

$\mathbf{y}_{ij} = \mathbf{x}_{n_{ij}} \cdot \mathbf{a}$

A diagram illustrating the relationship between the output \mathbf{y}_{ij} and the input $\mathbf{x}_{n_{ij}}$ and \mathbf{a} . The output \mathbf{y}_{ij} is shown as a small grey block, which is equal to the dot product of the input $\mathbf{x}_{n_{ij}}$ (a tall teal block) and the vector \mathbf{a} (a tall grey block).
