

# Delivering on the EU strategy on the Rights of the Child

**23 APRIL 2024**

Today the Commission adopted an initiative on integrated child protection systems in the best interests of the child, including a Commission Recommendation and a communication. The aim of this package is to put all prior actions of this mandate in an integrated framework and to support Member States with implementation.

With this package, the Commission is reaching another key milestone to turn the **2021 EU Strategy on the Rights of the Child into action**. This is bringing **decisive progress to empower children and to promote and protect their rights**, offline and online, in the EU and globally. In order to embed a child perspective in all EU actions, the Commission established the EU Network for Children's Rights to reinforce the dialogue and mutual learning between the EU and Member States on children's rights, and support the implementation, monitoring and evaluation of the strategy. This work is the result of a whole College approach, bringing together all 27 Commissioners to protect children.

*"Since the adoption of the Strategy, this Commission has taken bold actions to make children's rights a reality. We want to empower children to become resilient citizens in this ever-changing society. It is our shared responsibility to make sure every child can fulfil its rights, everywhere."*

Vice-President for Democracy and Demography, **Dubravka Šuica**
