâ »; or by means of the strong genitive, e.g., আক্ষাৱা, আমাৱা, আমৱা সব « āmbā-r-ā, āmā-r-ā, āmā-r-ā sâb(h)â » we, তোক্ষাৱা, তোমাৱা, তোমৱা সব « tōmhā-r-ā, tōmā-r-ā, tōmā-r-ā sâb(h)â » you. Both the types are found in MB. literature. With the demonstrative and other non-personal pronouns, however, « sâbâ » is employed in NB. only to indicate inanimate objects, and to indicate animate objects সব « sâbâ » must be used with the রা « -rā » form: e.g., এ-সব « ē-sâbâ » these things, মে-সব « sē-sâbâ » those things, and এৱা « ē-râ », এৱা-সব « ē-râ-sâbâ » these people, তাৱা « tā-râ » they, those people (but এ-সবলোক « ē-sâbâ lôkâ » these men, মে-সব ছেলে « sē-sâbâ chelê » those boys). The method by simple juxtaposition of « sâbâ » to the base has not yet become obsolete in NB. The simple strong genitive, without adding the noun of multitude, already came into being in the 14th century. But it was still not very popular, and was confined to the first and second personal pronouns apparently. In the ŠKK., there are only 3 instances of it:

- p. 202, আজি চৈতে আক্ষাৱা চৈলাহ্নী এক মতী ॥  
 « āji hāitē āmhârâ hâilâhô (= hâilâô) ēka-matî »  
*From to-day we have become of one accord.*
- p. 232, পুছিল তোক্ষাৱা কেহে তৱাসিল মনে ॥  
 « puchilâ tōmhârâ kenhê târâsilâ manê »  
*Why did ye ask with a mind afraid?*
- p. 263, আক্ষাৱা মৱিব শুণিলে কাশে ।  
 « āmhârâ mâribâ śuṇilê Kâshê »  
*If Kamâsa were to hear, we shall die.*

The « -râ » plurals for the pronouns seem to have been well-established in the 15th century: তোমৱা, তাৱা, টৈহাঁৱা, ঘোৱা, আমৱা « tōmârâ, târâ, ihârâ, môrâ, āmârâ » etc. are quite frequent in the 1580 and 1602 MSS. of the Uttara and Ayôdhyâ-Kândas of Kṛttivâsa's 'Râmâyana.' It was during this century also, apparently, that the « -râ, -érâ » affixes were extended to nouns. Thus in Vijaya-gupta's 'Padmâ-purâna' (last quarter of the 15th century: edition by Pyârî-Môhan Dâs-Gupta, Calcutta, 1818, from late MSS., modernised to a great extent), we find ছেলেৱা « chelê-râ » (for

« chāllā-rā ») children (p. 12), কাজীরা « kājīrā » the Qāzīs (p. 55), বাপুরা « bāpurā » good men, fathers (a term of address: p. 149), কামারেরা « kāmārērā » black-smiths (p. 169), শিবেরা বাপে ঝী « Sibērā bāpē jhī » they together, Śiva the father and (Padmā or Manasā) the daughter, lit. the Śiras, father and daughter (p. 219), etc., beside তা(হা)রা « tā(hā)rā », মোরা « mōrā » (pp. 53, 54), তোরা « tōrā » (p. 71), etc., etc. In MB. from the 16th century the use of « -rā, -ērā » is steadily on the increase, although it looks as if it was not favoured by literary Bengali of the Late MB. period. The « sādhu-bhāṣā » of the 19th century similarly preferred compoundings with « gāṇḍ, sāmūhā, sākālā » etc.; but « -rā, -ērā » are at the present day commonly used both in the « sādhu-bhāṣā » and the Standard Colloquial and it is found in all the dialects. In the « sādhu-bhāṣā » and the Standard Colloquial « -rā, -ērā » are used only for the nominative, but in many forms of dialectal (colloquial) Bengali, we have the « -rā, -ērā » bases employed for the genitive as well by adding the usual « -ṛā »: e.g., Standard Colloquial nomi ative তাৰা « tārā » they, genitive তাৰের « tādērā » their (= « sādhu-bhāṣā » তাৰাৰ « tāhārā » and তাৰাদিগেৰ « tāhādigērā »), but East Bengali তাৰা « tārā », genitive তাৰাৰ « tārā-ṛā »: the last is therefore a double genitive form. Similarly, there is Western Bengali (Dhalbbum) আমৰাকে « āmārā-kē » us, to us = Standard Colloquial আমাদেৱ « āmādērā »; so Malpaharia চাকৰৰাকে « cākārā-rā-kē » to servants, মিতানৰাকে « mitān-rā-kē » to friends (LSI., V, I, p. 100), etc.

The use of a form of the genitive for the nominative plural is not an isolated fact in Bengali. Apart from the genitive plural in « -rā, -ērā », we have in Bengali itself, in the Western dialects, plural forms by extension from the obsolete genitive in « -kā »: e.g., Western Bengali (Dhalbbum, LSI., V, I, p. 79) ইগা « i-gā < \* i-kā > these; (Malpaharia, Santal Parganas, LSI., V, I, p. 100) বেহিযাগা « bēhiyā-gā » courtesans, ইহাগা « ihā-gā » these, সাম্রাজ্যগাৰ « sāmṛājya-gā-ṛā » of friends; (Manbhumi, LSI., ibid., p. 97) হাতগা « hāt-gā » hands; S.W. Bengali (LSI., ibid., p. 110) ইগা « i-gā » these; etc. Among the sisters and cousins of Bengali we have similar instances, e.g., Magahi « hamar-ni » we < \* hamar > of us+genitival affix « -ni »; Bhōjpuriyā « hamani-kā, hamaran » we, « unha-kā » they,

« kēkānī, kekanī-kā » *who?* (pl.) ; in the Baghēlkhanḍī form of E. Hindi, we have similarly « hamārē, tihārē » *we, ye* (cf. Kellogg, ‘Hindi Grammar’ p. 193). In Eastern Pahāṛī (Khas-kurā or Nēpālī), the plural affix is « -hēru, -haru » and « -ēru », with which are connected the dialectal Rājasthānī (Mālvī) plural affix « -hōr, -hōrō, -hōnō » and the Early Kanaujī (W. Hindi) plural affix « -hwār » (cf. LSI., IX, IV, p. 23; IX, II, p. 55). The source of the above would seem to be the old genitive and adjectival post-position of MIA., namely « -kara, -kēra »,—the source equally of the Bengali « -rā, -ērā » : the « h-, hō-, hē- » being possibly the « -h- » of the old oblique (cf. Hoernle, Gaudian Grammar, pp. 191, 192).

The evolution of the « -rā, -ērā » affix for the plural is comparatively a late thing in Bengali, and its derivation from « kara, kēra <kārya> » is clear ; and it cannot be in its origin a Dravidian borrowing, nor should it be compared with the Dravidian plural « -är, -ār », found in Tamil as well as in the Dravidian speeches adjoining Bengali, viz., Oraon and Maler.

**492.** In dialectal Bengali there is an affix for the plural, মৌনি « mīnā » (West Bengali, Manbhumi Dist.), or মন « mānā » (South-Western Bengali of Midnapur). This is undoubtedly the same as the affix « -māna- » which is found in Oriyā as a common plural affix (in the nominative « mānē ») : e.g., « puruṣā », pl. nom. « puruṣ-ē, puruṣā-mānē », genitive pl. « puruṣāñ-kā(rā), puruṣā-mānāñ-kā(rā) ». In the Early Oriyā of the 15th century inscriptions (see *supra*, p. 107), the form occurs as both « māṇa » (with a cerebral « ṇ ») and « māna ». The source of this form is the OIA. « mānavā », compounded to indicate the plural, like « jana, lōka ». The *tbh.* form in Oriyā gave « \*māṇā = \*māṇā » (< ava, awa> à » : see p. 346) : but when it became an affix, it was possibly confused with a *ts.* « māna » *measure*, and this has led to the spelling with a dental « -n- » which obtains now : « \*māṇavahi, māṇāhi » gave « mānē, mānē ». In OB., the word is found with the « -ā » affix, e.g., in Caryā 46 : « mōha-vimukkā jāi māṇā, tabē tuṭai avāṇā-gamaṇā » *when a man is freed from ignorance, then (his) coming and going (= samsāra) is broken*. The word is found in the Haijong dialect of East Bengali (Maimansing) as মান « mānā » *man*, and possibly it occurs in other dialects. In Bhōjpuriyā, we have « manāi », a common word for *man in general*, which

represents either a « \*mānavika » or the old Māgadhi nominative singular « mānavē » \*mānavi » : and « man » for the plural is found in the Nāgpuriyā dialect of Bhōjpuriyā, as well as in the contiguous Chattisgarhī form of Eastern Hindī. We have thus a tract of IA., embracing the Oriyā, West Bengali (in part), South-eastern Bhōjpuriyā and Chattisgarhī speeches, in which « mānava » has come to be a plural indicating word : and considering that « mānē » is in full force in Oriyā, it may be presumed that this employ originated in the old West Rādha form of Māgadhi Apabhrānsa, which was the source of Oriyā, and thence it spread to the contiguous dialects.

**493.** Early Assamese uses the words « gāna, saba (saṁha, sama), sakala » etc. to indicate the plural, just like Bengali. The use of these affixes has become obsolete now. New Assamese employs instead the words « -bilākṣ, (-blākṣ), -bōrṣ » and « -hātṣ ». All these are rare in Middle Assamese. « -bilākṣ » is of obscure origin. North Bengali has a dialectal form for the Common Bengali « -gulā, -gulākṣ », namely, « -gilā, -gilākṣ, -glā », and a connexion between « -gilākṣ » and « -bilākṣ » has been suggested ; but apart from the phonetic difficulty of the change of « -gi- » to « -bi- », there is a wide difference in the employment of this word — « -gulā » in Bengali is contemptuous, but « -bilākṣ » in Assamese is honorific. In Early Assamese, again, « -gulā(ka) » is not found at all. The Skt. work « vilōka » has been suggested as the source of « -bilākṣ » (Devānanda Bharāli, ‘Asamīyā-bhāṣār Maulik Vicār,’ Dibrugarh, 1912, p. 35). The use of the *ts.* « lōka » as an honorific plural affix in Assamese lends support to this derivation (*e.g.*, « tai » *thou*, « tumi » *you*, honorific « tumi-lōkṣ » ; so « mantri-lōkṣ » *ministers*), but the change of « ḥ » to « ʒ » is not justifiable, and this precludes the above derivation.

« -bōrṣ » may be from an IA. « bahula » or « bahala » *many*, rather than from « bhūri » (as suggested by Devānanda Bharāli, *op. cit.*) Or can it be that « -bōrṣ » and « -bilākṣ » are connected with each other, and are to be referred to a non-Aryan (Tibeto-Burman) source ? There is the common Bodō plural affix « frā, for, fūr » which comes up in this connexion : Bodō formed an important (if not the largest) non-Aryan element in Western Assam where the Assamese dialect was characterised.

Assamese « -hāṭa » represents « \*ahanta », present participle of « √ah = as », corresponding to Bengali হৈতে, হইতে « haitē », apparently used as a genitive-ablative post-position in the Eastern Magadhan dialects, and later stereotyped into the plural affix in Assamese.

494. By reduplicating the adjective, we have the sense of the plural distributive in Bengali, as in other NIA. languages : e.g., ৰড় বড় শোড়া « bāṛā bāṛā ghōṛā » *horses, each a big one*; OB. (Caryā 28) « ūcā ūcā pābata (sts.) » *hills, each a high one*; MB. (ŚKK., p. 388) ৰড় বড় গাছের « bāṛā bāṛā gāchērā » *of trees, each a big one*.

#### [D] CASE INFLEXIONS: INHERITED FROM MIA., AND NEWLY CREATED.

495. Following the method of the Sanskrit grammarians, the Bengali noun is declared to have seven cases (eight, including the vocative), which are formed by adding both inflexions and postpositions. The following are the case affixes which are added to the noun in New Bengali, like organic inflexions, as distinct from the detachable post-positional words :

Nominative : এ, ম « -ē, -y় » ;

Instrumental : এ, ম « -e, -y় » ;

Locative : এ, ম « -e, -y় » ; তে « -ta, -t-ē », এ-তে « -ē-t-ē », extended also to the Instrumental and the Nominative.

Oblique-Locative : এ, ম « -e, -y় » , occurring as the Accusative and Dative, and also in the Instrumental with the post-positional verb কৰিয়া « kāriyā » or ক'রে « kōrē » ;

Genitive : র, এর « -r়, -ēr় » ; in the plural, ত গা, গো « -gā, -gō » ;

Dative : কে, কে, এরে « -k-ē, -r-ē, -ēr-ē » .

496. Of the above, the Genitive, Dative, and Locative affixes « -r়, -ēr়, -gā, -gō ; -k-ē, -r-ē, -ēr-ē ; -ta, -t-ē » are of recent, Late MIA. origin, having developed, not from OIA. case inflexions, but from help-words which came to be combined with the stems or inflected forms of the noun in the period immediately before the NIA. stage. The other affix, the affix এ « -ē », occurring also as ম « -y় » after the « -ā » and « -ō » vowels in New Bengali, which is found in the Nominative and Instrumental, and in the

Oblique-Locative and Accusative, is the sole representative in Bengali of the OIA. case affixes, into which several OIA. cases have merged.

### NOMINATIVE.

**497.** Bengali and Assamese nominative affix has the characteristic affix « -ē ». It has become rather obsolete in West Bengali, but it is still a living form in East Bengali and in Assamese. Instances are exceedingly common in the OB. of the Caryās and in MB. of all periods. In other Magadhan Languages, « -ē » as the nominative affix (singular) is obsolete now, but the older literatures of Oriyā and Maithili show that it was formerly as much a living form as in Bengali and Assamese. See *infra* for examples.

In the old Prācyā or eastern speech of the First MIA. Period, the OIA. nominative masculine and neuter affixes « -ah, -am » both became « -ē ». The specimens of the Eastern dialect that we have all show this « -ē »—Aśokan Eastern speech, Old Māgadhi as in the Śutanukā inscription (see p. 59), ‘Māgadhi’ and ‘Ardha-māgadhi’ as in Aśvaghōṣa’s dramas (p. 59), Jaina Ardha-māgadhi, and Māgadhi of the Sanskrit drama. In Late MIA., i.e., during the Apabhraṇa Stage, this « -ē » in all likelihood became « \*-i », as we find from the evidence of some of the Prakrit grammarians. Thus Mārkaṇḍeya (17th century) in his ‘Prākṛta-sarvasva’ notes for Māgadhi that « sāu purṇsy ēd-itāu : purṇsi sāu parē ’kāra ēd-itāu syāt » : i.e., in -su, or nominative singular, masculine (and neuter), the final « -ā » becomes « -ē » and « -i » : e.g., « śili munḍidē=śirah munḍitam » (Vizianagram ed., p. 102); and further, he says that in the Sābarī dialect, a form a Māgadhi, « -ā- » in the nominative singular becomes both « -ē » and « -i », and this is a rule which is common to both masculine and neuter nouns: « mānuṣē, mānuṣi ; vanē, vanī » beside « mānuṣō, vanam », for Skt. « mānuṣah, vanam » (p. 108: « ataḥ sāv ēd-itāu ca, purṇ-napurṇsaka-sādhāraṇō’ yaṁ vidhiḥ »). Paralleling the weakening of the OIA. locative « -ē » to « -i » in Late NIA. of both the East and the West, and that of Saurasēni and Mahārāṣṭri and other Western MIA. « -ah > -ō » to « -u »

in the Apabhrāṇas of the West (see pp. 311-312), the Māgadhi **<-ē>** can reasonably be expected to have also become **<-i>**, as the grammarian has noticed it. A form like **<putra> puttē** would therefore result in Māgadhi Apabhrāṇa as **<\*putti>**, in Māgadhi NIA. (including OB.) as **<\*pūti>**. This **<-i>** form for the nominative (by extension, serving as the base for the other cases also) seems to have actually survived in a few words: e.g., OB. vocative **<Kānhi>** (Caryā 7: <Kāñhē, Kṛṣṇa>); N.B. **† পুতি** **<puti>** beside **পুত্ৰ** **<putṭha>** *son*; **চাতৃতি** **<Cātuti>** (see pp. 409, 692); **ঠাই** **<thāi>** *place* <**<\*thāvī>**, **ঠামে**=**sthāman** > (but cf. W. Hindī **<thāw<\*thāvū>**); **মেই** **<nēi>** *indulgence* <**<\*nēhi=nēhē=snēhāḥ>** (but cf. MB. **ଦେ** **<dē>** <**dēha>**; **<dēhi>** is found in Early Oriyā); and a few similar forms in MB., NB. A form like **<putra-kaḥ>** with pleonastic **<-ka>** would give Māgadhi Pkt. **<putta(g)ē>** which would become in Māg. Ap. **<\*puttaī>**, and the Old Bengali transformation of it would be **<pūtē>** = MB. and NB.. **পূতে** **<putē>**. And probably in this way the **<-ē>** is mostly to be derived from a Māgadhi **<-āē>** = Skt. **<-a-kaḥ>**. Thus, OB. : **<jē ajarāmara hōi diṭa-kāndha>** (= **<diḍha-kāndhē>**, to rime with **<sāndhē>** in preceding line) so that he becomes ageless and deathless, and strong in his shoulders (Caryā 3: <**\*diḍha-kandhaï** <**diḍha-kandhaē=dṛḍha-skandhakāḥ**>); **< Bhādē bhaṇaī>** says Bhāda (Caryā 35: < Bhaddāē = Bhādrakahā : **<kumbhīrē khāi>** the crocodile eats (Caryā 2: <**kumbhīlāc=kumbhirakah**>); MB. (SKK.) **কংসের কারণে হএ স্টিরি বিনাশে** **<Kaṁsērā kāraṇē hāē sṛṣṭirā bināsē>** through the reason of K. the destruction of the world takes place (p. 2); **বাঢ়া মৰনে** **<bāṛhāē māḍanē>** love increases (p. 30); **না ছাড়ে শাকের পোতা** **<nā chārē Nāndērā pōē>** Nanda's son does not leave (p. 38); 'Crepar Xaxtrer Orthbhedh'—**<xadhue eq crux bhanaia boner moidhe raqhilo>** = **সাধুরে এক কুশ বানাইয়া বনের মধ্যে রাখিল** the saint made a crucifix and kept it within the forest, **<xtrie zigguiaxa corilo>** = **জীয়ে জিজ্ঞাসা করিল** the woman asked; etc., etc.;—such instances from MB. and NB. are extremely common. A noun without any verb, in the usual nominal phrase-building of NIA., is frequently found with this **<-ē>** in Bengali.

Examples from Oriyā: **<...Uttamā-kumārē...upujilā>** Prince Uttama was born ('Dhruva-caritra,' p. 4); **< bicārā nāśā kāribārē, ētā nōhāi subicārē>**

*you think of killing, this is not justice* (*Jagannātha-dāsa*, ‘*Bhāgavata*,’ the Story of the Birth of Kānsa, Contai ed., p. 19); « ēmāntā bhāli jānē jānē, buddhi āṇṭilā mānē mānē » *so viewing, each individually formed the plan in his mind* (*ibid.*, p. 7); « bājrā pāṛilā jēnhē sīrē, bādānē nōhilā uttārē » (text = *uttārā*) *as if a thunder-bolt fell on the head, there was no reply in the mouth* (*ibid.*, *Rāsa-līlā*, p. 7); « sujānā jānāṅkārā hitē, kābhāi biprā Jagannāthē » *for the good of virtuous men, the Brāhmaṇ Jagannātha narrates* (*ibid.*, p. 10); « ēkā gōplē ḍāgāsārī jāi, khōjāi puspā-bāri » *one herdswoman goes advancing and seeks flowers and water* (*ibid.*, p. 12); etc. This « -ē » for the singular nominative has already become rather rare in Early Oriyā.

Examples from Maithili: « jani Manamathē mana bēdhala bānē » *as if Love pierced (her) mind with an arrow* (*Vidyāpati*, VSPD. ed., p. 39); « kāpala parama rasālē » *(he) trembled, filled with love* (*ibid.*, p. 40); « sajānē-hu na purala manaka sādhē, nayana dēkhala Hari, ēta aparādhē » *even in a dream the heart’s desire was not fulfilled; (she) saw Hari with (her) eyes, (was that) such a crime?* (*ibid.*, p. 51); « cintāē bikala hṛdaya nahi thirē, bādāna nihāri nayana baha nīrē » *the heart agitated with thinking is not steady; seeing his face, tears flow from the eyes* (*ibid.*, p. 52); etc., etc.

An « -i » affix inherited from the Māgadhi « -ē » disappeared in the OB. period, possibly through confusion with the locative « -i < -ē >, and « -akāḥ > -āē > \*-āī > -ē » was fully established. In establishing this « -ē » as the characteristic nominative affix, there was the influence of the « -ī, -ē » affix of the instrumental. The nominative was replaced by the instrumental in the passive construction which occurred in OB. in the past tense of the transitive verb, following the MIA. conditions: e.g., OB. « \* Kānhē (for \* Kānhi) pōthī paḍhaī » *Krishna reads a book* would become in the past tense « \* Kānhē pōthī paḍhilī ». The difference between the nominative and instrumental affixes in OB. (Kānhē < Kānhaē = Kṛṣṇakah, Kānhē = Kāṇhē[ṇa]ṁ = Kṛṣṇēna) was one of nasalisation only, and the cases could be easily confused, and then affixes interchanged. And as a matter of fact, « -ē, -ī » interchange, and are used one for the other from the OB. period. The tendency also was to drop the affixes « -i, -ē » for the nominative when the construction was active: thus, beside

« kumbhirē khāī » (Caryā 2) and « Bhādē bhañāī » (Caryā 35), we have the simple « -a » base: e.g., « Saraha bhañāī » (Caryā 32). But this tendency may be said to have been resisted by the « -ē, -ē » of the instrumental nominative of the past transitive: e.g., OB. « cārē nila » *a thief took away* (Caryā 2); Kukkuri-pāē gāīda » *Kukkuri-pāda sang* (*ibid*) ; « Kānhē gāī » (= Kṛṣṇēna gitam: Caryā 18); « Bājulē dila » *Bājula gare* (35); « Ājadēvē saala bihariu » *everything Ārya-dēva has taken away* (48); MB. গাইলা চান্দিদাসে « gāīla Cāndidāsē » *C. sang*, etc. The nasalisation of the instrumental « -ē » was entirely dropped during the 15th century, and this made the fusion of the two cases complete.

In the gradual merging of the two cases, it is not unlikely that there was some influence of masses of Bengalised Tibeto-Burmans in North and East Bengal, who adopted the Aryan speech of Bengal during the formative period of Bengali. In Tibetan, for instance, the ‘verb must be regarded as denoting, not an action, or suffering, or condition of any subject, but merely a coming to pass, or in other words, they are impersonal verbs, like *taedet*, *miseret* etc. in Latin, or *it suits* etc. in English. Therefore they are destitute of what is called... the active and passive voice, as well as of the discrimination of persons... From the same reason the acting subject of a transitive verb must regularly appear in the Instrumental case, as the case of the subject of a neutral verb, —which, in European languages, is the Nominative—ought to be regarded, from a Tibetan point of view, as Accusative expressing the object of an impersonal verb, just as ‘poenitet me’ is translated by ‘I repent’... The subject of a transitive verb, in Tibetan, assumes regularly the form of the instrumental, of a neutral verb that of the nominative which is the same as the accusative.’ (H. A. Jäschke, ‘Tibetan Grammar<sup>2</sup>’, London, 1883, p. 40).

The possibility of the « -ē » of the nominative also preserving the Māgadhi Ap. instrumental plural « -ahi » (> nominative, as in Oriyā) has been noticed before (p. 724). The instrumental in MB., through overlapping of function with the locative and through confusion with the « -ē » of the locative, assumed the postpositional affix « -ta, -tē » which is proper to the latter: e.g., MB. (ŚKK.) হাতেত « hāthēta » *in or with the*

*hand*, NB. হাতেতে « hātētē ». This as a matter of course was taken up by the nominative in the Second and Late NB. periods, after nouns ending in a vowel (i.e. the vowels « -ā, -i, -u, -ō », after « -ā » had dropped off) : e.g., ঘোড়াতে খাস খাব « ghōrā-tē ghāsঁ khāyঁ » *the horse eats grass*, earlier ঘোড়ায় = ঘোড়া এ « ghōrā-yঁ = ghōrā-ē » and ঘোড়া « ghōrā », which are still used ; so গোরতে « gōru-tē » or গোর « gōru » (the earlier গোরএ « gōru-ē » is no longer found in the Standard Colloquial : see *supra*, p. 719).

Old Bengali shows a number of instances of nominatives in « -u » and « -ō » : these are literary impositions from Western or Śaurasenī Apabhrañśa ; and although they crop up in the artificial Braja-buli dialect, they are not found in the Bengali speech proper, either in MB. or in NB. (see *supra*, pp. 115-116 ; 103-104).

#### INSTRUMENTAL.

**498.** The instrumental « -ē, -ē » occurs in numerous instances in the Caryās : e.g., « darē » *in fear* (2), « bēgē » (5 : vēgēna), « mānsē » (6 : mānsēna), « akilēsē » (9 : = aklēsēna), « nāvē » (10 : = nāvēna), « bōhē » (12, 35, = bōdhēna), « suraa-pasāngē, jōini-jalē » (19 : = surata-prasāngēna, yōgini-jälēna), etc., etc. This « -ē » is used also for the plural number : e.g., « tiniē patē » *with or in three beings* (16) ; and it has been generalised for feminine nouns as well, e.g., « sānē » (Caryā 2 : saṁjñā + -ēna) « michē » (22 : = mithyayā), « hēlē līlē » (18 : = hēlayā līlāyā), « bhāntiē » (41 : = bhrāntyā) ; etc., etc. (see *supra*, p. 717).

The « -ē » represents the OIA. « -ēna », instrumental singular : « -ēna » is found in MIA. as « -ēna, -ēnam, -ēm » ; in Old Bengali and Early Middle Bengali it still retains the nasalisation— « -ē » ; e.g., হাতে মারে « hātē mārē » *strikes with the hand*, eMB. হাতে মারে « hāthē mārē », O.B. « hāthē māraī », MIA. « hatthēm mārēi » = OIA. « hastēna mārayati ».

The change of « -ēna » to « -ē » has been through the nasalisation of the vowel by the « -n- ». The nasalised form already occurs in Apabhrañśa. A parallel case is the change of « -ānām » of the genitive plural

to the forms  $\langle -ā, -ō \rangle$  in NIA. (See p. 373.) The full  $\langle -n \rangle$  also is preserved, for both  $\langle -ēna \rangle$  and  $\langle -anām \rangle$ , in NIA.: e.g., in Awadhi (Lakhimpuri dialect)  $\langle dārēn \rangle$  *through fear*; and  $\langle -n(a), -n-i \rangle$   $\langle ānām \rangle$  is quite common.

The instrumental  $\langle -ē \rangle$  is the sole relic of a true inflexion of OIA. which has survived in Bengali without contamination.

Instrumental  $\langle -ē, -ē \rangle$  is preserved in Bihārī, e.g., Maithili  $\langle nēnē \rangle$  *by a child*. It is found as  $\langle -ē \rangle$  commonly enough in Early Oriyā. Traces of it occur in the Western Languages: e.g., Hindī  $\langle dhīrē calō \rangle$  *walk slowly*. For Marāthī, cf. Jules Bloch, 'Langue Marathe,' § 193, and R. G. Bhāndārkar, 'Wilson Philological Lectures,' pp. 204-205.

The locative and instrumental were confused through the possession of the common affix  $\langle -ē, -ē \rangle$ , and in some cases a form could be equally either locative or instrumental. This resulted in the employment of the post-positional locative affix  $\langle -ta \rangle$  in the instrumental as well, which has been noticed above. The Caryās show one or two instances: e.g., Caryā 1,  $\langle sukhā-dukhētē \rangle$  *through joy and misery*; Caryā 15,  $\langle biārētē \rangle$  *by discrimination* (*vicāra*-). In MB. and NB.  $\langle -ta, -tē, -ē-tē \rangle$  become established for the instrumental, and for words ending in vowels (esp.  $\langle -i, -u, -ō \rangle$ ),  $\langle -tē \rangle$  has become the characteristic instrumental affix (see *ante*, p. 719).

In Caryā 14  $\langle bāha tu cchandā \rangle$  *row thou with pleasure*, and in Caryā 45  $\langle bādhai sō taru śubhāśubha-pāṇī \rangle$  *that tree grows through the water of good and evil*, we have exceptional cases of the simple base being used for the instrumental.

#### LOCATIVE AND OBLIQUE.

**499.** It represents in all probability an old locative suffix, an OIA.  $\langle *-a-dhi \rangle$ , not found in Sanskrit, but attested from MIA. (Pali)  $\langle -dhi \rangle$  and from the Greek  $\langle -thi \rangle$ . It has been also surmised that there was in OIA. an affix in two forms,  $\langle *-bhi, *-bhim \rangle$  (which is represented in Homeric Greek by  $\langle \phi\iota, -\phi\iota\in\iota\eta \rangle$ , and is found in Latin in  $\langle tī-bi \rangle$ : it occurs also in Armenian). Its use, as can be seen from the Greek and

other Indo-European languages, was in the sense of 'by, along with,' in the Locative and Ablative, as well as Instrumental, and rarely in the Genitive and Dative: and it was not of a definite number. This < \*-bhi, \*-bhīm > would become < -hi, -him > in MIA., and it seems this suffix is partly also the base of the MIA. ablative and locative affixes: the nasalised < -hīm > would certainly seem to go back to it. (Cf. Wackernagel, 'Altindische Grammatik,' I, p. xx; Herman Hirt, 'Handbuch der griechischen Laut- und Formen-lehre,' Heidelberg, 1912, § 304.) Thus, घरे < ghārē > in the house, eMB. घरे, घरे < ghārē, ghārē > = Late MIA. < gharahi, gharahīm > < OIA. < \*gṛha-dhi(m), \*gṛha-bhi(m) >.

It is very likely, however, that we have in addition the OIA. locative singular affix < -asmin > here, = < \*-assim̥, -assim̥, -amhi, -ammi > in Early MIA., which has merged into the Late MIA. < -ahi, -ahim̥ >. There is some difficulty of deriving < ahī, -ahī > from the Eastern form < \*-assi, \*-assī > as well as the Western < -amhi, -ammi >. The genuine Māgadhi form in the oldest period was < \*-assī >, and < -amhi > was a Western one (cf. Truman Michelson, JAOS., 1909, pp. 77 ff.); but later Prakrit grammarians note < -ammi > for both Māgadhi and Mahārāṣṭri. The form < -ahi > is found in Early Maithili in the locative, and < -e, -ē, -ai, -ahi, -ahī > occur in Old Bengali. Oriyā uses now < ṭhā-r-ē > for the locative, but < -ē > is quite common for the locative in Early Oriyā.

Old Bengali has also < -i > < < -ē > of OIA. for the locative: this < -e > -i > later dropped off in MB. (see *supra*, p. 312).

Instances of the inflected locative from the Caryās: < cīē > in the mind (!); < divasaī > (2); < eku hiahī > in one heart (2: printed text = < ekudi abī >, but < -di ahī > must be for < hiabī >, as the commentary has < bṛdayē >); < ghaḍiē, bākalaī > (< balkalē >: Caryā 3: printed text = < bākalaa >); < gharē > (2,11); < khanahī > (4: < kṣanē >, or < kṣanam >); < mājhē > (5, 14, 18, 30); < hiahi > (6); < niādi > (5), < niaḍi > (7) = < nikaṭē >; < acārē, caranē > (11); < pahilē > (12: = prathamē); < mangē (=mārgē), kulē > (14); < caṛilē > on haring mounted (5) < jīvantē, mailē; jāma-maranē > (22); < kanthē > (28); < sājhē > in the evening (38); < āiē > at the beginning (41: < ādi >; etc., etc.

There is in Bengali from the earliest times an accusative or dative form in <-ē, -ē> : e.g., OB. « sahajē thira kari » *making the sahaja steady* (Caryā 2) ; « sahajē kahēi » *describes the sahaja* (Caryā 27) ; « bindhaha para-ma-nibānē » *pierce the supreme Nirvāṇa* (Caryā 28) ; « balada biālā gaviā bājhē » *an ox made a barren cow to bear* (Caryā 33) ; « Bhādē bhañai, abhāgē laīā » *Says Bhāda, I have taken bad-luck* (Caryā 35) ; « sākhi kariba Jālandhari-pāē » *I shall make Jālandhari-pada my witness* (Caryā 36 : see p. 121 *supra*) ; « sadguru-baanē dhara patavāla » *grasp the word of the good master as an oar* (Caryā 38) ; etc. MB. (SKK., p. 46), দেহ মোরে সরস বচনে « dēh& mōrē sārās& bācānē » *give me a pleasant reply* ; *ibid*, p. 100, কান্দিঙ্গা জাণায়িবো কাশে : পাছে কাহাঙ্গিঙ্গি মোকে না দিছে দোষে || « kāndiā jānāyibō Kāśe, pāchē Kānhāñi mōkē nā dihē dōsē » *I shall cry and inform Kaṁsa, afterwards Kṛṣṇa will not (be able to) put blame on me* ; (Kṛttivāsa, 'Uttara-kāṇḍa') মাত্র তঞ্চ জিনিলে তৃষ্ণি হেন রাবণে « mānus& hāñā jinilē tumi hēn& Rābānē » *being a man, you could defeat such (a foe as) Rāraṇa* ; (KKC.) মোষ নাহি দেখ্য কেৱ কৰ অপহাৰে « dōṣ& nāhi dēkhyā kēn& kārā spāmānē » *why do you do me insult, seeing no fault?* ; *ibid*, ঘোল উপচার দিয়া ছাগল মহিষে « ḍōl& upācārā diyā chāgāl& -māhiṣē » *making the sixteen offerings (and sacrifices of) goats and buffaloes* ; NB. অঙ্গজনে দয়া কৰ « ḍāndhā-jānē dāyā kārā » *have pity on a blind person* ; etc., etc. We have also an <-ē> in instrumental forms with ক'বে or ক'রিয়া <kōrē, kāriyā>, like হাতে ক'রে « hātē kōrē » *with the hand* (never হাত ক'রে < hāt& kōrē>) ; খোজাৰ ক'রে « jhōṛāy kōrē (<jhōṛā-ē>) » *in a basket*, etc.

This <-ē, -ē> affix recalls the oblique (accusative, dative, instrumental and locative cases) in <-(a)hi, -(a)hī> which is found in Early Awadhī and W. Hindi : e.g., Awadhī (Tulasīdāsa), « taba Rāmahī bilōki Baidēhī » *then Vaidehī; seeing Rāma* ; « n̄pahi bacana priya, nahī priya prānā » *to the king his word is dear, not dear his life* ; « nāi munihī siru, sahita samājā » *having bowed his head to the sage, together with his companions* ; « aisē prabhuhī bilōkaū jāi » *I shall go and see such a lord* ; « pūchata prabhuhī » *they are asking the lord* ; etc.

W. Hindi ('Chatra-prakāśa,' ed., Nāgarī Pracārīnī Sabhā, p. 88): « utari Narmadā dēsahī āyē » *crossing the Narmadā, they came to the country* ; p. 91,

« *jahā sēvakahī nidrā lāgai, sāhiba tahā sangahī jāgai* » where sleeps takes the servant, the Lord even there watches in his company; etc. The affix is exceedingly common with the pronouns, in the form « -hi », and the present-day Western Hindi oblique « -ai, -ē » is derived from the earlier « -a-hi ». From their nature and employ, it would seem that we have in Bengali « -ē » and the Eastern and Western Hindi « -ahi, -ahī, -ai, -ē » a common inflected form. The use of it has now become comparatively rare in NB., but it was exceedingly common in MB. It is the case of the gradual restricted use in Bengali (as in other eastern dialects) of an oblique form as differentiated from the nominative. We find the same thing in Early Oriyā and in Early Maithili: what may be called the « -ē » oblique is no longer in use now, but it figures in the older literature in these speeches: as e.g., in Oriyā, Jagannātha-dāsa's 'Dhruva-caritra': « *muniñki prānāmi kāhē mādhurā bācānē* » after saluting the sages says sweet words (Contai edition: p. 17); « *muhi jāi bāsibāku dhāili āñcālē* » I went and caught the skirt to sit down (*ibid.*, p. 19); « *Uttāmā putrē sāngē lēi* » having taken (his) son Uttama with him, « *Sūti putrē kōlē dhāri* » S. having held her son in her lap (p. 61); « *sē kānyā Dhrubē dēlā bibhā* » gave that daughter to Dhruva in marriage (p. 63); « *Guhyākā-gānē dāyā bāhi, kāhānti Dhrubā-mukhā cāhi* » feeling pity for the Guhyakas, he says looking at D.'s face (p. 69); « *ēmāntē Kubērā-bācānē Dhrubā bicāri tōṣā-mānē* » in this way D., having pondered on K.'s words, glad of heart (p. 73); etc.; in Maithili: Vidyāpati (VSPd. edition): « *Rāhu dūri basa, niyarō na āvathi, tāi nahi karathi garāsē* » R. dwells afar, does not come near, that is why he does not gobble up (p. 12); « *kāmini karaē sanānē* » = « *kāmini karōti snānam* » (p. 23); « *āöra pēkhala... mōtimā-hārē* » further I saw the chain of pearls (p. 28); « *lōbhē garāsali lājē* » desire ate up (destroyed) shame (p. 38); « *sunaha, sundari ! Bidyāpati-bacana-sārē* » hear, O fair one, the precious words of Vidyāpati (p. 38); « *lakhala lalita tasu gātē rē* » O, I saw his handsome body (p. 39); « *tējala guru-jana-lājē* » I have given up shame of superiors (p. 43); etc.

This oblique « -ē » of Early Bengali and of other Magadhan dialects, < « -ai, -ai, -ahi, ahī », seems to be identical with the locative. The trans-

ference from the locative to the dative, accusative and instrumental sense is perfectly clear and intelligible. It has been suggested that this NIA. oblique « -ahi, -ahī » is derived from the OIA. genitive « -sya » (Hoernle, Gauḍian Grammar, p. 210; Beames, II, p. 221; R. G. Bhāṇḍārkar, Wilson Philological Lectures, pp. 243-244); and again, that the instrumental plural of OIA., « -bhiḥ » > Late MIA. « -him » has been extended to the singular, and as « -hi, -hi » has become the oblique singular (cf. Baburam Saksena, 'Declension of the Noun in the Ramayan of Tulsidas,' IAnt., 1923, Vol. LII, p. 74; cf. also L. P. Tessitori, 'Notes on the Grammar of Old Western Rājasthānī,' § 59, IAnt., 1914, p. 183; see *ante*, pp. 161-162). But the change of « -sya » to « -hi » presents a phonetic problem which is unexplained, considering that « -sya » remains as « -s- » in a number of forms, e.g. Hindi « kis, jis, tis = kasya, yasya, tasya », Bengali কিস- « kis- » = « kasya » (see *supra*, p. 549; Jules Bloch, 'Langue Marathe,' p. 182). The extension of an old plural to the singular, again, would be extremely curious, and certainly it is a very unsatisfactory explanation. The locative singular in « -a-hi, -a-hī » (< \*-dhi ; \*-bhi, \*-bhīm ; -smin) offers the most likely solution of this very characteristic case inflexion of NIA.

In the Bengali dative case forms « -(e)r-ē, -k-ē » we have the same locative affix « -ē », added to the post-positional affixes; and the locative « -t-ē » is case of double locative form (=post-positional locative affix « -ta » + « -ē »). So also the Oriyā « -ṭhā-r-ē », W. Hindi « -m-ē ». (Cf. Grierson and Hoernle, JRAS., 1903, p. 617).

**500.** There are cases of use of the simple base for the locative in OB. and in MB.: e.g., « sāsū gharē ghālī, kōñicā tāla (= tāli) » *putting the breath inside the room, and the key in the lock* (Caryā 4); « bēḍhila hāka pañāi eau-disa » *the surrounding tumult falls in the four quarters* (Caryā 6); « kule kula » *from shore to shore* (Caryās 14, 15); ŠKK. ଗୋହାରୀ କପିଟବୀ ରାଜା କଂଦେଶ ଦୁଆର « gōhārī kāribō rājā kāñsērā duārā » *a cry for justice shall I raise at the gate of king Kansa* (p. 328). This is mainly for purposes of rime, and does not indicate any real loss of the vowel, but cf. N.B. ଦୋର ଦୋର ଭିକ୍ଷା ମାଣ୍ଡା « dōr, dōr bhikṣā māṅḍā » *to beg from door to door* (see pp. 311-312).

There is no trace of the locative plural affix **<-su, -ṣu>** of OIA. in Bengali and its sister-speeches: it seems to have fallen into disuse from the Late MIA. stage. Saurasēnī Ap. uses the instrumental plural **<-ahi, -ēhi>** for the locative plural: it may be that such was also the case in Māgadhi Ap. in which **<-ahi, -ēhi>** could easily become confused with the singular locative.

**501.** The above are the real inflexions of the Bengali declension. The other affixes were independent words compounded with the noun, and then inflected; but in the genitive, there is in all likelihood an adjectival **<-ka>**.

The locative **<-ta>** is found in OR. in numerous instances in the Caryās: *e.g.*, **<sāṅkama-ta>** *on the bridge* (5); **<māṅga-ta, bāṭa-ta>** (8: māṛga-, vartman); **<pīta-ta>** *on the vessel* (14); **<gaṇa-ta>** *in the sky*, **<gīva-ta>** *on the neck* (28); **<tāla-ta>**? *on high*, **<hāḍi-ta = \*hāṇḍi-ta>** *in the pot* (33). This **<-ta>** would seem to be the word **<-antah>** *within*: it was compounded with the noun-base: **<mā(ŋ)gata < \*maggaanta = māṛga + antah>**. The loss of the **<-n->** here is unexpected for OB. The present participle in **<-anta>** still preserves the **<-n->**, and a post position like **<antar-ē>** *for*, is as yet not reduced to तरे **<-tārē>** (as in NB.) in the language of the Caryās. The fact of the word being agglutinated with the noun-base may have been responsible for its losing its individuality, and any intermediate stage with the nasalised vowel, like **<\*mā(ŋ)ga-w-āta, \*mā(ŋ)-gāta>** must be pre-Bengali. The **<-ta>** post-position characterises the Bengali-Assamese group only among Magadhan speeches. This post-position would nevertheless seem to have been a Magadhan (MIA.) inheritance in Bengali. At the present day, it occurs as **<-tā>** in Assamese and in dialectal Bengali (North, East, South-east). Standard Bengali employs **<-tē>** (which is a locative form **<-ta + -ē>**, i.e., from **<\*antahi = antah + dhi>**), and also **<-ē-t-ē>** (=locative in **<-ahi>** + **<-antah>** + **<-ahi>**). The word **<antah>** for the locative is found in Marāṭhī as a recent NIA. formation (see Jules Bloch, 'Langue Marathe,' § 197). R. G. Bhāṇḍārkar's derivation of Bengali **<-tē>** from the MIA. **<tahī>** = locative of pronominal base **<ta->** (Wilson Philological Lectures, p. 248), cannot be entertained, considering the existence of **<-ta, -tā>** side by side with **<-t-ē>**.

The extension of « -tā, -t-ē » to the instrumental and nominative has been noted before. It has also been used with an ablative force from Early MB. times: e.g., SKK., p. 264, মাতৃ বাপত বড় শুকজন নাহী় « māt-bāpātā bārā guru-jānā nāhī » *there are no greater respected ones than mother and father*; p. 308, আক্ষত আধিক তোর কে করিবে হিত « āmhatā ādhikā tōrā kē kāribē hitā » *who will do more good to you than I?*; p. 326, আক্ষতে চাহসি বাসি « āmhātē cāhāsi bāsī » *askest for the flute from me*; Kṛittivāsa, রাজাতে বিদায় মাজে « rājatē bidāyā māngē » *takes farewell from the king* (cf. R. S. Trivēdi, 'Śabda-kathā,' pp. 102-104).

The Skt. word « madhya » was used as a post-position for the locative in the Apabhraṇas of Northern India, in the *sts*, form « \*maddha, \*madha, \*mādha > maha, māha ». This is the source of the NIA. locative post-fix « -mē, -mā, -mā », etc. Dialectal Bengali (Haijong) মি « -mi » is in all likelihood derived from this (LSI., V, I, pp. 214 ff.): e.g., দেশমি « dēśamī ». This post-fix is otherwise unknown to Bengali, and to Assamese and Oriyā as well.

#### GENITIVE.

502. The OIA. genitive affixes in the singular have not survived in Bengali, as in most other NIA. speeches. The solitary « -a-sya » of « -ā » nouns was carried down to Late MIA., as a generalised affix for all nouns, and even this fell into desuetude. This « -a-sya » became « -āssā » in Māgadhi, as we can see from the evidence of the Brāhmī seals found in Magadha (see *supra*, p. 59, foot-note) and from the Prakrit grammarians. Side by side with « -āssā », Prakrit literature registers a form « -āha » for this form of MIA.: and this « -āha » forms a unsolved problem. A change of « -āssā » to « -āha » is difficult to explain: the change of « -śś-, -ss-, -ś-, -s- » to « -h- » in MIA. continues to be obscure (see *supra*, pp. 549, 550, 555). It seems « -āha » or some analogous form (-ahō?) is found as early as Second MIA. in Māgadhi, as in the dramas of Aśvaghosa. (H. Lüders, 'Bruchstücke Buddhistischer Dramen,' pp. 34-36); and the fact remains that Māgadhi Pkt. has « -āha », Saurasēni Ap. has « -āha, -āhō, -āhō », beside « -assu, -asu »; and that Old Bengali shows

« -ā » (and in a few pronouns, « -āha, -ha ») for the genitive (examples are given below). Can it be that the real development of Early MIA. « -assa, -assā » was a form « -ā, -ā » in Late MIA., through stages like « \*-asse, \*-assā > \*-āse, \*-āśe, \*-āsə, \*-āśə > \*-ās, -āś, \*-ās, \*-āś > \*-ā, \*-ā », and then the locative affix « -ha < -dha » (as in Skt. « i-ha » = MIA. « i-dha », cf. Avestan « ičā », etc.) extended to the genitive sense, or an emphatic particle « -ha, -hō < -hu = khu, khalu », was added to it? The transcription in Greek letters of MIA. Brāhmī and Kharoṣṭhī legends in the coins of the Indo-Scythian prince Nahapāna of Malwa of the 1st cen. A. C., so far as it can be restored, would seem to suggest that the pronunciation « \*-as » was current at the time, in Western India at least: the transcription seems to have been

### PANNIΩ ΞAHAPATAC NAHAΠANAC

=ranniō (raññō) Ksaharatas (Kṣaharātassa) Nahapanas (Nahapānassa) (E. J. Rapson, ' Catalogue of the Coins of the Andhra Dynasty in the British Museum,' London, 1908, p. cxii), where it would seem as if « -āsə » or « -āsə », or « -ās, -ās » was heard.

Be it as it may, in OB. we find « -ā, -āha » as the genitive affix— « -āha » being found with pronouns: thus, « harinā harinira nilaa na jāṇī » *the abode of the Stag and of the Doe is not known*, « Bhusuku bhaṇāi, mūḍhā hiahi na paīsai » *B. says, it does not enter into the heart of a fool* (Caryā 6); « jā ēthu jāma-maraṇē bisagñkā » = « yasya atra janma-maraṇē viśaṅkā » (Caryā 22); « jabē muṣā-ēra cā(ra) tuṭāi » = « yadā \*mūṣakasya-kāryah cārah trūtyati » (21); « jāb-ēra bāna-cihna-rūva na jāṇī » = « \*yasya-kāryakaṁ varṇa-cihna-rūpaṁ na jñāyatē » (29). In MB. the oblique form of the pronouns has « -āha » side by side with « -ā »: e.g., ताह्, ताहा, ता « tāha, tāh-ā, tā- » = « tasya ». The « -āha, -ā » is thus preserved in the pronoun in Late MB. and in NB., but in the noun it is entirely lost from after the OB. period, except in the verbal noun in « -ibā »—e.g., genitive दिवार, करिबार, शहिबार « dibā-r̥, kāribā-r̥, jaibā-r̥ », dative दिवाके, करबाके, शहबाके « dibā-kē, kārbā-kē, jābā-kē ».

**503.** From the Transitional MIA. Period we find the use of a number of words, either along with the genitive pleonastically, or compounded with the base to indicate the genitive idea. We have « -santa(+ -ka) » (present participle of « √as » to be) meaning 'belonging to,' in the Nasik inscriptions of the 1st-2nd century A.C., e.g., « amha-sa(n)taka, pitu-sa(u)taka » our, of the father (Senart, 'Nasik Cave Inscriptions,' Ep. Ind., VIII, pp. 73, 78); and the other words which came in during the Second MIA. Period are « kṛta > kada, kaa ; kārya > kajja, \*kāira > kēra, kēla ; kāra ; kṛtya > kicca ; \*dita (= Skt. datta) > dida, dia ; karṇa > kanṇa », etc. These words have become transformed into the genitive and other affixes of NIA. (see pp. 163, 164 *supra*). MIA. literature, however, does not notice all of them, but only a few, although certainly they all occurred in the spoken dialects in different parts of the country. The most popular post-positional or compounded word of genitival import occurring in MIA. literature is « kēra- (kēla-) », which is found all over Northern India in later times. The source of this word is « kārya », and it cannot be « kṛta » (which would give « kāta, kāda », or « kada, kaa, kida, kia » in MIA.); « kārya » came to be used (apparently as a *semi-tatsuma* form with epenthesis) in Transitional or Second MIA., as « \*kāira », before it became « kēra », in Māgadhi « kēla » (cf. Pischel, 'Grammatik der Prakrit-sprachen,' §176). This « kēra- » is found East in Bengal, and West in Rajputana ; « kēra- » also occurs in the speech of the European Gipsies who went with their language from North-Western India during the Second MIA. period. A vernacular or *tbh.* form would be « kayya » or « kajja », and the Sindhī affix of the genitive, « -jō, -jī », is certainly from this « kajja ». (Grierson : cf. A. F. R. Hoernle, JRAS., 1903, p. 616). Māgadhi Prakrit, like the Prakrits of other parts, took up « kēra (kēla) », side by side with some of the other words. As in other dialects, the form was either used after the genitive, as an adjective qualifying the noun governed, or it was compounded with the noun-base into an adjective ; but in either case, the whole sooner or later came to be regarded as one word, which brought about the voicing and dropping of the « -k- » in Eastern Magadhan quite early.

In Bengali forms like মানুষের « mānuṣēṛ় », ঘোড়ার « ghōṛāṛ় », making up with the inflexion a single word, as opposed to the Hindi « mānus-kā, ghōṛē-kā » forming a group apparently of an oblique base and a separable post-position, Grierson sees an inherent tendency in Bengali, as an ‘Outer’ language, towards a synthetic declension, which presents a contrast to Western Hindi as the ‘Midland’ speech favouring a separate post-position (see *supra*, pp. 161-164; LSI, IX, II, p. 328). But there is nothing in the Prakrit of the dramas, using « kēra(ka), kēla(ka) », to suggest that a particular dialect, Māgadhi, or Saurasēni, specially preferred compounding or mere juxtaposing after the inflected genitive. The pronouns, however, generally seem to retain the old inflected genitive which was strengthened by « -kēra (-kē'a) », and nouns could have mere compounding. Thus we have, e.g., in the ‘Mṛechakatīka,’ Saurasēni « ajjissa kērāo » beside « vessā-jīṣā-kērakō » and « paḍivēsi-gahavaū-dāraa-kēriāe », and Māgadhi « ajja-Cālulattā a kēlakē » beside « vappa-kēlakē »: but always « mama, tava, tassa (taśša), kassa (kaśś.), attaīō » + « kera(ka), kēla(ka) ». The pronominal forms in NIA, like Bengali তাৰ, তাহাৰ « tā-ṛ়, tāhā-ṛ় » (=ta+ya+ka+a), মোৰ « mōṛ় » (= mama+kara), and Hindi « tis-kā » and « mērau, mē:a », etc. show that the old usage for pronouns still continues. Besides, ‘Outer’ speeches do not always show a synthesis: e.g., Oriyā « jānāñ-kā(rā) » (= jānāñām kara-), which is as much post-positional as W. Hindi « ghōṛē-kā »; and European Gipsy, which is based on an ‘Outer’ speech allied to Western Panjabī, possesses forms like « cōres-kērō, -kērī » and « cōreñ-(u)ērō, -ērī » (=cāurasya, cāvṛāñām+kēra-). The preservation of the « -k- » in W. Hindi is no isolated thing: we have « -kar, -karā » (rather than « -ṛ় » as in Bengali) in the Bihārī dialects. The W. Hindi « -kāñ, -kā » seems to have retained the « -k- » chiefly through two reasons: firstly, it formed the only consonant in the post-position, and as such intelligibility demanded its retention; and secondly, there was in all likelihood the influence of the adjectival « -kka » affix, which also had a genitival force. The loss of « -k- » in the agentive affix « -nē » of W. Hindi (= MIA. \*kaṇṇahī, OIA. \*karṇa-smin :

cf. L. P. Tessitori, 'Grammar of Old Western Rājasthānī,' Ind. Ant. 1915, §§ 70, 71) is to be recalled.

Side by side with « kārya > kēra, kēla », the words « kara, kāra » and « kṛta > kaa » were used in Māgadhi Prakrit and Apabhrañśa to indicate the genitive. It would seem that in Māgadhi Ap. « kara » was used with the pronoun originally, and then was extended to the noun. Reduced to « -ara > -rā, -rā » it occurs as the genitive affix in Assamese-Bengali and Oriyā, and also in Maithili and other Bihāri speeches in the genitive of the first and second personal pronouns. The unreduced form « -kara » is here and there found as a survival in MB., possibly through Maithili influence; it is met with in Oriyā in the plural, where the « -k- » is preserved by the « -n- » of the genitive plural affix (see *supra*, pp. 137, 724); and it occurs in the forms « -kar, -karā, -kṛtā » in the genitive and dative of the pronouns other than those of the first and second persons in Maithili, Magahi and Bhōjpuriyā. « kēra, kāra » have become practically doublets of an identical genitive affix. They figure also in Eastern Hindi side by side. « kara » is still found in its unchanged form in Marāthī surnames like « Hō!-kar, Bijapur-kar, Ciplun-kar, Tāṭāw-kar » etc., meaning 'belonging to, dwelling in': compare the use of the genitive « -kā » in Mārwāṛī family names like « Khēm-kā, Gō̄̄-kā, Himatsinh kā », etc.

The affix « kāra » seems to have been rather rarely used in Māgadhi Apabhrañśa. It is now found in its unreduced form in a few nouns and pronouns in Bengali: e.g., সাকার « sākār kār » of the morning, তেমকাৰ « hēthā-kār », এখনকাৰ « ēkhānā-kār » of here, দছৰ ধৰ « bāchār-kār » of the year, সকলকাৰ « sākālā-kār » and সবাকাৰ, সবাইকাৰ « sābā-kār, sā(b)bāi-kār » of all, আপনাকাৰ « āpānā-kār » of self. It does not occur in the other Magadhan speeches: and it may well be a modification of « kār » itself.<sup>1</sup> The affix « kār » is used in NB. with nouns indicating

<sup>1</sup> Hoernle (Gāndian Grammar, p. 236, foot-note) regards this 'kāra' as being a double genitive, 'kā + -ra'. This explanation cannot be objected to considering that we have '-ka' as a genitive affix in Middle Bengali. But we do not have '-kā' (with the long 'ā') with nouns in Bengali: and although in Early Bengali we sometimes find '-ka,' the words which form the genitive with '-kāra,' as above, never employ the '-ka' form.

time and direction, and besides it has a definitive force (cf. Rabindranāth Tagore, 'Sambandhē < kārđ >' in 'Śabda-tattva').

The form < kṛta > MIA. kaa > is more important. As a word strengthening the genitive as well as the dative relation it seems to have come up in the Transitional MIA. Period, and probably even earlier. We have quite early < tasya kṛtē dattam = tasmāi dattam > in Sanskrit, an idiom apparently borrowed from a Prakrit or vernacular one; and a Buddhist Skt. form like < udyāna-kṛtam āsanam > shows the early establishment of < kṛta > kaa > as a genitive-indicating word. But it is a question whether the < -k- > genitive of the Magadhan languages (Early Bengali क < -kā >; New Bengali dialectal কা, গা, গো < -kā, -kē, -gō >, Oriyā < -kā >, in the plural; Maithili < -k >, Magahi < -k, -kē >, and Bhōjpuriyā < -k, kē, -kāi >) is based on the < kṛta > form. < kaa, kṛta > kaa >, compounded with the preceding noun-base, could be expected to drop the < -k- >, and to be changed to < -aa > as in the case of < -kēra, -kara >-ēra, -ara >. It seems that the basis of the New Magadhan < -k- > of the genitive is the MIA. pleonastic < -kka >, rather than < kaa < kṛta > (see *supra*, p. 683). The < -kđ > of the Bihāri dialects would derive better from a monosyllabic < -kka > rather than from the disyllabic < -kaa >. The 'Prākṛta-Pāṇḍagalā' (14th century) has some instances of the < -ka > genitive which would seem to be an Eastern form derived from < -kka >: e.g., (in the 'Bibliotheca Indica' edition, ASB.), p. 249, < Khurasāna-ka Ollā >; p. 403, < gāī-ka ghittā >; p. 412, < dēva-ka likkhia kēṇa mēṭāvā >; p. 470, < tā-ka janāpi ki na thakkaü bañjhāü >, etc. But the presence of a < kaa < kṛta > is not absolutely precluded from consideration; and this < kaa > can of course easily give the Western Hindi < kau, kō, kā >, and also Eastern Hindi and Bihāri < -kē, -kāi >. The < -k > in an Oriyā form like < purusāñ-kā > may be either the < -kka > generalised as an affix or help-word and employed by extension with the original genitive plural, or it may equally be the word < kaa > used post-positionally (= puruśānām kṛta-).

About the use of the < -ka > (< -kka, -kaa), there is an agreement between Modern Bengali and Oriyā: it is confined only to the plural (or plural > honorific singular) in Oriyā, and in Bengali now it is found,

although dialectally only, in the plural genitive of the pronouns only. Why this form should be chosen for the plural is not clear: possibly « -ra » and « -ka » (Oriyā « -ନ୍ତି-କା », Bengali « -কା, -গା, -গା = -গୋ ») were gradually adopted for the singular and the plural respectively in the absence or disuse of an affix distinguishing the two numbers.

Examples of « kēra > -ēra, -kara > -ara, -kka (-kaa) > -ka » for the genitive, from OB. and MB.:

« chānda-ka bāndha » *the bonds of (=from) pleasure* (1); « rukhēra tentali kumbhīrē khāï » *the crocodile eats the tamarind of (=from) the tree* (2); « harinā harināra nilaa na jānī » *the abode of the Stag and of the Doe is not known*, « harināra khura na dīsai » *the Stag's hoofs are not seen* (6); « tōhōri kudīa » *thy hut*, « kāhari nāvē » *in whose boat?* (tava + ha, kasya, + kara-), « tōhōra antarē » *for thy sake*, « hādēri mālī » *chaplet of bones* (hadḍa + kēra + -ikā) (10); « tōhōri bhābhariālī » *thy coquetry* (18); « ḍombī-ēra sangē » *in the company of the Dōm woman* (19); « mōhōra » *my* (20); « muṣā-ēra » *of the mouse* (21); « sō karaü rasa-rasānēri kañkbā (text = rasānēre kakhā) » *let him entertain the desire for pleasure and for elixirs* (22); « tōhauri » *thy* (28); « jābēra » *of which*, « tābēra » *of that* (29: yasya, tasya + kēra-); « cāndari cānda-kānti (reading of the commentary) » *moon-light of the moon* (31); « hāthēra kājikāna » *the bracelet of (=on) the arm* (32); « Dhēndhaṇa-pāēra gita » *D.'s song* (33); « mōhērā bādhā » *bound up of (=by, with) ignorance* (34); « pākhi na cahaï mōri pāṇḍiācāē » (see *supra*, p. 121); « kāheri śaṅkā » *whose fear?*, « mahāmudēri kapkhā » *desire of the mahāmudrā* (37); « tōhōrē dōsē » *through your fault*, « tōhāra biñānā » *your science* (39); « bāṣāṇā tōrā » *thy desire* » (41); « mōra » *my* (49); « tailā bāḍira pāsēra jonhā-bāḍi tāēlā (=uēlā? bhāēlā?) » *the mansion of moon-light by the side of the third mansion became clear* (50).

It is seen that « -ēra, -ara » like their source-forms in MIA. are adjectives referring to the nouns they qualify, and take the feminine affix « -i = -ī » (see *supra*, pp. 720-721), and also the case-terminations (*e.g.*, « tōhōrē dōsē » in Caryā 39: = « \*tava-kērakēṇā dōsēṇā » in MIA.)

« kēra, kara » occur in a few instances as cases of stereotyped survival in MB.: *e.g.*, ŠKK. ନଦୀକେରା « nādī-kērā »; ଶାଖେକେର « lākhē-kērā » *of one*

*lakh*; ‘Śrī-Kṛṣṇa-vijaya,’ বৎসকের « bātsā-kērā » (R. S. Trivēdi, ‘Śabda-kathā,’ p. 103); ‘Mānik Candra Rājār Gān,’ ফেড়াকর « kōrā-kārā » of a cow·ie, ঘড়কর « ghārī-kārā » of an hour (VSP., pp. 63, 65); ‘Śūnya Purāṇa,’ রূপাকর « rūpā kārā » of silver (p. 38), তামাকর « tāmā-kārā » of copper (p. 39), হীরকর « hīrā-kārā » of diamond (p. 40), etc. In some of the above instances, e.g., « lākhēkērā », kōrākārā, ghārīkārā, the base may be in « -kā » : « lākhēkā » one lakh, « kōrākā » one cowrie, « ghārīkā » one hour, so that the inflexion would be « -rā, -ērā » and not the old « kara, kēra ».

The « -ka » affix for the genitive is rather uncommon in Bengali from the oldest times: it has disappeared from Modern Bengali in the singular, but is found in dialectal forms in the plural only. Examples: O.B. « chāndā-ka bāidha » the bondage of pleasure (Caryā 1), « samādhika pāṭha » the process of samādhi (comm. to Caryā 21); in the ŚKK., জরমক তই কুলে বলশ্চ থৃষ্টবৈ • jāḍāmā-ka tārē kule kālāṅkā thuibē • will put a stain on the family for all life (p. 127); আপন কাৰক লাগি সবই বিকলী « āpānā kājā-ka lāgi sābāi bikāli » every body is anxious for the sake of her own work (p. 253); পৱাক শাগিঁ়া সে হারাইবে নাক ও নে « pāiā-ka lāgiā sē hārāibē nākā kānē » he will lose both his nose and his ears for the sake of another (p. 307); নিত্যানন্দ রাম বনে। রোহিণীক স্তুত « Nityānanda-rāṇā kāndo Rōhinī-ka sutā » I praise N., the son of R. (Lōcana-dāsa’s ‘Caitanya-māngala’), বিহারক রাজপুরী নামে ক্ষমাংতৌ « Bihārī-ka rājā purī, nāmē Amrābāti » the capital of Bihār, Amarāvatī by name (Vira-nārāyaṇa’s ‘Kirāta-parvan’); গৃহষ্ঠক ধৰ্ত এহি পুৱাণ কহিছে « gṛhasthā-ka dhārmā ēhi pnuāṇā kābhichē » this is the duty of the house-holder, so declares the Purāṇa (Sañjaya’s ‘Mahābhārata’: the last three examples given in R. S. Trivēdi’s ‘Śabda-kathā,’ p. 104); etc. N.B.: মোৰ, আমাৰ « mōi়়ା, āmā়ା » my, plural মো(ৱা)গো, আমা(ৱা)গো « mō(ିଏ)-gō, āmā(ିଏ)-gō », আমকা, আমগা « āmā-ka, -gā » our; তাৰ « tāିଏ » honorific তাৰ « tāିଏ », his, plural তাৰগো, তাৰগা « tā-gō, -gā-gō »; মানুষেৰ « mānuṣērā » of man, plural মানুষগো, -গ, এৰ-গো « mānuṣā-gō, -gā, -eିଏ-gō » of men. The « -gā, -gō » affix for the plural is present in some form or other in the vulgar dialects practically all over Bengal.

504. An affix « -sat-ka », loosely compounded with a noun, with its base (for the singular) or with the genitive (for the plural), is largely found

in inscriptional Sanskrit all over Northern India from the Second MIA. period : e.g., Inscription of Jayanāga of Karuṇa-suvarṇa (p. 180, *supra*), « brāhmaṇām-satka-grāma-slmā » ; Siyadoni Inscription (c. 11th cen. A.C., Lalitpur District, U. P., Ep. Ind., I, pp. 162 ff.) : « samasta-kall-pālā-nām-satka-haṭānām-upari (= Hindi « -kalwāī-ō-kē hāṭō-par), Vigrahapāla-satka-drama, bāmana-satka-vīthi, cāṇḍala-satkāvāñ-ānikā », etc. etc. This affix « -sat-ka » is difficult to explain : apparently it is the present participle of « √as → -santa + -ka » (pleonastic), such as we find in the Transitional MIA. (see *ante*, p. 753). It is not unlikely that a vernacular from « santa-ka » became « \*santə-ka, \*sant-ka, \*sakka » which was Sanskritised into « sat-ka » in medieval Sanskrit as in the inscriptions. In Early Assamese we have the affix সাক « -sākā », as in the forms অমাসাক, তোমাসাক « āmā-sākā, tōmā-sākā » *our, your, us, you*, which are obsolete in Modern Assamese. (Dēvānanda Bharāli, ‘Asamīyā-blāṣṭr Maulik Bicār,’ p. 32). These would affiliate themselves to a MIA. « \*amha sakka, \*tumha-sakka », Sanskritised into « \*asma-satka, \*yuṣma-satka ». This form সাক « sākā » has not been found in Bengali.

The plural of the genitive has been discussed under ‘Number’ above (p. 725 ff.)

#### DATIVE

505. The « -ka » genitive of Bengali is used for the dative in OB. : e.g., Caryā 4 « mantiē<sup>1</sup> thākurā-ka parinibittā » *the minister* (= queen, in chess) *has checked the king* ; Caryā 21, « nāśa-ka » *for destruction*. This genitive-dative in « -ka » is exceedingly common in MB., as in the ŚKK. and other works : e.g., ŚKK. p. 3, মানুষ নিয়েজিল মারিবাক তাৱ « mānus& niyējilā māribā kā tāē » *appointed men for killing him* ; মেই উপাদেশ দৰ চোকাক তথ্যে « sei upādēśa dibā tōmbā kā tākhājē » *he will give you advice at that time* ; p. 108, ঘৰক মন না জাএ « ghārā-kā mānā nā jāē » *the mind does not turn to home* ; etc., etc. This « -ka » occurs as « -h় » now, but it is confined

<sup>1</sup> The printed text reads মতিই : I accept the emendation proposed by Mubammad Shahidullāh in the VSPdP., 1327, p. 151

to North Bengal and Assam only, and members of the Bengali-Assamese group of dialects in other parts now employ « -k-ē, -r-ē ».

« -k-ē » is an inflected form, the final « -ē » being really the locative affix, as has been noted before (p. 749). It can be the locative of the adjective-genitive with pleonastic « -ka » (*supra*, p. 756); it can be equally the locative of the form « kaa < kṛta : e.g., তাকে দিল  $\leftarrow$  tākē dilit =Skt. « tasya kṛtē dattam » for « tasmāi dattam » (cf. Grierson in the 'Zeitschrift für vergleichende Sprachforschung,' quoted by Hoernle in the JRAS. for 1903, p. 615). There is a third likely source of « -k-ē »—the OJA. « kakṣa » (see *supra*, pp. 164, 553) which has been suggested by Beames ('Comparative Grammar,' II, pp. 252-259) and Hoernle (Gaudian Grammar, § 375, p. 224), and accepted by Kellogg (Hindi Grammar 2, p. 130). Hoernle later admitted the « kṛta » derivation (JRAS., 1903, p. 615). R. G. Bhāṇḍārkar would trace the dative « -k-ē » of Bengali and « -kō » of W. Hindi to a MIA. locative « kēhī, kahī » *where, somewhere*, from the interrogative pronoun base « ka » (Wilson Philological Lectures, pp. 246-248).

The last derivation does not at all seem convincing. Against it, and in favour of a derivation from « kakṣa », are the forms « kakhu » in OB. (see below), « kāhū, kāhu » with « -ā- » in Eastern Hindi, and « kahū » as in Western Hindi. (See also the remark in connexion with the derivation of the locative « -t-ē » at p. 750.) The forms « -kū, kahū » etc., as in Western Hindi, « ku » as in Oriyā, and « -ka » as in Early and dialectal Bengali, will also go against it: for all these forms accord but ill with « kahī, kai » the locative of « kaa, kṛta ». There cannot of course be any objection to the derivation of « kē » from « kṛta », but the difficulty remains with regard to « kō, kū, ku » and the « -hu » forms. The forms « ku, kū » is not found in NB., but it occurred in OB., and it is now the characteristic dative affix of Oriyā only among Magadhan speeches. In Caryā 35, we have « ēbē cia-rāā ma-kū(=mō-kū) ḡaṭhā » = « idānīm cittarājāḥ mama vinaṣṭa(h) », as the commentary explains; and also « Bājulē dila mōha-kakhu (bhāṇiā) » = « Vajrakulēna...māhyam pradattam », also according to the explanation of the commentary.

We have apparently « kakhu » side by side with « kū » here. The Skt. « kakṣa » seems to have been adopted in Late MIA. as a post-positional, and from « kakkha » a weak form « \*kakha » can very well be assumed. This in the transitional stage between Late MIA. and NIA. seems to have become « kaha, kāha ». The proper NIA. *tths.* « kākha, kākha, kācha » seem to have influenced the lengthening of the « kāha ». The change of « -ks- < -khh- > to « -h- » is not isolated: Beames gives « pāhū, pahū » *beside, to*, from Hindī, which he derives from « pakṣa » ('Comparative Grammar,' II, p. 258); Old Western Rājasthānī also has the same word as « pāhī, pāhi » (Tessitori, §72[8]); and Orīyā as « pāi, pā » as in « ki-pāi, ki-pā » *why? wherefore?* Pischel also cites a number of instances of change of « -ks->-khh- » to « -h- » from Prakrit ('Grammatik der Prakrit-sprachen,' § 328). We can also compare the origin of « maha, māhi, mē », NIA. post-position of the locative, from Sanskrit « madhya » introduced in MIA. as a *sts.* « maddha, madha » beside the *tbh.* « majjha > NIA. mājha ». The normal NIA. form of « kakṣa », with « -kh- », is certainly preserved in the Sindhi « khē » for the dative, and « khā, khō, khū » for the ablative (although Trumpp derived these from « kahā < \*kathām < kṛtam, kṛtē »: Sindhi Grammar, London, 1872, pp. 115-116): here the initial « -k- » of « kakkha » has been elided, like the « k- » in « kajja- < kārya » giving « -jō, -jī » for the genitive. The Sindhi « khē, khā, khō, khū », inflected forms of a post-fixed « (ka)kkha », the Old Bengali « kakhu », and the Early Eastern Hindī « kāhū » would all support the assumption that « kakṣa » is the source of Western Hindī « kahu, kāu, kō, kū » and Orīyā « ku ». These are all to be connected with an Apabhraṇśa (Māgadhi as well as Ardha-māgadhi and Śaurasēṇi) form for the *ablative*, « \*kakkhahu, \*kakkhahū », or probably « \*kakklāu, \*kakkhau ». (Cf. Māgadhi and Śaurasēṇi ablative affix « -ādō », which we would expect to give « -āu, -au » in Apabhraṇśa). Unlike « kē », the present day « kō, kū, ku » is thus not of locative origin.

« -kē » of Bengali can thus be either « kṛta », or « kakṣa », in the locative. It is not unlikely that the two post-positional words have converged into this one form. In the plural of the dative as in তাদেৱকে « tādērā-

-kē → *to them*, we can see that an analysis into « tasya + ādi-kēra + kaksē » or into « + kṛtē », is equally possible. The *tbh.* form কচে *kāchē* is still in use in Bengali as a post-position meaning *near, by, with*. The earlier forms of « -kē », namely « \*-kai, \*-kabī », are not found in Old Bengali. The Caryās, in addition to « -ka » and « -ku », give instances of « -kē »: « rūpā thōi mahī-kē thāvī » *putting away the silver, it was placed on the ground*, and « kēduāla nāhi kē ki bāhaba-kē pāraī (text=pāraa) » *there being no oar, what can one do in the matter of rowing?* (Caryā 18 : the text in the second instance is corrupt). « -kē » occurs regularly in MB., NB.; and « kē », with nasalisation, is rather rare in MB.

Maithilī has « kē », Magahī « kē », and Bhōjpuriyā « kē »: all these are identical with the Bengali post-position. Of the E. Hindī dialects, Awadhī has « kā, kā, ka », Baghēlī « kā, kahā », and Chattisgarhī « kā ». The Baghēlī « kahā » is a relic of the older forms « kahū, kahā » etc. of Early Eastern Hindi as in Tulasī-dāsa, and « kā, kā » apparently also are from « kāhū > \*kāhā ». The « kakṣa » derivative is thus found to occur in Bengali, Oriyā, E. Hindī and W. Hindī, and Sindhī.

**506.** The dative « -r-ē, -ē-rē »: it is found from OB. times, e.g., « karinjā karinjī-rē risaa (=risaī) » *the male elephant is impassioned (?) with regard to the female elephant* (Caryā 9); « kēhō kēhō tōhō-rē biruā bōlai, bidu-jana-lōa tō-rē kai ṭha na mēlāi » *some call thee (as being) of ugly form, (but) the learned never free thee from embrace* (Caryā 18). It is the locative in « -hi, -hī » of the genitive in « -ra, -rē ». At the present day, the « -r- » dative is found in East Bengal (W. Vāṇga specially), and the « -k- » dative is spread from Rādha through Varēndra to North Bengal and Assam, and seems to occur also in East Vāṇga, as in the Haijong Dialect of Maimansing, and in the Chakma of Chittagong.

#### ABLATIVE.

**507.** Bengali-Assamese does not now possess an organic affix for the ablative, unlike Oriyā. In Caryā 4, however, there seems to occur a solitary instance of an ablative form in OB.: « khēpahu (=khēpahū' jōini lēpana jāya » = « kṣēpāt sva-sthāna-yōgāt sā bōdhicitta-rūpā nāirātma-yōginī, mōha-

malāvaliptā bhavati », as the commentary explains. In Oriyā the ablative affix is also « hū », as in Early Oriyā, e.g., 'Kaṇsa-janma' in Jagannātha-dāsa's 'Bhāgavata': « Ugrasēna-hū nōbhē āna » *he is not different from U.* (p. 4, Contai edition), « kāhū utpatti hōlā » *from whom was the origin?* (p. 8, *ibid*). In Modern Oriyā it occurs as « -u »: « ghārā » *house*, ablative « ghār-u »; and it figures also in 'S.-W. Bengali.' The genitive form is also put in the ablative: « ghārā-rā, ghārā-r-u ». With proper names, and as an honorific, the post-positional form « ṭhā-r-u » from « ṭhā » *place* is used (cf. « ṭhā-r-ē » for the locative), and « ṭhā, ṭhu » also are found as ablative post-positions with pronominal adverbs of place. The « -hū, -u », doubtless a Māgadhi form, is apparently the same as that we find in Saurasēnī Ap., viz « -hu » in the singular and « -hū » in the plural (puttabu, puttahū). The origin of this « -hu, -hū » in Ap. is obscure, but it seems that it was due to the fusing of several case-terminations—« -a-taḥi > -adō > \*-au » of the ablative, plus « -h-, ~ » of the locative, for instance. The form « -a-hu, -a-hū » occurs in Sindhi, Panjabī and Western Hindi as « -ō, -ō » (e.g., Hin̄lī « hāthō-hāth » *from hand to hand* < « \*hatthahu hatthi »), and in Marwārī as « -ā » (cf. Tessitori, Grammar of OWR., §61).

The use of the locative form in « -ta, -tē » for the ablative has been noted above (p. 751). In the MIA. and NIA. confusion or interchangibility of the three cases, instrumental ablative and locative, there is probably the influence of Dravidian. (Cf. K. V. Subbaiya, IAnt., 1910, pp. 145ff.)

**508.** The development of the OIA. noun declension, through the Late MIA. (Apabhrañśa Māgadhi) into Bengali, as described above, is set forth below, in the declension of the OIA. word « *putra* » = MIA. « *putta* »:

### Māgadhi Apabhrañśa

### Bengali

Nominative: singular—

Nominative: singular—

(i) \*putti, \*putta (< Māgadhi  
Prakrit puttē < *putraḥ*).

(i) \*pūti, \*pūta < পুতি, পুত্ৰ puti,  
putta.

(ii) \*puttaī (< *puttaē* < *puttagē*,  
puttakē < *putrakēḥ*).

(ii) পুতৰা putē.

**Nominative : plural—**

- (i) \*puttā (< puttā < putrāḥ).  
 (ii) \*puttahi (< puttēhi < \*putrēbhīḥ = instrumental).

**Nominative : plural—**

- (i) ପୁତ୍ର put̪.
- (ii) ? ପୁତ୍ରେ putē.

**Accusative : singular—**

- \*puttā, \*puttam ( < puttām < putram).

**Accusative : singular and plural—**

Lost.

**Accusative : plural—**

- \*putta, \*puttāī (< \*puttāñi,  
 \*puttāñi < putrāñ).

**Instrumental : singular—**

- \*puttē, \*puttēm (< puttē-  
 ᱃[ṁ] putrēñā)

**Instrumental : singular—**

- OB. \*pūtē, \*pūtē > ପୁତ୍ରେ putē,  
 ପୁତ୍ରେ putē.

**Instrumental : plural—**

- \*puttahi, \*puttahī (< puttēhi,  
 puttēhim < \*putrēbhīḥ).

**Instrumental : plural—**

- ? ପୁତ୍ରେ putē.

**Dative : singular—**

- (i) \*puttā (< puttā < putrāya).
- (ii) \*puttā/ā(ha) (genitive) + kai ;  
 + ka(k)khi, ka(k)khī, kahi,  
 kahī ; putta-kkaī, -kkaī.
- (iii) \*puttāha-(k)arahi, -(k)alahi ;  
 \*puttāha-(k)ērahi, (k)ēlahi.

**Dative : singular—**

- (i) Lost.
- (ii) ପୁତ୍ରେକେ putākē, ପୁତ୍ରେକେ < putē-  
 kē >, ପୁତ୍ରକେ put̪-kē.
- (iii) ପୁତ୍ରରେ, ପୁତ୍ରେରେ putārē, -erē,  
 ପୁତ୍ରରେ, ପୁତ୍ରେରେ put̪-rē, putērē.

**Dative : plural—**

- \*puttahi, \*puttēhi (< puttēhi  
 [as in Aśokan inser.] < \*pu-  
 trēbhīḥ = putrēbhyaḥ) (also  
 Genitive Forms).

**Dative : plural—**

Lost.

**Ablative : singular—**

- \*puttāu, \*puttāu, \*puttahu,  
 \*puttahū.

**Ablative : singular—**

- OB. \*pūtu, \*pūtahu, \*pūtahū;  
 Oriyā putahū, putu.

## Ablative : plural—

- (i) \*puttahī, \*puttēhī (< \*putrē-  
bhiḥ = instrumental).

## Genitive : singular—

- (i) \*puttā, \*puttā, \*puttaha,  
\*puttāha (= puttaśśa <  
putrasya).  
(ii) \*puttā/ā(ha)-(k)ēra -([k]ēla);  
\*puttā/ā(ha)-(k)ara, -(-[k]ala);  
\*putta(k)ēra- (-[k]ēla);  
\*putta-(k)ara- (-[k]ala).  
(iii) \*putta-kka- (=putra-ka-).

## Genitive : plural—

- \*puttāṇa, \*puttāṇaṁ,  
\*puttāṇi- (<putrāṇām).

## Locative : singular—

- (i) \*putti (< puttē < putrē).  
(ii) \*puttahi, \*puttahī.  
(iii) \*putta-anta; \*putta-antahi,  
-antahī; \*puttahi antahi  
(\*puttahī antahī).  
(iv) \*putta-ma(d)dhi, -ma(d)dhahi,  
-ma(d)dhahī; -mabī, -mahahi,  
-mahahī (< madhya).

## Locative : plural—

- (i) \*puttaśu, \*puttēśu.  
(ii) \*puttahī, \*puttēhī (< \*putrē-  
bhiḥ=instrumental)

## Ablative : plural—

Lost.

## Genitive : singular—

- (i) OB. \*pūtā, \*pūtāha.  
(ii) ପୁତର, ପୁତେର putāṛ, putēṛ.  
(iii) OB., MB. ପୁତକ putā-kā.

## Genitive : plural—

- OB. \*pūtāṇa, \*pūtāṇa, \*putāni:  
NB. ପୁତାଇନ putāin.

## Locative : singular—

- (i) OB. \*pūti (cf. NB. ଘର gharī  
< ghar-i).  
(ii) OB. \*pūtahi, \*pūtahī, \*pūtai,  
\*pūtē>MB., NB. ପୁତେ putē;  
(iii) ପୁତାଶ putāṭ, ପୁତତେ putāṭe,  
ପୁତେତେ putē-tē.  
(iv) ପୁତମ୍ଭ putā-mī (cf. Bibāri  
< pūt-mī, -mai).

## Locative : plural—

Lost.

## POST-POSITIONAL WORDS.

**509.** Use of post-positions to denote case relations is found in IA., Kōl and Dravidian. In OIA., indeclinables like  $\leftarrow \bar{a}$ , adhi, anu, pari, pra  $\rightarrow$  etc. are found both as prepositions and as post-positions ; so in Old Greek. In IE., these so-called prepositions were properly adverbs referring to the act, but in all IE. languages, including IA., they came to attach themselves to and to 'govern' particular case forms of nouns (accusative or instrumental, ablative or genitive or locative). The prepositional and post-positional use with the noun of these particles fell into gradual disuse from Late OIA., and they lost their separate and independent existence in the sentence as help words : they were compounded as prefixes or pre-verbals with the verb, the sense of which they modified. Classical Sanskrit shows fewer particles with a prepositional or post-positional employ than Vedic (J. S. Speyer, 'Vedische und Sanskrit Syntax' in the *Grundriss*, §§ 85-90). In MIA., the number of these old particles as post-positions employed with nouns grew even more restricted. On the other hand, to make the sense clear, especially when in MIA. the case terminations were confused and were being lost, the IA. speech began to employ the accusative, dative, ablative or locative form of some suitable noun (with the sense of location, vicinity, direction, connexion, purpose, or power) along with the principal noun which retained its original inflexion. Classical Sanskrit, following the Prakrit vernaculars, took up this device (Speyer, § 91). This sort of auxiliary and post-positional use was later extended to some verbal formations—passive participles and present participles, and to the indeclinable conjunctive verb. Such post-positional or prepositional use of verb forms is not unknown to other IE. languages : e.g., English *during*, *regarding*, *concerning*, German *während*, French *pendant*, Italian *mediante*, *durante*, etc. But this principle was utilised only to a very limited extent elsewhere outside India, whereas IA., from the MIA. stages downwards, fully employed it to form post-positionals. Classical Sanskrit already took up some passive participles and conjunctive indeclinables as post-positions governing oblique cases (Speyer, §§ 92, 93). In this matter, it seems that IA. was profoundly

influenced by Dravidian (*vide supra*, p. 172; cf. also K. V. Subbaya, 'A Comp. Gram. of Dravidian,' IAnt., 1910, pp. 145ff).

Some of these post-positional words—nouns and verb-forms—through phonetic decay became transformed into organic affixes in NIA., as has been seen before. The conjunctive and participle post-positions, however mostly retained their phrasal character, and in NIA. they remain distinct, as detached words. Bengali has a number of such verbal post-positions. Besides, some nouns (old *tbhś.*, as well as *ts.* or *sts.*), are used as separable post-positions in all NIA. Their establishment is apparently post-NIA., and independent in each language or dialect group.

Below are given the more important Separable Post-positions of Bengali.

(1) অপেক্ষা « apēkṣā » = *with regard to*: *ts.*, used either with the base or with the genitive to indicate comparison.

(2) আগে « āgē », locative of আগ « āg » < « agra »: MB. আগত « āgatā » *before*. Used more commonly with the genitive, and occasionally with the=base: cf. ŠKK., p. 65, রাজা আগে কবিতে গোহারী « rājā āgē kāribō gōhārī » *shall make a plaint before the king*; p. 127, আকাশ আগত বৈং মাহি  
কেন ভন « āmhārā āgatā bīrā nāhī kōṇā jāi& » *before me (i.e., greater than me) there is no hero*; etc.

(3) করিতে « kāritē » > ক'রতে « kārtē, kōrtē » *doing*, present participle of কর « √kār » = « √kf » *to do* (instrumental or locative: « kārifē < karantē < karantahi, karantahī » (see p. 676). Employed with the genitive for comparison, e.g., রামেৰ ক'রতে শ্যাম ভালো « Rāmērā kōrtē Śyām& bhālō ». S. is better than R. This is a form which is not common in the « sādhu-bhāsa ».

(4) করিয়া « kāriyā » > ক'রে « kā'rē=kōrē » *haring done*: added to the locative oblique in « -ē » to denote the instrumental (see *ante*, p. 747). Used with an adverbial force after adjectives and nouns (the commoner practice at the present day being to use it after the base and not after the « -ē » oblique): e.g., জোর ক'রে « jōr& kōrē » *forcibly, lit. doing force*; টান ক'রে « tān& kōrē » *tightly*; ভালো ক'রে « bhālō kōrē » *well, etc.*; ŠKK., p. 14, একজ  
শাধিব আচ্ছে করিয়া যতনে « ē-kājā sādhibā āmhē kāriā jātānē » *we shall*

*do this work carefully*; p. 250, তখন রাধা বোধ করিঞ্চি সত্ত্ব গমনে জাএ « tākhānā Rādhā rōṣā kāriā sātwārā gāmānē jāē » *angrily then R. goes with quick steps; etc.*

(5) কর্ত্তক « kārttik় » (generally pronounced [kottrik]): a *ts.* word, used as an instrumental post-position, either loosely compounded with the stem, or used with the genitive: ‘having (the preceding noun or pronoun) as the doer’: e.g., বিদ্যাসাগর কর্ত্তক লিখিত « Bidyāsāgārđ-kārttik় likhitā » *written by Vidyāsāgara*; তাহা কর্ত্তক দৃষ্ট « tāhā-kārttik় dṛṣṭā » *seen by him*. A learned form, which became established during the early 19th century.

(6) কাছে « kāchē » *near by, beside* = locative of কাছ « kāch় » *side, neighbourhood*. Like the other derivative from « kakṣa », viz. কাঁথ « kākh় » (< MIA. \*kaŋkha=kakkha; cf. pp. 178-179), কাছ « kāchā » also meant *waist* in MB.: e.g., ŠKK., p. 287, কাছের কলসী « kāchērā kālāsi »; p. 250, কাছের কলসিংহ « kāchērā kālāsiñh » *in the jar held on the waist, beside কাশেত কলসী করি* « kākhē-tā kālāsi kāri » *placing the jar on the waist* (p. 259). কাছে « kāchē » is used with the genitive to indicate the locative. The base কাছ « kāch় » (or its genitive কাছের « kāchēr় »)+ থাকিয়া, থেকে « thākiyā, thēkē » *having been, or হইতে, হ'তে* « hātītē, hōtē » *being*, verbal post-positionals for the ablative, are also used along with the genitive of the noun or pronoun to indicate its ablative.

(7) কারণ « kārāṇ় » *cause*: used with the genitive, in an instrumental, dative as well as ablative sense: very common from eMB. downwards: e.g., ŠKK., p. 1, কংসের কারণে হএ সৃষ্টির বিনাশে « Kañsērā kārāṇē hāē sr̥ṣṭirā bināśē » *through Kānsa takes place the destruction of the world*.

(8) ঘর, ঘরে « ghārā, ghārē » *house, in the house* (gr̥ha): used colloquially over a great part of Bengal to indicate the oblique cases in the plural. It is used with the genitive of the noun, and optionally with the « -ā » oblique of pronouns. In the employment of this post-position, there seems to have been some influence of the « -k-, -g- » genitive for the plural (pp. 756, 757). Variations are ঘোরে « ghōrē », গরে « gārē ». (Cf. the plural use of মহল « mghālā »: p. 733).

(9) চাহিতে « cāhitē », present participle locative of চাহ « √cāb » *look at, want*: used in comparison, generally with the genitive and occasionally

with the stem. The beginnings of the post-positional use of this present participle form go back to OB.: « cāhantē » already figures in the Caryās (e.g., Caryā 31): but the old sense of *seeing* is still predominant in eMB. (SKK.)

(10) চাহিয়া, চেয়ে « cāhiyā > cēyē » *having looked at*, indeclinable conjunctive of চাহ « /cāh »: used in comparison, with the genitive. This use seems to be old. Cf. Early Eastern Hindi as in Tulasi-dāsa: « kahā dhanu kulisahu cāhi kaṭhōrā: kahā syāmala mṛdu-gāta kisōrā » *where is the bow, more tough than even the thunderbolt, and where the lad, darkish and soft of limb?*

(11) ছাড়ি « chārā » *let loose* = passive participle of ছাড় « /chār » *give up, loosen*: used with the stem in the sense of ‘without,’ e.g., আমাছাড়ি « āmā-chārā » *without me*, হক্কাছাড়ি « hukkā-chārā » *without the hookah, etc.*; or ‘in addition to,’ e.g., তা ছাড়ি « tā-chārā » *in addition to that* < letting that alone.

(12) অঙ্গে « jānyē » locative, beside the stem form জন্ম « jānyā » = *for the sake of, because of, caused by*: a ts. word, employed with the genitive to express the dative relation.

(13) ঠাই « ṭhāi » *place* (< sthāma-): dative or locative post-position, used with the genitive of the noun. An old post-position in Bengali: e.g., SKK., p. 142, কহ মোর ঠাপ্পি « kāhā mōrā ṭhāyi » *tell me*; p. 200, এবঁ আকাক পাঠাইল তোর ঠাই « ebē āmbākā pāṭhāyilā tōrā ṭhāi » *now me he has sent before thee*. Cf. NB. সবাইই মোর ঘর আছে « sābā-thāi mōrā gbārā āchē » *I have a home everywhere*. A locative of « thāi » — ঠাই-এ « thāi-(y)ē » is also found: this ঠাইয়ে « thāiyē » becomes in the Standard Colloquial ঠেফে, ঠেয়ে « ṭhēnē, ṭhēyē », and in Calcutta « ṭhēnē » is changed to ঠেঞে « ṭhēñjē » — the change of « -ñ- » to « -ŋ- » here is curious ঠাই « ṭhāi » is found in dialectal Bengali as ঠে « ṭhē », ঠি « ṭhi ».

(14) তরে « tārē » *for, for the sake of*, from অন্তরে « āntār-ē », a genuine tb. form, with regular MB. change « -nt- » to « -t- ». Used with the genitive of the noun, and the oblique of the pronouns of the first and second persons optionally. Found in OB. as « antarē »; e.g., Caryā 10, « tōhōra antarē » *for thee, for thy sake*. In the SKK., the word occurs as

the regular form তথেঁ < t̥hē > only twice, and as আঞ্চলেঁ < āñtārē > over a dozen times: (for < া- >, see *supra*, p. 814). The latter is apparently an archaic literary form.

(15) ধাকিয়া > ধেকে < thākiyā > thēkē > *having stopped at*: also dialectally \*ধেঁ, .ধ < thēē, thē > (\*thāiā): affixed direct to the stem (or to the locative oblique in < -ē > or < -tē >) of neuter nouns, and to the genitive of names of sentient beings, to indicate the ablative. Found in Early MB.: e.g., ŠKK., p. 347, দূরাধাকি < dūrā thāki > *from a distance*. Gujarāti has the same conjunctive used similarly for the ablative, viz., < thakī >.

(16) ধানে, ধানত < thānē, thānā-tā >, locative of ধান < thāna > (sthāna): used with the genitive to express the dative and locative relations. Examples are numerous in the ŠKK and other MB. works. In NB., it is mainly dialectal (in East and North Bengali, where it is found as ধনে, ধনে, ধোন, তোন, ধুন, তুন < thānē, tānē, thōn, tun, tun >).

(17) দিয়া, দিয়ে, দে < diyā > diyē > dē > *having given*. This conjunctive form is used ordinarily with the base of the noun (which is in accusative relation to it), but occasionally also with the genitive, to express instrumentality or intermediacy. Found from early times: e.g., ŠKK., p. 22, হাত দিয়া < hāthā diyā dēkha > *feel with the hand*, etc.

(18) দ্বারা < dwārā > : ts., instrumental of < dvār > *door*, = *through the instrumentality of*. Forms the instrumental, with the genitive (and also with the oblique base in < -ā > in the case of pronouns). This is in its origin a learned form, but it has become sufficiently popular to be used in familiar conversation in NB.

(19) নিমিত্তে < nimittē > (locative), নিমিত্ত < nimittā > (stem) = *mark, target, sign* > *objective*: a ts. word, forming the dative with the genitive of the noun.

(20) নীচে < nīcē > *below*: used with the genitive to express the locative.

(21) পর < pār > from < upari > of Skt. = *above, upon*. The full form উপর < upārā > also occurs, as also the Bengali locatives পরে < pārē >, উপরে < upārē >, as if from a base < upara >. Occasionally also strengthened by তে < -tē >, as পরতে < pārē-tē >, উপরতে < upārē-tē >. Used with the genitive to form the locative. E.g., ŠKK., p. 377, তনের উপর

« tānērā (sts. < stana) upārā » ; pp. 388, 389, গাছের উপর « gāchērā upārā » on the tree. But cf. ŠKK., p. 80, খোঁপাত উপর « khōmpā-tā upārā » on the coiffure, where « upārā » is used along with the locative in « -tā ».

(22) পাশে « pākhē » by the side of, locative of « pākhā » (pakṣa) : found in North Bengal: used like পাশে « pāsē » below (See supra, p. 121.)

(23) পাছে. ফিছে (পীছে) « pāchē, pichē (pīchē) » after. Used with the genitive (as in the corresponding Sanskrit expression). OIA. « paścā(t) » > MIA. « pacchā, pacchā » > NIA. « pācha », locative « pāchē ». The form « pīchē, pichē » has an anomalous « -i- », which is found also in the Hindi « pīchē ». Beames explains the « -i- » as follows: « \*paścē > \*pah(a)cē », on the analogy of « niścaya > nihacē » : « \*pah(a)cē > \*pahicē > pīcē », then « pīchē » with aspiration through influence of « īāclē » (Comp. Grammar, II, p. 297). But there is no need to postulate a *ts.* stage for this *tbh.* word: it is more likely that there was the influence of a word like « piccha » feathers of the tail, or « nīca » below down (also a post-position), or of « pṛṣṭha » > পিঠ় « pīṭhā » back (cf. পিছমোড়া « pīchā-mōṛā » beside পিঠ-মোড়া « pīṭhā-mōṛā » with arms pinioned behind the back), in altering « -ā- » to « -i- ». The « -i- » form might well be a borrowing from a Western dialect, and not native Bengali: and in the derived adjective and denominative verb in Bengali at least, the « -i- » is resultant, due to Umlaut and Vowel Harmony: « চ > পাছ, পাছু » « pāchā > pāchu, pāchuā », adjective, > পেচো, পেছু « pēchō, pēchu » > « পেছু « pichu »; verb পাছুনান « pāchuānā » > পেছোনা, পেছুনো, পিটুনো pēchōnō, pēchunō, pichunō » to fall back.

(24) পানে « pānē » at, towards, in the direction of: e.g., মুখ ধনে « mukh(ঠ)-pānē » at the face, towards the face, আমা(র) প নে « āmā(ঠ)-pānē » at me, towards me, ঘর or ঘরের পানে « ghārā (ghārēṛā)-pānē » in the direction of the house. This post-position occurs in Assamese as পনে « pānē ». The origin of it is obscure, but phonetically it can be from either OIA. « prajñā » knowledge (cf. p. 305, supra), or « panna » (✓ pad + na) reached, arrived at.

(25) পাশে « pāsē »: locative of পাশ « pāśā » side (pārsva). Forms the locative of proximity with the genitive: ŠKK., p. 7, এহার পাশে « ēhārā pāsē » by his side, রাধার পাশে, কাহের পাশে « Rādhārā pāsē, Kāhērā pāsē »

etc. We have also (in poetry especially) पाश  $\langle pāśa \rangle$ , which is the old locative in « -i », = « \*pāśi < pāśvē » (see p. 312).

(26) बहि « bāhi » *without, apart from, in addition to*: apparently from an OIA. « vyatīta ». Used with the base. In MB., this post-position is written बहि, बही « bāhi, bāhī », as if from बह  $\langle \sqrt{bāh} \rangle$  *carry, bear, be carried away* (indeclinable conjunctive forms of which are बहि « bāhi » and बहिया « bāhiyā »). The « -h- » however is euphonie (see *supra*, p. 341), and the OIA. passive participle « vyatīta » is the source: if it were बहि, बहिया « bāhi, bāhiyā », the Standard Colloquial form would have been ब'ये « bōyē », which is not the case. This post-position occurred in eMB.: cf. ŠKK., pp. 192, 193, हाटे दान मेह ए बाटे बही « hāṭē dāna dēha ē bāṭē bāhi » *pay the tax in the market, apart from (the tax) on the road, तिन कि दिवौर ए बाट बही* « bhin& ki dibō-rā ē bāṭa bāhi » *what else shall I give, in addition to (that on) the road.*

(27) बाहिर « bāhīrə », modern locative बाहिरे « bāhīrē », Standard Coll. बार, बेर « bārə, bērə », बाहिरे « bāirē » = *outside* (MIA. \*bāhiri, \*bāhīrē < bāhira: cf. OIA. bahih, bāh-ya). Employed with the genitive.

(28) बिना « binā », by Vowel Harmony बिने « binē », also बिनि « bini »: from the OIA. « vinā » *without*. This word is found both as preposition (a rare thing in NIA.) and as post-position. Thus बिना अमुमति or अमुमतिते « binā ānumāti, ānumāti-tē » or बिना हकु(८)म « binā hukum(ē) », beside अमुमति or हकुम बिना « ānumāti, hukum binā » *without permission*; बिना हाता, हाता बिना « binā hātā, hātā binā » *without handle*; etc. बिनि « bini » is a rare form, now occurring only prepositionally in a few expressions like बिनि-स्त्रार हार « bini-sutārə hārə » *a necklace without a cord*, बिनि दुःख « bini duḥkhē » *without sorrow*. It is found both pre- and post-positionally in the ŠKK., e.g., p. 212, बिनि यतने « bini jātānē » *without any trouble*, beside p. 215, काह बिनौ आजागिनौ गोपयूति « Kānhā binī ābhāgīnī gōpā-jubātī » *without Kṛṣṇa, the milkmaid girls are unhappy*. बिनि « bini » may be a locative form, from a nominalised use « \*bina » of the Skt. particle.

(29) बिहने « bihanē », OB. « bīhani, bīhunē » (Early Oriyā=bīhūṇa) *without, in the absence of*. It seems to be the Skt. « vihīna » in the locative, with influence of «  $\sqrt{bhū}$  » -hu-. Caryā 13, « niñda-bihunē suinā jaīsō »

*just as a dream* (*suina = svapna*) *without sleep*; 23, « jīvantē-bhēlā-bihāṇi maēla » *dead without even having been a living one*; 35, « cia-bihunnē pāpa na punna » *without mind, no sin, no merit*. In MB. and NB., this post-position is used with either the stem or the genitive: cf. ŠKK., p. 172, চুন বিহনে বেহু তামুল তিতা « cunā bībhānē jēnhā tāmbūlā titā » *just as the betel leaf is bitter without lime*; Kṛttivāsa, ‘Ayōdhyā-kāṇḍa,’ p. 9, তোমার বিহনে বাছা ছাড়িব জীবন « tōmār(ā) bībhānē bāchā chāribā jibān(ā) » *in thy absence, my son, I shall give up life*; etc.

(30) ভিত (ভৌত), modern locative ভিতে (ভৌতে) « bhītā (bhītā), bhītē (bhītē) » *in the wall, bank, side*: from « bhītti ». Used with the genitive, to indicate direction: e.g., ŠKK., p. 388, ষমুনার ভৌতে « Jāmunārā bhītē » *towards the Jumna*. Rare in the NB. « sādhū-bhāṣā ».

(31) ভিতর, ভিতরে « bhītarā, bhītarē » *within*, locatives (the first form < « \*bhītarī < \*abhyantarē »): used with the genitive.

(32) মাঝে « mājhē » *in the middle*, locative form (< madhya). Compounded with the stem, or used with the genitive: NB. বনমাঝে কি মনমাঝে « bānā-mājhē ki mānā-mājhē » *in the woods, or within the heart*; MB., ŠKK., ব্ৰিন্দাবন মাঝে « Brīndābānā-mājhē » *within Brīndāban*, মথুৱা পুৱের মাঝে « Māthurā-purērā mājhē » *within the city of Mathurā*, etc. This post-position is a characteristic one of Bengali, and is found from the OB. stage: e.g., Caryā 2, « kōri-majhē (= mājhē) ēku-hiahi » *in one heart, in the midst of (=among) 10 millions* (see ante, p. 746); 14, « Gaṅgā-Jaūnā-mājhē-re bahaī nāi » *the boat floats in the Ganges and the Jumna*; 30, « uittā gaāṇā-mājhē adabhuā » *risen in the sky, wonderful*; etc.

The locative in মি « -mi » in Haijong, from *sts.* « \*mahi, ma(d)dhi » = « madhyē », has been noted before (p. 751). Haijong has also the forms মিনি « -mini » and নি « -ni » which are difficult to explain: মিনি « mini » may be from « \*mahi » with « hī » changed to « -ni », and « ni » would in that case appear to be a contracted form of « mini ». Or it may be the affix « -hī » as added to the noun—ঘৰনি « ghāṛā-ni » < \*gharanhi < « gharahī ». Or is it the locative of a help-word « karṇa » *edge, side* (< -kanṇahi >\*(k)annaī > -ni \*?), which is found for the genitive and accusative in W. Hindi, Panjābi, Rājasthāni, etc.?

(33) লাগিয়া > লেগে « lāgiyā > lēgē », poetical লাগি « lāgi » = *having come in touch with*: contracted dialectally to লাগে, লগে, লয়ে, লাই, লে « lāgē, lāyē, lāy, lāi, lē ». Used with the base, or the genitive, to indicate the dative of interest, ‘for the sake of, with the object that.’ This post-positional form has become rather rare in the NB. « sādhu-bhāṣā » and in the Standard Colloquial, but it is exceedingly common MB. and in the archaic poetical language: e.g., সুখের লাগিয়া এ ঘর ঈধিমু « sukhērā-lāgiyā ē ghāṛā bādhinu » *for the sake of happiness this house I built* (Candīdāsa); ক্লশ লাগি ঝৰি ঝুরে « rūpā-lāgi ākhi jhurē » *the eyes shed tears for (a sight of) the beauty* (c. 1590: VSP., p. 1324); এইক্ষণে তোমালাগি ছাড়িব পৰাণ « ēi kṣanē tōmā-lāgi chāṛibā pārāṇ » *even at this moment for your sake I shall give up my life* (Kṛttivāsa, ‘Ayodhyā-kāṇḍa,’ p. 9); etc., etc.

(34) সঙ্গে « sāṅgē »: instrumental or locative-oblique of the *ts.* « sanga » *company*: used in MB. and NB. with the genitive, but in OB. with the stem, to mean ‘along with’: e.g., Caryā 32, « dujjana-sāṅgē » *with a bad man*; ŠKK., p. 169, বড়ামির সঙ্গে « bāṛāyirā sāṅgē » *with the old dame*; etc.

(35) সনে « sānē » *with*, instrumental of « samam, sama- ». In OB. the base « sama » (pronounced undoubtedly « saṁa ») is used with the instrumental or oblique: e.g., Caryā 10, « a lō Dōmbī, tōē-sama karibe ma sāṅga » *O Dombī, with thee shall I have companionship*; Caryā 33, « śiālā sihē-sama jujhāī » *the jackal fights with the lion*. The instrumental or locative « \*sama-hi=sāwē > sānē, sāyē » seems to have been in use in OB., and even in Māgadhi Apabhrañśa, as the Maithili equivalent « sañē, sayē » would show. By the end of the 14th century, it became সনে « sānē »: e.g., ŠKK., p. 19, দেবসনে « dēbā-sānē » *with a god*; p. 382, দসনের সনে « dāsānērā sānē » *with the teeth*. Dialectally in North Bengali, it occurs as সানে « sānē ». The earlier form সমে « sāmē » is also found in the ŠKK. (over a dozen times).

The W. Hindi « sō » and probably also « sē » *with, by* are from « sama ».

(36) সাথ, সাধে « sāthā, sāthē » *with*, from OIA. « sārtha » *having interest in*. Employed with the genitive, to denote association. This word is more commonly used in East Bengali, West Bengali (especially

the Standard Coll.) preferring সংগে « sāngē ». Not found in the ŠKK., which is in Early West Bengali.

(37) সুদ্ধ, সুদ্ধা, শুক(ঁ) « suddha, suddhā, (suddhā, -ā) » is used after the noun or pronoun put in the dative in কে « kē » or দের « -dērə » to indicate the dative of inclusion : e.g., তাকে শুক ব'লতে হবে « tākē suddhā bōltē hābē » one must tell him also, চেলেদের(কে) শুক নিয়ে « chēlēdērə (-kē) suddhā niyē » taking also the boys, etc. It is compounded with nouns and pronouns as an inclusive affix : see *supra*, p. 706.

(38) হইতে (হৈতে) « haitē » > হ'তে « hōtē » *being*. In MB., this is found also as হন্তে « hāntē », beside হোন্তে « hōntē », হইতে « haitē », হত্যে « hātyē = hāltē », হোইতে « hōitē », হতে « hātē », হনে « hanē ». With the base, it indicates the ablative. It is the present participle of √হ or অহ « √hā, ḥā » to be = OIA. « √as » : « \*as-ant- > \*abanta- > \*ahenta- > \*ahita- > hāita- », locative or oblique « \*ahanatahi » > « \*ahitē » > হইতে « haitē », NB. হ'তে « hōtē ». There are phonological reasons for affiliating হইতে « haitē » to « √as » > \*ahitē » and not to « √hō, hū » > \*hōitē » : (see *infra*, under Verb : 'Substantive and Defective Verbs.') The MB. dialectal form হনে « hānē » shows change of « -nt- » > -t- » to « -n- » on the analogy of « karanti > করেন kārēnə » does, do (honorific) : and possibly there is some influence of সনে « sānē » (No. 35, above). Equivalents of হইতে « haitē » are apparently the Magahi « -satī » and Bhōjpuriyā « -santē » = from, by (Hoernle, Gaudian Grammar, pp. 228, 328), where the sibilant has been preserved.

The use of « -santa- » as a genitival post-position is very old, and has been found, at least in MIA. of the South-west, as early as the Transitional MIA. period (see *supra*, p. 753). At the present day, this employ of « -sant-, -hant- » obtains in the Western languages, Sindhi and Rājasthāni (« -sand- » in Sindhi, and « -handō, -handī » in Western Rājasthāni), and in the Dardic speech of Kashmir (« -hondū », beside « -sondū < -s handu » with « -s » from the genitive base to which it is affixed : cf. Grierson in 'Lallā-vākyāni,' London, 1920, p. 139). It has been also suggested that the Panjabī genitive post-position « -dā, -di » has developed out of the same present participle « -handa » (Beames, II, p. 291), but that is exceedingly problematic, and is not at all attested, and it seems that here we have another

post-positional form, in all probability a derivative from OIA. «  $\sqrt{dā}$  » *to give* (see *supra*, p. 164). This genitival use is not met with in the Eastern languages. Early Assamese, like Bengali, uses the locative oblique হণ্টে « hāntē », beside the base form হন্তা « hāntā » (not found in Bengali), as an ablative affix, either with the noun base, or with the locative in ত « -tā » e.g., দুই-হণ্টে « dui-hāntē » *from two*, মন-হণ্টে « mānā-hāntē » *from the mind*, নগরী-হণ্টে « nāgārī-hāntē » *from the city*, beside মোত-হণ্টে « mō-tā-hāntē » *from me*, লালতা-হণ্টে « lālatā-tā-hāntē » *from the forehead*, etc. In later Assamese, however, হণ্টে, হন্তা « hāntē, hāntā » no longer feature for the ablative. But we have a form ইত « hātā », certainly from this « hāntā », as a plural affix for rational nouns, to indicate only members of a trade, caste or group (Hēma-candra Baruā, 'Asamīyā Vyākaraṇa,' p. 18) : e.g., ছাতার-ইত « chātār-  
hātā » *students*, কাহাৰ-ইত « kāhār-  
hātā » *bell-metal workers*, ডোম-ইত « dōm-  
hātā » *people of the Dōm caste*, etc. (see *supra*, p. 739). The use of ইত « hātā » for the plural is possibly based on an earlier use of হণ্টে « hāntā » as a genitive post-position (as in Sindhi, Rājasthānī, and Kaśmīrī) in addition to an ablative one, in the Eastern languages : which, in that case, would parallel the development of the Bengali রা, এৱা « -rā, -erā » as a plural affix from the genitive র, এৱ « -rā, -erā ».

In the form হইতে « hātē » there also has been the influence of the present participle of  $\sqrt{\text{হৈ}}$  «  $\sqrt{hō}$  » (< bhū), as both these substantive roots, « as » and « bhū », have merged into one form in Bengali. The present participle of «  $\sqrt{bhū}$  » = « bhavant->honta », is found to be employed as an ablative elsewhere in IA.—e.g., in Western Rājasthānī and Gujarātī as « hūtaū, taū, tu, thāū, thi » (cf. Tessitori, 'Notes on the Grammar of OWR.', § 72), and in Khas-kurā, where it occurs as « bhandā ». In Western Apabhrānsa « \*bhavantaū, hontaū » (<  $\sqrt{bhū}$ ) were undoubtedly in use as ablative-forming post-positions, like « ahanta-, asanta- » (<  $\sqrt{as}$ ) in Māgadī Apabhrānsa.

These post-positional present participles of Late MIA. are certainly distinct from the Second MIA. ablative affixes « -him-tō, -sum-tō », which look like compounds formed of the OIA. inflexions (« him » = instrumental plural, and locative singular ; or « sum » = locative plural ; plus « .tō < OIA.

-tah, -at + -tah ▷ ablative affixes), although the suffixes ▷ -hiṁtō, -sumtō ▷ and the Apabhrāṣṭa present participles ▷ hontaü, \*santaü ▷ have been sought to be connected with each other (cf. Hoernle, Gaudian Grammar, § 376).

(39) হইলে, হ'লে ▷ hāilē ▷ *on having been*, conditional conjunctive of the substantive verb, is used with the base or the dative in ▷ -kē ▷ to mean 'in that ease,' 'on such-and-such or so-and-so remaining.' The negative form নহিলে, নহ'লে ▷ nāhilē, nālē, nōlē ▷ is used also with the base or the dative in ▷ -kē ▷ as a post-position meaning *without*.

A number of *tss.* are also used as post-positions: e.g., ▷ anusāra, anukrama, anuyāyi [onuṄgai], bhinna, viṣaya, vyatīta, vyatirēka ▷ etc., which are mostly put in the locative or oblique and used with the genitive or the mere base.

The Perso-Arabic form সেওয়ায়, সওয়ায়, সহায়, সওয়া, সহা ▷ sēwāy, sāwāy, sāhāy, sāwā, sāhā ▷ *besides, other than, over and above*, is used in Bengali with the base or the genitive, generally with the demonstrative pronouns, rather rarely with nouns. It has been borrowed from the Hindostāni, where it is both a preposition and a post-position (Hind. sawā, siwā, siwā-e, sawā-e, < Persian < Arabic siwā [swy] = *extra, additional*). The word বেগৱ ▷ bēgār ▷ *without* (Perso-Arabic ba-qair) is sometimes found, either as a preposition or as a post-position, exactly like বিনঁ ▷ binā ▷ (p. 772)

#### [E] ENCLITIC DEFINITIVES OR NUMERATIVES.

510. Bengali like most NIA. languages possesses some post-positional affixes or words which are added to nouns or numerals to define the nature of the object or article referred to. Pronouns other than those of the first and second persons also take these post-positions, which are attached to the words and practically become a part of them, the case-affixes coming after them. These post-positional words, full or attenuated, are commonly described as *articles*. When a noun (or pronoun) is in the singular, the article or definitive comes after it; when in the plural (and pronouns are not used in the plural here), it must be qualified by a numeral, with which the post-positional is combined: where the number is vague or unknown, the definitive is not used. Where the numeral-cum-enclitic

precedes the noun, it becomes an attributive adjective, and does not take the case affixes, which are added to the noun: but where numeral-cum-enclitic follows the noun, it is loosely compounded with the latter, and the affixes are attached at the end of the entire group. Thus, মানুষ « mānus̪ » man: একজন মানুষ « ēk̪-jān̪ mānus̪ » one-person man=a man; একটা or একটী মানুষ « ēk̪-tā, ēk̪-tī mānus̪ » a or one man; একজন মানুষের « ēk̪-jān̪ mānus̪ēr̪ » of a man, একজন মানুষকে « ēk̪-jān̪ mānus̪-kē » to a man; but মানুষটা, মানুষটী « mānus̪-tā, mānus̪-tī » the man, মানুষটার, মানুষটীর « mānus̪-tā-r̪, mānus̪-tī-r̪ » of the man, মানুষটাকে, মানুষটীকে « mānus̪-tā-kē, mānus̪-tī-kē » to the man; দুটা, দুটী or দুজন মানুষ « du-tā, du-tī, du-jān̪ mānus̪ » two men, genitive দুটা, দুটী or দুজন মানুষের « du-tā, du-tī, du-jān̪ mānus̪ēr̪ », but মানুষ দুজনের « mānus̪-du-janēr̪ » of the two men, মানুষ-দুটীকে, « mānus̪-du-tī-kē » to the two men; etc.,

The definitives are used with nouns in the qualifying genitive, e.g., নীচের টার « nichēr̪-tā-r̪ » of the one below, উপরের খানা থেকে « upārēr̪-khānā-thēkē » from the piece at the top, পাশের জনকে « pāsēr̪-jān̪-kē » to the one beside, etc. When the definitive is placed before the numeral, which qualifies the noun, instead of after it, the sense becomes, on the contrary, vague and indefinite as to the number: e.g., জনহই মানুষ « jān̪-dui mānus̪ », or মানুষ জনহই « mānus̪-jān̪-dui » about or some two men, gen. জনহই মানুষের or মানুষ জনহইরে « mānus̪-jān̪-duiēr̪, jān̪-dui mānus̪ēr̪ ». This usage is certainly old in the language: it is found in the Early Maithili of the ‘Varṇa-ratnākara’ (*supra*, pp. 102-103). The enclitics টো (টো, টে), টী « -tā (-tō, -tē), -tī » are not used in this way to precede the numeral, as it is not an entire word any longer. To emphasise the vagueness, the indefinite forms of the numerals (with এক « -ēk ») are also used: e.g., জন হই or জনহইয়েক « jān̪-dui, -dui-ŷ-ēk », খান-দশ or দশেক « khān̪-dās̪, -dās̪-ēk̪ ».

The employment of these enclitic words or fragments of words lacks the range and variety of the numerative or qualifying words of many other languages, e.g., Chinese (cf. R. K. Douglas, ‘Chinese Manual,’ London, 1889, pp. 64-66), and Japanese (e.g., H. J. Weintz, ‘Japanese Grammar Self-Taught,’ London, 1904, pp. 32-34), although there is some resemblance in the general principle.

Common Numeratives of Bengali, and their Origin:

(1) খান, খানা < khān<sup>g</sup>, khānā >, diminutive খানী, খানি < khānī, khāni > (originally feminine: see pp. 672-673)=*a piece* (<< khaṇḍa >: see p. 365). In NB., it is used by preference to specialise objects of rectangular or flat form, or objects which have a frame-work. But in the ŠKK., it is used in an expression like নাতিনী খানী < nātini-khāni > *the (little) granddaughter* (p. 11: cf. also note at p. 433 of the ŠKK., where is quoted from Early Assamese কণ্যানি < kānyā-khāni > *the little daughter*). This numerative was thus established in Bengali by the eMB. period at least. Cf. also বেঢ়িল কৃটিশা (=কুড়িশা) > কুঁড়ে) খান < bēṛhilā kur(h)iā-khāni > *surrounded the cottage* (Kṛttivāsa, ‘Uttara-kāṇḍa,’ p. 58), সাতারিয়া আনে ভূষণ অজ্জনের শব্দৈর-খান < sātāriyā ānē Bhṛgu Arjunēś śārīrā-khān<sup>g</sup> > *B. swims and brings the body of A.* (ibid, p. 65), দুইখান হাত < dui-khān<sup>g</sup> hāṭ<sup>g</sup> > *the two hands* (ibid, p. 92); etc.

(2) গাছ, গাছা < gāch<sup>g</sup>, gāchā >, diminutive গাছী, গাছি < gāchī, gāchi > =*a long piece, a ‘stick,’ a ‘tree’* (MIA. < gaccha >: see p. 472): used with reference to thin and long articles. This is not found in eMB., and seems to have been established in its numerative function during the lMB. period.

(3) গোটা < gōtā >, diminutive গুটি, গুটি < guṭi, guṭi > =*one piece, one whole, one round object*. It occurs also as গেটি < gōt<sup>g</sup> >, and is found in Hindostānī as an independent word meaning *a pebble or stone, a round object, a piece, a man (as in a game)*. The word is of uncertain origin, but doubtless the Skt. < gutikā >, Bengali গুটি < guṭi > *a small globe or ball, a pill, a pearl, a pustule, the cocoon of the silk-worm* is the same word. The source of it may be the Skt. root < gṛ > *to sprinkle, moisten*, which figures in the ‘Dhātu-pāthas’: a form like < \*gṛ-ta > to mean *a drop* could well have given < \*gurta >, whence < \*gutṭa, \*gōtṭa >, whence the NIA. forms, as well as the Skt. < gutikā >. The Skt. word has been also sought to be connected with < gōla > *round* and < guḍa > *molasses*. The word গোটা < gōtā > was derived from < gōṣṭha-ka > by Hoernle (Gauḍian Grammar, p. 273), but that should give an aspirate in NIA., e.g., < \*gōṭhā >, whereas all the actual NIA. forms—Western and Eastern Hindi, Bihārī, Bengali, Oriyā and Assamese,

have « -t- » and not « -th- ». The form « gōtā » figures as a post-positional numeral in Bihārī ; e.g., in Maithili « duhū-gōtā » *the two pieces* ; also in Oriyā, in Bengali, and in Assamese ; and consequently it is likely that the numeral employ of this word goes back to Māg. Ap. We have it in Early Maithili, and it is extremely common in Early Bengali : e.g., ŠKK. বাণী শুটি « bāṇi-guti » *the flute*, several times, and Kṛttivāsa, ‘Ayōdhyā-kāṇḍa,’ বাণ গেটি « bāṇḍ-gotā » *the arrow* (p. 28). In NB. গোটা « gōtā » is quite common as a noun meaning *whole* ; its numeral use, however, has become considerably curtailed.

(4) জন « jāṇ় » *person*, which can be either *tbh.* or *ts.*, is used to indicate men and women. The use of this word is found in eMB., and in all likelihood it goes earlier : e.g., Kṛttivāsa, ‘Ayōdhyā-kāṇḍa,’ p. 2, ভাই দুইজনে « bhāi dui-jānē » *the two brothers*, lit. *brother(s) two-persons* ; ‘Uttara-kāṇḍa,’ p. 66, মাতাপিতা দুইজনে « mātā-pitā dui-jānē » *the two parents (or mother and father both)* ; etc.

(5) টি « -tā » (by Vowel Harmony টো « -ṭō » and টে « -ṭē » : p. 401), diminutive টি, টি « -ti, -ti » : used as the post-positional ‘Definite Article,’ meaning *an object, a whole*. For derivation and use, see *supra*, p. 686. The dialectal forms « -dā, -di » have been noted before. In the Haijong (Maimansing) dialect, apparently it is this « -tā > -da > -rā » that figures in forms like রাজাৱা « rājā-rā » *the king*, মাঞ্জৱা « māgu-rā » *the wife*, কথাৱা « kāthā-rā » *the word*, etc. (LSI., V, I, pp. 216 ff.).

টি, টি « -tā, -ti » are the most important definitives of Bengali. The employ of these is already well-established in the Early MB. period : e.g., ŠKK., p. 75 সোনাৱ কটুআ হটি মানিকে পুৰায় « sōnārā kātuā du-ti mānikē purāy় » *causing the two (round) boxes of gold to be filled with gems* ; Kṛttivāsa, ‘Ayōdhyā-kāṇḍa,’ p. 28, চকুটি « cāksu-tā » *the eye* ; ibid., p. 1, হটি ব্ৰাহ্মণ « dui-ti Brāhmāṇ » *(the) two Brāhmans*, হটি হাত « duṭi hāṭ » *the two hands* etc., etc.

The « -tā » affix is found as টি « -tu » after the numeral এক « ēk় » *one* (= -t- + -u <-ū : p. 677) ; and when used post-positionally after a noun, « -tu » is extended to টু-ক « -tu-ka » , and further strengthened to টুকু « -tu-k-u » : « -tu, -tuk়, -tuku » are all used to denote ‘a small quantity

of any thing,' generally of fluids and of substances which are already in small fragments : e.g., একটু জল « ēk-<sup>ṭ</sup>-tu jāl<sup>ṭ</sup> » *a little water*, but জন্টুক, টুক « jāl<sup>ṭ</sup>-tuk<sup>ṭ</sup>, jāl<sup>ṭ</sup>-tuku » *the little water*; একটু মূল « ēk-<sup>ṭ</sup>-tu nun<sup>ṭ</sup> » *a little salt*, *a pinch of salt*, মূলটুকু « nun<sup>ṭ</sup>-tuk(u) » *that pinch of salt*. The « -k- » in « -tuk<sup>ṭ</sup>, -tuku » looks like being the nominal or pleonastic affix (see *ante*, pp. 679 ff), but it may be from « ēk<sup>ṭ</sup> » *one*, as in the dialectal word টুক, টুয়েক « tuk<sup>ṭ</sup>, tuyēk<sup>ṭ</sup> » *a little* (e.g., টুক, টুয়েক বাদে « tuk<sup>ṭ</sup> or tuyēk<sup>ṭ</sup> bādē » *a little later*, as in West Rādha Bengali : =« -tu » diminutive + « ēk<sup>ṭ</sup> »).

(6) থান « thān<sup>ṭ</sup> » *flat piece, round or rectangular piece* (< sthāna) : e.g., কাপড় দুখান « kāpār<sup>ṭ</sup> du-thān<sup>ṭ</sup> » *the two pieces of stuff*, etc. Rather restricted in employ.

A few other words are similarly used as definitives. E.g., the Persian words তা « tā » *sheet* (< tah, tāh » *fold, plait* : দুতা কাগজ « du-tā kāgāj<sup>ṭ</sup> » *two sheets of paper*), and কেতা « kētā » *piece* (Ar. « qitā<sup>°</sup> » *cutting* : নোট দু-কেতা « nōṭ<sup>ṭ</sup> du-kētā » *two bank-notes*). But they partake rather of the nature of English words like *heal* ('five head of cattle'), *sail* ('ten sail of ships') than of enclitic definitives like the above.

---

## CHAPTER III

### THE NUMERALS

511. The numerals present one of the difficult phonetic problems of NIA. Their forms show a remarkable uniformity all over the NIA. area, a uniformity which is not in keeping with the several phonetic histories of the various NIA. speeches. The names for the cardinals in the different NIA. languages, instead of going through their proper MIA. forms back to OIA. (i.e., with each group showing independent and distinct forms with characteristic dialectal phonetic history, in general agreement with the phonology of the mass of words in the language), appear rather to be based on some standardised MIA. forms. These standardised forms originally belonged to some particular dialect of MIA., but they were early adopted in a standard dialect, a sort of Hindostānī of ancient times (when they did not originally belong to it), whence they were imposed upon the vernacular speeches in the different tracts of the country; and the proper native forms in these latter vernaculars were generally superseded, although in some cases they have maintained themselves (*e.g.*, Gujarātī « bē » Sindhi « b'ē » Marāthī « dōn » Bengali দুই « dui » *two*, Panjabī « wih » *twenty*). From the very close resemblance between the common NIA. cardinals and those of Pali, the latter may be taken to represent the basis or source of the former. Pali is based on the speech of the Midland, with influences from the East as well as the North-West and the South-West: one Pali form for *twelve* is « bārasa », with « b- » for OIA. « dv- », which does not seem to be a proper Midland treatment of this group of consonants: the native Midland form was certainly « d(u)vādaśa », also found in Pali, but we do not know when « bārasa » or an earlier « \*bādasa < dvādaśa » from an outside dialect imposed itself in Pali, side by side with the native form in « d(u)vā- ». (Cf. p. 58, *supra*.) The form « bārasa », however, became established in the standard form of the Midland speech, and thence passed on to the other dialects, Ardha-māgadhi and Māgadhi included; although these latter continued to use their

proper forms « duvālasa, \*duvādasa » side by side with « bārasa », at least as a literary survival down to Second MIA. times. Even though the Pali forms give a sufficiently satisfactory ground work for those of NIA., there are certain irregularities in the development of the latter, which cannot be properly explained. Thus, intervocalic « -s- » became « -h- » in all the forms except those of the 9th decade in Western Panjabī and Sindhi : e.g., W. Panjabī « yārā(h), bārā(h) » = 11, 12; « wiḥ, ikkī(h), bāi(h) » = 20, 21, 22; « triḥ, battih » = 30, 32; « cālī(h), cutālī(h) » = 40, 44; « pañjāh, aṭhwañjā(h) » = 50, 58; « bāhṭh, chēāhṭh » = 62, 66; « ihattar, pañjhattar » = 71, 75; but « assī, ikāsī » = 80, 81, where the sibilant is retained. In the other NIA. languages, in Marāṭhī, Gujarātī, W. Hindi, E. Hindi, Bibārī and Bengali for instance, we find « -h- » for « -s- » regularly only in the 2nd and 8th decades, but irregularly in other cases (e.g., Hindi « bārah » = 12, « bāhāttar » = 72 but « pacās » = 50, « aṭhwan » = 58); while the « -s- » remains in the third, fourth, fifth and ninth decades (e.g., Hindi « bāis » = 22, « aṛtīs » = 38, « byāllis » = 42, « pacāsī » = 85) : and Oriyā and Assamese preserve the « -s- » in the eighth decade as well (the « s » in Assamese has become [x]). The Pali forms cannot explain all these anomalies among the NIA. speeches, because Pali represents an earlier state of things in MIA. when « -s- » remained a sibilant. The later Prakrits show a mix-up of « -s- » and « -h- » forms which it is now impossible to refer to local dialects of the Second MIA. stage. Forms like those that we find in Pali would seem to have been adopted in most MIA. dialects by the Second MIA. stage : then after the « -s- > -h- » change took place in one area (probably in N.-W. India : see *supra*, p. 549), that phonetic development also partially insinuated itself into the forms of the standard speech (some form of Śaurasēṇī, in all likelihood), and thence also to the other dialects, but not uniformly.

The origin of the NIA. words for the numerals has been discussed by Bloch (cf. 'Langue Marathe,' pp. 214-223). The question is studied here from the point of view of Bengali.

**512.** *One*—এক « ēk » [æ:k] : from eMB. [e:kə], OB. [e:kə] < MIA « ēkka », a MIA. *ts.* or *sts.* form, occurring side by side with the *tbh*

« ēga, īa » which occur in Prakrit but which are not so common (Jaina Ardha-māgadhi prefers « ēga », however). The Assamese এ « ē » = one, as in এজন « ē-zāŋ » = one person, এটা « ē-tā » = one, এহেজাৰ « ē-hēzār » = one thousand (= Bengali একজন, একটা, একহাজাৰ « ēk-jaŋ, ēk-tā, ēk-ħājār »), shows that the *tbh.* « īa » was as much a living form in Second and Third MIA. as the *sts.* « ēkka ». A common and exceedingly important word, for the numeral *one*, it could not remain as the colourless « īa », and hence the *ts.* form could easily come in to meet the necessity of a distinctive vocable.

In composition, « ēkā » remains unmodified (*e.g.*, একুশ *ekuś* < ēkuīś, ēkāīś = 21 ; একত্ৰিশ, তিৰিশ *ēk-ṭ-t(i)ris*, ēkāṭtriś = 31 ; একচালিশ *ēk-ṭ-cālliś* = 41 ; একান্ন *ēkānna* = 51 ; একষট্টি *ēk-ṣ-sattī* = 61 ; একাত্তর *ēkāttarā* = 71 ; একান(ব)ই *ēkānī*, *ēkānābbāi* = 91 ), except in এগাৰ « ēgārā » = 11. Here the voicing difficult is to account for. It seems to be NIA., from a Late MIA. « \*ēkāraha », a standard form, < earlier « ēkkārāha » which supplanted the *tbh.* « īāraha ». The « -k- < MIA. -kk- » is preserved in Marāṭhī « akrā » ; and Panjābī « yārā » represents the normal MIA. *tbh.* « īāraha- ». The Ardha-māgadhi « īga » would only be confined to literature, and cannot be regarded as being responsible for the NIA. « ēgārā, īgārah » etc. The ‘Prākṛta-Pāṅgala’ form « ēggāraha » seems only to be a Prakritisation of the NIA. word. In forms like « ēk-ūṣā, ēk-ṭ-t(i)ris » etc., an analysis into « ēkā + biś » (*viś*), « ēkā + t(i)ris » was easy, and this analysis seems to have helped to bring in or retain the « -k- » ; but there was not much scope for this analysis when « -daśa » became « -raha » in the MIA. « ēkkāraha, \*ēkāraha, īāraha » in the dialects, which mostly now have « -g- » or zero for the original « -k- ». In Gujarāti « ḍogaṇis » = 91, « ḍoṅatīs » = 29, « ḍogaṇcālīs » = 39, « agnō-ēśī, ḍogānyāśī » = 79, however, it is not a case of voicing : « ḍogan- » is not from OIA. « ēkōna- », but is rather from a Skt. « \*apaguṇa (-vīñśati) », etc. (Pischel, § 444).

In Chittagong Bengali, there is the voicing of « -k- » which characterises this dialect : « ēgā < ēkā » ; also « ēkuā, ēkā > ēguā, ēgā, eggā, oggā » ; (this « ēguā, eggā » gives in Chittagong Bengali the numerative enclitic « -ggā » or « -gōs » : *e.g.*, « du-ggā » = two pieces, « tsāir-gōs » = four pieces,

etc., which corresponds to « dui-gō, cār-gō » etc., of the Bihārī dialects); « ēgāis়, ēgois় = ēkuis়, ēkāis় »; etc.

In other compound forms in Bengali, « -k- » of « ēk » is preserved: e.g., একইতি « ēkuiti » (=ēka-putrikā). The « -k- » is lengthened or doubled in Bengali for emphasis, as in the case of the other consonants: e.g., একেকালে, একেবারে « ekkē-kālē, ekkē-bāre » all at once or all at the same time, etc. (see above, p. 448).

513. *Two*=হই « dui », from MIA. « duvē », properly the neuter form = « dvē » of OIA., which is already established in the eastern dialect of Asoka for the masculine as well (e.g., Rock Edict I. Jaugada = « duvē majulā=dvāv mayūrāv »). হই « dui » is a genuine Prācya and Māgadhi form as preserved in Bengali. It is found in the other Magadhan speeches as well. Other typical NIA. forms, differing from that of the Eastern tracts, are « dō » (W. Hindi and Panjabī), « dōn » (Marāṭhī), « bē » (Gujarātī), « b'ē » (Sindhi) and « dē-ka » (Sinhalese).

In composition with nouns, the equivalent was « dō » in MIA. In the Caryās, « dō » also occurs (beside « dui ») as an independent or qualifying form: e.g., « dui gharē » (Caryā 2), « dui māra (=mārga: Caryā 26), and « dō bātā » (=vartma: Caryā 15). We have also a definitive « duā » as in « phītaü duā » let the two be split or destroyed. In genuine Bengali compounds, the form « dō » becomes « du » when followed by a high vowel (see under 'Vowel Harmony,' *supra*, pp. 397-398): thus, দুমখ « du-mukhō < dō-mukh-ā » two-faced, দুচূট « du-chut় » < দোচূট « dō-chut় » (see p. 472), দুপুর « dupur় » < দোপহর « dō-pahār় » (dvi-prahara); but দোপাটি « dō-pātī » a flower, দোঁশিলা « dō-śiśilā » of mixed breed (dvi+aśa+la-), দোভাসী « dō-bhāṣī » interpreter, etc. A common contraction of the adjectival দুই « dui » is দু' « du »: e.g., দু(ই)টা > দুটো « du(i)-tā » > du-tō » two pieces, দু(ই)জন « du(i)-jāṅ » two persons. In such forms, দু « du » is regarded as forming compounds, and this fact influences the original « dō » in many compounds to be changed to « du »: e.g., দুহাতা > দুহাতা « du-hātā » > du-hāttā », beside দোহাতা « dō-hātā » with both hands (=to one's best advantage), দুধারী « du-dhārī » beside দোধারী « dō-dhārī » two-edged, etc.

In MB. there is the form **দোহ** « dōhā » *two* (as in **দোহৈ** « dōhē » nominative and oblique, **দোহাৰ**, **দোহাকাৰ** « dōhā-r̥, dōhā-kār̥ » genitive, **দোহাকে** « dōhā-kē » dative) which represents an Apabhrāṣṭa genitive « \*dōnhā, dōn̥nām ». Variants of this form, with the nasal from the genitive plural of the noun, are **দুইহ** « duihā » (as in the ŠKK.), and **ছহান** « duhānā » (as in the Early Assamese **ছহানো** « duhānō »).

In compound numerals, we find the forms **ব** « bā- » and **বি**, **বি** « bā-, bi-, bē- » representing the OIA. « dvā-, dvi- »: thus **বাইশ** « bāis̥ » (dvā-viñśatī), **বত্তিশ**, **বত্তিরিশ** « bātt(i)riś » (dvā-trinśatī), **বিশালিশ**, **বেশালিশ**, **বালিশ** « biyāllis̥, bēyā-, byā- » (dvi-catvāriñśatī), **বিৱাশি** « birāsi » (dvy-aśitī). The change « dv- > b- », as has been noted before (see *supra*, pp. 508, 782) is non-Māgadhi: native Māgadhi would have shown « \*dōā-, \*dui- ».

Bengali **দোকা** « dōkā » *twain, with a second* is an analogical formation after **একা** « ēkā » *alone*.

In the OB. of the Caryās we have the word « bēni » to mean *two* (Caryā 1, 4, 5). The word in this sense is extremely common in Early Oriyā (ବେଣୀ). It is the *ts.* word « vēṇi » *plait, plait of two bands of hair*, and the Sanskrit word itself would seem to be based on a MIA. formation from « dvi- », with « v- < b- » from « dv- ».

**514.** *Three*=**তিনি** « ting », properly **তৌনি** « ting » < OB. « tini, tini=tini » (cf. Caryā 13, « tini bhuaṇa » *the three worlds*; also Caryā 7 and 16); Oriyā, Assamese and Maithili=« tini ». This form is found in most NIA., excepting in the Western Languages—Panjabī and Lahndī, Sindhī and Gujarātī—which have forms in « -r- » (Panj. and Lahndī « trai », Sindhī « ṭrē », Gujarātī « traṇ ») through Dardic influence. The NIA. « tini » comes from the OIA. neuter « triṇi », which was generalised in the East for all genders (and, it seems, also in the Midland: cf. W. Hindi « tin(i) »). This can be seen from Aśokan inscriptions: thus « tiūni pānāni » in Dhaulti and Jaugada I,=« tiāni, tini pānāoi » in Kalsi, for which Girnar has « ti, tri prāṇā » and Shahbuzgarhi « tra(yo) prāṇa, prāṇa-trayo ». OIA. « triṇi » seems to have passed through a stage « \*tr̥ṇi » to give Early MIA. « tinni, \*tiṇṇi ». An expected Māgadhi form from « triṇi », without the intermediate stage « \*tr̥ṇi » postulated here, would be « \*ṭiṇi », and also

« \**ti*-=tri- »: cf. Hindostānī « *ti-kāṭhī* » = tri-kāṣṭhikā » wooden triangular frame to which offenders are tied to be flogged (= Bengali টিকটকি « *ti-kāṭhī* » with confusion with the onomatopoetic word টিকটকি « *ti-kāṭhī* » house lizard) in which « tr- > *ti-* » seems to be a Māgadhism which has survived.

In compound numerals we find তে, তি « tē-, ti- » (< *traya-*, *tri-*): তেৱ « tērā » (*trayodaśa*, \**tridaśa*), তেইশ « tēiśa » (*trayōviñśati*), তে'অশ « tētrīśa » (*trayastrīñśat*), etc., etc. In compounds generally we have তে « tē- », changed to তি « ti- » by Vowel Harmony: e.g., তেঁহাই « tēhāi » third part (*tri-bhāgikā*), তেপ্যা « tēpāyā » *tripod*, M.B. তেঁড়ী, ফেঁড়ী « tēṛī, tiūṛī » *oven* (*tri-vṛt*), etc. O.B. however has « *ti-sarāṇa* » (*Caryā* 13) and « *tia-dhāu* » (< *tri-ka-+dhātu*: *Caryās* 28, 29).

515. *Four*=চার<ঢার, চারি « cār < cālr, cāir, cāri ». This is the form which is found in almost all NIA., except Sinhalese, which has « *satara*, *hatara* ». The NIA. « *cāri*, *cār* » is apparently to be connected with the OIA. neuter form « *catvāri* ». In the Aśokan Kalsi dialect, « *cat(t)āli* », occurs already for the masculine; but Aśokan of Girnar shows for masculine « *catpārō* » (*catvārah*). (This, if it had survived, would have given in NIA., Gujarātī, a form « \*cāpar », through a Second MIA. « \*cap̪ārō »). Pali has « *cattāro* » (accusative « *caturō* »), « *catassō* » and « *catāri* » for the masculine, feminine and neuter respectively. From Second MIA. « *catāri* », we come to the Apabhraṇa « *cāri* » and the Early NIA. « *ciāri* »: and the apparent loss of « -tt- » in these later forms is not easy to explain (see *supra*, pp. 254-255). The loss of the « -tt- » may have been due to the form taken by this numeral word in compounds — « *caü* < *catuh-* »; and as Pischel notes (Gramm. der Pkt.-Spr., §439, p. 313), « *cāri* » occurs in Apabhraṇa in compounds (« *catuspāda* » > \**caüppāa*+\**cattāri-pāa* » giving « *cāri-pāa* »?).

The form « *ciāri* » is attested from Early Oriyā, from Marāṭhī, and from other NIA. languages (see *ante*, p. 106). It can also be well assumed that Bengali also possessed this « *ciāri* », at least side by side with « *cāri* ». The form « *ciāri* » appears to be late, and NIA. There is no proper

explanation of the intrusive (?) « -i- », but an Iranian influence here does not seem to be an impossibility (see *supra*, p. 255; also see *infra*, under *Six*).

In compounds, the numeral occurs as ৳ৰ « cāu » = MIA. « caū », OIA. « catuh, catus, catur ». The diphthongal form occurs already in OB.: e.g. « cau-disa » (Caryā 6), « cau-kot̄hi » (Caryā 37). In the numerals, « cau » has become contracted to « cō-, cu- »: thus চৌদ **« cōddā »** (« caturdaśa »: the « sādhu-bhāsā » form চৌক **« cāyddā »** is archaic), চৌবিশ **« cōbbis̄ »** (caturvīśati), চূৰাজিশ **« euallis̄ »** (catuścatvārinsat), চূৰান **« cuānnā »** (catuhpañcāsat), চূৰাত্তর **« euāttarā »** (catussaptati), চূৰাপী **« curāsi »** (caturaśiti), চূৰান(ব)ই **« curā-nā(bbā)i »** (caturnavati). The forms চৌজিশ **« cau-tris̄ »** (catustrināsat) and চৌষট্টি **« cau-satt̄i »** (OB. « caūsāthi, cauṣāt̄hi, cauṣāt̄thi » as in Caryās 3, 12 and 10 respectively := « catuṣ-sāti ») preserve « cau »: but they are not the normal Bengali forms as expected—the first has *ts.* influence, and the second seems to have been influenced by literary Prakrit from the OB. period. In MB. and dialectal NB., through the common change of « া » to « ঃ », we have চৈপৰ, চৌপৰ **« cāipār̄, cōpār̄ »** < চৌপৰ **« cāupār̄ »** (caū-pahara, catusprahara), চৈক **« cāiddā »** (= Assamese চেখা « cāidhyā ») beside চৌক **« cāyddā »**, etc. (see *supra*, p. 385). Compounds like চৌকাঠ **« cau-kāṭhā »** door-frame, চৌমুঠী **« cāmuṭhī »** four-in-hand, চৌমোল **« cau-dōla »** litter, palanquin of state, চৌমুঠী, \*চৌধুৰী **« Caudhuri < \*Caudhārī »** a title or surname < chief (= catur+dhara + -ika), চৌমাথ **« cau-māthā »** carrefour, crossing, are archaic in type, and « cau » is an atrophied form; and in MB. and NB., compositions with the Bengali চারি, চার **« cār(i) »** are more common: e.g., চার-পেয়ে < চারি-গাইয়া **« cār̄-pēyē < cāri-pāiyā »** four-footed, চার-কেলে < চারি-কালিয়া **« cār̄-kēlē < cāri-kāliyā »** of the four ages, etc.

**516. Five = পাঁচ « pāc̄ » (OIA. pañca). All NIA. speeches agree in retaining the nasal, except Sinhalese, which has the form « paha < pasa < \*paca ». In compounds with nouns, « pāc̄ » remains unchanged in Bengali: e.g., পাঁচমুঠী **« pāc̄-muṭhī »** five-crested, পাঁচ-হাতী **« pāc̄-hāt̄-ī »** five cubits long, etc. In the compound numerals, however, the word occurs in four forms in Bengali, as below:**

- (1) পঁচ « pāc- » as in পঁচিশ « pāciś » (pañca-viñśati), পঁচত্তর « pācattāra » (pañca-saptati), পঁচাশী « pācāśī » (pañcāśiti), পঁচান(ব)ই « pācānā(bbā)ji » (pañca-navati) ;
- (2) পঁচ « pañc- » as in পঁচাশ « pañcāś » (pancāśat), পঁচান্ন « pañcānnā » « pañca-pañcāśat » : there is a dialectal পঁচপন « pācṣ-pāṇṣ », and উনপঁচাশ « unā-pañcāś » ; also contracted to « -āñc- » as in উনঁচাশ « unāñcāś » 49 ;
- (3) পঁয় « pāyṣ- » as in পঁয়ত্রিশ « pāyṣ-triś » (pañca-triñśat), পঁয়তালিশ « pāyṣ-tallis » (pañca-catvāriñśat), and পঁয়ষটি « pāyṣ-ṣaṭti » (pañca-ṣaṭti) ;
- (4) পন, পান, আন « pāñc-, -pānnā, -ānnā » as in পনের « pānērā » (pañca-daśa), and in the fifties—একান, বাহান, তিপ্পান, চূমান, পকান, ছামান, সাতান, আটান, « ekānnā, bāhānnā, tippānnā, cuānnā, pañcānnā, chāppānnā, sātānnā, ḥānnā ».

Of the above, « pācṣ < pācṣ- », with short « -ā- » through absence of stress in the word in the formative period of Bengali, seems to be the native Bengali form : and « pañc- » in পঁচাশ « pañcāś » etc., has a restored « -ñ- », apparently through *ts.* influence : the expected native Bengali form would be « \*pācāś » : cf. Hind. « pacās ». The forms « pāyṣ (=paña) » and « pāñṣ, pānnā, -ānnā » are respectively from MIA « pañña » and « panna (panna) », from « \*pañja < pañca ». The change « ñj > ññ, ñ » is found in Maithili in one or two forms (see *supra*, p. 364), but it does not characterise Bengali ; and « -ñc->-ñj->-nn-, -n- » is equally foreign to Bengali. We find the latter change in the Midland and Eastern inscriptions of Aśoka : e.g., « pañna-ḍasa » (=panna-ḍasa < pañca-daśa) and « pañna-visati » (=panna-visati < pañca-viñśati) in the Delhi-Siwalik pillar, for instance, and « sa-pañnā » (=\*sappannā[h] < ṣaṭ-pañcāśat) at Sahasram : where it can well be an imposition from an « -ñc->-ñj->nn » (and « -s- > -h- ») dialect, presumably of the North-West (cf. Jules Bloch, JA., 1912, I, pp. 332 ff.).

517. Six=ছয়, ছ « chāyṣ, chā », Assamese « chāy » [səɛ], Oriyā « chāa ». MIA. has the form « cha ». The Bengali, Assamese and Oriyā forms, as well as the Panjabī « chē », Marāṭhī « sahā », and the forms « chē, chēy-, chiy- » as in the decades (as compared with Hindi and Gujarāṭī

«cha-») are apparently based on a fuller form in MIA. than simple «cha». The word cannot have originated from «sat» of OIA.: «s- > ch-» would be an inexplicable change in Early MIA., and we should expect the sibilant to remain either as «s-» or as «ś-», as in «śoḍāśa, śaṣṭi» > NIA. sōlah, sāt̪: and as a matter of fact the word for *six* does occur with «s-», in Aśokan Prakrit.

The Indo-European word for *six* was «\*seks, \*sweks». In Indo-Iranian, it became «\*saśs, \*swaśs», the expected OIA. equivalent of which would be «\*sakṣ, \*swakṣ > \*sak, \*swak», which could change only to «\*sat̪, \*svat̪» by analogy (Uhlenbeck, 'Manual of Sanskrit Phonetics', p. 88; Wackernagel, I, p. 174): normally it could not certainly be «sat», such as we actually find in OIA. In the form «śaṣ-» (as in «śaṣ-thā, śaṣ-ti»), the second «-s-» is quite regular (< Indo-Iranian «\*s[w]aṣtha, \*s[w]aṣti» = IE \*s[w]eks-tho, \*s[w]eks-ti: cf. Wackernagel, I, § 202, d). This «-ś- > -s-» in the interior of the word may have influenced the initial «\*s-» to «ś-, s-» (Indo-Iranian «\*s[w]aṣtha, \*s[w]aṣti > \*ś[w]aṣtha, \*ś[w]aṣti > OIA. śas-, Prim. Iran. \*ś[w]aṣ-»: cf. H. Reichelt, 'Awestisches Elementarbuch,' § 160). The Avestan equivalent of Vedic «sat, saś» is «xvaš», which represents the Iran. «\*śwaś» (with the «-w-» of IE. «\*sweks»): the prothetic «x-» in «x-śvaš» is regular in Avestan before initial «ś-» plus consonant (Reichelt, ibid., § 174). The forms «śaṣ (śaś), xvaš» beside «\*śvas (\*śwaś)» occurred in the various ancient dialects of Indo-Iranian, as we can see from Sanskrit, from Avestan, and from the various present-day speeches of the Indo-Iranian borderland—Iranian and Dardic: e.g., Baṣgali «śō», Kalaṣa «śōh», Vērōn «uṣu» and Śinā of Jalkot «śva (śva)», as well as Paštō «śpaž, špēž, špag», would seem to be based on a form «\*śwaś» or «\*śvas»; Śinā «śah, ša (śah, ša)» and Kaśmīrī «šeh» on «śaṣ (śaṣ)», like the New Persian «šaš», : and the Central Asian Ghalcha forms—Yüdghā «uxšo» and Munjānī «axše» would appear to be based on a form agreeing with the Avestan «xvaš». But «śas, \*śyas» cannot explain the MIA. and NIA. «cha-», and the Khō-wār (Dardic) «choi». Could the typically Iranian «xvaš» have been borrowed, or blended with the Indian «śaṣ», in an old Indo-Aryan frontier dialect, in the

form « \*kṣas, \*kṣak »? This form in « kṣ- » could well be extended to « \*kṣaka », to make it a disyllabic word like « pañca, sapta » etc.: and « \*kṣas, \*kṣaka » could very well be the source of « cha, chaa », with the North-western or Western MIA. alteration of « kṣ- » to « ch- » (cf. *supra*, p. 469).

Tokharian of Central Asia (*supra* p. 5) shows some peculiar forms for *six* and *sixth*, which may be noted. In Dialect A, it is « ṣak », ordinal « ṣkaṣ » and in Dialect B the forms are « ṣkas, ṣkaste », cardinal and ordinal. The derivation « IE. \*seks > \*ṣaks > \*ṣakas > ṣak, ṣkas » has been proposed (cf. A. Meillet, MSL., XVII, 1912, p. 287). But in this connexion, can an Indo-European « \*skes » (or « \*skwes »), as occurring side by side with « \*seks, \*sweks », be postulated? In that case, this « \*sk- » of Indo-European can regularly give the « ch- » of Indo-Aryan.

In the Aśokan inscriptions, the words for *six* are « cha » (Rūpnāth: « cba-vacharē »), « sa- » (Sahasram: « sa-vachalē, sa-pañnā »), « ṣa- » (North-West and Kalsi), and « sadu- » (Dehli-Siwalik and-Meerut « saḍu-visati »). The occurrence of « cha » and « sa-, ṣa-, sad- » side by side is a certain indication that the first is a form independent of the other ones.

The « -h- » in Western Apabhraṇa « chaha », Marāṭhī « sahā », Sinhalese « saha » is obscure. It may represent the second sibilant in the base form « ṣas », which is seen to occur in Dardic. The forms « chē, chēy-, chiy- » in the compound numerals are easily explained as being from a MIA. « chaa, chaya ». The Maithili « chau », earlier « chaō, chahu » (as in the 'Varṇa-ratnākara,' *supra* pp. 102-103; also in the same work, « āṭhahu=āṭha » 8, « caubisaō »=« caubisa » 24, etc.), has the affix « -hu » which would seem to be only an emphatic particle.

The words for 16, and the *sixties*, are based on the OJA. (Sanskrit) forms with « s- ».

**518.** *Seven*=সাত « sāt »: regularly derived from OIA. « sapta », and found in all the IA. speeches (Hindi etc. « sāt », Panjabī « satt », Sindhi « sata », Sinhalese « hata, sata »).

In the compound numerals, except in সতেৰা « satera » 17, and সাঁইডিষ্ট « sāitrisṭ » 37, « sāt » is unchanged. In Early Bengali, it is likely that the

compounded form was **\*sātā**, with weakening of **-ā-** to **-ā-** through absence of stress : cf. Oriyā **sātāīśa, sātā-cālīśa** 27, 47, Hindi **satāīś, sat-hattar** 27, 77, etc. The **-ā-** is due to initial stress, no doubt; but curiously enough, we have সতেৱ **sātērā** and not **\*sātārā** which would be the expected or normal form for Bengali. In সাইত্রিশ **sātrīś** (or সায়াত্রিশ **sāyātrīś**) there was certainly the influence of **pāy় < pāñña** of প্রত্রিশ **pāyātrīś** 35 : cf. similar nasalisation in Bengali চৌত্রিশ **cāutriś** (beside চৌত্রিশ **cāutriś**) 34, and Maithili and Hindi **tētīs, cāntīs, tētālīs**. Other Magadhan speeches have **sāl-** or **sāy-**; e.g., Maithili **sāltīs, sāltālīs**; except Assamese, which has a borrowed and modified form **sāttrīc** [xāttrīs]. The analogical **sāi-, sāy-** we find also in Hindi **sātīs, sātālīs**, and Panjābī **sāt(r)ī, sātālī** 37, 47. The form of this numeral as **sat** > **sād, sar, sar, sād**, as in Hindi **sar-sāth** 66, Gujarātī **sād-trīs** 37, which is due to the influence of **aṭh-, ad-** 8, is not found in Bengali.

**519. Eight=অটি < āṭi>, আঠ < āṭhā> in eMB. and OB. (< aṭṭa-).** This word remains unchanged in compounds as **āṭi**, except in আঠাৰ **āṭhārā** 18, where the old aspiration is preserved. The *ts*. আঠ, অটি < āṭṭā, āṣṭā> is also common, by itself and also in the forms অষ্টশী < āṣṭā-āśī> 88 and আটন(ক্র)ই < āṣṭā-nā(bbā)i> 98, beside the regular *tħħs*. আটশী < āṣṭāśī> and আটন(ক্র)ই < āṣṭā-nā(bbā)i>.

**520. Nine=নয় < nāy় >, from OB. < \*naẏā >, and ন < nā, nā > = OB. < naῶ > mainly in compounds (OIA. *nava*). Oriyā has **nāā**. The numeral নয় < nāy় > does not occur in the decades, the nines being formed, as in OIA., by prefixing **ūna-** (in Bengali উন < ūnā->, Oriyā < ūnā-, ūnā->) *less* to the next ten : e.g., উনিশ < un-iś > 19, উনসত্তর < ūnā-sattār > 69, etc. Cf. **ōgaṇ-** in Gujarātī, p. 784. An exception is নিনান(ক্র)ই < ni-r-ā-nā(bbā)i > 99, with altered vowel and intrusive **-r-**. Most NIA. languages agree in having a corresponding compounding of *nine* and *ninety*, Oriyā, however, has **ānē-sātā** (with irregular dental **-n-**).**

**521. Ten=দশ < dāś >. The sibilant is preserved in most NIA. except in the Western languages—Lahndī **dāh** beside **das**, Sindhi **d'āha**, dialectal Gujarātī **dah**, and Marāṭhī **dahā**; and Sinhalese**

also has « *daha(ya)* » beside « *dasa(ya)* ». In the OB. of the *Caryās*, we find « *daśa* » side by side with « *daha* », of which the former alone would seem to be native Māgadhi.

### 522. *The Tens.*

The phonology is peculiar for Bengali in two ways—by change of OIA. « -ś- » to « -h- » (which is dropped in MB.), and by that of « -d- » to « -r- »: « -daśa > \*-daśa, -dasa (cf. Aśokan *duvāśasa*, *pañnaśasa*) > -lasa, -lasa (cf. Jainā *Ardha-māgadhi duvālasa*), -rasa (as in Pali) > -raha (as in Second MIA.) ». The change of « -d- » to « -d̪- », which could easily alter to « -l̪-, -l- » and then « -r- », has not been satisfactorily explained. It certainly occurred in a cerebralising dialect after the « d̪ » in « śoḍaśa » altered to « l̪, l », as this « d̪ > l̪ > l » did not participate in the general change of « d > d̪ > l̪ » to « r » of « ēkādasa » and the rest. (Cf. Jules Bloch, ‘*Langue Marathe*’, § 221; see *supra*, p. 488, for the cerebralisation; also p. 549 for « -ś- » > « -h- ».)

The final group « -aha » became « -ā » and then « -ā » in Bengali, Oriyā and Assamese: and this final « -ā » is also written and pronounced & « -ō » in Bengali (*supra*, p. 347); but « -ahā » is retained in Bihārī and in Hindi. In Panjābī, it occurs as « -ā » (yārā, bārā etc.) where it is an oblique plural form used absolutely: so in Sindhī « -an » (yārahan, bārahan). Marāthī has « -ā » (akrā, bārā), which also is apparently a plural form with dropping of intervocal « -h- » (< \*ēkkārahā, \*bārahā ?). In Gujarātī, the group « -aha », found in Northern India, is dropped (*e.g.*, bār, tēr, caud, pandar, sōl, satar, adhār): this apparent dropping of two syllables of MIA. is strange, but it is possible that the Second MIA. source-forms of the Gujarātī tens were, not « bārasa, tērasa, caüddasa » (or « bāraha, tēraha, caüddaha ») etc., but rather « \*bāras (\*bārah), \*tēras (\*tērah), \*caüddas (caüddah) » etc., with the final vowel already dropped, through an intermediate stage of « \*bārasə, \*tērasə, \*caüddasə » (or « \*bāraha, \*tēraha, \*caüddaha ») etc. (See *supra*, p. 752, on the probable pronunciation of genitival « -asya > -assa » as « -ase, -as » in the Malwa country in the Transitional MIA. period.) Sinhalese preserves rather archaic forms, « ekoṭosa, doṭosa, telesa, pahaṭosa,

solosa, satalosa, atalosa », where the « -l- » occurs in all the numbers, and not in the form for 16 alone, as in Northern India.

In NIA. « cau(d)dah », the « -d- » is preserved by the preceding « -r- »: MIA. « caiddaha » is palpably an uncerebralised, non-Māgadhi form. The MIA. doubling is kept up in NB. চৌদ, চৌদ « cāuddā, coddā », Standard Coll. [cōddo], although we find চৌদ « cāudā » with one « -d- », (beside চৌদ « cāuddā ») in the ŠKK. In Assamese চৈধ্য « cāidhyā » there has been metathesis of the « -h- », aspirating the « -d- »: the « -y- » indicates only doubling.

### 523. The Twenties.

The common Bengali word for *twenty* is কুড়ি « kuri » = Assamese « kuri », Oriyā « kōriē », meaning *score*. Cf. Bengali এক কুড়ি « ēkā kuri » *one score*, but never বিশ « ēkā bis̪ ». In Western Hindi the word also occurs in the form « kōri », which is the earlier form (see *supra*, pp. 395-396). Gujarāti has it as « kōṭī, kuntī ». Computation is, or normally used to be, by twenties in Bengal: at the present day, this is still the old-fashioned way: thus 25 = এক কুড়ি পাঁচ « ēkā kuri pāc̪ » *one score and five*, 38=এক কুড়ি আঠারো « ēkā kuri ḥāthārō » *one score and eighteen*, 62=তিন কুড়ি হুই « tīnā kuri dui », 85=চার কুড়ি পাঁচ « cārā kuri pāc̪ », 100=পাঁচ কুড়ি « pāc̪ kuri », etc. Counting by twenties is also common in Assam: and the fact that the numerals for the third decade in Assamese show in their spelling ৫ « e » indicating the [s] pronunciation, rather than শ or স « ś, s » which would be the expected form (with normal change in pronunciation of the original sibilant to the guttural spirant [x]: একইচ, বাইচ, তেইচ, চৌবিচ, পঁচিচ, ছার্কিচ, সাতাইচ আঠাইচ, also উনইচ « ēkāic̪, [ekois], bāic̪ [bais], tēic̪, cāubica, pāc̪ic̪, chābbica [sabbis], sātaic̪, [xatais], unāic̪ » 21, 22, 23, 24, 25, 26, 27, 28, 19, rather than \*একইশ, \*বাইশ « \*ēkāis̪, \*bāis̪ » [ekoix, baix] etc.) indicates that the forms in « -ic̪=-vīsa » were borrowed from some Western dialect, Maithili or Hindi, into Assamese. In Bengali, the word বিশ « bis̪ » 20 is by no means common: it occurs only in a few expressions like উনিশ-বিশ « unis̪-bis̪ » 19 and 20=*minute distinction*. Counting by twenties is also found in Bihar, and also further west in Hindustan.

It is to be noted that the highest unit for counting among the Kôls is twenty (Santali « isî », Mundârî « hîsî, isî », Kurku « Isâ » : the IA. « bîs », and « kôrî » also are used : *hundred* is  $5 \times 20 = [môrës\ isi:]$  in Santali, [môrës hisi] in Mundârî, « mono Isâ » in Kurku, « molloï kođî » in Savara : borrowings of the NIA. word « sai, sau<śatam> are also found). Vigesimal counting is found in many languages—*e.g.*, in Dardic (cf. Grierson, ‘Pisäca Languages,’ p. 37), in French. But it seems that in the case of Bengal, Bihar and the Upper Gangetic plain, probably also in the North-Western frontier (the Dardic tract), Kôl influence was responsible for this habit of computation, rather than that counting by twenties characterised some form of OIA. The word « kôrî, kuṛî » occurs in Tamil as « kôđî ». Although any cognate form has not been found in the Kôl speeches, it is still exceedingly likely that « kôrî, kuṛî » in its origin is a Kôl word, and not Dravidian or Aryan.

The OIA. « viññati » gave MIA. « visati (Asôkan and Pali), vi(n)sai, visaI, visaîm (Second MIA.) ». The Pali « vîsâ, visa », IMIA. « visa » are from an OIA. « \*viññât » on the analogy of « triññât, catvâriññât, pañcâññât ». In the compounded forms, the labial « -v- » (where not doubled to « -bb- ») has been vocalised in Bengali and other Magadhan ; and besides, the vowel « -i- » has been dropped wherever suitable in Standard Bengali, but it is preserved in dialectal Bengali (as in Chittagong), in Oriyâ, in other NIA. generally : *e.g.*, ଉନିଶ « uniś় » < « \*unôiś় », unaiś় 19, ଏକୁଶ « ēkuś় » < « ēkâiś় », \*ēkaviśa 21, ସାତାଶ « sâtâś় » < « sâtâiś় », \*satâvîsa 27, etc. ଚରିଷ « cabbis় » properly for ଚୋରିଷ « cobbis় » (caubbisa, caturviññati) and ଛାରିଷ « châbbis় » (< śadviññati >, with « ch- » from the numeral for six) are archaic forms, influenced by Prakrit, which retain the group « -bb- » (under normal conditions expected to change to a single « -b- ».)

#### 524. *The Thirties.*

The native *tbh.* form \*ତୀଶ \*ତିଶ « \*tiś় » has been supplanted in Eastern Magadhan (Bengali, Assamese, Oriyâ) by the *s/s.* ତିଶ « triś় » or ତିରିଶ « tiriś় » ; in Assamese, as the spelling in ট, ତିଚ « tric় » = [tris] shows, this supplanting has been recent. In the compound numerals for the fourth decade, the *tbh.* « \*tiś় » is frequently heard in

Bengali : e.g., বাতীস  $\leftarrow$  bāttis়  $\rightarrow$  32, ছতীস  $\leftarrow$  chāttis়  $\rightarrow$  36, etc. (beside the more common বাত্রিস  $\leftarrow$  bātriś  $\rightarrow$ , ছত্রিস  $\leftarrow$  chātriś  $\rightarrow$  etc.) : cf. OB.  $\leftarrow$  batīśa, batīsa  $\rightarrow$  (Caryās 17, 27), MB. চৌতিশ  $\leftarrow$  cāutīśā  $\rightarrow$  (see *supra*, p. 228); Assamese  $\leftarrow$  bātīśā  $\rightarrow$  = [botixa] ; and Oriyā preserves in the *tbh.*  $\leftarrow$  -tīśā  $\rightarrow$  side by side with the *sts.*  $\leftarrow$  -tirīśā  $\rightarrow$  in the fourth decade.

The  $\leftarrow$  -r-  $\rightarrow$  forms of Gujarāti (tris, trīś) and Panjābī (trī, trih) may be due to the numeral for *three* (tran, traī). Sindhī has  $\leftarrow$  tīha  $\rightarrow$ . Other NIA., e.g., Hindī, Marāṭhī, keep to the *tbh.*  $\leftarrow$  tīs  $\rightarrow$  (Sinhalese  $\leftarrow$  tiha, tīsa  $\rightarrow$ ).

### 525. *The Forties.*

*Forty* is চালিশ or চালিশ  $\leftarrow$  cālliś  $\rightarrow$ , cālliś  $\leftarrow$ , sometimes চালিশ  $\leftarrow$  cāliś  $\rightarrow$  =  $\leftarrow$  catvāriśat  $\rightarrow$ . The last form with one  $\leftarrow$  -l-  $\rightarrow$  is the genuine *tbh.* form : this single  $\leftarrow$  -l-  $\rightarrow$  is found as the cerebral  $\leftarrow$  -ʃ-  $\rightarrow$  in other NIA. The doubling of the  $\leftarrow$  -l-  $\rightarrow$  is quite optional even now, and is apparently recent in Bengali, absent as it is in Assamese, in Oriyā, and in other NIA. The change of  $\leftarrow$  -r-  $\rightarrow$  to  $\leftarrow$  -ʃ-, -l-  $\rightarrow$  in this word shows that it is Prācyā or eastern in origin (< cattālisa), but it spread all over the NIA. area. The group  $\leftarrow$  -tvā-  $\rightarrow$  Early MIA.  $\leftarrow$  -ttā-  $\rightarrow$  has been dropped as in  $\leftarrow$  cāri  $\rightarrow$  4, but Sinhalese preserves the dental ( $\leftarrow$  hataliha=satalisa < MIA. cattālisa : there is also  $\leftarrow$  sālisa  $\rightarrow$ , which is late). The dropping of the  $\leftarrow$  -tt-  $\rightarrow$  is already found in Second MIA., in Jaina Ardha-māgadhi. In the compound forms for the fifth decade,  $\leftarrow$  -c-  $\rightarrow$  remains in একচালিশ or চালিশ  $\leftarrow$  ēk- $\bar{c}$ āl(l)iś  $\rightarrow$ , -cālliś  $\rightarrow$  41, (c) ছচলিশ  $\leftarrow$  chēcālliś  $\rightarrow$ , chā-  $\rightarrow$  46, সাতচালিশ  $\leftarrow$  sāt- $\bar{c}$ ālliś  $\rightarrow$  47, and আটচালিশ  $\leftarrow$  āṭ- $\bar{c}$ ālliś  $\rightarrow$  48 ; it is dropped in বিযালিশ  $\leftarrow$  biyālliś  $\rightarrow$  49 (<  $\leftarrow$  \*bāyālliś  $\rightarrow$  etc. : cf. Oriyā  $\leftarrow$  bāyālliś  $\rightarrow$ ) and চুযালিশ  $\leftarrow$  cuālliś  $\rightarrow$  44 (<  $\leftarrow$  \*cō-āliś, \*cau-āliśa) ; and it is altered to  $\leftarrow$  -t-  $\rightarrow$  in তেতালিশ  $\leftarrow$  tē-tālliś  $\rightarrow$  43 and পঞ্চতালিশ  $\leftarrow$  pāy়-tālliś  $\rightarrow$  45. In Māgadhi, we would expect the  $\leftarrow$  -c-  $\rightarrow$  to remain (see *supra*, p. 468). The form  $\leftarrow$  -tālliś  $\rightarrow$  is found in other NIA., and it is obscure : can it be due to some dialectal shortening of  $\leftarrow$  cattālisa  $\rightarrow$ , through loss of the initial syllable ?

### 526. *The Fifties.*

For 49 and 50, we have পঞ্চাশ and উন্পঞ্চাশ, ‡ উন্পঞ্চাশ  $\leftarrow$  pāñcāś, unā(pā)ñcāś  $\rightarrow$ , where the full  $\leftarrow$  ñ  $\rightarrow$  is due to *ts.* influence (see p. 789). In the compound forms OIA.  $\leftarrow$  -pañcāśat  $\rightarrow$  occurs as পঞ্চ পান্ত, অন্ত আন্ত  $\leftarrow$  -pānnā

> -pānnā, -ānnā, -ānnā >, dialectally পন <-pān&gt;, with one <-n->, in Bengali. The forms of dialectal Bengali, of Oriyā (e.g., < ēkābānā, bābānā, tēpānā, chāppānā > etc.), of Assamese (e.g., < bāuwān ; cāuwan ; sātāwān > etc. beside < bāuwānnā, cāuwānnā, sātānnā >), of Maithili (ekāwan, bāwan, tirpan, cāuwan, pacpan > etc.), of Hindōstānī, and of other NIA. speeches would show that the double <-nn-> is a late development within Standard Bengali itself. OIA. < pañcāśat > in the form < \*pannāsa > \*pannāha > pannā >, already found in the Eastern speech of Aśokan, became established in some standard form of Early MIA. In Second MIA., it occurs as < pannāsam̄, pannāsā, pannā, -pannām̄, -vāṇṇām̄ > (in Jaina Ardhamāgadhi). The contraction of <-āśat > to <-āśa, \*āḥā > -ā, -ām̄ > thus occurred already fairly early in Prācyā (Western Prācyā) : although the change <-ñc- > -nn-> is inexplicable for this dialect. The change seems to have been through < \*pañjāśat, pannāha > (see *supra*, p. 789), and not through < \*pañcāśat, \*pañcasat, \*pañcat >, as Pischel suggests ('Grammatik der Pkt.-Sprachen,' § 445, p. 317). The NIA. <-pan, -wan > in composition comes from this contracted MIA. <-pannām̄, -wannām̄ >, Aśokan <-pannā > : the uncontracted form of MIA., viz. <-pannāsa, \*-pannāha > would have given NIA. < \*panā >, in composition <\*-wanā >, which is not found.

In Bengali বাহন্ন <bāhānnā> 52 we have euphonic < h > (p. 341 ; for < \*bāwānā, bāwānā >, cf. Oriyā < bābānā >). In তিপ্পান্ন <tippānā> 53 the doubling is due either to the influence of ছাঁপ্পান্ন < chāppānā >, or to the Hindōstānī *sts.*, with < r > — < tirpan >, by assimilation in Bengali of the <-r-> with the following consonant (see *supra*, p. 541) : the native Bengali form, now obsolete, seems to have been like the Oriyā < tēpānā >. A form তিয়ান্ন or তেয়ান্ন < tiyānnā, tēyānnā >, also native Bengali, occurs. চুয়ান্ন < cuānnā > 54 is for < \*cō-ān&gt;, \*cāu-ān&gt; : cf. Assamese < cāu-wān >. The dialectal পাঁচপন < pāc&gt;-pān&gt; (Central and East Bengal) represents the genuine Bengali form, and not the Standard পাঁচান্ন < pāñcānnā >. The other numerals show no anomaly, except the doubling of the <-n->.

### 527. *The Sixties.*

The word for *sixty* is ষাট = < śāṭ > in Standard Bengali, ষাঁট < śāṭ > ষটি < śāṭi > in Eastern and other dialectal Bengali, = Assamese < śāṭhi >,

Oriyā « sāthīē », and it is regularly derived from OIA. « ṣaṣṭi ». The form with সঠি, সাঠি « sāthā » is also found. In the compound numerals, in Bengali the ট « -t- » is doubled: একষটি « ēka-ṣṭti » 61, বাষটি « bā-ṣṭti » 62, পঞ্চষটি « pāyaḍ-ṣṭti » 65 etc. Oriyā has the *tbh.* form « -ṣathi ». The final « -i » in the compound forms, again, is anomalous: contrast উনষাট « unā-sāṭa » 59, with proper loss of final « -i » ( see *supra*, pp. 307 ff.).

### 528. *The Seventies.*

OIA. « saptati » certainly first changed to « \*saptati » by spontaneous cerebralisation, and then in MIA. (as the source of the NIA. forms) to « \*sattaṭi, \*sattadi, sattari » quite early. In Pali occur both « sattati » and « sattari ». It is very likely that there was the influence of « sattaraha » = « sapta-daśa » in bringing about the change of the « -t- »  $\rightarrow$  -ṭ-  $\rightarrow$  -ɖ-  $\rightarrow$  « -r- ». The double « -tt- » is anomalous for Bengali; it is found also in Bihārī, in Hindi, in Marāṭhī. It is quite normal in Panjabī, and the double « -tt- » may have been imposed from the Panjab dialects on Hindi and on the rest. Gujārātī has one « -t- » ( $agñōtēr=69$ , sitēr=70, ikōtēr=71, b[ō]hōtēr=72, etc.). It would seem from the Oriyā and Assamese forms that in East Magadhan at least, the normal NIA. form with one « -t- » was the rule. But Bengali (in common with the Bihārī dialects) seems to have adopted the Western forms in « -tt- ». In compound forms, « sattari » changes to « -hattari » in most NIA. This, again, seems not to have characterised Magadhan, at least East Magadhan: the sibilant is preserved as a sibilant in Oriyā (unā-stōri, ēkā-stōri, bā-stōri, etc.), and undergoes the normal change to [x] in Assamese, although written স « s » (bā-sāṭar, tē-sāṭar, cāu-sāṭar etc.): cf. also Bengali উনসত্তর « unā-sattāṛ » 69, with the sibilant and not « \*unā(-h)attāṛ ». Bengali thus in all likelihood agreed with its immediate sisters Assamese and Oriyā in having « -s- » and single « -t- » throughout in the eighth decade. The « -h- » (in what may be called the Western, non-Māgadhi or ‘new forms’ for the eighth decade of Bengali) is preserved in dialectal Bengali, e.g., ‡ « ēka-hattāṛ, pācā-hattāṛ, sāṭā-hattāṛ, āṭā-hattāṛ », but in the Standard Colloquial it is dropped as an intervocal sound, except in বাহাত্তর « bāhāṭāṛ » 72.

529. *The Eighties.*

The OIA. « aśiti » quite regularly gives आशी « āśī » in Bengali, with change of initial « ā- » to « ā- » (see *supra* p. 314). The doubling of the « -s- » in Panjābī and Hindōstānī « assī » is peculiar, and seems to have originated in the Panjab: it was this doubling which possibly preserved it from changing to « -h- » in the Panjab dialects (cf. OIA. « kṛtā, \*ditā, pītā » > « \*kitta-, \*ditta-, \*pitta- » > Panjābī « kitā, dittā, pītā »). The Sinhalese « asū, asūva », with intervocal sibilant preserved, would seem to be based on a MIA. « \*ass- » rather than on « as- » (cf. W. Geiger, ‘Litteratur und Sprache der Singhalesen,’ § 21, 22). The Sindhī « āśi » would equally be based on an earlier « \*assī ». It seems that a form with doubled « -s- » characterised the IA. speeches of the North-West and the South-West from MIA. times: « \*assii(m) »; and it is also extremely likely that there was a nasalised form of it, « \*aṇsii(m) » (through spontaneous nasalisation: see *supra*, pp. 368 ff.), which gave by epenthesis the Marāṭhī « aisi, ēsi » and Gujarātī « ēsi, hēsi » (cf. Old Western Rājasthānī « aisi » : L. P. Tessitori, ‘Notes on the Grammar of OWR.,’ § 80).

In the compound forms, Panjābī and Hindōstānī show an intrusive « -r- » in « ti-r-āśi », which is apparently due to the analogy of « curāśi », where it is original (= catur-aśiti). Bengali has this « -r- » form, তিৰাশী (by Vowel Harmony তিৰেশী, ‡ তিৰিশি) « tirāśi, tirēśi, ‡ tiriśi »; and the « -r- » has been further extended to বিৰাশী, বিৰেশী, ‡ বিৰিশি, « birāśi » > birēśi, ‡ biriśi ». Maithili also has « bērāśi » beside « bēśi ». The « -r- » forms for 82, 83 do not seem to be proper for Māgadhi, but rather due to Western influence: cf. Oriyā « bāyāśi, tēyāśi », but চূৰাশী « curāśi » 84 is quite proper (« cōrāśi < \*caür-āśi »). For 89, Bengali has a contracted উনাশী « unāśi » beside a fuller উনআশী « unāśi ».

530. *The Nineties.*

The word for *ninety* has two forms: নষ্ট « n̄ṣṭi », and নক্ষই, নক্ষই « nabbai, nabbui ». The former is the native Māgadhi form: OIA. « navati > \*navai > \*naai > \*nawai > n̄ai > n̄ai », Assamese « n̄ai ». The second one with geminated « -bb- » is not genuine Bengali: cf. Hindi « nawē, nawwē », Panjābī « nabbē, nawwē », Sindhī « navē <

\*navvai >, Marāṭhī « navvad » with MIA. <-d-> preserved (< \*navvaddi ?). Bihārī « nabbāi », Oriyā « nābē < \*nabbaī > are similar Western forms. In Pali, the form is « navuti »; and the Ardha-māgadhī « naūim » and Jaina Mahārāṣṭri « naūi » are based on an Early MIA. form with <-u-> like the Pali one. Gujarātī « nēvū » and Sinhalese « anū(va) » alone represent these attested MIA. forms in <-u->.

As in the case of the *Eighties*, we find the intrusive <-r-> in बिराम(ब्र)इ > bi-r-ā-nā(bbā)i > 92, तिराम(ब्र)इ < ti-r-ā-nā(bbā)ai > 93, निराम(ब्र)इ < ni-r-ā-nā(bbā)i > 99, on the model apparently of चुराम(ब्र)इ < curā-nā(bbā)i > 94 (caturnavati). On the analogy of the <-ā-> in the *Eighties* (ēkāśi < ēkāśiti, pācāśi < pañcāśiti, sātāśi < saptāśiti, ḫātāśi < aṣṭāśiti), the *Nineties* all over the NIA. area show an intrusive <-ā->: एकाम(ब्र)इ < ēk-ā-nā(bbā)i > Marāṭhī « ekyānnav » 91, Hindī « nawānawē » Gujarātī « nayānū » 99, etc.

531. *Hundred* is श' < śā, sō >, in combination generally pronounced < sō > (e.g., एकश [ækʃo], सওऽशो [ʃwoʃo] = 125, दुश्चि [duʃo], पाँचश [pɔʃʃo] etc.): a regular development out of OIA. « śata- » (śaa, O.B. \*śāwā, MB. \*śā). Oriyā is also < śā >, and Assamese [xɔ:]. The diphthongal forms < sai, sau > (< sayā, sawā) as in Bihārī, Hindī and Panjābī are now unknown to Bengali, as also the nasalised forms as in Marāṭhī (śē) and Gujarātī (sō), preserving the « anusvāra » of MIA. (pp. 358-359, *sup:a*). The form श्र < śāy় > = < sai > of Hindī etc., however, occurred in Early Bengali: thus in the proverbial lines—

নৱা গজা বিশে শ্য। তাৰ অদ্বৈক বাঁচে হয় ॥

বাইশ বল্লা, তেৱে ছাগলা। শুণে গেতে বৱা পাগলা ॥

« nārā gājā biśē śāy়, tārā ḫardhēkā bācē hāy়;

bāis়ā bālādā, tērā chāgālā : gunē gēchē Barā pāgālā »

*A man, and an elephant, hundred and twenty; half of that lives  
a horse;*

*An ox twenty-two, a goat thirteen: so has computed the mad-cap  
Barā (= Farāha-mihira),*

where बিশे श्र < biśē śāy় > = hundred with twenty (< biśē >=either < biś-ā > by Vowel-Harmony, or < biś-iyā >, adjective from < biśā > 20, with <-ā >

affix, p. 658 *supra*, or « -iyā » affix, p. 674), is an idiom corresponding to the Hindostāni « bisā sau » (J. T. Platts, 'Hindustani Grammar,' p. 53). The form « sau » also occurred in OB : cf. Mayang (of Manipur) « āk-hau-gō » *hundred*, where « hau » < « sau ».

**532.** The word for *thousand* is a Persian borrowing, হাজাৰ « hājār » (< hazār, Avestan hazaŋra), in Assamese « hēzār », which has superseded the native word (from OIA. « sabasra ») in all NIA. Was it because the native IA. word had fallen into disuse in the spoken forms of Late MIA. and Early NIA. when the Persian language came into India with the Turki and Tajik invaders? It is not unlikely that a composition like « daśa-śata » had restricted or made obsolete the single word « sahasra » sahassa, śahassā etc. in IA., making it possible for the Persian « hazār » to meet the want of a single term in the popular language. The Sinhalese « dahasa » 1,000, which seems to be better explained as a composition of « daśa + śata » rather than as a modification of « sahasra = sahasra » (Jules Bloch, 'Langue Marathe,' p. 222), and the use of « das sau » for 1,000, etc. in Hindostāni (cf. Platts, 'Hindustani Grammar,' p. 53) and in other NIA. would support this assumption. The native Indian (*tbh.*) word seems to be present in a few compounds, e.g., ଶାଶ୍ଵତ « śāśvata » a surname (= sahasra-malla ?), ଶାଶ୍ଵରାମ « sāśvatra-māra » a personal name (= « sahasra-rāma » ?: the *ts.* form is also found as a name).

**533.** For 100,000, ଲକ୍ଷ « lākh় » < « lakṣa » is native Indian. For 10,000,000 the word is କୋଟି, କୋଟି « kōṭī, kōti », of unknown origin, which occurs also in Sanskrit. The forms କୋଡ଼ି, କୋର « krōḍi, krōṛi » (= Anglo-Indian *crore*) are in common use in Bengali: the corresponding form in Hindi is « karōṛi »: « krōṛi », karōṛi = krōḍi seems to be a false Sanskritisation of a vernacular « \*kōḍa, kōdi » agreeing with the *ts.* « kōti »: cf. Caryā 2, « koḍi-mājhē ēku-biahī » among ten millions, in the heart of one only. In the feeling of Bengali speakers, « krōṛi » is the more learned form, a better Sanskrit word than « kōti »: we find it in compounds like କୋଡ଼ିପତି, କୋଡ଼େଖିର « krōḍi-pati, krōṛiśwār » etc., side by side with କୋଟିପତି, କୋଟିଖିର « kōṭi-pati, kōtiśwār ».

**534. The Fractional Numbers.**

The following are common to all NIA., and are easily explained. (Cf. S. K. Chatterji 'Prācīn Bāngalā "āhuṭha, āuṭa" Ō Sārddha-saṅkhyā-bācak Śabdābālī' in the VSPdP., 1330, pp. 113-117).

$\frac{1}{4}$ : পো, পোআ, পোয়া < pō, pōā > < MIA. < pāwa-, pāā- >, OIA. < pāda- >. The change of < -āwa- > to < -ō- > is against the general phonetic development of this group in Bengali: see *supra*, pp. 349-350: the form expected should have been < \*pā- >; cf. Oriyā < pā- > *quarter*, < pā- > *one quarter* (cf. also Bengali পাই < pāi- > *pie, pice*= < pādikā- >). This alteration certainly indicates extraneous influence (cf. Hindi < pāw- >; cf. also Bengali conjunction তো < tō- > = MIA. < tāva- >, OIA. < tāvat- > ).

$\frac{1}{2}$ : the common Bengali word is আধা < ādhā- > *half*, আধি < ādhā- > *half portion*, Oriyā < ādhā- > *half*, < ādhē- > *one-half*; OB. < adha=ādhā- >: < OIA. < ardh- >. The absence of cerebralisation (we would expect < -rdh- > to change to < -ddh- >) shows that it is a non-Māgadhi form. The native Māgadhi equivalent seems to occur as আড় < āṛḍ- > in a number of compounds, e.g., আড়-পাগল < āṛḍ-pāgla- > *half-mad*, আড়-বাকা < āṛḍ-bākā- > *half aslant*, আড়-মাদলা < āṛḍ-māḍalā- > *half-drum shaped, not fully oblong*, আড়ে গেলা < āṛē gēlā- > *swallow half chewed*; cf. besides দেড় < dēṛḍ- >  $1\frac{1}{2}$ , সাড়ে < sāṛē- > *plus half*, আড়াই < āṛāi- >  $2\frac{1}{2}$ . The Gujarātī < ardho- >  $\frac{1}{2}$  is peculiar, and may be a blend of < addha- > and < addba- >.

$\frac{1}{3}$ : তেহাই < tēhāi- > (*tri-bhāgika*): rather archaic.

$1\frac{1}{2}$ : দেড় < dēṛḍ- >, earlier < dēṛhā- > as in Oriyā, = MIA. (Māgadhi) < diaḍḍha- >, OIA. < dvayardha- >. Colloquially, we find occasionally ডেড় < dēṛḍ- > in Bengali, and there are forms in other NIA. also which show cerebralisation of the initial dental: e.g., Hindi < dēṛ(h)- > beside dāṛhā, dōṛhā, Panjābī < dēṛh, dēōṛhā, dūṛhā, dūṛh- > beside < dōṛhā- >.

$2\frac{1}{2}$ : আড়াই < āṛāi- >, Oriyā < āṛhāi- > (with earlier < -ṛh- >), = MIA. < ad̥hatiya- > (cf. Aśokan < ad̥hatiya- >: Sahasram), a true Māgadhi form showing also haplogy of < -t- > < OIA < ardha-tṛtiya- >. A MIA. form < \*addha-titiya- > gave Gujarātī < aṛi, haṛi- >; and the Marāthī < ad̥ic- > represents another (Early) MIA. form like < \*ad̥dha-titiyya- > (=Second MIA, < \*ad̥dha-iijja- >, whence < \*ad̥dhiija > \*ad̥hija > ad̥ic- >).

3½ : Early MB. ଆହୁତ୍ତା  $\sim$  āhuṭha (as in the ŠKK., pp. 55, 153), Late MB. ଆର୍ଦ୍ଧା  $\sim$  ār̥d̥ha, ār̥t̥ha : from OIA.  $\sim$  ardba-caturtha, through MIA.  $\sim$  \*ad̥dha-catut̥tha > \*ad̥lha-yadut̥tha > \*ad̥lha-aūt̥tha > ad̥dhuṭ̥tha ; then by dissimilation of one the cerebral groups,  $\sim$  \*āhuṭ̥tha, and finally  $\sim$  āhuṭha in OB. (The form  $\sim$  ad̥dhuṭ̥tha occurs in Jaina Ardha-Māgadhi, and it has been falsely Sanskritised into  $\sim$  adhyuṣṭa). This word has now become obsolete in Bengali, but its cognate forms are found in the Bihāri dialects, in Hindi, and in other NIA. (Cf. Hoernle, Gauḍian Grammar, §§ 413-416; Kellogg, Hindi Grammar<sup>2</sup>, pp. 159, 161).

*Plus ¼* : ମେଳେ  $\sim$  sāḍā, sāwā, Oriyā  $\sim$  sāuyā=sāuā : < MIA.  $\sim$  savāa- = OIA.  $\sim$  sapāda-. It is an adjective, found in all other NIA. (Hindi adjective  $\sim$  sawā =  $\sim$  sapāda, noun  $\sim$  sawāl =  $\sim$  sapādikā).

*Plus ½* : ମାତ୍ରେ  $\sim$  sārē, also in Oriyā ; = Hindi  $\sim$  sārhē. From OIA.  $\sim$  sār̥dha- > MIA. (Māgadhi)  $\sim$  \*sāḍ̥dha-, NIA.  $\sim$  sāḍ̥ha-. The absence of the  $\sim$  -ṛh- in Oriyā shows that it is not a native form of it.  $\sim$  sārhē is an oblique or plural form, < $\sim$  \*sāḍ̥dahi> : cf. also Gujarāti  $\sim$  sārā, the expected singular nominative form of which would have been  $\sim$  \*sārō.

*A quarter less* : ପୌନେ  $\sim$  pāunē ; also  $\sim$  pāunē in Oriyā. The source is OIA.  $\sim$  pādōna- a quarter less. The alteration of  $\sim$  -ādō- > MIA. > -āō- > to  $\sim$  -āu- (cf. p. 351 *supra*), and the presence in the Oriyā form of the dental  $\sim$  -n- instead of the expected cerebral  $\sim$  -ṇ- , indicate that the word is not proper Bengali and Oriyā, or Eastern Magadhan.  $\sim$  pāunē is an adjective, qualifying the number following it, which is reduced by a quarter: ପୌନେ ହିଁ  $\sim$  pāunē dui = 2 minus  $\frac{1}{4}$  =  $1\frac{3}{4}$ ; ପୌନେ ଆଟ  $\sim$  pāunē āt̥t̥  $\sim$  =  $7\frac{3}{4}$  ; etc. Its use with ଏକ  $\sim$  ēk̥t̥ is recent, and is found to denote only the hour, e.g., ପୌନେ ଏକଟା  $\sim$  pāunē ēk̥t̥ା quarter to one. The  $\sim$  -e- in  $\sim$  pāunē seems to be the plural  $\sim$  -ahi- (*supra*, p. 724) : cf. also Gujarāti  $\sim$  pōnō  $\sim$   $\frac{3}{4}$ , but  $\sim$  pōnā bē  $\sim$   $1\frac{3}{4}$ , with  $\sim$  -ā- indicating plural. For  $\frac{1}{4}$ , the native Bengali is ତିନି ପୋ(ଆ)  $\sim$  tin-pō(ā) = Oriyā  $\sim$  tini pā.

**535.** Adjectives are not declined in Bengali, although in the oldest period we find concord between a subject and its predicate (adjective or verb) in so far as the latter takes up the feminine affix if the former is feminine (see *supra*, p. 721). In the Caryās, however, we find that the numerals

sometimes take case-affixes corresponding to the nouns they qualify: e.g., « tiniē pāṭē » (see *supra*, p. 743); « ēkē sara-sandhānē » *with one aiming of the arrow* (*Caryā* 28); « daśam-i duāra-ta » *in the tenth door* (*Caryā* 2).

### 536. *The Ordinals.*

The use of the *tbh.* ordinal forms has been greatly curtailed in Bengali. They are now restricted, to indicate the days of the months, and besides occur in one or two stereotyped expressions. The *ts.* ordinals have entirely replaced them in the « sādhu-bhāṣā », and these have found a permanent place in the Colloquial also. As there is no native affix in living use to form ordinals, and as *tbh.* ordinals beyond 32 (the largest number of days for a month) are not much used, the language is helpless in expressing ideas like 84<sup>th</sup> or 105<sup>th</sup>, and must borrow Skt. words—unfamiliar-looking enough for Bengali—like « caturaśiti-tama » and « pañca-viṁśatī-adhika-śata-tama ». It has been sought to naturalise the Skt. affix « -tama » in Bengali, by using it with *tbh.* numerals (e.g., চুরাশি-তম « curāśi-tāma » 84<sup>th</sup>, এক-শ-পঁচিশ-তম « ēk-ś-pāciś-tāma » 105<sup>th</sup>), but such hybrids are extremely artificial, and have not succeeded.

In the Colloquial, however, the *genitive of the cardinal* numeral expresses its ordinal: e.g., দশের পাতা « dāśera pāṭā » *the tenth page*. Also the word qualified by the cardinal is put in the genitive in a cumbrous construction in some cases, as follows: the cardinal numeral + the word in the genitive + the word itself: e.g., ষাট দিনের দিন « sāṭa dinēra ding » *the sixtieth day*, তিন-শ বারের বার « tin-sābārēra bāra » *the 300th occasion*; etc.

The Forms for the Ordinals occurring in Bengali are:

*First* = NB. পঁয়লা < পহেলা « pāy়lā < pāhēlā », MB. OB. « pahila » (cf. *Caryā*s 12, 20). The source of this form, which occurs in all NIA., is an OIA. « pra-tha+ila », becoming in MIA. « \*pathilla, \*pathilla > \*padhilla, \*pahilla ». The Skt. « prathama » is a blend of « pra-tama » (cf. Avestan *fratəma*) and « pra-tha » (with ordinal « -tha », as in « catur-tha, sas-tha, sapta-tha »). Equivalents of « prathama », as well as of an elaborate « prathama+ila » occur in the Prakrits. The Bengali form « pahila » is non-Māgadhi in origin, as shown by the absence of cerebralisation.

*Second, Third.* The Bengali words in use are দোষ্ঠা and তৃষ্ঠা « dōṣṭhā, tṛṣṭhā », which are probably new Magadhan formations with the cardinal bases *plus* an affix « sarā » (No. 57, p. 700). The OIA. forms were « dvitiya (dvitya) » and « tṛtiya ». The former apparently gave (i) a MIA. « \*dutiyya, \*duijja, \*du(y)ajja », whence we have the Early Bengali দুজ (SKK.) > দোজ < dujā > dōyajd > dōj > and Hindī « dūj »; and (ii) a MIA. « biyya, bijja », whence Marāthī and Gujarātī « bij »; besides (iii) the form « docca, duecca » (< dvitya), which is not represented in NIA. The latter (i.e. the OIA. « tṛtiya ») through MIA. « \*titiyya, tiijja, \*ti(y)ajja » gave Bengali তিঅজ (SKK.) > তেজ « tiājā, tej >, besides Hindī, Marāthī and Gujarātī « tij ». The change of « -iya » to « ijja, -yajja, -aja » (through a doubling of « -y- », which first took place in Early MIA.), is not Prācya, or Saurasēnī: at least it is certainly non-Magadhan (see *supra*, p. 476). In Bengali দুজ, তিঅজ occur in the SKK., but they were replaced by *tss.* « dvitiya, tṛtiya », except in the expressions দোজ-ব'রে, < তেজ-ব'রে « dōj-bārē, tej-bārē < bār-iyā » = *a bride-groom for the second and third time*.

*Fourth:* চোঁচি « cauṭhā » (by Vowel Harmony চোঁচি « cauṭhō »), MB. (SKK.) চোঁচ « cauṭhā- »; in (Saurasēnī) Apabhraṇa as written in Bengal, it occurs as « cauṭhṭha = cauṭṭha » (cf. ‘Dōhā-kōsa’ of Saraha, p. 117 of ‘Buddha Gān Ō Dōhā’). In Maithili also we have « cauṭh », The cerebral « -ṭh- » indicates that it is derived from a Māgadhi « \*cauṭṭha, cauṭṭha- » < « catuṭṭha < caturtha ». Other NIA. speeches show the un-cerebralised « cauth », and Bengali has borrowed this form (চোঁচ « cauṭh ») from Hindostāni and Marāthī, meaning the *fourth part of a sum of money in a transaction, and a fourth of the revenue*.

Upto the ordinal for 4, NB. shows diverse ordinal affixes, « -tha+ila ; -sara ; -tha »; *plus* the definitive or adjectival « -ā » affix (No. 6, p. 658). For the ordinals for 5 to 18, we have a generalised OIA. ordinal affix « -ma » + NIA. « -i » > -i > -ikā, -ika ». Thus *fifth* is পাঁচই < \*pāñcāi < \*pācui < \*pācāi > < « \*pañcamikā, -ikā » for OIA. « pañca-ma »; *sixth* = ছাঁটই < \*ছাঁটে, \*ছৰেটে « chāñṭei < \*chāñṭai, \*chāñṭai » < MIA. « \*chaamia < chaamikā » ( « chā+ma » for « sas-tha » of Skt.); *seventh* = সাতুই < \*sātuei

« sātui < \*sātāi > < MIA. « sattamika », for Skt. « sapta-ma »; so to অষ্টাকই < \*অঠারসমি > « āṭhārui < \*āṭhārāi > eighteenth, representing a MIA. « \*āṭhārasamika » (cf. Pali « atṭhārasama » = Skt. « aṣṭādaśā »: the Skt. in the ordinals from 11th to 19th simply shifts the accent to the last syllable, « -daśā », which takes the masculine, feminine and neuter affixes as an adjective). The ordinal « -ma » (> Late MIA « -wā ») has lost its nasalisation in Standard Bengali, except in ষাঁওই « chāui » sixth: in Hindostānī the nasal is retained as « -wā » (= wā) ; and the nasal also is found in other NIA., either as « -m- » or as a mere nasalisation of the vowel.

From 19 onwards, the affix is ঈাৰ « -iyā », contracted to এ « -ē », an adjectival form (= No. 26, p. 674): thus \* উনিশিযা, উনিশে « \*unisiyā > unisē », dialectal উনইশা « unāsiyā » 19th; so পঁচিশে « pāciśe » 25th, চলিশে « callisē » 40th. Indication of the ordinals by a definite affix is exceedingly rare beyond the fourth decade.

---

## CHAPTER IV

### THE PRONOUN

537. The Pronoun in Bengali takes the same case affixes and post-positions as the Noun, but it has, unlike the Noun, a definite oblique form to which the affixes and post-positions are added. This oblique form is generally the old genitive, as in Late MIA. There has also been an extension of the new genitive in « -ra » to form a new oblique or plural in MB. and NB.

#### [A] THE PRONOUN FOR THE FIRST PERSON.

538. OIA. « aham » *I* was extended to « \*aha-ka-m » with the pleonastic « -ka- », and in ‘Old Māgadhi’ « ahakam » was the word for *I*. Aśvaghōṣa employs it in the ‘Old Māgadhi’ of his dramas (H. Lüders, ‘Bruchstücke,’ p. 36). In the Prakrit (Māgadhi) of ‘Bhāṣa,’ the form is « ahakē », with the characteristic Māgadhi affix « -ē » (Sukthankar, ‘Studies in Bhāṣa,’ JAOS., Vol. 40, pp. 248-259); and « ahakē » occurs in the Māgadhi of the Second MIA. period, as in other Skt. dramas, as « hakē, hagē » and « haggē », the last being certainly an emphatic form. The loss of the initial syllable is at least as old as the 3rd century B.C., long before the time of Aśvaghōṣa and Bhāṣa. In the eastern inscriptions of Aśoka, we have « hakam »: so that « ahakam, ahakē » in the former writers, and « ahaẏam < ahakam » in Jaina Ardhmāgadhi would appear to be literary and archaic forms. By 300 A.D., it would appear that two forms were to be found in Māgadhi, « hakam (\*hagam), hakē (hagē) » for the OIA. « aham ». Against these, New Bengali shows nothing. But in the Old Bengali of the Caryās, there is the form « hāu » = *I*, apparently for « \*hāu, \*haū », which occurs four times: « tu lō dōmbī, hāu kapālī » *thou, oh, (art) a Dōm woman, (while)* *I (am) a Kāpālika* (Caryā 10); « hāu sutēli » *I slept* (18); « hāu nirāsi » *I am ‘Sans-Esperance’* (20); and « hāu acchilē (= \*āchilō? \*āchila?) »

*I was* (35). OB. « hāu » can be compared with Gujarātī « hū » and Brajbhākhā « hāu ». Of the two Māgadhi forms « hakam, hakē », the former can only give OB. « hāu » (see *supra*, p. 359); while the latter could be represented in OB. only by a form « \*hai, \*hai » (< \*haē < hagē). It is just possible that in Māgadhi Apabhrānsa, « \*hai » was current, side by side with « \*hāu ». The nasalised form, however, ousted the other one, and in the struggle the former was in all likelihood strengthened by Western Apabhrānsa which also had « hāu ». At the same time « \*hai » itself may have influenced the formation of the verb substantive first person — « asmi, \*asāmi > \*asami > \*ahimi > \*ahiwi > \*haiwi > \*hai > hai », and of the affix « -i » for the first person present of the verb. By initial stress, however, Māg. Ap. « \*hāu » could become « hāu » in OB.

In MB., « hāu » as the old nominative fell out of use, and the old instrumental took its place: but « hāu » seems to have (given or at least influenced) the affix for the first person to the bases for the past and future tenses of the verb in Bengali and Assamese (see *infra*, under Verb: 'Personal Affixes').

539. The OIA. instrumental « mayā » occurs in Second MIA. as « maē, maī », in (Western) Apabhrānsa as « maī ». The nasalisation in Apabhrānsa (also preserved in NIA., e.g., Hindi and Panjabī « maī », Gujarātī « mē », Sindhi « mū ») would indicate an influence from the instrumental affix for the noun (-ēna > -ē: maī < \*may'ēna = mayā). The OB. equivalent is « maī » (= ? « mai »: the nasalisation can well be omitted in Bengali writing, see *supra* p. 362), which is found in Caryās 16, 18, 27, 29, 30, 35 (thrice), 36, 39; and a contracted form « ma » also occurs (Caryās 10, 13). This is as yet instrumental in OB., being used in the passive construction with the past or future (in « -il-, -ib- ») of a transitive verb: e.g., Caryā 35—

• ēta-kāla hāu acchilē (= āchilō? āchila?) sva-mōhē:  
ēbō maī bujhila sadguru-bōhē •

*For such a long time I was in my own ignorance :*

*Now by me it has been understood through the good master's instruction.*

The nominative « hāu », however, became obsolete, and the instrumental « mai (maī) » assumed its function. The confusion between the active and passive constructions, with gradual disuse of the latter, was both a cause and an effect of the interchange of the instrumental and the nominative, or of the use of the former for the latter (see also pp. 166, 742).

The oblique base « mō » (see below, § 541), with the instrumental « -ē » from the noun gave a new instrumental « mōē, mōē », which is found as early as O.B.: cf. Caryā 10, « tōhōra antare mōē ghalili hādēri māli » *for thy sake the chaplet of bones has been cast off by me.* This quite early became confused with « mai (maī) »; and « mōē, mai » in MB. occur in a bewildering variety of spellings (see § p. 811) as forms of practically one word.

In NB., this instrumental-nominative is found as মুই « mui » (= Assamese « māī », Oriyā « mū »; it occurred in Bihārī as « mē », but there it is now obsolete). The Bengali মুই « mui » is almost archaic, and then it is found only among certain lower classes in different parts of Bengal: consequently it is considered as a vulgar form now (cf. the phrase তুই-মুই করা « tui-mui kārā » = *use insulting or inferior language*, which does not have the sense of affectionate intimacy indicated by the French « *tutoyer* »).

**540.** The ordinary form for *I* is আমি « āmi » which was originally the plural of « haū, maī ». It comes from a common MIA. « amhē » = OIA. (Vedic) « asmē » for « vayam »: « asmē » > \*āmhē > \*āmhi, \*āmbhi > \*āmhi, \*āmbhi »: the NB. equivalent of which ought to be \*আমি « ām » , with loss of final « -i » (see *supra*, § 151: we have « -ām » no doubt as an affix for the verb, where, however, there was influence of other forms: see *infra*, under Verb: 'Personal Affixes'). In the Caryās, we find « āmhē, āhmē, āhmē (= āmhē), āmbhē »: thus, Caryā 4 « ahmē bīrā » = Skt. comm. « vīrō' ham » (properly = « vīrāḥ vayam »); « āmhē sāṇē dīthā » = « asmābhīḥ saṁjñāyā dṛṣṭam » (Caryā 1); « āhmē dēhū » = *I give*, lit. *we give* (Caryā 19): « ambhē na jāñāhū » *we know not* (Caryā 22). The form in « -i » is not found in the Caryās, although the MIA. « amhē » is expected

to give « \*āmhi » in OB.: and it is seen, the form in « -ē » is used both for the nominative and the instrumental. In the ŠKK., we have both आङ्मी, आङ्मि « āmī, -i=āmhi » (only 6 times) and आङ्मे, आङ्मे « āmē, -ē=āmbē » (some 30 times): and there is not the least distinction between the two forms. The group « -hm-=mh » represents an aspirated « -m- », an inheritance from MIA. which continued down to Early MB. times, to lose its aspiration by the 16th century. Oriyā has only the « -ē » form, « āmbhē ». The « -ē » form would seem to represent the Late MIA. instrumental : « asmābbih > \*amhahī > āmhbē, āmbhbē »; and the « -i » form, the original nominative (see *supra*, p. 309). But already from before OB. times, there was a confusion between them, with the result that « -ē » practically ousted the « -i » in OB. and MB., (as we can see from OB., and from the preponderance of « -ē » forms in the ŠKK., as well as from Oriyā), but later this « -ē » itself seems to have become « -i » or to give place to the latter.

The transference of « āmhi, āmbē » from plural to singular took place in OB., as we can see from the Caryās. It became identical with « māi, mui, mōē » etc. in Early MB. Doubtless, the plural when first used for the singular was characteristic of polite or formal speech : cf. Oriyā « mū » inferior, and « āmbhbē » polite, formal, and respectful. The old plural sense of « āmi » is still preserved in Assamese, where « āmi » always = *we*, never = *I*. Cf. also Western Hindi « haū » (Brajbhākhā), « maī » (Hindostānī and Brajbhākhā), plural « ham »; Gujarātī « hū », plural « amē »; Panjābī « māī », plural « as(s)i »; Marāṭhī « mī », plural « āmī »: which still continue faithful to the OIA. in point of number. The Bihārī dialects have now made the original singular obsolete, the plural « ham » being the one used for *I*. The proper plural use of « āmi » however is occasionally found in MB., as late as the 16th century : e.g., in the ‘Caitanya-Bhāgavata’ of Vṛndāvana-dāsa, we find forms like आमि द्वाइ पातकीरुं « āmi dui pātakirū » of us two sinners, आमार उद्धारे « āmār uddhārē » through our salvation, आमि द्रोह कैलुं « āmi drōha kāilū » we did offence (p. 258, ed. Atul Kṛṣṇa Gōswāmī).

**541.** यूटि, आमि « mui, āmi » are the nominative forms of Bengali, and their history is given above. There are the oblique forms मौ « mō »

and আমা « āmā », to which the inflections and post-positions (accusative-dative « -ē », « -rē », « -kē », genitive « -ṛ̥ », locative « -tē », instrumental « dwārā, diyā » etc.) are added to form the various cases. « mō- » is the OIA. genitive « mama », which (through Māgadhi Apabhrañśa and OB. « \*maῶa ») occurs already in OB. Another form is « ma- », found in OB. side by side with « mō ». Following the oblique forms of the other pronouns (see *infra*) and the old genitive of the nouns, which optionally preserve the « -ha » (see *supra*, p. 752), « mō- » took up the « -ha » from OB. times, and was thus extended to « mō-ha- ». Inflected forms on the basis of this « mō- (ma-), mō-ha » oblique in the Caryās are : « mō-ē » instrumental (Caryā 10); « mō-ra » (Caryā 20, 33, 49), « mōhō-ra » (Caryā 20)=genitive forms qualifying masculine or neuter, and « mō-ri »=genitive qualifying feminine noun (Caryā 36); and « mō-ha-kakhu, ma-kū = mō-kū » dative (Caryā 35). In MB., beside মো « mō- », the extended forms of this oblique base are মোহ, মোহে, মহ, মচে « mōhā-, mōhō-, māhā-, māhō- ». The instrumental form « mō-ē » occurs in the spellings মোএ, মো়ে, মোঞ্চ, মোঞে, মোঞ, মোঞিঃ, মুঞ্চ, মুঞে, মুঞি, মোট « mōē, mōē, mōnā, mōnē, mōnā, mōnī, muṇī, mūhi, tuyī, mōi » etc., which are all used for the instrumental-nominative = মুই, মই « mui, māi » (see *supra*, p. 809). The inflected forms as usual are মোব (মোহর), মোকে, মোতে « mō-rā (mōhā-rā), mō-kē, mō-tē » etc. Besides there is the locative oblique in « -ē < -hi » ( মোহি, মো়ে mōhi, mōē > মোৱ mōyā, মোঞ্চ mōnā etc.), which is used in MB. for the dative-accusative. The original genitive use of « mō » seems to have existed in OB. (cf. « tō < tava » below). In eMB., « mō », although the oblique base, itself came to be used for the nominative, through confusion with « mōē » and « mā, mu < māi, mui ».

The form আক্ষ, আমা « āhmā- = āmhā- (as in the ŠKK.), āmā » represents the OIA. base « asma- », in MIA. « amha- ». It was strengthened by an « -ā », apparently through the influence of the « -ā, -āha » of the noun. In Oriyā, it occurs as « āmbhā- », as in « āmbhā-rā, āmbhā-ku » etc. That the extension of « āsmā- > āmhā- > \*āmhā, \*āmā- » to « āmhā-, āmā- » is due to a genitive « -ā » is seen from the

frequent use of the base « āmhā- », without the genitival « -rā », for the genitive in the ŠKK. and other MB. works ; and the fact that post-positions are added direct to the « āmhā- » base, as if to the genitive, is to be noted.

**542.** With the old plural « āmhē, āmhi > āmi » becoming first honorific and then ordinary singular (the honorific singular sense still obtains in Oriyā at the present day), new plurals were formed, as in the case of the noun, from the Early MB. period, either by adding nouns of multitude like « sāmbā (sābā), sākālā », or by extending the strong form of the genitive in « -rā » : thus, in the ŠKK., we have আঙ্কে সংকে « āmhē sāmhē », beside আঙ্কাৰা « āmhārā » (see *supra*, p. 735) ; in the ‘Caitanya Bhāgavata,’ 16th century, nominative মুই-সকল « mui-sākāl », আমি-সব « āmi-sāb », oblique, আমা-সব « āmā-sāb » ; beside মোৰা, আমৰা « mōrā, āmārā ». For the genitive, the use of « -dérə » seems to have been established by the end of the 15th century (*vide supra*, p. 731). The « -rā » and « -digā, -dérə » affixes are in common use in NB. at present, but « -sākāl, -sāb » are also occasionally found in NB. But « -gānā, -gulā, sāmūhā » and the rest do not occur. The position for Bengali is thus the following :

		Singular Forms.		Plural Forms.	
Old Singular = vulgar, archaic, dialectal.		Old Plural > Honorable Singular > from Old Singular Ordinary Singular.		Regular Plural = poetic, dialectal.	New Double Plural.
Nominative	মুই mui	আমি āmī	মোৰা mō-rā	আমৰা āmā-rā (+ সব sāb etc.)	
Oblique	মো mō-	আমা āmā-	মোদিগ mō-digā- মোদেৱ mō-dérə-	আমাদিগ āmā-digā- আমাদেৱ āmā-dérə-	

Double plural forms are found elsewhere in NIA., retaining the

honorific sense where the original singular is preserved and the original plural continues to be used as a plural: thus—

Old Singular.	Old Plural	Double Plural (Honorific).
Bengali মুই mui (vulgar)	আমি āmi (sg.)	মোৰা, আমৰা mōrā, āmṛā
Assamese māi (sg.)	āmi (pl.)	āmā-lōkṣ
Oriyā mu, mū (vulgar)	āmbhē (sg.)	āmbhē-mānē
Magahi [lost]	ham (sg.)	ham-anī, ham-ar-nī
Maithili mē (obsolete)	ham (sg.)	ham-sabb, hamrā-sabb
Bhōjpuriyā mē (obsolete)	ham (sg.)	hamanī-kā, ham-ar-an
[Khaskurā ma (sg.)	hāmi (pl.)	hāmi-haru]

In Western Hindi, Panjabī, Sindhī, and Marāthī, as well as Sinhalese, where the old singular and plural forms are preserved intact, there is no room for the double plural: the Hindostānī « ham-lōg » *we*, with a frequent enough use of « ham » = Bengali « āmi » for the singular, is due unquestionably to Eastern influence.

543. An oblique form like « majh-, mujh- » (as in Marāthī, Rājasthānī-Gujarātī and W. Hindi) is not found in Bengali and in other Magadhan speeches: Māgadhī Apabhrañśa apparently did not possess a form like « majjhāṁ, majjhū » (as in Prakrit and W. Apabhrañśa), which is found in the ablative as well as in the genitive, but which originated from the OIA. locative « mahyam ». But in the Brajabuli dialect (s. *supra*, pp. 103-104) we commonly find a genitive form মঝু « mājhū » (occasionally also oblique), which is a Western Apabhrañśa imposition on Bengali, doubtless in the formative period of the language (cf. *supra*, pp. 113-116), at a time when « majh- < majjhū, majjhāṁ » had not altered its vowel to « -u- », as in « mujh » in W. Hindi (on the analogy of « tubhyam > \*tuhyam > tujjhāṁ, tujjhū > tujh »). The form মঝু « mājhū » now and then appears in Vaiśṇava poetry written in pure Bengali, and that is due to imitation of the Brajabuli style. The MIA. genitive force of « majjhāṁ » is still retained in the Marāthī « mājhā, mājhē ».

It is a remarkable fact that the genitive of the personal pronoun throughout a great part of the NIA. area should show the adjectival

form with the « -ra (< kēra, kara, kāra) » affix, both in the first and second persons : e.g., in addition to the Magadhan speeches, we have E. Hindi « mōr, hamār (tōr, tohār) », W. Hindi « mērā, mērau, mērī ; hamārā, hamārau, hamārī », Panjābi « mērā, mērī » Gujarati « mārō, mārī, mārū ; amārō, amārī, amārū », Rājasthānī « mhārō, amhārō » etc.; also in the Pahārī languages ; and in the Gipsy dialects outside India. These are based on Western Apabhrānsa forms like « mahāra, amhāra » (cf. Pischel. ‘Gramm. der Pkt.-Sprachen’ § 434; Jules Bloch, ‘Langue Marathe’ § 210; Beames, Comp. Gramm., II, p. 312).

In the Bengali poetic diction, the form 布 **মামা** « māmā » for the genitive is quite common. This certainly is to be regarded as a MIA. form preserved by literary tradition and strengthened by the Skt. « mama ».

**544.** The rage for Sankritising Bengali which was in vogue late in the 18th and early in the 19th centuries when the speech was under the guardianship of the *pandits*, finds its expression in the curious form আমাদানি « āsmādādi » *we*, occurring commonly in the genitive আমাদানির « āsmādādir » *our*, pronounced [əʃʃɔdadir], in which the Skt. base is made to oust the *tbh.* one. In this artificial ‘restoration’ of the genuine Bengali আমাদের « āmādēr » , the source of « -dēr » as « -ādi » has instinctively been hit upon.

**545.** Typical Dialectal Forms for the First Personal Pronoun in New Bengali (*all* forms cannot be given : only some characteristic ones have been introduced) :

S.W. Bengali.

West Rādhā.

Nom. মুই mui—শোরমেনে mōr- <i>mēnē</i> ,	
শোরে mōnnē, আমান্নে āmānnē	
Gen. শোর mō- <i>r̥</i> —শোরমকার mōr̥-	
mān̥-kār̥, শোরমেনকার mōr̥-mēn̥-	
কার̥, শোরেকার mōnnē-kār̥	
Dat. শোকে mō- <i>kē</i> —আমান্নেকে āmānnē- <i>kē</i>	
Other Cases—শোরিয়া mō- <i>diyā</i> , শোরিয়ু	
mō- <i>hōtē</i> , শোতে mō- <i>tē</i> , শোদেরয়ে	
mō-dēr̥- <i>tē</i> , etc.	

Nom. মুই mui—মুইরা « mui-rā »	
Gen. শোচৰ, মহৰ mōhā- <i>r̥</i> , māhā- <i>r̥</i> —	
শোচের mō- <i>dēr̥</i>	
Dat. শোকে mō- <i>kē</i> —শোদের mō- <i>dēr̥</i>	
Other Cases—শোদিয়া mō- <i>diyā</i> , শোহ'তে	
mō- <i>hōtē</i> , শোতে mō- <i>tē</i> , শোদেরয়ে	
mō-dēr̥- <i>tē</i> , etc.	

East Rāgha (Standard Colloquial),  
also Varēndra (North Central).

East North Bengali  
(Dinajpur).

Nom. আমি āmi—আমৰা āmṛ̥-rā
Gen. আমাৰ āmā-r̥—আমাদেৱ āmā-dēr̥
Dat. আমাকে āmā-k̥e, আমাৰ āmā-y < āmā-ē—আমাদেৱ āmā-dēr̥, আমাদিকে āmā-di-k̥e
Loc. আমাৰ āmā-y, আমাতে āmā-tē, —আমাদিগতে āmā-digē-tē, আমা- দেৱতে, āmā-dēr̥-tē, etc., etc.

No. হামি hāmi—হামৰা hāmṛ̥-rā
Gen. হামাৰ hāmā-r̥—হামাদেৱ hāmā-dēr̥
Dat. হামাক, হামাকে hāmā-k̥, hāmā- k̥e—(plural, same as genitive).

### North Bengali.

Nom. মই mui, মই m̥i, মেঁ m̥i, হামি hāmi	হামা hāmā, হামৰা hāmṛ̥-rā, হামাগুলা hāmā-gulā
Gen. মোৰ mō-r̥, হামাৰ hāmā-r̥	হামাগুলাৰ hāmā-gulā-r̥
Dat. মোক mō-k̥, হামাক hāmā-k̥	হামাক hāmā-k̥
Other Oblique: মো mō-, মোৰ mō-r̥-, হামা hāmā—হামাগুলা hāmā-gulā- (Loc. মেঁ-ই m̥-t̥, হামা-ই hāmā-t̥)	

### West and South-West Vajga.

### South-East Vajga (Chittagong).

Nom. মই, আমি āmi, āmā—মোৰা mō-rā, আমৰা āmṛ̥-rā	Nom. অঁই āi—অঁওৰা āō-r̥, অঁমৰা āy-r̥, অঁৱা ā- r̥
Gen. মোৰ mō-r̥, মুৰ m̥-r̥, আমাৰ āmā-r̥—আমৰাৰ amṛ̥-r̥, মোৱগে mōr̥-gō, আমাগে āmā-gō	Gen. অঁওৰা āyā-r̥, অঁৱাৰ ā- r̥— āmā-r̥, আমৰাৰ āmṛ̥-r̥, অঁমৰাৰ āy-r̥-r̥
Dat. আমাৰে āmā-r̥-e—আমৰাৰে āmṛ̥-r̥-e	Dat. অঁয়ে āy-r̥-e, অঁৱে ā- r̥-e— অঁমৰাৰে āmṛ̥-r̥-e, অঁমৰাৰে āy-r̥-r̥-e

The origin of the above dialectal forms is plain in every case. The S. W. Bengali মোঁজে • mōnn̥e • is contracted from \*mō-mān̥e •, and \*āmā-

mānē-kār̤ » gives আমান্নেকাৰি « āmānnēkār̤ ». Contiguity with Maithili is seen plainly in the forms with initial « h- » in North Bengali ( « asma- > amha- > \*hamma- > hām, ham- »), as opposed to the normal development in Bengali « amba- > āmh- > ām- »). The « -m- » has been reduced to a simple nasalisation in Chittagong, through an intermediate « -ñ- » which is also heard as « -ō-, -o- ».

[B] THE PRONOUN FOR THE SECOND PERSON.

**546.** The Forms for the Second Person (in the Standard Speech) are—

Old Singular (= New Singular, contemptuous or affectionate, for juniors and familiars).		Old Plural (> New Singular, inferior and familiar).	New Plurals.	
Nominative	তুই tui	তুমি tumi	Inferior and contemptuous.	Ordinary and familiar.
		তোৱা tō-rā	তোমৰা tōmā-rā (+ সব, সকল sab, sakal etc.)	
Oblique	তোঁ tō-	তোমা tōmā-	তোদিগ tō-digā. তোদেৱ tō-dēra	তোমাদিগ tōmā-digā, তোমাদেৱ tōmā-dēra

The above forms present an exact parallel with those for the first person: only the old singular (with its new plural in « -rā ») is used freely, in all its forms, to express familiarity or contempt, by all classes in society: unlike « mui, mō- », it has not become archaic, or confined to the lower classes only.

**547.** OIA. « tvam » *thou* gave the MIA. « tuṁ », in addition to other forms. This « tuṁ » seems to be the source of the OB. « tu », which occurs also (through contamination with the oblique) as « tō ». Oriyā has preserved this as « tu »: Early Maithili and Eastern and Western Hindi as « tū ». It is quite possible, however, that the OIA. original of the (Magadhan and Śaurasēni) NIA. « tu, tū », without nasalisation (as opposed to the nasalised forms like the Marāṭhi « tū », Gujarāti « tū », Rājasthāni « tū », Panjābī and Sindhī « tū ») was a form like « \*tū »,

as in Avestan (beside « tvəm »), instead of the Vedic and Sanskrit « tvam » (=tū + am).

In OB., « tu, tō » are the nominative forms, and they are found in the Caryās either independently (as e.g., Caryā 18, « Kānhē gāi, tu Kāma-caṇḍalī » *Kṛṣṇa sings, thou art a 'Karma-caṇḍālikā'*; Caryā 6, « sunā hari[n]ā tō » *hear thou, O Deer*; Caryā 41, « jaï tō mūḍhā acchasi, puecha-tu sadguru pāwa » *if thou art ignorant, ask thou at the feet of the good master*), or loosely agglutinated with the verb in the imperative (e.g., « puecha-tu » *ask thou*, in Caryās 5, 41; « bāha-tu » *row thou*, Caryā 8; « bujha-tu » *comprehend thou*, Caryā 32).

**548.** This OB. nominative form « tu » has become obsolete in MB. and NB. The form तूरि « tui », from the old instrumental, corresponding to « mui » of the first person, has taken its place. The typical representative of OIA. « tvayā » in MIA. is « taē »; in the Apabhrāṇa the word shows nasalisation, which is due to the influence of the noun (taī < \*tvayēna = tvayā). In the Caryās, we find « tāī = taī », which still retains its old case-value: e.g., « tāī binu » (=tvayā vinā: Caryā 4): « tāī bitāliu » (=tvayā vitālitam: Caryā 13). There is also in OB. a new instrumental formation on the basis of the oblique « tō » (tō-ē = tō-ñ), which become confused with the original « taī, tui » in Early MB. The OB. « tāī » occurs in Assamese as « tāī »: in the change of the vowel to « u » in Bengali « tui », there was in all likelihood the influence of the oblique « tō- ».

**549.** The oblique तो « tō- », the nucleus to which the case terminations and post-positions are added, represents the OIA. genitive « tava ». In OB., « tō » is found in its proper genitive sense: « tō muha » *thy face* (Caryā 4); « kin tō mantē, kin tō tantē, kin tō rē jhāṇa-bakhānē » *what is (the good) of thy spells, thy scriptures, and thy meditations and expoundings* (Caryā 34: « kin = kim » is a Sanskritism or Prakritism). It is found as accusative-dative (an extension of the genitive) in « tō puchami » *I ask thee* (Caryā 10). This form is also extended to « tō-ha-, tō-hō- » (cf. « mō-ha », p. 811, *supra*): genitive « tōhō-ra » (Caryā 10), « tōhāra » (Caryā 29), genitive feminine « tōhōri » (Caryās 10, 18), « tōhauri = tōhōri »

(*Caryā* 28), « tōhōrē dōsē » with thy fault (= \*tava-karēṇa dōsēṇa : *Caryā* 39); dative « tōhōrē » (*Caryā* 18): beside genitive « tō-rā » (*Caryā* 41), dative « tōrē=tōrē » (*Caryā* 18). The instrumental based on this oblique is found in *Caryā* 10 : « ā lō Dōmbī, tō-ē sama karibē (=kariba) ma (=mai) sāṅga » *O Dōm woman, I shall have union with thee.* This instrumental « tōē=tō-ē » and the older « taī » reacted upon each other, and became merged into one form, and in Early M.B. the vowel in « taī » was altered through this process.

In eMB. (ŚKK.), we have a form with nasalised vowel, **ତୋ** < tō >, of fairly frequent occurrence. This is used as a nominative, singular. It seems it was originally a plural form: the genitive plural in < -na > as an honorific came to be attached to the singular < tō, tō-ha >, in formations like < \*tō-na, \*tō-hā > in Māgadhi Apabhraṇa, for the regular plural < \*tumhāṇa(m), \*tumhahā > etc. The old honorific sense of it was lost in Early MB. That this was the case for this < tō > can be seen from the Early Maithili plural base for the second person—singular < tū >, plural < tō-sabh, tōh-sabh > (= < \*tō-na, \*tō-hā > plus < sabh >): cf. also the Bhūjpuriyā and Magahi plural < tō-ha-ni=tōha-+ -na + -i >; this < tō, tōh, tōh-an-i > are thus quite distinct from the older < tumh- > = MIA. < tumha > < OIA. < yuṣma- >. The instrumental of this < tō, \*tō-hā > would be < \*tō-ē, \*tō-̄, \*tōh-ē >, which would easily merge in the other singular instrumental < tō-ē > noted above: and we actually have an instance of a dative **ତୋଇକ** < tōhā-kā > in the ŚKK. This was thus an additional strengthening (with the loss of any plural > honorific sense it might have possessed at the beginning) of the recent < tō-ē > (= tō + ē). In eMB., < tāi, tō-ē, tō-̄ > were all confused: specially when the nasal was very unstable. Quite a large number of ways of writing these are found in MB. MSS. (e.g., ତୋ, ତୋସ, ତୋସ, ତୋଏ, < tāi, tōyā, tōē, tō̄, tōñā, tōñā, tōñē, tōñē, tōñī, tūñī, tūñī, tui >), and all these have finally resulted in the inferior or contemptuous, or extremely familiar form of NB. ତେ < tui >.

550. Corresponding to আমি «āmi», N.B. has তুমি «tumi» = Early MB. তুম্কি, তোকে «tumhi, tomhē», O.B. «tumbē». The New

Bengali form represents a combination of the MIA. nominative (=tumhē) and instrumental (=\*tumhahi, tumhēhi). The instrumental use occurs in OB. : e.g., « tumbē hōiba » = « yuṣmābhīr bhavitavyam » (Caryā 5), « tumhē jāibē » (\* jāibē in printed edition) = « yuṣmābhīr yātavyam » (Caryā 23). In Oriyā the form is « tumbhē », in Assamese « tumi », = plural.

For the oblique, we have the base তোমা « tōmā- » (Early MB. তোকা « tōmhā- »), paralleling আমা « āmā- », which is derived from the OIA. plural base « yuṣma- ». The forms তুমি, তোক্ষে, তুমহে, তোমা, তোকা « tumi, tōmhē, tōmā-, tōmhā- » quite early, in the First MIA. period had taken up the « t- » from the singular « tvam, tvaya, tubhyam » etc., so that we have « tumbē, tumha- » instead of « \*yumbē, \*yumha- ».

The Asōkan eastern form « tuphē » (=? tuppē ? tumphē) is not represented in NIA., any more than « aphē » (=? amphē ? apphē, =asmē).

**551.** Through the influence of Saurasēni Apabhrañśa in the OB. and Early MB. periods, and of the Brajabuli dialect, we have some peculiar Western forms in the language of Vaiṣṇava lyrical poetry : e.g., তুহু « tuhū » thou (= Western Apabhrañśa « tuhū », derived by Pischel from « \*tva-ká-m », 'Gramm. der Pkt.-Sprachen,' p. 296; but it may properly be an emphatic form, « tu » + particle « hū, hu », cf. Eastern Hindi and Bihārī, as well as Brajabuli, « hama-hū » *we also*, « saba-hū » *everybody*) ; তুয়া « tuā » thy (= literary i.e. early Maithili « tua » : MIA. « tuva », Western Ap. « tuha » : OIA. « tava »); তুঝ « tujhā » thy (Western Ap. « tujjhū », Second MIA. « tujha » : < « \*tuhyān » = OIA. « tubhyam », cf. « mahyam »); and besides, the extended base « tō-ha, tu-ha » is also much used through the example of Maithili or Brajabuli (as well as Brajbhākhā), in Vaiṣṇava lyrics ; e.g., তোহে, তুহে, তোয় « tōhē, tuhē, tōy » accusative, locative and dative; তোহারি, তুহারি « tōhāri, tuhāri » genitive.

**552.** In the Magadhan speeches, we have the following developments of the old forms for the second personal pronoun, paralleling those for the first personal pronoun :

	Old Singular	Old Plural	New Plural
Bengali	তুই tui	তুমি tumi (sg.)	তোবা, তোমরা tōrā, tōmṛā
Assamese	tāi	tumi (pl.)	tā-hātē, tōmā-lōkē (hon. pl.)

	Old Singular	Old Plural	New Plural
Oriyā	tu	tumbhē (respectful sg.)	tumbhē-mānē (hon. pl.)
Magahī	(obsolete) tū, tō (sg.)		tōh-anī tōh-ara-nī,
Maithili	tū (obsolete) tō, tōh (sg.)		tō(h)-sabh, tōharā-sabh
Bhōjpuriyā	tē (archaic) tū (sg.)		tōha-nī(-kā), tōh-ar-an
[Khaskurā	ta (sg.)	timi (pl.)	timi-haru]
[Hindostāni	tū, taī	tum (pl.)	tum-lōg]

## 553. Typical Dialectal Forms for the Second Personal Pronoun :

S. -W. Bengali

West Rādha

Varendra

Nom. তুই tui, তুমি tumi —তোমের tōnnē, তোমারে tōmānnē	Nom. তুই tūi—তোরা tō-rā, তুমরা tumṛ-rā, তোমরা tōmṛ-rā	Nom. তুই tui— তমরাত tāmṛ-rāb
Gen. তর tā-rā—তমার tāmā-rā, তদের tā-dērā, তোমের tōnnērā	Gen. তোর tō-rā—তোমার tōmā-rā, তোদের tō-dērā, তোরাদের tōrā-dērā, তোগোর tō-gō-rā	Gen. তোর tō-rā— তমার tāmā-rā তুমার tūmā-ghārā

North Bengali

West &amp; S.-W. Vanga

East Vanga  
(Chittagong)

Nom. তুই tui—তুমরা tūmṛ-rā	Nom. তুয় tāy, তুমি tumi —তোরা tō-rā, তোমরা tōmṛ-rā	Nom. তুই tui, তুই* tūi < tumi—তোরা tō-rā, তোমরা tōmṛ-rā < tōmā-rā
Gen. তোর tō-rā—তমার tāmā-rā, তুমার tūmā-rā, তুমাঘার tūmā-ghārā.	Gen. তোর tō-rā, তর tā-rā —তোরার tō-rā-rā, তোমার tōmā-rā, তোমাঘার tōmā-ghārā, তোর-গো tō-rā-gō	Gen. তোর tō-rā—তোয়ার tōyā-rā, তোমার tōmā-rā < tōmā-rā, etc.

## [C] THE PRONOUN FOR THE THIRD PERSON.

The Pronoun for the Third Person (or) ‘General Demonstrative’: সে, তাহা nominative « sē », oblique « tā(hā)- », etc.

554. The Typical Bengali forms as in the Standard Colloquial and the « sādhu-bhāṣā » are the following :

	Singular		Plural	
	Old Singular.	Old Plural > Honourific Singular	New Plural > Ordinary	Double Plural = Honourific
Nominative	সে sē, [neuter] তা(হা) tā(hā)]	তিনি tini; তেহ় tēhā, তিহ় tihā (archaic)	ত(হা)রা tā(hā)rā তা(হা)রা tā(hā)rā (+সব, সকল sāb় (+সব, সকল sāb় sākāl etc.) ; সে sākāl, etc.) সব sē+sāb় etc.	
Oblique	তাহা tāhā-, তা tā-	তাহা tāhā-, তানা tānā-, তেনা tenā-, তা tā-	তা(হা)দিগ় tā(hā)- তা(হা)দিগ় tā(hā)- digā-, তাচাদেব digā-, তা(হা)দেব tā(hā)dērā tā(hā)dērā-	

555. The OIA. nominative of the pronoun for the third person (the base of which was « ta ») was « sa, sah ». In Māgadhi Prakrit it became « sē », and the Māgadhi Apabhraṇa form was in all likelihood « \*śi », which seems to be preserved in the Assamese সি « si » (for শি « śi »), pronounced [xi] or [ći]. But in Bengali, and in Oriyā, and also in the Bihāri group, the pronoun occurs in the nominative as সে « sē (sē) » instead of the expected « \*si (śi) ». The « -ē » vowel may be due to an extended form « \*sa-ka-h » (cf. ahakan = aham) : which would give in Māgadhi « \*śakē > śagē > \*śaē > \*śāī > sē » (cf. pp. 741-742, *supra*) ; or it may be due to the influence of the instrumental form « tē » (< tēna). The OIA. feminine « sā » seems to have continued (as « sā ») in Māgadhi down to the Apabhraṇa period, when it fell into disuse, and the masculine came to be used for the feminine. Already during the Second MIA. stage, the masculine « sē » came to be employed for the neuter (like the neuter affix « -am > -ām » of the noun taking up the masculine « -ē <-ah » affix : *supra*, p. 622) (Pischel 'Grammatik der Pkt.-Sprachen,' § 423). In Bengali, as in other Magadhan, there is as a consequence no distinction of gender, « sē (sē) » being used for masculine, and feminine and also for neuter. For the neuter nominative, however, the form তা(হা) « tā(hā) » is

more common. It is really the oblique extended to the accusative and then to the nominative; the accusative employ we find in the Caryās: e.g., « tā dēkhi » *having seen that* (7), « tā śuni » *having heard that* (16).

556. The oblique singular ता(हा) « tā(hā)- » is really the genitive in « -ā, -āha » discussed above, § 502 (pp. 751-752). The genitival use « -ā, -āha » occurred in OB., as we can see from the Caryās. The oblique « tāh-ā- » is by extension of « tāha » with the definitive « -ā » affix. By adding the usual affixes and post-positions, we have forms like genitive ताहर, ताहार, ताहेर, ताक « tāhā-rā, tāhā-rā, tāh-ērā, tā-kā », accusative and locative (or new oblique) ताहे, ताओ « tāh-ē > tāy় », locative ताहते « tā(hā)-tē », instrumental ताहा-दिया, -দারা « tā(hā)-diyā, -dwārā », etc.

557. The OIA. plural forms (masculine « tē », feminine « tāh » neuter « tāni ») seem to have continued down to Second MIA. (respectively as « tē; tāo; tāni, tāim ».). But they have not been inherited in NIA. Already in the Second MIA. stage, the nominative forms « sē, sē » of the singular were extended to the plural, in Ardha-māgadhi and Māgadhi (Pischel, § 423). In OB. we find « tē » in Caryā 22: « jē sacarācara tiasa bhamanti, tē ajarāmara kimpi na honti » *those (Yogis) who wander through all the world and also through hearen, they do not become in the least ageless and deathless*: this « tē » may be a Sanskritism; but it can well be a nominative plural, derived from an instrumental « \*tēhi, tēhi ». A similar nominative « tē » occurs in Eastern Hindi and Western Hindi. This « tē » (or « tē »?) nominative of Old Bengali seems to have lingered on till Early Middle Bengali, and then it was dropped from the speech, new forms taking its place: we have one instance in ŚKK., p. 313: गोपीकुलेर तोक्षे कैगे आपमान....., ते सक्षे चोराखिल धाञ्चे तोर काळ « gōpī-kulērā tōmhē kāilē āpamānā, tē sāmkhē cōrāyilā bāśi tōrā Kānhā » *you have insulted the Gopis, they have stolen your flute, O Kṛṣṇa.*

The expected form of the OIA. « tē » in Māgadhi Apabhrañśa and in OB. would be « \*ti », and in an emphatic position it might remain as « tē ». Side by side with « sē, tē », the instrumental and the genitive plural were undoubtedly used for the nominative in Māgadhi Apabhrañśa

and in OB. (\*tēhi, \*tāhi, \*tēhī; \*tāna[m], \*tāhā; \*tān-i), paralleling the usage for the noun.

558. MB. and NB. honorific singular forms come from the plural instrumental and genitive of Apabhrāṣṭa and OB. In MB., the honorific nominative is তেহ্, তিহ্ < tēhā, tihā >, which palpably receives its < ē, i > vowel from the instrumental, and its nasalisation may be due to the influence of the genitive. It is not impossible, moreover, that the < -ē- > of the OIA. genitive < tēsām > should have persisted through some dialectal undercurrent here. The forms তেহ্, তিহ্, or তেহ (besides তেহো) < tēhā, tihā, tēha, tēhō > were continued down to the middle of the 19th century, in the < sādhu-bhāṣā >. The ŠKK. has registered তেহ্ < tēhē > is one place (p. 19), and তেহো < tēhō > in another (p. 67): in the ŠKK., the honorific sense is not strong, and we find that the ordinary সে < sē > is joined to তেহো < tēhō > merely as an emphatic form. (e.g., চৌদ চৌ বৃগ আযু লক্ষার রাবণ। তেহো সে মজিঙ্গা গেল শীতার কারণ॥ < cāudā cāu jugā āyu Lāṅkārā Rābāṇā, tēhō sē mājīgā gēlā Sītārā kārāṇā > *fourteen four-yugas his life, Rāvana of Lāṅkā: even he went to perdition through the reason of Sītā*). The form now actually in use is তিনি < tini >, both in the colloquial and in literature, which is not met with except in Late MB.. this < tini > is from an earlier colloquial form < \*tēni > (cf. honorific oblique base তেনি < tēnā- >, beside তি < tā >, in the Standard Colloquial area : < ē > i > by Vowel Harmony), which looks like a blend of the genitive and instrumental. Assamese has preserved the old < tihā, tēhā > in the form of < tēo >.

The oblique তাহা < tābā- > is easily explained. The persistence of the < -h- > may be due to the influence in singular তাহা < tāhā- >. There has been a great deal of cross influence in the development of these forms. There are in the Standard Colloquial area the dialectal obliques তেনি < tēnā- > and তানি < tānā- > (the latter more of a 'folk' form), which retain the vocalism of the instrumental and genitive, and the full < -n- > of the nominative form < tini > and the genitive-oblique < tāng̪ >. The genitival use of তান < tāng̪ > (< < tāna=tēsām >: see *supra*, p. 306) is found in East Bengali: cf. also Oriyā < tāŋ-kā(rā) > (= < tēsām-kara-, -kṛta >), and Maithili < tan-i-k >,

Bhōjpuriyā « tinh- kē ». The full « -n », or nasalisation, from the genitive plural, came to be associated with the plural (and honorific) base, and hence we find in MB. the honorific genitive তাহান « tāhā-nā » (< tāha-), Early Oriyā « tāhā-nā ». Bengali তাৰি « tā- » can be either from « tāna », or it is merely a new formation by nasalising the singular « tā- = tāha ».

With the Bengali « tēhā-, tēnā-, tini, tā(bā)- » etc. are to be compared the Maithili « tan-ik », Magahi « tinh- », Bhōjpuriyā « tinh » ; and Awadhi ten(h) », Bagheli « tenh », Chattisgarh « tin » ; Western Hindi tin(h) » — plural or honorific forms, all with similar genitival « -n- ».

**559.** The old plural becoming singular honorific, new plurals were formed on the basis of their respective genitives in « -ra ». These came in use during the Early MB. period (see *supra*, pp. 734-736).

**560.** Early Bengali preserves relics of some of the older case forms. The instrumental « tēna > tē » is preserved in the sense of *therefore, consequently* in the ŠKK., as তেঁ, তে « tē, tē » : e.g., p. 38, করলো থগু ব্রত আৱ জৰমত, তেঁ বা দৃঃখিনী মোএ « kārālō khāndā-brātā ārā jāramā-tā, tē bā duhkhinī mōē » *in my previous birth I did an unfulfilled penance, may be for that I am miserable (now)*; p. 218, বুলি তেঁ আতি যতনে « buli tē āti jātānē » *for that I say with great care*; p. 367, বাপ নন্দবোধ মাম যশোদা, তেঁ তুকী মাৰী আকারে « bāpā Nāndā-ghōṣā, māmā Yāśodā, tē tumhī māmī āmbārē » *(my) father is N., my mother Y., therefore you are my maternal uncle's wife*; p. 359, গেআন বাণে ছেদিলেঁ মদন বাণ, তে আৱ না ভোলো তোকার ঘোৰন « gēānā-bānē chēdilō Madanā-bānā, tē ārā nā bhōlō (=bhōlō) tōmhārā jāubānā » *with the arrow of wisdom I have shattered the arrow of Love, therefore I do not forget myself through your youth*. There is also the phrase তে কাৰণে « tē kārāṇē » = « tēna kāraṇēna » which occurs more than ten times ; and an extension of « tē » occurs as তেঁএ, তেঁও, « tē, tē » e.g., এবে তোকে দেখি কৃপমে। তেঁএ মোৱ বাঢ়িল আশে « ebē tōkē dēkhiē rupasē, tēē mōrā bāñhilā asē » *I see thee now to be so beautiful, therefore my hope has increased (p. 45)*; যেই দধি দুধ স্থত ভাণ্ডত আছ ই। পসার সাজিতে তেঁএ কাঙ্ক জ্ঞানে « jēi dādhī dudhā ghṛtā bhāndā-tā āchāē, pāsārā sājité tēē Kānhu-kā juāē » *the curds, milk and ghee that remain in the pots, K. should make a display for sale with that (p. 179)*; and as তেঁউ « tē-ū » (< tēna + MIA.

hu = khalu) (p. 29). In later MB., this instrumental is very common as a conjunction, in the form **তেই** « tēi » *therefore* (= tēna+hi). The form « tēi » is archaic and poetic now, and তে কারণে, তে কারণ « tē-kārāṇē, tē-kārāṇḍ » also occur in NB. poetry.

The locative in « -hī », « tahī » (see *supra*, pp. 745-746) occurs in OB. : e.g., « tahī caḍī nācāi » *they dance, mounted on that* (Caryā 10). Its use became obsolete as a locative in MB., where it was adopted as noun of place = *there*, to which the case affixes were added. The ŠKK. has যমনার তীরে কদম্বতর তলে তহি বসি কাহ বাএ বাশে « Yāmūnārā tirē kādāmba-tāru-talē tāhi bāsi Kānbā bāē bāsē » *by the bank of Yamunā, under the Kadamba tree, sitting there* K. plays on the bamboo flute (p. 306), beside মগনদ কুচযুগ গগন মাঝাৰ। তহিত নক্ষত্রগণ গজমুঠীহার॥ « mṛgā-māḍā kucā-yugā gāgānā-mājhārā, tāhi-tā nāksātrā-gānā gājā-muti-hārā » *your two breasts (smeared) with musk-paste is the vault of the sky, the necklace of elephant (big) pearls is the mass of stars thereon* (p. 154), where « tāhi-tā » has a pleonastic locative « -tā ». In ordinary MB., তহির, তহিৰ « tāhi-rā, tāhi-rā » are not rare, meaning both *of that place* and *his, its*. Oriyā also possess « tāhi-rā » beside « tā(hā)-rā » as genitive of « sē ». In Early MB. and in Late MB., the form তথি, তথী « tāthi, tāthi » *there* (< locative of MIA. « tattha » = OIA. « tatra ») is similarly used : তথির « tāthi-rā » *of him*, তথিত « tāthi-tā » *in him*, etc.

**561.** The distinction of gender is now lost in all Magadhan, but a feminine form for the third personal pronoun has been preserved in Assamese and in South-Eastern Bengali (Chittagong) : and traces might still exist in the other dialects. Thus in Assamese beside the masculine « si », plural « si- hātē », there is a feminine « tāi, tāyē », plural « tāi-hātē » ; and Chittagongese shows a feminine তাই « tāi » (plural « tāi-rā »), beside the masculine হিতে, তে « hi-tē » (< \*si+tē=sē+tē), tē » (plural « hitē-rā, tārā ») : Basanta Kumar Chatterji, VSPdP., 1326, p. 112). This feminine « tāi » (the nasalisation in the Chittagong « tāi » is irregular, and might be through the infection from honorific forms) seems to be based on the Second MIA. instrumental, dative and genitive « tāē » (< OIA. instrumental « tayā »), occurring in Māgadhi as well as in other dialects (Pischel, § 425).

The absence of distinction of gender for the personal pronoun of the third person is a defect in the language, and there have been unsuccessful attempts to do away with this defect by employing the Sanskrit « sā » for the feminine nominative, and the base « tasyā- », from the Skt. feminine genitive « tasyāḥ », for the feminine oblique : তার « tasyā-ṛ̥ » of her, তাকে « tasyā-kē » to her, etc. In some 18th and 19th century documents the « tasyā- » oblique has been found<sup>1</sup> (Chandra-Śekhara Kālī, VSPd., Kāryavivaraṇī for 1316, pp. 45, 46 ; and ‘ Hōmiōpyāthik Bhaisajyābalīr Siddhiprada Laksāṇa-eay,’ Vol. I, 8th edition, Calcutta 1921, pp. 11 ff.)

**562.** Some Western (Śaurasēni) forms figure in OB. and in MB., especially in the Vaiṣṇava lyrics. (See *supra*, pp. 103, 115.) সো « sō » instead of the native সে « sē » is found in the Caryās (e.g., 10, 22, 27, 33, 41) : it is the nominative, but is found as an accusative also, e.g., Caryā 21, « kariha sō niccalā » make him motionless ; Caryā 45, « chēwaha sō taru » cut down that tree. This form is fairly common in Vaiṣṇava lyrics and is often demonstrative adjective, as in OB. Thus « sō » is thrice as numerous as « sē » in the Caryās, a fact which is explicable through Śaurasēni literary influence as well as through the MS. being copied in Nepal. The genitive of « sō » in Western Apabhraṇśa has the forms « tassu, tasu » and « tāsu » (=tassa, tasya), beside « tahō ». In the Caryās we have « tasu » (instead of the native « tā, tāha, tāh-ēra »), as in « tasu anga » its limbs (27), « maṇa taru, pāñca indi tasu sāhā » the mind is a tree, the five senses are its branches (45). Maitili of literature also possesses this form. In MB., Brajabuli as well as ordinary poetic Bengali, it occurs as তছু « tāchu », with « -eh- » for « -s- » (*ante*, pp. 474, 551).

<sup>1</sup> In Early NB. letters and documents, for feminine forms like দেবী, দাসী, শ্রীমতী dēbī, dāsī, śrī-matī, the genitive and other cases are on the basis of the Skt. genitive in ‘-yāḥ’ : দেবাৰি, দাস্তাকে, শ্রীমতাকে ‘ dēbīr, dāsyā-r, śrī-matyā-kē,’ besides the regular ‘ dēbī-r, dāsī-kē, śrī-mati-kē’ etc. A curious result of this practice has been that in Bengali epistolary and legal language, these ‘-yā’ oblique forms have become established as nominatives, especially with names of widows, and in this way a distinction is made of widows from unmarried girls or women with husbands living.

563. Typical Dialectal Forms for the Third Personal Pronoun :

South-West Bengali

West Rādha

Nom. সে, তিন sē, tin—তারমেনে tār̥-mēnē, তানমেনে tānāl-mēnō, তান্নে tānnē, তান্নেরে tānnē.	Nom. সে তাই sē, tāi—তাহরা tāhā-rā, তানরা tānā-rā.
Gen. তার, তান tār̥, tān̥—তারমেনকার tār̥-mēn̥-kār̥, তানমেনকার tānāl-mēn̥-kār̥, তান্নাকার tānnā-kār̥.	Gen. তাহর tāhā-rā—তাহরদেব tāhār̥-dēr̥. (The Remote Demonstrative is also commonly employed)

North Bengali (Rājbatiśī)

West Vāṅga

(Dacca, Maimansingh)

Nom. সে, তী, তীয়, তানি sē, tā, tāy, tāni—তামাৰা tām(ā)-rā.
Gen. তার, তাহে, তামাৰ tā-rā, tā-r-hē, tāmā-r̥—তামাৰ tāmā-r̥, তামৱাৰ tām̥rārā.

East Vāṅga (Sylhet, Kachar)

Nom. সে, তাইn, তিনি sē, tāin, tini—
তারা, তানৱা, তাহনৱা tā-rā, tā(hā)n̥-rā.

Nom. হে, হিনি hē, hini—হেৱা, চেনৱা hē-rā, hēng̥-rā.
Gen. হেৱা, চেনৱাৰ hē-r̥, hēnā-ār̥—হেৱগো hē-r̥-gō, চেনৱাৰ hē-ār̥, চেনৱাৰগো hēnā-r̥-gō.

Gen. তার, তান, তাহন tā-r̥, tān̥, tāhā-n̥—তারাৰ tā-rā-r̥, তাগো tā-gō, তানৱাৰ tān̥-rā-r̥.
(The Remote Demonstrative is employed in Hajong)

South Vāṅga (Bakharganj)

S. E. Vāṅga (Chittagong)

Nom. হে, তাইn, hē, tāin—হেৱা, তারা hē-rā, tā-rā.
Gen. হেৱা, তার hē-r̥, tā-r̥—হেৱাৰ, hē-r̥-r̥, তারাৰ tā-r̥-r̥.

Nom. হিতে, হেতিন, তে hi-tē, hē-tin, tē; (fem.) তাই tāi—তারা, হিতেৱা tā-rā, hi-tē-rā, তাইৱা tāi-rā.
Gen. হিতাৰ, তাৰ, তান hē-tā-r̥, tā-r̥, tān̥, তাইৰ tāi-r̥—তাৰাৰ tā-r̥-r̥, তানাৰ tānā-r̥, তাইৰাৰ tāi-r̥-r̥.

S.-W. Bengali has the characteristic « -mēng » affix for the plural contracted to « -n- ». The West Rādha তাই « tāi » may originally have been the feminine form noted in p. 825. North Bengali uses the base তা « tā » (beside a fuller তানি « tāni ») for the nominative ; and the form তামার « tāmār় », plural তামারুরা « tām(ā)rā » are honorific, with « -m- » for « -n- » or « -h- » of other forms of Bengali — a phonetic peculiarity which characterises this dialect : as early as c. 1555 A.C., in a letter from the Kōc king Nara-Nārāyaṇa of North Bengal to the Ahom king Su-khām-phā, we find ইমারাক পাঠাইতেছি « imā-rā-kā (=ibā-digā-kē) pāthāitē-chi » *I am sending them*, তামরার মুখে « tāmārā-rār় (=tāhā-digēr়) mukhē » *from their mouth* (Report of the Third North Bengal Literary Conference, p. 37 ; VSP., II, p. 1672).

The use of the « -rā » plural for the oblique as well is noticeable in the North and East Bengali dialects. As the forms « imārā-k় » and « tāmārār় » mentioned above show, such oblique use was established by the 16th century.

The nominative « sē » becomes « hē » in many of the East Bengali dialects ; and in South Vāṅga, « hē » changes « tini » to « \*sini > hini », « tēnā-r় » to « \*sēnār় > hēnār় » ; and « sē » > « hē » is used for the oblique as well : e.g., East Vāṅga « sē-r় » > hēr় » *his*, « sē-rā » > hērā » *they*, « sē-rā-r় » > hērār় » *their*. The Assamese accusative « siyē » [xie, cię] shows a similar though restricted use of the nominative base for an oblique case.

The Chittagongese nominative « tē » seems to be due to the influence of the oblique base in « ta- ». A peculiarity of this dialect (and of S.-E. Vāṅga generally) consists in the double forms « hi-tē, hē-tin=sē + tē; sē + tini ».

In the Mayang dialect, the base « tā » is used for the nominative (genitive « tā-r় » singular, plural nominative « tānō », plural genitive « tānō-r় »).

**564.** The nominative সে « sē », emphatic সেই < সেহি « sēi < sē-hi >, is used as a demonstrative adjective, = *that*, for all genders. A noun

of multitude agglutinated to « sē, sēi » indicates the plural. The qualified word takes the case inflections, e.g., মে লোক, সেই লোক « sē, sēi lōkə » *that man*, সেই-সকল লোকের « sēi-sākālə lōkērə » *of those men*, etc.

[D] THE PROXIMATE OR NEAR DEMONSTRATIVE.

565. The typical Bengali forms in the Standard Literary and Colloquial are :

	Singular	Plural	
	Old Singular	Old Plural = Honorific	New Plural
Nominative	এ̄ (earlier এহ) ehā, neuter ইহা ihā	এই̄ ehā, ইহ̄ ihā, ইনি ini	এরা ērā, ইহারা iħārā (এনৰ, এন্তা) এনারা ēnārā, ে-সাবঢ, ে-গুলা)
Oblique	এ, ইহা ে-, ihā- (earlier এহ ehā)	এ̄, এঁয়া, এনা ে- দিগ, দের ে-হা, েনা, ইহ̄ ে- দের, ইহাদিগ, দের ইহা- ihā-	এ̄-, এঁয়া-দিগ, দের ে-হা-দের, ইহাদিগ, দের ইহাদিগ- ihādīg- -dēr-

566. In Vedic and Sanskrit there are two pronouns to indicate the near demonstrative = *this, this here*: [i] the pronoun « ে-ta- », (nom. sg. masculine « ে-শ

an-ayōḥ • ), « i- » (< i-y-am, i-d-am • ; in *guṇa* forms « \*ai-, ē- • , as in « ay-am • , Vedic « ēnā = \*ai-nā, ayā = \*ai-ā • , ēbhīḥ, ē-śām, ē-śu = \*ai-bhis, \*ai-śām, \*ai-śu • , etc.), and « im- » (as in « im-am, im-ām, im-āḥ, im-ān • etc.). In OIA. dialects other than those which formed the basis of the literary speeches (Vedic and Sanskrit), it is not impossible that each of these bases, namely, « a-, an-, i- (ai- > ē-, ay- ), im- » existed in their entire declensions.

The basis or root form of the Bengali proximate demonstrative is « ē- », dialectally « i-, ī- »: the affix « -ha » of the oblique is genitival, and the nasalised forms, or forms in « -n- », were originally plural genitives. The older form for the nominative seems to be « ē- ». The Caryās know « ē- » (e.g., Carvā 6, « ē bana cehāḍī » *abandoning this forest*; 28, « ē bana hindāī » *wanders in this forest*; 33 « ē tailōē » *in this threefold universe*; 39, « ē jaga » *this world*), beside « ēha » (Caryā 43, « ēha sahāva » *this nature*), and « ēhu » (Caryā 22, « ja ēhu jaati » for « \*jē ēhu jugati »: cf. Comm., « ē-ā hi yuktiḥ »). The eMB. of the ŠKK. also shows « ē- », in the forms like এ, এজা, এহ, এই, এছি, এনি, এশাৰ, এহাক, এহাত, এহার, এহো « ē, ēa, ēhā, ēi, ēhi, ē-si, ēhā-ē, ēhā-kā, ēhā-tā, ēhā-rā, ēhō » occurring some four score of times, while a solitary « i- » form occurs in ইহাৱ « ihārā ». In the NB. Standard Colloquial « ē » also is the word, « ihā » belonging to the literary language and to the dialects.

The source of the Bengali « ē- » would thus seem to be the OIA. base « ēta- ». The *guṇa* form of the defective pronoun « i- », as « \*ai- > ay-, ē- » can of course be equally the source of a NIA. « ē- ». But MIA. remains do not register a fully declined « i- » demonstrative: Aśōkan Prakrits and Pali both show that the base « im- » was the one most widely current in the First MIA. period, with the simple « i- » and « a- » bases considerably restricted in use. The same thing is noticeable in Second MIA. as well. The « i-, im- » bases seem to have continued in the Western Apabhrañśa of literature, specially in the form « āya- », beside « ēya-, ēa- = « ēta- ». In the Māgadhi Apabhrañśa, however, it seems that only the base « ēta- > ēa- » (genitive « ētasya > \* ēha ») was current,

which gave the Bengali « ē, (ēhā) ». The base « ima- » of MIA. is not represented in NIA. in which its expected development would be « \*īwā- ».

Saurasēnī Apabhrañśa as written in Eastern India (in the Buddhist Dōhās shows numerous instances of the nominative « ēhu » (= ēśah). What exactly was the nominative of the « ēta- » base in Māgadhi Apabhrañśa cannot be determined. The Māgadhi Prakrit forms are « ēśē, ēśā, ē(d)am ». The « -ś- » apparently dropped through influence of the neuter and of the oblique. The genitive « ēha » was strengthened to « ēhā » in Early MB. The genitive plural « ētānām (= ētēśām) > ēnā(m) » is the source of oblique honorific bases « ēnā-, ēhā-, ē- » etc. The NB. honorific nominative ইনি « ini » presents a parallel case with তিনি « tini » (p. 823) : Early Bengali employed ইই, ইহো, এহো « ihā, ihō, ēhō », which we occasionally find written in MSS. as ফিহ, ফিহো, ফেকো « ūihā, ūihō, ūēhō ».

The alternation of « i, ē » is a commonplace thing in NIA. phonology. The « i » forms developed in Bengali quite early : the solitary ঈচার « ihā-rā » in the ŠKK. shows that it goes back to the 14th century at least, and ঈহার, ঈহারে, ঈহাকে « ihā-rā, ihā-rē, ihā-kē » etc. are common enough in MB. The Late MB. prose preferred these « i- » forms, whence the NB. « sādhu-bhāṣā » took them up. Oriyā preserves the earlier broader vowel, like Standard Colloquial Bengali : « ē, ēhā, ēhi ». In MB. and dialectal Bengali we find a form ঈচান « ihāng », honorific genitive singular, = « ihā » + « -na » of the plural. In Assamese we have singular nominative « i », oblique « iyā- », plural « i-hāt- » : the honorific is « ēo » = MB. « ēhā » ; and there is a feminine form in Assamese, « ēi », corresponding to « tāi » *she* (*supra*, p. 825), which seems to be based on the MIA. feminine genitive « ētāē, \* ēdāē, \* ēcāē », agreeing with « tāē » for « tasyāh ».

The Bihārī dialects show « i, ī » for the nominative, and « ēh-, ē-, ēhi- » for the oblique ; and corresponding to « ēhā-, ihā- » of Bengali are to be found in Maithili « hina-k < \*inba-ka » (honorific oblique), and Magahi and Bhōjpuriyā « inh- » (plural base).

567. The OIA. « ēta- » base is found to be represented in most other NIA. Typical forms are given below :

	Nominative		Oblique	
	Singular	Plural	Singular	Plural
Awadhī	I, yū (= ēhū)	in, ē	ē-, ēh-, ēhi-, yāhi-	in-
Hindōstānī	yah, yēh, yih (< *ēaha )	same as Singular	is-	in-, inh-
Brajbhākhā	yah, yih (< *ēaha)	yē, yaū	is-, yā- (= *ēaha)	ini-, in-, inhaū-
Panjābī (Eastern)	ih, ēh	ih, ēh	ēs-, is-, ih-	ēh-, inh-
Lahndī	ē, ēh, ī	ē, ēh, nēh, in, ī, ih	is-, ih-, ī-	inhā-, inhē-
Sindhī	hi, hē, hiu, hia	hi, hē	hina-	hine-, hinane-
Rājasthānī	yō, yā (ō, ā)	yai, yē, (ē, āī)	aī-, in(i)-, ī-, anī-	inā-, ānā-, in-, yā-, ā-
Gujarātī	ē	ēō	ē-	ēō-
Marāṭhī	hā [m.], bi [f.], hē [n.]	hē, hyā, hī	hyā- (yā-), hī-(ī-)	hyā- (yā-)
Khaskurā	yō	ina, in(i)	yes-, yas-	ina-, in(i)-

Of the above forms, the oblique singular in « -s- », as in Western Hindi (Hindōstānī, Brajbhākhā), Panjābī and Lahndī, as well as in Khaskurā (and the Western Pabāṛī dialects), is based on the OIA. « ētasya » (genitive of the « ēta- » base), which seems to have become « \*ētissa » in First MIA. (cf. « ētisa » in Aśokan the Shahbazgarhi : a similar change of the original vowel to « -i- » we note in the instrumental « \*ētina < ētēna », which figures in the Second MIA., Māgadī and Jaina Mahārāṣtri, as

« ēdinā » and « ēinā » respectively): « \*ētissa < \*edissa > \*ēissa » would be the development in Later MIA. It is quite likely that like « kissa, kiśśa, kīsa » = OIA. « kasya » which from the Early MIA. period was specialised from its genitive employ, and became almost an independent form (cf. Bengali কিসে, কিসের « kisē, kisē-r় » by *what, of what*: see *infra*, under 'Interrogative'), « \*ēissa » also was specialised, first as an ablative, and then as an oblique. This « \*ēissa » could easily be the source of the NIA. « is-, ēs-, yes-, yas- » etc. In East Bengali (Dacca) when one is at a loss for a word the expletive ইসে « isē » is frequently used (= *namely, this er, what*): this « isē » seems to be the equivalent of the W. Hindi « is- » in Bengali (cf. the similar use of « ēthi » in Bhojpuriyā : p. 534). The normal genitive form in « -ha » gave the oblique in the other NIA. dialects, and in many cases this oblique was shifted to the nominative. The nominative plural « yaj, yē, ē », as in Western Hindi, in Rājasthāni and in Panjabī, possibly represents the instrumental « \*ēhi = ētēhim = ētaih ». In Gujarāti « ē » has taken up the sense of the remote demonstrative, and « -ō » is its normalised plural affix. The nasal « ় » (or nasalisation of the vowel derived from the nasal) in the Rājasthāni oblique singular comes from the OIA. pronominal base « ēna- » *he, she, it*, which was continued in MIA. (Pischel, § 431); but it is not preserved elsewhere in NIA. In the Apabhrañśa source of Rājasthāni-Gujarāti, the « ēta- » and « ēna- » bases were merged into this demonstrative (Tessitori, 'Notes on the Grammar of OWR.', § 89). The Sindhi oblique e.g., « hina » is probably similarly to be explained. The prothetic « h- » in Sindhi is peculiar, but it may be by metathesis, from the genitive oblique « \*ēha > \* ēha > hē, hī » : « u, a » are recent masculine and feminine affixes. The Marāthī forms present some obscurities (cf. Jules Bloch, 'Langue Marathe,' pp. 162, 208): but can it be that in the formation of Marāthī « hā » etc. there was a blending in Mahārāshṭri Apabhrañśa of forms like « ēha- » (= ēśah, ētasya) and « āa-, āya- » (= ayam), such as we find in the Western Apabhrañśa? Gujarāti also has « ā » *this*, which is derived from « āya-, āa- » as found in Jaina Apabhrañśa of the West, = Second MIA. « aya- » < OIA. nom. masc. « ayam ».

Sinhalese has the bases « ū, ē (ë) » for the third personal pronoun : of these, « ū » corresponds to the Remote Demonstrative of Bengali, and is cognate with it (see *infra*), and « ē (ë) » is traced by Geiger to « ayam » of MIA. The proper demonstrative bases of Sinhalese are « ma- », which is derived ultimately from the OIA. and MIA. « ima- », and « ara » *that*, representing the OIA. stem « āra- » *far* ('Litteratur und Sprache der Sinhalesen,' pp. 66, 67).

**568.** The differences in gender have not been inherited in NIA. In Bengali and other Magadhan, a possible instrumental « \*ēē, \*ē » (=ētēna) seems to have merged into the nominative and oblique, and also a possible plural instrumental > nominative, such as we find, for instance, in the Brajbhākhā « yai, ē, yā ». An expected locative in OB. and MB. would be « ēhi, ēhi » : this seems to occur in NB. as এই « ēi », as in এই যে « ēi jē » *here it is*, এইখানে « ēi khānē » *here*, এই হেথায় « ēi hēthāy » *here at this place*, etc.

Corresponding to the form তথি « tāthi », OB. seemed to have possessed « \*ēthi ». We have « ēthi » in Oṛiyā, in the oblique, as an equivalent of « ēhā » ; and « ēthi » occurs in Bhōjpuriyā as an expletive like ইসে « isē » of dialectal Bengali. Connected with this possible OB. « \*ēthi » we have the form ইথে « ithē » *in this* in MB. (from the ŠKK. downwards).

**569.** Dialectal Forms for this pronoun agree in general with those for the Third Personal pronoun.

S.-W. Bengali has nominative এউ « ēu », really an emphatic form, = « ē + hu ». The expected plural forms of the type of « ē(u)nē, ē(u)mēn-kār, ē(u)nnē-kār » do not feature in the LSI.

West Rādha agrees with the Standard Colloquial in having এ « ē », but the vulgar dialect has a preference for ই, ঈ, « i, I », owing to contiguity with Bihārī ; and the full forms ইহাৰ, ইহাকে, ইহাৱদেৱ, ইহাদিগে « ihā-r̥, ihā-kē, ihār̥-dér̥, ihādigē » etc. occur in it.

In North Bengali, ই « i » as well as এই, এও « ēi, ēo » figure for the singular, and ইমৰা, ইমৰাক, ইমৰাব « im̥rā, im̥rā-k̥, im̥rā-r̥ » etc. for the plural, corresponding to তামৰা « tām̥rā » etc. (p. 828).

In East Bengali, we have এ « ē » in the singular, plural এৱা « ē-rā », genitive plural এৱার এৱগো « ērārā, ērā-gō », and ইনি « ini » is singular, with plural এনানৰা, এনারার « ēnān-rā, ēnā-rā-rā » etc. for the honorific. The full « -n- » rather than the nasalisation is preferred.

570. Like সে, সেই « sē, sēi », এ « ē », with its emphatic এই « ēi < ēhi » is used as a demonstrative adjective.

[E] THE REMOTE OR FAR DEMONSTRATIVE ও, উহা « o, uhā ».

571. The forms in Bengali are—

	Singular		Plural	
	Old Singular	Old Plural	New Plural from Singular	Double Plural from Old Plural
Nominative	ও o (earlier ওহা ohā)[neuter উহা uhā]	উনি uni (earlier উই uhā, ওই ohā)	ওৱা orā, উচ্চাৰা uhārā ( ওব, ওপনা o-sabā, o-gulā )	ওৱাৱা orārā, ওনারা ohārā, উইঁচাৰা uhārā
Oblique	ও o-, ওহা ohā- উহা uhā-	ও ঠি- (ওহা ohā-), ওনা onā-, উহা uhā-	ওদিগ odiġā-, ওদেৱ odērā, উহাদিগ uhādīgā, etc.	ওদিগ, -দেৱ o- digā, -dērā, ওনা- odērā, উহাদিগ uhādīgā, etc.

572. In Indo-Iranian, there were the following demonstrative bases which gave the remote demonstrative in the Indic and Iranic languages : [i] a base « \*ava- » (= Indo-European « \* owo- » : Old Church Slav « ovū »), giving the Iranian pronoun « ava » *that* as in Old Persian and Avestan (which has become « ō, ū » in New Persian = *he, that*, as opposed to « ē, i- » *this* < Old Pers. « ai-ta- » = Skt. « ē-ta- », and « in » *this* = Skt. « ē-na- »). In Indo-Aryan, this base seems to have been current dialectally, although in the Rig-Veda alone it is preserved only in the genitive and locative dual form « avōḥ » ; [ii] a base « am-ū (am-ū), am-i » which is characteristic of Vedic and Sanskrit. It is obscure in origin, and seems to be an extension of « a-m », the accusative of the simple pronominal base « ă- » (= Indo-European « \* ă, \* o »), with « u » and « i » particles,

into « am-u-, am-i- » which was established as a pronoun (cf. Vedic « tam-u, idam-u; also cf. « imam » < « im », accusative of a pronoun « i », plus particle « -am ».) This base « amu, ami » is not found outside India. [iii] For the nominative masculine and feminine, Indo-Iranian had the forms « \* sā-u, \* sā-u », a combination of the third personal nominative pronouns « sā, sā » plus the particle « -u », beside a neuter « tad-u ». (These are found in the Old Greek as « ho-u, \* hā-u-, \* tod-u- < tou- » as in « hou-tos, hau-tē, tou-to ».) The masculine « \* sā-u » and the feminine « \* sā-u » apparently were used one for the other. In Iranian these became « \* hā-u, \* hā-u », and Old Persian generalised the masculine (as « hauv ») for both genders, and Avestan the feminine « hāu ». In Indo-Aryan also, the feminine form was taken up for both the genders; and there was prothesis of the pronominal base « ā- », giving « ā-sā-u ». (The proper masculine form from Indo-Iranian « \* (ā-)sā-u » would have been « \* asō » in Sanskrit.) For the neuter, a new formation « ad-as » (= neuter pronominal « a-d », cf. « ta-d, ya-d » etc., and a suffix « -as ») was created in OIA.

Leaving aside the nominative « asāu, adas », it is clear that in OIA. « amū-, amū-, ami- » formed the base for demonstrative, with a possible « ava- » base which is not noticed in Vedic and Skt. except in the dual form « avōh ».

The base of this pronoun in Bengali is « ō, ōhā », and not « u », which is later, and dialectal (cf. the case of « ē, ēha » and « i » of the near demonstrative). The ŠKK., however, shows « ō » only in the genitive ওহার « ōhā-rā » (twice), and it is « ū, u » in the nominative (thrice). The West Rādha dialect even now prefers « u » to « ō ». There is no instance of this pronoun in the Caryās. The ordinary demonstrative « sē, tāhā » seems to have been more popular than the « ō (u) » demonstrative in OB. and MB. This was certainly the case in some other forms of Magadhan, e.g., Assamese and Oriyā, which use « sē, sēi » (in Assamese = [xi, xeij]) and « sēhi », and do not possess the « ō » form. In the case of some of the pronominal derivatives, Bengali, too, prefers the bases « sē-, tā- » to « ō, ō- » & : thus, সেখান « sē-khānɔ » beside ওখান « ō-khānɔ » *there*, NB. তবে

« *tābē* » rather than MB. અદે « *ābē* » *then*. In the Śaurasēṇī Apabhrāṇśa, however, as well as in the Avahattha of the 'Prākṛta-Paingala' and of Vidyāpati and others (cf. p. 91), « ō » is found : *e.g.*, Hēma-candra (verse 45, under Apabhrāṇśa) « jaī pucchahu ghara vad̄ālī, tō vadḍā ghara ōi » *if thou askest about big houses, then big houses are there* (« ōi » = « \*avē », locative of « \*ava » : Pischel, 'Grammatik der Pkt.-Sprachen,' § 432) ; verse 97, « ḫ gōrī-muha-nijjiaū baddali lukku miajku » *that moon, more beautiful than even Gaurī's face, is hid in the cloud* ; 'Prākṛta Paingala' (ed. Bib. Ind.), p. 139, « ḫ bakkala, ḫ pasu, ḫ pāsāṇa » ; p. 348, « sasī ḫ » (=śāśī saḥ) ; Vidyāpati (Kirtti-latā) — « bāla-canda, Vijjāvāī-bhāsā, duhū nahī laggāi dujjāṇa-hāsā : ḫ Paramēsara-Hara-sira sōhai, i niccaya nāra-maṇa mōhai » *the scorn of bud men cannot touch these two — the young moon and Vidyāpati's language : that adorns the crest of the Supreme Deity Hara, this certainly pleases the mind of gallants*; etc. In the Apabhrāṇśa which is connected with Gujarātī, as in the Jaina writers, the « ō » demonstrative does not occur : neither is it found in Marāṭhī.

The source of NIA. « ō » (and its variants in the different languages, as below) would seem to be the OIA. base « \*ava », which looks like having been current in the spoken dialects, although ignored by the literary speeches—Vedic, Sanskrit, Pali and the various Prakrits—and came to its own only in Late MIA. literature through occurrence in the popular poetry in Apabhrāṇśa. The base « amu- » is quite popular in Pali, it is common enough in Second MIA., its development in Late MIA. and NIA. would have been « \*aῶu-, \*aັu- » : this may have existed in Late MIA., but it gave place to the colloquial « \* ava- > ō- ». The « ava, ḫ » pronoun has always been a living one in Iranian, and it occurs in Dardic (*e.g.*, Śinā) : it can well have been a living one in some OIA. and MIA. dialects.

The oblique, honorific and secondary plural forms run parallel to those for « ē », and there is the alteration between « ḫ, ū (u) » similar to that between « ē, ī (i) ». In the Bihārī dialects, « ū, ū » are the nominative, and « ḫh-, ḫ-, uh- » are found for the oblique : and corresponding to the honorific « uni, ubā- » etc. of Bengali, Maithili has « hunā-k < \*unha-ka », and Magahi and Bhōjpuriyā have « unh- ».

573. The « ava- » base is thus represented in some of the other NIA. speeches :

	Nominative		Oblique	
	Singular	Plural	Singular	Plural
Awadhī	ū, wai	on, un, ū	ō-, ohi-, ōh-, wahī-	on-, un-
Hindōstānī	wah, wōh, wuh	wē	us-	un-
Brajbhākhā	wah, wuh, wō	wē, wai	wis-, wābi-, wā-	un(i)-, win(i)-, unbaū-(winhaū-)
Panjābī	uh, ūh	uh, ūh	us-, uh-, ūs-	ōh-, unh-
Lahndī	ō, ū, ūh	ū, ū, ū, ūh, ūhē	us-, uh-, ū-	unbā-, unhē-
Sindhī	hū, hō, huā	hū, hō, hōē	huna-	hune-, hunane-
Rājasthānī	wō, u, wōh, wā	wāl, vi, wai	wāl-, ū,- un(i)-, wanī-	un-, unā-, wanā- wā-
Khaskurā	u	una, uni, un	us-	una-, uni-, un-

The oblique singular « -s- » forms of Western Hindi, Panjābī and Lahndī, and Pāhāṛī (Khaskurā), are apparently based on the old genitive « \*avasya > MIA. « \*avussa », paralleling « ētasya > ētissa », « kasya > kissa ». The plural nominatives, Western Hindi « wē », Lahndī « uhē », Rājasthānī « wai, wāl, vi », would be from an instrumental nominative plural, « \*avahi, hī- > \*avēbhīh ». The « -ṇ-, -n- » in the Rājasthānī and Sindhī singular oblique would appear to be by the analogy of the Near Demonstrative. Gujarātī and Marāṭhī do not possess a form corresponding to this « \*ava- > ū, ū ». Sinhalese has « u », equally derived from « ava » (Geiger : see *supra*, p. 834).

574. There is a NB. locative adverb ओई « ūi » *there*, which represents either a Māgādhī Apabhrāṇa « ūi » < \*ōi > « avē » as in Hēma-candra, *supra*, p. 837), or the locative in « -hi » (\*ōhi = OIA. ava + -dhi). ओई « ūi » is

commonly written অই  $\leftarrow$  &i>, but that does not alter its  $\leftarrow$  ō  $\rightarrow$  pronunciation. There is no  $\leftarrow$  -thi  $\rightarrow$  form in Bengali as a substitute for the oblique (cf. তথি, ইথে  $\leftarrow$  t̄thi, ithē  $\rightarrow$ , supra, pp. 825, 834), which we see in the Bihāri dialects (e.g., Bhōjpuriyā  $\leftarrow$  ötthu, öthuā  $\rightarrow$  that, Maithili  $\leftarrow$  uthī, uthi  $\rightarrow$ ).

575. Dialectal forms for  $\leftarrow$  ō, u  $\rightarrow$  run parallel to those for  $\leftarrow$  ē, i  $\rightarrow$ , with only substitution of the back vowels proper to this pronoun, and it is unnecessary to describe them. In many of the dialects, for instance in parts of West Rādha as well as E. Bengal, as a characteristic phonetic habit, অ  $\leftarrow$  & $\rightarrow$  is substituted for ও  $\leftarrow$  ō  $\rightarrow$ .

576. The emphatic ওই  $\leftarrow$  öi  $\rightarrow$  < ওহি  $\leftarrow$  öhi  $\rightarrow$  (frequently written অই  $\leftarrow$  &i  $\rightarrow$ ) = that, that there, is used as a demonstrative adjective.

577. There is a superficial resemblance between the NIA. demonstrative bases and those of Dravidian, which has the bases  $\leftarrow$  i-  $\rightarrow$  for the proximate,  $\leftarrow$  a-  $\rightarrow$  for the remote and a less common  $\leftarrow$  u-  $\rightarrow$  for the intermediate demonstrative (or  $\leftarrow$  iv-, av-, uv-  $\rightarrow$ : C. P. Venkatarama Ayyar, 'Madras University Dravidic Studies,' I, 1919). But that resemblance is only accidental: the NIA. forms can be easily traced back to OIA., and Dravidian influence here is extremely problematic. The Kōl demonstrative pronouns are more complicated in their construction and employment (cf. Santali, in LSI., IV, pp. 43-44), and here the question of influence is even more unlikely. The question of Tibeto-Burman influence seems to be still more remote.

#### [D] THE RELATIVE PRONOUN.

578. The forms are—

	Singular		Plural	
	Old Singular	Old Plural Honorific	New Plural	Double Plural = Honorific
Nominative	যে jē [neuter যা(ঃ) jā(hā)]	জেই jehā, জিই যা(ঃ) jā(hā)	যা হা রা jā(hā)rā	যা(ঃ)রা jā(hā)rā
Oblique	যা(ঃ) jā(hā)-	যা হা jā(hā)-, যেনা jēnā-	যা(ঃ) দিগ jā(hā)-, যা(ঃ) দের dig&- , যা(ঃ) দের jā(hā)dēr&-	যা(ঃ)দিগ jā(hā)- dig&- , যা(ঃ)দের jā(hā)dēr&-

The pronoun is written with य < y=j > in NB., but in OB. and MB. ज < j > was preferred, although य was also used in MB. through Skt. influence (the OIA. source of the word in Skt. < ya- > being well-known).

**579.** The source of this pronoun is the OIA. relative < ya- >. The nominative य < jē > = Māgadhi < yē >, OIA. < yah >, has developed like < sē > from < sa, sah >: Assamese has < ji > [zi]. A plural nominative < jē > (< \* yahi= \*yēhi >, MIA. instrumental plural : cf. W. Hindi < jē > plural of < jō >) may have merged into the singular. The honorific is based on the plural genitive < yāna(m), yāṇa(m) > = < yēśām > : the < ē, i > vocalism in जेह्न, जिह्न, जिनि < jēhā, jihā, jini > may be due to the nominative. The oblique is the strengthened form of a genitive < jaha >. In Assamese, the neuter oblique has the < i > vowel, being based on the nominative (masc. nom. < ji >, oblique < jā- > : neuter nom. < ji >, oblique < ji-hā >).

Oriyā and Bihārī in the main agree with Bengali: thus—

	Old Singular	Old Plural=Honorific	New Plural
Oriyā	jē, jāhā-	jēū, jāhā-	jē-mānē
Maithilī	jē, jāhi, ja-	jani-k (genitive)	jē-sabh
Magahi	jē (jaun), jēh-	jinh- (oblique pl.)	jinh-ak-an-i
Bhōjpuriyā	jē (jawan, jaun), jēh-	jinh-(oblique pl.)	jinh-kā

Eastern Hindi (*e.g.*, Awadhī, Chattis-garhī) shows < jē > in the nominative, representing the vocalism of Ardha-Māgadhi. The form < jaun > (cf. < taun > for the 3rd personal pronoun) agrees with < kaun > (see *infra*, under 'Interrogative'). The OIA. < ya- > is preserved in other NIA., excepting Sinhalese, which has adopted the Dravidian device of employing adjectival relative participles instead of the relative pronoun, and this pronoun has consequently dropped off.

### 580. OB. forms :

Nominative : < jē jē āīlā tē tē gēlā > *those who came went away* (Caryā 7); < jē jē gēla > *he who* (or *those who*) *went* (Caryā 15); < ja ēhu jaati > (= < \*jē ēhu jugati >, following the Commentary : Caryā 26): < jē bham-anti > (plural, < \*jahi, \*yēbhīh > : Caryā 22);

Accusative : « jā ēthu cāhāma » (the printed text has « vāhāma » : cf. Commentary, « yam paśyāmy atra » : Caryā 21) : « jā laī acchama » (Comm. = « gṛhitvā tiṣṭhāmi » : Caryā 29) ;

Instrumental : « jē ajarāmara hōi » (Caryā 3) ; « jēna (archaic) tuṭāī avanā-gavanā » (Comm. = « tēna yātāyātam trutiyati » : Caryā 21) ;

Genitive : « jā, jāhēra » (see *supra*, p. 752) ;

Locative : « jahi » (Caryā 3).

Besides, there are numerous (some dozen) instances of the Western Ap. nominative « jō » in the Caryās, and one or two instances of the corresponding Western genitive « jāsu » (in one case, as « jasu » in Caryā 40, it is used for the locative). This « jō » figures in Brajabuli poetry, and « jāsu, jasu » occur there as यच् « jāchu » (see *supra*, pp. 473-474).

The locative « jahi » is used as the oblique base in MB., esp. in the genitive, e.g., यथि॑ « jāhirā » : cf. Ṣṛiyā neuter « jābī » = masculine and feminine « jā(hā) ». Corresponding to « tāthi » (see p. 825), MB. has यथि॑ « jāthi », as in locative यथित् « jāthi-tā », genitive यथिर् « jāthi-rā » (see *supra*, p. 297).

**581.** The dialectal forms correspond to those for the demonstratives. The relative, with its emphatic form येत् « jēi (< jēhi) », is used as an adjective.

### [G] THE INTERROGATIVE PRONOUN.

**582.** The following are the forms for the masculine and feminine :

	Old Singular	Old Plural > Honorific	Old Plural	Double Plural = Honorific
Nominative	কে kē [adj.] কোন् kōng]	কেহ් kehā, কিনি kini	কা(শা)রা kā- (hā)-rā	কা(শা) রা kā(hā)-rā
Oblique	কা(শা) kā(hā)-	কা(শা) kā(hā)-	কা শির্গ kā- (hā)dig&-, কা শা দের kā(hā)dér&	কা(শা) দিগ্বি kā(hā)- dig&-, কা শা দের kā(hā)dér& (কেনাদের kēnādér&)

The neuter has a separate form :

Singular Nominative कि, की ki, kī (adj. = कोन् kōn̪) ;

Oblique किं ki, किसे kisē (from base < kīsa->) ;

Genitive किसेर kisēr̪ ;

Plural : किसव, कि-सकल, कोन्-गुला ki-sāb̪, ki-sākāl̪, kōn̪-gulā, etc.

**583.** The nominative के < kē > is the form which characterises all Eastern speeches, Eastern Hindi included. Assamese also shows < kē > instead of the expected < \*ki > < Māgadhī < kē >, and Oriyā also has < kē >. The neuter < ki >, from common OIA. < kim > (not < kad >, corresponding to < tad, ētad, yad >), is a characteristic form, and this apparently brought about the introduction of < kē > for the masculine.

कोन् < kōn̪ > was originally indefinite, and in its emphatic form कोन, कोनो, कोन० < kōn̪, kōnō, kōn̪ō < kōn̪-hō > the indefinite sense still survives. The pronoun is found as < kaun̪, kōn̪, kaun, kōn > in most NIA., and has its parallel in the other bases, like < taun̪, jaun >. It occurs in Western Apabhrāṇa as < kavaṇu, kavaṇa->. Hoernle derives < kavaṇu > from an Apabhrāṇa quantitative pronoun < kēvaḍu > ('Gawlian Grammar,' p. 291): but this is inadmissible. Pischel traces it to an OIA. diminutive or pejorative base < kava- > (from the old pronoun < ka- >, and from < ku- > *bud* as well) which we find in Skt. forms like < kava-patha > *bud way*, < kavōṣṇa > *slightly warm* ('Grammatik der Pkt.-Sprachen,' § 428). The < -ṇ- > remains obscure still. But < kaun̪, jaun̪, taun̪ > apparently form one group: and there is no pejorative sense in this indefinite form. It seems likely that the source of the < -vāṇa, -\*vūṇa, -un > forms is the OIA. indeclinable < punah >: < kah punah >, apparently regarded as one group from Early MIA. times, < \*ka-puna- > Second and Late MIA. < \*kavuna- > kavaṇa >. It is a noteworthy fact that < kaun̪, kōn > is found only in the nominative in the Northern Indian languages, although the oblique use is found in Gujarātī and Marāthī: thus the genitive of कोन् < kōn̪ > in Bengali is कार < kār̪ >, in Hindostānī < kis-kā >, but in Gujarātī it is < kōn̪-nō > and in Marāthī < kōn̪-cā >. In the ŠKK., the forms are कोण, कोण < kāuṇa, kōn̪a >, beside कोमण < kōmāṇa = kōwāṇa >, and emphatic कोणोहो, कोहो

• kōnō-hō, kōnhō ». It seems that in the Early MB. of the ŠKK. there was a confusion between the uncontracted কমণ  $\leftarrow$  kāmāṇā, kāmāṇā = kāwāṇā » and the interrogative pronominal adjective কেনন, কেমন্ত, কেমত  $\leftarrow$  kē-māṇā, kē-māntā, kē-mātā » (see *infra*). Early Middle Bengali কোন  $\leftarrow$  kāṇā » has its counterpart in Oriyā  $\leftarrow$  kāṇā-si » *only, some*; and the equivalent of  $\leftarrow$  \*kāwāṇā » of MB. (in MB. it is always an adjective) in Oriyā is  $\leftarrow$  kāṇā, kāṇā » = *what*.

584. The oblique  $\leftarrow$  kā(hā)- » is based on the  $\leftarrow$  -ā(ha) » genitive; and the honorific is the genitive plural, MIA.  $\leftarrow$  kāna(m) » for OIA.  $\leftarrow$  kēśām », with vocalism from the nominative.

The neuter base কিস  $\leftarrow$  kisa- » goes back to the Early MIA. genitive  $\leftarrow$  kissa » (which is already present in Pali) or  $\leftarrow$  kiśā » (as in Māqadhbī (= OIA. kasya)). The  $\leftarrow$  -i- » vowel seems to have been due to the influence of the neuter base  $\leftarrow$  ki- » ( $\leftarrow$ \*kisya > kissa, kiśā »: cf. Pali locative  $\leftarrow$  ki-smiṁ, ki-mhi »), beside  $\leftarrow$  ka-smiṁ, ka-mhi »). During the Early MIA. period, this form extended its sense to the ablative (in addition to the dative), and became stereotyped into the neuter nominative as well, in the sense of *what*: and  $\leftarrow$  kissa, kiśā > kīsa, kīśā » was loosely compounded with a following noun (especially in the ablative), in Second MIA. (cf. Pischel, § 428). It seems that on the analogy of  $\leftarrow$  kissa », other forms like  $\leftarrow$ \*tissa, \*ētissa, \*yissa » etc. were built up, which ultimately gave the oblique singular forms of the pronouns in Western Hindi and Panjabī. Of these, the base  $\leftarrow$  kīsa- » alone occurs in Standard Bengali: it is found in OB. independently, without an affix: e.g., Caryā 6,  $\leftarrow$  acchahū kīsa » *in what am I*; Caryā 9,  $\leftarrow$  kāhērē kīṣa (= kīsa) bhañi māi dibi piricchā » =  $\leftarrow$  kasya kim uktvā mayā siddhāntah pradātavyah » as the Commentary explains; ibid,  $\leftarrow$  Lui bhañai, bhāiba (= bhāwiba) kīṣ (= kīsa) » =  $\leftarrow$  Lūyī-pādah siddhācaryō hi vadati, mayā .. kim bhāvyam ». In the ŠKK., we have post-positional forms, like কিসক, কিসকে, কিস (also কৈস), কিসের, কিসেরে  $\leftarrow$  kīsā-kā, kīsā-kē, kīsē (kīsē), kīsērā, kīsērē ». The base form occurs in Oriyā as  $\leftarrow$  kīsā »; Assamese has it as  $\leftarrow$  kībā » (< kīsā), neuter pronoun (beside a neuter  $\leftarrow$  jīhā » <  $\leftarrow$  jīsā=yasya »). The Bibāṛī dialects do not, however, show the  $\leftarrow$  kīsa » base. The oblique of  $\leftarrow$  ki » is  $\leftarrow$  kīsā- » in NB.

but in eMB. we have also the oblique use of « ki » (e.g., কিতে « ki-kē » in the SKK).

585. The honorific is based on MIA. « kāṇa(m) = kēśām » : the genitive কাহান « kāhā-nā » is found in MB. In Maithili, it is the honorific base, « kan-ikṣ ». The « -n- » oblique occurs as usual in other NIA. as well.

586. The locative কহি, কহি « kahī, kahi » of OB., and MB., is found in NB. in the form কহি « kāi » where : in the Standard Coll., কহি « kāi » is used in response to a statement or question, but in E. Bengali, it is a general word for where. The use of « kāhi » as the oblique base is found in MB. : e.g., কহির « kāhi-rā » of where = whose ; also in Oriyā, e.g., « kāhi-rā ». The other locative adverb কথি « kāthi » is found in MB., also as an oblique base : e.g., (SKK). কথির « kāthi-rā » whose. As « kāthi », it also forms the locative base of the neuter in the Bihāri dialects (especially Maithili).

In NB. there is the form কর « kāy » (in the standard language also as ক « kā ») how many, which is from OIA. « kati ».

587. The forms in OB. :

Nominative indefinite masculine « kē-hō » (Caryā 18) ; neuter « kāhi kariaī » what is done (Caryā 1 : locative-oblique used for nominative, < « kāha ») ;

Accusative : neuter « kīṣa, kīṣ=kīṣa » (Caryās 6, 29) ; « kāh-ē » (Caryā 6) ; « kā » (Caryā 39) :

Genitive : fem. « kāhari » (Caryā 10) ;

Dative : « kāhērē » (Caryā 29) ;

Locative : « kahī » (Caryās 7, 31, 49) ; « kāhi » (= « kāha » + locative affix : Caryā 43).

As an interrogative particle, « ki » occurs in OB. in some instances, e.g., Caryā 33 « duhila dudhu ki bēṇtē śāmāī » (see *supra*, p. 263) ; « bhāga (= bhāṅga) tarāṅga ki sōsāī sāara » can broken breakers suck up the sea ? (Caryā 42). An archaic « kiṁ » is found in some instances (22, 34, 41). Besides there are the common Western forms—nominative « kō » (16, 29), indefinite « kōē, kōi » (as in 42, 43), genitive « kāsu » (23).

The dialectal forms do not call for any special comment.

[H] THE INDEFINITE PRONOUN.

588. কেহো, কেহ, কেট  $\leftarrow$  kēhō, kēhā, kēu  $\rightarrow$  occurs only in the singular." It is a nominative Māgadhi form, coming from OIA.  $\leftarrow$  kāḥ api  $\rightarrow$  Māgadhi  $\leftarrow$ \*kē $\pi$   $\rightarrow$ \*kē vi  $>$ \*kē-va  $>$ \*kē-wa, kē-o  $\rightarrow$  $\leftarrow$  kēha, kēhō  $\rightarrow$  (with influence from the emphatic particle  $\leftarrow$  hu, hō  $\rightarrow$ ): cf. Oriyā  $\leftarrow$  kēi  $\rightarrow$  (= \*kēvi). Assamese has  $\leftarrow$  kēo, kēo  $\rightarrow$ , Magahī  $\leftarrow$  kēū  $\rightarrow$ , Maithili  $\leftarrow$  kēo  $\rightarrow$ , Bhōjpuriyā  $\leftarrow$  kēhū, kēū  $\rightarrow$ ; Eastern Hindi as a Prācyā speech shows the  $\leftarrow$  ē  $\rightarrow$  vowel:  $\leftarrow$  kēū, kēhū  $\rightarrow$ . Western Hindi has the proper Saurasēnī  $\leftarrow$  kōi (< kō'vi, kō'pi  $\rightarrow$ ). The word  $\leftarrow$  kēhō  $\rightarrow$  occurs in Caryā 18 :  $\leftarrow$  kēhō kēhō tōhōrē biruā bōlāi  $\rightarrow$  some call thee deformed.

The oblique form of  $\leftarrow$  kēhō, kēu  $\rightarrow$  is  $\leftarrow$  kā(ha)-  $\rightarrow$  or  $\leftarrow$  kā(hā)-  $\rightarrow$  + case-affix or post-position +  $\leftarrow$  hō, ō  $\rightarrow$ , or  $\leftarrow$  kā(ha)-, kā(hā)-  $\rightarrow$  +  $\leftarrow$  hō, ō  $\rightarrow$  + case-affix or post-position: e.g.,  $\leftarrow$  kāhā-+ -rā + ō  $\rightarrow$  MB. (SKK.) কাহু  $\leftarrow$  kārhō, kāhrō  $\rightarrow$ , NB. কাৰো, কাৰু  $\leftarrow$  kārō, kāru  $\rightarrow$  whose;  $\leftarrow$  kāhā-+ ō + -kē  $\rightarrow$  MB. কাহোকে  $\leftarrow$  kāhōkē  $\rightarrow$  NB. কাউকে  $\leftarrow$  kāukē  $\rightarrow$ , beside literary কাহাকে and  $\leftarrow$  kāhā-+ -kē + ō  $\rightarrow$  colloquial কাকেও  $\leftarrow$  kākēō  $\rightarrow$  (and SKK. কাখে  $\leftarrow$  kākhō  $\rightarrow$  <  $\leftarrow$  kāhā-+ -kā + hō  $\rightarrow$ ) whom. For the plural forms, the  $\leftarrow$  -ō, -hō  $\rightarrow$  comes at the end of the inflected word: কাৰাৱ  $\leftarrow$  kārā-ō  $\rightarrow$ , কাৰদেৱ  $\leftarrow$  kādērā-ō  $\rightarrow$ , etc. The NB. genitive has a peculiar form in the colloquial, কাৰু  $\leftarrow$  kārurā  $\rightarrow$  (either =  $\leftarrow$  kā-r-u  $\rightarrow$  + additional genitive  $\leftarrow$  -rā  $\rightarrow$ ; or =  $\leftarrow$  kā(hā)-+ ō + -rā  $\rightarrow$  কাউৱ  $\leftarrow$  kā-u-rā  $\rightarrow$ , with euphonic  $\leftarrow$  -r-  $\rightarrow$ :  $\leftarrow$  kā-r-u-rā  $\rightarrow$ ).

589. The neuter indefinite is কিছু  $\leftarrow$  kichu  $\rightarrow$  which is found in other Magadhan (in Oriyā, however, as  $\leftarrow$  kichi  $\rightarrow$ ). The OIA.  $\leftarrow$  kim + -cid  $\rightarrow$  occurs as  $\leftarrow$  kiñchi, kiebi  $\rightarrow$  (= kicchi) in the Central and Eastern inscriptions of Aśoka, with the aspirate  $\leftarrow$  eh  $\rightarrow$ , as opposed to stop  $\leftarrow$  kiñci  $\rightarrow$  of the South-West (Girnar). This aspiration, so old, is peculiar: was it due to the influence of a possible masculine indefinite  $\leftarrow$ \*kaechi < kaścid  $\rightarrow$ ? The NIA.  $\leftarrow$  kichu  $\rightarrow$  also has the emphatic particle  $\leftarrow$  hu  $\rightarrow$ :  $\leftarrow$  kiñchi-hu  $\rightarrow$  (or  $\leftarrow$  kiñci-hu  $\rightarrow$ ?  $\rightarrow$   $\leftarrow$  kichu  $\rightarrow$ . (cf. Hoernle, 'Gaudian Grammar,' § 465). The Oriyā  $\leftarrow$  kichi  $\rightarrow$  may represent the emphatic  $\leftarrow$  hi  $\rightarrow$  (< \*kiñchi = kiñci + hi). The loss of nasalisation is very ancient. In Western Hindi, the form is

◀ kachu, kuch ▶ (= ◀ \*kam ▶ used as neuter, + -cid, + hu=khu, khalu ▶ ?), also ◀ kichū ▶.

**590.** The relative যে ▶ jē ▶, যা ▶ jā ▶ is combined with কেহ কেউ, ▶ kēhā, kēu ▶ and কিছু ▶ kichu ▶ respectively to mean *whosoever, whatsoever*. This combination would seem to be recent in Bengali. The earlier way would be by periphrasis: e.g., যে হোটক সে হোটক ▶ jē hōukā sē hōukā ▶ = NB. যে কেউ শেক ▶ jē-kēu hōkā ▶ *whoever it may be*; or by adding the emphatic particle: e.g., যেউ ▶ jē-u ▶, যেহো ▶ jē-hō ▶, as in the ŠKK.

### [I] THE REFLEXIVE AND HONORIFIC PRONOUN.

**591.** OIA. ◀ ātman ▶ *self* changed to ◀ atta- ▶ in Early MIA. (Udīcā, Madhya-dēśa, Prācyā). From ◀ atta- ▶ we would expect a neo-Māgadhi ◀ \*āta ▶: but this ◀ atta ▶, in Māgadhi as well as Ardha-māgadhi and Śaurasēnī, appears to have been overlaid by a cognate form ◀ appa- ▶ from South-Western MIA. (cf. ◀ atpā ▶ in Aśokan Girnar: *ante*, p. 508). Pali shows only the basic Midland ◀ atta- ▶; and ◀ atta- ▶ is continued in the Second MIA. in Māgadhi and the rest, but by the Second MIA. period, the South-Western form established itself in the North and the East. The Second MIA. forms were: singular nominative ◀ appā ▶, instrumental ◀ appanā ▶, genitives ◀ appanō ▶, pl. ◀ appāna ▶, besides other ones (cf. Pischel, § 401). The nasal of MIA. has been preserved in NIA. in most cases, owing no doubt, to the base being regarded as being, in a vague way, ◀ appaṇa- ▶.

In the Caryās, we have the following instances of the reflexive use of ◀ ātman ▶ apā, āpaṇa, āpaṇā ▶:

3 : ◀ āīla garāhaka apanē bahiā ▶

*The customer came, journeying all by himself;*

6 : ◀ apanā māṇsē harinā bairī ▶

*Because of its own flesh, the deer is a foe;*

22 : ◀ apanē raci raci bhava-nirvāṇā,

mic'hē lōa bandhāvāē apanā ▶

*Creating again and again being and extinction by himself,*

*For naught man binds himself ;*

- 31 : « na jāṇami apā kahī gaī paīṭhā »  
*I know not where the self having gone has entered;*
- 32 : « apanē apā bujha tu nia-maya »  
*By thyself understand thou in thy own mind;*
- 39 : « disai para-apyanā (= appanā) »  
*Other and self are seen.*

In the Caryās, as can be seen from the above instances, « apā (= āpā) » is the nominative, « apanē » instrumental, « apanā » genitive and accusative. The O.B. nominative « apā (= āpā) » is an extended form of « \*āpa » = IMIA. « \*āppā », Second and Early MIA. « āppā » = OIA. « ātmā ». The oblique forms are regular O.B. derivations of the MIA. « appaṇā » stem. The O.B. nominative « āpā, apā (= \*āpā) » is now rather obsolete in NB., the « -n- » oblique having encroached upon the realm of the nominative: « āpā », without « -n- », meaning *self*, is preserved in the nominative in Oriyā (āpē). Instances of the old form আপ « āpā » *self*, however, are found in Bengali: e.g., আপ ভালো তো জগত ভালো « āpā bhālō tō jāgatāt bhālō » *if self is good, the world also is good* (cf. Hindī. « āp bhalā tō jag bhalā »); আপ চাইতে পরের উপর দারাদ « āpā caitē pārērā upārā dārād » *anxiety for another more than for oneself*; cf. also আপি আপ « āpi-āpi » *all by oneself*, in baby language (cf. Oriyā « āpē-āpē »). But in Eastern and Western Hindī, it has been extended to mean the honorific pronoun as well: e.g., Awadhī, both nominative and oblique, singular « āpu » plural « āp » = *your honour*, beside nominative « āpu », genitive « āpan », oblique « apanē » = *self, of self*; Hindūstānī nominative and oblique singular « āp » *your honour, his honour*, plural « āp-lōg, āp-lōgō- », beside reflexive « āp », oblique « apnē », genitive « apnā, apnē, apnī ».

**592.** The extension of the sense from the Reflexive to the Honorific (Second) Personal Pronoun is a recent thing in NIA. It is absent in MIA. It is not found in O.B. and eMB., nor in the older literatures in the other NIA. tongues. In Early Bengali documents (e.g., in the letter of c. 1555 A.C. from the Kōc king of North Bengal to the Ahom king of Assam, *supra*, p. 828), তুমি, তোমার « tumi, tōmārā » are used as respectful or honorific forms, not আপনি « āpāni » as in NB. or « āpuni » as in Assamese.

The Bihārī dialects employed, and even now employ, words like « āhā, ahā, ahāf ; ais ; raur ; rauwā » (see *infra*), and Eastern Hindī also employed « raur », for the honorific of the 2nd person : these words correspond to the NB. মোশাই, মশায়, মহাশয় « mōśāi, māśāy়, māhāśāy় » and the Urdū « janāb, huzūr ». The use of the reflexive for the honorific second person is not an Eastern NIA. innovation : nor is it characteristic of the North-Western, South-Western, and Southern NIA. : e.g., Panjābī (Eastern and Western) uses « tus(s)ī », the ordinary plural, for the honorific, and « āp » is an imposition from Hindostānī ; so Sindhī has « tavhī » (? = \*tusī < \*tussa- < \*tuṣma-, yuṣma- ), and the reflexive « pāṇa » (= appaṇa < ātman- ) is used as an honorific, as in the genitive « pāḥa-jō », to mean *yours* as well as *yours and mine* ; and in some of the dialects of Rājasthānī, and in Gujarātī, the reflexive base « āpā, āpan- » is used, not to mean *you*, but *you and we* (Gujarātī, however, has « āp » as an honorific second person = *your honour*, declined like a regular noun, but in the plural and in the second person : this use of « āp » is possibly the result of Brajbhākhā or Hindostānī influence through the Rājasthānī dialects : to denote *self*, New Gujarātī has the base « pōta- » < « \*pōpa » < OWR. « apōpa » < Apabhrāṇśa « \*appahu-appa- » : cf. Tessitori, 'Grammar of OWR.', § 92) ; and Marāṭhī employs the base « āpan » as an honorific for all the three persons, as well as to denote the inclusive personal pronoun (1st and 2nd persons), like Rājasthānī and Gujarātī. Sinhalese partly agrees with the South-Western speeches in using the form « api, apa » (appa-) for the plural of the 1st personal pronoun, only it does not include the 2nd person. (The reflexive in Sinhalese is « tamā », a *sts.* form from « ātman » : Geiger, 'Litteratur und Sprache der Sinhalesen,' pp. 67, 69). Honorific use of the reflexive seems to be absent in the Himalayan (Pahārī) speeches ; and it is not found in Gipsy dialects outside India.

The Eastern, Northern, Western, South-Western, and Southern NIA. speeches thus do not seem to have developed in themselves the extension of the Reflexive for the Honorific of a special pronoun : in the last two groups, the reflexive was used as an inclusive 1st personal pronoun. On the other hand, we find that the Midland speech, Western Hindī, uses the reflexive

base for the honorific of both the 2nd and 3rd persons. It is exceedingly likely that the Eastern and other speeches borrowed this use of the reflexive from the Midland dialects, and the Magadhan speeches especially restricted it to the 2nd person only, as they possessed an honorific form for the third. Probably this borrowing is not older than two centuries from now.

593. The forms for the base **আপন** «āpān-» in Bengali are :

	OB.	Early MB. (SKK.)	NB. (Standard Coll.)
Nom.	apā (āpā), āpanā, appanā	আপনে, আপুণী, আপুণি <b>āpānē</b> , āpūni, -I	আপনি <b>āpāni</b> , আপুনি <b>āpuni</b>
Acc.	āpanā	আপনে, আপনাক, আপনা, আপন <b>āpānē</b> , <b>āpānā-k</b> , <b>āpānā</b> , <b>āpānā</b>	... ... ...
Ins.	āpanē	(as Nominative)	আপনি <b>āpāni</b>
Gen.	āpanā	আপন, আপনা, আপনার <b>āpānā</b> , <b>āpānā</b> , <b>āpānā-rā</b>	আপন, আপনার, আপন- কার <b>āpānā</b> , <b>āpānā-rā</b> , <b>āpānā-kārā</b>
Dative	...	(as Accusative)	... ... ...
Oblique base	...	আপনা <b>āpānā-</b>	আপনা <b>āpānā-</b> .

The nominative «āpāni» as an honorific has its final vowel through analogy of «tini, ini, uni, jini» etc. : otherwise we would expect «āpānē», and this form does occur dialectally. The plural is made in NB. by adding «-rā, -digā, -dērā» etc. to the oblique, as in the other pronouns. There is a base form, e.g., আপন পর «āpānā-pārā» *self and others*. The genitive আপন «āpānā» (beside «āpānā») has the definitive «-ā».

594. There is the form আপস «āpās» used in the plural, = *among themselves, mutually*, which is found also in W. Hindi and other NIA. The form is obscure, but it can be from a MIA. genitive «\*appassa» (< \*ātma-sya = ātmānaḥ), as Beames suggested (Comp. Grammar, II, pp. 330-331). It is used in Bengali in the locative as well as the genitive, but in a locative expression only : e.g., আপসে «āpāsē», আপসের মধ্যে «āpāsērā mādhyē» *among themselves (ourselves, yourselves)*. Can it be affiliated to a MIA. locative plural «appasu = ātmasu», as a solitary survival of a loc. pl. form in NIA. ?

595. A blend of « āpa » and the Skt. « ātma- », pronounced [āt̪o], has given the M.B. and N.B. আপ্ত « āptā » *of self*, which has quite a currency in some compounds, e.g., আপ্ত-জন « āptā-jan̪ » *relations*, আপ্ত-স্বীয় « āptā-sukhī » *seeing to one's own happiness*, আপ্ত-নারী « āptā-nārī » *one's own wife*, আপ্ত-গরজে < গরজিয়া « āptā-gōrjē < -gārjā-iyā » *selfish* (Perso-Arabic *garz*, cf. Pers. xv ud-garzī), etc.

596. Among dialectal forms for this pronoun may be noted only the S.E. Vanga (Chittagong) আঁওনে, আঁওনা « āñōnē, āñōnā », or আঁনে, আঁনা « āñē, āñā », with rather long « ā », which show the nasalisation of the NIA. « -p- » : « -p- > « -w- » > « ū ».

597. The *ts.* word নিজ « nijā, nija » is used in N.B. to denote *self*. It is found as a *tbh.* « nia » in the Caryās in some 3 places, but the *ts.* « nijā » is established in the ŠKK. (over a dozen times).

598. The Bihārī forms « rāur-, raur ; rāuwā ; āis-, ais- ; āhā-, ahā- » may be noted. These are used as honorific terms of address, and also as equivalents of *your honour*. « rāur » is found in Eastern Hindi, and is very common in Bhōjpuriyā : it is from a MIA. « lāūla », occurring, e.g., in the ‘Prabōdha-candrōdaya’ ; the source is an OIA. « rāja-kula- » or « rāja-kulya- » *royal* (cf. Hoernle, ‘Gaudian Grammar,’ § 447) : the Western equivalent of this word is « rāwal ». The word « rāuwā » is only an extended form of « rāū », which is from « rāja- ». The form « āis-, ais- » occurs in dialectal Maithili ; the source may be a form like « ati-sa » *pre-eminent*, or « atiśā » *supreme lord* (cf. « Atiśā », or « Atiśā », the title of Dipaṅkara Śrī-jñāna, the Buddhist scholar and saint of Bengal, c. 1000 A.C., whose original name was Candra-garbha : Sarat Chandra Dās, ‘Indian Pandits in the Land of Snow,’ Calcutta, 1893, pp. 50, 51, 60) : this can be compared with the use of « mahāśaya » in Bengali. The source of « āhā, ahā » is obscure : « ahā- » is found in Early or literary Maithili, as nominative or vocative, and « ahā-, ahā́- » are the oblique bases, « -ā, -ā́ » of which are the genitive and instrumental plural forms. Connexion with the OIA. « bhavān », MIA, « bhavañ » presents some phonetic difficulties. The form « ahā, ahā́, ahā́- » is used in Maithili not for superiors

in age or status, but among equals : and it is very likely that the OIA. « āyuṣmān » > MIA. « āyasmā » (as in Pali) is the source : this would give an Apabhrañśa « \*āamha, \*āmha, āhā ». There is no form corresponding to « ābā, āhāj, āhā- ; ahā, ahaī, ahā- » in Bengali, but it is possible that the personal affix « -ēhē, -ē » for the second person of the verb is connected with it (see *infra*, under Verb : ‘ Personal Affixes ’).

### [J] PRONOMINAL DERIVATIVES, ADJECTIVE AND ADVERB.

#### [I] Adjectives of Quality or Manner in মত- « -māṭṭa », মন « -māṇḍa ».

**599.** These are : তেমত, তেমন « tē-māṭṭa, tē-māṇḍa » *in that way, like that* ; এমত, এমন « ē-māṭṭa, ē-māṇḍa » *in this way, like this* ; ওমত, অমত, অমন « ō-māṭṭa, ḡ-māṭṭa, ḡ-māṇḍa » *like that, in that way* ; যেমত, যেমন « jē-māṭṭa, jē-māṇḍa » *like that, in the way that* ; কেমত, কেমন « kē-māṭṭa, kē-māṇḍa » *like what ? in what way ?*. The affix is added apparently to the nominative bases of the various pronouns : for the 3rd personal pronoun the oblique base has influenced the form, though we have সেমত « sē-māṭṭa » which is rather rare. For the remote demonstrative the form ৱ- « ū- » has been broadened to « ḡ- ». The « -m- » in this affix is often pronounced as [v̑].

The source of « -māṭṭa » in NB. and MB. is OB. « -manta » < OIA. « -mant-, -vant- » : cf. Vedic forms implying likeness or size, like « ētā-vant-, tā-vant- » *so great*, « yā-vant- » *as*, « i-vant- » *so great*, « ki-vant- » *how far*, and Vedic and Sanskrit quantitatives like « i-yat, ki-yat » *so much, how much*. The « -manta » affix in this employ seems to be peculiar to the eastern Magadhan speeches only. Oriyā, as being more archaic than Bengali-Assamese, preserves the full form in the adjectives « tē-mānta, ē-mānta, jē-mānta, kē-mānta ». The group « -nt- » changed to « -t- » in Bengali (see *supra*, p. 502). The Oriyā adverbs « ti-māti, ē-māti, ji-māti, ki-māti » also show the « -t- < -nt- ».

The « -māṇḍa » forms of Bengali and Assamese are irregular. It seems that quite early in the OB. period, when the full form « -manta » was current, through contamination with the pronominal adjectives of quality in « -hana » (see *infra*, p. 853), « -manta » came to have a variant « \* -mana, \* -maṇa ». It is already well-established in the ŠKK., so much

so that the proper « -mātā » affix is much restricted, কেমণে, কেমনে, কেমণ, কিমনে « kē-mānē, kē-mānē, kē-mānā, ki-mānē », for instance, occurring some 20 times, and কেমতে « kē-mātē » only twice. In NB., the « -t- » forms are archaic, even for the « sādhu-bhāṣā », and the colloquial knows only the « -n- » forms.

Bengali has also a form মতন « mātānā » *like, similar to* (see next para), which is a blend of « -mātā » and « -mānā ».

This affix « -mātā, -mānā, mātānā » quite early came to be regarded as a separate word in Bengali and Assamese, through confusion with the Skt. « mata, manas < √man > : e.g., আমাৰ মত(ন) « āmār় mātā(n) » *like me*, তোমাৰ মত(ন) « tōmār় mātā(n) » *like you*, পুৱানো মত(ন) « purānō mātā(n) » *like old, oldish*. As a separate word, মত « mātā » is now frequently written মতো « mātō » (< « \*-mantāwa, manta + ka »), following the pronunciation. The independent use of « mātā, mānā » is fairly common in the ŠKK., where it generally occurs after and strengthens the pronominal adjective of quality in « -hānā, -hnā, -nā » : e.g., কেন মণে, মনে, মতে « kēnā + mānē, mānā, mātē » *in what way*; এহি মতে « ēhi mātē » *in this way*; যেহ মনে « jēnhā mānē » *in such a way that*; NB. poetic হেন মতে « hēnā mātē » *in this way*.

Early Assamese had the « mātā, mānā » forms : e.g., Śaṅkara-dēva, « hr̥di-sthitā huā tumi jēnā kārābāhā swāmi, Hṛṣikēśā, kāribā tēmānā » *remaining in my heart, just as you will make me do, Lord Hṛṣikēśa, so shall I do* (Dēvēśwar Chalibā, ‘Asamīyā Sāhityar Burañji,’ Jorhat, Saka 1833, p. 123); « cāri dinā sēhi mātē thākiyā Iśwārā » *in that way, the Lord, staying for four days* (ibid., p. 133). Early Assamese also has forms like « jēntē, tēntē » etc. = « jēwāntē, tēwāntē < jēmāntē, tēmāntē ». In Modern Assamese, the full « -m- » or the altered « -ñ- » forms no longer occur, but contracted ones, « ēnē, jēnē » < « \*ēmānē, jēmānē », pronominal adverbs, which seem to have merged into the « -hānā, -hēnā » forms (see *infra*).

With addition of the instrumental « -ē » we have corresponding adverbs : এমতে, এমনে « ēmātē, ēmānē » [əmote, əmone] *in this way*, কেমনে « kēmānē » [kəmone] *how?* etc.; but the adverbial use of the simple « mātā, mānā », without the « -ē » affix, is also found. There is in NB. also a locative use of the « -mān-ē » forms, in which the « -ē » is certainly the locative affix :

কমনে « kāmñē » *where?*, যমনে « jāmñē, jēmñē » *in the direction that*, এমনে « ēmñē » *in this direction*, etc. (the forms « kā- » etc., rather than « kē- » etc., are probably due to the analogy of কই « kai » etc., for which see *supra*. Contracted forms of these adverbs of direction are found in dialectal Bengali: e.g., EB. কনে « kānē » (< kāōnē, kāññē, kāmñē); এনে, এয়ানে « ēnē, ēānē » (< ēmānē) etc. Oriyā also has similar forms—« ēnē, tēnē » etc.

[II] Adjectives and Adverbs of Quality in হন, হেন, হ, ন « -hānā > -hēnā > -hnā > -nā ».

**600.** NB. has the following: হেন, যেন, কেন « hēnā, jēnā, kēnā », dialectally ঘেনে, কেমে « jēnē, kēnē » (with instrumental « -ē » affix). Besides there is a rare তেন « tēnā ». Of these, হেন « hēnā » alone is used as an adjective: e.g., হেন কাজ « hēnā kāj » *such work*; cf. also যেন তেন উপায়ে « jēnā tēnā upāyē » *in any way possible, by some means or other*. কেন, কেমে « kēnā, kēnē » simply means *why* < *in what way*, and যেন, যেমে jēnā, jēnē » is also a conjunction = *so that, in order that*.

In eMB. (ŚKK.), the corresponding forms were (এ)হেন, তেহেন or তেহ, যেহেন or যেহ, কেহেন or কেহ « (ē)-hēnā ; tē-hēnā, tēnā ; jē-hēnā, jēnā ; kē-hēnā, kēnā », and these were adjectives as well as adverbs—the instrumental « -ē » affix being commonly used for the adverb: e.g., কি নাম তাহার, কেহেন তার রূপ « ki nāmā tābārā, kēhēnā tārā rūpā » *what is her name, what is her beauty like* (ŚKK., p. 11). In NB., the adjectives in « -mātā, -mānā » have practically ousted the « -hēnā, -hnā, -nā » forms from adjectival use.

The eMB. « -hēnā » forms correspond to the Maithili « ē-han, tē-han, kē-han » (< « \*-hana »: the Bengali change of « \*-hā- » to « -hē- » is due to the influence of the preceding bases « ē-, jē-, kē-, tē- »).

The Māgadhi Apabhrāṇa source of the Maithili and Bengali forms would be « \*aīhana-, (or ēīhana-?), \*taīhana-, \*jaīhana-, \*kaiīhana- »; which would represent Second MIA. (Māgadhi) « \*eāiśāna-, \*taīśāna-, \*jaīśāna-, \*kaiśāna- » (see *supra*, pp. 95, 555). OIA. has pronominal adjectives in « -dṛṣā »—« tādṛṣā-, ētādṛṣā-, yādṛṣā-, kīdṛṣā- »

etc. This « -dṛśa- » affix became « -disa-, -diśa- », and then « -isa-, -iśa- » through loss of interior « -d- » in MIA. With a pleonastic adjectival affix « -na » (cf. Whitney, 'Sanskrit Grammar,' §§ 1223 g, 1245 f), this affix was extended, either in dialectal OIA. or in MIA., to give « yaīśāṇa (jaīśāṇa), tāiśāṇa (taīśāṇa) » etc., beside « jaīsa-, taīsa- » etc. The OIA. vocalism of the pronominal bases has been regularised in MIA., through what process we do not know. The change of the sibilant to « -h- » in Maithili and Bengali is peculiar and unexplained. Early Oriyā shows forms like « jē-sāṇa », and Old Bengali like « aīśāṇa ». The « -s- » forms occur in Magahi and Bhōjpuriyā, and in E. Hindī and W. Hindī, and in most forms of NIA. besides. The presence in OB. of the sibilant in these adjectives (as in « aīśāṇa, kāīsē, jaīsō, tāiśō, aīsa, kāīsē » in the Caryās) is certainly due to Western Apabhrañśa influence (see *supra*, p. 115). Similarly in Early Maithili we have the Western « -s- » forms side by side with the native « -h- » ones. Through the Brajabuli dialect the « -s- » forms were once more introduced into Bengal through W. Hindī influence, and from the 16th century onwards, the « -s- » was written ছ « ch » : e.g., যেছন « yāichāṇa = jaīśāṇa », অইছন ত্রিছন « śāichāṇa = śāiśāṇa », কৈছে « kāichē » = Hind. « kāīsē », কৈছন « kāichāṇa = kāiśāṇa ». The forms without « -n- », corresponding to the Western Hindī « aīsā, aīśi ; aīsē » etc., do not seem to occur in East Magadhan.

In the ŠKK. occurs the correlatives জৈসাধে, তেসাধে « jāiśāñē, tēśāñē », as in জৈসাধে রতি জাগৰো, তেসাধে কাহ আগিরো « jāiśāñē rāti jāñābō, tēśāñē Kānhā āñibō » when I shall understand love's sport, then I shall bring Kṛṣṇa (p. 21). These correspond with Early Asamese « jāiśāñi » (ŠKK., Comm., p. 447) : and they are Saurasēñi « -s- » forms borrowed in OB. which persisted with the earlier literary tradition in MB. and Early Assamese : probably some sort of confusion with a word like সময় « samaya = sañwaya » also existed here.

### [III] Nouns and Adjectives of Quantity in ত « -tā » or তে « -tō ».

**601.** They are তত (তেত), এত, অত, যত (যেত), কত < \*কেত < tātā, (tētā [tætə]) ; ētā ; atā ; jātā (jētā = [jɪʒætə]) ; kātā < \*kētā >, also ততেক,

এতেক, [অতেক], যতেক, কতেক < tātēk<sup>ɸ</sup>, ētēk<sup>ɸ</sup>, ḥtēk<sup>ɸ</sup>, jātēk<sup>ɸ</sup>, kātēk<sup>ɸ</sup> >, with pleonastic < -ēk<sup>ɸ</sup> > affix, as in Maithili. These agree with Oriyā < tētē, ētē, sētē, jētē, kētē >, and Assamese < tētē(k), ētē(k), kētē(k) > etc. Early Assamese also had forms in < -tā, -tō > like Bengali. Corresponding forms occurs in other NIA. speeches : e.g., Hindostānī < titnā, tittā ; itnā, ittā ; utnā, uttā ; jitnā, jittā ; kitnā, kittā >.

As sources of these in MIA., we have in Western Apabhrāṇa < tēttiu, ēttiu, jēttiu, kēttiu >, Second MIA. < tēttia, ēttia, jēttia, kēttia >, and First MIA. (Pali) < tattaka, ēttaka, kittaka >. These MIA. forms are derived from, or are connected with, Vedic quantitatives in < -yant- >, like < i-yant- > so much, < ki-yant- > how much. It seems that formations made up of the pronominal base + the affix < -yant- (-yat-) > + an adjectival < -tya, -tiya > (cf. Pischel, 'Grammatik der Pkt.-Sprachen,' § 153) gave in Early MIA. forms<sup>1</sup> like < i-yatta-, \*a-yatta- (\*i-yat-tiya, \*a-yat-tiya-) ; \*ki-yatta- (\* ki-yat-tiya-) ; \*ya-yatta- (\* ya-yat-tiya-) > etc., which were regularly altered into the Pali (with a pleonastic < -ka > as in < ētta-ka, kitta-ka >), Prakrit and Apabhraṇa forms. The source-forms of Bengali would seem not to have had the < -ia > ending as in Western Apabhrāṇa (< ēttia, kēttia > etc. should give < \*ētī, \*kētī > in NIA.), but rather < -a-ka > ending, as in Pali (ēttaka > ēttaa > OB., MB., ētawā, ētā > NB. ētā, ētō [ætō]). In Caryā 35 we have < ēta-kāla > (see *supra*, p. 808).

The above forms are also used as nouns in Bengali, as in other NIA., and as such for the genitive they take not the simple < -rā- > affix, but the affix কাৱ < -kāṛ<sup>ɸ</sup> >, or the archaic form কেৱ < -kēṛ<sup>ɸ</sup> >.

In Bengali, the form কতক, কঠোক < kātak<sup>ɸ</sup>, kātōk<sup>ɸ</sup> > has an indefinite sense (= kātā + o, hō + -kā pleonastic : cf. kēu, p. 845). MB. has the emphatic কথো < kāthō > (= kātā + hō, hu), which corresponds in formation to the Maithili < kathū >.

<sup>1</sup> OIA. ‘-(t)tya’ would be expected to become ‘cc’ in MIA.; but a s.t.s. ‘tt’ treatment is not unknown, cf. ‘āditya-vāra > MIA. āitta-vāra > NIA. (Hindi) āit-wār, it-wār’ *Sunday*. In the present case, the form with intrusive ‘-i-’ (e.g., ‘\*ya-yat-tiya > yettia, jettia’) certainly helped to prevent palatalisation of a corresponding ‘\*ya-yat-tya.’

## [IV] Adverbs of Time in ৰে &lt; -bē &gt;.

**602.** These are তবে, এবে, যবে, কবে < tabē, ēbē, jābē, kābē >; < ēbē > is archaic and poetic for NB., and it is also found as ইবে < ibē >, অবে < ḡbē >, dialectally in NB. and occasionally in MB. In OB., they were respectively < tabē, ēbē, jabē, \*kabē, \*abē (?) >—the first three actually occurring in Caryās 46, 35 and 21 respectively. Equivalents in Oriyā are < tēbē, ēbē, jēbē, kēbē >, while < ḡbē > is not found. The difference in the vowel of the pronominal base between Oriyā (tē-, jē-, kē-) and Bengali (tā-, jā-, kā-) is to be noted. Modern Assamese does not possess these forms, but Early Assamese did, and the Early Assamese forms agree with the Oriyā ones. In Early and Modern Maithili < taba, tabē, tabē; aba, abē, abē, ābē; jaba, jabē, jabē; kaba, kabē, kabē > are found. In Western Hindi, the same forms are found as < tab, ab, jab, kab > (Hindostānī), and as < tabai; abai, abē; jabai; kabai > (Brajbhākhā).

The forms in < -ē, -ai > are palpably locatives, with the locative affix < -ē, -ai < -ahi, ahī >. The source of the forms in Western Hindi and in the Magadhan speeches would be Śaurasēnī and Māgadhi Apabhrañśa forms like < \*tabba- (\*tēbba-), \*ēbba-, \*jabba- (\*jēbba-), \*kabba- (\*kēbba) >, locative < \*tabbahī, (\*tēbbahī), \*ēbbahī >, etc.

In Vedic the indeclinable < ēvā, ēvā > originally meant *thus*; in later Indo-Aryan it became merely an emphasising particle. In the sense of *thus*, however, in later Vedic, the form < ēvám > came in, and this < ēvám > in all likelihood is but an extension of < ēvā, ēvā >. In Second MIA., < ēvám > became < ēvvamī >, in the sense of *thus*. In MIA., < ēvvamī > seems to have occurred also as < ēbbamī, \*ēbbā > which further seems to have developed a temporal sense from a modal one, and this temporal meaning was strengthened by putting it in the locative (\*ēbbahī, \*ēbbahī). Corresponding to < ēvā, ēvám > \*ēbbamī > which in the Apabhrañśa stage easily affiliated itself to the pronominal base < ē- < ēta- >, it is exceedingly likely that other analogous pronominal adverbs were evolved, like < \*tēvā(m), \*yēvā(m), \*kēvā(m) >, in Early MIA., which would become < \*tēvvamī > \*tēbbamī > etc.; or < \*tavvamī > \*tabbamī >

etc. through substitution of the pronominal bases in « -a- », namely « ta-, ya-, ka- ». Thus all these are on the basis of « ēvā, evám > ēvvam ». The form « ab-ē, ab » would seem to be merely a weakening of « ēbai, ēbē ».

Western Apabhrāṇa as in Hēma-candra actually has forms which would presuppose the new formations « \*tēva, \*yēva, \*kēva » on the model of « ēva » : and these forms show MIA. nasalisation of « -v- » : « emva = ēwā ; temva = tēwā, tiwā » ; jemva = jēwā, jiwā ; kemva = kēwā, kiwā » (cf. Pischel, 'Grammatik der Pkt.-Sprachen,' § 261). NIA. representatives of these adverbs of manner are now found (see *infra*, p. 860). Locative forms of these occurred as adverbs of time in Western Apabhrāṇa : Hēma-candra actually cites « ēwahī = idānīm » (Pischel, § 261). This « ēwahī » of course cannot give the Bengali « ēbē > ēbē », or the Maithili « abē », and Western Hindi « abai » ; but a parallel MIA. formation « \*ēvva- > ēbba-, ēbbahī » alone can.

### [V] Adverbs of Time in খন « khāṇḍ ».

**603.** These are তখন, এখন, যখন, কখন « tā-khāṇḍ, ē-khāṇḍ, ja-khāṇḍ, kā-khāṇḍ » = *then, now, when, when?*, besides an অখন < ওখন « a-khāṇḍ < ō-khāṇḍ » *then, at that time* which is used as a sort of indefinite addition after future verbs (*e.g.*, দেবোঅখন দেবো-খন, দেবে-খুন « dēbō-ākhāṇḍ, dēbō-khāṇḍ, dēbō-khunḍ » *I shall give at some future time, I will give* : this influenced the past formations in the Standard Colloquial like দিলুম-খুন « dilum-kuṇḍ » = *I gave then, and I gave* : see *infra*, Verb, 'Pleonastic Affixes'). The « khāṇḍ » is from the OIA. « ksāṇa », which occurs in Bengali as a *sts.* ক্ষণ « [khæ:n, (k)khon] : « tat-ksāṇam > takkhāṇa, tākhāṇḍ » etc., with irregular absence of lengthening. This form of temporal adverb occurs in all the Magadhan languages. Cf. 'Prākṛta Pāṅgala' (Bib. Ind. ed.), p. 304, « jakkhāṇa vira Hamira calē » *when Hamir the warrior marches*; p. 318, « Kāśī-rāā jakkhāṇa calē » *when the king of Kāśī marches*.

## [VI] Adverbs of Place in থা &lt; -thā &gt;.

**604.** We have তথা (সেথা), হেথা, হোথা, যেথা (যথা), কোথা < tāthā (sēthā); hēthā; hōthā; jēthā (jāthā); kōthā >, which have also locative forms তথায় (সেথায়), হেথায়, হোথায়, যেথায় (যথায়), কোথায় < tāthāy (sēthāy), hēthāy, hōthāy, jēthāy (jāthāy), kōthāy >. The Bengali সেথা < sēthā > is a new formation with a generalised < -thā > base added to the nominative form < sē >, and < hētha, hōthā > are for < ēthā, ōthā > with prosthetic < h- > (see *ante*, p. 556). OB. gives < ēthu >, a form influenced by W. Apabhrañña, in *Caryā* 15.

These < -thā > forms are based on MIA. < tattha, ēttha (\*ōttha), yattha > jattha, kuttha (\*kōttha) > which already occur in Pali, and thus date from the First MIA. period. The corresponding OIA. forms are < ta-tra, \*i-trā = a-trā, \*ava-trā, ya-trā, ku-trā >. The aspiration in the MIA. forms presents a difficulty. This may be due to the < -r- > (see *supra*, p. 438). Pischel refers < ēttha > to the Vedic < itthā > (in Skt. < ittham >) = *thus* ('Grammatik der Pkt.-Sprachen,' § 107), and the rest apparently would follow analogically. But W. Geiger derives these from the < -tra > forms ('Pali Litteratur und Sprache,' §§ 9, 62), and cites cases from Pali where we have < -tth- < -tr- >, like < sōtthiya, sōttiya = śrōtriya >, and < ubhayaththa = ubhaya-trā >. Can it be that we have the OIA. < √ sthā > here, in original forms like < \*tat-stha, \*yat-stha > etc. ?

Old locatives of these < -tha > forms like তথি < tāthi >, যথি < jāthi > are used as oblique bases for their corresponding pronouns : see *supra*.

The MIA. forms were strengthened with the definitive < -ā > in OB. The < -thā > forms do not occur in Assamese and in Oriyā : the latter has < sēthi, ēthi, jēthi, kēthi >; and corresponding < -th- > forms occur also in the Bihāri dialects (see *infra*, § 607).

Assamese has as adverbs of place < tāt (tātē), jāt (jātē), kāt (kātē) >, which correspond to the Maithili < tatay (tatē), jatay (jatē), katay (katē) >, besides < ētay (ētē) > and < ōtay (ōtē) >; and W. Hindi (Brajbhākhā) has < titā, kitā (kata), jita > and < itā, itai, ītai > and

• *uta* ». The Maithili forms occur in Brajabuli also. They are connected with the Western Ap. locatives like « tēttahē, ēttahē (tēttahī, ēttahī) » etc., noted by Hēma-candra : « tētta, ētta » etc. are apparently the OIA. « tatra, \*itra = atra » etc., altered in MIA. in some Western dialect, without the aspiration which we find preserved in Pali « tattha » etc. and Bengali হেথা « hēthā » etc.

[VII] Adverbs of Place in খানে « khānē », etc.

605. Like স্থানে, এখানে « sē-khānē, ē-khānē » etc. These are late formations, being compoundings of « sē, ē, o, jē, kōn় » and the noun খান « khān় » *place* (< « khaṇḍa »), see *supra*, pp. 365, 779 : there seems to have occurred some contamination with the Skt. « sthāna » as well as Pers. « xānah », both meaning *place*).

606. There are similar compounds with ধার, ধারে « -dhārā, -dhārē » = *side, edge, bank, limit, line* (e.g., এধারে « ē-dhārē », ওধারে « o-dhārē »), agreeing with the Hindostāni « i-dhar, u-dhar » etc., and with Bhōjpuriyā « ihar, uhār » with weaking of « -dh- » to « -h- ». (Höernle derives these latter differently : cf. p. 315 of ‘Gaudian Grammar’). The Maithili « em-har, jem-har » etc. are connected.

607. Dialectal Bengali (W. Rađha) shows ইংকে, উকে « indhē, undhē » *here, there, etc.* which agree with the Bihārī (Maithili) « indē » undē » or « inda, unda » etc. They seem to be connected with the Hindostāni « yahā, wahā » etc., which are old MIA. ablatives, from Western Apabhrañśa « \*ēahā, \*ōhā » < Second MIA. « \*ēamhā, \*ōamhā » < OIA. « ētasmāt, \*avasmāt » etc. From Māgadhi Apabhrañśa forms similar to those of Western Apabhrañśa, the new Magadhan dialects could easily have « ihā, uhā, inha, unha » and then « indha, undha », locative « indhē, undhē » etc.

608. Dialectal Bengali preserves also some locative forms in « ঁhi, -ti », e.g., সেঁhi, এঁhi, জেঁhi « sēthi, ēthi, jēthi » as in South-West Bengali ; ঈঁti, সেঁti « iti, sēti » in North Bengali. This « ঁhi » seems to come from an OIA. « sthāman » *place* (see *supra*, under শান « thān », p. 762).

Oriyā also has it, both as « thi » and as an extended « thā-ra- » with the genitive affix.

609. The New Bengali correlatives শাই—তাই « jāi, tāi » *when—then, as soon as—immediately* are from the OIA. « yadā-hi, tadā-hi ».

610. OB. as in the Caryās shows some adverbs of manner in « -ma », unquestionably pronounced « -wā »: e.g., jima » (Caryās 13, 19, 29, 30, 31, 41, 43) and « tima » (Caryās 9, 43), and also probably « kima » (Caryā 39). These are Western Apabhrañśa forms borrowed in OB. Cognate forms in other NIA. speeches are—Eastern Hindi « jimi, timi » etc.; Western Hindi « jyaū, tyaū ; jyō, tyō ; jyū, tyū ; jū, tū » etc.; Gujarātī « jēm, tem » etc. These are derived from Western Apabhrañśa « jer̥va, ter̥va, ker̥va = jēwā, tēwā, kēwā » etc., which are nasalised modifications of OIA. « \*yēva, \*tēva, \*kēva », formed on the analogy of « ēva » (see *supra*, p. 857. Cf. Pischel, 'Grammatik der Pkt.-Sprachen,' § 261; Tessitori, 'Grammar of OWR.', § 98 [3]).

---

## CHAPTER V

### THE VERB

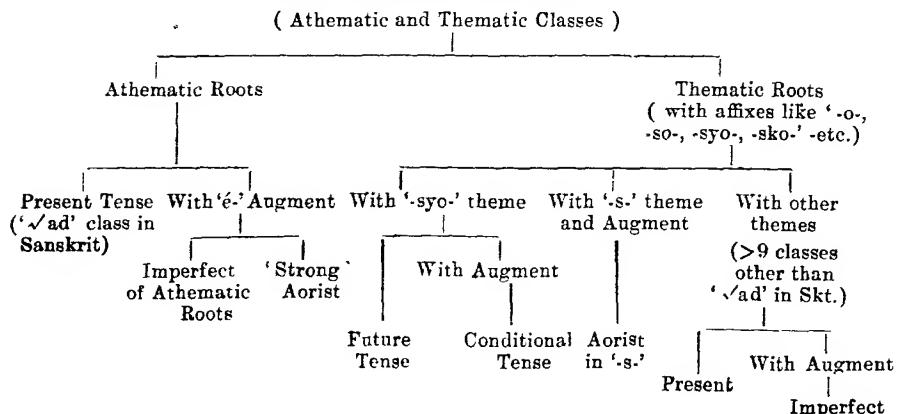

#### [A] CONJUGATION OF THE VERB IN INDO-EUROPEAN, IN OIA., AND IN NIA.

611. The elaborate conjugation of the verb such as we find in Vedic and in Greek did not obtain in Primitive Indo-European. The conjugational system was exceedingly simple in the oldest period. There was no distinction of tenses as such, and the subjunctive and optative moods were just evolving out of the indicative. The verb root (in simple, extended, or reduplicated form), in the active voice, took up certain personal affixes, either added direct to the root, or with certain *themes*, or syllables like  $\leftarrow$ -\*o-, \*-nu-, -\*so-, -\*to-, -\*sko-, -\*dho-  $\rightarrow$  etc. which were added as links joining the root and the personal termination ; and sometimes there was a nasal infix,  $\leftarrow$ -\*ne-, -n-  $\rightarrow$  which came in and modified the form of the root. The force of the affixed themes was to indicate the *aspect* or nature of the action, whether it was progressive or transitory, iterative or intensive, or indefinite. To express a state attained, as the result of a completed or perfected action, the verb root underwent a special modification in itself and further took up certain other personal terminations, slightly different and curtailed forms of the ones mentioned above. The conjugation of the verb in Primitive Indo-European thus fell into two parts, taking in view the kind of action (whether it was completed or not) and the kind of pronominal affixes it adopted accordingly. The paradigm of a root thus falls into two divisions—or *systems*—which have been named (i) the *Present-Aorist*, and (ii) the *Perfect*. These systems did not indicate time relation, but only the action in the present time, incomplete or perfected. If past time were to be emphasised, an adverbial particle  $\leftarrow$  é  $\rightarrow$ , called the *augment*, which was always stressed, was placed before the verb form. In course of time this particle became loosely attached to the verb, and the combined

« \*é » (> Indo-Aryan = « á ») and verb form resulted in the imperfect and aorist (as well as the 'plu-perfect') tenses of Vedic and Sanskrit.

The themes or affixes which were added in between the root and the personal terminations (e.g., Skt. *< kar-ō-ti*, *kri-nā-ti*, *div-ya-ti*, *sah-a-tē*, *ga-ccha-ti* < IE. \*gw̥m-sko-ti >, etc.) had in Prim. IE. each its special meaning or force, but in the later phase of IE., the earlier *nunances* were to a great extent lost, and in several cases they took up distinct and well-defined values not known before. Thus the « -s- » theme came to denote the past tense in Italic, Celtic and Slav, and developed into the aorist tense of Greek and Sanskrit ; the « -so- » and « -syo- » themes developed into the future tense respectively in Greek and in Sanskrit and Baltic. The *Perfect System* gradually evolved into the perfect tense in most IE. languages : thus IE. « \*√d̥pk » *to see*, with a strong grade (\*dórk), reduplicated (\*de-dórk) and with the personal affix « -a », gave a form « \*de-dórk-a », which was a present form, = *I am after completing the act of seeing*, form which easily developed the perfect or past sense of *I saw*, and the form became the perfect tense, as in Sanskrit (*dadársa*) and in Greek (*dédorka*). The tense and mood forms of OIA. were developed in this way out of the simple *aspects* of IE. The tables below give the relation borne by OIA. tenses to the Prim. IE. forms :

#### (i) Indo-European Present-Aorist System.

## (ii) Indo-European Perfect System

Without Augment (=Original Present)	With Augment (=Original Past)
Perfect Tense	Pluperfect of Vedic

Originally in IE. there were two moods, the indicative and the imperative. From the indicative developed the conjunctive and the optative. The thematic vowels < \*-é-, \*-ē-, \*-ó-, \*-ō- > which at first denoted some particular aspect of the action in the indicative, came to acquire the sense of a special mode, that of the conjunctive or subjunctive : and in some of the IE. languages they became well-established as modal affixes, deviating from their original aspect-indicating function. Similarly the affixes < \*-yé-, \*-yə-, \*-I-, \*-oi- > came to be associated with the optative mood : originally (like the < \*-é-, \*-ē-, \*-ó-, \*-ō- > above, and the < -s- > of what later became the aorist, as well as < \*-sye-, \*-syo- > of what was later changed to the future ), < \*-yē-, \*-yə-> etc. indicated some aspect of the action, as much as < -nu-, -nā-> and the other *themes* which have not become specialised for a mood or tense and of which the proper force is no longer understood. And themes of the groups < \*-yé-, \*-yó- > and < \*-éye-, \*-éyo- > became respectively the affixes of the denominative and causative forms. The germs of these later modal and other developments in all cases existed in these aspect-indicating themes of Primitive IE.

**612.** Below is given a conspectus of all the conjugational forms of Vedic, from its own stand-point, and not in historical relationship to Prim. IE. :—the development and systematisation of the former from the latter has been of an intricate character.

This will indicate the extent of the losses sustained by Bengali, which is typical for all NIA.

## A CONSPECTUS OF OIA. (VEDIC) VERB-FORMS.

Root: < car >, or < cal > *to move, to walk.* (Finite forms given are of the 3rd person singular, unless otherwise stated).

### I. The Present System.

#### A. Indicative Mood:

- (i) With Primary Personal Affixes = Present Tense :
  - (a) Active Voice : cár-a-ti (cár-a-si, cár-ā-mi, etc).
  - (b) Middle Voice : (1) Reflexive : cár-a-tē ; (2) Passive : car-yá-tē.
- (ii) With Secondary Personal Affixes, preceded by the Augment = Imperfect Tense :
  - (a) Active : á-car-a-t.
  - (b) Middle : (1) Reflexive : á-car-a-ta ; (2) Passive : cf. á-hū-ya-ta.
- (iii) With Secondary Personal Affixes, without Augment = Injunctive :
  - (a) Active : cár-a-t.
  - (b) Middle : (1) Reflexive : cár-a-ta ; (2) Passive : cf. sū-yá-ta.

#### B. Subjunctive Mood :

With Primary Personal Affixes = Present Subjunctive :

- (a) Active : cár-ā-ti, cár-ā-t.
- (b) Middle : (1) Reflexive : cár-ā-tāi, cár-ā-tē ; (2) Passive : cf. bhri-y-ā-tē, uh-y-ā-tē.

#### C. Optative Mood :

With Secondary Personal Affixes = Present Optative :

- (a) Active : cár-ē-t.
- (b) Middle or Reflexive : cár-i-ta.

#### D. Imperative Mood :

- (a) Active : 2 sg. cár-a, 2 pl. cár-a-ta.
- (b) Middle : (1) Reflexive : 2 sg., cár-a-sva ; (2) Passive : cf. 2 sg., hū-yá-sva.

#### E. Participles of the Present System :

- (a) Active : cár-ant-.
- (b) Middle : (1) Reflexive : cár-a-māna ; (2) Passive : car-yá-māna.

**II. The Aorist System, in Simple or Non-Sigmatic, Sigmatic (with « -s-, -sa-, -iṣ-, -siṣ- »), and Reduplicating forms of Roots.**

**A. Indicative Mood :**

- (i) With Secondary Personal Affixes *plus* Augment = Aorist (past).
  - (a) Active: á-cār-s-i-t, á-cār-i-t, á-cl-car-a-t; cf. á-ruk-ṣa-t, á-vid-a-t.
  - (b) Middle: á-cār-ṣiṣ-a-ta, á-cār-a-ta, á-cl-car-a-ta ; cf. á-vid-a-ta, á-bud-dha, á-stō-ṣ-ṭa, á-sthi-ta ;  
Passive : 3 sg. only : á-cār-i.
- (ii) With Secondary Personal Endings, without Augment = Injunctive Aorist.
  - (a) Active: cár-i-t; cf. dvik-ṣá-t, kár-s-i-t, bhū-t, dī-dhar-a-t, etc.
  - (b) Middle: cár-ṣiṣ-a-ta, cár-a-ta, cl-car-a-ta : cf. 1 sg. sthē-ṣ-am ; páv-iṣ-ṭa ; 3 pl. hā-ṣiṣ-ur ; vid-ā-ta ; vṛ-ta, 3 pl. sī-ṣap-a-nata etc.

**B. Subjunctive Mood :**

Subjunctive Endings added to Aorist Base, without Augment = Subjunctive Aorist.

- (a) Active : cf. stō-ṣ-a-ti, stō-ṣ-a-t ; kár-iṣ-a-t ; yá-ṣiṣ-a-t ; vid-ā-ti, vid-ā-t ; kár-a-ti ; sī-ṣadh-ā-ti.
- (b) Middle : cf. stō-ṣ-a-tē ; 3 pl. sán-iṣ-a-ntē ; vid-ā-tē ; kár-a-tē.

**C. Optative Mood :**

- (i) Optative Endings added to Aorist Base = Optative Aorist.
  - (a) Active : cf. vid-é-t ; bhū-yá-t ; vōc-é-t.
  - (b) Middle : cf. bhak-ṣ-i-ta, mām-ṣiṣ-ṭa ; jan-i-ṣiṣ-ṭa ; ar-i-ta.
- (ii) Aorist « -s- » added after Optative Base « -yā-, -i- » = Benedictive or Precative :
  - (a) Active : car-yá-s : cf. gam-yá-s, bhū-yá-s.
  - (b) Middle : car-i-ṣ-ṭa : cf. pad-i-ṣ-ṭa.

## D. Imperative Mood :

- (a) Active : cf. 2 dual, mṛk-ṣá-tam ; 2 sg. nē-ṣ-a, av-iḍ-dhi, sad-á, kṛ-dhí, bōdh-í.
- (b) Middle : 2 sg. dhuk-ṣá-sva ; 2 sg. sák-ṣva; 2 dual, yā-siṣ-tám ; 2 pl. sad-a-dhvam ; 2 sg. kṛ-ṣvá, yuk-ṣvá.

## E. Participles of the Aorist System :

- (a) Active : cár-ṣ-ant- ; cf. sák-ṣ-ant-, śuc-ánt-, gm-ánt-, kr-ánt-, sthā-nt-, etc.
- (b) Middle : cf. śuc-ā-māna, kr-āñá, budh-āná, yam-a-s-āná, mand-a-s-āná, etc.

## III. The Future System.

## A. Indicative Mood.

- (i) With Future «-syá-» Base and Primary Personal Endings = Future Tense.
  - (a) Active : car-i-syá-ti.
  - (b) Middle : car-i-syá-tē.
- (ii) Augment Preterit of the Future, with Secondary Personal Endings = Conditional.
  - (a) Active : á-car-i-sya-t ; cf. á-bhar-i-sya-t.
  - (b) Middle : á-car-i-sya-ta.

## E. Participles of the Future System :

- (a) Active : car-i-syá-nt-
- (b) Middle : car-i-syá-māna : cf. stav-i-syá-māna.

## IV. The Perfect System.

## A. Indicative Mood :

- (i) Primitive Indo-European Present of the Perfect System = Perfect in Sanskrit.
  - (a) Active : ca-cár-a.
  - (b) Middle : cér-é, cf. tēp-é, da-dh-é,

(ii) Augmented Perfect=Imperfect of the Perfect System=Vedic Pluperfect:

- (a) Active : cf. á-ca-eakṣ-a-t.
- (b) Middle : cf. 3 pl. á-ca-kri-ran.

(iii) Injunctive Perfect, without Augment :

- (a) Active : cf. ta-stambh-a-t.
- (b) Middle : cf. di-dis-ṭa.

B. Subjunctive Mood :

Subjunctive Inflections added to Perfect Base=Subjunc. Perfect.

- (a) Active : cf. mú-mōc-a-ti, mu-muc-a-t.
- (b) Middle : cf. ta-táp-a-tē, jú-jōṣ-a-tē.

C. Optative Mood :

- (a) Active : cf. ja-gam-yā-t.
- (b) Middle : cf. va-vṛt-tá.

D. Imperative Mood :

- (a) Active : cf. ci-kid-dhí.
- (b) Middle : cf. va-vṛt-svá.

E. Participles of the Perfect System :

- (a) Active : cf. ca-kṛ-vāṁs, ja-gm-i-vāṁs.
- (b) Middle : cf. tēp-ānā, ja-gm-ānā.

## V. Participles.

A. Active and Middle, as under the various Tense Systems above.

B. Past or Passive Participle : car-i-tá ; cf. li-ná, kṛ-tá.

C. Perfect Participle : car-itá-vant (a late formation).

D. Future Passive Participles and Adjectives : cár-ya, car-āyya, car-énya, \*cár-tva, car-tavyà, car-i-tavyà, car-an-íya.

E. Indeclinable Participle or Conjunctive : car-i-tvā, car-i-tví ; -cár-ya ; cf. kṛ-tvā, kṛ'-tya.

## VI. Verbal Nouns and Infinitives :

cáras, car-ásē; cár-i-tu-m, car-i-tav-ā́i, cár-i-tav-ē, cár-i-tō-s; car-í, car-áy-ē; car-i-ty-ā́i; car-ádhy-ā́i; cár-am; -cár-a-m; car-án-i; car-í-tra; car-á-tha; cf. also bhár-maṇ-ē, dā-ván-ē, dhūr-van-ē, sā-táy-ē.

### VII. Periphrastic Forms.

- A. Perfect Active : car-ay-ām + ása, -babhūva, -cakāra.
- B. Future : caritā, 1 sg. caritāsmi.

### VIII. Secondary Conjugations.

- A. Passive : car-yá-tē (Present), á-cár-i (Aorist 3 sg.).
- B. Causative : inflected forms like cár-áya-ti, cár-áya-tē, á-cár-aya-t-, cár-ay-iṣyá-ti, cár-áy-ē-t, cár-áya-tu, á-cár-ay-i-ṣy-a-t, cár-yá-tē ; etc. ; Active Present Participle cár-áy-ant-, Passive cár-yá-māna, etc.
- C. Denominative : cár-áyá-tē, cár-āyá-tē, etc.
- D. Desiderative : cí-car-iṣ-a-ti, cí-car-ṣ-a-ti ; á-ci-car-ṣ-it ; ci-car-i-ṣyá-ti ; Causative-Desiderative—ci-car-iṣ-áya-ti ; etc.
- E. Intensive : Indicative cár-car-i-ti ; also Optative, Imperative, Imperfect Indicative, etc. Present Active Participle, cár-i-car-ant- ; Passive Participle—cár-car-āna (cf. kán-i-krad-ant-, jár-bhur-āna), car-cūr-yá-māna.

**613.** Compared with the above elaborate system, that of the NIA. speeches shows a very great simplification. And Bengali (with Assamese) is perhaps more simplified than any of its sisters and cousins—the distinction in number for verb forms, which obtains in almost all NIA. speeches, the inflected passive, the « karmaṇi » and « bhāvē prayōgas » of W. Hindī, Panjabī, Rājasthānī etc., the negative conjugation of Khaskurā, etc., are all absent. The curtailment of the OIA. system has been carried out along the lines indicated below, to give that of Bengali :

- I. The Present System : the OIA. *themes* have been in a few instances retained in the root in NB.

#### A. Indicative Mood :

- (i) The forms for the Present Tense alone have been retained :

OIA. calati > NB. cálē : OIA. calanti > NB. cálēṇā ;  
 calasi > cálī-s : calatha > cálā, cálō.  
 calāmi > cálī : (calāmaḥ > cálō).

## D. Imperative Mood :

3 pers. calatu > cālu, cālu-kṣ; calantu > cālunṣ;  
 2 pers. cala > cāla; calata > cāla, cālō.

## E. Participles :

- (a) Active : calant- > calanta > cālāntā, cālit- (=the base of the Conditional or Habitual Past).
- (b) Passive or Middle : calamāna > cālānā (with Causative influence).

## II. The Aorist System : entirely lost.

## III. The Future System :

- A. The Indicative future in « -syā- » was inherited in OB., but NB. retains only the forms for the 2 person as a Future Precative, or Imperative with Future implication : « calisyasi > cālis, calisyatha > cālihā > cāliō > cōlō ».

## IV. The Perfect System : entirely lost.

## V. Participles :

The Past Passive Participle in « -tā, -itā », fortified in Late MIA. by the pleonastic « -illa » affix, gave the Past as well as Adjectival Base of Bengali, in « -ila », and also the Conditional Gerund in « -il-ē »; without the « -ila », this OIA. « -(i)tā » participle in the source of the Bengali Verbal Voun in « -ā ».

The Future Passive Participle in « -(i)tavya » was altered into the Bengali Future Base in « -ibā », and of the Verbal Noun in « -ibā ».

The Conjunctorive Participle affix « -ya » of OIA. lives in the Bengali Conjunctorive affix « -i-yā ».

## VI. Verbal Nouns :

Some have been preserved : « cāla, cāla, cāl-ānṣ » etc.

## VII. Periphrastic Forms—not preserved.

## VIII. Secondary Conjugations :

The Causative, in the MIA. form of « -āpa- », and the Denominative, are partially represented in the Bengali affix « -ā- ». The original ablaut grade of the Causative has occasionally been maintained.

The above are thus the comparatively few forms inherited by Bengali as a NIA. language. In MB. and OB. a few other relics of OIA. forms are found which are already tending to become obsolete. The losses have been to a great extent made good by newer formations (*e.g.*, by the development of compounded verbs, and the use of particles and help-words). The syntax too has altered, to help in fixing the language in its new and altered environment.

#### [B] BENGALI VERB-ROOTS.

#### [I] HISTORICAL CLASSIFICATION.

**614.** The number of Sanskrit verb-roots, according to the grammarians, comes up to some 2,000 (1961, according to N. L. Westergaard's lists in O. Böhtlingk's 'Pāṇini,' Leipzig, 1887, pp. 62\*-84\*). Of these, only slightly over 800 have been found in literature (Vēdas, Brāhmaṇas, the Epics, and Early Sanskrit works), employed their conjugated forms. Of this number, again, some 200 belong to the Vēdas and the Brāhmaṇas alone, about 500 occur in both Vedic and Sanskrit, and less than 150 are found in the later literature alone (W. D. Whitney. 'The Roots, Verb-forms and Primary Derivatives of the Sanskrit Language,' German ed., Leipzig, 1886, p. 244). OIA. as in the Vēdas and the Brāhmaṇas has consequently registered less than 700 roots which were in living use as verbs, apart from those occurring only in nominal and other derivatives. This number, 700, can by no means be said to exhaust all the verb-roots in the speech of the OIA. period, but considering the extent of the Vedic and Brāhmaṇic literature, and fact that this literature touches upon almost all the aspects of the life of the times, the number of roots not represented cannot be very many.

Many of the 800 roots actually used in OIA. literature (Vedic and Early Sanskrit) are merely extensions of primitive roots, and in some cases, as we advance into the MIA. stage, are but Prakritic modifications of OIA. roots. The number of primitive roots inherited from IE. by OIA. will necessarily be rather small. Be it as it may, the absence of some 200 Vedic roots in Sanskrit shows that this inheritance was not retained

intact by the Aryan speech in India. Old roots changed their meaning, and went out of fashion ; and the losses were made good by building up anew with the old materials, and in a few rare instances by possible borrowings from the non-Aryan speeches. The MIA, vernaculars employed a large number of derived forms as new roots. The spoken language reacted on the literary speech, Sanskrit, and numerous MIA. forms were adopted into Sanskrit in a slightly altered form, and were gradually accepted by the Sanskrit grammarians, and given an equal place with the primitives. There could be no rule to guide the caprice why some Prakrit roots were taken up and others rejected by Sanskrit: thus « bruṇ < budḍa, hind, hikk, khēl, katt, lag, pitt » and a number of others have found a place in both the « dhātu-kōṣa » and the literature of Sanskrit, but other equally good Prakrit roots like « kadḍha < kṛṣṭa, lukka, cukka, phittā, cagh, bhar < smṛ, ghūl < ghūrṇa » were rejected. The grammarians of later ages (from the Second MIA. period) seem to have encouraged this practice to some extent. Sanskrit the language the Gods and the *Rishis* was the mother of all language, and this was apparent from the vernaculars of Northern India ; consequently, vernacular words and roots must necessarily originate from those of Sanskrit : when the grammarians were agreed on this principle, at a time when the historic development of forms by phonetic and other changes was not fully understood, the Sanskrit « dhātu-kōṣa » began to grow in extent by the accession of new roots foisted on it by grammarians. Of the roots in the current « dhātu-kōṣas » a small number may even have been the creations of grammarians to explain words of doubtful etymology ; but the bulk of them may legitimately be regarded as having been in actual use in IA., though not in its oldest period. Thus in addition to the aristocratic roots of direct IE. origin like « as, bhū, sthā, gam, yā, ad, mṛ, dṛś, dram, cal, pat, dhā, div, mṛj, snih, duh » etc., the « dhātu-kōṣas » give as good Sanskrit humbler roots of late and obscure origin, like « 'gu(n)li' vēṣṭanē, eūrṇikaranē'pi; 'dipa' ksēpēl; 'bha(n)dī' paribāsē; 'kha(n)dī' manthē; 'capa' kalkanē; 'juḍa' prēranē; 'caha' pari-kalkanē; 'khiṭa' uttrāsanē; 'lōḍr' unmādanē; 'jimu' adanē; 'hudṛ, hōḍr' gataū; 'dīṇa' vihāyasa-gāmanē; 'muta'

sāmēūrṇanē ; ‘dhakka’ nāśanē ; ‘bukka’ bhāsanē ; ‘kana’ nimilanē ; ‘kadda’ kārkkaśyē ; ‘laḍa’ vilāsē ; ‘adḍa’ abhiyōgē ; ‘ada’ udyamē ; ‘ṭuṭa’ alpa-bhāvē », etc., etc., which have in almost all cases NIA. equivalents, and can in the majority of cases be explained easily as secondary formations from words derived from primitive Aryan roots ; the origin of quite a number of them, however, remains obscure.

**615.** The number of verb-roots in Bengali is 1,056, according to the excellent grammar of Pandit Nakuleśwar Vidyābhūṣaṇa (4th ed., Calcutta, Bengali year 1315). This includes original or primitive roots, causatives, and a number of denominatives used chiefly in literature, and excludes onomatopoeics. A Bengali « dhātu-kōṣa » of about 1,500 roots has been easily compiled by me on the basis of Jñānēndra-Mōhan Dās’s dictionary (see *supra*, p. 218) : this includes onomatopoeics, and a number of obsolete roots not used in NB., beside a large number of Sanskrit denominatives used in high literature. The number will be much larger if proper *tbh.* roots in early Bengali literature and in the present-day dialects are all brought together.

Roots in Bengali, as in other cognate IA. speeches, can be classified on the lines indicated below, taking into consideration their origin, and partly also their function :

- 1. Primary Roots
  - Primary Roots inherited from OIA. (*tbh.s.*) :
    - (a) Simple Roots, (b) Prefixed Roots.
  - Primary Roots from Causatives in OIA.
  - Primary Roots re-introduced from Sanskrit (*tss.* and *stss.*)
  - Primary Roots of doubtful origin (*dēśī?*)
- 2. Secondary Roots
  - Causatives in « -ā- ».
    - Native (*tbh.*)
      - (a) Early(inherited)
      - (b) M.B. and N.B. (coined)
    - Tatsama.*
    - Foreign.
  - Compounded and Suffixes (*tbh.*)
  - Onomatopoetic.
  - Doubtful.

## (1) Primary Roots.

**616.** Primary Roots in Bengali, at a rough computation, number about 300. Strictly speaking, denominatives derived from MIA., which number about 100, may be classed under primary roots, since they have been inherited as roots by Bengali and behave exactly like primitive roots derived from OIA. (*e.g.*, a root like কাড় « kāṛ » *snatch away* < « kaḍḍha = krṣṭa »): these might have been denominatives in MIA., but the nouns or adjectives which were their sources are in many cases obsolete in Bengali.

**617.** There are a little less than 200 roots in Bengali which can mostly be traced right up to primary roots of OIA. (Vedic and Sanskrit, and in some cases only to the early Prakrits). Examples are, of unprefixed roots : « আছ *āch* (MIA. acchati, IE. \* es-sko-ti) ; ইছ *ich* (icchatī) ; কষ *kāṣ* *tighten* (krṣ) ; কর *kār* (kr̥) ; কাদ *kād* *weep* (krand) ; কাপ *kāp* (kamp) ; কাট *kāṭ* (kr̥t) ; কিন *kin* (krṇāti) ; কুদ *kūd* (kūrdati) ; খন *khān* (khan) ; খা *khā* (khād) ; খুজ *khūj* *seek* (? kṣudyatē) ; খেল *khēl* (khēlatī) ; গণ, গুণ *gāṇ* (gaṇ) ; গিল *gil* (gil, gir) ; চৰ *cār* *graze* (car) ; চল *cāl* (cal) ; চি *ci* *awaken* (cīt, cf. cētayati) ; চু *cu* (eyav) ; চুন *cinōti* ; চুম *cumb*) ; ছা *chā* (chād) ; ছাড় *chāṛ* (chard) ; ছিঁড় *chīṛ* (chiṇḍ, chindati) ; ছেঁচ *chēc* (sic, siñc) ; জপ *jāp* *persuade* (jalp) ; জাগ *jāg* (jāgr) ; জি *ji* (jīv) ; জিন *jin* (jināti) ; জল *jwāl* = জল *jāl* (jval) ; টান *tān* (tan) ; তুটি *tut* (trut) ; †ডহ *dah* (dah) ; ঢাক *dhāk* (MIA. dhakk) ; তৰ *tār* (tp) ; তাজ *tāj* (tarj) ; তুল *tul* (tul) ; †ডশ *dāś* (daṁś) ; দল *dāl* (dal) ; দুল *dul* (cf. dōla) ; দুহ *duh* (duh) ; দুষ *dus* (dus) ; দে *dē* (dā) ; দেখ *dēkh* (MIA. dekkh < dṛks) ; ধৰ *dhār* (dhṛ) ; ধৰণ *dhwās* = ধস *dbās* (dhvas) ; ধা *dhā* (dhāv) ; ধো *dhō* (dhāv) ; †ধুন *dbun* (dhvan) ; নাহ *nāh* (snā) ; নে *nē* (nī) ; নু, নো *nu, no* (nam) ; পচ *pāc* *to get rotten* (pac) ; †পি *pi* (pibati) ; পিঙ *pīj* (piñj) ; পুচ *preehati* ; পূজ *pūj* (pūj) ; ফাট *phāṭ* *split* (OIA. sphāṭ < \*sphl̥t) ; ফুট *phuṭ* (ibid) ; বাট *bāṭ* *distribute* (vāṇt) ; বট *bāṭ* *remain, be* (vṛt) ; বৰ *bār* (vṛs ?) ; বাচ *bāc* *live* (vāñc) ; বোল *bōl* (brū) ; বস *bās* (vas) ; বহ *bāh* (vah) ; বাধ *bādh* (bandh) ; বিধ *bīdh* (vyadh) ; বুধ *bujh* (budh) ; বুল *bul* *wander about* (val) ; ভজ *bhāj* (bhaj) ; ভৱ *bhār* (bhṛ) ; ভাজ *bhāj* *fry, roast* (bhṛjj) ; ভাঁজ *bhājj* *fold*

(*bhañj*) ; ভুষ *bhūṣ* (*bhūṣ*) ; মহ *māh* *churn* (*math*) ; মজ *māj* *sink, get juicy* (*majj*) ; মিশ *miś* (*miśr*) ; মিল *mil* (*mil*) ; মার্ড *māṛ* (*mṛd, mard*) ; মাখ *mākh* (*mrakṣ*) ; মল *māl* (*mard*) ; যা *jā* (*yā*) ; যাচ *jāc* (*yāc*) ; যুধ *jujh* (*yudh*) ; রাখ *rākh* (*rakṣ*) ; লহ *lāh* (*labh*) ; লখ *lākh* (*laks*) ; লাগ *lāg* (*lag*) ; লাজ *lāj* (*lajj*) ; লাল *lāl* (*lal*) ; লুঠ *luṭh* (*lunṭh*) ; শুশ *śus* (*sus*) ; শুন *śun* (*śṛṇōti*) ; শুক *śuk* (*śungh*) ; শো, সো *sō*, *lie down* *sō* (*svap*) ; সহ *sah* (*sah*) ; সর *sār* (*sṛ*) ; †সি *si* (*siv*) ; সিঝ *sijh* *be boiled* (*siddh*) ; শোহ, সোহ *sōh* (*śubh*) ; হের *hēr* *scrutinise, gaze* (cf. *ākhetā hunting*) >, etc., etc.

Of prefixed roots, examples are - আ *ā* (*ā-yā*) ; আস, আইস *ās, āis* (*ā-viś*) ; আঙজ *āoj* *make half-shut* (*ā-vṛj*) ; আঁচা *ācā* (*ā-cam*) ; আন *ān* (*ā-nI*) ; আছাড় *āchāṛ* > *dash, throw down with force* (*ā-chard*) ; উচল *uchāl* *overflow* (*ut-sāl*) ; উঠ *uṭh* (*ut-sthā*) ; উতর *utār* *reach* (*ut-tr̥*) ; উপেখ *upēkh* (*ut-pra-iks*) ; †উই *ui* *rise, as the sun* (*ud-i*) ; উজা *ujā* *flow up, as a river* (*ud-yā*) ; উপচ *upac* *flow over* (*ut-patyatē*) ; উপজ *upaj* (*ut-padyatē*) ; উলহ, উল, উর *ulgh*, *ul*, *ur* *descend* (*ut-labhh*) ; নিব, নিভা *nib(h)ā* (*nir-vā*) ; নিখর *nirakh* (*nir-iks*) ; নিসর *nisar* (*nih-sṛ*) ; নিহাল, নিহার *nihāl, nihār* (*ni-bhāl*) ; †নিবড় *nibāṛ* *finish* (*nir-vṛt*) ; †নেউট *nēuṭ* *return* (*ni-vṛt*) ; পাখল *pākhāl* (*pra-kṣāl*) ; পরথ *pārakh* (*pari-iks*) ; †পরশ *pārāś* *serve, food* (*pari-viś + sparśa*) ; পর < পহির *pār* < *pāhir* (*pari-dhā*) ; পরিহর *pārihār* (*pari-hṛ*) ; পস, পহিস *pās, pāis* (*pra-viś*) ; পোছ *pōch* *wipe* (*pra-uñch*) ; পোহা *pohā* *dawn* (*pra-bhā*) ; বস, বহস *bās, bāis* (*upa-viś*) ; ভজি *bhij* *get wet* (*abhi-añj*) ; বিক *bik* *sell* (*vi-kri*) ; †সাতৰ *sātār* *swim* (*sām-tṛ*) ; সামাল *sāmāl* *gather up, save* (*sam-bhāl*) ; সঁপ, সোপ *sāp, sōp* (*sam-arp*) >; etc., etc.

**618.** The primary roots have all come to Bengali through the MIA., and as such they bear the stamp of the phonetic modifications of the various periods. The ten classes (*gaṇas*) into which the Sanskrit grammarians have arranged OIA. verb-roots, taking into consideration their *themes*, became levelled down to one in Apabhrāṇa, and all original thematic affixes which were added to the root in the present system were lost in MIA., being either dropped or incorporated with the root. In some instances, however, a characteristic theme could not be dropped; and the presence of the <-ya-> theme is indicated by the result of its assimilation with the consonant of the root. Bengal

primary roots inherited from OIA. have preserved only a few traces of these themes : thus—

1. « -ya- » theme: e.g., « সিধে sijhē (sidh-ya-ti); নাচে nācē (naccaī, nṛt-ya-ti); যুধে, জুঝে jujhē (yudh-ya-ti); শুষে śusē (śuṣ-ya-ti); বুঝে bujhē (budh-ya-ti); সমুঝে samujhē (sam + budh-ya-ti); টুটে tūṭē (trut-ya-ti); মানে mānē honours (man-ya-tē) »; etc.
2. « -nō- » theme: « চুনে cune culls, selects (ci-nō-ti); শুনে śunē (śr-nō-ti); ধুনে dhunē (dhu-nō-ti) »;
3. « -nā- » theme: « কিনে kinē (kri-nā-ti); জিনে jinē (ji-nā-ti) »; (cf. জানে jānē = jānāti);
4. The « -ech- » theme (= IE. \* -sko-), not recognised by Sanskrit grammarians, occurs in the roots « আছে āchē (acchatī, \* es-sko-ti); †ইচে ichē (icchatī); †পুচে puchē (pṛechati); পহুচে pahūchē (pahuñcaī, pahucchāī, \* prabhuechati, \* pro-bheu-sko-ti) ».

Original Passive forms, with « -yá- » affix of the Passive, e.g., « উপচয় upacyā overflow (utpatyátē); †উপজয় upajyā (utpadyátē); O.B. dīśāī (dṛś-yá-tē); রোচে, রুচে rōcē, rucē is pleasing (rucyátē) », etc., may be noted here.

The « -n- » infix of OIA. remains as a nasalisation of the root vowel in Bengali forms like « ছিন্ডে chīṇḍē (chinḍ-a-ti, chi-n-d-a-ti); ভাঙ্জে bhāñjē (bha-ñ-j-a-ti) », etc. Cf. « বাংধে bādhē (\* bandh-a-ti); রাঁধে rādhē (randh-aya-ti) ».

**619.** Apart from phonetic modification and decay, and the analogical tendency which brought about a general uniformity in the stem seeking to marshal the roots under one head, primary roots underwent certain modifications in MIA which would appear erratic and inexplicable. These have been described by Hoernle in his paper on Hindi Roots (JASB., 1880, Part I, p. 35ff.). Phonetic changes which altered « samarpayati » to « sāpē », « vismarati » to « bichurē », « upavisati » to « bāsē », « svapiti » to « śōy » , « abhyajyatē » to « bhijē » , « prōñchati » to « pōchē, mōchē » are sufficiently clear: and the analogical tendency levelling down the diversities in the forms of roots is plain enough. The striking thing is that in MIA., the bases

of active roots are frequently derived, not from the active form in OIA., but rather from the passive one, and in some cases apparently from the future base rather than that of the present. Causative bases of OIA. also supplied the simple root forms of MIA. and NIA. The deponent forms in MIA. can be explained as taking up a reflexive character, from which the active sense easily evolved, and this was sometimes accompanied by slight semantic changes: e.g., « abhyajyatē » is anointed > anoints oneself > ভিজে « bhijē » = gets wet ; « tapyatē » > MIA. « tappaī » is heated > heats oneself, > তাপে « tāpē » gets hot ; « namyatē » is bent, gets bent, bends > নামে « nāmē » descends ; « brūyatē » is said > « \*buryati > bollaī » > বোলে, বলে « bōle, bālē » says ; etc. A number of derivatives from passive participles are similarly used actively. Certain roots in OIA., ending in « s, š » (also other consonants —« c, j, h »), change the final consonant to « k » before the « -sya- » in the future, resulting in « -k-sya- » for the future base. The MIA. change of « -k-sya » was « -kkh- » or « -ech- ». In some instances, it seems that on the model of MIA. bases like « puccha = OIA. pr̥cch, gaccha, p̥ccha = pra+ikṣ, accha, yaccha, \*pahuecha, \*pahuñca = NIA. pahūch- », certain roots employed for the present their future bases in « -ccha- < -k-sya- ». (Hoernle, *op. cit.*) Thus OIA. « ā+krak-sya-ti », from « √kṛṣ », would give « ā+kacchaī > আ-চেচ্ছাই, \*ায়চেচ্ছাই, \* আয়চেচ্ছাই » in MIA., which apparently was the source of Hindi « aiñcāj, aicai » draws, Bengali হেঁচড়ায় « hēc-rā-y » drags (with prothetic « h- », and « -r- > -d- » extension). Such future > present bases do not, however, seem to have been as numerous in MIA. and NIA. as Hoernle makes them out to be (*op. cit.*).

**620.** There are slightly over 50 roots in Bengali which were originally causatives in OIA. The old ablaut modification (*guna*) of the root vowel is preserved in Bengali, and the meaning has in many cases been slightly modified. These old causatives have become primary roots in Bengali, and a regular causative form with the « -ā- » affix has been built up both from this causative-primary and its basic root: e.g., « patati » > পতে « pātē » falls, « pātayati » > পাতক

« *pārē* » *causes to fall, fells, gets a thing down*; whence new formations in « -ā- »—পড়ায় « *pārāy* » *causes to fall*, and পাড়ায় « *pārāy* » *causes to fell, causes to get something down from high*. The root পাড় « *pār* » has become, so far as N.B. is concerned, an independent form, with the sense of *taking down a thing*. Examples of these causatival formations: +উঘারে « *ughārē* » (*udghāṭayati*); +উপড়ে, উপড়ু « *upārē* » > *upārāy* » (*utpāṭayati*); গালে « *gālē* » *strains, causes to flow off* (*gālayati*), beside গলে « *gālē* » *melts, slips through like water* (*galati*); MB. গোঞ্জে « *gōñāē* » *passes time* (*gamayati*); চাবায়, চিবায় « *cābāy*, *cibāy* » *chews* (*carvayati*); ঢালে « *cālē* » *causes to move* (*cālayati*), beside ঢলে « *cālē* » *walks* (*calati*); ছোঢ়ে « *chōḍē* » *casts, throws from a distance as a ball*, beside ছুটে « *chuṭē* » *runs* (*Dhātupāṭha*=√*chuṭ*—*chōṭayati* *splits, cuts*); টানে « *ṭānē* » *pulls* (caus. < √*tan*); তারে « *tārē* » *saves* (*tārayati*), beside তরে « *tārē* » *crosses, is saved* (*tarati*); +তাএ, তাওয়ে « *tāē*, *tāwē* » (*tāpayati*); ধারে « *dhārē* » from earlier উধারে « *udhārē* » *borrowes, remains a debtor* (*uddhārayati*), besides ধরে « *dhārē* » *holds*; থোয় « *thōy* » *places* (*sthāpayati*); MB. নোঙে « *nōñē* », N.B. নোয় « *nōy* » *bends* (« *nāmayati* », confused with « *namati* »); পায় « *pāy* » (\* *prāpayati*), in the sense of « *prāpnōti* »; পসারে « *pāsārē* » *extends, spreads out* (*prasārayati*); পারে « *pārē* » *is able, succeeds* (*pārayati*); পূরে « *pūrē* » (*pūrayati*); ফাড়ে « *phārē* » *splits* (*sphātayati*); বাহে, বায় « *bāhē*, *bāy* » (*vāhayati*); বাটে « *bāṭē* » *pounds (spices) with a stone roller* (*vartayati*); বারে « *bārē* » *shields, stops* (*vārayati*); MB. ভারে « *bhāyē* » *appears* (*bhāvayati*), beside MB. হো়এ « *hōē* » (*bhavati*); মারে « *mārē* » *kills, strikes* (*mārayati*), beside মরে « *mārē* » (\**marati* = *mriyatē*); মাপে « *māpē* » *measures* (old *sts.* = \**māppēi* < *māpayati*: cf. Hindī *nāpe* *measures* = *nāppēi* = *jñāpyatē*); মোহে « *mōhē* » (*mōhayati*); রঁধে « *rādhē* » *cooks* (*randhayati*); টালে « *ṭalē* (*ṭalayati*), beside ঢলে « *ṭalē* » (*ṭalati*); সারে « *sārē* » *repairs* (*sārayati* *arranges, nourishes*) besides সরে « *sārē* » *moves, goes to* (*sarati*); হারে « *hārē* » *is defeated* (*hārayati*) beside হরে « *hārē* » *takes away, steals* (*harati*); cf. *dēśi* ঢালে « *dhālē* » *pours* beside ঢলে « *dhālē* » *reels*; etc., etc.

621. A number of roots, which do not at all look like secondary formations, cannot be traced to any OIA. (Sanskrit) form;

although it is extremely likely that they are in most cases *t�hs*. Analogous forms occur in the « dhātu-kōṣas » in some cases, but that is no help in determining the origin. A few resemble Dravidian roots of similar meaning, and these may be of Dravidian origin: e.g., ἔδει « ēr = ēd » give up; நடு « nār = nad » move, walk (< OIA. nṛt dance > MIA. nat, nad ?); குடு « kud » leap (cf. Skt. kūrd); முடு « muṛ = muḍ » fold, wrap; dialectal ஶப்று « sāpār = sāpad » eat, gobble up, finish (e.g., தாது ஶப்றான் « bhāṭaśāpārāñā » finishing one's meal of rice): roots exactly similar in form and meaning to all of the above are found in Tamil. Roots that would come under this group of obscure etymology would be, among others—

« அாச் āc guess; அாடி āṭi tighten; காச் kāc MB. dress, NB. wash clothes; கூடு kūr pound; கூடு kūd carve; ஖ஸ khās slip off; ஖டி khāṭ work, labour, put money on a trade, or lend at interest (in the last sense a late Skt. « √khaṭṭ » has been found: see Jñānēndra Mōhan Dās's Dictionary, under ஷட்டான்); ஏடு khūṭ scratch, rub, rub gently with the finger-tips or nails, peck with the beak; ஞல் khul loosen, open, open bolt; ஗ாந் gād ram in; ஘ிர் ghir surround; ஘ுட் ghuc come at an end, be finished, cf. Assamese ஘ுட gus enter; டட் cāṭ be angry, get ruffled or cracked; சாக் cāh look at, ask (OIA. « eakṣ » ?: cf. Asōkan « eaghati » = strives, wants < OIA. « \*eagh » = IE. root ?); சாச் cāc scrape; சாடி cāṭ lick (OIA. caṣṭa. √eakṣ ?); சாப் cāp press; சீக் chāk strain; சீடு chāṭ clip off; சாப் chāp print, press; சிப் chip hide; சூடு chuṭ run; ஜோக் jōkh measure; ஜூட் juṭ, ஜூல் jul meet together; ஜல், ஜுல் jhāl, jhul hang; ஜூக் jhūk lean out; ஜீப் jhāp plunge; ஜால் jbāl mend a metal pot, clean a well; ஜூஜ் jhūj ooze; டெஸ் tās drip (onomat. ?); டெஸ் tās be finished, die; டீக், tēk, டீக் tēk, டீக் tēk, டீக் tēk endure, repair; டாக் tāk taste (cf. டாக்ரா tākgrā palate); டிப் tip pinch with the fingers; டேல் thēl push; தாக் dāk call, shout; தூர், தூக் dub, bur sink, drown; தார் tār hustle, pursue; தூக், தூர் thur, thur mince (cf. thurv kill); பட்ட be in agreement; பிங் plj card cotton; பூக் pur burn (cf. Skt. √put); பூத், பூது put, pūt bury; ஫ிர் phir turn; வாச் bāc live (Skt. vāñc); வாச் bāch select, choose; விஹா, விஅ bi(h)ā give birth to; தாஸ் bhās float (< Skt. bhās shine

> appear ?); রহ rāh remain (? arh); রট rāt spread (as a rumour); রড rār run; লড lār fight; লুষ, লুশ lus, luṣ gorge oneself; সঁট sāt ibid, also tighten; ইট hāt walk (cf. Skt. hiṇḍ, Gujarātī hēḍ-vū); etc.

**622.** MIA. borrowings from Sanskrit may be included under the inherited or the proper *tbh.* element of Bengali. After Bengali emerged from Māgadhi Ap., as a distinct speech, and literature began to be produced in it, the habit of borrowing from Sanskrit obtained a greater impetus. A practice grew up in Bengali literature from very early times of adopting Sanskrit roots bodily into the language, like the adoption of *ts.* nouns and participles. This practice received a fresh support during the age of Vaiṣṇava renaissance in the 16th century, and again in the 19th century, in the hands of modern poets like Madhusūdan Datta. This use of Skt. forms, even when their *tbh.* counterparts were in actual use, is not peculiar to Bengali alone: we find it in the medieval vernacular poetry of all Aryan India. It was the inevitable effect of a revival of classical studies—in grammar, literature, law, theology and philosophy, the results of which were brought to bear upon the vernaculars. The revival of Brahmanic studies strengthened the position of Sanskrit, which had throughout retained a living touch with the vernaculars as their natural feeder. We thus find from Middle Bengali times *ts.* roots or bases like « আহ্বান াhwa, কীর্তি kirtta, গর্জ garja, চুম্ব চুmba, তিষ্ঠ tistha, ত্যজ্য tyaja, ধ্যা dhyā, ধ্বন ধ্বন dhwan, নম nam, নির্ম নির্মā (স/স., নিরমা nirāmā), নির্ণয় nirṇi, নির্মিতি niści, প্রণাম prāṇam, বদ্ধ বদ্ধ (vad), বন্দ বন্দ banda (vand), বর্জ বর্জ barja (varj), বর্ত বর্ত barta (vart), ভজ্জ ভান্জা, ভর্ত্তা ভর্ত্তা bhartsa, ভিত্তি bhid, মৰ্দ মৰ্দ marda, যজ্ঞ যাজ্ঞ yaj, রাজ্য rāj (the last two may be *tbh.*s.), শেভ শোভ sōbh, সেব সেব (sēb a), স্মর smar, হিংস হিংসা > etc., etc. to be in common use, side by side with *tbh.* equivalents in many cases. These *ts.* roots, although understood by most people, figure mainly in literature, and only a few have been adopted in the colloquial, like তিষ্ঠে « tisṭha » (cf. তিষ্ঠাইতে দেওয়া tisṭhāitē dēwā > Standard Coll. তিষ্ঠুতে দেওয়া tisṭhutē dēwā=let one remain at peace), বর্তে « barta » (cf. বাচিয়া বর্তিয়া > বেচে-ব'চে থাকা bāciyā-bātiyā > bēcē-bōrtē thākā to remain alive and well, বর্তিয়া > ব'চে যাওয়া bātiyā > bōrtē jāwā to feel saved, to get a new existence). The number of such common *ts.* roots comes up to some 100; but it is often difficult to determine

whether they are *ts.* roots, or denominatives, as frequently the base in Bengali shows « guna » of the Skt. root characteristic of noun forms.

### (2) Secondary or Derivative Roots.

**623.** The Causatives are the most characteristic of this class. They have the affix « -ā- » which comes from the Second MIA. « -āva- » = First MIA. « -āpa- », which is only a generalisation of the « -pa- » affix found in the causative of some OIA. roots ending in « -ā », e.g.,  $\sqrt{dā} > dā-pa-ya-$ ,  $hā > hā-pa-ya-$ ,  $mā > mā-pa-ya-$ ,  $yā > yā-pa-ya-$ ,  $sthā > sthā-pa-ya-$ ,  $snā > snā-pa-ya-$ , etc. Their verbal nouns as well as infinitives and passive participles have the affix আন, আনো « -ānā, -ānō ». Almost every primary root and denominative which is not already a causative in form can have its causative in « -ā- ». A number of denominatives (especially in the case of bases in three syllables, ending in ত « -r- », original or affixed) have become obsolete, their places being taken by causative formations which are used without causative meaning: e.g., আকাড় «  $\ddot{ākāṛṣ}$  » *embrace, hold with both hands* (*anka-da* : cf. *anka-pālikā* *embrace*), proper verb form আকাড়ে «  $\ddot{ākāṛṣē}$  », causative extension \* অঁকাড়াও  $>$  অঁকড়াও «  $\ddot{ākāṛāē}$  >  $\ddot{ākāṛāy}$  » ; উখাড় «  $ukhāṛṣ$  », উখাড়ে «  $ukhāṛē$  » > \* উখড়াও,  $\ddot{ākāṛāy}$ , উখড়োয় «  $*ukhāṛāē$  >  $ukhāṛāy$ ,  $ukhāṛāy$  » *roots out*; উজাড় «  $ujāṛṣ$  » *desolate*, উজাড়ে «  $ujāṛē$  » > \* উজ্জাড়াও «  $*ujāṛāē$  », উজড়াও, উজড়োয় «  $ujāṛāy$ ,  $ujāṛāy$  » *makes desolate, ransacks*; উগার «  $ugāṛṣ$  » > উগারে «  $ugārē$  », \* উগারাও «  $*ugārāē$  » > উগরায়  $\ddot{ākāṛāy}$  «  $ugāṛāy$ ,  $ugāṛāy$  » *vomits*; তাকে «  $takē$  » *gazes* (*tarkayati*) > তাকায় «  $takāy$  »; হাঁকাড়ে «  $hākāṛē$  » *shouts, hits* > \* হাঁকাড়াও «  $*hākāṛāē$  » > হাঁকড়াও, «  $hākāṛāy$ , *beside* হাঁক্রায় «  $hākāṛāy$  » *belabours*; etc., etc. The causatives present a numerous class in Bengali, the proper « -ā- » causatives numbering some 400.

**624.** Denominatives are made up from nouns and participle adjectives, these nouns and participles being treated exactly like roots. A vowel ending the noun or participle base is dropped. IA. developed early this habit of making roots out of nouns and adjectives, without adding the denominative-forming affix « -aya- ». According to the Skt. grammarians (who doubtless were guided by vernacular Prakrit usage in

this respect), any noun-stem could be used as a verb-stem. With the decay of inflected past forms, the past participles became, after the present base, the most important. In some cases there was a very great difference in form between these two outstanding parts of the verb. The levelling tendency in MIA. simplified matters by making the passive participle the basis of a new present formation, which in course of time ousted the old present: since in Late MIA., the latter often appeared (from point of view of MIA.) irregular and peculiar. Equally frequently the reverse process took place. Thus, OIA. « upaviśati » and « upaviṣṭa- » gave MIA. « uvaīsaī » and « uvaīt̄tha », but « uvaīt̄tha » assumed the function of the present, so that in NIA. (Hindostānī) we have present « baithē » (rather than « baiśē »), and pass. participle « baj̄hā »; and in the OIA. group « śpñōti, śrūta- > MIA. « sunāi, sudō > suō », « sunāi » made « suō » obsolete by bringing about the creation of a new form « suniō », so that in Hindostānī we have present « sunē » and pass. part. « sunā ». The simple « -a » verbal noun, as presenting the root in a very intelligible form, also often supplied a basis for the new conjugation.

The Köl and Dravidian speeches might have been responsible for the wide development in IA. of the practice of forming denominatives. Anyhow, it was a late MIA. characteristic which has come down to Bengali. Denominatives in « -ā- » are now freely formed, even from foreign nouns and adjectives.

**625.** As for the *tbh* (and *dēśī*) denominatives of Bengali, absence of literary records does not allow us to fix with certainty when they were first employed as verbs—whether in the pre-Bengali period, or in later times. The forms without « -ā- » seem to be earlier. Examples are : « উঁচো ugē rises (uggaa, udgata); উজাত্তে ujāre clears (\*ujjhāda, \*ud-jhāta with trees cut down); MB. উনাএ unāē gets hot (uṇha, uṣṇa); উবে ub(h)e is volatile (ubbha, ūrdhvā; ubbhāa, ubbhṛta); MB. উমাএ umāē steams (umha, uṣma); কাহে, কষ kahē, kṣy (kahēi, kathayati); কাড়ে kārē snatches away, robs (kadḍha, kṛṣṭa); কামায় kāmāy earns, shares (« kamma, karma »: Second MIA. « kammaī » cuts; connexion with Pali « kappēti » trims, as suggested by R. Morris, 'Pali, Sanskrit and Prakrit

Etymology,' Transactions of the 9th International Congress of Orientalists, London, 1893, Vol. I, pp. 494-495, not likely); কালায় kālaya gets black, blackens (kāla); কুড়ায় kūrāy gathers (kūḍā, kūṭa); খোয়ায় khōwāy gets lost (\*khāwa, khaa, kṣaya); গাড়ে gāṛē buries (dēśi gadḍa: ? < garta); গাবায় gābāy vaunts (gabba, garva); গাহে, গায় gāhē, gāy sings (gāhē, gāthayati < gāthā); গুছায় guchāy arranges (guecha); ঘোলে ghōlē mixes thoroughly as liquids (ghölla = ghūrnā); ঘামে ghāmē sweats (gharma); চিনে cīnē recognises (cīhna); চোরায় cōrāy steals (cāura); চেতায় cētāy comes to senses (cittāvēi, citta-); চিরে cirē slits, pierces (cīara, cīvara); ছাদে chādē grips, holds tight, binds (chanda); ছিনে chinē snatches away (chinna); জিতে jitē wins (jitta < jitā); ছিটায় chīṭāy sprinkles (chīṭā-,? kṣipta); জুতে, জোতে jutē, jōtē hitches ox or horse to vehicle (jutta, yukta); টকে tākē gets sour (takka=takra); ঠাটায় ṭhāṭāy stiffens (ṭhadḍha < \* ṭhatṭha: stabdha ?); দাঢ়ায় dāḍāy stands (dandāyatē); তাকে tākē gazes (takkēi, tarkayati); তাতে tātē gets hot (tatta, tapta); তিতে titē gets wet (tinta, √tim); থামে thāmē comes to a standstill, stops (thambha, stambha); থিরায় sthīrāy (sthira) থিতায় thitāy subsides as a residue (sts. ? < sthitā); দুখায় dukhāy pains (dukkha, duḥkha); ধূমায়, ধৈঁয়ায় dhūāy, dhōāy smokes (dhūwa, dhūma); পাকে pākē ripens (pakva); MB. পতিয়া, পইতায় pātiyāē, pāitāy believes (sts. < pratyaya); পইতে pāiṭhē enters (pāiṭha, praviṣṭa); পিটে piṭē beats (pitta, pistā); বাঁকে bākē (bajka = vakra); বাঁধানে bākhānē explains, praises (bakkhāṇa, vyyākhāṇa); বাজে bājē is played, as music (vajja, vādyā); মাগে, মাঙ্গে mā(ŋ)gē begs (maggaī, maggeī, mārgati, mārgayati); মাতে mātē becomes intoxicated (matta); মৃতে mūtē (mūtra); মুদে mudē closes, as eyes (mudrā seal); রুঢ়ে rūthē angers (ruṭṭha, ruṣṭa); রুধে rudhē prevents, forbids (ruddha); শুধায় sukhāy dries (suška); সেঁতায় sēṭāy gets wet (\* sinta, sitta < sikta) \*, etc., etc. *Tadbhara* derivatives of NIA. origin in Bengali can be exemplified by forms like আঁধারা ādhārā (andhakāra); আউলা, এলা āulā, ālā, ēlā make dishevelled (ākula); আলগা ālāgā loosen (ālagga, ālagna); আঁতকা āṭṭkā be seized with a sudden fright (ātanṭka); ইটি itā stone, hit with pellets (iṣṭaka); উঁচি ūcā raise, level as a weapon (uecca-); আগুআ, আগুয়া, আগা, এগো āguā, ālgā > ēgō advance (agra+uka); কষা kaṣā tighten (karṣa); কাঁধি kādhā to shoulder (skandha); কিলা kilā

*give blows with the fist* (*kil& fisticuff*) ; খেঁজু khēñrā *strike with a broom* ;  
 খেপা khēpā *become mad* ; গালা gālā *abuse* (*gāli=garhikā*) ; চাপড় cāpḍdā  
*pat* (*cāpḍr̥ patting with the flat of the palm*) ; ঘনা ghānā *deepen* (*ghana*) ;  
 ঘূমা ghumā *sleep* (*ghum& sleep* : see p. 482 *supra*) ; পেঁজা gōjā *tuck inside* (cf.  
*gōj& a peg*) ; চড়া cārā *slap* (*cār& a slap*) ; ছেঁচা chēcā *wash after evacuation*  
 (*sāuca*) ; জুতা jutā *strike with the shoe* (*jutā shoe*) ; বাঁটা jhātā *strike with*  
*a broom* ; ঢেউআঁ dħēuā *dash water in a tank or stream* (*dħēu ware*) ; তলা  
 tālā *sink deep* (*tala*) ; তাসা tāsā *play cards* (slang : *tās& playing cards*) ; তেওড়া  
 tēorā *make deformed* (*tri-vṛta*) ; দাতা dātā *gnash teeth, show teeth* (*danta*) ;  
 MB. নিন্দা nindā *sleep* (*nindrā*) ; পাদা pādā *break wind* (*parda*) ; পাছুআঁ > পেছো  
 pāchuā > pēchō *fall back* (*paścāt*) ; বিষা bi-ā *fester as a wound* (*vīsa*) ;  
 ভাঙ্গা bhāñ(g)ā *break* (*bhangā*) ; রাঙ্গা rāñ(g)ā *redden* (*rañga*) ; লাঠি lāṭhā  
*belabour with sticks* (*lāṭhi* < *yaṣṭi* ? < \* lak-ṭhi = \* lak-, \* lag- [cf. *lak-uṭa*,  
*lag-uḍā* + *yaṣṭi*] ; শানা sāñā *whet* (*sāñā*) ; হাতা hātā *receive in hand to one's*  
*advantage* (*basta*) ; MB. হুমা humā (*hōma*) » , etc., etc., The noun base not  
 infrequently ends in < -u > : thus আঁশুয়া > এগো < āg-ū-ā > ēgō » *advance*,  
 পাছুয়া > পেছো < pāch-u-ā > pēchō » *recede*, পারুয়া > পেরো < pār-u-ā  
 > pērō » *cross*, etc.

The *tbh.* derivatives convey mainly an instrumental or acquisitive sense.

Common *tbh.* roots of this class number some 200 in Bengali.

**626.** Sanskrit denominatives, in *ts.* or *sts.* forms, like Skt. roots and participial forms, occur from the oldest Bengali onwards. Almost any Sanskrit noun, preferably in < -a >, which is not the name of a concrete object, can be used as a root in the language of Bengali poetry. About 100 denominatives of this class are in common use in the Bengali. A few of this have developed characteristic vernacular or *sts.* forms from MB. onwards, e.g., তেয়াগ < tēyāgā > < < tyāga >,  
 বরণ < bārāṇā > < < varṇa >, দরশ < dārāśā > < < darśa >, পরশ < pārāśā > <  
 < sparśa > etc.

Examples of *ts.* demonstratives: < agrasara, ādara, ādēśa, ākula,  
 āghāta, ānanda, ālāpa, āśīṣa, ucchēda, uttāpa, uddhāra, unmōca, ulanjā  
 citra, trasta, dvēṣa, dvandva, dāna, dīpa, nāda, nīrava, niścaya, niśphala,

nistāra, parihāra, pradāna, pranāma, pramōda, prasāra, prasāda, praśama (*ts.* root, *pra* + *śam* ?), puraskāra, bhāti, bhāva, vikāsa, vighōsa, vināśa, vistāra, vēṣṭa, rāga, yōga, lēpa, saṁhāra, santōṣa, stuti > etc., etc.. we have even a word like « *prati-vidhītsā* » turned into a denominative root, অতিবিধিস « *prāti-bidhītsā-* », in poetry (*e.g.*, in Madhusūḍan Datta and in Giriś Chandra Ghōsh).

**627.** Foreign denominatives number barely 20. They are almost all from the Persian (or Perso-Arabic) : *e.g.*, অর্শ « *ärśā* » *be entailed as property* (*ärṣah*) ; কাবলা « *kāblā* » *make agree or accept* (slang : < *qabūl* ) ; কুলুপা « *kulupā* » *lock up* (*qufl = lock*) ; খতা « *khātā* » *cast accounts, estimate* (*xatt*) ; থামচা, থিমচা « *khāmṣcā*, *khimṣcā* » *pinch* (Ar. *xams* = *fire* : *pinch with the fire fingers* ?) ; গুঁতা « *gūtā* » *butt with horns* (*gutah plunge*) ; গুজরা « *gujṛā* » *pass time* (*guḍār*) ; জম « *jām* » *gather*, জমা « *jāmā* » *collect* (*jam⁹*) ; MB. তপাস « *tāpās* » *seek* (*tafaḥħus* : see *supra*, p. 213, footnote 2) ; তো়া « *tōā* » *flatter* (? *tawā-jah*) ; দাগ, দাগ « *dāg*, *dāgā* » *mark* (*dāg*) ; নরমা « *nār̥mā* » *be soft* (*narm*) ; গরমা « *gār̥mā* » *be hot* (*garm*) ; কস্কা « *phāṣṣkā* » *slip from hold* (*fasx*) ; বদলা « *bād̥lā* » *change* (*badl*) ; MB. মানা « *mānā* » *forbid* (*man⁹*) ; সাবাশা « *sābāśā* » *cry bravo* (*sābāś < sād-bāś*) ; etc., etc.

There are no denominatives proper from the other foreign sources, Portuguese and English. English verbs like *edit*, *manage*, *quote*, *note*, *agree*, etc., as well as nouns and adjectives, are freely compounded with Bengali roots like « *kār*, *dē* » to form verbs, in the familiar speech of persons educated in English, but such words by themselves are not used as verb roots, with or without the « *-ā* », as in the case of Persian words. Slang is responsible, however, for one or two genuine denominatives, *e.g.*, in student slang in Calcutta one can hear পাসানো, *পেছনো* < পাস্যানো « *pās-ānō*, *pēsunō* < *pās-u-ā-nā* » *to pass* < English *pass*.

### 628. Compounded and Suffixed Roots.

There are over 125 roots which are derivative, being made up of either two roots combined, or a root preceded by a noun or adverb, or in the majority of cases, of a root (primary or denominative)

modified by a suffix. Instances of the first type (two roots combined) can be easily analysed. The second root which is suffixed is commonly আসা, আইসা < *ā(i)sā* > come. Thus, we have দেখসো, দেখসা < *dēkhā-sē*, *dēkhā-sā* > come and see found from early MB. times, = দেখ + আইস < *dēkh+āis* > see and come, and ŠKK চড়সা < *cārāsā* > come and mount ( $\sqrt{cār} + \sqrt{āis}$ ). We have also occasionally a similar combination with শি from গিয়া < *gā* < *giyā* > (করগা, গা ওগা < *kārā-gā*, *khāo-gā* > go and see, go and eat). We have beside a combination of রহ <  $\sqrt{rāh}$  > to remain and সহ <  $\sqrt{sāh}$  > to endure, in the imperative only—contemptuous র'স্ত < *rōṣṭ* >, ordinary রোসো < *rōsō* > < *rāhā sāhā* > wait, in the Standard Colloquial. The above forms strictly speaking are not roots,—they are merely compounded forms, contracted and stereotyped. Besides, they do not occur in all persons and tenses, but only in the imperative. Of the second type (noun or adverb and root) are found some instances, also from eMB., like আগছা < *āguchā* (< \**āguṣā*, *āgu*+ $\sqrt{āis}$ ) > advance, রাকাড়া > রাকড়া < *rā-kārā* > *rākāṛā* > shout, raise a shout, and the negative forms নার < *nār* < *nā*+*pār* > fail, not succeed, নহ < *nāh* < *na*+ $\sqrt{*ab}$ , *hā* > not be.

The periphrastic forms composed of a noun (*tbh.*, *ts.* or foreign) and a root like < *kār* > do, like দর্শন করা < *dārśāṇḍ kārā* > to see, গমন করা < *gāmāṇḍ kārā* > to go, do not come under this.

**629.** The bulk of these secondary compounded roots are suffixed. We have these suffixes: (i) ক < -*k-* >, (ii) ট < -*t-* >, (iii) ড < -*t-* >, (iv) র, ল < -*r-*, -*l-* >, and (v) স, চ < -*s-*, -*c-* > (cf. G. A. Grierson, 'On the Irregular Causals in the Indo-Aryan Vernaculars,' JASB., 1896, Part I). These modified the meaning of the original root or denominative base in various ways,—as an intensive or continuative, frequentative or approximative affix. Corresponding forms occur in the other NIA. speeches. These roots may again be described as denominatives from nouns ending in < -*k-*, -*t-*, -*ḍ-* (-*r-*), -*r-*, -*l-*, -*s-*, -*c-* >.

**630.** Of these affixes, (i) ক < -*k-* > in Bengali indicates, generally, the suddenness of the action, or its continuity: it is thus an intensive. Its origin has been discussed before (see *supra*, pp. 679 ff.). Examples in Bengali: চুক < *euk* > be at an end (\**eyut-kṛ*); কঠিচকা < *kōṭīčkā* >

**wrinkle** (kuñc); খিঁচকা « khīcakā » *pull, nag* (cf. খেঁচ khēc *pull* : ? « krakṣyati < √kr̥ṣ >, whence MIA. « kacchai, kañcaï », vowel influenced by « ā-krakṣati > \*ākacchaï > āyañcaï > NIA. aīcaī »); চলকা « calakā » *spill, as water from a vessel full to the brim* (cal); চুলকা « culakā » *scratch* (√cal ? cf. চুলবুল cul-bul *wander*); চানকা « cāṅkā » *glance, make eyes, draw the eyes as in a picture*; (? \*cayana-kka, cētana-); চুমুকা « cumukā » *sip, touch vessel with lips* (cumb); ছিটকা « chitṭkā » *sprinkle* (chitṭ = *drop, sprinkling*); so চমকা « cāmṛkā » *be bright, dazzle, be startled as at a sudden flash or noise*; জমকা « jāmṛkā » *be showy*; টপকা « tāpṛkā » *jump over*; টসকা « tāsṛkā » *drip, run out*; ঠমকা « thāmṛkā » *caper, walk with a dancing gait*; তুলকা « tūlṛkā » *wave a fly-flap*; ডডকা « tāṛkā » *be in fits*; থমকা « thāmṛkā » *be at stand-still*; থকা « thākā » *ibid*; থাকা « thākā » *remain*; দমকা « dāmṛkā » *come as a gust of wind*; ধমকা « dhāmṛkā » *rebuke*; নড়কা « nāṛkā » *move about*; বথ < বহকা « bākhā < bāhṛkā » *be borne away* > *go astray*; ভড়কা « bhāṛkā » *be confused, fear* (bhraṣṭa); ঘচকা « mācṛkā » *break with a noise, sprain*; মুচকা « mucṛkā » *smile, wrinkle*; লটকা « lāṭkā » *hang*; সটকা < সড়কা « sāṭkā < sarṣṭkā » *slink away* (sṛta); হড়কা « hāṛkā » *slip one's foot, be slippery*; হেঁচকা « hēcṛkā » *drag*; etc.

A few words of other origin have come in line with these « -k- » denominatives: e.g., আঁতকা « āṭkā » *be filled with sudden fear* (sts., < ātañka, ā-√tañc); টসকা « usṛkā < uksā » *trim a lamp, incite* (?) utkarsa); কড়কা « kāṛkā » *rebuke* (cf. « kaḍakkha- = katākṣa- », whence NIA. [Hindi etc.] « karḍkhā » *war-song* < *challenge* < *glance of contempt*: confusion with, or influence of কড়া « kārā » *stiff likely*); ফসকা « phāṣṛkā » *slip*, from the Persian (see p. 884); চটকা « cāṭkā » *rinse* by metathesis from কচটী, কছটী « kāc(h)ṣṭā » (next para.); etc.

**631.** The affix (ii) ট « -ṭ- » is the « -ṣṭ- » affix (No. 41), noted at pp. 684 ff. *supra*. It indicates continuity of the action. Examples: কছটী, কষটী « kāṣṭṭā, kāṣṭṭā » *rinse* (karsa-varta-); ঘষটী « ghāṣṭṭā » *rub along* (gharsa-varta-); চিপটী « cipṣṭā » *press down*; so জাপটী « jāpṣṭā » *embrace, hold with both arms*; ঝাপটী « jhāpṣṭā » *struggle* (MIA. \*jhappa, jhampa); দাপটী « dāpṣṭā » *be aggressive* (darpa); পাশটী « pāśṭā » *pass by* (pārvava-

varta-); রপটা < rāpṭā > *gad about*; লপটা or লিপটা < lāpṭā, lipṭā > *stick on*, etc. Cf. MB. নেউটা < nēutā > *return* (nivartt-) which is of different origin.

**632.** (iii) The ড < -ṛ- > affix is the pleonastic ত < -ṛ- >, discussed before as Formative Affix No 46 (pp. 689 ff.) The sense is sometimes intensive, but generally it is merely pleonastic. In some instances the sense is continuative or approximative, and then the ত < -ṛ- > would seem to be connected with < √vṛt >, either as a phonetic modification of < -t- < vattā, vṛtta > above, or it is the same ড < -ṛ- > as Formative Affix No. 44 (pp. 687-688 *supra*): thus ঘেষড়া, ঘষড়া < ghēṣṭrā, ghāṣṭrā >, দাবড়া < dābāṛā > *beside* ঘষটা < ghāṣṭā >, দাপটা < dāpṭā > *above*; হেচড়া < hēcṣṭrā > *pull*, see *supra*, p. 878; in আওড়া < āorā > *repeat*, তেওড়া তোবড়া < tēorā, tōbāṛā > *disfigure*, and MB. নিবড়া < nibāṛā > *finish*, we have the OIA. < √vṛt >. Examples of < -ṛ- >: আংকড়া < āṅkṣṭrā > *embrace* (see *supra*, p. 880); আচড়া < ācṣṭrā > *scratch*, (? √aīc *wander*, bend, curl + -da-); কুঁকড়া, কোঁকড়া, কুঁচড়া < kūkṣṭrā, kōkṣṭrā, kūc-, kōc- > *crumple, wrinkle, be curly* (kuñc); খেদড়া < khēdāṛā > *hustle* (cf. খেদা < khēdā > *drive away*, Hindī and Bengali noun < khēdā > 'khēddah,' *enclosure to which wild elephants are driven and caught*: *sts.*, < < √khid > *torment*?); ফিচড়া < khīcṣṭrā > *feel tense or annoyed* (see < khīcṣṭkā >, *supra*, p. 886); ঘাবড়া < ghābāṛā > *be frightened* (connected with ঘাপটা < ghāpṭā > etc., p. 685); চাপড়া < cāpṣṭrā > *slap, pat* (carpaṭa); চিমড়া < cimṣṭrā > *dry up, reduce to skin and bone* (√cip > \*civ > \*ciw, cim); চুমড়া < cumṣṭrā > *flutter* (cumb), also চুমরা < cumṣṭā >; জোবড়া, জাবড়া < jōbāṛā, jābāṛā > *blotch* (cf. জবজবে < jābājābē >, *onomatopoetic to denote the idea of stickiness and moisture*); তাংড়া, তামড়া < tāṅṣṭrā, tāṁṣṭrā > *save up, store up* (Yōges Chandra Vidyānidhi, Bengali Dictionary, VSPD., gives a late Sanskrit < 'tryaṅgata-' śikya-bhēdē > = Marāthī < tāṅgaḍ > *bind the feet*: Monier Williams, < tri-angāta > *three strings suspended to either end of a pole for carrying urdens*). থাবড়া < thābāṛā > *slap* (cf. থাবা < thābā > *paw*); থুবড়া < thubāṛā > *give a blow, fall down on the face* (Dhētu-kōṣa √thurv kill: cf. থুড়া < thurā > *bound, cut into small bits*); দাদড়া < dādāṛā > *be aggressive* (dvandva+ta), also দাদলা < dādāllā >; হুমড়া < dumṣṭrā > *bend, crumple* (< ?); দৌড়া < dāurā > *run* (drava+da); নিঙড়া < ningṣṭrā < ningāṛā > *wring wet clothes* (niñj); নেংড়া < nēngṣṭrā > *limp* (cf. নেঙ্গ < lēñ[g]ṣ > *foot, kick*); নেবড়া < nēbāṛā

*smear (sts. < lēpa) ;* পাকড়, MB. পাখড় « pākāṛ, -khāṛ » *seize* (? parka + -da : √ ptc mix, unite) ; পাছড়া « pāch(u)r̥ » *dash, toss, clean corn* (< ?) ; মুচড়া « muc̥r̥ā » *wring* (cf. mac̥kā, muc̥kā : onomatopoetic) ; মুষড়া « muṣṭr̥ā » *be dispirited* (cf. muṣ *steal, rob* : cf. the expression « hanta musitāḥ vayam » *alas, we are done for!*) ; রংগড়া « rāg̥r̥ā » *rub* (< beat? cf. late Sanskrit « drakaṭa, dragada » *drum* ; Yogeś Chandra Vidyānidhi, Beng. Dictionary) ; হাঁকড়া « hāk̥r̥ā » *drive* (MIA. hakka shout) ; হাতড়া « hāt̥r̥ā » *feel with the hand* (hasta) ; হমড়া « hum̥r̥ā » *push through eagerness, fall face forwards* (connected with হামা « hāmā » *crawl*) ; etc., etc. It would be seen that the « -ṛ- » roots are mostly very obscure, and these suffixed forms or roots, a most characteristic element inherited by NIA. from MIA., constitute a problem of prime etymological importance. From these roots with the ণ « -ṇ- » affix are to be distinguished roots like আছাড় « āchāṛ » *dash, throw down with force* (ā-chṛd) ; উজাড় « ujāṛ » (see page 881, *supra*, with a variant আজাড় « ājāṛ » *empty a vessel*) ; উপাড় « upāṛ » (*utpāṭayati*) ; etc. : but উখাড় « ukhāṛ » may represent « utkhāṭa + -da ».

633. (iv) The affixes র, ল « -r-, -l- » represent the OIA. adjectival and pleonastic affix occurring both as « -ra, -la » (see *supra*, pp. 697-698). In compounded denominatives, the force is that of approximation or resemblance, or connexion. The « -r- » form in some instances may be a modification of ণ « -ṇ- » above ; and in other cases it may be for « -āṛ » formative < -ākāra >, implying resemblance (Affix No. 18, *supra*, pp. 668-669). Similarly the « -l- » form may represent the adjectival « -āl̥ » (No. 19, p. 669). Examples : আগলা « āg̥lā » *watch* (ar̥ga-la-) ; উচলা, ওচলা « ūc̥lā, ñch̥lā » *sift* (uñch) ; খোসলা « khōs̥lā » *peel* (khōsā skin of fruit) ; চোমরা, চুমরা « cōm̥rā, cūm̥rā » *flutter* (cumb) ; চোবলা « cōb̥lā », ছেবলা « chōb̥glā » *bite as a snake* (cf. চোপ « cōp̥ » *blow* : see p. 482 *supra*) ; ঝাঁকরা « jhāk̥r̥ā » *shake* (see p. 479 *supra*) ; ঝামরা « jhām̥r̥ā » *be pale, dry up* (p. 480) ; ঠাহরা, ঠাহরা « ṭhār̥ā, ṭhāh̥r̥ā » *look over, scrutinise, examine a thing that is standing still* (ṭhāha, ṭhāwa < √sthā) ; ডুকরা « duk̥r̥ā » *shout, lament loudly* (cf. dāk̥ *shout*) ; থেতলা « thēṭlā » *pound, batter* (cf. থেঁত *thēṭa* *pounded*) ; নাগলা « nāg̥lā » *reach* (lāga + -āla-) ; দাদলা « dāḍlā » *swagger* (dvandva) ; পিকলা « pik̥lā » *spit, squirt out*.

(onomatopoetic); ফুসলা « phuslā » *wheedle, lead astray by whispering in the ear* (onomatopoetic); ফুকরা « phukkrā » *shout out, lament loudly* (onomatopoetic: « phukka » *puffing, blowing*, cf. Hindī « pukār » *shout*); বাওলা « bāolā » *fan, winnow* (vāta); হাকরা, হাক্করা « hākkārā, hākkārā » *shout, give a blow* (MIA. hakkāra *shout*); হামলা « hāmhlā » *be eager, fall down on all fours in eagerness* (cf. hammati *crawls*); etc., etc. This affixed « -r-, -l- » of course is not to be confused with original « -r-, -l- » in forms like আঙলা « āṅgglā » *to use fingers* (anguli); পটভরা « ubhārā » *bring down, pour* (udbhārayati); নিকলা « niklā » *get out* (nih + kp); বাতলা « bātlā » *explain* (from Hindostānī, a causative in « -lā- »); etc.

**634.** (v) The affix ন, চ « -s-, -c- » is the affix of resemblance (No. 55, p. 699). Examples with it are কপচা « kāpচā » *chatter like a bird* (kłp); শুমসা « gumঁsā » *be stuffy* (< grīṣma? : cf. শুমট « gumāṭ » *stuffy weather*); so চকসা « cākঁsā » *become clear, as sky* (see p. 699); ছুপসা « eupঁsā » *be lean, be hollow* (p. 699); ঝলসা « jhālঁsā » *roast* (see p. 479); লেঙচা « lēngঁcā », নেঙচা « nēngঁcā » *limp* (see p. 699); ধামসা « dhāmঁsā » *rummage as a bed* (cf. M.B. ধামালি « dhāmāli » *horseplay, sport*); বালসা « bālঁsā » *get fever as a baby* (bāla); ভাপসা « bhāpঁsā » *smell foetid* (bāspa); ভেঙচা, ভাঙচা « bhēngঁcā, bhāngঁcā » *make faces* (bhājga); etc., etc.

**635.** Onomatopoetics also fall under denominatives. These can be classed under two heads—Onomatopoetics Proper, and Roots Reduplicated or Repeated, which produce a jingle. Onomatopoetics Proper can also be either simple or reduplicated.

It is evident that in the early stages of IA., onomatopoetics were not so common. Compared with the Vedic, the MIA. dialects are specially rich in onomatopoetics.

Vedic has registered about a dozen onomatopoetics formed by repeating a root to produce a jingle, or by compounding an imitative word with a root of action or existence (cf. Whitney, Sanskrit Grammar, § 1091; see also *supra*, pp. 175, 200). Onomatopoetics were included in the category of *dēśī* words by Prakrit grammarians, as they cannot show counterparts in Vedic or Sanskrit. We have onomatopoetics

of two types in the speech of Ancient India (Vedic, Skt., and the Pkts.): *simple*, like the Sanskrit nouns « *jhaj-kāra*, *guñj-ana*, *kūj-ana* », Pkt. verbs « *jhanj-kārēi*, \**guñjai*, *kūjaï* »; and *reduplicated*, like Late Skt. « *khaṭ-khaṭāyamāna*, *maḍamaḍāyitā*, *pharpharāyatē* », etc., Pali « *halahalā*, *kinikināyati*, *capueapu* », etc., and Prakrit « *caḍapaḍanta*, *cuhičuhū*, *tharaha-ra-* », etc. It would be seen that in Sanskrit the onomatopoetics are treated as denominatives in « *-āya-* », but in MIA., we have the direct use of the stem as root.

Onomatopoetics of the reduplicating type are found in abundance in all NIA. languages. In Bengali, onomatopoetic reduplications are ordinarily used as adverbs, absolutely i.e., without any affix, and modify a verb of action : e.g., চক্র করে « *cākā-cākā kārē* » *glitters*; or they are employed as gerundives in « *-iyā* », also standing in adverbial relation to the verb of action, e.g., *কন্কনাইয়া* < *কন্ক’নিয়ে উঠে* « *kāngh-kānāiyā* » *kānghkōniē uthē* *gives a throbbing pain*. A group consisting of a reduplicated or simple onomatopoetic and a verb like *কর* « *kār* » *to do* may be regarded as a compound verb formation.

There are over 125 common onomatopoetics in Bengali which are used as verb-roots. The list of onomatopoetics given in Rabindra-nāth Tagore's 'Sabda-tattwa' comes up to 651, which includes words of all kinds that would come under this head. By change of the vowel, the same consonant group can be made to take numerous forms, which are slightly differentiated in meaning. Thus টক্টক « *tākā-tākā* » *tick of a clock*, টিক্টিক « *tikā-tikā* » *tick of a watch*, *nagging in a mild way*, টুকটুক « *tukā-tukā* » *gentle battering with a tiny hammer*, টাঙ্কটাঙ্ক « *tyākā-tyākā* » [tæktæk] *jangle, unpleasant remarks*, টিক্টাক « *tikā-tākā*, *tukā-tākā* » *gentle blows with alternation of sound*, টকাটক « *tākātākā* » *quick one after another*, etc. The proper significance and use of the onomatopoetic forms in the psychology and art of Bengali speech has been discussed by Rabindra-nāth Tagore in 'Sabda-tattwa' and by Rāmendra-sundara Trivedi in 'Sabda-kathā'.

#### Examples of Onomatopoetic Verbs in Bengali.

##### A. Onomatopoetics Proper :

(i) Simple : চিলা < cillā > shout ; চুঁয়া < cūā > scorch in cooking, be fried black ; টুপি, টুনা < tupā, tūnā > drip ; ফুক < phuk > whiff, smoke, puff ; ফেঁমা < phōsā > hiss ; হাঁক < hāk > shout (MIA. hakka) ; হাঁচ < hāc > sneeze (cf. O.B. < bhāñjī > as in Sarvānanda) ; etc.

(ii) Duplicated : কট্টকটা < kṭṭa-kṭṭā > sense of biting or breaking pain ; কট্টমটা < kṭṭa-mṭṭā > look with glaring eyes ; কড়মড়া < kṛḍ-mṛā > gnash one's teeth ; কুড়মুড়া < kuraḍ-muraḍa > chew something crisp ; কাচকাচা < kyāč-kyāčā > creak ; খটখটা khṭṭa-khṭṭā > rattle, knock ; গড়গড়া < gṛḍ-gṛḍā > roll ; পেঁগা < gēgā >, গেঁও < gēñā > groan, have a dried-up throat or choked voice in speaking ; চড়চড়া > চচড়া < cāṛḍ-cāṛā, cāccāṛā > striking with a cane, sense of whipping pain ; বলমলা < jhāl-ṭ-mālā > dangle, be bright ; বমবমা < jbām-ṭ-jhāmā > make a hollow ringing noise, tinkle as anklets, patter as heavy rain ; ঠকঠকা < ṭhāk-ṭhākā > knocking sound ; তড়বড়া < tāṛḍ-bāṛā > clatter as galloping horses, chatter ; থিকথিকা < thik-ṭhikā > sense of teeming as with maggots ; পিলপিলা < pilā-pilā > sense of being over-crowded ; ফরফরা < phāṛḍ-phāṛā > flutter ; বজবজা < bāj-ṭ-bājā > sense of being moist and rotten ; বিড়বিড়া < bīṛ-ṭ-bīṛā > mutter ; ঘচমচা < māč-ṭ-māčā > crackle in the mouth ; সপস্পা < sāp-ṭ-sāpā > sense of being wet and uncomfortable ; হড়হড়া < hāṛ-ṭ-hāṛā > sense of being slippery and uncanny ; etc., etc.

### B. Roots Repeated.

(i) Complete repetition : জলজলা < jäl-jälā > be brilliant (jval) ; টেন্টন < tān-tānā > sense of binding pain (tān = tān) ; টেলটেলা < ṭal-ṭalā > be clear and ready to run off, as water (ṭal) ; ধূকধূকা < dhuk-dhukā > pant (cf. dhūk pant, gasp) ; সড়সড়া < sāṛ-ṭ-sāṛā > feel creepy, as with an insect crawling over the body (sāṛ < srta) ; গলগলা < gal-galā > ooze or flow out, as blood (gal) ; গনগনা < gan-gānā > burn brightly (< gan < agni ? cf. Pali gini) ; etc.

(ii) Modified repetition, where another root of similar sense and association echoes the preceding one : চুলবলা, চিলবিলা < cul-bulā, cil-bilā > be fidgety, be eager to move away (< cāl, bul >: cf. চলবুলা < cālā-bulā > wander about, move and walk) ; টলবলা < ṭal-bālā > be shaky and moving (ṭal, bāl = bul < Skt. val) ; দলমলা < dāl-ṭ-mālā > shake and pat (< dal, mal >: cf. দলাইমলাট < dālāi-mālāi > currying a horse) ; etc., etc.

**636.** In addition to roots which easily affiliate themselves to one or the other of the above classes, there are a few roots of which the origin has not been found out, and which from their look are secondary formations : e.g., কাচা < kācā > bring to a failure, make 'cutcha'; গজা < gājā > sprout ; MB. গাহা < gāhā > cawker ; গুটা, গুড়া < gutā, gurā > gather up, as a net or line ; গুঁড়া < gūrā > pound ; জিরা < jirā > cool one self, rest ; টাঙ্গা < tāṅ(g)ā > hang on high ; বিলা < bilā > distribute ; হেদা < hēdā > pine away ; লেলা < lēlā > set a dog on a person ; etc. In some cases they appear to be *dēśī*.

In a number of *dēśī* and *tbh.* roots, we find a wide range of vowel change : চিপসা and চুপসা < cipṣā, cupṣā > get shrivelled ; জাবড়া, জোবড়া < jabṛā, jōbṛā > smudge, blotch ; etc. This, as well as other variations, like nasalisation or the absence of it, and interchange of consonants, etc., have been noticed under *Phonology*. The dislocation of the MIA. tradition in Bengali spelling from the very beginning, through Sanskrit influence, has been responsible for the state of chaos which exists in the spelling of verb-roots (as of other forms) in Middle and New Bengali. Dialectal modifications are not properly discriminated and kept in their proper place. The result is that we have the same root spelt differently, e.g., গোঁড়া and গোয়়া < gōṛā, gōyā > (=gāṛā) pass (gam-aya-), শু and শু < śu, su > sleep, lie down (svap), নেউটা and লেউটা < nēutā, lēutā > return (ni-vṛt), আইশ, আইস, আস < āiś, āiś, ās > come (ā-vis), etc., etc.

## [II] FORMAL CLASSIFICATION OF ROOTS.

**637.** The proper classification of roots in Bengali, viewed from the formal aspect, is not with regard to their affixes (because they are always the same—the Bengali verb presents only *one* conjugation, and apparent irregularities are only the result of recent phonetic changes), but with regard to the modifications of the root-vowels and also of the affix-vowel in the case of the causatives and denominatives. These modifications are the result of Epenthesis-cum-Umlaut and Vocalic Harmony (*supra*, pp. 375 ff.). Roots have [i, e, u, o] when the following affix has a high vowel, [i, u] ; and these are lowered respectively

to [e, æ, o, ɔ] in the case of a low vowel [e, o, a, ɔ] following ; and [ɛ, ɔ] are changed to [e, o] through the influence of a following [i, u].

The principal parts of a Bengali verb, judging from these vowel modifications, can be taken to be (i) Inferior Imperative, which is identical with the Root; (ii) 3rd pers. Present; (iii) 3rd pers. Past; or 3rd pers. Future; (iv) Present Participle, and (v) Conjunctive in « -iyā ». All the variations a root can undergo are found in the above forms. To classify formally the Bengali verb, it is best to take the Standard Colloquial in which the phonetic advance has been the greatest. The « sādhu-bhāṣā » spelling does not consider the present-day vowel changes and contractions, and conjugation in the « sādhu-bhāṣā » means only a rigid and regular adding of a series of affixes.

Below are given in phonetic transcript the groups into which the Standard Colloquial verbs would range themselves : the spelling in Bengali is not uniform, as has been noted before.

Class I (a) : Roots in « -ā- » [ə] closed by a consonant :

- (i) [kər] *do*; (ii) [kore]; (iii) [korle, kolle < \*kərile; korbe < \*kəribe]; (iv) [korte, kotte]; (v) [kore];
- (i) [bəl] *say*; (ii) [bole]; (iii) [bolle; bolbe]; (iv) [bolte]; (v) [bole].

Class I (b) : Roots ending in « -ā- » [ə], originally in « -āh » [əɸ] :

- (i) [rə < rəɸ] *remain*; (ii) [rəɛ]; (iii) [roilo; roibe, rəbe]; (iv) [roite]; (v) [roe];
- (i) [ʃə < ʃəɸ] *suffer*; (ii) [ʃəɛ]; (iii) [ʃoile; ſoibe, ſəbe]; (iv) [ʃoite]; (v) [ʃoe]. Similarly [də, bə < dəɸ, bəɸ] *burn, bear*; etc.
- (i) [fiə < \*əɸi] *be*; (ii) [fiəɛ]; (iii) [fioło; fiəbe]; (iv) [fiote]; (v) [fioe].

Class II (a) : Roots ending in « -ā- » [ə] :

- (i) [kha] *eat*; (ii) [khaɛ]; (iii) [khele, khelo; khabe]; (iv) [khete]; (v) [kheeɛ];

Class II (b) : Roots in « -ā- » [ə] ending in a consonant :

- (i) [mar] *beat*; (ii) [mare]; (iii) [marle, malle, marlo, mallo; marbe]; (iv) [marte, matte]; (v) [mere].

Class II (c) : Roots in « -ā » originally closed by « -h » [afī > a] :

- (i) [ga < gafī] *sing* ; (ii) [gaē] ; (iii) [gaile ; gaibe] ; (iv) [gaite] ;  
(v) [geē < \*gaifia, gefia].

Class III (a) : Roots in « -i » (rare, archaic) :

- (i) [fjī] *live* ; (ii) [fjie] ; (iii) [fjilo ; fjibe] ; (iv) [fjite] ; (v) [fjie].  
So [pi] *drink*, etc.

Class III (b) : Roots in « -i- », ending in a consonant :

- (i) [mil] *unite, be found* ; (ii) [mele] ; (iii) [millo ; milbe] ; (iv) [milte] ; (v) [mile].

Class IV (a) : Roots in « -e » (irregular) :

- (i) [de] *give* ; (ii) [dæē] ; (iii) [dile ; debe] ; (iv) [dite] ; (v) [die] ;  
(i) [ne] *take* ; (ii) [næē] ; (iii) [nile ; nebe] ; (iv) [nite] ; (v) [nie].

Class IV (b) : Roots in « -e- » ending in a consonant :

- (i) [khel] *play, inferior imperative* [khæl < \*khelə] ; (ii) [khæle] ; (iii) [khelle ; khelbe] ; (iv) [khelte] ; (v) [khele].

Class V : Roots in « -u- » ending in a consonant :

- (i) [jūn > jōn] *hear* ; (ii) [jone] ; (iii) [junle ; junbe] ; (iv) [junte] ;  
(v) [june] ;  
(i) [khūfʒ > kbðfʒ] *search* ; (ii) [khðfʒe] ; (iii) [khūfʒle ; khūfʒbe] ;  
(iv) [khūfʒte] ; (v) [khūfʒe].

Class VI : Roots in « -o » :

- (i) [jō] *lie down* ; (ii) [joe] ; (iii) [julo ; jobe] ; (iv) [jute] ;  
(v) [jue] ;  
(i) [do] *milk* ; (ii) [doē] ; (iii) [duile ; duibe, dobe] ; (iv) [dute, duite] ;  
(v) [due] ; (irregular ; « -o < -uh »).

Class VII : Causatives and Denominatives in « -ā » (see also *supra*, under *Phonology*, ‘Umlaut’) :

- (i) [kora] *cause to do* ; (ii) [koraē] ; (iii) [korele ; körabe] ; (iv) [korate] ; (v) [korie] ;  
(i) [fʒaōa] *cause to go* ; (ii) [fʒaōaē] ; (iii) [fʒaōale ; fʒaōabe] ; (iv) [fʒaōate] ; (v) [fʒaie].

- (i) [ç̪jina > ç̪jena] *cause to recognise*; (ii) [ç̪jinaš > ç̪jenaš] ; (iii) [ç̪jendle ; ç̪jendbe] ; (iv) [ç̪jenate] ; (v) [ç̪jnie].
- (i) [dækha] *show* ; (ii) [dækhaš] ; (iii) [dækhale ; dækhabe] ; (iv) [dækhate] ; (v) [dekhie] ;
- (i) [ʃona] *cause to hear* ; (ii) [ʃonaš] ; (iii) [ʃonale ; ʃonabe] ; (iv) [ʃonate] ; (v) [ʃunie].

[III] ROOTS AND VERBAL NOUNS IN BENGALI.

**638.** Although roots are essentially the creations of grammarians, conceived as the foundation of a number of words, there is always present, even among the uneducated speakers of an inflexional language, what may be called *root-consciousness*. Often the barest form, identical with the grammarian's root, is found to be in use in speech, even in highly inflected languages. Thus in Sanskrit, we see that « dr̪ś » means *a seeing, a seer* ; so « bhuj, bhū, p̪rech » are used as nouns ; and similarly « vṛt » is *that which turns*, and « vid » occurs as a noun in the sense of *knower*. The nominal inflexions were of course added in Sanskrit, although, as a result of phonetic decay, it would so seem that in the nominative singular the bare root itself without any formative affix added was the word. And in the modern IE. languages like English, French, Persian, Hindi, Bengali, what was originally a combination of root+affix has commonly been reduced to the bare root through phonetic decay. As a consequence in NIA. what at first sight looks like the root unmodified by any inflexion, features as a verbal noun, and also as the inferior imperative. Historical grammar will tell us that originally such forms ended in an affix, « -i » or « -a », which is now lost. In Dravidian, the simple root is used for the imperative singular : in modern Hindi and Bengali, we have the same thing resulting as the *finale* of a long history ; although it looks like an approximation to the Dravidian usage. Instances of such phonetically decayed *Root-Nouns*, as they may be called, are fairly common in Bengali. These occur either singly, or with another root-word of similar meaning, and are in the accusative or nominative relation to the verb with which they are employed : e.g., মাজ « sāj » as

in সাজ করা « sājø kārā » *array*; ফাট « phāṭø » *crack* as in ফাট ধ'রেছে « phāṭø dhōrēchē » *it has got a crack*; পচ « pācø » *rotteness*; চির, চিড় « cirø, cirø » *mark or line of a crack*; পাক ধরা « pākø dhārā » *become ripe, tend to ripen*; দ্রব « dубø » *a dipping*; তাক লাগা « tākø-lāgā » *gaze, be struck with wonder*; খাই করা « khā-khā kārā » *be eager to eat* (but cf. খাউ খাউ করা « khāu-khāu kārā », *supra*, pp. 678-679); চল « cālø » *circulation*; রহ-সহ or রহ-ঠহ করা « rā(hā)-sā(hā), rā(hā)-tħā(hā) kārā » *to wait and watch*; ভাঙ্গুর « bhāñ(g)ø-eurø » *breaking and pulverizing*; ভুলচুক « bhulø-eukø » *mistakes and omissions*; তোলপাড় « tōlø-pāṛø » *raising and felling = turning upside down, agitating*; মারধর « mārø-dhārø » *striking and seizing*; ধর-পাকড় « dhārø-pākṛø » *seizing and catching*; মারকাট « mārø-kāṭø » *striking and cutting down*; ভাঙ্গড় « bhāñ(g)ø-gāṛø » *destroying and building*; দেখ-মার « dēkhø-mārø » *seeing and striking, attacking at sight* (cf. in a daily paper—জার্মানী দেখ-মার নৈতি অবলম্বন করিল « Jārmānī dēkhø-mārø niti & bālām-bāñg kārilā » *Germany has adopted the policy of 'hit at sight'*); so উঠ-বস « uṭhø-bāsø » *rising and sitting*; হাৰ-জিত « hārø-jitø » *lose and win*; চল-বুল « cālø-bulø » *walk and wander*; হাঁক-ডাক « hākø-dākø » *shout and yell*; কাট-ছাঁট « kāṭø-chāṭø » *cut and trim (as of garments)*; ফাট-ফুট « phāṭø-phutø » *crack and split*; etc., etc. These Root-Nouns also form compounds with other nouns: e.g., ছাড়-পত্র « chāṛø-patrā » *passport*. See also under 'Verbal Nouns,' *infra*. For Root Imperatives, see under 'Moods,' below.

### [C] KINDS OF VERBS: INTRANSITIVE AND TRANSITIVE.

**639.** Verbs in Bengali are either intransitive or transitive. In their outward form, however, there is no distinction between the two classes. Intransitive roots are chiefly primary ones, although those of secondary origin also occur. E.g., « āch, kād, kās, khēl, gāl, cāl, eu, jwār = jār, jwāl = jāl, ji, jā, jujh, jhār, tūt, ṭal, mil, hil » etc. Also old denominatives like « pāk, ruṭh, tāt, bāk, māt, phās, thām » etc.; and new denominatives « kulā, ghumā, dārā, bāhirā, śukhā, sētā » etc. All primary intransitive roots can be made transitive by adding the causative « -ā- ».

**640.** The initial stress of Bengali has in most cases obliterated the means of differentiating between the intransitive and transitive

(causative) forms of roots by making long the quantity of the root-vowel of the latter, and keeping short the quantity of that of the former. This means still obtains in the Bihārī dialects, and in Eastern as well as Western Hindi: e.g., Bihārī « kāṭab » *get cut*, causative « kāṭab » ; « dīṣab » *be seen*, « dīṣab » *show*; « gāṛab » *be interred*, « gāṛab » *inter*; Hind. « pālñā » *be reared*, « pālñā » *rear*; « nikālnā » *get out*, « nikālñā » *cast out*; etc. These intransitives with a short vowel are frequently new forms in NIA., built out of the old causatives with a proper long vowel (cf. R. L. Turner, 'The Loss of Vowel-Alternation in Indo-Aryan,' in the 'Proceedings and Transactions of the 2nd Oriental Conference,' Calcutta, 1922, p. 492). But the « -ā - » affix is indispensable in Bengali for the causative, or transitive form of an intransitive root, and quantity of the root-vowel does not count.

**641.** The transitive verb depends largely on its object. In Bengali, as in other NIA. languages, only inanimate nouns can properly be said to have an accusative case,—i.e., only these do not take a dative affix like « -kē, -kō » etc.: e.g., জল আনো « jālā ānō » *bring water*, ভাত খায় « bhāt̪ khāy » *eats rice*, কাঠ কাটে « kāṭha kāṭe » *cut wood*, etc. Animate nouns when really in the accusative case take the dative affix « -kē, -rē » in NB. when they are personal and definite: but they do not take the dative affix, and thus behave like inanimate nouns, when the object signified is general, vague or indefinite: গোৱা চৰাব « gōrū cārāy » *grazes cattle*, but গোৱাটকে দীর্ঘ « gōrū-tā-kē bādhō » *tie the cow*. The accusative apparently governed by an intransitive verb in Bengali is properly a dative, or a locative: e.g., বাড়ী চলো « bāṛī cālō » *come home*; জলকে চল « jal̪-kē cāl̪ » *come to the water* (=river, tank); ঘৰক গেল « ghāṛ-ke gēla » *went home*, etc.

The extension of dative the post-position to the accusative is a NIA. development. The NIA. « bhāvē prayāga » or neuter construction of the transitive verb, in the past tense, as in Hindi « us-nē ghōṛī-kō dēkhā » *by-him with-reference-to-the-mare it-was-seen* (as opposed to the « karmani » or passive construction, « us-nē ghōṛī dēkhī » *by-him mare she-was-seen*), was not a characteristic thing in MIA.: it could be established only when the dative post-position came to be attached to the accusative for precision, as the inflexion of the latter was lost. Bengali সে মানুষকে দেখিল « sē mānus̪-kē dēkhilā » *he*

*with-reference-to-the-man saw* and से मानुष देखिल « sē mānūṣa dēkhilā » *he man saw* are in their formation analogous respectively to the « bhāvē » and « karmanī » constructions of Hindi, etc., only the Bengali development has been to make them both active (with the proper nominative rather than instrumental), and definite in case of the post-positional form. The loss of OIA. affixes brought in the employment of post-positions for clearness and definiteness. The accusative did not possess any remarkable inflection—the OIA. « -am » had dwindled away to zero in Bengali and other NIA. When the dative post-position was taken up by the accusative, it was to supply this want of an affix; and it brought in greater definiteness. In Apabhrāṇa and in Avahattha we have the accusative (for the animate noun) without post-position, e.g., in the 'Prākṛta-Pāṇḍala,'— « girivara-saṇām ṣamaha Haraṁ » *salute ye Hara dwelling in the noble mountain* (p. 313, Bib. Ind. edition); « gōla (= gōḍa)-rāja jinī » *having conquered the King of Gauda* (p. 423); « Bali chali » *having cheated Bali* (p. 586); etc.: but « rajja Suggivaha dijja » *gave the kingdom to Sugrīva* (p. 576), where we have the dative-genitive. In the OB. of the Caryās, we have the same thing: « guru puechia jāṇa » *ask the guru and know* (2); « sadguru pucchi » *asking the good master* (4); etc. In MB. and NB., in some cases the old accusative survives: e.g., বলে মাতা স্বরূপনী « bāndō mātā surādhānī » *I worship mother S.*; রাম ভাজা দন « rāma bhājō māṇḍ » *adore R., O mind.* But already in the ŚKK., we find the NB. characteristic of using the dative affix for the accusative established. Bengali in this respect came in line with the other NIA. languages which developed largely the neuter construction: thus রাধাক দেখিঁ « Rādhā-kā dēkhiā » *seeing R.,* পুছিল নাগকে « puchilā Rādhā-kē » *asked R. (p. 135);* বড়ায়িক ছাড়ী কেহে হৈবো একাকিনী « bāṛayi-kā chāṛi kēnhē hāibō ēkākinī » *why should I be alone, leaving the old woman?* (p. 147); etc.

**642.** One intransitive verb, compounded with a noun or adjective, behaves like a transitive in NB.: the verb বাস « bās ». Originally it meant *to feel, to like, to regard, to hold.* The source of it seems to the common OIA. root « vas » *to dwell,* with the long, or causative grade « vās, vās-aya » used as

active; but there seems to have merged in it also the other OIA. roots « *vaś* » *desire, wish for*, and « *vas* » *love*, as 'well as « *vāś* » *put on garment*. In NB., the words ভালো, বাসা « *bhālō*, *bāsā* » = *well* and *like* have formed a compound verb-root, transitive, = ভালবাসা, ভালোবাসা « *bhālā-bāsā*, *bhālō-bāsā* » *to love*. The compound মন্দ-বাস « *māndā-bāsā* » *dislike* also is heard in NB. But in MB., বাস « √*bās* » was an ordinary root, which was used with other nouns, or was used impersonally: e.g., তর বাসি, তর বাসি মনে « *bhāya* *bāsi*, *dāyā* *bāsi* *mānē* » *I am afraid in my mind*; শরীরে বাসি বল « *śārīrē* *bāsi* *bāla* » *I feel strong in body*; কেচুক বাস কি « *kātukā* *bāsā* *ki* » *do you think it is queer?*; অঙ্গত চেন বাসি « *ādbhutā* *hūnā* *bāsi* » *strang: as it were it appears to me*; না দেব কড়ি তোমার মনে বাস « *nā* *dēbā* *kārī*, *tōmārā* *mānē* *bāsē* » *it strikes you as if I shall not pay the money*; নাজ বাসে « *lājā* *bāsē* » *feels shy*; কোপে না কহিলা মনে বাসে « *kōpē* *nā* *kāhilā*, *mōrā* *mānē* *bāsē* » *appears in my mind that he spoke not in anger*; বাসি ভাত বাসে জিহ্বায় রস বাসে « *bāsi* *bhātā* *byāñjanē* *jihwāy* *rā*-*bāsē* » *the tongue feels moist (with relish) with cold rice and curry*; আমর আগেতে নৃত্যকরিতে বাস ঘৰণ « *āmārā* *āgē-tē* *nṛtyā* *kāritē* *bāsā* *ghṛṇā* » *hollest in soon to dance before me*; বল চেন বাসে « *dhāudā* *hēnā* *bāsē* » *it seems us if it were a maze*; চাটিতে না পারে চান্দ পা এ বাসে বালু « *hātītē* *nā* *pārā* *Chāndā*, *pā*-*bāsē* *bāndhā* » *C. cannot walk, feels as if fastened by the feet*: etc., etc. (the examples given above are from the 'Padmā-purāṇa' of Vijaya-gupta, but instances abound in all MB. writers). The nouns in apparent accusative relation with « √*bās* » like ভালো, মন, তর, তর, কেচুক etc. above, are properly adverbial in nature, rather than true accusatives.

#### [D] MOODS: OPTATIVE, SUBJUNCTIVE, IMPERATIVE.

**643.** NB. possesses but two moods, Indicative and Imperative. The Imperative occurs in the second and third persons only, and in the present tense. It is sometimes quite properly called the 'Imperative Tense.' An old future for the second person is used as a Precative or Future Imperative. For the Infinitive, there are some verbal nouns. The other moods of OIA.— Subjunctive or Conjunctive, Optative, Injunctive, and Precative, are entirely lost in Bengali.

**644.** In the well-known «āryā» or distich giving rules for working land-measures, attributed to the mathematician Śubhajkara (under whose name the old Indian system of arithmetic and square and cubic measures as practised in the village schools in Bengal passes), we have an optative or precative form निज्जे «lijjē» : कुडू वा कुडू वा कुडू वा निज्जे, काठाव कुडू वा काठा निज्जे «kuṛubā kuṛubā, kuṛubā lijjē: kāṭhāv kuṛubā, kāṭhā lijjē» *kuṛubā* (= *kuḍava*, ‘*bighā*’ *measure* =  $\frac{1}{3}$  *acre*)  $\times$  *kuṛubā*, *take* (*the result*) as *kuṛubā*; *kāṭhā* (=  $\frac{1}{27}$  *th* of a *bighā*, ‘*cottah*’)  $\times$  *kuṛubā*, *take* as *kāṭhā*. Here «lijjē» *take*, is properly an optative or precative = *let one take*, representing a Late MIA. «\*lahijjaī, lahējjāī», which is made up of the optative form for the 3rd singular, «lahejja, lahijja» (= OIA. «\*labh-yā-t, \*labh-iyā-t» for «labh-i-ta»), plus the affix for the indicative 3rd present «-i» (< OIA. -ti). The OIA. «-yā-» optative or precative became «-eyya» in First MIA., which gave later MIA. «-ejja, -ijja», and assumed the personal terminations «-mi, -si- (also -hi), -ti» > -i» etc. of the indicative, and sometimes «-tu» > -u» of the 3rd person imperative (*e.g.*, ‘Prākṛta-Pāñgala,’ p. 427—«sō tuha Saṅkara dijjau mōkkhā» *may he, Saṅkara, grant you liberation*, where «dijjau» = «dējja, dijja [*< dadyāt*]» + «-u [*< tu*]» of the imperative. Cf. Grierson, JRAS., 1910, pp. 162-163); and as a distinct tense form—the ‘Optative Tense’—it existed in Late MIA. This optative in «-j-» is preserved as a respectful imperative in the Midland and Western NIA. languages—*e.g.*, Hindostānī «kijiyē» *please do*, Gujarātī «marjē, mārjō», etc.; but it is not found in the Eastern languages, being conspicuous by its absence in the Caryās, and in MB. in general. निज्जे «lijjē» of Śubhajkara is only a stray form which has found a place in a technical verse. It is not unlikely however, that the «-ijja-» optative existed in Māgadhi Apabhraṇa. The ‘Prākṛta-Pāñgala’ verses with the «-ijj-» forms (see *supra*, p. 124) could from that assumption be connected with the East. There is a NIA. inflected passive in «-īj-, -I-, -ij-, -i-», which is quite a different thing, being derived from the OIA. passive affix «-yā-». A connexion between the MIA. inflected passive in «-ijja- <-yā-» and the MIA. «-ij-, -j-» imperative was suggested by Hoernle, but Tessitori has shown how this MIA. form is

only the old optative ('Comp. Grammar of the Gaudian Languages, §§ 480, 481, 499; 'Notes on the Grammar of OWR.,' §120).

**645.** In MB. the optative sense is expressed by the indicative with the pronominal adverb দেন « jēnā » used as a conjunction = *so that* (see *supra*, p. 853); and sometimes the instrumental of the pronoun বা « jā » *that*, যাতে « jātē » *so that*, is also similarly employed : e.g., আমি যেন দেশি « āmi jēnā dēkhi » *so that I may see, may I see*; সে বাতে করে « sē jātē kārē » *so that he may do, may he do*. There is also a periphrastic form with the root পান « pā » *obtain* or পার « pār » *be able*: e.g., যেন আমি দেখতে পাই, or পারি « jenā āmi dēkhtē pāi, pāri » *may I see*. The conjunctives দেন, যাতে « jēnā, jātē » have no fixed place in the sentence. This idiom is found as early as the ŠKK.: e.g., p. 168, দে যেহ আকাক বাচ্চা দিভিৱার « sē jēnhā āmhā-kā bābāē dādhi-bhārā » *may she make me carry the load of curds*; p. 186, সাবধানে লঞ্চ যেহ না ছাড়া ঘোল « sābādbānē lālā jēnhā nā chārāe ghōlā » *take it carefully, that the whey may not scatter*; p. 211, কেহে কাহাকো মেঢ় না করে উপচাস « kēhō kāhākō jēnhā nā kārē upāhāsā » *may no one taunt another*. In other MB. works also this construction figures: e.g., 'Caitanya-Bhāgavata,' p. 204 (ed. Atul Krishna Goswāmī), মোর কাম—যেন দেখি পাই « mōrā kāmya, jēnā dēkhā pāi » *my desired object—may I get a sight; etc., etc.* The conjunctive or adverbial participle in ঈলে « -ilē » implies a condition, and it can be used with an optative force: e.g., গেলে দেখি হয « gēlē dēkhā hāy » *an interview might take place if one went*. In this idiom, however, the optative sense is not always implied: e.g. OB. Carya 2, « rāti bhaile Kāmarūpa jāi » *she goes to Kāmarūpa (would go, may go) when it becomes night*; ŠKK., p. 397, যে বুদি করিলে রাতে আকার জীবন « jē budhi kārilē rahā āmhārā jibānā » *by doing such contrivance with which my life may endure (or will endure), etc.*

**646.** The Subjunctive Mood, which was of so great importance in Vedic, was dropped in Classical Sanskrit, although it lingered on in Early MIA. (cf E. Müller, 'Pali Grammar,' p. 105). Bengali in common with other NIA. (except Assamese) possesses a Present Participle form which is used for the Past Subjunctive or Conditional, as well as Past Habitual: e.g., (বদি) করিতাম (করিতে, করিত) « (jādi) kāritām (kāritē, kāritā) », Oriyā

« mu kārānti (tu kārāntu, sē kārāntā) » if I (you, he) did, etc. ; so Maithili « ham karitahu, sē karitai », Western Hindi « maī kartā, ham kartē » etc.

The subjunctive is formed in Bengali with the help of the conjunction যদি « yadi, jādi » if, a ts. which has ousted the OB. *tbh.* « jaī ». Occasionally in early Bengali (as in early 19th century prose), the conjunction যে « jē » that is used. A similar use of « jaī » or « yadi » occurs in OB. : e.g., Caryā 5, « jaī tumhē, lōa hē, hoība pāragāmi » if ye, O men, will be goers across; 41, « jaī tō mūḍhā acchasi, bhānti puccha-tu sadguru-pāva » if thou art ignorant, ask thou about thy mistakes at the foot of the good master ; in eMB., ŠKK., p. 137, যদি মোরে পুছে আইছনে « jādi mōrē puchē Āihānē » if Ā. were to ask me ; p. 244, তোকা দেখি যদি মোর বিচলিল মনে « tōmhā dēkhi jādi mōrā bicālilā mānē » if by seeing you my mind is moved ; p. 289, আনল শরণ কিবা করিবো যদি না দিবে বচনে « ānālā śārāṇa kibā kāribō jādi nā dibē bācānē » if you do not gire word, I reck not I shall seek refuge in fire ; p. 351, যদি কাঞ্জাঙ্গি কর পার, ত্বে মোর তবেসি নিস্তার « jādi Kānhāñi kārā pārā, hāē mōrā tābēsi nistārā » if you get me across, O Kṛṣṇa, then indeed may come my salration ; etc.

This use of « yadi, jaī » is common in the Apabhrañśa and Avahāṭha : cf. ‘Prākṛta-Paiṅgala,’ p. 211, « sēra ṛkka jaī pāvāü ghittā » if I could get a seer of ghee ; p. 465, « jaī ētthi digantara jāīhi kantā » if the beloved one were to go to a foreign land even now ; p. 430, « jaī jaddā rūsaī, cittā hāsāi pētē aggī thappiā » if cold rages, the heart contracts, and fire is put on the stomach ; etc., etc.

**647.** The Imperative Mood, or ‘Imperative Tense,’ has the following affixes :

New Bengali :

First Person : Same as those for the Indicative Present.

Second person : Inferior (=Original Singular) has a form identical with the bare root : e.g., ক্ৰ « kār-ঢ », চল « cāl-ঢ » ; Ordinary, used with inferiors and equals (=Original Plural) has root + « -া » or « -ো » : কৰ, কৰো « kār-া, kār-ো », চল, চলো « cāl-া, cāl-ো ».

Honorific (= Originally 3 plural) = root + উন্ত় < -und> :  
করুন, চলুন < kår-unđ, cål-unđ >.

Third Person : Singular, now also Plural : root + উক্ত < -u-kđ > : করুক,  
চলুক < kår-u-kđ, cål-u-kđ >.

Honorific (= Original Plural) : root + উন্ত < -unđ > ; করন  
চলন < kår-unđ, cål-unđ >.

Early Middle Bengali :

First Person : Same as for Indicative Present.

Second Person : Singular and Plural অ, < -a >; অহ, হ < -ahā, -hā >, and  
হা < -hā > : e.g., কত < kāh-ā >, লঅ < lā-ā >, স্তৰ < sut-ā >  
(= sleep !), দে, নে < দেও, নেও < dē, nē < \*dēā, \*nēā >;  
করহ < kår-ahā >, চিন্তহ < cint-ahā >, জাহ, যাহ < jā-hā >,  
দেহ < dē-hā >, খাহ < khā-hā >, নিশ্বাহ < niśādh-ahā >, থোহ  
< thō-hā >; ঘাহ < khā-hā >, যাহ < jā-hā >.

Third Person : Singular and Plural : উ, অউ < -u, -au > with or without  
pleonastic ক < -kā > (উক, অউক < -u-kā, -au-kā >): rarely,  
honorific অন্ত < ántā > : e.g., জৈউ < jī-u >, পাশ < pāsu=pāś-u >,  
< dē-u >, ধক < dhār-u >, দণ্ডউ < khānd-āu >, তেজুক < tēj-u-kā  
< \*tēj-āu-kā >), থাকু < thāku (< \*thā-u-kā >); দেন্ত  
< dē-ntā > (only instance in the ŠKK.). (Also forms in ইউ  
< -iū >, for which see *infras.*)

Old Bengali :

- Second Person : (i) < -a > : < jāñ-a (Caryās 1, 44); sun-a (2); cäl-a (3);  
phäl-a (4); bāha-a (13); bāb-a (14); mār-a (21); kar-a  
(28, 41); bindh-a (28); pēkh-a (30, 46); bhōl-a (37);  
dhar-a (38); pasar-a, bas-a (39); bhañ-a (40, 42);  
phuđ-a (47); hēr-a, chāđ-a (50); aceha = āch-a (37) >;  
(ii) < -a-tu > : < puech-a-tu (5); bāh-a-tu (8); bujh-a-tu  
(33) >;  
(iii) < -aha, -ha > : < bindh-aha (28); bhul-aha (15);  
chēv-aha (45); (bāhaa, Caryā 13 = bāh-aha ?) >;

- (iv) « -hu, -u » : « lā-hu (1); hō-hu (6); lē-hu, jā-hu, lō-u = lēhu, lē-u ? (32); dhahu = dhara-hu ? (38); jā-u (38); chād̄-u (50) »;  
 (v) « -hī » : « hō-hī, jā-hī » (5).

Third Person : « -au » : « kar-au » (22);

Passive Third Person : « -iu », as in « ghōl-iy (12), marād-iy ? (12), saṁkēl-iy, jā-iy, (15); caṭār-iy ? (26) ».

**648.** OIA. employed the corresponding subjunctive forms for the imperative 1st person : singular « -āni », dual « -āva », plural « -āma ». These have not survived in MIA. and NIA. The OIA. imperative 2 sg. had « -a » as well as « -hi ». This « -a » was continued through MIA. and OB. down to eMB., after which it fell off from pronunciation : OIA. « cal-a » > NIA. « cal-a » > OB. « cal-a » > eMB. « cāl-ā » > lMB., NB. « cāl-∅ », This old singular is now used as the inferior imperative, both singular and plural : তুই, তোরা চল « tui, tōrā cāl∅ ». This « -a » affix was fairly common for the ordinary imperative, and in the general confusion of numbers, it seems to have been extended to the plural as well from the OB. period. The « -a » certainly assimilated with the root vowel, when the root ended in a vowel, before the eMB. stage : witness ŠKK. দে, নে = NB. দে, নে « dē, nē », < « \*dēā, \*nēā », inferior forms beside the ordinary NB. দাও or দাও « dāo, dāo » and নেও, নাও « nēo, nāo » < eMB. « dēā, nēā < dēha, nēhā ». <sup>1</sup>

The affix « -hi » of OIA. seems to have been continued down to OB. in the strengthened form « -hī », as in the Caryā « hō-hī, jā-hī » : and possibly in a form like করী « kārī » in the ŠKK., as in প্রভু হিয়া হেন নাহি করী « prābhu hāyiā hēnā nāhī kārī » do not do so, being the lord (p. 236),

<sup>1</sup> This loss of inflexional vowels occurring immediately after the root ending in a vowel seems to have taken place in Old Bengali, and possibly earlier still. Thus, for example, Tibetan tradition gives as an Old Bengali (or Old Magahi ?) sentence of the 11th century 'bhālā hoo (=hōu '), nāth(a) Atīśa, bhāt onā, bhāt onā (= bhāta anā < anā < MIA. \*ānāpaya' = Skt. īnāyaya) may it be well, Master Atīśa, get (them) bring rice, with which a beggar-boy accosted Dipāñkara Śrījñāna Atīśa distributing alms and food at Vikramāśilā. (Sarat Chandra Dās, 'Indian Pandits in the Land of Snow,' Calcutta, 1893, p. 60 )

we have traces of « -hi », or of its influence (but see *infra*, under 'Inflected Passive'). But this « -hi » is lost to N.B. The « -hi (-hi) » affix for the imperative seems to have been foreign to the eastern speech, which preferred « -a ». In MB. we have one or two instances of this « -hi (-āhi) » affix for the imperative, as a relic from MIA. : e.g., *Kṛttivāsa* (VSP., I, p. 497)—  
 आपनि धार्मिक तुमि धर्म ब्रह्महि आने « āpāni dhārmik, tumi dhārma bujhāhi  
 ānē » *you yourself are a righteous person, you explain the dharma to another.*

The OB. forms in « -tu », like « puech-a-tu », are cases of pure agglutination arising out of an emphatic employ of the pronoun « tu (< tvam) ». As a stereotyped form it was extended to the plural or honorific also (e.g., *Caryā* 5, « jaī tumhē, lōa hē, hōiba pāragāmi, puech-a-tu Cātīla anuttara-sāmī », translated at p. 262 *supra*).

The OIA. affix for 2 sg. *ātmanē-pada* was « -sva ». This gave a vocalised « -ssu » in First MIA. (Pali), which was used even with *parasmāi-pada* roots (E. Müller 'Pali Grammar,' p. 107 ; W. Geiger, 'Pali-sprache,' in the *Grundriss*, § 126). From « -ssu » came the Second MIA. « -su ». Pischel, however, holds that the Second MIA. « -su » arose by analogy : the Indicative had in MIA. the singular forms « -mi, -si, -ti > -di, -i », plural « mō, -tha > -dha > -ha, -nti », and by the juxtaposition of the 3rd personal forms, Indicative « -ti > -i, -nti » beside Imperative « -tu > -u, -ntu », the 1st and 2nd person singular also came to have in the Imperative « -mu, -su » beside the Indicative « -mi, -si » (cf. 'Gramm. der Pkt.-sprachen,' § 467).

The OB. forms in « -hu, -u » were used both for the singular and the plural, but probably they were singular at first, and it seems not unlikely that the « -hu, -u » affix originated from the « -su » form, in the pre-Ber gali stage : « \*calā-sva > calā-ssu > calā-su » might have given « calā-hu » in OB., with the obscure change of « -s- » to « -h- » remaining unexplained. Or a blend of *ātmanē-pada* « calā-su », plus « calāhi, calahi » (with *parasmāi-pada* « -hi » affix) may have given « calahu », and « calasu » + « cala » similarly may have resulted in « calu ».

The forms « calahu, jāhu, hōhu » etc. may equally be the original plural, with the « -ahu » affix, as in *Śaurasēṇī Apabhrāṇa*, originating as follows : OIA. Indicative 2 plural « calatha » > MIA. Imperative « calaha, calahu »,

the « -a » changing to « -u » in MIA. probably through analogy of the 3rd plural « -ntu ».

This « -u » affix was also extended to the 2nd person of the other tenses—to the past in « -il- » and the future in « -ib- » in dialectal Bengali, and to the singular 2nd person of the present, simple past, habitual past, and future in Oriyā.

The « -u » imperative is quite common in Apabhrāṣṭa, e.g., ‘Prākṛta-Pāṅgala,’ p. 463, « ē athirā dēkkhu sarirā gharu jāñ » *see, all this is unstable,—the body, house, wife.*

The Imperative 2nd plural affix in OIA. was « -ata ». This fell together with the Indicative 2nd plural « -atha » as early as the First MIA. period, and « -atha » became in Second and Late MIA. « -adha, -aha ». OB. inherited this as « -aha », and this অহ « -ahā » continued down to eMB., and is even now used in NB. as an archaic, literary form (e.g., আপন পাঠ্টতে মন করহ নিবেশ « āpanṭ pāṭhē-tē māṇḍ kārāhā nibēṣḍ » *direct your mind to your own studies*; পশ্চাত্তাগ দেখহ « pāścādbhāgā dēkhāhā » *see back*, as in Calcutta tramway tickets a few years ago). The contraction of « -ahā » to « -ā, -ā », however, took place in the spoken language as early as eMB., and this « -aha < -ā > » did not coalesce with the root when it ended in a vowel, unlike the « -ā » of the original singular. Final « -ā > -ā » also occurs as « -ō » in NB., and is as a matter of fact written ও « -ō » after vowels: জাহ, জাঅ > জাও « jāhā, jāā > jāō » *go!*; খাহ, খাঅ > খাও « khāhā, khāā > khāō » *eat!*; নেহ, নেঅ > (নেও) নাও > nāō > nēhā, nēā > nēō [næo] > nāō » *take!*; so হও « hāō » *be!*; জীহ, জীঅ > জীও « jīhā, jīā > jīō » *live*, which even occurs as জীউ « jīu » through the influence of the preceding high vowel (cf. ‘Māṇik Candra Rājār Gān,’ জীউ জীউ রাইঅত ধৰ্ম দেউক বৰ « jīu jīu rāiātā, dhārmā dēukā bārā » *live, ye farmers, may Dharma grant this boon*: the « -u » here, however, can equally be the other imperative affix « -hu, -u »). With roots ending in consonants the affix « -ahā » becomes also « -ō », and it is written either অ or ও: কর, চল or করো, চলো,—the pronunciation is generally [o] although the old tradition makes it অ in writing.

MIA. also changed « -aha » to « -ahu »: this has been noted before.

Early MB. « -hā » is only the « -ha » affix affected by the « -ā » of the root, as in « khā-hā, jā-hā ».

649. The OIA. affix « -tu » for 3 pers. sg. gave « -u » in OB. From eMB. times, the pleonastic ৳ « -kā » came to be added to this form (see *infra*, ‘Pleonastic Affixes’). Oriyā and Bihārī do not employ this « -kā ». In MB., forms with « -kā » are almost as common as those without; in NB., the « -kā » is universal, and after the loss of the « -u- », this consonant has become the distinctive affix for this form: *e.g.*, বাক্, খাক্, নিক্, দিক্ « jāk, khāk, nik, dik », etc. The group « -u-kā » modified its spelling in accordance with the epenthesis of « -i-, -u- », *e.g.*, MB. জাকু, পাকু, হকু, দেকু =জাউক, পাউক, হউক, দেউক « jāuk, pāuk, hāuk, dēuk » etc. (see *supra*, p. 383).

The plural form of the imperative 3 pers. in OIA., « -ntu », seems to have continued down to OB. The normal development in MB. and NB. ought to have been « -tu, -ūt, -t », but we actually find উন « -unq ». The expected « -nt- > -t- » has been ousted by « -n- » which is certainly the nominal plural affix extended to the verb (see *supra*, pp. 725-726).

OB. and eMB. have as a living form a passive imperative in « -iu, -iū », which is discussed below (under ‘Passive in Bengali’).

650. Forms for the Imperative in the other Magadhan speeches may be compared :

Assamese	Oriyā	Maithili
1. kārō;	1. kārē—karū;	1. dēkhiai, dēkhū ;
2. kār, honorific kārā;	2. kārā—kārā;	2. dēkh, dēkhahū;
3. kārōk.	3. kāru—kāruntu	3. dēkhau, dēkhathū.

The Assamese « kārā » represents « karaha, karāhā »; and « kārōk » = « karau + ka ». The Oriyā and Assamese 1st person is borrowed from the indicative. Oriyā 2 plural « kārā » is from « karaha ». The Maithili « dēkhiai » is extended from the indicative, and the other form « dēkhū » seems to have the « -ū » from « -mu, -mō », the Apabhrañśa imperative 1 sg. and pl. forms. The plural « -ntu » is represented by « -thū », like the indicative « -nti > -thī ».

**651.** NB. « sādhu-bhāṣā » has for the second person a future imperative, precative, and prohibitive in ইয়ো « -i(y)ō » which is found from the earliest period. In OB. and eMB. the form was ইহ « -ihā, -ihā ». It is a relic of the old inflected or sigmatic future of OIA.: singular « caliṣyasi » > « \* calihasi, calihisi » > Bengali চলিস « cāliṣa », plural « calisyatha » > « calihaḥ » > চলিহ « cālihā » > চলিঅ, চলিৱ « cāliā, cāliyā » > চলিয়ো, চলিও, চল্যো, চ'লো « cāli(y)ō, cāliyō, cā'lō = [c̪jolo] ». NB. Standard Colloquial has this « -iyā, -iyō » affected by Umlaut. The « -isya- » > -ih- » future was current in OB. and in eMB. (along with the « -itavya » > -ib- » future) in the three persons, but only the second person has survived in NB. (see *infra*, under 'Future Tense'). In the Caryās, as instances of the « -ih- » future imperative, we have « hōhisi, mārihasi » (Caryā 23). It is exceedingly common in the ŠKK. and other MB. works: e.g., « আসিহ াসিহ, চাহিহ াহিহ, করিহ ারিহ, ছাড়িহ চারিহ, তোষিহ তোশিহ, দিহ দিহ, ধরিহ ধাৰিহ, নিৰেদিহ নিবেদিহ, পুছিহ পুচিহ, রাখিহ রাখিহ » etc. In latter MB., epenthesis is noticeable, as usual: e.g., রাখিহ, রাখিঅ « rākhi(h)ā » becomes রাইখ, রাখ্য « rākhā, rākhyā = rākha » ; so দাওইহ « dāñdāihā » as দাওয়ায় « dāñdāiā » > dāñdāyyā », etc., etc.

The same future imperative occurs in Maithili and other Bihārī dialects, e.g., Maithili « dēkhihāh < dēkhihahu », Bhōjpuriyā sg. « dēkhihē » plural « dēkhihā, dēkhihau ». In the Bihārī dialects, the ordinary future in « -b- » can be similarly employed, as much as in Bengali. A similar imperative use of the sigmatic future does not seem to occur in Assamese and Oriyā.

A future imperative for the second person only can be noted, in Old Western Rājasthānī, in Western Apabhrāṇa and in Second MIA. and in all these it occurs generally with the negative particle « mā » (L. P. Tessitori, 'Grammar of OWR.', § 121).

**652.** The verbal form গ, গে « gā, gē » added to the imperative is found from the MB. period onwards to express the imperative in the immediate future, with a slight precative sense: e.g.,

1. আমি, আমরা করিগা, করিগে « āmī, āmṛā kāri-gā, kāri-gē » ;
2. তুই, তোরা কর্গা, ক'র্গে « tui, tōrā kār̪-gā, kōr-gē », করিস্গা, করিস্গে « kāris̪-gā, -gē » ;

তুমি, তোমারা করগা, করগে « tumi, tōmārā kārā-gā, kārā-gē » ;

৩. সে, তারা করক্গা, করক্গে « sē, tārā kāruk̪-gā, -gē » ;

তিনি, তাঁরা, করন্গা, -গে « tini, tārā kārun̪-gā, gē » (also second person honorific with আপনি, আপনারা « āpāni, āpānārā »).

Cf. MB., Kṛtivāsa, 'Ayodhyā-kāṇḍa,' p. 17 : সীতারে কহিল—'ফল করগা ভক্ষণ' « Sītā-rē kāhila—phālā kārā-gā bhāksaṇḍ » said to Sītā, 'go eat this fruit'; 'Uttara-kāṇḍa,' p. 20 ?, সেই শস্ত্রের ফল তুমি খাওগা আপনি « sei sāsyērā phālā tumi khāō-gā āpāni » you yourself go and eat the fruit of that grain; etc. Carey in his 'Bengali Dialogues' (Calcutta, 1818) translates forms in « -gā » as a simple future in the 1st person, and as an imperative in the 2nd and 3rd; e.g., উনি ও সামগ্ৰী আয়োজন কৰন্গা, আমি ও কৱিগা « uni-ō sāmāgrī āyojāṇḍ kārun̪-gā, āmi-ō kāri-gā » let him get things ready, and I will do the same (p. 42). We can compare this affix of Bengali with the future suffix « -gāu, -gō, -gā, -gi, -gē, -gi » of the Western Hindi and Panjābī dialects.

The Western « -gā, -gē, -gi » etc., are from the passive participle « gata > gaa ». For the Bengali « -gā, -gē », the source may equally be the same « gata », but the indeclinable participle গিয়া « giyā » haring gone, certainly had something to do with it: the change of the root-vowel in the contemptuous second person ক'রগে [korge] can be explained only as being from ক্ৰগিয়া [kɔr giya]. We can compare the use of গে « gē » < গিয়া « giyā » (not গা « gā ») with the simple past and the future tenses in the Standard Colloquial, with the force of *though, nevertheless, however, even now, immediately*: e.g., সে ক'ৰলে গে [se korle ge] and then he did, তুমি ক'ৰবে গে [tumi korbe ge] and you will do.

#### [E] VOICE : THE PASSIVE IN BENGALI.

#### [I] THE INFLECTED PASSIVE IN BENGALI.

##### [1] Passive Indicative.

**653.** Primitive Indo-European does not seem to have possessed a passive conjugation. In the Aryan (Indo-Iranian) period the passive developed out of the middle or reflexive, but it was confined to the present stem

and to the third person singular of the aorist only. The distinctive affix of this inflected passive was « -yá- » in the present stem, and the personal terminations of the middle voice were employed. Old Indo-Aryan (Vedic and Sanskrit) has preserved this passive. In Middle Indo-Aryan, the conjugational system underwent the greatest decay imaginable, but the passive was retained, being found in the present indicative and optative imperative; and a few forms like passive aorist and future were built up in Second MIA.

The « -yá- » affix occurs as « -ya-, -iya, -iyya-, -īya- » in First MIA. and as « -ijja- » or as « -ia- » in Second and Third MIA., or is assimilated with a preceding consonant. The middle inflections of course are changed for those of the active; and the passive is extended to a number of neuter roots, forming deponents. The NIA. languages inherited the « -ijja- > -ija- » or « -ia-, -ia- » passive from Apabhrāṇa, but it is not preserved in all of them. Early in the history of NIA., the analytical mode of expressing the passive came into being, and in most of them the old inflected passive fell into desuetude. The languages of the West have preserved it, but those of the Midland, the South and the East have either entirely lost it or have only retained it as an obsolete or archaic form. Western Panjabī, Sindhī and Rājasthānī, for instance, employ « -ij- » or « -i-, -i- » to form the passive; e.g., W. Panjabī « mārdā < mārānda- > striking, « mārindā » being struck; « cāhdā » wanting, « cāhidā » being wanted; « parhē » reads, « parhiē » is read; Sindhī « karijē » is done, « parhījē » is read; Mārwārī « karanō » doing, « karījaṇō » being done. Modern Gujarātī has *i* only in -ē, a 3rd sing. present passive form which is used in a reflexive sense as a substitute for the 1st plur. active [*i.e.*, « hū karū » *I do* < « aham karōmi », but « amē karīē » *we do* < « asmābhīḥ kriyatē » instead of from « vayam kurmaḥ »], and in all other cases substitutes the potential passive in *a*.<sup>2</sup> (L. P. Tessitori, 'Notes on the Grammar of OWR.' § 136: R. L. Turner suggests another explanation of the Gujrātī « -iē », as being from « -imah », through « -imō > -imu > -ī > -i », + « ē » of the 3 pl. [-anti > -ahim >

-è], to distinguish it from the absolute in « -i » < earlier « -ia » [JRAS., 1916, p. 227, foot-note].

**654.** The western languages are thus more conservative in the matter of preservation of this inherited form. The Midland language has curtailed the old passive, but relics do occur in it: e.g., Braj-bhākhā « mārai » *strikes*, « māriyai » *is struck*. Bhandarkar and Tessitori have given instances from the Early Awadhī of Tulasī-dāsa. (R. G. Bhandarkar, 'Wilson Philological Lectures,' Bombay, 1914, p. 227; Tessitori, 'Grammatical Forms in Old Baiswari,' JRAS., 1914.) The modern Hindī respectful imperative or precative forms like « kijiyē » *please do* have in all likelihood been influenced by the passive, if they are not of passive origin (cf. Hoernle, 'Gaudian Grammar,' § 480, 481, 499). An expression like Hind. « kapṛā cāhiyē » *cloth to sell* is a passive one, where « cāhiyē » = *is wanted*. Compare the Bengali চাই in কি চাই « ki cāi » *what do you want?* (literally, *what is-wanted?*), তোমার আসা চাই « tōmārāśāsā cāi » *you must come* (literally, *your coming is-wanted*): Bengali « cāi », Hindi « cāhiyē » are from a Middle Indo-Aryan passive from « \*cāhia(d)i » = Old Indo-Aryan « \*ca(g)hyatē »: compare these with কি চাও « ki cāo » *what do you want* and তুমি আসিতে চাও « tumi āsitē cāo » *you must come*, where « cāo » = চাহ « cāhā », 2nd pers. (plural), present and imperative, = « cāhaba » (= Skt. « -atha » and « -ata »). The « -i-, -i- » or « -ijja-, ija- » affix for the passive is quite common in the dialects of the 'Prākṛta-Pāīngala,' which represent the stage immediately before Modern Hindī: and the loss of this affix is quite a remarkable feature in Western Hindī when compared with the neighbouring Rajasthānī and Panjābī. The « -ij-, -ij- » passive was also quite frequent in Early Marāṭhī, as Bhandarkar has noticed it (R. G. Bhandarkar, 'Wilson Philological Lectures,' pp. 226-227); but it seems to have died out in Modern Marāṭhī.

**655.** It would be interesting to see how far the inflected passive is preserved in Old and Middle Bengali, and in other Magadhan languages.

The language of the 'Dōhā-kōṣas' (see *supra*, p. 112) shows some cases of the « -i- » or « -ijja-, -ija- », as well as the assimilated passive:

e.g., 'Buddha Gān Ō Dōhā,' p. 89, « purāṇē vakkhānijjaī » *it is described by the Purāṇa*; p. 103, « sō ē māī kahijāī » *that has been declared by me*; ibid., « sō paramēsuru kāsu kahijjaī » *for whom is that supreme lord (to be) described?*; p. 105, « visaya ramanta nā visaa vilipyāī (=vilippaī) » *enjoying the world, yet the world is not attached to him*; p. 106, « dēva pi (=vi) jjaī (=jaī) lakṣa (=lakkha) vi disai, apyaṇu (=appaṇu) mārī sa [ki] kariaī? » *if the deity is seen face to face, self becomes dead: he (=by him) what can be done?*; p. 107, « jāva nā disai » *until it is seen*; p. 109, « kāsu kahijjaī » *to whom is it (to be) declared?*; p. 129, « aīsō sō nibbāna bhanijjaī, jahi mana mānasa kiṁ pi na kijjaī » *Nirvāṇa is described to be such that there nothing is done of the mind or of the qualities of the mind*; p. 130, « jaī pavana-gamana-duārē [diḍha] tālā vi bhijjaī, jaī tasu ghōrāndhārē mana diva hō kijjaī » *if the strong lock at the door for the passage of the wind is shut* (« bhijjaī », cf. Bengali root ভেজ « bhēj » *to shut=?* Skt. « abhy-ajyatē »), *if in that, in the deep gloom, the mind is made as a lamp*: etc.

In this Western Apabhraṇa dialect, the « -ijja- » affix is more common than the « -ia- », and it is in full force as a passive form. The Old Bengali of the Caryā-padas has a number of instances of the inflected passive, but the affix is « -i(a)- », not « -ijja- » or « -ija- »; besides there are a few of the assimilated « -yā- » forms: e.g., Caryā 1, « saala sa[mā]hia kāhi kariaī » *what is attained by all samādhī?*; 6, « harinā harināra nilaa na jāṇi » *the abode of the stag and of the doe is not known*; ibid., « hariṇāra khura na disaa (=disai) » *the stag's hoof is not seen*; 26, « pāviaī » *is obtained*; « bhāviaī » *is thought of*; 32, « dubiē » *is milked*; 46, « echijāī » (=chidyatē) *is cut*; etc.

The analytical passive with root জা, যা « √jā < yā » *to go* following the verbal noun in « -ana » has already become established in the language of the Caryās; and the analytical « √jā » passive in NIA. seems to have been influenced by, if not actually developed out of, the older inflexional « -ij- » form.

It would seem that in Māgadhi Apabhrāṇa, the two forms « -ia- » and « -ijja- » occurred side by side: and « -ia- » seems to be the genuine Magadhan affix, and « -ijja- » borrowed through the influence of the Western speeches, and not native in the East. The « -ia- » was preserved in OB. and in MB., although as an obsolete form in the latter, and its real nature seems to have been lost to the speakers quite early.

The examples of the « -ia- » passive in the 47 Caryās are not so few, there numbering some twenty. In Middle Bengali literature we find similar relics of the inflected passive—a linguistic survival which seems not to have been noticed before. The affix loses prominence as the language progresses, and is ultimately merged into the 1st and 3rd personal affix; and in this way the passive verb is transformed into the active one.

There are numerous cases of the passive in « -i(a)- » in the ŠKK. : for instance—

p. 19, যত নানা ফুল পান করপুর সব পেলাইল পাএ ।

উঠিঅং বড়ায়ি রাধাক বুইল—হেন কাম না করিএ ॥

« jāta nānā phul& pānā kārāpur& sāb& pēlāil& pāē :

uṭhiā Bārāyī Rādhā-kā buil&—hēn& kām& nā kāriē »

*All the various flowers, betel-leares and camphor and all she  
threw away with her foot. The O'd Lady got up and said  
to Rādhā, 'you should not do so' (lit. such a deed should  
not be done : « kāriē ») :*

p. 57. আইহন বীর তিন লোকে ভালে জাণি ॥

« Āihān& bīr&, tīn& lōkē bhālē jāṇi »

*That Ā. is a hero is known (jāṇi) well in the three worlds ;*

p. 59, দান সাধি রতিপত্তিআশে ।

« dān& sādhiē rāti-patiāsē »

*The toll is demanded (sādhiē) with the expectation of dalliance  
(with thee) ;*

- p. 118, তুথিল হয়িলে কাহাঙ্গি দুষ্ট হাথে না খাই� ।  
 « bhukhilā hāyilē, Kāñhāñī, duī bāthē nā khāiē »  
*When one is hungry, O Kānha, one should not eat (« khāiē », lit.  
 it should not be eaten) with both hands ;*
- p. 137, আপনা রাখিয়ে আপনে ।  
 « āpānā rākhīyē āpānē » (=ātmā rakṣyātē ātmānā)  
*Self is (to be) preserved by self ;*
- p. 145, নাএর অস্ত্রে গেলো চন্দ্ৰবনী রাহী ।  
 তার পাছে আৱ বত গোআলিনী সহী ॥

 « tribhubānā-nāthā tōmhē Hāri, prabhu hāyiā hēnā nāhī kārī »  
*You are Hari, the Lord of the three worlds ; being the Master,  
 you should not do so (lit. it should not be done : « kārī ») ;*
- p. 289, পুনমীৰ চালু তোক্ষাৰ বদন ঘুসিএ জগতজনে ল ।  
 « punamīrā cāndā tōmhārā bādānā ghusiē jāgātā-jānē, lā »  
*O, your face is proclaimed (ghusiē) by the people of the world  
 to be the moon of the full-moon night ;*

p. 367, সোণা ভাঙিলে আছে উপাএ জুড়িএ আগুন তাপে ।

পুরুষ নেহা ভাঙিলে জুড়িএ কাহার বাপে ॥

• sōnā bhāngilē āchē ūpāē, juriē āgunā-tāpē :  
puruṣā-nēhā bhāngilē, juriē kāhārā bāpē ? •

*If gold is broken, there is a way—it is joined (juriē) by the heat of the fire; but if a man's love is shattered, by whose father (=by what man) can it be joined?*

There are numerous other instances of a similar type in the ŠKK. The general tendency will be to explain the forms in ইএ « -iē » as being in the ই « -i » of the first person, and the এ « -ē » only as a final lengthening for reasons of metre. But পাইএ, করিএ « pāiē, kāriē » etc., are true inflected passives, and it will be seen that in the instances quoted above, the passive construction gives the correct explanation of the passives rather than the active first person : পাইএ, করিএ etc., thus represent the Caryā forms like « pāviaī, kariaī », =Sanskrit « prāpyatē, kriyatē ». The passive was already dying out in Old Bengali; and in Middle Bengali it would be easily confused with the active first person from similarity in form. We may recall as a parallel instance the Gujarātī use of the passive third person singular as the first person plural active, as in « amē utāriē, amē cāliē », etc., which have been explained as being really passive forms (see *supra*, p. 910). The same thing seems to have happened in Central Magadhan, in the « -ai » forms for the 1st person of the verb. The passive in its origin is connected with the reflexive, and the transition to the active is always easy. More so in the early periods of Bengali, when there was a confusion between the instrumental and the nominative, from which the language even now is not wholly free.

The transition from the decaying passive, which was less and less properly understood, to the active was quite a matter of course : from after the ŠKK. onwards, we find frequent use of « -iē » in active forms, for the 1st person generally.

The passive use of the neuter verb is also common in Old and Middle Bengali : e.g., ŠKK.. p. 364, পুণ্য কইলে স্বর্গ জাইএ, নানা উপভোগ পাইএ « punyā kālē swāggā jāiē, nānā upabhbhōgā pāiē » (=gamyatē, prāpyatē) *practising virtue, heaven is attained, and many enjoyments are obtained.*

Examples of the inflected passive are frequent in Middle Bengali literature. A few are given below :

From poems by Cāṇḍīdāsa (VSP., II, pp. 968 ff.): নৌল মুকুতার হার  
মনোহর শোভিত দেখিএ গলে « nīlā mukutārāḥ hārāḥ mānōhārāḥ śobhitā dēkhiē  
gālē » *a charming necklace of blue pearls is seen beautifully in her neck;*  
অবলা পরাণে এত কি সহিএ « abalā pārāṇē ētā ki sahiē » *can so much be  
endured in the life of a weak woman?*; ক্ষুরের উপর রাধার বসতি, নড়িতে  
কাটিএ দে « kṣurērāḥ upārāḥ Rādhārāḥ bāsati, nāritē kātiē dē » *Rādhā's  
abode is on (the edge of) a razor, her body is cut at the (slightest)  
movement;* মানুষে এমন প্রেম কোথা না শনিএ « mānuṣē ēmāṇāḥ prēmā kōthā  
nā śuniē » *such love in man has nowhere been heard of;* from the  
'Caitanya-caritāmṛta' of Kṛṣṇa-dāsa Kavirāja (VSP., II, p. 1228):  
সনাতন কৈল গ্রহ ভাগবতামৃতে। ভক্তি-ভক্তি-কৃষ্ণ-তত্ত্ব জানি যাহা হইতে॥ হরিভক্তিবিলাস  
গ্রহ কৈল বৈশ্ববের কর্তব্য যাচ। পাইয়ে পার॥ « Sānātānāḥ kāilā<sup>2</sup>  
grānthaḥ Bhāgavatāmṛtē, bhākti-bhāktā-Kṛṣṇā-tattwā jāni jāhā hāitē :  
Hāri-bhākti-bilāṣā grānthaḥ kāilā bāisṇābāṣā-ācārāḥ, bāisṇābārāḥ kārttibhyā  
jāhā pāiyē pārāḥ » *Sanātana made the book Bhāgavatāmṛta, from which  
are known the doctrines of bhakti and bhakta, and the nature of Kṛṣṇa ;  
he made the book Hari-bhakti-vilāsa, on Vaiṣṇava ritual, in which the  
duties of a Vaiṣṇava are made to cross over, as it were (i.e. described in  
detail);* from 'Bhāgavata,' by Daivaki-nandana Sinha. (VSP., II, p.  
844): যে অঙ্গে দেখিএ সেই অঙ্গে অলঙ্কার « jē aṅgē dēkhiē sēi aṅgē alaṅkārāḥ »  
*jewels on every limb that is veined;* বিনি না পুছিলে কারো না জানিএ জাতি  
« bini nā puchilē kārō nā jāniē jāti » *no one's family is known without  
asking.*

656. Instances like the above are fairly common in Early Bengali literature, and further quotations are not necessary. Maithili and Oriyā, too, show similar forms, and some instances may be given :

Maithili : Vidyāpati (VSPD. edition), p. 6, « lakhaī na pāria, jēṭha  
kanēṭha » *cannot be distinguished, (whether) old (or) young*; p. 9, « jata  
dēkhala, tata kahahi na pāria » *all that was seen cannot be described*; p. 19,  
« paṭhahi na pāria ākhara-pāti » *the rows of letters cannot be read*; p. 21,  
« sē nahi dēkhala jē diya upāmā » *that has not been seen with which a*

*comparison can be made*; p. 30, « saba taha sunia aisana bēwahārā » *that such is the usage is heard from all*; p. 39, « Madhu-ripu sama nahi dēkhia sobāwana, jē dia tanhika upāma rē » *nothing handsome like the Foe of Madhu is seen, with which his comparison can be made*; p. 44, « na jāniya kiya karu mōhana cōra » *what this charming scamp may do is not known*; p. 499, « kajjala-rūpa tua Kālī kahiaō...Gangā kahiē pānī... Brambhā-ghara Bramhānī kahiē, Hara-ghara kahiē Gaurī » *in favour like lamp-black, thou art called Kālī ; she is called Gangā when in watery form ; in the home of Brahmā, is called Brahmāṇī ; is called Gaurī in the home of Hara ; etc.*

Oriyā : Jagannātha-dāsa's 'Dhruva-caritra' (Contai edition) : p. 5, « kāmpii (=kampvatē) tāhārā uijā dēhi » *her own body trembles*; p. 33, « dēhā-māṅgā diśāi, khājūrā-bṛkṣā-prāyā » *his body's measure is seen, like a date-palm*; p. 11, « dāsā-disi ḡandhākārā, kiebi hi nā disi » *the ten quarters are dark, nothing is seen*.

Thus the older literatures of Maithili and Oriyā also demonstrate the presence of the inflected passive in these speeches.

657. The inflected passive is also preserved in a curious idiomatic usage in Modern Bengali, in which both its form and nature are disguised. We have expressions like এ কাজ করে না « ē kāj# kārē nā » *shouldn't do this*, রবিবার দিন মাছ খায় না « rābi-bārā-dina māch# khāy nā » *shouldn't eat fish on Sundays*, অৱ হ'লে নায় না « jwārā hōlē nāy nā » *shouldn't bathe when there is fever*, etc., etc., where the forms করে, খায়, নায় etc., are used with or without the negative particle, and are apparently 3rd person indicative present, the subject, however, being left understood ; and such expressions have a general prohibitive or imperative force. The fuller form is presented in dialectal Bengali : in Birbhum, for instance, there is an imperative or optative in « -iyē », e.g., in sentences like হোথা যেয়ে না « hōthā jeyē (< jāiyē) nā » *one shouldn't go there*, ভাইকে না দিয়ে থেয়ে না « bhāi-kē nā diyē khéyē (< khāiyē) nā » *shouldn't eat without sharing with one's brother*, আগুনে হাত দিয়ে না « agunē hāt# diyē nā » *shouldn't put one's hand in fire*, তোর দাদা যেনে না এসে « tōr# dādā jēnē nā ēsē (=ēsiyē?) » *may your brother not come*, যে আমাকে এত কষ্ট দিলে তার কৃষ্ণাধি হ'লে, সে যেনে

হটী চোখ খেয়ে « jē āmākē ētā kāṣṭā dilē tārā kuṣṭhā-byādhi hōyē, sē jēnē duṭī cōkhā khēyē » *may he get leprosy, may he eat his two eyes, that caused me so much pain* (Basanta Kumār Chatterji in the VSPdP., 1326, p. 266) : in these, খেয়ে, দিয়ে are passives, and যেয়ে, এসে, হ'য়ে are equally passives of neuter verbs (such as are found in the ŠKK.) in which the archaic aspect, which cannot be confused with the indicative active present, is retained. In MB. there are instances of this construction : cf. ŠKK., p. 333, অভু হয়িআঁ। হেন না করী « prābhu bāyiā hēnā nā kārī » *shouldn't do so, being the Master*; p. 185, গোভ হয়িনেঁ কাহাত্রি আরতি না করী « lōbhā hāyilē Kānhānī ārāti nā kārī » *O Kānha, shouldn't yearn (too much) although there is desire*; p. 257, কেহ তার না কহিএ মরণে « kēhā tārā nā kāhiē mārātē » *none should speak of his death, etc. ; etc.* The MB. forms in « -i, -I- » indicate that this construction is properly a passive one; এ কাজ করে না, « ē kājā kārē nā » is « ētāt kāryām na kriyatē » : « kriyatē » would be « kariai, kāriē, kāri » in MIA. and OB. and MB. As in the other cases, the passive nature of the verb was forgotten, and the active form came in. The influence of a similar imperative use of the optative (active and middle) and of the passive, as in Sanskrit, is likely here.

General statements, in which the subject is not definite or important, may be in the third person, active. But it is just likely in such popular expressions like জামারের জন্য মারে ইঁস। গুঞ্জি-শুক্র থায় মাস॥ « jāmāyērā jānyā mārē hāsā, guṣṭhi-śuddhā khāy māsā » *they kill the goose for the son-in-law, and eat the meat with the whole family (= the goose is killed, the meat is eaten)*; and এক দেয় বর দেখে। আর দেয় ঘর দেখে॥ « ēkā dēy [dæə] bārā dēkhē, ārā dēy [dæə] ghārā dēkhē » *they give (in marriage), first by looking at the bridegroom, again by looking at the house = (the daughter) is given (in marriage), taking into note either the bridegroom or his family ; and in similar proverbial couplets and phrases, we have the passive.*

It seems we have also the passive in a rare polite imperative in some North Bengali dialects, e.g., শ্বাথেক, রাথেক « dyākhē-kā, rākhē-kā » *please see, please keep* (= « dēkhiē, rākhiē + -kā » : see below, ‘Pleonastic Affixes : Affix « kā »’).

## (2) BENGALI 'KARMA-KARTR-VĀCYA.'

**658.** The so-called middle-voice (*karma-kartṛ-vācya*) of Bengali, which we find in impersonal constructions, seems originally to have been this inflected **-yā-** passive: e.g. কলসী ভরে **< käläsī bhärē >** *the jar becomes full*; কাপড় ছেঁড়ে **< kāpāṛḍ chēṛē >** *the cloth gets torn*; বই কাটে **< bāi kāṭē >** *the book cuts > sells*; বাশ ভাঙ্গে **< bāśṭ bhāṅgē >** *the bamboo breaks*; শঁখ বাজে **< śākhā bājē >** *the conch-shell is sounded*; etc. Here ভরে, ছেঁড়ে, কাটে, ভাঙ্গে, বাজে, etc., are to be explained as passive forms, derived from earlier, fuller **< \*bhariaī >** > \*ভরিএ **< bhāriē >**, **< chindiaī >** > \*ছিণিএ **< chīṇdiē >** **< \*kattiaī, \*kāṭiaī >** > কাটিএ **< kāṭiē >**, **< \*bhañjiaī >** or **< \*bhāṅgiaī >** > \*ভাঙ্গিএ **< \*bhāṅgiē >**, **< \*bājiaī >** > \*বাজিএ **< \*bājiē >** etc., of OB. and eMB. A similar use of the passive is known also in Sanskrit (cf. Speyer, 'Vedische und Sanskrit-Syntax,' § 169).

## (3) OB. AND MB. PASSIVE IMPERATIVE.

**659.** In the ŠKK. there is a form in ইউ **< -iū >** which is illustrated by the following examples :

p. 140, নাও বাঞ্ছিতে গিয়াঁ করিউ যতনে **< nāā bāndhitē giā kāriū jātānē >** *let us make an attempt to build (lit. bind) the boat*; p. 141, আনহ সকল সহিতন মেলি করিউ যুগতি **< ānghā sākāla sākhi-jānā, mēlī kāriū jugāti >** *bring all girl friends, let us hold a consultation together*; p. 141, পসার সাজিউ দধি হৃধে, সেসি জৌবার উপাএ **< pāsārā sājīū dādhi dudhē, sē-si jibārā upāē >** *let us arrange our milk and curds for sale, that indeed is the means of livelihood*; p. 204, নানা ফুল ফুটিলহে মাঝ বুদ্ধাবনে। তাক পিন্ধি মথুরাক করিউ গমনে **&** **< nānā phula phuṭilā-chē mājhā Brndābānē, tākā pindhi Māthurā-kā kāriū gāmānē >** *flowers of many kinds have blossomed in the middle of Brndāvana, wearing these, let us go to Mathurā*; p. 253, যমুনাক যাইউ বাধা লয়িআঁ সখীগণে **< Jāmunā-kā jāiū Rādhā, lāyiā sākhi-gānē >** *let us, O Rādhā, go to Yamunā, taking (our) girl-friends*; p. 270, দধি বিকেঁ জাইউ মথুরা **< dādhi bikē jāiū Māthurā >** *let us go to Mathurā to sell curds*; p. 292, সচৰে রাধা লইআঁ জাইউ বৰ **< sātwārē Rādhā lāiā jāiū ghārā >** *let me take Rādhā quick to her home*; p. 310, বাশী চোৱায়িতে করিউ যতনে **< bāśī cōrāyitē kāriū jātānē >**

*let us make an effort to steal the flute;* p. 354, বারতা পুঁজির রাধা সব জন থানে « bārātā puchiū Rādhā sābā jāngā thānē » *let us ask for news, O Rādhā, from everybody;* p. 347. কদম্বলাক জাইউ চিত্তের হরিষে « kādāmā-tālā-kā jāiū cittērā hāriṣē » *let us go to the foot of the Kadamba tree, with joy in mind.*

This ইউ « -iū » form is certainly the passive imperative: in force it is generally optative or imperative. In an example like দৃশ্য চোরায়িতে করিউ যতনে, করিউ যতনে « kāriū jātānē » = ~kt. • kriyatām yatnah », so জাইউ « jāiū » = « gamyatām », বারতা পুঁজি « bārātā puchiū » *let us ask for news, lit. let news be asked for* = « vārttā pṛcchyatām ». The ইউ « -iū » affix is the Second MIA. imperative passive 3rd pers. singular affix « -iādu », as in Sauraseni (and Nāgadhi) « kadhiādu, kariādu (kaliādu), sunjādu (śunjādu) » = « kathyatām, kriyatām, śrūyatām », « -iādu » giving the later form « -iāu » and « \*-iu ».

In eMB., the spelling with long উ « ū » has no special point, unless the lengthening had a historical reason analogous to that for the final « -i » in the same period (see *supra*, p. 309). This 3 pers. imperative in « -iu, -iū » soon became confused with the 1 pers. indicative present in « -ō, -ō » (for which see *infra*, ‘ Radical Tense ’). This « -iu » passive is also found in Old Bengali (see *supra*, pp. 904, 907): *e.g.*, Caryā 15 « bāṭā jāiu » *go the way* (=vartma, vartmani gamyatām).

### [II] ANALYTICAL FORMATION OF THE PASSIVE IN BENGALI.

**660.** The inflected passive is a fossil in Bengali: the living method is analytical and periphrastic. The following are the ways in which the passive is formed in Bengali:

*I am seen* = (1) আমি দেখা যাই « āmi dēkhā jāi » ; (2) আমাকে (আমার, আমারে) দেখা যায় « āmākē (āmāy, āmārē) dēkhā jāy » ; (3) আমাকে (আমার, আমারে) দেখন যায় « āmākē (āmāy, āmārē) dēkhāṇḍ jāy » ; (4) আমি দেখা পড়ি « āmi dēkhā pāri » ; (5) আমাকে (আমার, আমারে) দেখা হয় « āmākē (āmāy, āmārē) dēkhā hāy » ; and (6) আমি দৃষ্ট হই « āmi dṛṣṭā hāi ».

Of these (1), (4) and (6) are true passives (*karma-vācyā*), and these agree with the passive forms of English, French and other modern

Indo-European languages. The other forms, (2), (3) and (5) are instances of the neuter construction (*bhāva-vācya*) in Bengali. All the above forms are used in Bengali, but there are slight shades of difference in their meaning.

661. (1) আমি দেখা যাই « āmi dēkhā jāi » *I am seen* is best explained as being composed of the passive participle (adjective) in আ « ā » and যা « √jā » *to go*, and which assumes the function of the substantive verb. But this form, though allowable, would not ordinarily be regarded as very idiomatic or natural in Bengali: the passive proper, with the object in the nominative, would hardly be considered as natural to the language, especially when the nominative is a definite person. But general statement, where only the action is definite, and is the more important thing, can be easily made with an impersonal construction in the passive: e.g., দেখা যায় « dēkhā jāy » *it is seen* (subject ইহা « ihā » *this, it understood*); যদি বলা যায় « yādi bālā jāy » *if it is said*; শোনা যাইতেছে or শোচ্ছ « sōnā jāitechē, jācchē » *it is being heard*. In the passive construction, the mind of the speaker is loth to forget that what is the grammatical nominative is the real object, and hence the feeling of the native speaker has this preference for the neuter construction, with the nominative-object in the dative, e.g., আমাকে দেখা যায় or আমাকে দেখা হয় « āmākē dēkhā jāy, hāy ». The conscious use of the passive would bring in a certain amount of emphasis; and to make a statement emphatic or definite, the dative with কে « -kē » is preferred to the accusative or nominative without any inflexion, when we are speaking of a sentient or animate being (see *supra*, pp. 897, 898). So আমাকে (আমারে, আমায়) দেখা যায় « āmākē (āmārē, āmāy) dēkhā jāy » would be preferred, as the idea is definite so far as the object of sight is concerned, to আমি দেখা যাই « āmi dēkhā jāi » where আমি « āmi », although formally nominative, is in sense really the oblique or accusative. আমি দেখা যাই « āmi dēkhā jāi », however, would seem to be the older form, and আমাকে দেখা যায় « āmākē dēkhā jāy » a later one. আমি করা যাই « āmi kārā jāi » *I am done* would be bad Bengali, because here the first personal pronoun would preferably have the কে « -kē » and be put in the dative as it is very

definite, and করা যাওয়া « kārā jāḍā » is rather vague: the construction would be regarded as clumsy. But আমি ধরা গাই « āmi dhārā jāi » *I am caught* would be quite allowable, as ধরা « dhārā » refers to a definite action.

Names of inanimate objects as a rule do not take কে « -kē » when they are in the objective or dative; hence ঘর দেখা যায় « ghāṛ̪ dēkhā jāy » *the house is seen* (not ঘরকে « ghāṛ̪-kē »), where ঘর « ghāṛ̪ » can be easily parsed as being the subject of the passive sentence.

**662.** (2) আমাকে (or আমারে, আমায়) দেখা যায় « āmākē (āmārē, āmay) dēkhā jāy » *I am seen* or, with a slight potentiality implied, *I may be seen* (=they can see me). There is a difficulty in explaining দেখা « dēkhā » here. Generally it is looked upon as a verbal noun in আ « -ā », derived ultimately from the passive participle in « -tā » of Indo-Aryan, the nominal use of which is also quite common in Sanskrit. It would thus be explained as meaning *with-regard-to-me, a-seeing goes-on* (or *takes-place*). The occurrence of (3) আমাকে দেখন যায় « āmākē dēkhāṇ̪ jāy » *with-regard-to-me a-seeing takes-place* would lend countenance to the above explanation. But it would seem that in an expression like আমাকে দেখা যায়, দেখা is really a passive participle adjective, and the whole construction is in the impersonal, which is so characteristic of the Western and Southern Indo-Aryan languages: আমাকে দেখা-যায় would be best explained as being literally, *with-regard-to-me, it-is-seen*.

If we had evidence from Old and Middle Bengali remains on this point, we might expect a solution of the difficulty. But the passive with the past participle in আ « -ā » was not at all a popular form, and its occurrence is rather rare in the plain direct narration of Middle Bengali verse. Stray instances in the ŠKK. like তোক্ষ জাইবে মার « tōmbā jāibē mārā » (= মারিঅ, মার্ত্ত OIA. « mārita > māria, mār-ā » = Modern মারা « mār-ā », i.e., মারিঅ+আ « māria » + pleonastic affix « -ā ») *you will get killed* (p. 33), বান্ধিল জাই « bāndhila jāi » *becomes tied up, is put in bonds*, (p. 71: here we have the old passive participle adjective in ইল « -il- », for which see *infra*, under ‘Past Tense’) indicate that the passive participle is the form associated with this construction. The transition was from the real passive made up of the participle and the verb (and with the

object proper in the nominative) to the impersonal neuter construction (with the nominative-object in the dative and the passive participle); and such a state of things has its parallel in the other cognate languages.

**663.** The origin of this জা or যা « jā » passive has undoubtedly been influenced, as Beames had suggested ('Comparative Grammar of the Indo-Aryan Languages,' Vol. III, 1879, pp. 73-74), by the old « -ijja- » passive of Apabhrāñśa. We have the « -ijja- » forms in Prakrit and Apabhrāñśa on the one hand, and the « jā » forms in the modern languages on the other: the middle is blank, and linking these two in all likelihood there was a transitional stage, not represented in linguistic remains, when the « -ijja- » was slowly assuming a new rôle as a root—when it was merging into the « jā » root, as it were. It would seem that the neuter passives (deponents) like « marijjaī=mriyátē » dies first took up an analytical form: because « marijjaī » is equivalent in meaning to « marāī » or « marē » (=máratí, máraté), the « -jjai » would seem to have been regarded as a form of « jāi » from « √jā », giving rise to the analysis « mari jāi » *haring-died, goes or passes away* (=MB. মরিয়া যাব « māriyā jāy »). The occurrence of the compound verb in the speech would help such an analysis. Once this analysis was established, there would not be any bar in forming other tenses and verb forms from « √jā ». In Early Middle Bengali, analysed forms of the above type (the conjunctive in হই « -i » or ইয়া « iyā » + √যা « jā », mostly with neuter verbs) are very common; e.g., in the ŠKK. চলি জাইহ « cāli jāihā » depart; পড়ি গেল দিতী « pāri gēla dithi » *the sight was cast*; ভাঙ্গি জাই « bhānggi jāe » gets broken; মোর মজি গেল মনে « mōrā māji gēla mānē » *my mind became attached*; পড়িয়া যাইবে « pāriyā jāibē » *you will fall*; মরিঞ্জি যাইবি « māriñjā jāibī » *wilt die*; etc., etc. An Old Bengali instance would seem to be « avasari jāi » (< « \*avasarijjai », deponent of « ava » + « √sri » more) in Caryā 2. The modern passive or neuter with the আ « -ā » participle would seem to be of later origin. The potential sense which one can attach to the passive in যা « √jā », and which is never present in the passive with হই « √hā », seems to point

at the « -ijja- » origin of the former. The old potential or optative had « -ējja- » in Prakrit, and the confusion between the passive and the optative, already noted, might just be continued in the newly risen analytical form.

As has been noted above, the « -ijja- » form seems to have been foreign to Māgadhi Prakrit and Māgadhi Apabhraṇa, the source of Bengali; since no « -ijja- » forms are found in the relics of the inflected passive preserved in Bengali and other Magadhan languages, only « -i- » forms. The formation of the analytical passive with « jā » may thus have been brought about in Old Bengali through contact with and influence of Western dialects having « -ijja- >-ij, -ij- ».

**664.** (3) আমাকে দেখন যাব « āmākē dēkhānā jāy » *I am seen, I may be seen, lit. with-regard-to-me, a-seeing goes-on (or takes-place)*. This form of passive is one of the oldest constructions in Bengali. It occurs in the Caryās, and it is quite plentiful in Middle Bengali; e.g., (Caryā 2) « dharāna na jāi » *cannot be held*, (35) « kahāna na jāi » *cannot be described*, (4) « lēpana jāi » *is entangled or smeared*; SKK., p. 38, ললাট লিখিত খণ্ডন না জাএ « lalātā-likhita khāndāna nā jāē » *that which is written on the forehead cannot be averted*; p. 58, প্রাণ ধরণ না জাএ « prānā dbhārānā nā jāē » *life cannot be endured*, etc. Middle Bengali instances are fairly common. In Modern Standard Bengali, this construction is falling into disuse, but it is fully preserved in the East Bengal dialects. The employment of this অন « -ānā » + যা « √jā » passive is impersonal, and it is on the lines of (?).

It would seem to have originated from an unconscious analysis of the verbal adjectives, passive, in « -anīya(ka) ». The line of development was probably as follows: « karaṇīya-ka > karaṇijja(y)a » > করণি জাএ « \*karaṇi jāē », করণ জাএ « kārānā jāē » ; so « paṭhanīya-ka > paḍhanijja(y)a », পঢ়ণি জাএ, পঢ়ন (পড়ন) জাএ, « \*paṭhanī jāē, pāṛ(h)ānā jāē » ; etc. The intermediate form in this process of analysis, as in করণি জাএ, পঢ়ণি জাএ, is not preserved in Bengali, but it seems to be represented in Early Baiswāri forms like « barani jāya, kahani jāi » etc., as in Tulasi-dāsa. We may note that an expression like না জায় কহনে « nā jāyā kāhānē » would be quite

natural in Middle Bengali, and the locative-instrumental in এ « -e » in কহনে « kāhan-ē » might be a reminiscence of the older form in ই « -i » which could be regarded as a locative. The analysis into a noun in অন+√ষ্ণ « -ana » + « √jā » took place before the Old Bengali period : and once this analysis became accepted, transposition of the noun and the verb, and the insertion of the negative particle না between the noun and the verb, which is so frequent in negative constructions of this type in Middle Bengali, would result : thus সহন না যায় « sāhānā nā jāy », না যায় সহন « nā jāy sāhānā » *it cannot be borne* (but curiously enough, না সহন যায় is not found, although সহন যায় না is commonly met with in modern speech : the reason being probably that না « nā » which qualifies the verb in this analysed form must not be separated from it by the noun).

In Middle Bengali we have a few cases where there is apparently a verbal noun in অ « -a » : e.g., নিরাবৰ না যায় রে « nibārā nā jāy rē » *cannot be prevented* (VSP., p. 981) ; so বোল না যায় « bōlā nā jāy » *cannot be described*. There is no form in Modern Bengali corresponding to it : the absence of the -ন (গ) « -ng (-ng) » in such cases is in all likelihood due to hapology.

**665.** (4) আমি দেখা পড়ি « āmi dēkhā pāri » *I am seen, I happen to be seen*, lit. *I fall seen*. This construction, apparently an old one, is essentially idiomatic, and strictly speaking it should come under the consideration of the characteristic 'Compound Verbs' of Modern Indo-Aryan. The use of the পড়ি « √pāri » is restricted to a few verbs only, and as Beames has fully noticed it, it indicates accidence as well as finality more than anything else. The দেখা « dēkhā » etc., are best explained as passive participle adjectives. The modern Dravidian employment of a root « pad » to form the passive has been noted by Beames and others, but it would seem that it is a matter of coincidence. The old Dravidian speech did not possess a passive form, but the employment of obviously the same root in the two groups of Indian speeches, Aryan and Dravidian, is interesting ; and it is only one of numerous points of similarity which demonstrate a fundamental agreement between the speakers of the languages of the two groups in their habits of

thought. The impersonal construction with পড়ে « √pār » (e.g., আমাকে দেখা পড়ে « āmākē dēkhā pārē ») is unknown.

**666.** (5) আমাকে দেখা হয় « āmākē dēkhā hāy » *I am seen* (i.e., they see me); lit. *with-regard-to-me, a-seeing takes-place* (or *a-seeing there-is*). Here we have a verbal noun in « -ā » : we never say আমি দেখা হই « āmi dēkhā hāi » where « āmi » would be the nominative. Note that মারা যাব « mārā jāy » or মারা পড়ে « mārā pāre » gets struck or killed, dies, but মারা হয় « mārā hāy » the striking or killing takes-place; দেখা গেল « dēkhā gēlā » seen went, came in sight, but দেখা হইল « dēkhā hāilā » *a-seeing took-place*. The root হ « hā » here is non-committal and merely states the fact. This construction seems to be a modern one.

**667.** (6) আমি দৃষ্ট হই « āmi dṛṣṭā hāi » *I am seen* is a learned form and a modern one, and it is found in high-flown speech and in the « sādhu-bhāṣā » only. This construction seems to have received a new impetus from the English passive: the Sanskrit passive participle avoids any ambiguity that might result if the native passive participle in আ « -ā » were used. But it undoubtedly originated in Middle Bengali, as Sanskrit passive participles have been largely introduced into the language since its birth.

**668.** The root আছ « √āch » is used with the past participle to form a sort of passive perfect, mostly in connexion with inanimate nouns or nouns that are names of lower animals, which are subjects of the predicate; e.g., এ বই আমার পড়া আছে « ē bāi āmārā pārā āchē » *this book has been read by me*, where আমার « āmārā » governs পড়া « pārā » which predicates বই « bāi » the subject of আছে « āchē »; মাছ ধরা আছে « māchā dhrā āchā » *fish have been caught* (or *fish that have been caught are*); এ কথা সকলের জানা আছে « ē kāthā sakalērā jānā āchē » *this is known to everybody*; এ বই তো পড়া ছিল « ē bāi tō pārā chilā » *this book indeed was read before*, etc., etc. This construction seems to be recent.

**669.** Two other idiomatic forms of the passive may be noted. চল « √cāl » *to go*, to express the idea of possibility or continuance, occurs with the verbal noun in আ « -ā », which governs the personal object

in the dative with কে « -kē », and the inanimate object or object which is the name of a lower animal in the accusative. The construction is impersonal : e.g., খাওয়া চলে « khādā cālē » *can be eaten*, দেখা চলল « dēkhā cāllā » *the seeing went on*. খা « √khā » *eat in the sense of suffer* is used with the verbal noun মার « mārঃ » *a beating*, and is conjugated actively, to denote *to be beaten*. This last idiom occurs in other Indo-Aryan languages, as well as in Dravidian.

**670.** The impersonal and indefinite use of the passive is a noticeable feature in Modern Bengali. When one is not sure whether to use the honorific forms in speaking to an individual, recourse is taken to the passive impersonal to avoid any chance of giving offence by using the ordinary non-honorific : e.g., কি করা হয় « ki kārā hāy » *what do you do ? literally, what is done (by you) ?* instead of the direct forms, the honorific আপনি কি করেন « āpni ki kārēnঃ » or the inferior তুমি কি কর « tumi ki kārā ». So কোথা থাকা হয় « kōthā thākā hāy » *where do you live ? etc.* Cf. also the indefinite expressions ধরে নেওয়া যাব « dhōrē nēoā jāk » *let it be granted*; যদি বলা হয় or যায় « yādi bālā hāy, jāy » *if it is said that*; এখান দিয়ে যাওয়া যাব না « ēkhāng̃ diyē jādā jāy nā » *one cannot go by this way* (*where যাওয়া যাব* « jādā jāy » is probably from « \*jājjāi », passive with « -ijj- » : cf. এখান দিয়ে যাব না « ēkhāng̃ diyē jāy nā » *one does not, one should not go by this way*, where যাব « jāy » = « \*jāiāi », passive in « -ia- »).

### [III] THE PASSIVE IN « -Ā- ».

**671.** In MB. and NB. occurs a passive with a distinctive « -ā- » affix, which is illustrated below. This passive may have a potential implication.

Middle Bengali : SKK., p. 89, সেহি এহা পথে মাহাদানী বোল্লাএ « sēhi ēhā pāthē māhādānī bōlāē » *he is called the chief toll-collector in this highway*; p. 186, যেহে না ছাড়াএ ঘোল « jēnhā nā chārāē ghōlā » *so that the butter-milk is not scattered*; also cf. পঞ্চানন হুলো কয়, তেজীয়ান না দোষায় « Pañcānānঃ Nulō kāy, tējīyān nā dōṣāy » *says Pañcānana, the one with defective arm : 'a man of spirit is not censured'* (Nagendranātha Vasu, 'Banger Jātiya Itihās,' Brāhmaṇa-kāṇḍa, I, i, p. 224);

Modern Bengali instances : বেশ মানায় « bēśঁ mānāv » *fits nicely, looks well*; কথাটা ভাল শুনায় না « kāthā-tā bhālā śunāy nā » *the story does not hear nice (=it is not to be regarded as welcome)*; কথাটা চারাইয়াছে « kāthā-tā cārāiyāchē » *the news has been spread*; সে ভাল মানুষ কহার বটে, কিন্তু লোক স্ববিধার নয় « sē bhālā-mānus̄ kāhāy bātē, kintu lōk̄ subidhār̄ nāy » *he is spoken of as an honest man, but he is not of the good sort*; এতে কিন্তু দোষ খণ্ডয় না « ē-tē kintu dōṣ̄ khaṇḍāy nā » *but the evil is not averted by this*; যত পরবায় তত দোষ বার হয় « jātā pārākhāy tātā dōṣ̄ bā'r̄ hāy » *the more it is tested the larger the tale of faults that come out*; ছল পরবার জন্ম কান বেঁধায় « dul̄ pārābār̄ jānyā kān̄ bēdhāy » *the ear is pierced to put on earrings*; এটা তত খারাপ দেখাবে না « ētā tātā khārāp̄ dēkhābē nā » *this will not show so bad*; etc., etc. : the sense in most instances, as above, is impersonal.

It occurs in Oriyā : ‘Dhruva-caritra’ of Jagannātha-dāsa (Contai edition), p. 8, « sē bōlāi pāṭārānī » *she is called the chief queen*; p. 48, « dēbā gāṇā-mādhyē tu bōlāu sunāsirā » *thou art called Sunāsira (=Indra) among the gods*; p. 16, « dwādaṣ̄ā ḍāksārā māntrā-rājā ē bōlāi » *of twelve syllables, this is called the prince of charms*.

This « -ā- » passive is found in other NIA. languages : in the Magadhan Maithilī and Bhōjpuriyā ; in Eastern Hindi, in Western Hindi, though rather rarely in these (e.g., Kabir, Kṣiti-Mōhan Sēn’s Selections, IV, p. 63 « sabahi piyāsa pūrana hōta hai, tana-kī tapana bujhāy » *all thirst is fulfilled, and the burning of the body is relieved* ; Guru Nānak, ‘Sukhamāṇi,’ ed. in Bengali characters by Jñānāndra Mōhan Datta, Calcutta, 1916, p. 80, « jīwana-mukata sōu kahāwai » *he is called ‘emancipated in life,’ beside the proper passive in « uha purukha kahiyai jīwana-mukata »* ; in Rājasthānī (dialectally), and in Gujarāti, in which the « -ā- » passive is the common method. It occurs also in Marāṭhī, where the affix is « -āv- -av-, -vav-, -avav- » (cf. Rāmchandra Bhikājī Jōshī, ‘Praudha-bōdh Marāṭhī Vyākaran,’ Poona, 1917, p. 215).

The « -ā- » passive has been explained as a Causative or Potential form, originating from the causative affix « -ā-, -āv- » < OIA. « -ā-pa-ya » (Hoernle, ‘Gaudian Grammar,’ § 484; Tessitori, ‘Grammar of OWR,’ § 140).

But another and a more reasonable derivation of the « -ā- » passive has been suggested by Sir George Grierson (in a private communication). He derives potential the passive affix « -ā- » from the denominative « -āya- » of OIA. The Bihārī dialects offer a clue to the source of this « -ā- » passive. In Maithili, Magahi as well as Bhōjpuriyā, there is clear indication that the affix for this passive was originally « -āya- », distinct from that of the causative which was, and still is in many forms, « -āwa- (< -āpaya-) ». Thus, the causative base in Maithili is « dēkhāb (< dēkhāw < \*dēkhh-āva-) » *to show*, and the potential passive base is « dēkhā » *to be seen*: in the 3 pres., the causative is « dēkhābē (dēkhāwē), dēkhābathi », the passive is « dēkhāe, dēkhāthi »; so in the future, causative « dēkhāot » (= MIA. \*dēkkhāvanta-), passive « dēkhāit » (= MIA. \*dēkkhāyanta-); and the past participle forms are, causative « dēkhāol » (< -āwa-la), passive « dēkhāel » (< -āya-la) (Grierson, 'Introduction to the Maithili Dialect,' Calcutta, 1909, pp. 214 ff., esp. tables on pp. 219 ff.). But even in Bihārī itself, the separate identity of the two affixes is to some extent confused, owing to interchange of « -w- » and « -y- » as intervocal glides. In the other NIA. speeches, the distinction has been entirely levelled down, both « -āya- » and « -āwa- » being reduced to « -ā- », or to « -āw- ». We see that from Early MIA. times the causative affix « -āpaya- » has encroached into the domain of the denominative (see *infra*, under 'Denominatives').

The « -ā- » passive is thus an extension of the denominative « -āya- » of OIA. The NIA. intransitives in « -ā- » are similar OIA. denominatives in « -āya- », and this can be well seen from cases like দোষায়, চারাইয়াছে, পরব্যায়, খণ্ডায় etc. at p 928, which certainly are based on nouns. Compare W. Hindi « Hari-simarana kari bhagata pragatāy » *a saint is made manifest* (< prakāṭa) *by thinking on God* (Nāṇak, 'Sukhamāṇī'). NIA. thus has preserved the denominative way of forming the potential passive, despite its being obscured by the causative.

**672.** The Passive Construction (*karmaṇi-prayoga*) in the past and future tenses is discussed below (under 'Participial Tenses' and 'Personal Affixes').

## [F] TENSE : THE SIMPLE TENSES.

**673.** For ordinary purposes, Bengali may be said to have *eight* tenses, with special affixes. These are—

(i) Simple Tenses: 1. Present; 2. Past; 3. Conditional or Habitual Past; and 4. Future.

(ii) Compound Tenses :

(a) Progressive: 5. Present Progressive; 6. Past Progressive;

(b) Perfect: 7. Present Perfect; 8. Past Perfect.

In addition, there are other Compound or Periphrastic tenses, like Present, Past and Future Continuous, or Habitual Past Perfect (with auxiliary « √ thāk ») where the original verb and the auxiliary are yet distinct and have not coalesced as in the case of the Progressive and the Perfect tenses.

These tenses historically fall under *three types*, viz., Radical, Participial, and Periphrastic.

There is only one *Radical Tense*—the Simple Present, or Present Indefinite, which is derived from the Indicative Present of OIA. *Participial Tenses* are the Simple Past, Conditional or Habitual Past, and Simple Future, which originated respectively from the passive participle (strengthened with the pleonastic « -la » affix), active present participle, and passive future participle of OIA. and MIA. The *Periphrastic* or *Compound Tenses* are made up with the help of the substantive verbs « √āch » and « √thāk » as well as « √rah » employed as auxiliaries with forms of the root.

In NB., we have only standardised forms, but in earlier Bengali, numerous forms occurred side by side.

## [I] THE RADICAL TENSE.

**674.** The inflexions are :

Old Singular Old Plural

1. « -i » ; (-δ) : « āmi, āmṛā cāl-i (‡ cāl-δ) » .

2. « -is, -s » ; « -ghā, -ā, -ō » : « tui, tōrā cāl-is ; tumi, tōmṛā cāl-ghā, cāl-ā » .

3. «-ē, -y»; «-ēn\$, -n\$»: «sē, tārā cāl-ē; tini, tārā cāl-ēn\$».  
 (āp\$ni, āp\$ñārā cāl-ēn\$=2nd person honorific).

The distinction in number in the 1st person was dropped from the earliest times in Bengali. In the 2nd and 3rd persons, this distinction was retained to some extent, in that the plural forms became honorific: in the 2nd person, the old singular became the familiar, inferior or contemptuous (both in the singular and the plural), and the old plural, for some period honorific no doubt, followed suit, although it is slightly more respectful and formal than the singular form. The 3rd person plural became the respectful or honorific, both plural and singular.

**675.** Typical forms occurring in the OB. of the Caryās are:

First Person :

«jīvami, pīvami (Caryā 4); acchahu (6); puchami, mārami, lēmi (10); dēhū, lēhū (8); bāhāma (20: = cāhāma); jāñahū (22); acchama (29); āvēśi (33); pēkhami (35); birahū =? biharaī (39: Comm. = vibaraṇam karōmi); acchuhū (44); siñcahū, jānami (49)».

Second Person :

«aisasi, jāsi (10); bujhasi, pucchasi, bāsasi (15); gilēsi (39); bujhaši, acchasi (41)».

Third Person :

«Lui bhanai (1); jāi, khāa = khāi, jāgaa = jāgai, jāa = jāi (2); sāndhaa = sāndhai, bhamanti Birūā (3); taraī, gaṭai = gaḍhaī (5); chāḍai, chuppaī, pivaī, bōlaa = bōlaī (6); bājaē, biharaē, lavaē (11); gājai, bhājai, dhāvai, ghōlai (16); bājai, bilasaī, nācanti Bājila, gānti dēvī, hōi (17); bhanathi Kaukkurīpā, jō bujhaē = bujhai (20); bhakhaa = bhakhai, karaa = karaī (21); jē bhamanti tē hōnti; Saraha bhanati = bhananti (22); paīsaa = paīsaī; bōlathi Sānti (26); basaī, hindai, khāi, pōhāi (28); lāgē (29); jujhāa = jujhai (33); bhuñjai (34); ujāa = ujai, bhanai; pamāē = \*sāmāi (38); Saraha bhananti (39); etc., etc.

**676.** Below are given specimens of forms occurring in MB. :

First Person :

« (mui, mu, mō̄, mō̄ē, mō̄ē, mō̄nā, āmhi, āmhē, āmi, āmhārā, āmārā, āmī-sābā, āmārā-sābā etc.) চলি, চলী cāli, cāli ; চলো, চলো cālō, cālō ; চলহ, চলহ চলউ, চলু cālāhū, cālā(h)u, cālu ; ( চলিএ cāliē ) ».

Cf. VSP., p. 30, কওঁ kād̄ ; p. 31, বলো bālō ; 34, থাওঁ khād̄ ; 57, যাওঁ yād̄=jād̄ ; 65, দেওঁ dēd̄ ; 67, জানোঁ jānōd̄, থোয়ো thōyōd̄ ; 68, দেও dēō = dēd̄ ; 276, বট bāti ; 732, রাখো মুঞ্জি rākhō muñi = rākhōd̄ ; 733, পড়হ' pārāhū, মুঞ্জি জাও muñi jāñgā = jād̄ ; 853, থাকিয়ে thākiē, করিয়ে kāriē ; 855 কান্দিএ kāndiē ; 861, মোরা আচোঁ mōrā ačhōd̄ ; 974, জানিএ jāniē, বাসিএ bāsiē ; 1204, যাম্বোঁ māgōd̄ ; 1211, পারোঁ pārōd̄ ; etc., etc. ; ‘Padmā-purāṇa’ of Vanśī-dāsa : p. 4, বন্দম bāndāmā (= bāndāwā, bāndō) ; p. 11, অণমহ' prāñāmāhū (বন্দোঁ, বন্দোঁ « bāndōd̄, bāndō »), and অণমহো « prāñāmāhō » are quite common in MB.) ; Kṛttivāsa, ‘Uttara-kāṇḍa,’ p. 28, বিষ্ণুরিয়া কহ মুনি শুনিউ কথন bistāriyā kābā muni, śuniū kāthān̄ (narrate in detail, O Sage, I [shall] hear the tale) » ; etc.

Cf. Oriyā: Modern Oriyā, singular « dēkhē, dēkhi » , plural « dēkhū » : Jagannātha-dāsa’s ‘Dhruva-caritra’ (Contai edition), p. 12, « āśirbāda kārā mōtē, sādhārā jēmāntē » give me blessing, so that I (may) succeed ; p. 13, « muhi jibāi » I live. Also, Maithili » dēkhi, cali, dēkhiai; chi, chiahu ; thikahu ; rahī, rahiahu » ; Early Maithili, as in Vidyāpati (VSPd. edition, Pada 30), « kahañō = kahañō » ; Magahī, « dēkhi, dēkhū » ; Bhōjpuriyā, singular « dēkhō » , plural « dēkhī, dēkhyū » .

Second Person :

« (tui, tuñi, taï, tō̄, tō̄ē, tō̄rā etc.) চলিসি, চলিসি, চলিসি cālāsi, cālisi, cālis ; (tumhi, tumhē, tumi, tōmārā, tōmārā, tumi-sāla, tōmārā-sābā etc.) চলহ, চল, চলো, চলু cālāhā, cālā, cālō, cālu » .

The « -sī, -is(i) » and « -āhā, -ā, -ō » forms are exceedingly common in MB. ; the « -u » form is rather rare.

## Third Person :

« (sē, tāhā, tāhārā, tāhārā-sābā etc.) চলই, চলে, চলএ cālāī, cālē, cālāē; (tēhō, tāhārā etc.) চলন্তি, চলন্ত, চলন্তে, চলেন, চলাইন, চলাই, চলিন্তি cālānti, cālāntā, cālāntā, cālānṭ, cālāin, cālāī, cālāñi » .

Cf. VSP., p. 357, « ষাণ্টি শৃঙ্গাল yāonti śrgāla=jāwānti, jānti » ; Kṛttivāsa, 'Uttara,' p. 179, « কুকুর বলেন kukurā bālen, কুকুর জানেন kukurā jānen » ; ibid, p. 7, গঙ্গা শিরে ধরিয়া হাসেন্ত শৃঙ্গপাণি « gāngā sīrē dhāriyā hāsēntā Śūlapāni » the One with the trident in hand (Śiva) laughs, bearing Gāngā on his head; p. 10, গুরুজন বাসেন লাজ « guru-janā bāsēn lāj » the revered ones feel shame.

The « -ānti, -āntā, -āntā » forms are very common in the ŠKK., in Chuṭi-Khān's (Śrikara Nandi's) 'Mahābhārata,' in Vijaya Pāṇḍita's 'Mahābhārata,' and in other older works. In Vaṇśi-dāsa's 'Padmā-purāna' (Maimansing District, 17th century), a large number of « -ānī, -āñi » forms occur, beside « -nti » ones : the former, it should be noted, occur more frequently with the past and future bases than with the present: e.g.. « p. 3, অৱস্থা বিধাতা smārānti bidhātā; p. 44, নারদে কহস্তি Nārādē kābānti ; p. 260, মঙ্গল গাহস্তি māngalā gāhānti ; pp. 262, 318, 362, 489, 496, নারীগণে দেহস্তি (দেয়স্তি) জেঁকার nārligāñē dēhānti (dēyānti) jōkārā the women give shouts of triumph ; p. 417, মঙ্গল গায়স্তি শুব্রতী māngalā gāyānti su-jubāti » ; besides p. 631, kārāñi = kārānti ; p. 622, yāñi = jānti ; p. 643, pūjāñi = pūjānti » ; etc., etc.

In addition, through Sanskrit influence, a few *ts.* or *sts.* forms occur in MB. in the 3rd person: e.g., বসতি « bāsati » dwells for বসে « bāsē » (vasati); বদ্বিতি « bādāti » speaks for বলে « bālē » (vadati), etc.

The forms in the sister speeches are: Oriyā sg. « cālāī », pl. « cālānti »; Maithili, original sg. « dēkhāi », pl. « dēkhathi », also in Magahī, besides forms with affixed object pronouns; Bhōjpuriyā sg. « dēkhē », pl. « dēkhan », besides other forms.

## 677. Origin of the Forms for the Radical Tense.

The different « ganas » of OIA. were practically levelled to one —with the theme « -a ». The OIA. causative « -aya- » > MIA. « -ē- » lost its force, and « -ē- » was also found in the indicative present form :

OIA. « karōti » thus figured as « karaï, karēi » in Apabhrānsa. NIA. forms are based on these Apabhrānsa simplified ones, both in form and use.

### First Person.

From OB. and MB., we see that the following were the old affixes : « -ami (= a<sup>W</sup>i, ai), -mi (= -<sup>W</sup>i -i), -i, -i ; -ama (= -a<sup>W</sup>a), -<sup>δ</sup>, -<sup>ō</sup> ; -a-hū, -a-hu, -hō, -au, -ū, -u ». The « -iyē, -iē » form in MB., as has been explained before (p. 915, *supra*), is really a passive form.

The old sense of number had died out in Bengali from the OB. period : it has continued in Oriyā to the present day. The affixes « -a-hū, -a-hu, -ahō, -aū, -u » form one group : here the « -hū » seems to be the first personal pronoun « \*haū » *I* (see p. 807, *supra*), agglutinated to a basic form of the root in « -a ». Cf. « -tu » for the 2nd person imperative (*supra*, p. 905). This « -hū, -ū, -u » form seems to have merged into the « -<sup>δ</sup> » form in MB. A form like ଶୁଣିତ୍ୟେ « śuniū » (*supra*, p. 932) seems to be first person in « -i », « śuni » + « hū »; or is it a blend of the passive in « -iu- » (*supra*, pp. 919-920) + « -hū », or « -<sup>δ</sup> » ? The « -hū » -hu » is found in Maithili also.

The form « -<sup>δ</sup> » is the affix for the first person now obtaining in Assamese and in North Bengali. This is apparently the same as « -ama » of OB., doubtless pronounced « -a<sup>W</sup>a ». Influence of the agglutinated « -hū » here is likely in post-OB. times. Cf. Oriyā first person pl. affix « -ū », which is doubtless based on « -ama ». The « -<sup>δ</sup> » occurs also in Central Magadhan.

The MB. and NB. « -i, -i » is the OIA. and MIA. « -mi » affix of the singular. The OB. « āvēśī » (Caryā 33) would go to show that it was already evolved in the OB. period ; but at that time the nasalisation in all likelihood existed ; and it seems to be generally indicated by retaining the « -m- », pronounced as « <sup>W</sup> » or nasalised « y ». But in a case like « āvēśī », it could not be so indicated *metri causā*, but seems to have been merely left unnoted (\* āvēśī = \* āyēśī = \* āwīśī<sup>W</sup>i = \* āvisimi : MB. āīśī). The Modern Oriyā first person sg. form in « -<sup>δ</sup> » (< Early Oriyā « -āI »), given above (p. 932), e.g., « dēkhē, sādhāi, jibāi », preserves the old nasalisation. The nasalisation is lost in Bengali and in Central Magadhan.

and partially also in Oriyā, e.g., in its **-i** form. It seems that in Māgadhi Apabhrañśa, an OIA. form like **< calāmi >** had resulted in **< \*calāmi >** as well as **< \*calimi >**, the former having given the Oriyā **< cālā, cālē >**, the latter the Bengali, Oriyā, and Maithili-Magahī **< -I, -i >** forms.

OIA. : **< aham calāmi —— vayam (Late OIA. asmē) calāmahi >**;

MIA. : **< ahakām, abakē calāmi —— mayam, amhē calāmō, \* calāmē ; hakām, hakē (\*hagām, hagē) calāmi, calāmi —— amhē calāmō, \* calāmē, \*calāmō, \* calāmē >**;

Māg. Ap. : **< haū, \* haī \* calami, \* calimi —— ambi \* calamu, \* calami \* calama, \* calāma (m = व्व) >**;

NIA. OB. : **< haū (mai) \*calāi, \*calī, \*calī, cali —āmhi (āmhē) calāwa, calō >**;

MB. : **< (mai, mui, āmhi, āmi, āmhārā, āmi-sābā etc.) calī, cali, calō >**;

NB. (Standard Speech) : **< (āmi, āmārā) calī >**; ‡ **< (mui, āmi, āmārā) calō >**;

Assamese : **< (māi, āmi) cālō >**;

Oriyā : **< (mū) cālē, calī >**, plural **< (āmbhē, āmbhē-mānē) cālū >**;

Maithili : **< calī, calū >** (for both numbers);

Magahī : **< calī, calī, calū >** (for both numbers);

Bhōjpuriyā : **< calō >**, plural **< calū, calyū >** (the singular **< calō >** probably influenced by Western speeches).

In the indiscriminate use of singular and plural forms, it is not unlikely that the singular **< \*calami, calimi >** in Māgadhi Apabhrañśa became confused with an expected, and possible Māg. Ap. plural form **< \*calāmi, \*calāmi >** < Magādhī Prakrit **< \*calāmē >** < OIA. **< calāmāh >**, with the change of final **< -ah >** to **< -ē >** and then to **< -i >**.

## 678.

## Second Person.

The history of the forms seems to have been as follows :

OIA. : **< tvam calasi — yūyam (Late OIA. \*yuṣmē, \*tuṣmē) calatha >**;

MIA. : **< tumām, tūm calasi — tumhē calatha, caladha ; tūm calasi — tumhē calaha >**;

Māg. Ap. : **< tū, tō calasi, \*calisi, \*calahi ; \*calasu, \*calahu, \*calāū (from the Imperative) — tumhi calaha >**;

NIA. OB. : « tū, tō, tai calasi, calisi—tumhi, tumbhē calaha, \* calaa » ;  
 MB. : « (tō, tō, tōē, tai, tui, tōrā) cālāsi, cālisi, cālāsi, cālis—  
 (tumhi, tumi, tōmhārā, tōmārā etc.) cālāhā, cālā, cālā, cālō » ;  
 NB. : « (tui, torā) cālis, † cālas (as in East Bengal), † cālu  
 (as in S.W. Bengali : cf. Oriyā)—(tumi, tōmārā) cālā, cālō » ;  
 Assamese : « tāi cālā——tumi cālā (tomālokē cālā, cālāhāk) » ;  
 Oriyā : « tū cālu——tumbhē (-mānē) cālā » ;  
 Maithili : « tō calahi, calah——tōh, tōh-sabh calahu » ;  
 Magahi : « tū, tō cal——tōhanī calah(in) » ;  
 Bhōjpuriyā : « tū, tē cal (calas, calasi, calis)—tōhanikā calah » .

## 679.

## Third Person.

OIA. : « sa(h) calati —— tē calanti » ;  
 MIA. (Māgadhi) : « sē calati —— tē calanti » ;  
 « sē caladi, calai —— \*tē calanti » ;  
 Māgadhi Ap. : « sē, \*si calai —— \*ti, tē calanti » ;  
 NIA. OB. : « sē \*calai (calanti *honorific*) — \*tē, \*tēhī, \* tēhi \* tēha,  
 calanti, \*calenti ;  
 MB. : « sē calai, calāe, cālē ; tōhā, tāhārā cālānti, cālēntā,  
 cālāntā, cālēnā, cālāni, cālāni, cālāi, cālāni, cālāin » ;  
 NB. : « (sē, tārā) cālē—(tini, tārā) cālēnā († cālāin) » ;  
 Assamese : « (si, sihātē) cālē (Early Assamese si-hātē cālāntā,  
 cālēntā) » ;  
 Oriyā : « sē cālāi—sē-mānē cālānti » ;  
 Maithili : « sē (sē-sabh) calai, calathi » (the latter honorific only) ;  
 Magahi : « sē calai, calē (calas < Bhōjpuriyā)—taun calin,  
 cali, calathi » ;  
 Bhōjpuriyā : « sē calē, calā ( calasi, calasu < Awadhī)—taun  
 calan, calin » .

The plural form in Bengali is now used as an honorific. The change of OIA. « -nt » normally is to « -t- » in Bengali, not to « -n- » : « cālēnā » therefore does not represent OIA. « calanti ». The form has obtained its « -n- » (further reduced to a mere nasalisation in dialectal Bengali) ultimately from the plural « -na » of the noun (see *supra*, pp. 725-726). It seems that this

« -na » was added to the plural-honorific forms for the verb in the past and the future tenses, which as participial forms did not have any affix originally, and therefore could take up both the plural « -na » of the oblique noun and the « -anti » of the radical tense: MB. ordinary « gēl-ā, gēl-ā », honorific « gēl-ēn<sup>g</sup>, gēl-ānti ». Thus « -na » and « -anti » became identical; and in the place of « calanti, calēnta », and a possible « \* calēti, \* calētā » (cf. ŠKK. ଦେତି « dēti » *they give* = « dēnti »), the form « calē-n<sup>g</sup> » came in. Doubtless the use of the present participle in « -itē » (calitē-calitē), the infinitive in « -itē », and the past habitual base « calit- », all the three with « -it- », helped the establishment of « -ēn<sup>g</sup> » in the other verb forms as the plural honorific affix. Oriyā alone among Magadhan languages has preserved the « -nti ». In other Magadhan, in E. and W. Hindi, and in other NIA., the « -nti » has similarly given place to a mere nasalisation or to « -n »: except in Marāthī, where the « -nti » is altered to the normal NIA. development, « -t » (Jules Bloch, ‘Langue Marathe,’ § 235).

The Maithili and Magahī « calathi » is peculiar, showing « -thi » for OIA. « -nti »; probably it is a case of emphatic « hi »: « calanti hi > calat(i) hi > calathi ». In the Caryās, « -thi » for honorific « -nti » occurs in a couple of instances: « bhaṇathī Kukkuriṇpāē » (20), « bōlathi Sānti » (26). These seem to have been due to the mistake of the Nēwārī scribe of the MS., familiar as he was more with Maithili than with Old Bengali.

The « -s- » forms for the 3rd person in Magahī and Bhōjpuriyā seem to be ultimately from Awadhī, and the « -s- » seems to be the pronoun « sē » *he*, agglutinated with the verb-base (like « hū, tu » for the 1st and 2nd persons in OB.).

## [II] THE TENSES ORIGINATING FROM OIA. PARTICIPLES.

### (1) THE PAST BASE.

**680.** The inflected past tenses of OIA.—the imperfect, aorist and perfect—were continued in MIA., but their employment grew more and more rare. In Early MIA. (as in Pali) the imperfect and aorist

coalesced, and formed practically one past form (cf. Geiger, 'Pali Grammatik,' § 158 ff.), although Pali grammarians sought to indicate a theoretical difference between them by calling the forms derived from the old imperfect and the strong or root aorist (with the 3rd person singular ending in « -a, -ā ») the « hiyattanī » or *yesterday past*, and the forms derived from original sigmatic aorist (with the 3rd person singular ending in « -i, -si ») as the « ajatani » or *to-day past*. The perfect became very much restricted. In Second NIA., the perfect all but disappeared, being found only in a few stereotyped forms; and the same thing happened with the imperfect-aorist tense, which could be found with a number of roots, or had resulted, as in Ardha-Māgadhi, into a couple of affixes—a singular « -itthā, -ēthā » and a plural » -im̥su », originating from the OIA. *ātmanē-pada* (medial) aorist forms (Pischel, 'Gramm. der Pkt.-Sprachen,' §§ 515-517; Geiger, *op. cit.*, § 159).

This gradual decay or disuse of the old moods and forms of the old inflected past is a notable thing in the history of Indo-Aryan (cf. Jules Bloch, 'La Phrase nominale en Sanskrit,' Mémoires de la Société de Linguistique,' Vol. XIV). In this connexion Dravidian influence has been suggested, and indeed is probable (see *supra*, pp. 38, 174). As the old past forms fell into desuetude, their place was taken up more and more by the passive participle adjective which had the ending « -ta, -i-ta » or « -na » in OIA. In this extension of the verbal adjective to assume the function of the finite verb, going hand in hand with the decay of the latter, Dravidian influence, again, is likely. But the germs of this use we find within OIA. itself. In Vedic, the past or passive participle in « -ta » is quite frequently used as a finite verb, when the copula or the substantive verb « as » or « bhū » is omitted (cf. A.A. Macdonell, 'Vedic Grammar for Students,' § 208; B. Delbrück, 'Altindische Syntax,' Halle, 1888, §§ 215, 219). This construction, periphrastic in nature, with the substantive verb present or understood, seems to have come in first with intransitive verbs (meaning *going, sitting, standing, etc.*), or in impersonal statements. But as yet the passive participle has not invaded the domain of the transitive verb, in a passive construction with the true nominative in the instrumental,—

a construction which is perfectly normal in Second MIA., and which is continued down into NIA.: « sa yātah, sa jātah, sa ārūḍhah » might be used instead of « sa jagāma (iyāya, agacchat, agamat, ayāt), sa ajāyata (ajani), sa arubat (arukṣat, rurōha) » etc.; but « tēna kṛtah (kṛtā, kṛtam), tēna dṛṣṭah (dṛṣṭā, dṛṣṭam) » are not yet well-established in the place of « sa cakāra (akārṣit, akarōt), sa dadarśa (apaśyat, adrākṣit) », etc. But from Early MIA., the extension of the passive participle to transitive verbs also came in. In Pali, however, the OIA. condition obtains, and there is plentiful use of the past tense or aorist, the « -ta » forms occurring with intransitive verbs mainly: but the traditions of Pali as a literary speech go back to the oldest MIA., or latest OIA. period, and Pali syntax is not wholly based on that of the spoken vernaculars of the centuries immediately before Christ. But the language of Aśokan and other early inscriptions sufficiently demonstrate what an important place the passive participle in « -ta » had already obtained for itself in the popular dialects, considerably restricting the inflected past tenses. Thus, to give a few examples: Aśokan Rock Edict I (Girnar), « iyaṁ dhammalipi dēvānam priyēna priyadasinā rāñā lēkhāpitā »; II (Girnar) « dvē eikichā katā ; ḥsuṇhāni...sarvatra bārapitāni ca rōpēpitāni ca »; V (Girnar) « ta mayā bahu kalāṇam katain »; Pillar, Rummindēi, « piyadasina lājina atana ḥāgāca mahīyitē; silā vigaḍabhičā kālāpita, silāthabhē ca usapāpitē, Lumminī-gāmē ca ubalikē katē »; Nigliva, « lājina thubē dutiyāṁ vadhitē »; Khāravēla Inscription, « mahārājēna...kīḍitā kumāra-kīḍikā : yōvarajam pasāsitam »; Bharhut Inscription on gateway, « .. Dhanabhūtina kāritam tōraṇam (= tōraṇam), silā kāñmamitō ca upamīna »; Sanchi, Stupa I, « Vēdisakēhi darīta-kārēhi rūpa-kāñmam kātam »; Besnagar Inscription of Heliodorus, « garuḍa-dhvajē ayam kāritō Hēliōdōrēna »; Mathurā Ayāgapatī Inscription, « ...ganikāyē Vasu(yē)...śilāpaṭō pratisthāpitō »; etc., etc.

Illustrations can be multiplied. These show that the passive participle construction, the verb being an adjective qualifying the nominative when it was intransitive and the object when transitive, became the common idiomatic way of expressing the past in MIA. By the time when the Apabhrāṇa Stage came in, the old inflected past forms, which still

lingered in Second MIA., were clean swept away, and only this participial past remained in IA. ; and the NIA. past tense was formed out of this.

The IA. speeches outside India show similarly the passive participle as the base for the preterit : Sinhalese (Geiger, 'Litteratur und Sprache der Sinhalesen,' pp. 71-72), and the Gipsy speeches of Europe (F. Miklosich, 'Ueber die Mundarten und die Wanderungen der Zigeuner Europas,' XI, p. 44).

**681.** The affix « -ta, -ita » was by this time reduced to « -a, -ia », except where it was assimilated to a preceding consonant (*e.g.*, « drṣṭa- », = Panjābi « dīṭṭhā », beside « \*dṛkṣita- > dēkkha- » = Hindi « dēkhyā, dēkhā », Bengali দেখিল « dēkh-il- » ; « supta > sutta > Early Beng. সুত্তি  
sut-il- » ; « matta > Beng. মাত্তি  
māt-il- »; etc.). A pleonastic « -ka », which was reduced to « -a » in Prakrit and Apabhrāṇa, was sometimes added. But the need for some distinctive affix for this important form, the only one to indicate the past tense, was felt in some parts of the country. The « -la » affix of OIA., in extended forms « -i-la, -a-la », which became very popular as an adjective affix (or a merely pleonastic one) from the early centuries of the Christian era, and probably even earlier, was frequently added. In the Second and Third MIA. periods « -i-la, -a-la » apparently became « -illa (-ĕlla), -alla ». In any case, in North-Eastern India the « -ll- » was specially popular from the Apabhrāṇa period (it may be earlier still) in connexion with the passive participle in « -a < -ta, -ia < -ita ». We have no specimens of this North-Eastern or Māgadhi Apabhrāṇa, but from the evidence of the Magadhan languages we have to surmise all that. In the Ardha-māgadhi area, and in the Midland, the « -ila, -ala > -illa (-ĕlla), -alla » affix was rather sparingly used ; also in the North-West : the source-dialects Eastern Hindi, Western Hindi, and Western and Eastern Panjābi apparently never used it with the passive participle, whether attributive or predicative. In the South-West, its use was more common than in the Midland, but not so common as in the East : it was used, as we can infer from Gujarāti and Rājasthāni and Sindhi, when the passive participle was a plu-perfect, or an attributive form, and not a predicate in the simple past, performing the function of a verb. In the

South, it was fairly common, and shortly after the formation of the Marāṭhī language, it became more and more popular as an affix in connexion with the passive participle > past tense.

The remnants of Second MIA. (especially in the Jaina dialects as written in the South-West) have preserved for us examples of this « -illa (-ëlla) » and « -ulla, -alla » affix with nouns and adjectives, like « kanṭailla, chāilla, mā(y)illa, lōhilla, sōhilla, nēurilla, thalailla, niyadilla, kasilla, sāsilla, kalāṅkilla, gaṇṭhilla, muttāhalilla, kandalilla, lacchilla, kivāilla, gōilla, chailla, gāmilla, bāhirilla, padhamilla, uvarilla, dāhinilla, majjhimilla, puvvilla » etc., etc.; and stray forms like Ardha-māgadhī « āñilliya » (āñia = ānita + illa : Pischel, 'Grammatik der Pkt.-Sprachen,' § 595), and « āgaëlliya » (āgata-), varëlliya » (varia-, vṛta-), chaḍḍiellayām (chardita-), laddhilliyām (labdha-) » (Tessitori, 'Grammar of OWR.,' § 126) etc. confirm the surmise made chiefly from the modern languages that « -illa (-ëlla), -alla » added to the passive participle in « -a, -ia < -ta, -ita » is the source of the NIA. « -l- » in this case. When the « -illa » in this way strengthened the passive participle, the latter retained fully its original adjectival nature, and « -illa » would change its ending according to the gender of the noun qualified.

**682.** Thus the past base in « -il- » in Bengali, Assamese and Oṛiyā, in « -al- » in the Bihārī speeches, and in « -il-, -al » in Marāṭhī, and similar « -l- » forms in the other NIA. speeches, originated from the OIA. « -ta, -ita » plus the OIA. diminutive or adjectival affix « -la- » in the extended forms « -ila, -a-la, > -illa (-ëlla), -alla ». This explanation, first suggested by Sir Charles Lyall in his article on Hindostānī in the 'Encyclopædia Britannica,' 9th edition (1879: reprinted as 'A Sketch of the Hindustani Language,' Edinburgh, 1880 : pp. 41-42) and by Sir Ramkrishna Gopal Bhandarkar in his 'Wilson Philological Lectures' (1877, Lecture V, first published Bombay, 1914, pp. 223-224), has finally been accepted as the only possible explanation, after Sten Konow showed how this « -l- » of Marāṭhī (and other NIA. speeches) phonologically must rest on a MIA. « -ll- » (in his 'Note on the Past Tense in Marāṭhī,' JRAS., 1902, pp. 417 ff. Cf. Tessitori, 'Grammar of OWR.,' § 126; Jules Bloch, 'Langue Marathe,' § 256).

**683.** Lassen and Hoernle, whose views, now disproved and abandoned, still obtain some following in India, traced this « -l- » to the « -ta, -ita » affix of OIA. direct: either along this line: « -ta, -ita > -da, -ida > -da, -ida > -la, -ila »; or along this: « -ta, -ita > -da, -ida > -la, -ila » (cf. Hoernle, 'Gaudian Grammar,' § 306). But neither of the above lines of change are known to have taken place on any large scale in IA.; and although there are cases of 'spontaneous cerebralisation' (*supra*, p. 487), and although there are a few cases where NIA. « -l- » (< earlier « -t- ») corresponds to Skt. « -d- » (*supra*, p. 543), a wholesale change of MIA. « -d-, -d- » to « -l- » is not attested. Under influence of preceding « r, ḡ », a dental « -ta » became a « -ṭa » in 'Old Māgadhi,' and the normal change of it in Second MIA. Māgadhi would of course be « -ḍa »; in fact, Vararuci notes two cases, « kāḍa, māḍa < kāṭa, māṭa < kṛṭa, mṛṭa » and a third « gāḍa (< gata) » by analogy apparently ('Prākṛta-prakāśa,' XI, 15); and many more can be attested from MIA., from Sanskrit, and from the NIA. speeches (like « \*sadakka > sāṛikṣa » *street* from « sṛta », « \*dhāḍa > dhāṛḍ » *torso* from « dhṛta », « \*bhāḍa > bhāṛḍ » = *surname in Bengali = servant* from « bhṛta, bhata »). In all these cases we find « -ṛ- » in NIA. (< -d- < -t- < -ṛt-) », and never « -l- ». The equivalent of « kāḍa, māḍa » should be « kāṛḍ, māṛḍ » or « kāṛā, māṛā » in NIA., and not « kaila, maila » as in Early Bengali or in the Bihārī dialects. In fact, the « -ṛ- » form, मृड़ « māṛā » < « māḍa », has continued apart in Bengali, in the sense of *dead body, corpse*, and this is quite distinct from the verb मृला « mālla » = \*maa-illa = mṛta + illa ».<sup>1</sup>

The adjectival accented « -lá » (Whitney, 'Skt. Grammar,' §§ 1189, 1227) became « -lla » in Second MIA. (Pischel, 'Grammatik der

<sup>1</sup> As has been noted before, the genuine, inherited Māgadhi forms in ' -ṛ-' = ' -d-' < ' -t-' < ' -ṛt-, -rt-' were largely ousted from or restricted in the eastern dialects, probably during the Second and Third MIA. periods, by new formations which did not show cerebralisation, but simple elision of the ' -t-' : see *supra*, p. 487. This was either due to the analogy of the larger number of ' -ta-' participles in which there was no scope for cerebralisation and the ' -t-' was duly lost in Second MIA. ; or it may be that here there was strong influence from the Western speeches due to the continuous immigration of Westerners into the East—Bihar and Bengal—during the formative period of the Eastern languages.

Pkt.-Sprachen,' § 194). It is just possible that the doubling was due to the fact that it was a *ts.* (or *sts.*) affix introduced in Transitional MIA., at a time when original *tbh.* or inherited intervocal  $\langle -l-$  tended to become cerebralised to  $\langle -l-$ , and that its *ts.* character as an intervocal *dental* or *alveolar* sound was sought to be preserved by this doubling. Another explanation, quite possible, would derive the MIA.  $\langle -lla \rangle$  from the OIA.  $\langle -la \rangle$ , strengthened by  $\langle -ya \rangle$  (also an adjectival affix):  $\langle *-l-ya > -lla \rangle$  (Jules Bloch, 'Langue Marathe,' p. 256). In any case, the fact remains that in Second MIA. it became  $\langle -ll-$ . In NIA., in those speeches where the cerebral  $\langle -l-$  is preserved, this  $\langle -l-$  stands on a MIA. single intervocal dental or alveolar  $\langle -l-$ ; and where in NIA. it is a dental  $\langle -l-$ , the MIA. source of it is double  $\langle -ll-$ , and not single  $\langle -l-$ . This has been shown for Marāṭhi (Sten Konow, JRAS., 1902, as cited above; cf. Jules Bloch, 'Langue Marathe,' §§ 144 ff.), and for Gujarātī by Turner (JRAS., 1921, pp. 527-528, 535, 537, 538). It is also the case with Oriyā: e.g., Oriyā  $\langle kālā \rangle$  *black*,  $\langle kāli \rangle$  *ink* (< *kāla-*),  $\langle bēlā \rangle$  (< *vēlā*),  $\langle dēulā \rangle$  (< *dēvakula*),  $\langle tilā \rangle$  (< *tila*), *ts.*  $\langle tāilā \rangle$  (< *tāila*), with  $\langle -l-$ , but  $\langle kāli \rangle$  (*kallim*, *kalya-*),  $\langle bēla \rangle$  (*bēlla*, *bilva*),  $\langle tēla \rangle$  (*tēlla*, *tāilā*), etc. (see *supra*, p. 533): and for the past tense and pass. part adj., Oriyā has  $\langle -l-$ , not  $\langle -l-$ , which thus must rest on a MIA.  $\langle -ll-$ . The same seems also to be the case with Panjabī. So that Apabhrāṇa (Eastern, Western, Southern)  $\langle *kaa-illa-, *kaya-illa-, *kaa-allā- ; *gaa-illa, *gaya-illa, *gaa-allā ; *calia-illa > *calilla, *callēlla * calla-illa (= *calya- + -ita- + -la) \rangle$  etc. can alone be the sources of Early Bengali  $\langle kāila \rangle$ , Bihārī  $\langle kail \rangle$ , Oriyā  $\langle kālā \rangle$ , Marāṭhi  $\langle kēlā, gēlā \rangle$ , Gujarātī  $\langle karēlo \rangle$  (= \* *karia-illa*), Sindhī  $\langle kayalū, kīalū \rangle$  (the last =  $\langle *kitta-allā- \rangle$ ); and Bengali  $\langle gēlā, cālilā \rangle$ , Oriya  $\langle galā, cālilā \rangle$ , Bihārī  $\langle gail, calal- \rangle$ , beside Oriyā  $\langle cālilā \rangle$ , Gujarātī  $\langle cālēlō \rangle$ , etc.

**684.** Another view about the origin of the NIA.  $\langle -l-$  is that it is an independent affix occurring in Indo-European itself, preserved in NIA., but ignored or left unnoticed in OIA. S. H. Kellogg first suggested this in his Hindi Grammar (cf. p. 340, second edition), and Beames connected this  $\langle -l-$  with the  $\langle -l-$  affix indicating the past tense in the Slav languages, and compared Slav (Russian) preterit

forms in « -l- » with those of the Marāṭhi as a typical Indian language with the « -l- » past ('Comp. Grammar,' III, pp. 135-136). But this connexion is not proper. We have seen that the MIA. form of the suffix was « -ll- » < OIA. « -l- » and that it is adjectival (diminutive or pleonastic) in its nature, whereas the « -l- » affix that we find in Slav is entirely different. The latter is a participle affix, forming *nomina agentis*, with an active present participle sense, and in Slav it is used to form periphrastic tenses with the substantive verb: and this « -l- » or « -lo- » affix has been found, in addition to the Slav, in Latin, Greek, Armenian and Tokharian among Indo-European speeches (A. Meillet, 'Le Slav Commun,' Paris, 1924, § 281; French trans. of Brugmann's Short Comparative Grammar, Paris, 1905, p. 351; S. Lévi and A. Meillet, 'Remarques sur les Formes grammaticales de quelques Textes en Tokharien B.: I: Formes verbales,' Extrait de Mémoires de la Société de Linguistique, Vol. XVIII, Paris, 1912, p. 22).

**685.** The « -l- » affix is established for the past tense in Bengali and other Magadhan speeches, so that its use in the Māgadhi Apabhrañśa can reasonably be presumed. The « -l- » affix is absent for the past tense in Eastern Hindi, Western Hindi, Panjābī, Rājasthānī, Gujarātī, Sindhi: in the source Apabhrañśas of these, therefore, it would be reasonable to think that it was not present there, or in any case it could not have been so prominent. But the « -ll- » form did not entirely supplant the simple passive participle in « -(i)a » in the East: from Old and Middle Bengali and from Early Oriyā and Early Maithili, we can see that the passive participle in « -ita > -ia » without the strengthening « -illa, -alla » was actually used predicatively for the past base. Examples are given below. The non-l form of the passive participle has given the Bengali passive participle in « -ā »: « calita- > calia- + -ā > cālā ». This non-l form occurs also in Eastern Hindi as well as in Western Hindi: but in NB. it is attributive, and not predicative. All this would show that the « -ll- » and the non-l forms were used side by side in Māgadhi Apabhrañśa, but the NIA. Magadhan speeches decided for the « -ll- » form for the past base as well as for the

adjectival participle base : in Modern Bengali, in the standard language however, the non-l form is employed as the adjective, and the « -l » form has been restricted to the predicate.

**686.** The following tables recapitulate the position in the NIA. languages :

[a] Non-l Forms in NIA.

- (i) OIA. « calita- » > Second MIA. « calia- ; (nominative) caliō, caliē » > Apabhrāṇa « calia- ; caliu, \*calii » ;  
 (ii) OIA. « calita-ka- » > Second MIA. « caliaa- ; (nominative) caliaō, caliaē » > Apabhrāṇa « caliaa- ; caliaü, \* caliaï » .

From MIA. passive participles of the above type are derived :—

Western Hindi (Braj-bhākhā) passive participle adjective and past base

„ (Kanaujī) „ « calyau » ;

„ (Hindostānī) „ « calō » ;

Eastern Panjabī „ „ « calliā, caliā » ;

Western Panjabī „ „ « callēā » (with

personal terminations added optionally to form the verb past) ;

Sindhi pass. part. adjective and past base « haliō » (with

personal terminations added in the intransitive) ;

Gujarātī pass. part. adjective and past base « cālyō » ;

Rājasthānī „ „ « cālyō » ;

Pahāṛī (Khaskurā) „ „ « cālyō » ;

Eastern Hindi „ „ « calā » (with

personal terminations added to form the past tense) ;

Early Maithilī past form « calia, cali, calu » ;

Early Oriyā past form « cāli » ;

Oriyā past participle « cālā » ;

Old Bengali past participle and past form « calia, cali, caliā, calā (caliō, caliu, calu) » ;

Middle Bengali past form « cāli (cālē ?) » ;

New Bengali passive participle « cālā (cāliyā ?) » ;

New Bengali and Assamese verbal noun « cālā » .

[b] Forms with adjectival or pleonastic « -l- » in NIA.

OIA. « calita- » > MIA. « calia- » + « -illa-, -ĕlla-, -alla- » > Ap. « \* calilla-, \* calĕlla-, \* calialla- ».

From « -ll- » forms of the above types in Apabhrañśa are derived :—

Sindhi passive past participle « halyalū » ;

Gujarātī „ „ « cālēl, cālēlō » ;

Marāthī „ „ « cālalā » (with

personal terminations added to form the past tense), besides  
a double « -l- » form, « cālalēlā » ;

Marāthī verbal noun « cālalē » ;

Bihārī past base, passive participle adjective, & verbal noun « calal- » ;

Orīyā past base and passive participle adjective « cālilā » ;

Bengali past base and passive participle « cālilā- » ;

Assamese past base « cālil- ».

**687.** Examples of non -l and « -l- » forms from OB. and MB. are given below.

#### Old Bengali: non-l forms.

In OB., as in the Caryās, the adjectival nature is still clear in many cases. The form expected in OB. would be « -ia > -i », or « -ia » + definitive « -ā » = « -iā » ; « -iā » is found, and « -I » also ; and « -ia », with the final « -a » retained, is also found as an archaic literary survival (cf. Bengali treatment of final MIA. vowels, *supra*, pp. 301 ff.). Besides, forms in « -iō (-ō) », -iu, -u » due to Western influence also occur (see *supra*, p. 15). This « -iu, -u, -iō (-ō) » is not found in MB. and NB.

Caryā 1 : « paīthō » (= paviṭṭhō, paviṭṭhaō = pravista-, -ṣṭa-ka-) ; « āmhē sānē diṭhā » (dṛṣṭa-); « baīthā » (cf. বেঠি মানুষ « bāīthā mānus̪ » sitting man in Chittagong Bengali, and বটিয়া « bāṭhiyā » haring sat in 'Māṇik Candra Rājār Gān,' VSP., p. 82—which show that « bāīth- » was a good OB. form, though now supplanted by the root « bāis »); Caryā 7, « bhinnā » ; 9, « haria » ; 10, « chādi » ; 11, « paītha, kiū, bhaīa » ; 13, « kia, māri » ; 16, « paītha, paīthā, diṭhā » ; 17, « pieiu = ? cāpiu, kia, biāpiu » ; 18, « bāhia, bitaliu, tāliu » ; 19, « uchaliā, caliā, abāriu, kia » ;

20, « saṅghārā » ; 26, « abāriu, caṭāriu » ; 27, « bikasau, unhasiu, cālia, gaū, bujhia » ; 28, « khāi?, pōbhāi? » ; 30, « phariā, uitā, bujhjhia » ; 31, « nāthā, paīthā, bihariu, niāriu » ; 34, « bādhā (< baddha-), ladhbā = lādhā (< labdha-) » ; 36, « pahārī, abārī » ; 44, « miliā, ūiā, paīthā, binaṭhā » ; 47, « jalia (< jwalita), paīā (= patita-) » ; 49, « bāhiu, luḍiu, nāthā, paīthā, thākiu, laiā ».

Old Bengali : « -l- » forms.

Caryā 2, « cauri nila, cōrē nila, nida gēla » ; 3, « āila, paīthēla » ; 4, « ubhila » ; 6, « bēṭila = bēḍhila » ; 7, « rundhēlā, bhaīla, āilā, gēlā, bhaīlla = bhaīlā » ; 8, « gēlī, mēlili, milila » ; 10, « mōē ghalili » ; 12, « jitēla » ; 13, « calila » ; 14, « budili, bhaīlā, cadilā » ; 15, « gēlā, bhaīla » ; 16, « lāgēlī » ; 18, « sutēli » ; 28, « maulila, lāgēlī, paṭilā, chāili, pōhālī » ; 30, « ujōli » (= udyōtitam) ; 31, « chāḍila » (cf. Commentary) ; 32, « mukala, bhālā » ; 33, « duhila (adj.), biāela » ; 35, « hāu acchilē (= āchilō? āchila?), maïi bujhila, dila, ahārila, lailā, ahārā-kaēla » ; 36, « nida gēlā, sutēlā, maïi dēkhila » ; 37, « ṭuṭi-gēli, acchilēsa » ; 39, « nilēsi, bhāgēla » ; 41, « phulilā » ; 44, « āilēsi, biccharila » ; 47, « lāgēlī āgī, ut̄hi-gēla » ; 49, « bhaīlī, lēlī » ; 50, « phut̄ilā, tāela = uēlā? bhāēlā? phit̄eli, phuliā = phulilā, pākēlā, mātēlā, bhēlā, bhālā, (gaḍilā), hakaēlā, mārila, bhaīlā, phit̄ili ».

In OB. the affix is commonly « -il- », as in Bengali, Assamese and Oriyā, and at times it occurs as « -ēl- ». Except in « mukala », « -al- », characterising Central and Western Magadhan, is not found. The affixing of personal terminations has started already in OB. (e.g., acch-il-ēsa, n-il-ēsi) ; but the old adjectival nature is sufficiently present, making the form take up the « -i (-l-) » affix of the feminine when the subject is feminine for the intransitive verb and when the object is feminine for the transitive.

**688.** Examples of the Middle Bengali verb in « -i, -i < -ia < -ita », without the « -l- » :

SKK. : p. 75. মৌন করিওঁ ছাঁচে থাকি এক পাশে « māunā kāriā duhē thāki (= thākilā) ēkā pāsē » *keeping silent, the two remained on one side* ; p. 217, যেহেন বাহির তেহেন ভিতর মুক্তে জাগিলো তোরে ! কপট সাগর হদয় তোক্ষার

নাহি মোর গোচরে ॥ « jēhēnā bāhirā tēhēnā bhitārā, sārūpē jāṇilō tōrē : kāpātā sāgārā hṛdāya tōmārā, nāchi (=nā āchilā) mōrā gōcārē » as on the outside, so within: I have known you in your true form; your heart is an ocean of deceit, this was not known to me; p. 325, সরপে বুয়িলোঁ। মো কাহ্নাঙ্গি তোর বালী আজ্ঞে নাহি পাই « sārūpē buyilō mō Kānhāñī, tōrā bāśi āmhē nāhī pāi (= pāilā) » I have said in sooth, O Kānha, I have not found your flute (note: past form with নাহি < nāhī >); p. 343, তোকে তত্ত্ব বোলেঁ। চজ্জ্বালী। যোড় হাথ করী বনমালী ॥ তাত বড় পাইল আপমান। তেনি তোকা ছাড়ি গেল কাহ ॥ « tōkē tātwā bōlō Cāndrābālī, jōrā hāthā kārī (=kārilā) bānāmālī : tātā barā pāilā āpāmānā, tēsi tōmāh chārī gēlā Kānhā » I tell you the truth, O Cāndrāvalī: the one garlanded with wild flowers (Kṛṣṇa) folded his hands (before you); through that he has felt insulted, that is why Kṛṣṇa has left you and gone away;

Kṛttivāsa, ‘Uttarā Kānda’ (VSPd. ed.): p. 16, তই চফু ঢাকিঙ্গি রাণী হেঁট মাথা করি। নারদ মুনি তবে দিল টিটকারী ॥ « dui cāksu dhākiñā rāñī hēṭā mātbā kārī (=kārilā), Nārāda-muni tābē dilā tit̄kārī » closing both her eyes, the queen (Mēnakā) hung down her head, and then the sage Nārada said words of scorn: p. 17, হাথে ধরি কঙ্গা আনিল দেব শূল-পাণি ॥ কঙ্গা লঞ্চা হৰ ছায়ামণ্ডপে বসি। চারিদিকে বেঢিল সব দেব ঋষি ॥ « hāthē dhārī kānyā ānilā dēbā ūlāpāñī ; kānyā lāñā Hārā chāyā-māñḍapē bāsi (=bāsilā), cārī dikē bērhilā sābā dēbā f̄sī » holding her by the hand, the Trident-bearer led the bride (Umā): Hara (Śiva) then sat in the pavilion with the bride, and all the gods and sages surrounded them on four sides; p. 14, পুশ্পকরথ সজিঙ্গি ব্রহ্মা তাহাকে দিল দান ॥ ব্রহ্মার বরে তুষ্ট হইলা বাপেরে নমস্করি। জত বর পাইল তাহা বাপকে গোচরি ॥ ছর্ণভ বর ব্রহ্মা মোকে দিল দান । « puspākā-rāthā sājīñā Brāhma tāhākē dilā dānā, Brāhmārā bārē tuṣṭā hāilā, bāpērē nāmāskārī (=kārilā); jātā bārā pāilā, tāhā bāpākē gōcāri (=gōcārilā): ‘durlābhā bārā Brāhma mōkē dilā dānā’ » Brāhma prepared the (aerial) flower-chariot and gave him as a gift: he was pleased at Brāhma’s boon and saluted his father, and told his father about all the boons he received: ‘rare boons has Brāhma made a gift of to me’; etc., etc;

Chuṭi Khān’s ‘Mahābhārata’ (VSPd. ed.): p. 144, এত বুলি অমুশাল করএ বিনয়, ঔৰ্ত হই আলিঙ্গি কৃষ্ণ মহাশয় « ēta buli Anusālā kārāē bināya, prita hāi

āliŋgi (=āliŋgila) Kṛṣṇa māhāśayā ➤ saying all this Anuśālva does courtesy ; being glad, the great-hearted Kṛṣṇa embraced him ;

Mālādhara Vasu's 'Bhāgavata' (VSP., p. 771) : তার দ্বন্দ্ব উপাড়িয়া নিল তুই ভাই। সেই দ্বন্দ্বে, মাহত মারি যমদের পাঠাই ॥ « tārā dāntā upāḍiyā nilg̃ dui bhāi, sēi dāntē māhutā māri Jāmā-ghārē pāṭhāi (=pāṭhāilā) ➤ the two brothers pulled out his tusks, and with those tusks killing the elephant-driver sent (him) to the abode of Yama ;

Vijaya-gupta's 'Padmā-purāṇa' (see *supra*, p. 735) : p. 108, গোসাঙ্গি কোন দোষে শাপি « gōsāñi kōng̃ dōṣe śāpi ➤ through what fault did the lord curse ? p. 109, কলসী ভরিয়া স্ফুরণ নাগ সবে ঢালি « kālāsi bhāriyā ghṛta & nāg & sābē dhali ➤ the Nāgas poured ghee in full jars ; p. 214, পদ্মার বচনে বেহুলা মনে ঘনে হাসি « Pādmārā bācānē Bēhulā mānē hāsi ➤ Bēhulā laughed in her heart at Padmā's words ; etc. ;

'Caitanya-caritāmṛta,' Ādi-līlā, Chap. 13 : শ্রীকৃষ্ণ চৈতন্য নবদ্বীপে অবতরি। অষ্ট চলিষ্য বৎসর প্রকট বিহরি ॥ চৌদশত সাত শকে জন্মের প্রমাণ। চৌদশত পঞ্চাশে হৈলা অন্তর্ধান ॥ « Śrī-kṛṣṇa-caitanya Nābabdwipē ḥabatāri, ḥastā-cāllisā bātsārā prākāṭā bibāri ; cāuddā-sātā-sātā śakē jānmārā prāmāṇā, cāuddā-sātā-pāñcānnē hālā ḥātārdhānā ➤ Śrī-Kṛṣṇa-Caitanya came down to Nāradvīpa ; he sojourned in manifest form for 48 years ; the date of his birth, Śaka 1407 ; he disappeared in 1455 ; also cf. VSP., p. 1222, যে পথে যে গ্রাম নদী শৈল যাই হই শৈলা। বলভদ্র-ভট্টাচার্য-স্থানে সব নিখি নিলা ॥ « jē pāthē jē grām & nādī śāil & jāhā hāi līlā, Bālabhadrā-bhāṭṭācāryyā-sthānē sābā likhi nilā ➤ in all the ways, in all villages, rivers and hills, wherever there were any events, he wrote down all from Balabhadra Bhāṭṭācārya ; etc.

### The Past use of the Present Tense in Bengali.

**689.** The « -i » affix in the past is thus found in MB., although it is not so common ; and this can only be expected, considering that in OB. the non-*I* form is hardly obsolete, although the « -l » has well-established itself. But in MB. and NB. we meet with a very common use of what is apparently the present tense in the past, in historical narrative generally : e.g., NB. গেল বছর যখন আমি কাশী যাই (=গিয়াছিলাম) « gēlā bāchārā jākhānā āmi Kāśi jāi (=giyāchilām) ➤ when I went to

*Benares last year ;* ভারতে আর্যদের আগমন কথন হয় জানা যায় না « Bhārātē Āryyādērā ḍāgāmāṇā kākhaṇā ḥāyaṇā jāuā-jāyā nā » *it is not known when the first coming of the Aryans into India happened ;* সম্রাট আকবর প্রায় ৫০ বৎসর রাজত্ব করেন « sāmrāṭ Ākbārā prāyā pāñcāśā bātsārā rājātwa kārēnā » *Emperor Akbar reigned for nearly 50 years ; etc., etc.* In MB. (and also in NB.), this ‘present’ is very frequently used side by side with the ordinary « -ilā » past, and is not distinguished from the ordinary present in any way as a present used especially for the past. This usage seems however to point to a continuance in MB. and NB. of the OB. passive participle without « -l- », used for the past tense. The regular form would be « -ita > -ia > -i, -i », which is not uncommon in MB., as in the instances given above ; but it seems that when « -ila » became established as the characteristic past base in OB. and MB., the « -i » form was not properly understood : in the 1st person it could easily be confused with the 1st person present affix, and in connexion with the 3rd person the final vowel could be changed to « -ē » as in the 3rd person present ; and in this way the old passive participle adjective could formally merge into the present tense, retaining its old past sense. This gave rise to what at first sight looks like a past use of the present. Once this construction was accepted, in Early MB., substitution for the « -i » participle by the 2nd personal affix « -ā » and by the honorific « -ēntā, -ēnā » was a matter of course. The use of the present for the historical past is of course a most natural thing, being found in many languages, Sanskrit and the Prakrits and the NIA. languages included. But the presence of the « -i » past for all persons in MB. points to « -ia < -ita > ; and also the use of « -i » and the « -ēnā, -ā, -ē, -i » forms along with « -ilā » in the same sentence or proposition seems to indicate that the passive participle without « -l- » had something to do with the so-called ‘present’ tense for the past in MB. and NB.

Examples of this promiscuous employ of « -ilā » with the non -l forms can be found in the passages quoted in § 688, and further instances are given below :

SKK., p. 19, এ বোল সুশিংঠি নাগরী রাধা হাণ্ডি সকল গাএ। যত নানা কুল পান করপুর সব পেলাইল পাত্র॥ « ē bōlā suniā nāgārī Rādhā hānḍā sākālā

gāē, jātā nānā phula pānā kārapurā sābā pēlāilā pāē » *hearing this talk, winsome Rādhā struck all over her body; all the various flowers, betel leaves and camphor and all she scattered with her feet*; p. 240, হেন বুনী

‘hā hā putrā’ kāri rājā hāilā bāhīrā » *‘Pravīra has fallen,’ so shouted every one: then from a distance Niladhwaja heard it; the king came out with ‘ah, ah, my son! ’*;

Kavikāñkaṇa Mukunda-rāma (Vāngavāsi edition) : p. 14, কোলেতে করিয়া রামা ছেলি করে পার ॥ প্রবেশ করিল ছেলি গহন কানন । « kōlētē kāriyā rāmā chēli kārē pārṣṭ : prābēṣṭ kārilā chēli gāhāṇṭ kānāṇṭ » *the lady took the goats across in her lap: the goats entered the dense forest*; p. 155, হাস্ত পরিহাসে দোহে বসিলা দম্পত্তী । জিজ্ঞাসে ঘরের বার্তা সাধু ধনপতি ॥ লহনা কহিল, অভু ভূমি ভাগ্যবান् । « hāsyā pārihāsē dōhē bāsilā dāmpatī ; jijñāsē ghārēṛṣṭ bārttā sādhu Dhānāpāti : Lāhānā kāhila, ‘prābhu ! tumi bhāgyābān’ » *the two, husband and wife, sat, in laughter and in jest; the merchant Dhanapati asked about the news of home: Lahanā said, ‘my Lord ! you are fortunate indeed’*; p. 175, তাহার পশ্চাতে আইল দাস নীলাম্বর । আদর করিয়া আইসে উজানী নগর ॥ « tābhārā pāscātē āīlā Dāsā Nilāmbārā, ādārā kāriyā āīsē Ujānī-nāgārā » *behind him came Nilāmbara Dāsa, doing (proper) respect he came to the city of Ujānī*; p. 185, সমুখ দুয়ারে অগ্নি দিলেন খুল্লনা ॥ দুয়ারেতে ঘায় অগ্নি, সান্তাইল ঘরে । প্রবল হইল অগ্নি জড়য়ের উপরে ॥ জড়গৃহে বাঢ়ে অগ্নি ক্রোশ পরিমাণ ॥ « sāmmukhā duārē ḥagni dilēṇṭ Khullānā : duārētē jāy ḥagni, sāmbhāīlā ghārē ; prābālā hāīlā ḥagni jāū-ēṛā upārē, jāū-ghē bārhē ḥagni krōṣṭ-pārimāṇṭ » *Khullanā set fire to the front door: the fire came through the door, and entered the house; upon the lac, the fire became strong, and the fire grew a krōṣṭa measure within the house of lac; etc., etc.* ;

Vāṇī-dāsa, ‘Padmā-purāṇa,’ (ed. Rām-nāth and Dvārakā-nāth Chakrabarti) : p. 207, আঙুবাড়ি ওঝারে আনিল আনিল চন্দ ঘরে ॥ পরম গৌরবেতে করিল সভাষণ । ধৰ্মস্তরি আগে আনে মড়া ছয়জন ॥ « ḥagu-bāṛi ḥjhā-re ānilā Cāndrā ghārē, pārāmā gāurābētē kārilā sāmbhāṣāṇṭ ; Dhānwāntāri-āgē ānē mārā chāyā-jāṇṭ » *Candra advanced and brought the snake-doctor home, greeted him with great honour and they brought the six corpses before Dhanvantari*; etc. ;

‘Caitanya-caritāmṛta,’ Madhya-lilā, Chap. 9 : রাত্রিকালে রায় পুন কৈল আগমন । হইজনে কৃষ্ণকথায় করে জাগরণ ॥ হইজনে কৃষ্ণকথা হয় রাত্রিদিনে । পরম আনন্দে গেল পাঠ সাত দিনে ॥ « rātri-kālē rāyā punā kālā ḥaggamāṇṭ ; dui jānē Kṛṣṇā-kāthāyā kārē jāgārāṇṭ : dui jānē Kṛṣṇā-kāthā hāyā rātri-dinē, pārāmā ānāndē gēlā pācātā sātā dinē » *the king came again at night time; both of them kept awake discoursing about Kṛṣṇa; there was*

*discourse about Kṛṣṇa between them, night and day; some 5 or 7 days were thus passed in great bliss;* Antya-lilā, Chap. 9: এত বলি ঘোড়া আনি রাজস্বারে ধরি ..... এক রাজপুত্র ঘোড়ার মূল্য ভাস জানে। তারে পাঠাইল রাজা পাত্ৰ-মিত্ৰ সনে॥ সেই রাজপুত্র মূল্য করে ঘটাইয়া। গোপীনাথের ক্ষেত্ৰ হৈল মূল্য শুনিয়া॥ «ēta bali ghōrā āni rāja-dwārē dhāri ..... ēkā rājā-putrā ghōrārā mūlyā bhālā jānē; tārē pāthāilā rājā pātrā-mitrā sānē; sēi rājā-putrā mūlyā kārē ghātāiyā, Gōpīnāthārā krōdhā hāilā mūlyā śuniyā » *saying this and bringing the horse, they kept before the king's palace-gate: a prince knew well the price of horses; the king sent to him with his courtiers and friends; that prince fixed the prices very low, and hearing that (low) price, Gōpīnātha's anger rose; etc., etc.*

Such cases of indiscriminate use of the « -ila » and the present forms are exceedingly common in MB. Where continuous action is meant, it may be admitted that the form in use can very well be that of the present, since in the syntax of Bengali, action is viewed as happening before our eyes as much as possible. But we have also cases of finite or transitory action, and there the use of a present form would be difficult to justify even from the point of view of Bengali syntax. It is to be noted that with this so-called present past, the negative form which is employed is নাই « nāī », which seems to be itself a past form (see *supra*, p. 555).

In the ‘Prākṛta-Pāīngala’ we have a few instances of a form in « -ē » (for the third person), analogous to the Bengali ‘present’ past: e.g., p. 334 (Bib. Ind. ed.) « jini Kāīsa viñāśia kitti pāśia Muṭṭhi Aritṭhi vināśa karē; Jamalajjuna bhañjia paa-bhara ganjia Kālia-kula-sāṁhāra karē, jasa bhuaṇa bharē..... »; p. 576, « bappaa ukki sirē jini lijjia, tējjia rajja vaṇanta calē.... ». In the above cases, all the commentators are agreed (except in one or two instances) in regarding « viñāśia, pāśia, bhañjia » etc. as well as the « -ē » forms—« karē, dbarē, bharē, calē » as being passive participles in « -ia < -ita >, with the instrumental form « jini = yēna » as the subject (cf. *supra*, p. 124). The final « -ē » (instead of « -i ») is due in the ‘Prākṛta-Pāīngala’ to reasons of rime or rhythm in some cases, but as the work was finally redacted in the second half of the 14th century, the influence of the present tense third person in altering

the final vowel as in Bengali is also quite conceivable here. With the forms in « -ē » as above, one can compare certain other forms in « -u », genuine Western Apabhrañña inheritances, in the 'Prākṛta-Pāṇḍgalā': e.g., p. 570, « jiṇā vēā dharijjē...dantahi ṭhāu (= sthāpitā) dbarā...daha-muha kappē (= kartitah) ».

**690.** The non-l past form is found occasionally in Early Orīyā also, where it ends in « -i ». Thus Jagannātha-dāsa, 'Ūṣā-harāṇā' (Contai ed.): p. 6, « pārighā-prāhārē bināsi, siṁhā yēśānē pāśu grāsi : pārighā-ghātā bājrā-prāyē, jibānā nāśilā thōkāē : kāhārā bhujā-dāṇḍā chindī, pālāi gālē bālā chādi : dēkhinā Aniruddhā-gāti, nāgā-bāndhānē māhārāthī Aniruddhā-ku bēgē bāndhi : tā dēkhi Ūṣā kāndi » *he slew with a blow of his mace, as if a lion devoured a beast: the blow from the mace was as a thunderbolt, it destroyed the lives of some; the hands and arms of some were torn away, they ran away leaving the forces: seeing Aniruddha's devoir, the great warrior quickly bound Aniruddha with snake-bonds: seeing that, Ūṣā wept;* p. 9, « Kṛṣṇā upārē bāṇā bindhi » *the arrow pierced Kṛṣṇa;* p. 10, « sābhāyē dāsā digā cāhi » *looked at the ten quarters in fright;* p. 11, « jñānā pāsilā nijā dēhē : uṭhi sāmbhāli kālēbārā » *senses came back into his body: getting up, he took care of his person;* ibid, 'Kaūṣa-janma': p. 2, « Kṛṣṇā-bāri-bhābā icehi » *desired the inimical attitude of Kṛṣṇa;* p. 16, « dēbē pālāi swārgā chāri » *the gods fled, learing heaven;* 'Rukminī-harāṇā', p. 15, « jētē āyudhā hāstē dhāri, sābu chēdilē Nārāhāri » *Nārahari (Kṛṣṇa) cut to pieces all the weapons that he took in hand;* ibid., « Kṛṣṇā dhāilē Rukmā-sīrā : tāt-kṣānē tālē tāku pāri, pāñcā prākārē kāti dārhi : tā dēkhi Rukminī sundāri, Kṛṣṇārā hāstā bēgē dhāri » *K. seized Rukma by the head; at once flinging him down on the ground, cut his beard in five places: seeing that, fair Rukminī quickly took K.'s hand; etc., etc. Examples are fairly common in Early Orīyā.*

In Early Maithili also, we have equally the non-l form: but it seems owing to the strong influence exerted by the Western Apabhrañña, the remains of Early Maithili literature that we have show the non-l form with the characteristic Western « -u » (as much as in OB.). This « -u » form so far as Maithili is concerned was purely literary, and has no

place in Modern Maithili. Examples: Vidyāpati (VSPd. ed.), Pada 32, « sasana parasa khasu ambara rē, dēkhala dhani-dēha » *with the touch of wind the garment fell off, ho, the damsel's frame was seen*; Pada 40, « saba-jana ēka ēka cuni sañcaru, Śāma-daraśa dhani lēla » *all (her friends) moved about picking (pearls dropped from her necklace) one by one, and the damsel had her view of Śyāma (Krṣṇa)*; Pada 50, « ambara bighaṭu akāmika, kāmini karē kuca jhāpu suchandā » *of a sudden the garment slipped, and the lady with her hands covered her breasts with great grace*; ibid, « sundari rahu sira lāi » *the fair one remained hanging her head*; Pada 52, « candanē caraeu payōdhara » *the breasts smeared with sandal-paste*; Pada 60, « takhanē upaju rasa, bhēlihu mōñē parabasa » *sentiment (of love) was born even then, (and) I became another's thrall*; Pada 75, « jakhanē duhu-ka dīthi bichūrali, duhu manē dukha lāgu : duhu-ka āsā-dipa mijhāela, madana-ākura bhāgū.....bāma nayanā jañō bhēla dūtē, o dāhina rahu lajāi » *when the two were out of (each other's) sight, sorrow afflicted the hearts of both; the lamp of hope of both went out, and the sprout of love was broken; .....the left eye was a messenger, but the right one remained in bashfulness*; Hara-gaurī Pada 9, « pāhuna āela, Bhabānī bhāga-chāla basaīē dia ānī » *the guest came and Bharānī (Umā) brought the tiger-skin to sit upon; etc., etc.*

The non-l adjectival forms in Middle Bengali and New Bengali.

**691.** The non-l form gave OB. « -i », e.g., « calī » : with the definitive « -ā », Māgadhi Ap. « calia » became « caliā », and then by loss of the « -i- », it became « calā » by Early MB. times. A similar loss of the « -i- » occurs in the Western Hindi: cf. Hindostāni—« calā », Kanaujī « calō », beside Braj-bhākhā « calyau (= caliau) », ‘ Vernacular Hindostāni’ of Ambala « caliā » (cf. also Bāṅgarū of Karnal « kahyā » = Hindostāni « kahā »). The « -i- » seems to be preserved in the perfect tense in Standard Bengali « cāliyā-chē » and dialectal « cālī-chē [tsoilse] < cāli-chē >, where « cāliyā (cāli) » is in all likelihood the passive participle (see *infra*, under ‘Compound or Periphrastic Tenses’).

In the ŠKK., the non-l form is rather rare, *ts.* forms in « -ita » and the « -l- » participle adjective being more common; but instances

do occur: e.g., p. 259, চলৌ তৈলৌ চন্দ্ৰাবলৌ « calī (= calitā) bhālī Cāndrābālī » *C. was gone*; p. 381, বাহতে কনক চূড়ী, মুকুতা রতনে জঢ়ী « bāhutē kānākā cupī, mukutā rātānē jāṛī » *on her arms gold bracelets, encrusted with pearls and gems*; etc. (these two examples « calī, jāṛī » are feminine). Examples of the « -ā » form are plentiful in other MB. literature: to quote a few random instances, Kṛttivāsa, ‘Uttarā-kāṇḍa,’ p. 177, পথে স্থআ কুকুৰ « pāthē suā kukurঃ » *a dog lying on the way*; Vijaya-gupta, ‘Padmā-purāṇa,’ p. 12 তিতা বস্তু « titā bāstrā » *wet cloth*, p. 38 টুটী « tuṭā » *broken*, p. 55 ভাঙ্গা « bhāṅgā » *broken*, এড়া ঝটী « ēṛā rutī » *cast-away bread* (= *leavings of a meal*), p. 58 তোলা জল « tōlā jālঃ » *water drawn (from well or tank)*, p. 107 পোড়া কপাল « pōṛā kāpālঃ » *burnt forehead = bad luck*, p. 69 মৰা মানুষ « mārā mānuṣঃ » *dead man*, p. 132 পাকা মূলা « pākā mūlā » *ripe radish*, p. 158 দণ্ডগুলি ছোলা « dāntā-guli chōlā » *the teeth were well-scraped*, etc.; VSP., p. 386 লেখা « lēkhā » *written*, p. 989 আবোলা « ābōlā » *not uttered*, p. 1057 হারা « hārā » *lost*, etc.; Chuṭi Khān’s ‘Mahābhārata,’ p. 55 বাং কাটা গেল « bāṅg kāṭā gēlঃ » *the arrow was cut into pieces*; etc., etc.

The « -l- » form in Middle Bengali.

**692.** Examples need not be adduced for the verb past tense, as « -il- » is the past base of Bengali. Passive participial adjectives in « -il- » were very much in evidence in MB. In the NB. the non-l adjective in « -ā » has practically superseded the earlier, more common « -il- » adjective (except in one or two phrases like গেল বছৰ « gēlā bāchāṛā » *last year* in the Standard Colloquial: in the dialects it is still living, in forms like জুড়াইল ছধ « juṛāilঃ dudbঃ » *cooled milk*, শুতিল মানুষ « sutilঃ mānuṣঃ » *sleeping man*, কৱাইল কাম « kārāilঃ kāmঃ » *done work*, ভুঁধিল ছাইল্যা « bhukhilঃ chālyā » *hungry child*, etc.). The « -l- » form continues in full vigour in Oriyā and in the Bihāri dialects as an attributive adjective.

Examples from OB.: Caryā 6, « bēḍhila hāka » *a tumult that has been surrounded*; 8, « gēlī (=gēlā?) jāma bahuḍai kaisē » (printed text = বহু উই « bahu uī », but cf. Commentary translation = « vyāghuṭati ») *how can a birth that is past (gēlī = gata-) come back?* 14, « rathē-caḍilā bāha-bāna »

? carriage-riding scholars; 33, « duhila dudu ki bēñtē śāmāya », see *supra*, p. 263.

From MB.: ŠKK., p. 26, ভাঙ্গিল নেহা « bhāgīlā nēhā » *shattered lore* (NB. ভাঙ্গা « bhāngā »); p. 45, আরতিল কাক « ārātilā kākā » *greedy crow* (from *ts.* noun « ārati », or < « āratta = ārakta »); পাকিল বেল « pākilā bēlā » *ripened (ripe) bael-fruit* (= NB. পাকা « pākā »); p. 54, পাইল নিধি « pāilā nidhi » *received wealth* (= NB. পাওয়া « pāwā »); p. 99, ভুঁথিল বাষ « bhukhilā bāghā » *hungry tiger* (< *tbh.* noun « bhukha »); p. 163, আউলাইল চিকুর « äulāilā eikurā » *dishvelled hair*; p. 171, ভরিল যমুনা « bhārilā Jāmunā » *full Yamunā*; p. 195, ফুটিল বাঙ্গলী ফুল « phuṭīlā bāndhāli-phulā » *blooming bāndhuli flower* (cf. ফুটিত দ্বষ « phuṭitā pādmā » *blooming lotus, with ts. -ita*, in the same page); p. 216, রোষিলি রাধা দিল খর বচন « rōṣili Rādhā dilā khārā bācānā » *angry Rādhā gare (spoke) sharp words*; p. 207, পাকিল দ্রাক্ষা « pākilā drāksā » *ripe grapes*; p. 246, আসুখিল হইল « asukhilā hāilā » *became unwell* (from *ts.* noun « asukha »); p. 304, মজিল চিত না জাএ ধৰণ « mājilā citā nā jāe dhārāṇā » *heart lost (in love) cannot be retained*; p. 370, দগধিলি রাধা জীএ তোৱ দৰশনে « dāgādhili Rādhā jītō tōrā dārāśānē » *Rādhā burnt (with love) as it were, will live (only) at thy sight* (*sts.* dagadha < dagdha); p. 392, বিষাইল কাপ « biṣāilā kāṇḍā » *poisoned arrow* (from noun « viṣa »); ibid., বজৱে গঢিস বুক না জাএ ফুটিআঁ « bājārē gāṛhila bukā nā jāe phuṭiā » *heart built of thunder-bolt does not burst* (NB. = গড়া gāṛā); p. 398, কাটিল ঘাঅত লেসু রদ « kāṭilā ghāṭatā lēmbū-rāsā » *lemon-juice in an incised wound, etc.*; from Kṛttivāsa, ‘Uttara Kāṇḍa’; p. 272, ভরিল সমাজে « bhārilā sāmājē » *in full assembly*; ibid, ‘Ayōdhya Kāṇḍa’; p. 21, কাটিল কদলী ঘেন পড়ে ডালে মূলে « kāṭilā kāḍali jēnā pārē dālē mūlē » *like a plantain tree that has been cut down, which falls with its branches and its roots*; Kavi-kaṇkaṇa, p. 118, ভুঁথিল বাঘিনী « bhukhilā bāghini » *hungry tigress*; p. 160, রাহুৱ ভুঁথিল বেশো « Rāhura bhukhilā bēlā » *at Rāhu's hungry time*; Vanīśi-dāsa, ‘Padmā-purāṇa,’ p. 48, কুপিল নন্দী « kupilā Nāndi » *angry N.*; p. 644, হারাইল ধন « hārāilā dhāṇḍā » *lost wealth*; etc., etc.

The adjectival use of the « -l- » forms in OB. and MB., as well as in Early Maithili (see below) establishes the passive construction as having originally obtained in place of the active one in the eastern languages.

When these « -l- » participles qualify feminine nouns (either subjects, as in the case of intransitive verbs, or objects, as in the case of transitive ones), in OB., in eMB., and in Early Maithili, they take the feminine affix « -I, -i » (see before, pp. 672 ff.): thus, in OB., « mēlili kāchi » (Caryā 8); « ghalili māli » (10); « bujili Mātangī » (14); « lāgeli tānti » (17); « lāgeli dāli, sēji chāli, rāti pōhāli » (28); « tuṭi gēli kañkhā » (37); « lāgeli āgi » (47); « gharinī candalī lēli » (49); « phitili śabarāli » (50): eMB. ŠKK., p. 72, কেঁণ পূরাণে কাহ হেন শগিলী কাহিনী « kōṇḍ purāṇē Kānhā hēnā śunilī kāhiṇī » *in what Purāṇa, O Kānha, has such a tale been heard* (passive construction lingering in MB., with transitive verb); p. 9, বড়ায়ি চলিলী আন পথে « bārāyi cālili ānā pāthē » *the old dame went by another way*; p. 14, সে কি রাধিকা তৈলি সতী নারী « sē ki Rādhikā bhāgili Sītā sātī nārī » *is it that R. has become a chaste wife (like) Sītā*; p. 22, রাতা সিঁচা বসিলি শয়নে « Rādhā siā bāsilī śayānē » *R. having come sat down on the bed*; p. 144, মথুরা লড়িলী বড়ায়ি হআ আশ্বানী « Māthurā lārili bārāyi hāā āguānī » *the old dame moved (towards) Mathurā, being the leader*; p. 145, বুলিতে লাগিলী বড়ায়ি « bulitē lāgili bārāyi » *the old dame began to say*; ibid., গেলৌ রাহী « gēli Rāhī » *Rādhikā went*; p. 156, হেন শুণী মনত চঢ়িলী রাধা নাএ « hēnā gunī mānā-tā cārhili Rādhā nāē » *thus pondering in mind, R. got into the boat*; p. 266, জিলী পদ্মার ঝৌ « jili Pādumārā jhī » *Padmā's daughter lived (again)*; etc., etc. In Late MB., and in NB., as the « -l- » form lost its original adjective nature, and became more and more a verb, this affixation of the feminine « -I, -i » went out of use. The same thing has happened in Maithili, though to a lesser extent.

Instances of the « -l- » adjective from Early Oriyā: ‘Dhruba-carita,’ p. 11, « āpāṇā ḍrjilā kārmā āpāṇē bhuñjāi » *one tastes (the results of) one's deeds done by oneself*; p. 73, « Dhrubārā arjilā bibhūti » *merits earned by Dhruva*; ‘Rukminī-harana,’ p. 11, « ḍsthā pācīlā phālā bimbā » *(like) ripe (i.e. red) bimba fruit*; etc., etc. It is common also in Modern Oriyā.

Instances from Early Maithili: Vidyāpati, (VSPd. ed.) Pada 37, « titala basana » *wet clothes*; 9, « nahāili gōri » *bathing fair woman*;

62, « mūruchali abhañō » *am one that has fainted*; 41, « nagara bharalā » *a well-filled city*; 21, « kāmini kōnē gaṛhalī » *by whom (this) woman was created?* (fem. affix « -i »); Hara-gauri Pada 17, « Śaṅkarē Gōrī karē dhari ānalī maṇḍapa-mājhē » *Gaurī was brought to the middle of the pavilion by Śankara holding her hand*; etc., etc.

Western Hindi shows adjectives in « -l- » which are extended forms from nouns: *e.g.*, « lajīlī (lajjā), sawādila (svāda), adōkhila (dōṣa), haṭhīlī (haṭha), raṅgīlā (raṅga), caṭakīlā (caṭak *splendour*), chaīla (chavi) » etc. occur in Bihāri's 'Sata-sai'; and similar forms like « lāḍīlī » *petted* ( $\sqrt{lal}$ ): > Bengali লাঢ়লী « lāḍīlī », « bhīgīlā » *wet*, « kaṭīlī » *cut*, « rasīlā (rasa) », « ghāyala (ghāta) », « gaila » *lane* (gata) etc. are fairly common in Braj-bhākhā and other Early Western Hindi literature. The extension of the passive participle form occurs, but that is rare.

### (2) THE PAST CONDITIONAL OR HABITUAL.

**693.** The Past Habitual or Conditional occurs in most NIA. speeches. Of the Eastern languages, Assamese, however, does not show it. This past base is simply the old Present Participle, the Oriyā forms (retaining as they do the full « -nt- »: see next section) are clear on this point: OIA. « -ant-, -ayant- » > MIA. « -anta-, -enta- » > OB. « -anta-, -enta- » > MB. ৰৱে « -it- » (cf. Hoernle, Gaudian Grammar, §§ 298-300, §§ 506 ff.). To denote the conditional or habitual, « -it- » is inflected with the personal endings as an ordinary past form. The conditional or finite use of the present participle occurred in Second MIA. (cf. Tessitori, 'Grammar of OWR.', § 123). Both the conditional and habitual uses of the present participle seem to be connected with the sense of *when*, *while*, *whilst*, *when that* etc., which is inseparable from this form when it is not frankly attributive: and this sense of duration implying almost a condition is emphasised in the locative absolute with the present participle, a construction which is found in the language of the Rig-Veda. The conditional and independent use of the present participle could thus normally evolve out of it. Cf. *e.g.*, the Pāli Jātaka formula, « atitē Bārāṇasiyam Brahmadattē rajjam kārentē », followed invariably by a past verb.

OB. as in the Caryās has the locative absolute with the present participle: *e.g.*, Caryā 42, « muñhā acchantē lōa na pēkhai » *people do not see while they are ignorant*; quotation in Commentary to Caryā 48, « ghara acchantē mā jāṅga (= jāha? jāśva?) banē » *when there is a home, go not (let us not go?) to the forest*; etc. But an example of the past conditional or habitual tense does not occur in the Caryās. In Early MB., this habitual or conditional past is fully established as a tense; and judging from its occurrence also in Early Oriyā and in Bihāri, it may be inferred that this temporal employment goes back to Māgadhi Apabhraṇa.

Examples from MB.: ŠKK., p. 164, डुबिञ्चि मरितो यवे ना थाकित काहे « ḍubīḍā māritō jābē nā thākitā Kānhē » *I would have died by drowning if Kṛṣṇa were not (there)*; p. 256, जौयस्त थाकित यवे नान्देर नन्दने। एत थने आवसी हेत दरमने « jiyāntā thākitā jābē Nāndērā nāndanē, ētā khānē abāsāī hāitā dārāsānē » *if the son of Nanda were living, by this time certainly we would have seen him (lit. his viewing would have taken place)*; p. 223, जानितो नासितो, याइतो, « jānitō, nāsitō, jāitō » *I would know (if I had known), I would not come, I would go*; p. 284, दितो « ditō » *I would give*; p. 307, चाहित « cāhitā » *I would ask*; etc., etc.; Kṛttivāsa, ‘Uttarā-kāṇḍa’, p. 103, आमि यदि थाकितां « āmi jādi thākitānāñ ( = thākitām) » *if I had remained*; Kavi-kāṇḍa, p. 128, प्रतिदिन क्रितिमाथ अঙ्गे बुलाइत हात, चन्दने करिया विभूषित। स्वर्ण पिङ्गर दर पुष्टिमेन नृपर « prāti-dinā kṣiti-nāthāñ ḍāngē bulāitā hātā, cāndanē kāriyā bibhūṣitā: subārnā-piñjārā-pārā puṣitēnā nṛpā-bārdā » *everyday the lord of earth would rub with his hand on its body, adorning with sandal (paste); the good king would tend it in a cage of gold*; etc., etc. Examples are copious in MB.

#### 694. Forms in the other Magadhan speeches:

Oriyā	Maithili
1. cālānt-i—cālānt-u;	1. dēkhit-i;
2. cālānt-u—cālānt-ā;	2. dēkhit-ah, dēkhit-ē;
3. cālānt-ā—cālānt-ē.	3. dēkhait, dēkhit-athi.

(The affixes are those of the verb simple past.) (Besides a number of forms with pronominal affixes.)

## Magahī

## Bhōjpuriyā

- |                             |                                 |
|-----------------------------|---------------------------------|
| 1. dēkhat-i, dēkhaít-i, -ū; | 1. dēkhat-i, (fem.) dēkhat-yū;  |
| 2. dēkhaít-ā, dēkhaít-aī;   | 2. dēkhat-ē, -as, -is; pl. -ah; |
| 3. dēkhaít, dēkhaít-athi-n. | 3. dēkhit, dēkhat—dēkha(i)t-an. |

(Besides forms with affixed pronouns.) (Besides a few other forms for the third person.)

Assamese expresses the past conditional by affixing the word « -hētēn » to the inflected « -il- » past form : « kārilō-hētēn, kārilō-hāk-hētēn » etc. This « hētēn » occurs in Early Assamese as « hēntē » (as in « pāilō-hēntē » *I would receive* in ‘Ādi-caritra,’ p. 67), and it is undoubtedly the present participle of « √ah, ha » *to be*, in the locative absolute, « \* ahantahi > \* ahēntahi > hēntē », a variant of the other form « hānta, hātā » (see above, p. 739).

The « -it-, -at- » Future in the Modern Magadhan Speeches.

**695.** In Maithili and Magahī, there is the use of the present participle form in « -t- » for the Future. In both these forms of Central Magadhan, the « -t- » future has ousted « -b- » future (for which see *infra*) in the 3rd person : in Maithili there are also alternative « -t- » forms for the 1st and 2nd persons. Thus—

Maithili, 1st person : « dēkhat-iāi, dēkhit-āhū (dēkhat-iāi-nhī) » ;

2nd person : « dēkhat-iāi (dēkhat-iāi-nhī) » ;

3rd person : « dēkhat (dēkhāt-ai) », fem. « dēkhati », besides forms with the pronouns affixed — « dekhāt-ai-nhi, dēkhāt-tah, dēkhathu, dēkhathūnhi, dēkhathīnhi », fem. « dēkhatihi ».

Magahī, 3rd person, only : « dēkhat (dēkhāt-ai) », besides « dēkhātāhin, dēkhātan, dēkhātathī, dēkhātin, dēkhātathin, dēkhātāthīn(i) ».

Leaving apart the extended forms, with the pronominal affixes, the simplest form for the 3 person future in both Maithili and Magahī is « dēkhat » : thus, « sē dēkhat » *he will see*. Here we have the simple participial base apparently : < « sē \* dēkkhanta » = *he seeing*. But in the

past conditional it is « sē dēkhait », which seems to represent an old oblique form, a locative absolute apparently : « tasmin \*dṛksati (base \*dṛksant-) > \*tahī dēkkhantē, dēkkhanti > sē dēkhati, dēkhait (by epenthesis) ».

In dialectal Bengali, of Eastern Bengal (specially in the East *Vaṅga* area), there is also a future use of the « -t- » forms : thus, in East Sylhet Bengali, we have 1 pers. দেখতাম « dēkhtām » *I shall see*, also *I would see, if I saw*; 2 pers. দেখতাব « dēkhtāv », দেখতে « dēkhtē »; 3 pers. দেখতো « dēkhtō », দেখতা « dēkhtā » (LSI., V, I, p. 226). From the future, an imperative use also seems to be found occasionally in East Sylhet : e.g., আপনি করলাম, তিল কাটিব না « āpatti kā'rlām, tila kāṭita nā » *I objected, 'don't cut the sesamum'* (LSI., V, I, p. 232). Similar use is found in Tippera, in Noakhali, and in Chittagong : e.g., দিত না « ditā nā » *he will not give*, ক'রতাম ন « kā'rtām nā » *I shall not do*. The following peculiar construction is also noticeable, with the « -t- » conditional or future, to denote purpose or desire : আমি যাইতাম চাই « āmi jāitām cāi » *I want to go* (besides যাইতে, যাইবার « jāitē, jaibār » as in Standard Bengali), তুমি যাইতাব চাও « tumi jāitāv cāo » *you want to go*, হে যাইত চাব « hē jāitāv cāy » *he wants to go*, honorific তাইন যাইতা চাইন « tāin jāitā cāin » (as in Eastern Sylhet : LSI., V, I, p. 227). Cf. also দিতাম পাইরতাম না « ditām pāīrtām nā » *shall not be able to give*, কইরতাম দিতাম ন « kāīrtām ditām nā » *shall not allow (them) to do* (as in Noakhali), আই যাইতাম লাগ্গিলাম « āmi jāitām lāggilām » *I began to go*, তই যাইতা লাগ্গিলা « tūi jāitā lāggilā » *you began to go*, হিতে যাইতে লাগ্গিল « hitē jāitē lāggil » *he began to go* (as in Chittagong : cf. Basanta Kumar Chatterji in VSPdP., 1326, p. 114, = Standard Bengali « jāitē lāgil- » for all persons). Here we have simply the present participle adjective inflected as a tense even when it is not a finite verb. Such use is found in South-East Bengali of several centuries ago : thus in the Chittagong poet Ālāol of the 17th century, we have a line like কুবোল সহিতাম নারি « kubolā sahitām nāri (= nā pāri) » *I shall not be able to endure bad words* (VSP., p. 1142). The « -t- » future is also found in Mayang or Bishnupuriā (LSI., V, I, p. 424), which seems to be an old extension of Sylhet Bengali in the Tibeto-Burman tracts of the east. With the « -r- » affix (see *infra*, 'Pleonastic Affixes'), Sylhet Bengali and

Mayang, again, have some forms with the « -t- » conditional or future to indicate the present or future (LSI., V, I, pp. 226, 423, 424).

This future use of the present participle in the Bengali dialects of the extreme east is not shared by the other forms of the language, and seems only to be a local development. But the point is not clear. It is plain that in Central Magadhan, the future use of the present participle made a start with the third person, and Magahī did not go beyond it. The future use of the third person is found in the 14th century Maithili of Vidyāpati quite plentifully, but mainly in the third person. It cannot be surmised definitely whether this idiom originated in the Māgadhi Apabhraṇa period as a form inherited equally by Central and Eastern Magadhan.

Mārkanḍeya in his 'Prākṛta-sarvasva,' notes that in Nāgara (i.e., Western) Apabhraṇa, the present participle is used for all the tenses : thus, « sarvadā śatṛ : 'hontō' = bhavan, babbūva, bhaviṣyati vā » (XVII, 62, Vizagapatam ed., p. 119). This note is interesting : « hontō » is actually the source of the Gujarātī « hatō », Rājasthānī « thō » and Western Hindi « hatau, hutau, hatō, thō, thā » was (Tessitori, 'Grammar of OWR.', §§ 113, 123), and of the Gujarātī and Western Hindi (Hindostānī) present participle « hōtō » and « hōtā » besides ; and further, the present participle affix « -ant- » has given the Western Panjabī, and Sindhi affix « -nd- » for the future base. These are all Western languages. But how far the future use of the « śatṛ » of Sanskrit characterised Māgadhi Apabhraṇa cannot be known.

### (3) THE FUTURE TENSE.

The OIA. Sigmatic or Inflected Future in NIA.

**696.** The future was formed by adding « -syā- » (with or without the additional vowel « -i- ») to the root in OIA. This inflexional or sigmatic future is preserved in many forms of NIA. as « -s-, -ś-, -h- », in W. Panjabī, Rājasthānī (Jaipuri and Mārwāri), Gujarātī and W. Hindi (Braj-bhākhā, Kanaujī, Bundēlī), and partially in E. Hindi (in the 3rd person only in Awadhī and Baghēlī, and in all the persons in Chattisgarhī ;

the « -b- » future also occurs in the E. Hindī dialects, but never in the 3rd person). Of the Magadhan languages, Bhōjpuriyā preserves it in the 3rd person only, and in 2nd person as future precative; Magahi, 3rd person (beside the « -t- » future), and in the 2nd person as future precative; in Maithili and in NB., it is found in the 2nd person as a future imperative (see *supra*, p. 908); and in Assamese and Oriyā, it seems to have been entirely lost.

The sigmatic future at one time was present in the East, and traces of it continued down to eM.B. The OIA. sibilant has survived as a sibilant in Gujarāti, in some of the Rājasthāni dialects, in Western Panjabī (the MIA. « -ss- » < OIA. « -sy- » doubtless being retained as a single « -s- » in the latter: cf. *supra*, pp. 549-550, p. 79.). Thus: Gujarāti 1. « mārīś (māras) — mārīśū (mārsu) », 2. « mārasē (mārse) — mārasō (mārsō) », 3. « mārasē (mārsē) » = OIA. « mārayiṣyāmi »; etc.; Jaipuri 1. « mārasyū — mārasyā »; 2. « mārasī — mārasyō »; 3. « mārasī — mārasī »; Lahndā 1. « mārēsā — mārsahā, mārsāh », 2. « mārēsē — mārēsō », 3. « mārēsī — mārēsin ». In the rest, where the « -sy- » form is preserved, it occurs as « -h- »; and this change of « -s- » to « -h- » is an unexplained problem in MIA. and NIA. phonology (see *supra*, pp. 549-550, p. 783). Thus, Mārwāri 1. « mārahū — mārahā », 2. « mārahī — mārahō », 3. « mārahī — mārahī »; Braj-bhākhā 1. mārihāū — mārihāī », 2. « mārihāī — mārihāū », 3. « mārihāī — mārihāī »; Awadhī 3. « mārihāī (> mārē) — mārihāī », Bhōjpuriyā 3. « mārī — mārihē, mārihen », etc. The « -h- » is thus further lost intervocally in the Eastern languages: thus, « māriṣyati » > MIA. « mārihāī, mārihī » > NIA. « mārihi, mārī » (as in Bhōjpuriyā).

In Early MB. we have cases of the sigmatic future for the third person also. A number of instances occur in the SKK., and a few could be culled from 15th century Bengali: after which period it died out evidently when the intervocal « -h- » was slurred, and the form became confused with the present indicative (or the passive present, which itself was merging into the present active). No instance of the sigmatic future in the first person has been found, either in OB. or in MB.; and no

case of third person occurs in the Caryās ; only of the second person (see *supra*, p. 908).

ŚKK., p. 65, যবে তোৱে মাৰিহে পৰাণে। তবে তোক রাখিব কোণ জনে॥  
 « jābē tōrē mārihē pārāṇē, tābē tōkā rākhībā kōṇā jānē » when he will  
*strike you in life, then who will protect you?* ; p. 100, কান্দিঁ়া জাগায়িনো  
 কাশে। পাছে কাহাঙ্গি মোকে না দিহে দোষে॥ « kādiā jānāyibō Kāśe,  
 pāchē Kānhāñi mōkē nā dihē dōsē » I shall lament and inform Kanśa, and  
*Kṛṣṇa will not (= should not) blame one after that* ; p. 180, হাথ দিতে লিহে  
 কলিঁ়া « hāthā dītē lihē kaliā » the black (stain) will smear (itself) on  
*placing the hand* ; p. 251, কেহো যবে বেকত কৰিহে এহা কাজ। আজ্ঞাৰ খাঁখাৰ  
 তবে তোক্ষে পাইবে লাজ॥ « kēhō jābē bēkata kārihē ēhā kājā, āmhārā  
 khākhārā tābē tōmhē pāibē lājā » when someone will make this affair  
*known, then (there will be) blame for me, and you will have shame* ;  
 p. 26', নিষধ রাধাক যতনে॥ আৱ বাৱ হেন না কৰিহে। পুৰুষৰ আথি নিবালিহে॥  
 « niṣādhā Rādhākā jātānē : ārā bārā hēnā nā kārihē, puruṣerā ākhi  
 nibārihē » carefully forbil Rādhā, that she will not do like this again,  
*she will avoid a man's eyes* ; p. 323, শুণিঁ়া কি বুলিহে বলভদ্র ভাই « śuṇī ki  
 bulihē Bālābhadrā bhāi » what will brother B. say on hearing (this)? ;  
 p. 324, শুণী সব দেব গণে কি বুলিহে আজ্ঞারে « śuṇī sābā dēbāgāṇē ki bulihē  
 āmhārē » what will all the gods say to me hearing this? ; p. 336, যবে কাহ না

*karma, Kṛṣṇa will not be obtained, then I shall eat poison with my own hands* ; cf. Kṛttivāsa, 'Uttarā-kāṇḍa,' p. 59, column 117, আইস্ক ভূগুৱাম  
 তবে সি প্রাণ জাইহে « aīsukṛ Bhr̥gurāmṛ, tābē si prāṇṛ jāihē » let B. come,  
*then indeed life will depart.*

The « -itavya > -b- > Future in NIA.

**697.** The characteristic suffix for the future base in Bengali as well as Assamese and Oriyā is « -ib- », = « -ab- » of Bihārī and of Eastern Hindi. About the origin of this affix, there is no difficulty: it comes from the OIA, future passive participle gerundive in « -tavya- » or « -itavya », in Second MIA. « -(i)avva-, -(i)abba-, -ebba » and other

forms (Pischel, 'Gramm. der Pkt.-sprachen,' § 570). This affix does not occur in the Rig-Veda, and it is rare in other Vedic literature: it is a new formation, and replaces the Vedic gerundive « -tua » or « -tva ». In MIA. and in Classical Skt. it became much more evident. In Early MIA. it has the force of an imperative: e.g. Aśokan, Rock Edict I Girnar, « na prajuhitavyaṁ na ca samājō katavyō »; Sarnath, « iyāṁ sāsanē viṁna-pitavyiye », etc., etc. There is here a vague mandatory sense, with an express future implication. The simple future notion evolved gradually; side by side with it, the old notion of an action which is to be done continued, and was modified into simply the notion of an act. In NIA. both the uses of this form occur: as a future passive participle (which finally became the future tense), and as a verbal noun. Thus, Gujarāti has verbal nouns in « -vū », « karvū = kariavvaūṁ, \*karitavyakam, kartavya-kam », Rājasthāni (Mārwārī) in « -bō », « mārabō = \*māriabbaūṁ, māritavyakam », and Western Hindi (Braj-bhākhā) « māribāū, māribāu », (Kanaujī) « māribō »; Marāthī has a subjunctive base in « -āv- », e.g., impersonal « myā ut̄hāvē » *I should rise*, lit. *it is to be risen by me* (= \*mayā ut̄-sthātavyam), active « mī ut̄hāvā »; and the Eastern languages, Eastern Hindi, Bihārī, and Bengali-Assamese and Oriyā, have the verbal noun in « -ab-, -ib- » as well as « -ab-, -ib- » as the base of the future tense, with personal terminations added.

As it has been noted before, the « -(i)tavya- > -iabb- > -ib- » is not a native *tbh.* form in the East (*supra*, pp. 374, 375, 486-487). In the Eastern dialect, whether 'Old Ardha-Māgadhi' or 'Old Magadhi' of the First MIA. stage, as we can see from Aśoka inscriptions, OIA. « -vya- » became « -viya- », not « -vva- » (as for instance at Girnar). This First MIA. « -viya- » could only give « -vi, -i, -i » in the Modern Prācyā languages. The change « -(i)tavya > -(i)abba » is a later, post-Transitional MIA. feature in the eastern dialects, and « -iabba » is either a *semittatsama* form introduced from Sanskrit in the Transitional period (before the softening and final dropping of the intervocal « -t- » in « -itavya » was carried out), or was an imposition from some Western dialect which normally changed « -vya- » to « -vv- » and then to « -bb- ».

The « -(i)tavya » > « -ib- » was originally a verbal adjective, and the construction with a transitive verb was in the passive, the « -ib- » form qualifying the object in that case. This old usage is still in force in OB., as in the examples from Caryā 29 below.

Cases of « -ib- » future in OB.: Caryā 5, « tumhē hōiba » (= yuṣ-mābhīr bhavitavyam); 7, « kariba nivāsa » (= nivāśah kartavyah); 10, « tōe sāma karibē » (= ? kariba; ? < kariabbaī = \*kariabbaē = kartavyakah) ma (= maī) sāṅga » (= tvayā samāṁ kartavyō mayā saṅgah); 14, « jāiba puṇu jināūra » (= yātavyam punah jina-puram); 23, « tumhē jāibē »; 28, « lōdiba » (= Comm. « anvēṣayitavyah); 29, « maī dibi pīricchā » (= mayā dātavyā pīechā: dibi = \*diabba, + fem. -ī); 36, « kariba »; 39, « thākiba, khāiba maī »; 40, « kahiba » (kathayitavyam); etc.

It will be noted that in the Caryās, the form is « -ib- », and not « -ab- » as in Central and Western Magadhan, showing that the language of the poems belong to the East Magadhan group. Like « -illa- : -alla- », this affix, « \*-iabba, \*-iēbba, \*-ēbba » in Mag. Ap., ranged itself into two groups « -ibba- : -abba- », the Eastern Magadhan speeches adopting the former.

The affix for the 1st person future in many Bengali dialects (both in MB. and NB.) show « -m- », as « mā, -mu », and « -ñ- = -ñ- » as « -ñā, -ñ », instead of « -bā, -bō, -bū, -bōd, -bōhō ». This is merely a phonetic change, a softening of « -b- » in connexion with the nasal to « -ñ-, -m- », which has been discussed before (pp. 531-532). This « -m- » has 'been wrongly referred to the Sanskrit affix « -mah » for the 3 pers. plural indicative present by some Bengali writers on Bengali philology.

#### [G] PERSONAL AFFIXES

##### [I] ACTIVE (KARTARI), PASSIVE (KARMAÑI) AND IMPERSONAL (BHĀVĒ) CONSTRUCTIONS (PRAYOGA) IN NIA.

**698.** The personal affixes of the present or radical tense in NIA. are the phonetically decayed forms of those of OIA. Affixation for the participial tenses is a NIA. development. The future in Bengali and other

Magadhan languages, and in NIA. generally when it is of participial origin, followed the fortunes of the past. The formation of the past tense in typical NIA. of the first few centuries of the 2nd millennium A.C. agrees in principle with that of MIA. But subsequently, or it may be from the very beginning of the NIA. stage, there were new developments in some of the various groups of IA. The central language, W. Hindi, together with Eastern Panjabī, is most conservative, and has resisted innovations in the formation of the past, keeping true to the MIA. principle. The past tense in these speeches retains its MIA. character as the passive participle adjective qualifying the nominative when it is intransitive, and the object when it is transitive, the subject in the latter case being in the instrumental—the past of the transitive verb being thus a true passive albeit the construction of the phrase in nominal. Besides these active (intransitive) and passive (transitive) constructions for the past (« kartari » and « karmani prayōgas »), the central speech has preserved (though dialectally) the old neuter or impersonal construction (bhāvē prayōga) for the intransitive verb, and has further extended this neuter construction to the transitive verb (cf. LSI., IX, pp. 50-52). Thus, OIA. « Kṛṣṇah calitah (calitakah) » > MIA. « Kāñhō caliaō, Kāñhu caliaü » > NIA. (W. Hindi, Braj-bhākhā) « Kāñha calyau » (Active Construction); OIA. « Kṛṣṇēna pustikā paṭhitā, \* Kṛṣṇa-karṇēna pustikā paṭhitikā » (=MIA. idiom with instrumental postfix « -karṇa » and feminine in « -ikā ») > MIA. « \* Kāñha-(k)anṇē(na)m pōttihā paḍhiā (paḍhiā), \* Kāñha-anṇēm, Kāñha-anṇahī pōttihā paḍhiā » > NIA. (Braj-bhākhā) « Kāñha-naī, -nē pōthī parhī » (Passive Construction); OIA. « Kṛṣṇēna (\* Kṛṣṇa-karṇēna) calitam (calitakam) » > MIA. « Kāñha-(k)anṇē(na)m caliaam, caliaum » > NIA. « \* Kāñha-nē calyau », not found in Standard Hindostānī or Braj-bhākhā, but occurring in Vernacular Hindostānī (Neuter Impersonal Construction); and on the basis of this last, a new formation with transitive verbs (Impersonal Construction with the Transitive Verb) was established in NIA., as in W. Hindi (Braj-bhākhā): e.g., « Kāñha-nē Rāhī-kaū dēkhyau », of which the OIA. translation, word for word, would be « Kṛṣṇēna Rādhikāyāh-kṛtē dr̥ṣṭam » for « Kṛṣṇēna Rādhikā dr̥ṣṭā ».

This MIA. principle of « karmani, karttari » and « bhāvē » constructions, together with the NIA. extension, is substantially preserved in Rājasthānī, in Gujarātī, in Marāthī, in Western Panjabī, and in Sindhī, despite certain innovations. Rājasthānī in general agrees with W. Hindi, but its congener Gujarātī has confused the transitive impersonal construction with the transitive passive one, by making the past participle form qualify the object in the former construction as much as in the latter : e.g., « tēnē rāṇīnē jōi » *by-him with-reference-to-the-queen she-was-seen*, instead of « jōyū » *it-was-seen*. In this confusion some Rājasthānī dialects agree with Gujarātī.

Marāthī despite its affixing « -l- » to the passive participle has on the whole kept true to the MIA. standard : it has the active construction with intransitive verbs, and the passive with transitive ones, besides the impersonal with transitives. Its great innovation is adding personal affixes to the intransitive verbs (and following that, to some transitive verbs also : LSI., VII, p. 26), by which the past intransitive (also transitive in some cases) has become a regular inflected active past form, as much as in the Sanskrit perfect aorist or imperfect, or in the Bengali « -il- » past. Thus, « mī uṭhal-ō » for « mī uṭhalā » *I rose* (i.e. « aham utthita-lah+mē, mayā », instead of « aham utthitalah = utthitah », active), « myā rāṇī pāhili » (= « mayā rājñī dṛṣṭā », passive), but « myā rāṇī-s pāhile » (= « mayā rājñī-visayē dṛṣṭam », impersonal). The extension of the active construction to the transitive verb in some cases (e.g., « mī bōlalō », or « bōlilō, bōlilā » *I said*, as in the 'Jñānēśvarī,' instead of the passive « myā bōlalā, bōlali » etc. or impersonal « myā bōlalē ») shows that the old system has not been kept intact.

The Pahārī speeches on the whole agree with W. Hindi, and in some cases with Rājasthānī-Gujarātī in mixing up the impersonal and the passive. The Eastern Pahārī speech, Khaskurā, on the other hand shows a mixing up of the passive and active, by putting the subject in the instrumental, and the passive participle instead of qualifying the object is conjugated like a verb, taking affixes corresponding to the subject : e.g., « mai-lē pāp garē (garyē, garyā = garya- < karia, \*karita, kṛta + mē) »

*I sinned, lit. by-me sin done-by-me or did-I).* The MIA. principle is thus obscured here. (Cf. LSI., IX, pp. 26, 37, 147, 294, 328, 398-399, 466, 489, 572, 678, 695, 727, 783, etc., etc.)

The languages of the extreme west, W. Panjabī and Sindhi, both maintain the adjectival character of the passive participle, modifying it according to the gender and number of the object. But at the same time W. Panjabī employs pronominal affixes to emphasise the proper subject of the transitive verb (really instrumental), in addition to that of the intransitive; and Sindhi regularly adds these affixes to the intransitive (cf. LSI., VIII, Part I, pp. 270-271, and Trevor Bomford, 'Language spoken in Western Panjab,' JASB., 1895, p. 317, for W. Panjabī; LSI., VIII, Part I, pp. 67-68, for Sindhi). The use of pronominal suffixes in these western speeches is not confined to the passive participle only, but to other forms of verbs, and to nouns as well (LSI., VIII, Part I, pp. 42, 261), and is a special development in these, which is unknown to other cognate NIA., or to MIA. and OIA. The affixed pronoun in the passive participle or verb past base is to some extent necessitated in these speeches to ensure definiteness of the subject, as the instrumental post-position is frequently dropped (as in Panjabī, both Western and Eastern), or is non-existent (as in Sindhi, in which the oblique is employed for the instrumental). The affixation is merely formal, and does not imply any alteration in the old passive conception of the transitive past.<sup>1</sup>

<sup>1</sup> The use of the pronominal affix with nouns (e.g., W. Panjabī 'ghar-am' 'my house, Sindhi 'piu-mē' 'my father), as well as dative and accusative use of the affixed pronouns (e.g., W. Panjabī 'Sahiban mut-ēi khatt' *S, has-sent-to-thee a-letter*, 'kitu-s mōtā' *he-made-it fat*, 'bukhār hī-s' *fever is-to-him*, etc.) in these western languages, as well as in the extra-Indo-Aryan (Dardic) Kāsmīr, resembles the Iranian enclitic pronouns which one finds, e.g., in Persian, in Paštō, and in Balōc (cf. Geiger's 'Grundriss der iranischen Philologie'; C. Salemann, 'Mittel-persisch,' p. 291; P. Horn, 'Neu-persische Schriftsprache,' p. 118; Geiger, 'Die Sprache der Afghanen,' p. 217; 'Die Sprache der Balntschen,' p. 240). The whole of the Indo-Iranian area from Persia right up to the frontiers of the old Saurasēni (W. Hindi) area,—including the W. Panjabī (and probably also E. Panjabī in early times) and Sindhi tracts (among areas occupied by the NIA. speeches), the Dardic tracts, and those occupied by the Iranian speeches—seems to have been an area where

**699.** In the Magadhan languages, as well as in Eastern Hindi, on the other hand, the construction has become purely active, and the old MIA. principle has been completely ignored. The subject of a past sentence is in the nominative now at the present day, whatever might have been its nature originally. Traces of an instrumental affix may be found in the subject (*e.g.*, « -ē » in Assamese and Bengali), but the instrumental idea is now entirely absent. The personal forms, which (as in Sindhi and W. Panjabī) doubtless originally emphasised the instrumental-nominative, have in the Eastern languages lost their enclitic, emphasising character—have become personal inflexions pure and simple. Judging from indications in the earlier as well as later phases of these eastern speeches—OB., MB., NB., Early Maithili, etc., as well as Early Awadhī and Modern Awadhī, and from comparison with other NIA. speeches and with the habits obtaining in MIA., we can surmise that the personal affixes were not added to the past passive participle (and to the future passive participle) in Māgadhi Apabhrāṅśa, and that this affixation was not indispensable in the early stage of the neo-Māgadhan speeches. Thus, Māg. Ap. in all likelihood had « \* haū (? bai), tūm, sē calilla(a) » (= aham, tvam, sah calitah) and « \* amhi, tumhi, tē calilla(a), calillahi » (= vayam, yūyam, tē calitah), beside « \* maī, amhahī, taī, tumhahī, tē, tēhī rāa dēkkhilla(a) » (= mayā, asmābhīh, tvayā, yuṣmābhīh, tēna, tājī rājā dṛṣṭah), and « \* maī, amhahī, taī, tumhahī, tē, tēhī rāṇī dēkkhillī » (= mayā, asmābhīh, tvayā, yuṣmābhīh, tēna, tājī rājñī dṛṣṭā). Beng. made the first « n.uī, āmi, tui, tumi, sē, tēhā calila » and « mui etc. rāya, rājā dēkhila (rāṇī dēkhili) » and then by affixation, « mui dēkhil-i, -ā-hō, -ō, -ū, -ām ; tui dēkhil-i, -is ;

the old Aryan enclitic pronouns were retained as living forms, and were later turned into suffixes: and these suffixes therefore were different in origin from the personal affixes of the Eastern languages (*e.g.*, OIA. 'mayā kṛtam, kṛtam mayā, kṛtam mē' > Lahndā 'kitn-m'; Old Persian 'mana kartam' > Middle Persian [Pahlavī] 'man kart, am kart,' and 'kart-am' > New Persian 'kard-am': [cf. Horn, *op. cit.*, p. 148]: compared with this, Early Bengali ମୁଣ୍ଡ କାଳୁମ୍ 'mui kailum' *I did* is a different thing, originating in NIA. times from 'maī kailla'; and Hindi 'main-nē kiya' is of course entirely different, showing no kind of personal or pronominal affixation).

tumi dēkhil-a, -āhā; sē dēkhil-anti, -enta, -ēn, -āin, -āñi (calil-I, calil-āhō etc.) ». (Besides, the « bhāvē prayōga » with the object in the dative with « -kē » etc. was evolved: see *supra*, pp. 897-898.) Affixation was not fully established in Bengali even in the 15th century, as we can see from MB. literature, where the base form in « -ilā » is frequently used for all persons: and in fact, in some dialects even now the base form is used for the third person (*e.g.*, Standard Bengali « sē dēkhilā », Dacca « sē dēkhla, dēkhlo », *he saw*, base only, but Calcutta Bengali « sē dēkh-lē » with « -ē » suffix for the third person; so Dacca « sē kāīrbā, kōrbō » *he will do* beside Standard « sē kārib-ē », Calcutta « sē kōrbē »). Similar affixation has taken place in other Magadhan, and in Eastern Hindi (*e.g.*, Awadhī: 1. « dēkhēū, dēkhiū, pl. dēkhī, dekhā, dekhan, dēkhēn »; 2. « dēkhisi, dēkhēs, pl. dēkhēn, dēkhā, dēkhī »; 3. « dēkhisi, dēkhai, pl. dēkhin-i, dēkhēn » etc.).

Pronominal affixation apparently was carried on independently in each of the various groups of dialects in the Magadhan area,—in West Magadhan (Bhōjpuriyā), in Central Magadhan, in the various Bengali and Assamese dialect groups, in Oriyā. But some common tendencies were shared by all or most of them. The most remarkable development has been in Central Magadhan (Maithili and Magahī), which display a greater richness and variety in the matter of pronominal affixation than any other NIA. language—by which two or even three pronominal forms can be tagged on to the verb base. Thus we have Bengali মাৰিলাম, ‡ মাৰিলুম or ‡ মাৰিলি « māril-ām, ‡ māril-um, ‡ māril-i » *I, we beat* (past), = Oriyā « māril-i, māril-ū », Assamese « māril-ō », Bhōjpuriyā « māral-i », Maithili « māral-ahū, māral-i »; but also we have Maithili « māral-i-au-k » *I struck you*, or « māral-i-ai-nhī » *I struck him or them* (honorific object). We have here practically cases of polysynthesis, of long sentence words resulting from affixation. In this matter there may have been a strong influence of Kōl on Central Magadhan in the formative period of Maithili and Magahī: with forms like « mār-al-i-au-k » or « mār-al-i-ai-nhī », we can compare Kōl (Muṇḍārī) « om-ad'-iñ-ae » *he-gave-it-to-me* and « lel-k-iñ-ako » for « \* lel-ked'-iñ-ako » *they-saw-me*. The affixation in Eastern Magadhan is simpler, and approximate rather that of modern Dravidian

(e.g., Bengali. « pār-il-ām » *I read* = Tamil « pad-itt-ēn », root + tense affix + personal termination: see *supra*, p. 175).

700. Grierson, in two noteworthy papers to the JASB. for 1895 ('Suffixes in the Kāçmīrī Language' and 'Radical and Participial Tenses in the Modern Indo-Aryan Languages') has tabulated the various affixes of NIA. and suggested their etymologies. The Eastern languages have these affixes for the verb past tense, and the future tense; the Western languages have also the pronominal adjuncts; the Southern language Marāṭhī partially employs them. All this is opposed to the Midland language, W. Hindi. In this Grierson finds a point in support of the theory of Inner and Outer Indo-Aryan groups (see *supra*, *Appendix A to Introduction*, pp. 165-166; JASB., 1895, p. 351). But the conjugational system cannot be assumed to prove much, as has been said before. The languages started in the East without the personal terminations, and in later times only they entered into the habit of affixation; whereas it seems likely that in the Western languages the enclitic has persisted from OIA. times (or might have been due to the influence of the contiguous Iranian), and were at once the cause and the effect of the absence or rare use of the instrumental post-position. Grierson derives all the affixes of the past verb in Bengali etc. (equally with those in other languages) from pronouns. But in some cases at least, they were merely extensions of the affixes of the present or radical tense. Bengali, Assamese and Oriyā, again, show a development distinct from Maithili, Magahi and Bhōjpuriyā within the Magadhan family.

Except in the 3 sg., there is no distinction in Bengali-Assamese in the affixes of the intransitive and transitive verbs past tense. In Oriyā, the same affixes, sg. « -ā », pl. « -ē » are found for the verbs of both the kinds.

The affixes may now be discussed.

#### [II] AFFIXES FOR THE PAST TENSE.

701. MB. and NB. forms are given below. The affixes are added to the base in इ॒॑ « -il- » of which the « -i- » is dropped in most NB. dialects after influencing the preceding vowel.

*First Person* : অ < -*s* >; ই < -i >; উম, উঙ, উঁ ( কুম, কুঁ > *u* ), ওম, অম, ঙ, ওহঁ, আহঁ, ওহো, আহো, ও < -um, -uŋ, -ū ( -lum, -lū > -nu), -ōm, -ām, -ō, -ōhō, -āhō, -ōhō, -āhō, -ō >; আম, আঙ, এম < -ām, -āŋ, -ēm >;

*Second Person:* অ «-ଅ »; ই «-ି »; ইସ, ଏସି, ଏସ «-is, -esi, -esି »;  
ଉ «-ି »; ଆ, ଆହା «-ା, -ାହା »; ଏ, ଏଁ, ଏହେ «-େ, -େ, -ଏହେ »;

*Third Person*: no affix, simply ending in -ইল् -il<sup>ɸ</sup>; অ(ও) <-অ, (-ও)>, for both transitive and intransitive verbs; আ <-আ>; এ <-এ> for transitive verbs only, dialectally; আক, ওক, এক <-আ-ক<sup>ɸ</sup>, -ও-ক<sup>ɸ</sup>, -এ-ক<sup>ɸ</sup>->, for both transitive and intransitive verbs; besides অন্তি, আন্তি, অন্ত, আন্ত, এন্ত, এন, আইন, আঞ্জি, আঁই <-ান্তি, -ান্তি, -ান্তা, -ান্তা, -েন্তা, -েন<sup>ɸ</sup>, -াঙ্গি, -ান্নি, -াঁই>, honorific.

Standard NB., literary and colloquial, recognises only the following :—

*First Person*: আম «-ām», colloquially also এম, উম «-ēm, -um», and in poetry occasionally নু «-nu»;

*Second Person*: non-honorific, **ই** « -i »; ordinary, **এ** « -ē »; poetical **আ** « -ā »; honorific **ঞ** « -ēñ » (with **আপনি** « āpani »);

*Third Person* : ଅ «-କୁ» ; ଏକ «*ēka*» (rather archaic) ; ଏ «-େ» dialectally for transitive verbs ; poetical ଅ «-ାକୁ» ; besides honorific ଏନ୍ «-ଏନ୍ଗୁ».

## (1) THE AFFIXES FOR THE FIRST PERSON PAST.

**702.** The affix अ « -ā ». This is the simple base form, and is found in MB. and OB.: आमि चलिल  $\leftarrow$  āmi cālilā  $\rightarrow$  I went, आमि, मूहि राखिल  $\leftarrow$  āmi, mui rākhilā  $\rightarrow$  I kept; cf. OB. Caryā 35 « maī bujhila  $\rightarrow$  I understood (see *supra*, p. 808). The source of this इल « -ilā » is Māgadhi Ap. « -illaa, -illawa (< -ila-ka) », MB. « -ilā, -ilā », in NB. pronunciation often इले « -ilō, -lō ». This simple base is not found in NB., although it is common in eMB., becoming less common in lMB., and found but infrequently in post-17th century MB. As indicated above, the absence of affix means preservation of the OIA. conditions.

In OB., the « -ila » base had a feminine for « -ili, -ili », according as the subject of an intransitive verb or the object of a transitive one was feminine. Early MB. carried on this feminine affixation, but it has died out from eMB. times. Examples have been given above, p. 958.

**703.** The affix **ই** « -i ». This is now confined to the dialects of West Rācha, and to 'S.-W. Bengali,' and in any case is regarded vulgar. It was fairly common in MB. It seems originally to have been a (West) Rāqha form. Although used for both singular and plural, the evidence of Oṛiyā shows it to have been originally singular : Oṛiyā « mū āsil-i », pl. « āmbhē āsil-ū » *I came, we came*; « mū dēkhil-i, āmbhē dēkhil-ū » *I saw, we saw*. The affix seems only to be an extension of the present (singular) « -i » to the past tense (*supra*, pp. 934, 935).

**704.** The affixes উম্, উড়, উ ( লুম, লু > লু ) ওম্, অম্, উঁ, ওহঁ, আহঁ, ওহো, আহো, ও « -um, -uঃ, -ū, ( -lum, -lū > -nu ), -ōm, -ām, -ōঃ, -āhō, -ōhō, -ōঃ, -ō ». These form one group, and in their formation, two affixes seem to have converged : the « -ō » of the present (=OB. -āwa < MIA. -ama < OIA. -āmaḥ: *supra*, pp. 934-935), and the old first personal pronoun nominative « \* haū, hāu » as in OB. (pp. 807-808 *supra*) agglutinated to the past base ( in « -ilā, -ilā » ); « \* haū » seems to have been added to the present base (see *supra*, p. 934), and an extension of it to the past was a matter of course. Of the fuller forms, ইলাহঁ « -ilā-hō » occurs in eMB. (as in the ŠKK.), and ইলোহঁ « -ilō-hō » is found in the Early Assamese; and this and \* ইলহঁ « -ilā-hō » seems also to have occurred in MB. and the other forms, with loss of nasalisation, are found in MB. and Early Assamese. As can be expected, « \* haū > hō » as the nominative pronoun should occur with the intransitive verb; and that is what we find from eMB. In the ŠKK., the ইলাহঁ « -(ilā-)hō » form occurs with six verbs, all intransitive : আছিলাহঁ « āchilāhō » *I was*, আইলাহঁ, আয়িলাহঁ « āilāhō, āyilāhō » *I came*, জিলাহঁ « jilāhō » *I lived*, পড়িলাহঁ « pārilāhō » *I fell*, বাঢ়িলাহঁ « bārhilāhō » *I increased*, হয়িলাহঁ, হৈলাহঁ « hāyilāhō, hāilāhō » *I was* (to which we may add a seventh intransitive form showing « -hō », although in a different tense—মরিতাহঁ « māritāhō » *I would die*): Kṛtti-vāsa similarly has তপস্যা করিল আমি নহিলাহঁ অমর « tāpasyā kārilā āmi, nāhilāhō āmārō » *I performed austerities, but did not become immortal* ('Uttarā-kāṇḍa,' p. 29); নিমজ্জনে গেলাহঁ « nimjñetrānē gēlāhō » *I went to an invitation* (*ibid.*, p. 15); also হইলাহঁ « hāilāhō » (pp. 26, 30, 36). MB. « jilāhō, pārilāhō » etc. would thus agree with Skt. « jīvitō' ham, patitō'ham ».

The ŠKK. uses « -ᳫ » (at times « -ᳪ » by dropping the nasalisation) with both transitive and intransitive verbs. This apparent complay of the full « -hᳫ » form with intransitives only was not maintained in Assamese: in the Early Assamese of the 15th and 16th centuries, we find it employed with transitive verbs also—*e.g.*, Dēvēndra Nāth Bēz-baruwā, ‘Asamiyā Bhāṣā Ārū Sāhityar Burañjī,’ Jorhat, Saka 1533, pp. 75, 173, « kārilōhᳫ » *I did*, p. 89, « lābhilōhᳫ, pārhilōhᳫ » *I received, I studied*, p. 138, « cīnilōhᳫ » *I recognised*, p. 169, « bulilōhᳫ » *I said*. In Early Maithili, the corresponding « hū » form seems to be restricted to the intransitive: *e.g.*, Vidyāpati has « bhēlihu » *I was*, « mōñē eukalihu » *I ceased*, « achalihū » *I was*, « gēlihu » *I went*, etc. (Pada 63); but in later Maithili, « -hū » is found for both the kinds of verbs. It has apparently become « -ū » in Magahi. From the 14th century, the « -hᳫ » and the « -ᳫ » forms had merged together, and the former occurs in the ŠKK. as a survival only (*e.g.*, for one « āchilāhᳫ » there are some six cases of « āchilō »; « āilō » occurs 11 times beside « ā(y)ilāhᳫ » 9 times, and other intransitive verbs show only the « -ᳫ » form). The Oriyā « -ū » of the plural seems to represent the « -ᳫ (<-āmah>) ». The OB. « acchilē » (see *supra*, p. 808) seems to be scribe’s error for « āchila », or it might be for « āchilō »; in the latter case, the affixation for the past in imitation of the present could be said to have begun from OB. times.

The form « -ilāhᳫ » thus converged into « -ilō », but « -ilāhᳫ » could also give « -ilāwō », and these would easily result in the MB. and NB. forms « -ilū, -ilunj, ilum, -ilōm, -ilām, -inu » etc., since in MB. « m » final and intervocal interchanges with « ū », written ঃ « য »; and MB. forms like « -ilō, -ilū » could develop the off-glide « ū » (-ilōw, -ilūw), which would easily resolve into « m ».

**705.** The affixes আম, আঙ, এম « -ām, -āŋ, -ēm ». It is not unlikely that « -ām » has partly evolved from « -āhᳫ » as above ( -ilāhᳫ > -ilāwō, -ilāw > ilāŋ, -il-ām). But this « -ām » should rather be affiliated to আমি « -āmi » *I (we)*, affixed to the past base, for this reason that in all the spoken dialects, where « -ām » occurs, the « -m » is retained intact, and there is no trace of a nasalised form « \*-ilā » or « \*-inā » such as

we might expect to be present in MB. or NB. if  $\leftarrow * -ilāw < -ilāhō \rightarrow$  were the only source.

By Vowel Harmony,  $\leftarrow .ilām \rightarrow$  gives  $\leftarrow .ilēm \rightarrow$ , which is regarded as a refined form, and is frequently used in literature and formal discourse.

**706.** A plausible etymology for the  $\leftarrow .āmi, -ām \rightarrow$  affix would be the OIA. substantive verb  $\leftarrow asmi \rightarrow$ : the use of the passive participle with  $\leftarrow asmi \rightarrow$  in the active sense is found in MIA. and medieval Skt. (e.g.,  $\leftarrow vidiṭō'smi, vismṛtō'smi \rightarrow$  etc.: cf. E. J. Rapson, 'Specimens of the Kharoṣṭhī Inscriptions discovered by Dr. Stein at Niya in Chinese Turkestan: Tentative Transcriptions and Translations,' British Museum, 1903, p. 7). The Sinhalese past tense is formed on the same plan by affixing forms of  $\leftarrow \checkmark as \rightarrow$ , present tense, to the passive participle (Geiger, 'Litteratur u. Sprache der Sinhalesen,' § 60). The same method seems to occur in the Bengali perfect tenses (see *infra*, 'Compound or Periphrastic Tenses'). But  $\leftarrow asmi \rightarrow$  does not occur as  $\leftarrow āmi \rightarrow$  either in Bengali or in other Magadhan: the equivalents of  $\leftarrow asmi \rightarrow$  in Bengali are  $\leftarrow āchi \rightarrow$  (\**acchāmi*) and  $\leftarrow hāi \rightarrow$  (\**asāmi*). A source like  $\leftarrow paṭhita + asmi \rightarrow$  is untenable for the NB.  $\leftarrow paṭilām \rightarrow$ , not only because of the non-continuance of OIA.  $\leftarrow asti, asi, asmi \rightarrow$  in Bengali, but also because of the fact that personal affixation is late in the language, and is either pronominal, or is by analogical extension of affixes from the present.

Hoernle explained the  $\leftarrow .ām \rightarrow$  affix as being the Skt.  $\leftarrow .āmi \rightarrow$ , present sg. affix: according to him, Bengali has preserved the original present indicative termination  $\leftarrow .āmi \rightarrow$ , in forms like  $\leftarrow pār(h)ilām \rightarrow = Māgadhi \leftarrow *paḍhidāmi \rightarrow$ . But this derivation is inadmissible: MIA.  $\leftarrow -d- \rightarrow$  does not become  $\leftarrow -l- \rightarrow$  in Bengali (see *supra*, p. 433), and  $\leftarrow -m- \rightarrow$  intervocal of OIA. occurs in NIA. only as the nasalisation of the contiguous vowel.

#### (2) THE AFFIXES FOR THE SECOND PERSON, PAST.

**707.** The affix  $\leftarrow -ā \rightarrow$  is the simple base form without any personal termination, found in MB. for the 2nd person as much as for the other two persons, but is now obsolete.

The affix  $\tilde{\text{E}}$  « -i » is of obscure origin. It occurs with the past in « -il- » and in the future in « -ib- ». It is not found in the radical tense and with the past conditional. Bengali-Assamese alone among Magadhan speeches has it. The fact that it is contemptuous, being used with the familiar « tui (tōrā) » form of the 2nd personal pronoun, shows that it was originally a singular affix. The corresponding affix in Oriyā is « -u », e.g., « tu thil-u » *thou wert*, « tu dēkhil-u » *thou didst see*. The Central Magadhan languages have confused the plural and singular; but it seems that the 2 pers. affix « -ē » in Magahī (as in « hal-ē » *thou wert* or *you were*, « dēkhal-ē » *thou didst see* or *you saw*, beside « halē, dēkhal-ē »; Maithili does not possess the « -ē » form, but the nasalised one only) and in Bhōjpuriyā (as in « dēkhal-ē, dēkhal-as » singular, « dēkhalāh < \*dēkhalahu » plural) is connected with the Bengali « -i », it being exceedingly probable that the « -ē » was formerly « -a-i » (cf. Maithili « dēkhalāf » beside « dēkhalē, 2 personal forms).

There is the other singular 2 personal affix « -is, -s » (see p. 979 below) with which the « -i » cannot be connected. In the absence of any other indication as to its source, it can only be referred to the 2 sg. imperative in « -hi, -a-hi » (see *supra*, p. 904), which would give « -i, -aī (-ai, -ē) » by loss of « -h ». The Oriyā « -u » similarly can be best explained as the 2 sg. imperative in « -hu » (*supra*, p. 906). This « -hi » lost its original function as an imperative affix, and became associated, first, it would seem, with the future base, and then with the past: we should note that « -i » is the only 2 personal contemptuous or singular affix for the future, whereas « -is » may be used for the past; and « -i » is not found with the past habitual (« cālib-i, dib-i », but « chil-is » beside commoner « chil-i », and « cālit-is, dit-is »; but we never find « cālib-is, dib-is »): this apparently shows that « -i » became first definitely attached to the future base, and then it was extended to the past; and the use of the future and the imperative should be taken into consideration in this connexion. There is an « -ahi » affix (< OIA. -asi) for the 2 sg. present tense in Western Apabhrāṇa, whence the imperative « -ē, -āi » affix in the Western languages, e.g., Hindostānī « tū kar-ē » Gujarātī « tū

**kar-ē** », and **Mārwāṛi** « **t(h)ū kar-ā᷍** » (< **tū kar-ahi**) ; but this present « -ahi » apparently did not occur in **Māg.** Ap., and is not represented in Bengali, which has only « -as, -is » < « -asi ».

**708.** The affixes **ইস**, **এসি**, **এস** « -is, -ēsi, -ēs » are contemptuous in sense, being used with « tui, tōrā », and were consequently originally singular. They represent the OIA. « -asi » which is preserved in the radical tense. The affix « -asi » has been partly extended to the past base, but the future did not take it up, apparently deciding for the « -hi > -i » from the imperative. The forms « -is » etc. are exceedingly rare with the past tense in NB., the employ of it with the « -il- » past being only occasional. MB. instances also are rare. In NB. it may be used with the past of «  $\sqrt{āch}$  » *to be*, as **ছিলিস** « chil-is » *thou wert*, both by itself as well as in the past progressive and perfect tenses, e.g., **যাচ্ছিলিস** « jācchilis » *thou wert going*, **গিয়েছিলিস** « giyēchilis » *thou hadst gone*, **দিয়েছিলিস** « diyēchilis » *thou hadst given*; but the « chil-i » form would be preferred. We may similarly occasionally hear **নিলিস**, **দিলিস** « nil-is, dil-is », but such forms would not be regarded as normal in the Standard Colloquial. It seems that analogy tried to attach « -is » to the past base, but has failed so far, although apparently this analogical use began early. We have thus in **Kṛtivāsa** ('Uttarā-kāṇḍa,' VSPd. ed., col. 124) **তুমি লুকাইলিস ডরে** « brāhmaṇ-bādhā kāriyā tumi lukāilis dārē » *killing a Brahman, you hid in fear* (here we see the improper use of « tumi », instead of « tui », with an « -is » form). I have not found « -is » with the past in the ŠKK., but apparently there is one case in the **Caryās**, e.g., **Caryā** 37, « jaīsanē acchilēsa taīchana (= taīsana) aceha » = ? *as thou wert, so be thou*; in **Caryā** 39, we have « bangē jāā nilēsi parē bhāgēla tōhāra binānā » *thy science (vijñāna) fled away after thou didst take a wife in Varṇga*: here « nilē si » may be either an « -ēsi » form, or it is « nilē » (conjunctive in « -ilē ») + « si » emphatic particle, as in **Caryā** 20—« jaubāṇa mōra bhai�ē si pūrā » *on my youth being mature*. The « -ēsi » would thus seem to have been attached to the past as early as OB. The vocalism in « -ēsi, -ēsa » seems to be due to a combination of the base form in « -a » + « -isi » (see p. 935): « \* acchilla-isi > \* āchilais(i) > āchilēs(a) ».

709. Grierson explained the « -i » as an instrumental pronominal enclitic: « mār-il-i » = *struck-by-thee* (*karmani prayōga*), « cal-il-i » *gone-by-thee* (*bhāvē prayōga*); and the « -is » was explained by him (as an affix for the past habitual derived from the present participle) as being ‘the direct pronominal suffix for the nominative’—« -s- » and « -i » being respectively nominative and oblique forms of a second personal pronoun (JRAS., 1895, I, p. 371). There cannot be any question of a 2nd personal pronoun in « -s- » from the existing specimens of IA., and Grierson considered this « -s- » (as in Bengali « -is » in « mār-it-is » etc.) ‘as a termination borrowed either from the first or the third person,’ but at the same time the possibility of « -is » being the OIA. « -asi » is admitted by him (*op. cit.*, p. 374). The « -s- » form of the first person occurs in Lahndā and Sindhlī, and in the Dardic Kaśmīrī: it is a singular form, if derived from OIA. « asmad »; but the whole question is rendered extremely problematical (*op. cit.*, p. 365 for the « -s- » for the 1st person). The use of the 3rd person « -s- » (< Prakrit « sē » *his*, which is an enclitic: Grierson, *op. cit.*, p. 347) for the 2nd pers. is hardly more satisfactory as an explanation. The well-known « -asi » which has survived in the radical sense should not therefore be ignored. And as for regarding « -i » as an oblique form of the 2nd personal pronoun, and referring it to the MIA. « bhē » or « uyhē » (JASB., 1895, p. 374, p. 346), there is this great difficulty that in Bengali-Assamese, which alone preserves the « -i », the form is contemptuous and as such cannot originally have been a plural suffix, whereas the MIA. « bhē, uyhē » are definitely plural ones.

710. The affix শ « -u » is found dialectally in ‘South-West Bengali’ and in North Central Bengali, and is distinctly of Oriyā affinity: ৈক্ষু « kāilu » *thou didst do*, গেলু = গেলু « gyālu = gēl-u » *thou didst go*, etc. It is singular in origin, and can only be referred to the imperative in « -hu, -u » (see above, p. 906). It is found in the present also, e.g., আছু « āchu » *thou art*.

711. The affixes আ, আহা « -ā, -āhā » were originally plural, being used with « tumi (*tōmārā*) », the old plural of the 2nd person, and never

with « tui ». They seem to be the same affix as the « -aha » of the radical 2nd plural (see *supra*, p. 935). The past base to which this 2nd person pl. affix was added (in Bengali-Assamese) apparently was extended by the definitive « -ā » : « calilā + -aha » \* cālilāhā, cālilāhā, \* calilāhā (cf. « khāhā, jāhā » for the imperatives: *supra*, pp. 903, 907). The « -ā » might, again, be simply the base in definitive « -ā », without the personal termination « -āhā ». The « -āhā » form occurs in eMB. (SKK.) and in Early Assamese side by side with « -āhā, -ā ». Late MB. has only « -ā »; and as a result of Vowel Harmony, through influence of the « -i » of « -il- », this « -ā » can be altered to « -ē » in NB., as in the Standard Colloquial চ'ল্লে < cōllē > < « calilā » you went (*supra*, pp. 400-401). Among SKK. forms in « -āhā » may be quoted আছিলাহা < āchilāhā > you were, গেলাহা < gēlāhā > you went, পড়িলাহা < pārlāhā > you fell, হয়িলাহা < hāyilāhā > you became; cf. imperative ওলাহা < olāhā > beside ওলাহ < olāhā > take down, *not* down. In Modern Assamese, the affix is « -ā », honorific; and Oriyā has retained it as « -ā (< -āhā »). Cf. Maithili simple form for 2nd person past « dēkhalāh < dēkhalahū >, and Bhōjpuriyā « dēkhalahū >, where we have the « -ahu » form as in the imperative.

712. The MB. forms এ, এঁ, এইঁ, « -ē, -ē, -ēhē » make one group. Judging from the SKK., the nasalised form « -ē » is the proper one for this affix, and this is only shortened from the older and fuller « -ēhē ». In the SKK., it is either « -ēhē », or « -ē » : and it is rarely « -ē » without the nasalisation: thus আণিলেঁ, আণিলেহঁ < āṇilē, āṇilēhē > you brought, এভিলেহঁ < ērilēhē > you abandoned, কইলেঁ < kālēhē > you did, করারিলেঁ < kārāyilē > you caused to make, গঢ়িলেঁ < gāṛhilē > you built, নিলেহঁ < nilēhē > you took, সাধিলেহঁ < sādhilēhē > you performed, চাহিলেঁ < cāhilē > you looked at, etc. No instance of « -ē, -ehē » with intransitive verbs occurs in the SKK.: originally it was probably used with transitive verbs. « -ēhē > -ē > -ē » is thus its development in NB. (Of course, in NB. the « -ē » can also be from « -ilā » by Vowel Harmony; see preceding paragraph.) This affix is unknown to Assamese and Oriyā. But Maithili « -ē, -ai », Magahi « -ē, -ahī » (< dēkhalē, dēkhalaī; dēkhalē, dēkhalahī >) seem to be the same affix.

The source of this « -ēhē, -ē, -ē » is obscure. The full form being « -ēhē », connexion with the Prakrit enclitic 2nd pers. pl. « -bhē, -uyhē » as suggested by Grierson (JASB., 1895, pp. 374, 346) is not impossible, but « bhē, uyhē » are otherwise unknown. It is a politer form than the « -i, -is » ones, both in MB. and NB. Is it that here we have the instrumental of the respectful or polite form for the pronoun of address « ahā, ahaī », which is still current in Maithili? (see *supra*, pp. 850-852). The fact of « -ēhē, -ē > -ē » not being found with intransitive verbs in the SKK. should be recalled: « ānilēhē » can therefore very well be from MIA. « \*āṇilla- » + « \*ahāhī, \*ahēhī » = instrumental pl. of « ahā- » (= OIA. āṇita-la- + āyuṣmadbhīḥ).

### [3] THE AFFIXES FOR THE THIRD PERSON, PAST.

**713.** The oldest Bengali had three forms for the passive participle as used with the pronoun third person or with the noun: « -ila (< -illa) », the simple base without any affix; « -ilāwā, -ilaa (< -illa-a, i.e., -illa- + -ka) », with an extension by the pleonastic « -ka > -a » (*supra*, pp. 652-653); and « -ilā (< -ila + -ā) », strengthened by the definitive « -ā » (*supra*, pp. 658 ff.). The NB. equivalents of these are respectively, ইল, ইল, (ইলা), ইলা « -ilā, -ilā (-ilō: MB. -ilā), -ilā ». All the three are found: « -ilā » is dialectal, occurring in North Bengali and North Central Bengali (with both transitive and intransitive verbs), as well as in Eastern Vanga dialects (Sylhet, Kachar, Mayang, Chittagong and Chakma, where « -ilā » seems to be preferred with intransitive verbs); « -ilā » is also restricted to the intransitive verb in Modern Assamese; « -ilā » is found in the « sādhu-bhāṣā » and in the East Bengal dialects with both transitives and intransitives, and in the Standard Colloquial with intransitive verbs (see *supra*, p. 974); while « -ilā » is now archaic and poetic for NB., and is found commonly in MB. and in Early Assamese, and in Oriyā « -ilā » is the only form in which this affix occurs for the 3rd person singular (« -ilā » however, occurs in Eastern Vanga, in Mayang as honorific, i.e. plural).

All these three forms « -ila > -ilā ; -ilaa, -ilā > -ilā ; -ilā » lack a personal or pronominal termination and this colourless form was accepted for

the third person. Doubtless there were slight shades of difference between the three; « -ā » and « -ā » forms were possibly more emphatic. Also the base form without any affix, « -ila > -ilə », retained its old adjectival nature unmodified in connexion with intransitive verbs, and this distinction is largely maintained now. In the Caryās, we find both « -ila » (= « -ila » as well as « -ilaa, -ilawa ») and « -ilā » (see *supra*, p. 947).

**714.** The affix এ « -ē »: occurs in West Bengali (including the Standard Colloquial), North Bengali and Assamese, with transitive verbs only: e.g., Standard Colloquial সে চল্ল, সে গেল, [je c̪ollo, je gælo] *he walked, he went*, North Bengali চলিল, গেল [tsolil, gel], Assamese « si calil, si gal », but for *he gare, he ate*, we have Standard Coll. সে দিলে, খেলে [je dile, khele], North Bengali দিলে, খাইলে, খালে [dile, khaile, khale] besides দিল, খাইল [dil, khail], and Assamese « dilē, khälē ». The Bihāri dialects show a similar differentiation (see *supra*, p. 93). No such differentiation between intransitive and transitive verbs is found in the East Bengal dialects, in which typical forms would be [tsollo, tsøllo; gælo] and [dilo, khailo], or as in Chittagongese [tsolil, gel] and [dilo, khailo].

The restriction of the « -ilē » affix to the transitive verb past tense in a continuous tract embracing Rādhā, Varēndra and Kāma-rūpa, and excluding Vanga (E. and S.-W.) and Cāṭṭala (S.-E. Vanga), is noteworthy: equally noteworthy is the occurrence of the « -ila > -ilə » for the intransitive in Varēndra (partially), in Kāma-rūpa, and in E. Vanga and Cāṭṭala. The « -ē » affix occurs in the future 3rd person (-ib-ē) for all verbs, in the both « sādhu-bhāṣā » and in the Standard Colloquial, but not in East Bengal dialects, in Assamese, in Oriyā, which use the « -ā » (-ibā, -bā). The usage in the future does not help us here.

The explanation seems to be as follows. The intransitive past is in its origin a verbal adjective qualifying the subject: here no special verbal suffix was necessary, for the adjectival nature remained long with intransitive, right down to eMB. (see *supr.*, p. 958,—the feminine adjectival « -i » continued to be used with both the kinds of roots). Hence the simple « -ila > -ilə », or « -ilaa > -ilā > -ilā, -ilō », was enough for it. But the

transitive past was not like that, and its nature developed into that of a proper verb with an object. So too the future form, both transitive and intransitive, partook more of the nature of the verb. In some of the dialects of the Bengali group, an affix gradually came to be attached to these. And that affix we find in NB. as « -ē » for both transitive past, and transitive and intransitive future.

The « -ē » was never a literary favourite in MB., the simple « -ā » or « -ā » base being commonly employed for the past third person. The composite « sādhu-bhāṣā » here followed the MB. preference for « -ā » in the past tense, but not in the future. But nevertheless, the « -ē » is found in MB. works—in the ŠKK., for instance. Thus, as 3 personal forms, we find in the ŠKK., for *he did*, কৈলে « kāile, kāilē » 4 times, করিলে « kārilē » once (= NB. Standard Coll. ক'র্লে, ক'ল্লে [korle, kolle]), while কইল, কয়িল « kā(y)ilā » occurs 17 times and করিল « kārilā » 6 times (= NB. ক'র্ল, ক'ল্ল [korlo, kollo]); for *he received*, পাইলে « pāilē » (= NB. পেলে [pele]) occurs once, but পাইল « pāilā » (= NB. পেল [pelo]) 7 times; for *he sent*, পাঠাইলে, পাঠায়িলে « pāthā(y)ilē » (= NB. পাঠালে, [pāthale]) 3 times, পাঠাইল, পাঠায়িল « pāthā(y)ilā » (= NB. পাঠাল [pāthalo]) 4 times; for *he said*, বইলে « builē » (cf. NB. ব'ল্লে [bolle]) once, বুয়িল, বুয়িল « bu(y)ilā » (cf. NB. ব'ল্ল [bollo]) 28 times; for *he gave* দিলে « dilē » once, দিল « dilā » 10 times; for *he took*, নিলে « nilē » 5 times, নিল « nilā » 6 times, and আণিলে « āṇilē » *he brought* is found once. The « -ē » for the 3rd person thus goes back to the 14th century. It is not, however found in the Caryās.

This « -ē » affix I take to be the « -ē » of the radical or present tense, 3rd person, extended to the past transitive base: দেখিল « dēkhilā » *seen*, *he saw* changed to দেখিলে « dēkhil-ē », NB. দেখলে « dēkhl-ē », on the analogy of দেখে « dēkh-ē » *he sees*; but an intransitive form like গেল « gēlā » = *gone*, fem. গেলি « gēli », sufficiently retained its adjectival nature not to require a verbal affix. We should note that the plural affix « -ānti, -āntā, -entā » was similarly extended to the past verb, as an honorific form merely (see *supra*): « -ē » was the characteristic 3rd pers. affix, and the plural as an honorific form was less frequent. This

extension of the « -ē, -ānti » etc. was accomplished possibly during the transition from OB. to eMB.: it was established by the end of the 14th century, and if the ŠKK. does not use it exclusively, it is because the literary speech tends to preserve the older tradition (in keeping to the older, unaffixed « -ā » form).

A partial agreement with Maithili may be noted. In Maithili, in the honorific, the transitive past base takes the affix « -thi » (< -anti) of the present honorific (= original plural), because its nature is that of a verb: « dēkhala-thi » *saw*. But the intransitive past base (with its adjectival nature) to denote the honorific takes the affix « -āh(a) » which is found with nouns and adjectives in Early Maithili: « sūtal-āh(a) » *slept*. (This « -āha » is very common in the 'Varna-ratnākara' MS., see *supra*, pp. 102-103: it seems to be the Māg. Ap. genitive in « -āha » extended to form the plural, like « -rā » of Bengali, « -kā » of Bhōjpuriyā).

In the Standard Colloquial, some intransitive verbs are seen to employ the « -ē » affix, in apparent contradiction to the rule that it is confined to transitives only: thus নাচলে « nāclē » *he danced*, কান্দলে « kāndlē » *he wept*, হাঁটলে « hāṭlē » *he walked*, খাট্টলে « khāṭlē » *he laboured* (but খাট্টল « khāṭlā » *it fitted*). Cases like these can be explained as a phonetic development out of « -ilā » forms of MB. — < « nācilā, kāndilā, hāṇtilā, khāṭilā » etc. (see *supra*, pp. 400-401): but the proper explanation is that these verbs are really transitives with cognate objects like নাচ, নাচি, নাচন « nāc, nācā, nācāng », কান্দ, কান্দা, কান্দন « kādā, kānnā, kādāng » etc. understood and sometimes expressed. The « -ē » is thus never extended to intransitives in the dialects in which it is employed. On the other hand, through the influence of the « sādhu-bhāṣā » and of East Bengal dialects, the « -ā » form is now being used at times by Standard Colloquial speakers with the transitive also—*e.g.*, পেল, খেল, দেখল, দিল « pēlā, khēlā, dēkhłā, dilā » *he obtained, ate, saw, gave*, beside the proper « -ē » forms.

The credit of first noticing the difference between the intransitive and transitive past bases in Bengali as well as of suggesting explanations belongs to Grierson (JASB., 1895, pp. 366, 374, 350; LSI., V, I, 1903, p. 13, foot-note; cf. also 'Prabāsi' for 1329, Pausa, pp. 382 ff.). In

the JASB. article, a form like মারিলেক « māril-ē-(k<sub>4</sub>) » *he killed* Grierson sought to explain (on the analogy of Maithili forms with affixed object and subject pronouns) as being from « \*māril-ai-ka », being either < « \*māril-āya-ka » = *killed-this(object)-by-him*, where « āya » was the (Western) Apabhrañśa equivalent of Skt. « idam », and « ka » was a third personal pronoun with instrumental power having affinities in Kaśmīrī ; or < « \*māril-ahahī-ka » = *killed-that(object)-by-him*, where « ahahī » was the oblique of « aha », the (Western) Apabhrañśa equivalent of Skt. « adas ». But there is nothing in MB. and OB. to warrant such derivations. We have the « -ēka » affix with intransitive verbs from the eMB. period. Grierson formulated another explanation in the LSI. : খালে « khālē » *he ate* = « khāil& » *eaten* + « -hi » *by him, by them*. But this « -hi » as an enclitic instrumental pronoun cannot be otherwise assumed from MB. and OB.

715. The « -k<sub>4</sub> » affix in the forms অক, ওক, এক « -āk<sub>4</sub>, -ōk<sub>4</sub>, -ēk<sub>4</sub> » in the past tense is pleonastic : possibly it was polite or honorific in Early Bengali. This is discussed below, under 'Pleonastic Affixes,' pp. 989 ff.

716. The honorific forms —অস্তি, আস্তি, অস্ত, আস্ত, এস্ত, « -ānti, -āntā, -āntā, -ēntā » and এন, আইন, আঞ্জি, আই, « -ēn<sub>4</sub>, -āñg<sub>4</sub>, -āñi, -āñi » have been extended from the present tense by adding to the past base in « -ilā ilā ». As has been explained before, they form two groups—the verbal « -anti » and the nominal « -āna, -ana, -ān-i, -an-i », the latter having ousted the former (see *supra*, p. 936). In the eMB. of the ŠKK., we find the verbal « -nt- » forms only : কাহিলান্ত « kārhilānta » *took off*, চাহিলান্ত « cāhilānta » *looked at*, গেলান্ত « gēlānti » *went*, কহিলান্ত, কহিলেন্ত « kāhilānta, kāhileñta » *said*, etc. ; and there are no « -n(i), -ñi » forms, which came in later. Early Assamese has « -āntā » — « thāilāntā, bhāilāntā » *was (were)*, « kāilāntā » *did*, etc. Maithili and Magahi also have « -thi (< -anti) » (*supra*, p. 937) : but in Maithili « -thi » occurs only with transitive verbs (Maithili « dēkhala-thi », but « calal-āh<sub>4</sub> », whereas Magahi has both « dēkhala-thi, calala-thi »).

In later MB., « -nt- » and « -n- » occur side by side in the texts. « -ēntā, -āntā » are the common affixes in Chuṭī Khān's 'Mahābhārata' (VSPd. ed.) : and « -ēn<sub>4</sub> » is already well-established in Kṛttivāsa. The

nominal « -n- » form may thus be said to have successfully invaded the domain of the verb in the 15th century. In the 'Padmā-purāṇa of Vañśī-dāsa (17th century: Maimansing), « -śī (< -āni) » is almost the rule for the past third person honorific : e.g., p. 43, পুলস্ত্য কহিলাই « Pulāstyā kahilāī » *P. said*; p. 71, কহিলাই মেনকাসুন্দরী « kahilāī Mēnakā-sundarī » ; p. 98, ব্ৰহ্মা চলি আইলাই « Brāhmā cāli āilāī » *B. came away*; p. 109, ধৰিলাই « dhārilāī » *caught*; p. 185, দিলাই « dilāī » *gave*; p. 194, বলিলাই « bālilāī » *said*; p. 196, ভাবিলাই « bhābilāī » *thought*. The « -āni, -āñi, -śī » form is still current for the honorific in E. Vanga.

The nominal « -n- » figures in Bhōjpuriyā (e.g. « rahal-an » *was, were* = Bengali রহিলেন « rāhil-ēn় », « dekhāl-an, dekhāl-ani » *saw* = Bengali দেখিলেন « dēkhil-ēn় »). In Assamese « dēkhilā-hāk » *you saw*, « dēkhilō-hāk » *we saw*, the affix « -hāk » is found with the 2nd and 1st person to form the plural, and this also is undoubtedly the nominal « -na, -nha » with pleonastic « -ka ». In Maithili and Magahi, the nominal « -nh- » is added to the verb, but commonly with a dative-accusative (and not nominative-instrumental, or simple plural) force : e.g., Maithili « dēkhathi » *he* (honorific) *sees* (< they see), but « dēkhathi-nhi » (honorific) *he sees* (< they see) *them* (i.e. a respected person), and « dēkhiai-nhi » *sees them* > *sees a respected person* : and so with the past tense—« dēkhalaṭ-thi » *beside* « dēkhalaṭ-nhi » (here active « -nhi » as an equivalent of « -thi »), « dēkhalaṭ-k-ai » (object), « dēkhalaṭ-thi-nhi » (object). In the intransitive, « -nhi » is used for the indirect object only. So Magahi « dēkhalaṭ-thi », « dēkhalaṭ-thi-n » (object « -n- »). Oriyā too adds the plural affix (found with the noun) to the past and future bases of the verb, but it is not « -n- » of the genitive, but « -ē- » < « -ahi » of the instrumental (see *supra*, p. 724) : e.g., sg. « dēkhilā », pl. « dēkhil-ē » *saw*; sg. « hōilā », pl. « hōil-ē » *were*.

### [III] THE AFFIXES FOR THE FUTURE TENSE.

These are exactly on the lines of the past, and detailed treatment is not necessary.

717. The forms for the First Person in MB. and NB. are : এ (ও), ওহোঁ, ওঁ, (যৌ, যঁ > যু, যঁ, ও), আম « -ା (-ō), -ōhō, -ୟ (-b-ୟ, -b-ୟ > -mu, -m,

-ং = ৰ), -ାମ ». The base in « -ା » —ইବ « -ିବ-ା » —occurs in OB. and MB. (including the ŠKK.), and has been adopted as the « sādhu-bhāṣā » form, without any personal affix. In the ŠKK., « -୦ » is the affix for the first person, and « -ାହ୍ତ୍, -୰ହ୍ତ୍ » do not occur there; but the « -ହ୍ତ୍ » forms may be attested for eMB. from Early Assamese « hāibō-hō, dibō-hō » beside « hāibō, dibō » (= New Assamese « hām, dim ») *I shall be, I shall give.* The eMB. « -୦ » may have been also the result of « -ାଷା, -ାମା ». In any case, it would seem to have extended from the past; and in the past, already in the 14th century, « -ିଲା-ହ୍ତ୍, -ିଲୋ-ହ୍ତ୍ » had given « -ିଲ-୦ ». The Early MB. « -୦ » lost its nasalisation through confusion with the base in « -ା », and the Standard Colloquial « -୦ » (-bō), is commonly written ৰ « -ବା » following the « sādhu-bhāṣā » spelling. The « -ମ-, -ଙ୍- » forms have been noted before (p. 967). The affix « -ାମ » is found in Maimansing, and is evidently the same form as in the past (see *supra*, pp. 976-977).

718. The affixes for the Second Person are (in addition to the base form অ « -ା » in MB. and OB.): ই « -ି » contemptuous or familiar; উ « -ି » contemptuous and familiar, in MB.; এ, এଁ, এହେ « -େ, -ୟେ, -ୟହେ » polite, of which the shortened form « -େ » alone occurs in NB.; and আ, আହା « -ା, -ାହା » polite and ordinary (besides এନ୍ « -େନ୍ଦ୍ରୀ » with আପନି « ଆପନୀ » honorific, from 3rd person).

Of these, « -ି » and « -ି » are the same as in the past tense (pp. 978-980). « -ୟହେ » is found in the ŠKK., e.g., উঠিবেহେ « uṭhibēhē » *you will rise*, করিবেহେ « kāribēhē » *you will do*, কুষিবেহେ « ruśibēhē » *you will be angry*, etc.; also the contracted « -ୟେ » and the denasalised « -େ » are found there; and in the same work « -ିବ୍ହେ » occurs as a contracted « -ିଭ୍ହେ » in বহିতେ « bāhibhē » *you will carry* (p. 175). This « -ୟହେ, -ୟେ, -େ » has also apparently been extended from the past. So, too, « -ା, -ାହା », also polite forms. « -ା » is found in MB.—চলিবা, করিবা « cālibā, kāribā »; and this « -ା » might by Vowel Harmony give the Standard Colloquial চ'লবେ, ক'রବେ [kolbe, korbe]. These last two forms (-ା, -ାହା) are not found in the ŠKK., but the « -ାହା » can be attested from Early Assamese: e.g., « kāribāhā » (as in p. 852 *supra*). The « -ା » affix is now quite common in East Bengal dialects: the Standard Colloquial prefers « -େ ».

**719.** The affixes for the Third Person are : অ < -ା > (< -aa,-ା) the base, in OB. and MB. (found at the present day in East Bengali and in Modern Assamese); এ < -େ >, in the < sādhu-bhāṣā > and in the Standard Coll. (= same as the < -ē > of the 3rd person past : some influence of the < -ē > in the 3rd person sigmatic future of eMB.— < -hē > —described before at p. 965—is very likely here : < -ibē > is found in the ŠKK., in both transitive and intransitive verbs, and also in Early Assamese); and the honorific অষ্ট, এষ্ট, এন, আঞ্জি, অঞ্জি etc. < -ānt̄, -ēnt̄, -ēn#, -āñi, -āñi >, as in the past tense. Besides, there is the affix এক < -ēk̄ > with pleonastic < -ka >, found in the ŠKK. and in Early Assamese, and also in the NB. < sādhu-bhāṣā > and in West Rādha dialects : this is discussed below.

#### [IV] THE AFFIXES FOR THE CONDITIONAL OR HABITUAL PAST.

**720.** They also agree with those for the other two participial tenses. There are some restrictions : for the 1st person, ই < -i > does not occur ; for the 2nd person contemptuous (= old singular), ইস < -is > is used, and never (or rarely in some dialects) ই < -i > or উ < -u > ; and for the 3rd person, similarly, এ < -ē > is not found.

#### [H] PLEONASTIC AFFIXES.

##### [I] THE PLEONASTIC AFFIX < -KA >.

**721.** The pleonastic affixes added to the tense forms are noteworthy in Bengali as in the other Magadhan languages. The most common of these affixes is < -ka >.

In NB., the forms for the 1st person are free from the pleonastic affix, at least it is not added directly to the verb ; but it is added to the 2nd person past and future (ordinary, with < tumi >), and to non-honorific 3rd person past and future (and in some dialects to the 3rd person past habitual), as well as 3rd person imperative, and but rarely to the 2nd person imperative : e.g., তুমি দিলেক, দিলাক, দিবেক, চ'লবেক < tumi dil-ek#, dil-āk#, dibē-k#, cā'lbe-k# > (never, however, < tui dibi-k#, cā'libi-k# > ; সে দিলেক, চ'লনেক, দিবেক, চ'লবেক < sē dilē-k#, cā'llē-k#, dibē-k#, cā'lbe-k# > ; সে দিক, চলুক < sē di-k# (< diu-k#), cālu-k# > . Except in the case of 3rd person

imperative, the use of « *kā* » is regarded as archaic in the « *sādhu-bhāṣā* » and is to a great extent dialectal in Bengali.

Of the present-day dialects, that of West Rādha has a marked preference for the « *-ka* », commonly in the third person: and it is found also in North Bengali (which has a special employ with the 2nd person polite imperative = original passive?: e.g., আথেক « *dyākhēkā* < *dēkhē-ka* = ? \* *dēkhiai* + *ka* », p. 130, LSI., V, I; so রাখেক « *rākhēkā* < ? \* *rākhiai* + *ka* », p. 179, ibid; also cf. p. 216, in Hajong dialect: see *supra*, p. 918), in Mayang (where it seems to occur as « *-gā* »), and in Chittagong (in the Chakma dialect, rather rarely). It is found pretty frequently in MB., from the ŠKK. downwards, generally with the third person, occasionally with the second, and very rarely with the first. Already in the ŠKK. we have forms like ধরিলেক « *dhārilēkā* » *caught*, চাহিলেক « *cāhilēkā* » *looked*, হিফিলেক « *hiphilēkā* » *cast*, নহিবেক « *nāhibēkā* » *will not be*, করিবেক « *kāribēkā* » *will do*, লৈবেক « *lāibēkā* » *will take*, etc. In the ŠKK., it is noteworthy that the « *-ka* » has also been found with the 1st person future and with the 3rd person present—this sort of use with the first and third person is not noticed ordinarily: thus ŠKK. নির্বোক « *nibō-kā* » *I shall take* (p. 287), and পোড়েক « *pōrē-kā* » *burns* (p. 110). In the NB. Standard Colloquial, however « *-ka* » may be used with negatives in all persons and tenses as a detached word, without any special force, unless it be of some sort of finality: e.g., দেবো না ক' « *dēbō-nā-kā* » *I shan't give*, সে দিলে না ক' « *sē dilē-nā-kā*, *dēy-ni-kā* » *he didn't give*, তুমি দিও না ক' « *tumi diō nā kā* » *you won't give*, নাইক' = নাহি-ক' « *nāi kā* < *nāhi-kā* » *is not, are not*; in cases like the above, the negative phrase may be taken as one group-word to which the affix is added.

The « *-ka* » for the 3rd person imperative is already well-established in the ŠKK., although the older form without the affix is still equally common (see *supra*, pp. 903, 907).

The « *-ka* » is absent in the Caryās as a verbal affix.

722. Of the other Magadhan Languages, Bhōjpuriyā alone seems not to employ it with the past and future bases. It is fairly common in Early Oriyā, specially with the past in the 3rd person (sg. « *-ilā-kā* »,

pl. and sg. honorific « -ilē-kā »): but Oriyā never used it with the 3rd person imperative. The « -ka » affix for the verb, however, has fallen into disuse in Modern Oriyā. So, too, Early Assamese shows as much preference for the « -ka » as Bengali; e.g., 'Ādi-caritra,' p. 3, « bhāilēkā » beside « bhāilā » was; p. 7, « bōlāntōkā » they say, « thākāntōkā » they are; p. 9, « thākibēkā » they will be, « bulibēkā » they will say; p. 20, « nā-hi-k-āntā » they are not; p. 28, « nā-hi-k-ay » is not; p. 36, « thāilēkā » was; p. 43 « yōgāilēkā » supplied, etc., and elsewhere « nu-hi-k-ō » I am not (cf. Standard Coll. Bengali নইক' = নহিক' « nā(h)i-kā » I am not, নাইক' « nā(h)i-kā » he is not). All this usage is curtailed in Modern Assamese, where we find the « -ka » only with the 3rd person imperative, as in Bengali: e.g., « kār-ō-kā » let him do. The unstableness of the « -ka » in Oriyā and Assamese is, remarkable: and it is almost equally unstable in MB. and NB., being commonly attached to the imperative only.

The « -ka » features also in Central Magadhan. Its use in Magahi is rather restricted, it being found only in the 3rd person past both transitive and intransitive. The root « √ha » to be in Magahi also occurs as « √ha-k », for all the three persons. But in Maithili « -ka » has a greater importance. It is added to the 3rd person of the simple past tense of the transitive verb (« dēkhala-k » beside poetic or earlier « dēkhala » he saw), where it apparently refers to the subject; but in the 1st, 2nd and 3rd persons, it can be added pleonastically where the verb-form takes the pronominal affixes referring to the non-honorific object: e.g., 1st person: « dēkhal-i, dēkhala-hū, dēkhalā » I saw (simple form), « dēkhal-i-ai, dēkhal-i-a(h)u; dēkhal-ai, dēkhal-a(h)u » saw (with affixed « -ai, ahu » referring to the object in the 3rd and 2nd persons); and optionally, the latter group can have « -ka », as « dēkhal-i-ai-k, dēkhal-i-au-k; dēkhal-ai-k, dēkhal-au-k »; so 2nd person « dēkhal-āh » beside « dēkhal-ahā-k »; and 3rd person « dēkhala-k » he saw (simple), « dēkhal-k-ai, dēkhal-k-au » (with object pronoun « -ai, -au »), beside optionally « dēkhalā-k-ai-k, dēkhal-k-au-k » (in which two « -k- » affixes occur: the first « ka » refers apparently to the 3rd person subject, and the second « ka » is simply pleonastic). Early Maithili as in literature does not show these curious extensions

the form for the 3rd person was simply in « -ala »—« dēkhala », and not « \*dēkhala-ka », as in Modern Maithili. This we find in the old poetry, in Vidyāpati, in the ‘Varṇa-ratnākara.’ The affixation of the pleonastic « -ka » etc. thus developed along independent lines in Maithili.

723. The usage in MB. and NB. and in Maithili shows that the « -ka » is not restricted to a single person: it is found with all the three. We have a very popular pleonastic « -ka » affix in Bengali with other parts of speech also: we find it with nouns (*e.g.*, plural affixes গুলাক *>* gulā-k<sub>2</sub> *>* beside গুলা *>* gulā, আদিক *>* দিগ *>* -ādi-k<sub>2</sub> *>* -di-g<sub>2</sub> *>* beside আদি *>* di *>* -ādi *>* -di, একটুক *>* ēk<sub>2</sub>-tu-k<sub>2</sub> *>* a little beside একটু *>* ēk<sub>2</sub>-tu ; etc.), and dialectally it is found with conjunctions (*e.g.*, কিন্তুক for কিন্তু *>* kintu-k<sub>2</sub> = kintu *>* in North Bengali). This « -ka » is always handy to give a point, a supposed elegance to a form in the speech of the uneducated classes in many dialectal areas: we see that in the case of learned Sanskrit words. The pleonastic « -ka » with verb forms appears to be the same affix noted under ‘Formative Affixes,’ No. 36 (pp. 682-683). It came specially to be associated with the 3rd person past and future in Bengali because there was no prominent affix for these finite verb forms—nothing comparable with the « -ahō, -ō, -ām » etc. of the first person, or with « -is, -āhā, -ēhā » of the second. Sometimes it was thought to be quite a polite form too. The same apparently was the reason for the other Magadhan speeches: and if Maithili restricted it to the transitive past 3rd person (*e.g.*, « dēkhala » beside « calal »), it was because the past intransitive still retained a great deal of the original adjectival nature.

The link vowel of the pleonastic « -ka » in the 3rd person already occurs as « -ē » (and not « -ā » or « -ɔ ») in the ŠKK. In the future, the 3 pers. affix was « -ē », and « -k<sub>2</sub> » was simply added to it. In the past, it was apparently the transitive verbs in « -ē » in the 3rd person that first took up the « -ka » (we should compare with the state of things in Maithili in this matter): in the few instances of « -il-ē-ka » that we find in the ŠKK., there is no case of an intransitive verb. From the transitive it was apparently extended, as « -ē-ka », to the intransitive forms from the 15th century onwards.

**724.** Grierson, basing his observations on the modern Maithili use of « -ka » for the 3rd person past of the transitive verb, explained this « -ka » both as an instrumental pronoun referring to the subject (*e.g.*, « dēkhal-k-ai » *seen + by him* [k] + *object* [ai]), and as a nominative pronoun (*e.g.*, « dēkhal-i-au-k » = *seen + by me* [i] + *for you* [au] + *he* [k]: JASB., 1895, p. 350). But an *ensemble* view of the whole question would certainly connect other facts with what we see in Maithili, and make the simple explanation of the « ka » as the pleonastic affix as the more likely one, rather than regarding it as a problematic 3rd personal pronoun « -ka ». Grierson found support in postulating the 3rd personal pronoun « -k- » from the Assamese forms « bōpāi » *my father*, « bāpā » *your father*, and « bāp-ē-k » *his father*: but another explanation may be suggested for these forms: « -āi (bōp-āi) » may be compared with the affix of endearment found in Bengali personal names (for which see *supra*, 'Formative Affixes,' No. 9, p. 662); « -ā (bāp-ā) » for the 2nd person is an affix of respect, such as we find in the Assamese 2nd personal forms of the verb; and « -k (bāp-ē-k) » is just the pleonastic affix, perhaps originally added as a polite form, to the naked word « bāp ».

Among other NIA. speeches, the Jaipurī form of Rājasthānī has a fondness for this pleonastic « -ka » which can be compared with the Magadhan usage (LSI., IX, II, p. 35).

**725.** The « -ka » affix has had a very important place among the affixes of IA. Already in OIA., from post-Vedic times, this affix was employed with a variety of forces (cf. Franklin Edgerton, 'The *k*-suffixes of Indo-Iranian,' Part I, Leipzig, 1911). It seems to have been re-introduced in MIA., evidently through the influence of a large percentage of the Skt. *tss.* and *ssts.* which showed it. The pleonastic use of it has been exhaustively noted by Pāṇini. We find that the « -ka » could be used in Skt. pleonastically, or with a sense of contempt, pity, littleness, or unfamiliarity, in connexion with all sorts of forms—inflected pronouns and inflected verbs (mainly 3rd pers. sg.), as well as indeclinables, in addition to noun bases (cf. Pāṇini, V, iii, 71-78, 85, 86): *e.g.*, the instances given by the grammarians,

« uecāiḥ : uecakaiḥ ; śanaiḥ : śanakaiḥ ; tvayā : tvayakā ; yuvayōḥ : yuvakayōḥ ; yuṣmāsu : yuṣmakāsu ; jalpati : jalpataki ; pacati : pacataki ; pāti : pātaki ; svapiti : svapitaki ; ēhi : ēhaki » ; etc. It is not unlikely that a revived « -ka,-kka » should develop in MIA. and NIA. a similar employ as a pleonastic.

[II] THE PLEONASTIC AFFIX « -RA ».

726. An affix « -ra » occurs in dialectal NB. and in MB. In NB. this is found in West Rāchā (e.g., in the Sarākī dialect of Ranchi) in connexion with the conjunctive in « -i(y)ā » : e.g., ধাইআৱ « jāiār় = jāiā-r় » *having gone*, খাইআৱ « khāiā-r় » *having eaten*, উঠিআৱ « uṭhiyā-r় » *having risen* (LSI., V, I, pp. 88, 89); it is found also in the dialects of East Vanga—in Sylhet, Kachar and Mayang dialects, in Tipperah, Noakhali and Chittagong. The usage in East Vajga is more extensive: the « -ra » occurs not only with the conjunctive, e.g., Chittagong দিয়াৰে, কৰিয়াৰে, আইয়াৰে « diyā-r-ē, kāriyā-r-ē, aīyā-r-ē » *on having given, on having done, on having come*, Mayang « ēilā-rā » *on having come*, but also with the present (radical) and the past conditional (< present participle) tenses, to indicate continuous or progressive action: e.g., E. Sylhet যাইয়াৱ, যাইত্বাম « jāiyā-r়, jāit-r-ām, jāi-r-ām » *I go, I am going* (beside যাইতেছি « jaitechi » as in Standard Bengali); কৰ্ত্তা « kār̥t-r-ā » *is or are doing*; যাইত্বাম « jāit-rā-y » *you are going* (beside যাইতেছ « jaitechā »); হয়ৰ « hāyā-r় » *is happening*; and Mayang « pait-rā » *are getting*, « jā-r-gā » *he goes*, « tumi-te āho-r-ai (= aīsa-r-āy) » *you are coming*, « sōre dākāite hin kōrtā-r-ā » *thieves and robbers are making destitute*, « āmi kākuti kōriyā-r » *we pray*, « bāpōk gum jā-r » *the father sleeps*, « tā huōr rākhe-r » *he tends swine*, « bōk pāiyā mōring-kōrau-r-i » *I am dying of hunger*, etc., etc. (LSI., V, I, pp. 419 ff.); Chittagong কৰিৱ beside কৰি « kāri-r়, kāri » *I (we) do*, কৰৱৰ beside কৰন্দ « kārā-r়, kārās » *you do*, কৰেৱৰ beside কৰে « kārē-r়, kārē » *he does, they do*, খাইৱ, খাই « khāi-r়, khāi » *I eat*, খাওৱ « khāo-r় » *you eat*, খাইৱ, খাই « khāyér়, khā-r় » *he eats*, আই উয়াসে মৰিৱ « āi uāsē māri-r় » *I am dying through starvation*, আই তো়াৱ খেজমৎ কৰিয়ৱ « āi tōār় khézmāt kāriyér় » *I am doing service for you*, etc.; and Chakma « mārāñ-ār় » *I am dying*, « gārāñ-ār় » *I am doing*, « bhābē-r় » *he is thinking*, etc.

The MB. examples are all found in the ŠKK., and the « -ra » there occurs, not with the conjunctive, but with the finite tense forms—present, past and future, as well as imperative: thus: p. 39, আছের « āchē-rā » *is*; p. 195, শোভের « sōbhē-rā » *is beautiful*; p. 69, বাস্তের « bājē-rā » *sounds*; p. 152, গেলির « gēli-rā » *it went* (=gēlā-rā?); p. 2, চিন্তির « cinti-rā » *he deliberated* (non-l past in « -i »: *supra*, p. 947); p. 50, বেঢ়িলের « bēṛhilē-rā » *it surrounded*; pp. 50, 193, 279, দিবৌর « dibō-rā » *I shall give*; p. 84, হৈবের « hāibē-rā » *it will be*; p. 334, কহিআরে « kāhiā-r-ō » *let me narrate*; p. 11, কহিআর « kāhiā-r-ā » *do tell*; p. 72, খাওয়ার « khāā-r-ā » *do eat*; pp. 16, 115, 319, 336, 394 দিআর « diā-rā » *do give*; p. 38, দিআক « diā-r-u » *let him give*. In the imperative forms, the base seems to be the non-l passive participle in « -iā », to which « -rā » is added, and the whole is treated as a base to which the personal suffixes are attached. Cf. the Sylhet and Mayang forms, and the Chittagong idiom তুই দিয়াতে মুই দিয়া « tui diyā-r-ē mui diyā » *on your giving, I would give, or if you have given, then I have given also* (VSPdP., 1326, p. 251).

727. The fact of this « -ra » occurring in the two extreme dialect areas of Bengali—in Early West Bengali, in modern dialectal West Bengali, and in modern extreme Eastern and South-Eastern Bengali—would suggest that it was a common Bengali affix, but its development has been localised in certain tracts. It seems to occur sporadically in other dialects also in MB.: e.g., Vijaya-gupta's 'Padmā-purāṇa' (Barisal), খুপের ধোয়া দিয়াতে বাসিত করে কেশ « dhūpēṛa dhōḍā diyārē bāsita kārē kēṣ » *perfumes hair with incense smoke* (VSP., p. 186).

The « -ra » affix apparently occurs in other NIA., outside Bengal and the Magadhan area. We find it in Rājasthānī (e.g., Mārwāṛi « hūya-r, whē-r » *having become beside* « hūy-naī, hō, hō-kar, whētō-kṣnaī », « māra-r » *having struck beside* « mār-kar, mār-naī, mārū-naī »; Central Rājasthānī, Jaipuri etc., « whai-r, hō-r » *having become*, « māra-r » *having struck*; Mēwāṭī « hō-r, mār-ar »), where the affix « -ra » is added to the conjunctive participle; we find it in Pahāṛī, e.g., Khas-kurā « gārē-ra » *haring done*, « bhayē-ra » *having been* (where the « -ra » has been explained as a conjunction meaning *and*, which is added to the oblique form of the passive

participle), beside the « -i » conjunctive « gari, bhai » *having done, having been* (LSI., IX, IV, p. 36); Sirmauri « khāy-rō » *having eaten* (where « -rō » seems to be a post-position: LSI., ibid., p. 465); also « -rō » in other Pahāṛī dialects (LSI., ibid., pp. 570, 602).

The etymology of the Bengali « -ra » is puzzling, and probably the source is not one, but many. In the NB. conjunctives, whether of West Rāḍha or of S.-E. Vāṅga, it can very well be post-positional in origin, from « pāṛṭ, pār-ē » *after*, used in an adverbial sense. We have Modern Bengali instances like W. Rāḍha শারে বাদে « jāyē bādē » *after having gone* (where « bādē » *after* is the Perso-Arabic « ba'd ») = Standard Colloquial গিয়ে পর « giyē pāṛṭ » : Cf. Haijong dialect (Maimansing) উঠিয়ামি « uthiyā-mi » *after getting up*, দেখিয়ামি « dēkhiyā-mi » *on seeing* where « -mi » is the locative affix (see *supra*, p. 751); we can also compare Marāṭhī « uthilyā-var » *on having risen*, « sōdilyā-var » *on having left*, where « var=par ». The « -ra » in Khas-kurā, explained by Grierson as meaning *and* (< apara), can similarly be a postpositional form. In the present forms, in Bengali, the « -ra » can very well be the conjunction « āra, āara, aara < apara » *and* : « karē-rā » *does and=does, continues to do, is doing*. So, too, in the MB. past and future. But the addition of it to a verbal base, and then tagging on personal suffixes to it (as in the MB. imperative 1. « kāhiā-r-ō », 2. « kāhiā-r-ā », 3. « diā-r-u » and in NB. of E. Sylhet 1. « jāit-r-ām, jāi-r-ām », 2. « jāit-r-āy », 3. « jāit-r-ā », and Mayang 2. « āho-r-ai », 3. « kōrtā-r-ā ») is a unique phenomenon. I would suggest that here the « -r- » is the contracted form of « √kār », and the affix is simply the verbal auxiliary added on to the root : « kāhiārō < \*kāhiā + karō » = « kāthitān karōmi » *I make it described, for* « kāthayāmi » *I describe it*; « diāru < \*diyā + karu » = « dattān karōtu » for « dadātu » : « jāit-r-ām = \*jāita + karō, \*karām » (Bengali « √kār » + affix « -āmi ») = *going I do = I go on, I am going*; and a form like « jāi-r-ām » or « āhō-r-āi » shows a combination of a regular conjugation in the present + the « -r- < √kār » and personal affixes combined. The genitive affix « kara > -āṛṭ » implying connexion may also have something to do with it.

## [III] THE PLEONASTIC AFFIX &lt;-LI&gt; OF MB.

728. The affix **লি** <-li> occurs in the ŠKK. less than half a dozen times with the future or precative imperative : *e.g.*, করিহলি <kārihāli> *you will do*; দিহলি <dihāli> *you will give*; গাও গড়াহলি <gāgārāhāli> *you will roll (your) body*; চলিহলি <cālihāli> *you will go*. An equivalent of this affix has not been found in any NB. dialect Bhōjpuriyā among Magadhan speeches has an <-l-> form which is added to the old present (or radical) tense to form a present definite or future (LSI., V, II, p. 52). In some of the Rājasthānī dialects, in Marāthī, in Khas-kurā, and in Gaṛhwālī and Kumānū (Central Pahārī), the future is also expressed by an <-l-> form.

The MB. <-li>, occurring as it does with an original future form to strengthen its force, seems to be equally a future-indicating suffix, as in the other NIA. speeches, and to be identical with that. Various derivations of this <-l-> suffix have been suggested (*cf.* Beames, 'Comp. Gramm.', II, p. 163; Bhāṇḍārkar, 'Wilson Lectures,' p. 272; Hoernle, 'Gauḍian Grammar,' §§ 501, 509; Bloch, 'Langue Marathe,' p. 241). The derivation suggested by Bloch for this suffix seems to be the most likely one : it is the passive participle of a Prakrit root <lē> *to take* (corresponding to the Skt. <√ lā> : *cf.* similar alternation between Prakrit and NIA. <√ dē> and Skt. <√ dā>), such as we find, for instance, in Hindostānī <li-ā>, in Brajbhākā <li-nau>, in dialectal Bengali লিলে <li-l-ē> (=in Standard Bengali নিলে <ni-lē> with merging of নী <√ nī> and লহ <√ lāh <√ labh> in it). This <\* li (a)> li would seem to be added pleonastically, and in MB. it is used in both genders. *Cf.* similar future use of <gā, gau (< gata )> in Western Hindi (and in Maithili).

## [IV] THE PLEONASTIC AFFIX &lt; KHAN &gt; OR &lt; KHUN &gt;.

729. The colloquial of Calcutta and the surrounding districts uses the word খন <-khān> or খুন <-khun>, or অখন, অখুন <-akhān>, <-akhun> after vowels, pleonastically with all persons in the past and future tenses : *e.g.*, যাবো-(অ)খন, দিলুম-খুন, হবে-(অ)খুন <jābō-(ଅ)khun>,

dilum-khunq, bâbē-(q)khunq ▷ *I shall go, I (we) gave, it will be.* There is just a suggestion of the finality or instantaneous completion of the action : here the force of the OIA. « kṣāṇa » *instant*, its source, is preserved. Its origin has been given *supra*, p. 857, under ‘Adverbs of Time in अम् < khāṇq ».’ It seems to occur also in Magadhi, in forms like « kailṣkai-khan » *did*, « kahalṣkai-khan » *said*, « chōṛalṣkai-khan » *gave up*, « chōṛaulṣkai-khan » *caused to give up*, « ailai-khan » *came*, besides « kariai-khan » *I do, I shall do*, etc. (as in the ‘Gospel of St. Mark, in Magadhi,’ Calcutta, 1890 : a form which does not occur in Grierson).

In dialectal Bengali (Khulna, Jessore, etc.), this form has been reduced to « nē » (< &nē < &ñnē < &ñhñē [əxəne], =ākhñē) with the future only : দেবোনে « dēbō-nē » *I shall give*, যাবানে « jābā-nē » [zabane] *you will go*, etc.

#### [V] THE PLEONASTIC AFFIX ‘-TĀ’

**730.** The Mayang dialect apparently uses a pleonastic affix « tā » : thus, « eil-tā » *he came* « eilā-tā » *they have come*, « peilāng-tā » *I got*, « koraurī-tā » *I am making* « ose-tā, āse-tā » *is, beside* « eil » *he came*, « dekhilo » *he saw*, « nā-peil-gā » *did not get*, « korauri » *I do*, « āse » *is*, etc. This « -tā » is found with nouns and pronouns also (LSI., V, I, pp. 419 ff.).

Mayang does not distinguish between cerebrals and dentals, as much Assamese, and this « -tā » can well represent a cerebral « -tā ». This « -tā » apparently is the ‘Enclitic Definitive’ noted at pp. 780-781, and at p. 686. Its use with verbs is not noticed elsewhere in Bengali, but it seems to be present in Oriyā as « -ti », especially in Early Oriyā : e.g., « tu jibu-ti » *will you go ?* (cf. LSI., V, II, p. 381, Expletive Additions) : Early Oriyā, ‘Dhruva-caritra’ (Contai ed., p. 16) « pāibā-ṭi kāhi » *where will one get it ?*; ‘Bhāgavata, Vastra-harana’ p. 8, « nārākē pāribā-ṭi jāi » *will fall in hell*; ‘Rukmiṇī-harana,’ p. 3, « sē dhārmē bāñcā-ṭi-ki sukhē » *live happily in that dharma* (cf. Oriyā « tīkē » = Bengali একটু, টুকু « ēk-ṭu, -tu-k̤ », p. 780); ‘Rāsa-līlā,’ p. 8, « āmbhārā pūrilā-ṭi kāla » *my time is over ; etc.*

## [VI] THE PLEONASTIC AFFIX &lt;-DA&gt;.

731. In the OB., the two forms « gāī-*da* » *sang* and « sanāīda » *signified* occur (Caryā 2). They represent OIA. causative passive participles « gāpitam » and « samjñāpitam » + the pleonastic affix « -ta > -da » = « -ra » in NIA. (=Formative Affix No. 46, pp. 689 ff., *supra*). Use of this pleonastic affix for verb-forms is known in other NIA., although this figures no longer in that connexion in Bengali (of Rājasthānī dialects, LSI., IX, II, pp. 30, 59).

## [I] THE PARTICIPLES.

## [I] THE PRESENT PARTICIPLE.

732. The present participle occurs in Bengali in two forms: in the base-form in অস্ত  $\langle\text{-}āntā\rangle$ , and in the locative in ইতে  $\langle\text{-itē}\rangle$ . It represents the OIA. active present participle in « -ant- » (the « satr » of the Indian grammarians). These have been discussed under 'Formative Affixes,' Nos. 3 and 28. Other instances of the « -āntā » form may be given: পড়া  $\langle\text{paṛ-āntā}\rangle$  *falling*, নিবন্ধ  $\langle\text{nib-āntā}\rangle$  *dying out* (*as a flame*), উঠা  $\langle\text{uṭh-āntā}\rangle$  *rising*, জ্বলা  $\langle\text{jwäl-āntā}\rangle$  *burning*, সাজা  $\langle\text{sāj-āntā}\rangle$  *fitting*, ফুটা  $\langle\text{phut-āntā}\rangle$  *blossoming*, *boiling (bubbling)*, অক্ষরা  $\langle\text{ā-phur-āntā}\rangle$  *unending*, etc. The affix « -āntā » is an archaic survival (doubtless a literary one, for Bengali, with the « -n- » fully retained: it ought to have been \*অঁ  $\langle\text{-āt-}\rangle$ : we actually find « -āt- » in some rare instances in MB.: e.g., VSP., p., 658, জীৱত  $\langle\text{jīvātā}\rangle$  *liring*. The participle as an attribute of the subject of a sentence, e.g., as in Hindostānī (cf. Platts, 'Hindustānī Grammar,' p. 332), is not found in Bengali. The Assamese equivalent is « -ōt- »: « kār-ōtā » *doer*, « cāl-ōtā » *walker*, « di-ōtā » *giver*, etc. Oriyā has a form in « -u, -ū » as in « kāru, kārū » (which is different in origin from the « -āntā » participle,) as the present participle absolute (see *supra*, p. 678). In Maithili, the affix occurs as « -ait », fem. « -ait-i », in Magahi as « -ait, -at, -it » (feminine with « -i » added); and in Bhōjpuriyā the same forms as those of Magahi occur.

The absolute or attributive use of the « -āntā » participle is found only with one root in the Caryās: thus in 18, we have « jīvantē māsāḥ

(=mailē) nāhi bisēsō > *there is no difference between the living and the dead*, where it is instrumental ; also in 49, « jīvantē mailē nāhi biśeṣa » ; and in 23, « jīvantē bhelā bīhaṇi māēla » *died without having been a living one*, where it is apparently nominative. The form is also restricted in use in eMB., but a few instances are found : thus SKK., p. 256, जीवस्तु « jīvānta » *living*, p. 276, मारस्तु « mārānta » *one who strikes*.

733. The present participle in ইতে « -itē » represents the proper Bengali transformation of the MIA. « -anta » to « -ita. » —the native line of development in the language, represented in the Past Conditional or Habitual also. It is an inflected form—a locative absolute, and it indicates the condition under which an act is done. In dialectal Bengali, the uninflected form occurs either in forming the progressive tense (*e.g.*, কৃতাছে [kōrtāছে] < কৃতি + আছে \* kārit + āchē > in Maimansing Bengali), or to indicate either the simple participle, or when repeated a condition (*e.g.*, আসিং আসিৎ « āsit āsit » *while coming* in Manbhumi, Khāriā-ঢাহা dialect: LSI., V, I, pp. 93, 94). A locative of the present participle in « -it- » with the common postpositional affix for the locative case, *viz.*, ত « -t̪ » , seems to feature in the progressive tense in dialectal North Bengali: see *infra*, under ‘Compound or Periphrastic Tenses.’ By repeating the « -itē » form, continuity of the conditional or concurrent event is indicated: thus, আমি যাইতে সে আসিল « āmi jāitē sē āsilā » *on my going* (*lit. I going*), *he came* ; আমি যাইতে যাইতে সে আসিল « āmi jāitē jāitē sē āsilā » *while I was going, he came* ; আমি খাইতে খাইতে বলিব « āmi khāitē khāitē bālibā » *I shall narrate while eating* ; তার এমন ভাই থাকতে সে কষ্ট পায় « tārā ḍemāṅg bhāī thāktē sē kāṣṭa pāy » *with such a brother living, he suffers* ; সে নাচিতে নাচিতে আসে « sē nācītē nācītē āsē » *he comes dancing* ; গান গাইতে গাইতে স্নূতা কাটে « gāṅg gāitē gāitē sutā kātē » *spins while singing*, etc. The « -itē » form practically is in adverbial relation to the finite verb. This adverbial employ with an oblique form of the present participle is found in other NIA. speeches: *e.g.*, Early Assamese « -āntē » (fairly common); Oriyā « āntē », *e.g.*, (« kārāntē » *whilst doing*, also *on doing, about to do*: cf. « cālāntē mēdini kāmpāï » *the earth trembles while he walks*, as in Jagannātha-dāsa) ; Maithili « -itahī », (*e.g.*, « dekhitahī » *on seeing*) ; Hindostāni

« -tē » (see Platts, 'Hindustānī Grammar,' pp. 333, 335), e.g., « sārī rāt talaphṭē katī » *the whole night passed in restlessness* (lit. *I being agitated*), « dārtē dārtē māi pās giyā » *I approached (it) in great fear (fearing much)*, « ham gātē gātē sītī hāi » *we (fem.) keep singing while we stitch*: in all the above, the oblique form is a locative; but in Old Western Rājasthānī, the source of Gujarātī and Mārwānī, where also this adverbial participle occurs, and in Marāthī similarly, the oblique form seems to be an absolute plural genitive (Tessitori, 'Grammar of OWR.', § 124: but Jules Bloch and V.K. Rājawādē suggest the MIA. absolutive in « -tvā-nam, -ttānam » as in Pali and Ardha-māgadhi as the source of the Marāthī as well as Gujarātī « -tā »: 'Langue Marathe,' p. 260).

In the Caryās, the locative or adverbial participle occurs in a number of instances: e.g., « (15) jāntē, jāntē while going; (16) budantē while sinking; (20) biārantē while discussing, (23) paīsantē while entering; (30) suṇantē on hearing; (31) cāhantē cāhantē while seeing; (39) amiā āchāntē bisa gilēsi while there is nectar thou swallowest poison; (42) mūḍhā acchāntē lōa na pēkhai while he remains a fool a man does not see; dudha majhē laḍa naechāmtē dēkhai =? dūdha mājhē laḍa āchāntē na dēkhai he does not see the butter (fat) while it is the midst of the milk; (44) aṇa cāhantē aṇa biṇāthā while asking for the one, the other is destroyed; (50) jāgantē while keeping awake »; cf. also (6) « taraṅgantē = ? turāṁ gantē » *going quickly*; and « ghara acchāntē mā jāṅga banē », *supra*, p. 960.

MB. instances: ŠKK., p. 11, পাছে পাছে জাইতে পথ হারাইল আক্ষি « pāchē pāchē jāitē pāthā hārāilā āmbi » *I lost the way while going after (her)*; p. 15, বাহুত বলয়া শোভে পাঁএত ঝূপূৱ। চলিতে চলিতে তোৱ কুণ্ডুনু বাজে || « bāhu-tā bālāyā sōbhē, pāē-tā nupūrā: cālitē cālitē tōrā runu-jhunu bājē » *armlets grace (your) arms, on (your) feet anklets: while walking, these your (trinkets) tinkle*; p. 27, তাক দোঁঅরিতে মোৱ মনে বাঢ়ে তাপ « tākā sōāritē mōrā mānē bārhē tāpā » *sadness grows in my mind while I remember it all*; p. 355, যেবা কিছু দুখ দিলোঁ পার হৈতে নাএ « jēbā kichu dukhā dilō pārā hāitē nāē » *all the trouble I gave (thee) while crossing in the boat*;

ibid, না শুনিলোঁ। তোর বোল লওঁ। জাইতে পানী « nā śunilō tōrā bōlā lādā jāitē pāpū » *I did not listen to thy words while fetching water*; p. 376, চাহিতে চাহিতে পাইল আচর্ষিত « cāhitē cāhitē pāilā scāmbitā » *while seeking (looking for), found of a sudden*; etc., etc.; Kṛttivāsa, ‘Ayodhyā-kāṇḍa,’ p. 24, কান্দিতে কান্দিতে যান ভরত শক্রবন « kānditē kānditē jānḍa Bhāratā Śatrughāṇḍ » *Bharata and Śatrughna go weeping*; VSP., p. 709, নকুলক দেখস্তে সকল যাওয়া মরি « Nākulā-kā dēkhāntē sākālā jāyā māri » *all go dead while seeing N.*; ibid, p. 182, দহ চক্ষু থাকিতে « duī cākṣu thākitē » *while the two eyes exist*; etc., etc.

This adverbial or locative absolute present participle goes back to OIA., and occurs throughout the history of IA. : cf. Rig-Veda, I, 184, « uechāntyām usāsi » *at Dawn as it shines forth > when Dawn shines forth* (Macdonell, ‘Vedic Grammar for Students,’ § 205); see also *supra*, p. 959.

From MB. times, the adverbial present participle in « -itē » has been confused with the infinitive in « -itē », for which see *infra*, under ‘Verbal Nouns and Infinitives.’

### [II] THE PAST (PASSIVE) PARTICIPLE.

**734.** The Bengali Passive Participle comes from the OIA. « -(i)ta », fortified either by « -ā » or by « -il-, -ilā ». We have thus two types, the « -ā » type, and the « -il- » type, of which the latter is obsolete in the Standard Colloquial. They have been fully discussed under the ‘Past Tense,’ *supra*, pp. 940-959. In NB., the perfect tenses are made with a verb form in টৈয়া « -iyā » + the auxiliary substantive verb « আছ » (and « থাক »): করিয়াছি « kāriyā-chi » *I have done*, করিয়াছিলাম « kāriyā-chilām » *I had done*, করিয়া থাকিব « kāriyā thākibā » *I shall have done*. In Early Bengali, this « -iyā » occurs as ই « -i », and also as ইঁয়েঁ, ইঁঞ়েঁ, ইঁঞ্জ « -iā, -iyā, -iñā » etc.,—and the nasalised forms are still in use in West Bengali dialects.

This « -iyā » form is commonly explained as the conjunctive form = *having done*, but in the periphrastic combination of the tense, it is likely that it is the passive participle rather than the conjunctive indeclinable (see *infra*, under ‘Compound or Periphrastic Tenses’).

That the « -iyā, -i » form represents the Passive Participle also (in addition to the conjunctive) is seen from its adjectival or adverbial employ which has occasionally a present participial force : thus, মাঝে লক্ষ্মীর মূর্তি, হই পাশে দুই হাতী উঁড় উচ্চ করিয়া মাঝে লক্ষ্মীর মূর্তি, dui pāśe dui hāti śūr̥ ūeu kāriyā dārāiyā • in the middle the figure of Lakṣmī, on two sides two elephants standing with trunks raised high ; শিব নাচি নাচি বাস্তু সিব নাচি নাচি জায় • Śiva goes dancing ; Kṛttivāsa, 'Ayodhyā-kāṇḍa,' p. 20, কান্দিয়া কান্দিয়া রাণী আইল বাহির • kāndiyā kāndiyā rāṇī aīlā bāhir • the queen came out weeping : cf. কান্দিতে কান্দিতে যান ভরত শক্রবন at p. 1002. The transition in significance from the passive participle adjective to the active present participle can easily happen through intransitive verbs.

Causative and Denominative verbs form their passive participle in আন, আনে « -ānā, -ānō », which is discussed below under those verbs.

### [ J ] THE CONJUNCTIVES.

735. There are two Indeclinable Conjunctives, or Gerunds, in Bengali, one ending in ইয়া « -iyā » (> Standard Coll. এ « -ē » with mutation of preceding vowel), the other in ইলে « -ilē » (> Standard Coll. লে « -lē », with accompanying mutation through influence of the « -i- »). Both mean *having done*, or *having finished*: but « -iyā » indicates merely a *succession of actions or events* done by or with reference to the *same* subject, while « -ilē » implies a *condition or precedence in a succession of acts* performed by the same subject or by different subjects : e.g., আমি আসিয়া দেখিলাম « āmi āsiyā dēkhilām » *having come, I saw =I came and saw*; সে আসিলে (এলে) পরে আমি দেখিলাম « sē āsilē (elē) pārē āmi dēkhilām » *I saw after he came*; আমি সময় মত ফিরলে যেতে পারি « āmi sāmāyā-mātā phirlē jētē pāri »=I may go if I return in time; খেয়ে নাও, খেলে পর হাঁটতে পারবে « khēyē nāo, khēlē pār̥ hāttē pārbē » *eat (your fill), you will be able to walk if you eat (enough)*; আমি গেলে তুমি যেও « āmi gēlē tumi jēō » *you will go if I go (after I have gone)*; দিলে দেয় « dilē dēy » *gives when one gives him*, পেলে দেয় « pēlē dēy » *gives if he gets beside (পাইয়া) দেয়* « pēyā=pāiyā dēy » *gives after he gets, etc., etc.* There are other points of difference in the idiomatic use of these two forms (cf. Milne, 'Bengali Grammar,' pp. 180-189), but

the outstanding fact is that « -ilē » is conditional with reference to the same subject or different subjects, and « -iyā » is sequential with the same subject.

[ I ] THE CONJUNCTIVE OR ABSOLUTIVE IN ইলে « -ILĒ ».

736. The conjunctive in ইলে « -ilē » is based on the passive participle in « -il- », and it is occasionally an adjective and occasionally a noun, like the « -(i)ta- » participle in Sanskrit and also like its cognate « -al- » form in Bihārī. It is adjectival in character when it occurs absolutely with a noun or pronoun : e.g., রামে মারলেও ম'ববে, রাবণে মারলেও ম'ববে « Rāmē mārlē-ō mōrbē, Rābānē mārlē-ō mōrbē » *he (Kālanēmi) will die, whether Rāma kills him or Rāvaṇa*; আমি তাকে দিলে তবে সে বাঁচে « āmi tākē dilē tabē sē bācē » *he would live only if I give him*; and it is a verbal noun where it occurs with the genitive, e.g., আমার না দিলে কিছু আসে যাব না, কিন্তু তোমার দেওয়া চাই « āmārā nā dilē kichu āsē jāy nā, kintu tomārā dēwā cāi » *it doesn't matter (lit. nothing comes or goes) through my not giving, but you should give (lit. your giving is wanted)*; or where it forms an absolute clause word : e.g., দিলে হয় « dilē bāy » *it would be well to give, it won't be bad to give*, lit. *if there were a giving, it may be (good)*; cf. Standard Colloquial (dialectal) আমার আদেখলাম = \* আদেখিলাএ « āmārā adēkhlay < \* ā-dēkhil-ā-ē » *me not seeing, during my not seeing*.

« -ilē » is a locative form, and as a locative it has an absolute or conditional force. It can be compounded with other verbs in « -itē » and in « -iyā », to express, in the former case, a subjunctive or purposive gerund (e.g., করিতে গেলে « kāritē gēlē » *if one is do, when one is to do*, খাইতে দিলে « khāitē dilē » *when one gives to eat, if one is given to eat*), and, in the latter case, to denote a past conditional (e.g., খাইয়া গেল « khāiyā gēlē », *after one has eaten or after one has started to eat on, or, after one has finished eating*, দেখিয়া নিলে « dēkhiyā nilē » *after one has finished seeing, etc.*). Unlike the conjunctive in « -iyā », it cannot be repeated to indicate repetition or continuity : e.g., করিয়া করিয়া, ক'রে ক'রে « kāriyā-kāriyā, kōrē-kōrē » *having done again and again*, but not « kārilē-kārilē », the reason apparently being that as a past base « -ilē » is already perfective and final, and continuous or imperfect action cannot be well expressed by it. This

doubling of the « -iyā » or « -i » conjunctive is found OB., and also its equivalent form in MIA. and OIA. (e.g., saṁsmṛtya saṁsmṛtya, pītvā pītvā, etc.)

Instances of the conjunctive in « -ilē » from OB. and MB. : (Caryā 2) « rāti bhaīlē » *when it is night*; (5) « sāṅkama-ta caḍilē » *after getting upon the bridge*; (20) « -jaubaṇa mōra bhaīlē si pūrā ? as soon as my youth was mature ; ŠKK., p. 84, নাল গোপ শুনিলে হৈবের কোণ গতী « Nānda-gōpā śunilē bāibērā kōṇā gatī » *what will be the fate (then), when the cowherd Nanda hears?*; p. 98, তপত দুধ নালে ন পীয়ে, জুড়াইলে মোআদ তার « tāpata dudhā nālē nā piē, juṛālē sōādā tārā » *hot milk is not drunk through a straw, its taste (comes) when it is cooled*; p. 107, বল কইলে জানারিবো রাজা এ « bālā kālē jāṇāyibō rājāē » *shall make the king know if you use force*; p. 297, যে বুধি করিলে রহে আক্ষার জীবন « jē budhi kārilē rāhē āmhbārā jībānā » *by doing such contrivance by which my life can endure*; p. 299, হেন কাম করিলে নাসিবো তোর পাশে « hēnā kāmā kārilē nāsibō tōrā pāsē » *shan't come near you if you do such a thing*; etc. etc.

The conjunctive use of the locative form of the « -il- » base is found in other Eastern Magadhan : e.g., Oriyā « dēkhilē » *if one had seen, when one has seen*; Assamese « hāl-ē, hāl-āt » (= Bengali « hālē, \* hālē-tē »). In Maithili, Magahi and Bhōjpuriyā, the ablative of the verbal noun in « -al- » is used : e.g., Maithili « carī nahī bhēṭālā-sā » *through not getting fodder*, « ghumalā-sā ki lābh ahī » *what profit is there from wandering about* (Grierson, 'Maithili, Grammar,' p. 48 : the adjectival « -al- » is rather restricted in Maithili, see Grierson, pp. 113-114, and hence the locative absolute use of it is not found in Maithili, corresponding to Bengali এলে এলে « sē ēlē » *on his coming, etc.*); Bhōjpuriyā « parhalē, parhalē-sē » (Hoernle, 'Gauḍian Grammar,' § 488). With the locative use of the « -il- » participle in Bengali we may compare the Hindostāni oblique use of the past participle to denote a condition or sequence (see Platts, 'Hindustāni Grammar,' pp. 337-338 : e. g., kyū itnī rāt gayē tum āyē « why have you come at this late hour of the night, lit. when so much of the night is gone : =কেন এত রাত গেলে তুমি এলে « kēnā ētā rāt gēlē tumi ēlē » ), « pahar din eaṛhē, maī utrā » *when the sun had risen to one watch, I came down =বেলা এক পহর হ'লে « bēlā*

ākṣ pāhārā hōlē ». Compare also Marāṭhi « cālalyā-s », dative of the perfect participle in « -l- », = *having walked*.

The use of the passive participle locative, absolutely, with a noun or pronoun in the locative, to indicate the conjunctive, is found in OIA. and MIA.: e.g., « dṛṣṭē sūryē, punar api bhavān vāhavēd adūva-sēśam » (Mēgha-dūta) : « alē, lāa-sālaē haggē ; gōṇā małē (=mađē), aṇṇē kiñissām ; pavahaṇē bhaggē, avalam̄ gha.āiśśām ; tumaṇ małē (=mađē), avalē pavahaya-vāhakē huviśśadi » *I say, I am the king's brother-in-law ; if the oxen are killed, I shall buy others ; if the carriage is broken, I shall have another built ; if you die, then there will be another carriage-driver (Mrēchakaṭika) ; etc., etc.*

### | II] THE CONJUNCTIVE IN ॥ « -I », ইয়া « -iyā », ইয়ঁ ॥ « -iyā ».

737. In the « sādhu-bhāṣā », the gerund or conjunctive is formed by adding « -iyā » to the root : চলিয়া « cāl-iyā » *having gone*, রাখিয়া « rākh-iyā » *having kept* : in the Standard Colloquial, this « -iyā » is contracted to « -e », and there is mutation of the preceding vowel : ট'লে [c̪jole], রেখে [rekhe]. In MB., especially in West Bengal texts, « -iyā » also occurs in a nasalised form, side by side with the non-nasalised one, and this is written ইয়ঁ, ইয়া, এয়, ইয়ঁ ॥ « -iyā, -inā, -nā, -inā » etc. This nasalised form was a living one in some forms of West Bengali, and at the present day it occurs as (ই)ঝে, ইঝঁ ॥ « -(i)yē, -iyyā » [iš] in the West Rājha dialects. In addition to this « -iyā, -iyā », MB. (and the NB. language of poetry) has another form—in « -i »; e.g., চলি, রাখি « cāl-i, rākh-i ». The Caryās show all the three, as « -iā, -iā, -i (-i) » : thus, « -i, -I » : « (1) pāṇḍi *having spread*; (2) duhi *having milked*, cauri *having stolen*, thira kari *making steady*; (4) cāpi *having prssed*, cumbī *having kissed* (6) chāḍi *giving up*; (7) dēkhi *having seen*, gaī *having gone*; (9) paīsi *having entered*; (15) chāḍi ; (16) suni *having heard*; (21) uthi *having got up*; (22) raci raci *building again and again*; (26) dhuni dhuni *carding (cotton) again again* », etc., etc.; « -ia » : « (1) diṭa (=diđha) karia *making firm*, pucchia *questioning*; (5) phā(d) dia *splitting*; (10) bhañjia *breaking*; (15) bujia *having closed*; (39) nāśia *destroying* », etc.; « -iā » : « (2) dēkhaiā= ? dēkhiā *having seen*, bāhiā

*walking (<bearing>) ; (11) māriā having killed ; (12) tōdiā destroying, kariā having done ; (35) bhanīā having spoken ; (50) laiā having taken > ; and <-iā> : <(26) laiā having taken, (50) diā having given (= instrumental postposition)> ; etc.*

In South-East Bengali (Chittagong and Chakma dialects) there is an affix **নে <-nē>** (-iā-nē), or **নই <nāi>** (-i-nāi) which figures in connexion with the **<-iyā-i>** conjunctives : e.g., *আইয়ানে <aīyā-nē> having come, on coming* (Chittagong : LSI., V, I, p. 313), and **<jēi-nāi>** *having gone, <ēi-nāi> having come (=āisi-nāi), <jāgi-nāi> having kept awake, <hāi-nāi> having become, <di-nāi> having given, <dēi-nāi> having seen (=dēkhi-nāi), <bēi-nāi> having sat down (<bahi-nāi, basi-nāi>), etc.* (LSI., V, I, pp. 324 ff.). This **<-n->** affix seems to be connected with the **<-ā, -ñā, -yā>** of OB., MB. and dialectal NB. (W. Bengali). We can compare the Early Oriyā conjunctive affix **<-inā>**, found plentifully in literature (e.g., Jagannātha-dāsa's 'Bhāgavata, Kañśa-janma' : **<emāntē śuṇi Śukā yāti, hāsiṇa rājā-ku kāhānti>** *hearing this, the sage Śuka after having smiled, says to the king* : ibid., 'Rāsa-līlā', **<pāsiṇā galē ēhi bātē, dēkhiṇā cāhānti ucātē>** *entering, they went by this way ; seeing, they look sadly* ; 'Rukmini-haraṇa', **<kānyāku kārāīṇā snānā>** *after having bathed the bride* ; **<bhājīṇā sārbē kālē cūrā>** *breaking, they pulverised everything*, etc., etc., occurring side by side with the other Oriyā conjunctive affix **<-i>**, the one which in actual use now. But apparently this **<-inā>** form is obsolete now.

In the other Magadhan speeches, the **<-i>** affix is the only one which obtains, and in the Bihārī dialects this **<-i>** conjunctive is strengthened by the conjunctive of **<✓ kar>—<kar-i>** (also in Oriyā, where it often becomes **<kiri>**, e.g., **<dekhi-kiri>** *having seen*), **<kar>**, or by a dative postposition **<kai, kā, kē>**. The **<-i>** conjunctive features in other NIA.: the **<-i>** is sometimes dropped (as in Awadhī and Hindostānī), but generally it is reinforced by **<kari, kar>** or by some post-position.

So far as Bengali is concerned, we have thus these forms : **<-i ; -iā ; -i-ā>** ; and connected with the last is S.-E. Bengali **<-i-nē, -iā-nē ; -i-nāi, -iā-nāi>**, and Oriyā **<-inā>**.

In the Māl Pāhāriā dialect of Western Bengali (Santal Parganas), the word হেনক « hēnākṣ » is added to the conjunctive, which sometimes retains the nasalisation characterising this West Rādha speech : e.g., গুটিয়েই হেনক « guṭiyāi hēnākṣ » *having collected*, উঠি-হেনক « uṭhi-hēnākṣ » *having risen*, গায়ে-হেনক « gāyē-hēnākṣ » *having gone*, আসি-হেনক « āsi-hēnākṣ » *having come*, etc. (LSI., V, I, pp. 99, 100). This word « hēnākṣ » occurs also with the noun : e.g., চালচলন-হেনক « cālṣ-cālāṅg-hēnākṣ » *following (bad) ways, through bad ways*. This « hēnākṣ » is obscure, but it may be a verbal noun from « √hā—hāṅg » (= Standard Bengali হওন « hāōng ») put in the dative and used postpositionally (cf. the change of « √kār » to « √ kēr » in the same dialect). In any case, the conjunctive with « hēnākṣ » stands apart in Bengali dialects.

738. The conjunctive has always had a most important place in the history of IA., and in giving this place to this form in IA., Dravidian influences seem to have something to do. In the Vedic speech, the conjunctive is formed by « -tví, -tvā, -tváya », which are old cases of a verbal noun stem in « -tu » (this « -tu » also figures, in the accusative and dative « -tum » and « -tavē », as infinitive affixes in OIA.), and by « -yā, -yā (-t-yā, -t-ya) » (Whitney, ‘ Sanskrit Grammar,’ §§ 989 ff.). The « -tví, -tvā, -tváya » group occurs with the root not compounded with a preposition, adverb or substantive, and the « -(t)yā, -(t)ya » group occurs with the root when it is so compounded : but this rule was not adhered to in many early Skt. works (Whitney, ‘ Sanskrit Grammar,’ § 990, 2), and was entirely ignored in MIA., no discrimination along that line being made in their use. In addition to these affixes, it can be assumed, from the statements of grammarians (e.g., Pāṇini, VII, i, 48) and from the forms actually in use in Early MIA. (Pali, Aśokan Prakrits), that other ones—« -tvī-nam » and « -tvā-nam », and probably also « tū-nam » —were also in use in OIA., although they have not been found in Vedic and Skt. literature. In Early MIA., the affixes employed are : (Pali) « -tvā, -tvāna, -tūna, -ya » (the last often assimilated with preceding consonants), « -iya » (with a developed « -i », from the preceding one), and « -yā-na, -iyā-na » (a comparatively rare form, with « -na » added to « -ya », or « -yā », by analogy of « -tvā :

-tvā-na » : cf. W. Geiger, 'Pali Grammatik,' §§ 208 ff.), as well as « -tum » of the infinitive (in a few rare cases: E. Müller, 'Pali Grammar,' p. 128); and (Asokan) « -tpā<-tvā », « -ti=-tti<-tvī », « -tunam », « -ya, -tya » (assimilated), besides « -tu » (= « tum » of the OIA. infinitive, transferred to the conjunctive: cf. A. C. Woolner, 'Asoka Inscriptions, Text and Glossary,' Calcutta, 1924, I, p. xxxvii). In Second MIA. the forms employed or noted are: « -tvā > -ttā, -tā (after nasals) » ; « -tvā > \* -tu(v)ā > -dua » ; « -tvānam > -ttānam » ; « -tvānam > \* -tuvānam > -tuānam » ; « -tūna(m) > -dūna > -ūna(m) » ; « -tvī > -ppi, -pi, -vi » ; « -tvīnam > -ppinu, -pinu, -vinu » ; « -tya > -cea » ; « -ya > -ia » (also assimilated forms); and also « -(i)yāna(m) », like the Pali « -(i)yāna » ; and through a blend of « -tvā » and « -tyā, -tya », there is « -ccā », and through contamination with « -tvāna(m) > -ttāna(m) » and « -yā > -yānam » , there arose also the further extended form « -ccāna, -ccānam » ; besides, there is « -āe » (< OIA. -āya), as well as « -ya > -ia > -i » as in Apabhraṇa (Pischel, 'Grammatik der Prakrit-Sprachen,' §§ 581-594). And in addition to all these, a form « -dāni » is given by Vararuci (X, 16) for Māgadhi (this « -dāni » is probably for « -ttāna », with « -d- » on the analogy of « -dūna < -tūna »).

Of all these forms found in Second MIA. through the whole of the Indo-Aryan tract, the employ of particular ones in different parts of the country can roughly be noted. The « -tvī(nam) > -ppi(ṇu), -vi(ṇu) » form occurred in the Gujarāti-Rājasthāni area (cf. H. Jacobi, 'Bhavisatta-kaha,' p. 42; 'Sanatkumāra-carita,' p. 18; Tessitori, 'Grammar of OWR.,' § 131, 1). The « -tūna > -dūna > -ūna » affix was current in Mahārāṣṭri (but the Modern Marāṭhi « -ūn » for the conjunctive, with the dental « -n- », does not represent the Mahārāṣṭri « -ūna », but is another form, « -ō-n-i, -au-n-i » in Early Marāṭhi, of nominal origin, in which « -n-i » is a post-position: cf. Jules Bloch, 'Langue Marathe,' pp. 261-262). The affix which seems to have been commonly employed in the North-East, in the Midland, and in the North-West, and also in the South-West, in the Late MIA. period, was « -ya > -ia, -i », and probably also « -i ». The MB., Oriyā, Assamese, Bihārī, as well as Eastern Hindi and Western Hindi « -i » is

obviously derived from it : also the OB. strengthened form « -I » ; and « -ia » occurs also as an archaic literary form in OB. It also seems very probable that the extended form of « -ya », namely, « -iyāna, -(i)yāna(m) » (as in Pali and Ardha-māgadhi, the latter an eastern speech : Pischel, § 592) was current in the form of Māgadhi Apabhrāṇa prevailing in Bengal : and this « -(i)yāna (m) » can easily give the dialectal Bengali ইয়া « -iyā », ইন্দী « -inā » : cf. MIA. « tāna(m) » > তা « tā », « tēna(m) » > তে « tē » (*supra*, p. 373). In S.-E. Bengali, the nasal could well be preserved (cf. East Bengali তান « tān » honorific genitive < « tāna[m] = tēśām ») ; and this « -iyāna(m) » form (of which « \*-ina, - ina » is evidently a contraction), looking like a verbal noun, was put in the locative in Chittagong Bengali and in Chakma (-iyāñ-ē, -in-aï). Cf. the use of « -mi » in Haijong : দেখিয়ামি « dēkhiyā-mi » *having seen*, etc. (*supra*, pp. 751, 775). We cannot postulate any postpositional form « -inai » for the S.-E. Bengali (like the suffix in Gujarāti « kari-nē » *having done*, « thaī-nē » *having been*) : such a post-position (« -nai < kaṇṇahī- < karṇa- » : Tessitori, ‘Grammar of OWR.’, § 131, § 71) is unknown to Bengali. The Oriyā « -i-na » is simply by analogical addition of the « -na » to the « -i » form : MIA. « \* calia, caliyāna(m) » probably gave rise to a similar juxtaposition in Māgadhi Apabhrāṇa « cali, caliña(m) ». The Bengali strong form, and the most characteristic one, *viz.*, « -iā, -iyā » is apparently the « -i » form fortified either with the definitive « -ā » or with the « -ā » from « -iyāna(m) » > -iā ».

**739.** Tessitori derived the Gujarāti conjunctive in « -i » (as in « cālī-nē » *having walked*, « mārl-nē » *having struck*) from the passive participle in « -ia » (nom. « -iu », locative « -ii », whence « -i »), rather than from the Apabhrāṇa absolutive in « -i » (‘Grammar of OWR.’, § 131). This is quite likely, and the use of the postpositional affixes is indeed a strong support. It is even probable that in the North Indian languages, where the conjunctive has been fortified by a postposition (like « kē » in Hindostāni), the passive participle form had exerted some influence. But « OIA. \* cal-ya > calia > calī, cali > NIA. cali, cal » is a perfectly normal development. And even the OB. form in « -I », « cāpi » *having pressed*, etc., can represent a MIA. « -ia » : it can be well surmised

that in some dialects of Apabhrañśa, Second MIA. « -ia » became « -I » in the NIA. (cf. *supra*, ‘Phonology,’ pp. 302-303, 307), side by side with « -i » by simple dropping off the « -a » in this most commonly used affix.

**740.** The lavish use of the conjunctive is a noteworthy characteristic of Bengali, as of other NIA. speeches. Tibeto-Burman (*Bodo*) influence has been suggested in this connexion (J. D. Anderson, ‘The Origin of Bengali,’ JRAS., 1911, p. 524). Dravidian influence is equally likely, or perhaps likely to a greater extent, from MIA. times (see *supra*, p. 175). For NIA., this is a characteristic inherited from MIA. There is nothing unnatural in a Bengali sentence like ভোরে উঠে, আন দেরে চারটি খেয়ে নিয়ে, জিনিষগুলো সঙ্গে বেঁধে নিয়ে গাড়ীতে ঢিহিয়ে দিয়ে, পথে তার বাড়ী হ’য়ে তাকে তুলে নিয়ে, সময় থাকতে ষেশনে পৌছে টিকিট ক’রে আটকার গাড়ী ধ’রে চ’লে যেও « bhōrē uṭhē, snān̄ sērē cār-ti khēyē-niyē, jinis-gulō sāṅgē bēdhē-niyē gāṛi-tē cāriyē-diyē, pāthē tārā bāṛi hā'yē takē tulē nivē, sāmāvā thāktē st̄ēśānē pāuchē, t̄ikit kā'rē āt-tā-r̄g gāṛi dhā'rē cā'lē jēō » (with 15 conjunctives and only one finite verb) = *get up early, finish your bath, have some breakfast (of rice, etc.), bind up the articles and take them with you, put them down on the top of the cab, go to his house on the way and pick him up, arrive at the station in time, buy your ticket and catch the 8 o’clock train and leare*: and such « -iyā > -ē » sentences have their prototype in MIA.—in Pali and in Classical Sanskrit : e.g., Pali, « cōrā kujjhītvā...tiṇhēna asinā brāhmaṇām dvidhā chinditvā, maggē chaḍḍētvā, vēgēna anubandhitvā, tēhi cōrēhi saddhiṁ yujjhitvā, tē sabbē pi mārētvā, dhanam ādāya puna dvē kōṭṭhāsā hutvā, aññamaññām yujjhitvā, adūhatiyāni purisa-satāni ghātētvā, ētēna upāyēna yāva dvē janā avasitthā ahēsuṁ tāva aññamaññām ghātayimṣu » (Vēdabbha Jātaka); and Sanskrit, « atha sa brāhmaṇas tam paśum rākṣasam matvā bhayād bhūmāu nikṣipya dāivam nirbhartsya gṛham uddiṣya prasthitah », or « sa duṣṭāśayō bakaḥ kramēṇa tān pṛṣṭham ārōpya jalāśayasya nātidūrē śilām samāsādya tasyām ākṣipyā svēcchā bhakṣayitvā bhūyō’ pi jalāśayam samāsādya jalacarāñām mithyā-vārttā-sandēśāḥ manāṁsi rañjayānn (=rañjayitvā) āhāra-vṛttim akarōt » (Pañca-tantra).

**741.** The conjunctive in « -iyā » is frequently used as an adverbial gerundive: it is either repeated, or is used singly: in the latter case, generally it is of similar meaning with the finite verb modified by it, and the two form a compound verb: e.g., কান্দিয়া কান্দিয়া রাণী আইল বাহিরে « kāndiyā kāndiyā rāṇī āīlā bāhirē » *the queen came out weeping* (Kṛttivāsa, ‘Ayōdhya-kāṇḍa,’ p. 20); কষিয়া ধীধা « kāsiyā bādhā » *to bind tight*; টানিয়া ধৰা « tāniyā dhārā » *to hold tight*; চুটিয়ে বসা « cūṭiyē bāsā » *to speak fully, not to mince matters* (colloquial); চাপিয়া বসা « cāpiyā bāsā » *to sit heavy*; হাটিয়া > হেঁটে চলো « hāṭiyā > hēṭē cālō » *walk quick!*; চ’লে এসো « cā'lē ēsō » *come quick!* (see *infra*, under ‘Compound Verbs.’)

**742.** Occasionally in MB. we find « -ঃ » for the « -i » of the conjunctive: e.g., ŠKK., p. 348, পরিধান কর নেতে বাসে « pāridhānā kārā nētā bāsē » *huring put on a fine garment*; p. 361, কেহে সর জাইতে মোকে বোল « kēnhē sārā jāitē mōkē bōlā » *why do you ask me to move away?*; VSP., p. 869, চৱণ পাখাল আশুন মহাশয় « cārāṇḍ pākhālā āsunḍ māhāśayঃ » *please go wash your feet, sir* (lit. come after having washed). Cases like these do not demonstrate the presence of a form in « -ঃ » in MB., either a verbal noun, or due to the loss of « -i », for the conjunctive: these are simply due to scribe’s mistakes for করি, সরি, পাখালি, etc. In ḍaryā 27: « adha-rāti bhara kamala bikasiu » *through half the night the lotus blossomed*, where « bhara » may be for « bhari », as in other NIA. speeches, or it may be regarded as the second part of an adverbial compound « adha-rāti-bhara » (see *supra*, p. 702).

#### [K] VERBAL NOUNS, AND THE INFINITIVE IN ইতে « -ITE »

**743.** The following are the forms for the Verbal Noun in Bengali:

- (1) the অন « -ଙ୍ଗ୍ର » noun, with extensions of the affix as অনা, নା « -ଙ୍ଗ୍ରା, -ନା » and অনী, উনী, নী « -ଙ୍ଗ୍ରି, -ନୁଣୀ, -ନି »;
- (2) the অ « -ଙ୍ଗ୍ର, -ଙ୍ଗ୍ରା » nouns, with an extension ই, ই « -ି, -ି »
- (3) the ই « -ି » nouns;
- (4) the nouns in আ « -ା » from the simple passive participle;
- (5) the nouns in ইଲ « -ିଲ » from the « -ିଲ » passive participle;
- (6) the nouns in ইବ « -ିବ » from the future passive participle.

**744.** (1) This group of affixes has been discussed before ('Formative Affixes, No. 5, 5a, 5b,' pp. 656-658, *supra*). It is one of the most widely used forms from OB. times. Instances from the Caryās : « (2) dharāṇa ; (22) marāṇa ; (36) cēāṇa, bēāṇa (< cētana, vēdana) ; (46) phuḍāṇa = phuḍāṇa (sphuṭana) » ; MB. examples are copious. The extended « -ā » form is also found in the Caryās : e.g., (21) « jēṇa tuṭāṇa (= tutājī, tuṭājī = trut्यati) avanā-gavaṇā (= āgamana-gamana) » ; cf. also (7) « avanā-gavaṇē Kānha bimana bhaīlā (= bhaīlā) » *K. has become sad at this coming and going* (= saṁsāra) : this « avanā-gavaṇā », or « \*avanā-gavaṇā » of OB. has given the NB. আনাগোণা « ānā-gōṇā ».

In Hindostānī the « -nā » affix (= « -nau » in Braj-bhākhā, « -nō » in other W. Hindī dialects), same as the Bengali অনা « -anā », is used as the infinitive : also its equivalent « -nā » in Panjabī.

**745.** (2) This is a verbal noun in অ « -ং » which is quiescent, but which is traceable only in roots ending in a consonant (see *supra*, pp. 895-896). Thus, NB. বেল « bōlং » *speech*, eMB. (ŚKK.) « bōl-ং », OB. (Caryā 41) « bōl-ং », MIA. « bōll-ং » (cf. Suffix No. 1, p. 652). There was a feminine (diminutive) extension of this by « -i » < « -ī < -ia » < « -ikā » (see *supra*, Suffix No. 24, pp. 672 ff.): thus, NB. and MB. বুলি, বুলী « bul-i, bul-ī » *speech*, OB. (Caryā 41) « bōl-ī », MIA. « \* bōlliā < bōlliā » ; so ফেরি, ফিরি as in ফিরি করা « phēri, phiri kārā » *to hawk goods*, মৃড়ি as in মৃড়ি দিল « muri dilং » *covered (oneself) up* (< gave a covering up), etc.

This verbal noun affix (-ং, -ং), and the next one (-i), have become much confused in Bengali (in the Standard Colloquial), owing to the formative affix being dropped in each case : but it is still possible to distinguish the latter by the presence of the epenthetic « -i » in the dialectal forms of words which originally had it.

**746.** (3) The verbal nouns in ঈ « -i » form a much larger class, but the affix is now no more a living one (see *supra*, Suffix No. 25, p. 674). The verbal noun in « -i » is known to Maithili, e.g., « dekhī, dēkh » (Grierson, 'Maithili Grammar,' p. 109) ; and it seems that it is used to form the compound tenses like « dēkhai-chī » *I am seeing, I see*

( « dēkhai » = oblique of « dēkhī »), « dēkhai-achī, dēkhaichī, dēkhaich » he sees, etc. It seems to occur in the other Bihārī speeches—« dēkh = \* dēkhi », oblique « dēkhē ».

**747.** The Infinitive in Bengali appears to be the Verbal Noun (3) put in the locative. The Infinitive proper in Bengali has the characteristic affix ইতে « -itē » (in the Standard Colloquial reduced to তে « -tē » with mutation of preceding vowel) : e.g., করিতে, চলিতে, যাইতে « kār-itē, cāl-itē, khā-itē » to do, to go, to walk. This « -itē » of course is entirely different from the present participle affix « -itē » (ante, p. 999). The « -itē » of Bengali is best explained as the old verbal noun in « -i », plus the locative affix « -tē », dialectally « -t » as in Chittagong. The formation seems to a new one in Bengali. Thus, আমাকে যাইতে হইবে « āmākē jāitē hāibē » I shall have to go, I must go (lit. with-reference-to-me in-the-act-of-going i.e. to-go it-will-be) ; সে চলিতে পারে « sē cālitē pāre » he can walk (= he in-the-act-of-walking is-able) ; করিতে লাগিল « kāritē lāgilā » began to give, দিতে চাহিল « ditē cāhilā » wanted to give (but দিতে দিতে চাহিল « ditē ditē cāhilā » wanted [or gazed] while giving) ; যাইতে দাও « jāitē dāo » let go. The « -itē » form is used with roots like চাহ « cāh » to want, to look at, হ « hā » to be, দে « dē » to give, to allow, পার « pār » to be able, যা « jā » to go, to denote Acquisitives, Permissives, Desideratives and Gerundives (see below, under 'Compound Verbs'). In other NIA. speeches, a verbal noun is also used : e.g., « mōtē jibāku hēbā » I shall have to go, besides « jāi hēbā », where « jāi » is certainly a verbal noun in the locative ; Bhōjpuriyā « bahē lāgal », Maithili « bahē, bahai laglāh » began (plural or honorific) to blow ; Assamese « bābā-lāi dhārē » blows ; Early Awadhī « lagē parōsana nīpuna suārā » clever cooks began to serve (Tulasi-dāsa, 'Rāma-carita-mānasa') ; W. Hindi « bolnē lagā » began to say, « jānē dō » let go, « khānē hōgā » will have to eat, etc., etc. Cf. the use of the « -ibā- » noun in OB. and MB. (below, pp. 1017-1018). For the use of a verbal noun form in a similar construction in OWR., see Tessitori, 'Grammar of OWR.', §§ 132, 134.

There is in Ardha-māgadhbī an infinitive in « -(i)ttaē » (cf. Pischel, § 578) : « puechittaē » to ask, « sumarittaē » to remember, « tarittaē »

*to cross*, etc. This could easily give the Bengali ইতে <-itē>, through a Māgadhi Apabhrāṣṭa form <\*-ittaī> (this form <-ittaē>, attested from Ardha-māgadhi, could very well have occurred in Māgadhi Prakrit also). But it is not likely that this has been preserved in Bengali. The <-itē> form does not occur in any other Magadhan language. The Standard Bengali <-i-tē> has a dialectal form <-i-t̪e>, where the <-t̪e> is obviously the locative <-t̪e>, and this <-i-t̪e> cannot represent the MIA. <-ittaē>—the loss of two final syllables would be an insurmountable difficulty. The evidence in favour of a later, nominal origin of <-i-tē> as a locative form is exceedingly strong, not only from Bengali itself (with its use of the <-iba> noun), but also from other cognate speeches.

The OIA. infinitive affixes were <-tum, -i-tum> and <-(i)tavē>, respectively the accusative and dative forms of the verbal noun in <-(i)tu>. They are preserved in Pali as <-(i)tuṁ, -(i)tavē>, and in Asokan as <-(i)tuṁ> which passed on to the conjunctive in some dialects (cf. A. C. Woolner, 'Asokan Text and Glossary,' I, p. xxxvii), but it remained in Second MIA. as an Infinitive as <-(i)duṁ, -(i)uṁ> (Pischel, § 573 ff.). This affix is not preserved in NIA, and neither is <-(i)tavē>, which seems to have fallen into disuse in Second MIA. itself (unless <-ittaē> is its form in Second MIA., as Pischel thinks with E. Müller, 'Grammatik der Prakrit-sprachen,' § 578).

The <-itē> Infinitive is liable to be confused with the <-itē> Present Participle, and it is at times difficult to decide which form it really is: e.g., তাহাকে যাইতে দেখিলাম <tāhākē jāitē dēkhilām> *I saw him going*, where <jāitē> may be equally the Present Participle = (*while*) *going*, or the Verbal Noun locative = *in the act of going*. (See *infra*, under 'Periphrastic Tenses.') In Chittagong Bengali, this verbal noun has become so much confused with the participle that by contamination it takes personal affixes: e.g., আই যাইতাম নাগ্নিলাম <āi jāitām lāggilām> *I began to go*, তুই যাইতা নাগ্নিলা <tūi jāitā lāggilā> *you began to go*, হিতে যাইতা নাগ্নিল <hitē jāitā lāggil> *he began to go*, (Basanta Kumār Chatterji, VSPdP., 1826, p. 114); Noakhali dialect,

খাবাইতা লাইগ়জ  $\leftarrow$  khābāitā laig-ja [laigzə]  $\rightarrow$  to feed you have begun = Standard Bengali খাওয়াইতে লাগিয়াছ  $\leftarrow$  khāwā-itē lāgiyāchā  $\rightarrow$  (LSI, V, I, p. 309). The  $\leftarrow$  itē  $\rightarrow$  also figures in Chittagong as হৈতু  $\leftarrow$  -itu  $\rightarrow$  e.g., যাইতু লাইল [zaitu lail] began to go (=Standard  $\leftarrow$  jāitē lāgilā  $\rightarrow$ ), where the  $\leftarrow$  -u  $\rightarrow$  seems to be for  $\leftarrow$  -ō  $\rightarrow$  <  $\leftarrow$  -ā  $\rightarrow$ , by confusion with the present participle base in  $\leftarrow$  -it-ā  $\rightarrow$ .

**748.** (4) The passive participle in  $\leftarrow$  -ta, -ita  $\rightarrow$  can be used as a noun of action in Skt. and in Pkt.: e.g.,  $\leftarrow$  na bahunā śrutēna ; tasya gatāgatam kō' pi na jānāti ; nṛtyād asya sthitam manōharam ; mahā-svanāir dundubhi-nāditāś ca ; madhurām basitam, madhuram asitam, madhurām calitam madhurām ramitam ; madhurām tassa bhāsitarū ; ēkassa caritaṁ seyyō ; katañ ca sukataṁ seyyō ; sucaritañ carē ; avakidē viśumalēdi (= apakṛtam vismarati)  $\rightarrow$  ; etc. The passive participle in  $\leftarrow$  -(i) ta  $\rightarrow$   $\leftarrow$  -(i)a  $\rightarrow$  obtained the definitive  $\leftarrow$  -ā  $\rightarrow$  in OB., and from that resulted the Bengali verbal noun as well as passive participle in  $\leftarrow$  -ā  $\rightarrow$  (see *supra*, 'Formative Affixes, No. 7,' p. 660; also non-l passive participle form, *supra*, p. 944). The  $\leftarrow$  -ā  $\rightarrow$  form occurs in Assamese: e.g.,  $\leftarrow$  jowā  $\rightarrow$  [zowa] going,  $\leftarrow$  sōwā  $\rightarrow$  [xowa] sleeping,  $\leftarrow$  kārā  $\rightarrow$  doing, etc. It is found in Oriyā: e.g.,  $\leftarrow$  dēkhā  $\rightarrow$  sight, seeing,  $\leftarrow$  jānā  $\rightarrow$  knowing, etc. It does not occur in the Bihāri dialects and in Eastern Hindī. But in the Hindostāni passive participle formation (e.g., in expressions like  $\leftarrow$  kiyā-karnā, jāyā-karnā, dēkhā- cāhnā  $\rightarrow$ , compound verbs) the form is really a verbal noun.

In MB., the  $\leftarrow$  -ā  $\rightarrow$  verbal noun is not so prominent, nouns in  $\leftarrow$  -ibā  $\rightarrow$  and  $\leftarrow$  -ānā  $\rightarrow$  being more popular: but its occurrence is not rare. Thus, VSP., p. 68, বাক্তা নিছে  $\leftarrow$  bāndhā nichē  $\rightarrow$  taken in pledge; p. 83, চিন পুছা  $\leftarrow$  cīnā puchā  $\rightarrow$  recognising and enquiring; p. 123, দিয়া নাড়া দেই তাড়া  $\leftarrow$  diyā nārā dēi tārā  $\rightarrow$  gives a shake, and then drives away; elsewhere MB. and NB. লেখা জোখা  $\leftarrow$  lēkhā-jōkhā  $\rightarrow$  writing and computing, নাচা  $\leftarrow$  nācā  $\rightarrow$  dancing, কেনাবেচা  $\leftarrow$  kēnā-bēcā  $\rightarrow$  buying and selling, রাঁধাৰাড়া  $\leftarrow$  rādhā-bārā  $\rightarrow$  cooking and serving, etc., etc.

The Bengali  $\leftarrow$  -ā  $\rightarrow$  form has been derived by some from the verbal noun in ইবা  $\leftarrow$  -ibā  $\rightarrow$ :  $\leftarrow$  cālibā  $\rightarrow$  \* cāliwā  $\rightarrow$  \* cālwā  $\rightarrow$  cālā ; khāibā  $\rightarrow$  \* khāiwā  $\rightarrow$  khāwā  $\rightarrow$  (cf. 'Prabāsi' for Asādha, 1324, p. 264). But this line of

derivation is inadmissible : the MIA. « -bb- » results in « -b- » in Bengali, whereas a form like « khāwā » can be written and pronounced « khāā », and the « w » there is euphonic only (see *supra*, pp. 338-342, 533). To derive « khāā » from « khāibā » would be to postulate the entire loss of a MIA. double consonant group in a NIA. language—a phonological development not found in the Bengali Standard Dialect : and the « -ā » form is a Standard Dialect form. It would indeed be difficult for the same form to occur as « -ibā » and as « -ā » side by side in the same dialect and at the same time.

**749.** (5) The verbal noun in ইল « -ilā » is now obsolete in Bengali, but it occurred in Early Bengali, though not very commonly. The verbal form in « -ilā- » in the locative figures partly as the absolute conjunctive (in « -ilē »), for which see *supra*, p. 1004. It occurs also in Assamese and Early Oriyā. In the Bihārī dialects its equivalent, the « -al » verbal noun, is exceedingly common. It figures also in Marāṭhī. Examples in Bengali : OB. : « bhēlā bihani » (Caryā 23) = হইলে বিহনে (বিনে, বিনা) « hāilē bihānē (binē, binā) » *without having been* ; MB. : ŠKK., p. 249, বিনি ধাচিলে « bini jācilē » *without asking* ; Vañśi-dāsa's 'Padmā-purāṇa,' p. 435, হারাইলা হেনা বাসি « hārāilā hēnā bāsi » *I regard it as lost = as a loss*; তুমি জন্মিলা হতে « tumi jānāmilā-hatē » *from your birth* ; 'Caitanya-Bhāgavata,' p. 71, তুমি দিলে বিনা « tumi dilē binā » *without your giving* ; etc., etc. Cf. Oriyā, 15th century Inscription of Puruṣottama-dēva at Puri Temple (see *supra*, p. 107) : « hārilā-dōṣā » *sin of robbery*, « kālā » *doing*, genitive « kālā-rā » ; Early Assamese, 'Ādi-caritra,' p. 72, « Śāṅkārē dēkhāilā cāhilā » *wanted to show Śāṅkara* ; Modern Assamese « bul-il-āt » *on having said*.

For Bihārī, cf. Grierson, ' Maithili Grammar,' § 183 ; for Marāṭhī, see LSI., VII, pp. 27, 31.

**750.** (6) The verbal noun in ইব « -ibā » is from the same source as the future base. This form occurs in all Magadhan languages : it is regularly declined like any other verbal noun, although in NB., its employ has been restricted to the base ইব « -ibā » (combined with মাত্র « māṭra » to form an adverb—*e.g.*, বলিবামাত্র « bālibā-māṭra » *immediately*

*after speaking,* দেখিবামত্ত  $\leftarrow$  dēkhibā-mātrā  $\rightarrow$  on seeing, etc.) and the genitive ইবা-র  $\leftarrow$  -ibā-ṛā  $\rightarrow$  (e.g., দিবাৱ  $\leftarrow$  dibā-ṛā  $\rightarrow$  for giving; ইবা  $\leftarrow$  -ibā  $\rightarrow$  itself may represent an old genitive form: see *supra*, p. 752). Thus, OB. (Caryā 8)  $\leftarrow$  bāhaba-kē (=bāhiba-kē) pāraa (=pārai)  $\rightarrow$  is able to row, = MB. বাহিবারে পারে  $\leftarrow$  bāhibārē pārē  $\rightarrow$ ; eMB. (SKK.), p. 3, মানুষ নিরোজিল মারিবাক তাৱ  $\leftarrow$  mānuṣa niyōjilā māribā-kā tāē  $\rightarrow$  employed a man to kill him; p. 200, ফুল তুলিবাক তৱে  $\leftarrow$  phul& tulibā-kā tarē  $\rightarrow$  with a view to pluck flowers; p. 395, হাঠিবাক  $\leftarrow$  hāthibā-kā  $\rightarrow$  to walk, etc.; 'Caitanya Bhāgavata,' p. 11, মথুৰা দেখিব কৱি  $\leftarrow$  Māthurā dēkhibā kāri  $\rightarrow$  for to see Mathurā; Vañśi-dāsa's 'Padmā-purāna,' p. 108, আছে আছিবার মত নদীয়া নগৰ  $\leftarrow$  āchē āchibārā mātā Nādiyā-nāgārā  $\rightarrow$  there is the city of Nadiyā (if at all a town were) to exist; p. 165, লাগে বলিবার  $\leftarrow$  lāgē bālibārā  $\rightarrow$  begins to say; p. 473, আচ্ছুক ছুইব আৱে  $\leftarrow$  āchu-kā chuibā ārē  $\rightarrow$  ah, let alone merely touching; p. 592, দেখাইব কৱি  $\leftarrow$  dēkhāibā kāri  $\rightarrow$  with a view to show; p. 608, দিবা কৱি  $\leftarrow$  dibā kāri  $\rightarrow$  with a view to give; VSP., p. 609, ভূমিতে টালিব কৱি  $\leftarrow$  bhūmitē tālibā kāri  $\rightarrow$  with a view to throw on the ground; p. 620, মারিবার মোক  $\leftarrow$  māribārā mōkā  $\rightarrow$  to kill me; etc., etc. The  $\leftarrow$ -ib- $\rightarrow$  form is much used in North Bengal. The present progressive tense is formed in Assamese with the verbal noun in  $\leftarrow$ -iba  $\rightarrow$ : e.g.,  $\leftarrow$  kāribā-lāi dhārē  $\rightarrow$  is doing. In Assamese, the  $\leftarrow$ -iba  $\rightarrow$  noun is fully declined: e.g.,  $\leftarrow$  kāribā, kāribā-ku, kāribā-rā, kāribā-ru  $\rightarrow$ , etc.; also in the Bihārī dialects, e.g., Maithili  $\leftarrow$  karab, karabā-k, karab-ē, karabā-sā, karabā-mē  $\rightarrow$ . The use of the  $\leftarrow$ -(i)tavya  $\rightarrow$  form as a verbal noun is found in other NIA., like E. Hindi, e.g.,  $\leftarrow$  calab, karab  $\rightarrow$ ; W. Hindi, e.g., Brajbhākhā  $\leftarrow$  calibaū, karibaū  $\rightarrow$ , oblique  $\leftarrow$  calibē, karibē  $\rightarrow$ ; Rājasthānī (Mārwārī), e.g.,  $\leftarrow$  mārabō, caṭabō  $\rightarrow$ ; Gujarātī, e.g.,  $\leftarrow$  mārvū, cālvū  $\rightarrow$ ; and Marāṭhī, e.g.,  $\leftarrow$  ut̄hāvayā-, māravayā-  $\rightarrow$ , etc. In most of these (e.g., E. Hindi, Brajbhākhā, Rājasthānī, Gujarātī) this form is used as an infinitive.

751. Relative Participle Adjectives are formed in Oriyā and in the Bihārī dialects with the past and future passive participles used adjectively: e.g., Oriyā  $\leftarrow$  mu-dēbā dhānā  $\rightarrow$  money that is to be given by me,  $\leftarrow$  mu-kālā kāmā  $\rightarrow$  work that was done by me = Bihārī  $\leftarrow$  hamar kail kām  $\rightarrow$ . The  $\leftarrow$ -ib-, -il- $\rightarrow$  forms are not used in Bengali as adjectives for this purpose.

The past participle in « -ā » is so used, to denote the past relative idea : e.g., আমাৰ পৱা কাপড় « āmār̥ pārā kāpāṛ̥ » cloth (*dhōtī*) worn by me, তাৰ কৱা কাজ « tār̥ kārā kāj̥ » work done by him : the employ of the « -il- » form is unknown. The « -ib- » verbal noun is used in the genitive, beside the verbal nouns in « -ā » and in « -āṅg̥ », to indicate the present or future relative participial idea : e.g., আমাৰ পৱিবাৰ (পৱাৰ, পৱনেৱ) কাপড় « āmār̥ pāribā-ṛ̥ (pārā-ṛ̥, pārān-ēṛ̥) kāpāṛ̥ » ‘*dhōtī*’ worn by me, to be worn by me ; ভিক্ষা দেবাৰ চাল « bhiksā débāṛ̥ cāl̥ » rice set apart for giving as alms ; জল খাবাৰ ঘটী « jal̥ khābāṛ̥ ghāṭī » (water) vessel to drink water from ; etc., etc. We have this genitive use of the verbal noun, rather than mere adjectival juxtaposition, from Early Bengali times.

Verbal Nouns of Reciprocity are treated below, under ‘Reduplicated Verbs.’

#### [L] THE COMPOUND OR PERIPHRASTIC TENSES :

##### PROGRESSIVE AND PERFECT.

**752.** The following are the types of these tenses which are found in New Bengali :

(1) চলিতেছে, চলিতেছিল (চলিতে থাকিবে) « cālītēchē, cālītēchilā (cālītē thākibē) » is walking, was walking (will be walking); কৱিতেছে, কৱিতেছিল (কৱিতে থাকিবে) « kārītēchē, kārītēchilā (kārītē thākibē) » is doing, was doing (will be doing). This is the typical Progressive Form of Standard Literary Bengali. It is made up of the verbal form in « -itē » plus the substantive verb « āch » conjugated and employed as an auxiliary (« āch » for the past, « thāk » for the future). The « ā- » of « āch » is absorbed by the preceding « -ē » of « -itē », but in dialectal Bengali of East Bengal the full forms চলিতে আছে, চলিতে আছিল, কৱিতে আছে, কৱিতে আছিল « cālītē, kārītē + āchē, āchilā » etc. still occur.

This progressive form is the recognised one in the « sādhu-bhāṣā », and is found in the Vanga dialects : some typical forms may be given [*tso(i)lte*, *tso(i)ltesilo*, *ko(i)rte*, *ko(i)rtesilo*; *tso(i)lte ase*, *tso(i)lte asilo*, *ko(i)rte ase*, *ko(i)rte asilo*], also [*tsoltase*, *tsoltasilo*; *kortase*, *kortasilo*]. But it is not current in the spoken dialects of Rāḍha (including

the Standard Colloquial of Calcutta and the Bhāgirathi basin), of Varēndra, and of Kāmarūpa.

(2) A type, which occurs in MB. as a verbal form in *ই* « -i » *plus* the substantive verb « āch » (contracted to « -ch- »), in the present generally, and rarely in the past. The future with this « -i » form is unknown. Thus, MB. চলিছে, চলিছ « cāli-chē, cāli-chā », করিছে, করিছ « kāri-chē, kāri-chā », চলিছিল « cāli-chila », করিছিল « kāri-chilā ». This form is used in MB. in a vaguely continuative or progressive sense, and also in a perfect sense. With static verbs, it can easily indicate the progressive idea. In NB., the « -i » of « cāli », which underwent epenthesis, is now dropped. It occurs in Assamese (where the « -i » is retained), generally as a progressive in the present, and always as pluperfect in the past, but the perfect sense for the present form is also found.

This ill-defined tense form of MB. has given the West Bengali (including the Standard Colloquial) present and past *progressive* forms, like চ'লছে, চ'লছিল, ক'রছে > ক'চ্ছ, ক'ব্রছিল > ক'ছিল [ *çjolcʃ(h)e*, *çjoleʃhilo*; *koreʃ(h)e*, *koceʃhilo*, *korʃhilo*, *koceʃhilo* ] ; in North Central Bengali and North Bengali, it retains its vague employ, being used both for the present progressive and the present perfect in the present form, and for the simple past or past perfect in the past form, exactly as in Assamese. In the East Bengal dialects, it is used regularly for the *perfect* only, e.g., [ *tsolse*, *tsolsilo* ; *korse*, *korsilo* ; *tsəlsilo*, *tsəlsilo*, *kərse*, *kərsilo* ] = *has walked, had walked; has done, had done*,—the progressive sense being indicated by the « -itē » form in the East Bengali dialects.

The « -i » form occurs also in Oriyā, but here it is definitely perfect, and in the past and future Oriyā employs its characteristic root « √tha »: thus « kāri-āchāī, kāri-chāī » *has done*, « kāri-thilā » *had done*, « kāri-thibā » *he will have done*.

(3) A Perfect form made with the passive participle adjective in *ইল* « -il- » *plus* the substantive verb « āch » (contracted as usual). This is comparatively a rare form, and occurs in West and Central Rādha dialects (e.g., হ'লছে « hōlʃ-chē » *has become*, ম'লছে « mōlʃ-chē » *has died*, গেলছে, গেলছিল « gēlʃ-chē, gēl-chilā » *has gone, had gone*, in Murshidabad, Birbhum

etc.; cf. LSI., V, I, p. 72); and also in North Bengali (e.g., আইন চে < āin-cē = āil-chē > *has come*: LSI., V, I, p. 174); and it seems to be confined to intransitive verbs and to denominatives and causatives of denominative origin.

(4) A Perfect form in ইয়া < -iyā > *plus* the substantive verb (< āch > in the present and past, and < thāk > in future): in the MB., < -iyā >, or < -iā >, occurs also in the nasalised form < -iñā, -iyā, -iā > : thus, MB., and NB. < sādhu-bhāṣā > চলিয়াছে, চলিয়াছিল ( চলিয়া থাকিবে ) < cāliyāchē, cāliyāchilā (cāliyā thākibē) > *has walked, had walked (will have walked)*; করিয়াছে, করিয়াছিল ( করিয়া থাকিবে ) < kāriyāchē, kāriyāchilā (kāriyā thakibē) > *has done, had done (will have done)*; MB. (generally in West Bengal), besides the simple < -iyā > form in a variety of spellings, we find also চলিন্তাছে, চলিন্তাছিল, করিন্তাছে, করিন্তাছিল < cālināchē, cāliyāchē, kāriñāchē, kāriyāchē > etc. This perfect is found in NB., specially in the Rājha dialects, with < -iyā > contracted to < -ē, -iyē > and < -iñā, -iyā > to < -ē, -iyē > [ -ē, -iē ] : e.g., Standard Colloquial ক'রেছে, ক'রেছিল [cōlech(h)e, korech(hilo)], in other Rājha dialects, চলেছে, ক'রেছিল [cōlēch(h)e, korēch(hilo)], etc. It occurs also in the Vanga dialects, but never with the nasalised form: and it seems there it is less common for the perfect than the < -i > form (No. 3 above). The < -iyā, -iyā > form seems properly not to belong to the dialects of the North, and its presence there is due to literary and other influences. In some cases, this form indicates a static or continuous process also: see *infra*, § 757.

753. The progressive (whether in the < -itē > form or in the < -i > form), as can be plainly seen from MB. literature, is comparatively a late time-idea in the Bengali verb. The progressive does not seem to have been fully established in the language before the 17th century; and although both the < -itē > and < -i > forms occur in literature of the 15th, their occurrence is but extremely rare and hesitating, in authentic texts, and the < -i > form is found both for the progressive and the perfect. In Early MB., the simple present is used for the progressive. The beginnings of the development of the compound progressive in < -itē > and of the compound indefinite tense in < -i >, however, can be taken back to the 14th century: for

already in the ŠKK. we have instances of both : thus, e.g., কালিনীর তীরে বহে মন্দ পৰনে। তোকাক চিঞ্চিতে আছে নান্দের নদনে॥ « Kālinīrā tirē bāhē māndā pābānē : tōmhākā cintitē āchē Nāndērā nāndānē » *the gentle breeze is blowing (lit. blows) by the bank of the Kālindī (= Yamunā) : the son of Nanda is thinking of you* (p. 202 : here in « cint- » we have not a native Bengali root, but a *ts.* one, as described *supra*, p. 879), and ধিৰেঁ ধিৰেঁ কাহাপিৰ্ণ মো আইলেঁ। নিকটে। নিছড়িআঁ চাহোঁ পাণি লইছে মোকটে॥ « dhirē dhirē Kānhāñī mō āilō nikātē, nihuriā cāhō pāpi lāichē mōkātē » *gently, O Kṛṣṇa, I have come closer : I bend down and look, the water has come up (or is coming up ?) to the brim* (p. 153). The form লইছে « lāi+chē » would show that it was an old one, some time having elapsed for the fuller « lāi+āchē » to be so contracted. The « -itē » form for the progressive is thus certainly found in West Bengali of the ŠKK., but it is most curious that it would not be used in the West Bengal dialects of present day as a proper native dialectal form.

The origin of these different periphrastic methods may be now discussed.

**754.** (1) The « -itē », MB. « -itē », is doubtless the present participle : চলিতেছে = চলিতে আছে « calitēchē < calitē+āchē » *he is walking < he is while in the act of walking.* The « -it-ē » is apparently the locative : or is it merely the nominative—MIA. « calanta-ka- », nom. Māgadhi « calantakē > calantaē > calantāi > calantē > calitē » ? (see *supra*, p. 741). The non-locative form, presumably the nominative, occurs in dialects as « cālt-āchē = calit-āchē » etc. But « -itē » is more likely the locative. In Early Assamese, there was a similar construction with the locative, but the periphrasis here did not develop into a compound tense by combining the participle of the verb substantive, as it has in Eastern Bengali and in Standard Bengali : thus Saṅkara-deva (15th century) and other Early Assamese writers frequently employ constructions like « sūryā-sāmā sābē jwālāntē āchāhā » *you are all shining like the sun*, « āchē prākāśāntē » *are manifesting*, « upāsantē āchē » *are worshipping*, etc. As in Assamese, so in W. Bengali this participle progressive did not catch on in the spoken dialect, although the « sadhu-bhāṣā » took it up. It does not seem to occur in Kṛttivāsa (VSPd. edition), nor even in Kavi-kāṅkāna, both West Bengal writers (of the 15th and 16th centuries). But

in East Bengal writers, *e.g.*, Mādhavācārya, author of 'Cāṇḍī-kāvya' (16th century : cf. VSP., p. 335, হোতেছে « hōtēchē » *is happening*), Chuṭī Khān (Noakhali : 'Māhabhārata,' VSPd. ed., p. 59 : তবে সেই রক্ষিগণ দেখিতে আছেন্ত *then the guards remain watching*), Vaṇśī-dāsa ('Padmā-purāṇa,' p. 380, দেখিতেছি « dēkitēchi » *I am seeing*, p. 580, করিতেছে « kāritēchē ») etc., the « -itē » is well-established from the 16th century. And from the early 17th, it is found in the West Bengal writers also, like Kāśī-rāma Dāsa (*e.g.*, VSP., p. 676, হাতেছে « hātēchē », p. 685, দিতেছে « ditechē »). The prose documents, whether in East or in West Bengal, had to employ a definite form for the progressive, and it seems « -itē » became accepted in epistolary and documentary Bengali in the 17th century, and from that it was adopted into the « sādhu-bhāṣā » of the 18th and 19th centuries ; but West Bengal spoken dialects did not use it. The progressive « -i » form of the spoken dialects of West Bengal has now been adopted for the progressive, as a matter course, in the new literary dialect of Bengali based on the Calcutta Colloquial.

The construction, present participle (< « -ant- » of OIA.) *plus* verb substantive, occurs in other NIA (excepting Oriyā and Assamese) : in the Magadhan speeches (*e.g.* Maithilī « dēkhait-chī, dēkhait-chalahū », Magahī « dekhait-, dekhit-, dekhat+hī, halu » ; Bhōjpuriyā « dēkhāt bānī > dekhātānī », etc.) ; in E. Hindī (*e.g.*, Awadhī « dēkhat ahū, dēkhat raheū ») ; in W. Hindī (*e.g.*, « dēkhtā hai, dēkhtā thā ») ; in Panjābī (*e.g.*, « jāndā hai, jāndā sī »), in Rājasthānī and in Gujarātī (*e.g.*, Gujarātī « māratō hatō », Mārwārī « māratō hō » *was beating*) ; in Marāthī (*e.g.*, « uṭhat āhē, uṭhat hōtā » *is, was rising*) ; in Pahāṛī (*e.g.*, Khas-kurā « garda-cha, garda thiyo » *is doing, was doing*), etc., etc.

**755.** (2) The « -i » form is rather rare in eMB., but it becomes noticeable from the 15th and 16th centuries : *e.g.*, KKC. (Vāṅga-vāśī edition), p. 112, শীত তড়িত বর্ণে, হেম মুকুলিকা কর্ণে, কেশ মেষে পড়িছে বিজলি « pīṭā tārītā bārnē hēm&-mukulikā kārnē kēś&-mēghē pārīchē bijuli » *yellow, like lightning in colour, a little flower of gold has fallen (= is disposed) like lightning in the clouds of her hair* ; p. 122, কেমতে ধরিছ হিযা « kēmatē dhārichā hiyā » *how are you holding your heart (= how can you remain*

*unconcerned) ? ; Vañśi-dāsa, p. 3, শোভিছে « sōbhichē » is appearing beautiful ; p. 34, ভাবিছেন « bhābichēṇḍ » is thinking, etc. Cf. also Chuṭī Khān's 'Mahābhārata' (VSPd. ed.), p. 10, এহেন বুলিছে পূর্বে ধর্ম মহীপাল « ēhēṇā bulichē pūrbē dhārmma-māhipālā » so has said formerly the righteous king (*Yudhiṣṭhīra*) ; p. 21, যত পুণ্য করি আছম কায় বাক্য মনে « jātā punyā kāri āchāmā kāya-bākyā-mānē » all the merits I have earned in body, word and mind ; p. 22, রাজাৰ সাক্ষাৎ বসিছন্ত মুনিগণ । পাত্ৰ মিত্ৰ চারি পাশে কৰিছে শোভন ॥ « rājāṛā sāksat bāsichāntā muni-gāṇā, pātrā-mitrā cāri pāsē kārichē sōbhāṇā » in front of the king are sitting (were seated) the sages, and courtiers and friends are adorning in the four sides ; etc. It is of comparatively frequent occurrence in Late MB., but the meaning is not often fixed for either of the two tenses. In Early Assamese of the 15th century, this « -i » form is already well established.*

The source of this form in this construction is not clear. It would appear at first sight to be merely the conjunctive in « -i ». The perfect in « -iyā, -iyā » would similarly appear also to have the conjunctive in it. But the conjunctive would not accord well with the progressive sense, which we see is connected with this construction, side by side with the perfect one, in both MB. and NB. and in Early and New Assamese. The « -i » form, to indicate the perfect, might be, in the case of the intransitive verb, the non-*I* passive participle in « -ita > -ia > -i, -i » : « calia > calī > cali + āchē » gone + is = is gone, has gone (= calitō sti). The Maithili Progressive tense in « -ai » + « √ch », e.g., « calai-chī » I am walking, « karai-ch » he is doing, seems to indicate a possible source for the « -i » form of Bengali. Grierson explains this « -ai » progressive of Maithili as being a contracted form of the « -ait » present participle ('Maithili Grammar,' p. 173 : « dēkhai chī < dēkhait chī »). But, as suggested in the present work, p. 1022 *supra*, the « -ai » may well be a verbal noun locative : for it would be strange indeed for the full « -ait » and a contracted « -ai » to be in living use side by side in the same dialect and at the same time. So also compare the Magahi forms like « dēkha, dēkhē + hī » I see, beside progressive « dēkhait (dēkhat, dēkhit) + hī » I am seeing. The Rājasthāni dialects and Gujerāti, as well as some forms of Western Hindi, have a periphrastic

present in which the present forms of the verb properly conjugated are used with the verb substantive in the corresponding person and number: e.g., Marwārī « cañū-hū » *I go*, « cañā-hā » *we go*, « calai-hai » *he goes*, « calai-hai » *they go*; Jaipuri = « cañū-chū, cañā-chā ; calai-chai, calai-chai »; Gujarātī « cālū-chū, cāliē-chiē ; cālē-chē »; Brajbhākhā « calāū-hāū, calāū-hāi ; calai-hai, calai-hai », etc. The Bihārī compound tenses are not of the type found in the Western languages: here the form of the principal verb is unchanged—it is « -ai, -a, -ē » in all cases. Can the « -i » in Bengali-Assamese be a locative form of an OB. verbal noun in « -ia » = the OIA. passive participle in « -(i)ta »? OIA. « calita » > « calia », in Late MIA. (Māgadhi Apabhrānsa); locative OIA. « calitē » > « caliē » \* calii »; this would become « \* calī, cali » in OB., and then used with the root « āch »: « cali-āchē, cali-chē » therefore would mean *in-the-act-of-walking is = is walking*; so « dēkhi-chē » *in-the-act-of-seeng is = is seeing*. The « -i » form in Bengali can thus include both the locative (to develop into the progressive) and the nominative (in the case of the intransitive verb, to indicate the perfect—later this sense occurring with the transitive verb also by extension) of the « -ita > -ia » passive participle—in the former case it being the verbal noun, in the latter the participle. The Oriyā « -i » form, indicating as it does the perfect tense only, naturally is to be taken as the Oriyā variant of (4), for which see below (p. 1027).

With the idea that the composite « sādhu-bhāṣā » is the source of the dialects, the W. Bengali চ'লছে, চ'লছিল, ক'রছে 'ক'চ্ছে', ক'রছিল (ক'চ্ছিল) etc., are commonly regarded as contracted forms of the « sādhu-bhāṣā » চলিতেছে, চলিতেছিল, করিতেছে, করিতেছিল, etc. But that such is not the case is seen from the occurrence in MB. and in the NB. language of poetry of forms like চলিছে, করিছে in the progressive. The « sādhu-bhāṣā » চলিতেছে করিতেছে, etc. can only give চ'লতেছে, ক'রতেছে [cf. solteʃhe, korteʃhe], etc. in the Standard Colloquial, but such forms are not proper to the dialect, and when they occur at all, they are artificial, being due to an attempt to find colloquial equivalents of a literary form which is only too familiar: the forms চলিতে, করিতে « calitē, karitē » (as participles and verbal nouns in « -itē ») occur as চ'লতে, ক'রতে [cf. olte, korte (kotte)]. The doubling of the

affricate in the case of roots which end in a vowel, like খাচ্ছে, ঘাচ্ছে, পাচ্ছে, দিচ্ছে, শুচ্ছে < khācchē, jācchē, pācchē, dicchē, śucchē > [khacc̪(h)e, ḡjacc̪(h)e, pac̪c̪(h)e, dic̪c̪(h)e, ūc̪c̪(h)e] *is eating, is going, is receiving, is giving, is lying*, with past tense in ছিল < -cchilā >, would at first sight suggest that it is a case of assimilation of the < -t- > of < -itē >, and would thus connect these with the < -itē > form (< ditechē > \*dit-chē > dicchē >). But other West B. and North B. dialects do not show the doubling, even when in West B. these forms indicate the progressive. MB. দিছে < di(i)chē >, যাইছে < jāichē > should occur in West Bengali as দিছে < dichē >, ঘেছে < jēchē > (see *supra*, pp. 386-387), and so they do, for example, in Murshidabad and Birbhum (as present progressive: the corresponding past progressive forms are দিয়েছে < diyēchē < diyā-chē, গেলছে < gēl-chē >). But in the Standard Colloquial, MB. < jāichē > became < \* jāy-chē >, and it is this < -y- > which assimilated with the following < -ch- >: < jācchē >; so in < \* di(i)chē > it assimilated (it is possible by first becoming a glottal stop) to the < -ch- >, as < \* diy-chē [di?c̪he] > dicchē >; so শুইচ্ছে > \* শুয়েচ্ছে > śucchē >, etc.

The Oriyā speech forms its progressive tenses with the help of a verbal form in < -u >, + the substantive verb: e.g., < kāru-chi, kāru-chū; kāru-chu, kāru-chā; kāru-chi, kāru-chānti >. (For this < -u > affix, see *supra*, p. 678.) It is not unlikely that a similar form in < -u > was used in Rādha dialects contiguous to Oriyā, and that in Late MB. this form with the < -u > (not understood, and becoming quiescent in the middle of the word) merged into the < -i > form, or restricted the < -i > form to the progressive in West Bengali. But from extant documents, we cannot postulate with any amount of certainty a Rādha form < \* cālu-chē, \* kāru-chē > beside < cāli-chē, kāri-chē >.

**756.** (3) The perfect with the participle in < -la > is very much restricted in Bengali, and is only local for West Bengal, and probably also for North Bengal. In eMB. it may have been more prominent.

The construction, restricted as it seems to be to a few intransitive verbs, and to denominatives and causatives, is perfectly plain: W. Bengali আন্ছে < āl-chē > *has come*, হ'ল্ছে < hōl-che > *has happened*, ম'ল্ছে < mōl-chē >

*has died* (< MB. « *māilā-chē* » = « *mṛtōsti* »). From the intransitive, the « -l- » affix first spread to the denominative and then to the causative. It agrees with the Bihārī perfect of the intransitive verb; but is different from that of the transitive (and by analogy, often of the intransitive) verbs (in the present and past perfect tenses) in Bihārī, where we have either the juxtaposition of two tenses (the past in « -l- » and the substantive verb present or past) each properly conjugated, or the instrumental of the « -al- » participle used with the substantive verb (cf. LSI., V, II, pp. 28-29, 38-39, 52-53).

757. (4) The perfect in « -iyā, -iñā » is by far the most common of the compound tenses in eMB. It is found in a number of instances in the ŠKK.; and in Kṛttivāsa (VSPd. ed., Ayōdhyā, Uttara) it is well-established, and may be said to be fairly common in subsequent MB. literature. In Early Assamese, the « -iyā » form occurs with the substantive verb, but only as a separate word, and the « -iyā » and the substantive do not express the perfect idea. This « -iyā » form fell into disuse in later Assamese. Oriyā never developed the « -iyā » form, but had only the ones in « -i » and « -iñā ».

Examples from eMB.: ŠKK.: p. 143, পাতিআছে « *pātiāchē* » *has established*; p. 175, শুণিআছ « *śuṇiāchā* » *you have heard*; p. 317, স্মৃতিআছিলোঁ! « *sutiā āchilō* » *I was asleep, I was sleeping*: p. 325, নিজাছিস « *niāchisā* » *thou hast taken*; p. 376, বসিআছ « *bāsiā āchēntā* » *has sat down, is sitting*; Kṛttivāsa, 'Uttarā-kāṇḍa', p. 16, হঞ্চাছেক « *hāñā-chekā* » *has become*; p. 24, দিঙ্গাছি « *dīnāchi* » *I have given*; p. 177, সুআচেছ « *suā āchē* » *is lying*; p. 201, জুড়িঞ্জা আছে « *juṛiñā āchē* » *is spread, پড়িঞ্জা আছে « *pāṛiñā āchē* » *lies*; etc., etc. The form is found copiously in other MB. works.*

It would be seen that progressive or continuous action may be indicated in the case of intransitive verb; and such action is emphasised upon by keeping the « -iyā, -iyā » separate from the verb, in both MB. and NB.

The « -iyā, -iñā » form is doubtless the conjunctive: « *niāchisā* » being « *niā* + *āchisā* » = *having taken thou art* = *thou hast taken*. The nasalised form, current in West Bengal, is sufficiently indicative of its

proper nature. But that is not all. In the case of intransitive verbs, the « -iyā » form can equally represent the passive participle (see *supra*, p. 955) : স্থান আছে « suā āchē » *is lying (has lain)* < *lain* (\* svapita-> suvia-> suia-> suā) + *is*, চলিয়াছে « cāliāchē » *has gone* < *gone* (calita-> caliā) + *is*. Cf. N.B. এখানে যে বেশ গান চ'লেছে ! « ēkhānē jē bēṣṭ gāṇḍ cālēchē » *so, fine singing is going on here*; মাদ্রাজে খূব উৎসোগ চলিয়াছে or চলিতেছে « Mādrājē khub̄ udīyōḡ cāliyāchē (cālitēchē) » *great preparations are going on in Madras*; রাস্তায় কাদা হ'য়েছে « rāstāy kādā hōyēchē » *there is mud in the street*; র'য়েছি « rōyēchi » *I am staying*, etc. Cf. also the perfect with the participle in « -la » ; and the perfect of the intransitive verb in the Bihārī dialects, and in other NIA. languages, like W. Hindi, etc. (e.g., Hindōstānī « wuh gayā hai » = « asāu gataḥ asti »; Gujarātī « bū cālyō chū » = « aham calitāḥ asmi »). The static and continuous use with the substantive verb separated or united can in this way be explained. So that the « -iyā, -iñā » form would seem to combine in Bengali both the conjunctive and the passive participle (the latter in the case of intransitives); but from Early MB., from the similarity of forms (« -iyā » for both of them) and from the nature of the constructions, any such original distinction was lost sight of.

The participle in « -iyā, -iñā » and the auxiliary have coalesced but loosely in Bengali. To emphasise an « -iyā-chē, -iyā-chilā > -ē-chē, -ē-chilā » form, the emphatic particles ই « i » and তো « tō » *indeed, surely* generally come in between, and not at the end. This is especially noticeable in the Standard Colloquial. Thus, প'ড়ে-ই-ছে « pōṛē-i-chē » *it has fallen, to be sure*; দিয়েই-তো-ছিলুম « diē-i-tō-chilum » *I had indeed given, I had very nearly given*; দিয়ে-তো-ছি « diyē-tō-chi » *I have given in truth*; etc. The emphatic, however, can also come at the end: e.g., প'ড়েছেই প'ড়েছে « pōṛēchē-i pōṛēchē » *it has certainly fallen*; etc.

The use of root « thāk » for the future progressive and perfect is rather rare in MB.: « √thāk », when not put in the future, expresses a continuous state in compound verbs with the « -iyā, -iñā » form: e.g., ŠKK., p. 176, বসিঞ্চা ধাক « bāsiā thākā » *remain sitting, remain seated*.

**758.** Two dialectal forms for the progressive tense may be noted.

(5) The 'South-West Bengali' progressive, made by combining the present tense of principal verb with «  $\sqrt{\text{tha}}$  » to remain regularly conjugated : e.g., কৰিছি  $\langle \text{kāri}-\text{thi} \rangle$  I do + I remain = I am doing; যাউছু  $\langle \text{jāu}-\text{thu} \rangle$  thou goest + thou remainest = thou art going; হয়েছে  $\langle \text{hāy}-\text{thē} \rangle$  he is + he remains = he is (= Standard (O)lloquial হ'চ্ছে  $\langle \text{hōcchē} \rangle$ ). In some cases, the principal verb is not conjugated, but put in the conjunctive : ধোবাইছ  $\langle \text{khābāy}-\text{thā} \rangle$  you are feeding. (See LSI., V, I, pp. 108, 109 ff.) The Common Bengali « -i » + « āch » -ch- form is also known in this dialect. The root «  $\sqrt{\text{tha}}$  » (< sthā) is not found elsewhere in Bengal. This use of two finite forms side by side is exactly of the type found in Brajbhākhā and in Rājasthānī-Gujarātī noted at pp. 1024-1025.

(6) In the district of Bogra, and in some other North Central Bengal tracts, there is a progressive form in « -(i)t, -it- » + root « āch » : thus কৰতিতেছি  $\langle \text{kārtitechi} \rangle$  I am doing, কৰতুতুছ  $\langle \text{kārtutuchu} \rangle$  thou art doing, কৰতিতিছে  $\langle \text{kārtitichē} \rangle$  he is doing, খাটিতিতেছি  $\langle \text{khāttitechi} \rangle$  I am labouring (LSI., V, I, pp. 152-153). This form appears to be merely the « -itē, -it- » participle further strengthened by the locative affix « -tē »—it is really a double locative form : « kāritē + -tē ». The personal termination of the auxiliary substantive verb seems to have influenced the « -itē-tē » of the principal verb form, and to have altered it accordingly, at least in the 2nd person : « kāritētē, \*kāritatē + āchu > \*kārt(e)tē-chu > \*kārtutu-chu ».

The use of the « -r- » affix for the progressive in E. Vāṅga and S.-E. Vāṅga has been discussed before (pp. 994 ff.).

### [M] CAUSATIVES.

**759.** The Causative in Bengali is made by adding the affix আ « -ā- » to the root, with euphonic « w » or « y » between vowels : e.g., কৰ «  $\sqrt{\text{kār}}$  » to do > কৰা «  $\sqrt{\text{kārā}}$  » to cause to do ; থা «  $\sqrt{\text{khā}}$  » > থাওয়া «  $\sqrt{\text{khāā}}$ , khāwā » to cause to eat ; দে «  $\sqrt{\text{dē}}$  » > দেওয়া, দেওয়া «  $\sqrt{\text{dēā}}$ , dēwā, dēyā » to cause to give ; জী «  $\sqrt{\text{jī}}$  » > জীওয়া « jiyā » to cause to live. There are of course old causatives of OIA. which do not add this « -ā- » affix, but show original root-modification (Ablaut) and behave like independent roots, which have been noted before (*supra*, pp. 876-877).

The source of this « -ā- » is the MIA. « -āva- », from OIA. « -āpa-ya- », which has been indicated above (*supra*, p. 880). The normal OIA. form « -aya- », with modification of the root vowel, became considerably curtailed from First MIA., and « -āpaya- » largely took its place. Thus we have in the Aśoka Inscriptions forms like « kārāpita-, pārāpita-, vivāsāpaya-, sāvāpaya- » (= Skt. kārita, hārita, vivasaya-, śrāvaya-), and in Pali « vasāpēti, sarāpēti (✓smṛ), pucchāpēti (✓pucch), siñcāpēti, palāpēti », etc., etc. This « -āpaya- » even invaded the domain of the denominative. In Second MIA., it became « -āva-, -āvē », and when there grew a confusion between the « -aya- > -ē- » causative and the simple verb (see *supra*, pp. 933-934), the « -āv-, -v- » form with the unmistakable « -ā-, -v- » in it easily became established as the causative affix in Late MIA. and NIA.

In the Caryās, the causative affix occurs as « -āva- », as in « bandhāvāē » *causes to bind* (Caryā 22); and this « -āva- » was contracted to « -ā- » in MB. (*supra*, p. 350, *Phonology*). The « -ā- » causative has been extremely common in Bengali from its very origin.

**760.** The Verbal Noun from causative roots takes the affix আন, আনো, « -ānā, -ānō », which represents « -āpa- » base + « -na »: cf. Skt. « dā-pa-na » *causing to give*, « jñā-pa-na » *causing to know, announcement*, etc. On the model of these, First MIA. built up forms like « \*kārāpana, \*cālāpana » etc.; and a generalised « -āpana » gave Second MIA. « -āvāṇa », extended to « -āvāṇa-a » by the « -(k)a » affix, which became the Bengali causal noun affix « -ānā, -ānā, -ānō » ('Formative Affixes Nos. 13, 13a,' *supra*, pp. 664, 665).

### 761. Participles of the Causative.

The Active Present Participle has the usual affix ইত, ইতে « -it-, -ite », contracted to « -t, -tē » in the Standard Colloquial (see *supra*, 'Formative Affix No. 10,' p. 663). The archaic form « -anta » is not found with causative verbs. Assamese has « -āñtā »: « kārāñtā » *one who causes to do* (beside « kārāōwā » = « kārā-ū-ā » with « -ū-ā » affix, for which see pp. 678, 679), « khuwāñtā » *one who causes to eat* (beside « khuōwā »). Bengali has to indicate the active causative participle idea by a clumsy phrase—যে করার সে, যে খাওয়ার সে « jē kārāy sē, jē khāwāy sē », etc.

The Causative Passive Participle affix is আন, আনো <-āna, ānō> (see *supra*, p. 666). Instances of <-ānā> are not very common in MB., but they do occur: thus, ŠKK., pp. 109, 116, 318 শুখান <śukhānā> *dried*; KKC. (Vanya-vāsi edition), p. 147 হারান <hārānā> *lost*; VSP., p. 263 (17th century text), সিজান <sijānā> *boiled*; etc. The more favourite way seems to have been the <-il-> affix (see *infra*, p. 1032). On the analogy of the verbal noun in <-ā>, presenting an identical form with the passive participle in <-ā> (<cālā> = *a going*, also *gone*; <kārā> = *a doing*, also *done*), the <-ānā> affix, found also in the causative verbal noun, seems to have been strengthened for the passive participle in Modern Bengali.

The <-ānā> affix does not seem to occur in Assamese, in Oriyā, and in the Bibārī dialects, but it is found in E. Hindi, and in W. Hindi, and it also occurs as a passive form in Rājasthānī-Gujarātī; thus, Tulasi-dāsa has forms like <phirānō, juṛānī, harakhānē, lapaṭānī, akulānī>, etc.; in Early W. Hindi, the <-āna> was found, but now it seems to have fallen into disuse: thus, Kabir has (ed. Kshiti-mōhan Sēn, III, p. 62) <māyā dēkha-kē jagata lubhānō, kāhē rē nara garabānō?.....prēma-kē hātha kāhē na bikānō?> *the world has been charmed seeing Māyā; why, O man, has been this boasting? why hast not been sold in the hand of love?* (it would be seen that in <bikānō> we have the causative passive participle; in the other two cases, and also in E. Hindi <harakhānē, akulānī, lapaṭānī> given above, the forms are denominative passive participles); in Rājasthānī, forms like <sunānō, batānō> *was heard, was displayed*, etc., are past passive forms (from passive participles: cf. LSI., IX, II, p. 58); and in Northern Gujarātī, <-ānō> is the passive participle affix for roots in <-ā>, e.g., <mārānō> *was killed*, <dīthānō> *was seen*, <bharānō> *was filled*, etc. (LSI., IX, II, p. 343).

The source of this <-ānā> seems to be <-māna>, the OIA. affix for the present participle for *ātmanē-pada* and passive verbs. The past sense can easily evolve in the passive verb: *being done, being caused to be done, caused to be done*, and also simply in the passive participle, *done*. There might be in this matter some influence from the <-na> passive participles of OIA., which in some cases came down to Late MIA., e.g.

« *din̄ṇa*, *kin̄ṇa*, *rūṇṇa*, \* *lin̄ṇa* » etc.; and already in one instance at least we have a passive participle use of « -māna » in Pali, in combination with « -ta », in « *vibhāta-māna* » *become bright* (Geiger, ‘Pali Litteratur und Sprache,’ § 191, note: Geiger, however, regards the reading as doubtful). The form « -māna » in Epic and Classical Sanskrit becomes « -āna », and « -āna » is the more common form (Whitney, ‘Skt. Grammar,’ § 1045 f.). The form « -āna » also occurs in Pali, and in later MIA. it is also found as « -āna », though there it cannot be said to be common. The passive participle use of « -āna » came in during Second MIA.: a form like « *palāṇa* » (= Skt. « *palāyita* » = Bengali † পলান, পলানো † *pālāṇā*, *pālānō*) already occurs in Jaina-Mahārāṣṭri (Tessitori, ‘Grammar of OWR.,’ § 126 [2]).

**762.** In MB. and dialectal NB., the passive participle of causatives occurs with the usual « -il- » affix: e.g., ŠKK., p. 58, লোটাইল *lōṭāīlā* » *caused to be rolled, rolled*; p. 318, আখাইল *ākhāīlā* » *scoured, washed*; East Bengali কড়াইল *kārāīlā* » *done, caused to be done*, জুড়াইল *jurāīlā* » *cooled* = Standard Literary and Colloquial « *kārāṇā*, *jurāṇā* ». In West Bengali, as in W. Murshidabad for instance, the « -il- » participle (contracted to « -l- ») occurs in the compound tense (perfect), but not independently: e.g., লাগালচো [lagalčuo] *have you fixed?*, কি খালচিলা [ki khālčhila] *what were you feeding with?*, দেওয়ালচে [dēoṛālče] *is causing to give*, etc. The « -l- » form occurs in the Oriyā and in the Bihārī dialects. Assamese however prefers the « -ā » form (« *kārōwā* » *caused to be done* = « \* *karāpita-* » + « -ā »).

**763.** Double Causatives—such as are found in Bihārī (e.g., Maithili « *dēkhab* » *see*, causal « *dēkhāēb* » *show*, double causal « *dēkhābāēb* » *cause to show*; « *girab* » *fall* > « *girāēb* » *fell* < « *girābāēb* » *cause to fall*; Bhōjpuriā « *dēkhal*, *dēkhāwal*, *dēkhāwāwal* », etc.), in Eastern Hindi (e.g., Lakhimpurī Awadhi « *hāsab* » *smile*, « *hāsāwab*, *hāsāwāwab* »), in Western Hindi (e.g., Hindostānī « *karnā*, *karānā*, *karwānā*; *dēnā*, *dilānā*, *dilwānā* »), in Panjābī (e.g., E. Panjābī « *sikkhnā* » *learn*, « *sikkhāunā* [sikkhlāunā], *sikkhwāunā* »), in Rājasthānī-Gujarātī (e.g., Gujarātī « *karvū*, *karāvavū*, *karavāvavū* »)—have not been found in Bengali and in Oriyā.

But they occur in a restricted way in Assamese (*e.g.*, « kār, kārā, kārōwā »). The « -l- » causatives of Western Hindi and Panjābī, and of Rājasthānī-Gujarātī, and the « -d-, -r- » causatives as in Rājasthānī-Gujarātī (*cf.* Tessitori, 'Grammar of OWR.', § 141 [3]), are also unknown in Bengali and its sister speeches. A few Hindostānī « -l- » forms occur as loans: *e.g.*, বাতলান « bātlānā » *to inform, to describe*, in slang or familiar colloquial; দেলান « dēlānā » *to cause to give* in Late MB.; and the nouns ধোলাই « dhōlāi » *a causing to wash > cost of washing*, সেলাই « sēlāi » *sewing* and চোলাই « cōlāi » *distilling*.

**764.** There is in Bengali a periphrastic way of forming the causative with the verbal noun in « -ā » and the verb করান « kārānā » *to cause to do*. This method is exceedingly common in Rājha Bengali, outside the Standard Colloquial: thus রাখ « √rākh » *to keep*, রাখা করান « rākhā-kārānā » *to cause to keep*; so আনা করান « ānā-kārānā » *to cause to bring*, ডাকা করান « dākā-kārānā » *to cause to call*, খাওয়া করান « khāwā-kārānā » *to cause to eat*, দেওয়া করান « dēwā-kārānā » *to cause to give*, etc. The use of the causative form করান « kārānā » with *ts.* or *sts.* nouns is also common in Standard Bengali: *e.g.*, স্নান করান « snānā-kārānā » *to cause to take a bath*, গান করান « gānā-kārānā » *to make sing*, নাচ করান « nācā-kārānā » *to make dance*, দাঢ় করান « dāṛā-kārānā » *to cause to stand*, etc.; such instances are extensions of nominal compound verbs with কর « √kār », and we have cases in the ŠKK. also—*e.g.*, চেতন করান « cētānā kārānā » *to bring to senses*, পান করান « pānā kārānā » *to cause to drink*, etc.

### [N] DENOMINATIVES.

**765.** Denominatives have occurred in all the periods of the language: *e.g.*, « mātēla » (Caryā 50: māta < matta); ŠKK., p. 159, খঙ্গিবে « khāngāibē » *will be angry* (khāngā *anger*); p. 158, খেআইলেঁ « khēailē » *I ferried* (khēā = *ferry*); p. 191, ভাঙ্গসি « bhāṅgāsi » *jestest*, ভাঙ্গাইল « bhāṅgāili » *didst jest* (*bhāṅga* *fool, buffoon, knave*), আউলাইল « aūlāili » *disherelled* (ākula); p. 372, বিষাইল « biṣāilā » *poisoned* (viṣa), etc.

Commonly in Bengali, the noun, if it is a short form (disyllabic > monosyllabic), is used as a root: চিন « cīn » (*cihna*)—চিনিবে, চিন্বে

« *cinibē, einbē* » *will recognise*; তাত  $\leftarrow$  *tāt̪* » *heat* (*tapta*)—তাতিল, তাতশ  
 • *tātilā, tātlā* » *became hot*; পাক  $\leftarrow$  *pāk̪* » (*pakva*)—পাকিতেছে, পাকছে  
 • *pākitēchē, pākchē* » *is becoming ripe*; কম  $\leftarrow$  *kām* » *small, less* (Persian *kam*)—  
 কমিল, ক'মল  $\leftarrow$  *kāmilā, kā'mlā* » *became less* জম  $\leftarrow$  *jām* » *gathering* (Perso-  
 Arabic *jam'*)—জমিবে, জ'ম্বে « *jāmibē, jā'mbē* » *will gather, will flourish*; etc.  
 But the distinctive affix for the denominative in Bengali is আ  $\leftarrow$  -ā- :  
 শাখ  $\leftarrow$  *sāñḍ* » *hone, whet-stone*, শাখাইল  $\leftarrow$  *sāññāilā, sāññā'lā* » *whetted*;  
 ঢাঁক  $\leftarrow$  *dāṛḍ* » *stick, rod*, ঢাঁড়ায়  $\leftarrow$  *dāṛḍāy* » *stands upright, stands*; তল  $\leftarrow$  *tal̪* »  
*bottom*, তলায়  $\leftarrow$  *talāy* » *goes to the bottom*; ঘন  $\leftarrow$  *ghānā* » *thick*, ঘনাইতেছে  
 « *ghānāitēchē* » *is thickening*; MB. দৃ়  $\leftarrow$  *dāṛhā* » *firm*, দৃ়ঢ়ান  $\leftarrow$  *dāṛhānā* »  
*to make firm*; etc., etc. No definite rule can be laid down where the  
 formative affix is employed and where it can be dispensed with. Here-  
 in in the NIA. Bengali is as arbitrary as OIA. and MIA.: cf. Sanskrit  
 « *bhiṣakti, kṛṣṇati* » *beside* « *kṛṣṇāyatē, kavayati* ». It may be noted  
 that in Dravidian, Kōl and Tibeto-Chinese, the root could be used both  
 as a noun and a verb.

The OIA. affixes to form the denominative (apart from cases where no such affix was used) were « -a-, -ya-, -ā-ya-, -a-ya, -i-y-a-, -i-y-a, -ū-ya,  
 -u-ya-, -s-ya (-ś-ya) ». The form « -ā-ya- », resembling the causative  
 affix « -āpaya (-āvaya) », seems to have become more common than the  
 rest in Early MIA.; and the colourless or « -a- » form also was largely used  
 (cf. Geiger, 'Pali Litteratur und Sprache,' § 186, § 188). The causative  
 largely influenced, and then encroached upon the domain of the deno-  
 minative. In Pali, e.g., we find denominatives with the generalised MIA.  
 causative affix « -āpaya- », like « *ōpuñjāpēti* » = Skt. « *ava-puñjayati* »,  
 « *ussukāpēti* » = « *utsukāyatē* », and also causative-denominatives like  
 « *sukhāpēti, dukhāpēti* » (Geiger, § 187). In Second MIA., there is a  
 greater mix-up with the causative; the old forms are retained, but « -āya- »  
 is more prominent, and « -āya- > -āa- » and « -āpaya- > -āvē- -āv- »  
 approach each other (Pischel, §§ 557 ff.). As it has been seen before  
 (Bengali Denominative Passives in « -ā- », *supra*, p. 929), the distinction  
 between the denominative and the causative is all but lost in NIA.,  
 being preserved only in the Bihārī dialects.

The verbal noun as well as the passive participle affix for the denominative is আন « -ān », which seems to be extended from the causative (see *above*, pp. 1030-1032). The verbal noun in « -ila » is also found in dialectal Bengali : OIA. « dandāyita » > MIA. « dandājā » + « -illa » > Bengali দাঁড়াইল, as in W. Bengali (Murshidabad) দাঁড়ালেছে « dāndāla-chē » has stood so ; জুতুলছিল = জুতাইন্ছিল « jutulāchilā » < jutāīlāchilā > gave a beating with the shoe, < jutā shoe ; etc.

[O] VERB SUBSTANTIVE, AND DEFECTIVE VERBS.

766. Five roots express the substantive idea in NB. : আছ « āch », হ or হো « hā, hō », থক « thāk », রহ « rah » and বট « bat ».

Of these, « āch » is the most important. Bengali « āchē » is, *are* comes regularly from Second MIA. « acchāï » (which is found in Mahārāṣṭrī, Jaina-Mahārāṣṭrī, Ardha-māgadhi, Āvanti, Paiśācī and Western Apabhrāṇa : cf. Pischel, 'Grammatik der Pkt.-Sprachen,' § 480), First MIA. « acchati » (as in Pali). Various derivations of this MIA. root « acch » have been proposed, connecting it with either « √ās » *to sit* or « √ as » *to be* (see Pischel, *loc. cit.*) The derivation favoured by Pischel is from OIA. « √ ā, ṛch » *to go*, which also meant « mūrtti-bhāva, indriya-pralaya, dravya-kāthinya » *to take a form, to have loss of the senses, to become hard*, according to the *Dhātu-pāṭha*. A verb meaning *to go* may develop the sense of *being*, and we find that in Kaśmīrī « gatsh » *to go* is very often used in the sense of *being, becoming* (cf. Grierson, 'Dictionary of the Kaśmīrī Language,' ASB., pp. 313, 315). But it is highly unlikely that this most widely used IA. substantive root (see following paragraph) should be merely a semantic development out of a verb meaning *going*, and that this development should have taken place as early as the First MIA. period, if not earlier. The most satisfactory derivation of « √acch, āch, ch » is from an OIA. « \* √acch », which is not preserved in Vedic or Sanskrit. The Indo-European root « \* es », = « as » of OIA., occurred in thematic forms as well : « \* es-e-ti » (which would correspond with a possible OIA. « \* as-a-ti ») and « \* es-ske-ti » (which would agree with an OIA. « \* as-cha-ti, \* acchati »), beside the athematic « \* es-ti » (= OIA. « as-ti »). Sanskrit grammarians do not recognise « -cha-, -ccha- »

as a verbal theme (= « \*-ske-, -sko- » of Indo-European), occurring as it does in less than a dozen roots of Skt., e.g., « iech (< is), uech (< us), p̄ech (< f), gacch (< gam), p̄rech (< \* p̄fs, cf. p̄fs-ta), m̄rech (< m̄f), m̄urēch (< m̄ür), yacch (< yam), yuech (< yu), vānch (< van) » : but the source of this « -ccha » in Indo-European, namely, « \*-ske, -sko- », was a distinctive verbal theme which is of greater frequency and importance in other branches of IE. (cf. Brugmann's Short Comparative Grammar, French trans., pp. 549, 550 ; A. Meillet, 'Introduction à l' Étude comparative des Langues indo-européennes ' , pp. 185, 186). The « \*-ske/o- » theme is found with « \* √es » in a number of ancient Indo-European speeches—Greek (e.g., Homeric preterit « éskon, éske »), Latin (Old Latin future « escit »); Tokharian (« sketar » is, « skente » are), Armenian (subjunctive « içem »). This derivation of « acch, acchatī » has been suggested by Sylvain Lévi and A. Meillet ('Remarques sur les Formes grammaticales de quelques Textes en Tokharien B : I, Formes verbales,' p. 28, from the 'Mémoires de la Société de Linguistique,' 1912). Cf. पहुँच « √pāhūch », *supra*, pp. 344, 473.

The root « āch (ch) » is now found in all Magadhan speeches except Magahi and Bhōjpuriā. It seems that these two dialects also at one time possessed them, for it is occasionally met with in old poetry in Bhōjpuriā (see *supra*, p. 167). Eastern Hindi similarly seems to have had it also : in Early Eastern Hindi, as in Malik Muhammad Jāyasi for instance, it figures (e.g., at pp. 31, 35, 45, 53 of the ASB. edition,— « āchahi, āchā, āchabī », which have been explained as meaning *good*, « acchā », by Sudhākara Dvivēdi). The MIA. source dialect of Western Hindi, Saurasēni, possessed it, according to Vararuci (XII, 19 : « astēr acchahī »); « achnā » is recognised in Hindi as a root, and it seems that instances of it occur in Old Western Hindi poetry, but it is no longer a living form in that speech. It is found in Gujarāti as much as in Bengali, and it is equally common in some of the Rājasthāni dialects. In Marāṭhī, it is common as « asñē ». It figures also in most of the Pahāṛī speeches. The range of « acch » thus appears to have been fairly extensive (see *supra*, p. 167). The loss of it in some of the NIA. speeches is nothing exceptional: witness the disuse of the Old English substantive verb « weorðan » in New English,

while it is retained (as « werden ») in New High German. But it seems this root, despite its mention as a Saurasēni form by Vararuci, was not a popular one in the Midland: its being ignored by Sanskrit may be due to a restricted occurrence in the Midland; and Midland influence may have further curtailed it in Eastern Hindi and in Bhōjpuriyā and Magahi in recent times.

« āch » is a defective root in NB. as well as in MB. It occurs only in the present and the past in NB., but in MB. the imperative, present participle, conjunctive and verbal noun in « -iba » also are found. Thus,

Present : 1. আছি « āchi », 2. আছিস, আছ • āchis, āch& », 3. আছে « āchē », MB. আছএ « āch&ē »; 2 and 3 honorific আছেন « āchēn », MB. আছস্তি, আছেন্ত, আছন্ত « āchānti, āchēnt&, āchānt& »;

Past : 1. (আ)ছিলাম, ছিলুম, ছিলেম « (ā)chilām, chilum, chilēm », MB. (আ)ছিলোঁ « (ā)chilō » etc.; 2. (আ)ছিলি, ছিলিস « (ā)chili, chilis », (আ)ছিলা « (ā)chilā », ছিলে « chilē », etc.; 3. (আ)ছিল « (ā)chil& », † আছলেক « āchālēk& », MB. also (আ)ছিল « (ā)chilā »; 2 and 3 honorific ছিলেন « chilēn », MB. (আ)ছিলস্তি, (আ)ছিলাস্তি, (আ)ছিলেন্ত, (আ)ছিলন্ত « (ā)chilānti, (ā)chilānti, (ā)chilēnti, (ā)chil&nta »;

Imperative, MB. 3. আছউক « āchāuk& », (আ ছুক, « (ā)chuk& »;

Present Participle, MB. (আ)ছিতে « (ā)chitē »;

Conjunctive, MB. (আ)ছিযা « (ā)chiyā, ছিযঁ « chi(y)& »;

Verbal Noun, MB. আছিবা « āchibā ».

The aphæresis of the initial « ā- » is as old as eMB.: e.g., ŠKK. p. 124, ছিতে « chitē », p. 232, ছুক « chuk& »; cf. also p. 124, আগুছিবঁ « āguchi& » having been before.

In Oriyā, the past and future tense of « āch » shows another root, « tha » (as in « thilā » *he was*, « thilū » *I was*, « thibē » *they will be*, etc.), of which the source seems to be OIA. « √sthā » ( « sthita > thia+illa > thila »; but cf. Early Assamese « thāil& » *remained* < « \*thaŷa- > + « -illa »). ‘S.-W. Bengali’ uses a base « tha », also from « √sthā », but with cerebralisation, in the equivalents of Bengali ছিল « chil& » etc., in

the compound tenses (see *supra*, p. 1029). Beside equivalents of « \*acchita + -illa », MIA. forms based on « sthita + -illa » were thus current in the Prakrit dialects brought to Bengal.

767. Root হ, হো « hā, hō ». This is apparently a single root in NB., but the form really represents two roots which have merged into one—one being « √ah » or « √ha » from OIA. « √as », the other « √hō » from OIA. « √bhū ». The distinction between the two is preserved in many NIA. speeches, at least in form. Thus, we have Magahi past forms « hal, halai » from « √ha », beside « hōl, bhēl » from root « √hō, bha = √bhū »; W. Hindi has « hai » *is*, « hū » *am* (in Early W. Hindi literature frequently occurring as « abai, āhai ; ahaū, ahū, āhū » etc., from « √ah, as »), beside « hōwē, hōē ; hōwū, hōū » *may be* (from « √hō=bhū »). Cf. Grierson, ‘Maithili Grammar,’ § 219, for « √ah » in Maithili. And in West Bengali, in the Khāriā-ṭhār dialect of Manbhum District, the verb occurs as আহ় « āhāy » *is* (LSI., V, I, p. 97).

The OIA. « √bhū » became « hō, hū » in the NIA. languages. In MB., we have হও, হো « huē, hōē », with its equivalents « huāi, hōi » in Oriya and « hōwē » in Early Assamese. MB. and Assamese show beside these the form হয, হয় « hāē, hāy », honorific MB. হয়তি « hāyānti=hāānti » (p. 9, Chuti Khān’s ‘Mahābhārata’), হয়তা « hāyāntā=hāāntā » (ibid., p. 56), হান্তি « hānti », etc. In the ŠKK., however, the « hō » form is extremely rare, occurring only once, and « hā » is the common form. In the Caryās, we find « hōi » and « hōnti », and the « ha, ah » form does not occur. The past tense of « √hō », apart from হোইল « hōilā » which has merged in হইল « hāilā » (< \*ah-il-ā), shows in OB. and MB., as well as in Early Assamese, the forms ভাইল, ভাবিল, ভেলা « bhāilā, bhāvīlā, bhāilā, bhāilā », etc. A conjunctive ভই « bhāi » is also known. The « bha » base occurs also side by side with « hō » in other NIA. e.g., W. Hindi (Hindostāni) « hūā » beside dialectal « bhayā » ; and we can also note the Hindi verb « bhāwē » = « bhāvayati », (cf. the MB. ভাব « bhāy ») *seems*. OIA. « √bhū » gave « hō » through the occurrence of the verb in the middle of the sentence (see *supra*, p. 553), and side by side with this intervocal « -h- » modification, the original initial « bh- » seems to have remained as a stereotyped form in the same area.

In MIA., all roots of OIA. tended to conform to the thematic « -a- » group. Root « as », athematic in Vedic and Sanskrit, would thus seem to have developed a thematic form « \* as-a-ti » beside « as-ti », if this did not already exist in OIA. OIA subjunctive forms, like « ásati, ásat » might have exerted some influence here. The OIA. athematic « as-ti » survives through MIA. « atthi » in the Gujarātī negative form « nathī < nāsti >, and is not found elsewhere in NIA. The form « \* as-a-ti » seems to be the source of NIA. আহৰ « āhāy » (West Bengali), হএ হয় « hāē, hāy » (Standard or Common Bengali), « ahaī, haj » (W. Hindi), « āhē » (Marāṭhī), etc. This « \* as-a-ti » however, has not been found in MIA., and the phonetic puzzle of the change of « -s->-h- » remains unsolved (*supra*, pp. 549-550). Jules Bloch suggests connecting Marāṭhī « āhē » with OIA. « ā-bhavati », as a likely derivation of it ('Langue Marathe,' p. 294). But the loss of prefix « ā- » over a great part of the North Indian area would be strange. In any case, with the distinct occurrence in NIA. of « hō, ha » side by side, « ha » cannot with any certitude be derived from « bhū ». Bengali phonology shows that the source of « ha » in OB. was « \* ah » and not « hō=bhū » : নয় « nāy » is not < ন-হয় « nā-hāy » = « na + \* ahaī » ; নহিলে < নহিলে « nālē < nāhīlē » on not being < « na + \* ahilē » ; MB. নহিব « nāhibbā » shall not be = « na + \* ahiba » : the change is of « ā + ā > à > å » (for which see *supra*, pp. 347, 555). In the Standard Colloquial, MB. করিব, চলিব « kāribā, cālibā » I shall do, I shall go by loss of the interior « -i- » and mutation of the preceding « -å- » give [korbo, çolbo], but there is no such mutation in the case of বহিব, সহিব « bāhibā, sāhibā » I shall bear, I shall suffer > [bəbo, ſəbo], when the « -i- » is dropped ; but when the « -i- » is retained (the presence of « -h- » preventing the hiatus in OB. and eMB. has something to do with the preservation of the « -i- » in such cases), we have mutation : [boibo, ſoibo]. Now হইব « hāibā » shall be gives in the Standard Colloquial [fiəbo] : this would seem to be based on \*অহিব, \*অহ্ব « \* āhibā, \* āhbā », which then by metathesis becomes হব « hābā » [fiəbo]. A form from « hō=bhū », হোইব « hōibā » would give in the Standard Colloquial \* [fiəbo], with « -ō- » in the root, but such a form is unknown. In the past tense (first person), we

have for the above roots, respectively, [korlum (*kollum*), *çollum*], but [*boilum*, *foilum*] and [*fiolum*] : [*bolum*, *jolum*] would be exceedingly rare, and wrong for the Standard Colloquial dialect ; and [*fiolum*] never occurs. [*fiolum*] apparently is not based on  $\leftarrow * \text{ah-il-um} < \sqrt{\text{ah}}$  \*, but rather on  $\leftarrow \text{hō-il-um} < \sqrt{\text{bhū}}$  : in the former case it would have fallen in line with [*boilum*, *foilum*], and with [*koilum*]  $\leftarrow \sqrt{\text{kāh}}$  *to speak* etc., and preserved the  $\leftarrow \text{-i-}$  (in the Standard Colloquial). The future tense thus seems to preserve  $\leftarrow \sqrt{\text{ah}}$  \*, and the past  $\leftarrow \sqrt{\text{hō}}$  \*.

**768.** The root रह « *rāh* » *to remain, to continue to be* (the causative of which occurs in the ŠKK., रहाए « *rāhāē* » *stops*), is a regular verb which can be said to form one of the substantives in Bengali. It occurs in other NIA.—Marāthī « *rahāñē*, *rāhnē* », Gujarati « *rahēvū* », Sindhi « *rahanu* », Panjabī « *rahiñā* », W. Hindi « *rahnā* », E. Hindi « *rahab* » : it is found also in the Dardic Kaśmīrī.

This root is of obscure origin. A common derivation is to regard it as an intransitive formation from a passive verb : Skt. « *rakṣyatē* » *is preserved, is kept* > MIA. « *rakkhiaī* » > « *rākhiaī*, \* *rāhiaī*, \* *rāhiaī* » > NIA. « *rahaī* » *remains* (cf. Platts, ‘Hindustānī Dictionary,’ under « *rahnā* »). Despite the presence of the Marāthī « *rāhnē* », this derivation is not convincing. Then the NIA. form « *rah* » cannot be affiliated to any of the Sanskrit roots, « *rah* » *to separate, to aba don*, « *rañh* » *to hasten, to speed*, and « *lañgh* » *to leap over*, because of the insurmountable difference of meaning. This root however occurs in MIA., e.g., Jaina Prakrit « *rahaē* » *remains, stays*, and MIA. *dēśī* « *rāho* = *nirantarah* » (as referred to by Jules Bloch, ‘Langue Marathe,’ p. 393).

It would be strange indeed if such an important NIA. root, a root of elementary significance, and so widely spread too, should not be of OIA. origin. There is the Skt. root « *arh=argh* » *to deserve, to merit, to be worthy of, to have a claim to, to be entitled to, to be worth, to be able*, etc. This is connected with the Greek « *alphé* » *worth, value* ; and Skt. «  $\sqrt{\text{arj}}$  » *to acquire* is also supposed to be related to this «  $\sqrt{\text{argh}}$ , *arh* » (Uhlenbeck, ‘Etymologisches Wörterbuch der altindischer Sprache’ ; also J. Leumann, ibid., I Theil, Dissertation, Strassburg, 1893). In Pali

« √ rah » figures as « araha- » : but the old meaning is preserved. Skt. « √ arh » in the present tense second person is used with the infinitive as a polite request : « kartum arhasi, dātum arhasi » *please do, please give.* This « arb, araha- » does not agree with the NIA. « rah » in sense, although in form they are almost identical.

There is in Middle High German a verb « rēgen » meaning *to raise oneself up, to be rigid, to be fixed*, in Modern German « emporragen » *to tower, to hervorragen* » *to rise above, to project, to stand out.* There is also in Latin a verb « rīgeo, rīgēre » *to be be fixed, to stiffen.* It has been suggested that the Latin and the German forms are connected, and the hypothetical Indo-European root « \* régh-o-, \* ḡh-é- » has been proposed as the source of both (August Fick, 'Vergleichendes Wörterbuch der idg. Sprachen,' Göttingen, 1890, p. 517 : Fick regarded this as belonging specially to the West European i.e. "centum" group of Indo-European, and he further connected the Greek « √arkh » *to be first* and Lithuanian « rāgas », Old Slav « rogū » *horn* : W. Prellwitz accepts all this in his 'Etymologisches Wörterbuch der griechischen Sprache,' Göttingen, 1905, under « árkhō » ; E. Boisacq, however, regards these etymologies as dubious, 'Dictionnaire étymologique de la Langue grecque,' Heidelberg, 1906, under « arkhós » ; and A. Walde also disputes them, 'Lateinisches etymologisches Wörterbuch,' Heidelberg, 1910, under « rīgeo, recens, frīgeo »).

Was there a root « \* ragh, rah » = *to stand, to be fixed, to be stiff* also in OIA.? The possibility of an OIA. form like « \* ragh, rah » is made a probability by the presence in most NIA. of « √ rah », and also of « √ raha » in MIA. (as in Jaina Mahārāṣṭri « sō yā aiva jūyā-pasangī ; nivasanā-mēttam pi na rahaē » *he is exceedingly addicted to gambling : not even his clothes remain* : Jacobi, 'Ausgewählte Erzählungen in Mahārāṣṭri,' Leipzig, 1886, p. 58 : it features also in the Jaina kārya « Siri-sirivāla-kahā » : cf. 'Pāīa-sadda-mahaṇṇavō' by Hargovinddas Trikamchand Seth, Calcutta, 1925 ; it occurs also in the late work 'Prākṛta-Pāīngala'). The use of this root in MIA. Jaina texts favours the assumption that it also occurred in the traditional Ardha-māgadhi from Early MIA. times. The eastern dialect of Asōka undoubtedly

is Ardha-māgadhi of the Early MIA. period (cf. H. Lüders, 'Bruchstücke Buddhistischer Dramen,' p. 41). In that puzzling passage in Aśoka's Pillar Edict IV, « lajūkā pi laghaṁti paṭicalitavē mām (,) pulisāni pi mē chaīḍamnāni paṭicalisaṁti », the word « laghaṁti=laghanti » has been interpreted to mean *are eager* (= « raṅghantē » : Bühlér) and *they must* (= « arhanti » : *auch die Lajjukas müssen mir gehorchen*, H. Lüders, 'Sitzungsberichte der kön. preuss. Akad. der Wissenschaften,' Vol. LIII, 1913, p. 993). But it seems very likely that it means *remain*, and is the Aśokan equivalent of the NIA. « rah » : *the Lajjukas also remain (are staying) to serve (obey) me, and they will also serve (obey) the officials who know my will* seems to be the proper translation (cf. A. C. Woolner, 'Asoka Text and Glossary,' 1925, II, p. 86). The sense of « √arh », with an implication of compulsion, is hardly suitable in this general statement in the above passage. In Bhabra Inscription, however, we have the OIA. « √arh » in the form « alah » with the « a- » retained : thus, « alahāmi hakām tam vatavē » (= arhāmy aham tad vaktavē=vaktum). The assumption of an OIA. root « \*ragh, rab, lagh », from the occurrence of it in NIA. and in (Late) MIA. (Jaina Prakrit) and from the presence in extra-Indian Indo-European of « rēgen, rigeo » etc., seems to be borne out by the Aśokan « laghaṁti ». And it is not unlikely that there was a confusion between this « \*ragh, rab, lagh » and « argh, arh, arah, alah » in MIA.

**769.** Root थाक् « thāk » *to remain < to be fixed*. It is commonly derived from the OIA. « √sthā », but Hoernle connects it with « √stabha + kṛ » > MIA. « thakka » (see *supra*, p. 680). This is certainly the true derivation, although it is possible that OIA. « √sthā » > « thā, tha » has merged into it : cf. Oriyā « √thā » beside « √thāk », Assamese past form « thāilā », Bengali causative থো঱ « thōy » *places* (sthāpayati). Equivalents of this root occur in other NIA.—in Bihārī, in W. Hindi, in Gujarātī ; and it is found in Late MIA.,—in the 'Prākṛtā Pāñgala,' for instance.

**770.** Root बट् « bāṭ » as a substantive verb in the Standard Colloquial is frequently used to express doubt or polite assent, and as such is ordinarily restricted to the 3rd person present only—बटे

« bātē »—which has practically been reduced to a particle of assent or query in Standard NB. The root is defective in not having past and future forms, and conjunctives, participles and verbal nouns. The forms for the 1st and 2nd persons, and the honorific, are sometimes used : বটি « bāti » *I am, I may be*; বটিস, বট « bātis, bātā »; বটেন « bātēn » generally with the conjunction যদি, যদিও « yādi, yādi-ō » *if, although*. The 3rd personal form is sometimes used for emphasis—সেই বটে « sei bātē » *it is he indeed*. In the West Rājha dialects, the use of « bātē » as the equivalent of « āchē » and « hāy » is still preserved : e.g., in Manbhumi, তোমার হাতে ঘাটিতে কি ? « tōmār̥ hātē ghātī-tē ki ? » *what have you got in the vessel in your hand ?* জল বটে « jāl̥ bātē » *it is water*.

In Oriyā, the counterpart of « bāt » is « ḡ̥t », also a defective verb. The loss of the initial « b (< v ) » in Oriyā seems to have been brought about by the occurrence of the verb in the middle of the sentence, which helped to reduce the « v- », which became « b- » in Bengali, to a glide « w » which came to be dropped. Maithili and Magahi have not preserved the root, but in Bhōjpuriyā it is a very common and useful substantive verb, its forms there being « bāt̥-, bār̥-, bā, bā-ni » etc.

The source of this root is the OIA. « vṛt » *to turn, to revolve, to roll, to take place, to occur, to exist, to remain* etc. : « vartatē », MIA. Māgadhi « vat̥tati, vat̥tai » > বটে « bātē » (see *supra*, p. 319).

**771.** Some Bengali verbs present irregularities in their conjugations, especially in the past bases. But these irregularities are not so great as in Panjabī or Marāṭhī. The process of standardisation early levelled down the passive participle bases derived from MIA. to a regular « -il- » form in Bengali. A few survivals, however, remain. Thus কর « √kār », past tense MB. করিল « kārilā » (> NB. ক'র্ল ক'ল্ল, কর্লে ক'ল্লে [korlo, kollo, korle, kolle]) is a new and regular formation in eMB. from the root, but the earlier form derived from MIA. « \* kaẏa-illa » is the OB. and MB. কৈল « kailā », now obsolete or dialectal : cf. Oriyā « kālā », Bihāri « kail ». So মরিল « mārilā » *died* > ম'রল ম'ল্ল [morlo, mollo], beside the older মৈল « māilā », which is found in both standard and dialectal Bengali as ম'ল [molo]; and on the analogy of « kailā, māilā », we have in MB.

a seemingly archaic মাইল « māilā » (whence the dialectal West Bengali মেলে « mēlē », i.e., « māil-ē ») for a regular মারিল « mār-il-ā » *he struck* (\*mārita + -illa), a causative form, which occurs in the Standard Colloquial as মাৱলে, মাল্লে [marle, malle < \*marile]); and also পৈল « pailā » *fell* in MB., for পড়িল « pārilā » > NB. প'ড়ল [porlo]. Root যা, জা « jā » (OIA. « yā ») has the past base গেল « gēlā » = Early Assamese « gāilā », Oriyā « galā », Bihārī « gail », from OIA. « gata » + « -ila »; this is the genuine and current form, and যাইল « jāilā » is a regular « sādhu-bhāṣā » creation out of যা « √jā », which is not the spoken form. The conjunctive forms are গেলে « gēlē » and গিয়া, গিয়ে « giyā, giyē » *on going, having gone* (cf. Early Bengali, Early Assamese গই « gāi », also found in OB.); but যেলে « jēlē » and যেয়ে « jēyē » would appear to be extremely uncommon in colloquial Bengali, and would seem to be based on the literary forms যাইলে, যাইয়া « jāilē, jāiyā ».

772. The roots meaning *give* and *take* have had a close inter-influence in their history. OIA. root « dā » *to give* did not use its reduplicated forms in MIA., and already in Transitional MIA. (Bharhut), it figures as « dēti » < « \*dayati », apparently through analogy of « nayati » > nēti » (from « √nI » *to lead, to take away*). The passive participle base was « datta » in OIA. (which seems to be preserved in the Panjabī « dittā »); and a form « \*dita » also occurred in OIA., which gave W. Hindi « diyā », Bengali দিল « di-la »; beside another in « -nn- », attested from MIA. « dinna- » and NIA. « dīnau » (W. Hindi, Brajbhākhā), « dīnha » (Early Awadhi), « dīdhō = \*dindhāü, dinhāü » (Gujarati : cf. Tessitori, ‘Grammar of OWR.,’ § 126 [3]). We have besides the form « dēl- » in Bihārī, in which occurs the vocalism of the present. NB. Vowel Harmony has largely modified the original disposition of the « -i- » and « -ē- » vowels (see *supra*, p. 894). For *take*, we have as many as three roots in Bengali. The standard « sādhu-bhāṣā » knows only ল, লহ « √lā, lāh » (which, if it is not the Skt. « labh », is at least influenced by its *tbh.* form « √lah ») : Present 1. লই « lāi », 2. লইস, ল'স « lāis, lā's », লহ, লও « lāhā, lāō », 3. লহে, লও « lāhē, lāy », honorific ল'ন, লয়েন, লহেন « lāng, lāyēng, lāhēng »; Imperative 2. ল « lā <lāhā>, লও, লহ « lāō, lāhā <lāhāhā>,

3. লাউক « lauk », honorific লাউন « laünk »; Past base লাইল « läilä- », Future base, লাৰ, লাইব « labā-, läibā- », Conjunctive লাইয়া « läiyā| », Passive Participle লাওয়া « läwā ». This « lah, lā » root occurs in MB. literature also. But it is never used in spoken Bengali. The vocalism parallels that of roots সহ, বহ « sāh, bāh » as given above (e.g., Future [ʃəfibō > ſoibo, ʃəbo], so [ləfibō > loibo, ləbo]), and thus indicates the form « lah » (< « labh ») as a source of the NB. root. The dialects (other than Standard Colloquial) use a root লে « lē », e.g., Present 1. লিহি(ই) « li(i) », 2. লিস « lis », লেও > লাও « lēo > lāo », 3. Present লেব « lēy » [læø], Past লিলে « lilē », Future লিবে, লেবে « libē, lēbē », Conjunctive লিয়ে « liyē », etc.: this root is now regarded as vulgar; but it figures in MB., and in OB. (e.g., Caryā 14, « kawadī na lēi, bōdī na lēi » *takes not a cowrie shell, takes not a farthing*; Caryā 10, « lēmi » *I take*; 32, « lēhu » *you take*; 49, « lēlī » *taken*). It seems that this « √lē », and « lā, labh » were confused with each other: « lē » was made to approach « lāh » as an elegant, literary form. The OB. conjunctive forms « lai » (Caryās 29, 38, 47), « lāiā » (28, 45), « laiā » (26) seem already to be the result of this confusion in changing the root vowel of « lē » to « la » as in « lah » (cf. NB. dialectal « liyē » *having taken* < « √lē »). This « lē » is found in Bibārī, in E. Hindi, in W. Hindi (lē-nā), etc. The source of it seems to be the OIA. root « lā » *to take*, as in Sanskrit. In Sanskrit, however, this root is not so common. The popular Skt. root is « grah », which is represented by forms in some of the NIA. speeches. The change of « lā » to « lē » is probably the result of the influence of « dēi, dēti = dāti, dadāti » (cf. Jules Bloch, 'Langue Marathe', p. 400, under *lenem*). The Standard Colloquial root meaning *to take* (occurring also in MB.) is নি, নে « ni, nē », now conjugated exactly on the model of « dē » (see *supra*, p. 894). It may be that this form is due to the change of the initial « l- » of « lē » to « n- » (see *Phonology*, p. 545); but it is at least equally likely that here we have the OIA. root « nī » *to lead, to carry off for one's self > to take*. We have আন « ān » = « ā + √nī » as a common verb in Bengali; and it is exceedingly likely that OIA. « √nī » has also survived in Bengali.

OB. had the root « ghēn » *to take* (< OIA. gṛhṇāti) : cf. Caryā 6, « ghini (= ghēni) mēli » = « gṛhitvā muktvā », according to the Commentary. It is lost to Bengali now, but Oriyā still retains this root ~~as well as~~ common form ( $\sqrt{ghēn}$ ).

It is curious that the root for *taking* also means *wearing (clothes)*, in Oriyā (<  $\sqrt{ghēn}$ ), in Marāṭhī (lēṇē), and in MIA. (< laīāṁ parihitāṁ : laīātā angē pinaddham ity anyē » — ‘Dēśināma-māla’ quoted by Jules Bloch, ‘Langue Marathe,’ p. 400 : cf. Skt. « vāsāṁsi jīrṇāni yathā vihāya navāni gṛhṇāti narō’ parāṇi »).

773. Root आ॒ <  $\sqrt{\text{ā}}$  > *to come* is a defective root, which is affiliated to root आ॒इ॑स्, आ॒स् <  $\sqrt{\text{ā}}\text{i}ś$ , ा॒s > *to come* (< OIA. ā +  $\sqrt{viś}$ ), to supply an optional past form and the familiar imperative (= singular). Thus—

3 Present, MB., NB. (sādhu-bhāṣā) आ॒इ॑से, आ॒से < āiśē, āsē >, NB. Standard Coll. आ॒से < āsē >; 3 Past, MB. आ॒इ॑सिल् < āiśilā >, NB. (sādhu-bhāṣā) आ॒सिल् < āsilā >, also MB. आ॒इ॑ल् < āilā >, NB. Standard Coll. ए॒ल् [elo], East Bengali आ॒स्ल् [aiʃlo]; 3 Future, MB., NB. (sādhu-bhāṣā) आ॒सिबे < āsibē >, NB. आ॒स्वे [aʃbē]; Imperative, 2 familiar or inferior आ॒य < āy >, 2 ordinary < sādhu-bhāṣā > आ॒इ॑स < āiśā >, Standard Coll. ए॒सो [eʃo], आ॒इ॑स्क, आ॒स्क < āisukh, āsukh >, 2, 3 honorific आ॒(इ॑)स्त्रुन् < ā(i)sunh >, Future Imperative 2 inferior आ॒(इ॑)सिद् < ā(i)sis >, ordinary NB. आ॒इ॑सिओ < ā(i)siō > > ए॒सो [eʃo]; Conjunctive आ॒सिया < āsiyā >, ए॒से < ēsē >; Absolutive, आ॒सिले < āsilē > > आ॒स्ले < āslē >, beside आ॒इ॑ले < āilē > > NB. ए॒ले < ēlē >; Present Participle आ॒सिते < āsítē > > आ॒सते < āste >.

The form < ā > comes from OIA. < ā +  $\sqrt{yā}$  > : < āyāta + -ila- > \* āilla- > \* āilla- > आ॒इ॑ल् < āilā- > ए॒ल् [elo]. The verbal noun connected with this root is आ॒ना < ānā >, which is not found by itself: but here, as the OB. form « avanā-gavaṇā » *coming and going* (found in the Caryās : = NB. आ॒नागोना < ānā-gōnā >) shows, we have <  $\sqrt{\text{gam}}$  > — < āgamana- + gamana- >. It seems a MIA. form like < \* āwāi > (= OIA. \* ā-gamati) has merged into < ā +  $\sqrt{yā}$  >. The present tense of <  $\sqrt{\text{ā}}$  > is not found in NB., but OB. shows < āvāi > (Caryā 42; also spelt < āvayi > in Caryā 43). Corresponding to this OB. < āvāi, avanā- > we have W. Hindi 3 Present < āwē >, Verbal Noun or Infinitive < ānā >; in Bihari

(Maithili), Verbal Noun « āb », Present Participle « ābait » beside « āöt », 3 Future and Conditional Past (= original Present Participle) « auta- », Present 3 person original singular « āē » beside « ābai », plural > honorific « ābathi », Future 1st person « āeb, āob », conjunctive « ābi, āi, āy ». (Grierson, 'Maithili Grammar,' §§ 312, 313). The Maithili « -b-, -o- » forms, both from original « -w- », clearly show that as in Bengali, we have also the OIA. « \*āgamati » > MIA. « \*āawāi » form : Māithili « āē = āi < āyāti », and « ābai = āwāi < \*āgamati, ābathi < āgamanti, āeb < āyātavya, āob < \*āgamitavya ». The Maithili past base always is « ail- », where it is < \*āyāta + -illa », as in Bengali « āilā » : cf. W. Hindi « āyau, āyā » (< ā-yāta-ka).

Three OIA. roots preceded by the « ā » particle thus feature in the Bengali verb for *coming* : « ā-viś », « ā-yā » and « ā-gam ».

#### [P] DUPLICATED VERBS.

**774.** Certain verb-forms are doubled in Bengali to indicate repeated, intense or continuous action. These are either conjunctives in « -iyā » (or « -i » in Early Bengali), or present participles in « -itē », used with an adverbial force with reference to the finite verb. Thus we have in OB. (Caryā 10) « chāi chōi = chōwī chōwī » *frequently touching*; (26) « dhuni dhuni » *by continually carding (cotton)*; (31) « cāhantē cāhantē » *continually scrutinising*; MB., Cāndi-dāsa, বুরিয়া বুরিয়া কান্দে « jhuriyā jhuriyā kāndē » *weeps (silently) shedding tears continually*; Gōvinda-dāsa, উড়িয়া পড়িয়া মাতল  
অমর ঘুরিয়া ঘুরিয়া ঝুলে « uriyā pāriyā mātala bhrāmara ghuriyā ghuriyā bulē » *the drunken bee flies and moves and circles round and round*, হাসিয়া হাসিয়া অঙ্গ দোলাইয়া নাচিয়া নাচিয়া যায় « hāsiyā hāsiyā Āṅga dōlaiyā nāciyā nāciyā jāy » *goes smiling always, swinging the body and dancing always*; N.B. দেখে দেখে « dēkhē dēkhē » *seeing for a long time*, খেটে খেটে « khētē khētē » *working continuously*, etc. This usage goes back at least to MIA. : cf. Late Skt. « pītvā pītvā punah pītvā, patitvā ca mahitalē », an idiom based on MIA.

**775.** There are a number of roots which are used in pairs—roots similar in meaning, or indicating connected ideas, and together they

convey an intensive idea, or the idea of the entire process involved (cf. under 'Onomatopoetic Roots,' p. 891). These do not make what are known as 'Compound Verbs,' as both the roots take inflexions; e.g., NB. বুঝে-মুছে « bujhē-sujhē » *understanding well, wiping-much* « dhuyē-muchē » *washing and wiping=making clean completely, mērē-dhōrē* « mērē-dhōrē » *striking and restraining=forcibly, কান্দে-কাটে* « kāndē-kātē » *weeps and fidgets, past tense কান্দল-কাটল* « kāndlā-kātlā », future কান্দবে-কাটবে « kādbe-kātēbē » ; নাচে কোদে « nācē-kōdē » *dances and capers, past নাচ্ল-কুন্দল* « nāclā-kūndlā », future নাচ্বে-কুন্দবে « nācbē-kūdbē » ; লাফাল-ঝাপাল « lāphālā-jhāpālā » *leapt and jumped*; হটকানো-পাটকানো « huṭkānō-pāṭkānō » *to turn topsy-turvy, to ransack*; etc. They occur in earlier Bengali as well: ŠKK., ছিণি-জুলি « chin̄di-juli » *tearing and scattering*; so ভাগি-জুলি « bhāgi-juli » ; উথাঅঁ-পাথাঅঁ « uthāā-pāthāā » *cheering and heartening*; 'Sayings of Dāka,' ধোইয়া-পৌচ্ছিয়া « dhōiyā-paucchiyā » *washing and wiping = thoroughly washing*; etc.

There is another kind of reduplication, behaving like the roots which are used in pairs, in which, following the habit of Bengali with regard to nouns, the verb is repeated by an artificial form in which the vowel or the consonant in the initial syllable of the verb is changed, and a jingle thus results, which continues the idea of the verb, or brings in notions of a similar nature: e.g., খেয়ে-দেয়ে « khēyē-dēyē » *having finished one's meal*; জিরিয়ে-টিরিয়ে « jiriyē-ṭiriyē » *resting and reposing*; কান্দে টান্দে « kādē-ṭādē » *weeps and sorrows*; ঝাড়লে-ঝুড়লে « jhāṛlē-jhuṛlē » *wiped and cleaned* (see *supra*, p. 176, on 'Echo Words'). This form is also found in MB.: e.g., Dāka, খাই-হাই, না পালে হাঁও « khāy-dāy, nā pālē hāñḍī » *eats and enjoys, but does not attend to the cooking pot*.

**776.** There is in Bengali, as in other NIA., a common Verbal Noun of Reciprocity, which may be noted in this connexion. The verbal root or the noun is doubled, and they are connected by a link vowel « -ā - », and the second part of this reduplicated form takes the affix « -i <-i> »: e.g., জানাজানি « jānā-jāni » *knowing in common*, বলাবলি « bālā-bāli » *informing each other*, হৃষাহৃড়ি « hūṛā-hūṛi » *pushing and pulling each other*, মারামারি « mārā-māri » *striking each other* > *fighting, দেখাদেখি*

« dēkhā-dēkhi » *seeing each other, mutual seeing*, घुसाघुसि « ghuṣā-ghuṣi » *fighting with fisticuffs*, कानाकानि « kānā-kāni » *talking with mouth by each other's ears, whispering*, हाताहाति « hātā-hāti » *hand-to-hand fight*, मुखामुखि « mukhā-mukhi » *face-to-face, etc.* These nouns can be used adverbially.

Similar formations are known to OIA. Pāṇini has already noted them, under *Bahu-rrīhi* compounds (cf. 'Aṣṭādhyāyī', II, ii, 27, and V, iv, 127 : « kēsā-kēsi, dāñjā-dāñji, karnā-karṇi, muṣṭā-muṣṭi, jalpā-jalpi » etc.) In OIA., these are nominal compounds only, the « -ā- » being the modification of the stem-vowel of the word. This formation occurred with concrete nouns as well as verbal nouns in OIA. (cf. « jalpā-jalpi »); and the final « -i » seems to have been strengthened by « -ka » in MIA., so that it could be retained in NIA. as « -ī, -i » (-ika > -ia > -ī, -i : \* karṇā-karṇi-ka > \* kanṇākanṇia > kānākāni, -ni).

Repeated roots of the type noted above in § 775 form by analogy compounds of a similar type, only the reciprocal sense is absent: e.g., चेचामेचि « cēcā-mēci » *shouting and noise (singly or by many)*, कादाकाटि « kādā-kāti » *weeping and sorrowing, etc.*

#### [Q] COMPOUND VERBS.

**777.** Modern IA. languages agree in having a remarkable idiomatic use of verb roots in connexion with a noun or a verbal conjunctive or participle. The noun which is compounded is in the accusative, and occasionally in the locative; and the verbal form remains unaffected, the root following taking the temporal and personal affixes. The two parts combined form one idea. The inflected root in such a group, though outwardly in form the principal part modified by a noun or by a participle, is properly the auxiliary; and sometimes it has no special force, although generally it strengthens or otherwise modifies the idea of the preceding verbal participle or noun. The use of this 'Compound Verb' or 'Group Verb' construction amply compensates for the loss of the root-modifying prefixes which form such a characteristic feature of Sanskrit and of Indo-European speeches outside India. In English, the modifying prefix now comes after (e.g., *to lie down, to sit down, to put off, to put out*), though

we have older forms (like *to with-stand*, *to for-give*, *to for-get*, *to up-set*, etc.). So for English *sit down*, and Skt. « ni + √sad », we have in Bengali বসিয়া পড়া « bāsiyā pāṛā », lit. *having sat, to fall*, = Hind. « baīṭh jānā » *having sat, to go*. The loss of the root-prefix both in form and significance (e.g., « upa-viśati » becoming « bāisē, bāsē », « pra + √āp » becoming « √pā ») as well as the absence of new root-modifying prefixes or particles when the old ones were lost by assimilation, has gradually brought about this make-shift of the Compound Verb. These compound verbs supply to some extent the want of modal and temporal affixes, and are as characteristic of the modern Indo-Aryan speeches as the 'aspects' of the verb in the Slav languages.

In this point there is a remarkable agreement with Dravidian (see *supra*, p. 174). In the Dravidian languages, compound verbs of exactly similar formation and function occur, e.g., in Tamil, with « koļlu » *take*, « varu » *come*, « viđu » *leave*, « pō » *go*, « uru » *come*, « adi » *strike*, « padu » *suffer*, etc.; in Telugu, with « konu » *buy*, *take*, « vesenu » *throw*, « iceu » *give*, etc. It is very likely that here we have another contribution of Dravidian in the formation of Modern Indo-Aryan speeches.

**778.** The Compound Verb occurs from the earliest period in NIA. We have, e.g., in the Caryās, « dīṭa (= didha)-karia » (1), « ? cauri-nila » (2), « tuṭi-geli » (36), « ? sadī-paḍiā » (44), « uṭhē (= uṭhi)-geli » (47); in the ŠKK., আণি দিবো « āṇi dibō » *I shall bring*, কাণ্ডি নিলে « kāṛhi nilē » *snatched away*, লাণি গেল « lägi gēlā » *become fixed*, কহিঁ দেহ « kahiā dēhā » *do describe*, মুছিঁ পেলাইবো « muchiyā pēlāibō » *shall wipe off*, etc., etc. Examples are common in MB.

**779.** Types of the Compound Verb in Bengali.

(Cf. J. T. Platts, 'Hindustāni Grammar,' pp. 169-180; S. H. Kellogg, 'Hindi Grammar,' pp. 257-279; Grierson, 'Maithili Grammar,' pp. 289-298.)

### I. Nominals.

(a) Accusative: জমা করা « jāmā-kārā » *to gather*, দর্শন করা « dārsanā-kārā » *to see* (e.g., *the deity in a temple*), দর্শন দেওয়া « dārsanā-dēwā » *to*

*show oneself*, আহার করা < āhārā-kārā > *to eat*, আহার দেওয়া < āhārā-dēwā > *to feed*, পাস or ফেল করা or হওয়া < pāṣṭ-, phēṣṭ, kārā, bāwā > *to pass or fail (in examination)*, স্বাদ নেওয়া < swādā-nēwā > *to taste*, জল দেওয়া < jālā-dēwā > *to water*, নাম নেওয়া < nāmā-nēwā > *to repeat the name (of God)*, লাফ দেওয়া < lāphā-dēwā > *to jump* (Sanskritised in the < sādhū-bhāṣā > as লক্ষ প্রদান করা < lāmphā-prādānā kārā >), etc., etc.

(b) Locative : আগ বাড়ি or বাড়ান < āgā-bāṛā, -bāṛānā > *to advance, go! করা < gā-kārā > to receive properly, to attend (receive on body, cf. গারে মাখা < gāē mākhā > = to smear on the body in the same sense ), etc.*

(c) With the locative verbal noun (or infinitive) in ইতে < -itē > :

(i) Inceptives (with < √lāg > *to be attached*) : করিতে > ক'র্তে লাগা < kārtē lāgā > *to set to do*, খাইতে > খেতে লাগা < khāitē > khētē lāgā > *to set to eat*, etc.

(ii) Desideratives : দিতে চাওয়া < ditē cāwā > *to wish to give* (with < √cā, cāh > *to want*) ;

(iii) Acquisitives : দেখিতে > দেখ্তে পাওয়া < dēkhitē > dēkhtē pāwā > *to be able to see* (with < √pā > *to get*),

(iv) Permissives : বসিতে > ব'স্তে দেওয়া < bāsitē > bōstē dēwā > *to allow to sit* (< √dē > *to give*) ;

(v) Potentials : চলিতে > চ'ল্তে পারা < cālitē > cōltē pārā > *to be able to walk* (< √ pār > *to be able*).

(d) With the verbal noun in < -i > and in < -ā > : Reflexives : মুড়ি দেওয়া < muri-dēwā > *to wrap oneself up*, শুড়ি মারা < guṛi-mārā > *to creep, to cower, হামা দেওয়া < hāmā-dēwā > to crawl on all fours*, etc., etc.

## II. Verbs.

(a) With the conjunctive (in < -iyā, -ē >) :

(i) Intensives : কাঁড়িয়া > কেড়ে নেওয়া < kāriyā > kērē nēwā > *to snatch away*; ভাঙিয়া > ভেঙ্গে দেওয়া < bhāngiyā > bhēṅgē dēwā > *to break fully*; আসিয়া > এসে পড়া < āsiyā > ēsē pārā > *to come along, to reach*; উঠিয়া > উঠে পড় < uthiyā > utħē pārā > *to get up*; দিয়া > দিয়ে দেওয়া < diyā > diyē dēwā > *to give away*; ভাগিয়া > ভেগে পড়া < bhāgiyā > bhēgē pārā > *to decamp*; সরিয়া > স'রে পড়া < sāriyā > sōrē pārā > *to retire (silently)*;

উঠিয়া পড়িয়া > উঠে প'ড়ে দাগী < uṭhiyā-pāriyā > uṭhē-pōṛē lāgā > to be up and doing, to be at something tenaciously ; etc., etc.

(ii) Intensives and Completives : খাইয়া > খেয়ে ফেলা < khāiyā > khēyē phēlā > to eat completely, to finish entirely ; মুছিয়া > মুছে ফেলা < muchiyā > muchē phēla > to rub off ; কাটিয়া > কেটে ফেলা < kātiyā < kētē phēlā > to cut down ; বলিয়া > ব'লে ফেলা < bāliyā > bōlē phēlā > to blurt out ; বসিয়া > ব'সে পড়া < bāsiyā > bōsē pāṛā > to sit down, etc., etc. Generally with < √phēl > to throw, to cast with transitives, and < √par > with intransitives.

(iii) Inceptives, with যা < √jā > to go ; লাগিয়া > লেগে যাওয়া < lāgiyā > lēgē jāwā > to start ; বসিয়া > ব'সে যাওয়া < bāsiyā > bōsē jāwā > to sit down for something, etc.

(iv) Staticals : বসিয়া > ব'সে থাকা, রহা (রওয়া) < bāsiyā > bōsē thākā, rāhā (rāwā) > to continue to sit, to remain sitting ; মাগিয়া > লেগে থাকা, রহা < lāgiyā > lēgē thākā, rāhā > to be fixed or working at something ; জাগিয়া > জেগে থাকা, রহা < jāgiyā > jēgē thākā, rāhā > to keep awake, etc. (The < -iyā > forms here may be the passive participle rather than the conjunctive).

(v) Continuatives : বকিয়া > ব'কে যাওয়া < bākiyā > bōkē jāwā > to go on chattering ; খাইয়া > খেয়ে যাওয়া < khāiyā > khēyē jāwā > to go on eating, etc. (খাইয়া যাওয়া < khāiyā jāwā > is also passive, to get eaten, where the < -iyā > form is not the conjunctive : see *supra*, pp. 922 ff.).

(vi) Miscellaneous : e.g., করিয়া > ক'রে দেখা < kāriyā > kōrē dēkhā > to experiment (to do and see) ; বুঝাইয়া > বুঝিয়ে দেওয়া < bujhāiyā > bujhīyē dēwā > to explain ; ছিটকাইয়া > ছিটকিয়ে পড়া < chitkāiyā > chitkiyē pāṛā > to be scattered ; etc., etc.

(b) With the Present Participle in ইতে < -itē > :

(i) Continuatives or Frequentatives : দিতে, করিতে > ক'র্তে, হাসিতে > হাস্তে থাকা < ditē, kāritē > kōrtē, hāsitē > hāstē thākā > to remain giving, doing, smiling ; etc.

(ii) Staticals : করিতে করিতে যাওয়া < kāritē-kāritē jāwā > to go while doing, নচিতে নচিতে গাওয়া < nācītē-nācītē gāwā > to sing while dancing. (Here the form is strictly not of the compound verb, as both roots retain their independent meaning : but the < -itē > forms have an adverbial sense.)

---

## APPENDIX.

**780.** The following are the main or typical stages in the development of Bengali as a Modern Indo-European language from the Primitive Indo-European speech :

- (1) Indo-European, c. 2500 B.C. ;
- (2) Indo-Iranian or Aryan, c. 1800 B.C. ;
- (3) Old Indo-Aryan (Vedic Dialects), c. 1200 B.C. ;
- (4) Transition to Middle Indo-Aryan in the *Prācyā* or Eastern speech, c. 700 B.C. ;
- (5) Early Middle Indo-Aryan of Magadha (Old Māgadhī), c. 300 B.C. ;
- (6) Transitional Middle Indo-Aryan of Magadha, about the time of Christ ;
- (7) Second Middle Indo-Aryan of Magadha, c. 300 A.C. ;
- (8) Late Middle Indo-Aryan of Magadha and Bengal, or Māgadhī *Apabhrāñśa*, c. 800 A.C. ;
- (9) Old Bengali, c. 1100 A.C. ;
- (10) Early Middle Bengali, c. 1400 A.C. ;
- (11) Late Middle Bengali, c. 1600 A.C. ;
- (12) New Bengali or Modern Bengali, after 1800 A.C.

In the preceding pages, this development from the third stage as above, from Old Indo-Aryan, has been sought to be indicated in its general lines, both in sounds and in inflexions. The development of Old Indo-Aryan from the parent Indo-European speech properly forms a distinct branch of the subject. To illustrate the transformation of Indo-European to Bengali, however, a few sentences in New Bengali are taken below, and their equivalents through the typical preceding stages are given, and in this way the hypothetical Indo-European source-forms are worked back. This will indicate within a short compass the processes underlying this transformation.

All the words in OIA., Indo-Iranian, and Indo-European sentences below have been accented.

(i) মা ঘরে আছে « mā ghārē āchē » *mother is in the house* < eMB.  
 মাও ঘরে আছে (আছএ) « māo ghārē āchē (āchhē) » < OB. \* « māwā gharē (gharaī, gharahi, gharahī) āchaī » < Māgadhi Apabhrānsa \* « māā (māwā) gharahī (gharahi, ghalahī, ghalahi or ghari) acchaī » < Māgadhi Prakrit \* « māā (<mādā, mādā) ghalahī (<ghalaḍhī, ghaladhi ; or ghalasšī, or ghalē) acchaī (< acchaḍī, acehadi) » < Old Māgadhi (Prācya) (= First OIA.) \* « mātā ghaladhi (ghalasšī, ghalē) acehati » = Late OIA. (not Prācya)  
 \* « mātā gharadhi (< garhadhi, or gharassi (< garbasmin, gharē) acehati » < OIA. « mātā \* gphá-dhi (gphé) \* ácehati (\* accháti) » < Indo-Iranian \* « mātā ghṛdhá-dhi (ghṛdhái) as-ç(h)á-ti (< as-ská-ti) » < Indo-European \* « māté(r) ghṛdhó-dhi (ghṛdhéi) es-ské-ti ».

(ii) সাধ হয় মোর মনে « sādhā [ʃā:dhɪ] hāy mōrā mānē » *a longing is in my mind* (the form মোর « mōrā » is archaic for the NB. Standard Colloquial) < eMB. সাধ হোও মোর মণে « sādhā hōē mōrā mānē » < OB. \* « sādha hōi mōra maṇē (maṇai, maṇahi, maṇahi) » < Māg. Ap. \* « śaddha hōi mōarahī (= mō-alahī, māwā-kalahī) maṇahī » < Māg. Prakrit \* « śaddhā hōi (< hōḍi, hōdi) mama-kalabi maṇahī (< maṇaḍhi, maṇadhi, maṇaśśi) » < Old Māgadhi \* « śaddhā hōti (or bhōti) mama manadhi (maṇaśśi) » < Transitional OIA. \* « śāddhā bhavati mama manadhi (manasmin) » < OIA. « śāddhā bhāvati máma mánasi » < Indo-Iranian \* « ćrád-dhā bhāwati mána mánasi » < Indo-European \* « kréd-dhē bhéweti méne ménesi ». (হয় « hāy » also represents an OIA. « \* as-a-ti », IE. « es-e-ti » : see *supra*, pp. 1038-1040).

(iii) দাঁড়ে না বাঁয় « dāṛē nā bāy » *rows a boat with an oar* (= stick) (the word না « na » is rather archaic for the NB. Standard Colloquial) < eMB. দাঁড়ে (দাঁওেঁ) নাও বাঁহে « dāṛē (dāṇḍē) nāo bāhē » < OB. \* « dāṇḍē nāwā bāhāi » < Māg. Ap. \* « dāṇḍēm (dāṇḍē) nāam (nāwā, nāā) bāhēi » < Māg. Prakrit \* « dāṇḍēna(nā) nāam vāhēi (< vāhēdi, vāhēdi) » < Old Māgadhi \* « dāṇḍēna nāvā(nā) vāhēti (< vāhāti, vāhay'ti) » < OIA. « dāṇḍēna, dāṇḍā (\* dandrā) nāvam vāhāyati » < Indo-Iranian \* « dandrā nāwa (nāwm) wāžhāyati » < Indo-European \* « dendrō (? derdrō) nāwm wēghéyeti ».

(iv) গোয়ালা গাই দোয়  $\leftarrow$  gōwālā gāi dōy  $\rightarrow$  *the cowherd milks the cow*  
 $<$  eMB. গোআলা গাই দুহে দুহণ  $\leftarrow$  gōālā gāi duhē (duhāē)  $\rightarrow$   $<$  OB.  $\leftarrow$  gōālā  
 (gōwālā-ā) gāi (gāwī) duhaī  $\rightarrow$   $<$  Māg. Ap. \*  $\leftarrow$  gōālā (gōālī) gāiṁ (gāi) duhaī  $\rightarrow$   
 $<$  Māg. Prakrit \*  $\leftarrow$  gōvālē (< gōbālē, gōbālē) gāvīṁ duhaī (< duhađi,  
 duhadi)  $\rightarrow$   $<$  Old Māgadhī \*  $\leftarrow$  gōpālē gāvīṁ dubati  $\rightarrow$   $<$  Transitional  
 OIA. \*  $\leftarrow$  gōpālāḥ gāvīṁ duhati  $\rightarrow$   $<$  OIA.  $\leftarrow$  gō-pālāḥ (gō-pāḥ) gāvīṁ  
 (gām) dōgdhi  $\rightarrow$   $<$  Indo-Iranian \*  $\leftarrow$  gau-pāś (gau-pālāś) gā(w)m dháugdhi  
 $<$  Indo-European \*  $\leftarrow$  gwou-pōś (gwou-pōlōś) gʷō(w)m dhéugh-ti  $\rightarrow$ .

(v) বর বে (বিবে) ক'রে বড় আনে  $\leftarrow$  bārā bē (biyē) kōrē bāu ānē  $\rightarrow$  *the bridegroom  
 brings (leads) the bride after having married*  $<$  eMB. বর বিআ (বিহা) করিআ  
 বহু আগে (আণ্ণি)  $\leftarrow$  bārā bi(h)ā kāriā bāhu ānē (ānāē)  $\rightarrow$   $<$  OB. \*  $\leftarrow$  bara biāha  
 (= biyāha, biwāba) kariā (kari) bahu ānāi  $\rightarrow$   $<$  Māg. Ap. \*  $\leftarrow$  bara (bari)  
 biāhanī (biwāhā) karia bahum (bahū) ānēi  $\rightarrow$   $<$  Māg. Prakrit \*  $\leftarrow$  valē vivāham  
 kalia (kadua) (or ūḍhbā) vahum ānēi (< ānēđi, ānēdi)  $\rightarrow$   $<$  Transitional  
 OIA. \*  $\leftarrow$  valah (varah) vivāham karya (kṛt-ya, kṛtvā) (or ūḍhvā) vadhum  
 ānaiti (ānay'ti)  $\rightarrow$   $<$  OIA.  $\leftarrow$  vārah (\* vālah) vi-vāhám kṛtvā (or ūḍhvā)  
 vadhum á nāyati  $\rightarrow$   $<$  Indo-Iranian \*  $\leftarrow$  wāras (wálas) wí wāzhám kṛtwā  
 (or uždhwā, užhtwā) wadhum á nāyati  $\rightarrow$   $<$  Indo-European \*  $\leftarrow$  wélos wí  
 wēghóm kṛtwō (or ughtwō) wedhūm ó néyeti  $\rightarrow$ .

(vi) মানুষের আই শ বছর  $\leftarrow$  mānuṣerā āi śā bāchārā  $\rightarrow$  *a man's life-time  
 is a hundred years* (the word আই  $\leftarrow$  āi  $\rightarrow$  *life-time, man's age*, is by itself  
 rather archaic for New Bengali, but it occurs in পরমাই  $\leftarrow$  pārāmāī  $\rightarrow$ ,  
 অঁইবুড়  $\leftarrow$  āi-burā  $\rightarrow$ , etc.; and বছর  $\leftarrow$  bāchārā  $\rightarrow$  seems to be a *sts.*)  $<$  eMB.  
 মানুষের আউ শ (শঅ) বছর  $\leftarrow$  mānuṣerā āu śā (śā) bāchārā  $\rightarrow$   $<$  OB. \*  $\leftarrow$  mān-  
 uṣerā āu (āwu) śaa (śawa) bacchara  $\rightarrow$   $<$  Māg. Ap. \*  $\leftarrow$  mānuṣa-ēra āu (āwu)  
 śaaṁ bacchara (bacchala)  $\rightarrow$   $<$  Māg. Prakrit \*  $\leftarrow$  mānuṣa-kēlē (= mānuṣāśśa)  
 āu śaaṁ (< śāđam, śādam) vacchala  $\rightarrow$   $<$  Old Māgadhī \*  $\leftarrow$  mānuṣāśśā āvu  
 (āyu) śataṁ vacchala (vacchalaśśe)  $\rightarrow$   $<$  OIA.  $\leftarrow$  mānuṣasya (=mānuṣasya)  
 āyūḥ śatām vatsarāḥ (vatsarāśah; \* vatāḥ)  $\rightarrow$   $<$  Indo-Iranian \*  $\leftarrow$  mānu-  
 šasya āyūś ḡatām watsarāś (watsarásas; watás)  $\rightarrow$   $<$  Indo-European  
 \*  $\leftarrow$  móñusosyo āyús kmtóṁ wetōs (? wetserōs)  $\rightarrow$ .

(vii) সে দৌড়ে এল (গেল)  $\leftarrow$  sē dāurē elō (gēlā [gælo])  $\rightarrow$  *he came (went)  
 running* (lit. *having run*)  $<$  eMB. সে দৌড়িআ আইল (গেল)  $\leftarrow$  sē dāuriā

**āīlā** (gēlā) > < O.B. \* < sē daüdiā (daüdī) āīlaa, āyilaŵa (gēlaa, gēlaŵa) > < Māg. Ap. \* < sē (saī, sī) dava-đ-ia āyillaa (gaillaa, gaŷaillaa) > < Māg. Prakrit \* < sē (saē < ūagē, ūagē) dava-đ-ia (davia) āāē (āyāē < aŷāđē, āyāđē) (gaē < gađē, gadē ; gađē) > < Old Māgadhi \* < sē (śakē) davia (dava-Ń-iya) āyātē (gatē ; gaṭē) > < Transitional OIA. \* < saḥ (sa-ka-h, sa) dravya (dru-t-ya, drutvā) āyātah (gataḥ) > < OIA. < sa drutvā (= drávan) ā yātāh (gatāh) > < Indo-Iranian \* < sa drutwā (= dráwan[ts]) ā yātás (gatás) > < Indo-European \* < so drutwō (= drówonts) ó (e)yātós (gʷ̥m̥tós) >.

(viii) জ্যাণে দেখে না, ম'লে পাই < jyāntē [fʒænte] dēkhē [dækhe] nā, mā'lē [mole] pāy > *does not see while living, obtains when dead* < eMB. জিষ্ঠে দেখে (দেখে) না, ম'লে পাই < jiyāntē dēkhē (dēkhāē) nā, māilē pāē > < O.B. \* < jiantē (= jiyāntē, jīwantē) nā dēkhai, maïlē pāai (= pāwai) > < Māg. Ap. \* < jīantahī na dēkkhai, maillaḥī (< maẏaillaḥī) pāvēi > < Māg. Prakrit \* < jīvantahi (< jīvantadhi ; jīvantāssī) na dekkhai (< dekkhađi, dekkhadi), maahi (< madadhi, madaśsi ; mađadhi, mađaśsi) pāvēi (< pābeđi, pābēdi) > < Old Māgadhi \* < jīvantāssī (jīvantē ; jīvantadhi) na dēkkhati (dakkhati), maṭāssī (maṭadhi ; maṭē) pāpēti (pappōti) > < Transitional OIA. \* < jīvantē (= jīvantasmin, jīvati ; jīvan) na dreksati (derksati < dṛkṣati, draksati, *present form*), mṛtē (mṛtaḥ) prāpaiti (< prāpay'ti, prāpayati = prāpnōti) > > OIA. < jīvan na \* draksati (= \* dārṣati), mṛtāḥ prá ḥpnōti > < Indo-Iranian \* < g'íwan(ts) na dárçati, mṛtás prá apnáuti > < Indo-European \* < gʷ̥ íwonts ne (nē) dérketi, mṛtós pró apnéuti >.

## **ADDITIONS AND CORRECTIONS**

## ADDITIONS AND CORRECTIONS

---

### PAGE

- 1, l. 8 : the number of Bengali speakers according to the Census of 1921  
is 49,290,499.
- 4, l. 13 : read 1915 for 1914, and F. for W.
- 8, ll. 20-23 : these voiced stops accompanied by closure of the glottis  
are as a matter of fact found in certain East Bengali dialects, as  
regular substitutes for the voiced aspirates, [g', dz', d', t', b'] for  
[gh̪, fʒh̪, dh̪, bh̪], as I have found out subsequently. In East  
Bengali there is accompanying high tone.
- 12, ll. 12-17 : Amīr Khusrau was born at Patiyālī in 1253, and died at  
Delhi in 1325 (E. G. Browne, 'Literary History of Persia,' II, p. 540).  
The first authentic poet of Urdū seems to have been Muḥammad Qulī  
Qutb Ṣāh, king of Golconda in the Deccan, who died in 1611 A.C.  
He used a vernacular Western Hindī speech with Panjābī affinities,  
not exactly identical with the Hindostāni of later times. (Cf. Braj-ratn  
Dās, 'Urdū-kā Pratham Kavi' in the 'Nāgarī Pracāriṇī Patrikā,'  
Benares, New Series, Vol. 4, No. 2.)
- 27, footnote l. 17 : after 1916, p. 364, add : R. G. Bhandarkar, in the  
JBBRAS., Vol. 25, 1917, pp. 76-81.
- 28, footnote l. 10 : in the list of references on the Harappa seals, add at  
the beginning : A. Cunningham, (Archæological) Reports, Vol. 5  
(1875), pp. 105 ff. ; J. F. Fleet, JRAS., 1912, pp. 699 ff.

About the recent discoveries in Sindh and at Harappa, see Sir  
John Marshall's article in the 'Illustrated London News' for September  
20, 1924, and further articles by Prof. A. H. Sayce and Messrs. C. J.

Gadd and Sidney Smith in the same journal for September 27 and October 4, 1924, respectively. Cf. also S. K. Chatterji, 'Dravidian Origins and the Beginnings of Indian Civilisation' in the 'Modern Review' for December 1924; also the 'Modern Review' for February, 1925, and the 'Journal Asiatique' for 1925, p. 371. See also 'Sumerian Connexions with Ancient India,' by Ernest Mackay, JRAS. for 1925, pp. 697-701. Further articles on these 'Indo-Sumerian' antiquities by Sir John Marshall have appeared in the 'Illustrated London News' for February 17 and March 6, 1926 and in the 'Times of India Illustrated Weekly' for March 7, 1926.

31, l. 7 : *read dialects for languages.*

44, l. 16 : *read Kausitaki.*

46, l. 8 : the Vrātyas. Mm. Haraprasād Śāstrī derives « vrātya » from « vrāta » *horde*, in a suggestive paper containing some interesting information about the Vrātyas or 'the Original Inhabitants of Magadha,' one of six lectures on 'Magadhan Literature,' delivered in the University of Patna, 1923.

47, l. 12-21 ; « hēlayah (hēlavah) ». This form has been sought to be explained as a Semitic word, the same as the Hebrew « ēlōāh » = Arabic « ?ilāh- » (K. P. Jayaswal, in the ZDMG., Vol. 68, p. 719 : cf. R. G. Bhandarkar in the JBBRAS., Vol. 25, pp. 76 ff.). But this is extremely unlikely. Hebrew (as well as Arabic) was rather removed from the tracts where the Aryans moved much or were settled in, in North Mesopotamia and North-Western Iran, at this early period (B.C. 2000-B.C. 1300); and Hebrew conquest of Palestine took place during the closing centuries of the 2nd millennium B.C. The Semitic word for *god* which the Aryans would be likely to pick up, if they did pick it up at all, would be the Babylonian and Assyrian « ilu », which makes the connexion with the Indian form remote. Jayaswal also derives the Indian « mlēcca (Pkt. milakkhu) » *foreigner* from a Semitic word « mlk », in Hebrew « mělēx ». But there is no reason not to regard this word as Indo-European (see Uhlenbeck, 'Altindisches Etymologisches Wörterbuch').

54, l. 33 : after « -āni » add : the dative plural affix was « -ēhi » (= -ēbhyaḥ, \*-ēbhīḥ) rather than the genitive-dative affix « -ānām » (= -ānām) which characterised the Midland, North-Western and Southern speeches as in the Aśoka Inscriptions and in Pali (cf. Surendranāth Majumdar Sāstri, 'The Dative in Pali,' in 'Sir Asutosh Mookerjee Silver Jubilee Volumes, III,' Calcutta University, 1925).

56, l. 3 : read presents for present ; and in l. 19, read dramas for drama.

59, l. 17 : read nama for nāma.

59, footnote : Cf. K. P. Jayaswal in the JBORS. for 1924, pp. 189 ff., for further Brāhmī seals from Magadha with « -śa (= -śśa) » for the genitive affix « -syā » (e.g., Mamaśa, Citaśa, Bhadaṁta Lōpagōraśa, Abhaya-vamaśa).

65, l. 19 : read Mōlājandī for Mōḍālandī.

66, l. 6 from bottom : read शृणु for श्रृणु.

67, l. 27 : read Bāgādīs for Bāgūdīs. (The « Vāthurīs » are different from the « Bāurīs ».)

68, l. 24 : read Mangalore for Bangalore.

71, l. 4 : read Gaina for Gaina.

72, footnote, l. 2 : read Lāla- for Lala-. Also in l. 11, correct Dipa to Dīpa.

75-76. King Candra-varman of Puṣkaraṇā. Mr. K. N. Dikshit, of the Archaeological Survey of India, definitely suggested the identification of Puṣkaraṇā of the Susunia Rock Inscription with a place in Bengal—in the district of Bankura, and not with Pokharaṇ in Rajputana. Also Mr. Nikhil-Nāth Rāy B.L., in the 'Bhārata-varṣa' for Jyaiṣṭha, 1330, p. 832. There is actually in that district a village 'Pokharna' (*vulgo* 'Pākhānnā, Pōkhānnā') on the Dāmōdar river, some 25 miles east of Susunia Hill (23 N 87 E, Bengal Survey, scale one inch = one mile, Sheet No. 238, Survey Season 1854-64). This is conclusive, and it would show that Rājha at least was entirely Aryanised, and had a Hindu Vaiṣṇava king in the 4th century A.C. ; and it may be concluded that Aryanisation was already some centuries old.

90, l. 19 : add at the end, after Jan. 1923, the following : C. D. Dalal and P.D. Gune, 'Bhavisayattakaha by Dhanapala,' Baroda, 1923, Introduction.

94, ll. 18-20 : the future in « -t- », from the old Present Participle, occurs in East Vanga Dialects : see under *Morphology*, pp. 961-963.

100, l. 6 : for *rahaulaū*, read *rahalaū*.

104, l. 2 : after in Brajabuli., add : The Braja-buli dialect also spread into Assam, or rather, an Assamese Braja-buli was developed, as early as the 15th century, Śaṅkara-dēva and others having composed poems and dramas in it. From the biographies of Caitanya, we learn that it had also spread into Orissa during that century, Braja-buli songs being sung by Vaiṣṇavas in Orissa as much as in Bengal.

104, footnote : the 'Kirtti-latā' has been published in the Bengali character, with Introductions and Translation in Bengali, by Mahāmahōpādhyāya Haraprasād Śāstri, in 1924 (Hṛṣikēśa Series).

106, ll. 21-24 : the earliest specimen of connected Oriyā seems to be in the newly discovered bilingual inscription (Oriyā and Tamil) of Nṛsiṁha-dēva II (13th Century) from Bhubaneswar, very carelessly edited in the JASB. for 1924, pp. 41 ff. Among some of the noteworthy things in this inscription, we may mention the following : (i) the vowel [r̥] was pronounced as [ri] and not as [ru] as in Modern Oriyā : cf. the spelling « Krīṣṇa » in l. 3 ; and (ii) the word « ācāya < ācārya », which occurs here, also occurred in Old Bengali (see pp. 121-122, *Introduction*). The writing differentiates between the dental and cerebral « l » sounds, and the former, marked with a diacritical sign below as in Modern Oriyā (see under *Phonology*, p. 538), has been wrongly transcribed as double « ll », in the verb past tense.

109, ll. 13-21 : the 'Tīkā-sarvasva' was written Śaka 1082 : Panḍit T. Ganapati Śāstri published the first part in 1911, and completed the entire work in 1917.

110, footnote, l. 2 : read Caryā for Carjā.

123, footnote : the OB. line quoted was evidently a proverb, and it occurs in another MB. work, the 'Caṇḍī-kāvya' of Kavi-kañkaṇa Mukunda-rāma Cakravarṭī, in the form হরিণ় জগত্বৈরী আপনার মাসে « hāring jāgatā-bāiri ḥāpanār̥ḍ māsē » (as pointed out to me by my friend Mr. Charu Chandra Banerji of Dacca University).

127, after line 2, add :

**65a.** The Sanskrit encyclopædia 'Mānasollāsa' or 'Abhilāśartha-cintāmaṇi' (of which the first volume has been published in the Gaekwad's Oriental Series, 1925), composed in Śaka 1051 or 1129 A.C. under the auspices of king Sōmēśvara III Bhūlōka-malla of the later Cālukye dynasty of Mahārāṣṭra, who ruled from 1127 to 1138 A.C., seems to contain a few Old Bengali lines. (Sakhārām Gaṇēś Dēuskar in the Bengali journal 'Āryāvartta' for Māgha 317, pp. 678-679; R. G. Bhāndārkar, 'Early History of the Deccan<sup>2</sup>', Bombay, 1895, pp. 89-90; Dēuskar mentions a Marāṭhī article by V. K. Rājāwāḍē on this work read before the 1st Mahārāṣṭra Sāhitya Sammēlan which I have not seen. I am indebted to my friend and colleague Mr. Kshitish Chandra Chatterji, M.A., for bringing Dēuskar's article to my notice.)

In the section on Poetry and Music ('Gīta-Vinōda') in this work, short poems and verses in Sanskrit, Prakrit, Apabhrāṇa, Lāṭī, and in the Dravidian Kaṇṇaḍa speech have been given; and besides a few verses occur, which are undoubtedly in the various NIA. speeches—Old Marāṭhī, Old Braj-bhākhā, and Old Bengali, to judge from at least some of the forms. The work is preserved in various MSS. at Poona, Tanjore, Bikaner, and elsewhere. I could consult one of the Poona MSS. (copied Saṁvat 1930=1874) which happened to be in the Indian Museum at Calcutta in 1923, and through the kind offices of my friend Mr. Sris Chandra Chatterji, Engineer and Architect, lately in the service of the Bikaner State, I also obtained (December 1923) transcripts of the relevant parts from an old MS. of the work (dated Śaka 1593=1671 A.C.) in the Fort Library of Bikaner. Both the MSS. are very corrupt, and although there is a close agreement between them (both seemingly being based on the same original), the bad readings make it almost impossible to restore the text of the non-Sanskrit portions from these only. Instead of attempting to give a critical edition of these portions in question, I give below tentative readings of some of the vernacular passages based on a comparison

of the two MSS., wherever they can be made out with any degree of certainty. We have thus—

« ..... chāṁdu chāṁdu maī jāīvō (= jāībō ? jāība ?) Gōvinda-saha khēlāna ..... Nārāyaṇu jagaha-kēru (-kārā) gōsāṁvi » (Bikaner, fol. 141a ; Poona, fol. 168b)= *Leave (me), leave (me), I shall go to sport with Gōvinda.....Nārāyaṇa the lord of the world.*

Bikaner folia 141b and 142a and Poona fol. 169(a, b) give a song praising the ten Avatāras of Viṣṇu, which seems to represent more than one form of NIA. The first verse is in Old Marāṭhī, and runs thus : « jēnē rasātala-uṇu matsya-rūpēṁ vēda āṇiyalē(m).....tō saṁsāra-sāyara-tāraṇu, maha-tē(m) rākhō Nārāyaṇu » by *Whom the Vedas were brought from Rasātala in the form of a fish.....the Saviour in the ocean of transmigration.. He, Nārāyaṇa, (may) keep me.* The next verse (on the Tortoise Incarnation) is very corrupt. The third verse is as follows : « jō suvara-rūvēṁ pāyalu paīśi dāṇau Hariṇa-kachapu mācavīn (?), dāḍha Gōvinda dharanī uddhariām sō dēu..... » *Who in the form of a boar entered Pātāla and killed the demon Hiraṇya-kaśipu, Gōvinda who rescued Earth with his tusk, that God.....*This verse has Śaurasēṇi affinities, as also the next two verses on Nṛsiṁha and Vāmana Avatāras, but both are hopelessly corrupt.

The sixth shows some distinctive Bengali features : « jē brāhmaṇēra kulē(m) upajiyā(m), Kātavī(r)yā jēnē bāhu-pharasē khāṇdiyā : Paraśarāmu dē(v)u sē māhara (mōhara ?) maṅgala karaü » *Who was born in the family of a Brāhmaṇa, by Whom with the touch of his arm Kārtavīrya was cut down, He, the God Paraśurāma, may work my welfare.* The above reading is substantially that of the Bikaner MS., and the Bengali character of this passage is shown by the pronoun « jē », and « -ē(m), -ēra » affixes for the locative and genitive ; and « -iyā » would be the non-l passive participle adjective (> verb past) which featured in Old Bengali (see pp. 946 ff.)

The verse describing Rāma is missing in both the MSS. That on Kṛṣṇa is apparently in Old Braj-bhākhā : « Nanda-gōula jāyau Kanhu jō gōvi-janē(m) vaḍihē..... » : but it is corrupt. The

verse on Buddha runs thus : « Buddha-rūpeṁ jō dāṇava-surā  
vañcaüni vēda-dūṣaṇa bōllaüni māyā mōhiyā, tō dēu mājhi passāū karu »  
*Who in the form of Buddha, after having Cheated Gods and Demons and  
having said words of scorn for the Vedas, led (them) astray by his Māyā—  
that God may grant grace to me : it is distinctly Old Marāṭhī. The  
last verse on Kalki is in Sanskrit.*

131, ll. 27 ff. Dāk the Gōwālā (cowherd) is also well-known in Bihār as a sage and author of proverbial sayings, as Sir George Grierson tells me. See also Mm. Haraprasād Sāstrī on Dāk and Khānā in the Bengali journal 'Prāci' (Dacca) for Śrāvanya, 1330.

137, l. 13 : *read form for from.*

148, l. 30 : *read « bhāṣā » for « bhasā ».*

156, l. 13 : *read vēlā for vēla ; l. 15, correct to between.*

157, l. 13 : *read « nīb » for « nīb » ; l. 14, read tāmra for tamra.*

159, ll. 14, 15 : Pischel gives ('Grammatik der Prakrit-sprachen,' § 304) « ut̄ta, iṭṭa » as MIA. forms . The deaspiration in these words thus goes back to MIA. times, and the W. Hindi « ūt̄, iṭ » are obviously based on MIA. « \* un̄ṭa, \* in̄ṭa » showing Spontaneous Nasalisation (discussed at pp. 368 ff.).

166, l. 6 : *after mī read :, myā.*

171, l. 5 *from bottom of page* : *after Dravidian sounds, and add : these (barring the last, which is found in Dravidian—in Tamil only, to be precise).*

176, l. 7 : *read « ghōrā-ṭōrā » for « ghōrā-ṭōrā ».*

176, l. 11 : *read « kudure-gidure » for « kudire-gidire ».*

177, ll. 21 ff : This idiomatic use of a verbal conjunctive meaning *having said* is a common idiom in Tibeto-Burman as well—in Kuki-Chin, for instance—and it is also found in Burmese (see LSI., III, Part III, p. 5) ; and it is common in Bodo also, which was the original language of a large section of present-day Bengali-speakers in North and East Bengal (J. D. Anderson in the JRAS., 1913, pp. 867 ff).

180, *after l. 14, add :*

In connexion with the above is to be taken (iv) the Ghugrahati Copper-plate of Samācāra-dēva (cf. Ep. Ind., 1925, Vol. XVIII, pp.

74 ff., ed. by Nalinī-Kānta Bhāṭṭāśālī, M.A.), which mentions « Navyāvakāśikā », as well as « Vāraka-maṇḍala », and « Vyāghra-cōraka » and « Gopēndra-cōraka » village, and « Vidyādhara-jōṭikā »; and among personal names it gives « Pavitruka, Dāmuka, Vatsakundā, Śuci-pālita. Vihita-ghoṣa, Śūra-datta, Priya-datta, Janārddana-kundā ».

*Para 87* : This Copper-plate Inscription has been edited and published by Dr. L. D. Barnett in the Ep. Ind. ('Vappaghoshavāta Grant of Jayanāga,' Vol. XVIII, pp. 60 ff.).

182, l. 24 : « koppam ». Compare also Tamil « kuppam » *village*.

187, l. 10 : The Gōvindapur Grant has since been edited by Prof. A. C. Vidyābhūṣaṇa in the 'Bhārata-varṣa' for Phālguna, 1332.

188, after line 5, add :

[27a] A new Copper-plate Grant of Viśva-rūpa-sēna has been recently discovered in Maimansing, and has been edited by Mm. Haraprasād Śāstri in the 'Indian Historical Quarterly,' Calcutta, Vol. II, No. 1, March 1926, pp. 77-86. This gives quite a number of place-names in Vaṅga, besides some personal names.

195, after l. 6, add : (ଅ)ସାଵାର « (ā)sāwārə » *horseman, trooper, sāwāri* « sāwārī » *rider (on horse, in carriage)* : occurs in the Bharhut and Sanchi inscriptions as « asavāri » : from Old Persian « asa-bāri- » *horseman* (=New Persian « suwār »).

195, after l. 18, add : କୋଣ « kōṇə » *corner*, from MIA., and Skt., = Greek « gōnos ».

196, last line but one : read « śuruṭṭu » for « śuļuṭṭu ».

197, l. 1 : after Tibetan « blama », add : ଟଙ୍ଗନ « tāngānə » *a hill pony, Bhotia pony* = Tibetan « rta-pāṇ ».

198, 199 : The word « dhitā » (as the source of « jhī ») has also been derived from the Indo-European  $\sqrt{*}dhē$  » *suck* (=OIA. « dhā »), which we find in the Latin « fi-lius ».

203, l. 22 : read « fath for fatḥ.

213, last line in footnote 1, read 'khājāncī' for 'khajañcī'

215, ll. 9 ff. ; the word ମେଟେ « mētē », a slang term to denote dark-skinned

Eurasians, is at least influenced by the French « métis », if not actually derived from it. The word may be from « māṭīā » earthen, by Umlaut.

215, l. 22 : read ইস্কুপ for ইস্কপ.

232, l. 7 : read rasūla and mōhāmōti ; l. 20, read pūsē for pusē.

233 : immediately before § 126, add : Bengali MSS. in the Persian character are but rarely found in other parts of the country. One such MS., however, has come to light recently—a Bengali version of the ‘Qissah-i-Amīr Hamzah’—from Jessore district. It was exhibited by Maulavi ‘Abdu-l-Walī in the ASB. (November 1925). In its transcription, unlike the Chittagong MSS., it employs regularly ঃ and ঃ for স and ঙ.

235, heading, read : SILĒT ; footnote, l. 4, read in for is.

245, l. 22 : read tzándanon for tsándanon.

254, 255 : loss of « -tr- » > « -tt- » : W. Geiger cites also (Festschrift E. Kuhn, p. 186) Sinhalese « hū » (sūtra), « mū » (mūtra) « rā » (rātri).

256, l. 21 : « ratta (< ratna) » actually occurs in MIA. (in the Pali ‘Sutta-nipāta,’—‘Sabhiya-sutta’: « ratta-ññā » = « ratna-jñā », explained in the Commentary of Buddha-ghōṣa as « ratana-ññū »).

260, l. 25 : read « -vā » for « -ā ».

263, l. 18 : read 'fi(ং)a:la for fi(ং)a:la.

264, l. 14 : read kohi for kohi ; l. 17 : read c̄upori for c̄upari.

265, l. 5 from bottom : read mōṇo for mōṇḍ.

269, l. 3 from bottom, add : The glottal stop occurs with the voiced stops and palatal or dental affricates [g', ū' (dz'), ḍ', d', b'] in some East Bengali dialects as the regular substitutes for the corresponding aspirates [gh, ūh, ḍh, dh, bh] of Standard Bengali.

272, l. 17 : correct the figure for : [h] from 2·02 to 0·02.

282, l. 12 : read pāṇīya- for pāṇīya.

287, ll. 11, 12. It should be noted that the « Payār » has also 16 morae, including the pauses, although the number of syllables is 14.

293, l. 6 : read bāc̄fia for bāc̄fia.

294, l. 12 : read 'c̄a(ং)e for 'ca(ং)e.

- 298, l. 6 : read 'জাগ্রো for জাগ্রো.
- 301, last line : read pāṭṭa for pāṭā.
- 302, l. 20 : read kārā for kārā.
- 305, l. 20 : after (grīvā), add : MB. ঘড় « ghārā » array (ghatā) ;
- 307, last line but one : read « আে » for « াে ».
- 309, l. 8 : read MB. for MA.
- 313, l. 11 : after (alābu), add : হেঁট  $\leftarrow$  hēṭṭa  $\rightarrow$  below > in a crouching position (\* ahēṇṭa, \* ahēṭṭha < \* adhiṣṭāt, Buddhist Sanskrit hēṣṭā, = OIA. adhastāt) ; MB. পাসরে  $\leftarrow$  pāśarē  $\rightarrow$  forgets (apasmarati) ;
- 315, l. 19 : read māśānḍ for māśānḍ.
- 315, l. 12 : read « াত় » for « াত় » ; after (antra), add : আশথ beside আশথ  $\leftarrow$  āśāthā, āśāthā  $\rightarrow$  (āśvattha) ; and in l. 15, delete : খাজা  $\leftarrow$  khājā  $\rightarrow$  a sweetmeat (khādyā), and take this deleted portion to p. 321, l. 23, before the word জাড়, adding khājja before khādyā.
- 319, l. 20 : the word « sabhā » forming the plural. Mr. Sukumār Sen has drawn my attention to the word « yuvati-sabhā » young women in Song 18 of the 'Gita-govinda' (Canto IX). Cf. also pp. 732-733.
- 324, l. 6 : read « niṣuti » for « niṣuṭi » ; l. 10, read \* piuśi for piuśi ; l. 25, read টীঁ for টীঁ.
- 325, l. 20 : read \* ūru- for \* uru ; l. 21, read -aṣṭhī- for -asthi-.
- 329, l. 8 from bottom : correct bōḍra to bōḍra.
- 331, l. 20 : read 'যদিন' for যদিন ; l. 25, read caritavya for cartavya.
- 333, l. 8 : after [jīdne], add : বটাটি  $\leftarrow$  ghāṭī-tā  $\rightarrow$  that water-vessel, বটাটি  $\leftarrow$  bāṭī-tā  $\rightarrow$  that cup > Standard Coll. ব'টটে, বাটটে [għoṭṭe, batte].
- 334, l. 7 from bottom, add : করমচা < করমোচা  $\leftarrow$  kārāmca < kārā-mōcā  $\rightarrow$  a fruit, Cassia carondas (Skt. kara-marda, Hind. karaundā : cf. 'Devatā', Pāṇini Office, Allahabad, 1917, p. 155).
- 335, l. 7 from bottom : correct persons to person.
- 337, l. 10 : correct -ū- to -ū-.
- 341, l. 6 from bottom : read jaēr for jaēr.
- 342, l. 10 : read chāyārā for chāyārā ; l. 19, delete MB.
- 349, l. 1 : after NIA., add : (where no special force of the « -ā » is present or evident).

- 350, l. 4: before etc., add : মাই, তাই < jāi, tāi > (yadā-hi, tada-hi).
- 351, l. 13: add at the end: But পৌনে [poune] less by a quarter has < -āu- > for MIA. < -āō > (pāōṇa, pādōna).
- 352, l. 15: read \* duūlia for duulia; l. 8 from bottom, after (dēva, dēha), add: † রে [r̥e:, r̥e:] line for plough to follow (\* rē, rēhā, rēhā, rēkhā);
- 353, l. 7 from bottom: read \* ghrata.
- 355, l. 8, after (nacca, nṛtya), add: † বাসোঃষা < bāswā > ox, Maithili < basahā > (vasaha-, vṛṣabha-); in l. 21, read \* tādrśana.
- 356, l. 2: before etc., add: বুক < buk > chest (cf. Skt. vṛkka, Avestan vərəθka kidney, MIA. bukka);
- 357, l. 5 from bottom: correct egreja to igreja.
- 358, l. 3, l. 6: read respectively [abrito] and [abbrito]; last line, correct to ghanakam.
- 359, l. 12: for < ū > read < ḫ >.
- 364, l. 7, add: But we have the sts. বেন্নন < bennan > [bænnon] curry from < vyāñjana >.
- 365, l. 12: read ṣandā for sanḍā.
- 366, l. 7 from bottom: read śimul& for śimula.
- 367, l. 12, add: an! ŠKK. চাঞ্ছলী < cāmbhālī > a flower for < cāmēli >.
- 369, l. 7 from bottom: read \* inṭa for \* inta.
- 370, l. 6: read sēcayati for sēcayati; l. 19, bāṭul& for bāṭul&.
- 373, ll. 11-12: read ſ for ſ.
- 378, l. 13: after e.g., add: Pali < issēra, acchēra < \* ēssaira, \* acchaira < \* essairia, \* acchairia < āīsvarya, āścarya >.
- 386, l. 18: after < gāṭ >, add: beside গেট < gēṭ >.
- 392, l. 19: read [ʃoitt̥o] for [ʃoitt̥o].
- 396, l. 3 from the end: read [borp(h)i] for [borp(h)i].
- 398, l. 10 from bottom: read \* কুড়লি for the first কুড়লি, and kurāli for kurāli.
- 402, l. 14, before origin, add to their: l. 5 from bottom, read [ʃore ɔ:].
- 424, l. 6 from bottom: add: MB. < -āhā-, -āya- > also occur as [oē]: গ়না < গহনা [goēna] < < gāhānā > ornaments, jewels (grahāna-); ম়না [moeṇa] < < māyānā > a talking bird, 'mynah' (madana-). In l. 16, read bhōjēṣa for bhōjēṣa.

- 430, l. 4 and 2 from the end : [ʃts] (as in [kəʃtsit] and [dzoʃk:həʃtso:k:re:]) is pronounced also as [rʃʃ] and [cʃʃ].
- 438, l. 9 : read §84 for §86.
- 440, l. 21, read gāṛ for ḡāṛ ; last line, correct † to ‡.
- 441, l. 3 : *The Aspirates.* It should be noted that the aspirate nasals and liquids (< nh, mb, rh, lh > : cf. 'Prākṛta-Pāṇḍgala,' Bib. Ind. ed., p. 6) occurred in OB. and Early MB., and these became deaspirated in the Late MB. stage.
- 443, l. 5 from bottom : read ◊ āḍḍlā ◊ for ◊ āḍḍla ◊.
- 449, l. 5, add recent before foreign, and put a comma after words. After l. 8, add : Other instances of assimilation : ◊ n > m ◊ : মোহনভোগ় ◊ mōhān়-bhōg় > *pudding made of flour, sugar and ghee* > [mo(f)i]on-bhīog > mombhīog > mumbhīog] in the Calcutta Colloquial ; ◊ n় > n > ŋ ◊ : ডাঙ্গুলি ◊ dāñdā-guli > *tip-cat (game)* > ডান্গুলি, ডাংগুলি [danguli, ḡanguli].
- 451, l. 22 : correct pañca to pañēca ; l. 24, at the beginning, add : [r̥] is similarly assimilated to a following [ʃ], as in মাকড়সা ◊ mākṛ̥ḍsā > spider > Calcutta Coll. মাকসা ◊ mākāsā > [məkɔr̥ʃā] > makosā, হাত্তীশাল ◊ hāt̥isāl > *room for pots, kitchen* > [hāt̥r̥ʃal] by Epenthesis > হেঞ্জেল [hēñjel].
- 452, l. 5, and l. 4 from bottom : correct < to >.
- 453, l. 17 : correct gh to ḡf.
- 456, l. 14 : correct kāk় to hāk়.
- 460, after l. 8, add, in a new paragraph : OIA. ◊ -ksy- ◊ : ভেখ, ভেক ◊ bhēk(h)় > mendicancy, the life of a monk, monk's garb (bhāiksya).
- 468, l. 13 : add so before long.
- 470, l. 2 from bottom : correct the semicolon before পঁচা to >.
- 471, l. 8 supply, after jēāc় : woman with first child living. L. 9, before etc., add : MB. আচাভুা ◊ ācābhūā > (accabbhua-, atyadbhuta-). After l. 11, add as a new paragraph : OIA. ◊ -rc- > MIA. ◊ -cc- > -nc- > : আচ < āc় > heat of flame (arcih) ; কুচি < kūci > brush (kūreikā).
- 472, l. 2 from bottom : read \* es-ské-ti for \* es-sko-ti.

473, l. 2 : read \*pró+bhu-ské-ti ; l. 3, read \*ppk-ské-ti ; l. 17, add at the end : MB. নেউছা, nichā < nēuchā, nichā > adorn (< nēvaccha-, nēpathya- > : there is another form in MB., nichā < nichā >, for which see *infra*, p. 551).

475, l. 13 : read 'fry' for 'try' ; l. 3 from bottom, correct † to ‡.

480, l. 15 : delete \* before dhitā, and add after duhitā) : (the MIA. < dhitā > is derived by some scholars from the IE. \* \* √ dhē > suck = OIA., < √dhā >, which is found in the Latin < filius, filia >.)

L. 7 from bottom, read ঝুঁঁৰা for ঝুঁৰা ; l. 5 from bottom, read ঝুটা for ঝটা.

484, l. 18 : read < mardā-mi > for < mardāmi > ; l. 5 from bottom, delete one and.

488, l. 26 : read dāśṣ for dāśṣ.

490, l. 16 : read টাটু for টাটু.

495, l. 5 : read dimba for dimba.

498, l. 15 : read দেগ for দেগ.

502, l. 9 from bottom : correct > to <.

509, l. 21, read পুঁটী মাছ for পুটী মাছ.

510, l. 10 from end : add, after < rūpā > : silver ; and after rūpya- : stamped coin.

513, l. 2 from bottom : correct to বেওরা.

514, add after l. 17, as a separate para. : OIA. < -vy- > : the future base ইব < -ibā- > (OIA. < -itavya- >, MIA. < -iavva-, -iabba- >).

515, l. 5, read bhukhā for bhukha ; after l. 23, add as a separate para. : OIA. < -dbh- > : MB. আচাভুআ < ācābhūā > (atyadbhuta-) ; and then after that add the portion from উভিয়া যাওয়া to (ud+√bhṛ, bhar) in ll. 31-33 (by mistake entered under OIA. < -rbh- >).

520, l. 9 : before MB. গোঙ্গাএ, add : গুই < gūi > a surname (< -gōmin > : cf. Candra-gōmin, the Bengal grammarian of c. 600 A.C.);

521, l. 11 : before ছাতিম, add : Standard Coll. গোমনে [gomne] late, a sts., for গৌণে < gāunē [goune, gōwne] > (< gāuna);

523, l. 10 : read ē for ē.

525, l. 9 from bottom : read most for all ; l. 3 from bottom, correct to intervocal.

- 527, l. 9 : correct to বিষ্ণুপুরে.
- 534, l. 11 from bottom : correct to পক.
- 535, l. 2 : read [ঝ] for [ঢ].
- 536, l. 13 from bottom : read as follows : at a later time, Early Braj-bhākhā in the West as well), to change....
- 548, l. 11 from bottom : read apasmarati for prasmarati.
- 549, l. 1 : read śimśapā for śimsapā.
- 550, l. 9 : read si for sī ; l. 2 from bottom, read śatāyuh.
- 556, l. 9 from bottom : read bāīci for bāīci.
- 557, l. 10 : read sāhā for sāha ; 11, read nēhā for nēha.
- 560, l. 9 : read regarded for regard ; l. 12, read Saifi for Saifī.
- 563, l. 3 from bottom : correct to syllable.
- 570 : l. 8, read 'Moghals' for Moghals ; and in the Table of Consonants, take h from the Semi-cowel to the Fricative line.
- 576, l. 7 : read [tābu] for [tābu] ; l. 11, correct Hindostānī to Hindostānī ; l. 23, read fiab(e)li for fiab(e)i ; l. 25, read হালুয়া for হালুয়া ; and l. 26, fiabjī for fiabfi.
- 577, l. 4 from end : read রিশবৎ for বিশবৎ.
- 580, l. 9 : read হিন্দু for হিঙ্গু ; and l. 5 from bottom, before and, add : and আমারী ◆ āmārī ▶ canopied seat on elephant (‘imārī).
- 581, l. 14 : read corpses for corps.
- 593, last line : add In as the last word.
- 608, l. 12 from bottom : correct phæʃʃad to phæʃʃad.
- 613, l. 5 from bottom : before হজির, add : নজির [noʒiɔr] present (naðr) ;
- 621, l. 10 : correct Collected to Collected.
- 623, l. 11 : read তোলো for তোলা.
- 625, l. 5 : read 'coffee' for 'caffee.'
- 643, l. 6 : before 'theatre,' add : (also ঠিএটাৱ [thietar] commonly in Calcutta cockney, through assimilation with the following cerebral).
- 656, l. 13 : read ghūrn- for ghūrn-.
- 658, l. 4 : read বাধনী for বাধনী.
- 670 ; read rūpālī for rupālī in l. 7, and rūpuli for rupuli in l. 8.
- 672, l. 17 : read রঁধনী for the first রঁধুনি.

673, l. 2 : read বষ্টুমী for বষ্টুমী.

677, last line : read pleonastically for peonastically.

682, l. 13 : read ছহলা for dholla ; l. 20, before পুঁটকে, add : মেচকো in মেচকো  
ফের < mēc̪kō > in < mēc̪kō phēṛ > a strong knot, a complication < a  
knot in a jute rope (< মেচা < mēcā > jute in the Standard Dialect in  
tracts to the south of Calcutta) ;

688, l. 5 : read sāpāriyā for sāpāriyā ; l. 6, read লুঠিয়াড়।

697, l. 6 from bottom : add : < ugra-rūpa > exceedingly fierce, Pali < kalya-  
rūpa > exceedingly pleased, etc., etc.

699, l. 5 from bottom : read দুপসা for the second বাপসা.

702, l. 4 from bottom : read thānī for thanī.

703, l. 1 : correct to Perso-Arabic.

706, under (9) মষ, add : It is likely that in the locative sense, as in দেশমৰ,  
the affix is partly based on the NIA. locative suffix from < madhya >  
noted *infra*, p. 751.

706, before last line add :

(12) স্থ < -sthā >.

**467a.** Following Skt. forms like দেশস্থ < dēśā-sthā > remaining in  
the land, সভাস্থ < sabbhā-sthā > present in the assembly, মধ্যস্থ < madhyā-  
sthā > remaining in the middle, arbitrator, etc., etc., the compounded  
< -sthā > has come to be used as an affix with থক. and foreign words, in  
the sense of occurring at, present in, etc. : e.g., কলিকাতাস্থ < Kālikātā-  
sthā > of Calcutta, from Calcutta, staying at Calcutta ; শঙ্খাইস্থ সংবাদদাতা  
< lārāi-sthā sambādā-dātā > war correspondent ; কর্ণওয়ালিস-স্ট্রিটস্থ দোকান  
< Kārnāwālisā-Strītā-sthā dōkān > shop in Cornwallis Street ; etc.

712 : Add at the beginning :

(৩a) পাতি, পাত < pāti-, pāt- >.

**473a.** This word, in the sense of *small*, occurs with a number of terms, like পাতি-কুয়া or পাতকো < pāti-kūā, pāt-kō > a small well (as opposed to an ইন্দ্ৰারা < idārā > a large masonry well < < indrāgāra >),  
পাতি-শিয়াল < pāti-siyāl > small jackal, পাতি-লেবু < pāti-lēbu > a kind of  
tiny lemon (as opposed to other kinds), পাতি-হাঁস < pāti-hās > duck

(as opposed to রাজ-হাঁস « rājñ-hāṣṭha » *goose*), পাতি-ভাঁড় « pāti-bbāṛa » *small earthen cup*, পাতি- or পাত-মৌড় « pāti-, pāt-māurha » *an ornament for the head* (< mukuta), পাতি-কাক « pāti-kākha » *crow* (as opposed to দাঢ়ি-কাক « dāṛḍhi-kākha » *juck-daw*), পাতি-নেড়ে « pāti-nēṛē » *shaveling, small shaven-headed one = Mohammedan of the lower castes* (a term of abuse), etc. The form occurs in East Bengal as পেতি « pēti », as in পেতি-কোরা « pēti-kāuā » *crow*, পেতি-মেকুর « pēti-mēkurha » *kitten*. The source seems to be OIA. « patra » *leaf* > « patrika », MIA. « pattia » > NIA. « pāti » *thin as a leaf* > *small, insignificant*: cf. পাতলা « pāṭalā » *thin, not deep* (patra-la). The French « petit » [pēti, pt̪i] *small* has been suggested by some as the source of this form, but it is exceedingly unlikely, despite the fact of the presence of the French in Bengal (at Chandernagore), and of the East Bengali form « pēti » presenting an unexpected vowel in the « -ē- » (the East Bengali form, however, seems to be a borrowing from Standard Bengali with irregular alteration of the vowel).

712, l. 13: correct « nābālākha » to « nābālākha ».

720, ll. 8, 9: delete : বৎসহারা গাভী « bātsā-hārā gābhi » *a cow which has lost her calf*. In l. 11, read form for from.

731, ll. 11, 13: read ‘professors’ for ‘scholars’ ; and in last line but two, put an \* before মানুষাদ.

733, l. 5: read rājñ-nāitika.

740, l. 7 from bottom: read : a form of Māgadhi.

741, l. 9: read \* thāwi for thāwi ; l. 12, add after NB.: so Assamese « gādhāī » (< \* gaddahi, gaddahē, gardabhaḥ), « lātāī » (ts. latā + -i). In l. 24, read p. 1 for p. 2.

744, l. 6: read « gōru-ē » for « gōru-ē »

745, l. 2: read « -ānām » for « -anām ».

751: add as a new paragraph, after l. 16 :

In dialectal Bengali, as in Sylhet, there is a locative affix in « -ō, -ā » ; e.g., ঘরো, ঘর « ghārō, ghārā » *in the house* (LSI., V, I, p. 225). This would seem to be based on a MIA. « \*gharaha »,

where « -ha » is the OIA. affix « \* -dha », of a locative character, which is found in Sanskrit in « i-ha (cf. Prakrit i-dha), ku-ha, sa-ha (cf. Vedic sadha) », and which seems to have been extended to the noun also. (This « -dha » seems to be connected with the other locative affix « -dhi » discussed before at p. 745, and has cognate forms in the Latin « in-de », Slav « kū-de »: cf. Thumb, 'Handbuch des Sanskrit,' Heidelberg, 1905, § 407).

751, l. 8 from bottom: read an unsolved problem.

756, l. 8: « udvāna-kṛtam āsanam » (cf. Grierson, 'On Certain Suffixes in the Modern Indo-Aryan Vernaculars,' Kuhn's Zeitschrift, Vol. 38, pp. 473 ff.: also « karāṇḍē mālā-kṛtē », in the 'Mahā-vastu,' etc.).  
Last line but two: read purusāñām.

759, l. 12: the affix in Assamese seems to be সা « sā »: cf. also the genitive form « tōmāsā-rā » and the locative « tōmāsā-tā » in Early Assamese.

762, ll. 2, 3 from end: a solitary example of an ablative form in OB.  
There is another instance of an ablative in « -hu » in the Caryās, viz., « raaṇahu śahajē kahēi » (Caryā 27), which the Sanskrit Commentary translates and explains as « sadguru-vacana-tattva-ratna-prabhāvāt sa mayi sahajānandaṁ kathayati ».

772, under Post-position No. (26), বই « bāī ». My friend Mr. Sailendranāth Mitra, M.A., of the Department of Pali in Calcutta University draws my attention to the use of « bahiddhā » in Pali, with the ablative, to mean *apart from, outside of*: e.g., « itō bahiddhā samanōpi n'atthi » *outside of this, there is no monk* (Mahāparinibbāṇa-sutta, V, 27). The use of « bahiḥ, bahirdhā (= bahiḥ + dhā) », with the ablative as well as genitive, to denote *outside*, occurred in OIA. (cf. Speijer, 'Vedische und Sanskrit-syntax,' §§ 88, 89, 90). The source of the Bengali post-position বই, বহি, বহী « bāī, bāhi, bāhi » would thus be the OIA. « bahiḥ », and not « vyatita » as suggested in the text.

790, l. 14: correct to Wackernagel.

800, l. 15: read sō for sō.

801, l. 21 : A MIA. form for « sahasra » seems to have been « sahamśa » (beside « sahassa »), and this nasalised form occurs as « sahāsa » in Early Western Hindī. An old spelling of the place name ‘Sasseram’ or ‘Sahasram’ in Bihar is ‘Sahansram’.

802, l. 11, add at the end: There is also the word सिकि « siki », सिका « sikā » a quarter, a silver coin equal to the fourth of a rupee. The word occurs dialectally as « suki, sukā », and is apparently the same word as the Hind. « sūkā ». Platts derives « sūkā » from « sapādaka » with a quarter (‘Hindustani Dictionary’). It may be that here we have the influence of the MIA. « sikka » (see *supra*, pp. 194-195) or the Perso-Arabic « sikkah » coin, in connexion with the « -k- » consonant as well (as the « -i- » vowel in the Bengali form).

811, l. 17 : read मूहि, for मंह,

821. In the Table, under Old Plural, Oblique, read ता for त।; under New Plural, Nominative, read ता(ही)रा, and oblique, ता(ही)देर ; and in connexion with what has been said in l. 8 in § 555, note: the form « sa-kah » actually occurs in OIA. (Rig-Veda, Śatapatha Brāhmaṇa, etc.): see below, note on p. 993.

823, l. 13 from bottom : read ता for त।

825, l. 17 : read possesses for possess.

828, l. 10 : read tāmṛ-rā-rṛ for tāmṛ-ra-rṛ.

829, l. 2 in § 566 : delete comma after « ē-ta- »; l. 5, read . base « \*to- ».

832, l. 3 from bottom : read in the Shahbazgarhi Asōkan.

835, l. 7, read उहा for उहा ; in the Table, under Oblique of Old Plural, read ओहा for ओहा.

839, read [F] for [D] before the heading THE RELATIVE PRONOUN ; and in the Table, under Oblique of Double Plural, read या(ही)देर for या(ही)देर.

840, l. 6 : « ya-kah » as the source of « jē » occurs in OIA., like « sa-kah » the source of « sē » : see *supra*, note on p. 821, and *infra*, on p. 993.

861, l. 14 : read \*-n- for -n-.

862, l. 4, read div-ya-ti for div-ya-ti.

867, l. 3 from bottom : read cár-i-tav-āí for car-i-tav-āí.

869, l. 12 from bottom . read NOUN for VOUN.

871, l. 15 : read seem for seen.

873, l. 12, read es-ské-ti for es-sko-ti ; l. 15, read খুজি for খুজ ; l. 24, read খৰসি for খৰসি.

874, l. 5 : read lāj for āj ; last line, read Bengali.

875, l. 12 : read es-ské-ti ; l. 14, read pró+bhu-ské-ti.

882, l. 22 : read vyākhyāna for vyyākhāna.

884, l. 16 : read দাগা for the second দাগ.

#### 885, heading line : read COMPOUNDED AND SUFFIXED ROOTS.

898, ll. 18-19 : The dative-accusative with the post-position occurs in OB. : e.g., Caryā 12, « matiē ṭhākura-ka parinivittā » = « matyā prajñāpāramitānubuddhyā ṭhakuram iti saṅklēśārōpita-cittam parinirvāṇārōpitaṁ kṛtaṁ », according to the Commentary.

L. 3 from bottom : read like for ike.

900, l. 12 : read labh-ē-ta for labh-ī-ta.

901, l. 3 : read NB. for MB.

904, l. 5 : read « -äü » : « kar-aü ».

907, l. 16, add : The affix in the form of « -üt », however, is actually found in S.-W. Bengali : চলুৎ « calūt », etc.

908, l. 15 : read later for latter.

909, l. 15 : add : The form « gā » (earlier form « gai, gaë ») is also optionally added in Maithili to emphasise the future (cf. Grierson, Maithili Grammar<sup>2</sup>, pp. 136-137).

L. 4 from bottom (=heading line) : read as (1) PASSIVE INDICATIVE.

924, l. 18 : read lalātā- for lalātā-.

932, l. 7: read থোঁৱে। for থোঁৱে ; l. 11, read পাঁৱে। for পাঁৱে।

941, l. 11: correct to Grammatik.

956, l. 4: read « calī, jārī ».

961, headline : correct to FUTURE.

968, l. 13: read is for in.

975, l. 9, from end : read « pārilāhō » for « pārilāhō ».

984, l. 19 : correct the first वृश्चिक to वृहीष्म.

993, last line, after 'e.g.' add : MIA. « aha-ka-ṁ, tva-ka-ṁ », OIA. (Rig-Veda) « asa-ka-, sa-ka- », (Kauśitaki Brāhmaṇa) « yāma-k-i », (Śatapatha Brāhmaṇa, etc.) « sa-kā, sa-ka-, ya-ka-, ya-kā, asa-ka- », etc ; and note also.....( I am indebted to Mr. Sukumār Sen for drawing my attention to the OIA. forms occurring in the Vedic texts).

1019, l. 9 from the end : read « āch » for the present and the past.

1029, l. 13 : read « -(i)t- + -it- » + root « āch ».

1032, l. 10 : read pālānā for pālānā.

1035, l. 3 : read adjective passive participle for verbal noun ; and in l. 6, take the semicolon before so.

1040, last line but one : read altindischen.

---

 অমল—378, 711  
 -অমি—666  
 অমিয়া—355  
 অমৃত, অত্রত—357  
 অৱ (sound)—424, 426  
 অংগি, অংগী (sound)—425  
 অংয, অংযু (sound)—427  
 অংযে (sound)—424, 426  
 অ'রে (sound)—426  
 অলেয়েকলত, -ক্রথ—645  
 -অৱ—112  
 অৱক্ষা—710  
 অৱি—397
- অৱি—668  
 অৰ্পা—214  
 অৰ্পা—884  
 অৰ্পা—582  
 -অল—669  
 অলিকুল—727  
 অলী—615  
 অশথ—335, 504, 506, 1068  
 অঙ্গদ—506  
 অঙ্গথ—710  
 অথ—534  
 অষ্ট—792  
 অষ্টআলী—792  
 অষ্টন(ৰ)ই—792  
 -অসিমা—700  
 অহুথ—397  
 অঞ্চাদি(ৰ)—814  
 -অহ—(sound) 425 ; (verbal affix) 903, 906  
 অহিল্য—710  
 অহিমাৰী—710  
 -অহে—425  
 ‘অ’—271  
 অ—(sound) 258, 271, 272, 389, 393, 402, 404, 574, 575, 576, 579, 582, 622, 636, 637, 638, 639 ; (suffix) 656, 657, 658, 660, 664, 716, 734 ; (genitive affix) 162, 752 ; (in verb forms) 921, 922, 923, 926, 974, 980, 988, 1012, 1029, 1034 ; (prefix) 709, 710 ; (verb-root) 874, 1046  
 অংঅৱ—283, 314, 340, 349  
 আআ—429  
 আই—(sound) 421 ; (affix) 422, 661, 662, 663
- আই (grandmother)—307, 421  
 আই (=ইংৱু) —310, 406, 662  
 আইআ—383  
 আইচ—342, 471  
 আইজ—269, 380, 385  
 -আইত—653, 655, 663, 676  
 আইদ—308, 380, 383  
 আইন—582, 584  
 -আইন—725, 974, 986  
 আইন্ড—1021  
 আইবড়—422  
 আইয়া—416  
 আইয়ানে—1007  
 আইয়ারে—994  
 আইল—(verb) 320, 386, 544, 1046  
 আইলপনা—380  
 আইলা—386  
 আইলাৰ—383, 386  
 আইলাহো—975  
 আইলে—1046  
 আইলাই—987  
 আইলু—384  
 আইশ—892  
 আইশ—123, 379, 874, 892, 1046.  
 আইসই—350.  
 আইসতে—385  
 আইসা—885  
 আইদি—340  
 আইদিও—1046  
 আইসিয়া—352  
 আইসিল—1046  
 আইসিস—1046  
 আইশ—379  
 আইহক—1046

- আইস্বর—1046  
 আইসে—320, 345, 379, 383,  
     387, 550  
 আইহ—198, 283, 307, 314,  
     347, 383, 554  
 আইহণ—198, 283  
 আইহত—692  
 আই—162  
 আইব—372  
 আইশ—310  
 আগা—882  
 আজ—269, 307  
 আলা—351, 704, 882  
 আলুনা—699  
 আউ (=etus)—310  
 আউ (sound)—423  
 আউআ (আওয়া) —664  
 আউখ—310  
 আউট—493, 554  
 আউট (= Eng. out)—639, 645  
 আউল—320, 342, 379, 383,  
     544  
 আউলা—345, 351, 386, 423,  
     704, 882  
 আউলাইল—383, 957, 1033  
 আউশ—320, 355  
 আউষ—355, 547, 548  
 আও—(sound) 423 ; (suffix)  
     663  
 আওজ—874  
 আওজা—320  
 আওট—349  
 আওটা—320, 423, 491  
 আওড়া—423, 887  
 আওতা—535  
 আওয়াজ—314, 616  
 আওয়াস—427  
 আওরঙ্গজেব—588, 607
- আওরঞ্জেব—607  
 আওলা—522  
 আংট—493  
 আংরেজ—215  
 আই (=আমি)—521, 815  
 আই—726, 974, 986  
 আইব—336, 372, 519, 547,  
     550  
 আইয়টিয়া—686  
 আউনী—423  
 আওমা. -নে (=আপনা, আপনি)  
     —850  
 আওরা (=আমরা), -রার, -রারে  
     —815  
 আওলা—519, 544  
 আক—316, 360, 362  
 আকড়া—887  
 আকৰ্ণী—691  
 আকৰ্ণী—333, 550  
 আকাড়—880  
 আকড়াঘ—880  
 আকাড়ে—880  
 আকুৰ—337  
 আকুৰী—337, 550  
 আকোৱ—337  
 আখ—1.0, 307, 316, 369,  
     460  
 আখৰ—369, 540  
 আপি—150, 316  
 আচ—(heat, flame) 307, 316,  
     369, 1070 ; (to guess) 878  
 আচড়া—887  
 আচল—335, 361, 471  
 আচা—874  
 আচন—664  
 আচাৰ—519  
 আচলা—364  
 আজুলি—398
- আঁট—878  
 আঁটি—316, 369, 493  
 আঁটু—311  
 আড়—496  
 আঁড়া (=আপা, আন) —526  
 আঁড়ি (=আণি, আনি) —526  
 আঁড়ুৰা—365  
 আঁত—316, 502  
 আঁতকা—882, 886  
 আঁতকে—449  
 আঁতড়ী—691  
 আঁতড়ী—661  
 আঁধাৰ—317, 345, 366, 507  
 আঁধাৰ—882  
 আঁধি—366, 507  
 আঁনে, -না (=আপনি, আপনা)  
     —850  
 আৰ—301, 321, 637, 514, 531  
 আৰাৰ, -ৰাৰ, -ৰাৰ, -ৰাৰে, -ৰে  
     আৰাৰ (=আমৰা etc.) —815  
 আৰ (=আমাৰ) —142, 815  
 আৰাৰ, -ৰে (=আমৰা, -ৰে) —815  
 আশ—215, 310, 362  
 আষ—372, 519, 547, 550  
 আষটে—491, 686  
 আঃ—558  
 আক (suffix)—681, 974  
 আকছাৰ—473, 574, 612  
 আকন্দ—456  
 আকবৰ—577, 598, 605  
 আকল—597  
 আকলমলী—592  
 আকাশ—454  
 আ-কচা—710  
 আকট, -ট—710  
 আকাৰণ—710  
 আকুমাৰী—314, 378, 710  
 আকাঁড়—526

আকাড়া—710  
 আকেল—574, 592, 597, 619  
 আক্তা—599  
 আথ—310  
 আথড়া—282, 331, 460, 495,  
     688  
 আথনী—599, 614  
 আথ(ঁ)স্তা—710  
 আধুর—316, 369  
 আধাইল—1032  
 আধুষ্টি, -ষ্টী—578, 584, 618  
 আধের—599  
 আগ (= agni)—302, 461  
 আগ (= agra)—767  
 আগত—767  
 আগড়—687  
 আগন—440, 461, 463  
 আগবাড়ি, -বাড়ান—1051  
 আগমন—462  
 আগর (= Eng. auger)—636  
 আগল—462, 544  
 আগলা—888  
 আগলান—330  
 আগা—213, 461  
 আগি—152, 302, 316, 461  
 আগুআ, -যা—882, 883  
 আগুচা—885  
 আগুছিশ্চ—1037  
 আগুন, -নি—152, 376, 398  
 আগে—767  
 -আগে (in কাৰ্য্যকাগে)—462  
 আগুন—440, 461, 463  
 আগুট—710  
 আয়োৱ—314  
 -আঙ—974, 976  
 আগুট, -টী—685  
 আঙল—522  
 আঙলা—889

আঙিনা—363  
 আঙুৰ—574, 607  
 আঙুল—544  
 আঙ—360  
 ‘আঙ’ (= ঝ)—377  
 আঙ—361  
 আঙ্গট—685  
 আঙ্গটা—333, 685  
 আঙ্গটী—333  
 আঙ্গন—335, 528  
 আঙ্গুৱা—331  
 আঙ্গিনা—335, 363  
 আঙ্গুষ্ঠি—493  
 আঙ্গুৱ—574, 607  
 -আচ—684  
 আচকান—574, 577, 601  
 আচকা—522, চমকা—314, 522  
 আচষ্টা—314
