Film and music have always shared an intimate relationship. Classical Hollywood style dominates the American film industry, dictating the look and sound of most films. Yet filmmakers have always challenged this status quo. Through close viewings—and listenings—of film, we will pursue a more concrete understanding of how music guides our film comprehension, explore how American film music continues to develop, and evaluate how these varied approaches shape the societies in which we live. During this course, you will hone your skills as an academic writer by learning to critically evaluate and craft your own arguments about the roles of music/sound in film. Some of the films covered will include King’s Row (1942), Rebecca (1940), Touch of Evil (1958), Vertigo (1958), Breakfast at Tiffany’s (1961), Batman (1989), The Remains of the Day (1993), The Social Network (2010), It Happened on Beale Street (2018), and Midsommar (2019). Our topics of inquiry will include representations of jazz, the role of the acousmatic voice, the use of pre-existing music, auteurism, the musically-politically subversive, musical appropriation, and media convergence with digital technologies. Your work will include readings in which we interact with both current and classic scholarly literature; short writing responses that respond to our films and the issues they raise (15-300 words); a short paper focused on the close reading of a scene (800 words); and a final research project on a film music topic of your choice (3000 words). This final project may take different forms—from a recorded analytical film commentary to a more traditional academic paper. Paired with writing workshops and peer review exercises, you will develop the skills necessary to contribute to the greater academic community, write clearly and logically for your intended audience, and formulate original, persuasive arguments.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.612. Vocal Contests. 3 Credits.
This course examines voice contests across time. While contests such as American Idol have received widespread attention, these competitions must be understood in terms of a much broader trend towards the proliferation of music prizes, both within and outside the classical music tradition. Our course examines the deep history of the current obsession with voice contests, with examples drawn from the Ancient Greece to the current day. Together we will ask: what sustains the power of prizes? What has driven their incredible proliferation since the outset of the twentieth century, when the Nobel, Pulitzer and modern-day Olympic prizes were first awarded? How does prize culture motor the classical- and popular-music industries? And how should musicians best maneuver themselves within modern-day economics of prestige? While the focus of our course is on vocal contests, this course will be of relevance to all those with an interest in how musical value is created—and tastes shaped—by prize-giving institutions.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.613. Stravinsky Perspectives. 3 Credits.
The critical literature addressing the music and aesthetic orientations of Igor Stravinsky (1882–1971) encompasses multiple frames of reference: ritual, discontinuity, octatonicism, neoclassicism, serialism, Russianness, and more. This seminar will sample prominent approaches in scholarship on Stravinsky, tracing several debates and examining representative works.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.614. Mahler and Strauss in America. 3 Credits.
In April 1904, Richard Strauss undertook a whirlwind tour of the United States in which he was heralded as the “lion of the musical hour.” Four years later in January 1908, Gustav Mahler made his own American debut, inaugurating a spectacular but troubled relationship with both the New York Philharmonic and the Metropolitan Opera. Their receptions could not have been more different. In this course we use Strauss and Mahler as a lens through which to understand both German and American art at the Fin de Siècle. We will discuss American concert culture, performance practice, and the phenomenon of the celebrity concert tour. We will explore the works that Strauss and Mahler wrote and premiered in this period and their increasingly divergent careers. Finally, we will investigate how Americans, grappling with European art, tried to define their own.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.616. Sound Memories: Jazz Autobiography and Memoir. 3 Credits.
In the words of Henry Louis Gates, Jr., “The will to power for black Americans was the will to write; and the predominant mode that this writing would assume was the shaping of a black self in words.” What did the shaping of the black self in words mean for those whose primary mode of expression was musical and improvisational? In their autobiographies and memoirs, jazz musicians’ discursive self-invention would appear to be born of materials and processes akin to those of jazz itself: full of polyrhythms, spontaneous riffing, call and response, and turnarounds. This course examines the autobiographies and memoirs of central figures, such as Ethel Waters, Louis Armstrong, Sidney Bechet, Jelly Roll Morton, Duke Ellington, Billie Holiday, Charles Mingus, Dizzy Gillespie, and Miles Davis. We will ask what relationship these texts bear to musical performances and personas: compositionally, aesthetically, and as represented by other media. For example, do they perpetuate or rather stand in opposition to various jazz mythologies such as the musicians’ intuitive genius or sensationalized drug use? What roles do these myths serve? If together jazz autobiographies can be said to constitute a genre, might these sophisticated textual performances comprise a counter-narrative to official histories of jazz and speak a different kind of truth to power? Note: Lara Pellegrinelli is a new adjunct faculty member who is also teaching for Zane Forshee in the Breakthrough Curriculum this spring. It appears that she does not yet have a JHED ID. Patrick Wallen DOES have her contract details (both from Zane and from me). Please let me know what else I may need to do in order to get her into the system and get her course scheduled.
Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].;Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.

PY.610.617. Experimental Music since 1950. 3 Credits.
This course explores the construction of the idea of “experimental” music since around 1950. We will consider the work of numerous individuals, groups, and movements including John Cage and the New York School, the Chicago-based AACM, the Darmstadt circle, the Lower East Side loft jazz scene, Cornelius Cardew and the Scratch Orchestra, and Fluxus. Through the study of recordings (commercial and archival), scores, artists’ writings, and scholarly literature, we will develop historical and aesthetic understanding of the varied practices that helped create the notion of musical experimentalism. Finally, we will study more recent experimental work including that being done in Baltimore at venues such as the Red Room and at festivals such as High Zero.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.618. German Song in the 19th Century. 3 Credits.
This course considers the repertoire of nineteenth-century German art song through a focused study of the works of four major figures: Schubert, Schumann, Brahms, and Wolf. We will address theories of text in music, evolving notions of the song “cycle,” analytical approaches to the lied, and the place of the lied within the social sphere. We will devote particular attention to Schubert’s Die schöne Müllerin and Winterreise, Schumann’s Dichterliebe, and Brahms’s Vier ernste Gesänge.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.619. Music & Leadership. 3 Credits.

PY.610.620. Social Innovation through Music: Health, Education, and Policy. 3 Credits.

PY.610.621. Exoticism on the Musical Stage. 3 Credits.
Creators of musical works have been continually drawn towards the idea of the “other,” wanting to represent on the stage characters that they perceive as culturally different or outside the norms of their own society. This course focuses on musical works for the stage that contain representations of the “other,” examining how text, music, and staging all work in different ways to exoticize certain characters. Works discussed will include Rameau’s Les Indes galantes (1735), Mozart’s Die Zauberflöte (1791), Bizet’s Carmen (1875), Sullivan’s The Mikado (1885), and Bernstein’s West Side Story (1957), as well as more recent adaptations of these works such as Carmen Jones (1943), Carmen: A Hip Hopera (2001), and the upcoming new West Side Story film (2021). We will address the historical contexts of these works, not to excuse them for their stereotyping practices, but to learn the social, economic, and aesthetic contexts that contributed to their original receptions. In addition, we will examine our own responses to these pieces and discuss the ethics of performing these works today.
Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].;Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.

PY.610.622. Beethoven String Quartets. 3 Credits.
This class uses Beethoven’s string quartets as a lens through which to consider larger issues of Beethoven scholarship. We will pair an in-depth study of the works themselves with an examination of a variety of issues important to Beethoven (and to musicological inquiry in general), such as the history and inherited traditions of the string quartet, music in an evolving capitalist marketplace, the notion of the individual Romantic composer-genius, deafness and the late style, and historical performance practice. Throughout, we will consider the specific roles and responsibilities that performers and scholars share in bringing these magnificent works to life.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.624. England's Queen/Opera's Muse. 3 Credits.
Music flourished in the court of Queen Elizabeth I, who reigned from 1558-1603. Composers thrived in all genres: secular and sacred, instrumental and vocal. Centuries later, the legendary monarch inspired opera composers such as Rossini, Donizetti, and Britten to create musical works dramatizing the renaissance queen’s life. This course reviews the masterpieces of English renaissance and also examines the rich operatic works depicting the royal heroine. Topics to be addressed will include nineteenth century continental reception of English history and twentieth century revivals of the Elizabethan lore.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.626. Technologies in the Concert Hall & Opera House. 3 Credits.
n this seminar we consider material and mechanical complexities of musical events. In successive weeks we examine issues such as: how orchestras have historically been directed; auditoriums illuminated; stage machines used and operas surtitled. Our discussion will be grounded in concrete circumstances at particular venues in locations as diverse as Paris, Bayreuth and New York. Together we will examine some core questions: what did material conventions established at individual venues mean for those who produced and consumed musical works; what was at stake when innovations were introduced, and—above all—how do material conventions established in the past continue to have a hold over musical productions today?
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.627. Changing Tunes: Pre-Existing Music in Film. 3 Credits.
Music and film have always shared an intimate relationship. From its inception, film has been injected with pre-existing music, including chant, traditional Western composers from Beethoven to Bartók, and more contemporary artists from the Beatles to Beyonce. This music has influenced American and international film industries alike, shaping the look and sound of film. Through close viewings—and listenings—of film, we will investigate the meaning(s) these musical works can acquire as they are re-used and re-purposed. Similarly, we will explore how, through film, pre-existing music can live on, change, and reify the past through contexts beyond the concert consumption with which we may be more familiar. During this course, we will hone your skills as an academic writer by learning to critically evaluate and craft arguments about the roles of music/sound in film. Some of the topics covered include: canonical works from the 18th and 19th centuries, the use of 20th-century avant garde music in horror, representations of jazz, chant and other medieval genres, anachronistic uses, and popular song. Your work will include studying film clips and full-length films; readings; short writing responses (100-200 words); four short papers focused on close readings of scenes or other supplied prompts (1000-1500 words); and a midterm project. Paired with writing workshops and peer review exercises, you will develop the skills necessary to contribute to the greater academic community, write clearly and logically for your intended audience, and formulate original, persuasive arguments.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.628. New Directions in Beethoven Scholarship. 3 Credits.
There would seem to be little left to learn about Beethoven. The common understanding of the composer as a temperamental, solitary genius, cursed with a tragic hearing loss—often credited with spurring him to produce the world's most profound music—has changed little over the past century and a half. What might remain to be studied? This course takes up the challenge, reconsidering the well-known features of the composer's life, work, and legacy through examining trends in Beethoven scholarship of the last 25 years. What did "heroism" sound like in music, and did Beethoven's contemporaries hear the music in this way? What were the political forces behind Beethoven's work? What can we learn by historicizing the notion of "genius"? How can disability studies inflect our understanding of Beethoven's deafness? And what can Beethoven's conversation books—recently published for the first time in English translation—show us about his life? Through asking these questions, we will consider what various historiographical methods, such as microhistory, disability studies, and actor-network theory, have to offer the study of a repertoire most commonly approached through biography. Consideration of these questions will inevitably shed light on the inherited value systems that make up contemporary musical life, many of which are inherited from nineteenth-century Beethoven reception.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.630. Duke Ellington: The Search for an American Sound. 3 Credits.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.631. Sound Studies. 3 Credits.
What do cultural histories of listening tell us about the value we have ascribed to music at various points in time? And how have the invention of media from the musical score to the MP3 altered how we conceive of music as sound? "Sound Studies" is not a course in which we learn about the acoustic properties of noises or pitches (however interesting such matters may be) but rather a historical course, in which we consider how we can enrich our histories of music when we situate music within broader histories of sound. Our seminars, for instance, consider historical moments when we have listened to sound for truth (as when confessions were first recorded) or other forms of concrete information (as when sound was first communicated across phone lines) and examines how these practices did—and sometimes did not—shape ideas about how we should compose, circulate and consume music. Our case studies will be drawn from the medieval era to the current day.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.632. Music and Evolution. 3 Credits.
This course will examine the bio-cultural evolution of music in light of recent interdisciplinary research on the social bases of human cognitive evolution, and explore its implications for current debates in musicology, ethnomusicology, psychology of music, and human cognitive evolution.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.633. Reenacting Orpheus. 3 Credits.
This course addresses retellings of the Orpheus myth from Monteverdi's L'Orfeo (1607) to Mitchell's Hadestown (2010) and Aucoin's Eurydice (2020). We consider why this myth is so compelling to composers and librettists and explore the complexities involved in adapting the same subject for new audiences.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.634. Baroque Performance Practice. 3 Credits.
This class provides a detailed overview of prevalent performance conventions in the Baroque era as revealed by primary sources, as well as some insight into why these matters are important and what drives the early music movement. Required of all Historical Performance MM students.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.636. Three American Composer-Writers: John Cage, Anthony Braxton, Pauline Oliveros. 3 Credits.

PY.610.637. Topics In Music Cognition. 3 Credits.
This introductory course explores relevant research and theory in the emerging domain of music perception and cognition.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.638. Topics In Music Cognition 2. 3 Credits.
This introductory course explores relevant research and theory in the emerging domain of music perception and cognition.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.639. Music in the Multimedia Franchise. 3 Credits.
Music defines our media experiences. Musical themes can likewise go beyond their original audiovisual framework to operate as musical-cultural texts. This online, asynchronous course uses music as a tool to investigate musical branding and the creation of meaning in the media we consume every day. Through close viewings - and listenings - of films, television episodes, video games, commercials, and other media, this course will explore the meaning(s) these media construct and acquire as both they and their music are re-used and re-purposed in multimedia franchises that expand their content into myriads of installments and platforms.

PY.610.640. Topics in Ethnomusicology. 3 Credits.

PY.610.642. Unraveling Ravel: Beyond Bolero. 3 Credits.
Paradoxically accessible and esoteric, Maurice Ravel's music resides in the canonical repertoire of practically every conservatory student. Yet Ravel's relationship to his own musical training was fraught both as a pianist and composer. This course examines the life and works of the French composer whose legacy permeates the practice rooms of Peabody. Beyond a survey of his compositional output, this seminar will examine the era that produced Ravel. France at the turn of the century, Ravel's studies at the Paris Conservatory, and his relationship with his musical contemporaries will all be topics of discussion. All musicians are welcome to take this class.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.643. Popular Music in Global Perspective. 3 Credits.
Popular music(s)—while they often share certain practices of production and distribution—are made, performed, and enjoyed around the world in a wide variety of languages, genres, and contexts. They are also closely tied to a range of social practices, political projects, and economic concerns as varied as the contexts in which these styles are produced and consumed. In this course, we will examine the production, consumption, and circulation of popular musics in multiple national and transnational contexts. We will discuss ways in which a global perspective might complicate common Western understandings of popular music aesthetics, categorization, and participation. Finally, through a series of case studies, we will seek to understand both the breadth of practice in popular musics and how these musics and the values embedded in them may both support and disrupt global patterns of influence, exchange, and domination.
Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].;Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.

PY.610.644. 19thC Performance Practice. 3 Credits.
This class provides a survey of prevalent performance conventions in the nineteenth century as revealed by primary sources, as well as some insight into why these matters are important and what constitutes the so-called Historically Informed Performance (HIP) perspective.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.650. Pink Noise: Women Making Electronic Music. 3 Credits.
How do the innovations of women making electronic music complicate notions of listening, music history, and the nature of music? Instead of conceptualizing gender and technology as discrete, oppositional, and universally open, this seminar explores electronic music through the lens of feminist critical frameworks and musical analyses in tandem with models of listening – notably Deep Listening as promulgated by Pauline Oliveros and Hildegard Westerkamp's approach to "conscious listening." Inspired and guided by Tara Rodgers' seminal anthology of interviews, Pink Noises: Women on Electronic Music and Sound, we discuss the work, struggles, triumphs, and techniques of pioneers including Daphne Oram, Pauline Oliveros, Wendy Carlos, Ruth Anderson, and Adrian Piper. We will also examine contemporary innovators and cyberfeminist speculative futures. Along with readings and seminar discussion, course activities include research presentations, listening sessions, brief performances, and composition projects.
Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].;Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.

PY.610.651. Foundations of Music Research. 2 Credits.
This course introduces research from the roles of consuming and then creating materials with a focus on how research is created, disseminated, and accessed. Scholars analyze and produce a variety research outputs relevant for music researchers and performing professionals. Students engage with secondary and archival research materials, discuss how to publish and disseminate their own research, and explore how information is organized to optimize the use of academic library resources now and post-graduation. Open to MM and undergraduate Musicology minor students only. Fall and spring.

PY.610.652. Applied Ethnomusicology and Public Musicology. 3 Credits.
The disciplines of ethnomusicology and musicology regularly employ a valuable set of intellectual tools for understanding, discussing, contextualizing, and performing music. What value do scholarly insights such as these have outside of the academy and how might they be put to work? "Applied" ethnomusicology and "public" musicology use the scholarly insights of the two fields in service of a range of practical or entrepreneurial projects and writing that addresses a broad audience. In this course, we will discuss a variety of such projects, as well as some of the ethical and practical concerns that arise when scholars engage with their publics. We will practice multiple styles of writing useful to public-facing scholarship, including grant proposals, program notes, and think pieces. Through both discussion and hands-on experience, we will explore the division between strictly academic and public-facing or applied research, questioning the utility and limits of this boundary.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.653. What was Postmodernism?. 3 Credits.
Few –isms have caused more disagreement and general confusion than "postmodernism." Pervasively discussed (at least in some quarters) from the 1970s through the mid-1990s, the term has been considerably less dominant in recent years. Yet music students continue to encounter it in textbooks and survey courses as something like the "official" style of the late twentieth century. It is worth asking, then, just what we are talking about when we talk about postmodernism. This course explores the history of the idea in architecture, literary theory, and historiography, among other fields. Our particular emphasis, however, will be on the notion of postmodernism in music. In addition to reading many of the classics of postmodern theory, we will study a wide range of composers and musicians including George Rochberg, Pamela Z, Mauricio Kagel, DJ Spooky, Alfred Schnittke, Laurie Anderson, George Lewis, The Velvet Underground, Helmut Lachenmann, Arthur Russell, and Marina Rosenfeld among others.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.654. Music of the Arab World. 3 Credits.
Study of the music of the Arab world reveals a rich art music tradition, elaborate melodic and rhythmic systems, a central role for improvisation, and a complex relationship to the sacred realm. This seminar will examine the theory, performance practice, repertories, and cultural and historical contexts of Arabic art music, and incorporate work on aural recognition of modes, rhythmic cycles, genres, and performance phenomena. Building on this foundation, students will also survey the sounds of Islam in the Arab world, aspects of Arab identity in music, and musical change in the twentieth century.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.655. Child Stars. 3 Credits.
Over the last century, the child as performer has played a central—if often unacknowledged—role in the Western cultural imagination. Occupying a third space between "real" children and adults, the child star has functioned as a surface upon which (adult) audiences can project their fears and fantasies about the future, the past, innocence, sexuality, talent, and human nature. This course examines the work that child stars perform for Western society at large, pulling apart the various ways that this enduring and meaningful area of performance acquires cultural, economic, and political significance. We'll focus on the careers of young classical music virtuosi, television and film stars, and the Disney-promoted singers of the last few decades; our readings will draw from labor history, race and gender studies, and theories of children's literature. We will ask the following questions: Why is child stardom generally limited to the performing arts (rather than the visual arts, literature, or musical composition)? Why are contemporary child stars always accompanied by a tragic narrative of "lost" childhood, even as their exceptional status is translated into the kind of wealth and recognition that many adults dream of? And what are the ethical issues in promoting, consuming, and sometimes exploiting children's talent?
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.658. Beethoven at Work. 3 Credits.
How did Ludwig van Beethoven compose? Modern-day musicians are extraordinarily fortunate that Beethoven saved his work in various stages of completion. Through his surviving autographs and sketches, we have the ability to trace his early ideas to their eventual fruition. The simple becomes sophisticated; the seemingly vapid can be enlivened or abandoned altogether. Perhaps as inspiring as the grandeur of these compositions in their final form is Beethoven's industry and sheer diligence so clearly evident in the sources. This seminar provides performers an opportunity to examine and analyze Beethoven's compositional process and exposes them to practical research tools. This course also delves into evolving musicological trends by accessing digital archives located throughout the world. A visit to the Library of Congress in Washington DC will be scheduled. All musicians are welcome.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.665. Music and Politics. 3 Credits.
This course examines the many ways that music intersected with the global politics of the twentieth century. Focusing primarily (though not exclusively) on the Cold War period, we will explore arts policy in both capitalist and communist nations; examine the roles music and musicians played in state diplomacy; and ask how music functioned between the poles of protest and complicity. Along the way we will pose larger questions about the complex roles a non-material art form can play in the exercise of power, among them: How can music have a political meaning beyond direct references to a state or ideology? What constitutes political "action"? Can a truly apolitical art exist?
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.671. Issues in Ethnomusicology. 3 Credits.
An introduction to the theories and methods of ethnomusicology. Topics include transcription and analysis, fieldwork, performance practice, and intercultural aesthetics.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.672. Ethnomusicology of Western Art Music. 3 Credits.
In this seminar, students will survey an emerging body of writing about the music of the Western classical tradition not as a series of musical works and composer biographies, but as a practice of people making music. One might think of it as an anthropology of art music. Readings will examine conservatory cultures and specific cultural moments of different European, transnational, and global cultures of Western Art Music. Though ethnomusicology typically confines itself to "non-western" or "world" music, the West's classical music tradition is arguably the very first world music. We will also listen to and think about the implications of the work of the transnational community of young practitioners who are making this a global practice in the 21st century.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.674. History of Musical Instruments. 3 Credits.
While the emphasis is on contemporary Western models, the history and technology of precursors and non-Western instruments will be addressed. It is hoped that students will develop a thorough knowledge of the history, technology and performance of their own instruments, as well as an appreciation and some familiarity with all ancient and modern musical instruments. To gain an understanding of the workings of musical instruments, projects will include the construction of instruments from simple ones—constructed from easy recipes and materials readily found around the house— to some requiring more sophisticated formulas and parts. Some of our classes may be held in the Mechanical Engineering Department's Laboratory Space at Wyman Park.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.679. Experiments in Opera since 1970. 3 Credits.
As early as the mid-1920s opera was widely criticized for purportedly being out-of-joint with modernity, irrevocably stuffy, and elitist. By mid-century few composers associated with avant- garde movements were interested in the form. Since the early 1970s, however, there has been a kind of operatic renaissance involving a diverse pool of composers, writers, and artists (although the critiques never stopped). This course surveys an array of the more experimental operas written since 1970 by composers with roots in numerous traditions including serialism, free jazz, fluxus, performance art, and minimalism. We will seek out causes for the operatic turn while exploring how composers, writers, directors, and visual artists have adapted opera to reflect contemporary concerns. Each class will focus on a single work with associated texts by the relevant artists as well as readings drawn from musicology, art history, philosophy, media theory, sociology, linguistics, psychology, and theater studies. In addition to our weekly meetings we will have opportunities to visit composers, opera companies and institutes, venues, and festivals. Composers/librettists/directors covered in the course will include: Igor Stravinsky and W. H. Auden (the sole pre-1970 example); Carla Bley and Paul Haines; Meredith Monk; Gyorgi Ligeti; Robert Wilson and Philip Glass; Karlheinz Stockhausen; Robert Ashley; Anthony Davis and Thulani Davis; Laurie Anderson; Luigi Nono; Anthony Braxton; Heiner Goebbels; Olga Neuwirth and Elfriede Jelinek; and Michel van der Aa.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.683. Expanding the Canon: Women and Minority Composers. 3 Credits.
In this seminar we'll explore the lives and music of twelve female or minority composers with special attention to reception history, and the challenges of expanding the classical canon. Artistic "Canons" are complex, nebulous, and inherently fraught structures, in which cultural establishments reflect and propagate their values. In this course, we will investigate the histories of these canons, and the rationales for the inclusions and, most importantly, exclusions. Our individual case studies are linked by this broader historiographical narrative.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.684. Transnationalism. 3 Credits.
An examination of contemporary world music genres from an ethnomusicological perspective, with emphasis on transnational and global issues.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.689. The Symphonic Century. 3 Credits.
The symphony occupies a prominent place within the history of Western classical music in the “long” nineteenth century. At once a canvas for daring innovations in style and form and a genre strongly allied with notions of “tradition,” the nineteenth-century symphony brings together a complex set of issues that illuminate the broader history of music and musical culture of the past 200 years. This course introduces the iconic works of the symphonic tradition, with a focus on music of Haydn, Mozart, Beethoven, Schubert, Berlioz, Schumann, Mendelssohn, Brahms, Bruckner, and Mahler. As we aim to discover what made this music so remarkable in its time and why so many people still care about it today, we will consider each symphony both as a timeless work of art and as a particular moment in cultural history. Close attention will be given to the techniques of structural listening, and our work will be deeply rooted within the historical, philosophical, and political contexts of the time.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.691. Master’s Essay. 2 Credits.
A scholarly work written under the supervision of a member of the musicology faculty. Required for the Master’s degree in Musicology. Fall and spring.

PY.610.692. Wagner. 3 Credits.
Wagner stands as one of the most famous and controversial exemplars of German musical romanticism. A revolutionary, a composer, a dramaturg, a critic, and––by some metrics––a philosopher, Wagner is an unavoidable voice in the story of opera. In this course we evaluate Wagner’s life, works, and historical context. We evaluate patterns of criticism of reception, all with an aim of honing our skills as readers and writers.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.693. American Music. 3 Credits.
A survey of American Music, from colonial times to the middle of the 20th century. There will be a considerable emphasis on relating musical expressions to changing social/historical conditions. We will examine the roles played by technological developments and the rise of the music business shortly after the American Revolution. Our country’s varied musical styles invite serious study of all modes of performance and dissemination, not just “classical” composition and performance. Active participation in discussion is a requirement of this seminar, as is writing a research paper on a topic of the student’s choice.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.694. Music in Maryland. 3 Credits.
Music in Maryland: from British Colonization through the mid-20th Century: Founded in 1634, Maryland’s diverse geography, economy, and settlement begat a rich music history. This course traces music of the great tobacco plantations of the Chesapeake Bay, with their co-mingled African and British music, through the growth of Baltimore into a center of publishing, concerts, opera, church music, instrument-building and teaching. We will examine the roles played by technological developments and the rise of the music business shortly after the American Revolution, also considering developments in sound recording and broadcast radio. Going well beyond `classical` trends, we will also examine rich popular and folk traditions, such as parlor songs and `Sacred Harp` hymnody. Active participation in discussion is a requirement of this seminar, also required are several writing assignments and an in-class presentation on a topic of the student’s choice.
Graduate students must meet musicology seminar proficiency requirements in order to enroll in this course.;Undergraduates need to have successfully completed 2 out of 3 following courses in order to register: PY.610.321[C], PY.610.322[C], PY.610.323[C].

PY.610.755. Masters Research. 2 Credits.
An introduction to methods of research through independent written projects in music history. Required of all musicology majors.

PY.610.756. Masters Research. 2 Credits.
An introduction to methods of research through independent written projects in music history. Required of all musicology majors. Fall and spring.

PY.610.791. Dissertation (DMA). 6 Credits.
A study of an original musical topic, approved by the DMA Committee, culminating in the completion and defense of a scholarly work written under supervision of the student’s academic advisor. Graded on a S/U basis.

PY.610.792. Lecture-Recital Paper. 2 Credits.
A study of a specific musical topic, approved by the DMA Committee and suitable as the basis for a lecture-recital, culminating in a written paper and a public lecture-recital. Fall and spring. Graded on a S/U basis.

PY.610.813. Doctoral Consultation and Research. 2 Credits.
For graduate students working with a faculty member to complete a dissertation or a lecture-recital essay. Registration required each semester following completion of coursework in order to maintain active status in the program.

PY.610.814. Doctoral Consultation and Research. 2 Credits.
For graduate students working to complete a dissertation or a lecture-recital essay. Registration is required each semester following completion of coursework in order to maintain active status in the program. Fall and spring.

PY.610.847. Musicology Colloquium. 3 Credits.
An introduction to doctoral-level academic study at Peabody. Emphasis is on critical thinking, argument from sources, and written and oral presentations. The course features presentations from invited speakers. Open to DMA and MM Musicology students only. Lectures are open to the general public.

PY.610.848. Musicology Colloquium. 3 Credits.
An introduction to doctoral-level academic study at Peabody. Emphasis is on critical thinking, argument from sources, and written and oral presentations. The course features presentations from invited speakers. Open to DMA and MM Musicology students only. Lectures are open to the general public.

PY.320.101. Music for New Media 1. 3 Credits.
A foundation of compositional skills. Students will analyze the work of seminal composers of Western music and learn to compose by mimicking their style. Compositions will be scored and notated for common instruments but realized through software emulation. Software used in class: a digital audio workstation (e.g., Logic Pro) and notation software (e.g., Finale).
Music for New Media majors only.

PY.320.102. Music for New Media 2. 3 Credits.
Further development of compositional skills as they relate to film, TV and video game scoring. Students will analyze historic and contemporary scores, considering the role of music when it is synchronized to picture. Students will be required to make short cues 'inspired by' or as 'clones' of cues from the movies they study. They will examine ways to invoke common cinematic moods using a range of scales/modes, intervals, chord sequences, and instrumental choices. In lab classes they will have time to individually work on simple exercises, making original themes and variations under headphones that they will then share with the rest of the class for critiques. They will have homework time to complete these pieces and be graded on them. Students will delve deeper into sample-based sound libraries, learning how to create simple orchestrations, arranged for common instruments but realized through software emulation. Software used in class: for composition--a digital audio workstation e.g., Logic Pro, Ableton Live, plus the Amadeus orchestral software library etc; for video editing and audio mastering--Avid ProTools.
Music for New Media majors only.;Music for New Media 1, PY.320.101[C], required. Student must have received at least a B- in order to progress.

PY.320.201. Music for New Media 3. 3 Credits.
Students explore the role of sound design by composing soundscapes to accompany moving images, and recording Foley elements. In addition, principals of orchestration studied in the Instrumentation course are applied to software instruments. Students will learn to create an orchestral realization of a composition that sounds as realistic as possible. Final project will be a scene in which they are individually responsible for creating all sound elements except dialogue. Project will model professional work through the use of contracts, timeline development and other project management skills. Prerequisites: Music for New Media 2 and Instrumentation and Arranging; Co-requisite: The Tools of New Media 1.
Music for New Media majors only.;Music for New Media 2, PY.320.102[C], required. Student must have received at least a B- in order to progress.

PY.320.202. Music for New Media 4. 3 Credits.
Students will undertake a semester long research and composition project related to the vast field of composing music for film, TV, or games. This will serve as a guided preparation for the type of projects they may work in their private studies as upperclassman or the capstone project. Each project will be presented to the class, exposing all students to a diverse range of techniques, styles, and conventions – co-developing their vocabulary of scoring. Students will also generate a printed score for a soloist or ensemble to play on one of their compositions and investigate alternative workflows in creating a Main Title or Main Menu Suite.
Music for New Media majors only.;Music for New Media 3, PY.320.201[C], required. Student must have received at least a B- in order to progress.

PY.320.211. The Tools of New Media 1. 2 Credits.
Beyond writing music, music then needs to be implemented to become a part of the soundscape of a game. The ability to implement their music will open up additional opportunities for game composers. Starting with direct implementation in the game engine Unity, students will learn how to create and manipulate objects using the C# programming language. We will then transition into using the middleware audio engine Wwise to create deeper reactivity and variation in our scores.
Music for New Media majors only.;Completion of Introduction to Programming required (PY.350.466[C]).;Music for New Media 2, PY.320.102[C], required. Student must have received at least a B- in order to enroll.

PY.320.212. The Tools of New Media 2. 2 Credits.
How does technology complement and enhance the work of a composer working on film and games? Investigate the key components of modern sample libraries and how best to use them. Use modern synthesizers and samplers to create unique and compelling sonic landscapes to accompany moving images. Through “mock-up” exercises, various aspects of MIDI programming (“virtual orchestration” or “synthestration”) will be explored, culminating in building a moderate sized scoring template.
Music for New Media majors only.;Tools of New Media 1, PY.320.211[C], required. Student must have received at least a B- in order to progress.;Completion of Introduction to Programming required (PY.350.466[C]).

PY.320.301. Mixing Sound for Picture. 3 Credits.

PY.320.419. Internship. 2 Credits.
Music for New Media majors only.

PY.320.495. Music for New Media Capstone. 2 Credits.
The culmination of all course work and private study in the degree, the Capstone Project is equivalent to a recital given by a performance major. By the end of the second year (through instruction in New Media Composition class) students will submit for approval an outline of their intended Capstone Project. Completed projects will be displayed, performed, demonstrated, etc. at the conclusion of their final semester of study.
Music for New Media majors only.

PY.320.501. Music for New Media Seminar. 1 Credit.
A required course for New Media students. Particular attention will be paid to the role of music in media, as well as current industry trends and developments in the field. (1

BU.000.000. Advanced Registration Placeholder. 2 Credits.

SA.000.050. Teaching from a Distance Sandbox 1.

SA.000.051. Teaching from a Distance Sandbox 2.

SA.000.052. Teaching from a Distance Sandbox 3.

SA.000.053. Teaching from a Distance Sandbox 4.

SA.000.054. Teaching from a Distance Sandbox 5.

SA.110.404. MAIA Extended Research Project.
MAIA students may take two courses instead of completing and defending a 15-20,000 word thesis. However, in order to maintain a research component, they must prepare an 8,000 word research paper for one of their courses. This requirement may be similar to the existing requirement for a given course, or may be considered additional to or substitute for existing requirements, as decided by the course professor.

SA.110.405. MAIA Thesis Research.
MAIA students at SAIS Europe may choose to spread their thesis research over a full academic year or do most of the work during the final semester.

SA.110.406. MAIA Thesis Defense. 8 Credits.
The MAIA thesis is a 15-20,000 word research project for which a SAIS Europe faculty member acts as primary supervisor and another professor as second reader who cross-examines the candidate during the defense.

SA.999.202. Principles and Practices of International Negotiation.
Non-Credit Skills Course

PY.540.491. Acting For Opera 1. 1 Credit.
An approach to dramatic characterization through the development of the actor's imagination and expressive range, with special emphasis on the ensemble and projection techniques of the lyric stage.
Open to Voice majors only.

PY.540.492. Acting For Opera 2. 1 Credit.
Acting for Opera is a laboratory for the complete singer-actor. The canon of music-theatre continues to expand, and each genre of music has its own evolving style of performance. As such, students will practice working both from the outside-in (using the face, body, and voice to express ideas and emotions) and from the inside-out (using their imaginations as fuel for strong artistic choices). Readings include historic and contemporary discourses on both acting and rhetoric. Students will prepare monologues, dialogue, and recitative scenes assigned by the instructor, and will be graded upon their individual preparation as well as their ability to work in an ensemble.
Open to Voice majors only.

PY.540.513. Movement 1. 1 Credit.
Develops physical awareness, movement skills, and integration of musical and spatial concepts. Includes introductory dance technique, vocabulary and patterns. Active studies in Dalcroze eurhythmics, choreography, characterization and styles provide further abilities useful in opera.
Open to Voice majors only.

PY.540.514. Movement 2. 1 Credit.
This course develops singers' physical awareness, movement skills, and integration of musical and dramatic content. Areas of study include the dynamics of stage space, gesture as a product of characterization, and knowledge of basic dance forms for the opera stage. Processes draw from somatic studies and Jaques-Dalcroze eurhythmics.
Open to Voice majors only.;Completion of Movement 1 required, PY.540.513[C].

PY.540.515. Movement (GR). 1 Credit.
Graduate Acting students will learn how to decode the important information in each script, libretto, and score in order to translate it into vivid performances. Art (and therefore acting) may be subjective, but everyone can cultivate the skills required to become a better singer-actor. The aim of this class is to empower graduate students to make strong artistic choices by demystifying character, style, and rhetoric.
Open to Voice majors only.

PY.540.521. Opera Seminar. 2 Credits.
An advanced course on acting for the Opera stage. This class counts towards the Vocal Literature course requirement.The purpose of this class is to review, strengthen and apply concepts of stagecraft, acting, and character analysis to the advanced singer interested in singing on the Opera stage. This will be done through "Role Preparation", working exclusively in a given role in an opera. By the end of the semester the student will be able to create from the music and text of the opera role an entire, complete, practical character and performance us.
Open to Voice majors only.

PY.540.522. Opera Seminar. 2 Credits.
An introduction to acting for the Opera stage.
Open to Voice majors only.

PY.540.523. Opera in Action. 2 Credits.
Who gets to make and to experience opera? Opera in Action students will explore these questions and pose their own, using a short opera performance as the catalyst for both classroom and community engagement. Students will work with instructors from various fields to devise activities and foster conversations around music, theatre, and performance. Emphasis will be placed on developing each individual student's musical/dramatic skills in the context of community. Both Voice and Music Education students with a singing background are encouraged to apply.

PY.540.535. Graduate Opera Seminar. 2 Credits.
Individual and group work focusing on language, diction, and the vocal line as it relates to instrumentation and musical texture. Students will explore composers' stylistic, linguistic, and musical choices as the basis for crafting informed interpretations of operatic works in various styles, including 21st-century repertoire. Focus may include both individual arias and role preparation. This course also includes a career overview that encompasses auditions, management, singing in Europe, and professional expectations and standards.
Open to Voice majors only.

PY.540.536. Opera Aria Coaching. 2 Credits.
Bringing an Opera Aria to performance level requires a great deal of 'sleuthing', i.e. detective work. We are who we are in every day life simply by being a living, breathing ever-evolving human being. Our reactions, our personality are ever revealing themselves simply by interacting with the situations and people we encounter. Arias are, however, stories told in a moment in time, in a particular situation that is 'pre-scribed' by a librettist and composer. It is our challenge to find out what the intention of the creators was, what the message to deliver is and what experience brings us to this point. Research, dissection, pondering, in a sense, working backwards to understand the components of an aria will bring us to a point of delivering the message - hopefully - that the team had in mind. Vocal color, word stress, phrasing (both musical and literary) all contribute to a meaningful expression of a character's reaction to a particular situation at a point in time.
Open to Voice majors only.

PY.540.541. Opera Etude Seminar. 1 - 2 Credits.
A course to develop new operatic works by Peabody composers in close collaboration with vocalists. Study includes investigations of vocal function and use; an overview of literature and notational practices; exercises in writing for solo voice and instruments; libretto development; scene improvisation; and discussion of best practices for collaboration. Up to five composers from the fall semester will be chosen to write a 15-minute scene or one-act opera for full production in the spring. **For composers, participation in the fall semester is prerequisite to the spring.** The course is open to composers at the senior-year level or above. Junior-year composers may be enrolled by permission. Singers are enrolled via opera diagnostic auditions at the beginning of the year. Instrumentalists are also invited to participate for credit in both semesters.

PY.540.542. Opera Etude Seminar. 2 Credits.
A course to develop new operatic works by Peabody composers in close collaboration with vocalists. Study includes investigations of vocal function and use; an overview of literature and notational practices; exercises in writing for solo voice and instruments; libretto development; scene improvisation; and discussion of best practices for collaboration. Up to five composers from the fall semester will be chosen to write a 15-minute scene or one-act opera for full production in the spring. **For composers, participation in the fall semester is prerequisite to the spring.** The course is open to composers at the senior-year level or above. Junior-year composers may be enrolled by permission. Singers are enrolled via opera diagnostic auditions at the beginning of the year. Instrumentalists are also invited to participate for credit in both semesters.
Completion of previous course required, PY.540.541[C].

PY.540.552. Stage Directing. 1 Credit.
Open to Voice majors only.

PY.540.639. Opera Workshop. 2 Credits.
An introduction to dramatic characterization as it relates to and is practiced on the Opera stage.
Open to Voice majors only.

PY.540.640. Opera Theater. 2 Credits.
An advanced course on acting for the Opera stage.
Open to Voice majors only.

PY.540.691. Graduate Acting. 1 Credit.
Graduate Acting students will learn how to decode the important information in each script, libretto, and score in order to translate it into vivid performances. Art (and therefore acting) may be subjective, but everyone can cultivate the skills required to become a better singer-actor. The aim of this class is to empower graduate students to make strong artistic choices by demystifying character, style, and rhetoric.

PY.460.423. Organ Literature 1. 3 Credits.
A study of selected organ literature from all periods within the context of history, instrument design, and performance practice.
Open to Organ majors only.

PY.460.424. Organ Literature 2. 3 Credits.
A study of selected organ literature from all periods within the context of history, instrument design, and performance practice.
Open to Organ majors only.;Completion of Organ Literature 1 required, PY.460.423[C].

PY.460.425. Resources for Contemporary Church Musicians 1. 3 Credits.
This course is a survey of liturgics, working with the lectionary, choral literature for the average choir, conducting styles and interpretation, hymnody, and related subjects. The fall semester focuses primarily on liturgics, lectionary and hymnody.
Open to Organ majors only. Non-majors interested in taking the course should send an email to peabodyregistrar@jhu.edu with instructor permission attached.

PY.460.426. Resources for Contemporary Church Musicians 2. 3 Credits.
This course is a survey of liturgics, working with the lectionary, choral literature for the average choir, conducting styles and interpretation, hymnody, and related subjects. The spring semester focuses primarily on conducting, conducting from the console, choral literature, anthem accompaniment, children's choir techniques and repertoire, handbell techniques and repertoire, service planning, practical skills for managing a church music program, and forming a personal philosophy of church music.
Open to Organ majors only. Non-majors interested in taking the course should send an email to peabodyregistrar@jhu.edu with instructor permission attached.;Completion of Resources for Contemporary Church Musicians 1 required, PY.460.425[C].

PY.460.510. Organ for Non-Majors 1. 1 Credit.
Open to everyone with basic keyboard proficiency, this introductory course in service playing will cover organ technique, registration, hymn playing, and accessible literature.

PY.460.511. Organ for Non-Majors 2. 1 Credit.
Open to everyone with basic keyboard proficiency, this introductory course in service playing will cover organ technique, registration, hymn playing, and accessible literature.
Completion of Organ for Non-Majors 1 required, PY.460.510[C].

PY.460.545. Organ Seminar (UG). 1 Credit.
Classes in performance covering the repertoire and stylistic concepts from all periods of organ literature. A yearly requirement of organ majors.
Open to Organ majors only.

PY.460.546. Organ Seminar (UG). 1 Credit.
Classes in performance covering the repertoire and stylistic concepts from all periods of organ literature. Open to majors only.
Open to Organ majors only.

PY.460.845. Organ Seminar (GR). 1 Credit.
Classes in performance covering the repertoire and stylistic concepts from all periods of organ literature. A yearly requirement of organ majors.
Open to Organ majors only.

PY.460.846. Organ Seminar (GR). 1 Credit.
Classes in performance covering the repertoire and stylistic concepts from all periods of organ literature. Open to majors only.
Open to Organ majors only.

PY.520.615. Pedagogy Internship. 2 Credits.
The internship is intended to provide a one-year supervised work experience during which students are expected to demonstrate the ability to present well-planned and engaging classes and lessons. The primary focus is to further develop teaching skill in a studio setting.
Open to Pedagogy majors only.

PY.520.617. Internship Seminar. 1 Credit.
The seminar is intended to provide a forum for the following activities and discussion topics: sharing of successful teaching experiences, group review of videotapes, microteaching, discussion of recordkeeping systems, the business of teaching music, motivational techniques for special situations, and the importance of the parent and parent-teacher relationship.
Open to Pedagogy majors only.

PY.520.618. Portfolio Development. 1 Credit.
Guidance in professional portfolio development. The result will be a professional portfolio which is an organized collection of materials which demonstrate the intern's educational philosophy, knowledge of materials, experience in teaching, professional references, audio and video recording of teaching and performance obtained or collected during the first three semesters of graduate work. In addition, students will discuss employment opportunities, practice answering questions frequently used in the interview process and discuss how to effectively use their portfolio to gain a position as a studio instructor..
Open to Pedagogy majors only.

PY.415.567. Chamber Music for Percussion. 1 Credit.
PY.415.567 Consists of 14 hours of coaching per semester with students performing works for both percussion group and mixed ensemble. The most outstanding of these projects will receive a performance on the Peabody Percussion Group Concert.
Percussion majors only.

PY.415.568. Chamber Music for Percussion. 1 Credit.
PY.415.568 Consists of 14 hours of coaching per semester with students performing works for both percussion group and mixed ensemble. The most outstanding of these projects will receive a performance on the Peabody Percussion Group Concert.
Percussion majors only.

PY.450.111. Sightreading 1. 2 Credits.
A course to help foster fluency in the essential skill of transforming written music into sound. Includes score scanning, pattern recognition, and analysis of harmonic, rhythmic, and melodic structures in music from all periods. Required for undergraduate piano and organ majors. Also offered as an elective.

PY.450.112. Sightreading 2. 2 Credits.
A course to help foster fluency in the essential skill of transforming written music intosound. Includes score scanning, pattern recognition, and analysis of harmonic, rhythmic,and melodic structures in music from all periods. Required for undergraduate piano andorgan majors. Also offered as an elective.
Completion of Sightreading 1 required, PY.450.111[C]

PY.450.213. Accompanying 1. 1 Credit.
A course designed to acquaint pianists with the listening skills, flexibility, sensitivity, knowledge of musical style, and interpretative skills required of a collaborative artist. Traditional song literature will be discussed, prepared, and performed within a class setting, with an emphasis on the poetic analysis, musicianship, sound production, and pianistic techniques required for effective collaboration. Open to all qualified keyboard students at any level, this course is required for all undergraduate piano majors.
Must have completed Sightreading 1 2 (PY.450.111[C] AND PY.450.112[C])

PY.450.214. Accompanying 2. 1 Credit.
A course designed to acquaint pianists with the listening skills, flexibility, sensitivity,knowledge of musical style, and interpretative skills required of a collaborative artist. Traditionalsong literature will be discussed, prepared, and performed within a class setting,with an emphasis on the poetic analysis, musicianship, sound production, and pianistictechniques required for effective collaboration. Open to all qualified keyboard students atany level, this course is required for all undergraduate piano majors.
Completion of Accompanying 1 required, PY.450.213[C]

PY.450.411. Keyboard Literature: Baroque. 2 Credits.
A broad survey of the many styles of keyboard music from the early to late Baroque periods, focusing on the different national characteristics of music from England, France, Italy and Germany and how they evolve from the 17th to 18th centuries. Students explore this repertoire on the instrument for which it was written – the harpsichord.

PY.450.412. Keyboard Literature: Classical. 2 Credits.
A survey of the piano music of the Classical period, with emphasis on the works of Haydn,Mozart, and Beethoven. Works will be considered from a range of perspectives, includingstylistic, analytic, historical, and interpretive.

PY.450.413. Keyboard Literature: 19th Century. 2 Credits.
A survey of piano music from the Romantic period. Works will be considered from a rangeof perspectives, including stylistic, analytic, historical, and interpretive.

PY.450.414. Keyboard Literature: 20th/21st C.. 2 Credits.
A survey of the piano music of the 20th century, from its post-romantic roots to the present. Works will be considered from a range of perspectives, including stylistic, analytic, historical, and interpretive.

PY.450.628. New Piano Music. 2 Credits.
A course designed for the study and performance of post-1950 solo piano repertoire. Semesterprojects will include playing for and working with living composers. Guests scheduled toparticipate include composer Curt Cacioppo, pianist Leon Fleisher, and conductor Carl St.Clair. For piano majors only.
Open to Piano majors only.

PY.450.667. Piano Pedagogy 1. 2 Credits.
Exploration of principles, materials, and career development in the teaching of piano. Includes observation of Preparatory teachers and some supervised teaching of pre-college students. Open to majors only.
Open to Piano majors only.

PY.450.668. Piano Pedagogy 2. 2 Credits.
Exploration of principles, materials, and career development in the teaching of piano.Includes observation of Preparatory teachers and some supervised teaching of pre-collegestudents. Required for undergraduate piano majors and for MM Piano majors with Pedagogyemphasis, also offered as an elective. Open to majors only.
Completion of Piano Pedagogy 1 required, PY.450.667[C].;Open to Piano majors only.

PY.450.845. Piano Seminar (DMA). 1 Credit.
A seminar required of all doctoral students. Focus is on preparation for entering the musicprofession, including practice teaching, press kit and resume preparation, discussion of jobsearches, and topics of special interest. Offered in alternate years.
Open to Piano majors only.

PY.715.211. Keyboard Skills 1 - Piano Majors. 2 Credits.
A course in keyboard harmony, including transposition, figured bass, melody harmonization, and analysis. Required for undergraduate piano and organ majors.
Open to Piano, Organ, and Harpsichord majors only.

PY.715.212. Keyboard Skills 2 - Piano Majors. 2 Credits.
A course in keyboard harmony, including transposition, figured bass, melody harmonization, and analysis. Open to majors only. Required for undergraduate piano and organ majors.
Open to Piano, Organ, and Harpsichord majors only.;Completion of previous course required, PY.715.211[C].

PY.715.311. Keyboard Skills 3 - Piano Majors. 2 Credits.
A course designed to build score-reading skills at the keyboard. Required for undergraduate piano majors.
Open to Piano, Organ, and Harpsichord majors only.;Completion of PY.715.212[C] required.

PY.715.312. Keyboard Skills 4 - Piano Majors. 2 Credits.
A course designed to build score-reading skills at the keyboard. Open to majors only.Required for undergraduate piano majors.
Open to Piano, Organ, and Harpsichord majors only.;Completion of PY.715.311[C] required.

PY.715.633. Advanced Keyboard Skills 1 - Piano Majors. 2 Credits.
A course in score-reading, transposition, and figured bass accompaniment. Open to majors only. Required for MM piano majors. Students who completed Peabody's undergraduate courses in keyboard skills (715.155-156 and 715.255-256) with a grade of B or higher are exempt from this course.

PY.715.634. Advanced Keyboard Skills 2 - Piano Majors. 2 Credits.
A course in score-reading, transposition, and figured bass accompaniment. Open to majors and those with significant prior experience only. Required for MM piano majors. Students who completed Peabody's undergraduate courses in keyboard skills (715.155-156 and 715.255-256) with a grade of B or higher are exempt from this course.
Completion of PY.715.633[C] required.

PY.123.111. Exploring Arts Careers. 1 Credit.
This introductory course in Peabody's Breakthrough Curriculum is designed to help students develop a better understanding of their artistic identity and begin to create a context for their art. The class comprises four units -- Place, Purpose, People, and Path -- centered around what it means to be a 21st century artist in Baltimore and beyond. Exploring Arts Careers is a required course for all first-year undergraduates and transfer students.

PY.123.311. Building a Brand and Portfolio. 2 Credits.
Building a Brand and Portfolio is a two-credit course which focuses on career development training. Students will develop a digital portfolio, and conduct and produce an interview with a potential mentor. Digital portfolio will include website, supporting media, artist bio, and resume. Course also covers key professional skills including networking, negotiating, applying for jobs, and financial management.
PY.123.101[C] OR PY.123.111[C]

PY.123.312. Pitching Your Creative Idea (UG). 2 Credits.
Pitching Your Creative Idea, the final course in the Breakthrough Curriculum sequence is a required two-credit course for all third-year undergraduate and first-year master's students. In this project-based course, students develop and practice essential skills for the 21st century performing artist. Through determining and designing an artistic project for a setting external to Peabody, they learn skills in audience research, programming, collaboration, and professionalism, while also building experience advocating publicly for their artistry both verbally and in writing. As the capstone for this class, students create a written grant application and juried proposal, with the option to enter a juried competition for project funding.
Completion of Building a Brand and Portfolio needed, PY.123.311[C].

PY.123.412. Music and Law. 2 Credits.
How does a creative artist make a living — and a life? In this foundational survey course, students will study aspects of law that shape a career in and beyond the arts. Topics include how to get or grant permission to use copyrighted works, how to read a contract, and how to start or join a business. Advanced topics may include negotiation, the analysis of popular music in copyright infringement cases, and current developments in intellectual property law. By learning how copyright law can protect creative works, how contracts can generate income, and how business structures can influence the impact of the artist in society, students will empower themselves to create their future.

PY.123.413. Creativity, Entrepreneurship, and Organizations. 2 Credits.
How do musical compositions make it out into the world? In this practicum, students will get hands-on experience administering the recently discovered archive of a former Peabody composer whose centennial will be in 2021. Participants will help run a not-for-profit corporation, prepare critical and/or performing editions of works, and conclude the term with a recital of these rediscovered compositions. Due to the size of the archive (60+ works), this practicum could repeat each semester and culminate in a centennial concert or festival in 2021.

PY.123.415. Arts Leadership Today. 2 Credits.
Learn through discussion, case studies and hands on practice key aspects of leading and managing an arts organization today including strategic planning, programming, marketing, public relations, fundraising, staffing, budgeting, and community engagement.

PY.123.499. Business of Music Practicum. 1 Credit.
Required for students minoring in the Business of Music.

PY.123.501. Alexander Technique. 2 Credits.
This course is designed to provide students with a practical, experiential understanding of the principles of the Alexander Technique, a process of movement re-education, and the application of those principles to daily activities and to playing an instrument or singing. Much time will be given to the investigation of individual ways of moving. The exploration of this technique will lead students to a quality of movement informed by heightened physical and spatial awareness, improved balance, coordination and breathing, and effortless support. Students will learn how to avoid neck, back and shoulder pain, along with a means of preventing repetitive strain injuries related to playing their instruments.

PY.123.502. Alexander Technique 2. 2 Credits.
This course is for students who have completed PY.123.501 and want to integrate Alexander technique more fully into their performance and practice, as well as daily life. Students who have some other experience with Alexander technique may contact the instructor. During the course, students will deepen their ability to apply the principles of the Alexander Technique to performance and practice, and to choose balanced coordination of their whole selves. Students will learn to be able to rely on their own "Alexander awareness" to access effortless support and balance, to deal with stress, and prevent strain and injury. They will also develop their authentic expression, lively presence, freedom of movement and connection with themselves, their task, and their audience.

PY.123.521. Playing Well 1. 3 Credits.
Offered at the graduate level, this course covers anatomy and movement concepts as applied to music making, with particular attention to those structures at risk for repetitive trauma. This three-credit, 14-week online course is asynchronous, so you can work through the weekly course material when it's convenient for you. Through original and curated videos, assigned reading, participation in discussion boards, and individual assignments, you will learn how musicians use their bodies, exploring the skeletal, muscular, and nervous systems as well as posture and breathing, and analyzing movements that can cause stress and injury.

PY.123.522. Playing Well 2. 3 Credits.
Explores instrumental musicians' playing-related disorders. Topics include an overview of risk factors and injury mechanisms, principles of treatment, medical examinations, and specific injuries and treatments by body region. Students receive information from the expert perspectives of physicians, therapists, and musicians and complete a practical capstone project designed to apply medical and therapeutic knowledge to their work in practice and performance.

PY.123.523. Playing Well 3. 3 Credits.
Three-credit course explores primary and secondary prevention strategies within a framework of prevention, preparedness, response, and recovery. Topics include the importance of exercise, sleep and nutrition; how to plan playing-specific mind and body training and functional conditioning; warm-up, cool-down, unloading, recovery, and regeneration activities as key components of performance training; exposure control to repetition and force through efficient motor learning strategies; and integration of retraining programs in rehabilitation to prevent reinjury.

PY.123.611. Building a Brand and Portfolio. 2 Credits.
Building a Brand and Portfolio is a two-credit course which focuses on career development training. Students will develop a digital portfolio, and conduct and produce an interview with a potential mentor. Digital portfolio will include website, supporting media, artist bio, and resume. Course also covers key professional skills including networking, negotiating, applying for jobs, and financial management.

PY.123.612. Pitching Your Creative Idea (GR). 2 Credits.
Pitching Your Creative Idea, the final course in the Breakthrough Curriculum sequence is a required two-credit course for all third-year undergraduate and first-year master's students. In this project-based course, students develop and practice essential skills for the 21st century performing artist. Through determining and designing an artistic project for a setting external to Peabody, they learn skills in audience research, programming, collaboration, and professionalism, while also building experience advocating publicly for their artistry both verbally and in writing. As the capstone for this class, students create a written grant application and juried proposal, with the option to enter a juried competition for project funding.
Completion of Building a Brand and Portfolio needed, PY.123.611[C].

PY.123.630. Writing About Music. 3 Credits.
Writing About Music is a proseminar to coach structured writing projects in several genres.

PY.310.701. Composition Recital (UG). 2 Credits.
Undergraduate recital for Composition Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.310.721. Composition Recital (DMA). 2 Credits.
Open to DMA Composition Majors only.

PY.330.721. Conducting Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Conducting majors. Final recital for MM Conducting majors. AD students must take for S/U grade.
Prerequisite(s): Student must be co-registered in major lessons (Wind Conducting) or Conducting Seminar (Orchestral Conducting): PY.100.100[C], PY.100.100[C], PY.050.100[C], PY.050.101[C], PY.330.845[C], PY.330.846[C], PY.330.847[C], or PY.330.848[C].
Majors only

PY.330.722. Conducting Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Conducting majors. AD students must take for S/U grade.
Prerequisite(s): Student must be co-registered in major lessons (Wind Conducting) or Conducting Seminar (Orchestral Conducting): PY.100.100[C], PY.100.100[C], PY.050.100[C], PY.050.101[C], PY.330.845[C], PY.330.846[C], PY.330.847[C], or PY.330.848[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.330.721[C], needed.

PY.330.723. Conducting Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Conducting majors. AD students must take for S/U grade.
Prerequisite(s): Student must be co-registered in major lessons (Wind Conducting) or Conducting Seminar (Orchestral Conducting): PY.100.100[C], PY.100.100[C], PY.050.100[C], PY.050.101[C], PY.330.845[C], PY.330.846[C], PY.330.847[C], or PY.330.848[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.330.722[C], needed.

PY.330.724. Conducting Recital (GR 4). 2 Credits.
4th recital for AD Conducting majors. AD students must take for S/U grade.
Prerequisite(s): Student must be co-registered in major lessons (Wind Conducting) or Conducting Seminar (Orchestral Conducting): PY.100.100[C], PY.100.100[C], PY.050.100[C], PY.050.101[C], PY.330.845[C], PY.330.846[C], PY.330.847[C], or PY.330.848[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.330.723[C], needed.

PY.330.725. Conducting Recital (Concerto). 2 Credits.
Concerto recital for DMA Conducting majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Student must be co-registered in major lessons (Wind Conducting) or Conducting Seminar (Orchestral Conducting): PY.100.100[C], PY.100.100[C], PY.050.100[C], PY.050.101[C], PY.330.845[C], PY.330.846[C], PY.330.847[C], or PY.330.848[C].
Majors only

PY.330.726. Conducting Recital (Chamber). 2 Credits.
Chamber recital for DMA Conducting majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.330.727. Conducting Recital (Lecture). 2 Credits.
Lecture recital for DMA Conducting majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.350.701. Computer Music Recital (UG). 2 Credits.
Undergraduate recital for Computer Music Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.380.701. Historical Performance Recital (UG). 2 Credits.
Undergraduate recital for Historical Performance Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.380.721. Historical Performance Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Historical Performance majors. Final recital for MM Historical Performance majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.380.722. Historical Performance Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Historical Performance majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.380.721[C], needed.

PY.380.723. Historical Performance Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Historical Performance majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.380.722[C], needed.

PY.380.724. Historical Performance Recital (AD 4). 2 Credits.
4th recital for AD Historical Performance majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.380.723[C], needed.

PY.380.725. Historical Performance Recital (Concerto). 2 Credits.
Concerto recital for DMA Historical Performance majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.380.726. Historical Performance Recital (Chamber). 2 Credits.
Chamber recital for DMA Historical Performance majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.380.727. Historical Performance Recital (Lecture). 2 Credits.
Lecture recital for DMA Historical Performance majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.410.701. Brass Recital (UG). 2 Credits.
Undergraduate recital for Brass instrument Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.410.721. Brass Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Brass instrument majors. Final recital for MM Brass instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.410.722. Brass Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Brass instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.410.721[C], needed.

PY.410.723. Brass Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Brass instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.410.722[C], needed.

PY.410.724. Brass Recital (AD 4). 2 Credits.
4th recital for AD Brass instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.410.723[C], needed.

PY.410.725. Brass Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Brass instrument majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.410.726. Brass Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Brass instrument majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.410.727. Brass Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Brass instrument majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.415.701. Percussion Recital (UG). 2 Credits.
Undergraduate recital for Percussion Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.415.721. Percussion Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Percussion majors. Final recital for MM Percussion majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.415.722. Percussion Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Percussion majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.415.721[C], needed.

PY.415.723. Percussion Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Percussion majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.415.722[C], needed.

PY.415.724. Percussion Recital (AD 4). 2 Credits.
4th recital for AD Percussion majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.415.723[C], needed.

PY.415.725. Percussion Recital (Concerto). 2 Credits.
Concerto recital for DMA Percussion majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.415.726. Percussion Recital (Chamber). 2 Credits.
Chamber recital for DMA Percussion majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.415.727. Percussion Recital (Lecture). 2 Credits.
Lecture recital for DMA Percussion majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.420.701. Harp Recital (UG). 2 Credits.
Undergraduate recital for Harp Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.420.721. Harp Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Harp majors. Final recital for MM Harp majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.420.722. Harp Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Harp majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.420.721[C], needed.

PY.420.723. Harp Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Harp majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.420.722[C], needed.

PY.420.724. Harp Recital (AD 4). 2 Credits.
4th recital for AD Harp majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.420.723[C], needed.

PY.420.725. Harp Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Harp majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.420.726. Harp Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Harp majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.420.727. Harp Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Harp majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.425.701. Strings Recital (UG). 2 Credits.
Undergraduate Senior recital for String instrument Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.425.721. Strings Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA String instrument majors. Final recital for MM String instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.425.722. Strings Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA String instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.425.721[C], needed.

PY.425.723. Strings Recital (GR 3). 2 Credits.
3rd recital for AD and DMA String instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.425.722[C], needed.

PY.425.724. Strings Recital (AD 4). 2 Credits.
4th recital for AD String instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.425.723[C], needed.

PY.425.725. Strings Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA String instrument majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.425.726. Strings Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA String instrument majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.425.727. Strings Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA String instrument majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.430.701. Woodwinds Recital (UG). 2 Credits.
Undergraduate recital for Woodwind instrument Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.430.721. Woodwinds Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Woodwind instrument majors. Final recital for MM Woodwind instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.430.722. Woodwinds Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Woodwind instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.430.721[C], needed.

PY.430.723. Woodwinds Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Woodwind instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.430.722[C], needed.

PY.430.724. Woodwinds Recital (AD 4). 2 Credits.
4th recital for AD Woodwind instrument majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.430.723[C], needed.

PY.430.725. Woodwinds Recital (Concerto). 2 Credits.
Concerto recital for DMA Woodwind instrument majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.430.726. Woodwinds Recital (Chamber). 2 Credits.
Chamber recital for DMA Woodwind instrument majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.430.727. Woodwinds Recital (Lecture). 2 Credits.
Lecture recital for DMA Woodwind instrument majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.450.701. Piano Recital (UG). 2 Credits.
Undergraduate recital for Piano Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.450.721. Piano Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Piano majors. Final recital for MM Piano majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.450.722. Piano Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Piano majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.450.721[C], needed.

PY.450.723. Piano Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Piano majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.450.722[C], needed.

PY.450.724. Piano Recital (AD 4). 2 Credits.
4th recital for AD Piano majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.450.723[C], needed.

PY.450.725. Piano Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Piano majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.450.726. Piano Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Piano majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.450.727. Piano Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Piano majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.460.701. Organ Recital (UG). 2 Credits.
Undergraduate recital for Organ Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.460.721. Organ Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Organ majors. Final recital for MM Organ majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.460.722. Organ Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Organ majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.460.721[C], needed.

PY.460.723. Organ Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Organ majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.460.722[C], needed.

PY.460.724. Organ Recital (AD 4). 2 Credits.
4th recital for AD Organ majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.460.723[C], needed.

PY.460.725. Organ Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Organ majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.460.726. Organ Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Organ majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.460.727. Organ Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Organ majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.470.309. Guitar Junior Recital. 1 Credit.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.470.701. Guitar Recital (UG). 2 Credits.
Undergraduate Senior recital for Guitar Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.470.721. Guitar Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Guitar majors. Final recital for MM Guitar majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.470.722. Guitar Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Guitar majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.470.721[C], needed.

PY.470.723. Guitar Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Guitar majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.470.722[C], needed.

PY.470.724. Guitar Recital (AD 4). 2 Credits.
4th recital for AD Guitar majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.470.723[C], needed.

PY.470.725. Guitar Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Guitar majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.470.726. Guitar Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Guitar majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.470.727. Guitar Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Guitar majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.530.701. Voice Recital (UG). 2 Credits.
Undergraduate recital for Voice Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.530.721. Voice Recital (GR 1). 2 Credits.
1st recital for GPD, AD, and DMA Voice majors. Final recital for MM Voice majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.530.722. Voice Recital (GR 2). 2 Credits.
2nd recital for GPD, AD, and DMA Voice majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.530.721[C], needed.

PY.530.723. Voice Recital (GR 3). 2 Credits.
3rd recital for AD and DMA Voice majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.530.722[C], needed.

PY.530.724. Voice Recital (GR 4). 2 Credits.
4th recital for AD Voice majors. AD students must take for S/U grade.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.530.723[C], needed.

PY.530.725. Voice Recital (DMA Concerto). 2 Credits.
Concerto recital for DMA Voice majors. Must be co-enrolled in major lessons regardless of if in Residency or DIP.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.530.726. Voice Recital (DMA Chamber). 2 Credits.
Chamber recital for DMA Voice majors. May be taken either during Residency or DIP period. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.530.727. Voice Recital (DMA Lecture). 2 Credits.
Lecture recital for DMA Voice majors. Co-registration in major lessons not required (please see DMA handbook for further guidelines).
Majors only

PY.570.701. Jazz Recital (UG). 2 Credits.
Undergraduate recital for Jazz Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.570.721. Jazz Recital (GR 1). 2 Credits.
1st recital for GPD Jazz majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.570.722. Jazz Recital (GR 2). 2 Credits.
2nd recital for GPD Jazz Majors.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only;Completion or co-registration of previous recital in sequence, PY.570.721[C], needed.

PY.550.111. Recording 1a - Fundamentals. 2 Credits.
A course designed to introduce the beginning Recording Arts student to components of the recording process, including a detailed analysis of the nature of sound and human perception, digital audio and operation of recording consoles, microphone types and techniques, editing, and other skills. Open to majors and other majors with permission of instructor.
Open to Recording Arts majors. Non-majors who wish to enroll should email the instructor's permission to peabodyregistrar@jhu.edu.

PY.550.112. Recording 1b - Fundamentals. 2 Credits.
A course designed to introduce the beginning Recording Arts student to components of the recording process, a detailed analysis of the nature of sound and human perception, digital audio and operation of recording consoles, microphone types and techniques, editing, and other skills. Open to majors and other majors with permission of instructor.
Completion of Recording 1a with a B- or higher is required, PY.550.111[C].

PY.550.211. Recording 2a - Studio Technology. 2 Credits.
A continuation of Recording I that provides students with an in-depth exploration of the tools and technology associated with the recording process including signal flow, analog and digital theory, signal processing, and recording systems. Open to majors and other majors with permission of instructor
Completion of Recording 1b with a B- or higher is required, PY.550.112[C].

PY.550.212. Recording 2b - Studio Technology. 2 Credits.
A continuation of Recording I that provides students with an in-depth exploration of the tools and technology associated with the recording process including signal flow, analog and digital theory, signal processing, and recording systems. Open to majors and other majors with permission of instructor. Prerequisite: Recording I.
Completion of Recording 2a with a B- or higher is required, PY.550.211C].

PY.550.311. Recording 3a - Classical/Jazz Techniques. 2 Credits.
Building on the Recording I and II courses, students will explore techniques for recording in the "tonmeister" style of engineering, particularly as it relates to microphone techniques for classical and jazz music recording, mixing and editing. Additional topics include surround sound and multitrack production. Open to majors only.
Completion of Recording 2b with a B- or higher is required, PY.550.212[C].

PY.550.312. Recording 3b - Classical/Jazz Mixing and Editing. 2 Credits.
Building on the Recording I and II courses, students will explore techniques for recording in the "tonmeister" style of engineering, particularly as it relates to microphone techniques for classical and jazz music recording, mixing and editing. Additional topics include sur-round sound and multitrack production.
Completion of Recording 3a with a B- or higher is required, PY.550.311[C].

PY.550.411. Recording 4a - Rock/Pop Techniques. 3 Credits.
A continuation of Recording III, this course focuses on contemporary recording techniques associated with rock/pop music production. Topics include multi-track recording, mixing, overdubbing, and headphone monitoring. Open to majors only.
Open to Recording Arts majors only.;Completion of Recording 3b with a B- or higher is required, PY.550.312[C].

PY.550.412. Recording 4b - Rock/Pop Mixing and Editing. 3 Credits.
A continuation of Recording III, this course focuses on contemporary recording techniques associated with rock music production. Topics include multi-track recording, mixing, over-dubbing, and headphone monitoring. Prerequisite: Recording III or permission of instruc-tor.
Completion of Recording 4a with a B- or higher is required, PY.550.411[C].;Open to Recording Arts majors only.

PY.550.419. Recording Internship. 4 Credits.
Undergraduate students work in supervised professional positions in which they will have the opportunity to apply the knowledge and expertise developed during their course of study. The internship requires 320 hours of service in an approved facility. Open to majors only.
Open to Recording Arts majors only.

PY.550.511. Advanced Recording Systems 1. 3 Credits.
Theory and practical application of the tools and techniques used in professional audio recording in all common musical styles. Topics include a review of studio acoustics, human perception of sound, microphone theory and application, signal processing, recording, mixing and mastering. Advanced techniques in Classical, Jazz and Rock music recording, and other styles as time permits. Open to incoming students in the Recording and Production track of the Master of Arts in Audio Sciences program.
Open to Recording Arts majors only.

PY.550.512. Advanced Recording Systems 2. 3 Credits.
Theory and practical application of the tools and techniques used in professional audio recording in all common musical styles. Topics include a review of studio acoustics, human perception of sound, microphone theory and application, signal processing, recording, mixing and mastering. Advanced techniques in classical, jazz and rock music recording, and other styles as time permits. Prerequisite: Acceptance to Recording and Production track of the Master of Arts in Audio Sciences program, or permission of instructor.
Open to Recording Arts majors only.;Completion of Advanced Recording Systems 1 with a B- or higher is required, PY.550.511[C].

PY.550.513. Advanced Studio Production 1. 3 Credits.
Advanced practical training in producing and engineering recordings in a variety of musical styles at a professional level in a masterclass-like environment with an accomplished professional recording engineer. Final capstone projects will be evaluated by a panel of outside producers representing Classical, Jazz and Rock music styles and engineers who are experts in their respective field of professional audio recording, and presented at the end of the year in an open forum attended by all students in the Recording Arts and Sciences department. Open to majors only.
Open to Recording Arts majors only.

PY.550.514. Advanced Studio Production 2. 3 Credits.
Advanced practical training in producing and engineering recordings in a variety of musical styles at a professional level in a masterclass-like environment with an accomplished pro-fessional recording engineer. Final capstone projects will be evaluated by a panel of outside producers representing Classical, Jazz and Rock music styles and engineers who are experts in their respective field of professional audio recording, and presented at the end of the year in an open forum attended by all students in the Recording Arts and Sciences depart-ment. Prerequisite: Recording IV or Advanced Recording Systems.
PY.550.513[C];Open to Recording Arts majors only.

PY.550.515. Musical Acoustics. 3 Credits.
A course concerned with the physics of sound as applied to properties of musical instruments, perception of musical sound, electronic music reproduction, and the spaces in which they perform. Prerequisites for recording arts majors: Basic Recording I and II or equivalent. Prerequisite for non-recording majors: Basic Recording Techniques or equivalent. Open to majors only, others by permission of instructor.

PY.550.516. Electroacoustics. 3 Credits.
This class will cover the basic fundamentals of electro-acoustics subdivided into roughly four units: fundamentals and transducer theory, loudspeakers, headphones and microphones. Prerequisite for Recording Majors: Physics 2.

PY.550.517. Psychoacoustics. 3 Credits.
The course focuses on the basics of the physiological and psychological aspects of hearing with applications to audio and sound systems, architectural acoustics, and musical acoustics. Topics include auditory physiology of the outer and inner ear, masking, critical bands, loudness, duration, binaural hearing, localization, and pitch. Open to majors only.

PY.550.519. Acoustical/Audio Measurements. 3 Credits.
The theory and application of objective acoustical and audio measurements are studied. Measurement techniques used in the evaluation of both physical spaces and electronic equipment are presented. Topics include measurement microphones, sound level meters, noise sources, spectrum and FFT analysis, frequency analysis, reverberation, speech intelligibility, transfer functions, swept sine techniques, audio power measurements, ADC and DAC linearity, harmonic distortion and mixed signal testing.
Completion of Architectural Acoustics 1 required, PY.550.624[C].

PY.550.524. Sound Design/Video Games. 3 Credits.
This course is designed for advanced Composition, Computer Music, and Recording Arts students to study and collaborate on sound design and composition for video games. The class population is made up of 50/50 composers and recording engineers for the purposes of project collaboration. Enrollment by permission of the chair of the department.
Completion of Recording 3b, Advanced Recording Systems 1, or Introduction to Programming required, PY.550.511[C], PY.550.312[C], or PY.350.466[C]. Instructor permission may also be granted instead, and should be emailed to peabodyregistrar@jhu.edu in order to enroll.

PY.550.610. Audio Science and Technology. 3 Credits.
This course is designed to integrate many of the audio and acoustics concepts discussed in the Master of Arts: Concentration in Recording and Production degree curriculum into an exploration of the electronics and acoustics fundamental to audio engineering. Topics include Current, Voltage, and Power in Audio systems; Reactive Circuit Elements; AC Circuits; Semiconductor Devices; Integrated Circuits; Transistor Based Amplifier Circuits; Power Supply Technology; Embedded Systems, and Audio System Engineering. Additional discussion of Architectural Acoustic Fundamentals, including Large Hall and Small room acoustical design. Co- and Pre-requisites: Introduction to Electrical and Computer Engineering (undergraduate) and Advanced Recording Systems (graduate), or permission of the instructor.

PY.550.611. Consumer Audio Systems. 3 Credits.
An introduction to the world of consumer audio electronics. The playback chain: What it is, how it works, and how it sounds. Lectures and outside-of-class projects will include a topology analysis of and critical listening to the following audio components and technologies: preamplifiers; power amplifiers; loudspeakers; disc players; DACs; music servers; computer audio; turntables, cartridges, tonearms, phono preamplifiers for vinyl disc playback; broadcast and internet radio; home theater configuration; interconnects; receivers; lossy and lossless codecs; multichannel audio and bass management; specifications and measurement; wireless audio profiles and codecs; network audio; active products and DSP; and headphones and headphone amplifiers. At the end of the course students will have a deep understanding of these topics and the ability to aurally discern the musical impact various design topologies have on the playback of recorded sound. Co- and Pre-requisites: Recording III (undergraduate) and Advanced Recording Systems (graduate), or permission of the instructor.
Completion of Audio Science and Technology required, PY.550.610[C].

PY.550.624. Architectural Acoustics 1. 3 Credits.
This class covers the fundamentals of architectural acoustics design. Topics will include: Plane and spherical waves; acoustic impedance and sound energy density; reflection, refraction, and diffusion; sound absorption; acoustic materials; psychoacoustic aspects; room modes; statistical versus geometric acoustics; reverberation theory; coupled-space acoustics; behavior of sound in rooms; and large versus small room acoustics. Open to students in the Acoustical Studies track of the Master of Arts in Audio Sciences program or by permission of instructor.

PY.550.625. Audiovisual System Design. 3 Credits.
The objective of this class is to provide students with an overview of commercial audiovisual systems design. This will include both the considerations required to design audiovisual systems and all the ancillary considerations required to properly integrate these systems with architecture, electrical, mechanical, structural, and IT systems.
Completion of Electroacoustics required, PY.550.516[C]. Instructor permission may also be granted instead, and should be emailed to peabodyregistrar@jhu.edu in order to enroll.

PY.550.626. Noise Control. 2 Credits.
A continuation of Architectural Acoustics (550 • 624) Topics will include: perceptual aspects of noise control; sound power, noise control criteria and standards; hearing loss prevention; environmental acoustics; airborne sound isolation (transmission loss theory, walls, floors, doors, and windows) structure-borne sound insulation (impact insulation theory and floors); vibration isolation (vibration isolators and design); heating, ventilation, and air conditioning (HVAC) noise control; and noise control applications in buildings. Prerequisites: Physical Acoustics, Architectural Acoustics, or permission of instructor.
Completion of Architectural Acoustics 1 required, PY.550.624[C]. Instructor permission may also be granted instead, and should be emailed to peabodyregistrar@jhu.edu in order to enroll.

PY.550.627. Acoustical Modeling. 2 Credits.
Basics of computer modeling for room acoustics and sound system design. Topics include general theory and assumptions underlying computer modeling, different types of acoustical models, auralization, small room acoustics, large room acoustics, and sound system computer models. Introduction to popular computer models including Room Sizer, Room Optimizer, EASE, ULYSSES, and ODEON.

PY.550.631. Graduate Acoustics Seminar. 2 Credits.
This course examines professional practices common in the industry, including interaction with clients, design professionals, and contractors; professional ethics and liability; insurance; contracts and fees; and setting and project documentation. Open to majors only.

PY.550.632. Architectural Acoustics 2. 3 Credits.
This class is a continuation of content introduced in PY.550.624: Architectural Acoustics. This course focuses on analysis, design and application, expanding on established foundations and topical content in previous courses. Architectural acoustics applications for Concert Halls, Recital Halls, Spoken-word Theatre Spaces, Lecture and Classroom Spaces, Worship Spaces, Outdoor Performance Venues, Rehearsal and Practice Spaces, Recording and Production Spaces, Cinemas, Sports Venues, Restaurants and/or Office Spaces may be considered. This course is open to students in the MA in Audio Sciences, Acoustical Studies track, or by permission of instructor.
Completion of Architectural Acoustics 1 required, PY.550.624[C].

PY.550.640. Acoustics Design Practicum. 3 Credits.
In this course taken in the final semester of study, students act as acoustical consultants to design or analyze an existing room or sound system using the knowledge gained through prior classes. The students are responsible for complete analysis, measurements, modeling, design documentation, and presentation of the final design in class. Open to majors only.
Completion of Architectural Acoustics 1 and 2 required, PY.550.632[C] AND PY.550.624[C].;Open to Recording Arts and Acoustics majors only.

PY.550.651. Recording for Musicians 1. 2 Credits.
A comprehensive course in recording and associated technologies designed for the musician who wishes to know about the recording arts. The course is taught parallel to Basic Recording I and II but without the required mathematics and physics and is open to upper-level undergraduates and graduate students of all majors.

PY.550.652. Recording for Musicians 2. 2 Credits.
Designed for non-recording majors, this class offers an overview of the recording process starting with a basic understanding of the acoustics of a performance space; through the signal chain of microphones, signal processing, recording, editing, mixing, and loudspeaker and headphone monitors; to the acoustics of the monitoring environment and the human perception of sound. Additional topics include mastering a final product and distribution on CD and through online services. The completion of PY.550.651 is a prerequisite.
PY.550.651[C]

PY.425.449. Orchestral Repertoire - Violin. 1 Credit.
The development of orchestral performance skills for violinists. Emphasis on repertoire and preparation for auditions. Open to majors only.
String majors only.

PY.425.450. Orchestral Repertoire - Violin. 1 Credit.
The development of orchestral performance skills for violinists. Emphasis on repertoireand preparation for auditions. Open to majors only.
String majors only.

PY.425.451. Orchestral Repertoire - Viola. 1 Credit.
The development of orchestral performance skills for violists. Minimum of three students per class. Open to majors only.
String majors only.

PY.425.452. Orchestral Repertoire - Viola. 1 Credit.
The development of orchestral performance skills for violists. Emphasis on repertoire andpreparation for auditions. Open to majors only.
String majors only.

PY.425.465. Orchestral Repertoire - Cello. 1 Credit.
The development of orchestral performance skills for cellists. Emphasis on repertoire and preparation for auditions. Open to majors only.
String majors only.

PY.425.466. Orchestral Repertoire - Cello. 1 Credit.
The development of orchestral performance skills for cellists. Emphasis on repertoire andpreparation for auditions. Open to majors only.
String majors only.

PY.425.467. Orchestral Repertoire - Double Bass. 1 Credit.
The development of orchestral performance skills for double bassists. Open to majors only.
String majors only.

PY.425.468. Orchestral Repertoire - Double Bass. 1 Credit.
The development of orchestral performance skills for double bassists. Open to majors only.
String majors only.

PY.425.641. Violoncello Pedagogy 1. 2 Credits.
Training for prospective cello teachers with study of various pedagogues. Materials covered include setup, left hand, bow hand, sequencing of instruction, and choice of music and activities as they apply to beginning students at every age level. Open to both upper-level undergraduates and graduate majors.
String majors only.

PY.425.642. Violoncello Pedagogy 2. 2 Credits.
Training for prospective cello teachers with study of various pedagogues. Materials coveredinclude setup, left hand, bow hand, sequencing of instruction, and choice of music andactivities as they apply to beginning students at every age level. Open to both upper-levelundergraduates and graduate majors.
String majors only.;Completion of Violoncello Pedagogy 1 required, PY.425.641[C].

PY.425.651. Violin/Viola Pedagogy 1. 2 Credits.
Training for prospective violin/viola teachers with study of various pedagogues. Materials covered include setup, left hand, bow hand, sequencing of instruction and repertoire from the beginning to advanced levels. Observation of violin/viola instructors in the Peabody Preparatory and supervised studio teaching experience. Open to both upper-level undergraduates and graduate violinists and violists in the fall semester and by permission of instructor in the spring semester.
String majors only.

PY.425.652. Violin/Viola Pedagogy 2. 2 Credits.
Training for prospective violin/viola teachers with study of various pedagogues. Materialscovered include setup, left hand, bow hand, sequencing of instruction and repertoire fromthe beginning to advanced levels. Observation of violin/viola instructors in the Peabody Preparatoryand supervised studio teaching experience. Open to both upper-level undergraduatesand graduate majors in the fall semester and by permission of instructor in the springsemester.
String majors only.;Completion of Violin/Viola Pedagogy 1 required, PY.425.651[C].

PY.010.100. Minor Lesson 1/2 Hour. 1 Credit.

PY.010.101. Minor Lesson 1/2 Hr. 1 Credit.

PY.020.100. Minor Lesson 1 Hour. 2 Credits.

PY.020.101. 1 Hr Minor Lesson. 2 Credits.

PY.050.100. Major Lesson 1/2 Hour. 2 Credits.

PY.100.100. Major Lesson 1 HR. 4 Credits.

PY.100.101. Major Lesson 1 HR. 4 Credits.

PY.186.100. Vocal Coaching. 1 Credit.
PY.186.100 consists of weekly half hour-long lessons, designed to develop skills for performing and teaching the art of singing: including repertoire choices, musicianship, language, diction and study methods (background study, wordsmithing, observation, dissection, practicing and organizing), as well as preparation for a jury, hearing, or recital.

PY.380.109. Historical Performance 109 Jury. 1 Credit.
Historical Performance majors only.

PY.380.209. Historical Performance 209 Jury. 1 Credit.
Historical Performance majors only.

PY.380.309. Historical Performance 309 Jury. 1 Credit.
Historical Performance majors only.

PY.410.109. Brass 109 Jury. 1 Credit.
Brass majors only

PY.410.209. Brass 209 Jury. 1 Credit.
Brass majors only

PY.410.309. Brass 309 Jury. 1 Credit.
Brass majors only

PY.415.109. Percussion 109 Jury. 1 Credit.
Percussion majors only.

PY.415.209. Percussion 209 Jury. 1 Credit.
Percussion majors only.

PY.415.309. Percussion 309 Jury. 1 Credit.
Percussion majors only.

PY.420.109. Harp 109 Jury. 1 Credit.
Harp majors only.

PY.420.209. Harp 209 Jury. 1 Credit.
Harp majors only.

PY.420.309. Harp 309 Jury. 1 Credit.
Harp majors only.

PY.425.109. Strings 109 Jury. 1 Credit.
String majors only.

PY.425.209. Strings 209 Jury. 1 Credit.
String majors only.

PY.425.309. Strings Jr Recital/309 Jury. 1 Credit.
Prerequisite(s): Co-enrollment in major lessons required: PY.100.100[C] or PY.100.101[C] or PY.050.100[C] or PY.050.101[C].
Majors only

PY.430.109. Woodwinds 109 Jury. 1 Credit.
Woodwind majors only.

PY.430.209. Woodwinds 209 Jury. 1 Credit.
Woodwind majors only.

PY.430.309. Woodwinds 309 Jury. 1 Credit.
Woodwind majors only.

PY.450.109. Piano 109 Jury. 1 Credit.

PY.450.209. Piano 209 Jury. 1 Credit.
Open to Piano majors only.

PY.450.309. Piano 309 Jury. 1 Credit.

PY.460.109. Organ 109 Jury. 1 Credit.

PY.460.209. Organ 209 Jury. 1 Credit.

PY.460.309. Organ 309 Jury. 1 Credit.

PY.470.109. Guitar 109 Jury. 1 Credit.

PY.470.209. Guitar 209 Jury. 1 Credit.

PY.530.109. Voice 109 Jury. 1 Credit.

PY.530.209. Voice 209 Jury. 1 Credit.

PY.530.309. Voice 309 Jury. 1 Credit.

PY.570.109. Jazz 109 Jury. 1 Credit.

PY.570.209. Jazz 209 Jury. 1 Credit.
Open to Jazz majors only.

PY.570.309. Jazz 309 Jury. 1 Credit.
Open to Jazz majors only.

PY.530.469. Italian Diction. 2 Credits.
This course prepares students to sing artistically in Italian through a combination of dictionstudy, text translation, and performance. Prerequisite: minimum one semester of collegestudy of Italian language or permission of instructor.
Open to Voice majors only.

PY.530.471. Russian Diction. 2 Credits.
A study of Russian vocal music, including analysis and performance of selected works.
Open to Voice majors only.

PY.530.473. Opera Literature. 2 Credits.
A study of selected works in opera from the 17th century to present, with emphasis on compositional styles and traditions of performance. Offered in alternate years.

PY.530.474. Opera Literature. 2 Credits.
A study of selected works in opera from the 17th century to present, with emphasis on compositional styles and traditions of performance.

PY.530.475. English Diction. 2 Credits.
A study of the International Phonetic Alphabet and the English language, with particular attention to American English, its unique sounds and their execution in singing.
Open to Voice majors only.

PY.530.477. German Diction. 2 Credits.
A thorough examination of the phonemic/phonetic system of German pronunciation and its application to singing in that language. The course is designed to give students not only the professional tools to analyze the phonetic problems in German texts (and to transcribe those solutions with the aid of IPA), but also the ability to hear for themselves how those solutions can be applied. Special emphasis is placed on Bühnenaussprach/Hochlautung, noting the differences between speaking and singing in that language, and the resulting choices that the student will need to make in achieving a good and flexible singing pronunciation. The course emphasizes speaking and then singing excerpts from the German vocal repertoire from opera, oratorio, and Lieder.
Open to Voice majors only.

PY.530.478. Czech Diction. 2 Credits.
Open to Voice majors only.

PY.530.483. French Diction. 2 Credits.
A study of French vocal music, its poetry and interpretation, with attention to diction (using the International Phonetic Alphabet) and grammar, including analysis and performance of selected works.
Open to Voice majors only.

PY.530.545. Graduate Diction Review 1.
This two-semester course is an introduction and review of the International Phonetic Alphabet and its application in writing, speaking and singing English, French, German and Italian. Emphasis will be placed on the study of the IPA and its application in each of the four languages. Required for graduate voice students who do not pass the Diction Placement Exam.
Open to Voice majors only.

PY.530.546. Graduate Diction Review 2.
This two-semester course is an introduction and review of the International Phonetic Alphabet and its application in writing, speaking and singing English, French, German and Italian. Emphasis will be placed on the study of the IPA and its application in each of the four languages. Required for graduate voice students who do not pass the Diction Placement Exam.
Open to Voice majors only.;Completion of Graduate Diction Review 1 required, PY.530.545[C].

PY.530.589. Vocal Literature: English/Italian. 2 Credits.
A survey of English and Italian song literature from the Renaissance to Modern day, applyingthe International Phonetic Alphabet (IPA) to specific repertoire. Prerequisite: EnglishDiction and Italian Diction.
Undergraduates need to have completed English and Italian Diction in order to enroll, PY.530.469[C] and PY.530.475[C].;Open to Voice majors only.

PY.530.590. Vocal Literature: German/French. 2 Credits.
A study of selected vocal works and styles in French and German from the 17th century tothe present, with emphasis on compositional trends, traditions of performance, and exposureto a wide variety of literature from both cultures and languages. Prerequisite: GermanDiction and French Diction.
Open to Voice majors only.;Undergraduates need to have completed German and French Diction in order to enroll, PY.530.477[C] and PY.530.483[C].

PY.530.615. Selected Topics in Art Song. 2 Credits.
Performance seminar in 6 units, chosen to represent some important touchstones in the repertoire: John Dowland Songs with Lute (setting a standard); Franz Joseph Haydn Canzonettas (setting a standard); Francis Poulenc: 6 Decades of Song; Charles Ives: The Hidden Innovator; Robert Schumann in 1840: the Amazing “Song Year”; Florence Price: The Uncaged Bird
Open to Voice majors only.

PY.530.617. Singing Bach. 2 Credits.
An introduction to the performance of solo vocal repertoire by J. S. Bach. Singers will study and present representative selections from the St. Matthew Passion, St. John Passion B Minor Mass, Magnificat, Christmas Oratorio, and selected cantatas. The elements of style will be addressed, including the rhetoric of Bach recitative. Cultural and historical context will also be examined.
Open to Voice majors only.

PY.530.645. Musical Theatre Survey. 2 Credits.
Analysis and performance of selected works from the American musical theater, beginning with Jerome Kern and continuing to present-day examples. Offered in alternate years.
Open to Voice majors only.

PY.530.671. Operas of Mozart. 2 Credits.
A study of the music and drama of five principle operas. Offered in alternate years.
Open to Voice majors only.

PY.530.672. Operas of Verdi. 2 Credits.
Open to Voice majors only.

PY.530.679. Advanced French Airs and Melodies. 2 Credits.
An in depth study of French vocal music with an emphasis on style and interpretation, as well as attention to diction (reviewing the International Phonetic Alphabet) and grammar, including analysis and performance of selected works.
Open to Voice majors only.

PY.530.680. Survey of African-American Art Song. 2 Credits.
This seminar critically examines the history, nature, and trajectory of art song by African American composers. As such, we will understand that art song by African American composers is significant to the genre of art song as an entity. Using a Critical Race Theory Lens we will investigate the simultaneity race, gender, sexuality, and class oppression as expressed in musical values and the reception history of these works. Students will be required to musically prepare songs, perform them in class, and create short presentations about relevant stylistic elements of the song and information about the composer.
Open to Voice majors only.

PY.530.683. Vocal Pedagogy. 2 Credits.
A class participation course that includes an introduction to various voice teaching methods and their respective approaches to posture and breathing, registration, resonation, coordination, interpretation, and vocal health; an examination of the anatomy and function of the vocal mechanism; student teaching; teacher observation; repertoire and recital planning. Required for the MM in Voice with Pedagogy Emphasis and the DMA in Voice, Option C; an elective for seniors and other graduate students.
Open to Voice majors only.

PY.530.684. Vocal Pedagogy Lab. 2 Credits.
This semester of vocal pedagogy will be continuation of the introduction of relevant content through in-house and guest lecturers. Elements critical to an effective teaching studio will also be covered. Stimulating class discussion will be a vital part of the students' understanding of class content. Reading assignments accompany each class.
Open to Voice majors only.;Completion of previous course required, PY.530.683[C].

PY.530.685. Verismo Opera. 2 Credits.
Open to Voice majors only.

PY.530.686. Bel Canto Opera. 2 Credits.
Open to Voice majors only.

PY.530.687. Oratorio. 2 Credits.
Participants in this performance seminar will prepare and present representative oratorio repertoire from the 18th century to the present. Students will acquire an understanding of the breadth of styles in this body of repertoire and will complete the course with a list of works of practical value for themselves in the future. The term "oratorio" will be considered broadly, and may include symphonies with voice (e.g. Beethoven 9 and Mahler 2 & 4) but not concert works for solo voice (e.g. Mahler Des Knaben Wunderhorn and Ravel Shéhérezade).
Open to Voice majors only.

PY.530.691. 21st Century Voice 1. 2 Credits.
A performance practice course including score reading, definitions of the technical language of avant garde music, and contemporary vocal techniques. Performance is optional. Offered in alternate years.
Open to Voice majors only.

PY.530.692. 21st Century Voice 2. 2 Credits.
A survey of contemporary vocal literature and notational practices, including discussion oftechniques for learning complex music and coaching of selected repertoire. Students willpresent on topics, techniques, and repertoire. A course for singers, pianists, composers,conductors and others.A continuation of the fall semester. Prerequisite: PY.530.691 or permission of instructor.
Completion of previous course needed, PY.530.691[C].;Open to Voice majors only.

PY.530.695. Advanced Lieder Studies. 2 Credits.
This course is designed to present students with analysis, preparation, and performance of the poetry and music found in German Lieder. Through detailed study of poetry and music, we will trace the development of German song from it's humble origins, to the great song cycles of Schubert, Schumann, Wolf, Mahler, and beyond. Attention will be paid to appropriate diction, style, and practical performance of the German vocal literature.
Open to Voice majors only.

PY.430.455. Orchestral Repertoire - Clarinet. 1 Credit.
The development of orchestral performance skills for clarinet with emphasis on repertoire.
Woodwind majors only.

PY.430.456. Orchestral Repertoire - Clarinet. 1 Credit.
The development of orchestral performance skills for clarinet with emphasis on repertoire.
Woodwind majors only.

PY.430.463. Piccolo Class. 1 Credit.
Woodwind majors only.

PY.430.464. Piccolo Class. 1 Credit.
Covers repertoire from both solo and orchestral literature in order to increase proficiency,familiarity, and comfort with the "little flute." Emphasis on audition preparation and experience.Required material: Jack Wellbaum's Orchestral Excerpts for Piccolo.
Woodwind majors only.

PY.430.519. Orchestral Repertoire - Flute. 1 Credit.
The development of orchestral performance skills for flute with emphasis on repertoire.
Woodwind majors only.

PY.430.520. Orchestral Repertoire - Flute. 1 Credit.
The development of orchestral performance skills for flutists with particular emphasis onstandard orchestral flute solos and how they are traditionally performed for today's ensemblesand conductors, with focus on orchestral audition preparation and the developmentof skills unique to this setting and the demands of this repertoire: employing various stylesof articulation to enhance ensemble playing, learning methods for tuning under differentcircumstances and techniques for projection, exercising improved self-perception andunderstanding, developing knowledge of some acoustic phenomena of other orchestralinstruments, practicing observation as a method for honing one's own performance skills,applying the laws of nature to the process of creative interpretation. We frequently coverstandard excerpts which apply to the entire flute section or parts thereof. Usually the classincludes one Mock Audition per semester. Students practice building listening, observation,and teaching skills as a part of offering support and feedback to colleagues. They willbecome familiar not only with how to audition but also with how to adjudicate auditions.
Woodwind majors only.

PY.430.573. Orchestral Repertoire - Oboe/ EH. 1 Credit.
The development of orchestral performance skills for oboe and English horn with emphasis on repertoire.
Woodwind majors only.

PY.430.574. Orchestral Repertoire - Oboe/ EH. 1 Credit.
The development of orchestral performance skills for oboe and English horn with emphasison repertoire.
Woodwind majors only.

PY.430.575. Orchestral Repertoire - Bassoon. 1 Credit.
The development of orchestral performance skill for bassoon with emphasis on repertoire.
Woodwind majors only.

PY.430.576. Orchestral Repertoire - Bassoon. 1 Credit.
The development of orchestral performance skill for bassoon with emphasis on repertoire.
Woodwind majors only.

PY.430.591. Oboe Reed Making. 1 Credit.
The construction of oboe reeds.
Woodwind majors only.

PY.430.592. Oboe Reed Making. 1 Credit.
The construction of oboe reeds.
Woodwind majors only.

General Information, Procedures and Regulations

Introduction and Nomenclature

The Peabody Institute was founded in 1857. Music instruction began in 1868, and the first diploma was awarded in 1882. Following a long history of informal collaboration, the institute affiliated with The Johns Hopkins University in 1977 and became a constituent school of the University in 1986.

The title "Peabody Institute" refers to the original name of the institution and the continuing nomenclature in the University's official documents. For most purposes, Peabody operates as two divisions: the Peabody Preparatory and the Peabody Conservatory.

The Peabody Preparatory, founded in 1894, serves approximately 2,000 precollege and continuing education students on four campuses. More information about the Preparatory may be found on their webpages (https://peabody.jhu.edu/preparatory/).

The Peabody Conservatory is the post-secondary or "college" division of Peabody, serving approximately 700 students in five degree programs and three diploma programs, on a historic campus in Baltimore's Mt. Vernon neighborhood.

This is the catalogue of the Conservatory, which awards degrees as "The Conservatory of the Peabody Institute of the Johns Hopkins University," and which may also be addressed as "the Johns Hopkins Peabody Conservatory."

General Information, Procedures and Regulations

Mission

The Peabody Conservatory Mission Statement

The Peabody Conservatory strives to provide aspiring artists with the skills to pursue professional careers in the arts as well as the education to become leaders in the cultural life of their communities.

Strategic Objective

Peabody is building on its rich history of professional artist training at the highest level and has developed a vision for the role of the 21st century artist in society and the training required for artists to meet the new realities and opportunities of that role. Peabody's history, tradition, and pedigree, coupled with its forward-looking view and commitment to challenge traditional assumptions, allow it to take on the real work of what it means to prepare artists for a world that is constantly changing.

General Information, Procedures and Regulations

Accreditation Statement

As a division of The Johns Hopkins University, Peabody is accredited by the Maryland Higher Education Commission (MHEC) and the Middle States Commission on Higher Education (MSCHE).

The Maryland Higher Education Commission
839 Bestgate Road, Suite 400
Annapolis, MD 21401
Telephone: 410.260.450

Veterans Educational Benefits

Johns Hopkins is approved by the Maryland Higher Education Commission for the training of veterans, service members, eligible spouses and dependents under the provisions of the various federal laws pertaining to veterans' educational benefits. Johns Hopkins University also complies with Federal Law Section 103 (effective 1 August 2019) which ensures that Johns Hopkins University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that an eligible individual borrow additional funds, on any covered individual because of the individual's inability to meet their financial obligations to the institution due to the delayed disbursement funding from VA under Chapter 31 or 33.

Please visit the JHU Veterans Affairs website (https://registrar.jhu.edu/veterans/) for additional information.

General Information, Procedures and Regulations

Links

The Peabody Academic Catalogue is intended to provide information about curricula and policies and procedures related to teaching and learning. Other kinds of information that have previously been collected in the printed catalogue may be found elsewhere.

Consumer Information

In compliance with Title IV, the Higher Education Opportunity Act of 2008, and other Federal and State disclosure laws, the Peabody Institute has listed consumer information for prospective and current students. The most recent information is always available at: the Student Right to Know page (https://peabody.jhu.edu/life-at-peabody/student-right-to-know/)

General Information, Procedures and Regulations

Honor Societies

Music

Peabody chartered the Epsilon Omicron chapter of *Pi Kappa Lambda* in 1988. Pi Kappa Lambda (https://www.pikappalambda.org/about/) is a national honorary society for outstanding juniors, seniors, and graduate students, who are elected annually by the faculty according to the by-laws registered with the Association of College Honor Societies.

Peabody also sponsors membership in *NAfME (National Association for Music Education)*, a national professional organization of music teachers whose membership includes elementary and secondary school music teachers as well as those involved in teacher education at colleges and universities throughout the country. Membership is open to all music education majors.

Dance

Peabody has institutional memberships in the following associations:

- The National Dance Education Organization (https://www.ndeo.org/)
- The Maryland Council for Dance (http://www.mdcouncil4dance.org/)
- The American College Dance Association (https://www.acda.dance/) (ACDA) in the Mid-Atlantic North Region.

Each of these associations host meetings and festivals in which students have the opportunity to take master classes, perform, adjudicate work, and network.

Procedural Information

Procedural Information

In this section:

Procedural Information

Applicability

Students are responsible for understanding all regulations. Students are responsible for completing all applicable requirements for graduation. The Peabody Institute reserves the right to change any provision, requirement, policy, or regulation published within a student's term of residence. However, it may be assumed that, except under the most unusual circumstances, the regulations in force during a student's term of residence are those stated in the year in which the student matriculated.

Academic Petitions

Students with a compelling reason for an exception to an academic regulation, policy, or program requirement in this document should submit an academic petition, located under the "Academic Services" heading in the Peabody Institute Service Desk (https://projects.peabody.jhu.edu/servicedesk/customer/portals/). Petitions will be reviewed by the Petitions Committee in a timely manner.

Procedural Information

Studio Assignments

Students must have a major teacher for the duration of their studies. Studio assignments are arranged prior to matriculation on the basis of student requests and teacher availability. Once a student matriculates into the Conservatory, the student is expected to remain with the same studio teacher for the duration of their program. In instances where there are compelling reasons for requesting a change, a student may submit an academic petition (https://projects.peabody.jhu.edu/servicedesk/customer/portals/) as outlined in Applicability (p. 747). All studio changes require the signature of both the current and new major teacher, as well as the signature of the Associate Dean for Academic Affairs.

If no studio teacher is willing to accept a student, the student will be compelled to withdraw from the Conservatory.

Procedural Information

Course Numbering

The Johns Hopkins University Student Information System (SIS) contains the official listing of Conservatory courses. Course numbers are structured as follows:

The most common divisional codes are:

Code	Name
PY	Peabody
EN	Whiting School of Engineering
AS	Arts and Sciences
BU	Carey Business School

A list of frequently occurring departments:

Code	Department
PY.410	Brass
PY.310	Composition
PY.350	Computer Music
PY.330	Conducting
PY.800	Dance
PY.910	Ensembles - Large
PY.950	Ensembles - Small/Chamber
PY.470	Guitar
PY.420	Harp
PY.380	Historical Performance
PY.570	Jazz
PY.260	Liberal Arts
PY.250	Liberal Arts: Language
PY.510	Music Education
PY.710	Music Theory
PY.715	Music Theory - Keyboard, ET/SS
PY.610	Musicology
PY.320	Music for New Media
PY.540	Opera
PY.460	Organ
PY.520	Pedagogy
PY.415	Percussion
PY.450	Piano/Ensemble Arts
PY.123	Professional Studies
PY.550	Recording Arts and Sciences
PY.425	Strings
PY.100	Studio Lessons
PY.530	Voice
PY.430	Woodwinds

Procedural Information

Large Ensemble Participation

Participation in instrumental or vocal ensembles is integral to Peabody's music curricula.

With the exception of students in the Artist Diploma and Doctor of Musical Arts degree, all music students majoring in orchestral instruments or jazz are required to play in a large ensemble during every semester in which they are enrolled in major lessons. Historical Performance majors, vocalists, pianists, guitarists, composers, Music for New Media students, and computer musicians must also play or sing in large ensembles as dictated by their curricula.

The Ensemble Office manages the personnel, rehearsal, and performance activities of many of the Conservatory's instrumental and vocal ensembles, including orchestral rotations, chorus assignments, Jazz Ensemble, and Conductors Orchestra. The Ensemble Office does not manage the Conservatory's historical performance ensembles chamber music, or Peabody Opera Theatre voice students.

Large Ensemble Registration

Peabody's large instrumental ensembles for orchestral instrument majors are combined into a single course called Large Ensemble, designed to give participating students a wide range of ensemble experiences. Students will not remain in any one particular ensemble for the duration of a given semester or academic year but will instead rotate through a variety of different ensemble configurations. A single letter grade will be issued each semester which reflects a student's participation and achievement in all their ensemble experiences during that semester.

Ensemble	UG	Grad	Day	Time
Large Ensemble	PY.910.501	PY.910.801	MTWThF	3:30 - 5:30PM
Peabody Singers	PY.910.515	PY.910.815	MW	2:30 - 4:00PM
Peabody-Hopkins Chorus	PY.910.511	PY.910.811	MW	4:30 - 6:00PM
Peabody Jazz Ensemble	PY.910.537	PY.910.837	TTh	1:30 - 3:20PM
Baltimore Baroque Band	PY.910.527	PY.910.827	W	7:30 - 10:00PM
Renaissance Ensemble	PY.910.529	PY.910.829	T	6:00 - 10:00PM

The personnel in the Ensemble Office serve as the collective teacher of record for the Large Ensemble course. All rules published by the Ensemble Office constitute a syllabus and course outline for ensemble grading. It is the responsibility of each student participating in ensembles to know and abide by the rules. For the complete Large Ensemble Course Syllabus, which includes the Large Ensemble Attendance and Grading Policy and the Concert Attire Guidelines, see the Ensemble Office website

Procedural Information

Competitions

Peabody sponsors several annual prize competitions, through the generosity of various donors. Students should check competition guidelines, with dates, eligibility, repertoire requirements, procedural details and deadlines with the Concert Office. Previous first-prize winners are not eligible to enter the same competition a second time. Students must be in good academic standing and enrolled in major lessons to be eligible to compete in Peabody competitions.

Competitions Managed by the Concert Office

- **The Virginia Carty DeLillo Composition Competition** is offered biennially to any Conservatory composition major enrolled for lessons. Entrants submit one composition of any style, length, or instrumentation. First prize includes a $1,000 cash award and performance of the winning work at a public Peabody concert, if feasible. Second prize is $500.
- In the **Peggy and Yale Gordon Concerto Competition**, students compete for a $1,500 cash prize and a performance with the Peabody Symphony Orchestra, a recital on the Homewood campus, and additional recitals scheduled by the Yale Gordon Trust. This competition rotates annually in the areas of strings, piano, and orchestral instruments. Second prize is $750.
- **The Macht Orchestral Composition Competition** is for composition majors and is designed to provide a premiere public performance for new works for orchestra. Entries must have been written for a standard symphonic orchestra or chamber orchestra during the student's period of enrollment at Peabody. The works submitted must also have been played through in a Peabody orchestral reading session and the composer must be enrolled for major lessons during the year. Held annually since 2000, the competition winner receives a prize and a performance of the winning work at a Peabody public concert.
- **The Sylvia L. Green Voice Competition** is held biennially for junior, senior, or graduate-level voice students. Doctoral students are eligible if they are enrolled for major lessons. Contestants perform one or more works of chamber orchestra size or larger. Excerpts from opera or oratorio are not acceptable. First prize is $1,500 plus a performance with a large Peabody instrumental ensemble. Second prize is $750.
- **The William Marbury Prize** is awarded each year to an outstanding undergraduate violin student through a juried competition. The competition award includes a major public recital, as well as a $1,000 cash prize. Second prize is $500. Any undergraduate violin major enrolled in a degree or certificate program is eligible to enter this competition upon the major teacher's recommendation.
- **The Harrison L. Winter Piano Competition** was established in 1990 in tribute to a former chairman of Peabody's Board of Trustees. It is scheduled on a two-years on, one-year off basis. The first prize winner receives a $1,000 cash prize and a performance with the Peabody Symphony Orchestra. The second prize is $500.
- **The Vocal Studies Song Competition** is open to sophomores, juniors, seniors, MM, GPD, AD, and DMA students. The applicable language requirements for juries among the various class levels will apply to this competition. Only non-orchestral/non-operatic/non-chamber song repertoire will be permitted. Each singer should present a list of classical songs—4 songs for undergraduate level and 6 songs for graduate level. These songs should represent a variety of languages applicable to their class level requirement. The graduate competitors must include at least one song composed after 1950. All songs are required to be memorized.

Other Competitions

- **The Prix d'Eté Competition** was endowed by Walter Summer in 1994 and established to encourage composition and computer music majors to compose new chamber works exploring new dimensions in performance, instrumentation and multimedia. Held annually, entries in alternate years must demonstrate significant use of music technologies. The first prize includes $1,000, and a performance of the winning work. Details may be obtained from the Computer Music Faculty.
- **The Louis Sudler Prize in the Arts** is a University-wide $1,500 prize offered for excellence in performance, execution or composition in one of the arts as an advocational activity. Peabody seniors may compete in any artistic area except music (i.e. writing, visual arts, dance, film, etc.). Complete information about the Sudler Prize is available on the Sudler Prize website.

Procedural Information

Recitals

Public recitals are required for the completion of all undergraduate and graduate performance degrees and diplomas. All recitals must be scheduled through the procedures established by the Concert Office and in strict observation of the established deadlines. Students must be registered for major lessons during the semester in which they give a degree recital.

Most degree recitals take place on campus. Capstone projects and off campus recitals require the approval of the Major Teacher, Academic Affairs, and the Concert Office. See the Concert Office regulations (https://livejohnshopkins.sharepoint.com/sites/PeabodyStudents/SitePages/Recitals-at-Peabody.aspx) for information on the recital process.

Grades given for off-campus recitals may not be contested.

Students must earn at least a B- on all recitals in order to meet the standards for satisfactory academic progress. Any grade below B- is deemed an unsatisfactory grade and requires the student to retake the recital in the following semester.

Recital Repertoire

Degree recitals are solo recitals of repertoire selected with the approval of the major teacher. All recital repertoire should be new repertoire studied during the student's residency at Peabody. Students are not permitted to perform repertoire learned at previous institutions, performed at the entrance audition for Peabody, or performed at a hearing/jury in the student's current program. Solo performances are normally given from memory.

In instrumental areas other than piano, chamber works may be performed on the recital with the written permission of the major teacher and clearance from the Ensemble Office attesting to the availability of the other performers and the feasibility of the repertoire. Students who wish to perform ensemble works that are contained within the Ensemble Library holdings are allowed to check out the music, subject to availability, by submitting a music requisition form. Music from the Ensemble Library must be returned within one week following the recital.

Students who program works that are only available on a rental basis must make their rental arrangements through the Ensemble Office, which acts as Peabody ombudsman for copyright compliance. Rental parts are rented on a per performance basis, and students may only use rental sets for the exact performance for which they are obtained. An approved music requisition form must be submitted at least six weeks before the recital date. Students may not negotiate directly with music publishers for performances presented at Peabody or under the aegis of Peabody.

All proposed recital programs must meet the minimum-maximum required performance time for the degree in order to be approved by the Office of Academic Affairs and the Concert Office (see below (p. 749) for specific limitations).

Credit, Scheduling and Grades

A degree recital is a course. The course number for a degree recital is listed in the curricula for each degree and diploma. To receive credit for a recital, students must register for the course number through the registration process used for all other courses at Peabody. Unlike other courses, however, a degree recital requires special scheduling. To accommodate all students with an equitable division of resources, all degree recitals must be scheduled and performed within the guidelines set by the Concert Office.

All degree recitals are graded by two faculty members: the major teacher and a second faculty member from the department. Recital grades are submitted to the Office of Academic Affairs and recorded in SIS when received.

Specific Recitals

JUNIOR RECITALS

Students majoring in guitar, violin, violoncello, and viola performance are required to give a junior recital in their third year of study. This junior recital takes the place of the 309 jury. Students in other departments may elect to play a junior recital off-campus or as a non-degree recital (see the requirements for Non-Degree Recitals below) but must still complete a 309 jury.

All junior recitals must be completed before April 1 of each academic year.

Performance Time (in minutes of music) for Junior Recitals

Major	Minimum	Maximum
Guitar	25	60
Jazz	30	60
Violin/Viola	25	60

SENIOR RECITALS

All undergraduate students majoring in performance are required to give a senior recital in their final year of study. All senior recitals must be completed before April 1 of each academic year.

When registering for their senior recital, students should register following the course number:

Code	Title	Credits
Brass		
PY.410.701	Brass Recital (UG)	2
Composition		
PY.310.701	Composition Recital (UG)	2
Computer Music		
PY.350.701	Computer Music Recital (UG)	2
Guitar		
PY.470.701	Guitar Recital (UG)	2
Harp		
PY.420.701	Harp Recital (UG)	2
Historical Performance		
PY.380.701	Historical Performance Recital (UG)	2
Jazz		
PY.570.701	Jazz Recital (UG)	2
Organ		
PY.460.701	Organ Recital (UG)	2
Percussion		
PY.415.701	Percussion Recital (UG)	2
Piano		
PY.450.701	Piano Recital (UG)	2
Strings		
PY.425.701	Strings Recital (UG)	2
Voice		
PY.530.701	Voice Recital (UG)	2
Woodwinds		
PY.430.701	Woodwinds Recital (UG)	2

Performance Time (in minutes of music) for Senior Recitals:

Major	Minimum	Maximum
Composition	50	60
Guitar	50	60
Historical Performance	50	60
Jazz	50	60
Orchestral Instruments	50	60
Piano[1] and Organ	50	60
Voice	45	60

1 Piano senior recitals in piano must include one composition from the 20th or 21st century.

MM RECITALS

MM students majoring in performance are required to perform a departmental hearing at the end of their first year of study and a recital in their second year of study. Students are strongly encouraged to perform their MM recital in their third or fourth semester.

MM students should register with the appropriate recital course number:

Code	Title	Credits
Brass		
PY.410.721	Brass Recital (GR 1)	2
Conducting		
PY.330.721	Conducting Recital (GR 1)	2
Ensemble Arts		
PY.450.721	Piano Recital (GR 1)	2
Guitar		
PY.470.721	Guitar Recital (GR 1)	2
Harp		
PY.420.721	Harp Recital (GR 1)	2
Historical Performance		
PY.380.721	Historical Performance Recital (GR 1)	2
Organ		
PY.460.721	Organ Recital (GR 1)	2
Percussion		

PY.415.721	Percussion Recital (GR 1)	2
Piano [1]		
PY.450.721	Piano Recital (GR 1)	2
Strings		
PY.425.721	Strings Recital (GR 1)	2
Voice		
PY.530.721	Voice Recital (GR 1)	2
Woodwinds		
PY.430.721	Woodwinds Recital (GR 1)	2

1 Piano MM recitals in piano must include one composition from the 20th or 21st century.

MM Recitals should be comprised of 50 to 60 minutes of programmed music.

GPD RECITALS

GPD students majoring in performance are required to play two recitals as part of their diploma requirements. GPD students majoring in voice may use an opera role in lieu of one of the two recitals, but only if the role has been approved by the Voice Department as being of appropriate size and scope. Students must formally register for a GPD recital through the Concert Office and specify the operatic role as the repertoire selection.

Major	Recuital 1	Recital 2
Brass	PY.410.721	PY.410.722
Conducting	PY.330.721	PY.330.722
Guitar	PY.470.721	PY.470.722
Harp	PY.420.721	PY.420.722
Historical Performance	PY.380.721	PY.380.722
Jazz	PY.570.721	PY.570.722
Organ	PY.460.721	PY.460.722
Percussion	PY.415.721	PY.415.722
Piano[1]	PY.450.721	PY.450.722
Ensemble Arts	PY.450.721	PY.450.722
Strings	PY.425.721	PY.425.722
Voice	PY.530.721	PY.530.722
Woodwinds	PY.430.721	PY.430.722

1 GPD recitals in piano may include only one concerto per program.

GPD recitals should be comprised of 50 to 60 minutes of programmed music.

DMA RECITALS

DMA students majoring in performance are required to play a minimum of three recitals. Students must be registered for major lessons during the semester in which a recital is presented. Exceptions to this include only the chamber music recital and the lecture-recital.

DMA students are required to prepare one-page program notes of publishable quality for each recital. These program notes must be approved by a full-time member of the Musicology Department before the recital program will be approved by the Office of Academic Affairs.

DMA students should register with the appropriate recital course numbers:

Major	DMA 1 Solo 1	DMA 2 Solo 2	DMA 3 Solo 3	DMA 4 Concerto	DMA 5 Chamber	DMA 6 Lecture
Brass	PY.410.721	PY.410.722	PY.410.723	PY.410.725	PY.410.726	PY.410.727
Conducting	PY.330.721	PY.330.722	PY.330.723	PY.330.725	PY.330.726	PY.330.727
Guitar	PY.470.721	PY.470.722	PY.470.723	PY.470.725	PY.470.726	PY.470.727
Harp	PY.420.721	PY.420.722	PY.420.723	PY.420.725	PY.420.726	PY.420.727
Historical Performan	PY.330.721	PY.380.722	PY.380.723	PY.380.725	PY.380.726	PY.380.727
Organ	PY.460.721	PY.460.722	PY.460.723	PY.460.725	PY.460.726	PY.460.727
Percussio	PY.415.721	PY.415.722	PY.415.723	PY.415.725	PY.415.726	PY.415.727
Piano	PY.450.721	PY.450.722	PY.450.723	PY.450.725	PY.450.726	PY.450.727
Strings	PY.425.721	PY.425.722	PY.425.723	PY.425.725	PY.425.726	PY.425.727
Voice	PY.530.721	PY.530.722	PY.530.723	PY.530.725	PY.530.726	PY.530.727
Woodwind	PY.430.721	PY.430.722	PY.430.723	PY.430.725	PY.430.726	PY.430.727

DMA recitals should be comprised of 50 to 60 minutes of programmed music.

Lecture-recitals have the same minimum-maximum performance time as the other recitals in the program. However, the musical portion of the recital should not exceed twenty minutes.

AD RECITALS

Students in the AD program are required to present four public recitals, two in each academic year in which they are enrolled in lessons. AD students should register for the following recital course numbers:

Major	AD 1	AD 2	AD 3	AD 4
Brass	PY.410.721	PY.410.722	PY.410.723	PY.410.724
Conducting	PY.330.721	PY.330.722	PY.330.723	PY.330.724
Guitar	PY.470.721	PY.470.722	PY.470.723	PY.470.724
Harp	PY.420.721	PY.420.722	PY.420.723	PY.420.724
Historical Performance	PY.330.721	PY.330.722	PY.330.723	PY.330.724
Organ	PY.460.721	PY.460.722	PY.460.723	PY.460.724
Percussion	PY.415.721	PY.415.722	PY.415.723	PY.415.724
Piano	PY.450.721	PY.450.722	PY.450.723	PY.450.724
Strings	PY.425.721	PY.425.722	PY.425.723	PY.425.724
Voice	PY.530.721	PY.530.722	PY.530.723	PY.530.724
Woodwinds	PY.430.721	PY.430.722	PY.430.723	PY.430.724

Procedural Information

Academic Advising

Advising at Peabody provides students with resources to support their educational journeys. Studio faculty are important mentors to students as they progress through their major studies and develop as young professionals. Peabody Advising supplements this faculty mentorship and is dedicated to partnering with students to shape their academic experiences through on-going conversations about:

- learning opportunities and challenges
- curricular choices that optimize and individualize their Peabody education
- advancement through academic programs
- administrative policies and procedures
- identification and utilization of resources

- time management and study skills
- personal and educational goals

The Peabody Advising Partnership

Peabody Advising and students build relationships that foster students' acquisition of skills and knowledge to thrive at Peabody and prepare for their futures. Student participation in this relationship is integral to its success and students are encouraged to meet regularly with the Director of Advising. Additionally, understanding the roles of students and advising makes for a better advising experience.

WHAT YOU CAN EXPECT FROM PEABODY ADVISING

- To encourage and support the discovery and development of your personal and academic strengths
- To seek to understand your individual concerns and the unique experiences of student artists
- To assist you in learning and navigating successfully academic requirements, policies, procedures and deadlines
- To educate you on campus resources and support services and their relevance to your academic, professional, and personal goals
- To help you to develop active responsibility for your educational career

WHAT PEABODY ADVISING EXPECTS FROM YOU

- To identify and cultivate your interests, goals, and values through participation in the Peabody community
- To communicate concerns that impact your academic, personal, and professional goals
- To share your achievements and important experiences
- To learn and follow academic requirements, policies, procedures, and deadlines
- To act on referrals to campus resources and support services as well as independently seek them out
- To take ultimate responsibility for your educational career

Peabody Advising can help you plan a course of study, brainstorm options, and research opportunities. Finally, if you don't know where to go to get a question answered, Peabody Advising is a great place to start.

Procedural Information

Inter-Institutional Academic Arrangements

Johns Hopkins Interdivisional Registration

Within the Johns Hopkins University system, interdivisional registration (IDR) extends for Peabody students to courses offered by the Krieger School of Arts and Sciences, the Whiting School of Engineering, the Carey Business School, and the School of Education.

Peabody students must request cross-registration through the Office of the Registrar. Credit sought for any other courses taken outside the Conservatory during the period of a student's enrollment must be approved in writing by the Office of Academic Affairs.

Students may submit an Academic Petition to request that Homewood graduate seminars, listed as zero credits, be articulated for Peabody credit.

Undergraduates students with a cumulative GPA of 3.0 are eligible for IDR; all graduate students are eligible for IDR.

Baltimore Collegetown Network

Peabody, as a division of Johns Hopkins, is part of the Baltimore Collegetown Network. Full-time sophomores, juniors, and seniors may take one for-credit course per semester at one of the other participating institutions. A course taken at another school operates by the policies and on the schedule of the host institution, but the grade is articulated to the student's academic record by the policies of the Peabody Conservatory. For more information about taking a class at a nearby college, see: the Baltimore Collegetown website.

Peabody Preparatory

Music and dance non-credit instruction is available through the Peabody Preparatory at 25% discounted rates for Peabody Conservatory students. Students wishing to take non-credit private music lessons must go through placement interviews/auditions. Lessons are scheduled on a space-available basis. For more information on group classes or private lessons, please visit the Preparatory website (https://peabody.jhu.edu/preparatory/ways-to-study/departments/) or contact the Preparatory via email (peabodyprep@jhu.edu) or call 667-208-6640.

Procedural Information

Study Abroad Program

Students interested in studying abroad should make an appointment with the Advising Office to discuss the timely completion of their degree requirements.

Procedural Information

Outside Instruction and Public Performance

Peabody facilities may not be used for private teaching except in cases that are connected in some way with Conservatory or Preparatory programs. A student must secure the approval of their teacher to appear as soloist or ensemble member on programs presented outside the Conservatory. Peabody reserves the right to prohibit such participation if it is considered detrimental to either the student or the school. Students in the harpsichord program are only permitted to use the school's instruments for public performance outside the Conservatory with the permission of their teacher and the Ensemble Office.

Academic Regulations

Academic Regulations

In this section:

Academic Regulations

Applicability

The academic regulations in this section apply to students who have matriculated into a degree or diploma program at the Johns Hopkins Peabody Conservatory. The other schools of the Johns Hopkins University may have different regulations, and Peabody students must abide by those regulations when taking courses on those campuses. However, for Peabody students, courses, performances, and other requirements fulfilled outside the campus of the Peabody Conservatory are assessed, articulated, and recorded within the Conservatory's administrative regulations.

Academic Petitions

Students with a compelling reason for an exception to an academic regulation, policy, or program requirement in this document should submit an academic petition, located under the "Academic Services" heading in the Peabody Institute Service Desk (https://projects.peabody.jhu.edu/servicedesk/customer/portals/). Petitions will be reviewed by the Petitions Committee in a timely manner.

Academic Regulations

Academic Code of Conduct

Statement of Principles

The Peabody Conservatory of the Johns Hopkins University ("Peabody") is committed to academic honesty and ethical conduct.# Each member of the Peabody community is entrusted with two essential responsibilities: to live honorably within the established codes of conduct, and to hold other members of the community to the same high standard of conduct.

In keeping with the educational mission of the Conservatory, acts of misconduct are viewed as an opportunity to teach students to recognize the impact of their behavior on others and the extent of their responsibilities for their actions through counseling, mediation, and/or educational efforts, noting that every act of academic misconduct has consequences and may result in one or more sanctions as described in this policy.

1. SCOPE

The policies and processes of this Peabody Academic Code of Conduct pertain to all students enrolled at the Peabody Institute, including double degree students and joint degree students.

Non-Academic Misconduct

All issues of non-academic student misconduct will be subject to the University-wide Student Conduct Code (http://studentaffairs.jhu.edu/policies/student-code/).

Research Misconduct

Research misconduct is defined as fabrication, falsification, or plagiarism in proposing, performing, reviewing or reporting research. For a complete definition, refer to The Johns Hopkins University Research Integrity Policy (https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf). The Policy applies to all University faculty, staff, trainees and students engaged in the proposing, performing, reviewing or reporting of research, regardless of funding source. Allegations of research misconduct regarding a student must be referred to the Research Integrity Officer for assessment under that Policy and must also be reported to the Associate Dean for Academic Affairs.

2. CROSS-DIVISIONAL ENROLLMENTS

Peabody Institute students may enroll in courses in one or more other University divisions or schools. Peabody students are subject to this policy not only when enrolled in Peabody courses, but also when enrolled in courses in other University divisions or schools. Academic misconduct in the context of those "outside" courses will be subject to and resolved under this policy.

Students from other divisions of the Johns Hopkins University enrolled in classes at the Peabody Institute will be held to the standards enumerated in this Peabody Academic Code of Conduct, noting that students from outside divisions must also comply with their home division or school academic ethics policy and will be subject to their home division or school procedures for resolution of academic ethics violations in Peabody courses.

3. POLICY VIOLATIONS

Academic misconduct is prohibited by this policy. Academic misconduct is any action or attempted action that may result in creating an unfair academic advantage for oneself or an unfair academic advantage or disadvantage for any other member or members of the academic community. This includes a wide variety of behaviors such as cheating, plagiarism, altering academic documents or transcripts, gaining access to materials before they are meant to be available, and helping another individual to gain an unfair academic advantage. Nonexclusive examples of academic misconduct are listed below.

Cheating. The following are nonexclusive examples of cheating:

- fraud, deceit, or dishonesty in an academic assignment, text or examination
- use or consultation of unauthorized materials (e.g., notes, books, etc.) on assignments, tests, or examinations.
- unauthorized discussion of a test or exam during its administration.
- copying content on an assignment, test or examination from another individual.
- obtaining a test or examination or the answers to a test or examination before administration of the test or examination.
- studying from an old test or examination whose circulation is prohibited by the faculty member.
- use or consultation of unauthorized electronic devices or software (e.g., calculators, cellular phones, computers, tablets, etc.) in connection with assignments, tests or examinations.
- use of paper writing services or paper databases.
- unauthorized collaboration with another individual on assignments, tests or examinations.
- submission of an assignment, test or examination for a regrade after modifying the original content submitted.
- permitting another individual to contribute to or complete an assignment, or to contribute to or take a test or examination on the student's behalf.
- tampering with, disabling or damaging equipment for testing or evaluation.
- unauthorized submission of the same or substantially similar work, assignment, test or exam (e.g., a paper, etc.) to fulfill the requirements

of more than one course or different requirements within the same course.

Plagiarism. The following are nonexclusive examples of plagiarism:

- use of material produced by another person without acknowledging its source.
- submission of the same or substantially similar work of another person (e.g., an author, a classmate, etc.).
- use of the results of another individual's work (e.g., another individual's paper, exam, homework, computer code, lab report, etc.) while representing it as your own.
- improper documentation or acknowledgment of quotations, words, ideas, or paraphrased passages taken from published or unpublished sources.
- wholesale copying of passages from works of others into your homework, essay, term paper, or dissertation without acknowledgment.
- paraphrasing of another person's characteristic or original phraseology, metaphor, or other literary device without acknowledgment.

Forgery/Falsification/Lying. The following are nonexclusive examples of forgery, falsification and lying:

- falsification or invention of data/information for an assignment, test or exam, or in an experiment.
- citation of nonexistent sources or creation of false information in an assignment
- attributing to a source ideas or information that is not included in the source.
- forgery of university or other official documents (e.g., letters, transcripts, etc.).
- impersonating a faculty member.
- request for special consideration from faculty members or university officials based upon false information or deception.
- fabrication of a reason (e.g., medical emergency, etc.) for needing an extension on or for missing an assignment, test or examination.
- claiming falsely to have completed and/or turned in an assignment, test or examination.
- falsely reporting an academic ethics violation by another student.
- failing to identify yourself honestly in the context of an academic obligation
- providing false or misleading information to an instructor or any other University official

Facilitating Academic Dishonesty. The following are nonexclusive examples of facilitating academic dishonesty:

- intentionally or knowingly aiding another student to commit an academic ethics violation.
- allowing another student to copy from one's own assignment, test, or examination.
- making available copies of course materials whose circulation is prohibited (e.g., old assignments, texts or examinations, etc.).
- completing an assignment or taking a test or examination for another student.
- sharing paper mill/answer bank websites or information with other students.

Unfair Competition. The following are nonexclusive examples of unfair competition:

- intentionally damaging the academic efforts of another student.
- stealing another student's academic materials (e.g., books, notes, assignments, etc.)
- denying another student needed University resources (e.g., hiding library materials, stealing lab equipment, etc.).

4. FIRST-TIME OFFENSES

If a student is suspected of academic misconduct, the faculty member responsible for the course in which the misconduct allegedly occurred must review the facts of the case promptly with the student. If, after speaking with the student and any witnesses, the faculty member believes that academic misconduct has occurred, the faculty member must first contact the Associate Dean for Academic Affairs or another member of Academic Affairs to determine whether the offense is a first offense, or a second or subsequent offense. If a first offense, the faculty member may settle the case directly with the student, i.e., the faculty member and student may reach an agreement on the resolution of the alleged misconduct. If such an agreement is reached, the faculty member must promptly provide the student with a letter outlining the resolution that includes the charges, a summary of the evidence, the findings, and the sanctions agreed upon, and must also simultaneously provide a copy of that letter to the Associate Dean for Academic Affairs. If, however, the faculty member cannot reach an agreement with the student (e.g., the student denies cheating or does not agree with the proposed sanction, etc.), or the offense is a second or subsequent offense, or if in the case of a first offense, the sanction imposed would be greater than failure in the course, the faculty member must promptly notify the Associate Dean of Academic Affairs in writing of the alleged violations, evidence, including potential witnesses, and other pertinent details of the case. In such instances, the case will proceed to the next phase of resolution as outlined below.

5. HEARINGS

In the case of a first offense that is not resolved between the faculty member and student, or a second or subsequent offense, the Associate Dean for Academic Affairs, or another designee from Academic Affairs, will be assigned to the case and gather information regarding the alleged academic misconduct to determine the appropriate means of resolution. This gathering of information may include without limitation meetings with or requests for statements from the respondent and witnesses, and review of any related information. The Associate Dean for Academic Affairs may dismiss a case for a lack of sufficient information or if the alleged conduct does not fall within conduct prohibited by this policy. Absent these circumstances, the case will be resolved as explained below.

Types of Conduct Proceedings

There are two types of conduct proceedings – an administrative hearing and a panel hearing. The Associate Dean for Academic Affairs (or designee) will, after the initial inquiry, decide whether a case will be resolved through an administrative hearing or a panel hearing. In making this decision, the Associate Dean for Academic Affairs (or designee) will consider the nature of the alleged misconduct and potential sanctions, the complexity of the facts, the prior academic misconduct history of the respondent, and other relevant information and factors.

Administrative Hearing | An administrative hearing involves a meeting between the Associate Dean for Academic Affairs (or designee) and the respondent. The Associate Dean for Academic Affairs (or designee) may also meet with witnesses and others involved and obtain and review relevant evidence. The Associate Dean for Academic Affairs (or designee) will review the allegations and evidence with the respondent and give the respondent an opportunity to respond. The Associate Dean for Academic Affairs (or designee) will determine based on preponderance of the evidence whether the respondent is responsible for the alleged policy violation(s), and, if so, issue (an) appropriate sanction(s).

Panel Hearings | The panel is comprised of trained University students, faculty and staff appointed for annual terms by the Associate Dean of Academic Affairs to hear alleged violations of this policy. The panel, comprised of 3 student members and 3 members of the faculty and/or staff is charged with determining based on a preponderance of the evidence whether a respondent's actions constitute a violation of this policy and, if so, determining (an) appropriate sanction(s). The panel shall make its determination of responsibility and sanctions by majority vote, except that unanimity is required for a sanction of expulsion. The hearing is a closed proceeding, meaning that no one other than the panel members and necessary University personnel, may be present. The respondent and witnesses called to the hearing will be present in the hearing room only when making a statement or being questioned by the panel.

In general, hearings will proceed as follows, although the panel has discretion to alter the order or manner in which it hears or receives evidence, and to impose time limits on any stage of the process:

- introductions
- opening statement from the reporter, if applicable
- opening statement from the respondent
- questioning of the reporter by the panel, if applicable
- questioning of the respondent by the panel
- questioning of the witnesses, if any, by the panel
- closing statement from the reporter, if applicable
- closing statement from respondent

Witnesses

The Director of Advising or panel may request the presence of any witness with relevant information about a case. The respondent may request that relevant witnesses be heard the respondent's behalf. Absent exceptional circumstances, the respondent should inform the Director of Advising in writing at least three (3) days in advance of any meeting or hearing of the names of the witnesses and to what they will attest. The Director of Advising or panel may determine whether and the extent to which witnesses will be permitted to participate or questioned in any meeting or hearing, including whether their testimony is relevant.

6. APPLICABLE PROCEDURES

In connection with the resolution of alleged policy violations, a respondent shall:

- be notified in writing of the allegations in advance of any meeting or hearing;
- be notified in writing of the charges, and the date, time and location of the hearing, and identity of the hearing administrator or panel members in advance of the hearing;
- have the opportunity to review in advance of any meeting or hearing, any information to be considered by any faculty member, administrator or panel consistent with the Family Educational Rights and Privacy Act of 1974, as amended ("FERPA") and to protect other confidential information;
- be notified in writing of the outcome of any hearing, namely the findings, determination of responsibility, and any sanctions; and
- be notified in writing of the outcome of any appeal.

A respondent may raise the potential conflict of any University personnel participating in the resolution process. A respondent may also decline to participate in the resolution process. The University may however continue the process without the respondent's participation.

Communications under this policy will primarily be conducted with students through their official University email address, and students are expected check their official University email on a regular basis.

7. EVIDENTIARY STANDARD

A "preponderance of the evidence" standard will be used to determine responsibility for alleged violations of this policy. A "preponderance of the evidence" standard is an evidentiary standard that means "more likely than not." This standard is met if the proposition is more likely to be true than not true.

8. APPEALS

Except in the case of a resolution for first time offenses with a faculty member, the respondent may appeal an administrator or panel's finding of responsibility and/or sanction(s). A respondent must file any appeal within five (5) days of the date of the notice of outcome solely on one or more of the following grounds:

- procedural error that could have materially affected the determination of responsibility or sanction(s);
- new information that was not available at the time of the hearing and that could reasonably have affected the determination of responsibility or sanction(s); and
- excessiveness of the sanction(s).

Any appeal must be filed in writing with the Associate Dean for Academic Affairs. An appeal will involve a review of the file and as determined necessary, gathering of information from relevant university personnel or panelists; the appeal does not involve another hearing. On review of the appeal, the Dean or designee may:

- enter a revised determination of responsibility and/or revise sanction(s);
- remand the matter to the administrator or panel to reconsider the determination of responsibility and/or sanction(s); or
- convene a new panel to consider the case.

The Associate Dean of Academic Affairs will simultaneously send the appeal determination, with the reasons therefore, to the administrator or panel, as appropriate, and to the respondent. The decision of the Associate Dean is final. No further appeals are permitted.

9. SANCTIONS

The following factors may be considered in the sanctioning process:

- the specific academic misconduct at issue;
- the respondent's academic misconduct history; and
- other appropriate factors.

This section lists some of the sanctions that may be imposed upon students for violations of this policy. Peabody reserves the right, in its discretion, to impose more stringent or different sanctions depending on the facts and circumstances of a particular case. Sanctions for academic misconduct under policy are generally cumulative in nature.

When a student is found responsible for academic misconduct, the sanction(s) that may be imposed include without limitation one or more of the following:

- Formal warning.
- Retake of the examination, paper or exercise involved.
- Score of zero on the examination, paper or exercise involved.
- Lowering of the course grade.
- Loss of Peabody scholarship for a specific duration or permanently.
- Failure in the course without a notation on the student's transcript that the grade was for violation of academic integrity.
- Failure in the course with a notation on the student's transcript that the grade was for violation of academic integrity.
- Probation.
- Suspension from the Conservatory for a specified period of time without a notation on the student's transcript that the suspension was for violation of academic integrity.
- Suspension from the Conservatory for a specified period of time with a notation on the student's transcript that the suspension was for violation of academic integrity.
- Expulsion.
- Revocation of a degree.
- Other appropriate sanctions or corrective measures.

Definitions

Formal Warning | The student is notified in writing that their actions constitute a violation of this policy, and may be subject to other actions (e.g., re-taking an exam or failure in a course).

Probation | The student is notified that further violations of this policy within the stated period of time will result in the student being considered for immediate suspension or other appropriate disciplinary action. If at the end of the specified time period no further violations have occurred, the student is removed from probationary status.

Suspension | The student is notified that the student is separated from the University for a specified period of time. The student must leave campus and vacate campus residence halls, if applicable, within the time prescribed and is prohibited from University property and events. The conferring of an academic degree may be deferred for the duration of the suspension. A student must receive written permission from the University prior to re-enrollment or re-application. Academic work completed at another institution while on suspension will not be recognized for credit transfer.

Expulsion | Expulsion means the permanent removal of the student from the University. Expulsion includes a forfeiture of all rights and degrees not actually conferred at the time of the expulsion, permanent notation of the expulsion on the student's University records and academic transcript, withdrawal from all courses according to divisional policies, and the forfeiture of tuition and fees. Any student expelled from the University is prohibited from University property and events and future reapplication to the University.

10. RECORDS

If the student is found responsible of academic misconduct, the statement of findings will include any sanctions imposed. A copy of the findings will be copied to the Associate Dean of Academic Affairs. A case file concerning a student will be retained for seven (7) years from date that the student graduates or otherwise leaves the university.

Revised AY 2016-2017 | August 2017
```

Academic Regulations

Program Classification, Status, and Credit Limits

Students are only admitted to degree programs on the basis of scheduled auditions/interviews conducted during the normal admissions cycle and must matriculate in the fall semester that begins the next academic year. Peabody does not defer admissions. In some cases, students may matriculate to a diploma in a spring semester. Extension students may begin study in any semester depending on course and teacher availability.

Multiple Degree Programs or Majors

Students may only pursue multiple majors or multiple degree programs if they are admitted to both programs through the regular admissions process. Students enrolled in multiple programs must complete all requirements specific to both majors and may only overlap credits for supportive courses in music, professional studies, general studies, and electives.

UNDERGRADUATE

Students admitted to the Music Education and Recording Arts Bachelor of Music programs are considered students with multiple majors: a performance (or composition or computer music) major plus Music Education or Recording Arts. No other major may be added to these programs. Similarly, students in the double-degree program with the Krieger School of Arts and Sciences or the Whiting School of Engineering may pursue only one Peabody major.

Bachelor of Music Students majoring in Performance, Composition, Computer Music, and Music for New Media may add a second major, subject to the following conditions:

1. Students must pay for the second major lesson at the rate specially designated in the tuition schedule.
2. Performance majors may not add a second major on the same instrument with a different repertoire or style. Examples include Voice and Historical Performance Voice and Double Bass and Jazz Bass.
3. Students may not combine majors in the same department, such as Violin and Viola or Piano and Organ.
4. Finally, the majors Composition, Computer Music, and Music for New Media are mutually exclusive: no two may be combined. While Composition or Computer Music may be combined with Recording Arts, the Music for New Media may not be combined with Recording Arts.

Undergraduate students may add only one minor. The Performer Certificate may not be combined with any other program. Special instructions for students in the five-year BM/MM or BMRA/MA program are noted in Accelerated Graduate Degrees.

GRADUATE STUDENTS

Graduate students may not pursue two majors that result in two degree recitals in a two-year degree timeframe. Additionally, graduate students may not pursue simultaneously the Master of Music and Master of Arts degrees.

Students in the Master of Music degree may be admitted into Performance Pedagogy, which for the purposes of these rules counts as a second area of focus. Students in the Master of Music degree may apply for a second major in Music Theory Pedagogy or Musicology. Students in the Doctor of Musical Arts degree may be admitted into the Master of Music in Music Theory Pedagogy or the Master of Music in Musicology. Graduate students who previously earned a Master of Music degree elsewhere may not pursue the Master of Music degree at Peabody in the same discipline. Master of Music students pursuing two majors will receive a single, Master of Music degree. Doctor of Musical Arts students in a concurrent Master of Music Theory or Musicology program will receive two degrees (MM and DMA).

The Graduate Performance Diploma, Master of Arts Degree, and the Artist Diploma programs may not be combined with any other program. Students in the Doctor of Musical Arts Program who are also pursuing a Master of Music in Music Theory Pedagogy should refer to the guidelines of their DMA program.

Credit Limits

UNDERGRADUATE STUDENTS

Undergraduate students comprise all students who have matriculated to degree and diploma programs: Bachelor of Music (including Recording Arts and Music Education), Bachelor of Fine Arts, and the Performer's Certificate. Students who have been admitted to the five-year BM/MM program are undergraduate students until their fifth year. These students must enroll in a minimum of 12 credits each semester in order to maintain full-time status and must successfully complete 30 credits each year to demonstrate satisfactory academic progress. Undergraduate students must enroll as full-time students for eight semesters and enroll in major studies in each of those semesters. Any enrollment that puts a student below full-time status must be approved through the academic petition process and may impact financial aid, scholarship, and status for F-1 student visa holders.

Students at the undergraduate level are encouraged to take approximately 18 credits per semester. Undergraduate students may register for a maximum of 25 credits per semester. Some combined degree programs require more credits and students will be allowed to take the extra classes as prescribed by their requirements following an approved Academic Petition. In any other scenario, students with compelling reasons to take classes above the credit limit may petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/) Academic Affairs.

GRADUATE STUDENTS

Graduate students comprise all students who have matriculated to degree and diploma programs: Master of Music, Master of Arts, Doctor of Musical Arts, the Graduate Performance Diploma, and the Artist Diploma. Students who have been admitted to the five-year BM/MM program are graduate students in their fifth year. Note that the credit limits vary for degree and diploma programs. Performance, Conducting, and Composition students are required to remain enrolled in one-hour major lessons for four semesters of full-time study. Musicology and Music Theory Pedagogy majors are required to maintain full-time enrollment for four semesters of study.

GRADUATE DEGREE PROGRAMS

Graduate students in the Master of Music, Master of Arts, and Doctor of Musical Arts program must enroll in a minimum of nine credits each semester in order to maintain full-time status. MM and DMA students must successfully complete 18 credits each year to demonstrate good academic standing. Any enrollment that puts a student below full-time status must be approved through the academic petition process and may impact financial aid, scholarship, and status for F-1 student visa holders.

Students in the MM, MA, or DMA program may register for a maximum of 18 credits per semester including lessons, ensembles, recitals, and a maximum of six credits of graduate seminars each semester. Students who enroll in any Music Theory and Musicology courses beyond the six-credit limit will be administratively withdrawn from those classes. If a student has compelling reasons to take classes above the credit limit, they may petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/) Academic Affairs.

GRADUATE DIPLOMA PROGRAMS

Graduate students enrolled in the Graduate Performance Diploma, and the Artist Diploma programs must enroll in a minimum of four credits each semester in order to maintain full-time status. There is no part-time status for the GPD or AD. In addition to lessons, vocal coachings, ensembles, and recitals, students in the GPD and AD programs are allowed to enroll in a maximum of four additional credits each semester. Students who enroll in any classes beyond the four-credit limit will be administratively withdrawn from those classes. If a student has compelling reasons to take classes above the credit limit, they may petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/) Academic Affairs. Students in the one-year GPD program may enroll in additional credits if required to satisfy elective requirements. Ensembles do not apply to the credit limit.

Classification	Program	Minimum Credits for FT Status per Semester	Maximum Credits Allowed per Semester
Undergraduate Students	Bachelor of Music	12	25
	Bachelor of Fine Arts	12	25
	Performer's Certificate	12	25
Graduate Degree Students	Master of Music	9	18
	Master of Arts	9	18
	Doctor of Musical Arts	9	18
Graduate Diploma Students	Graduate Performance Diploma	4	8
	Artist Diploma	4	8

Academic Regulations

Sources of Credit

Students must earn more than half of the requirements for a degree or diploma at Peabody as a matriculated student. Any credits that are not earned at Peabody require approval for transfer from faculty and the Office of Academic Affairs or the Advising Office.

In every case, a graduating student must have credits earned at Peabody, transferred from a prior school or test provider or articulated from an approved enrollment at another division or institution as follows:

Degree	Credits
BM, BFA	120
MM, MA	30
DMA	60

Academic Credit

Peabody awards credit hours according to the guidelines of the Code of Maryland Regulations and the Middle States Commission on Higher Education For traditional coursework, students receive one credit for one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks in one semester. Enrollment in large ensembles accrues credits under the rubric for laboratory courses. Peabody grants two credits for success in large ensembles and has done so since 1985.

While accredited music schools may award as many as six credits for a semester of major lessons, they often do so if the lessons include the equivalent of a final exam. Peabody awards four credits for major lessons and one to two credits for the exam: the jury or recital. The disaggregation of credits for the lessons and the jury/recital is integral to Peabody's assessment of student learning, as noted below.

The Conservatory Curriculum and Assessment Committee in cooperation with the Associate Dean for Academic Affairs assign credit hours for each Conservatory offering as part of the procedure to approve new courses and programs. The same committee is charged with regular assessment of credit-bearing offerings at the course and program level.

Interdivisional and Baltimore Student Exchange Program Credit

Eligible Peabody students may request to take courses at other JHU divisions including: the Krieger School of Arts and Sciences, the Whiting School of Engineering, the Carey Business School, the School of Advanced International Studies (SAIS), and the School of Education.

Credit may also be available through the Baltimore Student Exchange Program (BSEP). To enroll in these courses, students need approval from the Office of the Associate Dean for Academic Affairs or the Director of advising, and, in some instances, from the instructor of the course.

Courses at other divisions and at BSEP institutions follow the grading policies and registration regulations of the host schools. These courses are recorded in the JHU Student Information System (SIS) with grades that factor into semester and cumulative GPAs.

Transfer Credits

Students may transfer credits taken at accredited post-secondary schools or through the accelerated testing of recognized providers (such as the College Board or International Baccalaureate).

Transfer credits are accepted following the submission of necessary documentation to Advising. Peabody can only transfer credits for students who have already matriculated into degree or diploma programs. New students are welcome to contact the Office of Academic Advising before enrolling but will not be able to begin the process of transferring credits until after matriculation.

For undergraduate transfer students, the year of study (sophomore or junior) is determined after the student matriculates, in conjunction with their progress in major coursework. Like most conservatories, Peabody does not accept transfer credits for lessons, juries, recitals, or ensembles. Bachelor of Music performance majors must participate in ensembles in every semester of private lesson instruction, and transfer students must participate in lessons and ensembles for at least two years.

Accepted courses taken outside of Johns Hopkins or BSEP are recorded in SIS without grades.

GRADUATE STUDENTS

New graduate students at Peabody may transfer a maximum of six credits of graduate study completed at other accredited institutions, pending the review and approval of department chairs and the Offices of Academic Affairs and Advising. All credits transferred to a graduate degree or diploma program must have been earned within five years prior to the student's first graduate degree registration at Peabody. Only credits that have not been earned in fulfillment of a previous degree may be transferred. Graduate students continuing from a previous Peabody program may transfer up to nine credits.

UNDERGRADUATE STUDENTS

First-time full-time undergraduate students may transfer a maximum of nine credits through Advanced Placement, International Baccalaureate, or dual enrollment to their degree programs. Undergraduate students in the fields of Recording Arts and Music Education may transfer additional credits of a specialized nature with the permission of their faculty advisors. Additional credits will be accepted for transfer students; however, at least half of all requirements must be earned at Peabody.

Transfer credits are only accepted if:

1. The credits are documented on an official transcript of an approved college.
2. They were not applied to any prior award (such as a degree or diploma)
3. The associated courses were completed with grades of B or better.
4. Faculty chairs and the Offices of Academic Affairs/Advising approve the credits as a substitution for a degree requirement.

Students are encouraged to request approval from the Office of Academic Advising prior to taking courses at other institutions.

UNDERGRADUATE ACCELERATED CREDITS

For undergraduate students, scores of 4 or 5 on select Advanced Placement Examinations, 50 on the CLEP administered by the College Board, or 6 or 7 on the International Baccalaureate Exam may be accepted for transfer credit. Transfer credits for these examinations are only accepted pending the submission of official documentation to the Office of Academic Advising.

See more specific restrictions below.

UNDERGRADUATE MUSIC THEORY

The Department of Music Theory does not accept transfer credits at the undergraduate level. However, advanced placement in music theory is possible based on placement testing at the time of matriculation.

UNDERGRADUATE MUSICOLOGY

The Musicology Department does not accept transfer credits for Advanced Placement courses in Musicology or Music History. However, the Musicology Department will accept up to six credits of courses taken at other accredited institutions. Students should contact the Chair of Musicology and submit an academic petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/) for approval. Students must present a syllabus of topics covered in the course. The faculty may request a graded sample of work completed in the course.

UNDERGRADUATE liberal arts

The Liberal Arts Department accepts a maximum of nine credits of AP, IB, or CLEP credit to fulfill Liberal Arts elective requirements.

UNDERGRADUATE MUSIC EDUCATION

The Music Education department directly oversees the Liberal Arts curriculum for students in the Music Education program. Music Education students should contact the Chair of Music Education about transferring AP or IB credits and consult with the Chair before enrolling in general studies courses at other institutions.

Waived Credits

Like most conservatories, Peabody does not accept transfer credits for the major-lesson enrollments: lessons, juries, recitals, or ensembles. The faculty of a department and placement test results determine the year of study (sophomore or junior).

Diagnostic testing of first year and transfer students may result in advanced placement in a curricular sequence. In such cases, Academic Advising will waive the credits for the courses that should have been taken before class in which a student is placed. Voice students may petition to take language exams in advance of attempting the appropriate course to place out of one or more of the required foreign languages and have those credits waived.

Academic Regulations

Grading System and Regulations

Letter grades are given for major lessons, coursework, ensembles, juries, and recitals. Students may not elect to take a class in a different format: there is no pass/fail option. For the following purposes of assessing academic progress, letter grades are assigned grade points as follows:

Letter Grades	Assigned Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D	1.00
F	0.00

No grade points are assigned for the following non-credit designations:

Letter	Definition
AU	Audit
I	Incomplete
IP	In Progress
W	Withdrawn
NCR	No Credit
P	Pass

The non-credit designations AU, W, NCR, and P are permanent grades for final transcripts. The regulations for auditing courses and In Progress grades can be found below.

Grade Determination

Professors may determine the scale of letter grades appropriate to the class grading percentage and make this scale known in their syllabuses. For most purposes, the following table may be regarded as a useful standard.

Grades Scored Between	Will Equal
95% and 100%	A
90% and less than 95%	A-
87% and less than 90%	B+
84% and less than 87%	B
80% and less than 84%	B-
77% and less than 80%	C+
74% and less than 77%	C
70% and less than 74%	C-
60% and less than 70%	D
0% and less than 60%	F

Grade Point Average

Grade point averages (GPA) are computed each semester and reported as term and cumulative GPA. A GPA is determined by multiplying the grade points for each earned grade by the number of credits for the course; the product is called the number of quality points. Artist Diploma recitals, composition and computer music portfolios, and final documents are not assigned letter grades and are therefore not calculated in a GPA. English as a Second Language courses are not calculated in a GPA, but students are still assigned standard letter grades. A GPA is the total number of quality points divided by the total number of attempted credits.

Example:

Grade & Credits and Weighting:

Class	Letter	Number	Credits	Grade x Credits	Quality Points
Class 1	B	3.00	4	3.00 x 4 credits	12.00
Class 2	A-	3.67	3	3.67 x 3 credits	11.01
Class 3	F	0.00	2	0.00 x 2 credits	0.00
Class 4	C	2.00	3	2.00 x 3 credits	6.00
	Attempted	Credits	12	Total Credits x Grades	29.01

29.01 Quality Points divided by 12 attempted credits = 2.4175
Semester GPA: 2.42. Student receives 10 credits.

Incomplete Grades [1]

The grade I (Incomplete) is a temporary grade that allows a student to complete the course under specific and documented conditions. Students must request the grade of I, and both the instructor and the student must complete the Incomplete Grade Contract in SIS before the last day of classes noted in the academic calendar. Students receiving an incomplete in any course are not eligible for the Dean's List for that semester.

Faculty must submit a grade to the Registrar's Office by the instructor after grading the student's completed work. All work must be completed, and the final grade submitted within four weeks after the start of the following semester as noted on the academic calendar. If the work is not completed within this period, a grade of F replaces the I on the student's transcript.

In Progress Grades [1]

Faculty may record the grade IP (In Progress) for applied work: juries, recitals, lessons, and technique classes in dance. The grade IP requires no contract since completion of this work is required to maintain good academic standing.

Students receiving an IP in any course are not eligible for the Dean's List for that semester and will receive a warning to resolve the grade to return to good academic standing.

The grade IP is also used as placeholder to mark passing semesters for academic commitments with indefinite durations, including DMA Consultation, Graduate Research, and Ear-training Review. For these classes, IP is assigned by default until the requirement is satisfied.

IP GRADE RESOLUTION

A grade of IP must be resolved by the sixth week of the subsequent semester. In general, all work should be submitted to faculty no later than the fourth week of the subsequent semester, although faculty can set earlier deadlines as they deem appropriate. IP grades that are not resolved by the deadline in the subsequent semester of enrollment will be changed to F on the student's permanent record. Students who take a leave of absence following the award of I and IP grades have until the fourth week of the semester of return to submit work. To be approved for graduation, students must satisfy all degree requirements including IP grades.

Failing Grades

At the undergraduate level, the grade of F is a failing grade for coursework. In addition, in the Department of Music Theory, a D is a failing grade. At the graduate level, the grades D and F are failing grades for coursework. Good Academic Standing requires students to earn higher grades in designated enrollments. Music students must earn a B- or better in major enrollments (lessons, juries, recitals, and Music for Media 1-4). Dance students must earn a B- or better in technique and performance classes.

For enrollments that are specifically designated as requiring higher grades in the Academic Standing policy, failure to achieve those grades requires approval to fulfill major area requirements and may delay graduation.

Grade Appeals

If a student disputes a recorded grade, they can appeal the grade through direct communication with the instructor. If the matter cannot be resolved with the instructor, the student may take their appeal to the chair of the department, or in the case of Large Ensembles, to the Large-Ensemble Manager. If the matter cannot be resolved with the chair, the student may submit an academic petition (https://projects.peabody.jhu.edu/servicedesk/customer/portals/). Grade appeals must be initiated within 45 days of the end of the grading period.

Grade Changes

Grades are only changed at the request of the course instructor in order to resolve an IP or I grade or to correct an error in grading. The instructor should request a change of grade by contacting the Conservatory Registrar, who will confer with the Associate Dean for Academic Affairs. Changes of grade should be requested and addressed promptly. Absent extraordinary circumstances—which would require broader consultation with the Conservatory leadership—no grade will be changed after 18 months of being posted to the student's record.

Academic Regulations

Dean's List Criteria

The criteria for inclusion on the Dean's List are:

1. Full-time status in an undergraduate degree program.
2. A semester grade point average of 3.67 or higher.
3. No 'In Progress' grades for the semester.

Students who achieve the Dean's List with a semester grade point average of 3.90 or higher are designated "High Honors."

Academic Regulations

Academic Standing

Conservatory students who have matriculated in degree and diploma programs are required to maintain good academic standing. The Office of Academic Affairs reviews academic standing at the end of each semester.

Students who receive federal financial aid are also required to maintain satisfactory academic progress (SAP) as determined by the Financial Aid Office (https://peabody.jhu.edu/audition-apply/financial-aid-scholarships/current-students/policies/).

Note: The interim policies instituted during the 2019-2020 and 2020-2021 Academic Years are no longer in effect.

Academic Standing for Undergraduate Students

GOOD ACADEMIC STANDING

Undergraduate students are considered in good academic standing if they complete 12 credits each semester with a term and cumulative GPA of 2.0. Music students must earn a B- or better in major enrollments (lessons, juries, recitals, and Music for Media 1-4). Dance students must earn a B- or better in technique and performance classes.

ACADEMIC WARNING

Students will receive a letter of academic warning for the following reasons:

- Receiving an F in any class.
- Taking an IP in a major enrollment such as lessons, juries, and recitals for Music students or technique and performance classes for Dance students.

Students who receive a letter of academic warning are still in good academic standing. The Conservatory recognizes that injury and illness may make it necessary to take an IP in a major enrollment. In such cases, a letter of academic warning simply signals the need to plan for a number of outcomes in the following semester. Any student who receives academic warning letters in consecutive semesters will be placed on academic probation.

ACADEMIC PROBATION
Students will be placed on academic probation for the following reasons:

- Earning a term GPA below 2.0.
- Completing fewer than 12 credits.
- Earning a grade below B- in major area enrollments.
- Receiving academic warning letters in consecutive semesters.
- Falling short of the pace to complete the degree in the normative timeframe.
- Failing any course twice.

Student who are placed on academic probation will receive a letter stating the reason for why they are not in good academic standing and are required to complete a self-assessment and meet with Peabody Advising. They must remedy the situation in the subsequent semester of study.

Students on academic probation may not enroll in courses outside of their major area that do not apply to their requirements nor participate in Interdivisional Registration unless required for their major program.

CONTINUED ACADEMIC PROBATION
Students who have been on academic probation will be reclassified as continued academic probation if, after a semester of study, the student has remedied the problem that placed the student on probation but has fallen short of one of the other measures of academic standing. In rare cases, a student may have academic standing extended on the presentation of documentation of treatment from a licensed care provider and in consultation with the Associate Dean for Academic Affairs and the relevant faculty.

ACADEMIC SUSPENSION
Students who have been on probation and do not meet minimum requirements for returning to good academic standing will be evaluated for academic suspension. An academic suspension is a forced separation from enrollment in the next fall or spring semester. Students placed on academic suspension must adhere to the following rules:

- The student may not register for coursework at the Johns Hopkins University.
- The student will have no access to the Peabody Campus or facilities.
- The student may be required to present evidence of successful academic progress at another school with credits to transfer and articulate to the degree program at Peabody.
- The student must return in one year or be administratively withdrawn from the Conservatory.

Additionally, a student who is not on probation but does very poorly in a semester could be considered for suspension if:

- The student earns a term GPA below 1.5.
- The student earns an F in a major enrollment.
- The student earns less than six credits.
- The student fails any course three times.

When a student returns after academic suspension, they are placed on academic probation until they have met the requirements under "Return to Good Academic Standing."

ACADEMIC DISMISSAL
Students who have been suspended for poor academic performance and then return to Peabody and fail to do well enough to return to good standing are dismissed, with no opportunity to return to complete the Peabody degree. Similarly, students may be dismissed without prior suspension if the GPA falls below 1.5 and/or the student earns an F in major enrollments.

RETURN TO GOOD ACADEMIC STANDING
Students are removed from academic action if they complete 12 credits and maintain a 2.0 term and cumulative GPA, and no unauthorized IPs or F grades.

If a student is not in good standing for multiple failures of the same course, there is an additional requirement of the successful completion of the course for a return to good standing.

Academic Standing for Graduate Students

GOOD ACADEMIC STANDING
Graduate students are considered in good academic standing if they complete each semester with a term and cumulative GPA of 3.0.

- Master of Arts students must earn 9 credits each semester.
- Master of Music and Doctor of Musical Arts Students must complete 9 credits each semester and earn a B- or better in lessons, and recitals.
- Graduate Performance Diploma students must earn 4 credits each semester and a B- or better in lessons and recitals.
- Artist Diploma students must earn 4 credits each semester and complete at least one recital each academic year.

ACADEMIC WARNING
Graduate students will receive a letter of academic warning for the following reasons:

- Receiving an F in any class.
- Taking an IP in lessons or a recital

Students who receive a letter of academic warning are still in good academic standing. The Conservatory recognizes that injury and illness may make it necessary to take an IP in a major enrollment. In such cases, a letter of academic warning simply signals the need to plan for a number of outcomes in the following semester. Any student who receives academic warning letters in consecutive semesters will be placed on academic probation.

ACADEMIC PROBATION
Students will be placed on academic probation for the following reasons:

- Earning a term GPA below 3.0.
- Completing fewer than 9 credits.
- Earning a grade below B- in major area enrollments.
- Receiving academic warning letters in consecutive semesters.
- Falling short of the pace to complete the degree in the normative timeframe.

Student who are placed on academic probation will receive a letter stating the reason for why they are not in good academic standing and must remedy the situation in the next fall or spring semester.

CONTINUED ACADEMIC PROBATION

Students who have been on academic probation will be reclassified as continued academic probation if, after a semester of study, the student has remedied the problem that placed the student on probation but has fallen short of one of the other measures of academic standing. In rare cases, a student may have academic standing extended on the presentation of documentation of treatment from a licensed care provider and in consultation with the Associate Dean for Academic Affairs and the relevant faculty.

ACADEMIC SUSPENSION

Students who have been on probation and do not meet minimum requirements for returning to good academic standing will be evaluated for academic suspension. An academic suspension is a forced separation from enrollment in the next fall or spring semester. Students placed on academic suspension must adhere to the following rules:

- The student may not register for coursework at the Johns Hopkins University.
- The student will have no access to the Peabody Campus or facilities.
- The student may be required to present evidence of successful academic progress at another school with credits to transfer and articulate to the degree program at Peabody.
- The student must return in one year or be administratively withdrawn from the Conservatory.

Additionally, a student who is not on probation but does very poorly in a semester could be considered for suspension if:

- The student earns a term GPA below 1.5.
- The student earns an F in a major enrollment.
- The student earns less than six credits.

When a student returns after academic suspension, they are placed on academic probation until they have met the requirements under "Return to Good Academic Standing."

ACADEMIC DISMISSAL

Students who have been suspended for poor academic performance and then return to Peabody and fail to do well enough to return to good standing are dismissed, with no opportunity to return to complete the Peabody degree. Similarly, students may be dismissed without prior suspension if the GPA falls below 1.5 and/or the student earns an F in major enrollments.

RETURN TO GOOD ACADEMIC STANDING

Students are removed from academic action if they complete 12 credits and maintain a 2.2 term and cumulative GPA, and no unauthorized IPs or F grades.

Academic Regulations

Registration Regulations

Auditing

Full-time students may audit no more than one Conservatory course each semester. Students must obtain written instructor approval to audit between the first and sixth week week of the semester as noted on the academic calendar. Students submit the approval to Student Enrollment and Account Management (SEAM) for enrollment processing. Students may not audit courses at other divisions of the University. Once a course is registered as audit, the grade of AU will be assigned which does not count for academic credit or figure into the number of attempted credits. A course registered as audit may not be converted to a letter grade for credit, but a student may be administratively withdrawn from an audit registration at the request of the instructor for not attending.

Change of Major

Students requesting a change of major must qualify for the new major through auditions and interviews with appropriate faculty. To initiate a change of major, a student should complete a 'Change of Major' form available in the Admissions Office. In the case of adding or dropping a Music Education or Recordings Major, students should submit an academic petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/) instead.

Change of Studio

In instances where there are compelling reasons for requesting a change, a student may request a change by submitting an academic petition (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/). See Studio Assignments.

Course Changes and Withdrawals

JHU Student Enrollment and Account Management and the Peabody Registrar's Office process course drops and withdrawals. See Academic Calendar (https://peabody.jhu.edu/academics/academic-calendar-resources/registrar/academic-calendar/) for deadlines.

Repeated Courses

Students must submit an Academic Petition for permission to enroll for a third time in a course that has been failed.

Academic Regulations

Attendance and Absences

Regular attendance is a student responsibility and is expected of all Peabody students. Professors set the attendance policy for each lesson, class, and ensemble. The attendance policy, along with all other rules of the class, may be found in the syllabus that is distributed at the beginning of each semester.

Occasionally, health or personal matters may interfere with a student's ability to attend class. In this situation, students are expected to notify professors as soon as possible about missing class and discuss how to make up missed class time or assignments in compliance with the relevant syllabi.

A serious or extended illness that causes several missed classes, major academic assignments, or examinations, and multiple large ensemble rehearsals, should be verified with documentation from a licensed caregiver. It is the student's responsibility to forward the verification to professors who request it or the Peabody Case Manager. A prolonged illness that interferes substantially with academic requirements for the semester may necessitate a withdrawal from classes or a medical leave of absence.

Occasionally, professional opportunities may interfere with regular attendance. Students should remember that outside performances must be cleared with major teachers (**Outside Instruction and Public Performance**). If an outside performance is approved students should notify professors as soon as possible about missing class and discuss how to make up missed class time or assignments. The same policy also applies to auditions.

In every scenario, the professor makes a final decision about whether or not an absence is excused based on the syllabus. If absences affect a final grade, the student may appeal the grade (and thus the ruling on the absences) through the policy articulated in **Grade Appeals.**

Academic Regulations

Interruption of Degree Work

Aleave of absence (LOA)#is an approved interruption of a degree program that is subject to a fixed duration and/or specific requirements for return. Awithdrawalis a complete departure from the Conservatory and its degree programs and can only be reversed through the mechanisms of re-audition and petition of the relevant academic committee.

Before requesting a leave or withdrawal, it is important that a student connect with the Pebody student case manager.

Leave of Absence

A student must submit a request for a leave (https://portalcontent.johnshopkins.edu/Peabody/conservatory/academicaffairs/forms/leaves_withdrawals.html) of absence. Examples of reasons for a#leave of absenceinclude:#personal#circumstances,#military service (foreign or domestic),#professional opportunities, or missionary work. A student#may opt to take a**medical leave of absence (MLOA)**to#devote their attention to medical care and treatment when physical or mental health difficulties impact their ability to participate in academic activities. Students who take#medical leaves of absence#provide medical documentation to#the Student Case Manager who will#give#support and connect them to resources.

#If the leave is granted, the leave will be made for a fixed duration of either one semester or one year. During that time, the student may not be enrolled as a full-time student at another institution. Any credits earned at another institution during the leave must be approved for transfer by#Academic Advising in consultation with department chairs.

The Peabody Conservatory is not obliged to grant a leave of absence, and students should present compelling personal or professional reasons for requesting an interruption of their regular progress toward the degree. A leave is not granted retroactively, and students must request the leave of absence before postponing their studies. Moreover, a leave is subject to the following conditions:

- The student must be a current student with remaining requirements to complete in a degree or diploma program.
- If the leave is approved before the start of a semester, the student's enrollments will be dropped.
- If the leave is approved after the start of the semester, the student will be withdrawn from enrollments.
- The student must be given clearance for all financial obligations, including but not limited to tuition, instrument loans, library fines, and residence fees. Any refund of tuition will follow the Conservatory refund schedule.
- A student who receives financial aid must make the appropriate arrangements with the Financial Aid office.
- An international student must make visa arrangements with the University's Office of International Students.
- A student requesting a leave is not guaranteed a space in a teacher's studio upon requesting to return to school.
- A student is limited to two total leaves of absence.

Return from LOA and MLOA

To re-enroll, a student on leave mst submit a reinstatement form. Study at the Conservatory may only resume at the scheduled start of a semester.

- Students should submit the academic petition by November 15 for spring re-enrollment.
- Students should submit the academic petition by April 15 for fall re-enrollment.

A student on MLOAwill need to complete reinstatement documentation which#includes:

- Release(s) of Information
- Student Self-Questionnaire
- Treating Provider Letter.

All students returning from a MLOA will work directly with the Student Case Manager to support their appeal in determining their readiness to return.

Extended Leave

Students on a leave of absence must report their status to the Conservatory by the stated dates in order to make arrangements to return or to extend the leave for an additional semester. Students who are granted an extension to a leave beyond the originally stipulated year may be required to re-audition. The maximum duration of a leave with an extension is three semesters.

Students who do not report their status by the above dates will be considered to have abandoned their degree programs and will be withdrawn from the Conservatory.

The Peabody Conservatory has no obligation to former students who abandon degree programs.

Special Circumstances for Leave of Absence

Doctoral students may only take an LOA while completing their residency. On completion of the required coursework, a doctoral student may no longer exercise the leave of absence option but must continue to enroll for Consultation (PY.610.813–814) in order to maintain standing in the program. If a student interrupts a program by failing to register for Consultation or failing to pay the Degree-in-Progress (DIP) fee for more than one year, the student must petition the DMA Committee for readmission. If a petition is approved, all retroactive fees must be paid in order for the reinstatement of status to become effective. Any DMA candidate who fails to register for Consultation will be dismissed from the program.

Double degree students may request a leave from the double degree program. A leave for double degree students is subject to the guidelines of the advising office for the Krieger School of Arts and Sciences or the Whiting School of Engineering. Before taking a leave of absence, students should consult with their major teachers at Peabody.

International students who request a leave should be aware that federal law governing the visa status of F-1 students requires them to vacate the United States for the duration of their leave of absence, unless the leave is granted for reasons of illness or other medical conditions.

Withdrawal

To request withdrawal from the Conservatory, students should submit this webform (https://portalcontent.johnshopkins.edu/Peabody/conservatory/academicaffairs/forms/leaves_withdrawals.html). This action will result in the closure of the student record. If a student withdraws after the drop period and before the end of the semester, the grades for that semester will be recorded as W. If a student has IP grades when they withdraw, they will be marked NCR.

More details including necessart request forms are available on "The Nest" in the Case Management section, under student affairs.

Academic Regulations

Graduation Eligibility

Students anticipating graduation must petition to graduate from the Peabody Conservatory by completing a form provided by the Office of the Registrar. The petition clarifies the student's name for the diploma and reserves or releases space at the commencement ceremony. The petition also initiates several important processes, including a final audit of credits, a clarification of contact information, and a review of the student's account. Students completing in May should submit this petition to the Registrar's Office in the fall semester of the year in which they intend to graduate, and no later than January 15 of that year.

To be approved for graduation, students must satisfy all degree requirements including IP grades, have a minimum 2.0 cumulative grade point average, settle all financial obligations, and resolve any and all outstanding charges of misconduct and violations of academic ethics. No student may participate in the commencement ceremony unless that student is approved for graduation.

Starting in the fall semester 2021 the Peabody Conservatory awards degrees and diplomas diplomas in May, August, and December.[1] Students may complete the requirements for a program after commencement and have their registration status changed to "requirements complete." However, they will not officially graduate from the Conservatory until the following December (or May) commencement.

Students pursuing five-year degree programs should refer to the degree requirements for special clarifications about commencement.

1 Policy updated on November 2, 2021 approved by University Registrar

Degree and Diploma Programs

Degree Programs

The Peabody Conservatory awards five degrees:

- **The Bachelor of Music (BM):** Performance (including Composition (p. 767), Computer Music (p. 768), and Music for New Media (p. 776)), Recording Arts (p. 795), and Music Education (p. 764)
- **The Bachelor of Fine Arts (BFA):** Dance (p. 810)
- **The Master of Music (MM):** Performance (including Composition (p. 814), Computer Music (p. 814), Orchestral Conducting (p. 822), and Wind Conducting (p. 824)), Performance-Pedagogy (p. 825), Music Education (p. 826), Musicology (p. 826), and Music Theory Pedagogy (p. 827)
- **The Master of Arts (MA) in Audio Sciences:** Acoustics (p. 828) and Recording Arts and Sciences (p. 829)
- **The Doctor of Musical Arts (DMA):** Performance (including Composition (p. 830), Orchestral Conducting (p. 832), and Wind Conducting (p. 836)).

Diploma Programs

The Peabody Conservatory also awards three diplomas which are certificates:

- The Performer's Certificate (PC) (p. 840)
- The Graduate Performance Diploma (GPD) (p. 842)
- The Artist's Diploma (AD) (p. 843)

Peabody collaborates with the Johns Hopkins Krieger School of Arts and Sciences and the Whiting School of Engineering to administer an undergraduate double-degree. However, for the purposes of the Peabody catalogue, this degree may be regarded as a modified BM or BFA degree.

Degree and Diploma Programs

Bachelor of Music Degree (BM)

The Bachelor of Music degree program at the Peabody Conservatory is designed to offer gifted students the training to prepare themselves for careers in performance, composition, computer music, music education, recording arts, and related areas of professional activity.

Admission Requirements

Students applying for the Bachelor of Music degree program present transcripts, test scores, and recommendations before playing an audition. The details of this process may be found at the Admissions website. Students applying for the Bachelor of Music degree program should meet the following criteria:

1. The student must be a graduate of an accredited high school or present evidence of equivalent study.
2. General admission requirements as listed for specific degrees and programs are identical for all applicants. However, immigration regulations, varying educational backgrounds, and financial considerations make special procedures necessary in order to help meet the needs of individual students. The detailed instructions sent to each applicant should be studied with utmost care.

Program Requirements

BM Curricular Components

Matriculating first-year students will satisfy between 131 and 161 credits in four years through passing grades, transfer credits, or onsite placement exams. Undergraduate students must be enrolled as full-time students for eight semesters and are required to remain enrolled in one-hour major lessons for all eight semesters.

The applied level of transfer students is determined by faculty and set at the end of the first year of study. Once set, the transfer student must be enrolled as a full-time student in one-hour major lessons until the conclusion of their adjusted final year.

Applied Enrollments

Major Lessons

Undergraduate students must enroll in major lessons through their last semester of the degree time frame (eight semesters for freshmen and the determined number for transfer students).

Any change to studio assignment must be approved by the Associate Dean for Academic Affairs (see Studio Assignments) and students must earn at least a B- in major lessons (see Academic Standing).

Juries and Recitals

The progress of each student is measured by the major department each year. Advancement and assessment are accomplished by an annual departmental examination (a "jury"). Every performance major must play a departmental jury for credit by the end of each school year. Students majoring in Composition, Computer Music, and Music for New Media students participate in weekly seminars with the entire Composition Department that provide ongoing departmental evaluation for each student. Dual Degree students who perform their recitals in their fifth year of study will play four juries and one hearing.

Jury	Description
109	The freshman or 109 jury is considered an advising aid to the student and their teacher in planning the following year's study.
209	The purpose of the 209 jury taken at the end of the sophomore year (fourth semester or credit hour equivalent) is to assess the student's overall progress and to determine whether or not they should continue in the chosen curriculum. On the basis of this jury and the student's overall academic record, the jury committee makes recommendations for the student's remaining years of undergraduate study.
309	The 309 jury is taken at the end of the junior year and is considered an advising aid to the student and their teacher in planning the final year of study, including the senior recital. Students in the departments of violin, viola, guitar, and jazz performance are required to play a "junior" recital at the end of the third year of study. This junior recital takes the place of, and is recorded with the same course number as, the 309 jury. Departments that require a junior recital may also require students to appear for technical examination and/or a demonstration of orchestral excerpts during the regular jury period.

A student who does not play a jury at the end of each academic year or does not earn at least a B- in a jury is not considered to be in good academic standing and will need to replay the jury in the following fall semester.

A graduation recital or comparable capstone project is required of all degree candidates.

Large Ensembles

All undergraduate students majoring in orchestral instruments must participate in Large Ensemble each semester of enrollment for major study as assigned, excluding Jazz majors. All Voice and Organ BM candidates have a six-semester choral requirement. For Voice majors, performance of a major opera role may qualify for Large Ensemble credit. All other non-orchestral BM candidates have a choral obligation as stipulated in their specific degree requirements. Ensemble credits beyond those required may be counted as elective credit. The regulations for performing in large ensembles, which are set by the Ensembles Office, may be found at the Ensemble Office website.

Small Ensembles

String and Percussion majors are required to enroll in four semesters of Chamber Music. Woodwind and Brass majors have a two-semester small ensemble requirement. Jazz majors must comeplete six semesters of small ensemble. A minimum of 10 certified coaching hours and a performance must be completed in order to earn credit. After completing the sight-reading course in the freshman year, Piano majors fulfill Accompanying and Chamber Music requirements specified in the curriculum.

Academic Enrollments

Breakthrough Curriculum

All undergraduates complete the Breakthrough Curriculum. Matriculating BM students take Exploring Arts Careers. In the third year of study, students take Building a Brand and Portfolio and Pitching Your Creative Idea. The culmination of study is the preparation and presentation of a pitch, adjudicated by a panel of faculty and guests that also serves as an entry in a real competition for funding and project support to implement a residency at one of Peabody's partner institutions. Students may attempt to test out of the Building a Brand and Portfolio requirement; information on testing out can be requested from the LAUNCHPad office (https://peabody.jhu.edu/life-at-peabody/career-services/).

Music Theory

With the exception of students in jazz performance, all undergraduate music students have a three-year requirement for Music Theory. The Music Theory program consists of four to six consecutive semesters of courses: Music Theory 1 through Music Theory 6. Students are strongly encouraged to complete all Music Theory requirements in the first three years of study. Simultaneous enrollment in more than one Music Theory course is not permitted except with the express permission of the Chair of Music Theory and the Associate Dean for Academic Affairs. Entering students who are not strong in the fundamentals of music (i.e., rhythm, meter, scales, intervals, keys, triads, and inversions) are encouraged to review their preparatory work during the months prior to the beginning of the academic year. Those who are not able to show proficiency in these areas on the placement exam will be placed in an intensive section. Advanced placement in Music Theory is possible.

Ear Training

Ear-training and Sight-singing classes are closely coordinated with the Music Theory curriculum. Students are strongly encouraged to complete all Ear-training requirements during the first two years of study. Students who are not able to show proficiency on Ear-training placement exams will be placed into an intensive section. Note: students who are placed into a Perfect Pitch section are exempt from the second year of Ear-training.

Keyboard Studies

Keyboard Studies classes are coordinated with the Music Theory and Ear-training curriculum. Students are strongly encouraged to complete all Keyboard Studies requirements during the first two years of study. Placement is determined by individual auditions.

Musicology

Students pursuing the standard BM musicology requirements will complete a total of 12 credits of musicology course work. Students enroll in History of Music 1, History of Music 2, History of Music, Music History in Global Contexts or enroll in three of these four courses plus a musicology elective seminar. Students must complete the first semester of the Liberal Arts Core curriculum (Core 2) before starting the sequence or be in their third year of study. Students may not enroll in more than one musicology survey course per semester, although students may enroll concurrently in their final survey course and an elective. Music Education majors follow a specific sequence of courses designed to accommodate Music Education coursework. Jazz majors take only History of Music 3. Transfer credits in Musicology are considered for approval by the Chair of Musicology and the Associate Dean for Academic Affairs on a case-by-case basis. Jazz majors pursue a concurrent curriculum in the history of Jazz. Students who are enrolled in English as a Second Language courses complete only three History of Music courses and do not complete an elective seminar.

Liberal Arts

Depending on their major, music students are required to fulfill 22-32 credits of Liberal Arts courses, beginning with a two-year Core Curriculum (12 credits). The majority of students will take the Core Curriculum in their first two years of study. Some students may be placed in Writing Intensive for their first year and begin the Core Curriculum in their second year. Students may petition to have Homewood Liberal Arts courses substitute for Core credit. Recording Arts students should see the Recording Arts specific program requirements for their variation of this curriculum.

Humanities Core Curriculum

- PY.260.115 Core 1: Analytical Thinking and Writing (3 credits, fall)
- PY.260.216 Core 2: Writing and Research Methods (3 credits, spring)
- PY.260.359 Core 3: Critical Methods (3 credits, fall)
- PY.260.360 Core 4: Art, Culture, and Society (3 credits, spring)

English as a Second Language (ESL)

Peabody offers intensive English as a Second Language (ESL) courses. Matriculating international students will be tested to determine their level of English proficiency and placed into the ESL curriculum if appropriate. Some Peabody courses require successful completion of ESL courses as a prerequisite. ESL 1 does not count toward fulfillment of degree requirements, and the grades earned are not calculated in the student's GPA; however, the hours are counted as part of the course load for tuition and full-time enrollment determination.

Critical Writing Intensive and ESL Writing Intensive

PY.260.021 ESL Writing Intensive 1 is a yearlong course designed for international students who are new to writing in English. PY.260.023 Critical Writing Intensive 1-PY.260.024 Critical Writing Intensive 2 is a yearlong course to prepare students for college-level writing. Both Writing Intensive courses involve close coordination with faculty members teaching the Core Curriculum and fulfill Liberal Arts electives.

Students enrolled in ESL courses can complete fewer Core courses and Liberal Arts Electives as outlined in their degree audits.

Liberal Arts Electives

Upon completion of the first year of the Liberal Arts Core or by the third year of study, students begin to take Liberal Arts elective courses. Students may fulfill Liberal Arts electives by taking coursework on the Homewood campus.

Electives

Unless otherwise specified, the term elective means class elective. Additional lessons cannot count as electives, but additional ensembles may. Questions about the appropriateness of all other courses for elective credit should be directed to the Office of Academic Advising.

Graduate Seminars

Graduate students in the MM and DMA programs have priority seating in Music Theory and Musicology graduate seminars, as do undergraduates with additional requirements (such as those in the five-year BM/MM program). In general, undergraduate students may only enroll in graduate seminars for elective credit under the following conditions:

- For seminars in Music Theory, students must have successfully completed Theory 1, 2, 3, and 4.
- For seminars in Musicology, students must have successfully completed at least two of the three History of Music survey courses and take the third simultaneously with the seminar.

Even after obtaining the permission of the faculty member, undergraduate students may still be removed from graduate seminar rosters, depending on the needs of the graduate population.

BM Curricula

In this section:

Bachelor of Music in Performance

Composition, Bachelor of Music

Program Requirements

For common requirements, please see the Bachelor of Music Degree (p. 764) page.

Code	Title	Credits

Bachelor of Music in Music Education

The Music Education major is designed for the gifted performer who has a special interest in sharing their musical expertise through teaching music in elementary or secondary schools. The goal of this professional preparation program is to provide prospective teachers with the knowledge, skills, and attitudes needed for the effective teaching of music. Graduates of the program are certified to teach music N-12 in Maryland and in all other states with which Maryland shares reciprocity.

The Music Education program awards a Bachelor of Music degree with two majors: Music Education and Performance (or Composition). As such, students are only admitted on the basis of a successful performance audition or composition interview in addition to their Music Education interview. Music Education students receive the same attention to their musical development (applied study, music theory, music history) as students in the performance programs at Peabody and are held to the same standard of excellence.

Program Requirements

The Music Education curriculum has specific general studies requirements as mandated by state and national accrediting agencies. The Music Education department directly oversees the Liberal Arts curriculum for students in the Music Education program. To the extent that these requirements are not satisfied within the Liberal Arts curriculum required of all Peabody undergraduates, students may choose courses offered at the Krieger School of Arts and Sciences. Advanced Placement and transfer credits are subject to the procedures found under the heading Transfer Credits in the Academic Regulations section of the catalogue and are accepted at the discretion of the Music Education Department.

All Music Education students are required to complete 15 weeks of intern teaching in a Maryland public school under the direction of the clinical supervisor. Intern teaching forms a capstone requirement of the curriculum, and students must meet all of the prerequisites and requirements detailed in the Handbook for Intern Teaching, which is assembled and distributed by the Music Education Department.

Below, the requirements for the majors Guitar, Piano and Voice are shown with a Vocal/General Music focus. Students with these majors may adopt the Instrumental concentration with the following substitutions:

Variation: Instrumental Focus

Code	Title	Credits
PY.510.211 & PY.510.212	Brass Class and Woodwinds Class	5
PY.510.223	Percussion Class	1
PY.510.338	Conducting the Secondary Instrumental Ensemble 2	2

Bachelor of Music in Recording Arts

The Bachelor of Music in Recording Arts and Sciences program is designed to meet the expanding need for skilled audio technicians, producers, and engineers who possess both technical expertise and a sophisticated knowledge of music. A four-year double major program, the Bachelor of Music in Recording Arts combines an applied performance or a composition major with a technical education in recording technology. Relevant studies in electrical engineering, math, science, and computer science are taken at the Krieger School of Arts and Sciences and the Whiting School of Engineering of The Johns Hopkins University on the Homewood campus.

Program Requirements

The Recording Arts curriculum includes extensive practical experience, in styles ranging from jazz, rock, and popular music to classical opera, chamber, choral and orchestral. In addition to regular laboratory sessions with live musical groups of all styles, students serve as recording engineers for all Peabody performances, including providing the audio feed for those events being streamed live. All recording majors are expected to work in the recording studios throughout the course of their enrollment as part of the College Work Study program. Following their third year, students complete an internship with a company or individual specializing in the area of the industry in which they intend to pursue a career following graduation.

Due to credit and scheduling conflicts, it is not possible to combine the Recording Arts major with the Music Education or Music for New Media majors or the double degree program at the Homewood campus of Johns Hopkins University. However, there are classes available to non-majors, and after graduating with their BM, students can apply for one of the Master of Arts majors: Recording Arts and Sciences, or Acoustics.

Composition, Bachelor of Music in Recording Arts

Program Requirements

For common requirements, please see the Bachelor of Music Degree (p. 764) page.

Minors

Undergraduate students may pursue a minor in the Business of Music, Historical Performance, Liberal Arts, Music Theory, Musicology, or Directed Studies.

Students may begin taking coursework toward a minor at any time. For Directed Studies, students may be admitted into the minor through the Admissions process or by applying by the end of their fourth semester of study. For all other minors, students may apply beginning in the fourth semester of study, and by the end of the penultimate semester. Students may apply by completing this form (https://projects.peabody.jhu.edu/servicedesk/customer/portal/23/create/230/). Students may apply for only one minor.

Once admitted to the minor, students must maintain good standing in the major area and a 3.5 cumulative GPA for Directed Studies or a 3.33 cumulative GPA for other minors.

Students may begin taking courses at another division of the university beginning in the second semester of study. Students with minors may not exceed enrollment in 25 credits each semester.

Successful completion of a minor will not appear on a diploma but will appear on a final transcript.

Business of Music, Minor

Program Requirements

Students take a customized curriculum with electives in three study areas: Accounting or Business Studies; Non-Profit/Arts Administration; and Communication/Marketing. Students may choose one additional elective from these study areas or an alternative course approved by the faculty. Electives may be taken at the Whiting School of Engineering (WSE), the Carey Business School, or the Krieger School of Arts and Sciences. Students complete the minor with a capstone project.

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/).

Total Credits		**14**

Directed Studies, Minor

Program Requirements

Students develop a Directed Study Plan that emphasizes a specific field beyond music. The plan must be approved by the Chair of Liberal Arts. Courses in the approved plan may replace Core 3 and Core 4 and may fulfill Liberal Arts Electives. Approval may also be granted for minor courses to replace Core 1 and Core 2 if they have sufficient content in text analysis, writing and research methods. Credits earned from AP, IB, or prior study cannot be applied to the Directed Studies minor.

On completion of the Directed Studies Minor, the transcript will indicate the title of the student's Directed Study plan. For example: *Directed Study Minor with Coursework taken in Jewish Studies* or *Directed Study Minor with Coursework taken in Modern Media.*

Coursework at another JHU Division 15 credits	
Coursework at another JHU Division, Peabody, or outside institution credits	6

Coursework taken at outside institutions follows the policies in Sources of Credit (https://e-catalogue.jhu.edu/peabody/general-information-procedures-regulations/academic/sources-of-credit/).

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/).

Historical Performance, Minor

Program Requirements

Students must take at least four credits in applied historical performance, including such courses as Baroque Flute Class, Baroque Violin, Viola da gamba, or Cello, and many others. Minor lessons are available and would fulfill the applied music requirement but are not required. Please note that students taking minor lessons will incur the minor lesson fee for each semester of study. Students must play in Historical Performance Ensembles until earning at least four credits. Finally, students must earn at least 4 credits in Historical Performance coursework chosen in consultation with the faculty.

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/)

PY.910.529 & PY.910.530 Renaissance Ensemble		3
Total Credits		**14**

Students approved for this minor are excused from four credits of Chorus and one opera performance elective

Liberal Arts, Minor

Program Requirements

Peabody students wishing to earn a Bachelor of Music or Bachelor of Fine Arts degree with a minor in Liberal Arts must complete six courses at the Krieger School of Arts and Sciences on the Homewood campus with at least three at the 200 level or higher. At least one of the courses must be a writing-intensive course, with the designation “(w)” in the Homewood course listing. Introductory language courses and Homewood music courses may not be used for the minor.

Given the requirements of this minor and the nature of the coursework, the Liberal Arts minor essentially subsumes the Liberal Arts elective requirement of the BM or BFA degree. All students applying for this minor must have their proposed program of study approved by the Associate Dean for Academic Affairs in consultation with the Chair of Liberal Arts.

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/)

Code	Title	Credits

Music Theory, Minor

Program Requirements

The Music Theory minor cultivates talented undergraduate students through specialized study in music theory. Students take one advanced skills class and three advanced music theory seminars. Students complete the minor with a research paper on a topic chosen in consultation with the department chair and the instructor of a seminar in which they are enrolled.

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/)

Capstone		
PY.710.462	Music Theory Minor Capstone	1
Total Credits		**12**

Musicology, Minor

Program Requirements

The Musicology minor is designed for students with an interest in music history beyond the core requirements. Students should apply for this minor after taking at least one course in the Musicology department. Students approved for the minor will take Music Bibliography and two graduate electives, in addition to the one Musicology elective required of all students: one from the graduate offerings at Peabody and one from the musicology seminars offered on the Homewood campus. Students complete the minor with a personally supervised capstone project.

Any credits taken in pursuit of the Musicology minor may also be applied as general electives for the BM degree. Some of the courses taken for the minor may count as Liberal Arts electives, but only on a case-by-case basis and in consultation with the Associate Dean for Academic Affairs and the Chair of Liberal Arts. With the exception of Founadtions of Music Research, students who matriculate to the five-year BM/MM program or continue in the MM program may not apply elective courses for the minor to their MM if those courses have already been counted as electives for the BM.

Additional information about minor requirements and the application process can be found here (https://e-catalogue.jhu.edu/peabody/bachelor-music-degree/minors/)

Combined Degree Programs

Peabody-Homewood Double Degree Program

Peabody and the Homewood schools of Johns Hopkins University offer the opportunity for a select group academically and musically advanced students to simultaneously pursue a Bachelor of Music degree and either a Bachelor of Arts degree from the Krieger School of Arts and Sciences or a Bachelor of Science degree from the Whiting School of Engineering. Students must be admitted independently to Peabody and one of the Homewood schools and be invited to participate in the double degree program. Students who have begun their junior year of study are not eligible to enter the double degree program nor may students transfer into the program midyear. The double degree program is designed as a five year program, and students must comply with the credit limit of 25 credits per semester.

Students in the double degree program must maintain full-time enrollment in each semester of study, including lessons at Peabody and at least one class at Homewood. Administrative services such as registration, financial aid, and student accounts are provided to double degree students by the Homewood schools. Consequently, students in the double degree program do not receive Peabody merit scholarships or any other form of financial aid from Peabody. Double degree students must enroll in private lessons, at a minimum, and, for instrumental majors, large ensembles to maintain their status as Peabody degree candidates in the double degree program.

Student Status

Students in the double degree program are responsible for meeting the requirements of both degree curricula within the published guidelines of the relevant programs. Students' principal affiliation is with the Krieger School of Arts and Science or the Whiting School of Engineering. All official procedures of registration and records are managed through the Homewood Office of the Registrar. The official transcript for a double degree student, including all courses at both Peabody and Homewood, is maintained by the Homewood Office of the Registrar.

Enrollment Requirements and Limits

Double Degree students must enroll in private lessons each semester. Instrumental majors are required to enroll each semester for large ensembles and private lessons to maintain their status as Peabody degree candidates in the Double Degree Program. Double Degree students must register for no less than one course at Homewood each semester. Peabody Double Degree students are permitted to enroll in a maximum of 25 credits per semester.

Residency Requirement for Peabody Double Degree Students

Peabody Double Degree students must complete at least 48 credits on the Homewood campus, in the Krieger School of Arts & Sciences and/or the Whiting School of Engineering.

Course Changes and Withdrawals from Peabody Courses

Students must follow the deadlines for adding, dropping, or withdrawing from Peabody courses which are published on the Peabody Academic Affairs website at https://peabody.jhu.edu/academics/academic-calendar-resources/.

Course Changes and Withdrawals from Arts and Sciences and Engineering Courses

Students must follow the deadlines and processes for adding, dropping or withdrawing from Arts & Sciences and/or Engineering courses which are published on the Homewood Registrar's Office website (https://peabody.jhu.edu/academics/academic-calendar-resources/registrar/).

Leave of Absence

Double Degree students may request a Leave of Absence (LOA) from the entire program, however, they cannot be granted leave from only one portion of the program. A LOA for Double Degree students is subject to the guidelines of the student's respective academic advising office on the Homewood campus.

Graduation Policies

Double Degree students must petition to graduate from the Peabody Conservatory in accordance with information located at https://peabody.jhu.edu/academics/academic-calendar-resources/registrar/, and also adhere to the policies and procedures for applying to graduate from their Homewood school, Arts and Sciences or Engineering as indicated at ASEN Undergraduate Graduation Policy (p. 1616). Both degrees are awarded simultaneously, and degree conferral is available in May and December of each academic year.

Graduation Closes the Undergraduate Record

Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. Students wishing to take additional courses at JHU after graduation should refer to Alumni Enrollment policies.

Accelerated Graduate Degrees

Qualified Peabody undergraduates have the option of applying to complete a master's degree in one additional year of study after completion of their bachelor's degree. The selection process takes place at the end of the third year of study. Applications are due by May 1. The admission process includes academic and performance elements as well as recommendations from faculty members. Students selected for the program maintain their initial financial assistance levels throughout the five years of study. Transfer students who will complete the BM in fewer than four years are ineligible for five-year programs.

The selection process for both the BM/MM and BMRA/MA programs is managed by the Office of Academic Affairs. The Associate Dean for Academic Affairs, in consultation with faculty and the administration, makes the final decisions about admittance to the five-year programs. Because the selection process considers the results of the 309 jury, the final decisions are not announced until all spring grades have been recorded.

Five-Year BM/MM Program

Admission Requirements

Undergraduate students may apply for admittance to the BM/MM program in the academic year in which they are scheduled to perform their 309 jury or junior recital (or, for composition majors, in their junior year) by submitting an application (https://peabody.jhu.edu/academics/academic-calendar-resources/academic-affairs/five-year-programs/five-year-program-application/) and faculty recommendations to the Office of Academic Affairs by May 1 of that year.

Admittance to the BM/MM program is limited to outstanding performers with excellent academic records. The minimum requirements for applying are:

1. An average of A- and above in all major lessons and juries
2. A minimum cumulative grade point average of 3.67
3. A recommendation from the major teacher.

Admittance into the BM/MM program includes the proviso that a student's fourth and fifth years of performance or composition study be with a single studio teacher unless there are circumstances that require special arrangements to be made by the Associate Dean for Academic Affairs. Students who wish to complete a BM in performance or composition and then earn an MM in Musicology, Music Theory Pedagogy, or Performance/Pedagogy are also eligible to apply for this program but may be required to complete additional application requirements. Students in the BM/ MM program are not permitted to pursue more than one MM degree. Students admitted to the BM/MM program have 2 semesters of Large Ensemble waived. Students typically begin taking MM coursework in their fourth year of study.

Five-Year BMRA/MA Program

Admission Requirements

Qualified students enrolled in the Bachelor of Music in Recording Arts (BMRA) program have the option of applying to complete a Master of Arts degree in Audio Sciences during a fifth year of study.

Students in the BM Music for New Media program may apply for this program with an adjusted program of study. Adjustments are detailed here (p. 809). Interested students should consult with Peabody Advising and department faculty.

Applications (https://peabody.jhu.edu/academics/academic-calendar-resources/academic-affairs/five-year-programs/five-year-program-application/)and materials must be submitted to Academic Affairs by 1 May during the student's third year of study. Admission to the BMRA/MA does not extend financial aid arrangements beyond a fifth year of study, nor does it guarantee continued major lessons in performance or composition.

Admittance to the BMRA/MA program requires:

- a cumulative GPA of 3.67
- recommendation from the Recording Arts faculty.

Course requirements for the fifth-year MA in Acoustics are listed here (p. 828).

Course requirements for the fifth-year MA in Recording Arts are listed here (p. 829).

Five-Year BM/MA: Music for New Media Variant

Students in the BM program in Music for New Media may apply for the five year BM/MA program with the following adjustments to the BM Music for New Media requirements (p. 776):

Dance, Bachelor of Fine Arts

The Peabody Conservatory BFA Dance program endeavors to prepare exceptional 21st century performers, choreographers, teachers, and future leaders dedicated to pushing the boundaries between dance and science and expanding the role and relevance of dance in both traditional and non-traditional contexts.

Admission Requirements

Students applying for the Bachelor of Fine Arts degree program present transcripts, test scores, and recommendations before playing an audition. The details of this process may be found at the Admissions website (https://peabody.jhu.edu/audition-apply/). Students applying for the Bachelor of Fine Arts degree program should meet the following criteria:

1. The student must be a graduate of an accredited high school or present evidence of equivalent study.
2. General admission requirements as listed for specific degrees and programs are identical for all applicants. However, immigration regulations, varying educational backgrounds, and financial considerations make special procedures necessary in order to help meet the needs of individual students. The detailed instructions sent to each applicant should be studied with utmost care.

Program Requirements

Dance Core and Performance

All BFA students take Ballet 1-4 and Modern 1-4 concurrently: students dance in both classes in each semester of enrollment. Transfer students are placed at the appropriate level at matriculation. To maintain Good Academic Standing, students must earn at least a B- in Ballet and Modern in each semester of study.

Students are required to participate in rehearsals and performances as assigned. Auditions for performances are held several times each year. All BFA students are required to attend auditions, unless other arrangements have been made with the Chair.

Additional off-campus performances may be scheduled throughout the year.

Dance Theory and Choreography

Dance Theory courses should be taken in the order recommended in the curricular grid, and any substitution must be approved by the Chair. Similarly, the choreography courses should be taken in sequential order: Improv/Authentic Movement (PY.830.202) followed by Choreography 1-3 (PY.830.301-302,404).

Code	Title	Credits
PY.830.202	Improv/Authentic Movement	2
PY.830.301 & PY.830.302	Choreography 1 and Choreography 2	6
PY.830.404 Choreography 3		3

Humanities

All BFA students are required to successfully complete Liberal Arts courses, beginning with a two-year Core Curriculum (12 credits). The majority of Peabody students will take the Core Curriculum in their first two years of study. However, students in need of intense writing instruction will take six credits of Writing Intensive in their first year and begin the Core Curriculum in their second year. ESL 1 does not count toward fulfillment of degree requirements, and the grades earned are not calculated in the student's GPA; however, the hours are counted as part of the course load for tuition and full-time enrollment determination.

 [(https://livejohnshopkins.sharepoint.com/teams/Advising/Shared%20Documents/Academic%20Catalog/AY%2019-20%20Academic%20Catalog%20CCrosso%20Edits%205-27-2020.docx#_msoanchor_1)**Humanities Core Curriculum**

- PY.260.115 Core 1: Analytical Thinking and Writing (3 credits, fall)
- PY.260.216 Core 2: Writing and Research Methods (3 credits, spring)
- PY.260.359 Core 3: Critical Methods (3 credits, fall)
- PY.260.360 Core 4: Art, Culture, and Society (3 credits, spring)

Critical Writing Intensive

PY.260.023 Critical Writing Intensive 1 is a yearlong course designed for students who have inadequate preparation in formal writing skills. Both Writing Intensive courses involve close coordination with faculty members teaching the Core Curriculum. The second semester of Writing Intensive incorporates visits to Core courses in order to familiarize students with the coursework ahead.

liberal arts Electives

Upon completion of the first year of the Liberal Arts core or by the third year of study, students begin to take the appropriate number of Liberal Arts elective courses. While students may take some courses at Homewood or elsewhere, Peabody's Liberal Arts Department provides a variety of courses designed specifically for Peabody students.

Breakthrough Curriculum

All undergraduates complete the Breakthrough Curriculum. Matriculating BFA students take PY.123.111 Exploring Arts Careers. In the third year of study, students take PY.123.311 Building a Brand and Portfolioand PY.123.312 Pitching Your Creative Idea (UG). The culmination of study is the preparation and presentation of a pitch, adjudicated by a panel of faculty and guests that also serves as an entry in a real competition for funding and project support to implement a residency at one of Peabody's partner institutions. Students may attempt to test out of the Building a Brand and Portfolio requirement; information on testing out can be requested from the LAUNCHPad office (https://peabody.jhu.edu/life-at-peabody/career-services/).

Minors

Undergraduate dance students may pursue a minor in Liberal Arts (p. 807) or Directed Studies (p. 806). Minor study is generally coordinated by the Office of Academic Affairs in consultation with the department offering the minor.

Students may begin taking coursework for a minor at any time. Students in the Directed Studies program should see the specific regulations for that program, below. For all other minors, students may apply beginning in the fourth semester of study, and up until the end of the penultimate semester of study. Students apply by completing this form. Once admitted to the minor, students must maintain a 3.33 cumulative GPA and good standing in the major area.

Students may apply for only one minor.

Successful completion of a minor will not appear on a diploma but will appear on a final transcript.

Master of Music Degree (MM)

The program leading to the degree of Master of Music provides for intensive development of performance skills, extensive knowledge of the literature in the major field of study, and achievement of a broadened knowledge of the art.

Students applying for the Master of Music degree program present transcripts, test scores, and recommendations before playing an audition. The details of this process may be found on the Admissions website. Successful applicants must matriculate into the Master of Music degree program in the fall semester of the calendar year in which they auditioned. The Conservatory does not defer entrance into degree programs or allow students to begin in the spring semester. Matriculating MM students must meet the following criteria:

1. A Bachelor of Music degree or the equivalent from an accredited institution.
2. Evidence of a degree recital or an approved equivalent must be submitted in the form of a degree recital program or credit listed on the student's transcript.
3. All entering students are required to take placement examinations in music theory, musicology, and ear-training.
4. Students who are placed in ESL courses in their first semester are only permitted to enroll in graduate seminars in music theory or musicology after satisfactorily completing the remedial coursework into which they are placed.

Program Requirements

MM Curricula

- MM Composition (p. 814)
- MM Computer Music (p. 814)
- MM Conducting, Orchestral (p. 822)
- MM Conducting, Wind (p. 824)
- MM Guitar (p. 815)
- MM Harpsichord (p. 816)
- MM Historical Performance Instruments (p. 816)
- MM Historical Performance Voice (p. 821)
- MM Music Education (p. 826)
- MM Music Theory Pedagogy (p. 827)
- MM Musicology (p. 826)
- MM Organ (p. 823)
- MM Orchestral Instruments (p. 822)
- MM Performance/Pedagogy (p. 825)
- MM Piano (p. 824)
- MM Piano: Ensemble Arts Vocal Accompanying (https://e-catalogue.jhu.edu/peabody/degree-diploma-programs/piano-ensemble-arts-vocal-accompanying-master-music/)
- MM Voice (p. 825)

MM Curricular Components

The Master of Music degree requires between 30 and 50 credit hours. The total number of credits varies by major; a detailed list for each major follows. The requirements for each degree must be satisfied with coursework at Peabody, certified transfer credits, or placement examination. Performance, Conducting, and Composition students are required to remain enrolled in one-hour major lessons for four semesters of full-time study. Musicology and Music Theory Pedagogy majors are required to maintain full-time enrollment for four semesters of study.

New MM students may apply as many as six credits from a previous institution and nine credits from a previous Peabody degree subject to the regulations in Transfer Credits (p. 757).

Review Courses

Deficiencies in the areas of music theory, ear-training, musicology, keyboard skills, or English must be corrected by remedial study at the Conservatory. Review courses do not count toward fulfillment of degree requirements, and the grades earned are not calculated in the student's GPA; however, the hours are counted as part of the course load for tuition and full-time enrollment determination. Students must satisfy any review requirements in Music Theory, and/or Musicology before enrolling in other graduate-level courses in these fields.

All requirements for the Master of Music degree program must be completed within five years of the date of initial registration.

Applied Enrollments

Major Lessons

Master of Music students in performance and composition must enroll in major lessons through their last semester of the degree timeframe. Any change to studio assignment must be approved by the Associate Dean for Academic Affairs (Studio Assignments) and students must earn at least a B- in major lessons (Academic Standing).

Hearings and Recitals

The progress of each student is monitored by the department every year. Advancement and assessment are accomplished by individual lessons and departmental hearings. Every performance major must play a recital or a hearing in each year of study. Recitals are essential learning modalities of a conservatory education but are also for-credit classes. Students must achieve at least a B- for a recital in order to maintain good academic standing. A student must play a recital or hearing in each academic year to maintain good academic standing.

MM performance majors are required to play a recital as the culmination of their degree program.

Portfolios

Degree Candidates majoring in Composition and Computer Music must submit a portfolio of works approved by the major teacher to the Office of Academic Affairs by April 15 of the year in which they intend to graduate. The portfolio must contain only compositions written during the student's time of study at Peabody.

Ensembles

Master of Music students majoring in orchestral instruments must participate in large ensemble each semester of enrollment for major study as assigned. Large ensemble auditions are held during Orientation Week. Large Ensemble credits beyond those required cannot be counted as elective credit. MM students majoring in composition are required to enroll in two semesters of a choral ensemble in the first year of residence. The regulations for performing in large ensembles, which are set by the Ensemble Office, may be found at the Ensemble Office website (https://peabody.jhu.edu/academics/academic-calendar-resources/ensemble-office/).

All graduate instrumental majors in the MM program participate in one or two semesters of chamber music as required by the individual program (this may be studio accompanying for pianists).

Academic Enrollments

Breakthrough Curriculum

All MM students complete the Breakthrough Curriculum. Matriculating MM, students take PY.123.611 Building a Brand and Portfolio and PY.123.612 Pitching Your Creative Idea (GR), in order, and in their first year of study. The culmination of study is the preparation and presentation of a pitch, adjudicated by a panel of faculty and guests and will also serve as an entry in a real competition for funding and project support to implement a residency at one of Peabody's partner institutions. Students may attempt to test out of the Building a Brand and Portfolio requirement; information on testing out can be requested from the LAUNCHPad office (https://peabody.jhu.edu/life-at-peabody/career-services/).

Music Theory and Musicology

MM students are required to take between four and five graduate seminars in music theory and musicology as part of their degree program. Students may enroll in a maximum of six credits of graduate seminars each semester. Students who enroll in any music theory and musicology courses beyond the six-credit limit will be administratively withdrawn from those classes.

As an enrollment prerequisite for all graduate music theory and musicology seminars, students must pass online placement exams offered early in the summer before matriculation. Students may not enroll in a graduate music theory seminar until they have passed the online test or completed the online review class in music theory offered for a tuition charge; students may not enroll in a graduate musicology seminar until they have passed the online test or completed the online review class in musicology offered for a tuition charge. After matriculation, tests are offered at the discretion of the departments.

Students who are placed in ESL courses in their first semester are only permitted to enroll in graduate seminars in music theory or musicology after satisfactorily completing the remedial coursework into which they are placed. As such, placement in ESL may delay completion of the MM degree beyond two years.

Foundations of Music Research

MM students are strongly encouraged to take Foundations of Music Research in their first year of study. International students who test into English as a Second Language Level I (PY.250.001 English Level 1a, PY.250.002 English Level 1b) are not permitted to take PY.610.651 Foundations of Music Research until they have successfully completed their first year of English studies. Exceptions are made only in consultation with the Musicology faculty, the ESL faculty, and the Associate Dean for Academic Affairs.

Electives and Other Requirements

Only courses designated as “G” (Graduate Elective) in the master schedule of classes may be used to fulfill graduate elective requirements. Curricular Practical Training may be used to fulfill a maximum of three elective credits. Questions about the appropriateness of courses for elective credit can be directed to the Advising Office.

For some curricula, certain requirements are not offered for credit. For example, departmental hearings for performers or foreign language exams in voice and musicology do not appear on transcripts. Other requirements do appear on transcripts, but the credits are not applied in fulfillment of a degree, such as remedial coursework. In every case, students must complete all requirements to remain in good standing and complete the Master of Music degree.

Performance Curricula, Master of Music

- MM Conducting, Orchestral (p. 822)
- MM Conducting, Wind (p. 824)
- MM Guitar (p. 815)
- MM Harpsichord (p. 816)
- MM Historical Performance Instruments (p. 816)
- MM Historical Performance Voice (p. 821)
- MM Organ (p. 823)
- MM Orchestral Instruments (p. 822)
- MM Piano (p. 824)
- MM Piano: Ensemble Arts (https://e-catalogue.jhu.edu/peabody/degree-diploma-programs/piano-ensemble-arts-vocal-accompanying-master-music/)

[1] All candidates for the M.M. in voice must meet language and diction standards in French, German, Italian, and English, which will be assessed in early in their first semester of study. Students who are designated for remedial work in language and diction will be reassessed at their graduate hearing at the end of their first year and must demonstrate improvement before performing their recital.

1 All candidates for the M.M. in voice must meet language and diction standards in French, German, Italian, and English, which will be assessed in early in their first semester of study. Students who are designated for remedial work in language and diction will be reassessed at their graduate hearing at the end of their first year and must demonstrate improvement before performing their recital.

2 In order to count as a Vocal Literature elective, a course must include in-class performances of repertoire. Approved courses include but are not limited to: Singing in Russian, Russian Songs and Arias, Advanced Lieder Studies, Advanced Vocal Repertoire in French, Arioso and Recitative, Music for the Voice – 20th and 21st Centuries, and Oratorio.

Master of Arts Degree (MA)

The Master of Arts programs were developed in conjunction with members of the professional audio and acoustics communities to provide students with the knowledge and skills necessary to work at an advanced level in the field of audio and/or acoustics. The program is intended both for current audio professionals who wish to obtain a post-baccalaureate credential and individuals with a background in science, engineering, technology, and/or music who are seeking additional training in order to gain employment in the audio or acoustics industries.

Admission requires an undergraduate degree in architecture, audio technology, computer sciences, electrical engineering, mechanical engineering, physics, or recording sciences. It is preferred that applicants have completed undergraduate coursework in physics and calculus, or have taken AP or IB level physics and calculus in high school. Additional requirements are a background in music with the ability to play an instrument or sing. Students pursuing Recording Arts and Sciences must take college Music Theory or have taken AP Music Theory (or equivalent). International students must demonstrate competencies in English commensurate with expectations for Peabody's Master of Music degree program.

Program Requirements

- Acoustics (p. 828)
- Recording Arts and Sciences (p. 829)

Students choose from two majors: Acoustics or Recording Arts and Sciences. Core coursework includes Musical Acoustics, Electroacoustics, Psychoacoustics, and Architectural Acoustics. The remaining coursework in each track consists of courses specific to the major chosen by the student, in consultation with their faculty advisor in accordance with background and professional goals.

The Acoustics major is designed to prepare students to work as professionals in the fields of acoustical consulting (with a particular focus on music performance and rehearsal spaces), audiovisual systems design, and acoustical product design. The program provides a thorough grounding in acoustical fundamentals and design practices to enable graduates to begin careers in these specialized fields upon graduation.

The Recording Arts and Sciences major is designed to prepare students to work as professionals in the many specialties within the professional audio field – in particular, recording engineering, music producing, product development, and consumer audio. Alumni have found work in recording studios; film and television score mixing; video game sound design, composition, and coding; radio and television broadcast; consumer electronics; audiovisual system design; and others.

Doctor of Musical Arts (DMA)

The program leading to the degree of Doctor of Musical Arts (DMA) provides students with the highest level of professional training in the art of musical performance or the craft of musical composition. To this end, applied study in the major field is supported by extensive academic work in musicology and music theory. The Doctor of Musical Arts degree certifies that its holder is a sophisticated professional with the requisite skills and understanding to be an effective leader in their field.

Admission Requirements

Students applying for the Doctor of Musical Arts degree program present transcripts, recommendations, and an analytical or historical essay written within the previous two years before: playing a live audition, sitting for an interview, and completing examinations in music theory and musicology. The details of this process may be found at peabody.jhu.edu/admissions (http://www.peabody.jhu.edu/

admissions/). Successful applicants must matriculate into the Doctor of Musical Arts degree program in the fall semester of the calendar year in which they auditioned. The Conservatory does not defer entrance into degree programs or allow students to begin in the spring semester. Students matriculating into the Doctor of Musical Arts degree program should present evidence of a Master of Music degree or its demonstrated equivalent.

Program Requirements

DMA Curricula

- DMA Orchestral Conducting (p. 832)
- DMA Wind Conducting (p. 836)
- DMA Guitar (p. 831)
- DMA Historical Performance Instruments (p. 832)
- DMA Orchestral Instruments (p. 833)
- DMA Organ (p. 834)
- DMA Piano (p. 834)
- DMA Voice (p. 835)

The DMA Guidelines

The procedures for meeting the requirements of the DMA program are listed in the DMA Guidelines, which are published and archived by the Office of Academic Affairs. The DMA Guidelines apply to each student that matriculates in the fall semester of its publication. What follows is an adumbration of the essential requirements.

Residency

The program of study for the Doctor of Musical Arts degree normally requires an attendance of two years. Student must attend full time for at least one year (earning a minimum of 18 credits and a maximum of 36 credits for one academic year. Students in the United States on an F-1 visa must remain full-time for the duration of their studies. All requirements for the Doctor of Musical Arts degree must be completed within seven academic years from the date of initial DMA registration. Exceptions to this regulation may be granted by the Doctoral Committee under extraordinary circumstances.

Degree-in-Progress

After passing the Preliminary Oral Examination, completing all academic requirements, and performing at least two recitals—or the number of recitals prescribed by the department— DMA students achieve Degree-in-Progress (DIP) status. For the purposes of student loans and visas, Degree-in-Progress students are full-time students.

Registration Requirements

Admission to candidacy is determined in part by the results of the three, written qualifying examinations: Major Field, Music History, and Music Theory. All examinations are graded on a “pass/fail” basis. A student who fails any qualifying examinations twice must petition the Doctoral Committee for permission to take the examination a third time.

Written exams are created by the respective faculty advisor in a student’s Advisory Committee and administered by the Office of Academic Affairs. They may be taken during the following periods beginning in the second year of coursework:

- October through November
- January through March (Spring Break)
- 15 May to 15 August

Doctoral Candidacy

On completing all qualifying exams, and any remaining solo, concerto, and/or chamber music recitals (for performance majors), a DMA student is considered a Doctoral Candidate. During the period of candidacy, the student completes Final Oral Exam, the Final Document, and a lecture recital (for Performance Majors). For further details, students should refer to the DMA Guidelines (https://peabody.jhu.edu/academics/degrees-programs/doctor-of-musical-arts/dma-guidelines/).

Degree Advisory Committees

The Office of Academic Affairs oversees the work of DMA students in coordination with the major teacher, an Academic Advisory Committee, and the Doctoral Committee. Some departments assign a group of faculty to grade all recitals for performance majors, which may be considered a second advisory committee, or Major Field Committee.

- The Academic Advisory Committee consists of the major teacher, a Musicology Advisor, and a Music Theory Advisor. This committee is available to the student for consultation and advice concerning curriculum and possible dissertation or paper topics. Members of this committee also submit appropriate questions for the written qualifying examinations and sit on the oral qualifying examination committee. The members of the Academic Advisory Committee are selected by the student but appointed by the Associate Dean for Academic Affairs and must be confirmed before the student becomes a Degree-in-Progress student.
- The Major Field Advisory Committee consists of the major teacher and other faculty members from the specific department. The Major Field Advisory Committee are responsible for approving the student’s repertoire list, approving and jurying all the student’s recitals, and submitting questions for the Major Field qualifying examination. In smaller teaching units, the Major Field Advisory Committee may be the department.
- The Doctoral Committee is a standing committee of the Conservatory Faculty Government that oversees all aspects of each student’s program in coordination with the Office of Academic Affairs. The Doctoral Committee is comprised of eight faculty members Senior Associate Dean of Institute Studies and meets monthly during each academic year.

Performer's Certificate (PC)

The Performer's Certificate is designed to train students with outstanding musical ability for careers in performance without the academic component of the Bachelor of Music curriculum. Majors are available in guitar, orchestral instruments, organ, piano, and voice.

A student who has matriculated into the Performer's Certificate program may later transfer into the Bachelor of Music degree program with the approval of the Associate Dean for Academic Affairs.

Admission Requirements

The admission requirements for the Performer's Certificate are the same as those for the Bachelor of Music degree program. Students should consult the Peabody website at on the Admissions website (https://peabody.jhu.edu/audition-apply/) for complete information. Pre-screening recordings are required for some majors.

Program Requirements

The Performer's Certificate is normally a three-year course of study, with a minimum residency of two years. At least 80 semester hours of course credit are needed for the completion of requirements. Candidates must participate in ensembles throughout their period of study.

Curricula

- PC Piano (p. 840)
- PC Voice (p. 841)

Graduate Performance Diploma

The Graduate Performance Diploma (GPD) program is designed to meet the needs of highly accomplished graduate-level performers who wish to pursue a more performance-intensive goal without the academic requirements of the MM or DMA.

Admission Requirements

Students may pursue majors in orchestral instruments, guitar, historical performance instruments and voice, jazz, organ, piano, and voice.
 Students applying for the Graduate Performance Diploma degree program present transcripts, test scores, and recommendations before playing an audition. Before matriculating into the Graduate Performance Diploma program, accepted students must produce a Performer's Certificate, an undergraduate degree in music from a recognized institution, or equivalent qualifications. The details of this process may be found on the Admissions website.

Program Requirements

Residency

For students that are new to the Peabody Conservatory, the Graduate Performance Diploma requires four semesters of full-time study. Students who matriculate for this two-year GPD program are expected to complete four semesters of major lessons, two recitals, and eight credits of electives in two years.

Students who begin the GPD after a prior degree program at Peabody (the PC, BM, or MM) are expected to complete the degree in one year and will only receive scholarship for one year. Students who begin a one-year GPD will have two semesters of lessons and, if applicable, two semesters of ensemble waived. All other requirements must be completed.

In all that follows, the two-year GPD refers to students who are new to Peabody and the one-year GPD refers to students who have just completed at prior degree.

GPD students are not permitted to enroll on a part-time basis.

Major Area

Each student taking applied music must demonstrate satisfactory progress as determined by the faculty. Study in the major field must continue through the last semester of enrollment. Any change to studio assignment must be approved by the Associate Dean for Academic Affairs (Studio Assignments).

All GPD students are required to play two recitals as part of their diploma requirements. The following majors have additional options:

- Performance majors in voice may use an opera role in lieu of one of the two recitals, but only if the role has been approved by the Voice Department as being of appropriate size and scope. An approved opera role must be registered as a GPD recital through the Concert Office.
- Performance majors in percussion will play a juried performance of orchestral repertoire as the second recital.
- For all other majors, one of the recitals may be a chamber music recital with the permission of the major applied department.

Any student who does not present a graded recital in a given year will be required to perform at a graded hearing before the department faculty at the end of the spring semester. A student who does not play a recital or hearing in each year of enrollment will not be considered to be in Good Standing (Academic Standing for Graduate Students (p. 752)).

Ensembles

GPD candidates majoring in orchestral instruments must participate in the large ensembles as assigned during each semester of enrollment. Historical performance students play in Historical Performance ensembles. There is no large ensemble requirement for other Graduate Performance Diploma candidates. The regulations for performing in large ensembles, which are set by the Ensemble Office, may be found in the Procedural Regulations section of the catalogue or at the Ensemble Office website (https://peabody.jhu.edu/audition-apply/).

Related Requirements

GPD students may choose electives from Music Theory, Musicology, repertoire studies, Curricular Practical Training, professional studies, or other music courses at or above the 400 level. To enroll in graduate Music Theory and Musicology seminars, students must pass the appropriate placement exams. With the approval of the Associate Dean for Academic Affairs, undergraduate courses with special career relevance to the student may also be accepted. Only courses designated as "G" (Graduate Elective) in the master schedule of classes may be used to fulfill graduate elective requirements, with the exception of small electives which may apply to electives. On Students are limited to four credits of coursework per semester, not including lessons, recitals, and ensembles. Students who enroll in more than four credits will be administratively withdrawn from any classes above the limit. In the areas of music theory and musicology, the student must take the appropriate placement examinations and satisfy any review requirements prior to enrolling in graduate-level courses.

Artist's Diploma

The Artist Diploma is a certificate program reserved for exceptional and experienced performers, with an emphasis on repertoire designed to meet the needs of those who are preparing to embark upon professional careers.

Admission Requirements

Application Requirements

Students may pursue an Artist Diploma in performance with the following majors: Guitar, Historical Performance Instruments and Voice, Orchestral Instruments, Organ, Piano, and Voice. There is no major in Composition and a student may only pursue a major in Conducting under the special circumstance of being appointed to a Baltimore Symphony Orchestra Fellowship.

Students applying for the Artist Diploma degree program present transcripts, test scores, and recommendations before playing a live audition in February. Upon the recommendation of the department, the performer(s) will be scheduled for a second audition with a panel of outside judges on the final day of Audition Week. The details of this process may be found at on the Admissions website (https://peabody.jhu.edu/audition-apply/).

Program Requirements

Residency

The normative case is two years of full-time enrollment. Students must complete one year of continuous full-time residency and four total semesters of full-time enrollment. Scholarship is awarded for a maximum of four semesters, and the program must be completed within five years.

Students enrolled in the program are expected to be active performing members of the Peabody campus community. The Artist Diploma candidate must present four public recitals: two in each academic year in which they are enrolled in lessons. In voice, a major opera role may be considered an appropriate substitute for one or more recitals, subject to approval of the major teacher and the departments involved.

Artist Diploma candidates must complete eight credits of elective coursework. The program also allows for independent study projects in various aspects of career development as appropriate.

Extension Study

Individuals who wish to enroll in private lessons or courses on a non-degree basis may register for such study through the Peabody Extension Division, pending faculty availability and demonstration of appropriate qualifications. Students may also take coursework to be certified for teaching in Maryland Public Schools.

Undergraduate Extension Study

Individuals who wish to enroll in private lessons or courses on an undergraduate non-degree basis may register for such study through the Peabody Extension Division, pending faculty availability and demonstration of appropriate qualifications.

A student who has been dismissed from a degree or certificate program at Peabody may not enroll as an extension student for at least one full semester following dismissal. The student may apply for readmission after that semester, but Peabody is under no obligation to grant readmission. The Conservatory reserves the right to exclude any student whose academic standing or general conduct is considered unsatisfactory. Further information may be obtained from the Registrar's Office.

Graduate Extension Study

Graduate Extension study is designed for individuals who already hold an undergraduate degree or diploma. A Graduate Extension student may make their own arrangements with an applied teacher before making formal application to the Conservatory. A recorded audition is acceptable, but the performing level must be validated by the accepting teacher upon the student's arrival at Peabody before extension status will be confirmed. A Graduate Extension student may be accepted onto a teacher's schedule or into coursework on a space-available basis if the application process is complete before registration.

The student may register for applied study and/or any combination of academic coursework. In the areas of music theory and musicology, the Graduate Extension student must take the appropriate placement examinations and satisfy any review requirement prior to enrolling in graduate-level courses. Lesson, performance, and coursework credits may count toward fulfillment of subsequent graduate diploma or degree requirements, if approved by the major department. Formal application for any change in graduate program must be made with the Admissions Office and all other requirements for entrance must be met. Graduate Extension registrants are eligible to participate in ensembles by audition but generally are not considered for institutional scholarship support.

A student who has been dismissed from a degree or certificate program at Peabody may not enroll as an extension student for at least one full semester following dismissal. The student may apply for readmission after that semester, but Peabody is under no obligation to grant readmission. The Conservatory reserves the right to exclude at any student whose academic standing or general conduct is considered unsatisfactory. Further information may be obtained from the Registrar's Office.

Music Education Certification

Individuals who hold a Bachelor of Music degree from an accredited institution may take classes to be certified by the Maryland State Department of Education (MSDE) to teach in public schools.

- Certification classes are offered as extension classes. There is no enveloping program and students studying for certification are not eligible for financial aid.
- Student taking certification classes are extension students and, by definition, part-time students.#Accordingly, students taking certification classes are always billed at the part-time, per-credit rate. Special tuition rates apply.
- Certification students, as part-time students, are not eligible for an F-1 visa.
- The Music Education faculty may require additional credits beyond minimum requirements to reinforce necessary skills for intern teaching.
- Finally, students who are completing#certification#in addition to another program will be considered extension students, billed at the per-credit rate provided they have completed their lesson and ensemble requirements and played a recital.#For students in majors that do not require lessons and a recital, they may be billed at the part time rate provided they have less#thana full-time semester's worth of remaining requirements for both awards.

NITZE SCHOOL OF ADVANCED INTERNATIONAL STUDIES

About Johns Hopkins SAIS

The Johns Hopkins University's Paul H. Nitze School of Advanced International Studies (Johns Hopkins SAIS) is a premier graduate school devoted to the study of international relations. A division of The Johns Hopkins University since 1950, Johns Hopkins SAIS is a truly global institution with a permanent physical presence on three continents: North America, Europe and Asia, in Washington, D.C., Bologna, Italy, and Nanjing, China.

Mission and Vision

Defining International Relations for 75 Years

For 75 years, students have come to the Johns Hopkins University School of Advanced International Studies to build their professional networks, learn from renowned faculty, train with policy practitioners, and gain hands-on work experience.

The school was founded in 1943 by Paul H. Nitze and Christian A. Herter who sought new methods of preparing men and women to cope with the international responsibilities that would be thrust upon the United States following the end of World War II. Scholars and professionals were assembled to teach an academic curriculum emphasizing international relations theory, international economics, and foreign languages. That education, combined with skills training and experiential learning, would prepare students for impact-oriented work in policy and other sectors. In 1955, a campus in Bologna, Italy was established, and in 1986 the school initiated one of the first Western university programs in the People's Republic of China in Nanjing.

Today, guided by the vision of its founders, the school's cadre of expert faculty prepares students for exciting careers across sectors and around the world. With a global alumni network of more than 20,000 graduates, you can be sure to find our alumni taking action in dynamic roles. From private-sector executives to entrepreneurs, leaders of nongovernmental organizations to ambassadors, and international media correspondents to energy consultants, alumni of the school are known for being innovative thinkers and problem-solvers with the economic and policy expertise to address today's most pressing challenges.

Accreditation

Accreditation

The Johns Hopkins University is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284-5000. Middle States is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation. Middle States has continuously accredited Johns Hopkins since 1921 and most recently reaffirmed the university's accreditation in 2014 following a decennial self-study and reaccreditation process. In addition to the university's institutional accreditation by Middle States, certain Johns Hopkins schools and/or programs are accredited by specialized accrediting agencies recognized by the U.S. Secretary of Education and/or the Council for Higher Education Accreditation.

State Authorization

The Johns Hopkins University is authorized by the Maryland Higher Education Commission to operate as an institution of higher education in Maryland, offering educational programs beyond secondary education, including programs leading to a degree or certificate. MHEC is responsible for establishing and enforcing policies regarding the integrity, review, and approval of proposals for new and substantively modified academic programs offered by Maryland's public and private colleges and universities.

Academic Policies and Resources

The Red Book

The Johns Hopkins SAIS Student and Academic Handbook (https://sais.jhu.edu/current-students/student-and-academic-handbook/), also known as "The Red Book," is a compilation of policies, regulations and procedures for students. Its purpose is two-fold: to communicate the standards of The Johns Hopkins University that support and guide life at Johns Hopkins SAIS as part of the greater JHU community and to describe the academic policies and procedures that form a framework for conducting the school's teaching mission. Of particular importance is the Honor Code, which sets out the behavioral standards expected of all Johns Hopkins SAIS students.

The information contained in this handbook is not available in any other school publication, and students are responsible for familiarizing themselves with its contents. Questions related to the manual should be directed to Academic Affairs (saisadvising@jhu.edu).

The policies and procedures detailed in The Red Book are subject to revision at any time, and changes are communicated to students only through their assigned JHU e-mail addresses. It is imperative that you activate and monitor this account so as not to miss these and other important announcements and messages throughout the year.

Degrees and Certificates

Doctoral Degrees

Master Degrees

Diploma and Certificate Programs

International Studies, Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) program is for individuals who have already earned a Master's degree (or have other substantial research experience) and seek to further their expertise as scholars and practitioners of international relations. PhD students work closely with faculty advisors to develop an academic plan that best supports their dissertation research. Throughout the program students develop a comprehensive understanding of qualitative and quantitative analytical skills, international relations, economics, and regional studies.

PhD students begin their studies in Washington, DC. During the dissertation stage, students can explore opportunities to study at SAIS Europe, the Hopkins Nanjing Center, or at other prominent global institutions.

Johns Hopkins SAIS graduates are sought after by employers in the public, private and nonprofit sectors. Their knowledge of economics, analytical abilities, regional expertise, diplomatic skills, international experience, language proficiency, as well as capacity to apply theory to real-world problems, give students a distinct professional advantage.

PhD Fields of Study

PhD students will have one of the following concentrations (either a policy or region):

International Policy Areas

- American Foreign Policy
- Energy, Resources and Environment
- Global Theory and History
- International Development
- International Relations
- International Political Economy
- Strategic Studies

Regions of the World

- African Studies
- Canadian Studies
- China Studies
- European and Eurasian Studies
- Japan Studies
- Korea Studies
- Latin American Studies
- Middle East Studies
- South Asia Studies
- Southeast Asia Studies

Faculty Advisors

Our faculty experts and scholars are internationally recognized for their scholarship, experience, and quality of teaching. They are award-winning scholars, authors, diplomats, thinkers, and senior ranking officials who are authorities on international economics and international relations and who have expertise in contemporary issues around the world.

All PhD students have a tenured, faculty advisor. The advisor has primary responsibility for coordinating the candidate's research agenda. Another senior member of the dissertation committee or "second reader" monitors the student's research throughout the dissertation project. Both the faculty advisor and the second reader are to be substantively involved in the student's preparation of the prospectus and the dissertation.

While the student will work actively with the first and second readers to prepare a dissertation prospectus, the student should also consult with the three supporting committee members throughout the doctoral research.

Prospective and current PhD students are encouraged to use the Faculty Directory to identify individuals to approach about involvement in their research and dissertation.

Degree Requirements

Campus: Washington, DC

Duration: Five to nine academic years (average 5.5), Full-time

Course delivery: In-person

PhD Program Structure

The PhD is divided into pre-dissertation (resident) and dissertation (non-resident) stages.

In order to earn the degree, students must fulfill all requirements and earn a cumulative GPA of 3.33 or above.

Pre-dissertation, Resident Stage

Pre-dissertation status lasts up to two years for students who have completed the Master of Arts of International Relations (MAIR) degree at Johns Hopkins SAIS and up to three years for those without an MAIR degree from the school. Students complete coursework, comprehensive exams, and defend the dissertation prospectus.

Pre-dissertation students are on-campus full-time taking courses, attending seminars, and/or approved independent study. During this time students are required to take *Research Methodology, and Statistics* and *Econometrics* in addition to coursework agreed to by a faculty advisory. PhD students must successfully pass *Theories and Methods of Qualitative Political Research* and *Research Design and Causal Inference,* plus two other research training courses approved by their faculty advisor. Prerequisites for *Research Design and Causal Inference* include *Statistics for Data Analysis* (waiver exam available) and *Econometrics.*

Within six months of passing the third comprehensive exam, students must prepare a written prospectus of the dissertation and present it in a formal defense that is open to members of the university faculty.

Dissertation, Non-Resident Stage

Students advance to the dissertation stage after successfully defending a prospectus and are not required to be on campus, however are still considered full-time status. Students should defend the dissertation within five years of the prospectus defense.

Comprehensive Exams

PhD students must select three examination areas from among the following:

- American Foreign Policy
- Comparative Politics
- Conflict Management
- Energy, Resources & Environment
- International Development
- International Economics[1]
- International Law
- International Political Economy/ Comparative Political Economy
- International Relations Theory
- Strategic Studies
- Regional Studies:
  - Africa Studies,
  - Asia Studies (China, Korea, Japan, South Asia, Southeast Asia),
  - Canadian Studies,
  - European and Eurasian Studies,
  - Latin American Studies,
  - Middle East Studies

Comprehensive exams from other divisions of Johns Hopkins University may be considered on a case by case basis.

[1] International Economics is not an exam. Consult with the PhD program for additional information.

PhD Dissertation

At the time of application, students will propose a research topic they would like to pursue for their doctoral dissertation. During their course of study, students will hone this topic in consultation with a faculty advisor and defend a prospectus that outlines the dissertation's research questions, mission, and methodology.

The PhD dissertation must be an original and analytical treatment of a subject of conceptual importance that involves the creation of new knowledge and not simply the master of existing knowledge. To conduct the research for, write, and defend the dissertation, a candidate will have a period of five years from the defense of the prospectus. It is understood that in fields with exceptionally difficult languages the process may take longer.

International Affairs, Doctor of

The Doctor of International Affairs (DIA) is designed for experienced professionals with at least five years of work experience who seek to further their expertise through an advanced practitioner's degree involving serious and novel research.

Under the guidance of school experts and scholars, DIA candidates take coursework and conduct research on the issues that most align with their professional interests. The program is delivered on an accelerated timeline and culminates with students defending their doctoral thesis.

Advanced standing is available for students who possess a relevant master's degree allowing the program to be completed in as little as two years – with one year of full-time study and a subsequent part-time, non-resident year focused exclusively on completing their doctoral thesis. Part-time students in the track complete course requirements over two years, followed by the thesis year, totaling three years overall.

Another three-year track is available for those who have not completed a prior, relevant master's degree. Students complete two full-time years of coursework in residence and the final year of this track is also conducted on a part-time, non-resident basis focused exclusively on completing the doctoral thesis.

Degree Requirements

Campus: Washington, DC and Bologna, Italy

Credits: 48-80

Duration: Two to three academic years, with Full- and Part-Time options

Course delivery: In-person

Curriculum

The DIA curriculum emphasizes learning, research, and evaluation. Students gain a deep understanding of foundational theory and learn to apply existing practice and knowledge toward solving real-world problems in fields such as:

- conflict resolution and negotiation
- climate change, energy access, global environmental policy
- sustainable development, foreign aid and global poverty
- human rights and humanitarian affairs, democratization, nation-building
- international political economy, economic development, emerging markets
- American foreign policy, grand strategy, history and statecraft
- defense and security, cybersecurity, and terrorism/ counterterrorism
- regions of the world, and more

During their course of study, students will work individually with a faculty advisor who will guide them through the doctoral thesis process. The final year is completed on a part-time, non-resident basis allowing students to conduct research, write, and defend their thesis.

In order to earn the degree, students must fulfill all requirements and earn a cumulative GPA of 3.33 or above.

Doctoral Degrees: DIA vs. PhD

The DIA is a practitioners' degree where students conduct applied research culminating in a doctoral thesis within their area of professional expertise.

It is different from a traditional PhD, which requires comprehensive exams and is usually thought of as producing an original body of knowledge in preparation for an academic career.

Faculty Advisors

Since the school's inception in 1943, the school's faculty members have been internationally recognized for their scholarship, experience, and quality of teaching. They are award-winning scholars, authors, diplomats, thinkers, and senior-ranking officials who are authorities on international economics and international relations and who have expertise in contemporary issues around the world. DIA advisors may include any Johns Hopkins SAIS faculty scholars or expert practitioners who hold PhD degrees.

Tracks

48 Credits:

Students who possess a relevant master's degree in fields such as political science, public policy, international relations, security studies or other related fields, will receive advanced standing, reducing overall credit requirements to 48. This can be completed in either two (full-time) or three (part-time) years.

Students in the 48-credit track complete 32 credits worth of coursework (usually meaning eight courses) and 16 credits of thesis in the final year. Aside from two DIA research methods courses (8 credits), all other courses are elective.

The final year is completed part-time and does not require residency in Washington, DC. During this year, students complete their research and write a doctoral thesis under the guidance of their faculty advisor.

80 Credits:

Students who do not possess a prior relevant master's degree must enroll in the three-year track.

The first two years follow the path of the school's two-year Master of Arts in International Relations (p. 855) (MAIR) degree. DIA students must take two DIA research methods courses in their second year. The final year of the DIA is completed part-time and does not require residency in Washington, DC. During this year, students complete their research and write a doctoral thesis under the guidance of their faculty advisor.

Students pursuing the 80-credit three-year track can begin their studies at the school's main campus in Washington, DC or at SAIS Europe in Bologna, Italy. Their second year must be completed in Washington, DC.

Students pursuing the 80-credit three-year track will also be conferred the Master of Arts in International Relations (MAIR) degree upon successful completion of the program.

European Public Policy, Master of Arts

The Master of Arts in European Public Policy (MEPP) is a one-year, cohort-based degree program that will prepare students to work with, or for, the institutions of the European Union. This degree program combines rigorous, multi-disciplinary academic and policy-relevant instruction on issues related to EU policies and activities, with hands-on practical training in the skills and techniques required to succeed in the broad EU policy community.

The MEPP builds on the school's strengths in multi-disciplinary analysis by introducing students to a broad array of concepts and tools from history, economics, international relations, law, and political science.

Degree Requirements

Campus: Bologna, Italy

Credits: 42

Duration: One year, Full-time

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Curriculum

During the fall term, students complete 16 credits combining specialized EU studies courses with electives chosen from an array of courses offered at SAIS Europe. Upon completion of exams and other requirements for the fall semester courses in January, MEPP students participate (with other SAIS Europe students) in the SAIS Europe career trek to Brussels which focuses on EU institutions, think tanks and consulting companies specialized in advocacy and public policy (non-credit).

In the spring semester, students take relevant EU courses, including a course on 'Scenarios for the future of Europe' which culminates in a simulation exercise. In addition, students choose one or more courses related to EU affairs, and additional courses from the broad array of courses offered at SAIS Europe in the spring.

Term	Courses	Duration
Summer	(4 credits)	
	Microeconomics Risk and International Trade	4 weeks
	Professional Writing Skills	2 weeks
Fall	(16 credits)	13 weeks
	History of European Integration	
	European Economic Integration	
	Law and Institutions of the European Union	
	Elective	
Intersession	Visit to European institutions with dedicated career contacts	1 week
Spring	(16 credits)	13 weeks
	Scenarios for the Future of Europe, with Simulated Negotations	

	At least one of: European Foreign Policy, European Financial Markets, or Europe and the Mediterranean Middle East	
	Elective(s), if applicable	
Summer	(6 credits)	8 weeks
	EU Simulation Exercise	
	Internship/Capstone Report or Original Research Project consisting of approximately 8,000 words	

Capstone

Students have the option to choose between an eight-week, focused summer internship or an original 8,000-word research paper under the supervision of a Johns Hopkins SAIS faculty member. The capstone must be completed during the second summer term.

Sample Electives

Students can select any elective offered at the SAIS Europe campus including the following courses[1]:

- Basic Issues of Sub-Saharan Africa's Political Development
- Foreign Policy Analysis
- Policies and Politics of the American Emergency State
- Econometrics
- Economic Survey of Latin America: Global Players or Market Strayers
- Financial Derivatives and Risk Management
- Renewable Energy: Markets, Technologies & Projects
- The Twin Pillars of the Gulf: Iran, Saudi Arabia & Their Gulf Neighbors

[1] Courses may vary each academic year.

Global Policy, Master of Arts

This 16-month interdisciplinary program is designed for working professionals with five or more years of experience who wish to continue full-time employment while pursuing their degree. Under the guidance of world-renowned scholars, diplomats and policy makers, students move through the program as a cohort and develop strong professional connections with accomplished and diverse colleagues. This degree program is delivered in Washington DC on an alternating weekend (Friday/Saturday) schedule.

During the 16-month program, students complete a series of core and elective courses on campus, in addition to four application seminars and four multi-day residencies. This format delivers a broad overview of global issues, customized to suit the academic interests of students.

Degree Requirements

Campus: Washington, DC

Credits: 40

Duration: 16 Months

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Curriculum

During the 16-month program, students complete a series of core and elective courses on campus. This format delivers a broad overview of global issues, customized to suit the academic interests of students. It is convenient for working professionals as classes typically meet every other week on Fridays and Saturdays.

The program begins with an optional non-credit foundation course: *Introduction to International Economics*. This is a self-paced online course offered as a resource to admitted students who wish to gain or strengthen foundational concepts in preparation for future coursework. Mastery of the course material is not required or expected—it is simply offered as a supplemental resource.
The MAGP is conferred upon successfully completing 40 credit hours including thirteen (13) courses plus four residencies (three local and one abroad) and four application seminars (running through the first four modules of the program). The 40 credits are divided as follows:

- Cohort Courses (8 courses worth 16 credits; courses are 2 credits each)
- Elective Courses (4 courses worth 8 credits; courses are 2 credits each)
- Application Seminars (4 courses worth 4 credits; courses are 1 credit each)
- Local Residencies (3 courses worth 6 credits; courses are 2 credits each)
- Leading Change in a Global Environment (Capstone/Global Residency Prep) (1 course worth 4 credits)
- Global Residency (1 course worth 2 credits)

Regular courses are graded using the standard grading scale; application seminars and residencies are graded pass/fail.

Term	Courses	Duration
Year 1		
Optional Online Preparatory Course	Introduction to International Economics (0 credits)	Self-Paced
Residency 1	International Policy Residency (2 credits)	August/September (3 days)

Application Seminars & Residencies

Experiential learning is an important component of the MAGP. In addition to academic courses, students participate in application seminars and residencies designed to build policymaking, negotiation, and leadership skills.

Application Seminars are designed to expand classroom learning and provide students with the necessary tools to more effectively embark on the capstone research project in Module 5. The Application Seminars are fully online, asynchronous one-credit courses in the first four academic terms (Fall-Module 1, Winter-Module 2, Spring-Module 3, and Summer-Module 4), as follows:

- Fall: Principles of International Politics
- Winter: Principles of International Political Economy
- Spring: Qualitative Research Methods
- Summer: Capstone Research Design

Residencies are immersive, multi-day exercises that take students outside the classroom and challenge them to apply lessons learned from their coursework. Three of the residencies take place locally (in or driving distance from Washington, DC). For the fourth, students travel abroad.

The four residencies are designed as follows:

- **International Policy** – With instruction from former and current policy makers, students work in teams to research, write and brief policy memos.
- **Policy Simulation** – Students enhance their understanding of international bargaining and negotiating as they take on the role of international leaders and policymakers in a time of crisis.
- **Policy Leadership** – Students participate in a leadership exercise and examine the many challenges of decision-making.
- **Global Policy** – During the final module of the program, students research a policy issue in a target country, conduct one week of intensive field research overseas, and conclude the program by presenting their report and recommendations to policy experts.

Global Risk, Master of Arts

Whether for private companies or public policy design, effective risk analysis requires expertise in the critical factors now driving global change, including technology, climate, politics, regulatory uncertainty, migration, pandemics, and extremism.

Based at the SAIS Europe campus in Bologna, Italy, students in the Master of Arts in Global Risk (MAGR) program develop sophisticated risk management and analysis skills through a comprehensive and interdisciplinary approach. The 13-month, full-time, cohort-based MAGR combines intellectual tools from economics, finance, political science, history, and international relations to create qualified professionals who understand the drivers of instability that characterizes the past decade in world affairs.

The MAGR degree provides students with the skills, concepts, and analytical techniques required to understand and manage global risk factors in public policy and private-sector decision-making. Graduates are currently employed in the private sector in finance, manufacturing, energy, and consulting roles, and working for multilateral and governments.

Degree Requirements

Campus: Bologna, Italy

Credits: 50

Duration: 13 months, Full-time

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Curriculum

The MAGR builds on the school's strengths in multi-disciplinary analysis by introducing students to a broad array of concepts and tools from finance, social sciences and international relations.

Renowned for their interdisciplinary scholarship and innovative work in the field of risk, Johns Hopkins SAIS faculty teach thematic courses to complement the program's more traditional training in quantitative methods.

Term	Courses	Duration
Summer		4 weeks
	Microeconomic Risk and International Trade	
	Introduction to Statistics	
	Math Review for Risk Assessment	
Fall		13 weeks
	Instability and Political Change in Consolidated Democracies	
	Macroeconomic Risk and International Finance	
	Fundamentals of Corporate Finance	
	Risk in Economics and Politics	
	Elective	
Spring		13 weeks
	Strategic Foresight for Political Risk Analysis: Working with Scenarios	
	Quantitative Methods for Risk Assessment	
	Elective	
	Elective	
Capstone		8-12 weeks
	Focused summer internship or an original 10,000-word research paper	

The first summer term begins with an intensive six-week program, with the first two weeks being offered remotely and the last four weeks held on campus in the classrooms. Courses include Microeconomic Risk and International Trade, Introduction to Statistics and a Math Review for Risk Assessment.

During the fall term, students further develop their understanding of economics and begin to also focus on issues in risk related to political and economic-related risk. They explore the methodological problems associated with the analysis of risk and uncertainty and the different approaches to managing risk. They examine how established democratic societies can rapidly become politically unstable and begin to develop quantitative approaches to risk assessment. Students also take a two-credit course in corporate finance which examines the fundamentals of asset evaluation and investment analysis. In addition, they select an elective course giving them the opportunity to study an area of specific interest to them and also engage with student in other degree programs at SAIS Europe.

The spring semester provides the opportunity for students to develop the main tools for geopolitical risk analysis through scenario planning. Moreover, candidates deepen their study of the principal sources of risk at the national and international levels. Students are also introduced to the main techniques for quantitative risk analysis employed in the financial industry. In addition, students take two additional elective courses chosen from the broad array offered in the Spring at SAIS Europe.

Capstone

In the second summer term, students work on their capstone project (off-campus). They may choose between an 8-12 week, focused summer internship or an original 10,000-word research paper under the supervision of a Johns Hopkins SAIS faculty member. The capstone must be completed during their second summer term.

Electives

Students in the MA in Global Risk degree program can select elective courses from among the numerous courses offered at SAIS Europe annually, where courses are available on such topics as European Integration, EU Foreign Policy, Foreign Policy Analysis, Economic Development in Latin America, Europe and the Middle East, Renewable Energy, Energy and Climate Change, Constitutional Development, Political Leadership in the Middle East, Asian Economic Development, East Asian Security, and many more.

Global Risk, Master of Arts (Online)

The MA in Global Risk (online) program at the Johns Hopkins University School of Advanced International Studies (SAIS) prepares students to understand risk models and decision-making frameworks, and then take their insights a step further. By combining both the qualitative and quantitative tools of risk management with critical thinking, regional knowledge and research skills needed for more comprehensive risk analysis and mitigation, Johns Hopkins MA in Global Risk graduates are uniquely positioned to succeed in today’s global environment.

Degree Requirements

International Affairs, Master of Arts

This two-year degree program is based at SAIS Europe. The MAIA program provides students with the option to work with faculty advisors to develop and produce an original thesis. Alternatively, students can base their program entirely on coursework, provided they complete at least one course which entails a major research project. MAIA students can pursue both years of the program at SAIS Europe in Bologna, Italy, or they can begin their studies at one of the established cooperative degree partners.

Students are taught under the American system of graduate education and can select courses based on their academic interests.

The close-knit international academic environment of SAIS Europe fosters a sense of community and collaboration and enables students to learn to communicate across borders and cultures.

Cooperative Degree Partners

SAIS Europe offers cooperative two-year degree programs with other leading universities. Students may begin their course of study at either institution, earning a diploma or master's degree from both. Students must apply and be accepted at both institutions.

Students entering SAIS Europe from cooperative degree programs receive advanced standing for courses taken at the partner program (usually 60 ECTS) during the first year. Cooperative degree candidates must then fulfill 32 US graduate credits through a combination of coursework and/or a thesis, in addition to the program's requirements in economics and non-native language proficiency.

As of June 2022, SAIS Europe manages partner programs with the following schools:

Diplomatic Academy of Vienna, Austria

Students who begin their studies in Vienna can apply to spend a second year of study in Bologna at SAIS Europe. Upon successful completion of the relevant requirements, they earn the MAIA from Johns Hopkins SAIS Europe. Those who begin at SAIS Europe can spend a second year of study at the Diplomatic Academy. Upon successful completion of their year at SAIS Europe and the relevant requirements, they can earn the one-year Diploma. At the end of the second year at the DA in Vienna, they can earn a Master of Advanced International Studies (MAIS) from the Diplomatic Academy.

Hopkins Nanjing Center (HNC) and SAIS Europe

This two-year program allows students to complete a Certificate in Chinese and American Studies at the Hopkins-Nanjing Center (HNC) (p. 859), as well as a Master of Arts in International Affairs (MAIA) at SAIS Europe. Students spend one year (fall/spring) at each campus, and may begin their studies at either location. Students apply separately to both programs.

Institut d'Études Politiques de Lille (Sciences Po, Lille, France)

Students pursuing a first year of study for the Master's cycle at Lille can apply to SAIS Europe in Bologna for a second year of study. Upon successful completion of the second year at SAIS Europe and all of the degree requirements of Sciences Po and SAIS Europe, students can earn both a Master's degree from Sciences Po and Master of Arts in International Affairs (MAIA) from Johns Hopkins SAIS. Students who begin at SAIS Europe can earn the Diploma in International Studies and then go on to pursue a Master's at Sciences Po Lille.

McGill's Max Bell School of Public Policy

Students can begin their studies at either SAIS Europe or at McGill's Max Bell School of Public Policy and after completing all the degree requirements, they receive both the MAIA degree from Johns Hopkins SAIS and Master of Public Policy from McGill.

SOAS University of London

Students begin their studies at either SAIS Europe or at SOAS University of London in one of the pre-approved Master of Science programs and after completing the relevant degree requirements you will receive both the MAIA degree from Johns Hopkins SAIS and a Master of Science from SOAS University of London.

(Student from SOAS much be in one of the pre-approved Master of Science (MSc)* programs)

Tel Aviv University (TAU)

Approved degree programs at TAU are Conflict Resolution and Mediation, Cyber Politics and Government, Developing Countries, and Security and Diplomacy.

University of Leiden, The Netherlands

Students pursuing the one-year Master of Arts in International Relations at the University of Leiden can apply to SAIS Europe for a second year of study. Upon successful completion of your second year at SAIS Europe, they can earn both the MA from Leiden and the MAIA from SAIS Europe. Those who begin at SAIS Europe may earn the Diploma in International Studies and then go on to pursue a Master of Arts in International Relations at the University of Leiden.

University of Bologna, Italy

SAIS Europe offers four, two-year cooperative degree programs with the University of Bologna at campuses in Bologna, Forlì and Rimini:

Department of Political Science, Bologna and Forlì. Students who begin the program at the University of Bologna and complete a second year at SAIS Europe can earn both a Laurea Magistrale from the University of Bologna and an MAIA from Johns Hopkins SAIS. Those who complete the first year of study at SAIS Europe can earn a graduate Diploma in International Studies from SAIS Europe and then pursue either the Laurea Magistrale at the University of Bologna.

Resource Economics and Sustainable Development of the School of Economics, Management and Statistics, Rimini.

Students who begin their studies at the University of Bologna, Rimini and complete the second year at SAIS Europe earn both a Laurea Magistrale in Economics and Market Policy and a MAIA from Johns Hopkins SAIS. Vice versa, those who complete the first year of study at SAIS Europe can earn the Diploma and then pursue the Laurea Magistrale in Economics and Market Policy at the University of Bologna, Rimini.

School of Economics, Management and Statistics, Bologna. Those who begin the program at the University of Bologna, Department of Economics, and complete the second year at SAIS Europe can earn both a Laurea Magistrale in Economics and a MAIA from Johns Hopkins SAIS. Students who begin with a first year of study at SAIS Europe and second year at the University of Bologna you will earn both the MAIA degree from Johns Hopkins SAIS Europe and the Laurea Magistrale in Economics from the University of Bologna.

Degree Requirements

Campus: Bologna, Italy

Credits: 64

Duration: Two academic years, Full-time

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Students who spend both years at SAIS Europe may either complete 14 courses (56 credits) and write a thesis of approximately 15,000-20,000 words (8 credits), or complete 16 courses (64 credits), one of which must entail a substantial research project. Approval for the thesis track is conditional on the thesis proposal by the first reader. Students who only spend one year at SAIS Europe as part of a cooperative program complete six courses (24 credits) and a thesis (8 credits) or eight courses (32 credits). MAIA students select courses from the broad array offered each year at SAIS Europe. The program allows students the flexibility to pursue their specific academic interests under the guidance of a faculty advisor.

International Economics

All MAIA candidates must successfully complete the following courses:

- International Economics I or Essentials of Economics I and
- International Economics II or Essentials of Economics II

The Economics I track covers topics in Microeconomics and International Trade Theory and the Economics II track covers topics in Macroeconomics and International Finance. The Essentials courses are more conceptual in nature and require only basic math skills.

Thesis Option

Students who wish to write a thesis must apply in fall of their second year. The application must be approved by a committee, and the thesis proposal must be accepted by the proposed thesis supervisor.

International Economics and Finance, Master of Arts

This challenging 11-month, full-time master's degree program is recognized as a STEM degree, and is offered at the Washington, DC campus. The Master of Arts in International Economics and Finance (MIEF) positions early- to mid-career professionals to excel in rigorous economic and financial analysis roles. The curriculum prepares students to understand advanced economic theories, master professional quantitative economics and econometrics skills, and assess a wide range of international economic and financial scenarios. Students in this cohort-based program take courses together that increase in complexity throughout the year.

Economics knowledge, analytical abilities and the capacity to apply economic analysis to real-world problems give our students a distinct professional advantage. Whether you are interested in pursuing a career in international finance, public policy, economic development, or research, the MIEF program provides students with a firm grasp of the theory and tools of international economics and finance.

Students in the MIEF program are encouraged to work with career counselors in the Office of Global Careers and faculty in the International Economics department to explore career options, attend career treks, build professional networks, and improve professional skills.

Degree Requirements

Campus: Washington, DC

Credits: 56

Duration: 11 months, Full-time

Course delivery: In-person

Curriculum

The MIEF degree is conferred upon successfully completing fourteen courses totaling 56 credit hours. In designing your academic plan, you are required to take the core MIEF courses, but you also choose a combination of international economics electives.

The program requires fourteen core courses, including three quantitative methods courses, five economics electives, skills workshops and the capstone course. Students are required to have a minimum 2.67 cumulative GPA to graduate.

Coursework begins with a six-week summer term starting in mid-July, and follows the school's regular fall and spring semesters with the addition of a January intersession. The capstone course begins in the spring semester and is competed in the summer.

Intersession Skills Workshops

Students take two intersession skills workshops to expand their professional skills and knowledge related to careers in international economics. Past workshops have covered working with economic and statistical analysis tools such as EViews, MATLAB, PcGive, R, and Stata, as well as, address topics related to working in strategic consulting, investment banking, and business strategy roles.

Capstone Course

Students apply the knowledge, skills and tools they have learned in the MIEF program to address an international economics issue impacting the public, private or nonprofit sector. Teams present their findings in a detailed presentation to fellow classmates, faculty and outside professionals in mid-June. Examples of topics include current account sustainability, exchange rate exposure, investment case studies, studies on financial markets and growth and debt sustainability studies.

International Relations, Master of Arts

The majority of students at Johns Hopkins SAIS are enrolled in the two-year, full-time Master of Arts in International Relations (MAIR) degree. The program's interdisciplinary coursework emphasizes international economics, policy and regional studies, international relations, and languages. Students can pursue this degree by completing coursework at the Hopkins-Nanjing Center, SAIS Europe, and/or Washington, DC.

Our graduates are in great demand by employers in the public, private and nonprofit sectors. Economics knowledge, analytical abilities, regional expertise, diplomatic skills, language proficiency and the capacity to apply theory to real-world problems give students a distinct professional advantage.

Degree Requirements

Campus: Washington, DC and Bologna, Italy

Credits: 64

Duration: Two academic years, Full-Time

Course delivery: In-person

In order to earn the degree, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above. Students are required to spend a minimum of 3 fall/spring semesters in full-time status (12+ credits). Students must spend at least one full-time semester of study enrolled at the Washington, DC campus.

Core Curriculum (24 credits)

Courses used toward the Core Curriculum may not be double-counted toward any other degree requirement.

World Order and Disorder (4 credits)

Students must complete one of the following courses:

- Theories of International Relations[1]
- Evolution of the International System[1]

Leadership, Ethics, and Decision-making in International Relations (4 credits)

Students must complete one of the following courses:

- American Foreign Policy Since World War II[1]
- Comparative Politics[1]
- Leadership, Ethics, and Decision-making

[1] Students cannot use a non-credit Core Exam to satisfy this requirement and must enroll in the course for credit.

International Economics (8 credits)

Students must complete:

- International Economics I or Essentials of International Economics I
- International Economics II or Essentials of International Economics II

If a student is waived from International Economics I and/or II, the student must take a replacement International Economics and Finance course(s) to fulfill this requirement. A replacement International Economics and Finance course may not be double-counted toward the International Economics and Finance Functional Focus area or any other requirement.

A student may only be waived by passing a waiver exam or having completed the equivalent course as an undergraduate at Johns Hopkins University.

Data Analytics (0-4 credits)

Students must complete:

- Statistical Methods for Data Analytics

Students who complete the non-credit version of this course in Pre-Term have fulfilled this requirement. Students who pass a waiver exam in Statistics must take a second approved Research Methods course.

Research Methods (4-8 credits)
Students must complete one approved Research Methods courses. Students who are waived from Data Analytics must take two Research Methods courses. Sample courses include:

- Applied Econometrics
- Econometrics
- Ethnographic Research Methods
- Macro Econometrics
- Methods in Comparative-International Research
- Practical Research Methods
- Quantitative Research Methods
- Research Design and Causal Inference
- Risk in International Politics and Economics
- Theories & Methods of Qualitative Political Research

Courses offering vary each academic year and are subject to change.

Interdisciplinary Program of Study (40 credits)
Beyond the Core Curriculum, students complete a self-designed interdisciplinary program of study. This must include at least 12 credits from courses within a specific Functional Focus Area and at least 12 credits from courses within a specific Regional Focus Area. Cross-listed courses may only be used toward one focus area. To fulfill both focus area requirements, students must complete at least 6 distinct courses (24 credits).

Functional Focus Areas (12 credits)
- Development, Climate, and Sustainability
- International Economics and Finance[2]
- Security, Strategy, and Statecraft
- States, Markets, and Institutions
- Technology and Culture

Regional Focus Areas (12 credits)
- Africa
- The Americas
- Asia
- China
- Europe and Eurasia
- The Middle East
- United States

Capstone
Capstones may be associated with a for-credit course or a non-credit activity and may not be completed in the student's first year of study. Students must complete one of the options below:

- **For-Credit Course Options (4 credits)**
  - Practicum Course
  - Project Course
  - Study Trip Course
  - Research Seminar Course
- **Non-Credit Options (0 credits)**
  - Internship Research Report
  - Leadership Research Report
  - Expanded Research Paper (affiliated with current course)
  - Expanded Research Paper (not affiliated with current course)

Students may count a for-credit capstone course toward functional or regional focus area requirements if applicable.

Language Proficiency

Students must demonstrate proficiency in a non-native language by passing a proficiency exam. Students must pass all required components of the exam (reading, speaking, listening and, in some cases, writing) to meet the requirement. Students may enroll in non-credit language courses taught at SAIS each semester to help reach the proficiency level.

Non-native English speakers must also fulfill the Non-Native English Speaker requirement by reaching a minimal level of English aptitude via an in-house diagnostic exam or by passing SAIS English language courses. Fulfilling the Non-Native English Speaker requirement does not fulfill the Language Proficiency requirement, which requires greater aptitude.

Professional Development Skills
Students must complete two non-credit professional skills courses. Professional skills courses usually require 4 to 8 hours over two to three sessions. Sample courses include:

- Policy Writing
- Public Square: An Advanced Course in Reading, Writing and Publishing
- Public Speaking: Defining, Developing and Presenting
- Preparing and Delivering a Briefing
- Data Tools and Analysis
- Advanced Excel
- Introduction and Advanced Geographic Information Systems
- Introduction and Advanced Python, R, STATA and Tableau
- Data Analytics for Policy Analysts
- Leadership Lessons: An International Business Career Perspective
- International Negotiation
- Introduction to Financial Intelligence
- Corporate Valuation
- Monitoring and Evaluating for International Development
- Political Risk Analysis

Course offerings vary by semester and are subject to change.

International Studies, Master of Arts

Offered at the Hopkins-Nanjing Center (HNC), this two-year program is the only master's degree fully accredited in both China and the United States.

Students complete coursework and a thesis in Chinese, culminating in a degree jointly awarded by Johns Hopkins SAIS and Nanjing University. Advanced proficiency in Mandarin is required prior to beginning study.

Alumni of the Hopkins-Nanjing Center have played key roles in government, business, journalism, NGOs, and academia. As graduates of the only truly joint target-language US-China graduate school of its kind, HNC alumni are uniquely poised to understand and manage diverse facets of US-China commercial, academic, economic, and political relations.

Degree Requirements

Campus: Nanjing, China

Credits: 64

Duration: Two academic years, Full-Time

Course delivery: In-person

Curriculum and Concentrations

Students in the MAIS program elect to concentrate in one of the following concentration areas:

- Chinese Studies
- Comparative and International Law
- Energy, Resources and Environment
- International Economics
- International Politics

Degree Program Requirements

During their two years (four semesters) of study, MAIS students must complete 64 credits of coursework for the degree. At least 32 credits (excluding MAIS Tutorial and MAIS Thesis Preparation courses) must be taken in Chinese. 24 credits must count towards their area of concentration.

In addition to the courses required for their concentration, students must pass 20 credits in at least two concentrations outside the specific concentration area. All MAIS students must take at least three Area Studies (Chinese and American Studies) courses in order to fulfill the requirement for the minor. Many courses are cross-listed between concentrations and may count for multiple requirements.

MAIS Tutorial - This course is designed to provide MAIS students with practical guidance in planning and carrying out their two-year course of study and helps students consider how their own concentration might be linked to larger issues in Sino-international relations.

MAIS Thesis Preparation - This course provides a forum for discussing progress on thesis work, interacting with visiting scholars and faculty, and measuring progress of their theses.

International Public Policy, Master of

The Master of International Public Policy (MIPP) is designed for experienced professionals, with at least seven years of work experience, who wish to develop advanced analytical and leadership skills.

Studying under world-class scholars and practitioners, students customize their course of study from hundreds of functional, regional, and economic courses to advance their expertise and position themselves for continued professional success.

MIPP students represent diverse employment sectors and geographic regions and bring substantial professional experience into classroom discussions. This program is completed in either one (full-time) or two years (part-time) and is offered at the Washington, DC and SAIS Europe campuses.

Our graduates are in great demand by employers in the public, private and nonprofit sectors. Economics knowledge, analytical abilities, regional expertise, diplomatic skills, language proficiency and the capacity to apply theory to real-world problems give students a distinct professional advantage.

Degree Requirements

Campus: Washington, DC and Bologna, Italy

Credits: 32

Duration:

Full-Time: one academic year, with summer options

Part-Time: two academic years, with summer options

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Curriculum

The MIPP degree consists of eight courses (32 credits). Students work with an academic advisor to design a program of study that is academically rigorous and professionally relevant.

Students may use the ‘focus areas' as outlined for the Master of Arts in International Relations degree (p. 855) to get ideas about how to structure their course plans, but this is not required and focus areas are not recorded on the student's academic record.

Language Studies

MIPP students may elect to take a non-credit language course each semester in one of the languages offered at SAIS. Language courses do not count towards MIPP credit and course requirements.

Strategy, Cybersecurity, and Intelligence, Master of Arts

The Master of Arts in Strategy, Cybersecuirty and Intelligence (MASCI) is a one-year degree that will prepare future leaders and operators for sound decision-making at the strategic, operational, and tactical levels, by enabling them to task, parse, and prepare a wide range of data and raw intelligence.

Students will gain expertise in major strategy and intelligence topics such as terrorism, extremism, cybersecurity, disinformation, political warfare, covert operations, sanctions, special operations, and economic espionage. The program is designed to build the skills to work effectively in careers in the US Department of Defense, US Intelligence Community, and the related private and nonprofit sectors.

Degree Requirements

Campus: Washington, DC

Credits: 40

Duration: 11 Months, Full-Time

Course delivery: In-person

In order to graduate, students must fulfill all degree requirements and earn a cumulative GPA of 2.67 or above.

Sample Course Schedule

Term	Courses	Duration
Pre-Term	Bootcamp (2 credits)	1 week
Fall	Strategy I (4 credits)	15 weeks
	Intelligence I (4 credits)	
	Elective (4 credits)	
	Elective (4 credits)	
January Intersession	Capstone Research Seminar (2 credits)	1 week
Spring	Strategy II (4 credits)	15 weeks
	Intelligence II (4 credits)	
	Elective (4 credits)	
	Elective (4 credits)	
Summer	Capstone (4 credits)	6 weeks

Pre-Term Boot Camp

The Pre-Term Boot Camp is designed to be an identity-forming group experience for the cohort to take place in and around Washington, DC in late August. The boot camp will include an introduction to the program and topics in intelligence, strategy, covert action, military basics, open-source intelligence and policy making, exercises and simulations, an intelligence walk around Washington DC, and a staff ride to a nearby historical battlefield.

Sample Electives*

- Air Power and Strategy
- China's National Security Perspectives
- Conduct of Foreign Policy
- Defense Analysis
- Disinformation
- Economic Sanctions and Statecraft
- Geopolitics of the Middle East
- Global Cyber Threats
- Illicit Finance
- Information Security
- Insurgency and Irregular Warfare
- Intelligence and Cyberspace
- International Bargaining and Negotiation
- International Crises and International Law
- Military Adaptation under Fire
- Operations Analysis
- Psychology and Decision-making in Foreign Policy
- Russia and the West: After the Cold War
- Security Challenges and Military Modernization in South Asia

*subject to change

Capstone

Students will select one of two capstone options, either a thesis or an oral presentation focused on strategic intelligence and national security. Each student will be assigned an advisor early in the capstone process. The advisor will provide or facilitate supervision of the work leading toward the capstone requirement. The thesis is a thoroughly researched and well-sourced research paper. The oral presentation is a thoroughly researched presentation, using any presentation software, presented in a 15-minute briefing, followed by a 30-minute Q&A session with at least two faculty members to probe the briefing's depth and quality. It must be accompanied by an executive summary, which should include a list of references to the best available sources. The Capstone Research Seminar will prepare students for both the capstone thesis and the oral presentation.

Sustainable Energy, Master of Arts (Online)

The Johns Hopkins University School of Advanced International Studies (SAIS) designed the MA in Sustainable Energy (Online) for professionals who want to help shape the future of renewable energy. With a cutting-edge curriculum and world-renowned faculty, few other programs can match the depth or practical experience that the Johns Hopkins SAIS program offers.

Leveraging the expertise of the Johns Hopkins SAIS' faculty and connections to global leaders in sustainable energy, this graduate degree program has been designed to fill key skill gaps across the energy sector — including in consulting, market research, policy, strategic advising and more.

Once enrolled, students gain access to the full breadth of resources available at Johns Hopkins SAIS, including career counseling and personalized job search assistance. Graduates also join the global alumni community of more than 230,000 Johns Hopkins University graduates. As one of the top universities for international relations, Johns Hopkins is recognized worldwide by employers, researchers as well as government and policy organizations.

In addition to online coursework, the program features two experiences at the Johns Hopkins SAIS campus in Washington, DC. These experiences give students the opportunity to connect with their cohort, expert faculty and study directly within the largest hub of energy policy and legislation in the United States. The second on-campus experience consists of the MA in Sustainable Energy capstone presentation and commencement ceremony, where students will participate with the full Johns Hopkins SAIS community in Washington, DC.

Degree Requirements

Credits: 40

Duration: Two years, Part-Time

Course delivery: Online

In order to earn the degree, students must fulfill all requirements and earn a cumulative GPA of 2.67 or above.

Code	Title	Credits

Introduction to Sustainable Energy		
Energy and Environmental Policy Analysis		
Economics of Sustainable Energy		
Distributed and Renewable Energy		
Sustainable Energy and Climate Change		
Global Governance of Sustainable Energy		
Sustainable Energy in Economic Development		
Systems Analysis for Sustainable Energy		

Sustainable Energy Finance
Capstone

Chinese and American Studies, Hopkins-Nanjing Center Certificate

The Hopkins-Nanjing Center (HNC) is a one-of-a-kind residential academic community in Nanjing, China, committed to cross-cultural learning, free and open academic inquiry, and advanced bilingual proficiency.

The one-year Certificate in Chinese and American Studies provides students with flexibility in course selection while deepening their knowledge of Sino-global relations.

Our target-language curriculum gives graduates a competitive edge. American and international students take courses in Chinese, while Chinese students are taught primarily in English. A shared residential community deepens cultural ties and creates individuals who are both bilingual and at home in two cultures.

Alumni of the Hopkins-Nanjing Center are renowned for their Chinese-language proficiency and their multidisciplinary approach to understanding international affairs and China studies. They play key roles in government, business, journalism, NGOs, and academia and are uniquely poised to understand and manage diverse facets of US-China commercial, academic, economic, and political relations.

Degree Requirements

Campus: Nanjing, China

Credits: 24

Duration: One academic year, Full-Time

Course delivery: In-person

Curriculum

The one-year certificate gives students flexibility in course selection while deepening their knowledge of Sino-global relations. Courses are offered on topics such as international economics, international politics, Chinese studies, energy, and international law.

Students in the certificate program must complete at least 24 credits of coursework, with 20 of these credits taught in Mandarin. Many students elect to take additional courses taught in English with their Chinese peers.

The certificate is jointly awarded by Johns Hopkins SAIS and Nanjing University.

Certificate + MAIR

Following completion of the one-year Certificate program in Nanjing, some students proceed to continue their graduate studies at Johns Hopkins SAIS with the Master of Arts in International Relations (p. 855). The MAIR portion of study can take as little as an additional academic year to complete. Students can pursue their studies at either campus in Washington DC or SAIS Europe, although at least one semester must be spent in Washington DC.

Students who complete the HNC certificate earn Advanced Standing credits toward their SAIS MAIR. Advanced Standing reduces the total number of credits needed for the MAIR from 64 to 32-40. Advanced Standing credits, however, do not fulfill specific degree requirements and the student may be required to take more than the minimum number of overall credits in order to complete the MAIR.

Students may use up to 2 approved courses taught at the HNC in English toward specific MAIR requirements. Each semester prior to registration, the Office of Academic Advising (DC) will provide a list of approved English language courses and which MAIR requirement the course may fulfill. Students may use up to 2 approved courses taught in Chinese toward the China regional focus area.

Students who complete a course equivalent to a required International Economics course (International Economics I or International Economics 2) are eligible to take a waiver exam but cannot satisfy the International Economics requirements with an HNC course alone. If the student passes a waiver exam(s), the student must complete a replacement International Economics course(s). Students may use one Level 2 HNC Economics course (whether taken in English or Chinese) as a replacement International Economics course. Courses taken at the HNC may not be used to fulfill the Data Analytics requirement, but may qualify a student to take a waiver exam. If the student is waived from the Data Analytics requirement, the student must complete 2 Research Methods courses.

Non-native-Chinese-speaking students who complete the HNC Certificate automatically fulfill Chinese language proficiency.

Certificate + MAIA

Students may also combine the Certificate with the Master of Arts in International Affairs (p. 853). Students in the Certificate + MAIA program spend one year each at the Hopkins-Nanjing Center and SAIS Europe, and may choose to begin their studies at either location. At the HNC, students must complete at least 32 credits of coursework, with at least 20 of these credits taught in Mandarin. Once the Certificate is completed, they receive 32 credits of advanced standing toward the MAIA. Students can complete complete the MAIA in one academic year at SAIS Europe by completing 32 credits.

The MAIA curriculum includes a minimum of two International Economics courses, four elective courses, and a thesis (8 credits). Students can opt to take two additional elective courses in place of the thesis as long as one of the courses produces a research paper.

Non-native Chinese speakers who complete the HNC Certificate are automatically approved for language proficiency in Chinese since their content courses were taught in that language. Native Chinese speaking students can use English for their required non-native language proficiency requirement.

Graduate Certificates

Complete a series of four courses and earn a graduate certificate designed to serve as an important credential for students and professionals seeking to expand on a chosen area of interest without having to pursue a full master's degree.

Certificates are eligible for financial aid and may be completed part-time over multiple semesters or full-time in a fall or spring semester. International applicants to the full-time certificate may qualify for an F-1 student visa.

Courses taken in a Graduate Certificate can be transferred to many of the schools degree programs. Up to 4 courses (16 credits) can transfer to the two-year Master of Arts in International Relations (Washington, DC) or

Master of Arts in International Affairs (Bologna, Italy) degrees. Students may transfer up to 2 courses (8 credits) to the Master of International Public Policy, PhD, Doctor of International Affairs and Diploma programs.

Degree Requirements

Campus: Washington, DC

Credits: 16

Duration: 1 full-time fall/spring semester or flexible part-time enrollment (including summer)

Course delivery: In-person with some online course options

In order to earn a Graduate Certificate, students must fulfill all requirements and earn a cumulative GPA of 2.67 or above.

Certificate in International Studies

The Certificate in International Studies (https://sais.jhu.edu/academics/diploma-certificate-and-non-degree-programs/certificate-international-studies/) allows you to design your own curriculum. Focus your studies in a particular policy area, region of the world or choose courses that give you a broader overview of international relations.

Recommended for:
Students interested in international relations, foreign policy, conflict resolution, international law, human rights, global business strategy or regional studies.

Course Requirements:

- Theories of International Relations
- 3 electives from any area of study (excluding International Economics I, International Economics II, and language courses)

Certificate in International Development

The Certificate in International Development (https://sais.jhu.edu/academics/diploma-certificate-and-non-degree-programs/certificate-international-development/) incorporates an interdisciplinary approach to the study of developing countries. It offers an opportunity to conceptualize development problems through social, political, economic and environmental aspects of development.

Recommended for:
Students interested in human and economic development, social change, health care and education reform, infrastructure and environment.

Course Requirements:

- Comparative Politics
- Introduction to Economic Development (or approved alternative development economics course)
- 2 Electives in International Development

Certificate in International Economics

The Certificate in International Economics (https://sais.jhu.edu/academics/diploma-certificate-and-non-degree-programs/certificate-international-economics/) allows students to research the flow of capital, labor, investment and trade among nations, while obtaining the qualitative and quantitative skills necessary for economic forecasting.

Recommended for:
Students interested in financial analytics, economic consulting, international trade and market research.

Course Requirements:

- International Economics I
- International Economics II
- 2 Electives in International Economics

International Studies, Diploma

The one-year Diploma in International Studies, offered at SAIS Europe in Bologna, Italy, gives students the flexibility to select courses based on their academic interests. The school's multidisciplinary curriculum is rooted in economics, political science, history, and foreign language proficiency and students are taught under the American system of graduate education.

The close-knit international academic environment of SAIS Europe fosters a sense of community and collaboration and enables students to learn to communicate across borders and cultures.

Johns Hopkins SAIS graduates are sought after by employers in the public, private and nonprofit sectors. Their knowledge of economics, analytical abilities, regional expertise, diplomatic skills, international experience, language proficiency, as well as capacity to apply theory to real-world problems, give students a distinct professional advantage.

Degree Requirements

Campus: Bologna, Italy

Credits: 32

Duration: One academic year, Full-time

Course delivery: In-person

In order to earn the Diploma, students must fulfill all requirements and earn a cumulative GPA of 2.67 or above.

Curriculum

Students pursuing the one-year Diploma in International Studies must complete a minimum of eight courses (32 credits) over two consecutive semesters, as well as demonstrate proficiency in a non-native language

The curriculum emphasizes international economics and international relations with options to focus in a broad range of policy areas and geographic regions. Students who wish to pursue economics courses must have completed introductory level Micro- and Macroeconomics prior to the start of the program.

Each year, approximately 70 courses are offered at SAIS Europe on topics such as:

- American Foreign Policy
- Conflict Management
- Energy and Sustainability
- International Development
- International Law
- International Political Economy
- Strategic Studies

- Global Risk
- European and other Regional Studies

Language Requirements

Native English speakers must pass a foreign-language proficiency examination or successfully complete two semester-long courses in one of the languages offered at SAIS Europe:

- Arabic
- French
- German
- Italian
- Portuguese
- Russian
- Spanish

Non-credit language courses do not count toward the number of courses or credits needed for the Diploma.

During the application process, non-native speakers of English will be required to submit a score from one of the following English competency exam: TOEFL, IELTS or the Cambridge C2 Proficiency. This requirement may be waived for individuals who have completed their undergraduate degree in English in a country where English is an official language. However, at the start of the academic year, all non-native English-speaking students at SAIS Europe must take the English proficiency exam, regardless of previous test results, to ensure an adequate level in all skills.

SCHOOL OF EDUCATION

About the School of Education

Established in 2007, the Johns Hopkins School of Education is a national leader in education reform through research and teaching. Grounded in the Johns Hopkins tradition of research and innovation, the School of Education is ranked among the top colleges of education in the nation by U.S. News & World Report as well as and among the top recipients of funded research..

The School of Education offers a rigorous academic environment where candidates can pursue a wide variety of graduate degree and certificate programs, and become experts in elementary and secondary teaching, counseling, administration and supervision, special and gifted education, and education in the health professions. Our candidates represent a wide variety of academic and professional backgrounds, including recent college graduates, professionals from disciplines outside of education seeking a career change, and experienced administrators, counselors, and specialists who want to enhance their skills in the classroom and practice area.

Through an interdisciplinary approach with emphasis on the most challenged urban schools, our programs and applied research have measurably improved the quality of PK-12 education. Our research and policy centers play an integral role in furthering the impact of that approach.

- The **Center for Research and Reform in Education** obtains, analyzes, and distributes the latest research to bring meaningful reform to under-performing public schools.
- The **Center for Safe and Healthy Schools** empowers schools, communities, and policymakers with the knowledge and tools to foster safe and healthy school climates.
- The **Center for Social Organization of Schools** conducts programmatic research, develops curricula, and provides schools with technical assistance to improve education.
- The **Center for Technology in Education** improves the quality of life of children and youth through teaching, research, and leadership in the use of technology.
- The **IDEALS Institute** works to build holistic systems to promote positive developmental outcomes in education, health, and social services for children and adults.
- The **Institute for Education Policy** convenes leaders from diverse viewpoints to share expertise in analyzing and disseminating solutions to our toughest educational issues.

True to Johns Hopkins University's mission to "bring the benefits of discovery to the world," the Johns Hopkins School of Education equips educators and communities—locally and globally—with the latest insight into how learning happens.

The Johns Hopkins School of Education explores the frontiers of knowledge to understand how individual, communal, behavioral, and neurological aspects of human development interact to impact learning. And we are passionate about sharing our findings: with educators, with leaders, with communities, with students. With you.

From individual students to the schools they learn in, from communities to whole populations, quality education is imperative. Nothing less than our future is at stake

Accreditation

The Johns Hopkins University is accredited by the Middle States Commission on Higher Education. All programs leading to professional licensure are approved by the Maryland State Department of Education (MSDE (http://www.marylandpublicschools.org))).

Vision

A Strategic Vision for the Johns Hopkins School of Education

The most important aspect of our vision is our people: students, staff, faculty, and leadership. As a community, we are committed to attracting and retaining a diverse, world-class faculty and staff. We believe in working collaboratively to cultivate a productive, supportive culture, which includes recruiting and promoting candidates from diverse backgrounds and inspiring our community to foster a positive environment.

The schools, organizations, and communities we serve are confronting complex, far-reaching problems. Some are long-standing; others have exploded only recently into our collective consciousness. More than ever, it is clear that these challenges will require deep, empirically informed change.

- Students and clients increasingly are being diagnosed with mental health disorders, challenging educators to move beyond an emphasis on academic achievement to one addressing mental health and social-emotional well-being.
- States and districts are experimenting with policy approaches that emphasize entrepreneurial solutions to school safety and early childhood education, and for-profit startups are competing with nonprofit, traditional providers.
- Education occurs in a context of growing societal and racial inequity—particularly in cities like Baltimore. Through our operation of the Henderson-Hopkins School, we have seen how local challenges reflect global ones.
- Research funders and consumers of research are requiring more rigorous studies that demonstrate the capacity to change practice at scale and make a lasting, positive impact.
- As the challenges and their solutions become more complex, securing financial resources requires more innovation and responsiveness.

Building on the Johns Hopkins School of Education's distinctive strength as a global research leader with a local commitment, as well as its innovative academic programs, research centers, and entrepreneurial spirit, our vision positions the school to address these challenges and take advantage of the opportunities they create.

Together, we deliver world-class research, academic programs, and services that address the constantly evolving needs of the people and organizations we serve, training leaders capable of creating and utilizing cutting-edge knowledge and creating innovative, evidence-based policies, methods, and products to address the challenges these organizations face.

Dispositions

The following dispositions illustrate the school's continued commitment, as a member of Johns Hopkins University, to produce candidates who are aware and ethical in pursuing their chosen practice. All candidates who complete a certificate, master's degree, and/or doctorate in the School of Education will be:

1. **Research Centered**
    a. **Committed to Inquiry and Innovation**
    Candidates will:
        i. be prepared to foster in others and engage in themselves the pursuit of life-long learning, continuous self-reflection, and research within their own practice or beyond;
        ii. maintain fluency in scholarship in their field, professional knowledge, as well as in effective and ethical practices;
        iii. evaluate and effectively implement appropriate new methods and tools; and
        iv. incorporate appropriate knowledge-building technologies in their practice.
    b. **Committed to Being a Reflective Practitioner**
    Candidates will:
        i. actively engage in critical, creative, and metacognitive thinking to support conceptual understanding; and
        ii. engage in independent and interdependent problem solving and experiential approaches to learning.
2. **Collaborative**
    a. **Committed to Creating Positive Climates**
    Candidates will:
        i. promote a climate in which learning is valued and ongoing;
        ii. provide choices to enable all to share in and contribute to social and intellectual life; and
        iii. uphold fair and equitable standards for conduct that encourage responsibility, mutual respect, and civic values, and that safeguard the physical, intellectual, and emotional well-being of each and every member of the community.
    b. **Committed to Active Engagement**
    Candidates will:
        i. actively engage in a community of learners that develop relationships, programs, and projects with colleagues in PK-20 schools and educational agencies designed to improve the quality of education for each and every student and education professional; and
        ii. contribute professionally to the field at local, regional, state, and national levels.
3. **Socially and Culturally Conscious:**
    a. **Committed to Fostering Social Justice**
    Candidates will:
        i. seek to understand their own privileges and/or prejudices; the stereotypes embedded in educational materials, rules/laws, and policies; and the cultural biases that exist in schools and other education-related or societal institutions;
        ii. work toward a global society where equality is recognized as a basic human right;
        iii. promote social and environmental responsibility; and
        iv. empower themselves and others to identify opportunities for growth toward excellence and equity.
    b. **Committed to Developing Cross-Cultural Competence**
    Candidates will:
        i. promote respect for self, students, families, and cultures;
        ii. demonstrate a belief that everyone can learn and value human diversity and equity in the learning environment; and
        iii. examine their own biases and prejudices and develop necessary awareness, attitudes, knowledge, and skills for effectively and respectfully teaching and mentoring people whose cultures differ from their own.
4. **Ethical**
    a. **Committed to Acting Responsibly**
    Candidates will:
        i. act with integrity and be considerate, respectful, punctual, and appropriate in appearance, conduct, and in all interactions with students, families, mentors, and colleagues; and
        ii. be creative and self-reliant in finding appropriate solutions to problems and managing dilemmas.
    b. **Committed to Acting with Integrity**
    Candidates will:
        i. conduct themselves in a professional manner;
        ii. be honest and open to constructive feedback from others, manage situations of conflict and their own stress appropriately, and take responsibility for their own actions; and
        iii. conduct research and practice efforts intended to discover what is rather than to prove what may be anticipated.

Doctoral Programs

Master's Programs

Graduate Certificates

Academic and Student Policies

General Registration Policy

Only students who have been admitted to a program (or as a Graduate Special Student) may register for courses. Students are encouraged to register for courses as early as possible during each registration period since a course may close or be canceled due to low enrollment before the end of registration. Students may not sit in on a class without being officially registered for that class, nor should they contact instructors to request permission to register for or attend a closed course. Students who fail to complete their registration and sit in on a class will not receive a grade or credit for attending the class.

Registration begins several months before each semester. Students who have been admitted to a program may register for courses online using the School of Education's SIS Self-Service website. Registration materials may also be brought to the Education Building. When registering online or by mail, students may choose to pay then or be electronically billed.

When students initially register for courses each semester, they will be charged tuition fees and a **non-refundable** $175 registration fee. Following their initial course registration, students may register for additional courses without being subject to any additional course registration fees. However, if a student registers for the first time within two weeks of the start date of the term (regardless of the first class meeting dates of the individual classes), they will be charged a late registration fee of $100, in addition to the registration fee of $175. Please see Student Accounts (https://education.jhu.edu/student-resources/student-accounts/) for more information.

Registrations are processed as they are received. If a selected course is full, a student may be placed in an alternate course or on a waitlist (if applicable). Additional information regarding registration may be found in the online course schedule, https://sis.jhu.edu/classes/.

Note: Students should use their student JHED ID number to register for courses. All outstanding debts to Johns Hopkins University must be paid in full in order to register for courses.

For additional registration and enrollment related policies, please visit:

- ·Adding a Course (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/adding-a-course/)
- ·Auditing a Course (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/auditing-a-course/)
- ·Course Load (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/course-load/)
- ·Dropping/Withdrawing from a Course (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/droppingwithdrawing-from-a-course/)
- ·Wait Lists (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/waitlists/)
- ·Leaves of Absence (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/leave-of-absence/)
- ·Withdrawal from a Program (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/changingwithdrawing-from-programs/)
- ·Interdivisional Registration (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/interdivisional-registration/)
- ·Refunds (including Exceptions to the Refund Policy) (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/refund-policies/)
- ·Attendance/Participation (https://education.jhu.edu/student-resources/office-of-the-registrar/registration-and-enrollment/attendanceparticipation/)

Academic and Student Conduct Policies

Academic and Student Conduct Policies

Statement of Principles

The purpose of the School of Education's Academic and Student Conduct Policies is to promote and protect the rights, welfare, intellectual integrity, safety, property, and health of all members of the academic community, as well as to promote the orderly operation of the School and to safeguard its property and facilities.

These policies are intended to enhance free exchange of ideas in an academic setting and are to be construed with that interest in mind. They are based on the principle that each student assumes individual responsibility to abide by them. They pertain to any person who is currently enrolled in a School of Education course or program, or who has completed degree or certificate requirements and is awaiting graduation. These policies apply to misconduct committed on University premises or during School of Education related or sponsored activities off School premises.

The School of Education reserves the right to institute disciplinary action whether or not the offense results or may result in action by a civil or criminal court. The School of Education also reserves the right to dismiss at any time a student whose academic standing or general conduct is considered unsatisfactory. Students who have been dismissed for any reason are permanently barred from matriculating in another credit-bearing or non-credit course or program in the School of Education.

All records of academic and student conduct cases, and all supporting documentation, shall be maintained in accordance with University policy and state and federal laws concerning maintenance and disclosure of student records.

Academic Misconduct Policy

Scope

The Johns Hopkins School of Education ("SOE") places the highest value on intellectual integrity and personal trust within our community. All SOE students assume an obligation to conduct themselves in a manner appropriate to the Johns Hopkins University's mission as an institution of higher education and with accepted standards of ethical and professional conduct. Students must demonstrate personal integrity and honesty at all times in completing classroom assignments and examinations, in carrying out their fieldwork or other applied learning activities, and in their interactions with others. Students are obligated to refrain from acts they know or, under the circumstances, have reason to know will impair their integrity or the integrity of the University. Instructors are required to investigate any suspicion of academic misconduct.

Non-Academic Misconduct

All issues of non-academic student misconduct are subject to the University-wide Student Conduct Code (http://studentaffairs.jhu.edu/policies/student-code/).

Research Misconduct

Research misconduct is defined as fabrication, falsification, or plagiarism in proposing, performing, reviewing or reporting research. For a complete definition, refer to The Johns Hopkins University Research Integrity Policy (https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf). The Policy applies to all University faculty, staff, trainees and students engaged in the proposing, performing, reviewing or reporting of research, regardless of funding source. Allegations of research misconduct regarding a student must be referred to the Research Integrity Officer for assessment under that Policy and must also be reported to the Vice Dean of Academic Affairs.

Interdivisional Enrollments

SOE students may enroll in courses in one or more of the other University divisions or schools. SOE students are subject to this policy not only when enrolled in SOE courses, but also when enrolled in courses in other University divisions or schools. Academic misconduct in the context of those “outside” courses will be subject to and resolved under this policy.

Policy Violations

Academic misconduct is prohibited by this policy. Academic misconduct is any action or attempted action that may result in creating an unfair academic advantage for oneself or an unfair academic advantage or disadvantage for any other member or members of the academic community. This includes a wide variety of behaviors such as cheating, plagiarism, altering academic documents or transcripts, gaining access to materials before they are meant to be available, and helping another individual to gain an unfair academic advantage. Non exclusive examples of academic misconduct are listed below.

Cheating

The following are nonexclusive examples of cheating:

- fraud, deceit, or dishonesty in an academic assignment, text or examination;
- use or consultation of unauthorized materials (e.g., notes, books, etc.) on assignments, tests or examinations;
- unauthorized discussion of a test or examination during its administration (including face- to-face and online examinations in either synchronous or asynchronous formats);
- copying content on an assignment, test or examination from another individual;
- obtaining a test or examination or the answers to a test or examination before administration of the test or examination;
- studying from an old test or examination whose circulation is prohibited by the faculty member;
- use or consultation of unauthorized electronic devices or software (e.g., calculators, cellular phones, computers, tablets, etc.) in connection with assignments, tests or examinations;
- use of paper writing services or paper databases;
- unauthorized collaboration with another individual on assignments, tests or examinations;
- submission of an assignment, test or examination for a regrade after modifying the original content submitted;
- permitting another individual to contribute to or complete an assignment, or to contribute to or take a test or examination on the student’s behalf;
- tampering with, disabling or damaging equipment for testing or evaluation; or
- unauthorized submission of the same or substantially similar work, assignment, test or examination to fulfill the requirements of more than one course or different requirements within the same course, including for courses that a student repeats.

Plagiarism

The following are nonexclusive examples of plagiarism:

- use of material produced by another person without acknowledging its source;
- submission of the same or substantially similar work of another person (e.g., an author, a classmate, etc.);
- use of the results of another individual’s work (e.g., another individual’s paper, examination, homework, computer code, lab report, etc.) while representing it as your own;
- improper documentation or acknowledgment of quotations, words, ideas, or paraphrased passages taken from published or unpublished sources;
- wholesale copying of passages from works of others into your homework, essay, term paper, or dissertation without acknowledgment; or
- paraphrasing of another person’s characteristic or original phraseology, metaphor, or other literary device without acknowledgment.

Forgery/Falsification/Lying

The following are nonexclusive examples of forgery, falsification and lying:

- falsification or invention of data or information for an assignment, test or examination, or in an experiment;
- citation of nonexistent sources or creation of false information in an assignment;
- attributing to a source ideas or information that is not included in the source;
- forgery of university or other official documents (e.g., letters, transcripts, etc.);
- impersonating a faculty member;
- request for special consideration from faculty members or university officials based upon false information or deception;
- fabrication of a reason (e.g., medical emergency, etc.) for needing an extension on or for missing an assignment, test or examination;
- claiming falsely to have completed and/or turned in an assignment, test or examination;
- falsely reporting an academic ethics violation by another student;
- failing to identify yourself honestly in the context of an academic obligation; or providing false or misleading information to an instructor or any other University official.

Facilitating Academic Dishonesty

The following are nonexclusive examples of facilitating academic dishonesty:

- intentionally or knowingly aiding another student to commit an academic ethics violation;
- allowing another student to copy from one’s own assignment, test, or examination;
- making available copies of course materials whose circulation is prohibited (e.g., old assignments, texts or examinations, etc.);
- completing an assignment or taking a test or examination for another student; or

- sharing paper mill/answer bank websites or information with other students.

Unfair Competition

The following are nonexclusive examples of unfair competition:

- intentionally damaging the academic efforts of another student;
- stealing another student's academic materials (e.g., books, notes, assignments, etc.); or
- denying another student needed University resources (e.g., hiding library materials, stealing lab equipment, etc.).

Investigations Allegations of Academic Misconduct

If a student is suspected of academic misconduct, the course instructor must investigate the matter. Instructors should document the potential evidence and all communication with the student concerning the possible infraction. If, after speaking with the student and any potential witnesses, the instructor believes that academic misconduct has occurred, the instructor must contact SOE's Office of the Registrar (copying the Office of Student Affairs) to determine whether the offense is a first-time offense, or a second or subsequent offense. Before making a final decision in a case, instructors should also consult with the faculty member in charge of the student's program and the student's faculty adviser. If the instructor ultimately determines that academic misconduct has occurred, the instructor must complete SOE's Academic Misconduct Form, providing a brief description of the infraction and the action(s) to be taken. These actions could include either imposing a penalty on the student or recommending that the case be referred to the hearing process.

First-time Offenses

For a first-time offense that the instructor does not consider to be egregious—i.e. not worthy of a penalty harsher than the award of an F grade for the entire course—the instructor shall determine the penalty at their discretion. Depending on the severity of the charge, the instructor may choose to 1) reduce the number of points or the grade level awarded for an individual assignment, 2) allow the student to resubmit an assignment, but set a limit on the possible number of points or the grade that the student may earn, 3) award zero points/an F grade for the assignment without granting the student an opportunity to resubmit, 4) award an F grade for the entire course, or 5) impose another type of penalty as s/he deems appropriate (provided that the penalty imposed is not greater than the award of an F grade for the entire course). If the instructor decides to impose another type of penalty (under option #5), the penalty should be determined in consultation with the faculty member in charge of the student's program.

If the student accepts the charge and penalty imposed by the instructor, s/he will sign the consent statement on the Academic Misconduct Form. A student who signs the consent statement admitting the infraction and accepting the penalty imposed cannot subsequently appeal.

If the student disagrees with the academic misconduct charge and/or the penalty proposed by the instructor, s/he must sign the acknowledgement statement on the Academic Misconduct Form, instead of the consent statement, acknowledging that s/he is aware of the instructor's decision. In such cases, the student may appeal the decision to the Vice Dean for Academic Affairs (or designee).

Once both parties have signed the form, it will be placed in the student's record (which the SOE's Office of the Registrar maintains), with a copy sent to the student's adviser, faculty member in charge of the student's program, Office of Student Affairs, and Vice Dean for Academic Affairs.

The process for handling non-egregious first-time offenses should be completed within 30 days of the instructor's identifying the alleged academic misconduct.

For a first-time offense that the instructor considers to be an egregious case of academic misconduct, where a sanction greater than awarding an F grade for the entire course should be considered, as well as for all second or subsequent offenses, the instructor must refer the case directly to the Office of Student Affairs for a hearing process for resolution.

Hearing Process for Second/Subsequent Offenses, Egregious First-time Offenses, and Student Appeals

The following cases shall be referred to the hearing process outlined below:

1. For a second or subsequent offense.
2. For a first-time offense that the instructor considers an egregious case of academic misconduct and where the instructor believes that a penalty greater than the award of an F grade should be considered.
3. For a first-time offense where the students has submitted an appeal to the Vice Dean for Academic Affairs (or designee) disputing the academic misconduct charge and/or the penalty proposed by the instructor.

For options 1 and 2 above—i.e. for a second or subsequent offense, or for a particularly egregious first-time case of alleged academic misconduct where the instructor believes that a sanction greater than awarding an F grade for the entire course should be considered—the instructor shall promptly notify SOE's Office of Student Affairs, submitting the completed Academic Misconduct Form outlining the alleged violation(s), and additionally detailing in writing any available evidence, including potential witnesses, and other pertinent details of the case.

For option 3 above—i.e. where a student disagrees with the instructor's decision and/or the penalty proposed by the instructor—any appeal to the Vice Dean for Academic Affairs (or designee) must be submitted by the student in the form of a letter to the Office of Student Affairs (who will vet the appeal on the Vice Dean's (or designee's) behalf). In submitting an appeal, the student must provide a thorough rationale for the basis of the appeal and include supporting materials as evidence. Such materials would typically consist of the disputed work in question, the signed Academic Misconduct Form, and any correspondence (such as email communications) between the student and the instructor and (where applicable) other persons involved in the case (e.g. communications with the faculty adviser and/or faculty member in charge of the student's program). The appeal form and supporting materials must be received by SOE's Office of Student Affairs within seven working days of the date that the initial Academic Misconduct Form is signed by the instructor and student. The appeal letter and supporting materials should be emailed to soe.studentaffairs@jhu.edu. (The term "academic misconduct appeal" should be referenced in the email subject link.)

For all the options outlined above, SOE's Office of Student Affairs will be assigned to the case and gather information regarding the alleged academic misconduct. This gathering of information may include without limitation 1) meetings with or requests for statements or additional supporting materials from the instructor, student, faculty adviser/faculty member in charge of the student's program, and/or witnesses, 2) review of any related information and supporting materials, and 3) (for student appeals) a determination that the appeal to the Vice Dean for Academic Affairs (or designee) was submitted within the seven-day appeal window.

Following this initial review, the Office of Student Affairs will forward the case and any supporting materials to the Vice Dean for Academic Affairs (or designee) with a recommendation as to whether the case should proceed or be dismissed. The Vice Dean (or designee) may dismiss a case for a lack of sufficient information, because the appeal was not submitted within the seven-day deadline established by this policy, or if the alleged conduct does not fall within conduct prohibited by this policy. Absent these circumstances, the Vice Dean (or designee) will appoint a hearing panel to resolve the case.

Panel Hearings

The hearing panel is composed of faculty and staff appointed for annual terms by the Vice Dean for Academic Affairs (or designee) to hear alleged violations of this policy. The hearing panel must comprise at least three faculty members drawn from the Student Affairs Committee and one representative from the Office of Student Affairs. The hearing panel shall convene within 21 days of its appointment by the Vice Dean (or designee) to consider the case.

The panel is charged with determining based on a preponderance of the evidence whether a student's actions constitute a violation of this policy and, if so, recommending (an) appropriate sanction(s). The panel shall make its determination of responsibility and recommended sanctions by majority vote, except that unanimity is required for a sanction of expulsion. The hearing is a closed proceeding, meaning that no one other than the panel members, and necessary University personnel, may be present.

The student accused of academic misconduct, and any other participants (e.g. the instructor or witnesses) called to the hearing, will be present in the hearing room only when making a statement or being questioned by the panel. Participants may attend the panel hearing remotely (e.g. via telephone or Skype), if unable to attend in person.

Witnesses

The hearing panel may request the presence of any witness with relevant information about a case. The student and/or instructor may request that witnesses with relevant information speak on their behalf. Absent exceptional circumstances, the student/instructor should inform the hearing panel in writing at least three days in advance of any hearing of the names of the witnesses and to what they will attest. The hearing panel may determine whether and the extent to which witnesses will be permitted to participate or questioned in any meeting or hearing, including whether their testimony is relevant.

Decision

Within 14 days of the hearing panel meeting, the representative from the Office of Student Affairs on the hearing panel will notify the Vice Dean of Academic Affairs (or designee) in writing outlining the hearing panel's findings, determination of responsibility, and any recommended sanctions (if applicable). The Vice Dean (or designee) will notify the student in writing of their judgement in relation to both the final determination of responsibility and the sanction (if any) to be imposed, copying the instructor, student's faculty adviser, faculty member in charge of the student's program, and the hearing panel within 14 days of receiving the recommendation from the hearing panel. A copy of the letter will also be placed in the student record maintained by the SOE's Office of the Registrar.

Applicable Procedures

In connection with the resolution of alleged policy violations, the student accused of academic misconduct shall:

- be notified in writing by the Office of Student Affairs of the allegations in advance of any hearing;
- be notified in writing by the Office of Student Affairs of the charges, and the date, time and location of the hearing, and identities of the hearing panel members in advance of the hearing;
- have the opportunity to review in advance of any hearing any information to be considered by any faculty member, administrator or panel consistent with the Family Educational Rights and Privacy Act of 1974, as amended ("FERPA") and to protect other confidential information;
- be notified in writing by the Vice Dean of Academic Affairs (or designee) of the outcome of any hearing, namely the findings, determination of responsibility, and any sanctions; and
- be notified in writing of the outcome of any subsequent appeal to the Dean.

A student accused of academic misconduct may raise the potential conflict of any University personnel participating in the resolution process. The student may also decline to participate in the resolution process. The University may however continue the process without the student's participation.

Communications under this policy will primarily be conducted with students through their official University email address, and students are expected check their official University email on a regular basis.

Evidentiary Standard

A "preponderance of the evidence" standard will be used to determine responsibility for alleged violations of this policy. A "preponderance of the evidence" standard is an evidentiary standard that means "more likely than not." This standard is met if the proposition is more likely to be true than not true.

Appeals to the Dean

A student may appeal the hearing panel's finding of responsibility and/or sanction(s). The student must file any appeal within seven working days of the date of the notice of outcome on one or more of the following grounds:

- procedural error that could have materially affected the determination of responsibility or sanction(s);
- new information that was not available at the time of the hearing and that could reasonably have affected the determination of responsibility or sanction(s); and
- excessiveness of the sanction(s).

Any appeal must be filed in writing with the SOE Dean (or designee). An appeal will involve a review of the file and as determined necessary, gathering of information from relevant university personnel or panelists; the appeal does not involve another hearing. On review of the appeal, the Dean (or designee) may:

- enter a revised determination of responsibility and/or revise sanction(s);
- remand the matter to the original hearing panel to reconsider the determination of responsibility and/or sanction(s); or
- establish a new hearing panel to consider the case.

The Dean (or designee) will deliver their final decision, with the reasons therefor, in writing to the student within 14 days of receiving the student appeal, simultaneously copying the instructor, the student's faculty adviser, faculty member in charge of the student's program, and hearing panel. A copy of the letter will also be placed in the student record maintained by the SOE's Office of the Registrar. The decision of the Dean (or designee) is final. No further appeals are permitted.

Sanctions

The following factors may be considered in the sanctioning process:

- the specific academic misconduct at issue;
- the respondent's academic misconduct history; and
- other appropriate factors.

This section lists some of the sanctions that may be imposed upon students for violations of this policy. SOE reserves the right, in its discretion, to impose more stringent or different sanctions and corrective measures depending on the facts and circumstances of a particular case. Sanctions and corrective measures for academic misconduct under policy are generally cumulative in nature.

Possible sanctions and corrective measures against students, include without limitation one or more of the following listed below.

Academic Sanctions
Examples of academic sanctions include but are not limited to the following: retaking of the examination, paper or exercise involved; score of zero on the examination, paper or exercise involved; lowering of the course grade; loss of any SOE scholarship for a specific duration or permanently; and failure in the course, including transcript notation of the sanction and/or academic misconduct violation.

Formal Warning
The student is notified in writing that their actions constitute a violation of this policy, and may be subject to other actions (e.g., re-taking an examination or failure in a course).

Probation
The student is notified that further violations of this policy within the stated period of time will result in the student being considered for immediate suspension or other appropriate disciplinary action. If at the end of the specified time period no further violations have occurred, the student is removed from probationary status.

Suspension
The student is notified that the student is separated from the University for a specified period of time. The student must leave campus and vacate campus residence halls, if applicable, within the time prescribed and is prohibited from University property and events. The conferring of an academic degree may be deferred for the duration of the suspension. A student must receive written permission from the University prior to re-enrollment or re-application. Academic work completed at another institution while on suspension will not be recognized for credit transfer.

Expulsion
Expulsion means the permanent removal of the student from the University. Expulsion includes a forfeiture of all rights and degrees not actually conferred at the time of the expulsion, permanent notation of the expulsion on the student's University records and academic transcript, withdrawal from all courses according to divisional policies, and the forfeiture of tuition and fees. Any student expelled from the University is prohibited from University property and events and future reapplication to the University.

Records
A case file concerning a student will be retained by the SOE's Office of the Registrar for seven years from date that the student graduates or otherwise leaves the university.

Policies Governing Student Conduct
All issues of non-academic student misconduct are subject to the University-wide Student Conduct Code (https://studentaffairs.jhu.edu/policies-guidelines/student-code (https://studentaffairs.jhu.edu/policies-guidelines/student-code/)).

Academic Standards

Academic Standards
The requirements for the degrees and certificates offered through the School of Education are subject to change. The School does not guarantee continuation of any particular curriculum or program of study.

The University does not guarantee the award of a degree or certificate to students enrolled in any academic program. The award of degrees and certificates is conditional based on satisfaction of all current degree/certificate and instructional requirements at the time of such award, compliance with the University and School regulations, as well as performance meeting the expectations of faculty. Any breach of academic standards may result in disciplinary actions against the student(s) involved; please see the Academic and Student Conduct Policies section for an overview of grievance and due process procedures.

The School of Education reserves the right to dismiss at any time a student whose academic standing or general conduct is considered unsatisfactory.

Graduate Students
Good Academic Standing
To remain in good academic standing, School of Education graduate students (master's, certificate, and non-degree) must maintain at least a B average (3.0 on a 4.0 scale) throughout their enrollment. In addition, graduate students (master's and certificate) must achieve a minimum cumulative grade point average of 3.0 (on a 4.0 scale) to receive approval for graduation.

Unsatisfactory Academic Standing
A graduate (master's or certificate) student's academic standing is considered unsatisfactory if any of the following outcomes occur:

- The student earns a grade of F for a credit-bearing course. No grade of F in a credit-bearing course may be counted toward a degree or certificate program. [*Note: In the Urban Teachers collaboration program a student who earns an F grade <u>will</u> be automatically dismissed from the program. Please refer to the program handbook for more information.*]
- The student's cumulative grade point average falls below 3.0 (on a 4.0 point scale).
- The student fails to meet other academic expectations as defined by individual programs— for example, performing unsatisfactorily during an internship placement.

Note: No more than one credit-bearing course in which the grade of C+, C, or C- is earned may be counted toward the degree or certificate.

Academic Probation
In the event that any of the above outcomes occur, the following actions are taken:

- The student is placed on academic probation for a period of not less than one semester. While a student can appeal the award of a grade (see Grade Appeals policy), a student cannot appeal the decision to place them on academic probation.
- As part of the terms of academic probation, the student will be placed on a Candidate Improvement Plan that outlines the specific requirements/goals that the student must meet within a designated timeframe in order to be reinstated to good academic standing (e.g. regaining a cumulative grade point average of 3.0).
- Any courses taken during the probationary period must be approved by the student's faculty adviser. If the student originally received an F grade in a required course, the student must repeat the course in which the unsatisfactory grade was earned. (See policies on Failure - F Grades and Repeated Courses.) If the F grade was earned in a course that is not required, the student may take another course that meets with faculty adviser approval.

A student will be released from probation once they have met the following conditions (where applicable): the student has 1) met the all requirements/goals laid out in the Candidate Improvement Plan, 2) completed any required repeated or substitute (for elective) course(s) with a satisfactory grade, 3) regained a cumulative grade point average of 3.0 (on a 4.0 point scale), as required for good academic standing, and 4) met all other conditions of probation set by their faculty adviser or the program.

Academic Dismissal
Students will be automatically dismissed from their academic program in the event that any of the following occur:

- The student fails to meet the requirements/goals laid out in the Candidate Improvement Plan within the designated timeframe and any other conditions set for reinstatement to good academic standing while on academic probation.
- The student earns two or more F grades cumulatively over the course of their entire program of study.

Dismissal decisions based on academic performance are final and cannot be appealed. While a student cannot appeal the School's decision to dismiss them, a student may appeal the award of the original grade(s) that led to the dismissal (see Grade Appeals policy). **Students who have been dismissed for any reason are permanently barred from matriculating in another credit-bearing or non-credit course or program in the School of Education**.

Doctoral Students (EdD and PhD)

Good Academic Standing
To remain in good academic standing, School of Education doctoral students must maintain a 3.25 grade point average (on a 4.0 scale) throughout their enrollment. In addition, doctoral students must achieve a minimum cumulative grade point average of 3.25 (on a 4.0 scale) to receive approval for graduation.

Unsatisfactory Academic Standing
A doctoral student's academic standing is considered unsatisfactory if any of the following outcomes occur:

- The student earns a grade of F for a course. No grade of F may be counted towards a doctoral degree program, and a student may be dismissed from the program.
- The student earns a grade of C+ or lower in any course. No grade of C+ or lower may be counted toward a doctoral degree program. Students receiving a C+ or lower will be required to retake the course (if it is a required course) or take an alternate course (if it was an elective course).
- The student's cumulative grade point average falls below 3.25 (on a 4.0 point scale).
- The student fails to make adequate progress towards the doctoral dissertation. The doctoral committee will consider progress based on expectations set by the program, discussions with the adviser, and input from the student.
- The student fails to meet other academic expectations as defined by individual programs.

Academic Probation
In the event that any of the above outcomes occur, the following actions are taken:

- The student is placed on academic probation for a time period equivalent to 12 credit hours. While a student can appeal the award of a grade (see Grade Appeals policy), a student cannot appeal the decision to place them on academic probation.
- As part of the terms of academic probation, the student will be placed on a Candidate Improvement Plan that outlines the specific requirements/goals (in addition to regaining a cumulative grade point average of 3.25) that the student must meet within a designated timeframe in order to be reinstated to good academic standing.
- Any courses taken during the probationary period must be approved by the student's faculty adviser. If the student received an unsatisfactory grade in a required course, the student must repeat the course in which the unsatisfactory grade was earned. (See policies on Failure (F Grades) and Repeated Courses.) If the unsatisfactory grade was earned in a course that is not required, the student may take another course that meets with faculty adviser approval.

A student will be released from probation once they have met the following conditions (where applicable): the student has 1) met the all requirements/goals laid out in the Candidate Improvement Plan, 2) regained a cumulative grade point average of 3.25 (on a 4.0 point scale), as required for good academic standing, and 3) met all other conditions of probation set by their faculty adviser or the program director.

Academic Dismissal
Students will be automatically dismissed from their academic program, irrespective of their cumulative grade point average at the time, in the event that any of the following occur:

- Fails to meet the requirements/goals laid out in the Candidate Improvement Plan and any other conditions set for reinstatement to good academic standing within 12 credit hours of being placed on academic probation.
- Earns a subsequent grade of C+ or below while on academic probation or having subsequently been reinstated to good standing following academic probation.
- Earns two or more F grades in the same semester or cumulatively over the course of their entire program of study.

- Earns two or more C grades (C+, C, or C-) in the same semester or cumulatively over the course of their entire program of study.
- Earns an F grade and one C grade (C+, C, or C-) in the same semester or cumulatively over the course of their entire program of study.
- Fails to successfully pass comprehensive exams after two attempts.

While a student cannot appeal the School's decision to dismiss them, a student may appeal the award of the original grade(s) (see Grade Appeals policy). Students who have been dismissed for any reason are permanently barred from matriculating in another credit-bearing or non-credit course or program in the School of Education.

Grading System and Academic Records

Grading System and Academic Records

General Grading Policy

The grading scale used for official grades for all School of Education students—graduate, and non-degree—is listed in the table below. Please note the grade of A+ is not assigned at any level.

Each instructor assigns grades according to their own system, which should be explained in the course syllabus. All students must possess acceptable written command of the English language; instructors will consider writing quality when assigning grades, and make referrals for those needing improvement in writing skills.

Grading Scale

Grades / Quality Points

A	4.0
A–	3.7
B+	3.3
B	3.0
B–	2.7
C+	2.3
C	2.0
C–	1.7
F	0.0
I	Incomplete
P	Pass
NP	No Pass (for non-credit courses only)
MR	No grade reported as yet by the instructor, not a failing grade
W	Official withdrawal (not assigned by instructor)
X	Grade not yet submitted by instructor

No notation on an official report may be changed except to correct an error or to replace an "I" (incomplete) grade.

School of Education records are sealed thirty (30) days after the conferral of a degree. After this date, no changes will be made to a student's academic record.

Note: Some programs may have additional grading requirements. For further details, please refer to the individual program descriptions in this catalogue.

Alternative Grading Scale

Some courses may choose to employ a Pass (P)/Fail (F) grading system rather than a letter-based grading scale (as outlined in the above table). In such cases, the award of a Pass (P) grade is equivalent to the award of a "B" grade or above, while the award of a Fail (F), and the consequences thereof, equate to the award of an "F" grade in the letter-based grading scale. The use of the Pass (P)/Fail (F) grading system for courses should be clearly stated in the course syllabus.

NOTE: **Beginning March 2020, Johns Hopkins University was affected by the global COVID-19 pandemic. Grading policies (from the Spring 2020 semester through to the Summer 2021 semester) were modified so that students were allowed to switch any of their courses from a letter grading method to Pass/Fail. During that time, the award of a Pass (P) grade was equivalent to the award of a **"B-" grade or above**.

Note: Pass (P) grades are not considered in the determination of a student's Grade Point Average (GPA). However, for credit-bearing courses, Fail (F) grades awarded on the basis of Pass (P)/Fail (F) grading system will count toward a student's GPA.

Grade Point Average

How to calculate grade point average (GPA):

1. Multiply the number of credits for each course by the quality points (noted on Grading Scale) associated with the grades received in each course.
2. Add quality points.
3. Add credits.
4. Divide quality points by the number of credits.

Failure (F) Grade

An "F" (failure) grade indicates the student's failure to complete satisfactorily the work of the course. No grade of "F" may be counted toward a graduate degree or certificate. If the course in which the "F" is received is not required for graduation, it need not be repeated. However, if the course is required, it must be repeated. If the required course involves laboratory work, both the lecture and laboratory work must be repeated, unless the instructor grants permission for a student to retake only one of these course components when repeating the required course. In all cases in which an "F" grade was received, the failing grade will remain on the transcript and will be calculated into the grade point average, unless the course is repeated. (Per the School of Education's Repeated Courses policy, when a course is repeated, both the original F and repeated course grades appear on the academic record; however, only the repeated course grade is used in calculating the grade point average.)

Withdrawal (W) Grade

The "W" (withdrawal) grade signifies an official withdrawal from a course approved by the Office of the Registrar. It is not assigned by the instructor. Students who wish to withdraw from a course must submit the facsimile Add/Drop Form (downloadable from the School of Education's website at http://education.jhu.edu/student-resources/office-of-the-registrar/forms-and-petitions/ (https://education.jhu.edu/student-resources/office-of-the-registrar/forms-and-petitions/)) in person, by fax at 410-516-9817, or by mail to the Johns Hopkins School of Education, Office of the Registrar, 2800 N. Charles St., Baltimore, MD 21218.

Incomplete (I) Grade

An "I" (incomplete) grade is used when the instructor is not prepared to give a final grade for the course because of some justifiable delay in the student's completion of specific coursework. A final grade is submitted to the Office of the Registrar by the instructor (using the Grade Change Form) after the student's completed work has been graded, provided the work was done within the agreed timeframe, as set by the instructor. In the event that the work is not completed within the agreed timeframe, and no grade is reported by the final day of classes of the subsequent semester (summer, fall, or spring), a grade of "F" automatically replaces the "I" on the student's academic transcript. The Academic Year Calendar details the last date each semester by which any "I" grades recorded in SIS are automatically replaced by "F" grades.

Repeated Courses

Graduate Students

A graduate (master's or certificate) student may voluntarily repeat one course while enrolled in a program; and it can only be a course in which a grade of B- or below was received. The course may be repeated only once.

Note: Students who are placed on academic probation may be required to repeat one or more courses as part of their Candidate Improvement Plan—see policy on Unsatisfactory Academic Standing below. Courses that students are required to repeat as part of their academic probation do not count as "voluntarily" repeated courses.

When a course is repeated, both the original and repeated course grades appear on the academic record; however, only the repeated course grade is used in calculating the grade point average. Course credit may be applied toward degree requirements only once, even if a course is repeated. The repeated course is indicated with an "R" on the academic record. Graduate students should be aware of the following when repeating courses:

- Only one course with a grade of C+, C, or C- will count toward a graduate (non-doctoral) degree program. Graduate students do not receive credit toward their degree or certificate for courses in which subsequent C+, C, or C- grades are earned.
- The number of F grades used to determine academic disciplinary actions includes repeated course grades (see policy on Unsatisfactory Academic Standing).
- Graduate (master's or certificate) students must achieve a minimum cumulative grade point average of 3.0 (on a 4.0 scale) to receive approval for graduation.
- Some programs, particularly at the master's level, may have additional grade requirements for repeated courses—for example, stricter requirements for internship courses. Students should refer to the program page in the Academic Catalogue or the program handbook (where applicable) for more information on program-specific course or grading policies.

Please note that a student may be eligible to receive federal financial aid (Title IV funds) if it is the first time that they are repeating the course.

Grade Appeals

Grades are awarded for an individual student's academic work during each semester based on that individual's mastery of the course content. Grades are determined by faculty through the exercise of their considered academic judgment, and the School of Education's administration will not override an instructor's considered academic judgment when it comes to grade award decisions. Mere disagreement or dissatisfaction with an instructor's evaluation of a student's academic work is not sufficient basis for a grade appeal. Nor may a student appeal an instructor's decision not to grade an assignment that was submitted past the specified submission deadline or if the work was submitted after the instructor has inputted the final course grade in SIS. Students who wish to appeal a grade must follow the steps in the order outlined below.

At each review level, consideration of a grade appeal is limited to an evaluation of whether or not the grade awarded was determined in accordance with the policies/standards outlined in the course syllabus. A course instructor's failure to follow the policies/standards outlined in the course syllabus—for example, a grade calculation error—may be considered evidence that the final course grade was not so determined.

A student who disagrees with the award of a grade on a particular assignment or with the final course grade must discuss the matter with the course instructor as the first step of the appeals process. If the matter remains unresolved following this initial discussion with the course instructor, the student is encouraged to ask their faculty adviser to assist as a mediator to resolve the dispute.

Note: In the event that the course instructor is also the student's faculty adviser, an alternative mediator, such as the program lead, should be identified.

Where final course grades are concerned, if the matter still cannot be resolved, the student may appeal the course instructor's decision to the Vice Dean for Academic Affairs (or designee).

Only final course grades may be appealed to the Vice Dean's level—students may not appeal grades for individual assignments to the Vice Dean's level.

Any appeal to the Vice Dean must be submitted in writing within thirty (30) calendar days after the final course grade has been posted in SIS using SOE's Course Grade Appeal Form (downloadable from the School of Education's website at http://education.jhu.edu/student-resources/office-of-the-registrar/forms-and-petitions/). When submitting an appeal, the student must provide a thorough rationale for the basis of the appeal, detail the steps that have been taken thus far to resolve the issue, and include supporting materials as evidence. The following materials should be included (where applicable) along with the appeal form: copy of the course syllabus; disputed assignment(s) in question; and correspondence between the student, the instructor, and adviser.

The grade appeal form and supporting materials can be mailed with a postmark no later than thirty (30) calendar days after the final course grade has been posted in SIS to the Johns Hopkins School of Education, Office of Student Affairs, 2800 N. Charles St. Baltimore, MD 21218 or emailed to soe.studentaffairs@jhu.edu (soe.students@jhu.edu).

The Office of Student Affairs (OSA) will review the documents to determine whether the appeal falls within the parameters established above and that it includes appropriate supporting materials. The OSA may contact the student, instructor, or adviser for additional materials or clarifications.

If the OSA is not satisfied that the appropriate conditions have been met, it will send a letter informing the student of this finding and will notify the Vice Dean of Academic Affairs of this action. A decision by the OSA to reject an appeal on this basis may not be appealed.

If the OSA is satisfied that the appropriate conditions have been met, it shall forward the grade appeal form and supporting materials to the Vice Dean of Academic Affairs (or designee), who will appoint a faculty hearing committee to review the case. The hearing committee must consist of at least three faculty members drawn from the Student Affairs Committee, plus a representative from the OSA. Following review of the body of evidence, the committee will render a decision within thirty (30) days of receiving the appeal. The OSA will submit a written letter outlining the hearing committee's decision to the Vice Dean of Academic Affairs (or designee).

The Vice Dean of Academic Affairs (or designee) will deliver the hearing committee's judgement in writing to the student, the instructor, faculty adviser, and the program lead within seven (7) days of receiving the hearing committee's decision. A copy of the letter will be placed in the student record maintained by the Office of the Registrar.

A student may, as a final action, appeal the hearing committee's decision in writing to the Dean of the School of Education within seven (7) days of receiving the decision. In such cases, the Dean (or their designee) will determine if the case warrants further consideration. Review of grade appeals at the Dean's level will focus solely on procedural considerations, assuring that internal appeal processes have been followed in accordance with stated policies. At the discretion of the Dean (or designee), a new hearing committee may be appointed to review the case and make a recommendation to the Dean (or designee). Any decision rendered by the Dean (or designee) is final and cannot be appealed further.

For appeals that reach Dean's level review stage, the School of Education shall notify the student in writing that the student's grade appeal has been received. Notification of the final decision by the Dean (or designee) concerning a final course grade appeal will be communicated to the instructor, the student's faculty adviser, and program lead, and placed in the student record maintained by the Office of the Registrar.

Note: School of Education records are sealed thirty (30) days after the conferral of a degree. After this date, no changes will be made to a student's academic record.

Grade Reports, Transcripts, and Academic Record Requests

Grade Reports

Currently enrolled students can access their semester grades and review and update their address information via the SIS Self-Service website.

Transcripts

Students who wish to obtain transcripts of their School of Education academic records should access the School of Education's website (https://education.jhu.edu/student-resources/office-of-the-registrar/transcripts-and-records/) for information on how to order transcripts online, by mail, or in person. Students who wish to obtain transcripts from previously attended colleges and universities should contact those institutions directly.

Photocopies of transcripts received by the School of Education from other domestic educational institutions will not be made available to a student. These documents are submitted specifically for consideration of admission and cannot be made available for any other use. Requests for photocopies of transcripts from international educational institutions, however, will be considered due to the difficulty of obtaining those documents directly.

Note: Transcripts are not issued for a student with an outstanding financial obligation to the University, nor will they be released without a student's signed authorization.

Academic Records Requests

Requests to inspect and/or receive copies of documents (other than transcripts from previous institutions and confidential letters of recommendation) maintained in the academic record of a student may be submitted under the provisions of the Family Educational Rights and Privacy Act of 1974 (FERPA (https://www.jhu.edu/assets/uploads/2017/01/ferpa.pdf)), as amended.

Requests must be submitted in writing with an original signature to the Johns Hopkins School of Education, Office of the Registrar, 2800 N.Charles St., Baltimore, MD 21218. Faxed requests will not be honored. For further information or questions, students should contact the Office of the Registrar at 410-516-9816.

Verification Requests

- Current students may print an enrollment verification certificate through SIS (https://sis.jhu.edu/sswf/) or submit a (https://education.jhu.edu/wp-content/uploads/2017/06/REQUEST-FOR-VERIFICATION-SERVICES818.pdf)Request for Verification Services Form (https://education.jhu.edu/student-resources/office-of-the-registrar/forms-and-petitions/).
- Alumni may request an enrollment or degree verification letter by submitting a Request for Verification Services Form .
- Third-party companies may request enrollment or degree verifications through the National Student Clearinghouse. (http://www.studentclearinghouse.org/)

For more information or assistance, contact the Office of the Registrar at 410-516-9816.

Loan Deferment Requests

Loan deferment is certification of enrollment and is processed by the Office of the Registrar. The School of Education participates in the National Student Clearinghouse, which is an industry- sponsored consortium that was created to simplify the enrollment verification and deferment processes for schools. The Clearinghouse is responsible for providing status and deferment information, on behalf of the school, to guaranty agencies, lenders, servicers, and the Department of Education's National Student Loan Data System (NSLDS).

During the second week of each month, the School electronically transmits a report of students' enrollment status to the Clearinghouse, which, in turn, will supply verification of enrollment to lending agencies. Deferment forms submitted to the Office of the Registrar will be forwarded to the Clearinghouse for processing . Students may call the Clearinghouse at 703-742-4200 if it appears a lender has not accessed the correct information.

Note: Half-time status for graduate students equates to a minimum of 4.5 credits per semester.

Family Educational Rights and Privacy Act

The University maintains its academic records in accordance with the provisions of the Family Educational Rights and Privacy Act of 1974 (commonly known as FERPA), as amended. Please see the University Policy on Family Educational Rights and Privacy (https://registrar.jhu.edu/student-privacy-ferpa/university-policy-on-family-educational-rights-and-privacy/) for more information.

Retention of Records

The academic record includes all documents related to an individual student such as application for admission, letters of recommendation, etc., as well as the record of academic performance commonly referred to as the transcript.

Retention of student records is dependent on an individual's student status within the School of Education.

- Records for individuals who are denied admission are retained for a period of two years.
- Records for students who are admitted to a program but do not register for courses are retained for a period of two years.
- Records for students who are admitted to a program, enroll, but do not complete the program and do not graduate are retained for five years after the last term of enrollment
- Records for students who are admitted to a program and graduate from that program are retained for five years from the date of graduation.

Transcript records are archived permanently in the Office of the Registrar. Documentation pertaining to registration is held only for a period of five years. If any questions should arise regarding documentation of enrollment in a course beyond that five-year period, it will be the student's responsibility to produce proper documentation to support any claim for a change to their record. **However, School of Education records are sealed thirty (30) days after the conferral of a degree. After this date, no changes will be made to a student's academic record.**

Grievances and Complaints

Introduction

When at all possible, complaints and disputes should be resolved through informal discussion by the parties involved or office against whom the student has a complaint or dispute.

The following points provide clarification as to what may not be considered under this grievance procedure.

- **Discrimination and Harassment**. Complaints alleging discrimination or harassment on the basis of race, color, gender, sex, religion, age, sexual orientation, pregnancy, national origin, ethnicity, disability, marital status, or veteran status should be referred to the University's Office of Institutional Equity (http://oie.jhu.edu/discrimination-and-harassment/) (OIE).
- **Disability**. OIE is responsible for the investigation and resolution of disability-related discrimination complaints received from faculty, staff, and students at Johns Hopkins University. For more information about filing an ADA or disability-related grievance, visit the OIE website (http://oie.jhu.edu/ada-compliance/).
- **Sexual Misconduct**. Complaints alleging sexual harassment, sexual assault, or other sexual misconduct will be investigated by OIE (http://oie.jhu.edu/sexual-misconduct/).
- **Grade Disputes**. Disputes involving grades are handled following the processes laid out in the School of Education's grade appeals policy (https://education.jhu.edu/academics/academic-policies/grading-system-academic-records/grade-appeals/).
- **Student Academic Conduct**. Disputes involving academic conduct are handled pursuant to the School of Education's academic misconduct policy (https://education.jhu.edu/academic-policies/academic-student-conduct-policies/).
- **Student Non-Academic Conduct**. Disputes involving student conduct of a non-academic nature are governed by the University's student conduct code (https://studentaffairs.jhu.edu/policies-guidelines/student-code/).

Filing a Formal Grievance

If the type of grievance is not covered by a specific policy above, students may submit a formal grievance (https://policies.jhu.edu/?event=render&mid=764&pid=32463&fid=policy_32463.pdf&_=0.713895637856) to the University

Admission

General Admission Policy

Johns Hopkins University is committed to equal opportunity for its faculty, staff, and students. To that end, the University does not discriminate on the basis of sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, or other legally protected characteristic. The University is committed to providing qualified individuals access to all academic and employment programs, benefits and activities based on demonstrated ability, performance, and merit without regard to personal factors that are irrelevant to the program involved.

Admission decisions are based on a holistic evaluation of the quality of the applicant's prior academic degrees and record, the essay/statement of purpose, letters of recommendation from professors or others familiar with the applicant's academic work, where required -performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, the appropriateness of the applicant's goals to the graduate program, and for some programs the compatibility of the applicant's research interests with those of the program faculty and the School.

Students must apply online to be admitted to a School of Education degree or certificate program. At a minimum, the application requirements will include:

- A completed online application form and payment of the $80 application fee (unless otherwise waived).
- An essay/statement of purpose (instructions and length will vary by program).
- A CV or résumé.
- Signed letters of recommendation (number determined by individual program).
- Official transcripts from all post-secondary institutions attended.

Official Transcripts

Official transcript(s) from prior undergraduate and graduate (if applicable) institutions are required.

- An official transcript is defined as a transcript received directly from the issuing institution (whether on paper and still in the envelope or a certified electronic copy) that is appropriately signed/authenticated.
- Official transcripts from all post-secondary institutions are required, not only from the institutions that conferred the degree(s). Transcripts must reflect all coursework taken from every post-secondary institution attended, even if you transferred, withdrew, did not graduate, or the coursework appears on other transcripts.

- College seniors in their final academic year should submit current official transcripts from all previous colleges or universities attended directly after completing the online application, followed by a final official transcript showing the award of the baccalaureate degree before the first semester or term enrolled at the School of Education.

Admissions Policy

To qualify for admissions, applicants must meet the below-listed criteria.

- For Master's and graduate certificate programs, applicants for admission must present official transcript evidence of receipt of a four-year baccalaureate degree (or equivalent) from a regionally-accredited institution of higher education.
- For doctoral programs, applicants must present official transcript evidence of receipt of a four-year bachelor's degree (or its equivalent) and a master's degree of appropriate length from a regionally-accredited higher education institution.
- SOE's admissions policy stipulates that a bachelor's degree or higher-level degree must be from an institution of good standing and comparable to a degree from Johns Hopkins University, both in the distribution of academic subject matter and in scholarship achievement.

JHU SOE has the authority to determine whether another institution is of comparable or acceptable standing; in general, national regional accreditation for U.S. institutions and authorization by a national higher education authority for international institutions is considered acceptable.

- For both undergraduate and graduate degrees, the applicant must have earned a minimum cumulative grade point average (GPA) of 3.0 (on a 4.0 scale) in all previous undergraduate and graduate studies (including for incomplete programs of study and programs still in progress).

Note: In exceptional circumstances, the School of Education may consider admitting an applicant whose GPA falls below a 3.0 GPA. Applicants with a sub-3.0 GPA must demonstrate other qualities that suggest they can succeed in a given academic program.

Official records of undergraduate and, where applicable, graduate transcripts must be mailed or delivered through the issuing institution's electronic transcript delivery service to the Office of Admissions. At the same time, other application materials—the essay, CV/ résumé, and signed letters of recommendation—can be uploaded electronically into the online application.

Mailing address:
Johns Hopkins School of Education Office of Admissions
2800 N. Charles Street
Baltimore, MD 21218

Electronic Delivery from issuing institutions & testing providers:
Email soe.admissions@jhu.edu

The Office of Admissions will not accept documentation such as grade reports, student advising reports, screenshots of student accounts, or any other document not released by the Registrar as a substitute for an official, authenticated transcript.

Academic records (transcripts, diplomas, and degree certificates) from non-U.S. institutions must be evaluated by an authorized credential evaluation agency and sent to the Office of Admissions in place of transcripts. A course-by-course evaluation is required for all post-secondary credentials (undergraduate and graduate, if applicable) for academic coursework completed outside the United States and Canada (see International Student Admission Policy).

Note: This does not pertain to students from the United States and Canada spending a semester or year abroad, often referred to as "study abroad."

Supplemental Materials

Applicants should consult the Admissions section of the SOE website and individual program webpages to determine specific admission Criteria, suitability of prior qualifications, or certification requirements for individual programs. Examples of supplemental materials include:

- Third letter of recommendation: A third letter of recommendation can also be included in the recommendation section of the online application.
- Academic writing sample: This should also be uploaded with the online application if required.
- Standardized tests: If required, all test scores must be official scores sent directly from the test administrator to the Office of Admissions and must be received by the stated applicant deadlines.

Official Score Reports and Time Limitations of Standardized Tests

Applicants for admission must have the respective testing agency - Educational Testing Service or the International English Language Testing System (IELTS) - provides the Office of Admissions with official score reports being considered for admission. Candidates are responsible for verifying the identification of the correct JHU School upon selecting the electronic delivery of the official examination score report.

Graduate Record Examinations must have been taken within five years of the start of the desired admission term, and the English language proficiency exam - Test of English as a Foreign Language (TOEFL) or the IELTS proficiency exam - must have been taken within two years of the start of the desired admission term to be considered valid scores for admission consideration.

For the GRE, TOEFL, or other tests administered by Educational Testing Services (ETS), the assigned institution code for the School of Education is as follows:

- GRE Institution code 5470
- TOEFL Institution code 8585

The School of Education's other testing provider institution codes include:

- CLEP Institution Code 3928
- Praxis Institution Code 5332
- SAT Institution Code 3926
- ACT Institution Code 8804

Falsification & Accuracy of Application Materials

The School of Education reserves the right to rescind any offer of admission if any discrepancies are found between uploaded and official academic records and test scores or if altered or forged documents are submitted. All official transcripts from previous institutions (whether a degree has been earned or not) are required to be listed on the online application form and submitted in an official format to the Office of Admissions. Additionally, if any essay, personal statement, or supplemental materials contain plagiarized information, the School of Education will rescind any admission offer. If this information is discovered after enrollment at the institution, disciplinary action may be taken up to and including dismissal from the School.

Admissions Records Maintenance and Disposal

All admissions documents, including academic records sent from other institutions and graduate admission exams, become the property of the Office of Admissions and part of the applicant's official university file. These documents will not be returned to the applicant. Admission credentials are retained for only one year. They are subsequently destroyed if applicants do not register for courses within the period for which the offer of admission is valid, have been denied admission, do not respond to requests for additional information, or fail to submit complete applications.

Admissions Deadlines

Only complete applications will be eligible for review. An application is considered complete when all required application materials are received by the Office of Admissions on or before the designated, posted deadline.

It is the applicant's responsibility to ensure that all materials are in the Office of Admission by the appropriate deadline.

The Office of Admissions reserves the right to deny any application that arrives after the deadline. Should any deadline fall on a weekend or official holiday, the in-office deadline will be the next business day.

Applicants should consult the Admissions, Deadlines & Requirements section of the website to determine specific deadlines for applying. Where listed rolling admission means that completed applications are reviewed until approximately three weeks before the program's start date. Applications will be accepted until programs reach capacity. If a program reaches full capacity, a notice will be posted on the admissions and individual program pages. Applicants applying for federal financial aid or scholarship consideration are recommended to submit a completed application by April.

Admissions Review Process & Timeframe for Notification of Decision

The Office of Admissions receives and processes all applications for admission to School of Education programs and works closely with applicants and the programs areas to verify the status of an application. Each program determines its process for reviewing completed applications. The length of the application review process and timeframe for receiving an admission decision varies from program to program.

Some programs review and make recommendations on a rolling basis; others meet regularly to review applications and make decisions based on a set schedule. Because there is no one standard process programs use to review applications and establish timeframes, the Office of Admissions cannot provide a specific timeframe between submission and receipt of decision for applicants.

Determination of Admissibility

Admission to the School of Education is determined at the individual academic program level. Admission decisions are made after a full review of the materials in the completed application. Programs consider grade point average and, for some programs, standardized test scores. The application review process also considers individual learners' professional experience and other distinctive characteristics.

Qualified applicants may also be contacted to schedule a personal or group admission interview. Students who are found to have provided fraudulent or incomplete information during the admission process may be disqualified or have any offer of admission rescinded.

Admission Decision Notification & Responding to Offers of Admission

Admitted applicants can expect to receive a notification of their decision by email. Applicants will be required to accept or decline the offer of admission using the School of Education's online application portal. The School of Education offers admission with the expectation that students will enroll in courses in the semester for which they are admitted, unless a deferral is granted (see below).

Admissions Deferral Requests

Requests for deferred admission will be considered by a program only after an admission offer has been made and accepted and an enrollment deposit paid (if required by the program). If a deferral is granted, the applicant may not apply to any other School of Education program. A student who requests and is approved to defer admission is considered under an obligation to enroll and attend the academic program the following year. Admitted students may request to defer admission into a program for up to two semesters or one year from their admission semester.

The following SOE programs do not offer admission deferral:

- Doctor of Education Online (EdD)
- Doctor of Philosophy in Education (PhD)
- MS Education Policy
- MS Educational Studies/TFA-TNTP
- MS Educational Studies/Urban Teachers
- MS Education/ International Teaching and Global Leadership cohort
- Graduate Special Students/Non-Degree Seeking

To request a deferral of admission, complete the Deferral Request Form located on the SOE Admissions website. Admitted students cannot defer admission once they have registered for a course in the School of Education. Financial aid and tuition support (e.g., awards) are not automatically deferred. Please contact the Financial Aid Office before requesting a deferral.

Note: Newly admitted students who have registered (matriculated) for a course and intend to withdraw from courses (s) in their first semester should contact the Office of the Registrar - see also Withdrawing from a Course.

Note: Veterans applying for readmission following inactivation/deactivation of a previous admission decision cannot be denied entrance for reasons relating to their service.

Health Insurance for School of Education Students

The School of Education offers full- and part-time certificate and degree-seeking students health, dental, and vision insurance coverage. It is university policy that all full-time students maintain adequate health insurance coverage to protect against unexpected accidents and illnesses. All students enrolled in full-time programs and currently without health insurance coverage should enroll in the Johns Hopkins University Student Health Benefit plan. (*Note: Full-time students with pre-existing health insurance coverage can choose not to enroll in the university plan.*)

International Students with an F-1 or J-1 visa status must purchase the university plan and are enrolled automatically.

The university plan is administered by Wellfleet (https://wellfleetstudent.com/), which has contracted with Cigna's network of providers. The annual coverage period is August 15, 2022, to August 14, 2023. Please note that this is a yearly plan with only one enrollment period.

Students can enroll in the plan via the SIS Self-Service website (look for the "Personal Info" tab and then select "Health Insurance"). Coverage will automatically renew for the spring once a student enrolls in spring semester courses. Students are billed for the premium on their SIS student account and are subject to the payment guidelines of the Office of Student Accounts unless other payment arrangements have been made. Coverage for eligible dependents is available at an additional cost.

Plan Details

For more detailed information about the Johns Hopkins University Student Health Benefit plan, please visit the JHU Student Health benefit site (https://education.jhu.edu/student-resources/office-of-the-registrar/tuition-costs-and-benefits-information/health-insurance-information/) or on the JHU benefits site (https://benefits.jhu.edu/health-and-life/student_health/overview.cfm).

To locate the nearest hospital or health care provider part of the Cigna PPO Network, visit the Cigna website at http://www.cigna.com/ or contact Wellfleet (https://wellfleetstudent.com/) at (877) 657-5044.

For information regarding the vision plan, visit the human resources website (https://hr.jhu.edu/benefits-worklife/health-life/student-health-benefits/eyemed-vision-plan/); for information regarding the new dental plan, visit Delta Dental on the website (https://hr.jhu.edu/benefits-worklife/health-life/student-health-benefits/delta-dental-plan/). Additional resources and cost of coverage information can be found on the JHU benefits website (https://hr.jhu.edu/benefits-worklife/health-life/student-health-benefits/resources-and-cost-of-coverage/) or by contacting JHUStudentBenefits@jhu.edu (JHUStudentBenefits@jhu.edu).

It is the student's responsibility to be an informed consumer, know how the plan works, benefits, providers, payment responsibility, etc. Please note that Wellfleet is the insurer, while Cigna is the provider. All plan questions should be directed to Wellfleet, not Cigna. For more detailed information about the insurance plan or if your academic program does not begin in the fall, visit Wellfleet at https://wellfleetstudent.com/ or call (877) 657-5044 directly. You may also seek support using SEAM's online form. (https://support.sis.jhu.edu/case/)

ID Cards

A copy of your Insurance ID card will be available to print through SIS at the start of the plan period.

If Your Current Non-JHU Insurance Coverage Is Ending

Currently enrolled students whose existing non-JHU health insurance coverage is ending can enroll in the Johns Hopkins University Student Health Benefit plan due to a qualifying life event before the published enrollment date by submitting a copy of the termination letter from their current insurance carrier to soe.registration@jhu.edu. New coverage is available beginning the 15th of each month and continues until the next regular enrollment date.

International Student Admission Policy

Demonstration of English Language Proficiency

Non-U.S. citizens from countries where English is not the official language are required to submit one of the following standardized tests as part of the admissions application process. A waiver for the English language proficiency requirement may be granted for some applicants who meet specific criteria. Please reference the Waiver section below for more information.

Accepted English Language Proficiency Tests

- TOEFL Internet-Based Test
- IELTS Academic or the IELTS Academic indicator Online Test
- JHU J-Test Online

For more information on English Language Proficiency Testing, please visit the International Student Admissions section of the SOE website.

English Language Testing Waiver Request Form

The English language proficiency requirement may be waived if the applicant meets at least one of these criteria:

- Is a citizen or permanent resident of the United States or a citizen of the United Kingdom, Ireland, Australia, New Zealand, or Canada (except Quebec).

Applicants who are citizens of India, Pakistan, the Philippines, Hong Kong, Singapore, etc., are not exempt from the requirement.

- At the time you enroll at Johns Hopkins School of Education, you will have studied in full-time status for at least two academic years in the United States, the United Kingdom, Ireland, Australia, or New Zealand, or with English language instruction in Canada or South Africa. Even if English was the language of instruction at your school, you are not exempt from the requirement if you did not study in one of these countries.

If you qualify for a waiver, you can locate the waiver form in the online application. You will be required to upload a short paragraph explaining the criteria met; you must also submit a transcript that shows you attended college in one of the approved locations and that your academic program was at least two years in length.

International Credential Evaluation

International applicants must hold, or be in the process of obtaining, the equivalent of a 120 credit U.S. baccalaureate degree (four years) from the equivalent of a regionally-accredited institution to be eligible for admission to Johns Hopkins School of Education masters or graduate certificate programs. The determination of degree equivalency to U.S. degrees is at the discretion of the Johns Hopkins School of Education.

Applicants who hold qualifying degrees or have earned credits from institutions outside the United States or English-speaking Canada must have their academic records evaluated by an accredited independent credential evaluation agency before being considered for admission to a degree program.

It is the applicant's responsibility to provide the necessary paperwork and payment to an approved evaluation service and request that an official copy of the report be sent to Johns Hopkins School of Education Office of

Admission directly from the evaluation agency. When selecting the type of evaluation, please select the course by course evaluation option.

Approved International Credential Evaluation Agencies

For international or internationally-educated applicants seeking to obtain a credential evaluation for academic transcripts and degrees, the Johns Hopkins School of Education approves the use of any National Association of Credential Evaluation Services (NACES) approved service. The course by course evaluation allows the School of Education faculty committee reviewers to properly understand your academic success and original transcripts confirm the authenticity of the applicant's degree.

Below is a shortlist of NACES approved agencies. For a complete listing of approved agencies, please visit the NACES website. Note: Applicants are not required to send additional, separate authentic institutional transcripts to the School of Education in addition to those required to be sent to the credential service.

World Education Services (https://www.wes.org/) (WES)

Educational Credential Evaluators (https://www.ece.org/) (ECE)

Educational Perspectives (https://www.edperspective.org/)

Foundation for International Services (https://www.fis-web.com/)

SpanTran (https://spantran.com/web/contact/)

Degrees from Canada

Degrees or credits earned at a Canadian higher education institution do not require international course-by-course evaluation if (1) the transcript is in English and (2) the institution is a member of Universities Canada (formerly the Association of Universities and Colleges of Canada (AUCC) or other accrediting body recognized by the United States Department of Education. If you received a degree from a college or university in English-speaking Canada, please have your institution submit transcripts directly to the Johns Hopkins School of Education Office of Admission.

Evaluation reports may be sent electronically from the evaluation service to: soe.admissions@jhu.edu or by mail to the address below:

Johns Hopkins School of Education Office of Admissions
2800 N. Charles Street
Baltimore, MD 21218

Admissions Policy & Three Year Bachelor's Degrees

The Johns Hopkins University School of Education's admission policy requires that an applicant have a bachelor's degree from a regionally accredited college or university or equivalent as determined by a regional accrediting agency. These accrediting agencies define bachelor's degrees in the U.S. require four years to complete with 120-semester credits. Applicants who have completed accelerated degree programs in less than four years but have earned the equivalent of 120 U.S. semester credits may apply.

Prospective students who have earned a bachelor's degree three years in length and under the equivalent of 120 U.S. semester credits should consult with the Office of Admissions before starting or submitting an online application.

If the School of Education's Office of Admissions receives a transcript or course-by-course evaluation that indicates that an applicant's degree (in progress or completed) is not equivalent to a four-year U.S. bachelor's degree, an applicant will be notified and may have their application inactivated or withdrawn.

The Johns Hopkins School of Education does not currently offer undergraduate courses for applicants to enroll in a fourth year of undergraduate study or bridge program, nor can our Admissions representatives advise applicants with three-year degrees on pathways to completing additional course credits to meet this requirement. We recommend that prospective students in this situation speak to an academic advisor at their bachelor-degree granting institution to determine the best pathway to achieving this outcome.

Admissions Policy for International Students Requiring a Student (F-1) Visa

An international applicant requiring a student (F-1) visa to attend school must obtain full admission to a degree program well before the start of the semester. The School of Education does not issue certificates of eligibility (Form I-20) for:

1. program that is designated as part-time enrollment only
2. a fully online program, or
3. any certificate programs.

The application and other required admission documents must be received by the Office of Admissions on or before the posted application deadlines. If applications and other required documents are not received by the Office of Admissions on or before the deadline, the application will automatically be considered for the next available semester. F-1 students must prove that they can afford all tuition and expenses for the academic year to receive their I-20 documents.

Upon receipt of an acceptance package from the School of Education, the international student who needs to obtain a student (F-1) visa is required to contact the Office of International Services (OIS, https://ois.jhu.edu/) at 667-208-7001 or ois@jhu.edu to request a certificate of eligibility (Form I-20). The I-20 is not automatically sent with the acceptance package. Before an I-20 is issued, the international student is required to send financial documentation and a notarized affidavit of support to:

Johns Hopkins School of Education Office of Admissions
2800 N. Charles Street
Baltimore, MD 21218

To maintain F-1 visa status, students must adhere to the regulations set by the U.S. Citizenship and Immigration Services (USCIS). Failure to abide by any of the regulations could result in students being considered "out-of-status" by USCIS.

Upon arrival at Johns Hopkins, international students on an F-1 visa must visit the OIS and bring passports, I-94 cards, and I-20s. Before leaving the United States for any reason, the I-20 must be signed by an OIS staff member for the student to re-enter the country. It is imperative to schedule an appointment with the OIS four weeks before departure.

Students on an F-1 visa must pursue a full-time course of study in a residential program at the school listed on the currently valid Form I-20 during every academic session or semester, except during official school breaks. Full-time status/entire course of study is defined by the School of Education as being enrolled in minimally nine credits each fall and nine credits each spring semester for graduate study and as being enrolled in minimally 12 credits each fall and 12 credits each spring semester for undergraduate study.

Summer semester courses are not considered when calculating full-time F-1 visa status, although credit earned during summer semester courses may be applied toward a student's degree.

To comply with USCIS regulations, all F-1 students must register for the full course load at the beginning of each fall and each spring semester. Other regulations are outlined in the international student's letter and I-20 Form.

Assisting students with F-1 visas is central to the support for international students provided by OIS. The office can also help students who hold other nonimmigrant visas and direct them to the appropriate resources or government offices. If students are unclear about the type of visa they should obtain, they should visit the USCIS website at www.uscis.gov (http://www.uscis.gov/) (http://www.uscis.gov (http://www.uscis.gov/)) for additional information or contact OIS at 667-208-7001 or ois@jhu.edu with any questions.

All current international students on F-1 visas sponsored by the School of Education are automatically subscribed to the International Service listserv upon the first semester of enrollment. Regular updates are sent regarding visa-related matters and other items of interest to international students.

Note: Federal financial aid is not available for international students.

Note: For summer semester admissions, international applicants may be considered for full-time graduate degree programs only. Applications for part-time degree programs beginning in the summer will not be considered.

International Graduate Special Students (Non-Degree)

International applicants who hold visas other than an F-1 visa and wish to enroll as part-time Graduate Special Students (Non-Degree) should follow the application directions outlined under Graduate Special Students (Non-Degree). International graduate students attending other institutions on student (F-1) visas during the regular academic year are also welcome to enroll as Graduate Special Students (Non-Degree) during the summer.

Graduate Special Students (Non-Degree)

Post-baccalaureate students who wish to take graduate-level credit courses (.500-level and above) but are not interested in earning a degree or certificate may enroll as Graduate Special Students (Non-Degree). Potential Graduate Special Student (Non-Degree) applicants should review the Admissions website and speak to a representative from the Office of Admissions (1-877-548-7631) before applying.

Note: Certain degree program courses are not available for students enrolled as Graduate Special students. Applicants are encouraged to confirm their eligibility and availability of their desired courses before applying for Non-Degree status. The Doctor of Education and Doctor of Philosophy degree programs do not permit Graduate Special students to enroll in doctoral-level courses. Prospective Graduate Special student (Non-Degree) applicants should speak with the Office of Admissions (1-877-548-7631) before applying and review the information located on the Admissions website.

Restrictions for Graduate, Non-Degree Status Students

Students enrolled in the Graduate Special Student (Non-Degree Program status) are not eligible for Federal Financial Aid and do not qualify as matriculated or enrolled in an academic program for loan deferment/forbearance programs.

Students enrolled in the Graduate Special Student (Non-Degree Program status) are not eligible to use their Veteran's benefits.

Students enrolled in the Graduate Special Student (Non-Degree Program status) are not eligible to participate in the JHU Student Health Insurance Program.

Students that have been previously academically dismissed or dismissed for student conduct violations from any SOE program may not reapply under Graduate Special Student [Non-Degree Program status].

Grad Special student non-degree admission does not guarantee later admission as a degree student.

A candidate may not submit a degree and non-degree application for the same entry term.

Per federal regulations, international applicants seeking an immigrant study visa are not eligible for admission under the Graduate Special Student Program status.

Requirements

Graduate Special Students (Non-Degree) must meet all prerequisites for course registration and are subject to School of Education academic standards. Graduate Special Students (Non-Degree) must possess a four-year bachelor's or its equivalent and a graduate degree from an accredited college or university and have earned a minimum cumulative grade point average of at least 3.0 (on a 4.0 scale) in all previous undergraduate and graduate studies (including incomplete programs of study and for programs still in progress). Applicants wishing to register for courses above the .500-level must receive approval from the academic area of emphasis to which the course belongs. Some courses are restricted to degree-seeking students only. Graduate Special Student (Non-Degree) applicants must submit:

- An application online
- A $25 application fee
- Official transcripts from all accredited post-secondary institutions attended.

Graduate Special Student (Non-Degree) applicants will receive an admission decision via email.

Graduate Special Students (Non-Degree) Seeking to Apply to a Full Degree/Certificate Program

Graduate Special Students (Non-Degree) who subsequently wish to enroll in a School of Education degree or certificate program must submit a new application and all required supporting materials (see General Admission Policy). Prior admission as a Graduate Special Student (Non-Degree) does not guarantee subsequent admission to a School of Education degree or certificate program. Any application of credits earned as a Graduate Special Student (Non-Degree) toward a degree or certificate is subject to approval by the program to which the applicant is seeking admission. The number of credits earned by a Graduate Special Student (Non-Degree) that may be applied toward a School of Education degree or certificate varies by program, but in no case shall exceed nine credits. Graduate Special Students (Non-Degree) who do not intend to pursue or apply credits toward a degree or certificate program may register for courses totaling more than nine credits, but in no circumstances can these additional credits be applied toward a School of Education degree or certificate program.

School of Education Alumni Seeking to Enroll as Graduate Special Students (Non-Degree)

Graduate Special Student (Non-Degree) status is well suited for School of Education graduate degree- and certificate-holders who are interested in taking additional courses for personal and professional development, as opposed to pursuing another degree or certificate. School of Education alumni may enroll in other classes by completing the online application. No additional transcripts or application fees are required for this status.

Reapplication and Readmission Policy

If you meet any of the following criteria, you must apply for readmission to the School of Education:

- If you have not registered or been enrolled for three or more consecutive semesters (one full academic year)
- If you officially withdrew from the School
- Applicants who declined a previous offer of admission must submit a new application. The application fee is required

Note: Former School of Education students dismissed for academic or disciplinary reasons are not eligible to re-apply or be considered for readmission to any SOE degree program or non-degree status.

Transfer of Graduate Credits

The maximum number of graduate credits earned at another accredited college or university that may be transferred into a graduate certificate or master's program in the School of Education varies by program, but in no case shall exceed three credits for graduate certificates and six credits for master's degrees. The maximum number of transferable graduate credits allowed for doctoral programs is Thirty-six credits for the EdD program (42 credits in some instances) and 12 credits for the PhD program. Graduate-level credits earned as part of a bachelor's degree program cannot be transferred into an SOE graduate program.

For graduate certificate or master's programs, the School of Education will only accept transfer credits for courses taken no more than five years before a student's acceptance into the program. The final decision regarding whether or not to accept graduate transfer credits, whether earned externally or internally (i.e., via another School of Education or other Johns Hopkins University graduate program), into a School of Education certificate or degree program rests:

(for applicants) with the respective program, or

(for enrolled students) with the faculty adviser or major adviser (for doctoral students), and will be decided upon on a case by case basis.

Only graduate-level credits earned at the grade of "B" or above (or equivalent) may be transferred into a School of Education graduate degree or certificate program.

A matriculated graduate student in the School who, under extraordinary circumstances, wishes to take a course offered by another institution to satisfy School of Education degree requirements must obtain written approval in advance from the Vice Dean for Academic Affairs (or designee). Permission is granted only in exceptional cases.

Changing Programs

Applicants

Applicants to degree or certificate programs who wish to change to another degree or certificate program offered within the School of Education must submit a request in writing to the Office of Admissions at soe.admissions@jhu.edu. The Office of Admissions will determine if a new application is required.

Admitted Students

Students who have already been admitted to a degree or certificate program and who wish to change to another degree or certificate program within the same program area must request the change to be approved by the Program Lead or Department Chair. If an admitted student wishes to change to another degree or certificate program outside the program area where the original offer of admission was granted, s/he must contact the Office of Admissions for further instructions. A program change may require submitting a new application form and any additional admissions materials not required as part of the original application (for example, a writing sample may now be required).

Admitted students seeking to change programs are not automatically admitted to a new program; their requests must be approved by the appropriate person(s) and the decision communicated directly to the student. Financial aid recipients must notify the Financial Aid Office when changing a degree or certificate program.

Adding a Second Master's Degree

Graduates with a School of Education master's degree who subsequently enroll in a second master's program must complete 30 additional credits beyond the first master's program to earn a second master's degree. The second master's program may, however, include specific program requirements that obligate students to take more than the minimum 30 additional credits. (Refer to individual program descriptions for specific credit requirements.) Students should submit an online application. Application requirements (excluding transcripts and fees) such as the essay, CV/résumé, dispositions survey, and signed letters of recommendation can be uploaded electronically using SIS Self-Service or mailed to:

Johns Hopkins School of Education Office of Admissions
2800 N. Charles Street
Baltimore, MD 21218

Note: Students may not enroll in (or apply for admission to enroll in) two master's programs concurrently.

Admission to Other Schools of the University

Students in the School of Education who wish to transfer to one of the other schools in the university (such as Engineering, Public Health, or the Carey Business School) are required to submit an admission application to that school. Admission to the School of Education establishes no claim or priority for admission to any other school in the University. Documents submitted to the School of Education as part of the application process are not transferable to other schools of the University and remain on file within the School of Education for one year.

Graduation

A student who expects to receive a degree or certificate must submit an Application for Graduation Form and graduation fee of $175. If earning both a certificate and a degree in the same academic year, only one graduation fee of $175 needs to be paid. In order to graduate and receive a diploma for completion of a degree or certificate program, students must first have applied to and been admitted into that same program(s) prior to applying to graduate.

Students who are planning to graduate should apply for graduation using the online graduation application form available through SIS Self-Service. The link to the application is in the Registration menu under Program of Study Information. A copy of the graduation form is also available outside of SIS self-service at: https://education.jhu.edu/student-resources/office-of-the-registrar/forms-and-petitions/ .

All students, regardless of whether or not they plan to attend the ceremonies, need to complete this application for graduation approval. **Students must complete separate applications for each degree and/or certificate they expect to receive.** Students who have submitted the Application for Graduation will receive a confirmation email from SIS. Their names are placed on the tentative graduation list for the semester in which they anticipate completing their degree/certificate requirements.

Students who are planning to graduate should complete all coursework on time and should not request or receive the grade of "I" (incomplete) during their final semester. **Note: School of Education records are sealed thirty (30) days after the conferral of a degree. After this date, no changes will be made to a student's academic record. Therefore, it is imperative that students verify all information on their academic record and request any corrections be made before their records are sealed.**

The Johns Hopkins University confers degrees at the end of the summer, fall, and spring semesters. The commencement ceremonies are held in May. The May commencement brochure will include the names of those students who applied to graduate by the designated deadlines for the academic year. (See the application deadlines at the end of this section.)

All graduates will receive their diplomas by mail approximately 4-6 weeks after their degree conferral date. To receive their diplomas, students must pay all student accounts in full and resolve all outstanding charges of misconduct and violations of academic integrity.

The deadlines (which are also listed in the Academic Year Calendar) for submitting the graduation application form and fees are as follows:

Semester	Application Deadline
Summer	May 31 (conferral date August 26, 2022)
Fall	August 29 (conferral date December 30, 2022)
Spring	January 23 (conferral date May 25, 2023)

Note: Johns Hopkins diplomas indicate the degree qualification and major without identifying the student's concentration.

Programs

Doctoral Programs

Education (Online), EdD

To address the dramatically changing landscape of education in the 21st century, which includes new research on the science of learning, advances in technology, and the emergence of a for-profit education sector, the Johns Hopkins School of Education offers an innovative online Doctor of Education degree program. This EdD program is designed to prepare an exceptional corps of educational practitioner-scholars, both nationally and internationally, who can set a high standard for transformational leadership in education, apply evidence-based practices to improve educational outcomes, and meet the vast challenges associated with improving learning outcomes in both public and private educational environments.

For the most up-to-date information about the EdD program, please visit https://education.jhu.edu/academics/edd/. If you have any questions about the EdD program, please contact soe.edd@jhu.edu.

Admission Requirements

At minimum, applicants to the EdD program should hold a master's degree from an accredited college or university. Previous degrees must document high academic achievement (a minimum GPA of 3.0) in an area of study closely associated with the objectives of the program. If the earned degree or credit is from an educational institution abroad, the candidate's academic record must be evaluated by a credential evaluation agency before consideration for admission. Applicants must submit the online admission application form, application fee, official transcripts from all post-secondary institutions attended, a curriculum vitae (résumé), online interview, and two letters of recommendations signed by the recommender. These letters should include the following:

1. A professor with whom the applicant worked in their master's program or an individual from their professional context who can speak to the applicant's competency to conduct rigorous scholarly work, and
2. A colleague/supervisor from the applicant's professional context who can attest to:
   a. the applicant's qualifications to pursue a doctorate,
   b. the applicant's impact on their professional practice, and
   c. knowledge of and support for the applicant's area of research/ Problem of Practice.

District support for the applicant's research within their context of professional practice is an important component of the admission process. Additionally, applicants will submit a personal statement including responses to the following:

- Describe a significant Problem of Practice relevant to your current context of professional practice.
- Indicate the importance of this problem within the educational landscape as well as the candidate's context of professional practice.
- Discuss the potential underlying causes for or contributing factors related to this Problem of Practice.
- Discuss the ways in which this problem aligns with one chosen area of interest.

All applicants who meet the entrance requirements will be asked to submit video and written responses to question prompts.

International students must fulfill the general requirements for admission and complete additional requirements—see https://education.jhu.edu/admission-financial-aid/admissions/international-applicants/.

Note: This program is not eligible for student visa sponsorship.

Students who enter the program are expected to possess an understanding of introductory research methods topics and will be required to successfully complete a series of pre-orientation modules prior to enrollment in the program. All students are expected to show competence in the content areas of these modules.

Please note that for the online EdD program, an offer of admission is for the specific cohort to which an application is submitted. Students may accept or decline the admission offer only; deferring to a future cohort is not an option.

Program Requirements

Program Structure and Requirements

Program requirements include a minimum of 90 graduate credits. Students must enter the program with a master's degree with a minimum of 36 graduate-level credits, which will be transferred into the EdD program. If a student does not have the required 36 master's credits, the student will be admitted on a conditional basis and must complete the additional graduate-level credits at an accredited college or university. Students with post-master's graduate credit in related education content completed prior to admission to the EdD program may petition to transfer in an additional six credits of equivalent coursework with appropriate documentation and with the approval of the EdD program director. Thus, students must complete between 48 and 54 credits at the doctoral level at JHU. The program includes the following required coursework components (subject to change):

- Foundations of Education/Applied Research and Evaluation (24 credit hours)
- Areas of Interest (18 elective credit hours)
- Doctoral Dossier Research (12 credit hours)*

In addition to successfully completing all the coursework requirements, candidates must also satisfy written assessments and an oral comprehensive examination that document attainment of competencies and a Doctoral Dossier research project.

*Students who extend their program of study may be required to enroll in additional independent study credits.

Problems of Practice and Doctoral Dossier

Students examine a Problem of Practice (POP), which is an area of concern they have observed within their professional context. This POP becomes the focus of the student's Doctoral Dossier. The Doctoral Dossier is embedded within the EdD program coursework, which provides students with a unique opportunity to examine an issue important to the organization in which they are employed. Students will demonstrate mastery of first- and second-year competencies through written and oral comprehensive assessments, which will serve as indicators of readiness for conducting their Doctoral Dossier projects.

To begin their Doctoral Dossier process, students will conduct a literature review and systems and stakeholder analyses to be documented in an introductory narrative. This narrative provides the rationale and supporting evidence for the student's decisions to pursue their research topic and their Scholarship of Discovery project, wherein students conduct evidence-based research that leads to knowledge creation. Upon completion of the Scholarship of Discovery project, students will then choose one of two projects to serve as their second and final project:

1) Scholarship of Application: *Demonstrate the application of the research to practice.* The purpose of this project is to a) consider how the research perpetuates and/or disrupts oppression, b) critique relevant systems, structures, and institutions, and c) determine avenues to effectively disseminate evidence to a wider audience and stakeholder group.

2) Scholarship of Integration: *Articulate insights from existing literature.* The purpose includes interpretation and/or identifying and articulating the patterns in which this and others' research fits. Students will present an overview of findings and identify ways to synthesize findings from different disciplines to see areas of convergence and divergence. Trends and new ways of seeing knowledge should be articulated.

Upon completion of their final project, students will create a final reflection, tying all aspects of their narrative and two projects together. The Doctoral Dossier will be presented at a final oral defense before a Doctoral Dossier Panel.

As part of our commitment to social justice, the EdD program does not privilege one form of communication over another. Thus, all components of the Doctoral Dossier can be communicated in a modality of the student's choosing: video, oral, scholarly writing, or public-facing writing.

Typically, we expect that students would complete four years of coursework and independent research concurrently. It is possible that some students may need more than four years to complete their research, in which case they will be required to enroll in at least one credit hour per semester after completion of the required 90 credit hours.

Learning Outcomes

Program Goals

Upon successful completion of the EdD, we expect that graduates will:

- Participate as a self-reflexive, social justice-oriented learner within diverse educational or learning communities.
- Analyze and critique educational practice and research from a social justice and systems perspective.
- Apply relevant methodologies to address critical challenges in education.
- Demonstrate a curiosity for, and a systematic approach to, at least one major topic of study within education resulting in an emerging expertise.
- Integrate research and practice-based knowledge to develop research-informed decisions and opinions about educational experiences, processes, policies, and institutions.
- Communicate effectively to diverse audiences about educational research, experiences, processes, policies, and institutions.

Education, PhD

The overarching goal of the School of Education's PhD in Education program is to develop scholars who will have advanced research skills for improving education practice, with specific emphases on policy analysis and education improvement. The program strives to prepare candidates that are equipped to:

1. meet the myriad challenges associated with systemic education change;
2. apply exceptional content area expertise contextualized within a comprehensive multidisciplinary frame of reference;
3. successfully bridge the theory and research to evidence-based practice gap;
4. be actively involved in public policy development and evaluation;
5. conduct research on complex databases linking educational practices to student outcomes, or lead laboratory- or school-based research programs that inform efforts to improve educational practices and student outcomes; and
6. develop national models of educational practice that guide curriculum development and educator preparation.

For Program updates and more information, please visit https://education.jhu.edu/academics/phd/

Admission Requirements

At minimum, applicants to the PhD program should hold a master's degree from an accredited college or university. Previous degrees must document outstanding academic achievement in an area of study closely associated with the objectives of the program. Applicants must submit the online admission application form, application fee, and official transcripts from all post-secondary institutions attended. If the earned degree or credit is from an educational institution abroad, the candidate's academic record must be evaluated by a credential evaluation agency before consideration for admission. Applicants are required to earn superior scores on the Graduate Record Examination (GRE) (taken within the past five years), present acceptable TOEFL or IELTS scores (if an international student), and demonstrate potential to become top scholars. Additionally, applicants are required to submit a curriculum vitae, a personal statement (outlining professional plans, goals, and expectations related to the PhD program), dispositions survey, and three letters of reference affirming the applicant's qualifications for advanced graduate study and potential for professional development in the field. Selected applicants who meet the entrance requirements will be invited to interview with the doctoral admissions committee.

Program Requirements

Program Structure and Requirements

The program requirements include earning a minimum of 90 graduate credits, of which a minimum of 78 credits must be taken at the doctoral level at Johns Hopkins University. While the program will be tailored to the specific learning needs of each student, it includes the following coursework components:

- Research methods and statistics courses (minimum of 18 credit hours)
- Core seminars (15 credit hours)
- Major and/or minor area electives & readings (minimum of 21 credit hours)
- Research and/or teaching credits (18 credit hours)
- Dissertation research (18 credit hours)

In addition to successfully completing all the coursework requirements, candidates must also satisfy the following program benchmarks:

- research progress,
- written and oral comprehensive examinations,
- dissertation prospectus development and defense,
- dissertation proposal development and Graduate Board Oral Examination,
- PhD candidacy, and
- the dissertation.

Each student will receive an annual written evaluation from the School of Education's Doctoral Studies Committee detailing their progress in meeting the required benchmarks at the end of each spring semester.

All School of Education PhD students will devote at least four years to full-time study and research as a resident student. This period of time will provide opportunity for full engagement and participation in the academic community and allow students to develop and demonstrate the scholarly capabilities required of the degree. The typical program of study is eight semesters, with six semesters devoted to coursework and research/teaching intensive experiences and two semesters devoted primarily to independent dissertation research. Students will typically enroll in 12 hours per semester for the first three years of their program and 9 hours per semester during the fourth year of their program, for a total of 90 credit hours. All students are expected to maintain enrollment as full-time graduate students over the course of the program. With the approval of their major adviser and director of the PhD program, students may transfer up to 12 credit hours of previously completed graduate-level coursework to substitute for selected required courses in the program.

Typically, each year four-to-eight PhD students will be admitted each year to begin classes in the fall semester. The majority of required courses will be delivered on the Baltimore Homewood campus in a face-to-face format, although students may (with approval) enroll in selected elective courses in divisions throughout the university.

Students must complete qualifying exams after completing two years of study. The successful completion of the written documents and oral defense of those documents allows the student to proceed to the dissertation proposal.

Dissertation

The program is designed as an apprenticeship model leading to a traditional research dissertation. The expectation is that students will be developing the skills and background knowledge throughout the program required to pursue a traditional research dissertation. Although the dissertation is not part of the formal coursework, the program is designed to put a student on track to develop an area of expertise as the foundation for an independent research project directed by the adviser. Students are expected to complete and defend a dissertation proposal by the end of the third year of study and use the final year of the program to complete and defend the dissertation. The dissertation is expected to demonstrate mastery of the relevant literature and scholarship in the collection and interpretation of data. The work should be appropriate for publication in high impact journals in the student's area of expertise. The dissertation will be presented at a final oral defense before the student's Dissertation Advisory Committee.

Note: Full tuition assistance and annual stipends are available to support selected outstanding candidates. For more information about the PhD program, please visit https://education.jhu.edu/academics/phd/ .

Learning Outcomes

Program Goals

Graduates will be prepared to fill faculty and research scientist positions at research-intensive universities or secure positions at research institutes and centers that conduct and manage large-scale education-based evaluations. Upon successful program completion we expect that graduates will:

- Be prepared for employment in research/faculty positions at top-tier research institutions.
- Contribute to the interdisciplinary public discourse on education improvement.
- Engage in and promote evidence-based practices through the application of rigorous methodology.
- Link education research to policy and practice.
- Provide leadership in the field by developing an independent line of ethical and culturally responsive research.
- Contribute to development of the next generation of scholars.
- Be able to influence school policy and reform.

Master's Programs

Counseling, Master of Science

The Master of Science (MS) in Counseling degree prepares individuals to be leaders and advocates in the fields of clinical mental health and school counseling. The program follows a nationally recognized, evidence-based curriculum aligned with national and state standards. The program is led by distinguished faculty and boasts a strong support network of school districts and mental health settings. The program's content includes: professional orientation and ethical practice, social and cultural diversity, human growth and development, career development, helping relationships, group work, assessment, and research/program evaluation. Students learn through didactic experiences, small group projects, and applied learning at community- or school-based sites. The Master of Science in Counseling degree program, with concentrations in Clinical Mental Health Counseling and School Counseling, is accredited by the Council for Accreditation of Counseling & Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA).

Students specialize in one of two concentrations:

- Clinical Mental Health Counseling
- School Counseling

Students have a maximum of five years to complete the program, but are strongly encouraged to follow the prescribed program of study.

Clinical Mental Health Counseling

The concentration in Clinical Mental Health Counseling prepares students to work in a wide range of clinical, community, and human service settings. Upon graduation, candidates gain the knowledge, skills, and academic requirements necessary to begin the licensure process in Maryland and many other states. The Clinical Mental Health Counseling program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Although the School of Education permits five years for program completion, there are full-time and part-time Clinical Mental Health Counseling sequences. Completion of a 100-hour practicum and 600-hour internship are required in this program. The Clinical Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

School Counseling

The School Counseling concentration prepares students to work in K-12 schools with an emphasis in urban school settings. The program is approved by the Maryland State Department of Education (MSDE), and graduates are eligible for MSDE certification as school counselors. Students have a maximum of five years to complete the program but are strongly encouraged to follow the prescribed program of study. The School Counseling concentration is also accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Completion of a 100-hour practicum and 600-hour internship are required in this program.

Admissions Requirements

Clinical Mental Health Counseling

Applicants to the program must hold a bachelor's degree from an accredited college or university and have earned a minimum cumulative grade point average of 3.0 (on a 4.0 scale) in all previous undergraduate and graduate studies (including incomplete programs of study and for programs still in progress). Applicants must submit an application, official transcripts from all accredited post-secondary institutions attended, a résumé or curriculum vitae, an essay, and two letters of recommendation. The content of the essay should address why the candidate wants to be a counselor, the type of contributions the candidate would want to make to the clinical mental health field, a discussion of how the candidate's background and professional experiences may support and/or constrain their becoming an effective counselor, and an exploration of how the candidate's experiences regarding human diversity, volunteerism, travel and/or work have impacted their desire to be a counselor. Selected qualified applicants will be invited to participate in a group admission interview.

School Counseling (Flexible Program)

Applicants to the program must hold a bachelor's degree from an accredited college or university and have earned a minimum cumulative grade point average of at least 3.0 (on a 4.0 scale) in all previous undergraduate and graduate studies (including incomplete programs of study and for programs still in progress). Applicants must submit an application, official transcripts from all accredited post-secondary institutions attended, a résumé or curriculum vitae, a personal statement of goals, and two letters of recommendation. Qualified applicants will be invited to participate in a group admission interview.

Program Requirements

Clinical Mental Health Counseling

The program's plan of study requires 60 graduate credits to be completed through full-time or part-time matriculation and students must successfully pass the Counselor Preparation Comprehensive Examination (CPCE) prior to or during the last semester of their graduate program. With the approval of the program adviser, a student may transfer a maximum of six graduate credits from an accredited college or university if the course directly aligns to the student's degree requirements and is taken within the five-year time limit. Completion of a 100-hour practicum and 600-hour internship are required in this program.

For a complete list of program plan requirements, please visit: https://education.jhu.edu/academics/ms_counseling/#programplan

School Counseling

The program's plan of study requires 60 graduate credits to be completed through full-time or part-time matriculation and students must successfully pass the Counselor Preparation Comprehensive Examination (CPCE) prior to or during the last semester of their graduate program. This degree program has the flexibility that allows students to meet the requirements to be school counselors, as well as coursework toward licensure as a clinical mental health counselor. The Counseling program is approved by the Maryland State Department of Education (MSDE).

With the approval of a faculty adviser, a student may transfer a maximum of six graduate credits from an accredited college or university if the course is directly applicable to the student's program. Completion of a 100-hour practicum and 600-hour internship are required in this program.

For a complete list of program plan requirements, please visit: https://education.jhu.edu/academics/ms_counseling/#programplan

Master of Science in Counseling

Mission Statement

The mission of the Johns Hopkins School of Education Counseling Program is to prepare graduate students to serve as socially just school counselors and clinical mental health counselors who implement theoretical, empirical, and practical frameworks that facilitate client growth and development, introspective awareness, and well-being in a global society.

Programmatic Goals

- Facilitate students' mastery of requisite knowledge, skills, and dispositions aligned with CACREP Standards to deliver counseling services that embody social justice principles, advocacy, multiculturalism, and upholds the worth and human dignity of all clients from culturally diverse backgrounds.
- Support and encourage students to incorporate a developmental approach to promote client wellness across the life span.
- Facilitate students' development of dispositions to serve as social justice advocates and leaders in the profession.
- Cultivate a collaborative learning atmosphere that incorporates cutting edge research and excellent didactic and experiential instruction.

Program Objectives

- **PO1** Graduates will demonstrate the skills and competencies to incorporate a developmental approach to promote student/client holistic well-being across the life span, inclusive of mental health, academic, social/emotional, cultural, and career goals. *(CACREP F.3 Human Growth & Development, F.4 Career Development)*
- **PO2** Graduates will demonstrate the skills and competencies to serve as advocates and leaders in educational and/or mental health settings that value social justice principles, multiculturalism, human dignity and the worth of all clients from culturally diverse backgrounds *(CACREP F.2 Social & Cultural Diversity; 5.G. School Counseling)*
- **PO3** Graduates will demonstrate the skills and competencies to assess needs, develop goals, and counsel students/clients in educational and/or mental health settings from culturally diverse backgrounds. *(CACREP F.5 Counseling & Helping Relationships; F.7 Assessment & Testing)*
- **PO4** Graduates will demonstrate the skills and competencies that reflect the knowledge, roles, and functions of the school and/or mental health counselor. *(CACREP 5.C. Clinical Mental Health Counseling; 5.G. School Counseling)*
- **PO5** Graduates will demonstrate the skills and competencies to effectively facilitate group work with students/clients from diverse backgrounds in educational and mental health settings *(CACREP F.6 Group Counseling & Group Work)*
- **PO6** Graduates will demonstrate the skills and competencies to develop equitable data-driven school counseling programs that meet the unique needs of student populations in educational settings. *(CACREP F.8 Research & Program Evaluation; 5.G. School Counseling)*
- **PO7** Graduates will demonstrate the skills and competencies to develop, apply, and evaluate evidence-based practices that meet the developmental needs of students/clients from diverse backgrounds in educational and mental health settings. *(CACREP F.8 Research and Program Evaluation; 5.G School Counseling; 5.C. Clinical Mental Health Counseling)*
- **PO8** Graduates will demonstrate the skills and competencies to work ethically, legally, and professionally in educational and/or mental health settings *(CACREP F.1. Professional Counseling Orientation & Ethical Practice)*

Education, Master of Science

Digital Age Learning and Educational Technology (Online)

The online 36-credit Master of Science (MS) in Education with a concentration in Digital Age Learning and Educational Technology prepares educators and related professionals to use a broad range of technologies in their multiple roles as teacher, instructional designer, technology coach, researcher, change agent, or leader in the field. The program is aligned with International Society for Technology in Education (ISTE) standards for educators, as well as with learning theories from the National Academies of Science's initiatives on the new science of learning. The knowledge base within the Digital Age Learning and Educational Technology program comes from both existing and emerging methods for effective technology integration and effective leadership, including policy, practice, research, theory, and culturally responsive education. The program's coursework involves project-based learning, discussions, and collaboration. Candidates gain competencies in instructional leadership, instructional and assistive technologies, systems change, data driven decision-making and Universal Design for Learning.

Educational Studies (Online Teach For America and TNTP Options)

The School of Education's partnership programs with Teach For America (TFA) and TNTP are specially designed to support the development of TFA corps members and alumni and TNTP alumni as they work to increase student learning in their classrooms through strategic and comprehensive coursework, professional development, and reflection. Participants in these partnership programs develop classroom skills as teacher leaders in order to make significant academic gains with their students, meet the needs of the whole child, and have a long-term impact in the field of education.

Educational Studies (Urban Teachers Option)

The Urban Teachers program at the Johns Hopkins School of Education prepares new teachers to succeed through a rigorous clinical training model, with the goal of improving student outcomes in high-need schools and training candidates to become highly effective teachers. This four-year collaborative program includes a 14-month residency working in urban schools prior to becoming a lead teacher; 40-43 credits of graduate coursework (depending on the program of study) leading to the award of a Master of Science in Education degree, which is completed in two years and is clinically based, allowing for teachers to practice their skills immediately in the classroom; and three years of coaching and mentoring to assist in developing outstanding practice once in the field.

Educational Studies (Individualized Interdisciplinary Program of Study Option)

This Master of Science (MS) in Education with a concentration in Educational Studies (MS Ed Studies) interdisciplinary program option offers a unique way to earn a master's degree while pursuing one or two areas of specialization—and the JHU School of Education is the only school in Maryland that offers such a degree. The 33–39 credit program is an individualized, interdisciplinary advanced master's degree in an area not covered by other master's degrees offered by the School of Education, allowing students to create a program of study that reflects their area(s) of specialization and personal career goals. This program option is intended for teachers, administrators, and other educational professionals who already possess certification in their field or who do not require certification.

Please note that although a few of the specialization options available to candidates within this master's program option do lead to certification through the applicable graduate certificate program, it is not a program feature of the MS Ed Studies degree itself.

The MS Ed Studies program is open both to school-based candidates and those who are not school-based but have an interest in pursuing one or more areas of specialization. While some courses can be taken online, this program option is not currently offered as a fully online degree. However, interested candidates should contact a program representative to discuss online options.

Gifted Education

The 33-credit Master of Science (MS) in Education with a concentration in Gifted Education is designed to prepare educators and administrators for teaching or leadership roles in the field of gifted education, with an emphasis on research and application of current best practices in the field. Based on the National Association for Gifted Children (NAGC) and Council for Exceptional Children (CEC) standards for teachers of gifted children, candidates will gain knowledge and skills in curriculum, instruction, program development, and assessment to meet the needs of academically talented students. As part of the program, candidates will observe gifted students, design innovative lessons, and learn how to design programs that are appropriate for gifted students' cognitive and affective needs. The program is recognized by the Maryland State Department of Education as meeting the requirements for Gifted and Talented Education Specialist certification in Maryland and satisfies endorsement requirements in many other states.

School Administration and Supervision

This Master of Science (MS) in Education concentration is designed for certified teachers and other certified personnel pursuing leadership positions in kindergarten through grade 12 (K-12) school settings and is approved by the Maryland State Department of Education (MSDE) for certification in school administration and supervision. Designed primarily for those pursuing principalship and supervisor positions, this 39-credit program is aligned with the nationally recognized Professional Standards for Educational Leaders (PSEL), as well as with the Maryland Instructional Leadership Framework outcomes. The program is also appropriate for preparing department chairs, team leaders, or curriculum coordinators.

In addition to the standard School of Education admission requirements, applicants are expected to: be certified teachers or other certified school personnel ; have 27 months teaching experience; be currently employed by a school district or an accredited independent school and be able to identify a person who will serve as a mentor (during final internship course). The mentor must have either Administrator I or II certification and be currently working in an administrative or supervisory capacity. Additionally, the mentor should be willing to coach the intern and to meet on a regular basis to provide assistance to the intern in experiencing the many facets of leadership.

A strong emphasis is placed upon the provision of opportunities for students to develop the skills and competencies that are necessary for successful educational leadership. Students have the opportunity to combine their practical experience with current research regarding best practices in areas such as leadership, curriculum and instruction, school law, technology, and other important curricula areas. The seminar is a capstone course where students synthesize prior learning as well as explore some current issues; the internship provides an opportunity for students to create a portfolio based on hands-on experiences in a school. The internship is completed in the school where the students are assigned to work and is completed under the careful supervision of a certified in-school mentor and a university supervisor.

The program is delivered in a face-to-face mode (with some online courses), and courses are taught at the Baltimore Homewood campus.

Note: As of October 15, 2020 the Maryland State Department of Education (MSDE) requires candidates seeking Administrator I certification to complete 3 credits in Special Education (COMAR 13A.12.04.01). You may earn credits through the School of Education or transfer them in from another accredited institution.

International Teaching and Global Leadership Cohort

The Master of Science in Education — International Teaching and Global Leadership Cohort (ITGL) prepares international educators to become innovative education leaders, with the knowledge and skills to transform schools, systems, and other fast-changing learning environments around the world. The 33-credit cohort (35 credits for TEFL), which includes both core and focus area courses, provides our candidates with the opportunity to build a solid foundation of theory and practice through three semesters of coursework and continuous practical experiences. With exposure to a variety of educational experiences, candidates gain a comprehensive understanding of the different educational models employed in their focus area. This degree prepares candidates to apply their expertise effectively in their home countries.

Creative and Innovative Education

When promising learners are not engaged and challenged, a whole nation can lose tremendous potential. This focus area emphasizes developing effective programs and instruction for creative and innovative learners and instilling those learning skills in all students.

Digital Age Teaching and Learning Technology

Integrating technology into the classroom is the most highly demanded skill in education today. This focus area emphasizes Johns Hopkins expertise in creating leading-edge online tools and implementing new methods to manage educational data.

Early Childhood

Young children learn best through structured, engaged play. This focus area emphasizes implementing evidence-based practices that bring together the latest research in neuroscience and child development to support young students.

Entrepreneur in Education

Promoting innovation in the paradigms, strategies, values and culture in school systems, social entrepreneurial ventures, and education companies is critical in today's educational landscape. This focus area emphasizes preparing international entrepreneurs to be creative and innovative, with the knowledge and skills to become successful leaders in entrepreneurial education around the world.

Science, Technology, Engineering and Mathematics

Instructional leadership in STEM education is a growing need globally. This focus area emphasizes the foundational knowledge necessary to develop and lead STEM educational efforts that support student learning and the pursuit of STEM careers.

Teaching English as a Foreign Language

In a rapidly changing global environment, education leaders play a critical role in promoting intercultural competence and respect for all learners, their languages, and their cultures. This focus area emphasizes research-based instructional practices specifically designed to foster a caring, positive partnership, team, or community that maximizes learner engagement, learning, and achievement.

Education Policy

This 33 to 36 credit master's degree program is focused on the changing landscape of education policy in the 21st century in the wake of No Child Left Behind. The field is looking for leaders with sophisticated skill sets who are able to understand complex federal and state statutes and regulations, to research and report on initiatives, to draft policy and regulatory language; to conduct financial analyses; and to possess a deep understanding of the inequities in education. They must then combine it all with a knowledge of the strongest educational models to shape effective, evidence-based education policies. This program comprises 11 or 12 three-credit courses delivered online. Students can also opt to include a three-credit internship for an experiential learning opportunity.

Admission Requirements

Digital Age Learning and Educational Technology (Online)

```
Please visit  https://education.jhu.edu/academics/dalet/   for
 details
```

Educational Studies (Online Teach For America and TNTP Options)

Applicants to the program must:

- Meet all schoolwide admissions criteria
- Be a full-time preK-12 teacher by the start of the academic year to which they are applying
- Be in good standing with their respective partner (TFA or TNTP)

Please visit https://education.jhu.edu/academics/educational-studies-tfa-tntp/ for additional details

Educational Studies (Urban Teachers Option)

Those interested in the Johns Hopkins School of Education Urban Teachers collaborative program must go through a two-stage application process:

1. applicants must first apply and be admitted into Urban Teachers; and
2. once accepted into Urban Teachers, candidates must then apply for admission to the Johns Hopkins School of Education's master's degree.

Please visit https://education.jhu.edu/academics/educational-studies-urban-teachers/ (https://education.jhu.edu/academics/educational-studies-urban-teachers/)for additional details

Educational Studies (Individualized Interdisciplinary Program of Study Option)

Prospective students planning to apply to the individualized, interdisciplinary MS Ed Studies program option should consult with a program adviser about which pathway best meets their needs before they apply. Prospective students planning on completing one or two graduate certificates as part of their program of study should apply for admission into the certificate(s) at the same time they apply to the master's program. As part of the application process, applicants must write an essay describing how the program will contribute towards their future plans. The essay for admission into the two-certificate pathway must address how the certificates will work together to foster the prospective student's future plans, and admission to the master's program is contingent upon admission to the two certificates. Students interested in the two-certificate pathway must apply for admission into the master's program before starting the second certificate.

Program Requirements

Digital Age Learning and Educational Technology (Online)

Program Plan (36 credits)

Code	Title	Credits
Foundational Introductory Course (Required)		
ED.893.508	Technology and the Science of Learning (Note: this course should be taken first)	3
Required Courses		
ED.810.607	Culturally Responsive Teaching	3
ED.893.545	Technology Integration for the 21st Century Learner	3
ED.893.550	Emerging Issues in Digital Age Learning	3
ED.893.601	Evaluation and Research in Digital Age Learning	3
ED.893.632	Data-Driven Decision Making	3
ED.893.634	Technology Leadership for School Improvement	3
ED.893.645	Explorations in Blended and Hybrid Learning	3
ED.893.650	Fundamentals of Design Thinking	3
ED.893.701	Advanced Seminar in Digital Age Learning (Note: take in final term)	3
ED.893.850	Advanced Applications in Digital Age Learning (Note: take in second to last or final term)	3
Elective Courses		
Students may take up to two electives (6 credits) in consultation with their academic advisor. These electives may replace any course with the exception of ED.893.508, ED.893.850, and ED.893.701. Electives may also be taken from outside the program		
ED.893.628	Gaming and Simulations for Learning	3
ED.893.546	Technology for Learner Variability	3
ED.893.600	Maker Education: Cultivating Curiosity, Creativity, and Problem Solving in Thoery and Practice	3
ED.893.651	Computational Thinking for K-12 Educators	3
ED.880.619	Foundations of Online Teaching and Learning	3
ED.880.623	Instructional Design for Online Learning	3

Educational Studies (Online Teach For America and TNTP Options)

Program Requirements

- *Number of Credits Required: 39 or 30 (excluding 9 waived credits)*
- *Waived Credits (9 Credits)*
    - Granted upon proof of successful completion of summer training program through TFA or TNTP. All waivers for successful completion of summer training are subject to approval by JHU each year.

Required Courses (21 Credits)

Code	Title	Credits
ED.813.601	Seminar in Transformational Leadership and Teaching: Part I	1
ED.813.602	Seminar in Transformational Leadership and Teaching: Part II	1
ED.813.603	Seminar in Transformational Leadership and Teaching: Part III	2
ED.813.604	Seminar in Transformational Leadership and Teaching: Part IV	2
ED.813.611	Classroom Management: Part I	1
ED.813.612	Classroom Management: Part II	2
Select one of the following:		3
ED.813.621	Effective Practices in Teaching and Learning I: General Educators	
ED.813.631	Effective Practices in Teaching and Learning I: Special Educators	
ED.813.641	Effective Practices in Teaching and Learning I: ESOL Educators	
Select one of the following:		3
ED.813.622	Effective Practices in Teaching and Learning II: General Educators	
ED.813.632	Effective Practices in Teaching and Learning II: Special Educators	
ED.813.642	Effective Practices in Teaching and Learning II: ESOL Educators	
ED.813.681	Teaching for Transformation I: Secondary Content	3
or ED.813.682	Teaching for Transformation I: Elementary Content	
ED.813.683	Teaching for Transformation II: Secondary Content	3
or ED.813.684	Teaching for Transformation II: Elementary Content	
Elective Courses		

Depending on their program of study, and subject to the approval of their advisor, candidates will take 9 credits of elective courses.		9
Capstone Project		
In addition to the above coursework, candidates are required to develop a capstone portfolio. The capstone is completed near the end of the candidate's program plan.		
ED.813.665	Portfolio Development, Part II: Student Growth	0
Total Credits		**30**

	Total Credits	**40**

Educational Studies (Individualized Interdisciplinary Program of Study Option)

There are two pathways for completing the MS Ed Studies program. One pathway allows a student to combine the deep study of one area of education with an exposure to the breadth of educational theory and practice. It requires the following common core courses:

Code	Title	Credits
ED.880.624	Evaluation and Research in Education (Or ED.881.611 Action Research)	3
ED.881.622	Advanced Instructional Strategies [1]	3
ED.855.610	Seminar in Teacher Leadership	3
Total Credits		**9**

1 Students may be allowed to take an alternative course as a substitute, including online options, subject to faculty adviser approval.

The remainder of the program includes a 15–18 credit specialization (almost always a graduate certificate) and 6–9 credits of electives designed in consultation with a faculty adviser. The combination of the core courses and the electives allows students who choose this pathway to be exposed to several areas of education outside their main specialization.

In the second pathway, students may elect to combine two graduate certificate programs (15–18 credits each). Students then take the Seminar in Teacher Leadership course, a capstone course that includes an independent project tying together the two certificates, to complete the MS Ed Studies. This pathway allows a student to study in depth two areas of educational theory and practice. Students pursuing this pathway are advised to consult with their faculty adviser about the timing of the two certificates.

Note: Students will not receive a diploma for successful completion of the coursework comprising a certificate program if they have not first applied to and been admitted into that same certificate program.

Gifted Education

The program is designed to be completed in six semesters, with students typically taking two courses per semester—though students may elect to take longer. A new cohort begins each year (subject to sufficient enrollments), with courses being delivered online.

Program Plan

Code	Title	Credits
Required Courses		
ED.885.501	The Gifted Learner	3
ED.885.604	Social and Emotional Needs of the Gifted	3
ED.885.512	Twice Exceptional Learners	3
ED.885.505	Creativity in Education	3
ED.885.510	Curriculum, Instruction, and Assessment for Advanced Learners	3

ED.885.519	Seminar I in Gifted Education and Talent Development	3
ED.885.515	Leadership of Gifted Education and Talent Development Programs	3
ED.885.520	Seminar II in Gifted Education and Talent Development	3
ED.885.820	Practicum in Gifted Education and Talent Development [1]	3
Elective Courses		
In addition, students must select and take two 3-credit elective courses, in consultation with their advisor.		6
Total Credits		**33**

1 All candidates employed in Maryland who are seeking Gifted and Talented Education Specialist certification from the Maryland State Department of Education will undertake a semester-long practicum experience as the culminating course of their program. Candidates who are employed in other states outside of Maryland will take an online 3-credit elective course in place of the practicum course in consultation with their advisor.

School Administration and Supervision

Program Plan

Code	Title	Credits
First Sequence of Concentration Requirements		
Must be taken prior to the second sequence.		
ED.851.601	Organization and Administration of Schools	3
ED.851.603	School Law	3
ED.851.705	Effective Leadership	3
ED.851.708	Systemic Change Process for School Improvement	3
ED.852.602	Supervision and Professional Development	3
ED.881.610	Curriculum Theory, Development, and Implementation	3
ED.880.624	Evaluation and Research in Education	3
ED.881.622	Advanced Instructional Strategies	3
Second Sequence of Concentration Requirements		
ED.851.609	Administrative and Instructional Uses of Technology *multiple technology courses available as a substitution. Consult advisor	3
ED.851.616	Issues in K-12 Education Policy	3
Elective Courses		
Select one of the following: *multiple substitutions available. Consult advisor		3
ED.851.512	Politics of Education	
ED.851.630	School, Family, and Community Collaboration for School Improvement I	
ED.882.524	Education of Culturally Diverse Students	
The following courses may be taken only after completing the first sequence of 24 credits:		
ED.851.809	Seminar in Educational Administration and Supervision	3
ED.851.810	Internship in Administration and Supervision	3
Total Credits		**39**

Please note that students must attend an organizational meeting or make arrangements to meet with the program coordinator in the semester prior to registering for the internship.

Note: Students enrolled in the MS in School Administration and Supervision program may not simultaneously enroll in, nor are they eligible to earn, the Graduate Certificate in School Administration and Supervision.

International Teaching and Global Leadership Cohort

Program Plan

Code	Title	Credits
Core Requirements (24 credits)		
ED.887.615	Explorations in Mind, Brain, and Teaching	3
ED.855.619	Global Leadership	3
ED.855.609	*Introduction to Entrepreneurship in Education (Science, Technology, Engineering, and Mathematics (9 credits))*	*3*
ED.813.652	Introduction to Global Education Policy and Analysis	3
ED.881.622	Advanced Instructional Strategies	3

ED.885.510	Curriculum, Instruction, and Assessment for Advanced Learners	3
Digital Age Teaching and Learning Focus (9 credits)		
ED.893.508	Technology and the Science of Learning	3
ED.893.550	Emerging Issues in Digital Age Learning	3
ED.893.628	Gaming and Simulations for Learning	3
Early Childhood Focus (9 credits)		
ED.855.603	The Early Childhood Learner	3
ED.855.608	Comparative High Quality Practices in Early Education	3
ED.855.630	Authentic Assessment and Measuring Child Outcomes and School Readiness	3
Entrepreneur in Education Focus (9 credits)		
ED.855.614	Planning a New Venture in Education	3
ED.855.617	Launching a New Venture in Education (Launching a New Venture in Education)	3
ED.855.618	The Sustainable Venture (The Sustainable Venture)	3
Science, Technology, Engineering, and Mathematics (9 credits)		
ED.855.530	Foundational Concepts of STEM	3
ED.855.540	Integration of STEM Content through the Science of Learning	3
ED.855.550	Leading STEM Instructional Programs & Professional Development	3
Teaching English as a Foreign Language Focus (11 credits)		
ED.855.500	Language Acquisition in TEFL	3
ED.855.501	Language and Culture in TEFL	3
ED.855.510	Building Productive Learning Relationships for TEFL	1

ED.855.502	Program Evaluation and Learner Assessment in TEFL (Program Evaluation and Learner Assessment in TEFL)	3
ED.855.520	Promoting Active Engagement and Learning for TEFL (Promoting Active Engagement and Learning for TEFL)	1
Total Credits: 33 - 35		

Education Policy

Number of Credits Required: 33-36
One-week residency in Washington, D.C., required

Program Plan

Code	Title	Credits
Foundational Introductory Course (3 credit hours)		
ED.820.602	Introduction to Education Policy (includes a 1-week residency in Washington, D.C.)	3
Core Courses (30 credit hours)		
ED.820.600	Introduction to Statistics (will be waived if completed a stats course with a B or better within 5 years of applying to the program)	3
ED.820.601	Intermediate Statistics	3
ED.820.603	Federal Education Policy	3
ED.820.604	Diversity	3
ED.820.605	International Education Policy (International Education Policy)	3
ED.820.606	State and Local Education Policy (State and Local Education Policy)	3
ED.820.607	Understanding Education Research (Understanding Education Research)	3
ED.820.608	Education Finance (Education Finance)	3
ED.820.609	Outside the Schoolhouse (Outside the Schoolhouse)	3
ED.820.610	Capstone Course (Capstone Course)	3
Elective (3 credit hours)		
ED.820.611	Experiential Learning (Experiential Learning (optional))	3
Total Credits		**36**

Note: The Foundational Introductory Course will be taken first, outside of the statistics courses

Learning Outcomes

Digital Age Learning and Educational Technology (Online)

Program Goals

The goals of the program are to:

- Cultivate proactive leadership skills for developing a shared vision for educational technology among all education stakeholders.
- Create systemic plans aligned with a shared vision for school effectiveness and student learning through the infusion of information and communication technology (ICT) and digital learning resources.
- Develop robust and reliable access to current and emerging technologies and digital resources, with equity for all stakeholders.
- Engage in planning and assessment centered on the needs and abilities of students.
- Develop and review policies, financial plans, accountability measures, and incentive structures to support the use of ICT and other digital resources for learning.
- Integrate content standards and related digital curriculum resources that are aligned with and support digital age learning and work.
- Design online and blended learning environments that facilitate digital learning and support communities of inquiry.

Learning Outcomes

Upon successful completion of the program, we expect students will:

- Lead their organization in the effective use of technology for digital learning.
- Establish leadership skills for supporting data driven decision-making.
- Develop skills for advanced technologies—including online and blended learning, mobile learning, multimedia-based instruction, tools for instructional management and assessment, and the integration of technology in Universal Design for Learning (UDL).
- Engage in technology integration—applying the new science of learning, digital-age skills, and a constructivist approach to teaching and learning, as well as the use of authentic assessment strategies, differentiated instruction and appropriate technology tools to accommodate all learners, including students with special needs.
- Build leadership skills through mentoring, consulting, professional development, and systems change.

Educational Studies (Online Teach For America and TNTP Options)

Program Goals

The goals for the program are to develop transformational educators who:

- Track and monitor student progress in an ongoing manner to ensure students make dramatic academic gains.
- Consistently integrate and apply their skills in planning, instructional delivery, and assessment to enhance student learning.
- Impact their classrooms, schools and communities as content experts by providing excellent education to their students and serving as student advocates.
- Advocate for diversity and inspire their students to strengthen their own advocacy skills, in order to develop a deep understanding of themselves as people and learners, and use their learnings to access future opportunities for growth and development.
- Engage various stakeholders in a student’s life to provide holistic, personalized support.
- Become reflective practitioners who have the ability to differentiate, modify, and analyze their own instruction and are able to foster a reflective disposition for continuous learning and improvement.

Educational Studies (Individualized Interdisciplinary Program of Study Option)

Student outcomes depend upon the pathway chosen, but all students who complete the program will:

- Develop an in-depth knowledge of at least one area of education.
- Increase their awareness of the breadth of work in education, either through a second area of specialization or through core educational coursework.
- Complete an independent project in their area(s) of concentration in the capstone course, the Seminar in Teacher Leadership. (Examples include a research project, an action plan, or a professional development plan.)

Gifted Education

Program Goals

The goals of the program are to prepare educators for leadership roles in the field of gifted education who are able to:

- Understand the diverse factors that inform the identification and support of K-12 gifted students.
- Create safe, inclusive, and culturally responsive learning environments that support the social, emotional, and cognitive learning needs of diverse groups of gifted K-12 students.
- Use assessments to identify gifted and talented students, assess their progress and modify interventions accordingly, and provide summative data on their accomplishments.
- Be reflective, ethical professionals who support and advocate for gifted K-12 students through collaboration with families and colleagues, use of community resources, and ongoing professional development.
- Serve as effective leaders in the development and implementation of gifted education and talent development programs.
- Lead efforts to address and eliminate excellence gaps in K-12 settings

School Administration and Supervision

Upon successful completion of the program, we expect students will:

- Demonstrate specific content knowledge regarding school leadership.
- Demonstrate knowledge of skills needed for collaborating with staff and others to create a vision and plan of improvement for a school.
- Demonstrate skills and dispositions that are needed to manage and to lead with respect to human and material resources and the total organization of a school.
- Demonstrate knowledge, skills, and dispositions that promote effective school, family, and community engagement.
- Demonstrate the ability to assess and to understand the larger context in which educators work today.
- Demonstrate knowledge of strategies and procedures for working fairly and justly with all stakeholders in a diverse school environment.
- Demonstrate knowledge of strategies and processes for providing a school instructional program for all students that is evaluated for effectiveness based on student achievement and other relevant factors (i.e., attendance, for example).
- Become reflective practitioners who are skilled in data-based decision making and the use of technology for instructional and administrative purposes.
- Demonstrate skills and strategies related to the safe and orderly operation of a school.

International Teaching and Global Leadership Cohort

Upon successful completion of the program, we expect students will be able to:

- Identify and explain best practices in Science, Technology, Engineering and Mathematics, teaching English as a foreign language, entrepreneurial education, early childhood, creative and innovative education and digital age learning to become successful global education leaders.
- Apply identified best practices in Science, Technology, Engineering and Mathematics, teaching English as a foreign language, entrepreneurial education, early childhood, creative and innovative education and digital age learning to become successful global education leaders.

Education Policy

The goal of our program is to provide the comprehensive, research-based, real-world, and work environment-ready skills and knowledge for students and professionals interested in the field of K-12 education policy.

Student Outcomes

The primary educational outcomes of the program is to prepare graduates to analyze and evaluate education research, translate research into policies, and contribute effectively to governmental agencies, legislative offices, mayor's offices, think tanks, and nonprofits that focus on education.

Upon successful completion of the program, we expect students to be prepared to:

- Analyze and evaluate education research.
- Analyze the structures that comprise public education in different states within the U.S. and in peer nations around the world.
- Analyze national and international educational assessment data.
- Translate research into policy recommendations for different stakeholders (i.e. states, local education bodies, city governments, or non-profits/think tanks).
- Analyze current or proposed federal and state legislation and regulatory language for their potential impact.
- Analyze existing education budgets and funding streams.
- Evaluate proposed policies in terms of their potential impact on underserved or marginalized populations.
- Compose reports, policy memos, op-eds, and policy briefings on educational issues in strong, clear, and empirically based language.

Health Professions (Online), Master of Education

The 34.5-credit Master of Education (M.Ed.) in the Health Professions (MEHP) and the embedded post-master's certificate (*see* Post-Master's Certificate in Evidence-Based Teaching in the Health Professions (https://e-catalogue.jhu.edu/education/programs/evidence-based-teaching-health-professions-post-masters-certificate/) *for more information*) is offered through a partnership among five JHU schools: Education, Medicine, Nursing, Public Health, and Business. The goal of the master's program is to develop interprofessional leaders and change agents who will globally transform health professions education.

The program consists of interprofessional educational experiences designed and delivered by faculty teams from the five partner schools. The master's program includes an educator portfolio built through the various courses of the program and a capstone experience in either educational leadership/professional development or educational research. MEHP Fellows are provided opportunities to engage in deep discussions, team projects, and group presentations in an interactive online community. The course schedule and online format is designed to complement the lives of busy health professionals who want to advance their competence as educators.

This program is designed to serve accomplished health professionals with advanced degrees in medicine, nursing, public health, pharmacy, dentistry, and other allied health fields. The curriculum prepares participants (MEHP Fellows) to become effective educators, educational leaders, and educational researchers. Applicants are required to hold an advanced degree (terminal degree preferred) in a health professions related field. All courses are offered in an online format. MEHP Fellows can complete the post-master's certificate within one-to-two years, and the masters' degree within two-to-four years, depending on whether they complete one or two courses per semester.

MEHP Fellows take the first 18 credits focused on evidence-based teaching as the core for the 34.5-credit MEHP program or as a stand-alone post-master's certificate. The emphasis of the core/certificate is on preparing health professionals to teach effectively. Participants examine learning theories, adult learning and development theories, hypotheses-driven education-based practice, curriculum development, assessment and feedback, instructional strategies, cultural competence, technology integration, and educational scholarship. MEHP Fellows create an educational philosophy to guide their work, conduct curriculum development and assessment projects, and begin to focus on an agenda for their educational scholarship.

Program Requirements

Master's Degree Tracks

To earn the full 34.5-credit master's degree, MEHP Fellows complete the core and one of two 16.5-credit track specialty options—in educational leadership or in educational research. Both options include the continued development of educator's portfolio and a mentored capstone project/research study. The capstone project is designed, implemented, analyzed, and presented in a manuscript aligned with the guidelines for a selected target journal. The manuscript is reviewed and feedback provided in preparation for journal submission.

In the educational leadership development track, MEHP Fellows develop skills in program design, advocacy, and evaluation, leadership skills, program management and faculty evaluation, with elective options in faculty development and grant/proposal writing.

In the research track, MEHP Fellows develop skills in educational research methodology, mixed methods research, educational research design, with elective options in statistics or writing grants and proposals.

Requirements (34.5 credits for the MEHP; 18 credits for the Post-Master's Certificate)

(All courses are three credits unless otherwise indicated.)

Post-Master's Certificate in Evidence-Based Teaching in the Health Professions

(Taken either as a standalone program or as the first part of the 34.5-credit MEHP program.)

Learning Outcomes

Core/Certificate Program Goals

As part of the core/certificate, participants will:

- Apply evidence-based strategies and methodologies to teach in a variety of settings.
- Use the assessment of learner needs in order to differentiate instruction.
- Effectively plan instruction and teach from an interprofessional perspective.
- Effectively teach as a member of an interprofessional team.
- Provide interdisciplinary learning experiences.
- Incorporate their knowledge of standards and standards-based instructional approaches to teaching.
- Demonstrate collaborative and clinical teaching models.
- Effectively assess learning.
- Effectively integrate technology into instruction.
- Demonstrate understanding of learning principles, theory, and development.
- Function as reflective practitioners.
- Demonstrate how to design, implement, and evaluate curriculum.
- Demonstrate cultural competence with colleagues and learners.
- Advise students effectively.

Educational Leadership/Professional Development Track

MEHP Fellows in the educational leadership/professional development track will:

- Serve as a mentor to others in their institution.
- Build and evaluate professional development programs.
- Evaluate professional development opportunities to improve them.
- Be a change agent in their organization.
- Incorporate the contributions of various health professions.
- Demonstrate negotiation skills.
- Apply cultural competence to educational program development and delivery.

Educational Research Track

MEHP Fellows in the educational research track will:

- Experiment to determine the effectiveness of knowledge transfer.
- Design and implement a scholarly project that uses appropriate methodology to evaluate programs or plan curricula.
- Review the appropriate literature and state the problem to be examined.
- Analyze data from quantitative and qualitative sources.
- Interpret data from quantitative and qualitative sources and identify limitations.
- Disseminate findings.

Special Education, Master of Science

Candidates for the Master of Science (MS) in Special Education may be recent college graduates or professionals experienced in fields other than teaching who wish to develop special education careers. The School of Education offers candidates the following options:

- Part-time master's program with focus in Mild-to-Moderate Disabilities which leads to teacher certification. Students may begin this program in either fall or summer semesters and have a maximum of five years to complete the program requirements.
- Part-time master's programs in two special education areas of focus (Severe Disabilities with Emphasis in Autism Spectrum Disorders and Severe Disabilities with an Emphasis in Applied Behavior Analysis) that do not lead to teacher certification (for students who choose to pursue the Master of Science in Special Education degree but who do not wish to qualify for teacher certification). Students begin during the fall semesters and have a maximum of five years to complete the program requirements.

Master's Programs Leading to Teacher Certification

The following Master of Science in Special Education programs have been approved by the Maryland State Department of Education (MSDE) for Generic Special Education certification:

- Mild to Moderate Disabilities (Elementary/Middle)—grades one through eight.
- Mild to Moderate Disabilities (Secondary/Adult)—grades six through twelve.

Mild to Moderate Disabilities: Elementary/Middle and Secondary/Adult (MSDE Certification—Generic Special Education)

This 39-credit program is designed for individuals who are seeking teacher certification to work with students who have mild to moderate disabilities, including learning disabilities, emotional disturbances, and mild intellectual disabilities. Candidates can start the program during the summer or fall semester and complete the program at their own pace. Candidates in the part-time program option must complete all program requirements within five years.

Special Educator certification options are available at the elementary/middle school (grades one through eight) or secondary/adult levels (grades six through 12). The teacher certification program options provide instruction and applied experiences in legal issues, educational assessment, data-based decision making, instructional programming, behavior management, and collaborative programming among general and special educators. Students learn to apply specialized techniques within a continuum of educational settings, with a particular emphasis on urban settings.

Non-Certification Master's Programs

The School of Education offers a number of program options for students not seeking certification but who want to enhance their skills in a specialized area of special education.

Currently, the School offers two non-certification specializations:

- Severe Disabilities with an Emphasis in Autism Spectrum Disorders option
- Severe Disabilities with an Emphasis in Applied Behavior Analysis

Severe Disabilities with an Emphasis in Autism Spectrum Disorders Option

This 36-credit master's degree program option prepares individuals to teach students on the autism spectrum—ages birth through adult—whose educational priorities include specialized instruction and support in areas of communication, social/emotional skills, cognitive skills, and adaptive/ independence skills.

SEVERE DISABILITIES WITH AN EMPHASIS IN Applied Behavior Analysis

This 36-credit master's degree program option is designed for educators (special educators, general education teachers, behavior specialists, instructional specialists, paraprofessionals, teaching assistants, registered behavior technicians) who are seeking specialized training in special education and evidence-based practice of ABA. Professionals who earn the MS in Special Education-Severe Disabilities with an Emphasis in Applied Behavior Analysis will acquire the competencies to meet the growing needs of students requiring special education and behavioral supports.

Admission Requirements

Master's Programs Leading to Teacher Certification

To be fully admitted, applicants must have earned at least a bachelor's degree from an accredited college or university and have earned a minimum cumulative average GPA of 3.0 (out of 4.0) in all previous undergraduate and graduate studies (including for incomplete programs of study and for programs still progress). Applicants must complete the online application and submit official transcripts from all accredited post-secondary institutions attended, a resume or curriculum vitae, an essay indicating the candidate's professional goals, and two letters of recommendation, plus achieve passing scores on one of the following tests: Praxis I/Core, SAT, ACT or GRE. (Please visit the Maryland State Department of Education (MSDE) website at http://www.marylandpublicschools.org/about/Pages/DEE/Certification/testing_info/praxis1.aspx to view the current state requirements.)

Non-Certification Master's Programs

To be fully admitted, applicants must have at least a bachelor's degree from an accredited college or university and have earned a minimum cumulative average GPA of 3.0 (out of 4.0) in all previous undergraduate and graduate studies (including for incomplete programs of study and for programs still in progress). Applicants must complete an application and submit official transcripts from all accredited post-secondary institutions attended, a résumé or curriculum vitae, an essay indicating your professional goals, dispositions survey, and two letters of recommendation.

Program Requirements

Depending on the specific focus area, students complete 36 to 39 graduate credits for their master's degrees. Students must work with a faculty adviser to develop a program of study that includes required and elective courses. All face-to-face classes are offered at the JHU Applied Physics Lab, in Laurel MD.

Master's Programs Leading to Teacher Certification

Internship Requirements

Students seeking State certification are required to complete two internships during their program. Prior to the first internship, students will be required to undergo a criminal background check. Students wishing to enroll in an internship course must let the special education program coordinator know at least one semester prior to the one in which they plan to complete the internship. Students are responsible for completing all requirements prior to each internship and should frequently review the information shared on the Special Education Program Community Page on our Learning Management System (LMS). The final internship should be completed during the last semester of classes and cannot be taken without first achieving a passing score on the two Praxis II exams.

Students must earn a grade of B or better in each required internship. If a student earns a grade below B in an internship, the student must repeat the internship, and earn a grade of B or A. Students may not register for any other course until they complete the repeated internship. If a student earns a grade below B in subsequent internships, the student may be dismissed from the program.

Program of Study

Depending on the specific area of focus, students complete 36 to 39 graduate credits for their master's degree. Students must work with a faculty adviser to develop a program of study that includes required and prerequisite courses. (*Note: Students who take courses outside their approved program of study do so at their own risk—there is no guarantee that credits earned from unapproved courses will be accepted*.) In addition to coursework, students must successfully complete the internships and graduate student project (with presentation), pass the two Praxis II exams and comprehensive examinations, and fulfill any other program-specific requirements prior to graduation. Upon graduation, students will be eligible to apply for Maryland State certification under the appropriate specialization area.

Mild to Moderate Disabilities: Elementary/Middle and Secondary/Adult (MSDE Certification—Generic Special Education)

Graduates of this program are eligible for certification in generic special education in Maryland. Along with the required coursework, graduate students must achieve qualifying scores on the Praxis/Core I exam (or one of the alternative State approved tests) prior to admission (if not acquired 3.0 GPA in Undergraduate Studies) and pass the Special Education Praxis II exams (Special Knowledge and TRE) prior to the second internship. All students must complete two internships, a Graduate Project (with presentation), and pass all required Praxis and Comprehensive exams before program completion.

Learning Outcomes

Master's Programs in Special Education

Program Goals

The goals of the School of Education's Master of Science in Special Education certification programs are to:

- Secure recognition from the Council for Exceptional Children (CEC) and approval by the Maryland State Department of Education (MSDE).
- Graduate highly qualified special educators, as measured by the successful completion of coursework, comprehensive exams, graduate projects and presentations, and required state Praxis exams.
- Graduate highly qualified special educators who possess the requisite competencies to effectively educate students with exceptionalities from a diverse range of backgrounds and needs in a variety of educational settings.

Program Objectives

The learning objectives of the School of Education's MS in Special Education certification programs are to:

- To prepare qualified and credentialed special education professionals who are able to apply evidenced-based strategies across settings in which students with disabilities are served.
- To provide multiple opportunities to bridge research and theory with reflective practice.
- To prepare qualified and credentialed special education professionals who possess and exhibit collaborative and ethical behaviors with students and colleagues.
- To prepare qualified and credentialed special education professionals who have acquired the knowledge to access necessary resources and the professional networks that will further their professional development and support their advocacy for children with disabilities and their families.
- To provide cutting edge research and excellent instruction, as evidenced by faculty scholarship and teaching evaluations.

Learning Outcomes

The learning outcomes for graduates of the School of Education's MS in Special Education certification programs are measured across seven content standard areas, as outlined by the Council for Exceptional Children (CEC, 2015).

ADDITIONAL OUTCOMES FOR THE MS SEVERE DISABILITIES IN EMHASIS IN APPLIED BEHAVIOR ANALYSIS

The broad educational objectives of the Master of Science in Special Education-Applied Behavior Analysis are to prepare educators to become effective teachers and leaders in applied behavior analysis and special education. The specific program learning outcomes are listed below:

- Candidates will define, demonstrate, and apply the concepts and principles of behavior analysis within an educational setting as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will utilize research methods to evaluate and measure the effectiveness of intervention and instructional procedures within an educational setting as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will conduct and complete behavioral assessments in order to identify the effective instructional program or behavior reduction plan in an educational setting as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will design, implement, and evaluate an instructional program based on assessment results to increase a desired behavior/skill for an individual student or a group of students in an educational

setting as evidenced by successful completion of coursework and when elected, practicum requirements.

- Candidates will design, implement, and evaluate a behavior reduction program based on assessment results to decrease inappropriate behaviors for individual students or a group of students in an educational setting as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will define and practice within the Professional and Ethical Compliance Code for Behavior Analysts, as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will be able to implement, manage, and practice applied behavior analysis in an educational setting as evidenced by successful completion of coursework and when elected, practicum requirements.
- Candidates will be able to demonstrate knowledge and skills as outlined by the CEC’s Advanced Specialty Set: Special Education Behavior Intervention Specialist
- With the successful completion of coursework and practicum requirements, candidates will take and successfully complete the Behavior Analyst Certification Board (BACB) exam as evidenced by a passing score (set by the BACB).

Post Master's Certificates

Applied Behavior Analysis, Post–Master’s Certificate

The 21-credit Post-Master’s Certificate in Applied Behavior Analysis (ABA)—designed for special educators, administrators, and school psychologists—offers specific coursework and training in the field of applied behavior analysis. Educators who receive preparation in the evidence-based practice of ABA will be better prepared to meet the needs of a growing population of students requiring special education services. Additionally, the ABA certificate will support the career goals of special education teachers and other school personnel who desire this specialized training. Johns Hopkins University is the only school of education in the state of Maryland to offer this specialized certificate. The program also includes an additional 12 credits of practica (4 elective courses) designed to meet the experience requirements for Concentrated Experience Fieldwork (1500 hours) as outlined by the BACB (www.bacb.com (http://www.bacb.com/)). ABA coursework is delivered using a blended learning program of instructional delivery, providing the opportunity for candidates to choose an in-person or online format.

The Association for Behavior Analysis International (ABAI) has verified the course sequence (https://www.abainternational.org/vcs (https://www.abainternational.org/vcs/)) as meeting the coursework and practicum experience requirements for eligibility to take the Board Certified Behavior Analyst (BCBA) examination.® Applicants will have to meet additional requirements to qualify for board certification. Upon completion of the program, graduates will be eligible to apply for certification as a behavior analyst (BCBA), offered through the BACB. It is expected that all students will pursue BCBA certification upon completion of the program. For more information about BCBA certification, please visit www.bacb.com (https://www.bacb.com/) .

Admission Requirements

Applicants must possess a minimum of a graduate degree (e.g., master’s or doctoral) from an accredited university. Please see the BACB website for more information (www.bacb.com (http://www.bacb.com)). Applications will be accepted throughout the year, with a new cohort scheduled to launch each year in the fall.

Program Requirements

*** Information for students entering program for academic year 2021-2022**

Code	Title	Credits
Requirements (21 Credits)		
ED.873.601	Introduction to Applied Behavior Analysis and Special Education	3
ED.873.602	Research Methods: Evaluation, Measurement and Single Case Design	3
ED.873.603	Behavioral Assessment and Intervention for Challenging Behaviors	3
ED.873.604	Behavioral Assessment and Instructional Strategies	3
ED.873.605	Ethics and Professional Conduct for Behavior Analysts	3
ED.873.606	Applications of Applied Behavior Analysis in the Classroom	3
ED.873.607	Supervision and Consultation in ABA	3
ED.873.610	Applied Behavior Analysis Practicum I	3
ED.873.611	Applied Behavior Analysis Practicum II	3
ED.873.612	Applied Behavior Analysis Practicum III	3
ED.873.613	Applied Behavior Analysis IV	3

Learning Outcomes

Upon successful completion of the coursework and practicum components of the certificate, we expect students will:

- Define, demonstrate, and apply the concepts and principles of behavior analysis within an educational setting.
- Utilize research methods to evaluate and measure the effectiveness of intervention and instructional procedures within an educational setting.
- Conduct and complete behavioral assessments in order to identify the effective instructional program or behavior reduction plan in an educational setting.
- Design, implement and evaluate an instructional program based on assessment results to increase a desired behavior/skill for an individual student or a group of students in an educational setting.
- Design, implement, and evaluate a behavior reduction program based on assessment results to decrease inappropriate behaviors for individual students or a group of students in an educational setting.
- Define and practice following standards outlined by the BACB’s Professional and Ethical Compliance Codes for Behavior Analysts (BACB, 2014).
- Implement, manage, and practice applied behavior analysis in an educational setting.

In addition, upon successful completion of the coursework and practicum requirements, students will be eligible to apply for and take the Behavior Analyst Certification Board (BACB) exam.

Clinical Mental Health Counseling, Post–Master's Certificate

This 15-credit post-master's certificate program prepares counselors and other human services professionals for specialized areas of practice in clinical mental health counseling. The program is designed for students who want to complete the academic requirements for their clinical professional counselor license.

Students develop individualized programs of study with the assistance of a faculty adviser. Applicants are required to have completed a master's degree in counseling or a related field from an accredited institution. An internship is available and encouraged, but not required. When an internship is included in the program of study, students must complete a minimum of a 600-hour internship experience.

Admission Requirements

Applicants are required to have completed a master's degree in counseling or a related field from an accredited institution of higher education and submit official transcripts from all accredited post-secondary institutions attended, a statement of personal and career goals, a detailed résumé or curriculum vitae, and two letters of recommendation.

Note: Letters are not required for students currently enrolled in the School of Education's Clinical Mental Health Counseling or School Counseling master's programs.

Program Requirements

Students develop individualized programs of study in consultation with their faculty adviser. The program must be completed within three years.

Evidence-Based Teaching in the Health Professions, Post–Master's Certificate

The 18-credit Post–Master's Certificate in Evidence-Based Teaching in the Health Professions programs is offered through a partnership among five JHU schools: Education, Medicine, Nursing, Public Health, and Business. The goal of certificate program is to develop interprofessional leaders and change agents who will globally transform health professions education.

The program consists of interprofessional educational experiences designed and delivered by faculty teams from the five partner schools. MEHP Fellows are provided opportunities to engage in deep discussions, team projects, and group presentations in an interactive online community. The course schedule and online format is designed to complement the lives of busy health professionals who want to advance their competence as educators.

This program is designed to serve accomplished health professionals with advanced degrees in medicine, nursing, public health, pharmacy, dentistry, and other allied health fields. The curriculum prepares participants (MEHP Fellows) to become effective educators, educational leaders, and educational researchers. Applicants are required to hold an advanced degree (terminal degree preferred) in a health professions related field. All courses are offered in an online format. MEHP Fellows can complete the post-master's certificate within one-to-two years, depending on whether they complete one or two courses per semester.

The emphasis of the certificate is on preparing health professionals to teach effectively. Participants examine learning theories, adult learning and development theories, hypotheses-driven education-based practice, curriculum development, assessment and feedback, instructional strategies, cultural competence, technology integration, and educational scholarship. MEHP Fellows create an educational philosophy to guide their work, a curriculum development project, and an agenda for their educational scholarship.

Program Requirements

Learning Outcomes

Certificate Program Goals

As part of the certificate, participants will:

- Apply evidence-based strategies and methodologies to teach in a variety of settings.
- Demonstrate the assessment of learner needs in order to differentiate instruction.
- Effectively plan instruction and teach from an interprofessional perspective.
- Effectively teach as a member of an interprofessional team.
- Provide interdisciplinary learning experiences.
- Incorporate their knowledge of standards and standards-based instructional approaches to teaching.
- Employ collaborative and clinical teaching models.
- Assess learning.
- Effectively integrate current and emerging technology into instruction.
- Demonstrate understanding of adult learning principles, theory, and development.
- Function as reflective practitioners.
- Design, implement, and evaluate curriculum.

- Enhance cultural competence and understand its applicability to effective teaching, learning and communication.
- Advise students effectively.

Certificate of Advanced Graduate Study

- Counseling, Certificate of Advanced Graduate Study (p. 900)

Counseling, Certificate of Advanced Graduate Study

The Certificate of Advanced Graduate Study in Counseling (CAGS) is an advanced 30-credit, post-master's program. Students develop an individualized program of study, guided by faculty advisers. Applicants must have a master's degree in counseling or a related field from an accredited institution. The CAGS requires a 600-hour internship and is designed for students who need more than 15 credits to gain licensure and for those from nontraditional disciplines such as bereavement, massage therapy, or other fields in which counseling skills are valuable for career advancement.

Admission Requirements

Applicants are required to have completed a master's degree in counseling or a related field from an accredited institution of higher education and submit official transcripts from all accredited post-secondary institutions attended, a statement of personal and career goals, a detailed résumé or curriculum vitae, and two letters of recommendation. (*Note: letters are not required for students currently enrolled in the School of Education's Clinical Mental Health Counseling or School Counseling master's programs*.) Eligible applicants will be invited for an interview with the admission committee.

Program Requirements

Students develop individualized programs with specialized concentrations with their faculty adviser's approval.

Code	Title	Credits
Required Course		
ED.861.713	Advanced Treatment Approaches	3
Elective Courses		
Select 27 credits with the approval of the faculty adviser		27
ED.863.875	Internship in Clinical Mental Health Counseling I (Recommended)	
Total Credits		**30**

Graduate Certificates

- Education of Students with Autism and Other Pervasive Developmental Disorders, Graduate Certificate (p. 900)
- Educational Leadership for Independent Schools, Graduate Certificate (p. 900)
- Gifted Education, Graduate Certificate (p. 901)
- Leadership in Technology Integration (Online), Graduate Certificate (p. 902)
- Mathematics/STEM Instructional Leader (PreK-6) (Online), Graduate Certificate (p. 902)
- Mind, Brain and Teaching (Online), Graduate Certificate (p. 903)
- School Administration and Supervision, Graduate Certificate (p. 903)
- Urban Education, Graduate Certificate (p. 904)

Education of Students with Autism and Other Pervasive Developmental Disorders, Graduate Certificate

This fully online 18-credit certificate is designed for certified educators, educational support personnel, parents, and interested members of the community to gain practical knowledge for supporting children and adults diagnosed with autism. The program addresses the wide range of competencies that are necessary for the provision of effective educational programming for students with autism spectrum disorders and other pervasive developmental disorders.

Program Requirements

Code	Title	Credits
ED.871.510	Legal Aspects, Service Systems, and Current Issues in Special Education	3
ED.877.513	Education of Students with Severe Disabilities: Augmentative Communication Systems	3
ED.877.551	Survey of Autism and Other Pervasive Developmental Disorders	3
ED.877.553	Classroom Programming for Students with Autism	3
ED.877.555	Teaching Communication and Social Skills	3
ED.877.550	Inclusive Practices for Autism Spectrum Disorders	3
Total Credits		**18**

Learning Outcomes

Upon successful completion of the program, we expect students will:

- Describe and define the developmental aspects, theoretical background, descriptive characteristics, and diagnostic characteristics of autism (ASD).
- Define, identify, and implement evidence-based practices to address the educational needs of students with ASD within an educational setting (pre-k through 12th grade).
- Utilize research methods to evaluate and measure the effectiveness of behavioral interventions and instructional procedures within an educational setting (pre-k through 12th grade).
- Design, implement and evaluate an instructional program based on assessment results to increase a desired behavior/skill and decrease undesired behaviors for an individual students or a group of students in an educational setting (pre-k through 12th grade).

Educational Leadership for Independent Schools, Graduate Certificate

This fully online graduate certificate program, offered in collaboration with the Association of Independent Maryland and DC Schools (AIMS), serves the needs of directors, heads of schools, principals, and other professionals responsible for the management of non-public schools. The program is also designed to serve independent schools' teachers who aspire to become administrators in an independent school setting. The certificate program comprises 15 graduate credits, with the option of applying them to the Master of Science in Education with a concentration in Educational Studies.

Admission Requirements

Applicants to this certificate program must be educational professionals employed in a K-12 independent school.

Program Requirements

Code	Title	Credits
ED.851.642	Leadership in Curriculum, Instruction, and Assessment for Independent Schools	3
ED.851.643	Supervision and Professional Development for Personnel in Independent Schools	3
ED.851.644	Public Relations, Marketing, and Fund-raising for Independent Schools	3
ED.851.645	Governance of Independent Schools	3
ED.851.646	Business Management and Finance for Independent Schools	3
Total Credits		**15**

Learning Outcomes

Upon successful completion of the program, we expect students will:

- Gain a deep understanding of their budgets, general principles of budget development, and strategies for communicating budgetary issues to their constituencies.
- Develop budgets for their schools that support faculty and staff in meeting their instructional goals.
- Become more proficient supervisors and professional developers with teachers and staff.
- Become more competent consumers and producers of research that is relevant to their jobs.
- Function more effectively and sensitively with faculty, students, staff, parents, and communities of diverse cultures and socioeconomic status.
- Enhance and refine their management skills, including supervision of personnel, strategic planning, conflict management, and fund raising.
- Improve their application of policy and laws to problems or issues that emerge.
- Become competent instructional leaders through the analysis and use of data about their schools and their communities.
- Build proficiency in the use of technology for instruction and administration.
- Become effective mentors and supervisors for their faculty and staff.
- Work effectively as part of a team and develop teams of teachers who provide participatory and democratic leadership to the school.

Gifted Education, Graduate Certificate

The 18-credit Graduate Certificate in Gifted Education is designed to address the needs of educators who are seeking Gifted and Talented Specialist certification in Maryland.

Candidates will study the foundations of gifted education, characteristics of gifted learners, and hone their knowledge and skills in curriculum, instruction, and assessment to meet the needs of academically talented students in their classrooms. As part of the program, candidates will observe gifted students and design and present lessons that are appropriate for gifted students' cognitive and affective needs. The program is designed to meet all state of Maryland and national standards for teaching gifted education.

Program Requirements

The certificate is designed to be completed in three semesters, with students typically taking two courses per semester—though students may elect to take longer. A new cohort begins each year (subject to sufficient enrollments), with courses being delivered online.

Students may combine this certificate with a second certificate to pursue the Masters of Science in Education-Educational Studies. Students interested in the two-certificate pathway to the master's degree must apply for admission into the master's degree and certificate programs concurrently.

Code	Title	Credits
ED.885.501	The Gifted Learner	3
ED.885.604	Social and Emotional Needs of the Gifted	3
ED.885.512	Twice Exceptional Learners	3
ED.885.505	Creativity in Education	3
ED.885.510	Curriculum, Instruction, and Assessment for Advanced Learners	3
ED.885.820	Practicum in Gifted Education and Talent Development [1]	3
Total Credits		**18**

[1] All candidates employed in Maryland who are seeking Gifted and Talented Education Specialist certification from the Maryland State Department of Education will undertake a semester-long practicum experience as the culminating course of their program.

Learning Outcomes

Program Goals

The goals of the program are to prepare educators who are able to:

- Understand the diverse factors that inform the identification and support of K-12 gifted students.
- Create safe, inclusive, and culturally responsive learning environments that support the social, emotional, and cognitive learning needs of diverse groups of gifted K-12 students.
- Use assessments to identify gifted and talented students, assess their progress and modify interventions accordingly, and provide summative data on their accomplishments.
- Be reflective, ethical professionals who support and advocate for gifted K-12 students through collaboration with families and colleagues, use of community resources, and on-going professional learning.

Leadership in Technology Integration (Online), Graduate Certificate

This 15-credit online graduate certificate program prepares students to become proficient at integrating technology for learning in K-12, higher education, and organizational settings.

Program Requirements

Code	Title	Credits
ED.893.508	Technology and the Science of Learning	3
ED.893.632	Data-Driven Decision Making	3
ED.893.634	Technology Leadership for School Improvement	3
ED.893.645	Explorations in Blended and Hybrid Learning	3
ED.893.850	Advanced Applications in Digital Age Learning	3
Total Credits		**15**

Learning Outcomes

Upon successful completion of the program, students will:

- Develop skills for advanced technologies—including e-learning, telecommunications and multimedia-based instruction, tools for instructional management and assessment, and adaptive computer access.
- Integrate technology for learning—applying the new science of learning, 21st century skills, and a constructivist approach to teaching and learning. Apply authentic assessment strategies, differentiated instruction, and appropriate technology tools to accommodate all learners, including those with special needs.
- Build leadership skills for mentoring, consulting, professional development, and systems change.

Program Goals

The goals of the program are for students to:

- Engage in planning, instructional design, and assessment centered around the needs and abilities of learners in a variety of contexts.
- Develop proactive leadership skills for communicating a shared vision for educational technology among all education stakeholders.

Mathematics/STEM Instructional Leader (PreK-6) (Online), Graduate Certificate

The online 18-credit Mathematics and STEM (Science, Technology, Engineering, and Mathematics) Instructional Leader (PreK-6) graduate certificate programs offer a unique opportunity for elementary teachers to enhance their content knowledge and pedagogical content knowledge and to experience leadership opportunities through engaging in the professional development of their peers. The focus of these two graduate certificate programs is to enrich teachers' subject content knowledge in the area of mathematics and the STEM disciplines, and to build upon their leadership potential through inquiry, dialogue, writing, and reflection. Participants will be eligible to receive a graduate certificate in either Mathematics Instructional Leader or STEM Instructional Leader upon satisfactory completion of the program requirements.

The Graduate Certificate Mathematics Instructional Leader (PreK-6) and Graduate Certificate STEM Instructional Leader (PreK-6) programs are approved by the Maryland State Department of Education (MSDE) for those seeking the Mathematics Instructional Leader (PreK-6) or STEM Instructional Leader (PreK-6) endorsement.

Program Requirements

These two online programs are delivered asynchronously. Students may take one or two courses (3-6 credits in total) each semester. The expected timeframe for completion is between 12 and 24 months.

Mathematics Instructional Leader (Pre-K-6) Certificate Program of Study

Students must first take the following 3-credit courses:

Code	Title	Credits
ED.840.600	Instructional STEM Leadership and Professional Development in the Elementary School	3
ED.840.601	Mathematical Foundations in the Pre-K-6 Classroom	3
ED.840.670	Advanced Methods in the Elementary STEM Classroom	3
ED.840.671	Algebraic and Geometric Thinking in the Pre-K-6 Classroom	3
ED.840.672	Advanced Topics in the Pre-K-6 Mathematics Classroom	3
ED.840.673	Practicum in STEM and Mathematical Instructional Leadership	3
Total Credits		**18**

STEM Instructional Leader (Pre-K-6) Certificate Program of Study

Code	Title	Credits
ED.840.600	Instructional STEM Leadership and Professional Development in the Elementary School	3
ED.840.601	Mathematical Foundations in the Pre-K-6 Classroom	3
ED.840.670	Advanced Methods in the Elementary STEM Classroom	3
ED.840.650	Physical Science in an Integrated Pre-K-6 Classroom	3
ED.840.651	Earth and Space Science in an Integrated Pre-K-6 Classroom	3
or ED.840.652	Life Science in an Integrated Pre-K-6 Classroom	
ED.840.673	Practicum in STEM and Mathematical Instructional Leadership	3
Total Credits		**18**

Learning Outcomes

The learning outcomes of the Mathematics and STEM Instructional Leader (Pre-K-6) certificates are as follows. Students in the program will:

- Enhance their abilities to engage diverse learners in mathematics/STEM content.
- Create equitable learning contexts through which all students will be prepared to engage with mathematics/STEM concepts and skills at the PreK-6 grade level and beyond.

- Understand learning theories and their application to the teaching of mathematics/STEM content and pedagogy.
- Network with other mathematics/STEM educators and professionals.
- Develop the ability to approach the learning of new topics in mathematics/STEM through inclusive, equitable, technology-enhanced, problem-based, and student-centered approaches.
- Understand the development of children's mathematics/scientific knowledge.
- Develop age appropriate learning experiences to foster students' critical thinking and ability to learn through classroom activities that:
  - promote the principles of equity, curriculum, teaching, learning, assessment, and technology (National Council of Teachers of Mathematics, 2000) (Mathematics option), or
  - are interwoven and interdisciplinary (National Science Teachers Association, 2003) (STEM option).
- Apply their learning of effective mathematics/STEM educational practices through the creation, implementation, and modification of content-specific and interdisciplinary mathematics/STEM experiences.
- Evaluate and adapt local curricular materials to incorporate authentic problems related to mathematics/STEM concepts and skills and serve as an instructional resource.

Mind, Brain and Teaching (Online), Graduate Certificate

The 15-credit Graduate Certificate in Mind, Brain, and Teaching is designed for PK-16 teachers and instructors, administrators, and student support personnel, as well as organizational leaders, consultants, and policy makers, seeking to explore how research from the learning sciences has the potential to inform the field of education. Courses will promote integration of diverse disciplines that investigate human learning and development that covers the lifespan.

The certificate builds upon basic and applied research from the fields of cognitive science, psychology and brain science, neurology, neuroscience, and education. It provides educators with knowledge of cognitive development and how emerging research in the brain sciences can inform educational practices and policies.

This program is offered in a fully online format. The timeframe for completion is five consecutive semesters spread over two academic years. Students also have the option of completing the program in three semesters, taking two courses in the fall semester, two in the spring, and the final course in the summer. The courses are offered in a sequential order in a cohort structure. Enrolling in individual courses requires the permission of the faculty adviser.

Program Requirements

Code	Title	Credits
ED.887.615	Explorations in Mind, Brain, and Teaching	3
ED.887.616	Fundamentals of Cognitive Development	3
ED.887.617	Neurobiology of Learning Differences	3
ED.887.618	Cognitive Processes of Literacy & Numeracy	3
ED.887.619	Special Topics in Brain Sciences	3
Total Credits		**15**

Learning Outcomes

Program Goals

This certificate aims to expand graduate students' knowledge and evaluation of theoretical and empirical work in the studies related to the learning sciences. Topics include brain structure and function, cognitive development, learning differences, research and practical application of topics such as emotions, attention, creativity, development of language, motivation, and intelligence, as well as the acquisition of skills and concepts related to arts-integrated pedagogy, mathematics, reading, writing, and problem-solving. Implications for education are considered.

During the program, students will:

- Identify areas in the learning sciences that have relevant application to teaching and learning in formal and informal learning settings. Examples include topics such as emotion and learning, memory, attention, cognitive development, learning differences, literacy, and numeracy.
- Identify basic brain structures and functions.
- Interpret findings from basic and applied research studies.
- Synthesize research findings and consider relevance to educational interventions.
- Apply content from courses to educational and professional practices and policies.

School Administration and Supervision, Graduate Certificate

The 18-credit online graduate certificate program option is designed for school-district employed certified teachers and other certified personnel pursuing leadership positions in kindergarten through grade 12 (K-12) school settings and is approved by the Maryland State Department of Education (MSDE) for certification in school administration and supervision (Administrator I). Program options are also appropriate for preparing department chairs, team leaders, or curriculum coordinators. In addition to the standard School of Education admissions requirements, applicants are expected to be:

1. certified teachers or other certified school personnel with 27 months teaching experience,
2. currently employed by a school district or an accredited independent school, and
3. hold a master's degree
4. Identify a person who will serve as a mentor (during final internship course). The mentor must have either Administrator I or II certification and be currently working in an administrative or supervisory capacity. Additionally, the mentor should be willing to coach the intern and to meet on a regular basis to provide assistance to the intern in experiencing the many facets of leadership.

A strong emphasis is placed upon the provision of opportunities for students to develop the skills and competencies that are necessary for successful educational leadership. The internship is the capstone course; it is completed in the school where the student works and is performed under the careful supervision of an in-school mentor and a university supervisor. Candidates must meet with a faculty adviser before they are fully admitted to this certificate program.

The certificate may be taken as a stand-alone certificate program or combined with another School of Education graduate certificate program to earn a Master of Science in Education with a concentration in Educational Studies.

There are two pathways available for the certificate:

1. a flexible option, open to any school-district employed certified teachers and other certified personnel and
2. an option restricted to JHU Teach For America corps members. For TFA corps members who have taken ED.851.705 Effective Leadership and/or ED.851.603 School Law as electives in the TFA program we will count these courses towards the Graduate Certificate in School Administration and Supervision.

Please note that while the program meets the certification requirements for Maryland, the School of Education cannot guarantee that the coursework will meet state credentialing requirements outside of Maryland. It is the responsibility of candidates who are employed in states other than Maryland to confirm with their state credentialing agency what the certification requirements are for their state and whether there is reciprocity with Maryland.

For more information on the pathways within online certificate option, please visit https://education.jhu.edu/academics/graduate-certificate-programs/school-administration-and-supervision/school-administration-supervision-online/.

Note: As of October 15, 2020 the Maryland State Department of Education (MSDE) requires candidates seeking Administrator I certification to complete 3 credits in special education (COMAR 13A.12.04.01). Students may earn credits through the Johns Hopkins University, School of Education or from another accredited institution. The special education credits may be at the Undergraduate or Graduate level.

Program Requirements

Courses in this certificate option are delivered fully online

Code	Title	Credits
ED.851.601	Organization and Administration of Schools	3
ED.851.603	School Law	3
ED.851.705	Effective Leadership	3
ED.852.602	Supervision and Professional Development	3
ED.881.610	Curriculum Theory, Development, and Implementation	3
ED.851.810	Internship in Administration and Supervision [1]	3
Total Credits		**18**

[1] Please note that students must attend an organizational meeting or make arrangements to speak with the faculty program coordinator in the semester prior to registering for the internship.

[2] As of October 15, 2020 the Maryland State Department of Education (MSDE) requires candidates seeking Administrator I certification to complete 3 credits in special education (COMAR 13A.12.04.01). The credits may be earned through the Johns Hopkins University, School of Education or from another accredited institution. The credits may be taken at the undergraduate or graduate level.

Learning Outcomes

Upon successful completion of the program, we expect students will:

- Demonstrate specific content knowledge regarding school leadership.
- Demonstrate knowledge of skills needed for collaborating with staff and others to create a vision and plan of improvement for a school.
- Demonstrate skills and dispositions that are needed to manage and to lead with respect to human and material resources and the total organization of a school.
- Demonstrate knowledge, skills, and dispositions that promote effective school, family, and community engagement.
- Demonstrate the ability to assess and to understand the larger context in which educators work today.
- Demonstrate knowledge of strategies and procedures for working fairly and justly with all stakeholders in a diverse school environment.
- Demonstrate knowledge of strategies and processes for providing a school instructional program for all students that is evaluated for effectiveness based on student achievement and other relevant factors (i.e., attendance, for example).
- Demonstrate skills and strategies related to the safe and orderly operation of a school.

Urban Education, Graduate Certificate

The 18-credit Graduate Certificate in Urban Education prepares students to work in a variety of capacities serving urban students. It offers three tracks depending on the student's focus: pedagogy, partnerships, or policy. All students take a core three-course sequence focused on

1. understanding the characteristics of urban areas and school systems, and
2. learning a core set of theories around learning, leadership and partnerships.

Program Requirements

The program offers three tracks depending on the student's focus: pedagogy, partnerships, or policy. Students in each track take the same three core courses. Each track also includes two specialized courses. Finally, students take one research course. [*Note: This course counts towards the core coursework in the Master of Science (MS) in Education with a concentration in Educational Studies (Individualized Interdisciplinary Program of Study option) for students seeking to apply Urban Education certificate towards the MS degree program*.] Courses are generally offered online, although sections may be offered at the Baltimore Homewood campus if there is sufficient demand. Students can begin the program in any semester.

Program Plan

Code	Title	Credits
Core Courses		
ED.880.611	The Social Context of Urban Education	3
ED.880.613	Teaching, Learning and Leadership for Successful Urban Schools	3
ED.851.630	School, Family, and Community Collaboration for School Improvement I	3
Tracks		
Select one of the following tracks:		6
Pedagogy Track		
ED.880.603	Educating the Whole Child: Teaching to the Developmental Needs of the Urban Child	

ED.810.607	Culturally Responsive Teaching	
Partnership Track		
ED.851.631	School, Family, and Community Collaboration for School Improvement II	
ED.880.617	Urban School Reform	
Policy Track		
ED.851.512	Politics of Education	
ED.880.617	Urban School Reform	
Research Course		
ED.881.611	Action Research for School Improvement	3
or ED.880.624	Evaluation and Research in Education	
Total Credits		**18**

Learning Outcomes

Through course activities and individual preparation, participants will demonstrate an understanding of and competencies in:

- Understanding the interrelationships of race, class and culture in urban classrooms.
- Communicating effectively within the school and parent community.
- Engaging community resources to enhance learning experiences.
- Building leadership capacity within the school setting.
- Linking school and classroom practices with systemic initiatives.
- Understanding the implications of recent research about urban school reform.

Research and Development Centers

Through their extensive research, partnerships, program development, leadership and service activities, the School of Education's research and development centers play an integral role in furthering the school's mission to support and advance the quality of education and human services for the continuous development of children, youth, and adults. Recognized as national leaders in creating new research-based models of instruction, these centers are making lasting improvements in student achievement and are helping to build high quality education systems that give every child the greatest opportunity to learn and succeed.

Center for Research and Reform in Education

(CRRE) works to improve the quality of education for children in grades preK through middle school. It carries out high-quality evaluation studies and reviews of research on educational programs. The center's work has included local, national, and international evaluations on topics such as effective programs for at-risk students, English language learners, leadership development, and online learning. CRRE is dedicated to providing stakeholders with rigorous evidence on what works in education, and publishes a best evidence website, magazine, newsletter, and blog focused on evidence-based reform. To learn more about the work of the Center for Research and Reform in Education, please visit https://education.jhu.edu/crre/

Center for Social Organization of Schools

Founded more than 50 years ago at Johns Hopkins University, the Center for Social Organization of Schools (CSOS) concentrates its research and development resources on the toughest problems in education—improving low-performing schools and the education they offer their students. The center comprises sociologists, psychologists, social psychologists, and educators who conduct research to improve the education system, as well as staff who develop curricula and provide technical assistance to help put this research into practice in some of the most challenging schools and districts across the country. The center's major programs are Talent Development Secondary (a leading partner in Diplomas Now), the Center on School, Family and Community Partnerships, the Everyone Graduates Center, and the Early Learning Partnership. CSOS also houses the Baltimore Education Research Consortium and Stocks in the Future. To learn more about the work of the Center for Social Organization of Schools, please visit https://education.jhu.edu/csos/.

Center for Technology in Education

The Center for Technology in Education (CTE) strives to improve the quality of life of children and youth, particularly those with special needs, through teaching, research, and leadership in the use of technology. Through a unique partnership, CTE combines the research and teaching resources of the School of Education and the leadership and policy support of the Maryland State Department of Education. The center's emphasis on technology in education is based on the belief that children with special needs have a right to the best possible education in the least restrictive environment, and the belief that technology can transform instruction so that all children can maximize their potential. CTE directs much of its work to expanding educators' awareness and skills so they are able to improve their practice and thereby increase student achievement. To learn more about the work of the Center for Technology in Education, please visit https://education.jhu.edu/cte/ .

Institute for Education Policy

The Johns Hopkins Institute for Education Policy (IEP) is dedicated to integrating the domains of research, policy, and practice to achieve educational excellence for all of America's students. Located at one of the nation's premiere research universities, the institute has direct access to leading national and international scholars. At the same time, located in Baltimore, it shares a home with an urban public school system that embodies many of the deepest challenges facing American education. IEP exists to bridge the gap between outstanding research and urgent need. It is committed to translating research on what narrows America's persistent achievement gaps to those on the front lines of policy and practice. Specifically, IEP connects research to the policies and practices that will ensure all children have access to:

- Deep and intellectually challenging curricula
- Highly-effective educators
- School models that meet students' diverse needs

By delivering the strongest evidence to the policy-makers who set the course and the practitioners who teach and lead, IEP hopes to serve the American children who enter our classrooms every day. To learn more about the work of the institute, please visit https://edpolicy.education.jhu.edu/.

Scholarships

School of Education Scholarships

Aegon USA Inc. Scholarship Fund

Established in 1999 by Aegon USA Inc. to provide scholarship support to School of Education and Public Safety Leadership students who demonstrate financial need.

Marlene K. Barrell Scholarship Fund

Established in 2004 to support graduate students in the School of Education.

BGE Scholarship Fund

This fund was established in 1998 with a generous gift from the Baltimore Gas and Electric Company. Scholarships are awarded to students who demonstrate financial need.

Bloomberg Scholars Program

Established in 1995 with a gift from Michael Bloomberg, ENGR ’64 and former chairman of the JHU Board of Trustees. The Bloomberg Scholars Program provides scholarship support to the School of Education. The competitive awards are made to support outstanding adult part-time students in master’s programs.

Edward Franklin Buchner Fellowship in Education

Established in 1987 by the late Louisa Buchner in honor of the late Dr. Edward Franklin Buchner, professor of education and philosophy and first chairman of the university’s College Courses for Teachers, created in 1909. The fellowship is for doctoral candidates in education at the School of Education.

Dorothy Davis Scholarship for Gifted Education

Established in 1987, this scholarship is for graduate students in gifted and learning disabled education and provides half-tuition scholarships.

Decker-Gabor Scholarship

This scholarship provides tuition assistance for undergraduate and graduate students. Established in 1999 by the late Al Decker, former trustee emeritus, and his wife, Virginia Decker, the scholarship honors Stanley C. Gabor, dean of the school from 1982 until his retirement in 1999.

Linda A. Fedor Memorial Scholarship

Established in 2004 by the Fedor family in memory of their daughter and sister, this scholarship supports an internship in the master’s degree in special education program at the School of Education.

Dean Ralph Fessler 100th Anniversary Scholarship Fund

This fund was established in 2011 to provide financial assistance for students in the School of Education.

Isaac and Fannie Fox Scholarship Fund

Established in 1997 by Lillian Bernice Fox, ‘61, the scholarship supports undergraduate students in memory of her parents.

Lillian Bernice Fox Scholarship Fund

Established in 1997 by Lillian Bernice Fox, ‘61, for undergraduate students.

The Stanley C. Gabor Scholarship Fund

Established in 1999 in honor of Dean Emeritus Gabor at the time of his retirement to provide support to Carey Business School and School of Education students who demonstrate financial need.

The Sheldon D. and Saralynn B. Glass Endowed Counseling Scholarship Fund

Established in 2011 with a generous gift from Dr. Sheldon D. Glass and Mrs. Saralynn B. Glass to provide scholarship funds for full-time students enrolled in the Counseling Fellows Program who demonstrate financial need.

Nancy Grasmick Fellowship Fund

Established in 1998 to provide financial assistance to doctoral students in the School of Education.

David and Bessie Greenberg Scholarship Fund

Established in 2010 by Sheldon and Robin Greenberg to provide financial assistance for practitioners in the fields of law enforcement, fire/EMS, emergency management, public health, the military, security, and related public safety endeavors who pursue their degree(s) through the Division of Public Safety Leadership.

Alma D. Hunt/VCM Grant for Special Education

Established in 1999 by an anonymous donor in honor of the donor’s grandmother (1891–1987), a lady whose humble life and generous spirit were underscored by her compassionate concern to put others first, the grant provides tuition assistance to urban students with demonstrated financial need who are in the internship stage of their special education program in the School of Education.

Jumble-Inn Scholarship

The Jumble-Inn Scholarship was established in 1920 by a gift from the Jumble-Inn Committee to benefit women who teach in Baltimore elementary schools, who are residents of the city, and who are candidates for degrees in education. Preference is given to those in need of financial assistance.

Chester L. and Mary Ruth Kiser Scholarship

Established with a legacy gift in 2017, the Chester L. and Mary Ruth Kiser Scholarship Fund supports students in the School Administration and Supervision program.

Mary Levin Scholarship Fund

Established in 1978 for post-master’s degree students by the late Cecelia L. Bass, ’41, and Leon P. Bass in honor of her sister, the late Mary Levin, former executive secretary to the deans of McCoy College and the Evening College, now separately known as the Carey Business School and the School of Education.

Helen Hassie Lichtenstein Scholarship

Established in 1986 by the late Dr. Arthur Lichtenstein, ’30, ’34, in memory of his wife Helen Hassie Lichtenstein, ’39, this scholarship is awarded annually to a doctoral student at the School of Education who exemplifies a commitment to the field of special education and may need institutional support to further their studies. Dr. and Mrs. Lichtenstein, both alumni of the School of Education, were special education professionals in Baltimore public schools for many years.

Kelvin D. Machemer Scholarship

Established in 2004 by Kelvin D. Machemer to provide scholarship support for part-time students in the School of Education.

Michael-Weinstein Scholarship

Established in 1998 by Joel A. and Bonita M. Weinstein, ’72, in memory of her mother and brother, this fund provides financial assistance to students in the School of Education.

Middendorf Endowed Scholarship

Established in 2017 by the Middendorf Foundation in recognition of the 10th anniversary of the School of Education as a standalone school, the Middendorf Endowed Scholarship provides financial assistance to graduate students in the School of Education.

Richard and Marie Conley Mumma Scholarship Fund

Established in 1997 by the estate of Richard and Marie Conley Mumma, this scholarship provides financial assistance to graduate students. Richard Mumma served as dean of McCoy College and the Evening College from 1951 to 1970.

Helen M. and E. Magruder Passano Jr. Scholarship

Established in 1997 by Helen M. Passano, ’78, and E. Magruder Passano, ’67, ’69, and Waverly Inc., the fund provides need-based scholarships.

Pi Lambda Theta Scholarship

Established in 1980 by the Chi Chapter of Pi Lambda Theta, a national honor and professional association in education, to honor Drs. Florence E. Bamberger and Angela Broening. The fund provides financial assistance for graduate education students at the School of Education. Dr. Bamberger served as director of College Courses for Teachers and the summer session during the 1930s and 1940s.

Eugene H. Ryer Scholarship Fund

Established in 1998 in memory of Eugene H. Ryer, who attended evening courses at Hopkins during the 1930s, by his wife, Catharine H. Ryer, and son, David E. Ryer, ’64. The fund provides financial aid for students in the School of Education.

Aileen and Gilbert Schiffman Fellowship

Established in 1996 by a gift from The Hodson Trust in memory of Gil Schiffman, professor emeritus and former director of the Graduate Division of Education, this fellowship is awarded to School of Education doctoral students.

Sonia Beser Snyder and Naomi Beser Scholarship Fund

Established in 1997 by Sonia Beser Snyder, ’44, in memory of her twin sister, Naomi Beser.

William H. Thomson Scholarship

Dorothy S. Thomson established this fund in memory of her husband to provide financial assistance to worthy students in the School of Education.

Anna McClintock Welch Matching Fund

The family and friends of Anna McClintock Welch established a fund in her honor to assist working undergraduate students who require partial financial aid for their education. The fund matches up to 50 percent of the student’s earned income required to cover tuition, fees, and books. Although this is a scholarship program, the donors of the fund encourage recipients to repay the gift and thereby help students in the future.

Eva Orrick Bandell Wilson Memorial Scholarship

Established in 1967 by Eva Orrick Bandell Wilson, who attended classes in the Evening College, the fund provides aid for students with demonstrated financial need in the School of Education.

Alison P. Wolcott Memorial Scholarship

Established in 2008, for the purpose of advancing the service goals and ideals of Alison Paige Wolcott, to help cover the tuition and fees of a student enrolled in the Master of Arts in Teaching (MAT) program.

State Authorization of Distance Education and Higher Education Agencies in Other States

State Authorization of Distance Education

Johns Hopkins University has been approved by the Maryland Higher Education Commission to participate in the National Council for State Authorization Reciprocity Agreements effective February 22, 2016. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education.

Higher Education Agencies in Other States

Contact Information for Student Complaint Processes

Johns Hopkins University distance education students can contact the higher education agency in their state, the District of Columbia, and Puerto Rico with questions, comments, or complaints (see https://provost.jhu.edu/education/accreditation-and-academic-compliance/higher-education-agencies-in-other-states/ for a list of state agencies with contact information). The information provided in this link should not be construed as informative of what agencies regulate Johns Hopkins University or in what states the university is licensed or required to be licensed. States, through the relevant agencies or offices of the Attorney General, will accept complaints regardless of whether an institution is required to be licensed in that state.

Disclosures and Policies

NC-SARA

The following disclosures and policies pertains to students who enroll in Johns Hopkins University distance education programs as a condition of participating in NC-SARA.

The Johns Hopkins University encourages the complainant to seek resolutions to the allegations/grievances within the university’s processes. Complainants are to refer to their specific school in order to familiarize themselves with those policies and/or procedures. If a complainant has exhausted JHU grievance procedures and the grievance has not been resolved, the complainant has the right to file a complaint with the Maryland Higher Education Commission, the state portal agency for SARA. The portal agency is responsible for further consideration and resolution.

Maryland Higher Education Commission
6 North Liberty Street, 10th Floor
Baltimore, MD 21201
410-767-3300

http://www.mhec.state.md.us

Texas

The following disclosure pertains to students who enroll in Johns Hopkins School of Education Master of Science in Education Urban Teachers collaboration program offered in Texas. After exhausting Johns Hopkins' grievance/complaint process, current, former, and prospective students may initiate a complaint with THECB by submitting the required forms along with evidence of their completion of their institution's complaint procedures. Complaints may be submitted using one of the following three options:

- Completing the online student complaint form and uploading the required supporting documentation in Portable Document Format (PDF). To access the online student complaint form, use the "Contact Us" link to submit an email with "Student Complaint Against a Higher Education Institution" selected as the Contact Reason. After submitting your email, wait a few moments for the online student complaint form to be automatically presented for your use.
- Sending the required Student Complaint and Release Forms and supporting documentation as PDF attachments by email to studentcomplaints@thecb.state.tx.us.
- Mailing printed forms and documentation to:
  Texas Higher Education Coordinating Board
  Office of General Counsel
  P.O. Box 12788
  Austin, Texas 78711-2788

Facsimile transmissions of student complaint forms are not accepted.

All submitted student complaint forms must include a signed Family Educational Rights and Privacy Act (FERPA) Consent and Release form and THECB Consent and Agreement Form. Submitted complaints regarding students with disabilities shall also include a signed Authorization to Disclose Medical Record Information form.

Process: The first step in addressing a complaint is to follow Johns Hopkins' complaint procedures. If Johns Hopkins is unable to resolve the matter after you have exhausted their complaint and appeal processes, you may file a complaint with this Agency.

SCHOOL OF MEDICINE

Foreword

Medical and biomedical education is a complex mixture of graduate and professional education. Students are expected to master basic principles and theories as well as to obtain sufficient knowledge and experience to practice in their fields. The education must convey the continually expanding body of medical and biomedical science and prepare students for working during a time of rapid change in technology and societal needs.

To meet these educational goals in the program leading to the M.D. degree, schools of medicine must be at once conservative and creative. They may often seem overly conservative, but this can be attributed to the physician's painfully acquired distrust of panaceas. There is a generally accepted need to preserve certain fundamental principles —the axiom, for example, that the rational practice of medicine rests on a firm understanding of the basic medical sciences. Yet the great advances in medicine, the need to reasonably limit the number of years of formal education, the increasing number and complexity of special fields, and the diversity of interests and talents among students all demand continual examination of our educational aims and process.

Old traditions and new methods are characteristics of the Johns Hopkins University School of Medicine, where medical student education to a large degree was founded in response to the highly variable standards of medical education at the time. Hopkins was the first medical school in the United States to require a college degree for admission to the M.D. program, quite a radical idea when the first class entered over one hundred years ago. A college degree is still required, and current admission policies encourage a broad undergraduate education and permit successful applicants to select from a number of options prior to matriculation. The relative flexibility of the original curriculum foreshadowed the even greater number of choices available today. The wide variety of elective courses in the current medical student curriculum allows students to extend their knowledge in special fields of interest and to schedule elective and required clinical courses in a flexible manner.

In addition to the four-year M.D. program, the School of Medicine provides a number of graduate programs in biomedical sciences and related fields that lead to a Ph.D. or Master's degree. Also, selected students are given the opportunity to work simultaneously towards both the M.D. and the Ph.D. degrees.

The diversity of these educational options is detailed in this catalogue.

Mission Statement

The mission of the Johns Hopkins School of Medicine is to prepare physicians to practice compassionate clinical medicine of the highest standard and to identify and solve fundamental questions in the mechanisms, prevention and treatment of disease, in health care delivery and in the basic sciences.

Medical Education Program Objectives

The aim of the predoctoral medical curriculum at the Johns Hopkins School of Medicine is to prepare a diverse group of physician-leaders to improve the health of a diverse population through patient-centered medical practice and by addressing fundamental questions related to human health and disease; health care delivery; the medical humanities; and the basic sciences. As a measure of their competence, every graduate of the Johns Hopkins University School of Medicine will:

The Science and Practice of Medicine

- Apply scientific principles and a multidisciplinary body of scientific knowledge to the diagnosis, management, and prevention of clinical problems.
- Understand the variation in the expression of health and disease through critical evaluation of biomedical research.

Clinical Competence

- Obtain a sufficient level of medical knowledge to understand the basic facts, concepts, and principles essential to competent medical practice.
- Exhibit the highest level of effective and efficient performance in data gathering, organization, interpretation and clinical decision-making in the prevention, diagnosis, and management of disease.

The Social Context of Medicine

- Identify and respond equitably to the social, behavioral, economic and structural factors that influence health, disease, health care, and biomedical science.

Communication

- Demonstrate effective and compassionate interpersonal communication skill toward patients and families necessary to form and sustain effective medical care.
- Present information and ideas in an organized and clear manner to educate or inform patients, families, colleagues and community.

Professionalism

- Display the personal attributes of compassion, honesty and integrity in relationship with patients, families and the medical community.
- Adhere to the highest ethical standards of judgment and conduct as it applies to the health care milieu.
- Demonstrate a critical self-appraisal in their knowledge and practice of medicine, as well as receive and give constructive appraisal from/ to patients, families, colleagues and other healthcare professionals.

Lifelong Learning

- Understand the limits of personal knowledge and experience and will demonstrate the intellectual curiosity to actively pursue the acquisition of new knowledge and skills necessary to refine and improve their medical practice and/or to contribute to the scientific body of medical knowledge.

Medical Student Promotions

The record of each medical student will be reviewed by the appropriate Committee on Student Promotion at scheduled intervals and action will be taken on each student's status. In addition to maintaining good academic standing, medical students are expected to adhere to the accepted standards of professional behavior in their contacts with fellow students, faculty, patients, staff, and others. A student must satisfactorily complete the work of an academic year in all regards and be in good standing before advancement to the next year.

During years one and two, medical students must pass every course in order to be promoted. In either the first or second year, dismissal is automatic if a student receives two failing grades, one failing and one unsatisfactory grade, or unexcused incompletes in two or more courses.

A medical student may repeat only one year of the first two years of the curriculum. During the repeat year dismissal is automatic if the student receives one failing grade or two unsatisfactory grades.

During the clinical years, a failure in a required course/clerkship will be referred immediately to Promotions Committee for discussion and presentation of a remediation plan, unless the student's overall performance requires consideration of dismissal. The student will be permitted to complete any subsequent required course/clerkship they have begun, but no additional required clerkships can be taken until the failure is remediated. Unsatisfactory performance in two courses/clerkships or failure in a subsequent course will result in dismissal from school at the discretion of the Committee on Student Promotion.

The Committee on Student Promotion may make specific recommendations regarding remediation of grades in any year.

Any student facing a potential adverse decision by the Committee on Student Promotion will be invited to address the Committee along with a School of Medicine faculty advocate of their choosing. A family member who is a School of Medicine faculty member may not serve as a student's faculty advisor. The student must put forth an explanation for the deficient performance, any extenuating circumstances, and any other information relevant to the student's fitness to continue the academic program.

A student who is dismissed or subject to another adverse decision affecting their status in the educational program may appeal to the Dean of the School of Medicine. The Dean's review will be based upon procedural grounds alone to guarantee that due process was afforded the student and that published policies were followed appropriately.

A student who has been dismissed may have the right to petition the Committee on Student Promotion for readmission to the program if there is additional information that might demonstrate the student's ability to successfully meet the academic and professional expectations of the school.

In accordance with the high standard of ethical conduct required of a physician, students are expected to refrain from acts of dishonesty which impair the academic integrity of the University. Students whose behavior appears to be unbefitting a physician will be reviewed by an ad hoc committee of the Advisory Board of the Medical Faculty, and such other persons as may be deemed appropriate. The ad hoc committee will be appointed by the Dean, or, in the Dean's absence, the Vice Dean for Education. This committee will decide on the student's status within the school. Students reviewed under such circumstances will have the opportunity to meet with the ad hoc committee in person prior to a decision. A student whose status is affected by a decision of the ad hoc committee will be afforded an opportunity to appeal to the Dean and, thereafter, to the Provost of the University. A complete description of procedures to be followed in disciplinary matters is located in this catalogue in the section titled "Instruction Leading to the M.D. Degree." It is also available in the Student Affairs Office.

At the end of the Fourth Year the candidate's entire record, including both required and elective work, will be reviewed by the Committee on Student Promotion. Those who have satisfactory records and who are judged by the Committee to have demonstrated evidence of personal fitness for a career in medicine will be recommended to the Advisory Board of the Medical Faculty for the degree of Doctor of Medicine. Students must have resolved all outstanding charges of misconduct and violations of academic ethics to be eligible for graduation.

Special Students/Visiting Students

Under special circumstances a limited number of properly qualified persons may be admitted as special students to courses offered by the School of Medicine. Special students will not ordinarily be accepted for enrollment in the required courses leading to the M.D. degree. Exceptions to this policy require the approval of the Vice Dean for Education. Credit will not be given for such work toward the M.D. degree in this school.

Students enrolled in other medical schools who desire clinical clerkships in the School of Medicine are advised that the School reserves the right to strictly evaluate the pre-clinical and clinical education provided by the applicant's own school. Moreover, since clerkship opportunities are necessarily limited, the School must give first consideration to placement of its own students. As a general rule, clerkships are limited to students in LCME-approved schools. Visiting students are also accepted for research opportunities. Enrollment of visiting students is usually limited to one four week period per academic year.

Information on application, fees, and health insurance requirements may be obtained from the Office of the Registrar.

Enrollment

The School of Medicine enrolls full time students for the M.D., Ph.D., and Masters' degrees. Part-time students are not accepted for the M.D. degree. Under special circumstances part-time students may be accepted for graduate study. Tuition is assessed in relation to period of enrollment as specified in the Tuition and Fees section of this circular.

Students may interrupt their course of study to enroll in a combined degree program. Leave of absence status may be requested if a student wishes to temporarily withdraw from the course of study.

Advanced studies program status is a category of full-time enrollment that recognizes the student who interrupts the usual sequence of study to do an additional year (or years) of research or clinical work at Johns Hopkins or another approved site. Students on Advanced studies program status are assessed a minimal registration fee. The Associate Dean for Medical Student Affairs must approve all requests for leave of absence and advanced studies program status.

Interdivisional Studies

Regularly matriculated students throughout the University are eligible to register for credit courses offered by the basic science departments and selected courses in clinical departments providing prerequisites are met and space is available. Admission to the required courses of the medical curriculum require approval of the course director and the Associate Dean/Registrar.

A tutorial program designed for junior and senior undergraduates offers over 100 tutorials in clinical and basic science departments. Divisional registrars can provide additional information.

Johns Hopkins Bloomberg School of Public Health

Courses in the Johns Hopkins Bloomberg School of Public Health are open to students of the School of Medicine without payment of additional fees if consent is obtained from the course instructor and the administrative officers of the School of Medicine. Interdivisional registration forms must be used to enroll in Bloomberg School courses.

Medical students may elect to pursue the Master of Public Health (MPH) program in the Bloomberg School in conjunction with the medical curriculum. The program will consist of eleven months of required and elective courses in the Bloomberg School. This is exactly the same program followed by other individuals pursuing the MPH degree, as described in the catalogue of that School. The specific elective course program will vary according to the special interests of the individual student.

Medical students integrate this special program into their medical curriculum by taking a year's leave of absence on completion of the second or third year. During that year the student is enrolled full-time in the MPH program in the Bloomberg School. Upon completion of the MPH degree program, the student will return to the School of Medicine. The MPH degree is awarded independently upon completion of all MPH degree requirements.

Tuition support for this program may be applied for through the Bloomberg School.

All applications are subject to the approval of the Admissions Committee of the MPH program in the Bloomberg School. School of Medicine approval for all programs must be obtained from the Associate Dean for Medical Student Affairs. Comparable study arrangements are possible also for medical students in other U.S. medical schools.

Opportunities are available for further training within the departments of the School and in numerous graduate degree programs. For those interested, information concerning these programs may be obtained from Admissions Services in the Bloomberg School.

General Information

Conduct in Teacher/Learner Relationships (Student Mistreatment Policy)

Please see The Johns Hopkins University School of Medicine Policy on Conduct in Teacher/Learner Relationships and Learner Mistreatment. (https://hpo.johnshopkins.edu/som/policies/501/37867/policy_37867.pdf?_=0.828167584366)

Faculty Traveling Fellowship and Visiting Scholar Fellowship

The Tilghman Traveling Fellowship: In 1976, Dr. and Mrs. R. Carmichael Tilghman established the Tilghman Traveling Fellowship in the Johns Hopkins University School of Medicine.

The Tilghman Traveling Fellowship will be awarded periodically to young members of the medical faculty, who are native-born citizens of the United States, to assist them during a sabbatical leave of up to one year to travel outside the Baltimore area to pursue new theories, methods, and techniques in their chosen discipline.

The recipients are to be selected by a committee composed of the Dean of the Medical Faculty, the Vice Dean for Faculty, the Vice Dean for Research, the Vice Dean for Clinical Investigation, the Associate Dean for Research Administration, and the Directors of the Departments of Medicine and Pediatrics. Both full and part-time members of all departments in the School of Medicine shall be eligible for consideration. Those whose proposed work during the sabbatical year looks toward clinical application will be given the strongest consideration.

Guidelines are available at https://www.hopkinsmedicine.org/research/resources/offices-policies/ora/funding/tilghman.html. Applications may be submitted at any time, but should be submitted at least 60 days prior to the proposed travel.

The Shing Yuk Yau Memorial Fund: The fund was established in 1984 in memory of Shing Yuk Yau by his family and friends. Its purpose is to help defray traveling expenses for visiting Chinese scholars studying medicine at Hopkins. Preference is given to students and faculty studying subjects relating to the brain. The Fund fosters continuing exchanges between the School of Medicine and the Chinese Academy of Sciences.

Lectureships and Visiting Professorships

The Herter Lectureship: In November 1902, Dr. and Mrs. Christian A. Herter of New York offered to the Medical Department of the Johns Hopkins University the sum of $25,000 "for the formation of a memorial lectureship designed to promote a more intimate knowledge of the researches of foreign investigators in the realm of medical science." This gift was accepted by the Trustees of the University on November 3, 1902. According to the present terms of the gift, some eminent worker in the medical sciences is to be asked each year to deliver lectures at the Johns Hopkins University upon a subject with which they have been identified. The selection of a lecturer is to be left to a committee representing the departments of pathology, physiological chemistry, and clinical medicine, and if "in the judgment of the committee it should ultimately appear desirable to open the proposed lectureship to leaders in medical research in this country, there should be no bar to so doing."

William Sydney Thayer and Susan Read Thayer Lectureship in Clinical Medicine: On May 16, 1927, "a group of admirers of Dr. William Sydney Thayer" donated a fund to the Johns Hopkins University to endow a lectureship to be known as "The William Sydney Thayer and Susan Read Thayer Lectureship in Clinical Medicine".

According to the terms of the gift, the income of this fund is to be used to defray the expenses of one or more annual lecturers on subjects "in Clinical Medicine, Pediatrics, Neurology, or border line branches." The selection of the lecturer or lecturers is to be made by a "Committee composed of those who are from time to time occupying the chairs of Professor of Medicine, Pathology, Pediatrics, and Neurology at the Johns Hopkins Medical School."

Hideyo Noguchi Lectureship: In 1929, Dr. Emanuel Libman of New York generously gave the University $10,000 for the establishment of a lectureship in the History of Medicine. In accordance with Dr. Libman's desires, the lectureship was named after the distinguished investigator, Hideyo Noguchi.

The Dohme Lectureship: In June 1916, Mrs. Charles E. Dohme of Baltimore generously offered to pay annually the sum of $1,000 to the Trustees of the Johns Hopkins University to make it possible to offer each year a course of lectures in memory of her deceased husband, Charles E. Dohme, a well-known pharmaceutical chemist of Baltimore. The purpose of these lectures was to promote the development of a more intimate relationship between chemistry, pharmacy, and medicine. The donations made by Mrs. Dohme for this purpose up to the time of her death in December 1937 made it possible to offer, prior to 1938, thirteen courses of lectures by distinguished scientists from either this country or abroad. Upon her death, the University received from her estate a legacy amounting to the sum of $18,500 after the payment of inheritance taxes to be used as an endowment fund, the income of which is to be devoted to the continuation of these lectures.

The lectureship is open to scientists from any part of the world, and the selection of the lecturer is made by a committee representing the departments of pharmacology, chemistry, and medicine.

The Daniel Coit Gilman Lectureship: Through a generous gift from the Avalon Foundation, the School of Medicine has been able to establish a distinguished lectureship designed to further understanding between medical science and the humanities. The lectureship has been named in honor of the first president of The Johns Hopkins University, Daniel Coit Gilman, who was so influential in establishing the graduate character of the School of Medicine. This lectureship was inaugurated in the academic year 1960-61 with the first Gilman Lecture being appropriately given by Dr. Milton Stover Eisenhower, eighth president of the Johns Hopkins University.

The David M. Gould Lectureship in Radiology: In 1962, friends and former associates of Dr. David M. Gould generously created a lectureship in his memory in the field of Radiology. Dr. Gould was a member of the Johns Hopkins faculty from 1947 to 1955. During this time, he left a lasting impression on students and physicians alike for his warm understanding of their daily problems. His unusual skill as a clinical radiologist, teacher, and investigator was admired and respected by all who knew him. At the time of his early death, Dr. Gould was Professor of Radiology at the University of Colorado. The lecturers are selected from scholars distinguished in clinical radiology or related disciplines in accordance with the action of a committee headed by the Chairman of the Department of Radiology.

The Lawson Wilkins Lectureship: Through generous gifts from the colleagues, the students, and the friends of Dr. Lawson Wilkins, it has been possible to establish a distinguished lectureship designed to commemorate his great contribution to pediatric endocrinology.

The David Barap Brin Visiting Professorship in Medical Ethics: This visiting professorship, established by his family and friends, honors the memory and reflects the interests of David Barap Brin (1957-1980). The purpose of this visiting professorship is to foster the appreciation and understanding of ethical issues in basic and clinical research and patient care.

The Samuel Novey Lectureship in Psychological Medicine: The family, friends, and colleagues of Dr. Samuel Novey wished to establish a lectureship to honor his contributions as practicing physician, and as a teacher of psychiatry and psychoanalysis.

At the time of his death, Dr. Novey was Director of Training at the Sheppard and Enoch Pratt Hospital. He had also for many years been actively engaged in teaching and research at the Johns Hopkins University School of Medicine. Because he held joint appointments in the Departments of Psychiatry and Medicine, it seemed especially appropriate to designate the broad field of psychological medicine as the topic to which the lectures would be addressed.

The Willard Sears Simpkins Lectureship Fund An annual lectureship has been established in memory of Willard Sears Simpkins, a former trustee of the John F. Kennedy Institute. Dr. Frederick L. Richardson, former director of the Institute, was instrumental in assuring this memorial. The lecturers are to be selected from scholars distinguished in clinical or scientific aspects of child development or the related medical sciences. The selection of the lecturers will be left to a committee representing the Department of Pediatrics, Physiology, Neurology, and the Behavioral Sciences.

The Sir Henry Hallett Dale Memorial Lectureship: In 1971, the Burroughs Wellcome Fund generously provided an endowment to the Johns Hopkins University School of Medicine for the establishment of an annual Visiting Professorship of Clinical Pharmacology in honor of the distinguished pharmacologist. The purpose of the lectureship is the promotion of a wider appreciation of the importance of clinical pharmacology and its scientific base.

William F. Rienhoff, Jr. Lectureship: In 1971, a grateful patient announced her intention to endow a lectureship in clinical surgery in honor of Dr. William F. Rienhoff, Jr. Through her generous gifts to the University, the Lectureship was formally established in 1973. The lecturers are to be selected from scholars distinguished in clinical or investigative surgery, and the selection will be made by a committee representing the Section of Surgical Sciences.

The Paul Ehrlich Lectureship: In 1957, Dr. Emanuel Libman of New York generously gave to the School of Medicine a sum of $10,000 for the establishment of a lectureship in honor of Dr. Paul Ehrlich. The lectures under this endowment are given each year by the recipients of the Paul Ehrlich Awards and are presented on Young Investigators' Day.

The Alan Coopersmith Visiting Professorship: The family, colleagues, and friends of Dr. Alan Coopersmith have established a lectureship (or in special circumstances, a visiting professorship) in his memory in the field of Pediatric Hematology-Oncology. Dr. Coopersmith was a member of the Pediatric House Staff (1971-1973) and a Fellow in Pediatric Hematology from 1973 until the time of his death on December 5, 1974. His concern for patients and their problems and his incisive approach to complex clinical situations demonstrated his excellence as a clinician. Also evident was his desire to explore the unknowns of medicine by developing investigative skills in the laboratory. Lecturers will be chosen from distinguished scholars in clinical and/or research Pediatric Hematology-Oncology.

The William M. Shelley Visiting Professorship: Following the accidental death of Dr. William M. Shelley in 1974, his colleagues, friends, and former students generously created a Visiting Professorship in his memory, formally established in 1977. A graduate of the Johns Hopkins School of Medicine and former member of the Pathology house staff, Dr. Shelley served on the Pathology faculty from 1960 to 1970. In recognition of Dr. Shelley's commitment and contributions to teaching and residency training, the Visiting Professor spends several days with the residents and staff of the Department of Pathology in addition to delivering a formal lecture. The Visiting Professor is chosen from scholars distinguished in diagnostic pathology by a committee representing Pathology, Surgery, and Oncology.

The Philip Bard Lectureship: In 1978, the friends, colleagues, and family of Philip Bard donated funds to the Johns Hopkins University to endow a lectureship to be known as the Philip Bard Lecture in Medical Physiology.

According to the terms of this endowment, the income from the fund is to be used to defray the expenses of one or more annual lectures in Physiology, particularly as related to Medical Science. The selection of the lecturer or lecturers is to be made by a committee of those who are from time to time occupying the chairs of Physiology, Biological Chemistry, Pediatrics, and Medicine.

The John Howland Visiting Professorship: During the 1930's, the Harriet Lane Board of Managers set aside funds toward a tribute to Dr. John Howland, who, in 1911, succeeded Dr. Clemens Von Pirquet as Professor of Pediatrics at the Johns Hopkins University. He is widely credited with establishing academic pediatrics as it is known today, and with creating the first successful full-time university clinical department in this country. He was a superb clinician, teacher, and clinical investigator, for example, concerning acidosis and diarrhea, and calcium metabolism in tetany and in rickets. The Visiting Professor is to be selected from leading pediatric clinician investigators, recommended by the Academic Affairs Committee of the Department of Pediatrics.

The Henry G. Kunkel Lectureship: The family, friends, and former students of Henry G. Kunkel have endowed a lectureship in immunology commemorating this outstanding immunologist and clinical investigator. Dr. Kunkel, a graduate of the Johns Hopkins University School of Medicine, was Professor and Senior Physician at the Rockefeller University. During the course of his career, he made outstanding contributions to immunology, genetics, and clinical medicine. His demonstration that myeloma proteins closely resemble normal immunoglobulins laid the foundation upon which the present knowledge of immunoglobulin structure and led to the recognition of IgM and IgA as separate antibody classes. Dr. Kunkel's pioneering work in systemic lupus erythematosus and rheumatoid arthritis contributed in a seminal manner to knowledge of the underlying pathogenesis of these autoimmune diseases.

The Leslie Hellerman Lectureship: The Leslie Hellerman Lectureship was established in 1983 by the Department of Physiological Chemistry (now Department of Biological Chemistry) of the Johns Hopkins University School of Medicine, and by the family, friends, and former students of Professor Hellerman (1896-1981) to honor his memory. In 1927, he joined the Department of Physiological Chemistry and formally retired from his productive career in 1961. His pioneering work related to the structure of enzymes, metallo-enzyme function, and the application of mechanistic organic chemistry to explain enzymatic processes.

The Walter E. Dandy Visiting Professorship: Established in 1985, the Walter E. Dandy Visiting Professorship enables outstanding persons to be invited to spend a short period of time at Johns Hopkins reviewing research, meeting with students and faculty, and delivering the Dandy lecture. Among the goals of the professorship is to increase communication between basic and clinical neuroscientists.

Walter E. Dandy was a Hopkins neurosurgeon, whose outstanding research and neurosurgical abilities were summarized by his colleague Warfield Longcope, Professor of Medicine, who wrote that Dandy "had the genius of Lister combined with the brilliant technique of Horsley. He commanded respect and admiration from everyone who came in contact with him, and for those of us who saw him often, these were combined with great affection."

The Ray A. Kroc and Robert L. Kroc Lectureship: In 1985, The Kroc Foundation endowed a visiting scientist and lectureship. The funds are intended for the advancement of multiple sclerosis and other neurological disease research at Johns Hopkins University. Each year an eminent neuroscientist is invited for a visit of several days to meet informally with colleagues and to present a lecture. The selection of the lecturer is made by a committee chaired by the Director of the Department of Neurology.

The Nicholson J. Eastman Professorship and Lecture: Dr. Nicholson J. Eastman, one of the most influential and important American obstetricians, served for more than 20 years as Obstetrician-in-Chief at The Johns Hopkins Hospital and Director of the Department of Obstetrics in The Johns Hopkins University School of Medicine. Dr. Eastman was responsible in large part for the scientific development of obstetrics, and his numerous publications probably represent the first efforts to scientifically delineate what we now recognize as maternal fetal medicine. On behalf of his former students, residents, and friends, the Johns Hopkins University School of Medicine is happy to perpetuate his contributions to obstetrics and gynecology through the Nicholson J. Eastman Professorship and Lecture.

The Israel Zeligman Lectureship in Dermatology: The Israel Zeligman Lectureship in Dermatology was established in 1983 to honor the contributions of Israel Zeligman, M.D., who had been on the faculty of The Johns Hopkins University School of Medicine since 1946. He had been responsible for the teaching of all the residents that had passed through the Department of Dermatology Residency Program at that time. Dr. Zeligman was highly respected in the private practice of Dermatology, and was one who gave freely of his time to promote the clinical training program at The Johns Hopkins University School of Medicine. The Lectureship is supported by revenues generated by donations from former residents and friends.

The Vernon B. Mountcastle Lectureship: Upon the retirement of Vernon Mountcastle from the Hopkins' faculty in 1992, his friends and colleagues contributed funds to establish a lectureship in his name. The lectureship honors the major contributions of Dr. Mountcastle to neuroscience and to Johns Hopkins University. Each year a world-class researcher is invited to the Medical School to lecture on an area relevant to the neurosciences.

The Albert Lester Lehninger Memorial Lectureship: In 1989, family, friends, and former associates of Dr. Albert L. Lehninger established a lectureship in his memory in the field of biochemistry. Dr. Lehninger served as Professor and DeLamar Professor of the Department of Biological Chemistry from 1952 to 1978. He was then appointed University Professor of Medical Science, a position created to honor his distinguished service to the University, his scientific discoveries, and his teaching and writing achievements. He served in this position until his death in 1986. This Lectureship was inaugurated in 1990.

The Dean's Lecture Series: This series of lectures is designed to bring the work of senior members of the faculty to the attention of the Johns Hopkins community.

The Mary Elizabeth Garrett Lectureship: In 1996, the Women's Leadership Council in cooperation with the Dean's Office inaugurated the Mary Elizabeth Garrett Lectureship. The lectureship honors Ms. Garrett, who, in 1890, provided the final funding necessary to open The Johns Hopkins University School of Medicine with the provision that women be admitted under the same terms as prescribed for men.

The Ira and Jean Belfer Lectureship: The Belfer Lectureship was established in 1992 by Dr. and Mrs. Myron Belfer in honor of his parents, Ira and Jean Belfer. Dr. and Mrs. Belfer created the Ira and Jean Belfer Lectureship to allow leaders in the field of pediatric and adult cardiology to come to Johns Hopkins to share their most recent discoveries.

Ira and Jean Belfer established the Peter Belfer Laboratories at the Johns Hopkins Medical Institutions in 1973 in memory of their youngest son, Peter, who was a patient at Hopkins from the age of 6 months until his death from heart disease in 1991 at the age of 25. Since that time, the Belfer family and their friends have displayed unflagging interest and continued generosity in the support of Belfer Laboratories.

The Professor Carol J. Johns Memorial Lecture in Lung Health and Disease: This lecture was established within the Division of Pulmonary and Critical Care Medicine at the Johns Hopkins School of Medicine following the death of Dr. Johns on February 24, 2000.

This lectureship attests to the esteem in which she was held by the division as well as her commitment to excellence, the humanistic missions of the clinicians, and the contribution of women to medicine.

Loan Funds

Harold L. Amoss Loan Fund In 1956, Mrs. Harold L. Amoss and friends of the late Dr. Amoss established an endowment fund with income to be used for loans to aid deserving medical students.

J. G. Boswell Loan Fund This fund provides loans for medical students.

Class of 1932 Student Loan Fund The Class of 1932 established a long term fund for medical students in January of 1983, recognizing thereby the growing need for financial assistance of this kind.

Class of 1934 Revolving Loan Fund Established in 1985 by a 50th Reunion Class to provide long-term loans to needy medical students.

Class of 1935 Revolving Loan Fund Established in 1985 by a 50th Reunion Class to provide long-term loans to needy medical students.

Class of 1949 Student Loan Fund Established in 1985 by the 35th Reunion Class of 1949 to provide loans to needy medical students.

Class of 1952 Revolving Loan Fund Established in 1987 by the 35th Reunion Classes of 1952 to provide loans to needy medical students.

Class of 1959 Loan Fund Established in 1985 by the Class of 1959 for the 50th Reunion to provide loans to needy medical students.

Daniels Memorial Loan Fund This fund was established in 1980 by Josephine J. Daniels, M.D., Class of 1924, in memory of her husband and medical school classmate, Worth B. Daniels, Sr., an internist who practiced and taught in Washington, D.C. for 50 years. Following Josephine Daniels' death in 1990, their sons requested that her name be added to the Fund, which provides loans for financially needy medical students.

Lydia B. Edwards, M.D. Revolving Loan Fund This fund was established in 1999 to provide Loans to students in their 2nd, 3rd, or 4th year of medical school. Dr. Edwards is a 1932 graduate of the School of Medicine.

Filbert Foundation, Inc. Medical Student Loan Fund A $10,000 revolving loan fund established by the Filbert Company Foundation of Baltimore.

Warfield Firor Loan Fund This fund was established in 1962 to provide loans for medical students.

J. Theron Hunter Loan Fund Established by Dr. J. Theron Hunter, of the Class of 1925, to be used for aid in the form of loans to deserving students in the third and/or fourth year classes of the School of Medicine.

The Johns Hopkins Women's Medical Alumnae Association Student Loan Fund Established in 1971 by The Johns Hopkins Women's Medical

Alumnae Association to provide financial assistance to medical students, preferably women.

Robert Wood Johnson Foundation Loan Fund Established to provide aid to needy medical students who are female, members of designated racial minority groups, and/or from rural areas.

W. K. Kellogg Loan Fund Established in 1942 to provide financial assistance to students in the School of Medicine.

Halford B. and Lillian S. Kneale Loan Fund Dr. Kneale was a member of the Class of 1920 who pursued a distinguished career in Urology. He and Mrs. Kneale planned the Fund, which was established after Dr. Kneale's death in July 1983. It is a source of loans to medical students who, as one of the requirements for a loan, must be in the upper third of their class.

Pearl Konttas, M.D. Loan Fund This Loan Fund was established by Dr. Konttas in 1982. She was a member of the Class of 1923 and, during her professional career, served as a pediatrician.

Gertrude D. Maengwyn-Davies Loan Fund This is an endowed loan fund established in 1986. The income from the fund is to provide loans to deserving graduate and medical students interested in research in the basic health sciences.

George C. McKinstry Medical Loan Fund This fund was established to be used for individuals of character who are in need of assistance to complete their medical education.

The Nannie J. (Mrs. Ashby) Monroe Memorial Loan Fund This fund was established by James Monroe, M.D., JHUSOM '34, in memory of his mother, Nannie J. (Mrs. Ashby) Monroe. It provides loans for needy students in the School of Medicine.

Willey H. Norton Loan Fund The Willey H. Norton Loan Fund was established in July 1983 upon the receipt of a bequest from the estate of Dr. Willey H. Norton. Its purpose is to make loan monies available to financially needy students in the School of Medicine. Dr. Norton was a member of the Class of 1910 who pursued a distinguished career in obstetrics and gynecology.

School of Medicine Loan Fund In 1962, the Trustees of the University set aside $100,000 to be used as revolving loan funds for medical students.

Arnold A. Schwartz Fund A loan fund for students in the School of Medicine established in 1964 under the will of the late Arnold A. Schwartz.

Daniel Marsh Shrewbrooks, M.D. Memorial Loan Fund This fund was established to commemorate the life of Dr. Daniel Marsh Shrewbrooks, a member of the Class of 1915. Its purpose is to provide a loan resource for "deserving and needy students of the Johns Hopkins School of Medicine."

Surdna Foundation Loan Fund This fund was established in 1971 to provide loans for medical students.

Miley B. Wesson Memorial Loan Fund The fund was established in 1999, and provides low interest loans to medical students.

Dr. Lawrence R. Wharton Loan Fund Gifts from a grateful patient of Dr. Wharton have established a loan fund for students in the School of Medicine.

Medical Student Advising

The College Advisory Program (CAP) is a student-faculty learning community that strives to support students in foundational clinical skills training, academic and career advising, and the formation of their professional identities. This work is relationally-anchored with longitudinal connections with faculty and peers both within and across class years. CAP offers students a unique opportunity to not only learn the fundamental skills of medicine, including professionalism and humanism, but to also reflect on the transformative experience of becoming a physician with a trusted advisor and small group of peers.

The program strives to:

- Foster a welcoming learning community for all students
- Recognize and appreciate the diversity of lived experiences and unique interests among the student body
- Provide academic and career advising throughout medical school
- Foster social and supportive connections between students, particularly across levels of training
- Promote students' personal well-being, support deepening self-awareness and reflective skills
- Foster scientific inquiry, innovation, and leadership among students
- Assist students in building networks of connections within and outside of the Hopkins medical community to meet their emerging goals
- Provide role models of humanism, professionalism, clinical skills, and life-long learning about self and work

Students and faculty are organized into four colleges, each named after legendary Johns Hopkins faculty: Daniel Nathans, Florence Sabin, Helen Taussig, and Vivien Thomas. Each college is populated by 120 students (30 from each class) and 6 core faculty from a range of specialties. Incoming students meet their faculty advisors at Orientation and these advisors help students make the transition into medical school, support their learning "the roadmap" of medical education, and facilitate exploring interests in a variety of ways over the years of medical school.

In the first semester, CAP advisors serve as the students' small group preceptor for the Clinical Foundations of Medicine course, working with them on a weekly basis for 16 weeks. CAP faculty do not provide summative evaluations of their own advisees to ensure a safe learning environment. In subsequent years, CAP advisors serve as periodic clinical skills teachers and longitudinal career counselors, helping each student to develop professionally, identifying specialty mentors to satisfy emerging interests, and facilitating meaningful dialog on students' defining experiences in becoming health professionals.

Each college, under student leadership, organizes social and community service activities for its students to enhance vertical integration across classes and create a sense of home for each student. The second floor of the Armstrong Education Building is the geographic home of the Colleges, and each College has a dedicated multi-purpose suite for students on this floor.

Named Professorships

The creation of a Professorship in the School of Medicine indicates that a sum of money has been added to the University endowment to generate income which supports a professor in a particular department.

A date in brackets indicates year the named professorship was established. Anthony F Leva

John Jacob Abel Distinguished Service Professor of Pharmacology and Experimental Therapeutics [1962]: Unoccupied

Funded by a bequest in the will of Mrs. Anne D. Hamilton of Columbus, OH. Dr. Abel was the first Professor of Pharmacology (1893-1937) and a member of the original faculty of the School of Medicine.

Martin D. Abeloff Professorship [2007]: Drew M. Pardoll, M.D., Ph.D.

Funding provided by the Seraph Foundation (Henry and Linda Spires, Trustees) for a professorship in the Department of Oncology for the purpose of advancing outstanding cancer research and treatment. The Director of the Department of Oncology, Dean of the School of Medicine, and Seraph Trustees has the discretion of appointment over current and future faculty to this professorship.

ABCD Charitable Trust Professorship in Schizophrenia [2022]: Unoccupied

This permanent endowment will be used to benefit the Department of Psychiatry & Behavioral Sciences.

Leonard & Madlyn Abramson Professorship in Neurodegenerative Diseases [2004]: Ted M. Dawson, M.D., Ph.D.

Funding provided by Leonard and Madlyn Abramson.

AEGON Professorship in Prostate Cancer Research [2009]: Michael Carducci, M.D.

Funding provided by AEGON.

Aetna U.S. Health Care Professorship in Medical Genetics [1996]: Garry Cutting, M.D.

Funding provided by U.S. Healthcare Corporation.

Mohamad E. Allaf Directorship in Minimally Invasive Urology Surgery [2014]: Mohamad E. Allaf, M.D.

Income from the Principal will be used “for a directorship and research program in minimally invasive urology… This gift is to be utilized by Dr. Mohamad E. Allaf at his discretion for salary support, clinical & research programs or other purposes as determined solely by Dr. Mohamad E. Allaf.” The endowment will be held in the Brady Urological Institute in the School of Medicine.

Elizabeth Plank Althouse Professor for Alzheimer’s Research in Psychiatry and Behavioral Sciences [2006]: Constantine Lyketsos, M.D., M.H.S.

Funding provided for researching the cause, prevention, treatment, and cure of Alzheimer’s Disease.

Andelot Professor of Laryngology and Otology [1962]: David W. Eisele, M.D.

This Professorship was funded by a grant from Mr. Lamont DuPont Copeland of Wilmington, DE, a grateful patient of Dr. John Bordley. The Andelot name was selected by Mr. Copeland.

E. Cowles Andrus Distinguished Professorship in Cardiology [2001]: Edward K. Kasper, M.D.

Funding provided by Miriam Andrus, in memory of her husband, E. Cowles Andrus, M.D.

C. Michael Armstrong Professorship [2000]: Gregg L. Semenza, M.D., Ph.D.

Funding provided by Trustee C. Michael Armstrong to support medical research, with initial focus on stem cell research.

C. Michael and S. Anne Armstrong Professorship in Patient Safety [2014]: Allen Kachalia, M.D., J.D.

Funding provided by Trustee C. Michael Armstrong and his wife, S. Anne Armstrong, to support the director of the Armstrong Institute for Patient Safety and Quality.

Atran Family Foundation Endowed Professorship Fund in IBD Research [2021]: Unoccupied

This gift will benefit basic science research in the IBD section of the Division of Gastroenterology & Hepatology as an endowed gift to be held in perpetuity for a professorship bearing the name of the Atran Family Foundation Professor in IBD Research.

Dr. Frances Watt Baker and Dr. Lenox D. Baker, Jr. Deanship of the School of Medicine [1997]: Paul B. Rothman, M.D.

Dr. Frances Watt Baker and Dr. Lenox D. Baker, Jr. are 1966 graduates of the Johns Hopkins School of Medicine. Dr. Frances Baker is a pediatrician and Dr. Lenox Baker is a cardiothoracic surgeon and a member of the Johns Hopkins University Board of Trustees and the Board of Johns Hopkins Medicine.

Edmund F. and Virginia Ball Professorship in Ophthalmology [2005]: J. Fernando Arevalo, M.D.

Funding provided by Mr. Edmund F. Ball. This gift will be used to support research in macular degeneration and other disorders.

Dr. Freida Derdeyn Bambus Professorship in Ophthalmology [2005]: Hendrick P.N. Scholl, M.D., M.A.

Funding provided by Dr. Freida Derdeyn, a retired teacher who became acquainted with the work of the Wilmer Institute through a local group focusing on macular degeneration.

Theodore and Ingrid Baramki Professorship in Reproductive Endocrinology [1994]: Howard A. Zacur, M.D., Ph.D.

Funding provided by Dr. Theodore Baramki, a member of the faculty of the Department of Gynecology and Obstetrics, and the estate of Clarice Reiss. This gift will be used to fund a professorship in reproductive endocrinology.

Philip Bard Directorship in the Department of Physiology [1999]: Unoccupied

Established through commitments made in 1999 by Roger Greif, Philip Davies, Elizabeth B. O’Connor, Vernon Mountcastle, Timothy Harrison, and various donors in honor of Philip Bard, Professor of Physiology, 1933 to 1964.

The Barry Family Professorship in Translational Medicine [2016]: Kenneth Kinzler, M.D.

The gift will be used to benefit the Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins as an endowed gift to be held in perpetuity for purpose of a professorship bearing the name.

Baxley Professor of Pathology [1901]: Ralph H. Hruban, M.D.

A bequest in the will of Dr. Henry Willis Baxley (1824-1876) provided funding for the first endowed chair in the School of Medicine. Dr. Baxley was a graduate of the University of Maryland in 1859, was a southern sympathizer during the Civil War, and following the war practiced his profession in Baltimore and later in Virginia.

Stanhope Bayne-Jones Professorship in Medicine [1974]: David L. Thomas, M.D.

Mrs. Nannie S. Bayne-Jones provided the funding for this Professorship in honor of her husband. Stanhope Bayne-Jones received his M.D. degree from Johns Hopkins in 1914. As an expert in infectious diseases, he served on the faculty of the University of Rochester and Yale Medical School, and he also served as Dean at Yale. In 1942, he was made a brigadier general in the Army Medical Corps and served in many government posts during and following World War II.

The Sheldon B. Bearman, M.D. Professorship in the Russell H. Morgan Department of Radiology and Radiological Sciences [2020]: Pamela T. Johnson, M.D., FACR

A permanent endowment benefiting the Department of Radiology and Radiological Sciences.

Bendann Family Professorship in Ophthalmology [2011]: Esen K. Akpek, M.D.

An endowment fund at the School of Medicine, the income from the principal will be used for faculty support and the endowment will be held in the Wilmer Eye Institute.

Bendann-Iliff Professorship in Ophthalmology [1995]: Nicholas T. Iliff, M.D.

Established by Constance Bendann in honor of the Bendann Family and Charles E. Iliff, III, one of the pioneers of oculoplastics, the surgical restoration of the function and appearance of the eye.

Dr. Bertram M. Bernheim Research Professorship in Surgery [1987]: Christopher Abularrage, M.D.

Funding for this Professorship was provided by members of the Bernheim family to honor Bertram M. Bernheim, a 1905 graduate of the Johns Hopkins School of Medicine. As a member of the faculty of the Department of Surgery, he was responsible for pioneering research which resulted in significant advancements in vascular surgery and blood transfusion.

The Berry-Brem Professorship in Neurosurgery [2017]: Mark Luciano, M.D.

To support faculty support dedicated to hydrocephalus research in the Department of Neurosurgery. Funding was provided by George and Mary Nell Berry who were long-time donors to the department.

George E. Bigelow, Ph.D. Professorship [2014]: Eric Strain, Ph.D.

To support clinical behavioral pharmacology research and teaching with a primary focus on elucidating the mechanisms of addictive disorders and developing treatments.

Alfred Blalock Chair in Surgery [1992]: John L. Cameron, M.D.

Funding for this Chair was provided by contributions from Dr. Blalock's residents. Dr. Alfred Blalock was Director of the Department of Surgery (1941-1964), and is credited with establishing the field of cardiac surgery. He is best known for the creation of the Blalock-Taussig operation for the treatment of cyanotic congenital heart disease.

Bloomberg-Kimmel Professorship of Cancer Immunotherapy [2018]: Dung Le, M.D.

Inaugural recipient Professorship recognizing leadership in the Bloomberg-Kimmel Institute of Cancer Immunotherapy.

Bloomberg-Kimmel Professorship of Cancer Immunotherapy [2018]: Cynthia Sears, M.D.

Inaugural recipient Professorship recognizing leadership in the Bloomberg-Kimmel Institute of Cancer Immunotherapy.

Bloomberg-Kimmel Professorship of Cancer Immunotherapy [2018]: Jonathan Powell, M.D., Ph.D.

Inaugural recipient Professorship recognizing leadership in the Bloomberg-Kimmel Institute of Cancer Immunotherapy.

Marjorie Bloomberg Tiven Professorship in Neurofibromatosis [2017]: Jaishri Blakeley, M.D.

To benefit the Department of Neurology as an endowed gift to be held in perpetuity and which will support a professor in the Neurofibromatosis Therapeutic Acceleration Program.

John E. Bordley Chair in Otolaryngology/Head and Neck Surgery [1990]: Wayne Koch, M.D.

Funding for this Chair was provided by the McCarthy-Cooper Estate, patients, and residents of Dr. John E. Bordley, who was Director of the Department of Otolaryngology for 17 years (1952-1969).

Boury Professorship in Molecular Biology and Genetics [1937]: Unoccupied

This professorship was funded by a bequest in the will of Mr. Louis J. Boury. Mr. Boury was a native of Baltimore who moved to New York where he became a successful grain merchant.

Frederick Brancati Professorship [2012]: Jeanne M. Clarke, M.D., M.P.H.

The income from the principal will be used for faculty support and held in the Division of Internal Medicine in the Department of Medicine.

Breast Cancer Research Professorship in Oncology [1992]: Vered Stearns, M.D.

Funds were provided by Mr. and Mrs. Jeffrey Legum, Mrs. Naomi Legum, grateful patients and friends.

Henry Brem Professorship in Neurosurgery [2014]: Henry Brem, M.D.

The income from the principal will be used for faculty support and held in the Department of Neurosurgery. The professorship was funded by multiple donors with lead donations from Josh Fidler and Dr. and Mrs. Irving Sherman.

The Patricia B. and William T. Bright Professorship in Mental Wellness [2018]: Susan W. Lehmann, M.D.

The fund will support a master clinician and educator who is dedicated to patient care, teaching, and leadership in child psychiatry or geriatric psychiatry, and the professorship will rotate between these two psychiatry disciplines.

Dana and Albert "Cubby" Broccoli Professorship in Oncology [2001]: Elizabeth M. Jaffee, M.D.

Funded by a gift from the Dana and Albert "Cubby" Broccoli Charitable Foundation to be used to endow a Professorship in Oncology, having an initial focus on research and treatment of breast cancer.

William R. Brody Professorship in Radiology [1992]: Zaver M. Bhujwalla, M.D.

Funding for this Professorship was provided by Dr. William R. Brody, who was the Director of the Department of Radiology from 1987 to 1994. In 1996, Dr. Brody was appointed President of the Johns Hopkins University.

Brown Advisory Colleagues Endowed Corporate Professorship Fund at the Institute for Basic Biomedical Sciences [2021]: Cynthia Wolberger, Ph.D.

Funding will be used to benefit the Institute for Basic Biomedical Sciences as an endowed gift to be held in perpetuity for a professorship bearing the name of the Brown Advisory Colleagues Fund.

Thomas M. Brushart, M.D. Professorship in the Division of Hand Surgery [2000]: Dawn LaPorte, M.D.

Funding provided by Arthur H. and Dorothy M. Thornhill to provide faculty support in the Division of Hand Surgery, Department of Orthopaedic Surgery.

John L. Cameron, M.D. Professorship for Alimentary Tract Diseases in the Department of Surgery [2002]: Unoccupied

Established to support a prominent surgeon who devotes their efforts to determining the causes, encouraging prevention and developing management options for diseases of the alimentary tract.

Benjamin S. Carson, Sr., M.D. and Dr. Evelyn Spiro, R.N. Professorship in Pediatric Neurosurgery [2007]: Alan R. Cohen, M.D.

Funding for this professorship was provided by Mr. and Mrs. Donald Spiro to support the Chief of the Neurosurgery Pediatrics Division.

David J. Carver Professorship in Medicine [1974]: Henry R. Halperin, M.D.

Created by Dr. and Mrs. Samuel P. Asper in honor of Mrs. Asper's father, Dr. Asper was a 1940 graduate of the School of Medicine and a member of the faculty. Previous occupants: Drs. Philip A. Tumulty and William Hazzard.

Tom Clancy Professorship in Ophthalmology [2004]: Zelia M. Correa, M.D., Ph.D.

Funding for this professorship was provided by author Tom Clancy, a friend of Johns Hopkins Medicine and Johns Hopkins Board of Visitors member.

Clayton Professorship in Oncology [1993]: Bert Vogelstein, M.D.

In 1947, Dr. and Mrs. William L. Clayton of Houston, Texas created the Clayton Fund, which was used to support projects in cardiovascular disease under the direction of Dr. Benjamin M. Baker, class of 1927. In 1984, the direction was shifted to studies of colon cancer in the Oncology Center.

Donald S. Coffey Professorship of Urology [2004]: Kenneth J. Pienta, M.D.

Funding provided from the bequest of Mrs. Catherine Iola Michael and of the Mr. J. Smith Michael Unitrust.

James P. Connaughton, M.D. Master Clinician Education and Professor for Child and Adolescent Psychiatry [2015]: Unoccupied

The endowed professorship is in alignment with Dr. James Patrick Connaughton's vision, as founder and director of the Johns Hopkins Children's Mental Healthcare Center. The leader installed in this position will espouse Dr. Connaughton's vision of service to children, community, and teaching the next generation of clinicians while developing the best practices to serve this constituency. This endowment will be held in the Division of Child and Adolescent Psychiatry in the Department of Psychiatry and Behavioral Sciences.

Rear Admiral Ray R. Conner and Laura H. Conner Professorship in Pediatrics in the School of Medicine [1997]: Janet R. Serwint, M.D.

Funding provided by the estate of Admiral Conner. The estate stipulates the holder of the chair shall be the Director of the Harriet Lane Clinic.

Sara Miller Coulson and Frank L. Coulson Professorship in Medicine [2011]: Roy C. Ziegelstein, M.D.

Funding provided from income from the principal, which will be used "in honor of Dr. David Hellmann and that the holder of the chair be a physician who exemplifies Dr. Hellmann's passion for clinical excellence and knowing their patient as a person."

Meridith, John, and Joseph Cross Professorship in Ophthalmology [2014]: Jennifer E. Thorne, M.D., Ph.D.

Income from the principal will be used for an endowment professorship in ocular immunology research. The endowment will be in the Division of Ocular Immunology in the Wilmer Eye Institute.

Michael J. Cudahy Professorship in Cardiology [1994]: James L. Weiss, M.D.

Funding provided by Michael J. Cudahy, the founder of Marquette Electronics, which produces medical, diagnostic, monitoring, and clinical information systems.

Charles Cummings, M.D. Professorship in Otolaryngology - Head and Neck Surgery [2005]: Carole Fakhry, M.D.

Funding provided by various donors.

Harvey Cushing Professorship in Neurosurgery [1981]: Henry Brem, M.D.

Funding provided by Mr. and Mrs. John H. Whitney of New York in honor of Mrs. Whitney's father. Dr. Harvey Cushing, founder of the specialty of neurosurgery, was a member of the Johns Hopkins Department of Surgery from 1897 to 1912.

Dalio Family Professorship in Mood Disorders [2010]: Kay Redfield Jamison, M.D.

Funding provided by the Dalio Family to support the understanding, treatment, and dissemination of knowledge of mood disorders and support the position of the department director/s of the Johns Hopkins Mood Disorders Center.

Walter E. Dandy Professorship in Neurosurgery [2004]: Rafael J. Tamargo, M.D.

Funds provided by Walter E. Dandy, Jr.

Daniel & Gayle D'Aniello Professorship in Orthopaedic Surgery [2020]: Carol Morris, M.D.

The funds will be used to benefit the Department of Orthopaedic Surgery for a professorship bearing the name of David & Gayle D'Aniello Professorship.

Richard Bennett Darnall Chair in Surgery [1964]: Jennifer Lawton, M.D.

Funding provided by a bequest in the will of Mrs. Eugenia B. Darnall, whose husband, Richard Bennett Darnall, was an attorney in Annapolis, Maryland.

DeAcetis Professorship [2021]: Andrew Ewald, Ph.D.

This fund will be used to support a professorship in basic science cancer research in the Institute for Basic Biomedical Sciences at the School of Medicine.

Catherine DeAngelis and Jackie Julio Professorship [2020]: Barry S. Solomon, M.D., M.P.H.

This endowment benefits the Johns Hopkins Children's Center and the Department of Pediatrics.

Eugene DeJuan, Sr. Professorship in Ophthalmic Education [2006]: Fasika Woreta, M.D., M.P.H.

Funds provided by Eugene Dejuan, Sr. to help support the residency program at the Wilmer Eye Institute.

DeLamar Professorship in Biological Chemistry [1919]: Unoccupied

Funding provided by a bequest in the will of Capt. Joseph R. DeLamar, who was born in Holland in 1843, came to America after the Civil War, and engaged in the marine salvage business. In 1878, he moved west, entered the mining business, and became the owner of the Utah Mine and Smelting Co. On the advice of his attorney, he divided his $30 million estate between the "three best medical schools of the day: Johns Hopkins, Harvard, and Columbia."

Martin W. Donner Professorship in Radiology [1988]: Karen Horton, M.D.

Funding provided by contributions of current and former faculty, fellows, and house staff of the Department of Radiology. Dr. Martin W. Donner was Director of the Department of Radiology from 1972 to 1987.

Clarence Doodeman Professorship in Cardiology [2006]: Robert G. Weiss, M.D.

Funding provided by Edward and Loretta Downey to honor Mrs. Downey's father, Mr. Clarence Doodeman.

Andreas C. Dracopoulos Professorship in Ophthalmology [2015]: Daniel Finkelstein, M.D.

Income from the principal will be used "to support the work of Dr. Finkelstein and his successors with a preference for the field of bioethics in ophthalmology.

James T. Dresher, Sr., Professorship in Cardiac Surgery [2003]: James Gammie, M.D.

Funding provided by The Dresher Foundation, Inc., to establish an endowed professorship to honor James Dresher, Sr.

The Jim & Patti Dresher & Dresher Foundation Professorship in Medicine [2021]: Samuel Durso, M.D.

Funding will be used to benefit the Johns Hopkins Bayview Medical Center Department of Medicine as an endowed fund bearing the name of The Jim & Patti Dresher & Dresher Foundation Professor of Medicine. This will be conferred upon the Director of the Department of Medicine at Johns Hopkins Bayview Medical Center.

Drew Family Professorship in Orthopaedic Surgery in honor of Alec John Cosgarea [2016]: Andrew J. Cosgarea, M.D.

Funding providing by Ina and Howard Drew to support the research and clinical work in the area of sports medicine being conducted by Andrew J. Cosgarea, M.D. or his successors.

Harry J. Duffey Family Professor of Palliative Care in Oncology [2011]: Thomas Smith, M.D.

Funding provided by Harry J. Duffey, III. Income will be used to establish a full professorship at the School of Medicine, which will support a leading specialist in retinal diseases and, in particular, age-related macular degeneration and/or low vision.

G. Edward and G. Britton Durell Professorship in Ophthalmology [1998]: Elia J. Duh, M.D.

Funding provided by the Altsheler-Durell Foundation, Inc. to establish a full professorship at the School of Medicine, which will support a leading specialist in retinal diseases, and, in particular, age-related macular degeneration and/or low vision.

George S. and Delores D. Eccles Professorship in Ophthalmology [1998]: Peter A. Campochiaro, M.D.

Funding provided by the Eccles Foundation and by Mrs. Eccles for a professorship in Ophthalmology.

Milton T. Edgerton, M.D. Professorship in Plastic Surgery [2011]: Unoccupied

Funding provided by Dr. Milton T. Edgerton for an endowed professorship for the Director of the Department of Plastic and Reconstructive Surgery.

Jules B. Edlow and Joan Edlow Professorship in Diabetes [2017]: Thomas W. Donner, M.D.

The income from the principal will benefit the Division of Endocrinology in the Department of Medicine as an endowed professorship to be held in perpetuity.

Dr. Dorothy Edwards Professorship in Gynecology and Obstetrics [1986]: Andrew J. Satin, M.D.

Funding provided by a bequest of Dr. Dorothy Edwards, who attended the Johns Hopkins School of Medicine from 1917 to 1921. She was a successful gynecologist in Chicago. She specified that the Professorship be known by her title, first name, and last name.

Akef El Maghraby Professorship in Preventive Ophthalmology [1991]: Sheila K. West, Ph.D.

Funding provided by Dr. Akef El Maghraby.

Paul and Christine Englund Professorship [2017]: Unoccupied

The Englund Professorship was established in honor of the late Paul Englund, Ph.D., who served on the faculty of the Department of Biological Chemistry (1968-2010), and his wife, Christine Schneyer Englund, M.D., an adjunct faculty member in the Division of Endocrinology since 1990. Dr. Englund was known for his work on protozoan parasites that cause tropical diseases. The Englund Professorship supports a distinguished tenured faculty member who is widely recognized in the field of biological chemistry for their outstanding, peer-reviewed basic science research.

Eudowood Professorship in Pediatric Immunology [1986]: Jerry A. Winkelstein, M.D.

Funding provided by the Eudowood endowment. Eudowood was the name of a tuberculosis hospital officially known as The Hospital for Consumptives of Maryland, which joined with other institutions to form the Children's Medical and Surgical Center. The Eudowood endowment is managed by a Board of Directors, which provides funding for this and other professorships.

R. Christian B. Evensen Professorship in Urology at the Brady Urological Institute [2014]: Unoccupied

Funding from the principal will be used to fund the Department of Urology at the Brady Urological Institute.

King Fahd Chair in Molecular Medicine and Pediatric Oncology [1993]: Andrew P. Feinberg, M.D., M.P.H.

Funding provided by the Kingdom of Saudi Arabia. The King Fahd Professorships in the School of Medicine represent "an indication of the mutual human interest and mutual support and friendship between the Kingdom of Saudi Arabia and the United States of America."

King Fahd Professorship in Pediatric Oncology [1993]: Alan D. Friedman, M.D.

Funding provided by the Kingdom of Saudi Arabia. The King Fahd Professorships in the School of Medicine represent "an indication of the mutual human interest and mutual support and friendship between the Kingdom of Saudi Arabia and the United States of America."

Saul and Doris Farber Professorship in Clinical Care and Investigation in Pediatric Oncology [2013]: Allen Chen, M.D., Ph.D., M.H.S.

The income from the principal will be used for ongoing work to cure childhood cancers.

Robert and Maureen Feduniak Professorship in Ophthalmology [2009]: Michael Repka, M.D.

Established by Robert and Maureen Feduniak to support patient care and research related to amblyopia, strabismus, and eye diseases of children.

Warfield M. Firor Chair in Surgery [1969]: Pamela A. Lipsett, M.D.

Funding provided by a bequest of Alice Larsen Fink reflecting her "deep regard for Dr. Firor as a fine surgeon, teacher, and humanitarian." Dr. Warfield M. Firor was a distinguished practicing surgeon in the Department of Surgery.

Ken & Sherrilyn Fisher Professorship in Medicine [2012]: Paul Auwaerter, M.D.

The income from the principal will be used to attract, maintain, and empower a world-class clinician and investigator to focus his efforts on improving clinical care and translational research.

Elliot K. Fishman, M.D. Professorship in Radiology [2018]: Elliot K. Fishman, M.D.

It will be used to benefit the Russell H. Morgan Department of Radiology and Radiological Sciences as an endowed gift and held in perpetuity.

Carol Ann Flanagan Professorship in Breast Imaging [2014]: Unoccupied

The income from the principal will be used for the Professorship and will be held in the Russell H. Morgan Department of Radiology and Radiological Sciences.

John A. Flynn Professorship [2015]: Daniel J. Brotman, M.D.

The income from the principal will be used "to underwrite Dr. Flynn's current and future priorities in medical education and eventually will help advance the careers of young clinicians will see to emulate Dr. Flynn's approach to the field."

Blanket Fort Foundation Endowed Professorship in Pediatric Population Health & Health Equity Research [2022]: Sara B. Johnson, Ph.D., M.P.H.

The gift will be used to benefit the Johns Hopkins Children's Center & Department of Pediatrics as an endowed gift to be held in perpetuity for a professorship bearing a name to be mutually agreed upon by the Donors & the University. This Professorship will support faculty working to address health & education disparities for children.

Nichols J. Fortuin, M.D. Professorship in Cardiology [2008]: Ronald D. Berger, M.D., Ph.D.

Funded by contributions from patients and friends of Dr. Fortuin.

Frank J. Frassica Professorship in Orthopaedic Surgery [2011]: Mei Wan, Ph.D.

Funding provided by departmental unrestricted dollars, as well as donors who consented to move their gifts from unrestricted accounts to the Professorship.

Jonas Friedenwald Professorship in Ophthalmology [2004]: Deepak Edwards, M.D., F.A.C.S.

Named for Jonas Friedenwald, who was an associate professor at Wilmer. He was the father of experimental ophthalmic pathology and made key observations in glaucoma and ocular pharmacology.

James F. Fries Professorship in Medicine [2006]: Lisa A. Cooper, M.D., M.P.H.

Funding provided by James F. Fries, M.D. and Sarah Tilton Fries, M.P.H. to support a faculty member engaged in health outcomes research, clinical epidemiology, and/or health policy research.

Michael J. Garil Fund in Leukemia Survivorship [2014]: Kathy Ruble, Ph.D., MS

The income from the principal will be used to develop a cutting-edge program of care and discovery that will lead to important new approaches to predicting and preventing late effects in patients of all ages with leukemia.

Robert Garrett Professorship in Pediatric Surgery [1964]: David Hackam, M.D.

Funding provided by the Garrett Fund for the surgical treatment of children founded by Mary F. Jacobs.

William Thomas Gerrard, Mario Anthony Duhon, and Jennifer and John Chalsty Professorship in Urology [1998]: William B. Isaacs, Ph.D.

Funding provided by Mr. William Thomas Gerrard and Mr. and Mrs. John Chalsty for the Department of Urology.

James P. Gills Professorship in Ophthalmology [1999]: Neil Bressler, M.D.

Funding by James P. Gills, who trained at Johns Hopkins Hospital.

James Gipson Professorship in Ophthalmology [2012]: Unoccupied

The income from this endowment will be combined with the income from the permanently restricted The James Gipson Professorship in Ophthalmology. Income from the principal will be used to support other faculty.

James Gipson Professorship in Ophthalmology II [2012]: Unoccupied

The income from the principal will be used to support the work of other faculty members and will be held at the Wilmer Eye Institute in the School of Medicine.

The Helen Larson and Charles Glenn Grover Professor in Ophthalmology [2017]: Jeff Mumm, Ph.D.

Funding provided by the Grovers' estate and matched by the State of Maryland E-Nnovation Initiative Fund for the purpose of macular degeneration research at the Wilmer Eye Institute.

Given Foundation Professorship in Pediatrics [1962]: Unoccupied

Funding provided by the Irene Heinz Given and John LaPoute Given Foundation of New York for the purposes of medical research and teaching.

Morton F. Goldberg Professorship in Ophthalmology [1999]: Jennifer Elisseeff, Ph.D.

Funding provided by a number of unrestricted bequests to the Wilmer Institute.

David M. Goldenberg Family Chair in The Institute for Brain Protection Sciences at Johns Hopkins All Children's Hospital [2021]: George Jallo, M.D.

The David M. Goldenberg Family Foundation Chair within the Institute for Brain Protection Sciences at Johns Hopkins All Children's Hospital was established in 2021. This gift was matched 1:1 by the Institute for Brain Protection Services.

David Goldfarb, M.D. Research Professorship in Vascular Surgery [2014]: James Black, III, M.D.

Funding provided by C.R. Bard for endowed professorship om Vascular Surgery.

The Sol Goldman Professorship in Pancreatic Research [2015]: Michael G. Goggins, M.B., M.D.

Established by the Department of Pathology in honor of the Goldman Family to support a faculty member focused on pancreatic cancer research.

Vincent L. Gott, M.D. Professorship [2000]: Brett Mettler, M.D.

Funding provided by various residents, patients, and friends of Vincent L. Gott.

Dr. E. F. Gordon Professorship [2020]: Malcolm V. Brock, M.D.

This endowment benefits the Division of Thoracic Surgery in the Department of Surgery.

Katherine Graham Professorship in Ophthalmology [2002]: Julia Haller, M.D.

Funded by a major bequest from the Katherine Graham estate.

Lou & Nancy Grasmick Professorship in Cardiology [2021]: Wendy Post, M.D.

Funding will be used to benefit the Division of Cardiology as an endowed gift to be held in perpetuity for a professorship bearing the name of Lou & Nancy Grasmick Professorship in Cardiology. It will be filled by a qualified faculty member who has demonstrated a commitment to women professionals inn Cardiology.

Alex Grass Professorship in Oncology [2003]: David S. Ettinger, M.D.

Funding provided by Mr. Alex Grass of Wormsleyburg, PA.

Daniel B. & Florence E. Green Endowed Professorship in Ataxia [2021]: Liana S. Rosenthal, M.D.

This gift will be used to benefit the Department of Neurology as an endowment to be held in perpetuity for a professorship bearing the name of Daniel B. and Florence E. Green Professorship in Ataxia. It is the donor's request that the professorship holder engaged in novel research (including pilot projects) with a basic science & translational focus & whenever possible, that the research explores the changes in the brain which contribute to cerebellar ataxia, including cerebellar ataxia of unknown etiology, and improve the quality-of-life of those with cerebellar ataxia.

Joseph E. Green Professorship in Macular Degeneration and Other Retinal Diseases [1997]: Morton F. Goldberg, M.D.

Funding provided by a bequest from Joseph E. Green to the Department of Ophthalmology, which will support research activities by a faculty member in macular degeneration.

W. Richard Green Professorship of Ophthalmology [2007]: Richard D. Semba, M.D., M.P.H.

Funding provided by various donors to support a faculty member in Ophthalmology.

Erwin and Stephanie Greenberg Professorship of Urology [2017]: David J. McConkey, Ph.D.

Established to benefit the Johns Hopkins Greenberg Bladder Cancer Institute.

John W. Griffin, M.D. Directorship for the Brain Science Institute [2010]: Jeffrey Rothstein, M.D.

Income from the principal will be used to provide faculty support and "advance the work of the Brain Science Institute. Through the support provided…the director will be better able to communicate with and serve a large and diverse neurosciences community, while making decisions efficiently and moving targeted programs along rapidly."

John W. Griffin, M.D. Professorship in Neurology [2015]: Justin McArthur, M.D.

Funded by Jeffrey and Harriet Legum and will be held in Neurology and Brain Sciences.

John G. Griffith, M.D. Professorship [2019]: Jenell S. Coleman, M.D., M.P.H.

Funding provided by Dr. and Mrs. Lawrence Griffith, The Griffith Family and various donors for the support of a professorship in Gynecology honoring former faculty member, Dr. John Griffith.

Burton E. Grossman Professorship in Ophthalmology [1998]: Oliver Schein, M.D.

Funding for this professorship was provided by Dr. and Mrs. Burton Grossman to ensure the integration of the progression of specific ophthalmologic diseases and to develop techniques for preventing these diseases.

Guerrieri Family Professorship in Ophthalmology [1998]: Donald Zack, M.D.

Funded by the Guerrieri Family Foundation for the Center for Genetic Engineering and Molecular Ophthalmology at the Wilmer Institute.

Raj and Kamla Gupta Professorship in Infectious Diseases [2014]: Robert Bollinger, M.D.

The income from the principal will be used for scholarships for faculty support and held in the Division of Infectious Diseases in the Department of Medicine at the School of Medicine.

Willard and Lillian Hackerman Professorship in Oncology [1981]: Marikki K. Laiho, M.D., Ph.D.

Funding provided by Mr. and Mrs. Willard Hackerman. Mr. Hackerman is a graduate of the Johns Hopkins University School of Engineering and was a long-time trustee of the University. He is the CEO of Whiting-Turner Construction Co. and founded the Whiting School of Engineering.

Karl H. Hagen Professorship in Ophthalmology [1998]: Jiang Qian, Ph.D.

Funding provided by Mr. Karl H. Hagen to provide faculty support in the Department of Ophthalmology.

Haller Professorship in Pediatric Neurologic Diseases [1996]: Carl E. Stafstrom, M.D., Ph.D.

Funding provided by a bequest from Miss Virginia Doriot Haller of Salem, VA, whose purpose is to support research with a primary focus on genetic, developmental, and environmental factors in the neurologic diseases of children.

Bayard Halsted Professorship in Cell Biology and Anatomy [1943]: Unoccupied

Funding provided by a bequest in the will of Mr. Edward Bayard Halsted, a retired stock broker in New York City. "The income thereof shall be forever devoted to research work for the advancement of knowledge as to the nature, causes, means of prevention, and cure of such maladies in need of further study and investigation." Previous occupants: Drs. David Bodian and Thomas D. Pollard.

William Stewart Halsted Professorship in Surgery [2000]: Unoccupied

Funding provided by Department of Surgery's Unit Executive Fund.

Jacob Handelsman Professorship in Surgery [2004]: Fabian Johnston, M.D.

Funding provided by grateful patient of Dr. Handelsman.

Joseph S. and Esther Handler Professorship in Nephrology [2017]: Paul A. Welling, M.D.

To benefit the Division of Nephrology in the Department of Medicine as an endowed gift to be held in perpetuity for the advancement of bench research in renal medicine.

Michael and Ann Hankin and Partners of Brown Advisory Professor in Scientific Innovation [2013]: James Berger, Ph.D.

The income from the principal will be used to create a professorship what will be held in the Institute for Basic Biomedical Sciences.

James C. Harris, M.D. Professorship in Developmental Neuropsychiatry & Neurosciences Reseach [2021]: Unoccupied

The gift will be used to benefit the School of Medicine, Department of Psychiatry & Behavioral Sciences, Division of Child & Adolescent Psychiatry as an endowed gift to be held in perpetuity for a professorship.

Elizabeth Treide and A. McGehee Harvey Chair in The History of Medicine [1992]: Harry M. Marks, Ph.D. (Associate Professor)

Funding provided by Dr. and Mrs. Harvey, Dr. Harvey's colleagues in the Department of Medicine, and many friends and relatives of the Harveys. This Professorship was placed in the Department of the History of Medicine to recognize Dr. Harvey's (class of 1934) second interest in history after 27 years as Director of the Johns Hopkins Department of Medicine. Mrs. Harvey (class of 1943) was named to recognize her and other faculty wives for their contributions to this Institution.

Isaac Morris and Lucille Elizabeth Hay Professorship in Embryology [1996]: Peter Devreotes, Ph.D.

Funding provided by a commitment made in 1996 by Elizabeth D. Hay in memory of her parents.

Kyle Haydock Professorship in Oncology [2003]: Donald Small, M.D., Ph.D.

Endowed by author Tom Clancy memorializing a young friend who lost his life to cancer. To be used in perpetuity by a distinguished faculty member in Oncology for the purpose of advancing outstanding childhood cancer research and patient care.

David B. Hellmann, M.D. Endowed Professorship [2021]: David B. Hellmann, M.D.

The gift will be held in perpetuity to support the Johns Hopkins human again process. It will benefit the Johns Hopkins Center for Innovative Medicine in the Department of Medicine, under the direction of Dr. David B. Hellmann.

George J. Heuer Professorship in Neurosurgery [2014]: Allan J. Belzberg, M.D.

Income from the principal will be used to alleviate pain and suffering from neurosurgical diseases, and will be held in the Department of Neurosurgery.

Sherlock Hibbs/Eugene VanDyke Professorship for Research [2004]: Florin Selaru, M.D.

Fund established in the School of Medicine to be used to provide a professorship that will reside in the Dean's Office.

Frank Hinman, Jr. Professorship in Urology [2013]: Bruce J. Trock, Ph.D.

Endowment established from the estate of Dr. Frank Hinman to benefit urologic research at The Brady.

Hoehn-Saric Professorship for OCD and Anxiety [2014]: Gerald Nestadt, M.D., B.Ch., M.P.H.

Income from the principal will benefit the Rudolf Hoehn-Saric, M.D. Professor in OCD/Anxiety Disorders Research. The first recipient, Gerald Nestadt, M.D., Co-director of the OCD Clinic and Professor of Psychiatry and Behavioral Sciences, will use this funding for research in the areas of Obsessive-Compulsive Disorders, Anxiety Disorders, Tourette's and Attention Deficit Disorder. This endowment will be held in the Department of Psychiatry and Behavioral Sciences at the School of Medicine.

Charles J. Homcy, M.D./Simeon G. Margolis, M.D. Professorship [2015]: Alex Kolodkin, Ph.D.

The income from the principal will provide direct salary support for the Homcy/Margolis Professor for research and teaching in the Department of Neurosciences at the school, and the teaching of undergraduate and graduate neuroscience at the Krieger School of Arts and Sciences.

Rita Honey-Hiers Assistant Professorship for Tarlov Cyst Disease [2017]: Timothy F. Witham, M.D.

For faculty support for the professor focusing on Tarlov Cyst Disease in the Department of Neurosurgery. Funding provided by Charlie Scheeler and Mary Ellen Pease and a matching gift from the State of Maryland E-Nnovation grant.

Johns Hopkins Family Professorship in Oncology Research [2004]: Robert Brodsky, M.D.

Funds provided by the descendants of the parents of Johns Hopkins.

The Johns Hopkins Institute for Excellence in Education Professor of Medicine [2014]: Joseph Cofrancesco, M.D.

To be held by the Director of the Institute for Excellence in Education.

John Eager Howard Chair in Endocrinology and Metabolism [1990]: Paul W. Ladenson, M.D.

Funding provided by family, friends, colleagues, and grateful patients of Dr. John Eager Howard (class of 1928), who was a long-time member of the Johns Hopkins faculty and Chief of the Division of Endocrinology. He was a superb internist, as well as investigator. His research contributions include the elucidation of the relationship between unilateral renal disease and high blood pressure, and the role of a protein factor in urine in preventing the formation of kidney stones.

Ralph H. Hruban, M.D. Professorship in Pancreatic Cancer Research [2017]: James R. Eshleman, M.D., Ph.D.

Funding provided by friends of Dr. Ralph Hruban, in gratitude, to support a faculty member focused on pancreatic cancer research in the Department of Pathology.

R. Dale Hughes Professorship in Oncology [1999]: Samuel Denmeade, M.D.

Established through commitments made in 1999 by R. Dale Hughes and Frances M. Hughes and other donors. Mr. Hughes is a grateful patient of the Oncology Center and made this commitment because of the care he has received since 1987.

David S. Hungerford, M.D. Chair in Orthopaedic Surgery at Good Samaritan Hospital [2001]: Unoccupied

Established through a commitment made in 1997 by Good Samaritan Hospital and patients of Dr. David S. Hungerford.

Craig B. Huston Professorship [2013]: Unoccupied

The income from the principal will be used for research in eye diseases and will be held in the Wilmer Eye Institute at the School of Medicine.

Charles E. Iliff III, M.D. Professorship in Ophthalmology [2005]: Unoccupied

Funding for this professorship provided by Dr. Helen Ossofsky-Iliff to honor Dr. Charles Iliff and to provide support for research which will improve the outcome of ophthalmic surgery.

Institute for Excellence in Education Professorship [2014]: Joe Cofrancesco, M.D.

To be held by the Director of the Institute of Excellence in Education.

Julius H. Jacobson, II, M.D. Professorship in Vascular Surgery [1998]: Bruce Perler, M.D.

Funded by Julius H. Jacobson, II, M.D. to establish a chair in vascular surgery in the Department of Surgery.

Jakurski Family Directorship [2013]: Alan Partin, M.D.

Income from the principal will be used to support the Director of the Brady Institute.

Janssen/Strauss-Halbreich Professorship in Digestive and Motility Disorders [1998]: Unoccupied

Funding provided by Janssen Pharmaceutical, Inc., Jeremy and Nancy Halbreich, Theodore H. Strauss, Janie Strauss McGarr and various donors to create a professorship at the Marvin M. Schuster Center for Digestive and Motility Disorders at the Johns Hopkins Bayview Medical Center.

Jonathan & Marcia Javitt Rising Professorship [2021]: Cindy Cai, M.D.

The gift will be used to benefit the Wilmer Eye Institute as an endowed gift to be held in perpetuity for the support of a faculty member at the beginning of their career bearing the name Jonathan and Marcia Javitt Rising Professorship in International Ophthalmology.

Robert D. Jeffs Professorship in Pediatric Urology [2010]: John P. Gearhart, M.D.

Funding provided by the Zanvyl and Isabelle Krieger Fund. Income from the principal will be used for a professorship in pediatric urology. The endowment will be held in the Brady Urological Institute at the School of Medicine.

Jennison-Novak Families Professorship in Neurosurgery [2017]: Chetan Bettegowda, M.D.

Income from the principal will benefit the Department of Neurosurgery as an endowed gift to be held in perpetuity and used toward a professorship bearing the name of The Jennison & Novak Families Professorship.

Allan and Claire Jensen Professorship in Ophthalmology [2022]: Megan Collins, M.D., MPH

This endowment will benefit the Wilmer Eye Institute.

Richard T. & Frances W. Johnson Professorship in Neurology [2021]: Ellen Mowry, M.D., MCR, FAAC, FANA

To be established by commitments made by the family and colleagues of Richard T. Johnson. Dr. Johnson was a member of the Department of Neurology when it was created in 1969 and served for many years as director of the department.

Howard J. Jones, Jr., and Georgeanna Seeger Jones Professorship [2013]: James Segars, M.D.

Funding provided by the estate of Dr. and Mrs. Lonnie Burnett. Income from the principal will be used for the "unrestricted use and benefit…to establish an endowed chaired professorship." The endowment will be held in the Department of Gynecology and Obstetrics at the School of Medicine.

The Dr. Sydney H. Kane, Emma B. Kane, David M. Kane, and Family Endowment Fund [2013]: Unoccupied

The income from the principal will be used for research in newborn medicine and will be held in the Children's Center at the school in honor of the accomplishments of the late Dr. Sydney Kane, a noted neonatologist and research scientist.

Sheikh Khalifa Professor in Stroke Detection and Diagnosis in the Department of Neurology [2020] Argye E. Hillis, M.D., M.A.

Will benefit the Sheikh Khalifa Stroke Institute at the Johns Hopkins School of Medicine. There are two endowments which will provide an annual funding stream, in perpetuity, to advance the goals of the Institute, with a focus on research, teaching & clinical work that can be translated to the UAE whenever possible. The two professorships will provide additional faculty with opportunities and resources to achieve the research objectives of the Sheikh Khalifa Stroke Institute.

Sheikh Khalifa Professor in Stroke Treatment & Recovery [2020]: Preeti Raghavan, M.D.

The funding will benefit the Sheikh Khalifa Stroke Institute at the Johns Hopkins School of Medicine. There are two endowments which will provide an annual funding stream, in perpetuity, to advance the goals of the Institute, with a focus on research, teaching & clinical work that can be translated to the UAE whenever possible. The two endowments, along with a third to be funded in 2021, will support the work of the Director and two Center Directors, and will provide additional faculty with opportunities and resources to achieve the research objectives of the Sheikh Khalifa Stroke Institute.

Earl D. Kidwell, Jr., M.D. Professorship in Ophthalmology [2018]: Unoccupied

The funding will be used to support the academic and research activities of the Johns Hopkins University School of Medicine Department of Ophthalmology in the Wilmer Eye Institute.

Sidney Kimmel Professorship [2014]: Theodore DeWeese, M.D.

The income from principal will be used for an endowed professorship to provide research initiatives within Radiation Oncology & Molecular Radiation Sciences. The endowment will be held in the Department of Radiation Oncology & Molecular Radiation Sciences in the School of Medicine.

KKESH/Wilmer Professorship in International Ophthalmology [2010]: Ashley Behrens, M.D.

The King Khaled Eye Specialist Hospital (KKESH) is the largest eye hospital in the Kingdom of Saudi Arabia, and is one of the top-ranked medical facilities in the Middle East.

Knights Templar Eye Foundation Professor of Ophthalmology (KTEF) [2016]: Unoccupied

An endowed gift to be held in perpetuity to benefit the Wilmer Eye Institute

Henry J. Knott Directorship of the McKusick/Nathans Center for Medical Genetics and Professorship in Medical Genetics [1999]: Ambroise Wonkam, M.D.

Funding provided by Marion I. Knott in honor of her late husband, who served as a Trustee of the Hospital and, with his wife, was an extremely generous supporter of Hopkins.

Marion I. Knott Directorship of the Oncology Center and Professor in Oncology [1999]: William Nelson, M.D.

Funding provided by Marion I. Knott in honor of her late husband, who served as a Trustee of the Hospital and, with his wife, was an extremely generous supporter of Johns Hopkins.

Eric Kobren Professorship in Applied Health Informatics [2019]: Mohamed A. Rehman, M.D.

Funding provided by Eric and Catherine Kobren to endow and sustain the professorship holder, providing resources for research and other academic pursuits.

Catherine Kobren Professorship in Patient Safety and Quality [2019]: Angela Green, Ph.D., RN

Funding provided by Eric and Catherine Kobren to endow and sustain the professorship holder, providing resources for research and other academic pursuits.

Arlene and Robert Kogod Professorship in Mood Disorders in the Department of Psychiatry [2008]: Peter P. Zandi, Ph.D.

Funding will be provided by Arlene and Robert Kogod to provide the financial support and stability for research, education, and clinical activities of individual faculty members in the Department of Psychiatry.

Everett and Margorie Kovler Professorship in Pancreas Cancer Research [2009]: Unoccupied

Funding provided by Everett and Marjorie Kovler to provide support of pancreatic cancer research. The endowment will be held in the Sidney Kimmel Comprehensive Cancer Center at the School of Medicine.

Peter and Judy Kovler Professorship in Breast Cancer Research [2020]: Andrea Richardson, M.D., Ph.D.

Funding provided by Peter and Judy Kovler to support a faculty member focused on breast cancer research in the Department of Pathology.

Zanvyl Krieger Professorship in Pediatric Ophthalmology [1991]: David L. Guyton, M.D.

Funded by a contribution from Mr. Zanvyl Krieger, a 1928 graduate of the Johns Hopkins University, a successful business man, and philanthropist. He is a benefactor of many components of the Johns Hopkins University.

Sachiko Kuno and Ryuji Ueno Innovation Professorship [2014]: Akira Sawa, M.D.

To accelerate clinical and scientific innovation in mental health and brain science in the world.

Maurice E. Langham, Ph.D. Professorship in Ophthalmology [2008]: Albert Jun, M.D.

The income from principal will be used for Professorship in honor of Maurice E. Langham, Ph.D. The endowment will be held in the Wilmer Eye Institute.

Lawson Wilkens Professorship in Pediatric Endocrinology [2005]: Sheela N. Magge, M.D.

To provide professorship support to a faculty member in the division of Pediatric Endocrinology in the Department of Pediatrics.

George LeBoff Professorship for Research in Digestive Diseases [1999]: Mark Donowitz, M.D.

Funding provided by the estate of George LeBoff for support in the Division of Gastroenterology.

Lederer Professorship of Pediatric Epilepsy [1991]: Eileen P.G. Vining, M.D.

Funded by a gift for research in the care and cure of pediatric epilepsy.

L. Douglas Lee & Barbara Levinson-Lee Professorship in Clinical Practice [2021]: Steven J. Kravet, M.D., MBA, FACP

Funding will benefit the Department of Medicine, General Internal Medicine Division to support the office of the President of Johns Hopkins Community Physicians and to elevate the importance of excellence in clinical practice.

L. Douglas Lee & Barbara Levinson-Lee Professorship in Ophthalmology [2021]: Shameema Sikder, M.D.

Funding will benefit the Wilmer Eye Institute.

Legum Professorship in Acute Neurological Medicine [1999]: Daniel Hanley, M.D.

Funding provided by Mr. and Mrs. Jeffrey Legum. Appointment to the Professorship will be made by the Dean on the recommendation of the Chairman of the Department of Neurology. The recipient will be a leader in research of severe brain injury and disease.

Doris Lescher and John Bauernschmidt II Professorship in Ophthalmology [2004]: Unoccupied

Created by Dr. Peter McDonnell by combining the interest from two accounts. Both donors indicated that the income was to be used to support research into retinal diseases.

David Levine Professorship [2004]: Unoccupied

Established to be occupied by the Vice Dean for Clinical Investigations.

Julia L. Levy Ph.D. Professorship in Ophthalmology [2004]: Susan Bressler, M.D.

Funding provided by QLT, Inc. of Vancouver, BC.

Robert L. Levy Chair in Cardiology [1975]: Brian O'Rourke, Ph.D.

Funding provided by a bequest of Dr. Robert L. Levy, a graduate of the School of Medicine in 1913 and a highly respected practicing cardiologist in New York City. Previous occupants: Drs. J. O'Neal Humphries, Myron L. Weisfeldt, and Eduardo Marban.

John R. Lewis Professorship in Pathology [2022]: Unoccupied

Funding provided by anonymous donors in memory of the Honorable John R. Lewis, former United States Representative from Georgia, to support a faculty member in the Department of Pathology who is a member of an under-represented minority group.

Wayne Lewis Professorship in Orthopaedic and Shoulder Surgery [2006]: Edward McFarland, M.D.

Funding provided by Dextra Bank and Trust Co., Ltd. to create a professorship in orthopaedics and shoulder surgery.

Donlin M. Long Chair in Neurosurgery [2003]: Nicholas Theodore, M.D.

Established in 1999 by patients, colleagues, and friends in honor of Donlin Long, who served as Director of the Department of Neurosurgery from 1973 to 2000.

Mason F. Lord Chair in Geriatric Medicine [1996]: Cynthia Boyd, M.D., MPH

Funding provided by an anonymous gift to honor Dr. Mason F. Lord, a 1954 graduate of the School of Medicine, member of the faculty of the Department of Medicine, and Director of the Geriatrics Program at the Baltimore City Hospitals, now the Johns Hopkins Bayview Medical Center.

The Raymond and Anna Lublin Professorship in Medicine [1989]: Jeremey D. Walston, MD.

Funding provided by Dr. and Mrs. Raymond Lublin to support the leader of the Division of Geriatrics in the Department of Medicine. Dr. Lublin was a 1929 graduate of the Johns Hopkins School of Medicine, and practiced general surgery in East Hartford, CT.

Edythe Harris Lucas and Clara Lucas Lynn Chair in Hematology [1992]: Linzhao Cheng, M.D.

Funding provided by Clara Lucas Lynn, a grateful patient of Dr. William R. Bell.

Virginia and Daniel K. Ludwig Chair in Cancer Research [1996]: Stephen Baylin, M.D.

Funding provided by Daniel K. Ludwig, one of the world's great ship owners, who dedicated his fortune to medical research on an international scale for the understanding and eradication of cancer.

Virginia and Daniel K. Ludwig Chair in Clinical Investigation of Cancer [1999]: Ross C. Donehower, M.D.

Funding provided by Daniel K. Ludwig, one of the world's great ship owners, who dedicated his fortune to medical research on an international scale for the understanding and eradication of cancer.

Ian T. MacMillan Family Professorship in Clinical Pancreatic Cancer Research [2008]: Daniel Laheru, M.D.

Funding provided by the MacMillan Family to be used for clinical pancreatic cancer research at the Sidney Kimmel Comprehensive Cancer Center.

David Marine Professorship of Medicine [1985]: Nadia Hansel, M.D., M.P.H.

Funding provided by the estate of Dr. David N. Marine, a 1947 graduate of the Johns Hopkins School of Medicine. He specialized in the study of pulmonary disease and tuberculosis.

E. K. Marshall and Thomas H. Maren Professorship in Pharmacology [1997]: Namandje Bumpus, Ph.D.

Funding provided by Dr. Thomas H. Maren, class of 1951, who was a faculty member in the Department of Pharmacology directed by Dr. Marshall.

J. Willard Marriott, Jr. Professorship in Ophthalmology (Permanent) & J. Willard Marriott, Jr. Professorship in Ophthalmology (Quasi) [2020]: Peter L. Gehlbach, M.D.

The combination of these two endowments will establish a Professorship at the Wilmer Eye Institute at the School of Medicine.

Eli Kennerly Marshall, Jr. Professorship in Oncology [1978]: Unoccupied

E. K. Marshall succeeded Abel as Professor of Pharmacology. This Professorship was initially in the Oncology Division of the Department of Medicine, but moved to Oncology when Oncology became a department.

Bessie Darling Massey Chair in Biomedical Engineering [1971]: Michael I. Miller, Ph.D.

Funding provided by Mr. and Mrs. Massey, grateful patients of John Bordley.

The A. Edward Maumenee Professorship in Ophthalmology [1993]: Harry A. Quigley, M.D.

Funding provided by Mrs. Margaret Mosher and other friends, colleagues, and grateful patients of Dr. Maumenee who was Director of the Wilmer Eye Institute and Director of the Department of Ophthalmology from 1955 to 1979.

Oliver Lee McCabe, III, Ph.D. Professorship in the Neuropsychopharmacology of Consciousness [2020]: Roland R. Griffiths, Ph.D.

This benefits the Department of Psychiatry & Behavioral Sciences. It will be used for the purposes of human research on the effects of psychedelic substances on consciousness, treatment of psychiatric and behavioral disorders, the improvement of public health, and the betterment of humankind.

David Hall McConnell Professorship of Urology [1973]: Occupied by Misop Han, M.D.

Funding provided by Admiral H. P. John Duberg, a grateful patient of Dr. W. W. Scott. Adm. Duberg was married to Dorys McConnell Duberg, a daughter of David Hall McConnell who was the founder of the Avon Corporation.

The Hugh P. McCormick Family Professorship in Endocrinology and Metabolism [2003]: Sherita Hill Golden, M.D.

Funding provided by Hugh P. McCormick of McCormick Spice.

Martha McCrory Professorship in Medicine [2014]: Fred M. Wigley, M.D.

Funding to support a world-class physician whose clinical and research work is focused on efforts to cure scleroderma and provide patient care until that cure is discovered.

The Paul R. McHugh Chair in Motivated Behaviors [1998]: Timothy H. Moran, Ph.D.

Funding provided by Mr. William F. Scandling and various donors in honor of Dr. Paul McHugh, Director of the Department of Psychiatry and Behavioral Sciences.

Victor A. McKusick Professorship in Medicine and Genetics [2004]: Harry C. Dietz, III, M.D.

Funding provided by anonymous donor and friends of Dr. McKusick.

Menowitz/Rosenstein Professorship of Pediatric Respiratory Sciences [2018]: Peter J. Mogayzel, Jr., M.D., Ph.D., MBA

Benefits the Johns Hopkins Children's Center, Department of Pediatrics, in the Eudowood Division of Pediatric Respiratory Sciences (Pediatric Pulmonary Medicine) to be held in perpetuity for a professorship bearing the name.

Eugene Meyer III Professorship in Psychiatry and Medicine [1982]: Glenn J. Treisman, M.D., Ph.D.

Funding provided by Dr. Eugene Meyer, family, and friends. Dr. Meyer, a 1941 graduate of the School of Medicine, trained in Medicine, Psychiatry, and the Professorship supports joint activities in these two departments.

Myra S. Meyer Professorship for Mood Disorders in Psychiatry [2008]: Karen L. Swartz, M.D.

The income from the principal will be used to provide financial support and stability needed for the individual faculty members as it related to research, education and clinical activities in mood disorders.

Harvey M. Meyerhoff Professorship in Bioethics [1999]: Jeremy Sugarman, M.D., Ph.D.

Established by commitment made in 1999 by Harvey M. Meyerhoff, a long time University and Hospital Trustee and the founding Chairman of the Hopkins Health System Board.

Marilyn Meyerhoff Professorship in Thoracic Surgery [2022]: Julie Brahmer, M.D.

The donor intends to recommend that the grant be used to benefit the Sidney Kimmel Comprehensive Cancer Center as an endowed gift to be held in perpetuity for a professorship bearing the name of the Marilyn Meyerhoff Professorship in Thoracic Surgery.

Robert E. Meyerhoff Assistant Professorships [2007]: Michael A. Chattergoon, M.D., Ph.D. and Chiadi E. Ndumele, M.D.

Funding provided to enable Johns Hopkins Medicine to recruit junior faculty members with exceptional promise.

Robert and Jane Meyerhoff Professorship [2018]: Shawn M. Kunisaki, M.D., M.Sc.

Established for the recruitment of a junior faculty member with exceptional promise, and exemplary record of academic achievement in medicine and a demonstrated commitment to increasing opportunities for under-represented minorities and breaking down stereotypes. The ultimate goal will be to enable as many faculty candidates as possible and encourage them to either stay at Johns Hopkins as role models and mentors, or to move on to positions of national leadership, such as department chairs around the country.

Catherine Iola and J. Smith Michael Distinguished Professor in Urology [1988]: Shawn E. Lupold, Ph.D.

Funding provided by Mrs. Catherine Iola Michael and Mr. Smith Michael. Mr. Michael was President and Board Chairman of the First National Bank of Aberdeen, which was later acquired by Equitable Trust Company. Both Mr. Michael and Mrs. Iola Michael grew up in Harford County, Maryland. Mr. Michael died in 1978. This Professorship was established in memory of Mr. J. Smith Michael.

Anne G. Miller and G. Thomas Miller Professor in Medicine in the Center for Innovative Medicine: Scott M. Wright, M.D.

It was the desire of Sarah Miller Coulson with this gift to honor her mother, Anne and to remember her father, Thomas, and to support Dr. Scott Wright in the Center for Innovative Medicine (CIM). This professorship was created also to recognize Scott for his leadership of the Miller-Coulson Academy.

Edward D. Miller Professorship in Anesthesiology Research [2007]: Nicholas A. Flavahan, M.D.

Funding provided from the Johns Hopkins Hospital Endowment Fund, Inc. Funds will be used to support research activities and research infrastructure in the Department of Anesthesiology and Critical Care Medicine.

Neil R. Miller, M.D. Professorship in Ophthalmology [2021}: Unoccupied

This gift will be used to support a faculty member of the Wilmer Eye Institute, Johns Hopkins Medicine.

The Lloyd B. Minor, M.D. Vestibular and Skull Base Sciences Center Director [2020]: John P. Carey, M.D.

This benefits the Department of Otolaryngology-Head & Neck Surgery. It will fund the Lloyd B. Minor, M.D., Vestibular & Skull Base Sciences Center Director.

Michel Mirowski, M.D. Professorship in Cardiology [1998]: Charles J. Lowenstein, M.D.

Funding provided by the Mirowski Family Foundation, Inc., to provide faculty support in the Division of Cardiology in the School of Medicine. The Chair memoralizes Dr. Mirowski, a cardiologist at Johns Hopkins who played a key role in the development of the implanted defibrillator.

Arthur B. and Patricia B. Modell Professorship in Thoracic Surgery [2007]: Stephen C. Yang, M.D.

Funding provided by Mr. and Mrs. B. Modell to honor a faculty member in the Department of Surgery. This gift will allow the Department of Surgery to have a profound impact on the field of thoracic surgery.

C. David Molina, M.D., M.P.H. Chair in Medicine [2014]: Lawrence J. Appel, M.D., M.P.H.

Support for the chair holder who is committed to the health of all communities and to advancing medical well-being of individuals and communities and preventative medicine. Held in the Division of General Internal Medicine.

Russell H. Morgan Professorship in Radiology [1994]: Paul Bottomley, M.D.

Funding provided by friends and colleagues of Dr. Russell H. Morgan, Director of the Department of Radiology from 1946 to 1971.

Richard and Kathleen Morton Chair in Genetic Research [1989]: Unoccupied

Funding provided by Richard F. Morton and Kathleen C. Morton to provide faculty support in the Department of Genetic Medicine. Dr. Richard Morton completed an OB/GYN internship at Hopkins and also served on the School of Public Health faculty. Dr. Kathleen Morton is a pediatrician who served on the School of Medicine faculty and became the first woman named a dean there.

Margaret C. Mosher Professorship in Ophthalmology [2002]: John D. Gottsch, M.D.

Established in 2002 by a one-life gift annuity from the estate of Margaret C. Mosher of Santa Barbara, California.

James B. Murphy Professorship in Oncology [2000]: Richard F. Ambinder, M.D., Ph.D.

Established in 2000 by an anonymous donor in memory of James B. Murphy, Class of 1909.

Harry and Betty Meyerberg/Thomas R. Hendrix Professorship in Gastroenterology [2006]: Steven Meltzer, M.D.

Funding for this professorship provides faculty support in the Division of Gastroenterology in the Department of Medicine.

George T. Nager Professorship in Otolaryngology-Head & Neck Surgery [1999]: Elisabeth Glowatzki, Ph.D.

Funding to support research in the Department of Otolaryngology-Head and Neck Surgery in the School of Medicine.

Daniel Nathans Directorship of the Department of Molecular Biology and Genetics and Professorship in Molecular Biology and Genetics [2000]: Unoccupied

Funds provided by several anonymous donors in honor of Daniel Nathans. Dr. Nathans joined the faculty in 1962 and went on the direct the Department of Microbiology and Molecular Biology and Genetics. He served as interim president of the University from 1995 to 1996. He won the Nobel Prize in medicine in 1978 for his discovery and use of a restriction enzyme as “biochemical scissors” to cut and analyze DNA. In 1993, he received the nation’s highest scientific award, the National Medal of Science. Dr. Nathans died in 1999.

Paul K. Neumann Professorship in Pancreatic Surgery [1998]: Jin He, M.D., Ph.D.

Funding provided by Mark D. and Robin Neumann in memory of Mr. Mark Neumann’s father to support a prominent surgeon in determining the causes, prevention, and management options for pancreatic cancer research.

Noxell Chair in Dermatology [1985]: Sewon Kang, M.D.

Funding provided by the Noxell Foundation. The Noxell Company was a cosmetics company founded and based in Maryland which became a part of the Proctor and Gamble Co.

The Independent Order of Odd Fellows Professorship in Ophthalmology [1963]: Henry D. Jampel, M.D., M.H.S.

Funding provided by a grant for research in eye disease and eye pathology.

Lewis J. Ortt Professorship in Ophthalmology [1989]: Justin Hanes, Ph.D.

Funded by a gift from the Lewis J. Ort family for the support of diagnosis and management of hereditary eye diseases.

William Osler Professorship in Medicine [1978]: Mark Anderson, M.D., Ph.D.

Funding provided by a bequest in the will of Dr. J. Earle Moore, a prominent Baltimore internist and pioneer in the chemotherapy of syphilis. He was director of the Syphilis Clinic at Johns Hopkins. The Professorship is named for the first Director of the Department of Medicine, Dr. William Osler, and has been occupied by Directors of the Department.

The Lawrence C. Pakula, M.D. Professorship Fund [2020]: Frances Northington, M.D.

The gift will be used to benefit the Johns Hopkins Children’s Center & Department of Pediatrics as an endowed gift to be held in perpetuity for a professorship bearing the name of The Lawrence C. Pakula, M.D. Professorship. When possible, the recipient will be involved in the advancement of pediatric residency and/or education programs.

The Sheila Sutland Pakula Professorship for Maternal & Newborn Health [2020]: Nicole A. Shilkofski, M.D., M.Ed.

Benefits the Department of Pediatrics, for maternal and newborn health.

Arnall Patz Distinguished Professorship in Ophthalmology [1993]: Kannan Rangaramanujam, M.D.

Funded by gifts from family, friends, colleagues, and grateful patients of Dr. Arnall Patz, who was Director of the Wilmer Eye Institute and Director of the Department of Ophthalmology from 1979 to 1989.

Helen Golden Paulson Professorship in Gastroenterology [1982]: Anne Marie O’Broin-Lennon, M.D.

Funding provided by the estate of Helen G. Paulson in honor of Dr. Moses Paulson, who was a practitioner of internal medicine and gastroenterology in Baltimore. He was a member of the part-time faculty of the Department of Medicine.

Peavy Endowed Chair for Pediatric Diabetes Care at Johns Hopkins All Children’s Hospital [2019]: Unoccupied

The funding will be used to create an endowed Chair in the Department of Pediatrics with responsibility in Diabetes Care at JCACH. It will be held in perpetuity for a professorship bearing the name of the Peavy Endowed Chair for Diabetes.

Virginia M. Percy and William Algernon Percy Professorship in Orthopaedic Surgery [1979]: Unoccupied

Mrs. Percy was a grateful patient of Dr. Lee H. Riley, Jr.

Aliki Perroti Chair in the Department of Medicine [2006]: David B. Hellmann, M.D.

Funding provided by Mrs. Aliki Perroti. The recipient is to be a superior clinician committed to meeting the medical challenges of the twenty-first century and beyond.

Perry Family Professorship in Clinical & Translational Research at Johns Hopkins All Children's Hospital [2021]: Unoccupied

The Perry Family Endowed Professorship in Clinical & Translational Research was established at Johns Hopkins All Children’s Hospital through an unrestricted gift from the Perry Family Trust & funds from Johns Hopkins All Children’s Foundation.

Ronald R. Peterson Professorship in Medicine [2012]: Chirag Parikh, M.D.

The income of the principal will be used for the benefit of the Chair of Nephrology for Johns Hopkins Medicine.

Henry Phipps Professorship in Psychiatry [1908]: James B. Potash, M.D., M.P.H.

Created by a gift from Mr. and Mrs. Henry Phipps of Philadelphia for whom the Phipps Psychiatric Clinic is named.

Boone Pickens Professorship in Ophthalmology [2005]: Amir Kashani, M.D., Ph.D.

Funding provided by Mr. Boone Pickens of Dallas, Texas out of his respect for and admiration of Dr. Stark.

William V. Pitts Professorship [2020]: Unoccupied

Funding provided by the estate of William V. Pitts to be used to endow and sustain the director of the Johns Hopkins All Children's Heart Institute.

Leslie Plotnick, M.D. Professorship in the Clinical Care and Research of Pediatric Endocrinology [2001]: Unoccupied

Funds provided to fund a professorship in the clinical care and research of Pediatric Endocrinology at the Department of Pediatrics.

Catherine Ellen Poindexter Professorship of Cardiology [2019]: Hugh Calkins, M.D.

The funding will be used to benefit the Division of Cardiology as an endowed gift to be held in perpetuity for a professorship bearing the above name.

Kenneth Jay Pollin Professorship in Cardiology [2013]: Roger Blumenthal, M.D.

Created by Mrs. Irene Pollin. To be held in the Division of Cardiology.

Margery K. and Thomas Pozefsky Professorship in Kidney Transplant Surgery [2007]: Dorry Segev, M.D., Ph.D.

The income from the principal will be used to support a kidney transplant professor pursuing kidney transplant research in the Department of Surgery.

Sachin N. Pradhan, M.D., Ph.D. and Sikta Pradhan, Ph.D. Professorship in Spine Surgery [2020]: Unoccupied

Funded by Sikta Pradhan, Ph.D. and other patients, this professorship is for a spine surgeon in the Department of Orthopaedic Surgery.

Rainey Professorship in Pediatric Hematology [1992]: James F. Casella, M.D.

Funding provided by Dr. and Mrs. Rainey, family, and friends. Dr. Rainey was a 1933 graduate of the Johns Hopkins School of Medicine and practiced internal medicine in Greenville, SC. A family member was a patient of Dr. William Zinkham. Its purpose is to provide stable support for the Division of Pediatric Hematology.

John G. Rangos, Sr. Professorship in Adult Medicine [2001]: Francis M. Giardiello, M.D.

Funding provided by the John G. Rangos, Sr. Charitable Foundation to be designated for terms of at least five years to a physician-scientist both pursuing promising areas of research in gastrointestinal medicine and demonstrating exceptional promise in advancing new discoveries and treatments in the area of colon cancer.

Mark M. Ravitch Endowed Professorship in Surgery [1985]: Jonathan E. Efron, M.D.

Funding provided by friends, patients, and colleagues of Dr. Mark M. Ravitch to promote surgical scholarship. Dr. Ravitch, a 1934 graduate of the Johns Hopkins School of Medicine, trained in surgery with Dr. Alfred Blalock. He held numerous posts in American academic surgery and finished his career as Professor of Surgery at the University of Pittsburgh. He was a general, thoracic, and pediatric surgeon best known for the introduction of surgical stapling and the surgical repair of pectus excavatum.

Rear Admiral Ray & Laura Conner Professorship in Pediatrics [1997]: Barry S. Solomon, M.D., MPH

The purpose of this funding is to provide for the care of indigent children in need of medical care. To accomplish the objective, the President of Johns Hopkins Hospital and the Dean of the Johns Hopkins University School of Medicine shall act jointly as to the specific application of such annual income. It has been decided that the annual income will provide funding for the Director of the Harriet Lane Clinic in the Department of Pediatrics in the School of Medicine.

Rosemarie Hope Reid, M.D. Professorship in PCLT [2021]: Colleen Christmas, M.D.

Funding will be used to benefit the Primary Care Leadership Track in the School of Medicine as an endowed gift to be held in perpetuity for a professorship bearing the name of the Rosemarie Hope Reid Professorship.

Rose-Lee & Keith Reinhard Professorship in Urologic Pathology [2001]: Jonathan I. Epstein, M.D.

Funding provided by Rose-Lee and Keith Reinhard to honor Patrick Walsh, M.D. and to further prostate cancer research by establishing an endowed professorship in the Brady Urological Institute. Dr. Walsh was the Director of the Department of Urology from 1974 to 2004.

Rembrandt Foundation Professorship in Pediatric Palliative Care [2015]: Renee Denise Boss, M.D., M.H.S.

For the purposes of creating a professorship (in Pediatric Palliative Care) at the School of Medicine's Children's Center.

Richman Family Professor for Alzheimer's and Related Diseases [2008]: Gwenn Smith, Ph.D.

Funding provided by the Richman Family for the Department of Psychiatry and Behavioral Sciences for Alzheimer's and related disorders.

Lee H. Riley, Jr., M.D., Chair in Orthopaedic Surgery [1994]: Xu Cao, Ph.D.

Funding provided by the family, friends, colleagues, and patients of Dr. Riley to provide support for a clinical scholar in Orthopaedic Surgery. Dr. Riley was Director of the Department of Orthopaedic Surgery from 1979 to 1991.

Alfredo Riviere and Norma Rodriguez de Riviere Professorship in Endocrinology [1997]: Gary S. Wand, M.D.

Funding provided by Alfredo Riviere and Norma Rodriguez de Riviere for thyroid related research.

David Robinson Professorship in Vestibular Neurology [2022]: David E. Newman-Toker, M.D., Ph.D.

Endowed purpose is being changed to a Professorship which was always the intent of David Robinson, et al. The State of Maryland has awarded the Department of Neurology at $1.8M grant to bolster the fellowship to a full professorship.

Robert A. Robinson Professorship in Orthopaedic Surgery [1972]: James R. Ficke, M.D.

Established by contributions from grateful patients and colleagues of Dr. Robert A. Robinson, who was Director of the Department of Orthopaedic Surgery from 1953 to 1979.

Stephen and Jean Robinson Professorship for Eating Disorders [2014]: Angela S. Guarda, M.D.

To be used for the purposes of clinical care, research and education pertaining to improving the understanding and treatment of eating disorders. Associated with the Because It's You Foundation.

Mark C. Rogers Chair in Anesthesiology and Critical Care Medicine [1993]: Unoccupied

Funding provided by the Unit Executive Fund of the Department of Anesthesiology and Critical Care Medicine. Dr. Mark C. Rogers was Director of the Department of Anesthesiology and Critical Care Medicine from 1980 to 1993.

Mary Jo Rogers Professorship in Cancer Immunology & Melanoma Research in Oncology [2016]: William Sharfman, M.D.

The fund will be used to establish an endowed professorship to support immunotherapy work in melanoma.

Robert and Marion Rosenthal Professorship in Spine Surgery [2013]: Khaled M. Kebaish, M.D., MS, FRCSC

The income from the principal will be used for a leadership fund and held in the Department of Orthopaedic Surgery.

Barbara B. Rubenstein Professorship in Oncology [2002]: Saraswati Sukumar, Ph.D.

Funding provided by Trustee Mark Rubenstein and his children, David, Jonathan, and Hilary in memory of their wife and mother.

David M. Rubenstein Research Professorship [2015]: Paul A. Fuchs, Ph.D.

Income from the principal will be used "to create an endowed chair, the David M. Rubenstein Professor, who will dedicate their research efforts toward the goal of functional hearing restoration in our patients." The endowment will be held in the David M. Rubenstein Hearing Center in the Department of Otolaryngology-Head & Neck Surgery.

Murray B. Sachs Professorship in Biomedical Engineering [2012]: Natalia Trayanova, Ph.D.

Funding provided by Arthur J. Samberg in honor of Murray B. Sachs, Ph.D.

Salisbury Family Professorship in Neurosurgery [2008]: Cameron G. McDougall, M.D.

Funding provided by the Salisbury family.

Samsung Professorship in Medicine [1997]: Gail Daumit, M.D.

Funding provided by the Samsung Corporation to endow a chair in the Department of Medicine, Division of Internal Medicine.

Herman and Walter Samuelson Foundation Professorship in Oncology [1999]: Kenneth R. Cooke, M.D.

Funding provided by The Herman and Walter Samuelson Foundation for the purpose of advancing outstanding cancer research.

D. William Schlott Professorship in Medicine [2001]: Bimal H. Ashar, M.D.

Funding provided by friends, patients, and colleagues of Dr. D. William Schlott.

Bernard L. Schwartz Distinguished Professorship in Urological Oncology [1996]: Christian P. Pavlovich, M.D.

Funding provided by Dr. and Mrs. Bernard Schwartz. Dr. Schwartz is the CEO of Loral Space and Communications, Ltd. and a grateful patient of Johns Hopkins.

Huntington Sheldon, M.D. Professorship in Medical Discovery [2014]: Geraldine Seydoux, Ph.D.

Funding provided by an anonymous donor. The endowment is to be used by the IBBS.

Lawrence Cardinal Shehan Chair in Physical Medicine and Rehabilitation [1993]: Pablo Celnik, M.D.

Funding provided by the Good Samaritan Hospital to support the Director of Physical Medicine and Rehabilitation.

Irving J. Sherman M.D. Professorship in Neurosurgery [2010]: Gregory J. Riggins, M.D.

Funds provided by Mr. and Mrs. Irving Sherman for the Department of Neurosurgery.

The Irving J. & Florence Sherman Professorship Endowed Fund [2021]: Judy Huang, M.D.

The funds will be used to benefit the Department of Neurosurgery as an endowed gift to be held in perpetuity for a professorship bearing the name of The Irving J. and Florence Sherman Professorship in Neurosurgery.

Judy Yin Shih, Ph.D. Professorship in Anxiety Disorders Endowed Professorship [2019]: Unoccupied

Funding will be used to benefit the Department of Psychiatry & Behavioral Sciences to be held in perpetuity for a professorship bearing the name of Soh Chao Shih, Ph.D. Professorship in Anxiety Disorders.

Milton and Muriel Shurr Endowed Directorship [2012]: Unoccupied

Income from the principal will be used to establish an endowed directorship of the General Eye Service and be held in the Wilmer Eye Institute at the School of Medicine.

Raj and Neerah Singh Professorship in Biomedical Engineering [2008]: Raimond L. Winslow, Ph.D.

Funding provided by the Raj and Neerah Singh Charitable Foundation and will be used by the Department of Biomedical Engineering to recruit, retain, or support a distinguished faculty member specializing in computational medicine.

Branna & Irving Sisenwein Professor of Ophthalmology [2018]: Akrit Sodhi, M.D.

Funded from the Sisenwein's estate and matched with an $800,000 grant of the State of Maryland's E-Nnovation Initiative Fund.

W.W. Smith Charitable Trust Professorship in Immunology [2002]: Daniel B. Drachman, M.D.

Established by a grant from the W.W. Smith Charitable Trust as a reflection of Bill Smith's exceptional vision and his desire to enhance medical excellence.

Solomon H. Snyder Professorship in Neurosurgery [2014]: Michael Caterina, M.D., Ph.D.

Income from the principal will be used to “alleviate pain and suffering from neurosurgical diseases.” Will be held in the Department of Neurosurgery.

Alfred Sommer Professorship in Ophthalmology [2004]: Unoccupied

Funds set aside by the Department of Ophthalmology for retinal research.

Lewis Cass Spencer Professorship in Orthopaedic Surgery [1997]: Thomas L. Clemens, Ph.D.

Funding provided by Dr. Rowena Spencer, a member of the class of 1947, in honor of her father, the late Lewis Cass Spencer, M.D., an alumnus of the class of 1911 and the first orthopaedic surgical resident at Johns Hopkins.

Spiegel/Nichols Associate Professorship in Pediatric Urology [2011]: Heather DiCarlo, M.D.

Income from the principal will be used “for an Assistant Professorship”. The endowment will be held in the Division of Pediatric Urology in the Brady Urological Institute at the School of Medicine.

Paul D. Sponseller, M.D. Professorship in Pediatric Orthopaedic Surgery [2003]: Paul Sponseller, M.D.

Funding provided by Dr. and Mrs. David S. Hungerford.

Edward St. John Professorship in Cardiology [2019]: David D. Spragg, M.D.

Funding will be used to benefit the Division of Cardiology as an endowed gift to be held in perpetuity for a professorship bearing the name of the Edward St. John Professorship in Cardiology.

Theodore and Vada Stanley Distinguished Chair in Neurovirology in Pediatrics [1998]: Robert H. Yolken, M.D.

Funding provided by the Stanley Foundation. The endowment will support research in brain disorders, especially schizophrenia and bipolar disorders, which may be caused by infections in infancy and childhood.

Mary Wallace Stanton Professorship for Education [2004]: Roy Ziegelstein, M.D.

Funds provided by donor to endow Professorships in the School of Medicine.

Mary Wallace Stanton Professorship for Faculty Affairs [2004]: Unoccupied

Funds provided by donor to endow Professorships in the School of Medicine.

Walter J. Stark Chair in Ophthalmology [1992]: Walter J. Stark, Jr., M.D.

Funding provided by grateful patients of Dr. Stark: Mrs. Margaret Mosher, Ralph S. O’Connor, Ray Stark, and Mr. and Mrs. Albert Broccoli.

Stermer Family Professorship in Pediatric Inflammatory Bowel Disease [2001]: Maria Oliva-Hemker, M.D.

Funding provided by the Stermer Family for the Director of the IBD Center in the Department of Pediatrics.

Dr. Mary Betty Stevens Professorship in Rheumatology [1989]: Antony Rosen, M.D.

Funding provided by colleagues, friends, and former patients of Dr. Mary Betty Stevens to support a clinical scholar in the Division of Rheumatology. Dr. Stevens, a 1955 graduate of the Johns Hopkins School of Medicine, specialized in clinical rheumatology and directed the division within the Department of Medicine.

Leonard and Helen R. Stulman Professorship in Child and Adolescent Psychiatry [2011]: John Campo, M.D.

An endowment fund at the School of Medicine, the income from the principal will be used for the Stulman Professor and may also help foster cross-collaboration between Johns Hopkins and other community organizations in the field of child and adolescent mental health, and will be held in the Division of Child and Adolescent Psychiatry in the Department of Psychiatry and Behavioral Sciences at the Johns Hopkins School of Medicine.

Sunshine Natural Wellbeing Foundation Professorship in Chronic Fatigue Syndrome and Related Disorders in Pediatrics [2006]: Peter C. Rowe, M.D.

Funding provided to support a deserving faculty member.

Dr. Frank V. Sutland Chair in Pediatric Genetics [1991]: Ada Hamosh, M.D.

Funding provided by Mrs. Frank V. Sutland and family.

Josephine S. Sutland Professorship in Newborn Medicine [2007]: Akhil Maheshwari, M.D.

Funding provided by Mrs. Frank V. Sutland, Dr. Lawrence and Shelia Pakula, and the Louis Gross Foundation.

Diana Sylvestre, M.D. & Charles Homcy M.D. Professorship [2021]: Unoccupied

The gift will be used to benefit the Department of Neuroscience in the Institute for Basic Biomedical Sciences in the School of Medicine as an endowed gift to be held in perpetuity for a professorship bearing the name of the Diana Sylvestre, M.D. & Charles Homcy, M.D. Professorship.

Helen B. Taussig Professorship [1987]: Shelby Kutty, M.D.

Funding provided by the sale of Dr. Taussig’s property on Cape Cod to provide support for the Division of Pediatric Cardiology. Dr. Helen B. Taussig, a 1927 graduate of the Johns Hopkins School of Medicine, founded the specialty of pediatric cardiology. In association with Dr. Alfred Blalock, she developed the first surgical procedure for treatment of cyanotic congenital heart disease (blue baby operation).

Richard W. TeLinde Distinguished Professorship of Gynecological Pathology [1989]: Robert J. Kurman, M.D

Funding provided by the estate of Dr. Richard W. TeLinde, Director of the Department of Gynecology and Obstetrics from 1939 to 1960. He was an advocate of a close relationship between pathology and gynecology, and insisted that there be a pathology unit within the Department of Gynecology and Obstetrics.

Richard W. TeLinde, M.D. and Edward E. Wallach, M.D. Professorship [2015]: Valerie Lynn Baker, M.D.

Funding provided by Howard Jones, Jr., M.D. and the Jones family. Income from the principal will be used for a Professorship. “Preference will be given to those working in gynecologic endocrinology and/or infertility."

Samuel Theobald Professor of Ophthalmology [2015]: Jeremy Nathans, M.D.

Income from the principal (which comes from funds designated to be used for "general purposes without restriction as to the use of income or principal") will be used for an endowed professorship. The endowment will be held in the Wilmer Eye Institute in the School of Medicine.

Therapeutic Cognitive Neuroscience Professorship [2000]: Barry Gordon, M.D., Ph.D.

Funding by an anonymous donor to support wide ranging efforts to improve mental functions in people with brain disorders (The Department of Neurology).

Bloomberg-Kimmel Professor of Cancer Immunotherapy in the Bloomberg Kimmel Institute for Cancer Immunotherapy [2018]: Suzanne Topalian, M.D.

Used to support the Dr. Suzanne Topalian Chair Endowment Fund at the Johns Hopkins Bloomberg-Kimmel Institute.

Richard J. Traystman Professorship in Anesthesiology and Critical Care Medicine [2003]: Sujatha Kannan, M.D.

Endowed Chair of Pediatric Anesthesia and Intensive Care Medicine was renamed to honor Dr. Traystman.

The Leon Troper, M.D. Professorship in Computational Pathology [2020]: Alexander S. Baras, M.D., Ph.D.

Funding provided by Dennis Troper and Susan Wojcicki to support a professorship in computational pathology in the Department of Pathology in memory of Leon Troper, Dennis' father, who was a pathologist.

Philip A. Tumulty Associate Professorship in Medicine [1994]: Stephen D. Sisson, M.D., F.A.C.P.

Established in 1994 by various donors including Helena Hendrickson, a patient of Dr. Schlott.

Thomas and Dorothy Tung Professor in Anesthesiology and Critical Care Medicine [2010]: Cyrus D. Mintz, M.D., Ph.D.

Funded by Dr. Thomas and Dorothy Tung. Income from the principal will support the Tung Professor.

Hans and Ilza Veith Professorship in the History of Medicine [1998]: Unoccupied

Funded by Ilza Veith, Ph.D. to endow the Hans & Ilza Veith Professorship in the History of Medicine at the School of Medicine in memory of Professor Henry A. Siegerist.

Philip Franklin Wagley Chair in Biomedical Ethics [1995]: Ruth Faden, Ph.D.

Funding is provided by Dr. and Mrs. Wagley, family, friends, colleagues, and grateful patients. Dr. Philip F. Wagley, a 1943 graduate of the Johns Hopkins School of Medicine, practiced internal medicine in Baltimore. As a member of the faculty, he directed the course in medical ethics for medical students.

Henry N. Wagner, Jr., M.D. Professorship in Nuclear Medicine [2001]: Martin Pomper, M.D., Ph.D.

Funding provided by two anonymous donors and departmental funds to provide faculty support in the Division of Nuclear Medicine in the Department of Radiology.

A. Earl Walker, M.D. Professorship in Functional Neurosurgery [2008]: William S. Anderson, M.D., Ph.D.

Funding established to provide faculty support in Functional Neurosurgery in the Department of Neurosurgery.

Frank B. Walsh Professor of Neuroophthalmology [1981]: Neil R. Miller, M.D.

Funding provided by friends and trainees. Dr. Frank B. Walsh was the founder of the subspecialty of neuroophthalmology.

Patrick C. Walsh Professorship in Urology [1998]: Arthur L. Burnett, M.D.

Dr. Walsh was the Director of the Department of Urology from 1974 to 2004. Funding was provided by an anonymous donor.

Susan Hill Ward Professorship in Psychedelics & Consciousness [2021]: Matthew W. Johnson, M.D.

Funding will be used to benefit the Department of Psychiatry & Behavioral Sciences as an endowed gift to be held in perpetuity for a professorship bearing the name of "Susan Hill Ward Professorship in Psychedelics and Consciousness" to be used for the purpose of human research on the effects of psychedelic substance, treatment of psychiatric and behavioral disorders & the improvement of public health.

Abraham & Virginia Weiss Professorship in Cardiology [2004]: David A. Kass, M.D.

Funded by the Abraham & Virginia Weiss Trust.

Dr. Myron L. Weisfeldt Professor in the Osler Medical Residency Program [2020]: Unoccupied

The donor intent for this endowment, to be held in perpetuity, is to provide support for the Director of the Osler Medical Residency Program.

Robert Bond Welch Professorship in Ophthalmology [2005]: James T. Handa, M.D.

A group of donors expressed their interest in making their donations in recognition of their respect and admiration for Dr. Robert B. Welch. Dr. Welch obtained his M.D. degree from Johns Hopkins in 1953. He completed his internship and residency at the Wilmer Eye Institute.

William H. Welch Professorship in the History of Medicine [1934]: Jeremy Greene, M.D., Ph.D.

This Professorship honors Dr. William H. Welch, the first Dean of the Johns Hopkins School of Medicine.

Wellcome Professorship in Clinical Pharmacology [1971]: Craig Hendrix, M.D.

Funds were provided by the Burroughs-Wellcome Fund.

Sheila K. West Professorship in Ophthalmology [2018]: Pradeep Y. Ramulu, M.D., M.H.S., Ph.D.

Funding will be used in support of the academic and research activities of the Johns Hopkins University School of Medicine Department of Ophthalmology in the Wilmer Eye Institute.

Charlotte A. Wilson & Margaret K. Whitener Professorship of Ophthalmic Pathology [2017]: Charles G. Eberhart, M.D., Ph.D.

The Charlotte A. Wilson & Margaret K. Whitener Professorship of Ophthalmology was established by the kindness of the estate of Margaret K. Whitener in memory of her mother, Charlotte A. Wilson.

Lawson Wilkens Professorship in Pediatric Endocrinology [2005]: Sally Radovick, M.D.

Funds will be used to support faculty and to honor Dr. Lawson Wilkins, the father of Pediatric Endocrinology.

William Holland Wilmer Professorship in Ophthalmology [1925]: Peter J. McDonnell, III, M.D.

Funding provided by charitable contributions of Col. and Mrs. Henry Breckenridge and the Wilmer Foundation. Dr. Wilmer was the first Director of the Wilmer Eye Institute and the first Director of the Department of Ophthalmology from 1925 to 1934.

Marcella Woll Endowed Professorship [2018]: Laura M. Ensign, Ph.D.

This unrestricted quasi endowment fund will be used for the primary purpose of furthering the search for a cure of macular degeneration at the Wilmer Eye Institute in the School of Medicine. Funded through the Woll estate and matched with a grant from the State of Maryland's E-Nnovation Initiative Fund.

J. Donald Woodruff Chair in Gynecology and Obstetrics [1993]: Unoccupied

Funding provided by colleagues and friends of Dr. J. Donald Woodruff, a 1937 graduate of the Johns Hopkins School of Medicine. Dr. Woodruff was a distinguished teacher and clinician in the Department of Gynecology and Obstetrics from 1942 to 1996.

Alan C. Woods Professorship in Ophthalmology [2002]: Unoccupied

Funding provided by the Department of Ophthalmology Unit Executive Funds.

Zadek Family Professorship in Orthopaedic Surgery [2014]: Lee Riley III, M.D.

Funding from the principal will be used to support the Department of Orthopaedic Surgery.

Drs. David S. and Marilyn M. Zamierowski Directorship of the Johns Hopkins Simulation Center [2008]: Unoccupied

Income from the principal will be used "to endow permanently the Directorship of the Johns Hopkins Simulation Center." The endowment will be held in the School of Medicine.

David S. Zee, M.D. Professorship [2017]: David Zee, M.D.

Paul and Betty Cinquegrana established this professorship through an estate gift to support the work of David Zee, M.D. or his successors, relating to research in the area of vestibular neurology.

Elias A. Zerhouni, M.D. Professorship [2020]: Hanzhang Lu, Ph.D.

The combination of the two endowments are designated to support research in the Russell H. Morgan Department of Radiology and Radiological Sciences.

Office of Medical Student Affairs

The principal objective of the Office of Medical Student Affairs is to serve the needs of the medical students in the many aspects of life in the School of Medicine. A student who has a question about the experience here and who is uncertain as to an appropriate resource for an answer should check with the office. Any medical student needing assistance in adapting to this environment, or advice about personal or professional matters, should visit the Associate or Assistant Deans for Medical Student Affairs. The range of issues that may be addressed is broad, and additional resources will be found when needed.

The Office of Medical Student Affairs plays a major role in the application process for research experiences, extramural rotations, additional courses of study, and residency positions. The office also assists in arrangements for special funding of student projects and works as a liaison with the Johns Hopkins Medical Student Senate and other student groups and services. Notices containing new or more current information on a variety of topics are sent to each student at frequent intervals.

Scholarships

Recognizing the pressing need for financial assistance to students in the School of Medicine, many individuals and organizations have established funds for this purpose. Over the years many students now prominent in the field of medicine have been aided by one or another of these scholarship funds. In each instance the student is informed of the source of this scholarship aid.

Martin D. Abeloff, M.D. Scholarship Fund Established in 2018 by Mrs. Diane Abeloff in honor of her late husband Martin D. Abeloff, M.D.,, Med '66, Mrs. Abeloff earned a Master of Arts in 1967 in the Johns Hopkins Art as Applied to Medicine program and served as a member of the Department of Medicine faculty in 1969. She is devoted to Hopkins and to the Baltimore community.

Vivian B. Allen Scholarship Fund Mrs. Vivian B. Allen (Mrs. Beaumont Allen) established an endowment fund in 1955 to provide tuition aid to medical students with financial need.

Warde B. Allan Fund Established in 1968 by an anonymous gift to honor Warde B. Allan, M.D. for his eminent record at the School of Medicine and among his private patients. The fund is perpetuated by gifts from his family.

Blanche P. Alter, M.D., M.P.H., Endowed Scholarship Fund Created in 2017 by Dr. Alter, Med '67 . Dr. Alter completed her residency in Pediatrics at Johns Hopkins. She created this scholarship in honor of her 50th Reunion, to support merit-based financial aid of non-USA resident medical students.

Alumni Class Scholarships Through the auspices of the Medical Annual Fund, alumni support medical students through class scholarship funds.

Hodge Amemiya Scholarship The Hodge Amemiya Scholarship was set up with a gift from Mr. Hodge Amemiya as a permanent endowment to provide financial assistance to a medical student with preference given, if possible, to those who pursue a career in otolaryngology.

American Medical Association Education and Research Foundation (A.M.A.-E.R.F.) Scholarships The A.M.A.-E.R.F. annually makes grants to medical schools, which at the Johns Hopkins University School of Medicine have been used to support student low interest loans.

Marcia Anderson Memorial Fund An endowed fund established in 1989 by the husband, R. David Anderson, M.D., Class of 1990 and her family in memory of Marcia Anderson. The income is to provide scholarships to students with special needs.

E. Cowles Andrus Fund This endowed fund was established by Mrs. E. Cowles Andrus in memory of her husband, Dr. E. Cowles Andrus, a distinguished Johns Hopkins physician, teacher, and pioneer in the treatment of cardiovascular disease. In recognition of his devotion to Johns Hopkins, this fund provides financial assistance to needy medical students, with preference given to those who are planning a career in cardiovascular medicine.

Ralph and Ellen Anthony Medical Scholarship Fund Ralph and Ellen Anthony, good friends of the School of Medicine, established the Anthony Medical Scholarship Fund in January of 1984 for the purpose of providing scholarship aid to financially needy students in the School of Medicine.

Antoniades Family Scholarship Fund This scholarship was created by Spiro Antoniades, M.D., Med '92 and reflects his desire to pay forward the scholarship he received at the School of Medicine. Dr. Antoniades is a board-certified orthopedic surgeon specializing in spine surgery.

Richard Westcott Appleton Scholarship Fund An endowment fund was established in 1973 in honor of Dr. Richard Westcott Appleton, the income of which is to be awarded to “a medical student of moral worth and intellectual promise.”

Samuel Phillips Asper, M.D. Scholarship Fund Established to honor Dr. Asper, who was a graduate of the School of Medicine (M40) and a renowned Hopkins educator and physician. Preference given to students who intend to pursue a clinical or teaching career in an overseas country.

Dr. Samuel P. Asper and Morris L. Diamond Scholarship Fund Endowed in 2021 through a bequest by Sara Sacks Wegad, this scholarship honors the relationship of Dr. Asper with his patients, including Sara and her brother, Morris. The fund will be used for medical students with demonstrated financial need. Dr. Asper, Med '40, was a renown Hopkins educator and physician. Sara died in 2019 at the age of 99. Marion Diamond is her niece.

Dr. and Mrs. Fred B. Aurin Scholarship Fund Established in 1998 by Fred B. Aurin, M.D. and his wife, this fund will provide scholarship support for medical students, with preference to those from the University of Oklahoma or Texas.

Charles R. Austrian Fund for Medical Education An endowment fund was established in 1956 by friends and colleagues of the late Dr. Austrian, with income allocated to medical education and training of young physicians.

Robert L. Avery, M.D. Endowed Scholarship Fund This endowment fund was established in 2003 by Robert L. Avery, M.D., Med '86, to provide financial assistance to medical students.

Stewart W. Bainum, Sr. Memorial Scholarship Fund This scholarship was established in 2014 by the Bainum family in memory of Stewart Bainum Sr., creator of Manor Care, Inc, and Choice Hotels. This fund will be used to support medical students from diverse backgrounds.

David Graham Baird and Mildred Batchelder Baird Memorial Scholarship Fund The endowed fund was established by the Winfield Baird Foundation to perpetuate the memories of David and Mildred Baird. The income from this fund is to be used to support the needs of students in the School of Medicine.

Stuart B. Baker, M.D., Endowed Scholarship Fund This scholarship was created by Stuart B. Baker, M.D., Med '74, during the 125th anniversary of the School of Medicine.

Frances Ward Banks Memorial Scholarship Fund The Frances Ward Banks Memorial Fund was established by Elizabeth B. Banks in 1992 in memory of her mother. The income from this fund is to be used to support meritorious students in the School of Medicine.

Dr. John W. Barnaby Scholarship Fund This fund was established in 1997 through the estate of Dr. John Barnaby to provide scholarships to deserving medical students.

Jeremiah A. Barondess Scholarship Fund This fund was established in 1999 by Jeremiah A. Barondess, M.D., Med '49, in honor of his 50th graduation anniversary from the School of Medicine. Recipients should be M.D. candidates who also pursue a degree in the history of medicine.

Jennie Lee Batson, M.D., Memorial Scholarship Fund This fund was established in 1999 by members of the class of 1984 upon their 15th Reunion. Dr. Batson was a member of the class of 1984 who died of cancer. The fund provides assistance to needy students.

Dudley Beaumont Memorial Scholarship In 1945, the Trustees of The Louis D. Beaumont Trust contributed to the Johns Hopkins Hospital a fund in memory of a son, Dudley. The Hospital makes an annual contribution from this fund to the School of Medicine for scholarship support.

Thomas Allen Beetham and Ida Covert Beetham Memorial Scholarship Fund The Thomas Allen Beetham and Ida Covert Beetham Memorial Scholarship Fund was established in 1982 by Miss Martha E. Beetham to perpetuate the memories of Thomas and Ida Beetham. Miss Beetham specifically requested that the monies in this endowment fund be used for supporting the scholarship needs of students in the School of Medicine.

Elston L. Belknap Family Scholarship Fund The Elston L. Belknap Family Scholarship was established in July of 1981 by a bequest from Dr. Elston L. Belknap, a graduate of the School of Medicine in the Class of 1923. Its purpose is to provide assistance to deserving students in the School of Medicine, either in the form of loans or as scholarship aid.

Fredericka Berger Benton, M.D. Memorial Scholarship Fund Established in 1995 by John J. Benton, M.D., in memory of his wife. Both were graduates of the Class of 1945. This fund is to be used to provide scholarship aid to medical students with demonstrated financial need.

Barnett Berman, M.D. Scholarship Fund Established in 1999 anonymously by a former student, in recognition of Dr. Berman's long-time service and commitment to Johns Hopkins. Dr. Berman was an associate professor of medicine at Hopkins.

Laura L. & Kenneth I. Berns, M.D., Ph.D., Scholarship Fund Kenneth I. Berns, M.D., Ph.D., A&S '64, Med '66, and his wife, Laura L. Berns, A&S '63 (M.A), established this scholarship in 1999 in honor of his 35th reunion and to recognize his devotion to medicine and his lifelong affiliation with the Johns Hopkins School of Medicine.

John M. Berry, M.D., Scholarship Fund Create in 2005 through the estate of Mrs. Martha Brown Berry to support medical students in memory of her husband, John M. Berry, M.D., Class of 1901.

Laurence H. and Ida Lea Blackburn Endowed Scholarship for Medical Education Established in 2000 by Laurence H. Blackburn, Jr., M.D., and his wife, Rose, in honor of his parents. Dr. Blackburn, Jr. is a 1955 School of Medicine graduate.

Dr. Alfred Blalock Scholarship Fund This scholarship, established in 1966 by Dr. and Mrs. Thomas Harrold, commemorates the great service to human kind and the many contributions of one of Johns Hopkins' most distinguished surgeons, Alfred Blalock, M.D., who developed the blue baby operation designed to correct congenital abnormalities of the heart.

Joseph N. and Elisa Bongiovanni Medical Student Aid Fund This endowed fund was established in 1987 by the estate of Dr. Alfred M. Bongiovanni in honor of his parents. Dr. Bongiovanni was a member of the faculty in the Department of Pediatrics from 1952 to 1955. The income from the fund is to provide financial aid to needy students in the School of Medicine.

Luna Taylor Bradshaw & James S. Taylor, M.D., Scholarship Fund Established in 1997 by the Luna Taylor Bradshaw Trust through the estate of Miss Taylors brother, James S. Taylor, Med 28, in recognition of the tuition assistance Dr. Taylor received in medical school.

The Roslyn and Martin Brecker Scholarship Fund This scholarship was created by a gift from Dahna Brecker-Freidus, M.D. Med '90, and her husband Harris Freidus, in memory of her parents. The fund will provide a student the means to pursue their medical education and afford them the opportunity to practice in the field for which they have a passion. Dr. Brecker-Freidus's goal is that, in the future, students will have the opportunity to earn a medical degree from Johns Hopkins free of debt.

Samuel H. Brethwaite, M.D. Scholarship Fund Dr. Brethwaite was a member of the Class of 1935. The fund was established by his estate in 1998.

William and Wendyce Brody Fund This fund was established in 1992 to fund medical students pursuing a degree in one of the engineering disciplines. Dr. Brody, who became president of Johns Hopkins in 1996, was director of radiology from 1987 to 1994 with faculty appointments in the School of Medicine and the School of Engineering.

Drs. Beth and Warren Bromberg Scholarship Fund Established in 2012, the Drs. Beth and Warren Bromberg Scholarship Fund will provide financial aid to medical students. Both Drs. Bromberg are members of the Class of 1985. This scholarship was created in memory of Dr. Henry Seidel.

Dr. Patrick and Mrs. Judith Brookhouser Scholarship Fund Established in 1999 by Dr. & Mrs. Brookhouser to provide scholarships to needy medical students. Dr. Brookhouser was a member of the class of 1966.

Arnold S. Broudy, M.D., & Regina H. Broudy Scholarship Fund Established in 2001 by Arnold S. Broudy, Med '71, and his wife Regina Broudy, reflecting their devotion to medical excellence and lifelong affiliation with the Johns Hopkins School of Medicine.

Grafton Rayner Browne and Edna Spriggs Browne Scholarship Fund Dr. Grafton Brown died in 1973, leaving a Trust to provide scholarships for Hopkins medical students. Dr. Browne opened the city's first black-owned health clinic in East Baltimore, and dispensed medical care for 50 cents a visit until his death in 1973. He was a member of the Baltimore Chirurgical Society, the Monumental City Medical Society, and the American Medical Society. Dr. and Mrs. Browne enjoyed a long affiliation with Johns Hopkins.

L. Michael and Elizabeth M. Brunt Endowed Scholarship Fund This scholarship was established in 2013 by L. Michael Brunt, M.D. and Elizabeth M. Brunt, M.D. Dr. Michael Brunt is an alumnus of the Class of 1980. Preference to students from the states of Mississippi or Southeastern Missouri.

Art Buchwald Scholarship Fund Established by Mr. Art Buchwald in 1989 in honor of the Centennial of Johns Hopkins Medicine. The income from this fund will provide scholarships for students in the School of Medicine who demonstrate financial need.

Lisa S. Bunin, M.D., Endowed Scholarship Fund This scholarship was created by Lisa S. Bunin, M.D., Med '84, in honor of her 35th Reunion from the School of Medicine in 2018. Dr. Bunin is a board-certified ophthalmologist and oculoplastic surgeon in private practice.

Alden H. and Mary K. Burkholder Scholarship in Medical Education This fund was established in 1996 by Dr. and Mrs. John A. Burkholder in honor of his parents to provide scholarships for qualified medical students. John received his medical degree at Johns Hopkins in 1966, and his brother, Paul, in 1959.

The David P. Byeff and Stephen A. Byeff Scholarship This scholarship was endowed in 2018 by Dr. and Mrs. Peter D. Byeff (Med '74) in honor of their sons, David P. Byeff, J.D. and Stephen A. Byeff, M.A. Dr. Byeff is a private practice oncologist in Connecticut.

The Gail and Peter D. Byeff, M.D. Scholarship Established in 2006 by Dr. and Mrs. Peter Byeff. Dr. Byeff, Med '74, is an active leader and serves on the Hopkins Alumni Council. He is a private practice oncologist in Connecticut.

Douglas G. Carroll, Jr. Student Aid Fund Established in 1976 by Douglas G. Carroll, Jr., M.D., Med '42,to provide financial aid to deserving students in the School of Medicine.

David J. Carver Scholarship Fund An endowed scholarship was established in 1957 by Dr. David J. Carver for students in the School of Medicine. Dr. Carver earned a Ph.D. at the School of Arts and Sciences in 1919. Chinese students are to have preference insofar as there may be qualified applicants; second preference is for students of other Asian nationalities; third preference is for American students.

Centennial Scholarship Jeff Altman, a stand-up comic who resides in California, provided the seed money for this scholarship when he donated the proceeds of a performance at Johns Hopkins back to the institution.

Jerry and Ruth Chang Scholarship Fund Established in 2003 by Helena Chang Chui, M.D., Med '77, in honor of her parents, their accomplishments and their international work in pursuit of peace, in the hope that future generations of physicians will share a global vision that advances peace and health to the many countries of the world

Dean Alan M. Chesney and Dean Thomas B. Turner Scholarship Fund Friends and admirers of Dr. Chesney, Med '12, dean of the School of Medicine from 1929 to 1953, and Dr. Turner, dean of the School of Medicine from 1957 to 1968, established this scholarship in 1975 in their honor. Awards are to be used for scholarships for deserving medical students.

Chew Family Endowed Scholarship Fund Dr. Paul Chew (Med'77, KSAS '73) and his wife, Linda, were the first to take advantage of the new scholarship initiative to mark the Johns Hopkins School of Medicine's 125th anniversary. Dr. Chew held various roles at Johns Hopkins until 1992 culminating with his being named director of the pacemaker clinic.

Clark Foundation Scholarship Fund This scholarship was established in 1983 by the Clark Foundation of New York City.

Lansdale G. and Gladys B. Clagett Scholarship and Loan Fund This fund was created to provide need-based financial aid to medical students.

Class of 1915 Memorial Fund A fund established through gifts and bequests from and as a tribute to the Class of 1915 for the purpose of awarding scholarship aid to a deserving student or students at the Johns Hopkins University School of Medicine.

Rosenfeld, and his sister, Carolyn Rosenfeld, is to be used to provide students residing in the state of Maryland with scholarship support.

Adam T. Ross, M.D., Memorial Scholarship Fund This scholarship was created by the Class of 1997 in honor of their 15th School of Medicine Reunion and in memory of their classmate, Adam T. Ross, M.D.

Paul B. Rothman, M.D. and Frances J. Meyer, M.D. Merit Scholarship Fund The fund was created in 2017 to recruit and retain talented medical students from diverse backgrounds. Dr. Rothman has served as the Frances Watt Baker, M.D. and Lenox D. Baker, Jr., M.D. Dean of the Medical Faculty since 2012 and reducing student debt has been a main priority of his deanship. Dr. Meyer is an assistant professor of medicine in Gastroenterology at Johns Hopkins Medicine.

Barbara and John Runyan, M.D., Scholarship Fund In gratitude to Johns Hopkins and to ensure that future generations of deserving medical students can attend the alma mater he holds dear, Dr. Runyan, Med '47, and his wife established this scholarship in 2003 through their estate plans.

Stephen J. Ryan, M.D., Fund Stephen J. Ryan, Jr., Med '65, and the W. M. Keck Foundation established this fund in 2001 to commemorate his 35th class reunion.

Florence Rena Sabin Scholarship Fund The Johns Hopkins Women's Medical Alumnae Association, Incorporated established this fund in 1959 in memory of an eminent graduate of the School of Medicine, Class of 1900. The income is available for scholarships for deserving women medical students of academic distinction and promise, preferably a student entering the first year.

Daniel G. Sapir Scholarship Fund Daniel G. Sapir, M.D., Med '60 was a nephrologist, internist and medical educator whose medical career spanned nearly 40 years. In 2002, friends and colleagues of Dr. Sapir began a campaign to raise funds to establish the scholarship. Dr. Sapir had been diagnosed with a terminal illness, and the goal was to raise the funds to honor and to thank him for his extraordinary support, of themselves and their families, over such a long time, and to present it to him in his lifetime. He died in July 2002.

Arun B. Sapre, M.D. Memorial Scholarship Fund An endowed fund established in 1996 by Mrs. Arun B. Sapre, family, friends, and colleagues of Dr. Arun B. Sapre. The income is to provide scholarship assistance to needy medical students in the School of Medicine.

Michael F. Saviano Scholarship Fund Established in 2004 by the estate of Michael F. Saviano. After serving as a Captain in the United States Air Force Medical Corps, Dr. Saviano completed his Otolaryngology training at Hopkins and then started his own practice in San Francisco in 1967.

Morris Schapiro Scholarship Fund An endowment was established by the Morris Schapiro and Family Foundation in February, 1954, to aid needy, promising students. This gift was in commemoration of Mr. Morris Schapiro's seventieth birthday.

Lisa Dunkle Scheffler, M.D., Endowed Fund Established in 2016 by Lisa Dunkle Scheffler, M.D., Med '72, in appreciation for the medical education she received at Johns Hopkins.

Elizabeth Schmiedicke Schiebel Scholarship Fund The Elizabeth Schmiedicke Schiebel Scholarship Fund was established in 1991 with a gift from H. Max Schiebel, Med '33, in memory of his mother. This fund will provide financial support to medical students.

Oscar B. Schier Fund for Medical Student Aid This endowment was established with a gift from the estate of Ida F. Schier in memory of her brother, a Baltimore dairyman and national authority on the handling of milk. The income from this fund provides scholarship aid for financially needy medical students.

Ottilie Schillig Scholarship Fund The monies for the Schillig Scholarship Fund were dedicated during her lifetime by Ottilie Schillig. She asked that this fund be used to provide scholarships for deserving young students and to assist them in obtaining an education as doctors of medicine.

Robert E. Schmieg, Jr., M.D., Memorial Fund The Robert E. Schmieg, Jr., M.D. Memorial Fund was established in 2009 in memory of Robert E. Schmieg, Jr., M.D. Class of 1988, by members of the Class of 1988.

School of Medicine Alumni Scholarship Fund Income from an endowment provided by graduates of the School.

School of Medicine Scholarship Fund By action of the Board of Trustees of the Johns Hopkins University, a capital sum of $400,000 has been set aside, the income from which is to provide financial assistance to needy and deserving students.

Henry M. Seidel, M.D., Scholarship Fund was established by the Class of 1984 and endowed by gifts from the Classes of 1978-1990 to honor Dr. Henry M. Seidel, Associate Dean for Student Affairs. An alumnus of the Class of 1946, Dr. Seidel is recognized for his outstanding service to the students in their career development. The fund will provide scholarships to needy students in the School of Medicine.

Samuel Selinger, M.D. '69 & Rosemary Selinger Endowed Scholarship Fund Dr. Selinger, Med '69, created this scholarship in 2019. For nearly 35 years, Dr. Selinger was a cardiovascular surgeon in Spokane, WA, and now serves that community as an activist and volunteer. Dr. Selinger was Medical Director and Founder of Spokane County Medical Society's Project Access, a program which provides free or low-cost medical care to the uninsured.

Judy and Sam Shaker, M.D., Scholarship Fund Dr. Issam J. (Sam) Shaker, KSAS '64, Med '67, and his wife Judy created this scholarship in 2007 in honor of his 40th reunion from the School of Medicine.

Rosemary Vincent Shaw Scholarship Fund Endowed in 2016 by Dr. Marguerite Shepard to honor her aunt, Rosemary Vincent Shaw. Rosemary was a high school librarian in the New York City public school system and was always concerned for the poor and underserved. She left a life insurance policy to Dr. Shepard which covered the expense of medical school. Dr. Shepard earned her medical degree at Hopkins in 1963, and completed her residency at JHH.

Ezra S. Shaya Fund An endowed fund established by Dr. Ezra S. Shaya, Class of 1954. The income is to provide scholarships to needy medical students.

Jack H. Silveira, M.D., Scholarship Dr. Jack Silviera is a graduate of the School of Medicine, Class of 1957. He created this scholarship in 2009 to commemorate his 50th reunion. Dr. Silveira specializes in Obstetrics and Gynecology.

Dr. Barnard E. Simon and Bitten H. Simon, R.N. Scholarship Fund Established in 2000 through the estate of Dr. Bernard E. Simon to provide scholarships for medical students. Dr. Simon, Class of 1937, was a plastic surgeon whose work with the Hiroshima Maidens, after World War II, won him international acclaim.

J. Morris Slemons Scholarship Fund Established by a bequest from Anne G. Slemons to be used for scholarships for medical students.

Herbert Sloan, M.D. and Doris Edwards Sloan Scholarship for Medical Education This scholarship fund was established in 2003. Income from this fund will provide financial support for deserving medical students.

Elizabeth A. Small Endowment Fund The fund was established by Elizabeth Anne Small, M.D., Med '77, to provide scholarship support for women who are interested in dermatology.

Wladimir Solowiej, M.D. Scholarship Fund This endowment fund was established with a gift from the estate of Dr. Wladimir Solowiej, a Baltimore physician who emigrated from Poland. Although he was never on the staff, Dr. Solowiej nevertheless had high regard for Johns Hopkins. The income from this fund provides two scholarships, one in his name and one in the name of his sister, Augenia Zebrowska.

Alberta Speaks Scholarship Fund Established in 1986 as a bequest from the estate of Alberta Speaks to provide scholarship assistance for needy black students.

Rowena Spencer, M.D. Scholarship Fund This scholarship was created through the estate of Rowena Spencer, M.D. SOM Class of 1947, to provide a scholarship for a medical student to attend Johns Hopkins University School of Medicine, as was afforded to her.

Lisa Marie Sprague Memorial Scholarship Established in 1998 by Arthur Sprague, Class of 1960, and Mrs. Sprague in memory of their daughter.

Paul Luther Stine Memorial Scholarship Fund Established in 1996 from the Estate of Mildred C. Stine, to provide scholarship support to students in the School of Medicine, preference to be given to otherwise eligible applicants who are graduates of Brunswick High School, Frederick County, Maryland, residents of Frederick County, Maryland, or residents of the State of Maryland.

Barry and Evelyn Strauch Scholarship Fund Barry S. Strauch, A&S 1962, Med. 1965, and his wife Evelyn M Strauch established this fund to commemorate his 35th class reunion in 2001. Their gift reflects the couple's devotion to medical excellence and their lifelong affiliation with the Johns Hopkins University School of Medicine. The income is to be used to provide financial assistance to worthy students in the School of Medicine.

Josephine S. Sutland Scholarship for Medical Education Dr. Lawrence C. Pakula and his wife, Sheila Sutland Pakula, established this fund in 1998 in honor of her mother, Mrs. Josephine Sutland.

J.T. Tai & Co. Foundation Scholarship J.T. Tai & Company Foundation is a Chinese non-profit foundation in New York committed to the support of medical students and health care. The foundation was established in 1983 by the late Jun Tsei Tai, the owner of a real estate management company and internationally renowned art dealer in Asian art. Since 1997, it has provided yearly grants to be used for financial aid for students in the School of Medicine

Helen B. Taussig Fund Established in 1986 by the Life Income Gift Annuity of Dr. Helen B. Taussig. The income of this fund is to provide scholarships to needy medical students.

Owsei Temkin Scholarship Fund In 1993 Drs. Barbara and Martin Wasserman, both members of the Class of 1968, established this fund in honor of Dr. Owsei Temkin. This fund provides financial assistance to needy medical students, with preference given to those who have a special interest in the humanities.

Vivien Thomas Fund For Diversity The Vivien Thomas Fund was established in 2004 to increase diversity at The Johns Hopkins University School of Medicine, thus honoring the memory of a heart surgery pioneer by removing for others the economic and racial barriers that often stood in his way

John Thompson Family Endowed Scholarship Fund Established in 2015 to celebrate the three generations of John Thompson's who received medical degrees from SOM. The Thompson's legacy is a long history of applying the knowledge that they gained at the Johns Hopkins University School of Medicine.

Traci L. Thompson, M.D. and Billy M. Thompson, Jr. Scholarship Fund This scholarship was created by Traci Thompson Ferguson, M.D., Med '00, in honor and in memory of her brother, Billy M. Thompson. Dr. Thompson trained in the Osler House Staff. She is now Chief Medical Director at WellCare Health Plans, Inc. in FL.

Jefferson D. Upshaw, Jr., M.D., Endowed Scholarship The Jefferson D. Upshaw, Jr., M.D. Endowed Scholarship Fund was set up through a bequest from Dr. Upshaw, School of Medicine Class of 1954. Behind Dr. Upshaw's gift was a love for his medical school that no amount of money could reflect.

Vander Salm Family Scholarship Fund The Johns Hopkins University gratefully acknowledges the receipt of a gift from Thomas J. Vander Salm, M.D. to establish a permanent named endowed scholarship fund. Dr. Vander Salm graduated from the School of Medicine in 1966. The fund will provide assistance to medical students.

Fernando Vescia, M.D. Scholarship Fund Dr. Fernando G. Vescia, Med '55, KSAS, '51 was born in Egypt to Italian parents, only leaving in 1948 to study medicine. Dr. Vescia was a gastroenterologist in Palo Alto, CA for 32 years. He also taught medical history at Stanford University.

Roger L., M.D. and Mary J. von Heimburg Scholarship Fund Established in 2000. Dr. von Heimburg a graduate of the School of Medicine in 1955, passed away in September 1999. He lived for a long time in Green Bay, Wisconsin and asked that preference be given to students from the Midwest.

William D., M.D., and Selma S. Voorhees Scholarship for Medical Education Established in 2000. Mrs. Selma Voorhees opened the fund in honor of her husband, William, a graduate of the medical class of 1945.

Elmer Wakefield, M.D. Scholarship Fund This fund was established in 1998 by the estate of Dr. Wakefield to provide scholarships for students in need of additional funds to continue their education.

Dr. Arthur Nathan Wang Memorial Scholarship Fund This fund was created in 1988 in honor and in memory of Dr. Arthur Nathan Wang, an alumnus of the School of Medicine. Dr. Wang's promising career as a neurosurgeon was tragically ended early in his life by a fatal accident. The income from the fund each year will provide a scholarship to a needy and deserving student who intends to pursue a career in clinical neurosurgery. In establishing the fund, the family and friends of Dr. Wang hope to help others to complete the contribution to medicine and society begun by him.

Lillian W. and David N. Warfield Scholarship Fund This fund was endowed in December, 2014 through a bequest from Lillian W. Warfield, wife of David N. Warfield. Funds to be used to assist medical students who demonstrate financial need.

James Johnston Waring Memorial Scholarship Fund Through a generous gift from Mrs. James J. Waring, an endowment in memory of her husband has been established in the School of Medicine, the income from which is to be used as a scholarship fund for needy and worthy students. Although a member of the class of 1908, Dr. Waring subsequently received his degree from another school, having found it necessary to withdraw from the Medical School at the end of his junior year. Nevertheless, Dr. Waring was active in Hopkins' alumni affairs until his death in June, 1962.

Frederick and Gladys C. Warring Memorial Scholarship This fund was established in 1996 from the Gladys C. Warring estate to provide scholarships for students in the School of Medicine.

Levi Watkins, Jr., M.D., Endowed Scholarship Fund Levi Watkins was Johns Hopkins' first African American chief resident in cardiac surgery and the cardiac surgeon who performed the world's first implantation of an automatic heart defibrillator in a patient in 1980. This scholarship was established in 2009 to recognize Dr. Watkins' groundbreaking accomplishments, to honor his vision of bringing underrepresented minority medical students to Johns Hopkins, and to provide essential financial assistance.

David R. Weakley, M.D. Scholarship Fund An endowment fund established in 1995 by Dr. David R. Weakley, Med '75, in recognition of his 35th Reunion to provide scholarship support to medical students in the School of Medicine.

Drs. A. Peter and Yvonne Weiss Scholarship Fund in Medical Education Drs. A. Peter Weiss, Med '85, and his wife, Dr. Yvonne Weiss, a former intern in pediatrics at Hopkins, established this fund in 2004 to provide financial assistance to medical students at the School of Medicine.

Margaret Morris Weiss, M.D., and Robert A. Weiss, M.D. Endowed Scholarship Fund This fund was established by Drs. Margaret and Robert Weiss, both members of the Class of 1978, to honor their devotion to medicine and lifetime affiliation with the School of Medicine. Income from this fund will provide financial assistance to medical students.

Clarence S. Weldon, M.D., Endowed Scholarship Fund This fund was established in 2010 in memory of Clarence S. Weldon, M.D., School of Medicine Class of 1955, through gifts made from Ms. Ann Doyle and Ms. Susan Erlinger, daughters of Dr. Weldon, and other colleagues and friends. Dr. Weldon passed away in 2006.

Frances Turner White Fund This fund, established with a gift from the estate of Frances Turner White, provides scholarships for needy and deserving medical students.

Robert T. White, M.D., Scholarship Fund This fund was established in 2004 by Robert T. White, A&S 1947, Med 1952, via the Greater Alliance Foundation, Inc. Dr. White completed his obstetrical residency and gynecological training at Hopkins.

Drs. Shelby Wilkes & Jettie Burnett Scholarship Fund This scholarship was established in 2010 by Drs. Shelby Wilkes and Jettie Burnett, classmates in the School of Medicine, Class of 1975. Dr. Wilkes has had a distinguished career in Ophthalmology in Atlanta, GA, and has written and published numerous scientific articles in major ophthalmologic journals. Dr. Burnett is also an ophthalmologist in Atlanta specializing in diseases and surgery of the cornea, including corneal transplants.

Dr. Raymond Wing Memorial Scholarship Fund This fund was established in 1981 by Mrs. Raymond Wing to honor the memory of her husband, a member of the School of Medicine Class of 1927. It will provide support for students in their first year of study at the School of Medicine.

Winslow Foundation Scholarship Fund Gifts have been received annually since 1974 to fund scholarships for medical students, with preference for residents of Maryland, the District of Columbia, or North Carolina.

Charles Marion Wolfe Scholarship Fund The Fund was established in 1997 through the estate of Doris L. Wolfe in memory of her husband, Charles Marion Wolfe, to be used for a worthy medical student.

Ruth P. Young and Joseph M. Young, M.D. Endowed Scholarship Fund Established in 2004 by Joseph M. Young, Med 1945. After receiving his degree from Hopkins, Dr. Young completed his postdoctoral studies in surgery. He made his career at the Army Veteran's Administration Hospital in Memphis where he served as Chief of Laboratory Services and as a clinical professor of pathology at the University of Tennessee at Memphis until his retirement in 1986..

Evers P. and Adeline E. Zepp Scholarship Fund A fund was established as a bequest from the estate of Adeline E. Zepp to be used in support of the education of medical students.

Harold E. C. Zheutlin Scholarship This fund was created in 1998 by family, friends, and colleagues in memory of Dr. Zheutlin, A&S '38, Med '42, assistant professor of dermatology at Johns Hopkins.

Lionel J. Zheutlin, M.D. Scholarship Fund This fund was established in 1998 in memory of Dr. Zheutlin, a graduate of the Class of 1947. It provides assistance to needy students with preference to those planning careers in pediatrics.

Student Research Scholarships and Awards

Most students at the School of Medicine engage in research projects at some time during their period of residence. The results of original research are often published in leading scientific journals and presented at national meetings of scientific societies. Major contributions have been made by medical students participating in research programs at Johns Hopkins and other institutions. Below are a list of research opportunities, awards, and scholarships offered through the School of Medicine.

Dean's Year of Research - The Dean's Year of Research provides an opportunity for 10 candidates pursuing the M.D. degree at Johns Hopkins to spend one year in an intensive research experience with a faculty member within the School of Medicine. Medical students participating in the program may elect to interrupt their regular medical curriculum to take an additional year devoted to research, thereby delaying their date of graduation by one year. Under this program, you will be placed under the Advanced Studies Program Student status and paid a salary equal to that of a first-year graduate student. The cost of the salary will be shared equally between the Dean's Office and the department in which the student is conducting their research. The cost of your JHU dental insurance premium will be paid by the Dean's Office during your Dean's Year of Research. If you participate in the student health plan, the Dean's Office will also pay your individual health insurance and UHS service fee while you participate in this program. If you are not enrolled in the student health plan, the Dean's Office will cover your plan up to the cost of the student health plan. For more information, please contact the Office of Medical Student Affairs.

Dr. Harold Lamport Research Fund - Mrs. Golden S. Lamport established the Dr. Harold Lamport Research Fund in honor of her husband, a Distinguished Service Professor of Physiology and Biophysics. A renowned investigator and educator, Dr. Lamport contributed to research in physiology, biophysics, and circulation. He was first recognized internationally when he published a series of incisive studies of hemodynamics, including the first comprehensive analysis of the renal afferent and efferent arteriolar resistances in relation to kidney function in health and disease. The Lamport Fund will support the effort of medical students interested in research in the basic science areas of medicine. The Medical Student Research Committee will determine the winner after the annual Medical Student Research Day takes place. The work must be original and must have been performed during a period in which the student was a matriculated student in the medical school pursuing the regular curriculum.

W. Barry Wood Student Research Fund - The W. Barry Wood Student Research Fund was established in 1971 by the family and friends of Dr. W. Barry Wood, Jr. Dr. Wood had a long association with the School of Medicine as student, house officer, Vice President of the University in charge of medical affairs, and Director of the Department of Microbiology. The fund commemorates Dr. Wood's deep commitment to medical research and teaching. The Medical Student Research Committee will determine the winner after the annual Medical Student Research Day takes place.

Brantigan Clinical Research Fund - The fund was established in 1998 by a gift from John W. Brantigan, M.D. The purpose of the fund is to provide financial support for students to conduct research and/or present their findings at professional meetings. Please contact the Office of Medical Student Affairs for more details.

Henry Strong Denison Fund for Medical Research - By agreement dated September 23, 1937, the Johns Hopkins University received from the Henry Strong Denison Medical Foundation, Incorporated, an endowment fund of $100,000, to be known as The Henry Strong Denison Fund for Medical Research in memory of Henry Strong Denison, M.D., 1908. While the gift is made broadly for the support of medical research, the income will be used for the specific purpose of aiding in the training for research of young people deemed by the medical faculty to be especially gifted for a career in medical investigation. To fulfill the provisions of this gift, the income each year may be allocated for awards, scholarships, and stipends for medical students in the School of Medicine. For more information, please contact the Office of Medical Student Affairs.

William L. Straus, Jr., Scholar in Anatomy Award - This fund was established in 1982 by an alumnus to honor Dr. Straus, former associate professor of anatomy and Acting Director of the Department of Anatomy. The donor specified that the award be made to a student with strong interests in basic research, people, and the history of medicine at the Johns Hopkins University School of Medicine and Hospital.

Franklin Paine Mall Prize in Anatomy - The income from an endowment account established by Dr. Miley B. Wesson, an alumnus of the School, is used as an award for a deserving student particularly interested in anatomy. The grant is given in the name of Franklin Paine Mall, the first professor of anatomy in the School of Medicine, as a token of appreciation. Selection is made by the First Year Committee on Student Promotions.

Alan P. Trimakas Award in Cardiovascular Research - This award was established by contributions from the Class of 1979 to honor the memory of their classmate who died on January 15, 1979. In keeping with Dr. Trimakas' intentions to pursue a career in academic cardiology, for which he had shown exceptional ability, this award will be given to a medical student who has demonstrated unusual promise in the area of cardiovascular research. The award will be made during the third year for a student planning an extended commitment to a research project to be completed during the final year of the curriculum. The recipient of this award will be selected by a committee representing the Cardiovascular Division of the Department of Medicine. Applications should be admitted to the director of the division.

Helen and Harold Harrison Award for Outstanding Proficiency in Pediatrics - This award was established by the Alumni/ae of Dr. Harold Harrison's Residency Program in Pediatrics at the Francis Scott Key Medical Center. It is intended to give honor to the outstanding contributions made by the Harrison's over the many years of their tenure at the Johns Hopkins Hospital and the Francis Scott Key Medical Center, and it will, in addition, recognize each year senior students whose efforts in pediatrics have been distinguished.

Sylvan Shane Prize in Anesthesiology and Critical Care Medicine - Dr. Sylvan Shane, a member of the Department of Anesthesiology and Critical Care Medicine at Johns Hopkins from 1980 to 1984, has created an endowment to recognize an outstanding medical student making a career choice in anesthesiology. Dr. Shane's lifetime was devoted toward the search for ways to prevent pain and suffering in patients undergoing surgical procedures. His generous gift is designed to give support and encouragement to graduating medical students who are committed to the same efforts.

William R. McAlpin Research Fund - The purpose of this fund, made possible by a cash award to Dr. Jerome D. Frank from the National Mental Health Association, is to encourage research by students in the Johns Hopkins University School of Medicine and the Johns Hopkins University School of Public Health into any aspect of mental illness and mental health, but with preference given to studies relevant to clinical care, psychotherapy, or public health. Recipients will be selected by a committee composed of the Chairman of the Department of Psychiatry and Behavioral Sciences of the Johns Hopkins School of Medicine, The Chairman of the Department of Mental Hygiene of the Johns Hopkins School of Public Health or persons they designate, and Dr. Frank. To apply for a grant, the student must submit a letter to the chairman of either department stating the amount requested and the reasons for the request, with a supporting letter from a faculty member. Requests will be received and reviewed at any time. The amount of any single grant, or the total multiple grants to any one person, shall not exceed $500.

Leo Kanner Student Research Fund - The Leo Kanner Student Research Fund was established in 1982 by Mrs. June Kanner to encourage medical student research in child psychiatry. Dr. Kanner, the first professor of child psychiatry at Johns Hopkins, was division director from 1930 to 1959 and is often called the Father of Child Psychiatry. Income from the fund is used to provide a student in the School of Medicine the opportunity to participate in a summer research project with a Child Psychiatry faculty member.

Harry C. Saltzstein Prize for Medical Writing - This prize was established in 1990 through an endowment provided by the family of Dr. Saltzstein, a graduate of the Johns Hopkins University School of Medicine, Class of 1914. Dr. Saltzstein was the founder of Sinai Hospital of Detroit as well as its first Chief of Staff. He founded the Bulletin, Sinai Hospital of Detroit and ultimately became its editor. He maintained a life long interest in medical writing. His nephew, Dr. Sidney Saltzstein, graduated from the Johns Hopkins University School of Medicine in 1954. This annual prize will recognize excellence in medical writing by a student of the Johns Hopkins University School of Medicine.

Summer Research Stipends for Medical Students - Summer research stipends are awarded each year if funds are available. These stipends are awarded in the summer after a medical students first year of medical school so they may participate in a research project under the supervision of a Johns Hopkins faculty member. This stipend cannot be used to participate in research at an outside institution. For more information, please contact the Office of Medical Student Affairs.

Tuition

M.D. Candidates

Tuition rates are determined annually by the Board of Trustees. Annual tuition covers studies carried out during the entire 12-month period between enrollments (ordinarily September-August).

All M.D. candidates will be charged at the M.D. rate for a total of four years. Irrespective of the actual scheduling of the medical and graduate portions of their education, students in M.D.-Ph.D. programs will ordinarily be required to pay M.D. rate tuition for the first four years in such programs. Tuition for the remaining years will be assessed annually at the M.D. rate or at the established University Ph.D. rate, whichever is lower. Alternative schedules for payments at the M.D. rate by students in M.D.-Ph.D. programs must be approved by the Vice Dean for Education.

Students who repeat a portion of the M.D. program will be assessed tuition at the annually established rate. Tuition is prorated to period of enrollment.

There is a $25 annual fee for Advanced Studies Program status.

Graduate Students-Ph.D., M.S. and M.A. Candidates

Tuition for each 12 month period (September-August) of enrollment will be at the rate established by the University for Ph.D. candidates.

Visiting Medical Students

Visiting medical students are assessed registration fees based on the elective type, duration of elective, and LCME-accreditation status. Additional information can be found at http://www.hopkinsmedicine.org/som/students/policies/visitors.html.

Part-Time Degree Candidates

These students will be assessed tuition at the part-time rate established for the degree for which they are a candidate.

Special Students (Non-Degree Candidates)

Tuition will be assessed at the part-time rates established by the University for Ph.D. candidates.

Postdoctoral Students (Fellows)

Tuition for postdoctoral students who are not members of the Johns Hopkins Hospital house staff is $800 per annum, pro-rated in relation to period of enrollment. Tuition may be remitted as specified by the Executive Committee of the Board of Trustees.[1]

[1] The policy concerning tuition for fellows and postdoctoral students is based upon action of the Executive Committee of the Board of Trustees on January 19, 1966, as follows: "-where special circumstances do not make payment of such fees feasible, it will be remitted."

Tuition and Other Fees

Medical students matriculating in August 2022 will be charged tuition at the rate of $59,700 per year. The 2022-2023 tuition for graduate students registered in the School of Medicine is $59,700. These tuitions cover all normal charges. The tuition fee is payable in two equal installments, one at the opening of the academic year, and one at the beginning of the second half of the year. Living expenses, health insurance, an $850 annual fee for University Health Services, a $200 imaging fee for first and second year students, and a $740 matriculation fee are in addition to the tuition charge. The matriculation fee is a general University assessment and is collected once only from new students at the time of their initial enrollment as full-time students and/or as degree candidates in the University. Special schedules for payment of fees can be arranged with the Office of Financial Affairs.

Students will not be admitted to the regular courses until they have registered at the Office of the Registrar of the School of Medicine and arranged for payment of their fees for the first half of the academic year. Registration is not required for the second half, but arrangements must be made for the payment of second half tuition before students can be admitted to classes.

A late charge may be imposed in connection with all tuition and fees due to the School of Medicine as follows: Tuition, imaging, and matriculation fees are due and payable at the beginning of each term. The late charge will be 1-1/2% per month of the unpaid balance, and will be added to each unpaid account on the first of each month. For insurance and parking fees, the 1-1/2% late charge will be assessed thirty days after billing and on the monthly anniversary thereafter. When late payments result from delayed receipt of loans for which timely application has been made, the late charge may be waived by the Associate Dean for Student Affairs. All fees and charges must be paid in full in order for a student to be approved for graduation.

Young Investigators’ Day

The Young Investigators’ Day was established in 1978 to recognize student investigators who are trained at Johns Hopkins University School of Medicine and to provide them with a forum for their work. The awards are intended to recognize research undertaken by applicants while registered as students or postdoctoral fellows at the school of medicine.

The Johns Hopkins Medical and Surgical Association Awards for Postdoctoral Investigation were established in 1981 by the School of Medicine to recognize excellence in research by clinical or research fellows in the School of Medicine. These six awards are designated for clinical research, laboratory research with direct clinical relevance, and basic laboratory research. The awards are as follows:

The A. McGehee Harvey Research Award

The Helen B. Taussig Research Award

The Alfred Blalock Research Award

The W. Barry Wood, Jr. Research Award

The Albert L. Lehninger Research Award

The Daniel Nathans Research Award

The Michael A. Shanoff Research Award consisting of an honorarium and a certificate, is made annually to a candidate in the M.D., Ph.D., or M.D.-Ph.D. program in the Johns Hopkins University School of Medicine who, among all similarly eligible students, is considered to have made the most significant research contribution.

The award will be given in recognition of a substantial and sustained contribution to research, preferably undertaken over more than one elective quarter. Thoroughness and originality of research are to be primary considerations in the selection of awardees. Most of the research must have been undertaken during the candidates’ studies at the Johns Hopkins Medical Institutions. The award may be shared by two or more students who have collaborated on a research project. If the award committee finds no meaningful way to distinguish between the relative merit of the contribution and achievement of candidates who have worked on different research projects, then the award may be divided equally between such candidates. The awardee(s) will be selected by a committee comprised of members of the Basic Science and Clinical faculties.

The David Israel Macht Research Award was established in 1982 through an endowment provided by the family of Dr. Macht to commemorate the centenary of his birth. Dr. Macht was a graduate of the Johns Hopkins School of Medicine, Class of 1906 and was a member of the faculty of the Departments of Pharmacology and Medicine from 1910 to the middle 1930’s. He was a versatile and pioneering investigator and had a special interest in opiate alkaloids, the absorption of drugs, and a number of other areas.

The award is intended to recognize excellence in investigation by a student in the School of Medicine, registered in M.D., Ph.D., or combined M.D.-Ph.D programs. The award will consist of an honorarium and a certificate.

The selection of the awardee will be made by a Committee composed of Basic Science and Clinical Faculty members. The award will be awarded annually to a single individual. If, in the opinion of the Committee, no meaningful distinction between the qualities of two essays can be made, the award may be divided among not more than two individuals.

The Martin and Carol Macht Research Award was established in 1993 to recognize outstanding investigation by an M.D. or Ph.D., or M.D.-Ph.D. student in the School of Medicine. Dr. Martin B. Macht received both M.D. and Ph.D. degrees from Johns Hopkins, and was a Trustee of the University for many years. Dr. Carol Macht received M.A. and Ph.D. degrees from Johns Hopkins in the History of Art and Archeology. The award was established through an endowment gift from the Macht family.

The selection of the awardee will be made by a committee composed of basic science and clinical faculty members. The award will be awarded annually to a single individual. If, in the opinion of the Committee, no meaningful distinction between the qualities of two essays can be made, the award may be divided among not more than two individuals. The award consists of an honorarium and certificate.

The Paul Ehrlich Research Awards are made annually to candidates in the Ph.D., M.D., or Masters programs in the Johns Hopkins University School of Medicine. They are given in recognition of contributions to research undertaken during the candidate’s studies at this institution. The award consists of an honorarium and certificate.

The Alicia Showalter Reynolds Research Award was created by the School of Medicine Dean’s Office in 1997, to honor the memory of Alicia Showalter Reynolds, a Ph.D. student in the Department of Pharmacology and Molecular Sciences from 1992 until her untimely death in 1996. It is given in recognition of outstanding research by a Ph.D. candidate in the School of Medicine. The award consists of an honorarium and certificate.

The Mette Strand Research Award was established in 1998 by Dr. Strand's colleagues and friends as a tribute to Dr. Strand, a Professor of Pharmacology and Molecular Sciences. This award honors Dr. Strand's contributions to humanity, her unyielding devotion to science, and her role in training a generation of graduate students. Preference is given to a Ph.D. student. The award consists of an honorarium and certificate.

The Hans Joaquim Prochaska Research Award was established in 1998 by his mentor and friend Paul Talalay to honor the excellence that Dr. Prochaska exemplified, and the distinction he brought to the Hopkins M.D.-Ph.D. program. This award is given annually to a student in the School of Medicine who has made an outstanding discovery with preference given to an M.D.-Ph.D. candidate. The award consists of an honorarium and certificate.

The Bae Gyo Jung Research Award was established by an endowment in 2006 by friends and family in memory of Bae Gyo Jung, who was a predoctoral student in the department of Biological Chemistry. The award consists of an honorarium and certificate.

The Nuper Dinesh Thekdi Research Award was established in 2002 in memory of Nupur Dinesh Thekdi, M.D.-Ph.D. student at Johns Hopkins. The award consists of an honorarium and certificate.

The David Yue Research Award was established in 2015 in memory of Dr. David Yue, who was a Professor of Biomedical Engineering and Neuroscience. The award consists of an honorarium and certificate.

The Paul Talalay Research Award was established in 2017 to honor Dr. Paul Talalay, who was a Professor of Pharmacology and Molecular Sciences and 44 years ago started the Young Investigators' Day Program. The award consists of an honorarium and certificate.

The Physician Scientist Research Award was established in 2018 to recognize the outstanding research contributions by a Physician Scientist at Johns Hopkins School of Medicine. This award is supported by the Johns Hopkins School of Medicine Physician Scientist Training Program. The award consists of an honorarium and certificate.

The Post-baccalaureate Student Award was established in 2021 and is given to a candidate in a Post-baccalaureate program at the Johns Hopkins School of Medicine in recognition of their contributions to research.

The Claude and Barbara Migeon Research Award was established in 2022 to recognize outstanding basic research by graduate students and postdoctoral fellows. Dr. Claude Migeon (1923-2018) served as the director of pediatric endocrinology at the Johns Hopkins University School of Medicine from 1961 to 1994. His early focus on steroid metabolism established the norms of adrenal function in infancy and childhood. He also discovered the genetic cause of some endocrine disorders. Dr. Barbara Migeon is a professor emerita of genetic medicine and pediatrics who is known for pioneering work on the mechanisms and consequences of X-chromosome inactivation in females and its relevance to human disease, and as the founding director of the PhD program in Human Genetics. Both Drs. Migeon have been devoted members of many trainees throughout their careers, and with the award we honor their contributions as both scientists and mentors.

Policies

The Johns Hopkins University sets policies that apply to all students. In addition, the School of Medicine sets policies that pertain to its learners. School of Medicine policies that apply to its graduate and medical students follow.

Graduate Student Policies

School of Medicine policies that apply to graduate students can be found here (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/academics/academic-resources/policy-finder.html).

Medical Student Policies

School of Medicine policies that apply to medical students can be found here (https://www.hopkinsmedicine.org/som/students/policies/).

Graduate Programs

The School of Medicine supports a number of programs of graduate study in the biomedical sciences and related fields. These programs provide opportunities for advanced course work and research training leading to advanced degrees.

Under the direction of the University-wide Doctor of Philosophy Board, opportunities for study for the degree of Doctor of Philosophy are available in the School of Medicine in biochemistry, cellular, and molecular biology; biological chemistry; biomedical engineering; cellular and molecular medicine; cellular and molecular physiology; cross-disciplinary biomedical sciences; functional anatomy and evolution; health sciences informatics; history of science, medicine and technology; human genetics; immunology; molecular biophysics; neuroscience; pathobiology; and pharmacology and molecular sciences. A Master of Arts degree is offered in medical and biological illustration and in history of medicine. A Master of Science degree is offered in anatomy education, applied health sciences informatics, health sciences informatics, and medical physics. The requirements for the different degrees are established by the Doctor of Philosophy Board of the University, the School of Medicine's Committee on Masters and PhD Programs, program faculty, and administrators.

Degree Requirements

Requirements which must be met by all candidates:

For the Doctor of Philosophy degree:

1. A minimum of two consecutive semesters of registration as a full-time, resident graduate student.
2. A certification by a department or program committee that all departmental or committee requirements have been fulfilled.
3. A dissertation approved by at least two referees and certified by them to be a significant contribution to knowledge.
4. A Doctor of Philosophy Board Oral Examination.

Requirements for the different Masters degrees are listed with the individual programs.

Admission information and application materials may be found on the SOM Graduate Program Admissions website (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/).

Program Requirements

Requirements of the individual graduate programs may be found in the program-specific sections of the catalogue. Further information may be obtained by writing to the director of the graduate program, The Johns Hopkins University School of Medicine, Baltimore, Maryland 21205.

Programs

Anatomy Education, MS

The Johns Hopkins University School of Medicine Master of Science in Anatomy Education program is designed to give students the training they need in order to successfully compete for teaching positions in anatomy at the community college level. Because such positions often also require some instruction in physiology and/or histology, introductory courses in these disciplines are also included in the program, along with training in pedagogical techniques. The program is also appropriate for students who wish to go on to research or educational support positions in anatomy, such as anatomy lab manager or surgical research coordinator.

Admission Requirements

- Bachelor's degree from an accredited college or university
- Grade transcripts, personal statement, and two letters of recommendation
- Demonstrated proficiency in written and spoken English, for non-native speakers
- Interview with faculty (via Skype)

This program may also be appropriate for professionals in other disciplines who wish to return for specific training in anatomical education.

Tuition and Fees

A non-refundable application fee of $115 is payable by credit card at the time of application. Tuition at the Johns Hopkins School of Medicine for full-time graduate students during academic year 2022-2023 is $59,700. However, each student admitted to this program will receive a guaranteed scholarship from the School of Medicine, reducing tuition by roughly 30%. The tuition cost with scholarship for academic year 2022-2023 is **$40,000**, payable prior to entry into the program. There is also a one-time matriculation fee of $740.

Resources

For more information on graduate education at the Johns Hopkins University School of Medicine, see:
Johns Hopkins University School of Medicine Graduate Programs (https://www.hopkinsmedicine.org/som/students/graduate-programs/)

Contact Information

anatomyed@jhmi.edu, Program Coordinator

Dr. Elizabeth St. Clair (Elizabeth.StClair@jhmi.edu), Program Director

Dr. Gabriel Bever (gbever1@jhmi.edu), Assistant Program Director

Students admitted to this program are not eligible for F or J immigration sponsorship.

Coursework

All courses (except on-line courses) are held on the campus of the Johns Hopkins University School of Medicine in Baltimore. See below for contact information.

Foundations of Human Anatomy (7 weeks, 7 credits)

Intensive course taught to entering medical students and Ph.D. graduate students; includes lectures, small group activities (imaging, team-based learning, other), and full-body dissection.

Advanced Anatomical Dissection and Research (12 weeks, 5 credits)

Supervised small group cadaveric dissection focusing on more detailed understanding of specific systems and regional anatomy, anatomical variation, clinical correlations, and comparative anatomy. Includes a research project and paper.

Teaching Practicum in Anatomy (8 weeks, 3 credits)

Provides training in lecturing, small group leadership for presentation of anatomy; includes giving one lecture and assisting in labs in Summer Institute in Anatomy.

Introduction to Histology (5 weeks, 2 credits)

Introduction to basics of histology; on-line, using materials developed for medical school course in histology.

Fundamentals of Human Physiology (8 weeks, 4 credits)

Introduction to organ level human physiology, taught through the Johns Hopkins Bloomberg School of Public Health.

The following pedagogical courses are on-line and taught through the interdisciplinary

Johns Hopkins Medical Education in the Health Professions (https://education.jhu.edu/academics/masters-programs/master-of-education-in-the-health-professions/) program:

Instructional Strategies I and II (6 weeks and 1.5 credits each)

Instructional methods in small and large group teaching - team-based, interactive, and case-based; strategies to enhance critical thinking, creativity, and cooperative learning.

Ensuring Learning through Assessment and Feedback (12 weeks, 3 credits)

Design of effective assessment tools; aligning assessments with learning goals and objectives; use of feedback to monitor and evaluate learning.

Evidence-Based Teaching (12 weeks, 3 credits)

Apply evidence-based strategies and methodologies to teach in a variety of settings; assess learner needs to guide instruction; effectively integrate technology into instruction.

Applied Health Sciences Informatics, MS

Overview

The MS Applied is a 60-credit master's degree designed for individuals wanting to obtain practical competencies in biomedical informatics and data science. Using AMIA guidelines, we presume that the health sciences informatician should be capable of developing or leading innovative applications of information technology and information systems that address clinical or public health priorities.

The MS Applied requires that students undertake a 6-course "core" (18 credits total), student seminar (4 credits), electives (30 credits), and capstone (8 credits). The core courses provide a broad overview of foundational content in biomedical & public health informatics, clinical informatics, health information systems, and data science. The student seminar, taken across 4 quarters, provides a forum for students to explore current topics, learn directly from experts in the field, and develop a professional network and support structure. Electives can be chosen from relevant offerings from across the university. The program culminates with a 200-hour, student-designed, faculty-supervised capstone that provides students an opportunity to develop or apply relevant competencies within a professionally-relevant project.

The MS Applied program is offered in online and onsite formats. While the formal requirements for these offerings are the same, there are some important distinctions with regards to the intended audience, visa/citizenship requirements, course availability, and how the capstone is executed.

Online Offering

The Online MS Applied is by far the most popular. This format allows students to continue working full- or part-time while completing the degree requirements within a 36 month window.

While current employment is not a requirement of admission to the online program, most students pursuing this option are working full- or part-time within the health field. Because a Visa is <u>not</u> required for the online program, we consider applicants from all countries. Except in cases where students either live near campus or arrange to spend time in residence in or near Baltimore, students in the online program would only be able to take courses that are offered in an online format. Undertaking a capstone as an online student requires flexibility and the support of the employer.

Students applying to the online offering of this degree should be aware of additional state-specific information for online programs (http://web.jhu.edu/administration/provost/programs_services/accreditation/state_authorization/) and Title IV Gainful Employment Disclosure. (http://dhsi.med.jhmi.edu/content/gainful-employment-disclosure/)

Onsite Offering

The onsite offering of the MS Applied degree is an intensive, full-time, 12-month program of study.

Students in the Onsite MS Applied program are generally either mid-career health professionals looking to transition to an informatics leadership role within their organization *or* they are motivated and technically-capable early-career professionals or recent college graduates focused on obtaining a firm grounding in the field of health informatics. Mid-career professionals are often sponsored by their employer or the U.S. Government. Students in the onsite program can take either online courses or onsite courses. For students in the onsite offering of this program, faculty can provide more direct in-person oversight of the Capstone project.

IMPORTANT NOTES:

1. F1 Visas are not available for the Onsite MS Applied**.** F1 Visas are not required for the Online MS Applied.
2. The "core" courses for the MS Applied are *only* available online. This includes the onsite offering of the degree.
3. For students in the onsite offering of the MS Applied, there are many electives offered on-campus / in-person throughout the Hopkins campuses.
4. Students enrolled in the Onsite MS Applied are expected to complete all degree requirements, including the Capstone, within 12 months.

Admission Criteria

To be considered for the MS Applied, applicants should:

- Hold a terminal degree (master's or doctorate) in a relevant area of health care or public health;
- Hold a bachelor's degree in a relevant area of study, plus 3 to 5 years of related professional work experience; or
- Hold a bachelor's degree in a relevant area of study, plus possess relevant technical and analytic skills

The Admissions Committee considers the undergraduate and/or graduate academic record, statement of purpose, professional experience, letters of recommendation, technical and statistical background, English language proficiency, and the overall motivation and readiness of the individual to pursue graduate studies. Target average GPA is 3.5 or above (on a 4.0 scale).

Relevant areas of study or employment include, but are not limited to: medicine, public health, dentistry, veterinary science, nursing, ancillary therapies, librarianship, biomedical science, computer science, mathematics/statistics, information science, business, and information technology. Those with non-healthcare educational backgrounds are expected to have worked in health care for at least 3 years, with demonstrated abilities in areas like leadership, organizational-level thinking, quality assurance, management, etc.

Applications are made available online through Johns Hopkins School of Medicine's website (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/). Please track the receipt of all supporting materials through the SLATE application system.

Program Requirements

This program consists of 60 quarter course credits, made up of core courses, electives, and a Capstone. There is also an ethics requirement.

Core Curriculum

- Introduction to Public Health and Biomedical Informatics
- Applied Clinical Informatics
- Database Querying in Health
- Introduction to Precision Medicine Data Analytics
- Health Information Systems: Design to Deployment
- Heath Sciences Informatics: Knowledge Engineering and Decision Support
- Student Seminar and Grand Rounds
- Ethics

Biochemistry, Cellular and Molecular Biology, PhD

Fields of Study and Research

The Departments of Biological Chemistry, Biophysics and Biophysical Chemistry, Cell Biology, Molecular Biology and Genetics, Neuroscience, Pharmacology and Molecular Sciences, and Physiology jointly provide a program of study leading to the Ph.D. degree. The objective of the Biochemistry, Cellular and Molecular Biology (BCMB) program is to provide students with the breadth of knowledge and research training that will prepare them for their own independent and productive careers. Strong emphasis is placed on molecular and cellular approaches to fundamental problems in research areas covered by the participating departments. The focus on a broad background in basic science for all students promotes the study of problems of biomedical importance from a mechanistic perspective. The multi-departmental nature of the program fosters a collaborative environment that is ideal for graduate training, and promotes the extensive interaction and collegiality that is a hallmark of Johns Hopkins science.

Training includes a rigorous and broad-based first year curriculum, research rotations in three different laboratories, a proposal-based qualifying exam (along with a proposal-writing workshop), and thesis research in the laboratory of one of more than 100 participating faculty members. Once they join a laboratory, students establish a departmental affiliation and participate in their departmental journal clubs and seminars. At the same time, students continue to maintain their BCMB identity and affiliation in a number of ways. These include attending the annual BCMB retreat, assisting in the recruitment of new students, hosting a one-day symposium with outside speakers, and participating in a monthly student research colloquium (organized by BCMB students for their peers). There is no formal teaching requirement for BCMB students, but many opportunities for gaining teaching experience are available.

Due to the multidisciplinary focus of the BCMB program, students are very well prepared for the full breadth of modern biomedical science careers. Greater than 90% of students in the BCMB program complete the PhD degree. The average time to degree over the last 10 years is 5.7 years. On average, BCMB students publish 4 research papers with 2 as first author.

To date, there are over 700 BCMB graduates; many hold leadership positions in academia, industry, government and other sectors. At least 97% of graduates in the last 5 years are following career paths in laboratory research, medicine, or research-related careers.

The director of the training program in Biochemistry, Cellular, and Molecular Biology is Professor Rachel Green.

Facilities

The lecture halls and the research laboratories are located in the Wood Basic Science Building and the adjoining Physiology, Biophysics, Hunterian, Preclinical Teaching, Ross Building, Miller Research, and Rangos Buildings. Modern equipment and state-of-the-art core facilities are available to students. This includes electron microscopes, confocal microscopes, nuclear magnetic resonance spectrometers, mass spectrometers, HPLC and gas-liquid chromatographs, protein sequencers, peptide synthesizers, oligonucleotide synthesizers, X-ray diffraction equipment, as well as instrumentation for microarray analysis and deep sequencing.

Collaborative Facilities

All seven departments enjoy excellent working relationships with other departments in the medical school and with departments at the Homewood campus.

Financial Support

All students accepted into the BCMB program receive full tuition, health and dental insurance, and stipend support for the duration of their studies.

Admission Requirements

Candidates for admission should show a strong academic foundation with coursework in biology, chemistry, physical sciences, and quantitative analysis. A bachelor's degree from a qualified college or university will be required for matriculation.

The BCMB website (https://bcmb.bs.jhmi.edu/) has up-to-date information on "How to Apply (https://bcmb.bs.jhmi.edu/how-to-apply/)" and "Frequently Asked Questions (https://bcmb.bs.jhmi.edu/faq-2/)." For questions not addressed on these pages, please email bcmb@jhmi.edu (sroot@jhmi.edu).

Program Requirements

Students must successfully complete all eight courses of the "Foundations of Modern Biology" core curriculum, and the Core Discussion course in the first three quarters of year one. During the fourth quarter, students complete two electives, the "BCMB Responsible Conduct in Research" course, and the "Method, Logic and Experimental Design" course. Four additional elective courses are required in the advanced years of study.

An oral examination, conducted as prescribed by the Doctor of Philosophy Board of the University, must be completed before the end of the second year. Subsequently, students are required to participate in annual thesis committee meetings as they work on their thesis project, to review research progress and discuss plans for the next year.

Usually in year five, the student's thesis committee agrees that the student is nearing completion of their research and will be ready to write a dissertation. The student's advisor and one other member from their thesis committee will read and approve the dissertation. The student must present a public seminar on their completed thesis research.

The BCMB program recognizes the importance of students' professional development and career exploration during their graduate studies. In order to better integrate professional development into the training, the BCMB program is formally participating in the “OPTIONS” Career Curriculum offered by the Professional Development and Career Office (PDCO). During the first two years, students attend workshops and panel discussions facilitated by professionals in different fields discussing their career paths, what each profession entails, how the graduate training relates to the required skills and knowledge, and what additional skills would be useful. Several of the speakers are BCMB program alumni, and offer to follow-up with interested students, fostering a sense of community. In year 3, students join an OPTIONS Career Community which comprises six monthly workshops that provide exposure to careers and skills assessment (e.g., Academic Research; Business and Finance; Careers in Drug Development; Science Communication and Advocacy; Teaching; etc.). In year 4 and beyond, students meet with a career coach to create a plan for gaining more career-relevant experiences and/or participate in an internship.

Courses

The first year required courses are as follows:

Code	Title	Credits
ME.800.806	BCMB Computational Biology Bootcamp	1
ME.100.716	Analysis of Macromolecules	2
ME.330.709	Organic Mechanisms in Biology	2
ME.260.709	Molecular Biology and Genomics	1.5
ME.110.733	Principles of Genetics	2
ME.110.728	Cell Structure and Dynamics	1.5
ME.360.728	Pathways and Regulation	2
ME.800.805	BCMB Quantitative Biology Lab	1
ME.800.713	BCMB Responsible Conduct of Research	0.5
ME.800.705	Method, Logic and Experimental Design	1
ME.800.708	BCMB Core Discussion	0.5

Courses are detailed under the course descriptions listed in the entries of the Departments of Biological Chemistry, Biophysics and Biophysical Chemistry, Cell Biology, Molecular Biology and Genetics, Neuroscience, Pharmacology and Molecular Sciences, and Physiology, or as Interdepartmental.

Biological Chemistry, PhD

Program Overview

The Graduate Program in Biological Chemistry (GPBC) is designed to train the next generation of independent research scientists, while simultaneously supporting the professional development and career choices of all our students. The core of our Ph.D.- granting program is learning through research, augmented by an advanced curriculum, supportive mentorship, professional development, and career training. GPBC's focus on discovery-based education is consistent with the founding of Johns Hopkins as the country's first research university and its current position as one of the world's preeminent research universities. The Department of Biological Chemistry is dedicated not only to the advancement of science, but also to the health, well-being, and dignity of its diverse members and the diverse community within which it resides. We recruit, retain and inspire the next generation of diverse trainees, faculty and staff members at our school of medicine and in our health system.

Admissions

Candidates for admission should show a strong academic foundation with coursework in biology, chemistry, physical sciences, and mathematics. A bachelor's degree from a qualified college or university is required.

The Biological Chemistry (https://biolchem.bs.jhmi.edu/) website has up-to-date information on "How to Apply" (https://biolchem.bs.jhmi.edu/application-information/).

Inquires regarding admissions, please contact:
Darlene Sutton (dsutton5@jhmi.edu)
Program Coordinator
(410) 955-3086

Graduate Admissions Office:
Email: GradAdmissions (gradadmissions@jhmi.edu)

For more information about the program, please contact:
Stephen Gould, Ph.D. (sgould@jhmi.edu)
Program Director
(410) 955-3424

Ryuya Fukunaga, Ph.D. (fukunaga@jhmi.edu)
Associate Program Director
(410) 955-3790

Tamara O'Connor, Ph.D. (toconno7@jhmi.edu)
Admissions Director
(410) 955-7134

Daniel Raben, Ph.D. (draben@jhmi.edu)
Associate Admissions Director
(410) 955-1289

Program Requirements

The Graduate Program in Biological Chemistry trains students through a diverse curriculum that emphasizes discovery-driven education. While the focus is on laboratory research, students also benefit from outstanding courses, immersive scientific activities, strong mentorship, professional development, and a commitment to publishing.

Research is the primary activity of GPBC students. Research starts immediately upon matriculation with a series of research rotations, and thereafter continues in their thesis studies.

Courses: Required and elective courses ensure that GPBC students acquire a solid foundation in biomedical research.

Immersive Scientific Activities: Students receive additional training by attending and participating in seminars, journal clubs, symposia, colloquia, and retreats within the Department of Biological Chemistry as well as those offered by other Departments, Centers, Institutes and Schools across the University

Mentorship: GPBC provides multidimensional mentorship from the moment students arrive on campus through and beyond their graduation, with direct support from the student's research advisor(s), co-mentor, Thesis Committee, and GPBC Director.

Professional Development: The GPBC supports the long-term career success of its graduates by providing:

- Outstanding, mechanistically-oriented research training
- OPTIONS career training curriculum
- Full access to all services of the School's Professional Development Office (PDO)

Publishing: Students complete their research requirement by publishing their dissertation, peer-reviewed articles, reviews, etc.

Courses:

The first year required courses are as follows:

- ME.100.716 Analysis of Macromolecules
- ME.330.709 Organic Mechanisms in Biology
- ME.260.709 Molecular Biology and Genomics
- ME.110.733 Principles of Genetics
- ME.110.728 Cell Structure and Dynamics
- ME.360.728 Pathways and Regulation
- 4th Quarter Elective I
- 4th Quarter Elective II
- Rigor, Reproducibility & Experimental Design in Biological Chemistry, Yr. I
- Take and complete first year ethics training

Required courses beyond the first year:
Rigor, Reproducibility & Experimental Design in Biological Chemistry, Yr. 2
Four additional electives

GPBC Activities, By Year
Year 1:
Student orientation day (day 1)
Biological Chemistry Bootcamp (week 1)
Participate in research rotations (3-4 rotations of 2 months-long duration each)
Participate in immersive scientific activities (seminars, journal clubs, colloquia, interest groups, etc.), both required and elective
Select thesis advisor/home laboratory & initiate thesis research

Year 2:
Thesis research
Participate in immersive scientific activities
Write a thesis proposal
Take and pass the Doctoral Board Orals exam
Take and pass the required second-year class:
Rigor, Reproducibility & Experimental Design in Biological Chemistry, Yr. 2
Take and complete second year ethics training
Participate in OPTIONS career development curriculum
Form a thesis committee and identify a co-mentor
With the thesis advisor, draft and sign an individual development plan (IDP)
Participate in Thesis Committee meeting & GPBC Director meeting

Years 3, 4, & 5:
Thesis research
Publish papers
Participate in immersive scientific activities
Take and pass any remaining elective classes
Annually: IDP, Thesis Committee meeting, and GPBC Director meeting
Work with mentors to develop/implement a career plan

Year 5+:
Thesis research, with an emphasis on prompt graduation
Publish the dissertation and peer-reviewed articles
Participate in immersive scientific activities
Hold Thesis Committee meetings & GPBC Director meetings every 6 months
Implement the student's career plan

Biomedical Engineering, PhD

Biomedical Engineering (BME) has emerged as one of the most exciting interdisciplinary research fields in modern science. Biomedical engineers apply modern approaches from the experimental life sciences in conjunction with theoretical and computational methods from the disciplines of engineering, mathematics, and computer science to the solution of biomedical problems of fundamental importance. The Biomedical Engineering Graduate Program of the Johns Hopkins University is designed to train engineers to work at the cutting edge of this exciting discipline. There are two graduate programs in biomedical engineering. The masters program is supported by the Whiting School of Engineering and leads to a Masters of Science degree. The Ph.D. program is supported by the School of Medicine and leads to a Ph.D. in Biomedical Engineering.

Ph.D. in Biomedical Engineering

The cornerstone of the Program is our belief in the importance of in-depth training of students in both life sciences and modern engineering. In-depth training in life sciences is achieved in one of two ways. Many of our incoming Ph.D. students enroll in classes that are part of the first-year basic sciences curriculum of the Johns Hopkins University School of Medicine. That is, they learn human biology with the medical students. This is a unique and intensive curriculum covering a broad range of topics including molecules and cells, human anatomy, immunology, physiology, and neuroscience. This curriculum is an excellent way to build a broad and solid foundation in the life sciences. Alternatively, students may take graduate-level biology and life sciences courses from the many exceptional biosciences departments at Johns Hopkins. This option is often of particular value to students who enter the program already having a strong background in the life sciences. In-depth training in engineering, mathematics, and computer science is achieved through elective courses that are taken in the first and second years.

All students are fully supported during their time in the PhD program. This covers tuition and provides a stipend for the duration of their Ph.D. Because of the interdisciplinary nature of Biomedical Engineering, students can choose to perform their dissertation research in almost any laboratory in the University (subject to the approval of the program directors). Some students choose their research lab before matriculating, and some students have the opportunity to do research rotations among several labs during their first academic year. The opportunities to do research rotations are generously funded by multiple training grants supported by the National Institutes of Health.

Emphasis is placed on original research leading to the doctoral dissertation. The research may be experimental or computational - the breadth of research in Biomedical Engineering is large, and we encourage students to attend various seminars to learn about cutting edge approaches. To explore the current range of research by labs within the

Biomedical Engineering department, see here (https://www.bme.jhu.edu/research/research-areas/); in addition, many of our students work in labs outside the Biomedical Engineering department.

Program Directors

Rachel Karchin, Ph.D. and Patrick Kanold, Ph.D.

Financial Aid

All BME PhD students (regardless of citizenship or national origin) are supported (tuition, stipend, health and dental insurance) for the duration of their PhD. U.S. citizens and Permanent Residents are eligible for support from training grants from the National Institutes of Health (NIH). Students are also encouraged to apply for individual graduate fellowships from the National Science Foundation, NRSA awards from the NIH, and fellowships from private foundations. Only online applications for admission are accepted, and must be received by December 1.

Admission Requirements

Note: up-to-date admissions requirements are maintained on the Biomedical Engineering website *(*https://www.bme.jhu.edu/academics/graduate/phd-program/*), and applications are submitted through the* School of Medicine's application system *(*https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/*).*

The Program accepts applications for the Ph.D. program until December 1st of each year. We typically recruit students in seven areas: Biomedical Data Science, Biomedical Imaging & Instrumentation, Computational Medicine, Genomics & Systems Biology, Immunoengineering, Neuroengineering, and Translational Cell & Tissue Engineering. The program is unique in that it offers the BME student the strengths of one of the best medical schools in the world. If you wish to combine engineering with cutting edge research in medicine, this may be the program for you.

Our students have the option of taking many of the same courses as the medical students, including human anatomy, molecular and cellular biology, immunology, and pharmacology. Our students also take advanced engineering courses. Our admitted students come from many backgrounds and majors, and not all were undergraduate engineering majors. However, all have demonstrated a strong quantitative training, as well as sufficient background in biology (typically at least two introductory courses). Depending on their preferred research focus area, relevant preparation for that focus area should be evident in their application.

The admissions are reviewed by research focus area committees. The applicant should specify which area(s) they are interested in, and write about the kind of research they are considering. The faculty in each area vote and rank the applicants. The final pool of applicants is reviewed and approved by the whole program faculty. We use a holistic review process; for example, the median GPA is typically ~3.8, but we have no minimum GPA or GRE thresholds for review. Don't think that one bad grade or a tough semester stands in your way. We review the whole application and evaluate the potential of the person that wrote it, not just a set of numerical metrics.

Applications should be complete when submitted. In order to be considered a complete application, we must have:

- Official transcripts from each college or university attended. We no longer require applicants to submit official transcripts to OGSA via mail or electronically. Applicants may upload transcripts to the online application for review. Applicants who receive an offer or accept an offer of admission are required to submit official transcripts to OGSA via mail or electronically to GradAdmissions@jhmi.edu
- Previously, we have required official Graduate Record Examination (GRE) scores or MCAT scores, which can be arranged through the Office of Graduate Affairs. As of June 2021, we are actively reviewing this and you should look to the most up-to-date information on the BME website (https://www.bme.jhu.edu/academics/graduate/phd-program/). The GRE code for applying to graduate programs at the Johns Hopkins School of Medicine is 5316. The BME PhD program **does not rely heavily** on the GRE exam in making admission decisions. Research experience, course grades, and recommendations carry more weight.
- Three letters of recommendation – these letters should come directly from faculty members who are acquainted with you and your academic work. These letters should comment on your aptitude and promise for independent research.
- Personal statement – a typewritten statement (one page maximum) indicating the basis of your interest in graduate study and your career objectives. Included should be a discussion of any research experience you have had.
- A CV - this is your opportunity to list all relevant experiences and achievements
- TOEFL scores (for foreign students only; official copy)

Applicants for admission must fulfill the following course prerequisites:

- One year of college-level biology (may include quantitative biology or physiology)
- One semester of organic chemistry is required for students interested in the Immunoengineering or Translational Cell & Tissue Engineering research areas
- Sufficient mathematical training, typically including differential equations or other relevant mathematical preparation

If you are interested in applying and do not yet have the prerequisite courses, you may want to submit your application with an explanatory note indicating that, if accepted, you will make arrangements to take the prerequisites before matriculation. In the past, applicants have taken the prerequisites at their present schools, local community colleges, etc. Courses taken at any accredited college or university are acceptable.

Each applicant must have received a BA or BS degree or its equivalent prior to matriculation. A Master's degree is not required for admission to our program.

Process: The PhD program admissions committee will not consider any application until it is complete. Applicants may check the status of their application by logging into their online account.

Interview: The admissions committee will review completed applications and invite selected applicants to come to Johns Hopkins for a personal interview with faculty. Applicants who are residents of North America must come for an interview to be considered for admission. For residents outside of North America, for whom such a trip is not possible, a Zoom or telephone interview will be conducted. Final admission decisions will be made from the pool of interviewed applicants. Interview invitations will be sent out to applicants via email by the third Monday in January, or earlier if feasible. Videoconference interviews may be conducted, and personal interviews will be conducted on campus in February and/or March.

Acceptance: Applicants will be notified via email by late March with the outcome of their application. A full offer of admission to the program will include a yearly stipend, full tuition, matriculation fee, and individual medical and dental insurance. This applies to every accepted applicant, regardless of citizenship or national origin unless the applicant receives a conditional acceptance. Those offered admission will be asked to communicate their decision as soon as possible. In any case, we must have the applicant's decision by April 15.

Program Requirements

- Complete 30 credits of coursework in life sciences, engineering, mathematics, applied math, and/or computer science. Courses must be passed with a grade of B- or higher. Of the 30 credits, at least 12 credits must be in the life sciences and at least 12 credits must be in quantitative sciences. More detailed requirements can be found at our page on PhD degree requirements (https://www.bme.jhu.edu/academics/graduate/phd-program/phd-degree-requirements/)
- Complete at least 8 hours of face to face research ethics training
- Successfully pass the Doctor of Philosophy Board Oral Examination (this is a University-wide requirement)
- At least one year as a resident student at JHU (this is a University-wide requirement)
- Dissertation must be approved by at least two readers and certified by them to be a significant contribution to knowledge and worthy of publication
- Certification by the Program Director that all requirements have been fulfilled
- Submission of a dissertation to the library that adheres to the Doctor of Philosophy Board Dissertation Guidelines
- The program may determine the allowable time to complete degree requirements but in no case may that time exceed 9 years. Any approved leave of absence would not count toward the 9 years.

Integrated M.D.-Ph.D. Program

Candidates for the Ph.D. in Biomedical Engineering who wish to apply jointly for the M.D. degree must apply directly to the MSTP program (https://mdphd.johnshopkins.edu/) through the School of Medicine. Typically, MSTP students complete their PhD between their 2nd and 3rd medical school years, and in addition can do research during their 1st year summer. Good preparation in biology and chemistry as well as mathematics, engineering, and the physical sciences is essential. Life science graduate requirements are met by the first-year program of the School of Medicine. This program is more arduous than the Ph.D. program alone, but it may have marked advantage for students interested in clinical research and applications in hospital systems and in the delivery of health care. The catalogue for the School of Medicine should be consulted for admissions requirements and procedures.

Information about applying to the combined M.D.-Ph.D. program can be found at the the MSTP program (https://mdphd.johnshopkins.edu/admissions/) website, and applications are reviewed a separate MD-PhD Review Committee; a separate Graduate School application is not necessary, unless the student wishes to also be considered for the PhD program only. If offered admission by the MSTP program, students may choose to take part in the Biomedical Engineering PhD program, as long as they have sufficient background to succeed in the quantitive courses required by the program; matriculants and current MSTP students should schedule a meeting with the Program Director to discuss joining the program.

Biophysics and Biophysical Chemistry, PhD/Molecular Biophysics, PhD

Biophysics and Biophysical Chemistry

In addition to its participation in the Program in Biochemistry, Cellular, and Molecular Biology (BCMB) described earlier, the Department of Biophysics and Biophysical Chemistry provides training for outstanding students with interests in such quantitative areas as crystallography, enzymology, kinetics, protein design, and mathematical computer modeling, which fall outside the scope of the BCMB Program. Two separate training programs are available. The Program in Molecular Biophysics (PMB) is a large training program involving about 35 faculty members from both campuses of the University. The Biophysics and Biophysical Chemistry Program is a small program tightly centered around the Department of Biophysics and Biophysical Chemistry, and is appropriate to applicants with varied interests and diverse training backgrounds. Requirements for these two programs are given below. Applicants should feel free to discuss with the department which program is most appropriate for them.

Molecular Biophysics

The Program in Molecular Biophysics (PMB) was established in 1990 and has evolved continuously over the years to provide its student participants with training in both the fundamental principles of biophysics and contemporary advances in the field. Over 35 faculty, members of 12 departments throughout the University, offer opportunities for learning in diverse and changing areas of research. The carefully designed set of courses and intensive laboratory work integrate various aspects of molecular biophysics into a dynamic curriculum.

Johns Hopkins has long been a leading research institution of world renown. The Hopkins biophysics community is known for its collaborative and congenial atmosphere. Students are encouraged to forge innovative paths by seeking the advice of other biophysicists and forming collaborations that enhance their research. PMB is committed to making the resources of experiment, theory, and computation available to its scientists.

In keeping with an institution of its caliber, a large number of technology hubs and instrumentation facilities are available to Hopkins researchers.

Admission Requirements

Biophysics and Biophysical Chemistry

Candidates for admission to graduate standing should present a Bachelor's degree or equivalent with some undergraduate training beyond the elementary level in at least two of the following areas: chemistry, biology, mathematics, physics, and computer science. Undergraduate courses in physical chemistry, general college physics, differential and integral calculus, and computer science are particularly important. However, deficiencies in some of these subjects can be made up during graduate residency.

Molecular Biophysics

The Program in Molecular Biophysics is a cross-school program with participant laboratories on the School of Medicine campus and the Arts and Sciences and Engineering campus. The program encourages applications from students who have majored in biological sciences, biochemistry, chemistry, engineering, and physics. Backgrounds in related disciplines are welcomed as well.

The program derives its strength from participants with diverse interests. PMB students come from a range of undergraduate disciplines and, therefore, some may require additional courses or tutorials to round off their basic training. Individual needs can be interwoven into the required curriculum. Optimal background includes general chemistry, organic chemistry, physical chemistry, two semesters of college-level physics, biochemistry or molecular biology, and calculus or a high-level math course.

Financial Support

All PMB students receive full financial support including tuition, health insurance, fees, and a 12-month stipend. Assuming satisfactory progress toward the Ph.D., students may expect continued support of tuition, health insurance, and stipend through six years of their graduate study.

Program in Molecular Biophysics graduate students are supported for the first two years by a training grant from the National Institutes of Health. However, this support is limited to U.S. citizens and U.S. permanent residents. To be admitted, International students must have funding from their own government or a formal agency.

Students are encouraged to apply for external sources of funding such as National Science Foundation Predoctoral Fellowships, NIH Predoctoral Fellowships to Promote Diversity in Health-Related Research, and the Association for Women in Science Predoctoral Awards. Students accepted in the PMB have an excellent record of success in pursuing these opportunities.

HOW TO APPLY

Students must complete an online application (https://applygrad.jhu.edu/apply/). The GRE is not required. Materials include three letters of recommendation, transcripts, and a statement of purpose.

The deadline for receipt of complete applications is December 1. Promising applicants will be invited to a Visiting Weekend to meet with faculty on both campuses, talk with students, and have a look around Baltimore.

Visit our website at pmb.jhu.edu (https://pmb.jhu.edu/). Questions pmb@jhu.edu

Program Requirements

Biophysics and Biophysical Chemistry

During the course of graduate study the student must satisfactorily complete the following program of courses in the University or their equivalent at the intermediate or advanced level.

This list does not constitute an inflexible program; exceptions and modifications may be made at the discretion of the department to fit individual backgrounds, needs and interests.

Required Courses

The following three, short courses, and modules in biophysics are required:

Code	Title	Credits
AS.250.685	Proteins & Nucleic Acids	
AS.250.689	Physical Chemistry of Biological Macromolecules	
ME.100.715	Proteins and Nucleic Acids II	3

Additional requirements for the Ph.D. degree are as follows:

Examinations: Applicants must pass a qualifying oral examination as prescribed by the Doctor of Philosophy Board of the University. This examination will normally take place during the second year of residency. After the completion of the thesis, the student must satisfactorily complete a comprehensive oral examination administered by the Department of Biophysics and Biophysical Chemistry.

Dissertation: Completion of an original investigation and presentation of a dissertation is required. The dissertation must be accepted by the department and must be considered worthy of publication by referees nominated by the department.

Molecular Biophysics

Major Research Areas

Protein Folding & Dynamics, Membranes & Membrane Proteins, DNA-Protein Interactions, Structural Biology & Prediction, RNA Biophysics, Enzymes & Metabolic Pathways, Computation & Theory, Protein Design & Evolution, Single Molecule Studies.

Requirements for the Ph.D.

Degree Students must satisfactorily complete required and elective coursework. In addition, students must pass a Doctor of Philosophy Board Oral, a qualifying exam required university-wide, administered at the end of the second year. Students must continue to make satisfactory progress toward completion of their thesis research and meet annually with a thesis review committee in years 3 and 4 and semi-annually beyond year 4. Once thesis research is complete, students must defend their thesis before a final exam committee and present a final thesis seminar.

Required Courses

The methods and tools of biophysics are drawn from physics, chemistry, biology, mathematics and computer science. Consequently, the curriculum is correspondingly broad and rigorous. Four required courses form the core of the PMB curriculum: Physical Chemistry of Biological Macromolecules, Introduction to Computing in Biology, Proteins & Nucleic Acids, Proteins & Nucleic Acids 2 and Modules in Molecular Biophysics, . Students also take a four week course, Introduction to Computing in Biology in fall of their first year. These courses provide a conceptual framework for understanding energetics, dynamics, structure and interactions at the molecular level, practical experience in computational analysis, and exposure to the current frontiers of biophysical research.

Additional Academic Requirements

In addition to coursework, students attend weekly seminars and present one of their own in the third year. Proficiency in biochemistry, cell biology, and molecular biology is tested formally with an oral evaluation at the end of the first year. Tutorials and self-directed study provide alternative avenues for preparing for this evaluation.

The program aims to involve students in research projects from the start. First-year students complete three 7-10-week rotations in laboratories of their choosing. At the end of each rotation period, students present 10-minute talks with their rotation advisors, other faculty and students present. By summer of the first year, a student will have joined a research group and embarked on thesis research. Students are accepted to Ph.D. candidacy after successful completion of a qualifying oral exam at the end of the second year. Beginning in the fifth semester, students meet - (semi-anuualy beyond year 4) with a faculty thesis review committee.

Dissertation

Completion of an original Investigation and presentation of a dissertation are required. The dissertation must be accepted by the program and the results considered worthy of publication by the referees.

Cellular and Molecular Medicine, PhD

The Graduate Training Program in Cellular and Molecular Medicine prepares scientists for laboratory research at the cellular and molecular level with a direct impact on the understanding, diagnosis, treatment, and prevention of human diseases. The Ph.D. graduates of the program obtain rigorous training in scientific research and develop a thorough knowledge of human biology and human diseases.

This program grew out of a need for graduate training at the interface between medicine and the traditional basic science disciplines. Rapid progress in cellular and molecular biology has strongly impacted clinical medicine, offering insights about the fundamental causes of many diseases. Thus, the goal of this program is to train scientists who will make discoveries in the laboratory that can be applied expeditiously to the diagnosis, treatment, and prevention of disease. New technology allows scientists to identify genetic and molecular defects causing or predisposing to disease. The trainees in this program are working precisely at this interface between science and medicine to contribute to the long-term well-being of society.

Facilities

Students will work in well-equipped laboratories of approximately 135 program faculty located throughout the medical school campus. These researchers are supported by many shared facilities including microscopy, molecular biology, and protein chemistry.

Financial Aid

The program is supported by a combination of monies from the Lucille P. Markey Charitable Trust and an NIH training grant. Each student is provided a stipend, health and dental insurance, and tuition throughout their years in the program. The program covers these benefits during the students' first year; in subsequent years, the research advisor is responsible.

Admission Requirements

The mission of the CMM program is to recruit and train outstanding PhD candidates in translational research. We use a holistic approach in evaluating applicants, to ensure the best fit between our training program and trainees. Evidence of prior research experience is paramount in the admissions process, along with letters from research mentors. A bachelor's degree from a qualified college or university is required. Applicants are expected to have taken the following courses: biology, inorganic chemistry, organic chemistry, physical chemistry, physics, and calculus. Cell biology and/or biochemistry is recommended. Passage of the TOEFL is required for all students whose undergraduate instruction was conducted in a language other than English. CMM does not require or review GRE scores in the admissions process.

CMM draws from the top of an extremely strong and deep pool of candidates. Although we do not use score cut-offs, the average accepted student has a GPA of 3.71. Our class size varies between 20-24, and includes in addition to PhD candidates, trainees in dual MD/PhD, DVM/PhD programs and Clinical Fellows. Yield on admissions offers is high, ranging from 45-69%, with an average of 55% of offers resulting in acceptance.

Inquiries regarding admissions should be referred to:

Office of the Graduate Program in Cellular and Molecular Medicine
1830 E. Monument Street, Suite 2-103
Telephone: (410) 614-0391; (410) 614-3640

For questions not addressed on these pages, please email cmm@jhmi.edu.

Program Requirements

Students must complete successfully the following courses:

Code	Title	Credits
ME.800.702	Introduction to the Human Body: Anatomy, Histology, Physiology	5
ME.800.718	Topics in Cellular and Molecular Medicine	1
ME.800.801	Research in Cellular and Molecular Medicine	0
ME.260.708	Fundamentals of Genetics	2
ME.800.703	CMM Core Discussion	1.5
ME.360.728	Pathways and Regulation	2
ME.110.728	Cell Structure and Dynamics	1.5
ME.800.724	Introduction to Clinical Research	1.5
ME.800.709	Cellular and Molecular Basis of Disease	3
ME.800.717	CMM Grant Writing: Nuts and Bolts	1.5
ME.800.789	3B's: Bench to Bedside and Back	1
PH.260.801	Topics in Immunology I	1
ME.260.709	Molecular Biology and Genomics	1.5
PH.260.611	Principles of Immunology I	4

Students are required to take four electives to further broaden their experience in cellular and molecular medicine during the duration of their studies. Mandatory one elective out of the four required must be a **Biostatistics** course. Rigor and Reproducibility in Research (3R's) principles are integrated throughout the program's coursework. The Responsible Conduct of Research ethics training is a graduation requirement. An Ethics refresher course includes attending several Research Integrity Colloquium lectures each year.

Students are expected to perform research rotations in at least three different laboratories culminating with the selection of a thesis advisor to begin original research leading to their doctoral dissertation. All rotations must be performed in the laboratories of CMM faculty members.

Additionally, the program requires students to actively participate in the **OPTIONS Career Curriculum**, managed by the Professional Development and Career Office, that provides protected time for students to develop their career goals and prepare for their future. Through interactive workshops, students discover careers of interest, develop career-specific skills and build a professional network while connecting with fellow trainees with similar interests.

A University-mandated Doctor of Philosophy Board Oral Examination must be completed by the end of the second year of study. Annual thesis committee meetings are held until such time as the thesis committee believes the student is ready to write their doctoral dissertation. The dissertation is based on the student's novel research; a public seminar of thesis work is a graduation requirement.

Cellular and Molecular Physiology, PhD

Researchers in the Department of Physiology (http://physiology.bs.jhmi.edu/) integrate many disciplines to understand the functions of individual systems within a whole organism and the mechanisms that produce and sustain life. Faculty tackle issues such as the molecular control of cell membrane activities, intercellular and intracellular communication, coordinated cell signaling for organ development and mammalian embryonic development. They use computational methods, genetics and post-genomic strategies to study these issues in a variety of organisms, from bacteria and yeast to zebrafish, mice and people. Faculty participate in a number of graduate programs, including the program in Cellular and Molecular Physiology

Why Physiology?

Every modern branch of biomedical research has its physiological roots.

The Department of Physiology has a long-standing tradition of excellence. Our faculty, trainees, and staff seek to understand how the human body works from the head down to the toes and everything in between. Together, we exploit the range of available model systems to understand physiological processes at a mechanistic and integrated level in health with the explicit goal of understanding human disease and identifying potential therapeutics.

Postdoctoral Training

Students who have already been awarded the Ph.D. or M.D. degree may be accepted for postdoctoral research work with members of the faculty.

Admission Requirements

December 8 is the deadline for the receipt of ALL application materials for August admission into the CMP graduate program.

At the time of entry into the program, you must have completed a bachelor's or higher degree. Ordinarily this degree will be in biology, physics, chemistry, mathematics, or engineering, or some combination of these, but exceptions will be made. Scientific research experience is not required but is now common among applicants to our program. Such experience is to your advantage and is widely available to undergraduates willing to take the initiative. If you are planning ahead, consider searching out an experience of this kind.

Regardless of the degree major, the following are entrance requirements: Physics: one year college level course is required; two years of study are recommended. Chemistry: two years are required, and three recommended, of college level courses with laboratory, including inorganic, organic, and physical chemistry. Biology: two years of college level courses, with laboratory. Mathematics: through differential and integral calculus.

Foreign applicants must take the Test of English as a Foreign Language Exam (TOEFL).

In addition to the above, official transcripts or certified records from all university (undergraduate and graduate) study and three letters of recommendation from at least two faculty members who are acquainted with the applicants academic work are required to complete the application for admission. While these requirements will apply for the large majority of applicants, exceptions will be made for unusually well-qualified candidates.

Applications are due by December 8th for August admission. A full application should be completed online. ETS Institutional code: 5316 for TOEFL scores.

The requirements for the application are as follows: (removed detailed information on what these items are)

- Completed Online Application
- Curriculum Vitae
- Statement of Interest and Career Objectives
- Undergraduate Transcripts
- Three (3) Letters of Recommendation
- Application Fee

NOTE: GRE scores are no longer required and if submitted, will not be used in our decision-making process!

How to Apply

To ensure that all required documents are properly submitted, closely follow the directions found at Graduate Program Application Instructions (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/on-campus-programs/).

https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/

When applying for our program you can also apply for up to **four** PhD programs in JHU-SOM and pay for only **one** application fee.

Program Requirements

First Year

The first year curriculum, capped by the program's own Organ Physiology course, is comprehensive in scope and provides each of our students with an incredible foundation of scientific knowledge. Through three 10-week rotations, students select a lab to perform their dissertation research working in a field that excites their curiosity and in an environment that is both nurturing and challenging.

From start to finish, our students' communication skills are continuously honed through regular presentations to the department. Every trainee is encouraged to apply for fellowships and awards, and other career building opportunities.

Courses

In general, students must complete successfully the following basic science courses, given by the School of Medicine:

- Analyses of Macromolecules: Energetics, Structure and Function
- Current Physiology
- Molecular Biology and Genomics
- Principles of Genetics
- Pathways and Regulation
- Cell Structure and Dynamics
- Organ Physiology
- Research
- Primary Source Readings and Analysis

Rotations

- Three laboratory rotations to occur September - beginning of June. Thesis lab decided after rotations.

Second Year

Electives

Four electives must be completed as a part of the degree requirements. These electives can be completed at any time prior to graduation, while enrolled in the CMP program. Selection of these courses are influenced by a student's dissertation project and made in consultation with their mentor. One elective credit is 12-24 classroom hours and must be approved by the Program Director.

Thesis Proposal & Committee

The first thesis meeting must occur no later than August 15th at the end of the second year. A thesis proposal, typically in the format of an NIH fellowship application, is prepared for the first meeting of a student's thesis committee. Thesis meetings to occur yearly or more frequently, if needed.

Examinations

Graduate Board Oral Examination

Each student must pass an oral qualifying exam, which must occur by the end of March of the second year in the program. The goals of the exam are to test the depth and breadth of knowledge as covered in the first-year coursework and to examine the student's ability to design and interpret experiments.

Doctoral Dissertation

Usually in year four or five, the student's thesis committee agrees that the student is nearing completion of their research. When a student receives a "final phase" check at the thesis committee meeting, they are expected to complete any remaining experiments, write their thesis, and get approval from their mentor and reader (another faculty member from the thesis committee) within 6 months. Following completion of the dissertation, the student will present their work at an open seminar. Typically, the student's research is published in one or more scholarly journals prior to the dissertation being written.

Clinical Anaplastology, MS

Clinical Anaplastology:
Design and fabrication of realistic functional facial, ocular, and somatic (body) prostheses

The Master of Science program in Clinical Anaplastology (CA) offers students the knowledge to succeed as clinicians providing facial, ocular, and non-weight bearing somatic (body) prostheses, as well as designing 3D patient-matched models, surgical templates and other 3D printed clinical models. Prostheses are created working with each patient to custom mold, cast, sculpt, and colorize the final wearable device.

Clinical Anaplastology offers a treatment option to patients for whom surgical reconstruction alone cannot restore facial features or the appearance of limbs and digits. Custom prosthetic devices allow patients to resume functional activities of daily living.

The Board for Certification in Clinical Anaplastology (BCCA) Standards for Certification outlines the educational and supervised clinical training requirements for different eligibility pathways. Johns Hopkins supports certification in this profession and our program curriculum was designed in close consultation with identified subject matter experts, BCCA Eligibility requirements, Scope of Practice, Code of Ethics and Standards of Practice, CCA Practice Guidelines, and more (BCCA PDFs webpage). Studying with our faculty, who are Certified Clinical Anaplastologists (CCA) in good standing, can be counted toward the supervised clinical training requirements in accordance with BCCA Eligibility Criteria/ Pathway Guidelines.

Basic medical science courses are offered by the School of Medicine. Clinical Anaplastology courses and rotations are provided by the Department of Art as Applied to Medicine in collaboration with clinical services of the Johns Hopkins Hospital. All degree candidates must satisfy the requirements of Johns Hopkins University, the School of Medicine, and the Department of Art as Applied to Medicine to earn the Master of Science degree.

For detailed information on the CA program, please visit https://medicalart.johnshopkins.edu/msca/.

Admission Requirements

Candidates interested in the Master of Science program in Clinical Anaplastology are encouraged to prepare academically and artistically in the following areas:

- **Bachelor's Degree** (BS, BSc, BA, or similar) with high academic standing in all coursework
- **Science Coursework** (Required of all applicants, taken "for credit" at a degree-granting accredited college or university)
  - Inorganic or General Chemistry
  - Vertebrate Anatomy (with dissection lab)
  - Vertebrate Physiology
  - Organ Histology
- **Art Coursework** or Training (either at college or at an art atelier)
  - Figure or Portrait Drawing
  - Figure or Portrait Sculpting
  - Color Media
  - General Drawing
  - Digital Media (drawing, illustration, or painting)
- **English Writing** Course (GRE, TOEFL, or IELTS may substitute)

Recommended additional art coursework: Color Theory, Digital Media (sculpting, 3D modeling, and / or 3D animation), Art History, and Photography.

Preferred Skills or Previous Exposure

- CPR Certification
- Dental Laboratory Materials / Techniques
- Other anaplastology-related knowledge and skills: prosthetic sculpting, moldmaking, impression taking and casting *(Although previous exposure to these are preferred they are covered as part of the curriculum)*
- 3D scanning, 3D modeling, 3D printing, CAD, and related work

Application Process

Admission to the CA program occurs in two Steps. Full details on the requirements for each Step of the process, along with sample portfolio images and links to forms, are available on the Application Process web page (https://medicalart.johnshopkins.edu/ms-in-clinical-anaplastology-admissions-process/).

Step One - Portfolio and Applicant Profile

To Submit Step One requirements, candidates email FacialProstheticsClinic@jhmi.edu to request a link to a personalized Hopkins OneDrive folder *(HIPAA and FERPA compliant)*. Candidates then upload the Portfolio and Applicant Profile for review.

Step One Requirements:

- **Applicant Profile** PDF
- **Portfolio** - one of the following:
  - Artistic Portfolio
  - Clinical Portfolio*
  - Mixed Portfolio*

**(Candidate must collect authorization from each patient presented. Authorization forms are maintained by the candidate and are <u>not</u> submitted with the portfolio)*

Step Two - Application and Interview

Following Step One, CA faculty invite select candidates to submit the formal School of Medicine Graduate Programs Application and to Interview with the Faculty. *Application instructions will be provided only to those candidates invited to continue*.

Step Two Requirements:

- Transcripts from all colleges and universities attended**
- Statement of Interest in the Program
- Three Letters of Recommendation
- Application Fee
- Interview

***Unofficial transcript uploads are sufficient for the review process. Official transcripts, those mailed or electronically delivered directly from the administration at one school to an office or department at another school, which confirm the type and date a degree(s) was granted are needed from accepted students prior to matriculation into the program.*

Degree Requirements

Graduate Program:

1. Each candidate must successfully complete all courses offered.
2. Each candidate must submit a Capstone Research Project on a subject approved by and with the advice of one of the core faculties in the Spring Semester of the Second Year.

University:

1. A degree candidate's period of attendance in the program will be no less than 18 months.
2. Transfer graduate students must register for a minimum of two consecutive semesters as full-time residents.
3. Certification by the Department or Graduate Program Director that all requirements have been fulfilled.

Program Curriculum

The 22-month curriculum of the Master of Science program in Clinical Anaplastology (CA) is designed to prepare graduates for the field of clinical anaplastology and to become Certified Clinical Anaplastologists (CCA). A long-time leader in the profession, Associate Professor Juan García, MA, CCA (https://medicalart.johnshopkins.edu/juan-r-garcia-ma-cca-associate-professor/), developed the CA program curriculum closely consulting leadership of the Board for Certification in Clinical Anaplastology (BCCA) (https://www.bcca-cca.com/) and BCCA Certification Documents (https://www.bcca-cca.com/bcca-pdfs/), leadership of the International Anaplastology Association (IAA) (https://www.anaplastology.org/), as well as multiple subject matter experts in Clinical Anaplastology and related professions. Graduates of the CA program will follow current BCCA Eligibility Pathway 1 Anaplastology Educational Programs (https://www.bcca-cca.com/_files/ugd/d827e9_9abba48c3781449f8ca2a2ac9d862f78.pdf).

First Year

In the first year, students receive training in 1) Foundational coursework including anatomy, professional standards, materials and methods, 2) Interdisciplinary topics including clinical etiology, surgical functional and psychosocial considerations, and 3) Hands-on skills development such as creating various kinds of prosthetic devices, use of advanced 3D technologies and mold-making/casting methods. Students receive technical training in safe and effectives use of materials, equipment and instrumentation.

Second Year

In the second year, students focus on safe and effective clinical skills development through shadowing and parallel clinical efforts to provide prosthetic and other medical devices. This allows students to build a portfolio of clinical cases. Each student is required to complete a Capstone Research project advised by one of the core faculties. Students receive training in ethics, research integrity, and related topics important to clinical work, professional development and business practices.

Clinical Informatics, Post-Baccalaureate Certificate

Overview

The Post-Baccalaureate Certificate in Clinical Informatics (PBCCI) is a 21-credit certificate that was designed for health professionals who are adding health informatics to their existing scope of practice. The certificate consists of 6 required courses and a 75-hour practicum. The required courses cover a range of topics from applied clinical informatics to precision medicine and public health.

The certificate can be completed in as little as 12 months, although completing in 24 months is more standard if only one course is taken at a time. Students have the option to take as long as 36 months to complete, which is convenient if clinical or other professional priorities change while enrolled. The entire program can be taken remotely and there are no requirements to come to the campus.

NOTE: F1 Visa sponsorship is not available for the PBCCI.

Intended Audience

- Clinicians (physicians, nurses, dentists, doctors of osteopathy, etc.)
- Health specialists, including librarians and information managers seeking health IT skills and clinical data science skills
- Programmers/software engineers working in health IT who would benefit from a grounding in health informatics principles

Students should be aware of additional state-specific information for online programs (http://web.jhu.edu/administration/provost/programs_services/accreditation/state_authorization/) and Title IV Gainful employment disclosure. (http://dhsi.med.jhmi.edu/content/gainful-employment-disclosure/)

Educational Objectives

Upon completion of the PBCCI, students will be prepared to:

- Support or lead development of strategic health informatics initiatives within the clinical enterprise
- Work with clinical medical record data to evaluate evidence based practices
- Participate in or lead development of clinical knowledge management tools
- Support or lead health IT systems development, procurement, and implementation processes

Admissions Criteria

Applicants should have one of the following three qualifications:

- A previous master's or health-related professional degree (MD, BSN, etc.) from an accredited college or university.
- An undergraduate degree from an accredited college or university in a field relevant to Health IT, plus 3 years of experience in a field relevant to health IT.

Applications are made available online through Johns Hopkins School of Medicine's website (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/). Applicants must provide official transcripts, a statement of purpose, 2 letters of recommendation and a CV. Please track the receipt of all supporting materials through the SLATE application system.

Requirements

The Certificate requires 21 quarter course credits including the Practicum. Ethics training is also required.

- Introduction to Public Health and Biomedical Informatics
- Leading Change Through Health IT
- Health Information Systems: Design to Deployment
- HSI: Knowledge Engineering and Decision Support
- Database Querying in Health
- Introduction to Precision Medicine Data Analysis
- Health Sciences Informatics Technology Practicum

Ethics Training

Cross-Disciplinary Program in Biomedical Sciences, PhD

The Cross-Disciplinary Program in Biomedical Science (XDBio) is a graduate program at the Johns Hopkins University School of Medicine aimed at innovating graduate education in the biomedical sciences and facilitating interdisciplinary research training that bridges basic science and medicine.

The Mission of ***XDBio*** is to foster the development of the next generation of scientists who want cross-disciplinary training in biomedicine. The program aims to catalyze and support implementation of the creative ideas of its students, and to accelerate their paths to independent research as they embark on making important discoveries that benefit the human condition.

XDBio students will experience a flexible educational structure with a personalized curriculum guided by each student's individual research interests, prior course work, and future goals. ***XDBio*** students will have access to the rich offering of courses from across the University, and benefit from a mentoring structure that guides independent, interdisciplinary discovery. Students will find themselves embedded in the rigorous, collaborative environment that characterizes Johns Hopkins Medicine and will engage faculty and the broader Hopkins community regularly through research presentations, journal clubs, retreats, and one-on-one and small group interactions.

Johns Hopkins has always been a leader in training the scientists who change the world. With the increasing need for broad sets of approaches to address important biomedical questions, Johns Hopkins is committed to modernizing graduate training in biomedical research and producing exceptionally well-prepared biomedical scientists.

Curriculum

The program has no fixed curriculum. Based on each student's background, coursework, experience and research interests, an individualized program of study will be tailored to each student, maximizing the impact of coursework on the student's chosen thesis area. The student, in consultation with a faculty mentor group, will identify courses offered across the university which will support, complement and enrich their research.

Rotations

XDBio students will carry out rotations in labs at JHU. In consultation with the program, students will identify an anchor mentor within the Institute for Basic Biomedical Sciences prior to matriculating, and rotate in this lab for their first rotation. There is no required number of rotations, and students will work with the program, anchor mentor and faculty mentor group to identify their thesis lab.

Co-mentorship

A core aim of the XDBio program is to facilitate interdisciplinary training as part of each student's thesis work. Co-mentors will be chosen by the student in consultation with the anchor mentor and the faculty mentor group.

Functional Anatomy and Evolution, PhD

Ph.D. in Functional Anatomy and Evolution

The FAE graduate program offers a Ph.D. in Functional Anatomy and Evolution and provides individualized support by world-leading professors for each student in a close-knit department with an excellent faculty to student ratio. Our primary focuses are independent research and teaching human gross anatomy, with research areas covered by faculty and students that range from vertebrate fossils, to primates to recent human remains.
As a result of the interdisciplinary training of the FAE graduate program, our graduates are well equipped to face the challenge of today's

academic job market. For more information on requirements for entry to the program, see our requirements for admission.

Research

All students are required to engage in independent research, and a laboratory research rotation under faculty guidance begins soon after their arrival. Research may utilize our large collection of fossil and extant vertebrates as well as departmental research equipment. Research is further facilitated by our proximity to the collections of recent and fossil vertebrates held at the Smithsonian Institution's National Museum of Natural History in Washington, D.C., which can be accessed by a hour journey on public transport. Baltimore's excellent location offers ease of access to other major museums on the East Coast, as well as several international airports to travel to museums and collections around the world.

Teaching Opportunities

Teaching opportunities are primarily centered around training students to teach human anatomy in a medical school or allied health setting. Students act as laboratory instructors for both the Summer Institute in Anatomy and the School of Medicine Human Anatomy course. These are cadaver-based course, allowing for the highest level of dissection-based experience. The School of Medicine course is taught at the beginning of the third year of the Ph.D. program, while the Summer Institute is taught at the end of both the first and second years. Further teaching opportunities are available through undergraduate courses offered by the departmental faculty.

Prerequisites

The Functional Anatomy and Evolution (FAE) Program will admit well-qualified students to the program for work leading to the degree of Doctor of Philosophy. Applicants should have thorough training in organismic biology, chemistry, physics, and mathematics.

Program Director

Adam D. Sylvester, Ph.D.

Program Requirements

Requirements established by the FAE Program, which must be met by all candidates, are as follows:

1. Complete a minimum of four years of registration as a full-time, resident graduate student. Most candidates require five years.
2. Demonstrate evidence of achievement and promise in a comprehensive oral examination administered by the Doctoral Board, usually at the end of the second year of residence.
3. Demonstrate preparedness to carry out independent research by completing a research rotation project within the first two years.
4. Write a dissertation embodying findings worthy of publication, and certified to be a significant contribution to knowledge by at least two referees from within the department and two referees from outside.
5. Present a final departmental seminar in the field of the dissertation research.

Core Courses

Students must achieve a B- or better in Human Anatomy, Organ Histology, Evolutionary Biology, Biomechanics of the Skeleton, Mammals: Diversity, Structure and Evolution, Primate Evolution, Geometric Morphometrics, and Statistics.

Elective Courses

Students must also take at least four elective courses, to be determined through consultation with FAE faculty, chosen from among those offered by the FAE faculty (including Dinosaurs, Cladistics, and Allometry), as well as elsewhere in the University (e.g., Sedimentary Environments, Climates of the Past, Paleoecology, Behavioral Ecology, Animal Behavior, Geobiology, Isotope Geochemistry).

Rotations

Students must complete a formal research rotation with the faculty during their first two years. The rotation consists of a written formal prospectus/proposal of the research work, a write-up of the research by the student, and an oral presentation to the FAE group.

Fellowships

Predoctoral fellowships covering normal living costs and tuition are available.

Health Sciences Informatics, PhD

The Ph.D. in Health Sciences Informatics offers the opportunity to participate in ground-breaking research projects in clinical informatics and data science at one of the world's finest biomedical research institutions. In keeping with the traditions of the Johns Hopkins University and the Johns Hopkins Hospital, the Ph.D. program seeks excellence and commitment in its students to further the prevention and management of disease through the continued exploration and development of health informatics, health IT, and data science. Resources include a highly collaborative clinical faculty committed to research at the patient, provider, and system levels. The admissions process will be highly selective and finely calibrated to complement the expertise of faculty mentors.

Areas of research:

- Clinical Decision Support
- Global Health Informatics
- Health Information Exchange (HIE)
- Human Computer Interaction
- Multi-Center Real World Data
- Patient Quality & Safety
- Population Health Analytics
- Precision Medicine Analytics
- Standard Terminologies
- Telemedicine
- Translational Bioinformatics

Individuals wishing to prepare themselves for careers as independent researchers in health sciences informatics, with applications experience in informatics across the entire health/healthcare life cycle, should apply for admission to the doctoral program.

Admission Criteria

Applicants with the following types of degrees and qualifications will be considered:

- BA or BS, with relevant technical and quantitative competencies and a record of scientific accomplishment as an undergraduate;
- BA or BS, with relevant technical and quantitative competencies and a minimum of three years professional experience in a relevant field (e.g., biomedical research, data science, public health, etc.); or
- MA, MS, MPH, MLIS, MD, PhD, or other terminal degree, with relevant technical and quantitative competencies

Relevant fields include: medicine, dentistry, veterinary science, nursing, ancillary clinical sciences, public health, librarianship, biomedical science, bioengineering and pharmaceutical sciences, and computer and information science. An undergraduate minor or major in information or computer science is highly desirable.

The application is made available online through Johns Hopkins School of Medicine's website (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/). Please note that paper applications are no longer accepted. The supporting documents listed below must be received by the SOM admissions office by January 15 of the following year. Applications will not be reviewed until they are complete and we have all supporting letters and documentation.

- Curriculum Vitae (including list of peer-reviewed publications and scientific presentations)
- Three Letters of Recommendation
- Statement of Purpose
- Official Transcripts from undergraduate and any graduate studies
- Certification of terminal degree
- You are also encouraged to submit a portfolio of published research, writing samples, and/or samples of website or system development

Please track submission of supporting documentation through the SLATE admissions portal.

Program Requirements

The PhD curriculum will be highly customized based on the student's background and needs. Specific courses and milestones will be developed in partnership with the student's advisor and the PhD Program Director.

The proposed curriculum is founded on four high-level principles:

- Achieving a balance between theory and research, and between breadth and depth of knowledge
- Creating a curriculum around student needs, background, and goals
- Teaching and research excellence
- Modeling professional behavior locally and nationally.

Individualized curriculum plans will be developed to build proficiencies in the following areas:

- Foundations of biomedical informatics: e.g., lifecycle of information systems, decision support
- Information and computer science: e.g., software engineering, programming languages, design and analysis of algorithms, data structures.
- Research methodology: research design, epidemiology, and systems evaluation; mathematics for computer science (discrete mathematics, probability theory), mathematical statistics, applied statistics, mathematics for statistics (linear algebra, sampling theory, statistical inference theory, probability); ethnographic methods.
- Implementation sciences: methods from the social sciences (e.g., organizational behavior and management, evaluation, ethics, health policy, communication, cognitive learning sciences, psychology, and sociological knowledge and methods), health economics, evidence-based practice, safety, quality.
- Specific informatics domains: clinical informatics, public health informatics, analytics
- Practical experience: experience in informatics research, experience with health information technology.

Basic Requirements & Credit Distribution

- 15 "core" quarter credits (5 courses)
- 8 quarter credits of Student Seminar & Grand Rounds
- 60 elective quarter credits
- 6 quarter credits practicum/research rotation
- 36 mentored research quarter credits (12 in year 1, 24 in year 2)
- Research Ethics

Health Sciences Informatics–Research, MS

Overview

Health sciences informatics research involves investigating a range of topics: innovations in the health sciences (e.g., clinical, nursing, public health, and librarianship); understanding information needs; designing and creating information technologies; deploying information solutions; and evaluating information management systems. With the ubiquitous deployment of EHRs and other health information systems in the 2020's, health sciences informatics research also encompasses the application and evaluation of analytic platforms for precision medicine and population health.

The approach at Johns Hopkins is interdisciplinary. Although housed in the School of Medicine, the training program partners with all schools in the health sciences and throughout Hopkins. During rotations and thesis work, MSc Research students will have the opportunity to learn about and/or research topics like the following:

- Clinical Decision Support
- Global Health Informatics
- Health Information Exchange (HIE)
- Human Computer Interaction
- Multi-Center Real World Data
- Patient Quality & Safety
- Population Health Analytics
- Precision Medicine Analytics
- Standard Terminologies
- Telemedicine
- Translational Bioinformatics

The MSc Research program invites applicants from a range of disciplines including public health, clinical care, nursing, and biology, as well as from cognate fields such as computer, library, and information sciences.

Admission Criteria

Applicants with the following degrees and qualifications will be considered:

- BA or BS, with demonstrated technical and mathematical & statistical proficiency;
- BA or BS, and a minimum of three years of professional experience in a relevant field where technical and mathematical & statistical proficiencies were obtained; or
- MA, MS, MPH, MLIS, MD, PhD, or other relevant terminal degree where technical and mathematical & statistical proficiencies were obtained or applied

Relevant fields include public health, medicine, dentistry, veterinary science, nursing, ancillary therapies, librarianship, biomedical science, and computer and information science.

The application is made available online through Johns Hopkins School of Medicine's website (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/). The supporting documents listed below must be uploaded and tracked in the SLATE application system.

- Curriculum Vitae (including any peer-reviewed publications or conference presentations)
- Three letters of recommendation
- Official transcript of school record
- Certification of terminal degree
- Evidence of basic English language proficiency

You may also submit a portfolio of published research, writing samples, or samples of website or system development projects to support your application.

NOTES:

1. "*Technical proficiency*" in this context refers to the ability to work with computers and information systems to solve problems or accomplish tasks beyond word processing, order-entry, etc. Familiarity with at least one programming language is strongly preferred.
2. "*Mathematical & statistical proficiencies*" in this context involves the application of math or statistics to real-word problems or research. While evidence of applying these proficiencies within a professional or work setting would be considered ideal for an applicant, college-level course work in math and statistics will suffice.
3. "Basic *English proficiency*" is a consideration for admissions because of the collaborative nature of academic research.

Program Requirements

The Master of Health Science Informatics Research degree is completed over 24 months and requires 96 course credits including research and thesis preparation. The curriculum will be highly customized based on the student's background and needs, in partnership with the student's advisor and the MSc Program Director.

Year 1 of the curriculum will be focused on laying a solid foundation of research and quantitative methods and exposing students to a range of application areas through rotations and electives.

Year 2 of the curriculum will be focused on undertaking a research-based thesis under the direction of a faculty advisor. During Year 2 students will likely need to take advanced electives related to their thesis research. These advanced electives might focus on specific methods that may need to be applied or specific clinical, public health, or informatics topic areas that are the focus of the research.

Year 1

- Informatics Research Methods (4 course sequence)
- Quantitative Methods (2-4 course sequence of biostatistics, probability, or epidemiology)
- Electives
- Research Rotations & Research Seminar (4 quarters)
- Student Seminar (4 quarters)
- Research Ethics

Year 2

- Thesis Research (4 quarters)
- Advanced Electives
- Student Seminar (4 quarters)

History of Medicine, MA (On-site)

Students matriculated into the MD or graduate programs in the School of Medicine or PhD programs in the School of Public Health may apply to the 1-year MA in the History of Medicine. The work of this program extends over all phases and dimensions of the development of medicine and related sciences, the history of disease, and the historical analysis of related conceptual, cultural, and social problems. Students acquire facility in the methods of historical research and gain a wide acquaintance with the available literature in the history of medicine, science, and related fields of history.

Candidates for the on-site one year Master of Arts in the History of Medicine must be enrolled in the MD or other graduate program at the School of Medicine or School of Public Health. For more information, contact the departmental Director of Graduate Studies:

Graham Mooney, Director of Graduate Studies
Department of the History of Medicine
gmooney3@jhmi.edu

Requirements include the demonstration of competence in the general history of medicine by completing the coursework expected of all full-time first year graduate students in the Department, passing an examination at the end of the first year of study, completion of a satisfactory research essay, and demonstrated reading ability of one foreign language.

History of Medicine, MA (Online)

The Online History of Medicine Program offers an MA Degree for students who want to deepen their knowledge in the history of medicine and develop research skills in the field. Prior to application, please be sure to first review the information below.

The MA Degree provides a wide-ranging and in-depth overview of the history of medicine and offers the opportunity to focus on specific areas of interest. Students work closely with Department faculty to sharpen skills in historical research and writing over a series of twelve courses, culminating in the submission of an original thesis. All courses (except Directed Reading and Directed Research) are 3 credits each for a total of 36 required, plus a thesis. Directed Reading and Directed Research are 1 credit courses; each is taken 3 times. By completion of the degree, students will acquire and be able to demonstrate the following core competencies.

Core Competencies

1. Demonstrate breadth of knowledge of key scholarship in the history of medicine from antiquity to the present, with special proficiency in a chosen field of study.
2. Recognize the ongoing and provisional nature of knowledge and engage the past on its own terms.
3. Identify and critically assess primary and secondary sources, and deploy evidence from those sources to build an historical argument.
4. Choose among multiple tools, methods, and perspectives to investigate and interpret materials from the past.
5. Deploy evidence from primary and secondary sources to build an historical argument.
6. Practice the ethics and standards of historical research and writing that require peer critique, citation, and attribution.
7. Develop, plan and complete an independent research project that makes a significant, original contribution to existing literature in the history of medicine.
8. Apply historical knowledge and perspectives to contribute to public dialogue and professional life.

Applications for the online part-time Certificate or MA in the History of Medicine are accepted for much of the year, but applications are reviewed at three times. See here (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/online-programs/) for details, and to apply.

The application process will ask you to confirm that you have completed our online course 150.722 Introduction to the History of Medicine (https://hopkinshistoryofmedicine.org/online-program-courses/).

In order to apply you will need PDF files of the following:

- Curriculum Vitae (4 page limit)
- A personal statement of interest (1 page limit)
- Writing sample (optional)

The application form will also direct you to submit official transcripts that document your undergraduate degree electronically. Review of applications cannot begin until all required documents and application fees have been received. International students will need to submit translated and validated transcripts via a service such as WES (https://www.wes.org).

If you are applying for the MA, a member of faculty will contact you to arrange an interview by phone or Skype.

The application fee is US $115, payable online.

Click on these links for more details about the Certificate (https://hopkinshistoryofmedicine.org/certificate-in-the-history-of-medicine/) and the MA Degree (https://hopkinshistoryofmedicine.org/ma-degree/). If you are unsure about which to apply for, or need any assistance with the application process, please email us on ihmonline@jhmi.edu. Should you experience technical difficulties with the application portal, check that your browser is updated.

Degree Requirements

- Introduction to the History of Medicine
- All four Survey courses
- Methods in the History of Medicine
- Research seminar (two terms)
- Research Practicum on-site
- Directed Reading
- Directed Research
- One Elective
- Submission and approval of an original thesis

Online MA students who have taken a course before February 1, 2020 count time to completion from acceptance into the MA program. MA students have 5 years from acceptance to complete. Should a student switch from Certificate to Master’s, or vice versa, they will complete according to the timeline of their new program.

Students who have taken their first course after February 1, 2020 will count time to completion from the very first course they do in the program, before acceptance to the MA program. These MA students have 8 years to complete their degree. Should a student switch from one program to the other, they will complete according to the timeline of the new program.

All MA Degree students must complete a free, no credit, online course on Academic and Research Ethics, as well as a Responsible Conduct of Research Module as part of the Research Practicum.

History of Medicine, PhD

The PhD program in the History of Medicine is part of the broader Program on the History of Science, Medicine, and Technology jointly run by the Department of the History of Medicine (SOM) and the Department of the History of Science and Technology (KSAS).

The work of the PhD program extends over all phases and dimensions of the development of medicine and related sciences, the history of disease, and the historical analysis of related conceptual, cultural, and social problems. Students acquire facility in the methods of historical research and gain a wide acquaintance with the available literature in the history of medicine, science, and related fields of history. Departmental offerings are particularly strong in the history of medicine and science in early modern Europe and the Islamic world; medicine, science, and technology in the United States in the 19th and 20th centuries, including genetics; history of disease and public health; and studies of health and society in Latin America and Africa. The program offers coverage of racism and gender in the history of medicine, how medical and scientific knowledge is created, and medical practices of the body.

Students enter the PhD program with diverse backgrounds including medicine, science, and history. The Ph.D. program prepares students for scholarly careers in teaching, research, and in non-academic fields. For further information, see our website (https://hopkinshistoryofmedicine.org/admissions/). Students interested in the history of medicine should apply to the Program through the School of Medicine. Those interested in the history of science and technology should apply through the History of Science and Technology Department of the Krieger School of Arts and Sciences. Students who wish to combine medical training with academic training in the history of medicine may also inquire about the M.D.-Ph.D. program by writing:

The Director, M.D.-Ph.D. Program,
School of Medicine,
The Johns Hopkins University,
1830 E. Monument Street, Suite 2-300,
Baltimore, MD 21205.

Financial Aid

The regular department fellowships include tuition, stipend, research allowance and medical insurance.

Admission Requirements

Candidates must be at the post-baccalaureate level. Preference will be given to applicants with training in some aspect of the health sciences or history. For further information applicants should write to:

Graham Mooney, Director of Graduate Studies
Department of the History of Medicine
gmooney3@jhmi.edu

Program Requirements

The student must satisfy the requirements of the University, the School of Medicine, and the Program.

The principal requirement for the Ph.D. degree in the history of medicine is the writing of a dissertation based upon original research and of publishable quality. Prior to embarking on full-time dissertation research, candidates will prepare themselves by a variety of courses, seminars, and guided reading. During the first year of study, students receive a general introduction to historical research and complete a year-long survey in the history of medicine. In their second and third years, candidates prepare three fields of study: one in the Department of the History of Medicine; one in the History Department; and a third field to be determined by the student and the advisor. The specific requirements for such fields are set by the faculty member directing the field, in consultation with the student. These fields entail both broad and intensive reading, and the passing of a comprehensive examination and/or preparation of several historiographic essays. Towards the end of the third year, students must prepare and defend a dissertation prospectus. Candidates must also demonstrate a reading knowledge of two foreign languages before being admitted to formal candidacy for the degree. The final requirement for the Ph.D. degree is completion of a dissertation that is an original contribution to historical knowledge and of a standard suitable for publication. More detailed information can be found on the department website (https://hopkinshistoryofmedicine.org/content/program-requirements/).

History of Medicine, Post-Baccalaureate Certificate (Online)

The Online History of Medicine Program offers a Certificate for those students who wish to explore the history of medicine in depth.

The Certificate provides a rich overview of the field and develops basic skills in historical analysis in a set of six courses. Courses are 3 credits each, for a total of 18 credits required for the Certificate. Students who successfully complete the requirements of the Certificate can have their credits applied to the MA Degree in the History of Medicine, if they are admitted to that program. Students may also apply directly to the MA Program.

For more information on upcoming and available courses, visit our website (https://hopkinshistoryofmedicine.org/content/online-program-courses/).

Admission Requirements

Applications for the online part-time Certificate or MA in the History of Medicine are accepted for much of the year, but applications are reviewed at three times. See here (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/admissions/online-programs/) for details, and to apply.

The application process will ask you to confirm that you have completed our online course 150.722 Introduction to the History of Medicine (https://hopkinshistoryofmedicine.org/introduction-to-the-history-of-medicine/).

In order to apply you will need PDF files of the following:

- Curriculum Vitae (4 page limit)
- A personal statement of interest (1 page limit)
- Writing sample (optional)

The application form will also direct you to submit official transcripts that document your undergraduate degree electronically. Review of applications cannot begin until all required documents and application fees have been received. International students will need to submit translated and validated transcripts via a service such as WES (https://www.wes.org/).

The application fee is US $115, payable online.

Click on these links for more details about the Certificate (https://hopkinshistoryofmedicine.org/certificate-in-the-history-of-medicine/) and the MA Degree (https://hopkinshistoryofmedicine.org/ma-degree/). If you are unsure about which to apply for, or need any assistance with the application process, please email us on ihmonline@jhmi.edu.

Certificate Requirements

- Introduction to the History of Medicine
- Methods in the History of Medicine
- Any two of our four Survey courses
- Two electives (which may include the other 2 Survey courses)

Certificate students must complete a free, no-credit, online course on Academic and Research Ethics.

Current online students (any students who have taken a course before February 1, 2020) count time to completion from acceptance into the Certificate program. Certificate students have 3 years from acceptance to completion. Should a student switch from Certificate to Master's, or vice versa, they will complete according to the timeline of the new program.

Students who have taken their first course after February 1, 2020 will count time to completion from the very first course they do in the program, before acceptance to the Certificate program. Certificate students have 5 years to complete their program. Should a student switch from one program to the other, they will complete according to the timeline of the new program.

Human Genetics and Molecular Biology, PhD

Ph.D. Program

The Johns Hopkins Human Genetics Training Program provides a training in all aspects of human genetics and genomics relevant to human biology, health and disease.

The overall objective of the Human Genetics program is to provide our students with a strong foundation in basic science by exposure to a rigorous graduate education in genetics, genomics, molecular biology, cell biology, biochemistry and biostatistics as well as a core of medically-related courses selected to provide knowledge of human biology in health and disease. Advances in human genetics and genomics continue at an astounding rate and increasingly they are being integrated into medical practice. The Johns Hopkins Predoctoral Training Program in Human Genetics (HG) aims to educate highly motivated and capable students with the knowledge and experimental tools that will enable them to answer important questions at the interface between genetics and medicine. Ultimately, our trainees will be the leaders in delivering the promise of genetics to human health.

The Human Genetics Program has also partnered with the Johns Hopkins Bloomberg School of Public Health (JHSPH) and the National Human Genome Research Institute (NHGRI) in establishing the Maryland Genetics, Epidemiology, and Medicine Training Program (MD-GEM). Funded by the Burroughs Wellcome Fund, MD-GEM takes a multidisciplinary approach by combining the expertise of all three institutions, to foster the development of a new generation of scientists. Interested Human Genetics students can participate in this additional training.

This program is also offered as training for medical students in the combined M.D./Ph.D. program. Students apply to the combined program at the time of application to the M.D. program. (See section entitled Medical Scientist Training Program).

Research Facilities

Research laboratories are well equipped to carry out sophisticated research in all areas of genetics. The proximity to renown clinical facilities of the Johns Hopkins Hospital, including the Department of Genetic Medicine, and Oncology Center provides faculty and students with access to a wealth of material for study. Computer and library facilities are excellent. Because the program in human genetics is a university-wide activity, supporting facilities are extensive.

Financial Aid

The program is supported by a limited number of teaching assistantships and predoctoral training funds from the National Institutes of Health. These fellowships, which are restricted to United States citizens and permanent United States residents, cover tuition and provide monthly stipends and are awarded to essentially all students in the program. Students are encouraged, however, to apply for fellowships from outside sources (e.g., the National Science Foundation, Howard Hughes Medical Institute) before entering the program.

Applicants for admission should show a strong academic foundation with coursework in biology, chemistry and quantitative analysis.   Applicants are encouraged to have exposure to lab research or to data science. A bachelor's degree from a qualified college or university will be required for matriculation. We no longer require GREs to be taken.

The Human Genetics site (https://bcmb.bs.jhmi.edu/) has up-to-date information on "How to Apply (https://bcmb.bs.jhmi.edu/how-to-apply/)." For questions not addressed on these pages, please email Sandy Muscelli, the program administrator, at muscelli@jhmi.edu.

Program Requirements

The program includes the following required core courses: Molecular Biology and Genomics, Cell Structure, Computational Bootcamp, Pathways and Regulation, Human Genetics, Evolving Concept of a Gene, Basic Mechanisms of Disease, Genomic Technologies, Rigor and Reproducibility in Research, Molecular Mechanisms of Disease and Systems, Genes and Mechanisms of Disease, some of which are listed in the entries of the departments of Cell Biology, Molecular Biology and Genetics, Biological Chemistry and Cell Biology. Numerous elective courses are available and are listed under sponsoring departments.

Our students must take a minimum of four electives, one of which must provide computational/statistical training.

Our students also take a two-week course in July at the Jackson Labs in Bar Harbor, Maine entitled "Human and Mammalian Genetics and Genomics: The McKusick Short Course" which covers the waterfront from basic principles to the latest developments in mammalian genetics. The faculty numbers about 50 and consists roughly in thirds of JAX faculty, Hopkins faculty and "guest" faculty comprising outstanding mammalian geneticists from other US universities and around the world.

The courses offered by the faculty of the program are listed below. All courses are open to graduate students from any university program as well as selected undergraduates with permission of the course director.

Students must complete three research rotations before deciding on their thesis lab. They must also participate in the Responsible Conduct of Research sessions offered by the Biomedical Program; starting at year 3, students must attend at least two Research Integrity Colloquium lectures per year.

Our students participate in weekly journal clubs, department seminars,monthly Science & Pizza presentations as well as workshops given twice a year on diversity, identity and culture.

At the end of the second year, students take their Doctoral Board Oral Examination. Annual thesis committee meetings must be held following successful completion of this exam.

Average time for completion is 5.5 years.

Code	Title	Credits
ME.710.700	Advanced Topics in Human Genetics	1.5
ME.710.702	Molecular Mechanisms Of Disease	1
ME.710.737	Introduction to Computational Genetics	1
ME.710.738	Human Genetics: Consequences of Mendelian Transmission	0

Graduates from the Human Genetics program pursue careers in academia, medicine, industry, teaching, government, law, as well the private sector. Our trainees are encouraged to explore the full spectrum of professional venues in which their training my provide a strong foundation. Driven by curiosity and a desire for excellence, our trainees stand out as leaders in the chosen arenas of professional life. They are supported in the development of their career plans by a program faculty and administration who are dedicated to their success, and by a myriad of support networks across the Johns Hopkins University, many of which are provided by the Professional Development Career Office of the School of Medicine.

Immunology, PhD

https://gradimmunology.med.som.jhmi.edu/

For more complete information and to apply to the Graduate Program in Immunology see the department website (https://gradimmunology.med.som.jhmi.edu/**).**

The Graduate Program in Immunology began in 1982 with two students and a handful of faculty. Since then we have grown to 36 students currently in training and 46 faculty. The faculty research interests span the entire gamut of Immunology, from basic mechanisms such as somatic hypermutation and gene rearrangement, molecular mechanisms of antigen processing and presentation, molecular signals for immune cell development and differentiation to translational research in the fields of cancer vaccines, allergy, infectious disease, immune engineering, autoimmunity and transplantation.

We are fortunate to have a number of centers of excellence in Basic Immunology and Cellular Engineering, Microbial Immunology, Autoimmunity and Cancer Immunology. This, combined with world-class facilities in genomics, genetics, proteomics, cell imaging and bioinformatics means almost limitless opportunities for students to do cutting edge and creative Immunology research. It is indeed an exciting time for Immunology at Hopkins.

We are able to offer one of the most rigorous and expansive scientific training arenas in the world. The large number of accomplished biomedical scientists, the focus on interdisciplinary training, the availability of state of the art research facilities and a collegial environment gives our students a unique opportunity to develop as the next generation of leaders in Immunology. Recent program graduates have become post-doctoral research fellows in major labs all over the world. Many of our alumni have gone on to significant positions as successful independent researchers at universities, research institutes, government laboratories and biotechnology enterprises. Also, a number have distinguished themselves in public policy, intellectual property and scientific writing. All of our alumni have gone on to fulfilling careers in the biomedical field and for that we are grateful and very proud.

Fellowships

Financial Support:

Students accepted into the program will have their tuition, fees, and medical insurance (including dental and vision) paid. Students will receive a competitve stipend to cover living expenses. Support for the Graduate Program in Immunology is derived from government and private sources and individual research grants.

Note to International Applicants:

We are very much interested in attracting talented students from other countries to our program. However, there are some practical issues that you should be aware of before applying. We have a limited ability to support students who are not citizens or permanent residents of the United States. Our training program is funded by a training grant from the United States government. This grant will only support US citizens or permanent residents. Only very rarely do we have funds that can be used to support citizens of other countries.

We highly recommend that foreign applicants seek other possible means of supporting the cost of graduate study. Support could come from: (a) a scholarship from your government or (b) from a "special" foundation award. In your application, please discuss the possibility of obtaining support from one of these sources. Final admission to the program requires documentation that the appropriate financial resources are available. We highly recommend that you review the NAFSA: Association of International Educators website at www.nafsa.org. NAFSA does not offer financial assistance, but will offer some suggestions to help your search for financial aid for study in the United States.

Acceptance into the Graduate Program in Immunology is dependent on an invited personal interview. Foreign applicants, on invitation, should be prepared to travel to Baltimore, Maryland at their own expense. Once in Baltimore, the program will pay for local transportation, meals and accommodations.

Admission Requirements

Undergraduate Degree

Candidates for admission should hold a bachelor's degree or higher with training in one of the following, or related, areas:
General Biology
Biochemistry
Physics
Calculus
Organic/Inorganic Chemistry
Courses in Immunology, Biochemistry & Molecular Biology are recommended, but not required.

Transcripts

Transcripts of **all** college and university study (undergraduate and graduate) are required and must be uploaded to the application. If you have attended more than one institution, transcripts from each institution must be received for your application to be considered complete. International transcripts must be officially translated into English. If you have not yet completed your Bachelor's degree, upload a copy of your current transcript, showing in-progress courses. Official transcripts for in-progress courses can be uploaded to the online application in the Transcript Upload section when they become available, after you submit. Applicants should also upload a list of any current courses, and courses that will be taken before beginning graduate study that do not appear on their transcripts. Do not mail documents to the Office of Graduate Student Affairs unless requested or admitted.
If admitted, an official transcript from each institution you have attended showing proof of graduation and degree conferral will be required prior to matriculation. To be considered official, final transcripts must be sent: 1) by mail, directly from the institution in a sealed envelope:

Office of Graduate Biomedical Education
1830 E. Monument Street, Suite 620 (https://www.google.com/maps/search/1830+E.+Monument+Street,+Suite+620+%0D%0ABaltimore,+MD+21287/?entry=gmail&source=g)
Baltimore, MD 21287 (https://www.google.com/maps/search/1830+E.+Monument+Street,+Suite+620+%0D%0ABaltimore,+MD+21287/?entry=gmail&source=g)

If your institution is sending an E-transcript, please make sure they are sending the notifications to: Gradadmissions@jhmi.edu

Letters of Recommendation

Three letters of recommendation must be submitted through the online recommendation system. Applicants will need to obtain the name and email address of the recommenders when completing the application. Please request your letters of recommendation from faculty members or other professionals who are acquainted with you and your academic work. These letters should comment on your aptitude and promise for independent research.

GRE (no longer required for admission)

As of October 2019, The Graduate Program in Immunology **will no longer require** the Graduate Record Exam (GRE) for admission.

TOEFL Scores (Test of English as a Foreign Language) and IELTS (International English Language Testing System)

All levels of graduate education at Johns Hopkins require proficiency in the English language. It is highly recommended that applicants for whom English is a second language take the TOEFL/IELTS to demonstrate this proficiency. In general, foreign students admitted to the Graduate Program in Immunology have achieved TOEFL scores over 550.
You are exempt from having to take the TOEFL/IELTS if you hold a degree from a U.S. University/College or have attended a minimum of 2 years at an English speaking University/College. TOEFL/IELTS scores are valid for 2 years from expected entrance date.
Please use the Johns Hopkins School of Medicine code **(5316)** when submitting scores.

Application Fee

Application fee is $115.

Criminal Background Check

All Johns Hopkins University graduate students who are accepted will be subject to criminal background investigations. Generally, all offers of admission to School of Medicine degree programs will be conditioned on satisfactory criminal background investigations.

Program Requirements

In the **first year** of study, each student takes a core set of courses emphasizing basic molecular principles and how they apply to understanding immune function.

Required Coursework

Code	Title	Credits
ME.100.709	Macromolecular Structure and Analysis	1.5
ME.100.710	Biochemical and Biophysical Principles	1.5
ME.110.728	Cell Structure and Dynamics	1.5
ME.250.703	Graduate Immunology	4
ME.250.709	Immunology Course Discussion	1
ME.250.722	Autoimmunity	1
ME.250.804	Introduction to Immunology Research (Parts I and II)	1
ME.260.709	Molecular Biology and Genomics	1.5
ME.260.708	Fundamentals of Genetics	2
ME.260.802	Special Studies and Research	0
ME.360.728	Pathways and Regulation	2
ME.800.707	Computational Biology and Bioinformatics	0.5

Laboratory Rotations

During the first year, each student engages in three short-term research projects. Each project lasts approximately three months and is carried out under the direction of a faculty member. Additional rotations may be scheduled based on student interest. The projects are designed to give you an introduction to experimental research and an opportunity to learn more about specific areas of immunology prior to choosing a thesis laboratory and project. After completing the research rotations, the student will select a mentor for their thesis project.

2nd Year

Elective Courses

Students are required to take five elective courses prior to graduation. Students can begin taking courses in the spring of their first year, but most students opt to start in their second year. There are many available advanced level graduate courses offered in the School of Medicine, Bloomberg School of Public Health, and the Kreiger School of Arts and Sciences. The Immunology Program specifically offers several courses, including Tumor Immunology and Immunotherapy, Immunometabolism, Translational Immunology, HIV Biology and more. Many of these courses utilize small group discussions, in which students read and discuss current and seminal research papers on the selected topic.

Oral Examination

In the fall of the second year of study, trainees will take the Graduate Board Oral Examination. By the time the students take this exam, they will have successfully completed all required coursework. This examination serves as a means of evaluating the student's cumulative knowledge in biochemistry, cellular and molecular biology, biophysics, genetics, and immunology and their preparedness to carry out research for the Ph.D. degree. The exam may cover the student's proposed dissertation topic, but this is not the focus of the exam.

Formation of Thesis Committee

In the spring of the second year of study, students will bring together 4-5 faculty members, including their mentor, to serve as their thesis advisory committee. The purpose of the thesis committee is to help the student move their research forward, provide networking opportunities and career development advice and to ensure the student successfully completes their degree. At the initial meeting, the student will prepare a written research proposal in the form of an NIH grant.

3rd Year and Beyond

Elective Courses

Students are required to take five elective courses prior to graduation. Students can begin taking courses in the spring of their first year, but most students opt to start in their second year. There are many available advanced level graduate courses offered in the School of Medicine, Bloomberg School of Public Health, and the Kreiger School of Arts and Sciences. The Immunology Program specifically offers several courses, including Tumor Immunology and Immunotherapy, Immunometabolism, Translational Immunology, HIV Biology and more. Many of these courses utilize small group discussions, in which students read and discuss current and seminal research papers on the selected topic.

Thesis Meetings

Students are required to have at least ONE thesis meeting per year, but are welcome to have more if desired. At each committee meeting, the student should present their research work, roughly following the format of the written proposal. The discussion can be, and often is, open-ended in nature. The student should be prepared to discuss:
1. Background and significance
2. Specific goals of the research (specific aims)
3. Work accomplished to date, including pertinent experiments that "did not work"
4. Future experiments (long and short term)

Thesis and Final Seminar

Upon completion of the thesis research, each student must prepare a formal written thesis, based on the guidelines provided by the Graduate Board of the University. Two readers must find the written thesis acceptable: the thesis advisor and another member of the Thesis

Advisory Committee. Students must also present a formal public seminar on their research. The program office will schedule the final seminar. All University guidelines for thesis preparation must be met. More detailed information on this process is available in the program office.

Required Program Events

The Graduate Program in Immunology offers a wide range of activities that serve to enrich the training experience. All students are required to participate in the program activities throughout their graduate career and this is a vital aspect of the training program.

Journal Club

Immunology Journal Club is intended to provide all graduate students in the Graduate Immunology Program the habit of reading a diverse range of immunology journal articles early in their graduate careers. Presenters are generally encouraged to present new developments and findings that are less related to their research focus. This will allow participants to explore new areas of immunology, familiarize themselves with key investigators in the immunology field, and to develop sharp and valid criticism of sound experiments. This is an invaluable opportunity to keep abreast of new advances as well as hone one's presentation skills in an informal setting.

Annual Immunology Retreat

The Graduate Program in Immunology holds an annual fall retreat. This is a one-day activity at an off-site location. The day includes poster presentations by all Immunology trainees (3rd year and above), a series of 5-6 short student oral presentations (4th years), and a keynote address by a distinguished invited speaker. This meeting provides students with an excellent opportunity to hone presentation skills in an informal retreat setting.

Immunology Floor Meeting

Students and faculty of the Graduate Program in Immunology gather regularly on Thursdays for the "Immunology Floor Meeting." At these meetings, two speakers from different labs will each give a 30 minute presentation on their research in progress. These presentations are designed to allow for the exchange of ideas in an informal atmosphere. The idea is to have people present, as if they were presenting at lab meeting, so we can exchange ideas at the frontier of our research. These are not to be highly polished presentations but a description of your project as it stands, with people encouraged to talk not just about exciting new results, but also about difficulties, troubleshooting, new techniques being attempted, ideas, etc. The speakers can be graduate students, post-docs, or even faculty members, and we hope the venue will be an excellent opportunity for honing our speaking skills.

Immunology Forum

Students are required to attend the Johns Hopkins Immunology Forum that is scheduled regularly on Tuesdays at 4PM. As an added bonus for the students, we provide lunch for the speaker and the students on Forum days. Seminar speakers come from various institutions in the United States and abroad and meet with faculty and trainees. Immunology students are given the opportunity to invite several speakers each year. On this date, the students extend the invitation, organize the schedule, and take them to dinner. The seminar coordinator will assist in this. Collectively these activities provide a powerful training opportunity, allowing trainees to not only hear an interesting seminar, but also to develop the skills and confidence enabling them to enter into scientific dialogue with a gifted scientist.

Medical and Biological Illustration, MA

The Medical and Biological Illustration (MBI (https://medicalart.johnshopkins.edu/admissions-mbi/)) program offers a robust curriculum (https://medicalart.johnshopkins.edu/curriculum/) designed to prepare future leaders in the medical illustration profession. Accredited since 1970, the MBI program offers courses in visual communication of medicine and life-sciences as well as graduate level science courses in the School of Medicine. Courses are directly related to technical, biological, or medical subject matter. Student assignments require problem solving and individual research. Complete understanding of the topic is required. Expertise in all media communication utilized by clinicians, research scientists, health science personnel, students, patients, and the public is stressed. Applicants must hold a bachelor's degree with courses in premedical sciences, and be able to demonstrate art skills and experience which they obtained through instruction in the fine and applied arts.

Basic medical science courses will be offered by the School of Medicine. Illustration and communications curriculum will be provided by the Department of Art as Applied to Medicine. Students may individualize their study depending on previous training, professional interests, and career objectives. All degree candidates must satisfy the requirements of the University, the School of Medicine, and the Department of Art as Applied to Medicine.

The MBI program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP (http://www.caahep.org/)) in cooperation with the Accreditation Review Committee for the Medical Illustrator (ARC-MI (https://ami.org/about-ami/ami-leadership/committees/)), which is a Committee of the Association of Medical Illustrators (AMI (https://ami.org/)). Current Accreditation: 2019-2026

Equipment and Fees

Each student is required to own a digital camera, a USB flash memory stick and an external portable hard drive.

Scholarships

Departmental scholarships are awarded to all students enrolled in the program and applied towards tuition fees.

The W. B. Saunders Company Fellowship in Art as Applied to Medicine This fellowship was established in 1964 in honor of Lawrence Saunders upon his retirement after 50 years of distinguished leadership in medical publishing.

The William P. Didusch Scholarship and Loan Fund An endowment for student tuition support in the Department of Art as Applied to Medicine was established in 1973 with a generous gift from Mr. Didusch. A significant contribution was added to this Fund from the estate of Bertha M. Trott whose death in 1973 ended a life filled with dedication and service to urologists at Johns Hopkins and elsewhere. Memorial contributions from friends and colleagues have been added to this Fund since the death of William P. Didusch in 1981.

The Kathleen Mackay Powell Memorial Fund An endowment to assist and benefit students in the field of medical illustration given in memory of Kathleen Mackay Powell who studied in the department (1930-31) under Max Brödel.

The Leon Schlossberg Scholarship Fund This scholarship was established in 1999 in memory of Leon Schlossberg (JHU ’35) and his lifetime association as a medical illustrator for the Department of Surgery and faculty member in Art as Applied to Medicine.

The Elinor Widmont Bodian Scholarship in Medical Art This scholarship fund was established in 2000 by Mrs. Bodian (JHU ’43) and her family to provide financial assistance to students in Medical Illustration.

The Chester Reather Scholarship in Art as Applied to Medicine An endowment established in Art as Applied to Medicine in honor of Chester Reather’s distinguished career as a medical photographer and research associate at The Johns Hopkins University School of Medicine. This fund is used to reward a graduate student with a scholarship for innovative research and creative use of new imaging technology.

The Frank H. Netter, M.D. Memorial Scholarship in Medical Art Frank. H. Netter, M.D. is known world-wide as a medical illustrator who could distill complex medical subject matter into clear, effective teaching images. Dr. Netter was not only a skilled draftsman, but knowledgeable in anatomy, physiology, and pathology through his medical training. Family and friends established this scholarship to recognize a student in Art as Applied to Medicine who displays a similar balance of medical and scientific knowledge with the artistic skills that Dr. Netter exhibited throughout his career. Winners of this award have excelled in their academic courses; displayed exceptional art expression; and most importantly utilized both resources to create well designed and effective didactic illustrations.

The Gwynne M. Gloege Scholarship Fund in Medical Art This scholarship fund was established in 2004 by Gwynne Gloege (JHU ‘56) to provide financial assistance to medical art students.

The Ranice W. Crosby Scholarship Fund An endowment for student tuition support in the Department of Art as Applied to Medicine was established in 2008 with a generous gift from the estate of Mrs. Crosby. Memorial contributions from friends and colleagues have been added to this Fund since her death in 2007.

Awards, Lectureship, and Support

The Annette S. Burgess Award The alumni of the Department of Art as Applied to Medicine contribute funds each year which provide for an annual award given to the student whose ophthalmological illustration is outstanding.

The Ranice W. Crosby Distinguished Achievement Award Through the generosity of alumni, colleagues, and friends, a medallion honoring Ranice W. Crosby, Director of Art as Applied to Medicine from 1943 to 1983, is awarded for scholarly contributions to the advancement of art as applied to the medical sciences. The recipient is selected by a committee at intervals of from one to three years.

The Samson Feldman Visiting Scholar in Art as Applied to Medicine Rossetta A. and Sadie B. Feldman, sisters of Samson Feldman, established a visiting lectureship to honor his life as an artist and lifelong patron of the arts. Lecturers are selected from distinguished scholars in visual communications with the purpose of presenting contemporary views pertaining to medical art. The selection of lecturers are made by a committee representing the Department of Art as Applied to Medicine.

The James M. and Carolyn H. Phelps Fund Support for the preservation and care of the Max Brödel Archives. This fund was established in memory of their parents by the Phelps family.

Admission Requirements

The goal of the Admissions Committee is to find students with intellectual curiosity and a passion to communicate medicine and science through dynamic visuals. We seek candidates who demonstrate high academic performance in science, particularly the life sciences, excellent draftspersonship in an art portfolio, and strong verbal and written communication skills.

Further details on the below Prerequisites can be found on the MBI Admissions web page (https://medicalart.johnshopkins.edu/admissions-mbi/).

Prerequisites

- A **Bachelor's degree** demonstrating a high level of scholarship (BS, BA, BFA, or similar)
- **Exemplary Science Preparation** which includes the following four courses:
  - General Chemistry
  - Vertebrate Anatomy* (with mammalian dissection lab)
  - Vertebrate Physiology*
  - At least one of these *specific* Upper-Level Biological Science courses:
    - Molecular Biology
    - Embryology
    - Immunology
    - Histology
    - Cell Biology (must be upper-level / Junior-Senior level)
- A Strong Art Portfolio (https://medicalart.johnshopkins.edu/sample-portfolio/) demonstrating ability to realistically render directly observed subject matter in the following categories:
  - General Drawing
  - Figure Drawing
  - Color Media
  - Graphic Design
  - Digital Media
- **Excellent Written and Verbal Communication Skills**
  - At least one course in English Composition**

* A two-semester sequence in Human Anatomy and Physiology (course 1 and course 2) may substitute for the Vertebrate Anatomy and Vertebrate Physiology prerequisite courses. A one-semester Human Anatomy and Physiology course may only substitute for one prerequisite.

** GRE or TOEFL scores may substitute for one course in English Composition

Degree Requirements

Graduate Program:

1. Each candidate must successfully complete all courses offered, and must submit a thesis on a subject approved by the program director. The completed thesis must be approved by a university qualified preceptor as worthy of acceptance in partial fulfillment of requirements for the M.A. degree. The candidate’s standing will be reviewed by the Committee on Masters and Ph.D. Programs before they are recommended for degree.
2. The student must satisfactorily complete all science courses: Molecular and Cellular Visualization, Neuroanatomy for the Medical Illustrator, Pathology, and Human Anatomy with Embryology.

3. Students must outline their thesis research and consult with their preceptor by the first quarter of the second year. The thesis will include original investigation and expository illustration, and may also include 3D digital or physical models, 2D or 3D animation, video, or immersive technology.

University:

1. A candidate's period of attendance in the program will be no less than 18 months. Transfer graduate students must register a minimum of two consecutive semesters as full-time residents.
2. Certification by the Department or Graduate Program Director that all requirements have been fulfilled.

Program Curriculum

The Medical and Biological Illustration (MBI) program offers a robust curriculum designed to prepare future leaders in the medical illustration profession. Accredited since 1970, the MBI program offers courses in visual communication of medicine and life-sciences as well as graduate level science courses in the School of Medicine. Courses are directly related to technical, biological, or medical subject matter. Student assignments require problem solving and individual research. Complete understanding of the topic is required. Expertise in all media communication utilized by clinicians, research scientists, health science personnel, students, patients, and the public is stressed.

A complete and updated list of courses is available on the MBI program's Curriculum page (https://medicalart.johnshopkins.edu/curriculum/).

First Year

The academic calendar for first year students begins the first weekday in August. The first year curriculum includes courses in advanced sciences, illustration, animation, 3D modeling, graphic design, instructional design, medical photography and business practices. These core courses encourage research, close observation, accuracy, effective visual communication, exploration of various media, and learning in the sciences that will inform a future in medical illustration.

Code	Title	Credits
ME.120.708	Introduction to Design	0
ME.120.709	Continuous Tone Illustration	1
ME.120.714	Editorial and Conceptual Illustration	8
ME.120.715	Biological Illustration	2
ME.120.716	Medical Sculpture	3
ME.120.717	Communications Media (Graphic Design)	1
ME.120.719	Anatomical Ilustration and Radiological Visualization	1
ME.120.720	Vector Illustration	2
ME.120.721	Raster Tone Illustration	3
ME.120.722	Introduction to 3D Modeling and Animation	2
ME.120.727	Neuroanatomy for the Medical Illustrator	2
ME.120.728	3D Animation	4
ME.120.733	2D Animation	3
ME.120.755	Business Practices for the Medical Illustrator	1
ME.120.807	Design of Interactive Learning Experiences	2
ME.130.600	Human Anatomy	7
ME.120.726	Molecular and Cellular Visualization	3

Second Year

The second year curriculum applies the skills and knowledge acquired in the first year coursework to advanced topics including surgical illustration, scientific writing, website development, interactive media, independent research and thesis, presentations to scientific audiences, and ophthalmological illustration. The second year culminates in the Portfolio course designed to help students transition to professional life.

Code	Title	Credits
ME.120.724	Web Animation, Interactivity and Design	3
ME.120.750	Surgical Illustration	7
ME.120.751	Ophthalmological Illustration	3
ME.120.754	Research and Thesis	11
ME.120.756	Operating Room Sketching	4
ME.120.757	Scientific Communication	1
ME.120.758	The Portfolio	4
ME.300.713	Pathology for Graduate Students: Basic Mechanisms	3

Elective Studies

Students in their Second Year may select from the following courses as an overload to their curriculum with the approval of the director. Hours and course content to be arranged with the Director and Instructor.

Code	Title	Credits
ME.120.801	Advanced Projects in Illustration	0
ME.120.813	Independent Study	1

Seminars are offered throughout the year introducing topics pertinent to the profession. Sample topics: illustration ethics, intellectual property, artist rights, art pricing. Department faculty and guest lecturers.

Medical Physics, MS

The program is designed for full-time students who wish to pursue a career as a medical physicist either as a researcher, as a certified clinical profession or in industry. The program will require successful completion of a minimum of 38 credits for Master's degree and completion of a research thesis (in conjunction with one or more of the faculty). Full-time master's students will complete the program in two years.

Admission Requirements

- B.S. degree or B.A. degree in physics, applied physics, or one of the physical sciences, including physics training at least equivalent to a minor
- Official transcript of school record, personal statement, three letters of recommendation, and curriculum vitae
- Demonstrated proficiency in written and spoken English (TOEFL/ IELTS required for non-native English speakers)
- General GRE exam scores are required (physics GRE is recommended)

Tuition and Fees for the 24 Month Program

A non-refundable application fee of $115 is payable by credit card at time of application. 2022-2023 tuition at the Johns Hopkins School of Medicine for full-time graduate students is $59,700. There is also a one-time matriculation fee of $740.

Resources

For more information on graduate education at the Johns Hopkins University School of Medicine, see: Johns Hopkins University School of Medicine Graduate Programs (https://www.hopkinsmedicine.org/som/education-programs/graduate-programs/)

Contact Information

Ms. Debra Race (drace@jhu.edu), Program Administrator

Dr. George Sgouros (gsgouros@jhmi.edu), Program Director

Program Requirements

This program consists of 38 credits (cr). There is also a research ethics and responsible conduct of research requirement.

Courses

Core Medical Physics Courses (20 Cr)

All Medical Physics students are required to take the following courses:

- Radiological Physics and Dosimetry (3 cr)
- Radiobiology (3 cr)
- Radiation Therapy Physics (3 cr)
- Radiation Protection and Safety (3 cr)
- Fundamentals of Human Physiology (4 cr) Public Health crs
- Medical Imaging Systems (3 cr) Engineering crs
- Research Ethics I and II (0 cr)*
- Responsible Conduct of Research (0 cr)*
- Medical Physics Seminar (.5 cr) *must be taken first three semesters, but only 1 credit can be counted toward degree requirement*

*University requirement for graduation; no credit

OTHER REQUIRED COURSES (6 cr)

All MP students are required to take the following additional courses.

- ME.420.xxx Nuclear Medicine Imaging (3 cr) fall Yr 2
- ME.420.xxx Radiopharmaceutical Imaging and Therapy (3 cr) spring Yr 2

Research Project (6 Cr)

Students are required to take at least 6 cr of independent research project or Master's thesis research.

Elective Courses (6 Cr)

Student shall take 6 (or more) additional credit hours from the following list of courses or other courses as approved by the Program Director.

SOM Medical Physics (EB campus)

- ME.420.xxx Advanced Image Reconstruction (3 cr)
- ME.420.xxx Quantitative Imaging Analysis (3 cr)
- ME 420.xxx Molecular Imaging (3 cr)

PH Biostatistics (EB campus)

- PH.140.615 Statistics for Laboratory Scientists I (4 cr)

Biomedical Engineering (Homewood campus)

- EN.580.640 Systems Pharmacology and Personalized Medicine (4 cr)
- EN.580.674 Introduction to Neuro-Image Processing (3 cr)
- EN.580.679 Principles and Applications of Modern X-ray Imaging and Computed Tomography (3 cr)
- EN.580.693 Imaging Instrumentation (4 cr)

Electrical and Computer Engineering (Homewood campus)

- EN.520.623 Medical Image Analysis (3 cr)
- EN.520.631 Ultrasound and Photoacoustic Beamforming (3 cr)
- EN.520.659 Machine Learning for Medical Applications (3 cr)

Neuroscience, PhD

The Department of Neuroscience offers an interdisciplinary program designed to train doctoral students for independent research and teaching in neuroscience. It is the goal of the program to ensure that candidates for the Ph.D. and M.D./Ph.D. degrees obtain a background covering molecular, cellular, systems, and cognitive approaches to neuroscience, as well as receive training that brings them to the forefront of research in their particular area of interest. A series of core courses in neuroscience, along with advanced electives, seminar series, laboratory rotations, and original independent dissertation research, form the Neuroscience Graduate Training Program.

Students enter the program from different backgrounds and the laboratories in which they elect to work cover different disciplines; therefore, the program is tailored to fit the needs of individual students. The academic year at the Johns Hopkins University School of Medicine is divided into four quarters plus a summer semester. Courses are designed so that students have ample time to become involved in laboratory rotations. These laboratory rotations expose the student to a variety of current research techniques in neuroscience and provide an opportunity for the student to select a laboratory in which to conduct dissertation research. Scheduling of the three rotations is adjusted to make the most convenient schedule for each student. The rotations are usually completed by the end of the first full year in the program. Most students begin their thesis research at the beginning of their second year.

For more information, please visit The Solomon H. Snyder Department of Neuroscience webpage: http://neuroscience.jhu.edu. (http://neuroscience.jhu.edu)

Financial Aid

The program provides tuition remission plus a stipend at or above the National Institutes of Health Predoctoral level for all students. All entering and first-year students are encouraged to apply for individual fellowships such as those sponsored by the National Science Foundation and the Howard Hughes Medical Institute.

Admission Requirements

Applicants should have a B.S. or B.A. with a major in any of the biological or physical sciences. Recommended course requirements for entry into the program are mathematics through calculus, general physics, general biology, general chemistry, and organic chemistry; laboratory research experience is desirable but not required. Students with deficiencies in one or more of these areas may be admitted, provided they remedy the deficiency within their first year of graduate training.

Applications for admission are available online at http://www.neuroscience.jhu.edu. Applicants are required to take the Graduate Record Examination or Medical College Admission Test, and are encouraged to take the examinations in November or earlier. Two letters of recommendation, transcripts of undergraduate grades, and a statement on interest are required. December 8 is the deadline for receipt of the application form and all application materials.

Program Requirements

Courses

A year-long core course provides an integrated overview of molecular and cellular neuroscience, neuroanatomy and systems, and cognitive neuroscience. This course is aimed at providing Neuroscience graduate students with a foundation for posing meaningful questions in their area of interest. In addition to the core course, each student selects advanced electives offered by members of the Neuroscience Training Program or other departments at the Medical School. A list of Neuroscience courses can be found in the department statement on page 219.

Seminar Program

The Neuroscience Training Program conducts several seminar series to ensure that students are exposed to recent work by researchers from across the country and the world as well as by Hopkins faculty and fellows. Graduate trainees participate actively in these series throughout their training, including inviting and hosting three speakers each year. A weekly lecture is given by an outstanding researcher in some field of neuroscience. Seminars are selected so that an overall balance of subject matter is covered yearly. Students are given an opportunity to meet with each speaker for questions and discussion. Weekly lunchtime talks are presented on current literature by graduate students and postdoctoral fellows. Since an ability to communicate scientific work clearly is essential, graduate students receive close guidance in preparing and evaluating their journal club presentations. Once a month, the faculty, postdoctoral fellows, and students from one laboratory present and discuss the ongoing research in that laboratory. This provides an informal setting to discuss research being conducted in the laboratories of the Neuroscience Training Program and gives advanced graduate students and postdoctoral fellows a forum for presenting their work.

Requirements for the PhD Degree

A minimum residency of two academic years is required. During the course of graduate study, the student must successfully complete the required course requirements. An oral examination, conducted as prescribed by the Doctor of Philosophy Board, must be completed by the end of the second year. The student must then conduct original research and describe this research in a written thesis dissertation, which must be approved by the students Thesis Committee and the Doctor of Philosophy Board.

Training Facilities

The Training Program is centered in the Department of Neuroscience. The Training Program utilizes laboratory facilities located in the Department of Neuroscience plus several other basic and clinical departments closely associated with the Neuroscience Department. All of these laboratories are within a short distance of each other. Modern state of the art facilities for research in molecular biology, neurophysiology, pharmacology, biochemistry, cell biology, and morphology are available. The Mind/Brain Institute, located on the Homewood Campus of the University, is a group of laboratories devoted to the investigation of the neural mechanisms of higher mental function and particularly to the mechanisms of perception. All of the disciplines required to address these questions are represented in the Institute. These include neurophysiology, psychology, theoretical neurobiology, neuroanatomy, and cognitive science. All of the faculty in the Mind/Brain Institute are members of the Neuroscience Graduate Program.

Combined M.D./Ph.D. Program

About one quarter of the current predoctoral trainees in the Neuroscience Program are candidates for both Ph.D. and M.D. degrees. Applications for admission to the combined program are considered by the M.D./Ph.D. Committee of the School of Medicine. Application forms for the School of Medicine contain a section requesting information relevant to graduate study. Applicants interested in the combined M.D./Ph.D. program should complete this section also, and indicate specifically their interest in the “Neuroscience Training Program”. If application to the combined M.D./Ph.D. program proves unsuccessful and the applicant wishes to be considered for graduate studies, they must notify the Admissions Office of the Neuroscience Training Program by separate letter.

Pathobiology, PhD

Program Overview

Pathology is an integrative discipline that looks simultaneously at the whole organism and its component cells, tissues, and molecules to study the causes and mechanisms of disease. It is a discipline that strives to understand the mechanisms of disease at fundamental levels, and to apply this understanding to improve management of these diseases in the clinical setting. The **Pathobiology Graduate Program** provides a strong background in pathology and related basic sciences to prepare students for academic, research, teaching, and biotechnology careers.

Program of Study

The Graduate Program in Pathobiology of the Department of Pathology offers a program of study leading to the Ph.D. degree in Pathobiology.

The Program provides students with opportunities to elucidate the mechanisms and origins of human diseases through an integrative approach emphasizing systemic processes based on molecular and cellular pathologic underpinnings. Students are prepared with formalized classroom instruction in all general areas of disease mechanisms and undertake specialized training (including thesis research) one of five programmatic areas: Immunopathology; Microbiology & Infectious Disease; Neoplasia; Neuropathology; Vascular Biology & Hemostasis.

Applicants are not required to designate a specific programmatic area of interest at the time of application or matriculation, and laboratory rotations across multiple disciplines are typical for students in the Program. However, special funding opportunities may be available for applicants with commitment to a particular discipline.

Pathobiology encompasses fundamental and applied studies of the biological basis of disease. Like the discipline of pathology itself, it straddles the traditional basic and clinical sciences. Research in Pathobiology is typically aimed toward the discovery of the basic mechanisms that cause disease with the goal of developing fresh insights leading to improved treatments or preventative measures. Thus, the students in the Pathobiology program are prepared for careers in the translation of basic biological principles to solve specific disease problems.

Learner Mental Health and Well-Being

The health and wellness of students are of utmost importance to us here at Johns Hopkins. Students struggling with anxiety, stress, depression, or other well-being-related concerns, can contact the Johns Hopkins Student Assistance Program (JHSAP at jhsap.org (http://jhsap.org/)). Additional resources are available at https://www.hopkinsmedicine.org/getting-help (https://www.hopkinsmedicine.org/getting-help/).

Students with a disability or any health issue may request accommodations and are encouraged to contact the School of Medicine Disabilities Services Coordinator for graduate students to discuss your specific needs (Kristina Nance, GradDisabilityOffice@jhu.edu).

Diversity and Inclusion

At Johns Hopkins we strive to be a model of a pluralistic society in which we acknowledge, embrace, and engage diverse identities, perspectives, and experiences. We seek to build and buttress an inclusive intellectual and physical environment to ensure that all members of our community know with certainty that they belong at Johns Hopkins. And we aspire to equitably share the benefits and burdens of dismantling persistent systemic barriers to individual and communal success.

We believe, fundamentally, that every person has equal dignity and worth, and our unwavering commitment to diversity, equity, and inclusion is rooted in this predicate principle. These core values are essential to our university's academic, research, and public service missions, and bolster our commitment to excellence. Our search for truth and knowledge for the good of humanity depends on bringing the greatest variety of viewpoints and voices to bear on the challenges before us as students, scholars, staff, neighbors, and citizens.

At the intersection of these values is justice. Over the course of history, our nation and university have breached the ideals of justice by discriminating on the basis of race; ethnicity; sex; gender identity and expression; religious belief and observance; disability; socio-economic status; veteran/military status and other factors. We recognize the painful truth that such discrimination has inflicted multigenerational harm and further disenfranchises members of our society. Although our polity and our institution have made meaningful progress, we are by no means past the injury and loss caused by discriminatory practices.

Johns Hopkins assumes its responsibility as a leading research university to work to achieve diversity, equity, and inclusion, and we hold ourselves accountable for our progress through transparency, open communication, and an ongoing, unflinching assessment of met and unmet needs.

More details and resources can be found at the following link: jhu.edu/diversitystatement (https://jhu.edu/diversitystatement/)

Facilities

Classroom instruction is conducted in the lecture, seminar, and conference rooms of the School of Medicine. Student research is conducted in the state-of-the-art research facilities of program faculty. These fully equipped laboratories support studies ranging from molecular, cellular, and physicochemical analyses through whole animal and informatics-based techniques. The Program takes special advantage of its clinical service laboratories and clinical activities to familiarize students with and provide resources for translational research.

Financial Aid

Candidates accepted into the Program are offered full support providing payment of tuition, health, dental and vision benefits as well as a stipend for the duration of their studies. For more details regarding financial aid opportunities, please visit their page at https://www.hopkinsmedicine.org/som/offices/finaid/.

Admission Requirements

Students typically matriculate in July or August. The following 6 key elements for are required for application and ultimately for admission into the Program:

1. a bachelor's degree from a qualified college or university;
2. your updated CV;
3. coursework with laboratory in inorganic & organic chemistry, general biology, and calculus;
4. transcripts of undergraduate grades;
5. a minimum of three letters of recommendation; and
6. a one-to-two page personal statement including your research and career goals.

GRE Scores Not Required. As of Sept, 2019, when applying to the Graduate Program in Pathobiology, we no longer require the **GRE General or Subject Tests scores**, however if taken, applicants are invited to share their scores.

Underrepresented minority students are strongly encouraged to apply and to contact the program directors for guidance. Personal interviews at Johns Hopkins are preferred.

Inquiries should be directed to:

Stacey R. March, Sr. Academic Program Coordinator
Graduate Program in Pathobiology
The Johns Hopkins University School of Medicine
E-mail: smorgan9@jhmi.edu (pathobio@jhmi.edu)
https://pathology.jhu.edu/education/phd-program (https://pathology.jhu.edu/education/phd-program/)

PROGRAM AND SOM REQUIREMENTS

GRADUATE STUDENT POLICIES

All students are expected to read and follow guidelines stated in current posted policy available at the following link: https://www.hopkinsmedicine.org/som/training/graduate-programs/academics/academic-resources/policy-finder.html

LIST OF PATHOBIOLOGY REQUIREMENTS FOR GRADUATION:

Required Core Courses:

ME.300.800 Research in Pathobiology *(ongoing throughout PhD study)*

ME.800.803 Pathobiology Journal Club *(ongoing throughout PhD study)*

ME.300.713 Pathology for Graduate Students: Basic Mechanisms of Disease

ME.100.716 Analysis of Macromolecules: Energetics, Structure and Function

ME.260.709 Molecular Biology and Genomics

ME.110.733 Principles of Genetics

ME.110.728 Cell Structure and Dynamics

ME.360.728 Pathways and Regulation

ME.250.703 Graduate Immunology

ME.300.710 Pathobiology and Disease Mechanisms

ME.300.714 Pathology for Graduate Students: Cancer

ME.300.716 Pathology for Graduate Students: Immunology and Infectious Disease

ME.300.715 Pathology for Graduate Students: Neuropathology

ME.300.717 Grant Writing 101 *(2nd Year)*

ME.300.711 Introduction to Translational Research I *(during or after 3rd Year)*

ME.300.712 Introduction to Translational Research II *(during or after 3rd Year)*

Research Ethics I and II

Procedures for Choosing Rotations and a Thesis Environment:

1. Each student will complete 3 research rotations prior to selecting a thesis laboratory. A fourth rotation may be completed if desired.
2. Upon starting the rotation, students and their rotation mentors will complete the Rotation Plan form.
3. Upon completion of the rotation, the mentor will provide an evaluation of the student's work.
4. Students will present their rotation work at the Pathobiology Journal Club or at the annual Pathobiology retreat.
5. The 3 required rotations must be completed during the first year and are traditionally completed with Pathobiology faculty members. Outside Pathobiology faculty rotations may been completed, however these must be approved by the program director(s). If a student chooses to undertake their thesis research with an outside faculty member, the faculty member will need to be considered first by the Pathobiology Executive Committee before joining the program faculty.
6. Each research rotation will be about 3 months in length, with the exception of summer rotations. A full-time summer rotation (July-August) will be about 2 months in length.
7. The student must select a thesis advisor no later than 1 year from the date of admission to the program. **In general, students will not be permitted to conduct their thesis research in a laboratory where they have been previously employed. Any exceptions to this policy will be determined by the Pathobiology Executive Committee.
8. Faculty Advisors Groups: each student, along with a group of other students, will be assigned an faculty advisor during the time period between starting the program and choosing a thesis advisor. The group will meet with AT LEAST once every 4 months. These meetings will be initiated by the group's senior student leader (appointed by the Program).

Oral Examination

The Graduate Board Oral Examination tests the breadth and depth of the graduate student's scientific knowledge and readiness to begin thesis research. These exams are administered by the Pathobiology program through an oral examination committee consisting of 3 faculty members. This preliminary oral examination will be scheduled by lottery at the end of the first year meeting with the Program Director. The exam takes place during October after the student has completed all required first year courses. The exam is required for graduation.

Thesis Advisor and Advisory Committee

After the first year is completed, the student will choose an advisor from the Pathobiology faculty. After completing the Oral Examination for the Ph.D. Degree for the School of Medicine Programs, a Thesis Advisory Committee will be formed to monitor the student's thesis research progress. The student, with the consent of their advisor, decides on the composition of the thesis committee. The thesis committee consists of at least three experts in the student's field of study or related fields. Committee members help with research direction and technical challenges, and oversee the student's progress until research is complete and the doctorate is awarded. Students must meet with their Committee at least once per year to review progress.

Electives

All students in their second year and beyond are required to take a one-semester elective course for credit in each academic year. Courses may be taken for a grade or pass/fail. Students may choose a course offered in the Johns Hopkins Medical Institutions, or on the Homewood Campus subject to approval by the Program Director.

Translational Rotations (2 required)

The objectives of these rotations are to give graduate students an interactive exposure with the clinical diagnostic dimension of Pathology. Students should learn the fundamental clinical questions, the current state of the technologies to address these questions, and how basic science can be translated to advances in diagnostic and therapeutic modalities. Students must complete 2 translational rotations as a graduation requirement. These rotations need not require an experimental project involving bench work. If the student wishes to complete such a project, it should be decided jointly between the student and rotation advisor.

Departmental Thesis Seminar

Shortly before your submission of graduation materials, you must present your thesis work to the department in a one-hour talk.

Seminars, Journal Clubs, and Lab Meetings

Graduate students are required to attend the weekly Pathobiology Journal Club Course and all are expected to attend weekly Pathobiology lunch meetings as well as all lab meetings in their mentor/thesis advisor's departments throughout their training period. Students are encouraged to attend the many seminars presented by invited speakers who are involved in cutting edge research.

Pathobiology Annual Retreat:

The annual Pathobiology Retreat (held in early Fall), from 8:00 a.m. to 4:00 p.m. includes a series of short research talks by senior students and poster presentations by second-year and beyond students. Attending keynote speaker(s) will deliver a special lecture and faculty members and alumni will discuss their research. All members of the Pathobiology Graduate Program are expected to participate in this event.

Pathology Young Investigators' Day

The Departmental Young Investigators' Day (held March/April) provides residents, fellows, and students with the opportunity to present their clinical, basic, or translational research efforts. This activity allows faculty, fellows, residents, and students to learn more about the diverse ongoing research in the Pathology department. All fellows, residents, graduate students and medical students working with a faculty member who holds an appointment in the Department of Pathology or the Pathobiology Program are invited to submit abstracts and present posters at the annual event.

Graduate Student Association Poster Session
The Graduate Student Association Poster Session is held every year. This gives the students the opportunity to showcase their research to both faculty and peers.

AWARD OF THE PhD DEGREE AT THE JOHNS HOPKINS UNIVERSITY

```
Administrated by the Doctor of Philosophy Board
```

From the Doctor of Philosophy Board website:
*The SOM policy is based on NIH guidelines (*https://grants.nih.gov/policy/index.htm (https://grants.nih.gov/policy/)*). Students must receive training that includes a significant small-group component, allowing issues to be openly discussed with fellow students and faculty discussion leaders. A training program should provide at least eight hours of class time -- with at least three hours of face-to-face discussion -- and address at least the following topics:*

1. *The scientist as a responsible member of society*
2. *Research misconduct*
3. *Data acquisition and management*
4. *Authorship and publication practices*
5. *Mentor and trainee responsibilities*
6. *Use of animals in research*
7. *Conflicts of interest*
8. *Collaborative research*
9. *Human subjects if applicable*

It is the responsibility of each program to design a curriculum that satisfies these requirements. Contact the Associate Dean for Graduate Biomedical Education for any questions.

Degree Requirements:
There are three fundamental requirements for the Ph.D. at Johns Hopkins University: dissertation, residence, and oral examination. None of these requirements can be modified or changed without unanimous consent of the schools and the Provost.

1. ***Dissertation:*** *All Ph.D. students must successfully complete a dissertation in accordance with relevant school and program guidelines prior to degree conferral.*
2. ***Residence:*** *All Ph.D. students must have completed two consecutive semester of full-time study prior to degree conferral.*
3. ***Oral Examination:*** *All Ph.D. students must successfully pass a required oral examination conducted by five faculty members. The oral examination must include the chair and at least one other member from outside the candidate's home department.*

It is university policy that all program and university requirements for the Ph.D. must be completed in 9 years or less from start of the doctoral program. The Doctor of Philosophy Board reviews all candidates for the Ph.D. prior to conferral to ensure that the fundamental requirements for the Ph.D. have been met within the time frame delineated.

Over about a 5 year period, our trainees achieve a deep working understanding of the biology of human aging and human diseases, as well as state-of-the-art and high-throughput experimental approaches related to human disease. We accomplish our mission through a curriculum and environment that are **different and unique**. We encourage change, creativity, and out-of-the-box reasoning. The intensive coursework during the first year of training is designed to build a foundation in contemporary molecular, cell and structural biology, signal transduction pathways, neurobiology, genetics and genomics, immunology, and bioinformatics, all filtered through the prism of human pathology and translational medicine. These classes along with 3 lab rotations, and oral presentations based on this work, culminate with the student selection of a thesis lab headed by a faculty member who is accredited for mentor-compliancy by institutional and programmatic review.

A unique aspect of the program is the inclusion of **translational rotations** in a clinical pathology setting; these rotations directly reinforce the humanity, compassion, and importance of the student's research project to the ultimate goal of alleviating suffering caused by human diseases. Most students garner peer-reviewed publications during their training, and some successfully compete for NIH F31 individual training grants. Using coursework, supplemental library-based teaching tools, annual program retreats, as well as weekly journal clubs and discussion, scientific ethics, rigor, reproducibility, transparency and logic, and moral values are inculcated as Kantian categorical imperatives. The outstanding, interdisciplinary, and diverse programmatic and collaborative faculty and resource-rich environment act as catalysts for students to explore, thrive, and consolidate their novel research to launch their careers.

Historically, pathobiology graduates are well-trained biomedical scientists and have successfully embraced varied career paths and leadership positions in **academia (63%)**, **industry (17%)**, medicine, clinical laboratory medicine, entrepreneurship, business, government, and science writing. The Graduate Program in Pathobiology strives for students to have an important, global impact on the pathologic basis of human disease and health-related research.

Pharmacology, PhD

The Department of Pharmacology and Molecular Sciences hosts the Pharmacology Graduate Program, which offers a program of study and research leading to the Ph.D. degree. Research training opportunities within the program cover a broad spectrum of biomedical sciences including chemical biology, immunology, virology, cancer, and neuroscience. The mission of departmental research is to understand the molecular processes underlying physiology and pathology, and to apply this knowledge to discovering new drug targets and developing novel therapeutics. Within the program, students may choose to focus their efforts in any of a large number of specific research areas including signal transduction, structural biology and drug design, NMR spectroscopy, molecular genetics, cancer chemoprevention, viral immunosuppression, cancer immunology, cell-mediated immunity, mechanisms of HIV infection, vaccine development, glycobiology, biomedical mass spectrometry, clinical pharmacology, drug delivery, anti-parasite drug development, histone acetylation and gene regulation, melatonin and circadian rhythm, drug metabolism, Vitamin D pharmacology, natural product biosynthesis, telomerase and chromosome stability, T cell activation and tolerance, DNA repair, DNA topoisomerases, molecular imaging, and the clinical pharmacology of cardiovascular agents. The department is also pleased to host students and award doctoral degrees to M.D./Ph.D. degree candidates and students in other Ph.D. graduate programs in which Pharmacology faculty participate (Biochemistry, Cellular and Molecular Biology, Cellular and Molecular Medicine, Immunology, Neuroscience, and Pathobiology).

Financial Support

Financial support covering normal living costs, individual medical insurance, and tuition is usually provided.

Admission Requirements

Applicants should have a B.A. or B.S. degree with a major in any of the biological or physical sciences. Entering students are expected to have completed college-level courses in chemistry (inorganic, organic, and physical), calculus, and physics; a strong background in biochemistry is particularly desirable. A completed application form, at least three letters of recommendation, undergraduate transcripts, and a statement of interest must be received by December 8th.

Program Requirements

Students in the Pharmacology program are able to select a course of studies uniquely suited to their own career goals. It is usually required that students successfully complete the following courses:

Code	Title	Credits
First Year		
ME.100.716	Analysis of Macromolecules	2
ME.260.709	Molecular Biology and Genomics	1.5
ME.330.709	Organic Mechanisms in Biology	2
ME.110.728	Cell Structure and Dynamics	1.5
ME.360.728	Pathways and Regulation	2
ME.360.720	Organ Physiology	6
ME.330.802	Topics in Pharmacology (Weekly seminar series. Yearly registration is required.)	0.5
ME.330.708	Primary Source Readings and Analysis	0.5
Second Year		
ME.330.707	Graduate Pharmacology I	2
ME.330.715	Graduate Pharmacology II	2
ME.330.714	Essential Grantsmanship: Writing the Research Grant Proposal	1
PH.140.615	Statistics for Laboratory Scientists I	4

Students must also take two advanced elective courses selected from those offered by this or other departments.

During their first year of study, students will complete ~10-week research rotations in addition to their coursework. They will initiate dissertation research by the end of their first year and complete elective courses relevant to their developing interests in subsequent years of training.

During the second year of study, students will be required to pass a qualifying examination conducted as prescribed by the Doctor of Philosophy Board of the University. This examination will probe the depth and breadth of the student's knowledge of the biomedical subjects taught in the core courses.

The candidate is required to present a written dissertation based on original research undertaken while in residence as a graduate student and to present a departmental seminar describing the thesis research.

Combined M.D.-Ph.D. Degrees

Students seeking admission to or who are already participating in the M.D. program in the School of Medicine may participate in a program leading to both the M.D. and the Ph.D. degrees.

Medical Program

Doctor of Medicine, MD

Curriculum

The curriculum is organized to allow each of our graduates to achieve the eleven educational objectives noted in the Mission and Medical Education Program Objectives for the Johns Hopkins University School of Medicine (p. 909). The regular M.D. curriculum comprises four academic years designated First through Fourth Years. The academic requirements of this program can be combined with graduate study leading to a Master's or Ph.D. degree.

The Genes to Society curriculum is highly integrated both vertically and horizontally across the four years. Elective time is available beginning in Quarter 4 of the Second Year. Elective courses are described in the programs of the various departments in the section under Departments and Divisions, Centers, Institutes, and Subjects of Instruction. This information is supplemented by an elective book which is updated annually. Selected students may interrupt the regular curriculum for one or more years in order to pursue special studies.

The study of science basic to the practice of medicine begins in the First Year with four months of Foundations courses, including Foundations of Human Anatomy, Scientific Foundations, Clinical Foundations, and Foundations in Public Health: Epidemiology, Ethics, and the Health Care System. These courses are intended to introduce students to the basic language and concepts of biomedical science, including molecular biology, cell biology, biochemistry, anatomy, and the social and behavioral sciences. During Clinical Foundations, students begin training in the physician-patient medical interview, physical diagnostics, and clinical reasoning. Each student is assigned a college advisor (see Student Advising, page 77) upon entry to medical school, who serves as the instructor in Clinical Foundations, and academic and career advisor for the remainder of the four years.

Following winter break in First Year, students begin an 18-month organ systems-based course, Genes to Society, which presents genetics, molecular biology, advanced anatomy, physiology, pathology, pathophysiology, and clinical presentations related to each organ system. Dermatology, Immunology, Infectious Disease, Hematology/Oncology, Brain, Mind and Behavior, and Nerve and Special Senses are covered in the First Year. One half-day per week is devoted to a precepted clinical experience, the Longitudinal Ambulatory Clerkship, which provides further training in patient-centered interviewing, physical diagnosis, and health care systems.

Beginning with the first week of medical school and periodically in between courses, 3-day TIME (Topics in Interdisciplinary Medicine) courses will focus students on a multidisciplinary topic related to the social and behavioral sciences. The First Year TIME courses are Disparities and Inequalities in Health Care, Obesity, Nutrition, and Behavior Change, High Value Healthcare, Clinical Informatics, Global Health, Pain Care, and Disaster Medicine. Students will have a variety of lecture and small group discussions supplemented by experiential and skill learning in each course. In the afternoons of these TIME courses students will be attending a Scholarly Concentration course in one of five concentrations: Basic Science Research, Clinical Research, Public and Community Health Service, Ethics and the Art of Medicine, and History of Medicine. Beginning as a seminar series, each student will eventually complete a mentored scholarly project by the end of the Second Year of study.

Second Year students return in late August to complete the Genes to Society course in the following organ systems: Pulmonary, Renal, Cardiovascular, GI/Liver, Endocrine, Reproductive, and Musculoskeletal. The Longitudinal Clerkship continues one-half day per week until the winter break. The TIME courses in the Second Year are Substance Abuse Care, Patient Safety, and End-of-Life and Palliative Care. The Genes to Society course ends in February of the Second Year, and is followed by a 3-week Transitions to the Wards course, which provides intensive training in procedural skills, team communication skills, and clinical reasoning in preparation for the hospital-based clerkships that follow.

In the final quarter of the Second year, students begin the core clinical clerkships. These are 8-week rotations in the clinical disciplines of Medicine, Surgery, Pediatrics, Women's Health, 4-week rotations in Neurology and Psychiatry, and a 4.5-week rotation in Emergency Medicine. A week of Translational Medicine is required after each 8-week clerkship; during these weeks, students will return to a discussion of state of the art biomedical investigation. Students may elect to delay one 8-week rotation in the next 5 quarters, but must complete this required core of rotations by the end of the first quarter in Year 4. Two one-month advanced clinical rotations are required prior to graduation: a Subinternship and either the Advanced Critical Care Clerkship or the Advanced Adult Ambulatory Clerkship.

The clinical clerkships are devoted to the study of health and disease in the various clinical departments of the School of Medicine, The Johns Hopkins Hospital, Johns Hopkins Bayview Medical Center, Howard County General Hospital, Johns Hopkins All Children's Hospital, Sinai Hospital of Baltimore, Anne Arundel Medical Center, St. Agnes Hospital, and other affiliated hospitals. Students are introduced to practical clinical problems through instruction and participation in a health care team. Elective courses available in every department range from direct participation in current biomedical research to advanced clinical work. Many clerkships and elective courses may be taken during the summer.

In addition to the advanced clinical clerkships noted above, students are required to complete a 2-week course in the Fourth Year designed to refresh clinical skills and prepare them for internship. This course, Transition to Residency and Internship and Preparation for Life (TRIPLE), is offered twice in the spring of the Fourth Year, and includes simulation-based training, advanced cardiac life support, and advanced communication skills.

The academic year for first year students begins in August and ends in mid-June. There is a winter break in December and a spring break in March.

Between the First and Second Years, there is a summer vacation of eight to nine weeks when students may engage in research or other studies. Students must arrange their schedules to include, between the start of the fourth quarter of the Second Year and graduation in May of the Fourth Year, 7 quarters and 2 weeks of required clinical clerkships and 24.5 weeks of elective work; two additional vacation periods may also be scheduled. At the student's discretion, vacation quarters may be used for research, board preparation, or additional elective study. Graduating students cannot schedule required clerkships during the fourth quarter of the Fourth Year, unless approved by the Associate Dean for Student Affairs.

The total number of students in each class of the regular four year program is 120.

Electives

Programs in which elective study and research leading to graduate degrees are integrated with the medical program are described in a later section ("M.D.-Ph.D. Programs"). A limited number of stipends are available for students who wish to devote one full year to research.

Approval may be granted for elective study at institutions other than the Johns Hopkins University. In such instances, the student must present a description of the elective including goals and objectives to the Associate Dean for Student Affairs for approval. Electives are generally 4-4.5 weeks in length, and may not overlap with required courses for Johns Hopkins School of Medicine students. One of the required 2 $^{1/4}$ elective quarters may be taken at another non-affiliated medical institution. Students desiring to study at other institutions must make final arrangements through the Office of the Registrar of the Johns Hopkins University School of Medicine.

Students visiting other institutions and those who devote their free time to elective courses in this institution will be held responsible for proficient work just as in the case of the required subjects of instruction.

Formal registration for elective quarter programs is through the Office of the Registrar of the School of Medicine. The elective work for the Second through the Fourth Years is denoted by the symbol E (e.g., Neurology E). Such courses are listed numerically by department or sub-department. The catalogue does not list all elective courses. The Elective Book, an up-to-date description of all elective opportunities, is maintained by the Registrar and is available from the Registrar's Office or the following website: http://www.hopkinsmedicine.org/som/students/Academics/electives.html.

Required Work

The required departmental work for each course and core clerkship is usually regarded as a unit. It may be offered and graded as a single course, although the catalogue may indicate various course elements that comprise the whole. Formal registration for all required courses must be made through the Registrar of the School of Medicine.

Requirements for M.D. Degree

To be eligible for the M.D. degree, candidates must successfully complete the prescribed course of study of the First through the Fourth Years.

Preparation for Medical School

The courses taken and the grades earned are but a portion of an applicant's credentials. Certain areas of study (i.e. introductory biology, chemistry, physics and organic chemistry with associated laboratory exercises, and calculus) have traditionally been of value to medical students. Beyond the successful fulfillment of these basic prerequisites the Committee on Admissions is concerned solely with the quality and scope of an applicant's undergraduate educational experience. The field of concentration for undergraduate studies and the selection of additional courses in the sciences and mathematics should be the choice of the student and will not affect the admissions process.

Requirements for Admission

The following general requirements must be met by all applicants:

1. **Accredited Institution**. All applicants must be or have previously been in attendance at an institution on the list entitled "Accredited Institutions of Postsecondary Education," authorized and published by the American Council on Education, One DuPont Circle, N.W., Washington, D.C. 20036. Extension or evening courses taken in fulfillment of premedical course requirements are not acceptable unless they are identical to courses offered in the college's regular academic program. Preparation in foreign universities, in most cases, must be supplemented by a year or more of course work in an accredited United States university. The School of Medicine accepts prerequisites completed at the community college level. The change in policy acknowledges that as part of the holistic review process used to select applicants to interview at Hopkins, many factors are considered. These factors include the rigor of the applicant's course of studies, grades, MCAT scores, clinical and research exposure, letters of recommendation, personal statement, and the applicant's understanding of medicine. In addition, we consider the path the applicants have taken which led to their desire to apply to medical school and become a physician.
2. **Required Academic Work.** A list of specific pre-medical course requirements may be found under Course Requirements for Regular MD and MD-PhD Applicants. In order to assess the classroom performance of an applicant, the Committee on Admission requires that all of the coursework submitted in fulfillment of admission requirements must be evaluated on the basis of a traditional grading system. Such a system must employ a range of numbers or letters to indicate the comparative level of performance. If the applicant has received a grade of Pass/Credit for any of the specified premedical course requirements, the instructor must supply, in writing, a statement evaluating the student's performance in that course. CLEP credits may not be substituted for any course requirement.
3. **Conditions of Admission.** Students admitted to the School of Medicine on a conditional basis (i.e., requirement(s) yet to be completed) must fulfill those conditions prior to matriculation in the School of Medicine.
4. **Standardized Testing.** The Medical College Admissions Test (MCAT) is required for acceptance. The MCAT must be taken no later than September in the year the application is submitted. The oldest MCAT considered will be from four years prior to the year of matriculation.
5. **Letters of Recommendation.** A recommendation from the applicant's college premedical committee or an officially designated premedical advisor is required. If the college does not have a premedical advisor or premedical committee, two letters of recommendation are required from science faculty members in science departments who have taught the applicant and one non-science faculty member who has also taught the applicant. In addition to the letters indicated above, applicants with advanced degrees and/or full-time employment are required to submit recommendations from each component of their education and major work experiences.
6. **Non-U.S. Citizen Applicants.** Preparation in foreign universities, in most cases, must be supplemented by a year or more of course work in an accredited United States university. Official transcripts are required from all colleges attended outside the United States and Canada. Non-U.S. resident students are not eligible for federal or state funds. Financial aid funding is available to all current and newly admitted non-U.S. resident medical students. Financial aid assistance will be provided in the form of institutional loan and/or scholarship.
7. **Application Review.** Following receipt of all required credentials, the committee on admission will review applications and make interview decisions. Applicants selected for interview will be notified by the committee. With the approval of the Assistant Dean, it may be possible to arrange a remote interview when the applicant lives some distance from Baltimore. Notification of acceptances are made between late fall and mid spring.

Application for Admission

Applicants must first submit an online application at American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS for Johns Hopkins is October 15th.

Once you have completed your AMCAS application and it is verified, you will be invited to submit the Johns Hopkins University School of Medicine secondary application. The deadline for submission of the secondary application to the M.D.-Ph.D. Program is November 1st. The deadline for submission of the secondary application for the regular M.D. Program is November 1st.

Letters of recommendation to the M.D.-Ph.D. Program must be received by November 15th. Letters of recommendation to the regular M.D. Program must be received by November 15th. All letters of recommendation should be sent to the AMCAS letter service.

Application Fee: The secondary application fee is non-refundable and must be paid online when submitting the secondary application.

The application fee will be waived for applicants who have received an AMCAS fee waiver. Specific details are available in the secondary application instructions.

For the latest information concerning admissions requirements and procedures, please visit our website at: MD Admissions (https://www.hopkinsmedicine.org/som/education-programs/md-program/application-process/how-to-apply.html). Specific questions about applying to the School of Medicine may be answered by calling the Admissions Office at 410-955-3182. Information may also be requested by writing to:

Committee on Admissions,
Johns Hopkins University School of Medicine,
733 N. Broadway, Suite G-49,
Baltimore, MD 21205
or via email at somadmiss@jhmi.edu.

Accepted Applicants: It is the policy of the Johns Hopkins University School of Medicine to require criminal background investigations on accepted students in any professional or graduate program at the School of Medicine, interns, residents, and clinical fellows in any Graduate Medical Education program sponsored by Johns Hopkins, and other clinical and research postdoctoral fellows at the School of Medicine.

School of Medicine Technical Standards for Admission

Technical Standards for Medical Students

t this Page

The mission of the Johns Hopkins School of Medicine is to prepare physicians to practice clinical medicine of the highest standard with compassion and to identify and solve fundamental questions in the mechanisms, prevention and treatment of disease, in health care delivery and in the basic sciences.

JHUSOM is committed to diversity and to attracting and educating students who will make the population of health#care professional representative of the national#population.

Although students learn under the supervision of faculty, students interact with patients throughout their medical school education. Patient safety and wellbeing are therefore critical factors in#establishing#requirements involving the physical, cognitive, and interpersonal abilities of candidates for admission, promotion, and graduation. The necessary abilities and characteristics described below are also referred to as technical standards. They are defined in several broad categories#including#observation, communication, motor function, intellectual-conceptual, integrative, quantitative#abilities,#social and behavioral skills, and legal and ethical standards.

JHUSOM will consider for admission any applicant who meets its academic and nonacademic criteria and who#demonstrates#the ability to perform the skills listed in this document, with or without reasonable accommodations.

The stated intention of a medical student to practice only specific areas of clinical medicine, or to pursue a non-clinical career, does not alter the School of Medicine's requirement that all medical students achieve competence in the full curriculum required by the faculty.

Technical Standards

Observation:

Medical students must#acquire#information as presented through demonstrations and experiences in the foundational sciences. Medical students must be able#to#obtain and interpret information through a#comprehensive#assessment of patients,#correctly#interpret diagnostic representations of patients' physiological data, and accurately evaluate#patients' conditions and responses.

Communication:

Medical students must#exhibit#interpersonal skills to enable effective caregiving for patients, including the ability to communicate effectively, with all members of a multidisciplinary health-care team,#patients, and those#supporting#patients. Medical students must be able to#record information clearly and accurately interpret verbal and nonverbal communication.

Motor Functions:

Medical students must be able to perform routine physical examination and diagnostic maneuvers. Medical students must be able to provide general care and emergency treatment for patients, and to respond to emergency situations in a timely manner. These activities require some physical mobility, coordination of both gross and fine motor neuromuscular functions, and balance and equilibrium. Medical students must be able to meet applicable safety standards for the environment, and to follow universal precaution procedures.

Intellectual-Conceptual, Integrative and Quantitative Abilities:

Medical students must be able to effectively interpret,#assimilate, understand, and communicate the complex information required to function within the medical school curriculum both in person and via remote technology, and engage in problem solving individually and in small groups. Medical students must demonstrate the ability to comprehend three-dimensional relationships and adapt to different learning environments and modalities.

Behavioral and Social Attributes:

Medical students must exercise good judgment; attend to the responsibilities necessary for the care#of patients; and develop mature,#sensitive, and effective relationships#with patients. Medical students must demonstrate the skills required to effectively manage heavy workloads, function under stress, adapt to changing environments, display flexibility, and learn to function in the face of the uncertainties inherent in the clinical problems of patients. Medical students are expected to exhibit professionalism, personal accountability, compassion, integrity, concern for others,#and interpersonal skills including the ability to accept and apply feedback and treat all individuals in a respectful manner, regardless of gender identity, age, race, sexual orientation, religion, disability, or any other protected status.

Ethics and Professionalism

Medical students must maintain and display ethical and moral behavior commensurate with the role of a physician in all interactions with patients, faculty, staff, students, and the public. Medical students should understand and function within the legal and ethical aspects of the practice of medicine.

The technical standards delineated above must be met with or without accommodation. Students who, after review of the technical standards, determine that they require reasonable accommodation to fully engage in the program should contact Student Disability Services to confidentially discuss their accommodation needs. Given the clinical nature of our programs, time may be needed to create and implement the accommodations. Accommodations are not retroactive; therefore, timely requests are essential and encouraged.

Equal Access#to the JHUSOM Educational Program

Our core values translate into our work with all students, including those with disabilities.#JHUSOM actively collaborates with students to develop innovative ways to ensure accessibility and creates a respectful accountable culture through our confidential disability services.#JHUSOM is committed to excellence in accessibility; we encourage students with disabilities to#disclose#and seek accommodations.

Candidates with Disabilities

- Candidates who have questions about or want to request accommodations, auxiliary aids and/or services#should#contact Student#Disability#Services (https://www.hopkinsmedicine.org/som/education-programs/md-program/our-students/disability-services.html).
- In accordance with Johns Hopkins' policies which, in turn, embody applicable federal, state, and local laws (e.g., the Americans with Disabilities Act and the Rehabilitation Act), the Medical School does not discriminate in admissions or educational programs against any individual on the basis of their disability or handicap. No otherwise qualified individual with a disability/handicap will be excluded from admission.
- All#candidates#must#be able to perform essential functions in a reasonably independent manner. Their use of senses such as touch, pain, temperature position, pressure, movement, stereognosis, and vibration must be sufficiently intact to enable them to carry out all activities required for a complete medical education. Candidates must have motor function capabilities to meet the demands of medical education and the demands of total patient care. The candidates for the medical degree must be able to independently demonstrate a range of abilities and skills. The use of trained intermediaries#to carry out functions described in the#technical standards will#not be#permitted.#Intermediaries, no matter how well trained,#apply#their own#powers of#selection#and observation, which could affect the student's judgment and performance.

Requests for Accommodations

- A candidate who has#not been#offered admission#to#the School of#Medicine may#disclose#a disability#and#request accommodation#during#the admission#process.**This is not#required#unless the candidate wants to request#an accommodation for the admission process**.
- After admission,#medical students (including#admittees who#have not yet accepted#a place in#a class at the School of#Medicine,#admittees who#have accepted#a place, and matriculating medical students) can#disclose#a disability#and#request accommodation#through the Student Disability Services office (https://www.hopkinsmedicine.org/som/education-programs/md-program/our-students/disability-services.html)#using our on-line registration system (https://hopkins-accommodate.symplicity.com/public_accommodation/). Documentation for accommodations must provide the specific functional limitations in which the student is seeking accommodations for.
- While medical students can#disclose#a disability and request an accommodation at any time during their enrollment, students are encouraged to#disclose#the need for accommodation(s) as soon as possible.#Time for documentation review and arrangement of accommodation(s) is#necessary and#may take#up to four to six weeks.#Accommodations are not retroactive.

Ability to Meet the SOM Technical Standards

Candidates for admission must review and#verify#their ability to meet the#School of Medicine technical standards#when completing the application for admission.

If at any point an enrolled medical student ceases to meet the technical standards of the School of Medicine, they may#choose to work with Student#Disability#Services#to#determine#if reasonable#accommodations#could remove barriers. They also#may work with the Office of Medical Student Affairs to see what other services are available.#Should, despite reasonable accommodation (whether the candidate chooses to use the accommodation or not), a candidate or student's existing or acquired disability interferes with patient or peer safety, or otherwise impede the ability to complete Johns Hopkins School of Medicine's undifferentiated program and advance to graduation, residency, training, or licensure, the candidate may be denied admission or may be separated, discontinued, or dismissed from the program.

Responsibility

Monitoring of the ability of a candidate or student to meet the#technical standards#is the#responsibility#of a continuum of School of Medicine committees, faculty, and the medical student.#For medical students who have matriculated into the School of Medicine, issues related to technical standards are#evaluated#by#the#Pre-Clerkship or Clerkship Student Assessment and Formational#Committee#and the Medical Student Promotions Committee#and#considered on an individual basis.

Early Decision

We do not accept applications for early decision.

Deferred Admission

The Deferred Admission Plan enables students to diversify their educational and life experiences as they prepare for a career in medicine. Deferred admission may be approved for a period of one to three years to pursue international fellowships (Rhodes, Rotary, Marshall, Watson, Fulbright scholarships, etc.), join the Peace Corps, participate in service assignments in the United States or abroad, teach, or conduct research. Admitted applicants who are interested in deferring their matriculation into the first year class, must submit a written request by May 1st for review and approval by the Deferral Committee. If approved, applicants must complete an AMCAS application by the August 1st deadline of the year prior to matriculation. Please contact the Admissions Office for further information.

Combined Study-M.D.-Ph.D.

The Committee on Admission accepts applications not only from applicants for the M.D. program but from those who are interested in a combined M.D.-Ph.D. degree. Provided with the Johns Hopkins application for the M.D. program is a supplemental form which should be completed by those applicants for the combined degree. Under the section "Graduate Programs" in this catalogue, those departments which offer study leading to a Ph.D. degree are listed. When the application for the M.D. program as well as the "Application Supplement for Admission to Combined M.D.-Ph.D. Study" are received along with all necessary letters of recommendation, they will be reviewed by the Committee on Admission, the M.D.-Ph.D. Committee, and by the appropriate graduate department. If admitted to both degree programs, the student will ordinarily be expected to complete at least the first year of M.D. study before starting full-time Ph.D. work. Students initially accepted for only one of the two degrees are eligible to reapply for study towards the other at a later time. Students enrolled in the M.D. program can make application for a graduate program at any time during the course of their medical training. See section entitled "The Training of Medical Scientists: M.D.- Ph.D. Programs."

Advanced Standing

Due to space limitations, the School of Medicine is unable to admit transfer students.

Doctors of Medicine

Persons who have already received the degree of Doctor of Medicine elsewhere will not be admitted as candidates for that degree from the Johns Hopkins University.

Course Requirements for Regular M.D. and M.D.-Ph.D. Applicants

1. **Biology**
   College Biology with laboratory, one year (8 semester hours)
   The student should have an appreciation for the diversity of life such as viruses, prokaryotes, plants and animals, and a familiarity with the life cycles and metabolic activities of these organisms. The student should attain a basic understanding of the structure and function of the mammalian cell. Included should be a basic understanding of mammalian genetics. Applicants with Advanced Placement (AP) or International Baccalaureate (IB) credits in biology, acceptable to the student's undergraduate college, may be used in fulfillment of the requirement, but they must take one additional semester of an advanced biology with lab. Individuals who have completed their studies in biology more than 4 years prior to their application are strongly advised to take a one semester advanced mammalian biology course. We will accept online prerequisite courses completed at an accredited college or university.
2. **Chemistry**
   General college chemistry with laboratory, one year (8 semester hours)
   Organic Chemistry with laboratory, one semester, and one semester of biochemistry without a laboratory. The student should have knowledge of chemical equilibrium and thermodynamics, acid/base chemistry, the nature of ions in solution and redox reactions, the structure of molecules with special emphasis on bioorganic compounds, reaction rates, binding coefficients, and reaction mechanisms involved in enzyme kinetics. Also important is a basic understanding of the structure of nucleic acids including how they store and transfer information. Applicants with Advanced Placement (AP) or International Baccalaureate (IB) credits in general chemistry acceptable to the student's undergraduate college, may be used in fulfillment of the requirement, but they must take one additional semester of an advanced chemistry with lab. We will accept online prerequisite courses completed at an accredited college or university.
3. **Humanities, Social, & Behavioral Sciences**
4. The study of the humanities, social, and behavioral sciences is an essential foundation for the study of medicine. (24 semester hours) An applicant's educational experience must include at least 24 semester hours in these disciplines. Effective communication skills are essential and candidates must be proficient in spoken and written English and be able to communicate well. Successful passage of the TOEFL examination is required for all students whose undergraduate instruction was conducted primarily in a language other than English. We will accept online prerequisite courses completed at an accredited college or university.
5. **Mathematics**
   Calculus or statistics, one year (minimum of 6 semester hours)
   Mathematics courses should enable the student to develop equations, to interpret graphical representations of function, and to evaluate probability involved in testing hypotheses. Advanced Placement (AP) or International Baccalaureate (IB) credit for calculus, acceptable to the student's undergraduate college, may be used in fulfillment of the math requirement. Regardless of such credit, it is strongly recommended that applicants take at least one semester of statistics or epidemiology. We will accept online prerequisite courses completed at an accredited college or university.
6. **Physics**
   General College Physics with laboratory, one year (8 semester hours)
   The student should have an understanding of the constants and units of physical measurement; Newtonian mechanics; the physical properties of various states of matter such as liquids, solids, and gases; and the basic aspects of electricity, magnetism, and optics. Advanced Placement (AP) or International Baccalaureate (IB) credit for physics, acceptable to the student's undergraduate college, may be used in fulfillment of the physics requirement. We will accept online prerequisite courses completed at an accredited college or university.

Program Requirements

Code	Title	Credits
FIRST YEAR		
ME.800.640	Topics in Interdisciplinary Medicine - Disparities and Inequities in Health and Health Care	0
ME.130.600	Human Anatomy	7
ME.800.638	Scientific Foundations of Medicine (inc. Macromolecules, Cell Physiology, Metabolism, Genetics, Pharmacology, Foundations in Histology & Pathobiology, and Neoplasia)	0
ME.800.641	Topics in Interdisciplinary Medicine - Obesity, Nutrition, & Behavior Change	0
ME.800.642	Topics in Interdisciplinary Medicine – Global Health	0
ME.800.639	Genes to Society I (inc. Immunology, Microbiology/Infectious Disease, Hematology, and Dermatology)	0
ME.800.653	Integrative Medicine	0

ME.800.610	Genes to Society II (inc. Brain, Mind, & Behavior, Nervous System and Special Senses)	0
ME.800.621	Clinical Foundations of Medicine	0
ME.800.637	Foundations of Public Health: Epidemiology, Ethics & the Health Care System	0
ME.800.616	Longitudinal Ambulatory Clerkship - 1st year	0
ME.800.623	Scholarly Concentrations	0
ME.800.655	Topics in Interdisciplinary Medicine - High Value Healthcare (Translational Science Courses)	0
ME.800.644	Topics in Interdisciplinary Medicine – Disaster Medicine	0
ME.600.601	Topics in Interdisciplinary Medicine - Clinical Informatics	0
ME.800.643	Topics in Interdisciplinary Medicine – Pain	0
SECOND YEAR		
ME.800.630	Genes to Society III (inc. Cardiovascular, Pulmonary, and Renal)	0
ME.800.633	Scholarly Concentrations - 2nd year	0
ME.800.645	Topics in Interdisciplinary Medicine - Substance Use Disorders	0
ME.800.631	Genes to Society IV (inc. GI, Reproductive, Endocrine, and Musculoskeletal)	0
ME.800.646	Topics in Interdisciplinary Medicine – Patient Safety	0
ME.800.617	Longitudinal Ambulatory Clerkship - 2nd year	0
ME.800.634	Transition to the Wards	0
SECOND, THIRD, OR FOURTH YEAR		
ME.250.606	Medicine Core Clerkship	0
ME.380.600	Surgery Core Clerkship	0
ME.320.600	Pediatrics Core Clerkship	0
ME.200.600	Neurology Core Clerkship	0
ME.370.601	Psychiatry Core Clerkship	0
ME.140.600	Women's Health Core Clerkship (GYN/OB)	0
ME.520.601	Emergency Medicine Core Clerkship	0
ME.800.647	Topics in Interdisciplinary Medicine – End of Life/ Palliative Care	0
Translational Science Courses		
ME.800.648	Topics in Interdisciplinary Medicine – Metabolism	0
ME.800.649	Topics in Interdisciplinary Medicine – Immunology	0
ME.800.650	Topics in Interdisciplinary Medicine – Infectious Disease (Translational Science Courses)	0
ME.800.651	Topics in Interdisciplinary Medicine – Cancer	0
ME.800.652	Topics in Interdisciplinary Medicine - Introduction to Regenerative Medicine	0
ME.800.661	Topics in Interdisciplinary Medicine - Genomic Medicine	0
Required Advanced Clerkship		
ME.250.621	Advanced Ambulatory Clerkship	0
Advanced Clerkship in Critical Care		
Elective Courses totaling 955 hours (24.5 weeks)		
FOURTH YEAR		
ME.800.618	Transition to Residency and Internship and Preparation for Life	0

In addition to the above coursework, students are required to pass the Comprehensive Clinical Skills Exam (CCSE), pass USMLE Step 1, and take USMLE Step2CK.

MD-PhD, Combined Degree

From its inception, the physician-scientist has been a hallmark of Johns Hopkins medicine and the Johns Hopkins School of Medicine. Indeed, the Hopkins tri-emblem represents the three core values of the institution: teaching, patient care, and research.

The Johns Hopkins School of Medicine offers a variety of opportunities for the training of medical scientists. A combined curriculum leading to both MD and PhD degrees enables students who aspire to careers in academic medicine to obtain intensive training in specialized areas of the biomedical sciences in addition to top-flight medical training. The traditional diversity and flexibility of the educational opportunities at Johns Hopkins permit the design of individualized programs to meet the needs of students with a variety of interests, educational backgrounds, and career goals.

To accomplish our training goals, we expect students to fully commit to medical training while in medical school and research training while in graduate school. However, we also take important steps to ensure that students are exposed to the intersection of both worlds early in their training, as well as given the professional and career development advice they need to succeed.

In a word, the MD-PhD curriculum at Johns Hopkins is flexible. Most students decide to complete the first two years of medical school before they begin graduate school and finish the last two years of their medical training after completing their thesis work (see the Timeline below). However, students who want more first-hand experience in clinical medicine before beginning graduate work can elect to complete three years of medical school, followed by their graduate training, and then the last year of medical school. This can give them a better appreciation of the potential clinical relevance of their research. In making a choice, trainees consult extensively with the Program Director, the Dean of Students, members of the MD-PhD Committee, prospective research mentors, and their faculty advisors. Students in the MD-PhD Program are automatically accepted to all graduate programs, so decisions regarding graduate training programs can be made with a strong understanding of each program. The MD-PhD Committee is responsible for program oversight, admissions, and student mentorship (http://mdphd.johnshopkins.edu/mentoring/). On average, students complete MD-PhD training within seven-to-eight years.

Hopkins interdisciplinary organizational structure means each faculty member may be affiliated with several clinical departments, research sections, and graduate programs.

Formal graduate programs in the School of Medicine encompass the following areas: Biochemistry; Cellular, and Molecular Biology; Biological Chemistry; Biomedical Engineering; Molecular Biophysics; Functional Anatomy and Human Evolutionary Studies; Cell Biology; Cellular and Molecular Medicine; History of Medicine; Human Genetics; Immunology; Neuroscience; Pathobiology; Pharmacology and Molecular Sciences, and Cellular and Molecular Physiology. Students are also eligible to obtain their PhD in one of the 11 graduate programs at the Bloomberg School of Public Health or the School of Arts and Sciences on the Homewood Campus. Students may select a thesis mentor from faculty in the Schools of Medicine and Public Health.

The MD-PhD Program also sponsors special seminars and lectures, It also maintains a dedicated library, the Paul Talalay MD-PhD Library, to enrich the educational opportunities of all MD-PhD students. Efforts are made to acquaint MD-PhD candidates with the major advances, concepts, and cutting-edge techniques in contemporary medicine and biomedical sciences. We also create an environment that promotes a more intimate personal contact with successful medical scientists in this institution.

Admission Procedures. Individuals who wish to apply for admission to the combined MD-PhD Program of the School of Medicine must submit an application through AMCAS on which they will indicate the MD-PhD Program. Once the AMCAS application has been verified and submitted to Hopkins, the applicant will receive an invitation to complete the Hopkins Secondary Application. Here the applicant will submit the additional materials required for the combined degree. Hopkins does not allow applicants to apply to both the traditional MD program and the combined program during the same cycle.

All combined-degree applications are reviewed by a separate MD-PhD Review Committee (http://mdphd.johnshopkins.edu/md-phd-committee/) which is comprised of faculty from the basic sciences, clinical arena as well as faculty from the Bloomberg School of Public Health. A separate Graduate School application is **not necessary**. The MD-PhD Committee determines whether or not an interview is indicated. In general, the committee is looking for students with a passion for research and a commitment to medicine. This assessment is based on the applicant's research experience, letters of recommendation, academic performance and extracurricular activities. The Committee considers standardized test scores only in the context of the applicant's other credentials. If an interview is granted, the applicant is notified by the MD-PhD Office and after the applicant accepts, the process for scheduling an interview begins. Interview visits generally occur over two days. Applicants are interviewed by members of the MD-PhD Committee and other faculty members who share their research interests. Applicants have many opportunities to meet with current students and tour the campus during their visit.

All eligible applicants who are admitted to the MD-PhD Program are funded under the NIH Medical Scientist Training Program (MSTP) Award. This program, supported by the National Institutes of Health, provides full tuition, stipend, and medical and dental insurance for students. Due to federal restrictions, only U.S. citizens and permanent residents are eligible for MSTP funding. Approximately 10-12 MD-PhD students matriculate each year.

Students who matriculate to the traditional MD Program but have a clearly demonstrated interest and experience in scientific research, are eligible to apply to the combined MD-PhD Program. These students may apply for admission during the fall of their first or second year of medical school. These qualified applicants are evaluated and placed in the pool for the current application cycle and will be considered for MSTP funding.

Financial Support. The Johns Hopkins School of Medicine Medical Scientist Training Program (MSTP) is supported by a training grant from the National Institutes of Health. A number of exceptional students with unusual accomplishments and commitment to a career in the medical sciences will be selected for traineeships under this program. Such fellowships provide stipend and tuition support for combined medical and graduate study. All students who are admitted to the MD-PhD Program will be considered for these awards.

Graduates of The Johns Hopkins University School of Medicine MD-PhD Program have gone on to become leaders in many areas of academic medicine.

Advice on the scope and opportunities offered by these programs may be obtained from the Director or Administrative Director of the MD-PhD Program.

Subject Areas

Anesthesiology and Critical Care Medicine

At the Johns Hopkins Department of Anesthesiology and Critical Care Medicine, we improve the health of the community and the world by setting the standard of excellence in Patient and Family-Centered Care, Education and Research.

Our Mission is to be the world leader in discovery and innovation; high-value patient and family centered care; and education and professional development. Building on our rich traditions, we will utilize collaborative and inclusive approaches to transform our discipline.

Our commitment to Patient and Family-Centered Care is at the heart of all we do. We count among our ranks many of the world's most respected patient safety leaders.

Faculty members are deeply committed to achieving excellence in Education. Our programs in clinical training, and basic and clinical research are world renowned. Graduates fill the leadership ranks in academic and clinical anesthesiology programs and clinical practices around the globe. The department plays a key role in the training of nurse anesthetists.

Our distinguished Research faculty engage in cutting-edge research in the fields of Cardiovascular Biology, Cerebrovascular Biology, Neuroscience, Pulmonary Medicine, Acute & Chronic Pain, and Perioperative Medicine. In addition, we have innovative programs in Simulation Technology and Health Safety and Outcomes that are models for institutions throughout the world. Our faculty and trainees engage in multidisciplinary projects and collaborations, while taking full advantage of the rich resources of the entire Hopkins community. Learning and discovery are translated into innovation throughout the department.

Anesthesiology is the field of medicine dedicated to managing and treating patients in a dynamic setting while ensuring patient safety and comfort before, during, and after surgery. Anesthesiologists have the ability to work in operating rooms, intensive care units, inpatient floors, outpatient clinics, and as consultants. Unlike most fields of medicine, anesthesiology trains its physicians to be fluent in perioperative medicine, technical skills, critical care, and emergency situations. Anesthesiologists can also be thought of as "the internists of the OR" as the breadth and depth of knowledge crosses all fields of medicine including pathophysiology and pharmacology. They are the experts in airway management along with cardiac and pulmonary resuscitation, pain control and advanced life support. With more patients living longer and with a variety of chronic diseases needing complex surgery, anesthesiologists caring for such patients must be well versed in understanding that particular patient's physiology and be able to anticipate issues regarding their individualized perioperative care.

Because of the nature of the field, anesthesiologists must have a thorough understanding of pharmacology, pathophysiology, and anatomy, and how surgical interventions and medications can affect chronic and acute problems. Furthermore, they are one of the few physicians that are able to simultaneously assess, diagnose, and treat with various interventions on a minute-to-minute basis. You can truly see medicine in action. Not only does the intellectual stimulation and hands-on aspects of the field make it very attractive, the patient interaction can also be very fulfilling. The ability to allay patients' anxieties and fears prior to surgery is very rewarding as surgery can be one of the most frightening experiences many patients have encountered. It is satisfying to be able to assure the patient that you will do everything to ensure their safety and comfort, and that if a critical situation were to arise you are the physician on the team most adept at managing it. In addition to the ability to work in operating rooms, intensive care units, and both inpatient and outpatient settings, there are many options for further specialization within anesthesiology.

The ACGME accredited fellowships include: Cardiothoracic Anesthesia with TEE certification, Critical Care Medicine, Obstetric Anesthesia, Regional Anesthesia, Pain Medicine, and Pediatric Anesthesia. There are also many non-ACGME accredited fellowships that allow physicians to concentrate on particular aspects of the field such as Ambulatory Anesthesia, Trauma Anesthesia, Transplant Anesthesia, Vascular and Thoracic Anesthesia, and Neuroanesthesia. Whatever interests you within the field of medicine, there is a way to incorporate it within a career in anesthesiology.

Elective Opportunities

Curriculum Consultant: Dr. Tina Tran & Dr. Jed Wolpaw. Clinical electives must be approved by the course directors and/or clerkship coordinators.

ME.570.699 Anesthesiology Elective

BASIC CLERKSHIP IN ANESTHESIOLOGY

Students will join the anesthesiology team (anesthesiology residents and faculty) in the general operating rooms, applying physiological and pharmacological principles to peri-operative patient care. Cardiovascular and respiratory physiology will be central to this learning process. Students will learn fundamental airway management skills, including mask ventilation and intubation and will place intravenous and arterial access as well as additional advanced monitoring as dictated by the type of surgery and the patients' co-morbidities. Students will learn the principles of anesthetic management and the interactions between surgery, anesthesiology, and patients' medical co-morbidities including appropriate pre-operative evaluation, intra-op management and post-op transition. Hemodynamic management including intravenous fluid therapy, vasopressor use, and blood product transfusion practice will be emphasized. Students will learn how anesthetic management varies based on patient age, co-morbidities and specific surgical procedure such as abdominal surgery, cardiac surgery and intracranial surgery. Students will engage in didactics, simulation sessions, and group learning sessions with anesthesiology residents. This elective will be interactive and engaging. Students will have optimal hands on learning opportunities. Students will take overnight night call shifts with the anesthesiology team, caring for patients undergoing urgent or emergent surgery. Students will be able to request to work with specific residents or faculty as well as work with different subspecialty teams such as regional, OB, cardiac, pediatric, and pain management teams. More information and resources for the elective can be viewed at http://anesthesiology.hopkinsmedicine.org/anesthesia-clerkship-for-medical-students/. More information about the anesthesiology department can be viewed at http://anesthesiology.hopkinsmedicine.org/. Dr. Wolpaw has developed a podcast to discuss various topics in anesthesiology http://accrac.com/podcast/. Students are encouraged to join the anesthesiology interest group and become medical student members of the American Society of Anesthesiologists (ASA) https://www.asahq.org/member-center/medical-students (https://www.asahq.org/member-center/medical-students/) .

ADVANCED CLINICAL CLERKSHIP IN ANESTHESIOLOGY

This clerkship will allow students who have completed a Basic Anesthesiology Clerkship to expand their experiences in clinical anesthesiology practice. Students may create their own experience by either choosing to spend the clerkship doing general operating room cases or by seeking to gain experience in sub-specialty areas of anesthesiology including cardiac anesthesia, obstetrics anesthesia, neuroanesthesia, pediatric anesthesia, and pain management. The amount of time a student chooses to spend in any one or more of these sub-specialty areas is customizable to meet the student's interests. Student may request additional overnight call shifts and/or subspecialty call shifts such as liver transplant or cardiac surgery calls. This elective is recommended for students who are interested in applying to an Anesthesiology residency program. Students are encouraged to join the Anesthesiology Interest Group (AIG) and become members of the American Society of Anesthesiologists (ASA). Students will have opportunities to teach and mentor medical students currently on the basic anesthesiology clerkship.

ADVANCED CLINICAL CLERKSHIP IN PEDIATRIC ANESTHESIOLOGY

The clerkship in Pediatric Anesthesiology is designed for students interested in pediatrics, pediatric anesthesia, or pediatric surgery, and introduces them to the peri-operative anesthetic management of the pediatric patient. Under close supervision by faculty, fellows and residents, students will learn and apply the principles of preoperative evaluation of children, intra-operative monitoring techniques, pharmacology of anesthetic and related drugs, and immediate postoperative management. In addition, students will be exposed to and participate in anesthetic procedures such as airway management and establishment of vascular access. As the clerkship progresses, students will have the opportunity to participate in cases of increasing complexity. Students will participate in the full range of residency didactics including morning lectures, college days, simulation sessions. Students are assigned to the operating rooms at the Charlotte R. Bloomberg Children's Center and are notified by the OR schedulers of the actual daily assignment the night before. More information about the pediatric anesthesiology department can be viewed at http://anesthesiology.hopkinsmedicine.org/pediatric-anesthesia/. Students are encouraged to review resources on the Society for Pediatric Anesthesiology (SPA) website https://www.pedsanesthesia.org/ .

MANAGEMENT OF PAIN AND SUFFERING

This course is intended for students who have an interest in the assessment and treatment of pain and its attendant emotional manifestations. The focus will be on the use of analgesics, nerve blocks, and behavioral modification. The problems associated with cancer pain will also be part of this experience. It is hoped that this course will provide the student with some tools and insight into the management of pain and suffering in patients presenting either to routine medical practices or to specialty pain clinics. More information about the chronic pain management division can be viewed at http://anesthesiology.hopkinsmedicine.org/pain-medicine-and-pain-research/ and the regional & acute pain management division can be viewed at http://anesthesiology.hopkinsmedicine.org/regional-anesthesia-and-acute-pain-management/. Interested students are encouraged to join the American Society of Regional Anesthesia and Pain Management (ASRA) at https://www.asra.com/.

ANESTHESIOLOGY RESEARCH

Many opportunities exist within the department for research in areas of basic science (molecular, genetic, cell biology, basic pathophysiology, biochemistry), clinical trials, biomedical engineering, information management, outcomes research and data mining, and health policy & safety initiatives. Specific research opportunities should be reviewed on the departmental website. The interested student should contact the faculty member supervising the research prior to registering for the elective. More information about research faculty can be viewed at http://anesthesiology.hopkinsmedicine.org/research-home/ . Interested students are encouraged to join the International Anesthesia Research Society (IARS) at https://iars.org/.

Anesthesiology Research		

Biological Chemistry

The Department of Biological Chemistry has two major instructional functions. It provides required and elective instruction in biochemistry for medical students, and also offers organized programs of graduate study in biochemistry and cell biology toward the degree of Doctor of Philosophy. Two graduate programs are available: the departmental graduate program in Biological Chemistry and the joint graduate program in Biochemistry, Cellular and Molecular Biology (BCMB). The BCMB graduate program is a joint effort of the Departments of Biological Chemistry, Molecular Biology and Genetics, Biophysics and Biophysical Chemistry, Pharmacology and Molecular Sciences, Cell Biology, Neuroscience, and Physiology (see Graduate Program Section: Biochemistry, Cellular and Molecular Biology, and Biological Chemistry).

The staff and the facilities of all seven departments provide opportunities to medical students, graduate students, and postdoctoral fellows for carrying out research projects in many different areas of biochemistry and cell biology.

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy (see Graduate Programs) (p. 949).

Code	Title	Credits
Biological Chemistry		
ME.800.708	BCMB Core Discussion	.5
ME.340.808	Research-BCMB	0

ME.340.702	Current Topics in Biological Chemistry	2
ME.340.709	Fundamentals of Glycobiology	2.5
ME.340.710	Techniques in Glycobiology	4

Other Courses and Elective Opportunities

The courses described below are required for Ph.D. candidates but are available to medical students as elective opportunities.

Curricular Consultants: Elective courses for medical students must be approved by the preceptor; any member of the department may act as preceptor.

Biomedical Engineering

Graduate programs and courses in Biomedical Engineering

The Department of Biomedical Engineering hosts two graduate programs; the School of Medicine Graduate Program leading to the Ph.D. degree is described here (p. 954), and the Whiting School of Engineering Graduate Program leading to the M.S.E. in Biomedical Engineering is described here (https://www.bme.jhu.edu/academics/graduate/masters-programs/masters-program/). Course work in the Graduate Programs is available to qualified medical students on an elective basis. All Biomedical Engineering courses are listed in the

University's SIS catalog (https://sis.jhu.edu/classes/)ue, and have course numbers beginning with EN.580.

Biophysics and Biophysical Chemistry

The department of biophysics and biophysical chemistry provides training for outstanding students with interests in such quantitative areas as crystallography, enzymology, kinetics, protein design, and mathematical computer modeling.

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy (see Graduate Programs-Program in Molecular and Computational Biophysics Program).

Code	Title	Credits

Dermatology

The Department of Dermatology provides instruction directed at the basic science aspects of the skin and at clinical cutaneous disease during each of the medical school years. The emphasis of the department is upon the pathophysiology of cutaneous reaction patterns, a correlation of skin lesions (gross Pathology) with microscopic changes, the recognition and treatment of diseases that primarily affect the skin, and the identification of skin changes that reflect diseases in other organ systems.

We welcome students to take a dermatology clerkship regardless of the medical discipline they intend to pursue. This should take place after completing several core clerkships including Medicine, Surgery and Pediatrics. We believe students should receive as broad exposure to medicine as possible before taking our introductory clerkship (Clinical Clerkship in Dermatology) and making career decisions. If further experience/learning is desired, we also suggest taking our Advanced Clinical Clerkship in Dermatology. For those students with a career interest in Dermatology, taking electives in related sub-specialties such as Rheumatology, Immunology, and Plastic Surgery are encouraged.

For more information on student electives please click here (https://www.hopkinsmedicine.org/som/students/academics/electives.html).

Program Requirements

Code	Title	Credits
Dermatology-First and Second Years		
Preclinical (first/second) years of Genes to Society (GTS) curriculum		
Elective Opportunities		
Elective courses must be approved by the preceptor; any member of the department may act as preceptor.		
CLINICAL CLERKSHIP IN DERMATOLOGY		
Students may apply towards the end of their 3rd year or in their 4th year of medical school for a clinical elective in dermatology where the focus is placed on intensive exposure to a large number of patients in different clinical settings. Students will spend time exclusively at the Johns Hopkins facilities (Outpatient Center, Greenspring Station, Harriet Lane Pediatrics Center and Johns Hopkins Hospital Dermatology consult service). Our clinical services at these locations provide an excellent opportunity for students to interact with different types of patients and to be exposed to a wide range of skin problems. Parallel to the clinical activities, there are didactic sessions held either in the mornings or on Wednesday. Formal lectures on basic dermatology topics are given by dermatology residents and faculty members. No formal exam is given and grading is based on the evaluations submitted by residents and faculty members and a short oral presentation.		
ME.220.699	Dermatology Elective	0
ADVANCED CLINICAL CLERKSHIP IN DERMATOLOGY		

Students who have already taken the Clinical Clerkship in Dermatology at Johns Hopkins and who are interested in a specific area of dermatology or in dermatology research may benefit from this elective. This elective gives the student the opportunity for more “in depth” participation in specific areas of interest within the department of dermatology under guidance of a faculty mentor. Arrangements have to be made between the interested student and the faculty member who will be mentoring them PRIOR TO BEGINNING THE ELECTIVE. The main objective is active participation in a small clinical research project, or clinical and scholarly work with a faculty member with a certain specialty focus. The faculty mentor will provide the specific schedule. Students are encouraged to participate in all didactic activities including Grand Rounds and faculty lectures during the time spent in the department.

Research Opportunities in the Department of Dermatology

Dr. Crystal Aguh

Ethnic Skin Program and Fellowship

Dr. Nathan Archer

Our research focus is to understand mechanisms of protective innate and adaptive immune responses to skin pathogens, in particular *S. aureus*, and the role of aberrant immune responses and the skin microbiome in the pathogenesis of inflammatory skin diseases, including atopic dermatitis and psoriasis. Our long-term goal is to discover mechanisms that can serve as targets for future immune-based therapies and vaccination strategies.

Dr. Kristin Bibee

Translational research in cancer biology, clinical research on social determinants of health and patient reported outcomes as it relates to dermatologic care, technologic innovations in Dermatology Surgery

Dr. Anna Chien

Translational research in general dermatology; mechanism of skin aging; photobiology

Dr. Luis Garza

Stem cells, Regeneration, Wound healing

Dr. Jun Kang

Clinical and translational research in rheumatologic dermatology and in-patient consultative dermatology. AI and full body photography in dermatology.

Dr. Sewon Kang

Translational research in dermatology

Dr. Shawn Kwatra

During this rotation, students can participate in epidemiologic and translational itch research using a variety of resources. Preference for students with previous experience with R or other coding software.

Dr. Elise Ng

Research areas: AI in dermatologic surgery, scar outcomes, melanoma, investigate factors that impact clinical surgical practice

Dr. Sima Rozati

Translational research in cutaneous lymphoma, oncodermatology

Dr. Inbal Sander

Rheumatologic dermatology diseases, dermatopathology

Dr. Jeffrey Scott

Clinical research in dermatologic surgery and cutaneous oncology, including defining quality and value in Mohs micrographic surgery, patient-reported outcomes and social determinants of skin cancer treatment, and evidence-based management of high-risk and rare skin cancers.

Dr. Daren Simkin

History Of dermatology

Dr. Joel Sunshine

Dr. Sunshine's research focus is in two main areas: (1) developing novel genetic nanomedicines for activation of antitumor responses in melanoma and Merkel cell carcinoma and (2) improving our understanding of the critical mechanisms in the tumor microenvironment (TME) through multiplex immunohistochemistry, with a focus on evaluating the role of antigen presentation in the TME. Potential projects are available in both areas of active investigation.”

Dr. Janis Taube

Current research emphasis involves development of the AstroPath platform for immunotherapy biomarker discovery. Image analysis algorithms from astronomy are applied to pathology specimens from patients with melanoma and other tumor types to help identify spatial, multispectral signatures to help predict which patients are most likely to respond to a given therapeutic regimen. Tumor-immune atlases are generated and links to machine learning/AI algorithms are under development.

Dr. Joy Wan

Epidemiologic and clinical research investigations focused on pediatric dermatology; atopic dermatitis; psychosocial and life impact of chronic skin disease.

Emergency Medicine

Emergency Medicine—Second, Third and Fourth Years

Core Clerkship in Emergency Medicine:

During the Core Clerkship in Emergency Medicine, students will hone your skills in the rapid assessment of undifferentiated patients, become comfortable with stabilizing severely ill and injured patients, and develop their procedural abilities. In the clinical area, students will care for patients with a wide variety of diagnoses, working closely with faculty and residents. Student's educational experience will be enhanced through participation in weekly simulation exercises, resident teaching conferences, and departmental Grand Rounds. Students will learn to make crucial real-time medical decisions, and will leave the clerkship with a skill set that will serve them well in managing common emergencies, regardless of what field of medicine they ultimately pursue.

Emergency Medicine—Third and Fourth Years

Subinternship in Emergency Medicine

APPROVED SUB-I EXPERIENCE

Students in the third and fourth years who wish an in-depth experience in emergency medicine may serve as subinterns in the Adult Emergency Department. This course is about key concepts in the assessment, management, and disposition of patients in the Emergency Department. It builds on what they have learned in their Core Clerkship in Emergency Medicine, allowing them to apply those concepts by serving as the primary provider for acutely ill and injured patients in the ED. What students learn in this clerkship will prepare them not only to evaluate and manage patients in the ED setting, but also to address acute concerns that arise in the care of hospitalized and ambulatory patients. Upon completion of this elective, students will demonstrate competency in the recognition and initial stabilization of life threats in trauma and non-trauma patients. Sub-interns are required to attend departmental conferences. A formal case write-up, in the form of a Blog is required. Visiting applicants limited to LCME-accredited schools only. Due to high demand we are not accepting international medical students for the Advanced Clerkship.

RESEARCH TOPICS IN EMERGENCY MEDICINE

This elective course is offered to any medical student with specific research interests in emergency medicine. Students are given the opportunity to participate in original or on-going research projects with a faculty member in the Department of Emergency Medicine. During the summer a specific course teaches the fundamentals of clinical research while engaging in a research project designed as part of the curriculum.

Research Elective courses must be approved by the course director. Course descriptions and additional details can be found at Electives Book: Johns Hopkins School of Medicine (https://www.hopkinsmedicine.org/som/offices/registrars/med-students/electives.html).

Epidemiology

The Department of Epidemiology is an academic department in the Johns Hopkins University Bloomberg School of Public Health. The Department is loosely divided into eight track or research areas including Cardiovascular and Clinical Epidemiology Program. The department participates in required Epidemiology instruction for first-year students in the School of Medicine. In addition, elective opportunities, both formal courses and tutorials, are available. Interested students should consult the School of Public Health section of the catalogue for information on course offerings and areas of research represented in the department.

A combined M.D.-Ph.D. Program in Epidemiology is available. Interested students should consult the adminsitrator in each school for details. Currently these are Ms. Sharon Welling in SOM and Ms. Fran Burman in JHSPH.

Program Requirements

Other Courses and Elective Opportunites

Research and Tutorials. (same as Epidemiology PH.340.840 Special Studies and Research Epidemiology, School of Public Health). Students may undertake tutorials under the supervision of a member of the Department of Epidemiology faculty. These programs are individually planned and consist of reading in specific areas of epidemiologic and clinical interest or may comprise participation in research activities underway in the department. The School of Public Health follows a term schedule that rarely matches the School of Medicine calendar. Please be cognizant of academic calendars when selecting didactic courses. Degree candidates in the SOM may take course electives in the School of Public Health upon approval by the program directors.

Functional Anatomy and Evolution

Overview

The FAE graduate program offers a Ph.D. in Functional Anatomy and Evolution and provides individualized support by world-leading professors for each student in a close-knit department with an excellent faculty to student ratio. Our primary focuses are independent research and teaching human gross anatomy, with research areas that range from vertebrate fossils, to primates to recent human remains.

The Center for Functional Anatomy and Evolution has traditionally not trained MD-PhD students.

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy.

Program Requirements

Code	Title	Credits
Required		
ME.130.600	Human Anatomy	7
ME.130.708	Biomechanics of the Skeleton	0
ME.130.716	Primate Evolution	0

ME.130.744	Mammalian Evolution	0
ME.130.746	Evolutionary Theory and Phylogenetic Comparative Methods	0
Other Courses and Elective Opportunities		
Elective courses must be approved by preceptor; any member of the center may be a preceptor.		

Gynecology and Obstetrics

The Core Clerkship in Women's Health (Gynecology & Obstetrics) provides a productive and exciting learning experience through patient care, interaction with women's health providers, simulation, and other formal learning activities. As every physician will encounter female patients in their career, the purpose of this core clerkship includes:

- To introduce students to the depth and breadth of women's health issues
- To experience how OB/GYN merges surgery, medicine, and primary preventive care into a single practice
- To learn how overall mental and physical health interacts with reproductive function

- To gain comfort in taking an appropriate OB/GYN history and performing the breast and pelvic exam
- To introduce the principles of surgery related to women's health

*See **Requirements** for descriptions of our Clinical Sub-internships, Clinical Electives and Research Elective opportunities.*

Clinical elective opportunities must be approved by the Sub-internship Director who will verify availability via the division specific leader.

If interested in other clinical elective opportunities please discuss these specifically with the Sub Internship Director.

Program Requirements

Code	Title	Credits
Second, Third or Fourth Year		
Clinical Clerkship in Women's Health		
Research Elective Opportunities		
Research elective opportunities must be approved by the research preceptor, any member of the department can act as a preceptor.		
Women's Health Electives and Sub Internships		
To participate in Electives and Sub Internships the candidate must have successfully completed the Core Clerkship in Women's Health (GYN/OB)		
Sub Internship in Gynecology		
This clinical experience consists of a sub internship in gynecology. The student will function as a house officer at the first year level. In this capacity, the student will be responsible for the provision of inpatient and outpatient care to the patients who present to the respective services for care.		
Sub Internship in Gynecologic Oncology		
In this clinical experience the student will function as a house officer at the first year level on the gynecologic oncology service. The student will be responsible for providing inpatient and outpatient care to the patients who present to the service for care.		
Sub Internship in Obstetric/Maternal Fetal Medicine		
This clinical experience consists of a sub internship in obstetrics. The student will function as a house officer at the first year level and will be responsible for the provision of both inpatient and outpatient care to the patients who present to the respective services for care. A portion of each week can be spent in prenatal genetics, obstetrical sonography and fetal assessment.		
Sub Internship in Obstetrics and Gynecology at Bayview Medical Center		
This clinical experience consists of a sub internship in General Obstetrics and Gynecology. The student will function as an intern with responsibility for both inpatient and outpatient care. The emphasis will be on management of common OB/GYN problems.		
Clinical Elective in Family Planning & Reproductive Choice		
In this clinical experience, the student will function as a house officer at the first level on the family planning service. Students will participate in contraceptive and pregnancy options counseling. Students will be exposed to a breadth of family planning procedures including IUD insertion, contraceptive implant placement/removal, sterilization, and both medical and surgical abortion. A research component is encouraged.		
Clinical Elective in HIV Infection in Women		
Students will participate in the obstetric and gynecological care of HIV-positive women. A research component is encouraged.		
Clinical Elective in Reproductive Endocrinology		
In this clinical experience the student will function as a house officer at the first year level on the reproductive endocrinology service. The student will be responsible for providing inpatient and outpatient care to the patients who present to the respective services for care. A research component is encouraged.		

Health Sciences Informatics

The Biomedical Informatics & Data Science Section (BIDS) brings together a wide range of resources and expertise in biomedical information management, data science, population health, and technology. Through the educational, research, and service activities of the section, BIDS seeks to advance the development and use of electronic health record systems and other information resources for decision-making, research, and health care delivery. BIDS also seeks to increase the awareness of these resources among the Johns Hopkins community.

Basic research and development involving the application of informatics to a variety of medical and basic science disciplines is also being carried out by individual faculty members of the section, and the results of these efforts are being applied to research and educational initiatives throughout the Johns Hopkins Medical Institutions.

Current research areas of primary and affiliated faculty include: clinical decision support; global health informatics; health information exchange (HIE); human computer interaction; multi-center real world data; patient quality & safety; population health analytics; precision medicine analytics; standard terminologies; telemedicine; and translational bioinformatics.

Programs in Informatics

- Applied Health Science Informatics-MS (p. 951)
- Clinical Informatics, Post Baccalaureate Certificate (p. 961)
- Health Sciences Informatics–Research, MS (p. 964)
- Health Sciences Informatics, PhD (p. 963)

Program Requirements

Please see requirements for the specific Health Sciences Informatics degree and certificate programs.

History of Medicine

The department is organized to give instruction and opportunities for research in the history of medicine and kindred sciences, including the history of public health.

Students enrolled in the MD program in the School of Medicine can take courses in History of Medicine, choose History of Medicine for their Scholarly Concentration, and take electives centering on medical humanities and social medicine.

Graduate Program

Students matriculated into the MD or graduate programs in the School of Medicine or graduate programs in the School of Public Health may apply to the 1-year MA in the History of Medicine.

Program Requirements

History of Medicine courses specifically geared toward MD students include the Scholarly Concentration in the History of Medicine (1st and 2nd year students), a 4-week elective in Medical Humanities and Social Medicine (3rd and 4th year students, every January), and more flexible independent studies on a topic to be agreed upon with appropriate faculty member, throughout the year.

Each year a number of additional electives on varying topics is offered. For more specific information on current course offerings, Scholarly Concentrations, and more, please contact us at myrobbins@jhmi.edu.

Institute of Genetic Medicine

Constituted in 1999, the McKusick-Nathans Institute of Genetic Medicine became the Department of Genetic Medicine (DGM) in 2019 and is the focal point for patient care; basic, translational, and clinical research; and education in human genetics and genomics at Johns Hopkins. The DGM is a national and international leader in genetic medicine - the integration of our rapidly expanding knowledge of genetics and genomics into the practice of medicine. The goal of genetic medicine is to tailor prevention, diagnosis, and treatment in a manner appropriate for each individual patient. In pursuit of the goal of individualized medicine, the DGM catalyzes interactions between physicians and scientists with diverse and complementary expertise to promote the application of genetic discoveries to human disease and genetics education to the public. Many DGM faculty members have a co-primary appointment in another department in the School of Medicine and serves to introduce and integrate genetics throughout the School and the University. Moreover, our faculty members have considerable strengths and expertise in the areas of genomics, developmental genetics, biochemical genetics, population genetics, computational biology, and the genetics of complex disease. We aim to maintain Hopkins Medicine's leadership role in the medicine of the 21st century, a medicine that increasingly individualized and focused on prevention.

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy (see Graduate Programs in Human Genetics)

Residency Program

The Johns Hopkins medical genetics residency programs provide ACGME-accredited clinical residency and comprehensive research training in medical genetics. We offer a categorical training track and four combined training tracks with pediatrics, internal medicine, maternal fetal medicine, and reproductive endocrinology. With successful program completion, trainees are qualified and eligible to sit for the exam leading to board certification by the American Board of Genetics and Genomics (ABMGG). Residents and fellows in combined programs are also eligible and qualify to sit for the exam leading to board certification offered by their prospective specialty (i.e., pediatrics, internal medicine, maternal fetal medicine, and reproductive endocrinology).

Medical Genetics Residency Program is a two-year program designed to train physicians to provide comprehensive diagnostic, management, and counseling services for inherited diseases and the genetic factors pertinent to all diseases. The training experience also emphasizes the role of research in Medical Genetics so that trainees can pursue investigator-initiated research upon completion of the program. A third year of individualized specialty research is recommended.

Combined Pediatrics & Medical Genetics Residency: This 4-year curriculum meets the requirements of the American Board of Pediatrics (ABP) & ABMGG. Trainees are highly encouraged to complete additional mentored research training in medical genetics.

Combined Internal Medicine & Medical Genetics Residency: This 4-year curriculum is structured according to the requirements of American Board of Internal Medicine (ABIM) & ABMGG. Trainees are highly encouraged to complete additional mentored research training in medical genetics.

Combined Maternal Fetal Medicine Fellowship & Medical Genetics Residency: This 4-year curriculum is unique for physicians who have completed an accredited residency in Obstetrics and Gynecology and wish to integrate their Maternal and Fetal Medicine (MFM) fellowship with Medical Genetics residency training.

Combined Reproductive Endocrinology and Infertility Fellowship & Medical Genetics Residency: This 4-year curriculum is unique for physicians who have completed an accredited residency in Obstetrics and Gynecology and wish to integrate their Reproductive Endocrinology and Infertility (REI) fellowship with Medical Genetics residency training.

Medicine

The courses in medicine have been arranged for the student with the goal of preparing them to care for the whole person. This is accomplished through training in several principal objectives. First, their attention is directed to the patient as a person, and they are required to study the special needs of particular human beings and their unique reactions to the disease from which they suffer. Students are trained in the principles of diagnosis and are given opportunities to study disease in the human being, including its treatment and prevention. They are given training in accepted technical methods so that they may employ these fundamental procedures for the intelligent examination of patients. Lastly, students learn the communication skills essential to the care of patients and collaboration with colleagues. The work is essentially practical and the objectives are pursued simultaneously, progressing in complexity and independence from the first through fourth years of medical school. While the students are following these courses, they have an opportunity to spend their time in the inpatient and outpatient units of the Osler Medical Service, Johns Hopkins Bayview, and Sinai Hospital of Baltimore, as well as many clinics in the Baltimore-area community. In addition to the practical instruction, students are expected to read textbooks and consult monographs and original articles for much of their information.

Those students who wish to seek their area of concentration within the Department of Medicine will be assigned to a preceptor who will guide their clinical work, research, reading, and study, on a tutorial basis. It is particularly in the use of “elective time” that the preceptor will advise the student. To fit the interests and ability of the student, considerable flexibility in the choice of elective program will be possible.

Elective in Consultative Endocrinology

Elective in Gastroenterology

Elective in Geriatric Medicine - Bayview

Elective in Infectious Diseases - JHH or Bayview

Elective in Nephrology

Elective in Pharmacology

Elective in Pulmonary Diseases

Elective in Rheumatology

Various other electives and research opportunities

Molecular and Comparative Pathobiology

The Department of Molecular and Comparative Pathobiology provides instruction and consultation in veterinary medicine, experimental techniques, and comparative pathology, with emphasis on the study of disease processes in animals which relate to human health. Postdoctoral training is offered in laboratory animal medicine, comparative pathology, and in retrovirus biology. The department is equipped with medical, surgical, pathology, diagnostic, and research laboratories.

Program Requirements

Molecular Biology and Genetics

Courses taught by the Department of Molecular Biology and Genetics faculty are offered through School of Medicine Core Courses and through the Biochemistry, Molecular, and Cellular Biology (BCMB) graduate program (p. 952).

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy (see Graduate Programs (p. 949)).

ME.260.709 Molecular Biology and Genomics

This course covers the Molecular Biology and Genomics of both prokaryotes (using E. coli as the model organism) and eukaryotes, with a focus on "model organisms" including yeast, flies, worms, mice as well as humans. Both the Molecular Biology (reductionist) perspective and the Genomics (systems biology) perspective will be provided on each topic, and there will be heavy emphasis on mechanism and regulation of fundamental processes in biological information transfer DNA->RNA->protein. This lecture model will cover genes and genomes, transcription and the RNA world, replication, chromosome structure and function and genome instability.

Target Audience: First year graduate students. Post graduates with approval of course director.
Prerequisites: None

Multi-Department Courses

Program Requirements

First and Second Years

Scholarly Concentrations

Scholarly concentrations were designed to provide students an opportunity as early as possible in the curriculum to develop additional expertise in a particular area of interest, and guide students in applying a scholarly approach to an independent mentored project. Students begin by meeting in seminars in their particular area of interest during the intersessions, and subsequently identify a mentor and project timeline. The goal is completion of the project by the end of Year 2. The five areas of concentration from which students may choose are Basic Science, Clinical Research, History of Medicine, Medical Humanities, Bioethics and the Healing Arts, or Public Health and Community Service.

Topics in Interdisciplinary Medicine

Topics in Interdisciplinary Medicine (TIME) courses are designed to present the behavioral and social science content pertinent to the practice of medicine in the 21st century and provide additional clinical skill development in the preclinical years. They are taught by interdisciplinary faculty and placed at times in the calendar when students have no other competing coursework.

Code	Title	Credits
First Year		
ME.800.640	Topics in Interdisciplinary Medicine - Disparities and Inequities in Health and Health Care	0
ME.800.644	Topics in Interdisciplinary Medicine – Disaster Medicine	0

ME.800.634	Transition to the Wards	0
Third Year		
Translational Science Intersessions [2]		

[1] In the third quarter, Year 2 students spend two afternoons per week in Transitions to the Wards, a course designed to prepare students for learning in the clinical clerkships that follow. The course uses a combination of small group discussion and team-based learning to explore clinical problem solving, direct observation of advanced physical diagnosis and presentation skills with college faculty, and procedural and simulation exercise. Every student recertifies in Basic Life Support.

[2] The Translational Science Intersessions occur in the last week of each quarter, and are taken by students who have completed one of the eight-week core clerkship rotations in that quarter. Students will generally complete four Translational Science Intersessions during their clinical curriculum. These intersessions are meant to present more advanced understanding of state-of-the-art translational science research with students who have some clinical training. In general the format includes lecture, seminar-type discussions, journal clubs and student presentations with both basic science and clinical faculty. Students choose one small group topic within the general topic to focus the week. One afternoon in each of these weeks is devoted to a discussion of ethics, using a lecture, case presentation and small group presentation led by faculty from the Berman Institute of Bioethics. In the second afternoon session, students participating in the intersessions meet in small groups with their College Advisory Program to discuss critical incidents from the core clerkships

[1] In addition to the listed core courses, each student will complete statistics and quantitative methods courses. Each student also selects advanced electives offered by members of the Neuroscience Training Program or other departments at the Medical School. Students in the Neuroscience Training Program are required to complete six elective courses by the end of their second year. These may be a combination of small seminar-style elective courses in neuroscience, listed below, and advanced courses in other fields relevant to their research interests, such as molecular biology, genetics, immunology, biochemistry, biomedical engineering, biostatistics, pharmacology, physiology, anatomy and computer science.

Oncology

Elective Opportunities

Seminar Course: Biology of Cancer

This is an advanced graduate seminar course that is held biannually (rotates with New Approaches to Cancer Prevention and Therapy) in the Spring Semester. Selected timely topics are considered in some detail by world-famous experts, both local and international, using a combination of in-person and zoom-based seminars. Emphasis is placed on the fundamental processes underlying oncogenesis, and factors affecting the progression of various neoplastic diseases. A basic foundation will be developed that will permit the student to approach various aspects of oncology including epidemiology, carcinogenesis, environmental issues, biologic behavior of the neoplastic cell, and the rationale for the use of various treatment modalities with understanding.

Seminar Course: New Approaches to Cancer Prevention and Therapy

This is an advanced graduate seminar course that is held biannually (rotates with Biology of Cancer) in the Spring Semester. Selective timely topics being developed for the management of neoplastic diseases. Emphasis placed on illuminating the chemical and biological basis of therapeutic and translational impact on clinical practice.

Translational Research Conference

This one-hour weekly conference series highlights the most current and promising advances in translational research and provides an opportunity for participants to understand and appreciate how basic science and clinical research can be successfully integrated for translation into clinical treatments.

Fundamentals of Cancer: Cause to Cure

This is a basic graduate-level lecture course that is held in the late summer/fall every other year. The overall goal of this course is to provide clinically-oriented students (primarily residents and fellows) and laboratory-oriented students (primarily graduate students and postdoctoral fellows) with a broad perspective on basic science as they impact important clinical issues, bridging the gap between the laboratory and the clinic. The course is designed to be highly translational, covering fundamental molecular biology of cancer, the processes and pathophysiology of transformation and metastasis, and how targeted screening strategies and therapies for treatment and prevention emerge from new scientific knowledge.

Introduction to Cancer Research

Research experiences are offered on a space-available basis to U.S. and international trained medical students who submit appropriate application materials to the Registrar's Office. Positions are based on limited availability and not guaranteed. Interested and properly qualified students are encouraged to collaborate in clinical and laboratory research projects with members of the staff. Students will participate in research seminars and related teaching sessions. Interviews will be arranged with staff members to develop a mutually agreed-upon plan of study and research. Visiting students should not contact the department directly as the application process must be coordinated through the Registrar's Office. Offered all year; minimum of four weeks (for Johns Hopkins students; nine weeks for visiting students.)

Clinical Clerkship in Bone Marrow Transplantation

The principles and practice of bone marrow transplantation (BMT) will be stressed. Students will work on the inpatient BMT Unit of the Oncology Center and participate in the daily activities of the service including rounds, lectures, seminars, and informal discussions. Under supervision, the student will follow the clinical course of selected inpatients including follow-up marrow graft recipients in the BMT Outpatient Clinic. The student will have the opportunity to become acquainted with the allied disciplines and procedures that relate to clinical BMT, including histocompatibility testing, marrow collection ("harvesting"), and ex vivo marrow processing. A syllabus of pertinent literature will be provided. The student will also be encouraged to conduct and present a BMT-related research/literature review project. Availability/Duration: All year; ½ quarter; visiting medical students must follow JHUSOM quarter dates Prerequisite(s): Core Clerkship in Medicine or Pediatrics

Advanced Clinical Clerkship in Oncology

This elective will acquaint students with the principles and practice of oncology. Each student will serve as an advanced clinical clerk on one of three inpatient units. The student is expected to attend the weekly outpatient clinics, daily rounds with the attending physician as well as two weekly conferences: Oncology Grand Rounds and the Translational Research Conference. Other disease-oriented conferences should be attended as appropriate. Appropriate readings are recommended. Availability/Duration: All year; ½ quarter; visiting medical students must follow JHUSOM quarter dates Prerequisite(s): Core Clerkship in Medicine

Advanced Clerkship In Pediatric Oncology

Students will have the opportunity to help care for children with cancer on the inpatient Pediatric Oncology and Bone Marrow Transplant Services. Patient population includes children with newly diagnosed cancers, bone marrow transplant recipients, as well as those requiring admission related to complications of treatment. Students will be assigned patients to primarily follow along with resident supervision and will become integral members of the inpatient medical team. Additionally, each student will have an outpatient oncology clinic once per week. Core lectures occur at least twice a week. Students also attend weekly conferences including fellows' educational sessions and tumor boards. Availability/Duration: All year; 4 weeks; visiting medical students must follow JHUSOM quarter dates Prerequisite(s): Core Clerkship in Pediatrics and Internal Medicine.

Advanced Laboratory Research

Advanced research under the supervision of an Oncology faculty member. Research fellowships in basic and translational laboratory research on clinically relevant questions are available to students preparing themselves for careers in teaching and research. Availability/Duration: All four quarters; 1 year. Positions are based on limited availability and are not guaranteed. Prerequisite(s): Completion of years one and two

Clinical Clerkship in Medical Oncology at Johns Hopkins Bayview Medical Center

This clinical experience in medical oncology exposes trainees to the multi-disciplinary practice of medical oncology, including inpatient consults and outpatient clinics in solid tumor and malignant hematology. A special feature of the clerkship is the weekly Thoracic Multidisciplinary Clinic with medical, radiation, and surgical oncologists. Availability/Duration: All year; 2-4 weeks; visiting medical students must follow JHUSOM quarter dates Prerequisite(s): There are no absolute prerequisites but completion of a Core Clerkship in Medicine will help the student fully participate in the elective.

Subinternship in Clinical Bone Marrow Transplantation

This clinical elective will provide an in-depth experience in the management of patients undergoing allogeneic or autologous bone marrow transplantation (BMT) in the Johns Hopkins Oncology Center SKCCC. The student subintern will work with the BMT team, which consists of an attending physician, a clinical oncology fellow, a medical resident, and a physician assistant, plus staff members in nursing, nutrition, pharmacy, and social work. The subintern will assume responsibilities for the direct care of selected BMT inpatients, under the guidance of the attending physician and clinical fellow, and will assume night call every fourth night. The subintern is expected to participate in daily work rounds, didactic BMT lectures given by the inpatient attending physician, informal discussions about allied topics and current research activities, graft-versus-host disease walk rounds, and Oncology Center departmental seminars. The student will receive a syllabus of pertinent literature on both the clinical aspects and basic immunobiology of bone marrow transplantation. During this elective, the subintern will also have the opportunity to become acquainted with the allied disciplines and procedures that relate to clinical BMT, including histocompatibility testing, marrow collection ("harvesting"), and ex vivo marrow processing (e.g. lymphocyte depletion, chemotherapeutic treatment, cryopreservation). As part of this subinternship, the student will also be introduced to the basic and clinical research activities of the BMT program. Availability/Duration: Any ½ quarter, including summers; visiting medical students must follow JHUSOM quarter dates Prerequisite(s): Senior students only. Completion of Core Clerkship(s) in Medicine and/or Pediatrics is essential.

Pathology

Overview

Electives in Pathology provide students an excellent way of broadening their knowledge of medicine and determining their level of interest in the specialty. Most pathology electives give students first hand knowledge of the central role pathology plays in the diagnosis of disease, and as such, are valuable for students going into almost any clinical specialty.

Both general and subspecialty electives in Pathology are available. Electives in anatomic pathology focus on morphologic and histologic diagnosis, while those in the clinical laboratory illustrate the effective use and interpretation of laboratory testing. Research electives provide insight into basic pathogenesis of disease. Students who have already made a firm decision to enter postgraduate training in Pathology should contact an advisor in the department to gain assistance in planning a balanced elective program.

Pediatrics

The core clerkship in Pediatrics is an eight-week experience in which students care for patients in both inpatient and outpatient (ambulatory) settings. The clerkship focuses on general pediatrics, but students participate in the care of patients with sub-specialty needs as well.

After a three-day program of educational sessions/lectures intended to orient students to Pediatrics (PRECEDE), students spend approximately four weeks rotating in an inpatient setting and four weeks rotating in an outpatient setting. Additionally, students are required to complete a one-day rotation at the Kennedy Krieger Institute (http://www.kennedykrieger.org/), an affiliated hospital for children with developmental disabilities and rehabilitation needs.

Throughout the clerkship, there are weekly lectures presented by exceptional faculty. These serve as an aid in preparing students for the National Board of Medical Examiners shelf exam in Pediatrics, which is administered at the end of the clerkship.

Pharmacology and Molecular Sciences

Division of Clinical Pharmacology

This Division is operated jointly by the Department of Pharmacology and Molecular Sciences and the Department of Medicine as a closely integrated unit.

Graduate Program

Students are accepted for graduate work leading to the degree of Doctor of Philosophy. An integrated program leading to both the M.D. and Ph.D. degrees is also available to medical students who are interested in combined medical and scientific training.

Program Requirements

Psychiatry and Behavioral Sciences

Elective Opportunities

Elective courses must be approved by the preceptor; any member of the department may act as preceptor.

Elective work may be done within the Johns Hopkins Medical Institutions or under the supervision of Hopkins' faculty in affiliated institutions in the Baltimore area. In addition, students may request sponsorship of the department for an assignment to another medical school in the United States or abroad.

In addition to training programs in research and clinical psychiatry, the department offers elective seminars and independent study projects.

It is the policy of the Department of Psychiatry and Behavioral Sciences to maintain flexibility in its elective programs, and to attempt, as much as possible, to design programs that meet the needs of the individual students.

Dr. MacKinnon is the coordinator of electives for first and second-year students. Dr. Parekh and Dr. Gerstenblith coordinate electives for third and fourth-year students. Students are invited to discuss their interests and needs with them, or with any member of this department they may wish to consult.

Although there are numerous clinical and research electives available in the department, they should not be considered as prerequisites for residency training in psychiatry.

For those students who are strongly considering a psychiatry residency, it is recommended they complete a four-week subinternship in psychiatry, as well as devote a majority of their elective time to broaden and deepen their education in the other basic science and clinical areas.

The subinternship experience is good for students who wish to find out if they will like psychiatry as a career before making decisions about entering the field. It is also quite helpful for students who are not going into psychiatry, but realize a broadened clinical experience in this field would be useful in their chosen specialty. Students who may be interested in training in psychiatry should consult Dr. Vinay Parekh (vparekh1@jhmi.edu) and Dr. Avi Gerstenblith (tgerste1@jhmi.edu) as early as possible to discuss their educational plans.

For all students, elective opportunities in psychiatry will allow them to improve their skills and to develop new areas of interest in the field.

The elective programs described on the following pages are representative of opportunities for elective work that are available in this department, but many other opportunities can be developed through direct collaboration of individual students and individual faculty members.

Public Health

Courses in the Johns Hopkins Bloomberg School of Public Health are open to students of the School of Medicine without payment of additional fees if consent is obtained from the course instructor and the administrative officers of the School of Medicine. Interdivisional registration forms must be used to enroll in Bloomberg School courses.

Medical students may elect to pursue the Master of Public Health (MPH) program in the Bloomberg School in conjunction with the medical curriculum. The program will consist of eleven months of required and elective courses in the Bloomberg School. This is exactly the same program followed by other individuals pursuing the MPH degree, as described in the catalogue of that School. The specific elective course program will vary according to the special interests of the individual student.

Medical students integrate this special program into their medical curriculum by taking a year's leave of absence on completion of the second or third year. During that year the student is enrolled full time in the MPH program in the Bloomberg School.

All applications are subject to the approval of the Admissions Committee of the MPH program in the Bloomberg School. School of Medicine approval for all programs must be obtained from the Associate Dean for Medical Student Affairs. Comparable study arrangements are possible also for medical students in other U.S. medical schools.

Opportunities are available for further training within the departments of the School and in numerous graduate degree programs. For those interested, information concerning these programs may be obtained from Admissions Services in the Bloomberg School.

Program Requirements

Instruction in public health is available for medical students at the Johns Hopkins Bloomberg School of Public Health, and medical students may wish to consider enrolling in courses offered by the Bloomberg School of Public Health. A combined M.P.H.-M.D. Program is offered.

Radiation Oncology and Molecular Radiation Sciences

Overview

The Department of Radiation Oncology and Molecular Sciences at Johns Hopkins is dedicated to patient-centered, specialized care. Our multidisciplinary teams encompasses radiation oncologists, dosimetrists (experts who calculate the dose of radiation), medical physicists, radiation oncology nurses and radiation therapists who work cooperatively to provide the most advanced treatment options specific to each patient's disease.

Electives

Elective courses must be approved by the course director. Course descriptions and additional details can be found at: https://www.hopkinsmedicine.org/som/students/academics/electivebook.pdf

Section of Surgical Sciences

Program Requirements

General Surgery and Surgical Specialties

The Core Surgical Clerkship is a prerequisite for advanced elective courses in clinical surgery. Research electives may be scheduled with faculty members by arrangement, with the assistance of the faculty advisors or the clerkship director.

Second, Third, or Fourth Year

An eight-week core clinical clerkship will be offered each block and can be taken at any time from the last quarter of the second year through the first quarter of the fourth year. One-half of the block will consist of a clerkship experience in General Surgery. These consist of:

Johns Hopkins Hospital (JHH) Services:

- **Cameron Blue, Cameron Gold, Cameron Green, and Handelsman GI:** Primarily hepatobiliary and pancreatic oncology as well as other GI surgical problems. Laparoscopic/robotic and open surgery
- **Eckhauser:** Colorectal surgery, open and laparoscopic/robotic surgery
- **Halsted:** Trauma as well as emergent and elective general surgery
- **Handelsman BEM (breast, endocrine, melanoma):** Thyroids, parathyroids, adrenals, breast and melanoma
- **Pediatric Surgery:** General surgery, trauma, oncology and thoracic surgery in the pediatric population
- **Ravitch Colorectal:** Colorectal surgery, open and laparoscopic/robotic surgery
- **Ravitch MIS (minimally invasive surgery):** Almost all laparoscopic/robotic, primarily foregut, biliary and hernia surgery

Bayview (BV) – Community hospital where students will work with Johns Hopkins faculty and surgery residents. Students will see laparoscopic and open GI, oncology, hernia and bariatric surgery. Students will spend the entire rotation at Bayview including the subspecialties.

Howard County (HCGH) – Community hospital where students will work directly with Johns Hopkins faculty and surgery residents. Varied breadth of open and laparoscopic general surgery, foregut, hernia, and colorectal surgery cases. The subspecialty rotations will be at JHH.

The other half of the quarter will be divided between two of the following Surgical Specialties: Cardiac Surgery, Neurosurgery, Ophthalmology, Orthopaedic Surgery, Otolaryngology Head & Neck Surgery, Plastic Surgery, Thoracic Surgery, Transplant Surgery, Urological Surgery, and Vascular Surgery.

Outpatient and Ward Work

General Surgery Basic Clerkship: Each student will be assigned to a major teaching service for four weeks. These will include the general surgical services of The Johns Hopkins Hospital, Bayview Medical Center, or Howard County General Hospital. Students assigned to the Johns Hopkins Hospital will do both their general and subspecialty rotations at the Johns Hopkins Hospital. Students assigned to Bayview will do both their general and subspecialty rotations at Bayview. Students assigned to Howard County General Hospital will be assigned to subspecialty rotations at the Johns Hopkins Hospital. All didactics and labs will take place on Wednesdays at JHH. Didactics will cover both general and specialty topics. Weekly preceptor meetings will take place at JHH or BVMC. General Surgery Grand Rounds take place on Thursdays, 7:30 - 8:30 AM.

Cardiac Surgery: Students will be assigned to this department for approximately two weeks at the Johns Hopkins Hospital. Time on the rotation will be split between the Cardiac OR and Cardiac ICU.

Thoracic Surgery: Students will be assigned to this department for approximately two weeks at the Johns Hopkins Hospital.

Transplant Surgery: Students will be assigned to this department for approximately two weeks at the Johns Hopkins Hospital.

Vascular Surgery: Students will be assigned to this department for approximately two weeks at the Johns Hopkins Hospital.

Orthopaedic Surgery: Students will be assigned to this department for approximately two weeks either at the Johns Hopkins Hospital or at the Johns Hopkins Bayview Medical Center.

Otolaryngology Head & Neck Surgery: Students will be assigned to this department for approximately two weeks either at the Johns Hopkins Hospital or at the Johns Hopkins Bayview Medical Center.

Urology: Students will be assigned to this department for approximately two weeks either at the Johns Hopkins Hospital or at the Johns Hopkins Bayview Medical Center.

Plastic Surgery: Students will be assigned to this department for approximately two weeks either at the Johns Hopkins Hospital or at the Johns Hopkins Bayview Medical Center.

Neurosurgery: Students will be assigned to this department for approximately two weeks either at the Johns Hopkins Hospital or at the Johns Hopkins Bayview Medical Center.

Surgical Specialty Conference/Grand Rounds. Varies by specialty.

Elective Opportunities

General Surgery and Surgical Specialties. Elective courses must be approved by the Dr. Alodia Gabre-Kidan. Each department/division has a designated preceptor. A complete list of clinical and research electives can be found here: Electives Book: Johns Hopkins School of Medicine (https://www.hopkinsmedicine.org/som/offices/registrars/med-students/electives.html).

A subinternship in surgery is designed to give the advanced student supervised participation in clinical care of patients. This elective must be applied for at least two months before the starting date to insure appropriate credentialing by the Department of Surgery and the hospital. The Core Surgery Clerkship must be completed prior to an elective or subinternship being started.

Major Clinical Courses

The prerequisite of all major clinical electives is the Surgery Core Clerkship.

Department of General Surgery

Code	Title	Credits

Code	Title	Credits
Subinternship in Plastic Surgery		
Advanced Clinical Clerkship in Urology		

Postdoctoral Fellows

Most doctoral recipients spend three to six years following receipt of degree in postdoctoral training. The Johns Hopkins University School of Medicine has an active program of postdoctoral study. Currently there are 2,300 postdoctoral students enrolled, of whom 249 are in the basic medical science departments, 1,179 in clinical science departments, 872 are house officers of the Johns Hopkins Hospital. By actions of the Advisory Board of the Medical Faculty and of the Medical Board of the Hospital, primary responsibility for postdoctoral medical education is placed upon the Medical Faculty. Postdoctoral students, including house officers of the Johns Hopkins Hospital and affiliated hospitals, must register in the School of Medicine and are designated by the title of Fellow of the School of Medicine.

The following sections outline briefly some of the opportunities for postdoctoral education in the Johns Hopkins University School of Medicine.

For specific information, applicants should communicate with the director of the department in which they desire to study, the Associate Dean for Postdoctoral Programs, or the Associate Dean for Graduate Medical Education.

The Johns Hopkins University School of Medicine
733 N. Broadway, Room 137
Baltimore, MD 21205

Postgraduate Study and Fellowships

The School of Medicine offers opportunities for study to a limited number of individuals holding the M.D., Ph.D., or other equivalent doctoral degrees from accredited institutions. All departments and divisions have facilities for postdoctoral students. Candidates desiring to avail themselves of these opportunities for instruction and study must be acceptable to the head of the department in which they wish to work.

It is the policy of the Johns Hopkins University School of Medicine to require criminal background investigations on accepted students in any professional or graduate program at the School of Medicine, interns, residents, and clinical fellows in any Graduate Medical Education program sponsored by Johns Hopkins, and other clinical and research postdoctoral fellows at the School of Medicine.

Residency and fellowship programs are approved by the Maryland Higher Education Commission for veterans' educational benefits.

Postdoctoral/GME Offices

The Offices of Graduate Medical Education and Postdoctoral Affairs, within the Dean's Office of the School of Medicine, are directed by Associate Deans. The offices deal with all house staff of the Johns Hopkins Hospital and all postdoctoral fellows in the School of Medicine. The offices recommend and implement institutional policies covering house staff, in conjunction with the Office of the Vice President for Medical Affairs of the Johns Hopkins Hospital, and for non-house staff postdoctoral fellows. In addition, the Associate Deans and staff are available to all house officers and postdoctoral fellows for personal and career counseling. Additional information regarding the Office of Graduate Medical Education can be found at https://www.hopkinsmedicine.org/som/gme (https://www.hopkinsmedicine.org/som/gme/) and the Office of Postdoctoral Affairs can be found at https://www.hopkinsmedicine.org/som/offices/pda/.

Health and Dental Insurance

All postdoctoral students, their spouses, and dependent children must be covered by health insurance. It is required that postdoctoral students subscribe to the School of Medicine Student Health Program (SHP). Spouses and dependent children may be covered under an alternative insurance plan, subject to review and approval by the School of Medicine Registrar's Office. Foreign or travelers insurance is not accepted.

The dental plan for postdoctoral students covers only the student. The dental plan for the house officer also covers dependents. The house staff health insurance plans are fully subsidized by the Hospital and School of Medicine. The cost of individual health and dental insurance is provided for all non-house staff postdoctoral fellows.

A complete description of benefit plans can be found at https://www.hopkinsmedicine.org/som/offices/registrars/ (under Benefits).

Other Benefits

All house staff and fellows with full-time, primary appointments in the School of Medicine are covered under a long-term disability insurance program and a $100,000 term life insurance policy. These benefits are provided without cost to the trainees. A 403(b) retirement plan allows house staff and fellows to voluntarily tax-shelter a portion of their taxable income received as compensation for services. Income received in the form of fellowships (stipends) is excluded from 403(b) eligibility.

The University Health Service (UHS) provides adult ambulatory care to housestaff and postdoctoral students and spouses (if enrolled in the SHP). The fee for this service is provided by the preceptor.

Fellowships and Fees

Postdoctoral students are usually supported by stipends which accompany the awarding of fellowships. Some sources of the stipend offered to holders of these fellowships lie in the School of Medicine, others in agencies outside the school. Fellowship awards are usually made for one academic year and can be extended for those who wish additional training. Preceptors are expected to abide by the NIH minimum stipend guidelines for years of relevant experience for non-housestaff fellows paid through the Johns Hopkins University payroll system. Postdoctoral students who are not members of the house staff will be assessed tuition at the rate established by the University Board of Trustees for non-M.D. candidates, pro-rated in relation to period of enrollment (see Tuition Policies).

Internships and Residencies

Graduate physicians who are applicants for internship and residency positions at the Johns Hopkins Hospital may direct their inquiries to the director of the department in which they desire to serve, care of:

The Johns Hopkins Hospital
600 N. Wolfe St.
Baltimore, MD 21287

Postdoctoral Courses-Continuing Medical Education

Intensive brief courses are offered annually by various clinical departments. Current and future offerings can be found at https://hopkinscme.cloud-cme.com

SCHOOL OF NURSING

MISSION AND VALUES

The mission of the Johns Hopkins School of Nursing is to improve the health of individuals and diverse communities locally and globally through leadership and excellence in nursing education, research, practice, and service.

The academic rigor of our programs, the extraordinary nursing scholarship of our faculty, and our reputation for shaping nursing graduates who are leaders in their profession position us as one of the top nursing schools in the U.S.

OUR 2020-2025 STRATEGIC PLAN

INNOVATION & EXCELLENCE:

Lead advancements in education, research, practice and service.

COMMUNITY & GLOBAL CAPACITY:

Build educational/practice partnerships to build the health workforce and improve health outcomes through policy, practice, education and research.

TRANSFORMATIONAL TECHNOLOGY:

Leverage technology to advance our mission.

HEALTH POLICY & ADVOCACY:

Increase the focus on health policy in academic programming and increase advocacy and policy engagement.

PEOPLE, PARTNERSHIPS & COLLABORATION:

Strengthen and advance a cohesive and integrated school structure and environment that builds internal and external partnerships.

VIEW STRATEGIC PLAN (http://info.nursing.jhu.edu/strategic-plan/)

Admission

Johns Hopkins University is committed to recruiting, supporting, and fostering a diverse community of outstanding faculty, staff, and students. As such, Johns Hopkins does not discriminate on the basis of sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, or other legally protected characteristic in any student program or activity administered by the university or with regard to admission or employment. Applications are managed through the School of Nursing's Office of Admissions. Admission decisions are made by admissions committees. All admission decisions rendered are final and cannot be appealed.

The school seeks individuals who bring with them a spirit of inquiry, commitment, and motivation toward scholarship and leadership in the nursing profession. The Admissions Committee is interested in each individual and reviews holistically academic records, health care, other professional and community experience, interviews (for some programs), recommendations and expression of goals and interests. Intellectual interests and accomplishments are of primary importance in the admissions decision, and scholastic records are carefully examined. Clarity of goals, character, and achievement are also important.

If Johns Hopkins University receives false, fraudulent, deceitful, or misrepresented information that is material to student admissions as part of your application or application process, you are subject to sanctions, including denial or revocation of admission and revocation of any credits or degree(s) earned at Johns Hopkins. Johns Hopkins University will notate the sanctions imposed on your transcript, and may notify any institution where you seek or intend to enroll, or are enrolled in the future, of the sanctions imposed.

For questions regarding the application process and requirements, contact the Office of Admissions at 410-955-7548 or jhuson@jhu.edu.

Students may apply to only one Johns Hopkins School of Nursing academic program per academic term. To apply to a School of Nursing degree or certificate program, students will complete an online application at www.nursingcas.org (http://www.nursingcas.org/). At a minimum, the application requirements will include:

- Completed online application
- Acknowledgement of the Johns Hopkins University School of Nursing values
- Application fee
- Application essay(s)/Goal Statement
- A CV or résumé
- Three letters of recommendation (academic and professional)
- Official transcripts from all post-secondary institutions attended

Some School of Nursing programs may stipulate additional admission requirements (e.g., BSN, MSN, prerequisite courses, standardized test scores, writing samples, licensure, work experience, timed video response). Qualified applicants may also be contacted to schedule a personal admission interview. Applicants should contact the Office of Admissions at jhuson@jhu.edu or go online to nursing.jhu.edu/admissions/index.html (http://nursing.jhu.edu/admissions/) to determine specific admission criteria for individual programs.

Official GRE scores sent directly from ETS (Educational Testing Service, www.ets.org (http://www.ets.org/)) are required for the DNP/MPH. Official GRE or GMAT scores are required for the MSN/MBA and DNP/MBA programs. The GRE code for the Johns Hopkins University School of Nursing is **5767**.

Please note that the Johns Hopkins School of Nursing utilizes NursingCAS, the Centralized Application Service for Nursing Programs for all application processing. All applicants will be required to submit their application and all supplemental documents through this centralized application system.

NursingCAS
P.O. Box 9201
Watertown, MA 02471
617-612-2880
nursingcasinfo@nursingcas.org
www.nursingcas.org (http://www.nursingcas.org/)

For degrees earned outside the United States (with the exception of English speaking Canada), credits must be evaluated by WES (World Education Services, www.wes.org (http://www.wes.org/)) or Educational Credential Evaluators (www.ece.org (http://www.ece.org/)) with a course-by-course evaluation. Licensed nurses may also have international transcripts evaluated in a full education course-by-course report by the CGFNS (Commission on Graduates of Foreign Nursing Schools, www.cgfns.org (http://www.cgfns.org/)).

For MSN Specialty Tracks, Post-Degree Certificates, and DNP Programs, verification of RN licensure is required. All campus-based students must obtain a Maryland RN license or licensure from a compact state by the time of matriculation.

The Office of Admissions will make every attempt to notify applicants of missing documents; however, the applicant is responsible to ensure all required documents are received and the admissions file is complete by published deadlines. The Admissions Committee reserves the right to request additional information from an applicant, including an interview.

Submitted applications and documents become the property of Johns Hopkins University and will not be returned.

Before an admitted student can enroll at the School, all prerequisite coursework must be completed at a regionally accredited college or university with a grade of **B- or higher** (for the MSN Entry into Nursing Track) or with a grade of **B or higher** (for the MSN Specialty Tracks and DNP). No exceptions will be made.

State Specific Information for Online Programs

Students should be aware of additional state specific information for online programs. The most up-to-date information is available on each individual program's webpage and on the University's Required State Specific Disclosures for Students Enrolled in Online Distance Education Programs (https://provost.jhu.edu/education/accreditation-and-academic-compliance/state-authorization-of-distance-education/). The School of Nursing cannot enroll students in online academic programs who reside in/plan to complete clinical hours in certain states.

Admission Decisions

Applications are processed and files managed through the School of Nursing's Office of Admissions. Admission decisions are made by admissions committees. All admission decisions rendered are final and cannot be appealed. Applicants who are offered admission can expect to receive notification of their decision by email. Applicants will have a deadline by which to accept and deposit or decline the offer of admission using an online response form. For most programs, the response deadline is within three weeks of admission. Only letters or email sent directly from the Office of Admissions may be considered official notifications of admission. The School of Nursing offers admission with the expectation that students will enroll in courses in the semester for which they are admitted, unless a deferral is granted (see below).

Deferrals

For some programs, admitted students may request to defer admission for up to one year from the semester for which they were admitted. Only students who have paid the non-refundable enrollment deposit may seek a deferral. Students cannot defer admission once the semester/term has started in the School of Nursing*. Financial aid and tuition support are not automatically deferred. For questions regarding deferrals, please contact the Office of Admissions at jhuson@jhu.edu. If you wish to defer your attendance, you must submit a written request and explanation to the Director of Admissions. Deferral request decisions are formally communicated by the Director of Admissions to the student via email.

*Students with summer start terms in dual-degree programs at the Bloomberg School of Public Health and Carey Business School can request a deferral up until coursework has started at the partner school.

Application Deadlines

The School of Nursing strongly encourages all applicants to apply by the early or priority application deadline. For the most up-to-date information regarding application deadlines, please visit our website at nursing.jhu.edu/admissions/apply/deadlines.html (https://nursing.jhu.edu/admissions/apply/deadlines.html).

The School of Nursing will process any completed application received by the priority deadline and notify applicants whether they have been admitted or denied admission. While some programs may be willing to consider applications received after the priority application deadline, the School of Nursing cannot guarantee that late applications will be reviewed.

Adding the Post Master's Nursing Education Certificate for Master's Specialty Track and Doctoral Students

Students who are currently enrolled in a Master's Specialty Track or Doctoral degree program at the Johns Hopkins School of Nursing and wish to add the Post Master's Nursing Education Certificate must submit a written request to the Office of Admissions. A second program application is not required.

Note: Financial aid recipients must notify the Financial Aid office when changing or adding a degree or certificate program. Those in F-1 status must notify the International Services office for a new I-20 to reflect the change in program. Students using VA benefits must notify the VA Certifying Official in the Registrar's Office when changing or adding a degree or certificate.

International Applicants

The School of Nursing takes great pride in being world-renowned for nursing education. Below are additional requirements for international applicants to the School of Nursing. For more information on enrolling as an international student, please visit the Office of International Services website at ois.jhu.edu (http://ois.jhu.edu/).

Transcript Evaluation

For degrees earned outside the United States (with the exception of English-speaking Canada), credits must be evaluated by WES (World Education Services, www.wes.org (http://www.wes.org/)) or Educational Credential Evaluators (www.ece.org (http://www.ece.org/)) with a course-by-course evaluation. Licensed nurses may also have international transcripts evaluated in a full education course-by-course report by the CGFNS (Commission on Graduates of Foreign Nursing Schools, www.cgfns.org (http://www.cgfns.org/)).

Standardized Test Requirements

The Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) is required of applicants whose native language is not English. For School of Nursing applicants, the minimum TOEFL score is 100 (Internet-based); the minimum IELTS score is 7. Students may contact the Office of Admissions with questions about a TOEFL/IELTS waiver. Individual programs may require additional evidence to demonstrate English language proficiency. The TOEFL code for NursingCAS is **B506**.

Prerequisite Coursework

U.S. immigration regulations require that students needing an F-1 visa must successfully fulfill all prerequisites before an I-20 can be issued. To allow sufficient time to complete all the steps in the visa process, students must submit an official transcript or official course by course evaluation to the Office of Admissions at least 3 months prior to the beginning of the term in which they wish to begin studies (October for spring term; May for fall term) with final grades of B- or higher for the MSN Entry into Nursing Track.

Financial Aid and Scholarships

All students, regardless of citizenship, are automatically considered for merit-based scholarships. Need-based financial aid is reserved for U.S. citizens and permanent residents only. Students seeking an F-1 or J-1 visa to study in the United States must submit financial documents in English demonstrating proof of funding.

International students may be able to borrow through private education loan programs. However, they must apply with a creditworthy co-borrower who is also a U.S. citizen or permanent resident.

U.S. Employment Opportunities

There are no guarantees of employment for any graduates regardless of citizenship. Current immigration laws do have an impact on hiring practices.

Online Courses

Students sponsored by Johns Hopkins for F-1 or J-1 student status must maintain full-time enrollment status. Additionally, immigration regulations require students to be enrolled in classroom instruction. Only one online/distance course may be counted towards the minimum required courses in any term. Due to these restrictions, some degree programs in the School of Nursing do not qualify for F-1 or J-1 student sponsorship.

Conditions of Matriculation

Compliance Requirements

All enrolled degree/certificate-seeking students must register for and complete a background check, drug screening, required medical compliance, as well as other requirements, regardless of program, online/on-site course attendance status, and clinical/non-clinical course status. The School of Nursing has contracted with CastleBranch (https://jhu.castlebranch.com/JO78/package-selection/) to track and approve all compliance requirements. All enrolled degree/certificate-seeking students must provide all the required compliance documents, and must update documentation as required, in order to remain in compliance throughout the course of their program.

Technical Standards for Admission and Graduation

The curricula of the School of Nursing requires that students engage in diverse and complex experiences directed at achieving competencies, knowledge, skills, attributes, and professional values. Applicants for all academic programs, and enrolled degree-seeking students, must possess certain abilities and skills deemed essential for meeting the professional standards of accrediting agencies.

Admission to the Johns Hopkins School of Nursing is open to all qualified individuals and in accordance with the 1973 Vocational Rehabilitation Act and the American with Disabilities Act. The Johns Hopkins School of Nursing is committed to accommodating the needs of students with documented disabilities, and will do so to the extent possible without compromising the essential components of the curriculum. Questions or concerns regarding these technical standards should be directed to the Associate Dean for Enrollment Management and Student Affairs, (410) 955-7545. The Technical Standards for Admission and Graduation (p. 1082) are available on the catalogue page.

Advising

Academic Advising

All degree and certificate students are assigned an advisor to serve as a resource for information gathering, decision making, and program progression. In the DNP and PhD programs, Faculty Advisor assignments will be made according to the student's program and area of focus. Students will be notified of their advisors prior to orientation. In MSN Programs, professional academic advisors are assigned. Students are ultimately responsible for ensuring they are registered on time and for the correct classes.

Certificates

Healthcare Organizational Leadership, Post-Master's Certificate

The Post-Master's Certificate in Healthcare Organizational Leadership is designed for students with an entry level master's degree in nursing or a non-specialty MSN degree (e.g., nursing education).

Grounded in evidence-based practice, students who pursue this part-time online post-master's certificate in nursing will earn 16-credits and 376 clinical hours. Students can complete clinicals in diverse settings, including hospitals, community or public health agencies, school systems, and correctional facilities. Students who choose to continue their nursing education at JHU can apply the two-credit health finance course to the DNP Executive Track.

Upon completion of the Post-Master's Certificate in Healthcare Organizational Leadership, the graduate is prepared to:

- Apply leadership and management skills to improve services in a variety of health care systems
- Analyze the influences of social and health policy on health care delivery and clinical practice
- Apply for the DNP Executive Track without needing to earn an advanced practice nursing license

Nursing Education, Post-Master's Certificate

This 12-credit post-master's certificate prepares the student to combine their clinical and/or research expertise with expertise in teaching in preparation for careers in nursing education at all levels of academia and in nursing staff development.

The development of the curriculum is based on the NLN Scope of Practice for Academic Nurse Educators.

Certification: Graduates of the Nursing Education Post-Master's Certificate program are eligible to apply for the NLN Certified Nurse Educator examination once they have met the eligibility requirements. For more information, please visit www.nln.org/certification/index.htm (http://www.nln.org/certification/).

A total of 12 credit hours is required to earn the NECO. The learner chooses four of the 3-credit courses listed in the curriculum. Students may enroll in a 1-3 credit teaching practicum course with permission of the advisor. Students who are currently enrolled in a Master's Specialty Track or Doctoral degree program at the Johns Hopkins School of Nursing and wish to add the Nursing Education Post-Master's Certificate must submit a written request to the Office of Admissions. A second program application is not required.

Program Requirements

The Teaching Practicum is not required to earn the certificate but, if taken, the Teaching Practicum should be the final course in the sequence.

Each student's plan is customized with their advisor.

Pediatric Acute Care Nurse Practitioner, Post-Master's Certificate

This 13-credit post-master's certificate prepares the currently certified pediatric primary care NP to expand their expertise beyond primary care to the acute care of children. Post Master's Pediatric Acute Care Nurse Practitioner certificate students will learn how to diagnose and treat pediatric acute, critical and chronic care conditions, gain clinical competency, and apply evidence-based practices. Students will experience a vigorous academic program and clinical experiences to provide acute care to children across a variety of care settings and throughout the continuum of care. With access to Hopkins faculty and learning resources, graduates will develop and apply advanced skills in the assessment, diagnosis, and management of health problems encountered in acutely ill children.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Organization of Nurse Practitioner Faculties (NONPF) NP Core Competencies with Curriculum Content (2017)
- The Nurse Practitioner Core Competencies (2014)
- Population-Focused Nurse Practitioner Competencies: Pediatric Acute Care (2013) (NONPF)

Clinical practica and number of clinical hours: Clinical experiences are diverse and occur in a variety of settings. A gap analysis will be done based on previous acute care experiences to determine clinical hours needed to meet the minimum of 500 hours of precepted pediatric acute care clinical (600 hours recommended).

Certification: Certification: Graduates are eligible to apply for the Pediatric Nursing Certification Board's pediatric acute care and pediatric primary care certification exams: http://www.pncb.org/ptistore/control/exams/pnp/step.

Program Total: 17 Credits [cr]/ 560 Clinical Hours [CL]

Psychiatric Mental Health Nurse Practitioner, Post-Master's Certificate

This 17-credit post-master's certificate prepares the student to evaluate and treat mental health, substance use, and co-morbid conditions across the lifespan. Those who earn a Psychiatric Mental Health Nurse Practitioner Certificate will develop the competencies to provide a continuum of care that incorporates health promotion, prevention, treatment, recovery, and maintenance. Graduates work in a variety of settings ranging from specialty behavioral health centers to primary care, collaborate with other health care professionals and community organizations to provide evidence- based integrated care, and advocate to reduce inaccurate and hurtful representations of mental and behavioral conditions.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Organization of Nurse Practitioner Faculties (NONPF) Domains and Core Competencies of Nurse Practitioner Practice (2011)
- The NONPF Psychiatric-Mental Health Competencies (2013)

Certification: Graduates are eligible to apply for the American Nurses Credentialing Center: www.nursingworld.org/our-certifications (https://www.nursingworld.org/our-certifications/).

Doctoral Degrees

- Doctor of Nursing Practice, Advanced Practice Track (p. 1011)
- Doctor of Nursing Practice: Executive Track (p. 1027)
- Nursing, Doctor of Philosophy (p. 1028)
- Doctor of Nursing Practice (DNP): Advanced Practice Track/Doctor of Philosophy in Nursing (PhD) Dual Degree (p. 1036)

Doctor of Nursing Practice, Advanced Practice Track

The Doctor of Nursing Practice program at the Johns Hopkins School of Nursing is accredited by the:

Commission on Collegiate Nursing Education (CCNE)
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

The Doctor of Nursing Practice (DNP) is a practice-focused doctoral program. The mission of the Doctor of Nursing Practice (DNP) program is to prepare expert nurse clinicians, administrators, and executive leaders to improve health and health care outcomes. The focus is on practice that is innovative and evidence-based, reflecting the application of credible research findings. Across the program, the student develops advanced knowledge and skills reflective of the terminal practice doctorate through evidence-based practice in diverse clinical, health care, and academic settings. The goal for this program is to provide educational, clinical, and practicum experiences in a transdisciplinary, collaborative learning environment. Students complete a project that demonstrates clinical scholarship. This DNP Project emphasizes evidence-based approaches for quality and safety improvement in various roles and practice settings.

DNP Advanced Practice Tracks

The DNP Advanced Practice Track option is a post-baccalaureate to DNP program that prepares students for the Nurse Practitioner role with a focus on a specific population (adult-gerontological primary, adult-gerontological acute, pediatric primary, pediatric primary/acute, family primary, or psychiatric mental health), the Clinical Nurse Specialist role focused on a specific population (adult health, adult critical care, or pediatric critical care), or the Nurse Anesthetist role. The length of the program, number of credits, and clinical hours vary according to the role and specialty, ranging from 78 to 88 credits and 784 clinical hours for the Nurse Practitioner or Clinical Nurse Specialist tracks; 88 credits and 2,128 clinical hours for the Nurse Anesthesia track. The balance of the minimum of 1000 practice hours required for the DNP is obtained while conducting the DNP Project.

The DNP Advanced Practice program (Nurse Practitioner and Clinical Nurse Specialist tracks) is online with required on-site course immersions. The Nurse Anesthesia track is a hybrid program. The first year of the program is online and can be completed at a distance* (with 1-2 on-site immersion experiences in Advanced Health Assessment). All Nurse Anesthesia track students are required to be on campus beginning Summer Year 2 of the Plan of Study.

Students matriculated in the JHU School of Nursing are required to satisfy all academic requirements and adhere to all policies of the School. Students are expected to complete degree requirements within six years of enrollment.

Core courses that lay the foundation for advanced practice nursing are listed below. Additional core courses taken by students in the FNP, PNP, and CNS Pediatric Critical Care are so noted in the track descriptions that follow the DNP Advanced Practice Core Curriculum.

DNP Advanced Practice Core Curriculum

Code	Title	Credits

Doctor of Nursing Practice Advanced Practice Track DNP Project Progression

DNP students are required to successfully complete a DNP Project Proposal and Final Project.

Learning Outcomes

The Doctor of Nursing Practice (DNP) program outcomes are based upon:

1. The Essentials of Master's Education in Nursing (AACN, 2011)
2. The Essentials of Doctoral Education for Advanced Nursing Practice (AACN, 2006)

A graduate of the Doctor of Nursing Practice (DNP) program:

1. Integrates the art and science of nursing, with ethics and the biophysical, psychosocial, analytical, organizational, and public health sciences to improve patient and population health outcomes
2. Demonstrates organizational and systems leadership for quality and safety in health care systems
3. Critically appraises clinical scholarship and analytical methods for evidence-based practice
4. Applies information systems and technology for the provision and/or transformation of health care
5. Leverages interprofessional collaboration for the improvement of individual and population health outcomes
6. Utilizes population health strategies of risk reduction/illness prevention, health promotion, and health maintenance to reduce healthcare disparities and improve outcomes for diverse individuals and populations
7. Develops leadership for health care policy and advocacy that shapes health care financing, regulation, access, and delivery
8. Demonstrates mastery of the advanced nursing practice/advanced practice nursing role and population competencies

Adult-Gerontological Acute Care Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to utilize evidence-based guidelines while diagnosing and managing health problems of acutely and critically ill individuals across the adult lifespan. Adult-Gerontological Acute Care Nurse Practitioners work in acute and complex care settings such as critical care units, hospitalist or specialty services, and in other settings where patients can be physiologically unstable, technologically dependent, requiring frequent monitoring and intervention, and are highly vulnerable for complications.

The development of the curriculum is based on:

- The Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Task Force on Quality Nurse Practitioner Education and other national advanced practice, specialty focused standards and guidelines (AACN Scope and Standards Acute Care Nurse Practitioner Practice, American Association of Critical Care Nurses 2017)
- The Adult-Gerontology Acute Care and Primary Care Nurse Practitioner Competencies (AACN 2016)

Certification: Graduates of the Adult-Gerontological Acute Care Nurse Practitioner Track are eligible to apply for certification as an Adult-Gerontological Acute Care Nurse Practitioner from the American Association of Critical Care Nurses www.aacn.org/certification/get-certified (http://www.aacn.org/certification/get-certified/) or the American Nurses Credentialing Center www.nursingworld.org/our-certification (http://www.nursingworld.org/our-certification/).

Adult-Gerontological Critical Care Clinical Nurse Specialist, DNP Advanced Practice Track

This track prepares the student to ensure high quality, safe, and cost effective nursing care and patient outcomes for young adults, older adults, and frail elderly across the health-illness continuum. Graduates of the CNS track use their depth of expertise, developed through professional practice and graduate education, to provide, manage, support, and improve the nursing and health care provided to patients with chronic, acute, and critical illnesses. CNSs advance the care of patients, families, groups, and the nursing profession through collaboration, consultation, and teaching. CNSs conduct research, evaluate and apply evidence, and use ethical decision making to solve problems. CNSs operate within three spheres of influence:

- patient/nurse
- nursing practice
- organization/system

The development of the curriculum is based on:

- The Criteria for the Evaluation of Clinical Nurse Specialist Master's, Practice Doctorate, and Post-graduate Certificate Educational Programs (NACNS 2015)
- National CNS competency and standards statements, *Clinical Nurse Specialist Core Competencies* (NACNS 2017)
- *Scope and Standards for Acute Care Clinical Nurse Specialist Practice* (AACN 2014)
- *Adult-Gerontology Clinical Nurse Specialist Competencies* (AACN 2010)
- *Statement on Clinical Nurse Specialist Practice and Education, 3rd Edition* [NACNS, 2019]

Certification: Graduates are eligible to apply for American Nurses Credentialing Center (ANCC) www.nursingworld.org/our-certifications (http://www.nursingworld.org/our-certifications/) or American Association of Critical Care Nurses (AACN) Adult-Gerontology Clinical

Nurse Specialist (CNS) certification https://www.aacn.org/certification/get-certified (https://www.aacn.org/certification/get-certified/).

Adult-Gerontological Primary Care Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to provide person-centered, evidenced-based primary care to young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Emphasis is placed on the primary care management of acute episodic and chronic conditions and integration of health promotion and disease prevention throughout the adult lifespan.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Organization of Nurse Practitioner Faculties (NONPF) NP Core Competencies with Curriculum Content (2017)
- Common Advanced Practice Registered Nurse Doctoral-Level Competencies (2017)
- The Nurse Practitioner Core Competencies (2014)
- The Adult-Gerontological Acute Care and Primary Care Nurse Practitioner Competencies (2016)

Certification: Graduates are eligible to apply for one of the following certification exams: the Adult-Gerontology Primary Care Nurse Practitioner exam through the American Nurses Credentialing Center www.nursingworld.org/our-certifications (http://www.nursingworld.org/our-certifications/) or the Adult-Gerontology Primary Care Nurse Practitioner through the American Academy of Nurse Practitioners (https://www.aanpcert.org/ptistore/control/index (https://www.aanpcert.org/ptistore/control/index/))

Family Primary Care Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to practice at an advanced level to provide care to individuals and families across the lifespan (including pediatric through geriatric populations). Family primary care nurse practitioners (FNPs) provide the initial, ongoing, and comprehensive care to patients in ambulatory and outpatient settings. FNPs assess, diagnose, and treat acute and chronic illnesses and are responsible and accountable for providing preventative health care, including health promotion, disease prevention, and health education and counseling. As an FNP, these advanced practice nurses are committed to family-centered care within the context of the community.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- Family nurse practitioner population-focused nurse practitioner (NP) competencies defined by the 2008 Consensus Model for APRN Regulations: Licensure, Accreditation, Certification & Education, the National Organization of Nurse Practitioner Faculties (NONPF) NP Core Competencies with Curriculum Content (2017)
- The Nurse Practitioner Core Competencies (2014), and the Family/Across the Lifespan Competencies (2013)

Certification: Graduates are eligible to apply for certification exams through the American Nurses Credentialing Center (ANCC) Certification Program www.nursingworld.org/our-certifications (http://www.nursingworld.org/our-certifications/) or through the American Academy of Nurse Practitioners Certification Program https://www.aanpcert.org/certs/applications (https://www.aanpcert.org/certs/applications/).

Nurse Anesthesia, DNP Advanced Practice Track

This DNP track prepares graduates to become one of the primary anesthesia providers in the country, a certified registered nurse anesthetist (CRNA). All nurse anesthesia programs must be accredited by the Council on Accreditation of Nurse Anesthesia Programs (COA) for graduates to be eligible to take the National Certification Examination (NCE). According to the COA, Practice Doctorate Programs are designed to prepare graduates with competencies for entry into anesthesia practice. Entry-into-practice competencies for the nurse anesthesia professional prepared at the practice doctoral level are those required at the time of graduation to provide safe, competent, and ethical anesthesia and anesthesia-related care to patients across the lifespan for diagnostic, therapeutic, and surgical procedures.

Entry-into-practice competencies should be viewed as the structure upon which nurse anesthetists continue to acquire knowledge, skills, and abilities along the practice continuum that starts at graduation (proficient) and continues throughout their entire professional careers (expert). See https://www.coacrna.org/.

The development of the curriculum is based on the COA Standards for Accreditation of Nurse Anesthesia Programs, Practice Doctorate, revised October, 26, 2018 and the Accreditation Policies and Procedures Manual, revised May, 2019.

CERTIFICATION

After successful completion of the 36-month curriculum, students will be eligible to apply for the National Certification Examination (NCE) through the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA). Certification to be a CRNA requires a passing score on the national certification exam administered by the NBCRNA. The NBCRNA administers the NCE to measure the knowledge, skills, and abilities necessary for entry-level nurse anesthesia practitioners. The NCE is a variable-length computerized adaptive test for entry into nurse anesthesia practice. See https://www.nbcrna.com/

*DNP practicum hours will be incorporated into this course for the development of the DNP project.

Pediatric Critical Care Clinical Nurse Specialist, DNP Advanced Practice Track

This track prepares the student to ensure high-quality, safe, and cost-effective nursing care and patient outcomes for children across the health-illness continuum. Graduates of the CNS track use their depth of expertise, developed through professional practice and graduate education, to provide, manage, support, and improve the nursing and health care provided to patients with chronic, acute, and critical illnesses. CNSs advance the care of patients, families, groups, and the nursing profession through collaboration, consultation, and teaching. CNSs conduct research, evaluate and apply evidence, and use ethical decision making to solve problems. CNSs operate within three spheres of influence

- patient/nurse
- nursing practice
- organization/system

The development of the curriculum is based on:

- *Statement on Clinical Nurse Specialist Practice and Education, 3rd Edition* [NACNS, 2019]
- *Scope and Standards for Acute Care Clinical Nurse Specialist Practice* [AACN 2014]

Certification

Graduates are eligible to apply for:

- American Nurses Credentialing Center (ANCC) https://www.nursingworld.org/our-certifications/ or
- American Association of Critical Care Nurses (AACN) Pediatric Clinical Nurse Specialist (CNS) certification https://www.aacn.org/certification/get-certified (https://www.aacn.org/certification/get-certified/).

Pediatric Dual Primary/Acute Care Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to practice at an advanced level to provide evidence-based family centered care to children from birth through adolescence. PNPs prepared in primary and acute care are educationally prepared to care for patients across the entire continuum of health and illness and in a variety of care settings.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Organization of Nurse Practitioner Faculties (NONPF) NP Core Competencies with Curriculum Content (2017)
- The Nurse Practitioner Core Competencies (2014)
- Population-Focused Nurse Practitioner Competencies: Pediatric Acute Care (2013) (NONPF)

Certification: Graduates are eligible to apply for the Pediatric Nursing Certification Board's pediatric acute care and pediatric primary care certification exams: http://www.pncb.org/ptistore/control/exams/pnp/steps (http://www.pncb.org/ptistore/control/exams/pnp/steps/).

Pediatric Primary Care Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to practice at an advanced level to provide evidence-based family centered care to children from birth through adolescence. Pediatric primary care nurse practitioners (PNPs) provide the initial, ongoing, and comprehensive care to patients in a variety of settings including: private offices, community clinics, newborn nursery, schools and in program-based specialty areas that manage chronically ill patients across the disease spectrum. PNPs assess, diagnose, and treat acute and chronic illnesses and are responsible and accountable for providing preventative health care, including health promotion, disease prevention, and health education and counseling.

The development of the curriculum is based on:

- The National Task Force Criteria for Evaluation of Nurse Practitioner Programs (2016)
- The National Organization of Nurse Practitioner Faculties (NONPF) NP Core Competencies with Curriculum Content (2017)
- The Nurse Practitioner Core Competencies (2014)
- Population-Focused Nurse Practitioner Competencies: Pediatric Primary Care (NONPF 2013)

Certification: Graduates are eligible to apply for the Pediatric Nursing Certification Board's pediatric acute care and pediatric primary care certification exams: http://www.pncb.org/ptistore/control/exams/pnp/steps (http://www.pncb.org/ptistore/control/exams/pnp/steps/).

Psychiatric Mental Health Nurse Practitioner, DNP Advanced Practice Track

This track prepares the student to diagnose and manage acute and chronic mental health problems across the lifespan (including pediatric through geriatric populations). The Johns Hopkins School of Nursing includes the use of the Perspectives of Psychiatry as an approach to the understanding and treatment of patients with psychiatric conditions. This inclusion offers systematic consideration of the patient's psychiatric condition from four perspectives: disease, dimensional, behavior, and life story.

Certification: Graduates will be eligible to apply for American Nurses Credentialing Center (ANCC) certification as a board certified psychiatric mental health nurse practitioner (PMHNP-BC).

Program Total: 84 Credits [cr]/896 Clinical Hours [CL]/224 Project Practicum Hours [PPR]

[1] NR.110.577 & NR.110.578 are variable courses which for the Psychiatric Mental Health Nurse Practitioner, DNP Advanced Practice Track will be counted as 1 credit apiece

Doctor of Nursing Practice: Executive Track

The Doctor of Nursing Practice program at the Johns Hopkins School of Nursing is accredited by the:

Commission on Collegiate Nursing Education (CCNE)
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

The DNP Executive Track option is a post-master's to DNP program that is designed for students to remain in practice while gaining the knowledge, skills, and abilities to lead cross-professional teams in the improvement and provision of informed quality health care. The 40-credit DNP Executive Track is offered online with required on-site course immersions. The program can be completed in six semesters of study. The DNP is designed for nurses involved in an advanced nursing practice role including but not limited to: clinical nurse specialist, nurse practitioner, nurse midwife, nurse anesthetist, public health practitioner, nurse executive, nurse informatician, and health policy analyst. Clinical hours obtained as part of the master's degree can be applied to the DNP program. The student obtains 448 practice hours in association with conduct of the DNP Project, and additional DNP practicum hours to obtain a minimum of 1000 practice hours required for the DNP degree. Students are expected to complete degree requirements within six years of enrollment. The current DNP Program Director is Dr. Kimberly McIltrot, DNP, CPNP, CWOCN, CNE, FAANP, FAAN.

Program Requirements

DNP Executive Track Curriculum

The 40-credit DNP Executive Track includes 19 credits of required DNP core, 12 credits for the required DNP Project, and 9 credits of elective/cognate courses related to the student's focus specialty area. Students who require additional practice hours to fulfill the 1000 practice hours may take additional DNP Practicum course(s) for 1 (56 practice hours) to 2 (112 practice hours) credits to close that gap. Students who are concurrently completing the Nurse Educator Certificate Option (NECO)may utilize all of their NECO credits towards fulfillment of their (9) required electives. Students must complete the program within 6 years.

[1] DNP Executive Track students are not permitted to take Electives in the first 2 semesters. A total of 9 elective credits are required. Course credits can range from 1 to 3 and dispersed across semesters 3 through 6.

Program Total: 40 Credits [cr]/1000 Clinical Hours [CL]
(Prior MSN - up to 552 clinical hours plus 448 DNP practicum hours).

Doctor of Nursing Practice Executive Track Scholarly Project Progression

DNP students are required to successfully complete a Project Plan Proposal and DNP Project.

The Doctor of Nursing Practice (DNP) program outcomes are based upon:

1. The Essentials of Master's Education in Nursing (AACN, 2011)
2. The Essentials of Doctoral Education for Advanced Nursing Practice (AACN, 2006)

A graduate of the Doctor of Nursing Practice (DNP) program:

1. Integrates the art and science of nursing, with ethics and the biophysical, psychosocial, analytical, organizational, and public health sciences to improve patient and population health outcomes
2. Demonstrates organizational and systems leadership for quality and safety in health care systems
3. Critically appraises clinical scholarship and analytical methods for evidence-based practice
4. Applies information systems and technology for the provision and/or transformation of health care
5. Leverages interprofessional collaboration for the improvement of individual and population health outcomes
6. Utilizes population health strategies of risk reduction/illness prevention, health promotion, and health maintenance to reduce healthcare disparities and improve outcomes for diverse individuals and populations
7. Develops leadership for health care policy and advocacy that shapes health care financing, regulation, access, and delivery
8. Demonstrates mastery of the advanced nursing practice/advanced practice nursing role and population competencies

Nursing, Doctor of Philosophy

The goal of the PhD program at the Johns Hopkins School of Nursing is to prepare the leaders in nursing science development. Graduates will be prepared for careers as nurse scholars to conduct research that advances the discipline of nursing, health, and health care quality. The school offers an individualized program in selected areas of research congruent with student's area of interest and the expertise of the research faculty. A key feature of the program is an intensive mentored research experience with an active investigator who has an established program of funded research. In addition to the diverse research interests of the School of Nursing faculty, students have access to the entire Johns Hopkins University, which fosters interdisciplinary and international research projects.

Quality is the defining characteristic of academic life at Johns Hopkins and the School of Nursing. Each student completes a core curriculum and works closely with a faculty adviser to complete an individualized course of study that fulfills the student's goals and develops the basis for a program of research. The length of the program is expected to be the equivalent of four to five years of full-time study. Students must complete the program within 7 years. The Doctor of Philosophy of Nursing (DNP) to Doctor of Philosophy Nursing (PhD) pathway* can be done in less than 7 years.

Doctor of Nursing Practice (DNP) to Philosophy in Nursing (PhD) Pathway

This program is a full time PhD program for those who have already completed a DNP Program. Now advance your DNP project's research from clinical implementation to scientific discovery with a PhD in Nursing from Johns Hopkins and get credit for the work you've already done. You may carry over 9 elective credit hours from your DNP program to the PhD program. This reduces the elective credit load to 10 instead of 19 elective credits for the PhD program. With this decreased course load the degree program can potentially be completed in 3 years based on growth from prior DNP work, but that is not a requirement of the program. Please follow the overview, requirements, sample program and learning outcomes as written for the PhD program for all aspects of the DNP to PhD pathway. (https://nursing.jhu.edu/academics/programs/doctoral/phd/dnp-to-phd.html)

Funding for PhD Program

Qualified students interested in the PhD program may be eligible to receive tuition and stipend support through the School of Nursing. Complete information is available by contacting the PhD Program Administrator at SON-PhDProgram@jhu.edu

Please Note: In the following Curriculum and Plans of Study, School of Public Health courses (PH.XXX.XXX) are offered on the quarter system and are depicted here as [credits & units]and count accordingly in each school. The course directory for the Public Health courses (PH) is available at SPH Course Directory (https://www.jhsph.edu/courses/)

Summer Registration

PhD students register for all fall and spring semesters from matriculation to degree completion. The only exceptions are students on an approved leave of absence.

Students will register for the summer semester if they:

1. take a course;
2. complete the preliminary oral exam;
3. defend their dissertation; or
4. graduate (F1 Visa Students).

Students who successfully defended their dissertation within the spring semester, but who will graduate in the summer semester, are not required to register (with the exception of F1 Visa Students).

If a student is not registered for other summer coursework, registering for 1 credit of Dissertation Research is typically sufficient for the summer semester for those students planning their dissertation defense in the summer semester.

Students should work with their faculty mentor, PhD Program Director, and the Registrar's Office to determine their appropriate student status given their activities during the semester. All students should register prior to the first day of classes in all terms.

PhD Program Research Residency Guidelines

The research residency is an important pedagogical aspect of the PhD program regardless of funding source or student status, full or part time. Students should commit to a research residencies each semester – including summer - across the entire period of funding from the JHSON. The purpose of the research residency requirement for the PhD program is to provide full time students with research training. The goal of the research residency is for the student to have experiences in aspects of research that will facilitate embarking on a career of research and scholarship. Given that publication is a vital outcome of any PhD program, the research residency mechanism is an ideal one from which to publish. It is important to point out that not all research training experiences will be the same.

1. Decisions regarding research training experiences ultimately rest with the primary research mentor and the student; however, there are several relevant guidelines, outline on the following page:
   - An average of 15 hours per week (-) should be devoted to the research residency. Ideally, the student will be a part of a research team. Timesheets are available from the PhD Program Administrator to assist in tracking these hours.
   - The range of experiences may include but are not limited to: conceptualization of a study, grant writing, review of literature, data collection, data management, data analysis, preparation of manuscripts, presentations, and laboratory experiences.
   - It is highly desirable that the student participates in a variety of research endeavors throughout the residency. There is benefit to be gained from spending “time at task”.
2. Setting goals and objectives for the research residency:
   - It is important to have realistic and objective goals and outcomes to both ensure that there are meaningful research training experiences and that research training experiences are documented in the student portfolio.
   - The student and mentor shall devise research training goals for full time year around research training experience as well as each semester the student is a research trainee. It is also recommended that the overall goals are reviewed each semester.
   - Measurable outcomes addressing each goal should be articulated and monitored for achievement. Outcomes that are salient may include: the development of protocols, publications, presentations, and objective evidence of the above-mentioned range of experiences or other experiences that are deemed appropriate.
3. It is required that each student include one semester of research training away from the primary mentor during the full-time year around residency during the three-year SON supported course of study and stipend. The decision as to who the student will work with is to rest among the student, primary research mentor and the prospective researcher (Matching students with faculty will be determined collaboratively by the student, primary research mentor, the prospective researcher, and the PhD Program Director.):
   - The development of goals and objectives is similarly important for this research training experience.
   - Evidence of a successful time away from the primary research mentor would include similar measurable outcomes as described above.
   - Exceptions for this requirement can be considered on a case by case basis. Please consult with the PhD Program Director.
4. Given the pedagogical importance, a research residency is also required for part time students with the following considerations:
   - Research residency hours should be proportional to the number of credit hours, e.g., 5 – 10 hour per week
   - Flexibility in the requirements for part time students is important. Examples of times during which research experiences can be suggested include semester breaks, weekends, evenings, and during the summer.
   - The JH requirement for two successive semesters of full time study will facilitate a similar 15 hour per week research experience during this time for part time students.

PhD Program Teaching Residency Guidelines

Every PhD Student will serve as Teaching Assistant (TA) for at least one course without compensation prior to graduation. The required TA experience will be up to 10 hours per week. After completing their required TA residency, students may choose to serve as TA for additional courses for compensation.

The purpose of the TA experience is to advance the student’s socialization into the teaching role of the faculty member. Program Directors will determine the availability of TA positions. Specific learning objectives for the required TA experience will be developed by the student with input from the student’s PhD adviser and the mentoring course coordinator. Learning activities may include but are not limited to:

- Course planning and syllabus development
- Lecturing
- Leading interactive learning exercises,
- Using of information technologies to facilitate learning
- Measuring student mastery of knowledge and skills
- Test construction and item analysis
- Assigning and grading papers
- Development of teaching strategies for a class with students of varying abilities
- Determining student grades
- Evaluating student satisfaction
- Participating in curriculum planning and evaluation meetings
- Working with others to plan and conduct an educational research project.
- Working with others to publish a paper on a course or teaching method.
- Attending a national or international nursing education conference

Students should be able to articulate how their teaching and learning philosophy is grounded in their philosophy of the human person. Other areas of critical inquiry and reflection may include theories of learning; duties of teachers and students; virtues of teachers and students; and the objective of the education of nurses at all three levels.

Students considering The Nurse Educator Certificate Option (NECO) should discuss with their advisor whether to apply one of their teaching residencies to the teaching practicum (NR.110.543 Teaching Practicum) which is optional within the NECO.

Evaluation: Upon completion of each assigned course, graduate TA and the faculty of the graduate TA are expected to submit their evaluations to the Academic Program Administrator. Completed evaluations will be discussed at the PhD Curriculum Committee to monitor the quality of TA experience and also will be shared with relevant Program Directors to be considered for future TA assignments. TAs and the respective faculty member should be encouraged to include metrics in their course evaluation to assess the effectiveness of the TA.

PhD Student Scholarly Progression

PhD students are required to achieve various milestones (see below) in progressing through the program that culminate in the dissertation. These processes serve to assure quality of the scholarship and rigor of the scientific process.

- Annual Review (https://webapps.nursing.jhu.edu/secure/phd_progress/) with Advisor
- Annual Review with Dissertation Committee
- Comprehensive Examination (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Comprehensive_Exam_Application.docx)
- Preliminary Oral Examination (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Preliminary_and_Final_Oral_Exam_Form_Oct_2021.docx)
- Final Defense (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Preliminary_and_Final_Oral_Exam_Form_Oct_2021.docx)

Johns Hopkins University Mentoring Expectations

Please see the new Johns Hopkins University Mentoring Expectations (https://provost.jhu.edu/education/graduate-and-professional-education-resources/phd-mentoring-policies-and-resources/) and the new Johns Hopkins University Policy on Mentoring Commitments for PhD Students and Faculty (https://provost.jhu.edu/wp-content/uploads/2019/08/JHU-Mentorship-Commitments-of-Faculty-Advisors-and-PhD-Students.pdf) from the Provost's Office.

Annual Review with PhD Advisor

1. Conducted in the Spring semester annually as the student prepares to complete an academic year (generally late March – early May)
2. Documents to review:
   a. Individual development plan (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Individual_Development_Plan_writeable_002_.pdf)
   b. NIH Biosketch (https://grants.nih.gov/grants/forms/biosketch.htm)/CV
   c. Clinical research skills checklist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Research_Residency_Goals.docx)
3. Complete online submission of progress (student (https://webapps.nursing.jhu.edu/secure/phd_progress/) and advisor (https://webapps.nursing.jhu.edu/secure/phd_progress/advisor/)) to release registration hold

Annual Review with Dissertation Committee

1. Once the student has entered into candidacy, an annual meeting with the full dissertation committee is highly recommended
2. A review of student progress – academically and scientifically – along with additional development opportunities should be discussed

Challenges in study implementation should be reviewed and the committee should offer support to help the student overcome the challenge or refine the study as appropriate

PhD Comprehensive Examination

PhD **(**https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Comprehensive_Exam_Application.docx**)** Comprehensive Exam **(**https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Comprehensive_Exam_Application.docx**)Application**

1. Student Status: This examination may be taken as early as the first summer following fall admission.
   a. Students must have completed year one required nursing classes and statistics course work, totaling 24 credit hours, to sit for the Comprehensive Examination (with the exception of NR.110.827 Grant Writing and NR.110.891 Responsibilities & Activities of the Nurse Scientist, which need not be taken prior to this examination).
   b. Students must be registered the semester prior to the examination and have all incompletes cleared from their record in order to take the Comprehensive Examination.
2. Purpose: The purpose of the written comprehensive examination is to validate the student's ability and skills to generate, synthesize, and critically analyze knowledge relevant to the discipline of nursing. Questions related to required nursing and statistics courses are administered in the School of Nursing computer lab in two 3-hour segments separated by a 1-hour lunch break.
3. Procedure:
   a. The examination is offered in January and June. Examination dates will be set in November and March. All students are tested on the same day.
   b. Students desiring to take the examination meet with their advisers to review eligibility and assure that all requirements have been met.
   c. With the approval of the adviser, 30 days or more before the scheduled examination, the student completes the "Comprehensive Examination Application Form" and submits it to the PhD Program Director for approval. A copy of the approval form is kept on file in the students' personal folder in the PhD Program Director's office.
   d. The PhD Program Director informs the PhD Curriculum Committee members of those students approved to take the Comprehensive Examination three weeks before the examination.
   e. The PhD program office shall inform those taking the examination of its time and place and shall proctor the examination.
   f. Students not taking the examination when scheduled due to personal reasons are not penalized and need only to reschedule.
4. Structure: The examination consists of a proctored session in two parts of 3 hours each to test knowledge of required nursing program content.
   a. Part A is given in the morning and is to be completed in 3 hours before a lunch break. Part B is given in the afternoon and is to be completed in 3 hours.
   b. Students are required to type answers, print hardcopy, and submit exam answers via email to the Program Administrator from a JHSON computer in the assigned laboratory.
   c. Students may bring what they can carry for reference. The use of reference or bibliography databases (such as endnote or reference manager) is not permitted.
   d. Students should critically analyze and synthesize information in a logical manner, citing major authors.
   e. Students should structure their time to incorporate any needed breaks.
5. Development, Administration, and Grading:
   a. The PhD Curriculum Committee appoints the examination committee at its November and April meetings. The committee includes at least three members, one member having taught in the core theory sequence and one member having taught in the core research design and methods sequence.
   b. The committee convenes and selects the chair.

c. The committee develops integrating questions for the examination focusing on required nursing and statistics courses. The questions should test students' ability to synthesize nursing theory and research and statistics application.
d. The grade for each question is fail, pass, or pass with distinction. To pass the examination, the student must receive a pass or higher score from a majority of the examination committee on all questions. The criteria for adequate completion of the examination are intended to facilitate the judgment of the Comprehensive Examination Committee as to whether the candidate has responded adequately to the questions.
e. The candidate's response should thoroughly address each aspect of each question as well as:
    i. Reflect accurate, consistent, and appropriate application of concepts to the situation presented in the question.
    ii. Show evidence of in-depth application and synthesis of the content of the courses.
    iii. Reflect the appropriate use of references, e.g., statistical texts for statistical issues, and peer-reviewed journal papers.

6. Results:
    a. Students are informed of their results in writing within 30 days after completion of the examination. The letter is copied to the student's adviser, the chair of the PhD Admissions, Progression and Graduation Committee, and the Registrar's Office. If the student fails to pass any component of the Comprehensive Exam, the letter is also copied to the Associate Dean for Academic Affairs.
    b. Further feedback on students' performance may be obtained from their advisers.
    c. A student who fails the examination may repeat it once. The student should contact their academic adviser to discuss their academic difficulties and may be asked to write a letter to the chair of the PhD Admissions, Progression and Graduation Committee communicating any information including their plan for improvement.
    d. The repeat examination must be completed within two years of the original examination.
    e. The appeal process for grades applies to this examination.

PhD Preliminary Oral Examination

PhD Preliminary Oral Exam Form (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Preliminary_and_Final_Oral_Exam_Form_Oct_2021.docx)

1. Student status: PhD students having successfully completed the written Comprehensive Examination must be registered for at least three credits consisting of two credits dissertation advisement plus one credit dissertation seminar in the fall and spring semesters they are progressing toward the degree (see above for summer semester registration requirements). Part-time students who have completed the Comprehensive Examination must register for two credits dissertation advisement plus one credit dissertation seminar each semester they are progressing toward the degree after completing half (11) of the required elective credits. Before undergoing the Preliminary Examination, students must:
    a. complete all required and elective coursework;
    b. have all incompletes cleared from their record;
    c. have completed the Johns Hopkins University Residency requirement of 2 consecutive semesters, fall and spring, full-time study; and
    d. be registered the semester of the examination, this includes summer semester.
2. Preliminary Oral Examination Committee Composition:
    a. At least three of the five faculty members must be tenure track at the rank of assistant professor, associate professor, or full professor. This may include full time or part time faculty, visiting faculty, or emeritus faculty if they also hold the titles of assistant, associate, or full professor.
    b. Three of the five members must be from the candidate's home department (SON). One of these must be at the Associate Professor level or higher.
    c. Two members must be from outside of the candidate's home department (SON)
        - One (1) of the two outside faculty members must be within Johns Hopkins University, full-time tenure track holding rank of Professor, Associate Professor or Emeritus Professor who serves as Chair of the examination committee.
        - One (1) committee member from any department at the University (outside of the SON) or outside of the University pending committee approval
    d. For DNP/PhD students, because the oral exam stands in place of the DNP exam, it is expected that the student's DNP advisor will be a voting member of the committee.
    e. Note: With approval, there is an option for a 6th, non-voting member. This option is likely to be most relevant for DNP/PhD students.

3. Purpose of Preliminary Oral Examination: The purpose of a preliminary examination is to test the depth and breadth of the student's knowledge and reasoning abilities. The scope of such an examination cannot, nor should it be, sharply defined. The examination committee can gain a feeling for the limits of the examination by a review of the candidate's formal course record and by knowledge of the school, group, department, or committee requirements (e.g., whether specific minor as well as major subjects are to be included).

    Preliminary Oral Examinations are closed to all but the candidate and examination committee members. (Students are encouraged to arrange for a "Dry Run" presentation for colleagues and faculty input prior to exam.)
4. Criteria for Selection of Examination Committee Chair and Members (Oral exam forms must be submitted to the Academic Program Administrator at least 60 days before the exam date) The initial review will be conducted by Program Director and APG (Admissions, Progressions and Graduate) Committee Chair. Then the form will go to the APG Committee for final approval. Approval must be received by the student before they can conduct their exam.
    a.

    Chair Selection: The Examination Committee Chair will be the most senior ranking member from outside of the candidate's home department (SON) at JHU. If two outside members have the same rank at JHU, the Chair is the one who has been in that rank the longest.

b. Faculty that do not have an earned Research Doctorate (e.g., DNP, MD), are not tenure-eligible (e.g., Practice-Education Track), or are from outside the University, must have Curriculum Vitae (CV) submitted to School of Nursing PhD Admissions, Progression and Graduation Committee for approval. This approval is only required the first time they serve on a SON committee.
c. Each committee may include only 1 member who is not on faculty at Johns Hopkins University. Faculty members at other institutions and adjunct faculty must be reviewed and approved by the School of Nursing PhD Admissions, Progression and Graduation Committee prior to participation in the Oral Examination.
d. SON faculty members are defined as those having primary appointment in the Johns Hopkins School of Nursing or who are assigned as the Faculty Advisor.

Duties of the Chair

1. Preside at the examination.
2. Determine the scope, character, and conduct of the examination before the questioning begins.
3. Determine time allotments to inside and outside members of the committee.
4. Report the results of the examination to the candidate.
5. Report the results of the examination to the PhD Admissions, Progression and Graduation Committee immediately after the examination on the form provided for this purpose.
   a. Duties of the Members:
      i. Notify the Chair, Faculty advisor and Academic Program Administrator of inability to appear at designated time.
      ii. Participate in the examination process.
   b. Duties of the Alternate:
      i. Notify the Committee chair, faculty advisor and Academic Program Administrator of inability to appear at designated time.
      ii. Participate in the examination process as a committee member if one of the serving members of the committee fails to appear on the date of the examination.
      iii. Alternate members not called to serve as committee members may attend the examination if they wish to do so, but may not ask questions or vote.
   c. Dissertation Committee Optional Role: External Reader: An external reader is an individual with an earned research or clinical doctorate who offers additional content and/or methodological expertise but is not a regular member of the dissertation committee. Attendance at the dissertation oral examination is not required for the external reader. If in attendance, they may participate in the private portion of the exam at the discretion of the chair, but cannot vote on the outcome of the exam. In addition, the external reader may not be present during the voting.
   d. Length of Examination: Examination process will start with a 20-minute presentation on the topic of the student's proposed dissertation research. The chair will ask for questions from the committee. The student will respond until all members of the committee have completed their questions. The committee will vote by private ballot on its evaluation of the examination with majority ruling. (Total examination period is expected to be about 2 hours.)
6. Results of the Examination: Students who successfully pass the examination will become PhD Candidates. The examination may result in one of the following outcomes:
   a. If the candidate receives an unconditional pass (a majority of favorable votes), the committee is to be considered discharged.
   b. If the candidate receives a conditional pass, the removal of the condition is to be reported to the School of Nursing PhD Admissions, Progression and Graduation Committee by the chair in writing, after which the committee is considered discharged.
   c. If the candidate fails, the examination committee, through the chair, is requested to recommend a course for future action:
      i. No re-examination.
      ii. Re-examination by the same committee.
      iii. Re-examination in written form and conducted by the same committee.
      iv. Re-examination by a new committee. If the recommendation is for a new committee, at least one outside member of the original committee shall be appointed to the new committee.

      The committee may recommend whatever action in its judgment seems desirable, taking into consideration the background of the student, their prior performance and future potential, and reactions to oral questioning. The School of Nursing PhD Admissions, Progression and Graduation Committee will be guided by these recommendations and will assume responsibility for whatever actions are taken. Stipulations and/or Re-examination: If there is a recommendation for re-examination, the examination can be repeated once, but only once, and must be repeated within one calendar year. The committee may also make recommendations for the conduct of the proposed research that do not affect the outcome of the examination; the student's adviser will help them incorporate such recommendations into the proposal.

[1] Faculty who do not have an earned Research Doctorate (e.g., DNP, MD), are not tenure-eligible (e.g., Practice-Education Track), or are from outside the University, must have Curriculum Vitae (CV) submitted to School of Nursing PhD Admissions, Progression and Graduation Committee for approval

[2] Each committee may include only 1 member who is not on faculty at Johns Hopkins University. Faculty members at other institutions and adjunct faculty must be reviewed and approved by the School of Nursing PhD Admissions, Progression and Graduation Committee prior to participation in the Oral Examination. Occasionally, one adjunct or one scientist faculty member, but not both, may serve on the Committee. Neither may serve as the Chair.

[3] SON faculty members are defined as those having primary appointment in the Johns Hopkins School of Nursing

[4] Each committee may include only 1 member who is not on faculty at Johns Hopkins University. Faculty members at other institutions and adjunct faculty must be reviewed and approved by the School of Nursing PhD Admissions, Progression and Graduation Committee prior to participation in the Oral Examination. Occasionally, one adjunct or one scientist faculty member, but not both, may serve on the Committee. Neither may serve as the Chair.

PhD Program Dissertation and Final Oral Examination

PhD Program Dissertation and Final Oral Examination Form (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/nursing-phd/Preliminary_and_Final_Oral_Exam_Form_Oct_2021.docx)

1. Student status: PhD candidates in the School of Nursing must be registered for at least 3 credits per semester (not including summer, unless defending during the summer semester) after passing the preliminary oral examination until taking the final oral examination. Specifically, students are to take no less than NR.110.890 Dissertation Seminar Dissertation Seminar, 1 credit, and NR.110.899 Dissertation Dissertation Research, 2 credits, both fall and spring semester unless they are on an approved leave of absence. The student must be registered the semester prior to the examination. All students must complete all requirements for the PhD Degree within seven (7) years of matriculation (excluding any Leaves of Absence).

   Nota Bene: If students are the holders of a research training grant (such as NRSA), they must also comply with the academic requirements of that award.
2. Dissertation and Final Oral Examination Committee Composition: (Oral exam forms must be submitted to the Academic Program Administrator at least 60 days before the exam date) The initial review will be conducted by Program Director and APG (Admissions, Progressions and Graduate) Committee Chair. Then the form will go to the APG Committee for final approval. Approval must be received by the student before they can conduct their exam.
   a. At least three of the five faculty members must be tenure track at the rank of assistant professor, associate professor, or full professor. This may include full time or part time faculty, visiting faculty, or emeritus faculty if they also hold the titles of assistant, associate, or full professor.
   b. Three of the five members must be from the candidate's home department (SON). One of these must be at the Associate Professor level or higher.
   c. Two members must be from outside of the candidate's home department (SON)
      - One (1) of the two outside faculty members must be within Johns Hopkins University, full-time tenure track holding rank of Professor, Associate Professor or Emeritus Professor who serves as Chair of the examination committee.
      - One (1) committee member from any department at the University (outside of the SON) or outside of the University pending committee approval
   d. For DNP/PhD students, because the oral exam stands in place of the DNP exam, it is expected that the student's DNP advisor will be a voting member of the committee.
   e. Note: With approval, there is an option for a 6th, non-voting member. This option is likely to be most relevant for DNP/PhD students.

3. Student Responsibilities:
   a. Consult with the adviser regarding the composition of the Dissertation Committee.
   b. Procure agreement of the faculty members to serve on the Examination Committee and arrange a time suitable to all members (including alternates) at least 60 days before exam.
   c. Initiates Oral Exam for the PhD Degree form to obtain approval of Dissertation Committee composition and members from the PhD Admissions, Progression, and Graduation Committee at least 60 days in advance of the exam. The Oral Exam for the PhD Degree form should be accompanied by CVs of proposed dissertation committee members meeting any of the following criteria: (a) holds a non-Research Doctorate, (b) not tenured or tenure-eligible at Johns Hopkins University, or (c) does not have a primary faculty appointment at Johns Hopkins University. Form and accompanying CV(s) should be submitted to the PhD Admissions, Progression, and Graduation Committee for approval at least 60 days in advance of the scheduled exam.
   d. Obtains JHMIRB approval or Animal Research Committee approval (with adviser as PI of record) before initiating dissertation research.
   e. Executes research under the supervision of dissertation adviser.
   f. Keeps adviser informed of progress while conducting research, requesting meetings with adviser and Dissertation Committee members as appropriate.
   g. Writes the dissertation according to the "SON Guidelines for Writing the PhD Dissertation."
   h. After obtaining adviser's approval, initiates scheduling for Final Oral Examination.
   i. Submit dissertation to Dissertation Committee at least 3 weeks before anticipated Final Oral Examination.
   j. After approval of the dissertation, submit final version to the Sheridan Library's Electronic Thesis & Dissertation (EDT) Program.
   k. Prepares a manuscript to include at least some of the results of the dissertation to be submitted to an appropriate journal before graduation.
4. Purpose of Dissertation and Final Oral Examination: While the purpose of the preliminary oral examination is to test the depth and breadth of the student's knowledge and reasoning abilities in areas germane to the dissertation, the major focus of the final oral examination is the dissertation. Questions should be relevant to or based on the dissertation research including implications of the results.
5. Conduct of the Dissertation and Final Oral Examination
   a. Chair Selection: The Examination Committee chair will be the most senior ranking member of the committee within the University. If two members have the same ranks, the chair is the one who has been in that rank the longest. However, if the most senior member is also the student's adviser, the second most senior-ranked member will be the Examination Committee chair.
   b. Duties of the Chair:
      i. Preside at the examination.
      ii. Determine the scope, character, and conduct of the examination before the questioning begins in concert with the Dissertation Chair (adviser).
      iii. Determine time allotments to members of the committee.
      iv. The chair is responsible for enforcing time limits and not exceeding 2 hours in total.
      v. The student adviser reports the results of the examination to the PhD Program Director and the Executive Vice Dean immediately after the examination on the form provided for this purpose.
   c. Duties of the Members:

   i. Notify the Committee chair, faculty advisor and Academic Program Administrator of inability to appear at designated time.
   ii. Participate in the examination process.
 d. Duties of the Alternate:
   i. Notify the Committee chair, faculty advisor and Academic Program Administrator of inability to appear at designated time.
   ii. Participate in the examination process as a committee member if one of the serving members of the committee fails to appear on the date of the examination.
   iii. Alternate members not called to serve as committee members may attend the examination if they wish to do so, but may not ask questions or vote.

   Dissertation Committee Optional Role – External Reader: An external reader is an individual with an earned research or clinical doctorate who offers additional content and/or methodological expertise but is not a regular member of the dissertation committee. Attendance at the dissertation oral examination is not required for the external reader. If in attendance, they may participate in the private portion of the exam at the discretion of the chair but cannot vote on the outcome of the exam. The external reader is not present during the voting.

   Length of Examination: The examination process will begin with a 30-minute public presentation followed by 30 minutes of questions from the audience (Total of 1 hour for the Public Portion). The committee then meets in private with the candidate for questions (Total Time of 2 hours for the Private Portion). The chair will ask for questions from the committee. The student will respond until all members of the committee have completed their questions. The committee will vote by private ballot on its evaluation of the examination with majority ruling (total time of exam not to exceed 3 hours).
6. Results of the Examination: The examination may result in one of the following outcomes:
 a. If the candidate receives an unconditional pass (a majority of favorable votes), the committee is to be considered discharged.
 b. If the candidate receives a conditional pass, the exact terms of the condition are to be reported on the examination form, i.e., what course(s), if any, need to be taken, in what time frame the condition(s) should be met, and any other pertinent information that will point out clearly to both the student and the faculty how to satisfy the condition(s). As soon as all conditions have been met, the chair of the Examination Committee must report the removal of the condition in writing to the Doctor of Philosophy Board. The committee is then discharged. The removal of the condition is to be reported to the PhD Program Director and the Executive Vice Dean by the Dissertation Committee chair via the written "Reader's Report," after which the committee is considered discharged.
 c. If the candidate fails, the Examination Committee, through the chair, is requested to recommend a course for future action:
   i. No re-examination.
   ii. Re-examination by the same committee.
   iii. Re-examination in written form and conducted by the same committee.
   iv. Re-examination by a new committee. If the recommendation is for a new committee, at least one outside member of the original committee shall be appointed to the new committee.
 d. The two committee members designated by the PhD Admissions, Progression and Graduation Committee as Doctor of Philosophy Board Readers will be responsible for approving the final Readers' Report after the student has finished all revisions. The report shall be submitted to the School of Nursing Registrar's Office with a copy to the PhD Program Director and the Associate Dean for Academic Affairs.

[1] Faculty who do not have an earned Research Doctorate (e.g., DNP, MD), are not tenure-eligible (e.g., Practice-Education Track), or are from outside the University, must have Curriculum Vitae (CV) submitted to School of Nursing PhD Admissions, Progression and Graduation Committee for approval.

[2] Each committee may include only 1 member who is not on faculty at Johns Hopkins University. Faculty members at other institutions and adjunct faculty must be reviewed and approved by the School of Nursing PhD Admissions, Progression and Graduation Committee prior to participation in the Oral Examination. Occasionally, one adjunct or one scientist faculty member, but not both, may serve on the Committee. Neither may serve as the Chair.

Steps of Successful Completion of Final Oral Exam

- Make edits to your written dissertation with guidance from your advisor and committee
- Send a copy of your final abstract and title to the Academic Program Administrator (SON-PhDProgram@jhu.edu)
- Send a copy of your CV and any plans you have after graduation to the Academic Program Administrator (SON-PhDProgram@jhu.edu)
- Follow formatting guidelines here for you dissertation Electronic Thesis Submission: https://www.library.jhu.edu/library-services/electronic-theses-dissertations/formatting-guidelines/
  - Make sure to read the submission check list: https://www.library.jhu.edu/library-services/electronic-theses-dissertations/submission-checklist/
- Submit your dissertation to the library (directions included in link above)
- Submission Deadlines: https://homewoodgrad.jhu.edu/academics/graduate-board/deadlines/
  - You have to submit completed edits of an electronic copy of the dissertation to the Welch library and receive a receipt from the library confirming that the electronic thesis has been accepted by the deadline for the current semester when you defend. If you are unable to do that, then you will have to register for one credit of dissertation seminar for the semester following your defense.
- Forward a copy of the library receipt to the Academic Program Administrator (SON-PhDProgram@jhu.edu)
- Apply to graduate if you haven't already.
  - The application for graduation is available online via SIS. https://sis.jhu.edu/sswf/

Dissertation Guidelines for Manuscript Format

1. Chapter 1
   - Integrated knowledge of field, identification of gaps in the selected science and provision of a theoretical foundation for the research
2. Chapter 5
   - Concise summary tying work together
   - Discussion of the contribution this research makes to the related field of science (new knowledge)
   - Complete list of references
3. Appendices (optional):
   - Analysis not in manuscripts (tables, and/or narrative)
   - Instruments
   - Methods details not in the manuscript

Guidelines

1. A minimum of three manuscripts ready for submission to a peer-reviewed journal
2. Student must be first author
3. Subject must be student's original research
4. Subject to approval of Dissertation Committee
5. Can be a combination of manuscript types, (at least one must be data-based, two data-based manuscripts are encouraged if the data allows for this) such as:
   a. Literature review article
   b. Methodological
   c. Concept analysis and/or theory application
   d. Instrument development
   e. Results

   May also be results from three separate but related experiments
6. Timing: Articles must be produced while the student is matriculated in the SON PhD Program

To comply with copyright law, it is important that you do not include journal proofs or printed articles unless you receive permission from the journal in which your work has been published. You should include the word processing format (i.e., MSWord) in the dissertation. Be sure to include the full citation for the manuscript, indicating it has been published, has been accepted for publication, or under review as appropriate.

Program Requirements

Curriculum

Code	Title	Credits
Core Courses [1]		
NR.110.800	Philosophical Perspectives in Health	3
NR.110.814	Scientific Perspectives in Nursing	3
NR.110.815	Qualitative Research Designs and Methods	2
NR.110.809	Quantitative Research Design and Methods	3
NR.110.816	Mixed Methods Research Designs	2
NR.110.827	Grant Writing	1
NR.110.828	Measurement in Health Care Research	2
NR.110.891	Responsibilities & Activities of the Nurse Scientist	2
Statistics Courses		
PH.140.621	Statistical Methods in Public Health I	4
PH.140.622	Statistical Methods in Public Health II	4
PH.140.623	Statistical Methods in Public Health III	4
Elective Courses [2]		
NR.110.810	Theory & Concepts of Health Behavior and Health Promotion	3
NR.110.818	Special Topics in Violence Research	1
NR.110.824	Stress and Stress Response	2
NR.110.832	Writing for Publication	1
NR.110.835	Current Issues and Trends in Cardiovascular Health Promotion Research	1
PH.140.624	Statistical Methods in Public Health IV	4
NR.210.823	Special Topics: Qualitative Design and Implementation	1 - 3
Dissertation (3 credits per semester until completion of dissertation)		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation (Research)	2
Total Credits		**46-48**

[1] PhD students will be required to repeat a course if they earn a grade below a B (83%) for core nursing courses, and a grade below a C (73%) in non-nursing core courses. PhD students can repeat more than one course one time.

[2] Electives can be taken through any division of Johns Hopkins University including the School of Public Health, School of Medicine, School of Engineering, and all of the Social Science Departments. Some SON elective courses are offered every other year. Please check with the Academic Program Coordinator regarding course offerings. Independent study credits do not count toward the 19 credits of electives required. Students may apply up to 6 credits of a 500 level course offering (in or outside the SON) toward their doctoral program

requirements. The PhD Curriculum Committee has assigned 9 credits for the completion of the NIH Summer Genetics Institute, which may be applied to the PhD Program elective requirement.

Sample Program of Study

Course	Title	Credits
First Semester

	Credits	**1-2**
	Total Credits	**56-57**

1 PhD students will be required to repeat a course if they earn a grade below a B (83%) for core nursing courses, and a grade below a C (73%) in non-nursing core courses. PhD students can repeat more than one course one time.

2 Electives can be taken through any division of Johns Hopkins University including the School of Public Health, School of Medicine, School of Engineering, and all of the Social Science Departments. Some SON elective courses are offered every other year. Please check with the Academic Program Coordinator regarding course offerings. Independent study credits do not count towards the 19 elective credits of electives required. Students my apply up to 6 credits of 500 level course offering (in or outside the SON) toward their doctoral program requirements. The PhD Curriculum has assigned 9 credits for the completion of the NIH Summer Genetics Institute, which may be applied to the PhD Program elective requirement.

Learning Outcomes

Upon graduation from the PhD program, students will:

- Possess knowledge and skills in theoretical, methodological, and analytic approaches that will enable them to conduct research to discover and apply knowledge in nursing science, health, and health care.
- Assume a leadership role in nursing and in the broader arena of health care both nationally and internationally.

Doctor of Nursing Practice (DNP): Advanced Practice Track/Doctor of Philosophy in Nursing (PhD) Dual Degree

The Doctor of Nursing Practice program at the Johns Hopkins School of Nursing is accredited by the:

Commission on Collegiate Nursing Education (CCNE)
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

The DNP Advanced Practice Track/PhD creates rigorously prepared clinical DNP Advanced Practice Track/PhD scholars that offers the profession a ‘best of both worlds’ approach, creating innovative solutions for faculty practice, research, discovery, and translation. By combining the PhD goal of creating leaders in nursing science development with the DNP Advanced Practice Track’s mission to prepare expert nurse clinicians into an integrated curriculum, students receive both outstanding research and clinical practice experience.

The DNP Advanced Practice Track/PhD program is designed to be completed in a 5 year full-time plan of study. This shorter timeframe to achieve two doctoral degrees is accomplished by designing the program to align each educational component with the students desired research focus, creating connections that allow the DNP Advanced Practice Track/PhD student to seamlessly transfer evidence to practice, practice to research, and research to the classroom. The program also highlights both a structured teaching residency and a structured research residency.

Students can complete this program with the following DNP Advanced Practice Tracks:

- DNP Adult-Gerontological Acute Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-acute-care-nurse-practitioner-dnp/) (129 credits/784 clinical hours)
- DNP Adult-Gerontological Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-primary-care-nurse-practitioner-dnp/) (127 credits/784 clinical hours)
- DNP Adult-Gerontological Critical Care Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-critical-care-clinical-nurse-specialist-dnp/) (124 credits/784 clinical hours)

- DNP Adult-Gerontological Health Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-health-clinical-nurse-specialist-dnp/) (124 credits/784 clinical hours)
- DNP Family Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/family-primary-care-nurse-practitioner-dnp/) (132 credits/784 clinical hours)
- DNP Pediatric Critical Care Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/pediatric-critical-care-clinical-nurse-specialist-dnp/) (125 credits/784 clinical hours)
- DNP Pediatric Dual Primary/Acute Care Nurse Practitioner (p. 1023) (131 credits/784 clinical hours)
- DNP Pediatric Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/pediatric-primary-care-nurse-practitioner-dnp/) (130 credits/784 clinical hours)

Students are expected to complete degree requirements within seven years within the school of nursing.

DNP Advanced Practice Track/PhD Program Funding

Qualified students interested in the DNP/PhD program may be eligible to receive up to three years tuition and stipend support through the School of Nursing. Contact the PhD Program Administrator at SON-PhD@jhu.edu (SON-PhDProgram@jhu.edu) for more information.

DNP Advanced Practice Tracks

The DNP Advanced Practice Track option is a post-baccalaureate to DNP program that prepares students for the Nurse Practitioner role with a focus on a specific population (adult-gerontological primary, adult-gerontological acute, pediatric primary, or family primary), or the Clinical Nurse Specialist role focused on a specific population (adult health, adult critical care, or pediatric critical care). The length of the program, number of credits, and clinical hours vary according to the role and specialty, ranging from 74 to 81 credits and 672 to 784 clinical hours. The balance of the minimum of 1000 practice hours required for the DNP is obtained while conducting the Scholarly Project. The DNP Advanced Practice program is online with required on-site course immersions. Students matriculated in the JHU School of Nursing are required to satisfy all academic requirements and adhere to all policies of the School. Students are expected to complete degree requirements within six years of enrollment.

Core courses that lay the foundation for advanced practice nursing are listed below. Additional core courses taken by students in the FNP, PNP, and CNS Pediatric Critical Care are so noted in the track descriptions that follow the Core Curriculum.

Core Curriculum

Code	Title	Credits
Core Courses		
NR.210.600	Advanced Physiology/Pathophysiology	4
NR.210.601	Advanced Health Assessment and Measurement	3
NR.210.602	Clinical Pharmacology	4
NR.210.605	Diagnostic Skills and Procedures for Advanced Practice Nursing	2
NR.210.606	Biostatistics for Evidence-Based Practice	3
NR.210.607	Context of Health Care for Advanced Nursing Practice	3
NR.210.608	The Research Process and Its Application to Evidence-Based Practice	3
NR.210.609	Philosophical, Theoretical & Ethical Basis of Advanced Nursing Practice	3
NR.210.610	Health Promotion and Risk Reduction Across the Lifespan	2
NR.210.603	Human Growth and Development: Birth through Adolescence	1
NR.210.604	Health Supervision: Birth through Adolescence	2
Additional Core Courses [1]		
NR.210.802	Advanced Nursing Health Policy	2
NR.210.803	Nursing Inquiry for Evidence-Based Practice	3
NR.210.804	Organizational and Systems Leadership for Quality Care	2
NR.210.805	Translating Evidence into Practice	3
NR.210.806	Health Finance	2
NR.210.817	Analysis and Evaluation of Individual and Population Health Data	3
NR.210.818	Clinical Data Management and Analyses	2
NR.210.822	Health Information Systems and Patient Care Technologies	2
NR.210.896	Problem Identification	1
NR.210.897	Project Development	1
NR.210.898	Project Implementation	1
NR.210.899	Project Evaluation	1
NR.210.894	DNP Practicum [2]	1-2
Total Credits		**54-55**

1. The DNP core courses are required for all Advanced Practice DNP students. There is variation by specialty track in the minimum number of DNP Practicum credits and associated practicum hours.
2. NR.210.894 DNP Practicum [4cr/224PH Primary Care NP], [6cr/336PH CNS]

Core Totals 27cr (AGPNP, ACNP, CNS ACC, CNS AH)
Core Totals: 30cr (FNP, PNP] 29cr (CNS PCC)
Program Totals 27-30cr/224-336PH

Doctor of Nursing Practice Advanced Practice Track Scholarly Project Progression

DNP students are required to successfully complete a Scholarly Proposal and Final Project.

Program Requirements

For program requirements for both the DNP and PhD, please refer to the specific program section:

- PhD (p. 1028)
- DNP (p. 1011)
- DNP Advanced Practice Tracks (p. 1011)
- DNP Adult-Gerontological Acute Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-acute-care-nurse-practitioner-dnp/)

- DNP Adult-Gerontological Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-primary-care-nurse-practitioner-dnp/)
- DNP Adult-Gerontological Critical Care Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-critical-care-clinical-nurse-specialist-dnp/)
- DNP Adult-Gerontological Health Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/adult-gerontological-health-clinical-nurse-specialist-dnp/)
- DNP Family Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/family-primary-care-nurse-practitioner-dnp/)
- DNP Pediatric Critical Care Clinical Nurse Specialist (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/pediatric-critical-care-clinical-nurse-specialist-dnp/)
- DNP Pediatric Dual Primary/Acute Care Nurse Practitioner (p. 1023)
- DNP Pediatric Primary Care Nurse Practitioner (https://e-catalogue.jhu.edu/nursing/doctoral-degrees/pediatric-primary-care-nurse-practitioner-dnp/)

Sample Programs of Study

Please Note: In the following Plans of Study, School of Public Health courses (PH.XXX.XXX) are offered on the quarter system and are depicted here as [credits & units] and count accordingly in each school. Course descriptions for the Public Health courses (PH) are available at sis.jhu.edu (http://www.sis.jhu.edu).

DNP Advanced Practice/PhD Dual Degree Adult-Gerontological Acute Care Nurse Practitioner Track Program of Study

Course	Title	Credits
First Semester		
NR.210.607	Context of Health Care for Advanced Nursing Practice	3
NR.210.610	Health Promotion and Risk Reduction Across the Lifespan	2
NR.210.822	Health Information Systems and Patient Care Technologies	2
	Credits	**7**
Second Semester		
NR.110.800	Philosophical Perspectives in Health	3

	Credits	**14**
Third Semester		
NR.110.814	Scientific Perspectives in Nursing	3
NR.110.815	Qualitative Research Designs and Methods	2
NR.110.816	Mixed Methods Research Designs	2
NR.110.828	Measurement in Health Care Research	2
PH.140.623	Statistical Methods in Public Health III	4
	Credits	**13**
Fourth Semester		
NR.210.806	Health Finance	2
NR.110.827	Grant Writing	1
NR.110.840	Clinical Research Residency I	1
NR.110.841	Clinical Research Residency II	1
	Credits	**5**
Fifth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.803	Nursing Inquiry for Evidence-Based Practice	3
NR.210.804	Organizational and Systems Leadership for Quality Care	2
Electives		2
Research Residency		0
Preliminary Orals/NRSA		0
	Credits	**9-10**
Sixth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.110.891	Responsibilities & Activities of the Nurse Scientist	2
NR.210.802	Advanced Nursing Health Policy	2
NR.210.805	Translating Evidence into Practice	3
Preliminary Orals/NRSA Submission		0
	Credits	**9-10**
Seventh Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.602	Clinical Pharmacology	4
Electives		2
Research Residency		0
IRB Submission		0
	Credits	**8-9**
Eighth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.600	Advanced Physiology/Pathophysiology	4
NR.210.601	Advanced Health Assessment and Measurement	3
Electives (as needed)		3
	Credits	**12-13**
Ninth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.605	Diagnostic Skills and Procedures for Advanced Practice Nursing	2
Electives (as needed)		3
	Credits	**7-8**
Tenth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.660	Introduction to Acute Care (56CL)	4
Research or Teaching Residency		0
	Credits	**6-7**

Eleventh Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.661	Advanced Practice in Acute Care I (168CL)	6
Research or Teaching Residency		0
	Credits	**8-9**
Twelfth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.662	Advanced Practice in Acute Care II (168CL)	4
Clinical Research Residency II		1
	Credits	**7-8**
Thirteenth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.663	Advanced Practice in Acute Care III (168CL)	4
	Credits	**6-7**
Fourteenth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
NR.210.664	Advanced Practice in Acute Care IV (224CL)	6
Research or Teaching Residency		0
Final Oral Defense		0
	Credits	**8-9**
Fifteenth Semester		
NR.110.890	Dissertation Seminar	1
NR.110.899	Dissertation	1 - 2
Research or Teaching Residency		0
Final Oral Defense (as needed)		0
	Credits	**2-3**
	Total Credits	**121-132**

Program Total: 129 Credits [cr]/784 NP Clinical Hours [CL]

A minimum of 1000 practice hours is required for the DNP. The Dissertation Seminar & Dissertation courses will provide additional practice hours to meet this requirement.

DNP/PhD students must take 9 credit elective hours PhD specific coursework to be considered having completed their required electives for the program.

Program Total: 131 Credits [cr]/784 NP Clinical Hours [CL]

A minimum of 1000 practice hours is required for the DNP. The Dissertation Seminar & Dissertation courses will provide additional practice hours to meet this requirement. DNP/PhD students must take 9 credit elective hours PhD specific coursework to be considered having completed their required electives for the program.

At the completion of the dual degree program, the graduate:

- Functions at the highest level of nursing practice by integrating nursing, public health and medical science with ethics and the biophysical, psychosocial, analytical, organizational, and public health sciences.
- Demonstrates organizational and systems leadership for quality and safety.
- Utilizes clinical scholarship and analytical methods for evidence-based practice.
- Applies information systems and technology for the provision and/or transformation of health care.
- Leverages transdisciplinary collaboration for the improvement of individual and population health outcomes.
- Utilizes strategies of risk reduction/illness prevention, health promotion, and health maintenance for individuals and populations.
- Develops, evaluates, advocates, and provides leadership for health care policy that shapes health care financing, regulation, access, and delivery.
- Possesses knowledge and skills in theoretical, methodological, and analytic approaches that will enable them to conduct and apply research and analytical methods to discover, apply and advance knowledge in nursing science, health, and health care.
- Assumes a leadership role in nursing and in the broader arena of health and health care both nationally and internationally.
- Develops, evaluates, advocates, and provides leadership for health care policy that shapes health care financing, regulation, access, and delivery.
- Provides leadership to address health inequities through creative research and articulation of the value propositions guiding the research.

Dual and Joint Degrees

DNP Executive/MBA Dual Degree

The Doctor of Nursing Practice program at the Johns Hopkins School of Nursing is accredited by the:

Commission on Collegiate Nursing Education (CCNE)
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

The DNP Executive Track/Master of Business Administration is a dual degree post-master's program that is designed for students to gain the knowledge, skills, and abilities to lead cross-professional teams in the improvement and provision of informed quality health care while gaining fundamental business skills.

The 67-credit dual degree DNP Executive/MBA Track is offered in a convenient executive-style format, integrating on-site immersions with online and virtual learning experiences. The dual program is offered by the Johns Hopkins School of Nursing and the Johns Hopkins Carey

Business School. The program can be completed in nine semesters of study.

The DNP Executive/MBA is designed for nurses involved in an advanced nursing practice role including but not limited to:

- clinical nurse specialist
- nurse practitioner
- nurse midwife
- nurse anesthetist
- public health practitioner
- nurse executive
- nurse informatician
- health policy analyst

Clinical hours obtained as part of a master's degree can be applied to the DNP. The student obtains 448 practice hours in association with conduct of the DNP Project in addition to 552 practice hours obtained from the previous advanced nursing practice program, to meet a minimum of 1000. Students are expected to complete DNP Executive/MBA degree requirements within seven years of enrollment.

The development of the nursing curriculum is based on AACN DNP Essentials, AONE Competencies, ANA Scope and Standards of Practice for Nurse Administrators.

Plan of Study Overview

1. Students will have to take only 10 foundational/core MBA courses instead of 15
   a. The remaining 5 courses have been converted to electives to make it more flexible for specialization
2. General: There are a total of 11 general electives
3. Specialization: The students do not have to choose a specialization, but if they want:
   a. They can choose up to 3 specializations
   b. Each specialization comprised of 5 courses (total of 10 credits)
   c. Carey Business School has a total of 8 specializations

https://carey.jhu.edu/programs/mba-programs/flexible-mba (https://carey.jhu.edu/programs/mba-programs/flexible-mba/)

Specializations:

- Business Analytics and Risk Management
- Digital Marketing
- Entrepreneurial Marketing
- Entrepreneurship, Innovation, and Technology
- Financial Management
- Health Care Management
- Innovation and Technology
- Investments
- Public and private sector leadership

Admission Requirements

Apply through the School of Nursing website. Please visit nursing.jhu.edu/admissions/apply/index.html (https://nursing.jhu.edu/admissions/apply/).

Program Total: 67 Credits [cr]/1000 Clinical Hours [CL]

(Prior MSN - 552 clinical hours plus 448 DNP practicum hours)

The Doctor of Nursing Practice (DNP) program outcomes are based upon:

1. The Essentials of Master's Education in Nursing (AACN, 2011)
2. The Essentials of Doctoral Education for Advanced Nursing Practice (AACN, 2006)

A graduate of the Doctor of Nursing Practice (DNP) program:

1. Integrates the art and science of nursing, with ethics and the biophysical, psychosocial, analytical, organizational, and public health sciences to improve patient and population health outcomes
2. Demonstrates organizational and systems leadership for quality and safety in health care systems
3. Critically appraises clinical scholarship and analytical methods for evidence-based practice
4. Applies information systems and technology for the provision and/or transformation of health care
5. Leverages interprofessional collaboration for the improvement of individual and population health outcomes
6. Utilizes population health strategies of risk reduction/illness prevention, health promotion, and health maintenance to reduce healthcare disparities and improve outcomes for diverse individuals and populations
7. Develops leadership for health care policy and advocacy that shapes health care financing, regulation, access, and delivery
8. Demonstrates mastery of the advanced nursing practice/advanced practice nursing role and population competencies

DNP Executive/ MPH Dual Degree

The Doctor of Nursing Practice program at the Johns Hopkins School of Nursing is accredited by the:

Commission on Collegiate Nursing Education (CCNE)
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

The Master of Public Health program at the Johns Hopkins Bloomberg School of Public Health is accredited by the:

Council on Education for Public Health (CEPH)
1010 Wayne Avenue, Suite 220
Silver Spring, MD 20910
(202) 789-1050

The DNP Executive/MPH dual degree offered through the Johns Hopkins School of Nursing and the Johns Hopkins Bloomberg School of Public Health integrates nursing and population health frameworks to prepare nurse leaders to improve population health and advance health equity. Graduates will be prepared to employ systems-level thinking to address local and global health challenges by shaping policy, interventions, and quality improvements to create lasting change.

The 80-credit dual degree program is offered in a convenient executive-style format, integrating online and virtual learning experiences with on-site immersions. This dual degree option can be completed in three years.

The DNP Executive/MPH is designed for nurses involved in an advanced nursing practice role including but not limited to:

- clinical nurse specialist
- nurse practitioner
- nurse midwife
- nurse anesthetist
- public health practitioner
- nurse executive
- nurse informatician
- health policy analyst

Clinical hours obtained as part of the master's degree can be applied to the DNP program. The student obtains 448 practice hours in association with conduct of the DNP Project in addition to 552 practice hours obtained from the previous advanced nursing practice program, to meet a minimum of 1000 hours. Students are expected to complete DNP Executive/MPH degree requirements within six years of enrollment.

The development of the nursing curriculum is based on AACN DNP Essentials, AONE Competencies, ANA Scope and Standards of Practice for Nurse Administrators.

Plan of Study Overview

1. Streamlined requirements
    a. Fewer required courses at each school
    b. Select courses fulfill requirements across the two programs
    c. Time and credit savings
2. Electives

a. A diverse set of electives is available at JHBSPH

3. Specialization
    a. Students have the opportunity to specialize in their own areas of interest by tailoring their public health coursework. The specialization can inform the combined DNP/MPH project.
4. Combined DNP/MPH projects
    a. Students undertake a combined DNP/MPH project in their third year that synthesizes their knowledge and skills in nursing and population health. The project fulfills criteria for the DNP Executive project as well as the MPH Capstone project.

Admission Requirements

Apply through the School of Nursing website. Please visit nursing.jhu.edu/admissions/apply/index.html (https://nursing.jhu.edu/admissions/apply/).

Program of Study

Course	Title	Credits
First Year		
First Semester		
PH.340.601 or PH.340.721	Principles of Epidemiology (3.5 SON cr) or Epidemiologic Inference in Public Health I	5
PH.221.688	Social and Behavioral Foundations of Primary Health Care (3 SON cr) substitutes DNP Elective	4
PH.300.615	The Tools of Public Health Practice (1 SON cr)	1
PH.550.860	Academic & Research Ethics at BSPH	
PH.550.867	Introduction to MPH Studies	0
7.5 SON Credits		
	Credits	**10**
Second Semester		
NR.210.804	Organizational and Systems Leadership for Quality Care	2
PH.140.611	Statistical Reasoning in Public Health I (Term 1; 2 SON cr) counts towards NR.210.817 Analysis and Evaluation of Individual and Population Health Data (3 cr)	3
PH.380.755	Population Dynamics and Public Health (Term 1; 1.5 SON cr)	2
PH.552.601	Foundational Principles of Public Health (Term 1; 0.5 SON cr)	0.5
PH.552.603	The Role of Qualitative Methods and Science in Describing and Assessing a Population's Health (Term 1; 0.5 SON cr)	0.5
PH.140.612	Statistical Reasoning in Public Health II (Term 2; 2 SON cr) counts towards NR.210.817 Analysis and Evaluation of Individual and Population Health Data (3 cr)	3
PH.380.604	Life Course Perspectives on Health (Term 2; 3 SON cr) substitutes DNP Elective	4
PH.552.610	The Social Determinants of Health (Term 2; 0.5 SON cr)	0.5
12 SON Credits		
	Credits	**15.5**
Third Semester		
PH.550.608	Problem Solving in Public Health (Term 3; 3 SON cr) substitutes DNP Elective	4
PH.180.601	Environmental Health (Term 3; 3.5 SON cr)	5
PH.552.623	Principles of Negotiation and Mediation for Public Health Professionals (Term 3; 0.5 SON cr)	0.5
PH.552.624	Applications of Negotiation and Mediation for Public Health Professionals (Term 3; 0.5 SON cr)	0.5
PH.260.720	Communications Primer for the Public Health Sciences (Term 4; 1 SON cr)	1
PH Elective (Term 4; 2 SON cr)		3
PH Elective (Term 4; 2 SON cr)		3
12.5 SON Credits		
	Credits	**17**
Second Year		
First Semester		
NR.210.886	Problem Discovery (112 practicum hours)	3
NR.210.822	Health Information Systems and Patient Care Technologies	2
PH.550.630	Public Health Biology (2 SON cr)	3
PH Elective (2 SON cr)		3
9 SON Credits		
	Credits	**11**
Second Semester		
NR.210.803	Nursing Inquiry for Evidence-Based Practice	3
PH.552.625	Building Collaborations Across Sectors to Improve Population Health (Term 1; 0.5 SON cr)	0.5
PH.552.609	Psychological and Behavioral Factors That Affect A Population's Health (Term 1; 0.5 SON cr)	0.5
PH Elective (Term 1; 2 SON cr)		3
PH.221.654	Systems Thinking in Public Health: Applications of Key Methods and Approaches (Term 2; 2 SON cr)	3
PH.552.611	Globalization and Population Health (Term 2; 0.5 SON cr)	0.5
PH.550.602	Interprofessional Education Activity	0
8.5 SON Credits		
	Credits	**10.5**
Third Semester		
NR.210.805	Translating Evidence into Practice	3
NR.210.887	Project Advancement (112 practicum hours)	3
NR.210.802	Advanced Nursing Health Policy	2
8 SON Credits		
	Credits	**8**
Third Year		
First Semester		
PH Elective; 3 SON cr		4
PH Elective; 2 SON cr		3

PH Elective; 2 SON cr		3
7 SON Credits		
	Credits	**10**
Second Semester		
NR.210.888	Project Application (112 practicum hours) counts towards MPH Practicum (3 SPH cr)+ Special studies PH.xxx.840 (1 SPH cr)	3
NR.210.806	Health Finance counts towards PH.312.603 Fundamentals of Budgeting and Financial Management (3 SPH cr)	2
PH.552.608	Biologic, Genetic and Infectious Bases of Human Disease (Term 1; 0.5 SON cr)	0.5
PH.410.651	Health Literacy: Challenges and Strategies for Effective Communication (Term 2; 2 SON cr)	3
7.5 SON Credits		
	Credits	**8.5**
Third Semester		
NR.210.889	Project Evaluation and Dissemination (112 practicum hours) substitutes for MPH Capstone Project (2 SPH cr)	3
NR.210.818	Clinical Data Management and Analyses	2
PH.312.600	Managing Health Services Organizations (Term 3; 3 SON cr)	4
8 SON Credits		
	Credits	**9**
	Total Credits	**99.5**

80 Total SON Credits
Notes: Public Health 2-, 3-, 4- and 5-credit courses have been converted to the SON credit system

1000 Clinical Hours required [CL] Clinical hours obtained as part of the master's degree can be applied to the DNP program. The student obtains 448 practice hours in association with conduct of the DNP Project in addition to 552 practice hours obtained from the previous advanced nursing practice program, to meet a minimum of 1000 hours.

All part-time/online MPH students will be automatically registered for a 0 credit "course", *Introduction to MPH Studies* in their first term.

As part of the Interprofessional Practice core requirement, students also are required to attend an Interprofessional Event in the beginning of Term 2. An optional activity can be completed if necessary.

The Doctor of Nursing Practice (DNP) program outcomes are based upon:

1. The Essentials of Master's Education in Nursing (AACN, 2011)
2. The Essentials of Doctoral Education for Advanced Nursing Practice (AACN, 2006)

A graduate of the Doctor of Nursing Practice (DNP) program:

1. Integrates the art and science of nursing, with ethics and the biophysical, psychosocial, analytical, organizational, and public health sciences to improve patient and population health outcomes
2. Demonstrates organizational and systems leadership for quality and safety in health care systems
3. Critically appraises clinical scholarship and analytical methods for evidence-based practice
4. Applies information systems and technology for the provision and/or transformation of health care
5. Leverages interprofessional collaboration for the improvement of individual and population health outcomes
6. Utilizes population health strategies of risk reduction/illness prevention, health promotion, and health maintenance to reduce healthcare disparities and improve outcomes for diverse individuals and populations
7. Develops leadership for health care policy and advocacy that shapes health care financing, regulation, access, and delivery
8. Demonstrates mastery of the advanced nursing practice/advanced practice nursing role and population competencies

The Master of Public Health (MPH) program outcomes are based upon the:

1. Accreditation Criteria for Schools of Public Health and Public Health Programs (CEPH, 2021).

A graduate of the Master of Public Health (MPH) program will attain grounding in foundational public health knowledge as measured by the following learning objectives:

Profession & Science of Public Health

- Explain public health history, philosophy and values
- Identify the core functions of public health and the 10 Essential Services
- Explain the role of quantitative methods and sciences in describing and assessing a population's health
- Explain the role of qualitative methods and sciences in describing and assessing a population's health
- List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program
- Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc.
- Explain the critical importance of evidence in advancing public health knowledge

Factors Related to Human Health

- Explain effects of environmental factors on a population's health
- Explain biological factors that affect a population's health
- Explain genetic factors that affect a population's health
- Explain behavioral and psychological factors that affect a population's health
- Explain the social, political and economic determinants of health and how they contribute to population health and health inequities
- Explain how globalization affects global burdens of disease
- Explain an ecological perspective on the connections among human health, animal health and ecosystem health (e.g., One Health)

And demonstrate achievement of the following competencies:

Evidence-based Approaches to Public Health

- Apply epidemiological methods to the breadth of settings and situations in public health practice
- Select quantitative data collection methods appropriate for a given public health context

- Select qualitative data collection methods appropriate for a given public health context
- Analyze quantitative data using biostatistics, informatics, computer-based programming and software, as appropriate
- Analyze qualitative data using computer-based programming and software, as appropriate

Interpret results of data analysis for public health research, policy or practice

Public Health & Health Care Systems

- Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings
- Discuss how structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels

Planning & Management to Promote Health

- Assess population needs, assets and capacities that affect communities' health
- Apply awareness of cultural values and practices to the design or implementation of public health policies or programs
- Design a population-based policy, program, project or intervention
- Explain basic principles and tools of budget and resource management
- Select methods to evaluate public health programs Policy in Public Health
- Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence
- Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes
- Advocate for political, social or economic policies and programs that will improve health in diverse populations
- Evaluate policies for their impact on public health and health equity

Leadership

- Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making
- Apply negotiation and mediation skills to address organizational or community challenges

Communication

- Select communication strategies for different audiences and sectors
- Communicate audience-appropriate public health content, both in writing and through oral presentation

Describe the importance of cultural competence in communicating public health content

Interprofessional Practice

- Perform effectively on interprofessional teams

Systems Thinking

- Apply systems thinking tools to a public health issue

Healthcare Organizational Leadership, MSN/MBA, Dual Degree

The MSN Healthcare Organizational Leadership Track prepares graduates who are exceptional at patient care and safety as well as effecting change at the health care leadership and corporate levels. With an MSN/MBA from Johns Hopkins, graduates will crunch the data and help set organizational policy and priorities but will always account for the patient—and family—at the other end of every decision. Through this degree, graduates become strong leaders who can blend an understanding for the bottom line—medical, economic, regulatory, ethical—and turn that balancing act into a high-functioning daily routine. The 65 credit dual program is offered by the School of Nursing and the Carey Business School.

The development of the nursing curriculum is based on:

- AACN Masters Essentials
- AONE Competencies
- ANA Scope and Standards of Practice for Nurse Administrators

Clinical practica and number of clinical hours: Clinical practicum in HOL I (112 hours), HOL II (168 hours), and HOL III (224 hours) for a total of 504 clinical hours. Some MBA courses may require a residency component.

Certification: Certification for Nurse Executives and Nurse Executives, Advanced is based on experience and hours of practice, not educational preparation. Graduates are eligible to take a certification exam as a certified nurse manager and leader or nurse executive through the American Nurses Credentialing Center www.nursingworld.org/our-certifications (https://www.nursingworld.org/our-certifications/) and the American Organization of Nurse Executives www.aone.org/resources/certification/about_certifications.shtml (http://www.aone.org/resources/certification/about_certifications.shtml/).

Financial Aid

The Office of Student Financial Services assists students in obtaining financing for their education. The school participates in several financial aid programs that will help to pay education expenses. Financial assistance may include loans, grants, scholarships, and work-study funding. An overview of the various aid programs is provided here. If you need assistance with financial aid please visit the SEAM's Online Form (https://support.sis.jhu.edu/case/) or visit our website at nursing.jhu.edu/admissions/financial-aid/index.html (http://nursing.jhu.edu/admissions/financial-aid/).

2022-2023 Program Costs

One-year living expenses provided here are *estimates*, based on average costs. Actual costs may vary. For 2022-2023 planning purposes, a 3% cost-of-living increase should be anticipated, as well as at least a 2% to 3% tuition increase. For the current cost of attendance for each program, please visit nursing.jhu.edu/admissions/financial-aid/forms.html (http://nursing.jhu.edu/admissions/financial-aid/forms.html).

Grants, Scholarships, and Loans

Please note: Some outside scholarships may require a School of Nursing certification. Students needing certification for outside scholarships should contact Student Financial Services.

Helene Fuld Leadership Program for the Advancement of Patient Care Quality and Safety

This program is funded by the Helene Fuld Health Trust. Recipients will benefit from training and intensive, applied experiences in interprofessional clinical environments that provide an enduring foundation for continued excellence in advancing quality and safety in health care delivery. Award recipients will be required to participate in a variety of academic activities in association with the program.

Coverdell Fellows Program

The School of Nursing is proud to offer the Paul D. Coverdell Fellows Program. The program offers individuals who have successfully completed Peace Corps service the opportunity to participate in community nursing practice under the supervision of senior community health nursing faculty. This service is outside that required by the nursing courses.

Students will be paid a stipend for this service. In addition, an effort will be made to individualize the practice site of students based on their previous experiences and future career goals. Coverdell Fellows Scholarships in the amount of up to $15,000 are available to a limited number of returning Peace Corps volunteers. Preference is given to RPCVs who have completed their service within the past 24 months. For information, contact the Office of Admissions at 410-955-7548.

School of Nursing Merit Scholarships

Merit Scholarships are provided to students at the time of admission. They are awarded for the length of a student's program and range from $10,000 to full tuition. Merit awards are awarded from institutional funds and the endowed scholarships listed in this catalogue.

Maryland State Scholarships

The Maryland Higher Education Commission offers grants and scholarships to qualified Maryland residents. Most awards are based in part upon financial need. Specific program information and eligibility criteria can be found at www.mhec.state.md.us (http://www.mhec.state.md.us/) or by phone at 410-260-4565. (Non-Maryland residents should contact the designated state agency (https://www2.ed.gov/about/contacts/state/) for information on funding opportunities available through their state of residency.)

Hal and Jo Cohen Scholars Grant

The Maryland Nurse Support Program II Hal and Jo Cohen Graduate Nursing Scholarships is a competitive grant that awards full tuition for students to complete the graduate education necessary to assume roles as nursing faculty at Maryland institutions of higher education upon graduation. The Cohen Scholars grants selects individuals with a strong intent to pursue and remain in nursing educator as a faculty or hospital based educator in the state of Maryland. Cohen Scholars have a service commitment upon graduation to be a nurse educator.

Eligibility criteria for limited Cohen Scholars grant scholarship include: 1) an individual must be a Maryland or neighboring state resident and be fully admitted, 2) enrolled at a Maryland college or university as a full-time or part-time graduate student in a doctoral program (DNP, PhD) or post-graduate certificate program (nursing education, APRN certificate);

3) strong interest in the nurse educator role; 4) GPA 3.25/4.0, Grant awards have a service obligation component and are by nomination only, subject to the availability of funds and not all eligible applicants may receive an award.

Cohen Scholars grant recipients are expected to complete a required mentoring program and maintain a GPA 3.25/4.0 throughout the education program. The mentoring program includes faculty role preparation (9 credits of nursing education courses, teaching practicum/experience, mentoring activities), professional activities, employment placement, and annual performance reports.

Cohen Scholars grant service commitment includes employment in a nurse educator role within 6 months of education as a faculty or hospital educator. One year of full-time nurse educator experiences is required for each year of tuition support or two years of part-time for each year of tuition support.

Health Resources and Services Administration Scholarships

FACULTY LOAN REPAYMENT PROGRAM

The Faculty Loan Repayment Program provides loan repayment to individuals who have an interest in pursuing a career as a faculty member in a health professions school. Program applicants must be from a disadvantaged background, have an eligible health professions degree or certificate, and have an employment commitment as a faculty member at an approved health professions institution for a minimum of two years. Program participants receive funds (up to $40,000 for two years of service) to repay the outstanding principal and interest of qualifying educational loans.

NURSE FACULTY LOAN PROGRAM (NFLP)

NFLP recipients may receive up to $35,500 per year, which is allotted for tuition, books, and fees. Living expenses are not eligible to be covered by NFLP funding. To qualify for the 85% loan cancellation, NFLP recipients must be employed full-time as a Nursing faculty member over a consecutive four-year period. During this period:

- 20% of the loan is cancelled upon completion of employment for years 1, 2, and 3.
- 25% of the loan is cancelled upon completion of employment year 4.
- 15% of the loan is deferred while the borrower is employed during the four-year period.
- After 4 years, the remaining 15% is repaid over 10 years at an interest rate of 3%.

BALTIMORE TALENT SCHOLARS

The Johns Hopkins School of Nursing (JHSON) is proud to announce the creation of a scholarship program created to benefit the Baltimore community by keeping our most talented students in Baltimore City. In the vision of the Johns Hopkins University Baltimore Scholars program aimed at undergraduate students, the School of Nursing Baltimore Talent Scholars Program will provide four full-tuition scholarships annually to Baltimore City public high school graduates admitted to the JHSON MSN Entry into Nursing Program.

AMERICORPS AWARDS

This program provides educational awards in return for work in community service. Students can work before, during, or after their postsecondary education. Funds can be used either to pay current education expenses or to repay outstanding federal student loans. Information can be obtained from their website at https://www.nationalservice.gov/programs/americorps (https://www.nationalservice.gov/programs/americorps/).

TEACH FOR AMERICA

Through a partnership with Teach for America Hopkins offers waived application fees to Teach for America corps members and alumni. The School of Nursing also offers Individuals who have served in the Teach for America program with a $12,500 scholarship. To qualify for this scholarship students must be admitted to one of the pre-licensure academic programs and they must provide documentation of their service in Teach for America. No application is required.

FEDERAL DIRECT LOAN

This program provides a fixed interest rate loan to eligible students to help cover the cost of higher education. The government charges an origination fee that is deducted from the loan proceeds. Applicants must enroll at least half- time to be considered for a Direct Loan. The School of Nursing participates in two of the three types of Federal Direct Loans:

DIRECT UNSUBSIDIZED LOAN

This program provides a loan of up to $20,500 per year to eligible students. The interest rate for the Direct Unsubsidized Loan is contingent upon the disbursement date:

Disbursement Date	Interest Rate
On July 1, 2021 through June 30, 2022	5.28%
On July 1, 2022 through June 30, 2023	6.54%

Interest accrues from the time the loan is disbursed and continues until it is paid in full. Borrowers may pay the interest while enrolled in school or they can allow it to accrue. Accrued interest will be capitalized, which means it will be added to the principal amount of the loan. The origination fee is currently 1.057%. Updated information about the origination fee will be available at https://studentaid.ed.gov (https://studentaid.ed.gov/) after October 1, 2022.

DIRECT PLUS LOANS

This program provides loans up to the cost of attendance less any other aid a borrower may be receiving. It is based upon the creditworthiness of the borrower. The interest rate for the Direct PLUS Loan is contingent upon the disbursement date:

Disbursement Date	Interest Rate
On July 1, 2021 through June 30, 2022	6.28%
On July 1, 2022 through June 30, 2023	7.54%

Interest accrues from the time the loan is disbursed and continues until it is paid in full. Borrowers may pay the interest while enrolled in school or they can allow it to accrue. Accrued interest will be capitalized, which means it will be added to the principal amount of the loan. The origination fee is currently 4.228%. Updated information about the origination fee will be available at https://studentaid.ed.gov (https://studentaid.ed.gov/) after October 1, 2022.

THE JOHNS HOPKINS HOSPITAL EMPLOYEE SCHOOL OF NURSING TUITION LOAN

Johns Hopkins Health System Corporation / The Johns Hopkins Hospital (JHHSC/JHH) employees who are enrolled at the School of Nursing can finance their tuition through this special loan program with the Johns

Hopkins Federal Credit Union (JHFCU). For more information about this program, contact the JHHSC/JHH Benefits Office at 410-614-6504.

Employment

FEDERAL WORK-STUDY PROGRAM (FWS)

The program provides part-time employment for students who demonstrate financial need. Students who participate in the program earn money to help pay education expenses. The program encourages work that is related to the student's program of study and work in community service. Many community service opportunities are available. The amount of earnings will vary depending upon the employment obtained, rate of pay, and hours worked. Earnings are further limited by the amount of the student's demonstrated need and the availability of FWS funds. To locate current FWS opportunities please visit The University Of Experiential Learning's platform SMILE (https://orchid.hosts.jhmi.edu/stujob/sessmile.cfm). Students will need to login to SMILE to view current opportunities. Information regarding non-Federal Work-Study employment opportunities may be available through the Career Resource Center.

APPLICATION PROCEDURES

To apply for federal student aid for the 2022-2023 school year, applicants must:

- Complete the 2022-23 Free Application for Federal Student Aid (FAFSA)
- If applicable, submit the electronic School of Nursing Student Anticipated Enrollment Form after the FAFSA (students should check their To Do List)
- Be a U.S. citizen, permanent resident, or eligible non-citizen
- Be enrolled in a degree program and maintain satisfactory academic progress
- Be registered at least half-time
- Not owe a refund on a federal student grant or be in default on a federal student loan
- Register with the Selective Service (if required) and have a valid Social Security Number
- Not be convicted under federal or state law of possession or sale of illegal drugs

Application materials are available on our website at www.nursing.jhu.edu/academics/finaid (http://www.nursing.jhu.edu/academics/finaid/). Note that additional documentation may be requested. For optimum consideration, students should complete the application process by March 1 for fall enrollment and October 1 for spring enrollment. To be considered for state funding, students must follow the application guidelines published by their state of residency. Maryland residents must complete the FAFSA by March 1. Listings of state agencies and contact information can be found at www.studentaid.ed.gov (http://www.studentaid.ed.gov/). Once on the website, click on the "Funding your Education" link and then the "State Aid" link.

SATISFACTORY ACADEMIC PROGRESS

In accordance with federal regulations, students who receive Federal Student Aid (FSA) must be in good standing and maintain Satisfactory Academic Progress (SAP) while pursuing their degree or certificate.

Under Federal Title IV law, the school's SAP requirements must meet certain minimum requirements, and be at least as strict as the standards for Good Academic Standing. To remain in good academic standing, students must have a 3.0, meet or exceed 67% of their credits they attempt, and complete their coursework in the defined time for their program. Students on academic probation may also be on Financial Aid Suspension, or they may be on Financial Aid Warning status. The policy applies to new students starting in the 2018-19 academic year receiving Federal Student Aid for semesters/periods of enrollment that begin during or after summer 2018.

The federal regulations require that an institution use three measurements to determine SAP.

- Qualitative – students must maintain a minimum cumulative grade point average or equivalent
- Quantitative – students must maintain a minimum cumulative completion rate of credits attempted
- Maximum timeframe – students must complete their degree or certificate within a maximum timeframe

The standards used to evaluate academic progress are cumulative and, therefore, include all periods of the student's enrollment, including periods during which the student did not receive FSA funds.

PRE-LICENSURE STUDENTS

1. Minimum cumulative grade-point average (GPA) – Qualitatively, on a scale of 4.0, pre-licensure students must maintain a minimum 3.0 cumulative GPA.
2. Minimum cumulative completion rate – Quantitatively, financial aid recipients must maintain a cumulative completion rate equal to or exceeding 67% of the credits attempted.
3. MSN Entry into Nursing students must complete the program within 5 years of matriculation.

MASTER'S SPECIALTY, CERTIFICATE, AND DOCTORATE STUDENTS

1. Minimum cumulative grade-point average (GPA) – Qualitatively, on a scale of 4.0, graduate students must maintain a minimum 3.0 cumulative GPA.
2. Minimum cumulative completion rate – Quantitatively, financial aid recipients must maintain a cumulative completion rate equal to or exceeding 67% of the credits attempted.
3. Students must complete the required course work within the time periods specified below:

Coursework	Time Period
MSN, Specialty Students	6 years from matriculation
MSN, Specialty/MBA Students	7 years from matriculation
Certificate Students	3 years from matriculation
DNP, Advanced Practice Students	6 years from matriculation
DNP Executive Students	6 years from matriculation
DNP, Executive/MBA Students	7 years from matriculation
PhD Students	7 years from matriculation
DNP/PhD Students	8 years from matriculation

TREATMENT OF GRADES AND REPEATED COURSEWORK

Grades	Description
Course Withdrawal - W Grades	Not included in GPA calculation, but are considered a non-completion of attempted coursework

Incomplete Course – I Grade	Not included in the GPA calculation, but are considered a non-completion of attempted coursework until the coursework is completed and final grade is submitted
Audited Course – AU Grade	Not included in the GPA calculation, but are considered a non-completion of attempted coursework until the coursework is completed and final grade is submitted
Satisfactory (S) or Passing (P) Grade	Treated as attempted credits which are earned, but is not included in GPA calculation
Failing – F Grade	Treated as attempted credits that were not earned and is included both in GPA calculation and minimum completion rate
No Grade Reported – X Grade	Not included in the GPA calculation, but is considered a non-completion of attempted coursework until the coursework is completed and final grade is submitted
Course Repeats	Only repeated course grade will be used in GPA calculation; all attempts will be included in the completion rate determinations

All credits accepted for transfer to the student's program of study are taken into consideration as both attempted and earned credits. Grades earned at other institutions are not, however, counted when computing the student's GPA.

Financial aid recipients are reviewed for SAP at the end of each semester of enrollment (summer, fall, winter, spring). Letters are sent to students who do not meet the SAP standards and are either placed in a warning status or lose eligibility.

FINANCIAL AID WARNING STATUS

Students who fail to meet the minimum financial aid Satisfactory Academic Progress standards will be placed on Financial Aid Warning for the subsequent semester/period of enrollment. Students are still eligible for financial aid during the "Warning" semester.

Students applying for financial aid will be placed immediately into **Financial Aid Warning** status if they did not meet SAP standards in the previous period of enrollment prior to applying for aid.

FINANCIAL AID SUSPENSION – LOSING TITLE IV ELIGIBILITY

Students on Financial Aid Warning, who fail to maintain the minimum SAP standard during the warning semester, will be placed on **Financial Aid Suspension** status for subsequent semesters/periods of enrollment. No financial aid will be disbursed during subsequent semesters/periods of enrollment until the student regains financial aid eligibility.

Students applying for financial aid will not be eligible for assistance and will immediately be placed on **Financial Aid Suspension** status if they did not meet the minimum financial aid SAP standards, based on the two previous periods of enrollment prior to applying for financial aid.

Students who do not complete their program within the maximum timeframe lose eligibility for financial aid and are placed on Financial Aid Suspension status.

REINSTATEMENT OF AID AFTER FINANCIAL AID SUSPENSION STATUS

A student may regain eligibility for financial aid after Financial Aid Suspension status only by one of the following methods:

1. The student submits a written letter of appeal and the Financial Aid Appeals Committee grants the appeal. The student is placed on Financial Aid Probation for the next semester/period of enrollment and is eligible for Title IV aid during their Financial Aid Probation status. If the appeal is approved but the Committee has determined that the student will not be able to meet the SAP standards within one semester/period of enrollment, then the student will be placed on Financial Aid Probation with an Academic Plan which, if followed, will ensure the student is able to meet the SAP standards by a specific point in time.
2. The student registers for coursework while on Financial Aid Suspension status, pays for tuition and fees without the help of student financial aid, and does well enough in the coursework to satisfy all the satisfactory academic progress standards at the end of the subsequent semester(s)/period(s) of enrollment.

APPEAL PROCESS

Students who wish to appeal Financial Aid Suspension status must submit an appeal of Financial Aid Suspended status in writing to the Financial Aid Appeals Committee by the date specified in the Financial Aid Suspended notification letter. The Financial Aid Appeals Committee will review the appeal and notify the student in writing of their decision within 14 working days after the Appeals Committee meets and makes its determination. Appeals should include the following:

- The grounds for appeal (i.e., working too many hours, etc.)
- Demonstration that the student understands the reason behind failure to meet the SAP requirements
- Specific plans to rectify the student's current academic status

The Financial Aid Appeals Committee will review the appeal and consult with academic advisers and other involved parties as warranted. If it is determined that the student will not be able to meet the SAP standards by the end of the next semester/period of enrollment but the Committee is in agreement that the student's grounds for appeal are reasonable and the student has a reasonable chance to succeed and graduate, then if the appeal is approved the student will also be placed on an Academic Plan. Students will receive written notification of the decision. All decisions on such appeals are final.

Students who lose eligibility for financial aid due to not meeting the minimum SAP standards more than one time during their program may submit an appeal each time.

ACADEMIC PLAN

Students who lose eligibility and submit an appeal may be placed on an Academic Plan if the appeal is approved. The purpose of an academic plan is to support the student in bringing them back into compliance with the financial aid SAP standards by a specific point in time in order to ensure that the student will be able to successfully complete the degree or certificate program. The academic plan will be specifically tailored to the student and may include milestones and specific requirements such as a reduced course load, specific courses, or tutoring. Students on an academic plan are still responsible to meet the SAP requirements in the subsequent semester/period of enrollment and will lose eligibility if the SAP standards are not met, and need to go through the appeal process in order to regain eligibility. The student's progress in their academic plan will be taken into account in any subsequent appeal process of financial aid eligibility.

Contact the Office of Student Financial Services at 410-955-9840 or SEAM's Online Form (https://support.sis.jhu.edu/case/)for more information.

FINANCIAL AID—RETURN OF TITLE IV FUNDS

The Office of Student Financial Services is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or term.

Recalculation of financial aid is based on the percentage of earned aid using the following Federal Return of Title IV Funds formula:

- Percentage of payment period or term completed = number of days completed up to the withdrawal date divided by the total days in the payment period or term. (Any break of five days or more is not counted as part of the days in the term.) This percentage is also the percentage of earned aid.
- Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula:
    - Aid to be returned = 100% of the aid that could be disbursed minus the percentage of earned aid multiplied by the total amount of aid that could have been disbursed during the payment period or term.
- Other assistance under this Title for which a Return of funds is required (e.g., LEAP).

If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student would be required to return a portion of the funds. Keep in mind that when Title IV funds are returned, the student borrower may owe a debit balance to the institution.

If a student earned more aid than was disbursed to them, the institution would owe the student a post-withdrawal disbursement which must be paid within 120 days of the student's withdrawal.

The institution must return the amount of Title IV funds for which it is responsible no later than 30 days after the date of the determination of the date of the student's withdrawal.

Refunds are allocated in the following order:

1. Unsubsidized Federal Stafford Loans
2. Subsidized Federal Stafford Loans
3. Unsubsidized Direct Stafford Loans (other than PLUS loans)
4. Subsidized Direct Stafford Loans
5. Federal Perkins Loans
6. Federal Parent (PLUS) Loans
7. Direct PLUS Loans
8. Federal Pell Grants for which a Return of Funds is required
9. Academic Competitiveness Grants for which a Return of Funds is required
10. National Smart Grants for which a Return of Funds is required
11. Federal Supplemental Opportunity Grants for which a Return of Funds is required

Master's Degrees

Entry into Nursing, Master of Science in Nursing

The Master of Science in Nursing programs at the Johns Hopkins School of Nursing are accredited by the Commission on Collegiate Nursing Education (CCNE):

Commission on Collegiate Nursing Education
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930.

The MSN (Entry into Nursing) Program prepares students to become Master's level nurse generalists with advanced knowledge and skills to deliver and direct care to patients with complex conditions on interprofessional teams in a hospital, primary care, or community health setting.

This full-time, five-term program is delivered on-site and prepares students to take the nursing licensure exam (NCLEX) and be licensed as an RN upon graduation. The program emphasizes leadership, global impact, quality and safety, and evidence-based interprofessional education. Students learn from a framework that integrates knowledge from the physical sciences, the humanities, public health, genetics, and organizational sciences into nursing practice. For the MSN (Entry into Nursing) Program, the coursework in each semester builds on the knowledge acquired during the prior semester. MSN (Entry into Nursing) students may not progress to new semester coursework if all previous semester coursework is not successfully completed.

Graduates will be qualified to enter the nursing workforce immediately or continue their studies toward an advanced practice nursing specialty or doctoral degree.

Students must complete the program sequentially, as outlined in the curriculum, within 5 years.

Enhancement Options

Community Outreach

The Johns Hopkins University School of Nursing has an innovative educational curriculum for community-based public health nursing practice. The goals of the project are to increase education in public health nursing practice and to provide a community-based learning experience for students while improving both the delivery of health services to and the health status of the urban Baltimore community. The ultimate objective is to improve health in similar urban communities by increasing the number of nursing graduates who are proactive in urban public health. The School of Nursing operates clinics that are staffed by faculty and students in a transitional housing program, a low-income housing project, a domestic violence shelter, and a Baltimore city K-8 school.

Opportunities for special study credits with selected faculty are available. These offerings provide structured learning experiences while working directly in the community. Whenever feasible, students will be assigned to multidisciplinary teams to enrich the learning experience. Stipends are available for selected students who engage in special community service projects.

Nursing students interested in expanding upon or developing their interest in community-based public health may identify themselves upon matriculation or at any time during their course of study.

Birth Companions

This course focuses on developing initial competence in the Birth Companion role based on the Doula model. The Doula model emphasizes physical, emotional, and informational support to the mother before, during, and after childbirth.

Maternal and child health nursing and community health nursing theories and practices are introduced. Group processing of client and birth companion interactions and care management will be held biweekly. Seminars with experts in the field including lactation consultants, social workers, community health educators, and child birth educators will be included.

[1] This course offered in 3rd term for spring entrants.
[2] These are 7-week courses taken consecutively within the semester
[3] Only 3 elective credits are required in the 5th term

Learning Outcomes

Program outcomes for the MSN (Entry into Nursing) are based upon:

1. The Essentials of Baccalaureate Education of Professional Nursing Practice (AACN, 2008)

2. Essentials of Master’s Education in Nursing (AACN, 2011).

A graduate of the MSN (Entry into Nursing) Program:

1. Integrates knowledge from the sciences, the humanities, public health, genetics, and organizational sciences into nursing practice across diverse settings and populations.

2. Applies nursing process to provide care to and advocate for individuals, families, groups, systems, communities, and populations.

3. Models effective, respectful therapeutic communication in the practice of nursing.

4. Integrates knowledge and skills of organizational and systems leadership for critical decision making, to improve health and health care delivery.

5. Incorporates quality and safety principles to improve care in organizations across diverse settings.

6. Utilizes knowledge of the research process to critique evidence and translate findings to clinical practice.

7. Analyzes information management, information systems, and enabling technologies for the delivery of quality, coordinated, and safe care.

8. Applies knowledge of health care policies, financing, and regulations to influence political/policy making for nursing practice and health care delivery.

9. Coordinates increasingly complex care to improve outcomes and transitions of care through collaboration with interprofessional health care teams.

10. Integrates health promotion and disease prevention principles to provide patient and family-centered care for individuals, families, groups, systems, communities, and populations.

11. Embodies inherent values of the profession into ethical and legal practice of nursing. Exhibits the highest level of personal and professional value-based behaviors.

12. Incorporates knowledge of ecological and social determinants of health into care for individuals, families, groups, communities, systems, and populations.

13. Critically evaluates health issues within a global context.

14. Demonstrates cultural humility in the provision of care to individuals, families, groups, systems, communities, and populations.

15. Synthesizes practice-based knowledge to exercise advanced clinical reasoning and integrated clinical management in nursing practice.

Master of Science in Nursing (MSN) Healthcare Organizational Leadership Track

The MSN in Healthcare Organizational Leadership (HOL) prepares the student to assume leadership positions in various organizations providing direct or indirect healthcare services across the life span and care continuum; government agencies; community-based organizations (public and private); and other healthcare industries (insurance, biomedical, pharmaceutical). Students will acquire competencies essential for effective and transformative leadership in multiple organizational contexts and dynamics at micro, meso, and macro levels. Formation of the student's vision for an impactful leadership career, aspirations for meaningful legacy to the nursing profession, healthcare delivery systems, professional/health-related organizations, and the public health at large are distinctive features of the curriculum, aligned with the Johns Hopkins School of Nursing (JHSON), mission, vision, strategic directions, and attributes of a *Hopkins Nurse*. Furthermore, the HOL curriculum is informed by the real-world practice underpinned by the state-of-the science for nursing leadership, the American Organization of Nursing Leadership (AONL) Nurse Leaders Competencies, and the American Association of Colleges of Nursing (AACN) Essentials: Core Competencies for Professional Nursing Education.

Clinical practica and number of clinical hours: Clinical practicum in HOL I (112 hours), HOL II (168 hours), and HOL III (224 hours) for a total of 504 clinical hours.

Certification: MSN in HOL graduates are eligible to apply for certifications available for nurse leaders/executives through the AONL (https://www.aonl.org/initiatives/certification (https://www.aonl.org/initiatives/certification/)) and the American Nurses Credentialing Center (www.nursingworld.org/our-certifications (http://www.nursingworld.org/our-certifications/)).

The Master of Science in Nursing programs at the Johns Hopkins School of Nursing are accredited by the

Commission on Collegiate Nursing Education (CCNE)
Collegiate Nursing Education
655 K Street, NW, Suite 750
Washington, DC 20001
202-463-6930

All course work in the MSN specialty tracks, both clinical and classroom, is organized around 10 domains, competencies, and sub-competencies for advanced-level nursing education (AACN) and 5 common-core set of competency domains for healthcare leadership (AONL). Students develop progressive understanding and expertise in relation to these domains, and learning is structured to accomplish a related set of outcomes that are considered essential to advanced nursing practice. The MSN in HOL track includes core, professional and theoretical foundations of organizational leadership and management, business of healthcare, and practice of nursing leadership and management roles in multiple healthcare organizational contexts. The MSN in HOL track require 35 to 67 credits (includes MSN/MBA) during a minimum of 16-30 months of full-time study.

Graduates will have completed the educational requirements for appropriate certification. Full-time and part-time study are available.

Students matriculated in the JHU School of Nursing are required to satisfy all academic requirements and adhere to all policies of the School. Students are expected to complete degree requirements within five years of enrollment.

Graduates of the MSN in Healthcare Organizational Leadership program will be able to:

1. Integrate philosophical foundations of nursing, ethical and legal principles in their scope of practice as nurse-leaders.

2. Use theory and evidence-based leadership and management practices at healthcare organizations' microsystem, mesosystem, and macrosystem.

3. Apply finance, business, and economics principles in operations of healthcare systems or organizations.

4. Design initiatives for improving outcomes at the patient/family, staff/employee, and organizational levels.

5. Demonstrate attributes of a professional, transformative, and visionary nurse-leader.

Outcomes are based upon The Essentials of Master's Education in Nursing (AACN, 2011)

Online Prerequisites for Health Professions

These 11-week courses (https://nursing.jhu.edu/academics/programs/prerequisites/) are designed for students needing prerequisite courses for healthcare professions. The instructor-led courses are delivered using a facilitated teaching approach to engage students and encourage interaction and participation. All students who enroll in these courses are enrolled as non-degree seeking students with the School of Nursing. Courses are competitively priced and available online in the fall, spring, and summer semesters. First-time students need to submit an online application form found at the Online Prerequisites for Health Professions (https://nursing.jhu.edu/academics/programs/prerequisites/) web page.

REGISTRATION

These 11-week courses (https://nursing.jhu.edu/academics/programs/prerequisites/) are designed with students' goals in mind. The instructor-led courses are delivered using a facilitated teaching approach to engage students and encourage interaction and participation. All students who enroll in these courses are enrolled as non-degree seeking students with the School of Nursing. Courses are competitively priced and available online in the fall, spring, and summer semesters. First-time students need to submit an online application form found at the Online Prerequisites for Health Professions (https://nursing.jhu.edu/academics/programs/prerequisites/) web page.

All students pursuing a health-based education can take the following instructor-led prerequisites completely **online** and get a taste of Hopkins Nursing:

- Nutrition
- Human Growth and Development Through the Lifespan
- Biostatistics
- Microbiology with virtual lab*
- Anatomy with virtual lab*
- Physiology with virtual lab*
- Chemistry with virtual lab§
- Biochemistry with virtual lab§

**Virtual labs are accepted at Hopkins Nursing, but not everywhere. Check your university and state licensure requirements for prerequisite courses. For a full list of required courses visit our pre-licensure* Master of Science in Nursing: Entry in Nursing *(*https://nursing.jhu.edu/academics/programs/pre-licensure/masters-entry/*) program webpage.*

§Offered but not required by Johns Hopkins School of Nursing MSN Entry into Nursing program.

Registration Questions? Contact jhuson@jhu.edu (jhuson@jhu.edu?subject=Prerequisite%20Registration%20Question) or look in our FAQS (https://nursing.jhu.edu/academics/programs/prerequisites/faqs.html). Returning students register through the Johns Hopkins University Student Information System. (https://isis.jhu.edu/sswf/)

Students may enroll in up to three prerequisite courses per semester, but should not enroll in more than two lab courses at the same time. Anatomy is to be taken prior to Physiology and may not be taken in the same semester.

TUITION

Tuition is due at time of registration. Payment plan requests can be sent to the Office of Student Enrollment and Account Management (SEAM) by completing* the** SEAM's Online Form **(**https://support.sis.jhu.edu/case/**)to request support.** ***More information on cost of tuition can be found on the Prerequisite Information page ***(***https://nursing.jhu.edu/academics/programs/prerequisites/***).***

When you are enrolled in our prerequisite courses, you are enrolled as a non-degree seeking student and therefore are ineligible for federal student aid via the FAFSA at this time. Financial aid for prerequisite courses must come from private sources. Private sources include private student loans or third-party tuition aid such as that from an Americorps benefit or employer tuition assistance. For more information on using Americorps benefits, employer tuition assistance, or other third-party tuition aid, please contact our Financial Aid department by visiting the SEAM's Online Form (https://support.sis.jhu.edu/case/)to request support or call 1 877-419-5131.

Students may also fund their courses through military assistance/GI Bill. For more information on using your military benefits toward tuition costs for our prerequisite courses, visit the SEAM's Online Form (https://support.sis.jhu.edu/case/)to request support.

Note: If you are receiving some sort of financial assistance in paying tuition costs for your course, you must inform SEAM by visiting the SEAM's Online Form (https://support.sis.jhu.edu/case/)to request support or calling 1 877-419-5131 after registering for courses so that they can make note of this in your record and ensure that you will not be dropped due to nonpayment.

NR.110.200 Nutrition-3 credits
This course will cover the science and fundamentals of human nutrition. Topics covered include nutritional requirements related to changing individual and family needs, food choices, health behaviors, food safety, prevention of chronic disease, and nutrition-related public health in the United States and globally.

NR.110.201 Human Growth and Development through the Lifespan-3 credits
This course provides an overview of major concepts, theories, and research related to human development through the lifespan from the prenatal period to the end of life. Significant factors that influence individual functioning are explored.

NR.110.202 Biostatistics-3 credits
This course provides an introduction to the basic concepts of statistical ideas and methods that aims to equip students to carry out common statistical procedures and to follow statistical reasoning in their fields of study. Principles of measurement, data summarization, and univariate and bivariate statistics are examined. Emphasis is placed on the application of fundamental concepts to real-world situations.

NR.110.203 Microbiology with Lab-4 credits
This course introduces the core concepts and basic principles in microbiology, examining microorganisms and how they interact with humans and the environment. Information regarding classifications of microorganisms, characteristics of different cell types, and processes critical for cell survival is presented. Topics such as bacterial metabolism, microbial nutrition, genetics, anti-microbial approaches, and interaction of pathogenic bacteria with humans are also discussed. The course includes a virtual laboratory component designed to complement lecture topics. The course content provides the foundation of general microbiology necessary for students who are interested in applying to health profession programs.

NR.110.204 Anatomy with Lab-4 credits

This course will introduce components and structures of the human body at the level of gross and microscopic anatomy. Students will learn organ localization in the body and structural features comprising the different body systems. The body systems covered will include the skin, heart, lungs, and brain, among others. Upon completion, students will have an understanding of normal healthy anatomy that will prepare them for professional health programs. This course includes a virtual laboratory component designed to complement lecture topics.

NR.110.205 Physiology with Lab-4 credits
This course will introduce the functions of several human body systems. Students will learn how each part within a body system works together to seamlessly accomplish tasks. We will also discuss regulation of organ function, a critical component of physiology. After an introduction on electrolytes, the physiologic processes we will cover include cardiovasculature, lymphatics, and digestion, among others. Upon completion, students will have an understanding of normal healthy anatomical function that will prepare them for professional health programs. This course includes a virtual laboratory component designed to complement lecture topics.

NR.110.206 Chemistry with Lab-4 credits
This course introduces the core concepts of matter and energy, atomic structure, the periodic system, chemical bonding, nomenclature, stoichiometry, weight relationships, gases, solutions, chemical reactions, thermodynamics and equilibrium. The course includes a virtual laboratory component designed to enhance lecture topics. The course content provides the foundation of general chemistry necessary for students who are interested in applying to health profession programs.

NR.110.207 Biochemistry with Lab-4 credits
Biochemistry is a natural science that investigates life processes at the molecular level. This course begins with an introduction to the structure and function of the four classes of biomolecules: proteins, nucleic acids, carbohydrates, and lipids. In the second half of the course, glycolysis, the citric acid cycle, and oxidative phosphorylation will provide a context for an introduction to the fundamentals of enzyme catalysis, kinetics, bioenergetics, and metabolic regulation. The virtual lab promotes mastery of the lecture content while exploring lab techniques used in biochemical research. Upon completion, students will have a solid background in the science that provides the foundation of the biomedical sciences. Prerequisite: NR.110.206 Chemistry with Lab or the equivalent.

Policies

For current faculty and contact information go to https://e-nextcatalogue.jhu.edu/nursing/policies/Administrative%20Leave/

Academic Integrity Policy

The School of Nursing Academic Integrity Policy (the “Policy”) is based on the shared core values stated in the School’s Values Statement. Each member of the School of Nursing community, whether student, faculty or staff, holds themselves and others to the highest standards based on the values of excellence, respect, diversity, integrity, and accountability.

Each student is obligated to adhere to the highest standards of academic ethics and conduct in their academic endeavors.

The Honor Pledge

The following honor pledge will be included and signed on each examination and assignment:

> *“On my honor, I pledge that I have neither given nor received any unauthorized assistance on this (exam) (assignment) (care plan) (paper) (project).*

The pledge may be completed in several ways such as:

- Student will write and sign the pledge;
- Faculty will preprint the pledge on tests and student will initial it;
- Faculty will include the pledge on an online quiz/test and ask students to indicate their online verification.

Scope

This Policy applies to all matriculated and continuing School of Nursing students in full-time and part-time programs, and non-degree courses.

Cross-Divisional Enrollments

School of Nursing students may enroll in courses in one or more other University divisions or schools. School of Nursing students are subject to this policy not only when enrolled in School of Nursing courses, but also when enrolled in courses in other University divisions or schools.

Academic misconduct in the context of those "outside" courses will be subject to and resolved under this policy.

Research Misconduct

Research misconduct is defined as fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. For a complete definition, refer to The Johns Hopkins University Research Integrity Policy (“Policy”) available at https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf.

The Policy applies to all University faculty, trainees, students, and staff engaged in the proposing, performing, reviewing, or reporting of research, regardless of funding source. Allegations of research misconduct regarding a student should be referred to the Research Integrity Officer for assessment under that Policy, but may also be directed to the department chair or Dean of the responsible unit where the alleged research misconduct occurred.

Non-Academic Misconduct

All issues of non-academic student misconduct will be subject to the University-wide Student Conduct Code. For more on this policy, please refer to http://studentaffairs.jhu.edu/policies/student-code/.

Policy Violations

Academic misconduct is prohibited by this Policy. *Academic misconduct is any action or attempted action that may result in creating an unfair academic advantage for oneself or an unfair academic advantage or disadvantage for any other member or members of the academic community*. *This includes a wide variety of behaviors such as cheating, plagiarism, altering academic documents or transcripts, gaining access to materials before they are meant to be available, and helping another individual to gain an unfair academic advantage. Nonexclusive examples of academic misconduct are listed below*. All suspicions of academic misconduct, no matter how minor, must be investigated.

Cheating

The following are nonexclusive examples of cheating:

- Fraud, deceit, or dishonesty on an academic assignment, test, or examination
- Use or consultation of unauthorized or inappropriate materials (e.g., notes, books, etc.) on assignments, tests, or examinations
- Unauthorized discussion of a test or exam during its administration
- Copying content on an assignment, test, or examination from another individual
- Obtaining a test or examination or the answers to a test or examination before administration of the test or examination
- Studying from an old test or examination whose circulation is prohibited by the faculty member
- Use or consultation of unauthorized electronic devices or software (e.g., calculators, cellular phones, computers, tablets, etc.) in connection with assignments or during tests or examinations
- Use of paper writing services or paper databases
- Unauthorized collaboration with another individual on assignments, tests, or examinations
- Submission of an assignment, test, or examination for a regrade after modifying the original content submitted
- Permitting another individual to contribute to or complete an assignment, or to contribute to or take a test or examination on the student’s behalf
- Unauthorized submission of the same or substantially similar work, assignment, test, or exam to fulfill the requirements of more than one course or different requirements within the same course
- Tampering with, disabling, or damaging equipment for testing or evaluation

Plagiarism

The following are nonexclusive examples of plagiarism:

- Use of material produced by another person without acknowledging its source
- Use of another person’s ideas or words without giving appropriate credit
- Submission of the same or substantially similar work of another person (e.g., an author, a classmate, etc.)
- Use of the results of another individual’s work (e.g., another individual’s paper, exam, homework, computer code, lab report, etc.) while representing it as your own
- Improper documentation/acknowledgement of quotations, words, ideas, views, or paraphrased passages taken from published or unpublished sources
- Wholesale copying of passages from works of others into homework, essays, term papers, dissertation, or other assignment without acknowledgement
- Paraphrasing of another person’s characteristic or original phraseology, metaphor, or other literary device without acknowledgement

Forgery/Falsification/Lying

The following are nonexclusive examples of forgery, falsification, and lying:

- Falsification or fabrication of data/information for an assignment, on a test or exam, or in an experiment
- Citation of nonexistent sources or creation of false information in an assignment
- Attributing to a source ideas or information that is not included in the source
- Forgery of University or other official documents (e.g., letters, transcripts, etc.)
- Impersonating a faculty or staff member
- Request for special consideration from faculty members or University officials based upon false information or deception
- Fabrication of a reason (e.g., medical emergency, etc.) for needing an extension on or for missing an assignment, test, or examination
- Claiming falsely to have completed and/or turned in an assignment, test, or examination
- Falsely reporting an academic ethics violation by another student
- Failing to identify oneself honestly in the context of an academic obligation
- Providing false or misleading information to an instructor or any other University official

Facilitating Academic Dishonesty

The following are nonexclusive examples of facilitating academic dishonesty:

- Intentionally or knowingly aiding another student to commit an academic ethics violation

- Allowing another student to copy from one's own assignment, test, or examination
- Making available copies of course materials whose circulation is prohibited (e.g., old assignments, texts, or examinations, etc.)
- Completing an assignment or taking a test or examination for another student
- Sharing paper mill/answer bank websites or information with other students

Unfair Competition

The following are nonexclusive examples of unfair competition:

- Intentionally damaging the academic efforts of another student.
- Stealing another student's academic materials (e.g., books, notes, assignments, etc.)
- Denying University resources needed by another student (e.g., hiding library materials, stealing lab equipment, etc.)

Failing to Report Alleged Violation

- Failing to report any known or suspected violation of this Policy

Failing to Follow Applicable Policies, Procedures, Rules

- Failing to follow applicable JHU, divisional/school, program, course, and/or faculty policies, procedures, and/or rules regarding academic ethics

Improper Use of Electronic Devices

- Transmittal or posting of patient/client data or photographs
- Use of electronics in any way to gain an unfair advantage on an assignment/test

Academic Integrity Policy Procedures

Reporting Academic or Professional Ethics Violations

Any member of the faculty, administration, staff, or any student who has reason to suspect or believe a violation of this Policy has occurred is expected to notify the Ethics Board Chair or Associate Dean for Enrollment Management and Student Affairs.

Faculty-Student Resolution of First-Time Offenses

- If a student is suspected of academic misconduct, the faculty member responsible for the course in which the misconduct allegedly occurred must, if feasible, review the facts of the case promptly with the student.
- If, after speaking with the student and any witnesses, the faculty member believes that academic misconduct has occurred, the faculty member must first contact the Associate Dean for Enrollment Management and Student Affairs to determine whether the offense is a first offense, or a second or subsequent offense.
- For a first offense, after faculty consultation with the Associate Dean for Enrollment Management and Student Affairs and/or the Chair of the SON Ethics Board, the faculty member may choose to resolve the case directly with the student, i.e., the faculty member and student may reach an agreement on the resolution of the alleged misconduct. Note, neither the faculty member nor the student is obligated to resolve a complaint under this section. A faculty member may not resolve a second or subsequent offense directly with a student.
- If such an agreement is reached, the faculty member must promptly provide the student with a letter outlining the resolution that includes the charges, a summary of the evidence, the findings, and the sanctions agreed upon, and must also simultaneously provide a copy of that letter to the Associate Dean for Enrollment Management and Student Affairs.
- If, however, the faculty member cannot reach an agreement with the student (e.g., the student denies cheating, does not agree with the proposed sanction, etc.), or the offense is a second or subsequent offense, or, if in the case of a first offense, the sanction imposed would be greater than failure in the course, the faculty member must promptly notify the Associate Dean for Enrollment Management and Student Affairs in writing of the alleged violations, evidence, including potential witnesses, and other pertinent details of the case. In such instances, the case will proceed to an Ethics Board hearing as outlined below.

Ethics Board Hearing

- In the case of a first offense that is not resolved between the faculty member and the student or a second or subsequent offense, the Associate Dean for Enrollment Management and Student Affairs will convene a meeting of the Ethics Board in consultation with the chair of the Ethics Board.
- In advance of the Ethics Board hearing, the student will receive written notification of the hearing date, time, and location.

Ethics Board Selection and Ethics Panel Hearings

The Ethics Board consists of a chair, appointed annually by the Dean or her or his designee; two full-time faculty who teach primarily in one of the following programs—MSN Entry into Nursing Practice, DNP, or PhD, elected by the Faculty Assembly; Program Directors from each academic program; and students representing each academic degree.

For each matter, an Ethics Hearing Panel will be formed. The Ethics Hearing Panel consists of the faculty chairperson of the Ethics Board, the faculty members on the Ethics Board elected by the Faculty Assembly, the program director for the student's program, and two student members. The Associate Dean for Enrollment Management and Student Affairs or designee attends all hearings as a non-voting member of the Ethics Board.

Each student appearing before an Ethics Hearing Panel will have a hearing assistant unless explicitly asking that no hearing assistant be named. The hearing assistant for a student may be their academic advisor or other faculty member either chosen by the student or recommended by the Ethics Board. If desired, the faculty member, staff member, or student who reports the case may also have a hearing assistant of their choice or recommended by the Ethics Board. The assistant may meet with the respective parties to assist in preparation of evidence, testimony, and questions for the hearing. The designated assistants may attend and provide consultation in the hearing while the student or faculty member is present.

Students may request witnesses be present at the hearing. The student must furnish the Ethics Hearing Chair with the names of the witnesses in sufficient time to request the presence of the witnesses. It is within the Hearing Panel's discretion to limit the number of witnesses appearing at the hearing to a reasonable number.

Faculty, staff, or students bringing forth the case are expected to compile evidence and to present their account of the violation during an Ethics hearing. All supporting materials for the hearing must be placed on file in the Office of the Associate Dean for Enrollment Management and Student Affairs. Supporting materials may be submitted directly to the

Associate Dean for Enrollment Management and Student Affairs or indirectly through the assistant or the chairperson.

The Ethics Board will endeavor to convene within 10 working days of receiving the request for a hearing. Legal representation is not permitted at Ethics Board hearings.

In general, hearings will proceed as follows, although the Ethics Hearing Panel has discretion to alter the order or manner in which it hears or receives evidence, and to impose time limits on any stage of the process:

- Introductions
- Opening statement from the reporter, if applicable
- Questioning of the reporter by the panel, if applicable
- Closing statement from the reporter, if applicable
- Opening statement from the student
- Questioning of the student by the panel
- Questioning of the witnesses, if any, by the panel
- Closing statement from student

The reporter, student, or witness is only present in the room with the Ethics Hearing Panel during the time that they are being questioned or responding. At the conclusion of the hearing, all parties are dismissed and the deliberations of the Ethics Hearing Panel will be held in private.

The student is presumed innocent until the Ethics Hearing Panel has made a determination by a preponderance of the evidence that a violation has occurred. A "preponderance of the evidence" standard is an evidentiary standard that means "more likely than not." This standard is met if the proposition is more likely to be true than not true. The goal of the Ethics Panel is to reach consensus on the allegation and outcome. If this is not possible, a decision will be made by majority vote.

The Chair of the Ethics Board and the Associate Dean for Enrollment Management and Student Affairs shall, as soon after the hearing as is practicable and reasonable, prepare minutes of the hearing including:

1. Date, place, and time of the hearing,
2. The names of all persons present at the hearing,
3. A short statement of the charge against the student,
4. A summary of the findings of fact and conclusions made by the Ethics Board,
5. A statement of the decision of the Ethics Board,
6. The sanction(s) recommended by the Ethics Board, if applicable

The alleged violator and the initiating party will be informed in writing by the Office of Enrollment Management and Student Affairs of the decision on whether a Policy was violated following the decision of the Ethics Hearing Panel.

Any student found not in violation of all charges of the Academic Integrity Policy will be permitted to make-up missed assignments or clinical time during the time of the hearing and appeal process.

After the hearing, the Associate Dean for Enrollment Management and Student Affairs assists the chair in implementing the Ethics Board's decision. This will include notifying the student and appropriate faculty or School personnel (e.g., Registrar, faculty advisor, course faculty, Executive Vice Dean, appropriate program director).

Sanctions

If a student is determined to be in violation of this Policy, the following factors may be considered in the sanctioning of the process:

- The specific academic misconduct at issue;
- The student's academic misconduct history; and
- Other appropriate factors

This section lists some of the sanctions that may be imposed upon students for violations of this policy. The School of Nursing reserves the right, in its discretion, to impose more stringent or different sanctions than those listed below depending on the facts and circumstances of a particular case. Sanctions for academic misconduct under policy are generally cumulative in nature.

The following is a non-exhaustive list of possible sanctions and what these sanctions typically mean. The specific conditions imposed under each sanction (i.e. the terms of a suspension, etc.) will depend on the specific facts and circumstances of each case.

Formal Warning

The student is notified in writing that their actions constitute a violation of this policy, and may be subject to other actions (e.g., re-taking an exam or failure in a course).

Academic

These sanctions may include but are not limited to grade adjustments, including failure, on any work or course, or re-submission of an assignment. This may include or may not include permanent student record notation. If the sanctions include a notation on the student's transcript, "Grade due to Academic Misconduct" will be noted on the student's official School of Nursing transcript.

Corrective or Educational Measures

The student may be required to engage in other corrective or educational activities.

Probation

The student is notified that further violations of this policy within the stated period of time will result in the student being considered for immediate suspension or other appropriate disciplinary action. If at the end of the specified time period no further violations have occurred, the student is removed from probationary status.

Suspension

The student is notified that they are separated from the University for a specified period of time. The student must leave campus and vacate campus residence halls, if applicable, within the time prescribed and is prohibited from University property and events. The conferring of an academic degree may be deferred for the duration of the suspension. The student must receive written permission from the University prior to re-enrollment or re-application. Academic work completed at another institution while on suspension will not be recognized for credit transfer.

Expulsion

Expulsion means the permanent removal of the student from the University. Expulsion includes a forfeiture of all rights and degrees not actually conferred at the time of the expulsion, permanent notation of the expulsion on the student's University records and academic transcript, withdrawal from all courses according to divisional policies, and the forfeiture of tuition and fees. Any student expelled from the University is prohibited from future reapplication to the University.

Appeals Process

Except in the case of a resolution for first time offenses with a faculty member, the student may appeal a panel's finding of responsibility and/or sanction(s). The student must file any appeal within five (5) days of the date of the notice of outcome on one or more of the following grounds:

- Procedural error that could have materially affected the determination of responsibility or sanction(s);
- New information that was not available at the time of the hearing and that could reasonably have affected the determination of responsibility or sanction(s); and
- Excessiveness of the sanction(s)

Any appeal must be filed in writing with the Dean of the School of Nursing or designee. An appeal will involve a review of the file; the appeal does not involve another hearing. On review of the appeal, the Dean of the School of Nursing or designee may:

- Enter a revised determination of responsibility and/or revise sanction(s); or
- Remand the matter to the panel to reconsider the determination of responsibility and/or sanction(s), or
- Convene a new panel to consider the case; or
- Uphold the panel's decision

The Dean of the School of Nursing or designee will simultaneously send the appeal determination, with the reasons therefore, to the chair, as appropriate, and to the student. The decision of Dean of the School of Nursing or designee is final. No further appeals are permitted.

Records

A case file concerning a student will be retained by the Associate Dean for Enrollment Management and Student Affairs for the duration of the student's enrollment at JHU and seven (7) years from date that the student graduates or otherwise leaves the University.

The Associate Dean for Enrollment Management and Student Affairs will provide an overview of the process and procedures of the Ethics Board.

Procedural Rights

In connection with the resolution of alleged policy violations, a student shall:

- Be notified in writing of the allegations in advance of any meeting or hearing;
- Be notified in writing of the charges, and the date, time, and location of the hearing, and identity of the hearing administrator or panel members in advance of the hearing;
- Have the opportunity to review in advance of any meeting or hearing any information to be considered by any faculty member, administrator, or panel in accordance with the University policy on Family Educational Rights and Privacy Act of 1974, as amended ("FERPA") and applicable laws and regulations;
- Be notified in writing of the outcome of any hearing, namely the findings, determination of responsibility, and any sanctions; and
- Be notified in writing of the outcome of any appeal.

A student may raise the potential conflict of any University personnel participating in the resolution process. All such conflicts must be sent in writing to the Associate Dean for Enrollment Management and Student Affairs at least two days prior to the hearing date. A student may also decline to participate in the resolution process. The University may however continue the process without the student's participation.

Communications under this policy will primarily be conducted with students through their official University email address, and students are expected check their official University email on a regular basis.

Academic Standards for Progression

All students must maintain a GPA of 3.0 and can repeat a course with a failing grade in accordance with the program-specific terms below. Students are not permitted to repeat a course for which they have received a passing grade.

- MSN (Entry into Nursing) students will be required to repeat a course if they earn a grade below a C- (70%). Students can repeat one course one time.
- MSN (Advanced Practice) and DNP students will be required to repeat a course if they earn a grade below a B- (80%). Students can repeat one course one time.
- PhD students will be required to repeat a course if they earn a grade below a B (83%) for core nursing courses, and a grade below a C (73%) in non-nursing core courses (biostatistics). PhD students can repeat more than one course one time.

All students taking NR.210.606 Biostatistics for Evidence-Based Practice and NR.210.608 The Research Process and Its Application to Evidence-Based Practice can earn a C- in one of these courses without needing to repeat. If a student earns a C+, C, or C- for both courses, they must repeat one of the two and may not repeat any other course in the program.

Nurse Anesthesia students can earn a C- in NR.210.670 Human Anatomy without needing to repeat the course.

Students will be dismissed from the program at any time if it is mathematically impossible to attain a cumulative GPA of 3.0 by the end of the academic program.

MSN Entry into Nursing students may not progress to new semester coursework if all previous semester coursework is not successfully completed.

In the event that a student does not need to repeat a course but has a cumulative GPA below 3.0, the student will be placed on academic probation, suspended, dismissed, and/or subject to other conditions.

In the event the student is on probation for more than two consecutive semesters because the cumulative GPA remains below a 3.0, the student may be suspended, dismissed, and/or be subject to other conditions, whether or not it is mathematically possible to achieve a cumulative GPA of 3.0 by the time of graduation.

When students need to repeat a course to continue in their respective program of study:

- Student will be placed on academic probation and remain so until the course has been successfully completed.
- Student must take and pass the course the next time it is offered.
- Student may not be able to progress in the program if the course is a prerequisite for subsequent course(s) and/or there is a gap in semester(s) between the next available course offering.
- Student must notify the Office of Financial Aid of any delay of progression.

Academic probation, suspension, and dismissal are a permanent part of the student transcript.

Note that students who are in interdivisional courses and/or are enrolled in a joint or dual program must meet progressions requirements in both schools.

If a student earns a failing grade as defined by their program or has a cumulative GPA below 3.0, the student will be referred to the Progressions Committee.

- The student should meet with their advisor prior to the Progressions Committee meeting to explain any extenuating circumstances regarding the course grade(s). The student is allowed to formulate a written statement to submit to the committee regarding past grades and performance. This letter should be sent privately to the advisor and members of the Progressions Committee. The letter should be available to committee members at least 24 hours prior to the committee meeting.
- As the student representative, the adviser is also allowed to verbally present additional relevant information at the meeting of the Progressions Committee.
- In addition to any above listed outcomes, the Progressions Committee may impose other conditions for continuing in the program.
- The student will receive a letter from the Progressions Committee Chair outlining the decision of the committee.
- A student may appeal decisions of the Progressions Committee in writing to the School of Nursing Executive Vice Dean within 10 business days of the Progressions Committee letter. The student's statement will set forth the grounds for the appeal. The Executive Vice Dean will have access to documents reviewed during the Progressions Committee hearing. The Executive Vice Dean will send a written response to the student. The student may appeal the decision of the Executive Vice Dean to the Dean in writing within 10 business days of the Executive Vice Dean's letter. The decision of the Dean will be final.

Administrative Leave

A student not enrolled or not on an approved LOA will be considered on administrative leave. After 90 days on administrative leave, which begins from the start of the semester with no enrollment, the student will be administratively withdrawn from the program and will be required to reapply for admission.

Exception: Students not enrolled with prior program approval will not be considered on leave (e.g. enrollment not possible because course is only offered once a year).

Students may take one leave of any kind during the course of their program.

Attendance Policy

Students are expected to attend all courses, labs, and clinicals as scheduled. If students miss a clinical, they may be required to pay a fee for make-up clinical time or simulation exercises.

CANVAS and SON IT Help

The Johns Hopkins School of Nursing uses Canvas as it's learning management system (LMS). Canvas provides the opportunity to integrate technology into the teaching and learning process. Faculty members manage their own course content within their Canvas courses, with the technical support of the Course Support Team. Enrolled students can access course documents, submit assignments, complete quizzes and exams, and communicate with instructors and other students through Canvas at canvas.jhu.edu.

SON IT Help Desk & Course Support

The SON Help Desk is located in Room S315 in the SON's main building, and is available during normal business hours (Monday-Friday 8:00 AM – 5:00 PM) for all other technical problems and questions related to basic troubleshooting and operating system issues. They can also provide you with a loaner laptop if you are experiencing a problem with your machine that is preventing you from completing work. You may contact the SON Help Desk anytime, but you will only receive a response during normal business hours. The SON Help Desk can be reached by email at SON-HelpDesk@jhu.edu or by phone at (410) 614-8800. If a student is having general issues with their browser or operating system, or having difficulty logging in to the VPN, Canvas, cloud, etc., the best way to get help is to submit a ticket to the SON Help Desk (https://nursingjhu.qualtrics.com/jfe/form/SV_eK7Zq6ZgMW0Ydbn/).

The Course Support Team is also available for assistance during normal business hours for any issues with accessing course content or troubleshooting a course technology. If a student is experiencing a technical issue in a specific classroom, the best way to get help is to submit a ticket to the Course Support Team (https://nursingjhu.qualtrics.com/jfe/form/SV_4N4ruEfy0jE44QJ/).

Note: To inquire about grades or to request assignment deadline extensions, please contact your instructor directly. Their contact information can be found in the course syllabus.

If you experience an outage or login/password problem, please contact the IT@JH Help Desk at 410-955-HELP. The IT@JH Help Desk can be contacted 24/7, but will only be able to assist with JHED login problems and provide status updates for system-wide outages.

Clinical Placements

All clinical placements are authorized by the Johns Hopkins School of Nursing. There is a process within each course/track where clinical sites and placements are vetted and secured to ensure an excellent clinical experience. A student with a particular placement request should inform the course coordinator when completing the pre-clinical information form. Unless otherwise directed, the student is not to contact the site directly to request a placement. While requests will be considered, no placement or clinical site identified by the student is guaranteed.

On-campus students are assigned clinical sites within the Baltimore/Washington area. Students may be assigned a clinical practice site outside the range of public transportation. It is the responsibility of the student to have reliable transportation to all assigned clinical sites.

Distance students should contact their course coordinator regarding the process for securing a clinical site and preceptor. It is the responsibility of the student to have reliable transportation to all assigned clinical sites.

In some instances, make-up fees may be charged to a student who misses a clinical.

Clinical Warnings

A Clinical Warning is given whenever a student is at risk for not successfully completing a clinical course. This could be the result of not meeting the objectives on the Clinical Evaluation Tool or the inability to achieve clinical competencies. A Clinical Warning may also be given in conjunction with a Notification of Missed Clinical Time if missed clinical time is a factor in preventing a student from meeting the objectives on the Clinical Evaluation Tool or achieving clinical competencies. Clinical Warnings will be given to students at the earliest indication of concern, to enable the student to meet with the Clinical Instructor and Clinical Course Coordinator, so they may develop a plan for the student's successful completion of the clinical course.

A Clinical Warning is a written document, prepared by a faculty member who is responsible for the course, and sent to the student, the student's Faculty or Academic Advisor(s), the Director of the program, the Associate Program Director (if applicable), and additional course faculty who are working directly with the student or course.

Complaint/Grievance Policy

The School of Nursing Formal Complaint/Grievance Policy is based on the shared core values stated in the School's Values Statement. Each member of the School of Nursing community, whether student, faculty, or staff holds themselves to the highest standards based on the values of excellence, respect, diversity, integrity, and accountability.

Definition: A formal student complaint/grievance is defined as a signed statement written by a student alleging discriminatory, arbitrary, or improper treatment.

Process

1. A formal student complaint should be submitted within 10 days of the event causing concern to the relevant course coordinator, program director, or associate dean. The statement should include:
    a. a factual description of the complaint or dispute resulting in the grievance;
    b. names of persons involved if any;
    c. a brief description of all informal attempts at resolution; and
    d. any other information that the student believes to be relevant to the complaint.
2. In addition to the relevant course coordinator, program director, or associate dean, students may contact the Executive Vice Dean of the School of Nursing at any time in the formal complaint/grievance process. The Executive Vice Dean may communicate with relevant faculty or the Associate Dean for Enrollment Management and Student Affairs regarding the complaint. The Executive Vice Dean will not overturn a grade given by a faculty member or decision concerning safety in the clinical setting.
    - Complaint regarding a grade: Complaints involving grades or other evaluation of the student's academic work (excluding Progressions Committee decisions, please see below) may be addressed by this policy only if the evaluation is alleged to be arbitrary or capricious by the student. In the event that informal discussion between the student and instructor(s) fails to resolve a dispute, the student should appeal to the relevant Program Director. The Program Director will consult with the instructor(s) and attempt to resolve any process disputes but the instructor(s) retains the final decision about the grade for the assignment or the course.
3. Documentation of Complaint Response: The faculty or staff responding to the complaint should document the details below and submit this document to the Executive Vice Dean:
    - The date the complaint was formally submitted
    - The nature of the complaint
    - Steps/action taken to resolve the complaint
4. The formal process established here is not meant to supplant attempts at resolving complaints through informal discussion, though there are no circumstances under which a formal complaint/grievance must be settled informally. Whether settled informally or formally, the grievance process should move expeditiously without sacrificing the integrity of the process. Nothing in this policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University. Moreover, no action may be taken with respect to a formal complaint/grievance that would conflict with a university policy, federal, state, or local law or regulation.

For complaints related to:

- *Decisions of the Progressions Committee* - students should follow the appeal process defined in the School of Nursing's Academic Standards for Progression policy (p. 1068)
- *Academic integrity* - students should follow the School of Nursing's Academic Integrity Policy (p. 1064)
- *Sexual misconduct* - students should follow the University's Sexual Misconduct policy (p. 48)
- *Discrimination and harassment* - students should follow the University's Harassment and Discrimination policy (p. 48)
- *Compliance with the American with Disabilities Act* - students should follow the University's ADA Compliance and Disability Accommodations policy (https://oie.jhu.edu/ada-compliance/)

Compliance

All enrolled degree/certificate-seeking students must register for and complete a background check, drug screening, required medical compliance, as well as other requirements, regardless of program, online/on-site course attendance status, and clinical/non-clinical course status. The School of Nursing has contracted with CastleBranch (https://jhu.castlebranch.com/JO78/package-selection/) to track and approve all compliance requirements. All enrolled degree/certificate-seeking students must provide all the required compliance documents, and must update documentation as required, in order to remain in compliance throughout the course of their program.

The Johns Hopkins University also tracks COVID vaccines, boosters and flu shots through the Vaccine Management System (VMS). All enrolled degree/certificate-seeking students must provide all required compliance documents, and must update documentation as required, in order to remain in compliance throughout the course of their program.

Continuous Enrollment Policy

Each School of Nursing curricular program plan is designed to fulfill learning outcomes and promote staged learning. Degree and certificate students are expected to either follow their program of study and enroll every semester or be on a school-approved Leave of Absence (p. 1074).

A student not enrolled or not on an approved LOA will be considered on administrative leave. After 90 days on administrative leave, which begins from the start of the semester with no enrollment, the student will be administratively withdrawn from the program and will be required to reapply for admission. *Note: Students not enrolled with prior program approval will not be considered on leave (e.g. enrollment not possible because course is only offered once a year).*

Students may take only one leave of any kind while enrolled.

Course Policies

Course Drop or Withdrawal Policy

After the add/drop period, a student, who is not requesting a leave of absence from the program, may only drop or withdraw from one required course one time during their matriculation as a student in the program. If a student drops or withdraws from any additional course, the student will not be able to progress in the program. This does not pertain to a student who is requesting a leave of absence from the program. Changes to a student's program or course load may result in additional time to degree completion and additional tuition charges and fees in subsequent semesters of enrollment.

Process and Transcript Notation

If a class is dropped before 50% of the class is completed, no notation is made on the academic record. The advisor is required to sign the Add/Drop form for all required course drop/withdrawals after the add/drop period, and a copy of the form must be sent to the course coordinator.

After 50% through 70% of the scheduled classes have met, a "W" is recorded on the transcript. The faculty or academic advisor and Program Director are required to sign the Add/Drop form for required course drop/withdrawals at the 50% to 70% completion mark. A copy of the form must be sent to the course coordinator.

After 70% of the scheduled classes have met, the course coordinator will note on the form whether the student is receiving a passing grade for the course at the time of withdrawal. The determination will be based on the grade(s) achieved for all test(s) and other graded requirements that are due on or before that date. A "WP" (Withdrawn Passing) or "WF" (Withdrawn Failing), as appropriate, is recorded on the transcript. The signatures of the course coordinator, the faculty or academic advisor, and the Director of the Program are required on the add/drop form to withdraw from a class after the 70% completion mark.

See the Course Refund Policy (p. 1071) section to determine the amount of tuition to be refunded.

Course Listings and Schedule

The course listing is available online at sis.jhu.edu/classes (http://sis.jhu.edu/classes/). Course schedule descriptions are available at https://nursing.jhu.edu/academics/resources/course_listings/index.html (https://nursing.jhu.edu/academics/resources/course_listings/). Course descriptions are also found by clicking on the course number in the program of study.

Course Refund Policy

Semester/Term Courses

A refund of payments will be made to students withdrawing of their own accord as follows.

Drop Date	Refund
Weeks 1 and 2	100%
Week 3	50%
Weeks 4-6	25%
Week 6 and after	No refund.

Online Prerequisite Courses

A refund of payments will be made to students withdrawing from online prerequisite courses of their own accord as follows. Percentages are calculated from the date the student submits a written statement of withdrawal. No refund will be granted to students dismissed for disciplinary reasons.

Drop Date	Refund
Week 1*	100%
Week 2*	50%
Week 3* and 4*	25%
Week 5 and after	No refund.
Week 8 and after	No refund. "WP" or "WF" will be posted to record

***Note:** For refund purposes, all prerequisite courses run from Tuesday through Monday.

Course Warnings

The purpose of a course warning is to alert a student that they are in jeopardy of not obtaining a passing grade in a course. This mechanism is in place so that an academic success plan may be created to assist the student in the course and prevent possible failure of the course.

A course warning is a written document, prepared by the faculty member who is responsible for the course, and sent to the student, the student's Faculty or Academic Advisor(s), the Program Director, and the relevant Associate Program Director (if any) at midterm of a course. A course warning is not part of the student's permanent record.

Criminal Conduct Policy

Admission to any School of Nursing academic program or other clinical or research postdoctoral fellowships is conditional upon review and acceptance of prospective students' or fellows' criminal background investigation. The University reserves the right to rescind or revoke an offer of admission or appointment to any educational or training program to any individual, or dismiss a student whose criminal background investigation reveals a history of criminal conduct that:

- the University reasonably determines increases the risk of harm to patients or individuals on University or third party premises where a student may be engaged in clinical experiences required by the educational or training program;
- was not accurately disclosed in response to a direct question regarding criminal history on any application for admission or appointment in connection with the program; and/or
- is inconsistent with the high standard of ethical conduct required of all members of the academic community or is otherwise unbefitting a member of the academic community.

Examination Policy

Students are expected to take exams when scheduled. If a student encounters any unexpected extenuating circumstance and is unable to take the exam in the specified time frame, they should contact the course faculty immediately to avoid receiving a zero. The student will be required to provide documentation (i.e., medical excuse, accident report) to support the missed exam. It will be at the faculty member's discretion to offer a make-up exam and decide when it will be offered. The make-up exam may be different from the original exam. Examinations are given in a variety of formats.

Onsite Online Exams Requiring a Proctor

Online exams taken at the SON require students to download and use LockDown Browser software during online examinations. Information will be provided by the instructor.

Offsite using Online Remote Proctoring

Exams requiring a proctor that will be taken remotely for degree or certificate courses require a designated online, remote proctoring service. In some situations, students will be recorded, visually and through audio, during the exam. Students should refer to their course site for further details on the designated remote proctoring service.)

Students must take the online remotely proctored exam using the designated service and its software during the scheduled exam time noted in the online course site.

When taking an online remotely proctored exam, students must abide by the following instructions:

- Use the designated remote proctoring service, and download and test any related required software as noted in the course site **prior** to the scheduled exam time.
- Be sure to have a government-issued or school photo ID, because the remote proctoring service will ask them to present a photo ID to confirm their identity.
- Use a laptop that meets the SON's laptop requirement. Among other system requirements, *a working microphone and webcam are required*.
- Complete the room scan as requested by the remote proctoring service to check for any exam environment violations (e.g., prohibited items such as other persons, books, papers, etc. in the exam environment). Any allowed/prohibited items will be relayed by the course coordinator in the remote proctoring instructions.
- Not access any references, papers, books, notes, calculators, computer applications, or mobile devices unless otherwise noted.
- Place scratch paper and/or a pencil/pen (as permissible) next to their computer before starting the exam if they would like to use them.
- Not allow other persons to be within the exam environment.
- Not use headphones.

Grading Policy

The grading scale below is used to determine conversion of percent score to letter grade:

Range	Letter Grade	Grade Point
97 – 100	A+	4.00
93 – 96	A	4.00
90 – 92	A-	3.70
87 – 89	B+	3.30
83 – 86	B	3.00
80 – 82	B-	2.70
77 – 79	C+	2.30
73 – 76	C	2.00
70 – 72	C-	1.70
67 – 69	D+	1.30
63 – 66	D	1.00
60 – 62	D-	0.70
< 60	F	0.00

JHSON final grades in each course are rounded from the tenth place to the whole number. Semester and final official JHU GPA is rounded from the 1000th place.

Students are not permitted to repeat a course for which they have received a passing grade. For more information regarding repeating courses, please see the Academic Standards for Progressions policy. (p. 1068)

Health Insurance for Students

All students in degree and certificate programs are required to have health insurance coverage. The University will provide information about its student health insurance plan. Students will be automatically enrolled in the Student Health plan but can waive insurance with proof of comparable insurance.

All full-time, on campus, degree-seeking students will have access to University Student Health Services. University Student Health provides students with adult primary care and adult outpatient mental health services.

If you have a health insurance inquiry please visit SEAM's Online Form (https://support.sis.jhu.edu/case/). Information about rates, billing, termination of coverage, etc. is available at https://nursing.jhu.edu/information/current-student/student-affairs/health-safety/index.html

Dental and Vision insurance are not included in the student health plan but can be purchased for an additional fee. The University is offering a dental plan with Delta Dental and a vision plan with EyeMed. Coverage will start on August 15th for returning and newly enrolled students. Coverage will start on January 15th for the newly enrolled spring students. Returning students can enroll in August during open enrollment. *If a student misses open enrollment, they will not be able to enroll during the year.*

Incomplete Coursework

The designation of "I" (Incomplete) will be assigned by a course instructor when course requirements have not been completed on time and the course instructor assesses this as due to unavoidable circumstances.

A student must have successfully completed at least 50% of the coursework in the sequence in which it is offered in the course to be considered for an Incomplete.

For the MSN (Entry into Nursing) Program, the coursework in each semester builds on the knowledge acquired during the prior semester. Therefore, an incomplete or withdrawal from a required course must be completed before the student can progress to the next semester coursework. MSN Entry into Nursing students may not progress to new semester coursework if all previous semester coursework is not successfully completed.

- Students should inform the course instructor as soon as they know that they will not be able to complete the course requirements on time if they intend to request approval for an Incomplete.
- To request approval for an Incomplete, the student must consult with the course coordinator beforehand; discuss the reasons for requesting the incomplete; their proposed plan and date for completing the course requirements. The student must initiate the "Notification of Incomplete Coursework" form, which has been signed by the student, the course instructor, and the student's faculty or academic advisor.
- If the Incomplete is warranted, the course work must be completed by the end of the following semester or summer term for all academic program courses. An Incomplete in a prerequisite course must be resolved before the next course begins.
- The course instructor will submit the Notification of Incomplete Coursework form to the Office of Student Records to be included in the student's record.
- If an "I" is not resolved within the contracted time period, the course grade will be calculated on the completed work. Once a grade is determined, the course instructor will send the assigned grade to the Office of Student Records.
- For prerequisite students, permission is required to register for the next semester when two or more Incompletes are on the student's record.

Independent Study Policy

Students interested in competing an independent study for academic credit should begin the process by discussing the plan with their advisor and contacting an appropriate full-time faculty member of the Johns Hopkins University to supervise and evaluate the work. With Faculty guidance, the student develops the description, objectives, learning activities, and the method for evaluating work.

Registration:
Students must register for independent study to receive credit in that semester. A registration form must be completed and submitted with registration materials. The application for independent study can be found at https://nursing.jhu.edu/academics/documents/student-forms/Independent-Study-form.pdf. The signature of the faculty supervising the independent study and the student's advisor are required on the Independent Study form. In the event that the supervising faculty is also the advisor, signature of the Program Director is also required.

Supervision:
The supervisor must be a full-time member of the faculty of Johns Hopkins University. The faculty supervisor evaluates the work of the student and determines grades and credits.

Independent Study Project:
The subject for an independent study project should fall within the faculty supervisor's academic discipline or area of specialization. Independent study is viewed as individual activity rather than group activity, although it should not preclude students working together on a common project with separate objectives and specified learning activities.

Grading:
The method of grading an independent study project or research should be established jointly by the faculty supervisor and student. The decision should be made before the work begins.

Credit(s):
A maximum of 12 independent study credits can be counted toward the degree with no more than six credits earned in one academic year, and no more than three credits in one semester. In the PhD Program Independent Study credits may not count toward the required electives.

In determining credit to be awarded for an independent study, the faculty supervisor should determine the time to be spent by the student on the project as compared with the assignment of credit.

Involuntary Leave of Absence

Introduction

The University is committed to fostering a learning environment that enables students to thrive and participate fully in academic life. There are, however, occasions when a student's health interferes with their ability to take part in the academic community, and at such times the School provides the opportunity for the student to initiate a leave of absence. For instance, a student's mental or emotional health, medical condition, or inappropriate behavior or communication may necessitate a leave of absence or placement of conditions on continuing enrollment. The guidelines and procedures described herein are not intended to address such instances. Rather, these guidelines and procedures shall apply in those extraordinary circumstances when a student has not or cannot voluntarily address the issues of concern.

Guidelines for Use Involuntary Leave of Absence

In situations when a leave of absence is indicated, the Associate Dean of Enrollment Management and Student Affairs (EMSA) or designee will encourage the student to initiate a voluntary leave of absence. If the student declines to do so, the Associate Dean of EMSA or designee may require an involuntary leave of absence. This step will be taken when necessary to protect the safety of the student or other individuals or to preserve the integrity of the learning environment. Such a decision may be based on behavior and/or communication that:

- Harms or threatens harm to the health or safety of the student or others;
- Causes or threatens to cause significant damage to property or resources;
- Evidences chronic and/or serious drug or alcohol abuse;
- Significantly disrupts the functioning of the community; and/or
- Reflects disorganized or altered thinking incompatible with successful participation in the academic program.

Condition of Enrollment (COE)

When circumstances indicate that a leave of absence is not appropriate, the Associate Dean of EMSA or designee may nevertheless impose certain conditions as a requirement of continued enrollment. This step will be taken only after consultation with those responsible for oversight of the student's program of study.

Procedure

When the Associate Dean of Enrollment Management and Student Affairs (EMSA) or designee becomes aware, by whatever means, of the potential need for action, the following procedures will be initiated:

1. The Associate Dean of EMSA or designee will contact the student and describe the issues of concern. If this discussion alleviates all concerns, no further action is needed. Alternatively, procedures outlined below may also be initiated.
2. The Associate Dean of EMSA or designee may mandate a mental health or physical evaluation of the student. The Associate Dean of EMSA or designee may also specify conditions under which the student is allowed to remain at the University. Such conditions will be developed in consultation with others charged with oversight of the student's academic program, University Health Services, University Mental Health and the Student Assistance Program. The Associate Dean of EMSA or designee will provide written notice to the student when such conditions are mandated.
3. If a leave of absence is indicated, and if the student so agrees, procedures governing voluntary leaves of absence shall apply.
4. When a leave of absence is indicated and the student declines to accept a voluntary leave, the Associate Dean of EMSA or designee will discuss the implications of an involuntary leave of absence. If the student continues to decline, the Associate Dean of EMSA or designee will initiate an involuntary leave of absence after consultation with those charged with oversight of the student's academic program, University Health Services, University Mental Health, and the Student Assistance Program. In urgent situations, the Associate Dean of EMSA or designee may initiate an involuntary leave of absence immediately.

Under these circumstances, such consultation will be undertaken promptly thereafter. When an involuntary leave is imposed, the Associate Dean of EMSA or designee will provide the student with written notification to this effect. Students may take one leave of any kind during the course of their program.

This notification will outline the steps required for re-entry into the academic program and also note other pertinent information regarding the student's status while on leave.

Re-Entry

A student seeking re-entry to the curriculum after a voluntary or involuntary leave as described under this policy will undergo a "fitness for return" evaluation by the Student Assistance Program or University Mental Health and/or the appropriate health service (University or Occupational Health Services). Upon re-entry, the Associate Dean of EMSA or designee may impose conditions under which the student will be allowed to remain at the School. The Associate Dean of EMSA or designee will provide written notice to the student when such conditions are instituted.

Confidentiality

All records related to student leaves of absence and conditions placed on continuing enrollment will be maintained in accordance with applicable law and policy in the Associate Dean of EMSA's Office.

Leave of Absence or Withdrawal

Students must sometimes interrupt their studies for a variety of reasons (academic, personal, or medical). A student may leave the Johns Hopkins School of Nursing (JHSON) by either taking a leave of absence (leaving the school temporarily with the firm and stated intention of returning) or by withdrawing from the school (leaving the school with no intention of returning). Before a student seeks an academic or personal leave of absence, the student must consult with their academic/faculty advisor and/or other resources available to assist with such a decision (Student Affairs, Program Director, etc.) and outline and agree to a program of study upon return.

Medical leave of absence may be granted for physical or mental health reasons with the approval of the Office of the Associate Dean of Enrollment Management and Student Affairs and may require proof of readiness to return to study. The goal of the readiness process is to ensure students are healthy enough to continue in coursework. If possible, before a student seeks a medical leave of absence, the student should consult with their academic/faculty advisor and outline and agree to a program of study upon return.

Leaves of absence are granted for specific time periods, generally up to one year. Students may take one leave of any kind during the course of their program.

The JHSON is required by the Higher Education Act to recalculate the eligibility for federal Title IV student financial assistance for students who withdraw, drop out, are dismissed, or take a leave of absence, prior to completing 60% of a semester. Title IV funds include: Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Federal Work-Study, Federal Perkins Loans, Federal Direct Stafford Loans, Federal Direct Unsubsidized Stafford Loans, and Federal Direct PLUS Loans.

The application of the Return of Title IV Funds Policy may result in funds being due to the JHSON, and students are responsible for any outstanding balance due to the School of Nursing.

A student not enrolled or not on an approved LOA will be considered on administrative leave. After 90 days on administrative leave, which begins from the start of the semester with no enrollment, the student will be administratively withdrawn from the program and will be required to reapply for admission. *Note: Students not enrolled with prior program approval will not be considered on leave (e.g. enrollment not possible because course is only offered once a year).*

Process

To submit a leave of absence (LOA) or withdrawal the student is expected to go through the following steps:

1. Student downloads and completes the Leave of Absence or the Withdrawal form: https://nursing.jhu.edu/academics/documents/student-forms/LOA%20Form.pdf https://nursing.jhu.edu/academics/documents/student-forms/University%20Withdrawal.pdf
2. Student meets with academic/faculty advisor (MSN (Entry into Nursing), Executive DNP, or PhD) or track coordinator (Advanced Practice/Certificate) to discuss this decision and develop a proposed plan of study. If the LOA is a medical LOA, the Associate Dean for Enrollment Management and Student Affairs will work directly with the student to receive medical documentation and determine readiness for return process.

3. The LOA form and proposed plan of study (if applicable) will be signed by the advisor/track coordinator.
4. The adviser/track coordinator submits LOA or withdrawal form and proposed plan of study (if applicable) to the program director for final approval and signature.
5. The Program Director submits the LOA or withdrawal form to the Office of Student Records.
6. Once a leave of absence or withdrawal has been approved the Office of Student Records will finalize this process and will notify all JHSON officials (Advisor, Faculty, Program Director, Financial Aid, Student Accounts, etc.).
7. Once the program director receives notification from the Office of Student Records that the LOA has been finalized, the program director will notify the student and student's advisor/track coordinator.
8. Financial Aid staff will recalculate the eligibility for federal Title IV student financial assistance for the student (if appropriate) and complete the JHU paperwork for this process.

Note:

- Students on a LOA are not permitted to attend classes, use school services or maintain employment as students at the JHSON or other JHU school(s) while their leave is in effect.
- An approved LOA is not counted toward a student's time to degree and does not require the student to make degree progress during the period of the leave.
- A student can request a LOA for up to one year (only). Students who do not return from a LOA (after one year) will be administratively withdrawn from the JHSON by the Office of Student Records.
- Students may take only one leave of any kind while enrolled.
- If a student must take a LOA during the semester/term, the student would be unenrolled for that semester, would lose their tuition and fees for the term, and would not receive credit for their coursework. If the midway point of the course has been reached a "W" will be posted for each course. If 70% of the course has passed then a "WP" or "WF" will be posted, dependent upon the student's performance to date. If the leave occurred near the end of the semester and the student met the conditions for receiving grades of Incomplete, the student might wish to take grades of Incomplete. The student would need to follow current policy for making up Incompletes. The LOA would not affect the time frame allowed for making up "I" grades.

All international students who are in F-1 and J-1 visa status must follow a set of immigration regulations as outlined by the U.S. Government in order to maintain their international student status. Students who are in F-1 and J-1 visit status must meet with the JHU Office of International Student Services to discuss the decision to take a LOA or withdraw from the SON before submitting a completed Leave of Absence or Withdrawal Form.

Students who withdraw from JHSON in good standing may be considered for readmission. Students will be notified in writing by the Director of Admissions of their readmission status.

Letters of Recommendation

Students who need letters of recommendation should contact faculty directly. Requests for letters of recommendation should be sent a minimum of 14 business days prior to the time the letter is needed.

Letters of recommendation prepared by part-time faculty must be co-signed by a full-time faculty member familiar with the student.

For clinical recommendations, requests for letters of recommendation should be made at the end of the clinical rotation. Requests should be directed to the clinical instructor/preceptor and/or clinical course coordinators.

NCLEX

Pre-licensure students will be eligible to take the computerized National Council Licensure Examination (NCLEX) upon completion of all program requirements. The NCLEX is designed to test knowledge, skills, and abilities essential to the safe and effective practice of nursing at the entry level. Examination registration information is provided to pre-licensure students in the fifth semester practicum course. Academic Advisors can provide additional information and guidance.

Non-Degree-Seeking Students

The maximum number of credits that can be applied to a School of Nursing degree program by a non-degree seeking student is six. Students will not be allowed to take courses beyond the six credit limit unless an exception is made by the appropriate program director.

Non-degree seeking students may not enroll in any clinical courses. Courses available to non-degree seeking students are:

- Biostatistics for Evidence-based Practice
- Context of Health Care for Advanced Practice Nursing,
- Philosophical, Theoretical, and Ethical Perspectives of Advanced Nursing Practice
- The Research Process and its Application to Evidence-Based Practice

Non-degree seeking students may apply to a degree program at any time before completing six credits. There is no guarantee that applicants who have taken courses as a non-degree seeking student will be admitted to a degree program. All applicants to a degree program must meet the admission requirements outlined in the Admissions section of this catalogue. Additional courses are under review for possible inclusion in the list of approved courses available to non-degree seeking students. Please check with the Office of Student Records for details.

Notification of Missed Clinical Time

A Notification of Missed Clinical Time is given to a student who is not present for any portion of the clinical hours in a course. Clinical hours also includes laboratory and simulation. Accurate documentation of clinical hours in the program is required for every student. Missed clinical hours include the following:

- the entire clinical time is missed
- the student arrives late for clinical
- the student leaves clinical early

At the discretion of the Clinical Course Coordinator in conjunction with the Clinical Instructor, a clinical make up assignment may be given to a student who misses clinical time. Students may provide documentation of illness or other excuses for missing time, which will be noted. Even with documentation, a Notification of Missed Clinical Time will be sent to the student.

A Notification of Missed Clinical Time is a written document, prepared by a faculty member who is responsible for the course, and sent to the student, the student's Academic Advisor(s), the Director of the program, and additional course faculty who are working directly with the student or course.

Pet Guidelines

The Johns Hopkins School of Nursing is responsible for ensuring the health and safety of all employees and students. As such, and consistent with Johns Hopkins University Policy Number HSE025, The Johns Hopkins School of Nursing prohibits domestic pets or animal companions in restricted access areas* of University buildings, except for service animals or those animals for which express written consent of the facilities director has been given with support from aligned leadership.

In addition, The Johns Hopkins School of Nursing discourages faculty, staff, and students from bringing their household pets to work. Animals may cause serious allergic reactions in some community members, distract working service animals, and some community members may feel threatened or be distracted by the presence of pets.

Individuals not in compliance with this guideline will be completely and solely liable for any injuries or damage to personal property or people caused by the animal. Any repair or cleaning/maintenance costs to The Johns Hopkins School of Nursing caused by an animal will be charged in full to the owner.

The Johns Hopkins School of Nursing **shall not be liable for loss of, or injury to, any animal brought to the school**.

Information regarding violations of this guideline may be submitted via the suggestion boxes located throughout the building or to a manager.

This statement does not pertain to service or assistance animals in the school or clinical practice sites. For information regarding service and assistance animals, see the Service and Assistance Animal Policy at https://oie.jhu.edu/ada-compliance/guidelines-policies-procedures/service-animal-policy/index.html.

*Restricted areas refers to housing potential or known hazards whose entrance is restricted to authorized individuals. That includes, but is not limited to, research, teaching, and clinical laboratories, maintenance shops, mechanical/electrical spaces and construction areas, and any areas where chemicals are handled or stored.

Printing and Copying

To facilitate various program start dates, an annual quota of 1500 prints is allocated to each student on a bi-monthly basis. Students will be given a quota of 250 prints when they are first admitted to the School of Nursing. This quota will then be reset to 250 prints every two months (on January 1, March 1, May 1, July 1, September 1, and November 1). Any unused free prints will not carry over. Any prints or copies beyond 250 within the two month cycle will be billed to the student's SIS billing account at the applicable per page rate (see link below). The printing system allows students to print from their laptop computers (Mac or Windows). Printing wirelessly will require installation of Pharos client software.

Additional information about printing services is available at wiki.nursing.jhu.edu/x/FoAoAg (https://wiki.nursing.jhu.edu/x/FoAoAg/).

Professional Attire Policy

Agreements and contracts with clinical agencies dictate that student nurses follow a specific dress code. With this in mind, all students are required to wear uniforms at all clinical settings, including the School of Nursing labs, and in any international setting. The uniform requirements may be modified at specific sites so that students are in compliance with clinical site policy. Please be mindful of the fact that as a student you are representing Johns Hopkins School of Nursing (JHSON) at all of your clinical sites.

Students must have uniforms available the first week of their initial term.

- The School uniform, patch, name pin, and identification badge will be worn by an individual when functioning in the student role. A student may not wear a School uniform in an employment situation.
- Students must wear the official lab coat and professional attire when visiting a clinical setting to review patient assignments, etc.
- When a lab coat is worn, the name pin must be attached.
- Short white lab coats are not permitted.
- Sneakers, canvas shoes, and Crocs are not permitted. Shoes must be non-permeable.
- No casual attire is permitted in any work setting at any time (i.e. jeans, shorts, sweatshirts, T-shirts, sandals.)
- All scrub tops and lab coats must have the JHSON patch sewn on the left upper sleeve.
- Many community health sites require that students wear dark shoes.
- The long white lab coat may be worn over professional attire in some situations, to be determined by faculty.
- Students with special uniform needs pertaining to cultural or religious requirements should see the Program Director before purchasing uniforms. Accommodations may be made for the student's cultural or religious obligations.
- If scrubs are not required, the long white coat may be worn over professional attire in most situations. The JHSON uniform, name pin, and identification badge must be worn by an individual when functioning in the student role.
- Only one small post earring in each ear is allowed in clinical areas. Dangling or hoop earrings and bracelets are prohibited. Jewelry must be removed from any other visibly pierced location, including the tongue. Either a watch with a second hand or a digital watch that can track seconds is required.
- All tattoos must be covered.
- Hair must be worn above the collar or tied back securely with a small clip or band. Large hair bows or scarves are not permitted. Extreme hair colors are not permitted. For cultural or religious purposes, a solid navy blue, black, or white head-covering may be worn with the uniform scrubs. Men may have beards and mustaches if trimmed neatly. Facial stubble is not permitted.
- Fingernails should be clean, trimmed to no longer than 1/4 inch beyond fingertips, and with either pale or no polish. Fingernails are to be free of ornaments. Fingernail polish is to be free of chips. Artificial fingernails or other nail enhancements are not permitted because of documented outbreaks of infection due to gram negative bacteria associated with artificial nails.
- Makeup, if worn, must be applied in moderation to enhance the natural features and create a professional image. Glitter, sequins, and false eye lashes (including lash extensions) are prohibited.

- For patient and staff health and comfort, the use of all scented products, such as perfume, cologne, after-shave, hairspray, or lotions, are prohibited as they may have adverse effects on patients, visitors, and other employees.

Name Pin, ID Badge, and Uniform Emblem

Name pins are ordered through the Matthews Johns Hopkins Medical Book Center and must be worn on the upper right portion of the uniform. A fee will be assessed for replacement of a name pin. The JHSON picture ID badge is obtained during the orientation process. The picture ID badge should be worn at all times in class or clinic; the name pin should be worn when in a clinical setting.

For MSN Entry into Nursing, the standard uniform consists of the following as determined by a specific course:

- Navy blue uniform pants
- Navy blue uniform skirt
- Navy blue scrub top
- White scrub top
- Black, navy, or white shoes (non-permeable)
- Long white lab coat that includes School of Nursing emblem on the left sleeve and school name embroidered on left breast worn over professional attire.

Students will be notified about the required clinical attire for their specific clinical site by their clinical instructor before the clinical course begins.

All students:

If scrubs are not required, the white lab coat may be worn over professional attire in most situations. The JHSON uniform, name pin, and identification badge must be worn by an individual when functioning in the clinical role.

***Uniforms and pins are available from*:**

You have three options for purchasing uniforms.

- Matthews Book Center – Pricing/Ordering (https://www.webmedbooks.com/hopkinsnursing/default2.aspx)
- Women's Board – Pricing/Ordering (http://www.hanoveruniform.com/sites/hopkins/)
- Scrubin Uniforms - jhu.scrubin.com (https://jhu.scrubin.com/), Access Code: jhu410

Improper Uniform

Faculty members will tell an improperly dressed student to leave the clinical setting and return in proper uniform. The lost clinical time cannot be rescheduled, and a clinical warning may be issued.

Professional Ethics Policy

The School of Nursing Professional Ethics Policy (the "Policy") is based on the shared core values stated in the School's Values Statement. Each member of the School of Nursing community, whether student, faculty or staff, holds themself and others to the highest standards based on the values of excellence, respect, diversity, integrity, and accountability.

Each student is obligated to adhere to the highest standards of professional ethics and conduct in their academic endeavors. In addition, the School of Nursing upholds the professional code of ethics established in the Code of Ethics for Nurses (ANA 2015). Each student is held accountable for adhering to the American Nurses Association Code of Ethics.

The School of Nursing Professional Ethics Policy is grounded in the following principles:

- Act with honesty and integrity in the performance of all academic assignments, examinations and in all interactions with others
- Respect self, faculty, staff, fellow students and members of the health team
- Respect and protect the confidentiality of information
- Advocate for patients' best interest
- Respect the diversity of persons encountered in all interactions
- Respect property
- Respect policies, regulations and laws
- Abstain from the use of substances in the academic and clinical setting that impair judgment or performance

Scope

This Policy applies to all matriculated and continuing School of Nursing students in full-time and part-time programs and non-degree courses.

Cross-Divisional Enrollments

School of Nursing students may enroll in courses in one or more other University divisions or schools. School of Nursing students are subject to this policy not only when enrolled in School of Nursing courses, but also when enrolled in courses in other University divisions or schools. Academic misconduct in the context of those "outside" courses will be subject to and resolved under this policy.

Research Misconduct

Research misconduct is defined as fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. For a complete definition, refer to The Johns Hopkins University Research Integrity Policy *(*https://research.jhu.edu/jhura/compliance/research-integrity/*) ("Policy"). The Policy applies to all University faculty, trainees, students, and staff engaged in the proposing, performing, reviewing, or reporting of research, regardless of funding source. Allegations of research misconduct regarding a student should be referred to the Research Integrity Officer for assessment under that Policy, but may also be directed to the department chair or Dean of the responsible unit where the alleged research misconduct occurred*.

Academic Misconduct

All issues of academic student misconduct are subject to the School of Nursing Academic Integrity Policy. For more on this policy, please refer to Academic and Professional Ethics (https://nursing.jhu.edu/information/current-student/student-affairs/academic-professional-ethics.html) webpage.

Non-Academic Misconduct

All issues of non-academic student misconduct will be subject to the University-wide Student Conduct Code. For more on this policy, please refer to http://studentaffairs.jhu.edu/policies/student-code/.

Professional Code of Ethics

Each student enrolled in the Johns Hopkins University School of Nursing is expected to uphold the professional code of ethics established for and by the nursing profession and as defined by the School. Ethics are foundational to the nursing profession. The nursing profession expresses its moral obligations and professional values through the Code of Ethics for Nurses (ANA 2015). Each student should read the American Nurses Association Code of Ethics and is accountable for its contents.

In its Code of Ethics for Nurses, the American Nurses Association states that: "ethics is an essential part of the foundation of nursing. Nursing has a distinguished history of concern for the welfare of the sick, injured, vulnerable and for social justice. This concern is embodied in the provision of care to individuals and the community. Nursing encompasses the prevention of illness, the alleviation of suffering, and the protection, promotion, and restoration of health in the care of individuals, families, groups, and communities."– American Nurses Association Code of Ethics for Nurses with Interpretive Statements (2015)

Nursing students are expected not only to adhere to the morals and norms of the profession, but also to embrace them as part of what it means to be a nurse. The nurse recognizes that their first obligation is to the patient's welfare and that all other needs and duties are secondary; the nursing student adheres to this same value. A code of ethics makes the professional goals, values, and obligations of a nursing student more explicit, assisting the student in the development of their professional ethics.

A nursing student at Johns Hopkins University School of Nursing will strive to act in a professional, ethical manner in accordance with the Code of Ethics for nurses and the JHSON values. Each student will:

- Be responsible for their own learning and clinical practice and honor other students' right to learn and be successful in academic and clinical environments (i.e., develop own knowledge base through study and inquiry; recognize others' right to do well on their written work; have access to reserved material; and have access to their own preparation materials and supplies used in clinical areas).
- Demonstrate respect in verbal and non-verbal behaviors to all others in all clinical and academic settings (e.g., interact with others without using threats of, or commission of, physical harm, verbal abuse, unwanted sexual advances or contact, or other unwarranted physical contact. Arrive to class and clinical sites on time; silence beepers and cell phones in class, etc.).
- Demonstrate ability to meet all standards outlined in the Johns Hopkins School of Nursing Technical Standards for Admissions and Graduation (p. 1082).
- Assess patient status carefully upon assuming responsibility for their care.
- Provide safe, competent care, seeking assistance when personal knowledge and/or skill are not adequate. Avoid use of any substances that would impair clinical ability or judgment (e.g., prepare for clinical assignment to develop required knowledge and skill; review patient's medical record; seek assistance according to course and curricular objectives).
- Provide the same standard of care to all patients and families regardless of race, ethnicity, age, sexual preference, disability, religion, economic status, employment status, or the nature of their health problem(s). Accept that others have the right to their own cultural beliefs and values and respect their choices (e.g., demonstrate compassion and respect for every individual; provide the best quality of care possible to all patients; be non-judgmental of cultural differences).
- Provide patient care without expectation of, or acceptance of, any remuneration over and above salary (if applicable) (e.g., do not accept gratuities or personal gifts of monetary value).
- Document in a thorough, accurate, truthful, and timely manner data that reflects findings from one's own personal assessment, care, interventions, teaching, or the patient's and/or family's response to those activities (e.g., documentation errors are corrected in an acceptable manner, documentation is unaltered, vital signs are recorded at the time they are measured, and late entries are duly noted).
- Act in a manner that contributes to the development and maintenance of an ethical educational and practice environment. Recognize that the primary commitment in clinical practice is to the patient and that respectful interactions are expected (e.g., act as a role model for other students and colleagues; speak up if another student is speaking disrespectfully to classmates or faculty; work through appropriate organizational channels to share concerns about situations that jeopardize patient care or affect the educational environment; advocate patient safety).
- Complete legally required HIPAA training and University or clinical site requirements regarding confidentiality. Use patient data in all school work, papers, presentations, research findings and in the clinical setting in a manner that is accurate, truthful, and confidential. Patient data must have a justifiable reason for its presence. Acknowledge real data gaps that may exist in written work. Identify patient in paper by initials, not full name.
- Refrain from unauthorized use or possession of school or clinical setting's equipment, patient's belongings, or items dispersed or intended for patient use (e.g., do not download University software onto a personal PC or mobile device; do not use a hospital computer terminal for personal use; do not take a patient's prescribed medication for personal use).

Reporting Professional Ethics Violations

Any member of the faculty, administration, staff or any student who has reason to suspect or believe a violation of this Policy has occurred is expected to notify the Ethics Board Chair or Associate Dean for Enrollment Management and Student Affairs.

Faculty/Administrator-Student Resolution of First-Time Offenses

- If a student is suspected of professional misconduct, the faculty member responsible for the course in which the misconduct allegedly occurred must, if feasible, review the facts of the case promptly with the student. If the suspected professional misconduct occurs outside of a course, the Ethics Board Administrator will review the facts with the student,
- If, after speaking with the student and any witnesses, the faculty member or administrator believes that professional misconduct has occurred, the faculty member must first contact the Associate Dean for Enrollment Management and Student Affairs to determine whether the offense is a first offense, or a second or subsequent offense.
  - For a first offense, after faculty consultation with the Associate Dean for Enrollment Management and Student Affairs and/or the Chair of the SON Ethics Board, the faculty member or administrator may choose to resolve the case directly with the

student, i.e., the faculty member/administrator and student may reach an agreement on the resolution of the alleged misconduct. Note, neither the faculty member/administrator nor the student are obligated to resolve a complaint under this section. A faculty member or administrator may not resolve a second or subsequent offense directly with a student.

- If such an agreement is reached, the faculty member/administrator must promptly provide the student with a letter outlining the resolution that includes the charges, a summary of the evidence, the findings, and the sanctions agreed upon, and must also simultaneously provide a copy of that letter to the Associate Dean for Enrollment Management and Student Affairs.
- If, however, the faculty member/administrator cannot reach an agreement with the student (e.g., the student denies charge or does not agree with the proposed sanction, etc.), or the offense is a second or subsequent offense, or if in the case of a first offense, the sanction imposed would be greater than failure in the course, the faculty member must promptly notify the Associate Dean for Enrollment Management and Student Affairs in writing of the alleged violations, evidence, including potential witnesses, and other pertinent details of the case. In such instances, the case will proceed to an Ethics Board hearing as outlined below.

Ethics Board Hearing

- In the case of a first offense that is not resolved between the faculty member/administrator and the student or a second or subsequent offense, the Associate Dean for Enrollment Management and Student Affairs will convene a meeting of the Ethics Board in consultation with the chair of the Ethics Board.
- In advance of the Ethics Board hearing, the student will receive written notification of the hearing date, time, and location.

Ethics Board Selection and Ethics Panel Hearings

The Ethics Board consists of a chair, appointed annually by the Dean or her or his designee; two full-time faculty who teach primarily in one of the following programs—MSN Entry into Nursing Practice, DNP, or PhD, elected by the Faculty Assembly; Program Directors from each academic program; and students representing each academic degree.

For each matter, an Ethics Hearing Panel will be formed. The Ethics Hearing Panel consists of the faculty chairperson of the Ethics Board, the faculty members on the Ethics Board elected by the Faculty Assembly, the program director for the student's program and two student members. The Associate Dean for Enrollment Management and Student Affairs or designee attends all hearings as a non-voting member of the Ethics Board. Each student appearing before an Ethics Hearing Panel will have a hearing assistant unless explicitly asking that no hearing assistant be named. The hearing assistant for a student may be their academic advisor or other faculty member chosen by the student or recommended by the Ethics Board. If desired, the faculty member, staff member or student bring the case may also have a hearing assistant of their choice or recommended by the Ethics Board. The assistant may meet with the respective parties to assist in preparation of evidence, testimony, and questions for the hearing. The designated assistants may attend and provide consultation in the hearing while the student or faculty member is present.

Students may request witnesses be present at the hearing. The student must furnish the Ethics Hearing Chair with the names of the witnesses in sufficient time to request the presence of the witnesses. It is within the Hearing Panel's discretion to limit the number of witnesses appearing at the hearing to a reasonable number.

Faculty, staff or students bringing forth the case are expected to compile evidence and to present their account of the violation during an Ethics hearing. All supporting materials for the hearing must be placed on file in the Office of the Associate Dean for Enrollment Management and Student Affairs. Supporting materials may be submitted directly to the Associate Dean for Enrollment Management and Student Affairs or indirectly through the assistant or the chairperson.

The Ethics Board will endeavor to convene within 10 working days of receiving the request for a hearing. Legal representation is not permitted at Ethics Board hearings.

In general, hearings will proceed as follows, although the Ethics Hearing Panel has discretion to alter the order or manner in which it hears or receives evidence, and to impose time limits on any stage of the process:

- Introductions
- Opening statement from the reporter, if applicable
- Questioning of the reporter by the panel, if applicable
- Closing statement from the reporter, if applicable
- Opening statement from the student
- Questioning of the student by the panel
- Questioning of the witnesses, if any, by the panel
- Closing statement from student

The reporter, student or witness is only present in the room with the Ethics Hearing Panel during the time that they are being questioned or responding. At the conclusion of the hearing, all parties are dismissed and the deliberations of the Ethics Hearing Panel will be held in private.

The student is presumed innocent until the Ethics Hearing Panel has made a determination by a preponderance of the evidence that a violation has occurred. A "preponderance of the evidence" standard is an evidentiary standard that means "more likely than not." This standard is met if the proposition is more likely to be true than not true. The goal of the Ethics Panel is to reach consensus on the allegation and outcome. If this is not possible, a decision will be made by majority vote.

The Chair of the Ethics Board and the Associate Dean for Enrollment Management and Student Affairs shall, as soon after the hearing as practicable and reasonable, prepare minutes of the hearing including:

1. Date, place and time of the hearing,
2. The names of all persons present at the hearing,
3. A short statement of the charge against the student,
4. A summary of the findings of fact and conclusions made by the Ethics Board,
5. A statement of the decision of the Ethics Board,
6. The sanction(s) recommended by the Ethics Board, if applicable

The alleged violator and the initiating party will be informed in writing by the Office of Enrollment Management and Student Affairs of the decision on whether a Policy was violated following the decision of the Ethics Hearing Panel.

Any student found not in violation of all charges of the Academic Integrity Policy will be permitted to make-up missed assignments or clinical time during the time of the hearing and appeal process.

After the hearing, the Associate Dean for Enrollment Management and Student Affairs assists the chair in implementing the Ethics Board's decision. This will include notifying the student and appropriate faculty or School personnel (e.g., Registrar, faculty advisor, course faculty, Executive Vice Dean, appropriate program director).

Sanctions

If a student is determined to be in violation of this Policy, the following factors may be considered in the sanctioning process:

- The specific academic misconduct at issue;
- The student's academic misconduct history; and
- Other appropriate factors.

This section lists some of the sanctions that may be imposed upon students for violations of this policy. The School of Nursing reserves the right, in its discretion, to impose more stringent or different sanctions than those listed below depending on the facts and circumstances of a particular case. Sanctions for academic misconduct under policy are generally cumulative in nature.

The following is a non-exhaustive list of possible sanctions and what these sanctions typically mean. The specific conditions imposed under each sanction (i.e. the terms of a suspension, etc.) will depend on the specific facts and circumstances of each case.

Formal Warning

The student is notified in writing that their actions constitute a violation of this policy, and may be subject to other actions (e.g., re-taking an exam or failure in a course).

Academic

These sanctions may include but are not limited to grade adjustments, including failure, on any work or course, or re-submission of an assignment. This may include or may not include permanent student record notation. If the sanctions include a notation on the student's transcript, "Grade due to Professional Misconduct" will be noted on the student's official School of Nursing transcript.

Corrective or Educational Measures

The student may be required to engage in other corrective or educational activities.

Probation

The student is notified that further violations of this policy within the stated period of time will result in the student being considered for immediate suspension or other appropriate disciplinary action. If at the end of the specified time period no further violations have occurred, the student is removed from probationary status.

Suspension

The student is notified that the student is separated from the University for a specified period of time. The student must leave campus and vacate campus residence halls, if applicable, within the time prescribed and is prohibited from University property and events. The conferring of an academic degree may be deferred for the duration of the suspension. A student must receive written permission from the University prior to re-enrollment or re-application. Academic work completed at another institution while on suspension will not be recognized for credit transfer.

Expulsion

Expulsion means the permanent removal of the student from the University. Expulsion includes a forfeiture of all rights and degrees not actually conferred at the time of the expulsion, permanent notation of the expulsion on the student's University records and academic transcript, withdrawal from all courses according to divisional policies, and the forfeiture of tuition and fees. Any student expelled from the University is prohibited from future reapplication to the University.

Appeals Process

Except in the case of a resolution for first time offenses with a faculty member, the student may appeal a panel's finding of responsibility and/or sanction(s). A student must file any appeal within five (5) days of the date of the notice of outcome on one or more of the following grounds:

- Procedural error that could have materially affected the determination of responsibility or sanction(s);
- New information that was not available at the time of the hearing and that could reasonably have affected the determination of responsibility or sanction(s); and
- Excessiveness of the sanction(s).
- Any appeal must be filed in writing with the Dean of the School of Nursing or designee. An appeal will involve a review of the file; the appeal does not involve another hearing. On review of the appeal, the Dean of the School of Nursing or designee may:
- Enter a revised determination of responsibility and/or revise sanction(s); or
- Remand the matter to the panel to reconsider the determination of responsibility and/or sanction(s), or
- Convene a new panel to consider the case; or
- Uphold the panel's decision

The Dean of the School of Nursing or designee will simultaneously send the appeal determination, with the reasons therefor, to the chair, as appropriate, and to the student. The decision of Dean of the School of Nursing or designee is final. No further appeals are permitted.

Records

A case file concerning a student will be retained by the Associate Dean for Enrollment Management and Student Affairs for the duration of the student's enrollment at JHU and seven (7) years from date that the student graduates or otherwise leaves the University.

The Associate Dean for Enrollment Management and Student Affairs will provide an overview of the process and procedures of the Ethics Board.

Procedural Rights

In connection with the resolution of alleged policy violations, a student shall:

- Be notified in writing of the allegations in advance of any meeting or hearing;
- Be notified in writing of the charges, and the date, time and location of the hearing, and identity of the hearing administrator or panel members in advance of the hearing;
- have the opportunity to review in advance of any meeting or hearing any information to Be considered by any faculty member, administrator or panel in accordance with the University policy on

Family Educational Rights and Privacy Act of 1974, as amended ("FERPA") and applicable laws and regulations;
- Be notified in writing of the outcome of any hearing, namely the findings, determination of responsibility, and any sanctions; and
- Be notified in writing of the outcome of any appeal.

A student may raise the potential conflict of any University personnel participating in the resolution process. All such conflicts must be sent in writing to the Associate Dean for Enrollment Management and Student Affairs at least two days prior to the hearing date. A student may also decline to participate in the resolution process. The University may however continue the process without the student's participation.

Communications under this policy will primarily be conducted with students through their official University email address, and students are expected check their official University email on a regular basis.

Registration Policies and Procedures

The Office of Student Enrollment and Account Management (SEAM) is available to provide assistance to all students pertaining to online registration via SIS. If you need assistance with records & registration, visit the SEAM's Online Form (https://support.sis.jhu.edu/case/)to request support.

Registration

All students must complete registration by the beginning of each term in accordance with instructions issued by the academic program before they can attend classes. Detailed instructions about registration will be provided to all students via email before the registration period each term. If the student has not received this information at least one week prior to the registration period, the Office of Student Enrollment and Account Management (SEAM) should be contacted immediately. Students may not sit in on a class without being officially registered for that class.

Registration Holds

All students must have the approval of their assigned academic advisor before enrolling for any term. Students will not be allowed to register if there are unpaid bills from a previous term. The student is required to pay tuition or make financial arrangements with the Office of Student Enrollment and Account Management (SEAM) before registering for a given term.

Registration will also be blocked if a student is not in compliance with health insurance and student health requirements.

Add/Drop

A student wishing to add or drop a course must do so by the end of the second week of classes. The Add/Drop form is available at nursing.jhu.edu/academics/documents/student-forms/add-drop-form.pdf (http://nursing.jhu.edu/academics/documents/student-forms/add-drop-form.pdf). Please refer to the Course Drop or Withdrawal Policy (p. 1071).

Auditing a Course

To audit a course, the instructor's permission and adviser's approval are required. Students must register for the course as an audit with the Office of Student Enrollment and Account Management (SEAM). The course will be shown on the academic record as an AU and will not be used in determining the grade point average.

Cancelled Courses

If minimum course enrollment is not met, students will be sent a cancellation notice and have the option to enroll in another course with the academic advisor's approval.

Course Withdrawal Notation

- No notation is made on the academic record if a class is dropped before 50% of the class is completed. The signature of the advisor is required.
- After 50% and through 70% of the scheduled classes have met, the signatures of the advisor and the Director of the Program are required to drop a class. A "W" is recorded on the transcript.
- After 70% of the scheduled classes have met, the signatures of the course coordinator, the advisor, and the Director of the Program are required to withdraw from a class. The course coordinator will note on the form whether the student is receiving a passing grade for the course at the time of withdrawal. The determination will be based on the grade(s) achieved for all test(s) and other graded requirements that are due on or before that date. A "WP" (Withdrawn Passing) or "WF" (Withdrawn Failing), as appropriate, is recorded on the transcript. Please refer to the Course Drop or Withdrawal Policy (p. 1071).

Interdivisional Registration

Students may take courses at other divisions of the university. Students must complete an Interdivisional Registration Form (https://nursing.jhu.edu/academics/documents/student-forms/IDR-form.pdf) and submit it for processing to the Office of Student Enrollment and Account Management (SEAM) at the School of Nursing (home division). Prior to submitting the form, students should ensure there are no registration holds on their record, that they have completed any prerequisites for a course, and that they have secured any required permissions for a course at another division. Students must follow the registration deadlines of the host school for any courses taken at another division of the university.

Religious Observance Attendance Policy

The Johns Hopkins School of Nursing (JHSON) has established procedures for students to notify their instructors of an absence necessitated by a religious observance. This policy reflects the School's commitment to being responsive to and respectful of the diversity of the student population.

The School of Nursing recognizes that the various religious traditions observed by our diverse student body include more holidays than can easily be included on a list. In some faiths, observances vary by tradition and country and in accordance with the lunar calendar.

Students who will miss class for a religious observance are expected to notify the course instructor and Program Director within the first two weeks of the semester by submitting a Religious Observance Notification Form (https://nursing.jhu.edu/academics/documents/student-forms/Religious-Observance-Form.pdf) to their faculty or academic advisor.

Student Code of Conduct

The fundamental purpose of the Johns Hopkins University's (the "University" or "JHU") regulation of student conduct is to promote and to protect the health, safety, welfare, property, and rights of all members of the University community as well as to promote the orderly operation of the University and to safeguard its property and facilities. As members of the University community, students accept certain responsibilities which support the educational mission and create an environment in which all students are afforded the same opportunity to succeed academically.

This Johns Hopkins University Student Conduct Code (https://studentaffairs.jhu.edu/policies-guidelines/student-code/) (this "Code") applies to all students, including without limitation undergraduate and graduate students, and student groups and organizations, whether recognized by the University or not, in the following schools and divisions:

- Bloomberg School of Public Health (BSPH)
- Carey Business School (CBS)
- Krieger School of Arts and Sciences (KSAS)
- Paul H. Nitze School of Advanced International Studies (SAIS)
- Peabody Institute (Peabody)
- School of Education (SOE)
- School of Nursing (SON)
- Whiting School of Engineering (WSE)

The schools and divisions above must comply with, and ensure that their policies and procedures comply with, this Code. To the extent there is any inconsistency between divisional policies and procedures and this Code, this Code controls.

For more information on Johns Hopkins University's Student Code of conduct, please visit https://studentaffairs.jhu.edu/policies-guidelines/student-code (https://studentaffairs.jhu.edu/policies-guidelines/student-code/).

Technical Standards for Admission and Graduation

The curricula of the School of Nursing requires that students engage in diverse and complex experiences directed at achieving competencies, knowledge, skills, attributes and professional values. Applicants for all academic programs, and enrolled degree-seeking students, must possess certain abilities and skills deemed essential for meeting the professional standards of accrediting agencies.

Admission to the Johns Hopkins School of Nursing is open to all qualified individuals. In accordance with the 1973 Vocational Rehabilitation Act and the Americans with Disabilities Act. The Johns Hopkins School of Nursing is committed to accommodating the needs of students with documented disabilities, and will do so to the extent possible without compromising the essential components of the curriculum. Questions or concerns regarding these technical standards should be directed to the Associate Dean for Enrollment Management and Student Affairs (410) 955-7545.

Candidates for nursing degrees or certificates must be able to meet the standards (listed below) with or without reasonable accommodation:

Observation: Students must have sufficient capacity to make accurate observations and interpret them in the context of laboratory studies, medication administration and patient care activities. A student must be able to observe a patient accurately at a distance and close at hand. Overall, they must be able to effectively monitor, assess and respond to health needs.

Communication: Students must accurately elicit or interpret information: medical history and other information to evaluate adequately a client or patient's condition. They must accurately convey information and interpretation of information using one or more means of communication (verbal, written, assisted [such as a TTY] and/or electronic) to patients and the health-care team. They must be able to communicate effectively in teams. Students must be able to determine a deeper meaning or significance in what is being expressed. They also must be able to connect with others to sense and stimulate reactions and desired interactions. They must be able to interact effectively with the health-care team and maintain accurate clinical records on patient care.

Clinical Skills: Students are required to possess motor skills sufficient to independently elicit information from patients by palpation, auscultation, percussion, and other manually-based diagnostic procedures. Students should be able to conduct laboratory and diagnostic tests, and carry out physical assessments. Students must possess motor skills required for their specialty's scope of practice. The student must also be able to coordinate fine and gross muscular movements to treat patients in emergency situations. Emergency situations include any circumstance requiring immediate remedy.

Intellectual-Conceptual, Integrative, and Quantitative Abilities: The student must be able to develop and refine problem-solving skills that are critical to practice as a nurse. The student must have the ability to measure, calculate, reason, analyze and synthesize objective and subjective data and to make decisions that reflect consistent and sound clinical judgment. Students must possess good judgment in patient assessment, and the abilities to incorporate new information, comprehend three-dimensional relationships, and retain and recall pertinent information in a timely fashion. This includes decision-making in order to maintain safety and security of patients and to behave appropriately with patients, staff, students, supervisors and faculty.

Behavioral and Social Attributes: Students must possess the physical and emotional health required for the application of their intellectual abilities and the employment of sound judgment in an appropriate and prompt manner. Students must be able to function effectively under physically taxing workloads, and in times of physical and mental stress. Students must display compassion, sensitivity, and concern for others, and maintain professional integrity at all times. Students must be able to adapt to changing environments; display flexibility; accept and integrate constructive criticism and learn to function cooperatively and efficiently in the face of uncertainties inherent in clinical practice. This includes appropriately interacting with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.

Program Specific Requirements: In addition to the areas enumerated above, applicants and students must also possess any abilities and skills deemed essential for their particular program. These areas of enumerated skills and abilities are the minimum attributes required of applicants for admission to the specific nursing program and of students who are candidates for graduation.

Transcripts and Enrollment Verifications

Students who want transcripts of their academic records at the School of Nursing or who want them forwarded elsewhere should submit an online request. Please visit The National Student Clearinghouse Transcript Services website at www.transcriptservices.org (https://studentclearinghouse.org/transcriptservices/) for further information.

Transcripts are issued only at the written request or consent of the student. The only exception to this policy is the issuance of transcripts to other offices or departments within the University.

Official transcripts of work at other institutions that the student has presented for admission or evaluation of credit become the property of the University and cannot be copied or reissued. If a transcript of this work is needed, the student must get it directly from the issuing institution.

Enrollment verifications are provided by the Office of Student Enrollment and Account Management (SEAM) and are processed only at the written request of the student. Please submit your request through the SEAM's Online Form (https://support.sis.jhu.edu/case/).

Current students can visit https://www.studentclearinghouse.org/students/ to obtain a downloadable copy of proof of enrollment.

Transfer of Graduate Credit

A maximum of six graduate-level semester credit hours can be applied to SON programs in the Johns Hopkins School of Nursing for course(s) previously taken from outside the School of Nursing. DNP Executive Program students are required to take 40 credits at JHU. Course(s) must have been completed within five years of starting the degree program at JHSON.

The following SON courses are eligible for transfer review:

Code	Title	Credits
NR.210.606	Biostatistics for Evidence-Based Practice	3
NR.210.607	Context of Health Care for Advanced Nursing Practice	3

All transfer of credit decisions made by the program director are final.

Students wishing to transfer any course from inside or outside the university must have earned a minimum grade of B in the course. The course must have been completed and grade received prior to enrollment at JHSON. The course must have the equivalent number of credits or higher for transfer review.

The request to transfer credit must be concluded prior to the second semester registration period. If a student needs to take a course outside JHU once they have matriculated at the SON, they must obtain preauthorization prior to registering for the course.

Students who have taken graduate core courses at Johns Hopkins School of Nursing within the last five years do not need to complete the Transfer of Graduate Credit form.

It is the student's responsibility to work with the Office of Financial Aid to determine if any changes to the plan of study will change eligibility for financial aid. Students receiving VA benefits should also contact the Office of Student Records to determine if changes to the plan of study will change eligibility for these benefits.

To begin the process, please download the Transfer of Graduate Credits into JHSON (https://nursing.jhu.edu/academics/documents/student-forms/Transfer-of-Graduate-Credit-Form.pdf) form.

Tuition and Fees

Application Fee

Students submitting an application for admission must pay a $75 application fee directly to NursingCAS. If an applicant has already applied to another program using NursingCAS, each additional program application will be charged a fee of $45.

Enrollment Deposit

A non-refundable $1000 deposit is required of DNP Anesthesia students. All other students submit a non-refundable $500 deposit to enroll in the School of Nursing. The deposit will be credited to the student's tuition account.

Matriculation Fee

A onetime $500 matriculation fee will be charged to the student's account for degree seeking students.

Tuition Payment

Tuition for the upcoming semester must be paid by the billing statement due date. Non-degree-seeking students must pay at time of registration. MasterCard, Visa, Amex, and Discover Card are accepted. Alternate payment plans may only be arranged 30 days prior to the start of the semester. A $55-per-semester charge will be assessed for this service. No payment plans will be allowed for non-degree-seeking students.

Tuition Rates

For current tuition rates, please visit the School of Nursing's website here (https://nursing.jhu.edu/admissions/tuition/).

Tuition and Fee Payment Through SIS (Student Information System)

The Johns Hopkins University provides student account information using SIS (Student Information System) at sis.jhu.edu/sswf/ (https://

sis.jhu.edu/sswf/). This website allows students to view their accounts, make online payments, and update information. SIS is the official means of generating tuition bills to School of Nursing students. Paper bills are no longer mailed to enrolled students.

The self-service system will automatically send an email notification to the student's JHSON email address when a new bill is ready to be viewed online. No sign-up is required. Each registered student is automatically enrolled. It is the student's responsibility to check their student account and pay their tuition promptly.

Student Health Insurance

All students in degree and certificate programs are required to have health insurance coverage. The University will provide information about its student health insurance plan. Students will be automatically enrolled in the insurance plan but can waive insurance with proof of comparable insurance. All on-campus students must have insurance that will fully insure them in Baltimore, Maryland. No out-of-state HMO or out-of-state coverage will be approved.

Health Services Fee

All full-time on-campus matriculated students will pay an $850 annual health services fee and will have unrestricted access to all services at University Health Services.

Late Registration Fee

A student who for any reason does not complete registration until after the prescribed registration period must pay a $50 late registration fee before that registration is finalized by the registrar. Information about late registration fees is included in registration materials distributed by the Office of the Registrar.

Late Payment Fee

The University assesses a 1.5% per month late fee on the unpaid balance for any student whose account is in arrears. Students who have unpaid balances from a previous semester will not be allowed to register for subsequent semesters.

Transcript/Diplomas

JHSON does not charge for transcripts, however, the National Student Clearinghouse does charge a nominal fee for each transcript and for expedited delivery. No transcript will be released if the student has an unpaid student account balance. Diplomas will not be released to students with unpaid student account balances.

Graduation Fee

There is no graduation fee. For students who participate in the graduation ceremony, regalia is required. Students may rent or purchase regalia. Please contact son-graduation@jhu.edu for details.

Returned Check Fee

A $25 service fee will be assessed for any returned check.

If you need assistance with tuition payment, student health insurance or students accounts, please visit the SEAM's Online Form to request support or contact us by phone at 410-955-1243.

WHITING SCHOOL OF ENGINEERING

Click a link below to find out more about programs in the Whiting School of Engineering:

School website: https://engineering.jhu.edu/

Full-time, On-campus Undergraduate and Graduate Programs (Homewood)

About Engineering at Johns Hopkins

Engineering education at Johns Hopkins began with the establishment of an engineering school in 1913. Throughout its history, the Whiting School has maintained close ties with the Krieger School of Arts and Sciences, which has led pioneering education and research since the Faculty of Philosophy was assembled in 1876. The Whiting School of Engineering provides its students with an education and research environment that fosters a lifetime ability to create and apply new knowledge and to contribute to their professions.

The Whiting School offers 10 ABET-accredited programs in engineering leading to the Bachelor of Science degree: biomedical engineering, chemical and biomolecular engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering mechanics, environmental engineering, materials science and engineering, and mechanical engineering. The school also offers B.S. and B.A. degrees in applied mathematics & statistics as well as B.A. degrees in biomedical engineering, computer science, and general engineering. Beginning in the 2022-2023 academic year, the school is also offering a Bachelor of Science degree in Systems Engineering which will seek ABET accreditation when it is eligible to do so.

Our commitment to advanced study and research yields outstanding programs that lead to masters and doctoral degrees. In the descriptions that follow, each department lists its faculty and their research, research facilities, graduate programs, and the elementary and advanced courses they offer. More details can be obtained from the departmental websites, through the Whiting School homepage at http://engineering.jhu.edu (http://engineering.jhu.edu/).

Accreditation

The following Bachelor of Science programs in the Whiting School of Engineering are accredited by the Engineering Accreditation Commission of ABET: Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of ABET.

Undergraduate Policies

The policies, procedures, resources, and opportunities included in this section are relevant for undergraduates enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering on the Homewood campus. Please use the links at the right to navigate to your topic of interest.

Academic Policies

The Krieger School of Arts and Sciences and the Whiting School of Engineering offer myriad opportunities for intellectual exploration, academic challenge, and personal growth. To satisfy academic goals and assure progress toward graduation, students should take action and responsibility for the following:

- Seek advice from multiple faculty, and other university professionals,
- Meet with your advisor at least once a semester,
- Learn the information contained within this online catalogue. Failure to do so does not excuse you from responsibility for the rules and procedures,
- Track your completion of degree requirements,
- Consult your advising office and major department about any questions concerning academic policy.

All students are expected to observe the academic policies and practices of the university; personal difficulties, illness, and/or advice contradicting the rules and procedures does not constitute automatic grounds for exemption from these rules or procedures. Written requests for exceptions must be submitted to the student's academic advising office. After review, a student will be notified whether the exception is approved.

Students who have concerns of an academic nature related to teaching or other aspects of course delivery may contact the Vice Dean for Undergraduate or the Vice Dean for Graduate Education of their School.

The University reserves the right to change rules, procedures and other information within this website as appropriate. This website is not to be regarded as a contract. If you have questions, contact your school's advising office.

Requirements for a Bachelor's Degree

There are multiple categories of degree requirements that comprise an undergraduate degree at Hopkins. All approved credit earned through exams or at other colleges and universities may be used to meet: Distribution requirements, Writing-Intensive requirement, Departmental major and minor requirements, and to satisfy course prerequisites.

1. **Total Degree Credit Requirement**
   The total degree credit requirement is considered a distinct degree requirement, and ranges from 120-130 credits depending on the degree. It is not merely a cumulative tally of courses used to satisfy requirement areas 3-5.
2. **Residency Requirement**
   Students are required to complete a minimum number of credits in residency at JHU, therefore a limit is imposed on how many exam and transfer credits can be counted towards the total degree credit requirement.
3. **Distribution Requirement**
   Students must earn a minimum number of credits in academic areas outside of their primary major. The academic areas in the Hopkins curriculum are humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).
4. **Writing-Intensive Requirement**

To encourage excellence in writing across disciplines, the University requires all bachelor's students to complete writing-intensive courses. These courses are identified by a "W" in the JHU course schedule, and an asterisk (*) on the unofficial transcript.

5. **Departmental Major Requirement, and Minor Requirement**
Every student who earns a bachelor's degree must satisfy the requirements for each of their declared major(s), and minor(s). These requirements may include courses in other disciplines that provide skills and information of importance to professionals in the major field.
6. **First-Year Foundations Requirement (Arts and Sciences students only)**

An undergraduate student's school affiliation, and therefore the First-Year Foundations requirement, is based on the student's primary major. Arts and Sciences first-year students must complete a two-course requirement of a First-Year Seminar and a Reintroduction to Writing course. Arts and Sciences transfer students must complete an approved seminar and the Reintroduction to Writing course (or an equivalent transferred course). A full description of this requirement is available only in the Arts and Sciences catalogue because this requirement is not applicable to Engineering undergraduates even those who have an additional major in Arts and Sciences.

"D" Grade Restriction

University policy allows no more than 18 credits from courses with grades of D or D+ to be counted toward the total degree credit requirement for graduation. Departments may set a lower limit on the number of permissible D or D+ grades for a specific major. Many departments do not accept any D or D+ credits for major requirements.

Ten-Year Degree Completion Limit

A student must fulfill all degree requirements for graduation within 10 academic years from the date of matriculation at the University.

Degree Credit Totals

The Bachelor of Arts degree requires 120 credits.

The Bachelor of Science degree, whether in Arts and Sciences or Engineering, requires from 120 to 130 credits, depending on the major.

No program may require more than 130 credits.

For a degree requiring 120 total credits, a maximum of 20 approved credits from other sources may be counted towards the total degree credit requirement, even if more than 20 credits from external sources have been used to satisfy degree requirement areas of: Distribution, Writing-Intensive, and Departmental Major and/or Minor.

All approved exam credits earned will be posted to the transcript. Up to 12 approved transfer credits will be posted to the transcript. See External Credits (p. 1604) section for details.

Example:

A student has a total of 32 external credits posted to the transcript:

- 8 transfer credits from another university
- 24 credits from AP exams

All 32 of these credits may be applied to requirement areas of: Distribution, Writing-Intensive, and Departmental Major and/or Minor.

If the student's total degree credit requirement is 120, only 20 of those 32 credits will count toward the 120 total degree credit requirement (120-100=20).

If the student changes to a degree program whose total degree credit requirement is 126, only 26 of those 32 credits will count toward the total degree credit requirement (126-100=26).

Residency Requirement for Freshmen

Students who enter the university from high school must complete at least 100 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university
- through the Baltimore Student Exchange Program (BSEP) during the fall and spring semesters only
- through an approved study abroad program (up to 30 credits)

In addition, credits earned through JHU courses prior to matriculation as a degree-seeking student are applied to the 100-credit residency requirement.

Students who entered JHU prior to Fall 2014 should view the appropriate archived catalogue.

All students must complete a minimum of four semesters in residence as a full-time student. Students must be in residence for at least two of the final four semesters, including the final semester prior to graduation.

Residency Requirement for Transfer Students

Students who enter the university as transfer students must complete at least 60 credits at JHU. This includes courses that are taken after matriculation as a degree-seeking student:

- in fall, intersession, spring, or summer at JHU
- in other divisions of the university
- through the Baltimore Student Exchange Program (BSEP) during the fall and spring semesters only
- through summer and intersession study abroad programs sponsored by Hopkins departments

In addition, all transfer students must complete at least four full-time semesters in residence at JHU. Study abroad programs offered during fall and spring semesters do not count towards this four-semester requirement. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

Residency Requirement for Peabody Double Degree Students

Students earning a double-degree at Peabody must complete at least 48 credits in either the Krieger School of Arts & Sciences or the Whiting School of Engineering.

Writing Designation Requirements

To encourage excellence in writing, across disciplines, the university requires all undergraduates to take a number of writing-intensive courses. A writing-intensive (W) course is one in which students complete at least 20 pages of finished writing, distributed over multiple assignments, usually 3 or 4 papers, throughout the semester. Instructors respond to students' work in written comments or in conference, or both; and students have at least one opportunity to receive their instructor's feedback on a draft and then revise. A writing-intensive course guides students' practice in writing and makes writing an integral part of the course. The writing-intensive requirement is administered by the University Writing Program.

Writing-intensive courses are indicated by a "W" in the JHU course schedule and an asterisk (*) on a student's unofficial transcript. Courses taken to satisfy the writing requirement must be taken for a letter grade and passed with a grade of C- or better. Writing-intensive courses taken to satisfy major, minor, or distribution requirements may also count toward the writing requirement. All course registrations at the 500 level, which is by definition independent academic work, except for courses that are Honors Thesis and the Senior Essay in English, are not allowed to be writing-intensive.

KSAS Students:

Effective Fall 2022, all students earning a degree from the School of Arts and Sciences must complete Reintroduction to Writing in their first year at Hopkins plus an additional 12 credits in writing-intensive courses through their undergraduate experience for a minimum of 15 writing-intensive credits. Arts and Sciences transfer students will be required to complete the Reintroduction to Writing course in their first year at JHU and encouraged to take it in the first semester. Transfer students who wish to have a similar writing course from a prior institution reviewed to serve as a substitution for this course should speak to the University Writing Program. To ensure seat availability in the course, students should request this review prior to transfer student registration day in the summer.

WSE Students:

Candidates for a B.A. degree in the School of Engineering must complete 12 credits (four courses at least 3 credits each) in writing-intensive courses, while candidates for a B.S. degree in Engineering must complete 6 credits (two courses at least 3 credits each) in writing-intensive courses. Please note, this requirement is based upon a student's degree; students are not required to complete a separate writing requirement for any additional majors.

For information about transferring writing-intensive credits to JHU, please see the External Credits section of Academic Policies.

Academic Area Designation Requirements

The distribution requirement stipulates that students must earn a minimum number of credits in academic areas outside of their primary major. Area designators represent an association between the course and an academic area. Courses with area designators are expected to do more than employ basic techniques, they are to advance knowledge and increase a student's understanding of the theory. Courses that are teaching a basic skill, and therefore do not expose the student to modes of analysis and scholarship that represent the essence of a given discipline, will not be assigned an area designator. If taught within a Homewood academic department, the department is responsible for assigning area designators to their courses. Courses not offered through Homewood academic departments will be reviewed for proposed area designators by the appropriate dean's office.

The academic areas in the Hopkins curriculum are: humanities (H), natural sciences (N), social and behavioral sciences (S), quantitative and mathematical sciences (Q), and engineering (E).

The area designations of courses (H, S, N, Q, and E) are included in the course information in the departmental pages of the catalogue and in the online schedule of classes. The area designation also appears beside the course title on a student's unofficial transcript. When a course has more than one area designation (HS, EN, EQ, etc.), students may use only one of the designations to satisfy the distribution requirement.

Only courses or other credit-bearing opportunities with area designations may be used to satisfy the distribution requirement. Area designators are not assigned to the following:

- Independent study
- Research
- Internships
- Music performance (unless taken as part of a music minor, in which case the course will be designated H)
- Dance performance
- Foreign language elements courses (see additional foreign language rules (https://e-catalogue.jhu.edu/engineering/full-time-residential-programs/undergraduate-policies/academic-policies/registration-policies/#restrictionstext))
- Medical tutorials

Area designations can be assigned to courses taken elsewhere, to courses taken in other divisions of the university, or to graduate courses taken by undergraduates. These assignments are made by the appropriate dean's office based on the course content and the recommendations of the faculty. The most useful criteria for determining an appropriate area designator will be the course description and a similar JHU departmental offering.

The following courses at the Peabody Conservatory have H designations:

Area Designator	Code	Title
H	530.411	Keyboard Literature 1
H	530.412	Keyboard Literature 2
H	530.413	Keyboard Literature 3
H	530.414	Keyboard Literature 4
H	530.569	Jazz Analysis/History
H	530.570	Constructive Listening & Analysis/ Jazz History
H	610.321	History of Music 1
H	610.322	History of Music 2
H	610.323	History of Music 3
H	260.115	Core 1
H	260.116	Core 2

Distribution Requirement for Arts & Sciences Students

Students must earn:

- At least 9 credits in humanities
- At least 9 credits in social sciences
- At least 9 credits in natural sciences, quantitative, or engineering

These credits fulfilling the distribution requirement may overlap with major or minor requirements and the writing-intensive requirement.

In Arts and Sciences, courses taken for the distribution requirement may be taken for a letter grade or for Satisfactory/Unsatisfactory credit. Courses passed with a letter grade of D or better, or passed with a Satisfactory grade, will fulfill the distribution requirement. Students who entered JHU prior to Fall 2014 should view the appropriate archived catalogue.

Distribution Requirement for Engineering Students

Students earning a degree in the School of Engineering must complete the following distribution requirement:

18 credits (6 courses at least 3 credits each, except for the two specific course sequences listed below) designated H and/or S. Although language elements courses do not carry an area designator, engineering students may use these courses as substitutes for humanities courses in meeting the distribution requirement.

The following specific course pairings of a 2-credit course and a 1-credit course have been approved to count towards the H/S distribution requirements in place of a single 3-credit course:

Code	Title	Credits
Set One		
EN.660.400	Practical Ethics for Future Leaders	2
EN.660.406	Practical Ethics for Future Leaders - Special Topic	1
Set Two		
EN.660.400	Practical Ethics for Future Leaders	2
EN.520.404	Engineering solutions in a global, economic, environmental, and societal context	1

In Engineering, each department determines whether or not the Satisfactory/Unsatisfactory grading option will be permitted for courses used to satisfy the distribution requirement.

Completing a Major and Minimum Grade Point Average

Every student who earns a bachelor's degree must satisfy the requirements of a major. A major is a structured curriculum, usually within the confines of a particular academic field. Generally, the requirements for a major provide a student with a broad overview of the field through introductory courses, followed by more specialized courses tailored to meet the student's interests in the field. The requirements for the major may also include courses in other disciplines that provide skills and information of importance to professionals in the major field.

Courses that are used to satisfy major requirements must be taken for a letter grade, unless the course is only offered using the Satisfactory/Unsatisfactory grading system (i.e., there is no option for a letter grade). Students must have a grade point average of at least 2.00 in the letter graded courses used to satisfy major requirements. Many majors require a grade of C- or better in required courses.

Departmental Directors of Undergraduate Studies

For every major and minor that is offered at Johns Hopkins, there is a faculty member, or their designee, who serves as the program's Director of Undergraduate Studies (DUS). They are available to answer questions about their major(s) and/or minor(s). The directors also assign faculty advisors to students who declare a major or minor.

Information about KSAS DUS is located at https://advising.jhu.edu/completing-your-degree/directors-of-undergraduate-studies/.

Information about WSE DUS is located at https://engineering.jhu.edu/advising/directors-of-undergraduate-studies/.

Declaring a Major in Arts and Sciences

Students who enter the Krieger School of Arts and Sciences from high school are classified as pre-majors during their freshman year. In April, freshmen in Arts and Sciences will meet with an academic advisor to declare their primary major in Arts and Sciences. To declare a major at a later time, see Changing Majors or Advisors section below. Students must declare a major by April 15th of their sophomore year in order to assure that they will complete requirements for graduation in four years.

Arts and Sciences freshmen may declare second majors and minors offered through the School of Engineering beginning their freshman year until April 15th of their junior year.

Declaring a Major in Engineering

Students who enter the Whiting School of Engineering declare a specific engineering major on their application for admission. A student must take direct action to change the major. To change a major, see Changing Majors or Advisors section below.

Students cannot change their major into Biomedical Engineering. Students must be accepted into the program at the time of admission to the University.

It is recommended that undecided engineering students select a specific major no later than the end of freshman year.

Engineering students may declare a second major or minor offered through either the School of Engineering or the School of Arts and Sciences beginning their freshmen year until April 15th of their junior year.

Changing Majors or Advisors

Once students have declared a major, they may change their major or their faculty advisor by completing the online Program of Study form in SIS. Students cannot change their major into Biomedical Engineering.

Declaring Additional Majors (Optional)

Students who wish to complete the requirements of more than one major are expected to declare the additional major(s) by April 15th of their junior year. Students may add an additional major by completing the online Program of Study form.

A student with a double major receives the degree (B.A./B.S.) associated with the student's primary major. Completing a second major does not entitle the student to a second degree. The completion of additional majors is recorded on the transcript and diploma. When completing a double major, students need only satisfy the distribution requirement affiliated with the school of their primary major.

Declaring a Minor (Optional)

Students who wish to complete the requirements for a minor(s) are expected to declare the minor(s) by April 15th of their junior year. Students may add a minor by completing the online Program of Study Form. The completion of a minor is recorded on the transcript, but the minor does not appear on the diploma.

Official recognition with notation on the academic record is not given for completion of majors or minors at other divisions of the university or at other colleges.

Restrictions Applying to Double Majors and Minors

Within the Hopkins curriculum, requirements for the completion of undergraduate majors and minors are established by academic departments and approved by the Homewood Academic Council, acting on recommendations from the Curriculum Committees of the Krieger and Whiting Schools. Students who fulfill the necessary prerequisites and satisfy the specified course requirements for a major/minor will be certified as having completed that major/minor. While departments are free to designate the range of courses that may satisfy major/minor requirements for their own academic programs, they may not prohibit the use of course work presented for their department's major/minor from being used to satisfy the requirements of other majors or minors. In other words, students may "double count" coursework that independently meets the requirements of more than one major/minor.

Students are encouraged to choose additional areas of study to complement their major. However, students may not choose a minor with an identical name to their major. For example, a student majoring in Africana Studies may not declare a minor in Africana Studies.

Other prohibited combinations include:

1. Students may not major in Molecular and Cellular Biology and Biology.
2. Students majoring in the Natural Sciences Area may only double major or minor in a program outside of the natural sciences
3. Students majoring in Medicine, Science and the Humanities may not double major in Natural Sciences Area.
4. Students majoring in Romance Languages may not major or minor in one of the individual Romance Languages (except for the Spanish for the Professions minor).

Closely-related majors and minors that are allowed include:

1. Economics majors may complete a Financial Economics minor.
2. Spanish majors and Romance Languages Majors may complete the Spanish for the Professions minor.
3. Computer Science majors may complete a Computer Integrated Surgery minor.
4. Cognitive Science majors may complete the Linguistics minor.
5. Students majoring in Environmental Engineering may major in any major offered through the Department of Earth and Planetary Sciences.

The examples provided above may not be an exhaustive list and students who have questions about combinations of related programs should consult an advisor in their respective advising office.

Student Status

Contact Information

All matriculated students are required to have on record with the university accurate local and permanent contact information at all times and may be subject to a registration hold if this information is missing. This includes local address, local telephone number, and valid JHU e-mail address. Parent or legal guardian emergency contact information also must be on record and updated as necessary. This information should be maintained with the Registrar's Office by using SIS for Students (https://sis.jhu.edu/sswf/).

Student Classification (Year of Study)

Student classification refers to the familiar names for the four undergraduate years: freshman, sophomore, junior, and senior. A student's classification is generally determined by the academic year in which the student's cohort began the first year of college. In the first year, students in the cohort are designated freshmen. For students transferring into the university, an official student classification will be assigned by the respective advising office after completion of a final transfer credit evaluation. The number of credits a student has earned does not determine class standing. A student who graduates after three years would graduate as a junior.

For students who have been on leave and missed two or more semesters, classification will be determined by the student's academic advising office when the student returns to the university. If, for example, a student was on leave of absence for an entire academic year, the advising office may assign the student to a cohort one year behind the student's original cohort.

Students are required to register with their cohort, not on the basis of total credits or expected date of graduation. Plans to graduate early are not grounds for registering before a student's cohort. If a student who intends to graduate early is closed out of a required course for the major, the student may petition the department offering the course for approval to add the course. The decision rests with the department.

Full-Time Student Status

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester, unless a student has an approved reduced-course load accommodation through Student Disability Services.

Part-Time Student Status

Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) may register for fewer than 12 credits and pay for courses on a per credit basis with approval of the student's academic advising office. Prior to a ninth semester, a student may not enroll for fewer than 12 credits.

Leaves of Absence

Leaves of absence are granted for specific periods, generally up to one year, and such leaves are regarded as approved interruptions of a student's program. No tuition or fees are charged while on leave. If applicable, students should consult with the Office of Financial Aid prior to requesting a leave of absence. Students may not be eligible for health benefits if enrolled through JHU's Student Health Benefits. For more information, visit https://studentaffairs.jhu.edu/registrar/students/student-health-benefits/ and/or https://finaid.jhu.edu/.

Types of Leaves of Absence

STANDARD LEAVE OF ABSENCE

Students may be granted a standard leave of absence with the approval of the academic advising office for the student's school. Examples of reasons for a standard leave of absence include: military service (foreign or domestic), full-time internships preventing enrollment in courses, or missionary work. The deadline to request a standard leave of absence is the last day to drop classes. Students should contact their respective advising office for directions on how to request a standard leave. During a standard leave of absence, students may not enroll in another institution for the purpose of transferring credits back to JHU.

Students who fail to return to the university when expected will be considered to have withdrawn from the university.

EMERGENCY LEAVE OF ABSENCE

Students may be granted an emergency leave of absence for the purpose of dealing with a personal situation that impacts a student's ability to remain on campus and complete the semester. Examples of situations that might necessitate an emergency leave of absence include: the death of a family member, the need to serve as a caregiver for a family member, or other family emergencies. Students experiencing their own physical or mental health issues should refer to the medical leave of absence option. These emergency leaves are reviewed by the student's respective academic advising office and Student Outreach & Support in the Office of the Dean of Student Life (https://studentaffairs.jhu.edu/student-life/case-management/). During an emergency leave of absence, students may not enroll in another institution for the purpose of transferring credits back to JHU.

MEDICAL LEAVE OF ABSENCE (PHYSICAL OR MENTAL HEALTH)

Students may be granted a medical leave of absence to address their own physical or mental health concerns with the approval of Student Outreach & Support in the Office of the Dean of Student Life (https://studentaffairs.jhu.edu/student-life/case-management/). No tuition or fees are charged while on leave. Students on a medical leave of absence may request permission to take up to two courses totaling 8 credits or less at another institution while on leave. These courses must be pre-approved by following the directions of each school and the restriction of a total of 12 transfer credits remains. Students interested in taking courses while on medical leave of absence should contact KSAS Advising or WSE Advising. Further details are available from Student Outreach & Support on the Medical Leave of Absence website. (https://studentaffairs.jhu.edu/student-life/case-management/medical-leave-absence/)

Note for Peabody Double Degree Students

Peabody double degree students may request a leave of absence from the double degree program, however they cannot be granted a leave of absence from only one portion (Homewood or Peabody) of the program. A double degree student's leave of absence is subject to the guidelines of their respective academic advising office on the Homewood campus.

Withdrawal from the University

A student who wishes to withdraw from the university with no intent to return should consult with their respective academic advising office in order to submit an official notification. An official notification of withdrawal consists of a letter providing brief reason for withdrawal and effective date. The tuition refund schedule is posted on the Students Accounts website (https://studentaffairs.jhu.edu/student-accounts/tuition-fees/).

The academic advising office will inform the Office of the Homewood Registrar, who will circulate the notification to other relevant campus offices, such as Student Accounts, Community Living, Office of Financial Services, Office of International Services, etc.

An enrolled student who leaves the university without notice, or who fails to register by the end of the second week of the semester, may be considered to have withdrawn from the university.

A student who transfers to another institution is automatically considered to have withdrawn from JHU.

In the rare situation where a withdrawn student wishes to return to the university, the student must submit a written request for readmission to their respective advising office for evaluation. Neither readmission nor transfer of credits is guaranteed. A student must be formally readmitted before registering for courses. Readmitted students do not pay another matriculation fee.

A student who wishes to withdraw from the university on a temporary basis and intends to return in a future semester should see the information under Leaves of Absence (p. 1592).

Peabody Double Degree Students

Information about withdrawing from one or both of a student's degree programs is available on the Peabody Double Degree page (p. 808).

Combined Bachelors/Masters Programs

Many departments, institutes, and centers offer undergraduates the opportunity to complete some of the requirements for a master's degree while simultaneously completing requirements for a bachelor's degree. These programs offer early admission to a graduate program, and may enable a student to complete both bachelor's and master's degrees in four years. Other programs are considered five-year programs.

Students in the School of Arts and Sciences or the School of Engineering must be accepted into a combined program no later than the first semester of their senior year, however departments may set an earlier application deadline. Students in a combined program are considered to be full-time students, and are charged full tuition.

Students in a combined program are considered to be graduate students

1. upon completion of undergraduate degree requirements, **or**
2. upon completion of eight full-time semesters as an undergraduate student.

Clearance from a student's respective department is also required.

Additional information about combined programs is available at https://engineering.jhu.edu/academics/combined-bachelors-masters/ and http://homewoodgrad.jhu.edu/academics/combinedconcurrent-bachelors-masters-policies/.

Taking a Course as an Alumnus

JHU alumni who completed their bachelors degree through the Krieger School of Arts and Sciences or the Whiting School of Engineering may take additional courses in those divisions with permission of the advising office of the school from which they graduated. Students should contact the advising office of the school from which they graduated for registration directions. Courses, grades, and credits will appear on a new academic record. Students must follow the rules for earning a second major or a minor after graduating, if applicable.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Students should seek assistance of their respective advising office in order to register for a course after graduation.

Finishing a Second Major or a Minor after Graduating

Students who have completed eight or more undergraduate semesters may take an additional course or two after graduation to complete a second major or minor if they have filed an approved plan with their respective advising office *before* their initial graduation date. The courses, grades, and credits will appear on a new academic record. A notation indicating the additional major or minor will be added to the new academic record, but a new diploma will not be issued. Students must notify their respective academic advising office when additional courses taken after graduation satisfy another major or minor.

A plan consists of the following:

1. Written approval from the director of undergraduate studies for the additional major/minor;
2. Description of the remaining requirement(s) to be completed. No more than two courses may be needed and these courses must be completed within one year of a student's initial graduation date;
3. Brief summary of why it is necessary for the student to have their degree conferred before completion of all planned majors or minors; and,
4. Final approval of a plan must be obtained from the student's respective advising office.

Second Degrees

Krieger School of Arts and Sciences and Whiting School of Engineering undergraduate-degree alumni who wish to earn a second bachelor's degree at Hopkins must contact their advising office. Students who receive approval must have already completed the requirements for the first bachelor's degree and complete an additional 60 credits at Hopkins beyond what they have done for the first degree. Alumni must request permission to pursue a second bachelor's degree within ten years of the conferral of the first bachelor's degree. The second bachelor's degree must be completed within ten years from the starting date of the second bachelor's degree.

Registration Policies

Advising and Registration Periods

All students are required to meet with an advisor for each declared major prior to registering for the fall and spring semesters. Advisor alert(s) for each declared major are placed on all students' records in SIS well in advance of the registration period; the alert(s) must be released by the advisor(s) to permit the student to register.

In the School of Arts and Sciences, freshman, first-semester transfer students, and undeclared students meet with their academic advisor beginning six weeks in advance of the registration period. Students with declared majors should contact their faculty advisor to schedule a meeting prior to their registration date.

In the School of Engineering, students meet with their faculty advisors during Engineering Advising Week (early November for spring registration, and early April for fall registration).

Undergraduates register for Spring semester in November, for Intersession in December, for Summer in March, and for Fall semester in April.

Schedule Verification

Students are responsible for verifying their schedules in SIS. Students are encouraged to retain a copy of their schedule for their records. In addition, students are advised to check their schedules after performing online registration changes (adding and/or dropping courses) to ensure accuracy.

Students should review their schedule prior to the add, drop, and withdrawal deadlines. Changes to a student's schedule will not be approved after these deadlines have passed. Failure to review and retain a copy of their registration confirmation will not be considered grounds for approving exceptions to these deadlines.

Intersession and Summer Special Registration Information

Summer and Intersession opportunities, such as JHU-sponsored study abroad courses and career exploration courses, may have special registration deadlines, fees, and procedures. Please see the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites for additional information.

Intersession is a period in January for students and faculty to participate in a variety of courses and activities that are offered for credit, and for non-credit. These offerings are designed to enrich the intellectual and social life of the campus. Registration in Intersession is optional.

For Intersession academic exploration courses, the tuition cost of Homewood KSAS and WSE courses is free to undergraduates who were enrolled full-time in the previous fall semester (including approved study abroad); part-time students must pay tuition. All students must pay relevant fees. Students who are returning from a leave of absence may register for Intersession if they pay tuition per credit hour. Students who register for Hopkins Intersession courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Summer courses at JHU are primarily offered during two five-week terms. Some courses run on alternative schedules and may, therefore, have different deadlines. Courses are sponsored by the same academic departments that oversee the university's full-time degree programs. They are designed to reproduce, as closely as possible, similar courses offered during the spring and fall semesters. Tuition charges, and deadline dates, are published on the Summer Programs (https://summerprograms.jhu.edu/) website. Students who register for Hopkins Summer courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Late Registration Fees

Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean in their respective academic advising office. The university provides financing alternatives that permit students to register in most financial situations. Visit https://finaid.jhu.edu/ for information on financial support programs offered at JHU.

Students who for any reason do not complete their registration until after the prescribed registration period may be required to pay a late registration fee.

For late registration fees in the Summer, please see the Summer Programs (https://summerprograms.jhu.edu/) website.

Adding a Course

During the fall and spring semesters, students may add a course until the end of the second week of classes and pay no fees to add courses. During this time students may add courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, Arts and Sciences students need approval from the Arts and Sciences Advising Office, while Engineering students will need the approval of their faculty advisor and the approval of the Engineering Advising Office. Approvals for credit overloads can be processed in the SIS by the student's respective advising office which will enable students to add the course(s) online.

An instructor's signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep. As an exception to this policy, students may enroll in Independent Study, Independent Research, Thesis, and/or Internship until the end of the sixth week of the semester.

For fall and spring courses that are scheduled for less than the full semester, the last day to add will vary based upon course length and start date. Please see the Homewood Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites.

When adding courses in other JHU divisions, or at schools in the Baltimore Student Exchange Program (BSEP), students must follow the deadlines set by the host school or division. In the School of Public Health, the add deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

Dropping a Course

Courses may be dropped from the student's record until the end of the sixth week of the semester, provided that the student remains registered for a minimum of 12 credits. For engineering students, faculty advisor approval is required to drop a course after the second week of classes.

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to drop a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

For fall and spring courses that are scheduled for less than the full semester, the last day to drop will vary based upon course length and start date. Please see the Homewood Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (https://summer.jhu.edu/intersession/) or Summer (https://summer.jhu.edu/) Programs websites.

When dropping courses in other JHU divisions or at schools in the Baltimore Student Exchange Program (BSEP), undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

Withdrawing from a Course

After the end of the sixth week and until the end of the eleventh week, a student may withdraw from a course with a W on their academic record. A record of the course will remain on the academic record with a W appearing in the grade column to indicate that the student registered and then withdrew from the course. Students are not allowed to withdraw from a course after the end of the eleventh week of the semester. Course withdrawals must be conducted in person at the Office of the Homewood Registrar using an add/drop form. Engineering students need the signature of their faculty advisor on the add/drop form. No signature is required for Arts and Sciences students to withdraw from a course when the student remains able to earn a minimum of 12 credits.

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to withdraw from a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

Even with approval, withdrawing from a course may adversely affect a student's academic standing and/or financial aid satisfactory academic progress, and students should discuss these topics with the respective offices prior to submitting signed add/drop forms to the Office of the Homewood Registrar.

For fall and spring courses that are scheduled for less than the full semester, the last day to withdraw will vary based upon course length and start date. Please see the Homewood Registrar's Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites.

When withdrawing from courses in other JHU divisions or at schools in the Baltimore Student Exchange Program (BSEP), undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the withdrawal deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

Full-Time Student Status

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester, unless a student has an approved reduced-course load accommodation through Student Disability Services. Students with reduced course load accommodations approved through the Student Disability Services Office should refer to their website (https://studentaffairs.jhu.edu/disabilities/) for additional information.

Part-Time Student Status

Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis with the permission of their respective academic advising office. Prior to a ninth semester, a student may not enroll for fewer than 12 credits.

University Credit Hour Definition

JHU defines a credit hour as a reasonable approximation of the student learning outcome equivalency of an amount of work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates not less than, at a minimum, the federal definition:

- One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 15 weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
- At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Changes to this definition can be found in University Policies (https://policies.jhu.edu/doc/fetch.cfm/jhiiy1jH/). (https://www.jhu.edu/university-policies/) Graduate-level courses completed by undergraduates are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

Fall and Spring Semester Credit Requirements and Limits

For Arts and Sciences (AS) students, the average course load is 15 credits per semester for eight semesters. AS freshmen are limited to 17 credits, while AS upperclassmen are limited to 18.5 credits.

For Engineering (EN) students, the standard load is 16-18 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits.

Peabody Double Degree students are permitted to enroll in a maximum of 25 credits per semester.

Undergraduate students must be registered for a minimum of 12 credits throughout the fall and spring semesters. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

Intersession and Summer Credit Limits

Students may take a maximum of 3 credits during Intersession.

During the Summer, students may take a maximum of 14 credits total, with a limit of 7 credits per session.

Exceptions to These Credit Limits

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to drop or withdraw from a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

Credit overloads for Arts and Sciences students require approval from AS Academic Advising, and must meet one of the following criteria:

- Seniors in their eighth semester
- Upperclassmen who made Dean's List in the prior semester

Credit overloads for Engineering students are approved on a case-by-case basis, and require Faculty Advisor's signature, then final approval by the EN Advising Office, with review of the student's recent academic performance is a factor in the decision. First-semester EN freshmen are not granted credit overloads.

Restrictions

Registration Alerts

Registration alerts may be applied to student records for a variety of reasons, such as outstanding financial obligations, insurance and health clearances, academic standing, and missing emergency contact information. A student whose registration has been placed on hold for a non-academic reason must obtain clearance from the office or offices that placed the hold on registration. Transcripts will not be released for students with unpaid balances.

Students who have three or more incomplete grades from the previous semester may have a hold placed on registration activity. The student must have approval from their respective advising office to register, add, or drop.

Retaking A Course

Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains along with the notation "R" to indicate the course was retaken, and the original grade does not affect grade point calculations, nor does it carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. However, if a student drops or withdraws from the subsequent attempt the original grade is calculated into the GPA. A student may retake one course without written permission. Taking the same course a third time or retaking a different course requires written permission of the student's respective academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must be retaken under the Satisfactory/Unsatisfactory grading option.

To absolve a grade, the same course must be taken at Hopkins, not at another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:

1. by repeating a course of comparable content and level, or
2. as an independent study

Both of these options require approval of the department and/or instructor responsible for the course, and the student's respective academic advising office.

Approval for course retake can be processed in the SIS by the student's respective advising office which will enable students to add the course(s) online.

Special Retake Rules Related to Spring 2020, Fall 2020, and Spring 2021.

Due to the COVID-19 pandemic, there were special grading policies in effect during Spring 2020, Fall 2020, and Spring 2021 semester. Students who want to retake a course that was taken in one of those three semesters should refer to the chart below for adjusted retake rules.

Other Restrictions on Absolving a Grade

Grades may not be absolved by retaking a course after graduation.

Grades assigned by the Ethics Board due to an academic ethics violation may not be removed from the academic record by retaking the course.

Prohibition on Registering for Courses that Meet at the Same Time

Registering for two classes that meet at the same time or at overlapping times is not permitted, except as a temporary measure during the first two weeks of the semester when students are still deciding on which classes to take. By the end of the first two weeks of classes, students must resolve time conflicts in their schedules. Students receive a warning about time conflicts during the self-service registration process. Conflicts can be resolved as follows:

- Student must drop one of the conflicting courses by the end of week two of the current semester.
- For any exceptions, student must reach an agreement with the faculty of both conflicting courses. The approval must be documented in student records. Approvals can be submitted via SEAM case management system by student.

If the student does not resolve the conflict, they will be administratively dropped from one of their conflicting courses the 3rd week of the classes of the current term without any further notice. The course which was added later will be subject to this action.

Restrictions on Equivalent Courses and Courses Taken Out of Sequence

Courses that are sequential in nature, e.g., elementary, intermediate, and advanced language courses, or the Calculus sequence, must be taken in their proper order. One exception to this policy is that AS.210.301 Advanced French for Writing and AS.210.302 Advanced French for Speaking may be taken in reverse order with permission of the department.

Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, and AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office. This rules applies to courses offered by either KSAS or WSE, courses at other JHU schools, and courses transferred from other institutions.

The following restrictions apply to overlapping and the sequencing of courses in the Mathematics, and the Applied Mathematics and Statistics Departments:

- Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.553.291 Linear Algebra and Differential Equations or for the course. AS.110.212 Honors Linear Algebra.
- Students who earn credit for AS.110.405 Real Analysis I cannot receive credit for AS.110.415 Honors Analysis I
- Students who earn credit for AS.110.406 Real Analysis II cannot receive credit for AS.110.416 Honors Analysis II
- Students who earn credit for AS.110.302 Differential Equations and Applications cannot receive credit for EN.553.291 Linear Algebra and Differential Equations.
- Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.
- Students who earn credit for AS.110.311 Methods of Complex Analysis cannot receive credit for AS.110.407 Honors Complex Analysis.
- A student who earns credit in EN.553.291 Linear Algebra and Differential Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Differential Equations and Applications, AS.110.201 Linear Algebra, nor AS.110.212 Honors Linear Algebra.
- Students who earn credit for EN.553.426 Introduction to Stochastic Processes cannot receive credit for EN.553.427 Stochastic Processes and Applications to Finance.

The following restrictions apply courses in the Economics Department:

- Students who earn credit for AS.180.301 Microeconomic Theory may not earn credit for AS.180.401 (when offered).
- Students who earn credit for AS.180.334 Econometrics may not earn credit for AS.180.434 Advanced Econometrics.

Policy on Statistics Courses Sequencing

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not allowable for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not allowable for a student to receive credit for a more basic course after having received credit for a more advanced course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. Non-calculus based, basic (p. 1096)
2. Non-calculus based, intermediate (p. 1096)
3. Calculus based, intermediate (p. 1096)
4. Calculus based, advanced (p. 1096)

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses, however, all students are precluded from receiving credit for two courses that have much the same content, though they may have different emphases. This policy does not imply that a course in one of the above categories may be substituted for another course.

The list below shows the courses and sequences that are allocated to these categories. Examples:

- A student may take EN.553.111 Statistical Analysis I but then may not subsequently take AS.230.205 Introduction to Social Statistics.
- A student who has taken EN.553.310 Probability & Statistics for the Physical Sciences & Engineering may not also take EN.553.311 Probability and Statistics for the Biological Sciences and Engineering or any of the courses in the first two categories.

Category 1: (Non-calculus based, basic course)

Code	Title	Credits
EN.553.111	Statistical Analysis I	4
AS.230.205	Introduction to Social Statistics	4
AP Statistics		

Category 2: (Non-calculus based, intermediate course)

Code	Title	Credits
EN.553.211	Probability and Statistics for the Life Sciences	4
EN.553.230	Introduction to Biostatistics	4
AS.280.345	Public Health Biostatistics	4

Category 3: (Calculus-based, intermediate course)

Code	Title	Credits
EN.553.310	Probability & Statistics for the Physical Sciences & Engineering	4
or EN.553.311	Probability and Statistics for the Biological Sciences and Engineering	

Category 4: (Calculus-based, advanced course)

Code	Title	Credits
EN.553.420 & EN.553.430	Introduction to Probability and Introduction to Statistics	4

Some courses do not fall into one of the four categories:

- EN.553.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material such that no Category 1 course may be taken after EN.553.413 Applied Statistics and Data Analysis.
- EN.553.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.553.111 Statistical Analysis I-EN.553.112 Statistical Analysis II.
- AS.200.200 Research Methods in Psychology and AS.200.201 Design & Statistical Analysis for Psychology comprise a two-semester research methods sequence required of the Psychology major. While the courses introduce some statistical methods, they are not subject to the sequencing restrictions. Students who have completed these courses who wish to continue in statistics should consider a course in category 2 or higher.

Equivalent Statistics Courses

The courses EN.553.310 Probability & Statistics for the Physical Sciences & Engineering and EN.553.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. In accordance with the course retake policy, a grade in one may be absolved by the opposite course.

Important Note About Credit and Grades for Language Courses

Students must take the language elements (or beginning/first year) courses for a letter grade.

Students in the School of Arts and Sciences do not receive an area designation for these elements (beginning/first-year) courses.

Students in the School of Engineering can substitute language elements (or beginning/first-year) courses for humanities courses in meeting the distribution requirement.

Instructor's Permission

Most graduate (600-level and above) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university require undergraduates to obtain permission to register. If permission is required, engineering students need permission from the instructor and their faculty advisor. Arts and Sciences students require permission of the instructor. If online enrollment is not available, students must use an add/drop form to secure the appropriate permissions.

Auditing a Course

Undergraduate students may not audit a course. By the end of the add period, a student may only attend or participate in courses for which they are enrolled.

Registering for Independent Academic Work

Independent Academic Work is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include activity, exercise, and/or product that can be evaluated by a member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to competently evaluate the work, and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on-campus or off-campus. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student's achievements while doing the independent project, and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions, and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

- No more than three credits may be earned for independent study or research in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer.
- No more than 6 credits of any type of independent academic work may be earned in one academic year (see exception for students graduating in their eighth semester or later). The academic year begins with the first summer session and ends at the conclusion of the spring semester.
- Independent work done for academic credit may be paid or unpaid. Credits for research and independent study vary from 1-3 credits, and may be graded with either letter grades (A, B, etc.) or Satisfactory/ Unsatisfactory. Each credit hour should reflect 40 hours of work on the project.
- Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/ Unsatisfactory only.
- Students must register for independent academic work by the end of the sixth week of the semester. Students must adhere to the registration and add/drop deadlines during Intersession, and Summer. In the rare circumstance that a student must change the number of independent academic work credit for which they are registered, the deadline for these changes aligns with the deadline to withdraw from a course. The typical minimum and maximum credit limits must be observed.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. All courses registration at the 500-level, which is by definition undergraduate independent academic work, except for courses that are Honors Thesis and the Senior Essay in English, are not allowed to be writing intensive. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Additional policy information can be found in the Credit Hour Policy (https://policies.jhu.edu/doc/fetch.cfm/jhiiy1jH/).

Language Courses at the School of Advanced International Studies

Course credit, normally between 3 to 5 credits, will be awarded to AS and EN undergraduate students for the following language courses offered by the School of Advanced International Studies (SAIS) in accordance to the University's credit hour policy and in strict adherence to the hours of instruction scheduled: Burmese, Indonesian, Persian, Russian, Thai, and Vietnamese. Supplemental language tutorials will not be included in the course credit calculations.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters

Qualified undergraduates may take courses at other divisions of the university as long as the student has not previously earned credit for the content of the course. Students submit an Interdivisional Registration (IDR) form, which is available in the Homewood Registrar's Office, in the Office of Academic Advising, or in the Office of Engineering Advising. Courses taken at other JHU divisions must be taken for a letter grade, unless the course at the host division is offered on an S/U basis only. Approval(s) are required for all AS/EN students as indicated on the IDR form. All students must meet the course requirements as defined by the host division. Additional IDR information is located at https://registrar.jhu.edu/idr/.

Peabody Institute

Peabody Conservatory offers courses that must be taken for grade and credit. Homewood undergraduates who are not enrolled in either the Homewood-based music minor or the Peabody Double Degree program may take only one nonperformance course per semester at the Conservatory, and may also take one performance course concurrently with the approval of the student's respective academic advising office. Performance courses will receive 1 credit per semester unless taken as part of the Peabody Double Degree program.

Students may take private lessons at Peabody. Information is located at https://peabody.jhu.edu/preparatory/registration-financial-aid/placement-information/.

The Conservatory schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody schedule of courses located at https://peabody.jhu.edu/academics/academic-calendar-resources/registrar/. Visit https://peabody.jhu.edu/academics/peabody-at-homewood/ for additional information about taking lessons at the Conservatory.

The Carey Business School and The School of Education

Students may register for approved courses in these two schools on a case-by-case basis. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar's Office (https://support.sis.jhu.edu/case-home/), which requires permission of their academic advisor and the appropriate school program director or advisor. Students declared in the Carey Business minor for undergraduates may register for the required courses of the minor through SIS. Courses must be taken for a grade. Note that the Carey Business School and the School of Education students have priority in registering for these schools' courses.

School of Medicine and Bloomberg School of Public Health

Undergraduates may register for courses in the School of Medicine and/or the Bloomberg School of Public Health with the approval of the faculty advisor, the course instructor, and the student's academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade. Public Health Studies majors taking courses at the Bloomberg School of Public Health require only the Public Health faculty advisor's approval signature and can register for courses through SIS.

Registering for Courses at Other JHU Divisions During the Summer

Degree-seeking students are permitted to IDR enroll during the summer term(s). Students must meet designated course prerequisites and/or be otherwise qualified for the desired course(s) at the following JHU divisions:

- Advanced Academic Programs (AAP) division of the Krieger School of Arts and Sciences
- Bloomberg School of Public Health (excluding offerings through the Summer Institute)
- Engineering for Professionals (EP) division of the Whiting School of Engineering
- Peabody Institute (permission required from Peabody Associate Dean for Academic Affairs)
- School of Advanced International Studies
- School of Education
- School of Medicine

Students should register using the IDR form (https://support.sis.jhu.edu/case-home/), and pay for the course at their home division. The course, along with credits and grade, will appear of the student's home division transcript. Approval from both the home and host divisions is required to ensure that the interdivisional enrollment is appropriate for the student's degree. Summer courses in other divisions must be taken for a grade.

IDR enrollment is not available during the summer term(s) at the Carey Business School, nor the School of Nursing. Students seeking enrollment at either of these schools should pursue enrollment directly with the respective school. In order to ensure a course will transfer to the student's undergraduate academic record, students should follow the transfer credit pre-approval directions available from their advising office.

Registering for Courses through the Baltimore Student Exchange Program (BSEP)

Beginning sophomore year, undergraduates may take one course per semester (fall/spring only) at one of the several area colleges and universities that comprise BSEP. This program includes the following colleges in the Baltimore area: Community Colleges of Baltimore County, Coppin State University, Goucher College, Loyola University Maryland, Maryland Institute College of Art, Morgan State University, Notre Dame of Maryland University, Stevenson University, Towson University, University of Baltimore, and University of Maryland Baltimore County.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the BSEP institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through BSEP. Students register by submitting the BSEP registration form to the Homewood Registrar (https://support.sis.jhu.edu/case-home/). This form is available on the BSEP website (https://baltimorecollegetown.org/colleges/cross-registration/). The faculty advisor's approval is required for all courses. An academic advisor from the student's respective advising office must also approve the form. Submit completed registration materials to the Homewood Office of the Registrar (https://support.sis.jhu.edu/case-home/).

Prior to the start of classes at the host institution, students may report to the host school's registrar for additional assistance (for example, campus maps or id cards). JHU students enrolled through BSEP are not required to complete registration forms at the host institution, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the BSEP program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at these schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

Independent undergraduate work, special tutorials, or private study types of courses that consume a large portion of faculty time are generally not included in the BSEP program, nor are weekend or evening courses offered through continuing educational studies programs.

Cooperative Education in Engineering

Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

ROTC

Enrollment in the Johns Hopkins University Department of Military Science ROTC Program prepares students for full- and part-time careers in the U.S. Army and its Reserve Forces, as well as providing leadership and management skills valuable in any profession. Freshmen interested in finding out about the military profession should enroll in a Military Science course. Contact the professor of military science at 410-516-4685 for enrollment procedures and scholarship information. Visithttps://krieger.jhu.edu/rotc/ and https://e-nextcatalog.jhu.edu/arts-sciences/full-time-residential-programs/degree-programs/military-science/ (p. 1970) for additional information.

Final Examination Schedule for Fall and Spring Semesters

The Office of the Homewood Registrar establishes the final examination schedule. In rare cases, the official final exam schedule available on the Homewood Registrar's website may slot three final exams on one day for a student. Students should contact their respective academic advising office for assistance in these instances.

Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers) that are expected to be prepared for and completed after classes have concluded are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods.

Students who are concerned that any of these policies are being violated by their instructors should notify their respective academic advising office.

The final exam schedule (https://studentaffairs.jhu.edu/registrar/students/course-schedule/) is posted on the Office of the Homewood Registrar's website.

Grading Policies

Grades are submitted to the Homewood Registrar at the end of the semester. Grades can be viewed online by students in SIS. Students may designate authorized users to view final course grades in SIS.

Grades and Grade Point Average Points

Each grade corresponds to a numerical grade point equivalent to allow the computation of a grade point average. S and U grades have no effect on grade point average. The grades and their grade point equivalents are as follows:

Grade	Performance	GPA Points
A+	Excellent	4.0
A	Excellent	4.0
A-	Excellent	3.7
B+	Good	3.3
B	Good	3.0
B-	Good	2.7
C+	Satisfactory	2.3
C	Satisfactory	2.0
C-	Satisfactory	1.7
D+	Passing	1.3
D	Passing	1.0
F	Failure	0.0
S	Satisfactory (C- and above)	N/A
U	Unsatisfactory (D+ and below)	N/A

Other marks are used in special circumstances as follows:

Letter	Definition
FEV	Failure - ethics violation
I/Grade	Incomplete/Reversion Grade (incomplete grade reverts to this letter grade at deadline unless alternate grade is submitted prior to that deadline)
MR	Missing grade roster
MT	Multi-term
NG	No grade given, course completed
W	Official withdrawal
X	No grade reported by instructor

Grade Points and Grade Point Average

To determine the grade point average, multiply the grade point equivalent by the number of credits for the course. Add the products (grade points earned), then divide the total by the number of credits in the computation.

A Sample Calculation of a Grade Point Average

Grade	Credit	Grade Point Equivalent	Grade Points Earned
A-	4	3.7	14.8
B	3	3	9
B-	3	2.7	8.1
C+	3	2.3	6.9
TOTAL	13		38.8
GPA = 38.8/13 = 2.98			

Satisfactory/Unsatisfactory Grades

Undergraduates may select one course each semester and summer (across all summer terms) to take for Satisfactory/Unsatisfactory credit. Students indicate their S/U choice on an add/drop form. Arts and Sciences students need the advising office approval for courses within their major and/or for writing intensive courses. Engineering students need approval from their faculty advisor. Course instructors are unaware of which students in a class are registered for S/U credit. Instructors submit letter grades to the Homewood Registrar for all students in their course.

Students must decide whether to take a course on a S/U basis by the end of the eleventh week of the semester. This deadline applies to all courses, even those which may not have any graded work assigned or returned before the end of the eleventh week.

S/U grades have no effect on a student's grade point average. On the academic transcript, students who earn a grade of C- or above in a S/U course receive Satisfactory credit and a mark of S is entered on the academic record. Students who earn a grade below C- in a S/U course receive no credit and a mark of Unsatisfactory is recorded on the academic record.

Under certain conditions, graduating students in their eighth semester or later may exceed the normal S/U grading limit. See Graduation Policies for details.

Restrictions on Satisfactory/Unsatisfactory Grading

The S/U option applies only to courses in the fall, spring and summer terms in the School of Arts and Sciences and the School of Engineering. Only one course per semester or summer (across all summer terms) may be taken with the S/U grading option. However, an eligible student who registers for a course that is only offered for S/U grading may select an additional course for S/U grading in the same semester. Language elements courses must be taken for a letter grade.

If a student has taken a course for S/U credit and then changes to a major or minor that requires the course, the grade can be changed to a letter grade before graduation with the approval of the student's academic advising office and the director of undergraduate studies for the relevant major or minor. If the S grade is acceptable for the new major or minor, the S grade will not be converted to a letter grade.

Incomplete Grades

Students who are confronted with compelling circumstances beyond their control which interfere with the ability to complete their semester's work during the normal course of a term may request an Incomplete grade (I), a temporary grade, from their instructor.

Incomplete grades may be appropriate under the following conditions:

- the student has completed the majority of the work for the class as determined by the instructor.
- the student has consulted with the course instructor, and together they have created a viable plan to complete the coursework with sufficient time for the instructor to provide the final grade by the specified deadline described below. This conversation must be documented on an Incomplete Grade Contract, which is initiated by the student in SIS.

A student whose situation does not meet these criteria should consult their academic advisor to discuss academic options.

The required elements on the Incomplete Grade Contract are listed below; all of these topics should be included in the conversation between the student and the instructor.

1. The reason for the request for an incomplete grade
2. A description of all outstanding work that must be completed
3. Date the work is due from the student
4. The reversion grade if the student does not complete any of the outstanding work

An instructor is not obligated to approve a student's request for an Incomplete grade. If the instructor agrees to grant an Incomplete grade, the instructor and student must establish a timetable for submitting unfinished work within the relevant deadline stated in this policy below. The instructor must also specify the reversion grade, defined as the grade that will be assigned if no additional work is submitted, on the Incomplete Grade Contract. The student must submit their work to the instructor in enough time for them to review and grade it before the relevant deadline described below.

An Incomplete grade does not affect a student's grade point average and is replaced by the final grade submitted by the professor. If the final grade is not submitted within the relevant deadline stated in this policy below, the Incomplete grade will convert to the reversion grade entered by the instructor.

Incomplete grades cannot be held over to another semester to complete the missing work by retaking the course. Students and instructors do not have an option in this situation.

Under extenuating circumstances, students can petition their course instructors and their Academic Advising Office to extend their Incomplete deadline. The extension can be no longer than the last day of classes of the semester following the semester in which the incomplete was given. See below for additional information on extenuating circumstances.

Process and Deadline for Students in Good Academic Standing
A request for an Incomplete grade must be initiated by the student no later than the last day of classes via the Incomplete Grade Contract available in SIS. Students are expected to consult with the instructor before submitting the Incomplete Grade Contract. Incomplete grades will be treated as failures when evaluating academic standing.

Upon receipt of a student's Incomplete Grade Contract form, the instructor may approve or deny the request, at their discretion.

Instructors are required to submit the new grade to the Office of the Homewood Registrar no later than 45 calendar days after the last day of classes. If the Incomplete grade is not resolved within 45 calendar days after the last day of classes, the Incomplete grade is automatically converted to the reversion grade.

Process and Deadline for Students on Academic Probation
Students on academic probation may initiate an Incomplete Grade Contract in SIS as described above. For students who are on academic probation, Incomplete grades will be treated as failures when evaluating academic standing. For students on academic probation who have a conversation with their academic advising office prior to initiating the Incomplete Grade Contract, the academic standing decision will be finalized after the 45-day calendar day deadline.

Instructors are required to submit the new grade to the Office of the Homewood Registrar no later than 45 calendar days after the last day of classes. If the Incomplete grade is not resolved within 45 calendar days after the last day of classes, the Incomplete grade is automatically converted to the reversion grade.

Process and Deadline for Graduating Students
Students with incomplete grades in required courses at the date of degree conferral will not graduate.

Students with incomplete grades in courses that are not required for degree completion may still graduate. However, the deadline for completion is abbreviated; students must resolve incomplete grades within 30 days of degree conferral when the University closes the undergraduate record. If the work is not finished by the deadline, the reversion grade will be recorded. For the specific deadline relevant to each degree conferral, please consult with advising or the Office of the Homewood Registrar. For more details on incomplete grades and graduation, see Graduation Policies.

Guidelines for Students Regarding Extenuating Circumstances for Requesting an Extension of the Incomplete Grade Deadline

Extenuating circumstances are those circumstance that cause exceptional interference with academic performance, and which are over and above the normal difficulties experienced in life.

Policy on Changing a Grade

Once an instructor has submitted a grade to the Homewood Registrar, grade changes can be made only in the case of error in grading, calculation, or transcription. Students with questions about grading should contact the faculty instructor who has sole authority to assess and assign course grades. If the instructor determines a change is warranted because of error, the change must be submitted to the Homewood Registrar's Office by the end of the subsequent semester. Grade changes for graduating seniors must be submitted by the close of the undergraduate record.

Retaking a Course

Policies about retaking a course are located under registration policies.

First-Year Language Courses: Information about Credit and Grades

Policies about first-year language course are located under registration policies.

Dean's List

Undergraduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences and the Whiting School of Engineering who earn a term grade point average of 3.50 or above in a program of at least 14 credits with at least 12 graded credits will be placed on the Dean's List for academic excellence. Students with the SDS accommodation to be on a reduced course load and are opting to use that accommodation can earn Dean's List if they earned a 3.5 or better in 8-11 credits of which at least 7 are completed with a letter grade. An appropriate notation is made on the student's academic record. The academic advising offices of both schools email Dean's List notification letters to students. The Engineering Advising Office also sends letters to parents/guardians. By request, the University will place notification in your hometown newspaper, should you elect to follow the directions provided with the letter.

Class Rank

The University does not calculate class rank and therefore, cannot provide this information to students or outside parties.

Transcripts

Information about ordering transcripts is available on the Homewood Registrar's website (https://studentaffairs.jhu.edu/registrar/students/transcripts/). Partial transcripts of a student's record will not be issued.

Class Attendance and Absences

Although there are no university regulations concerning attendance, students are expected to attend all courses regularly. When students have missed classes, they should consult with their instructors and/or teaching assistants to explain the reasons for their absence, and to stay on track in the course. Instructors are encouraged to establish their own policies regarding attendance, and it is the student's responsibility to know those policies.

In certain courses regular attendance is given special importance. These may include foreign language courses, as well as introductory courses in Writing Seminars. Instructors in these courses may lower a student's grade for unexcused absences.

If a student is absent from classes over a period of several days without explanation, instructors are encouraged to inform the student's respective academic advising office. In some cases, withdrawing from a course may be considered; however, the student must withdraw from a course before the end of the eleventh week of the semester, and still remain in at least 12 credits.

Absence From Class Due to Illness

The Student Health and Wellness Center (SHWC) does not provide excuses for students who miss individual classes, including required attendance classes or labs. For students who are seen at the SHWC for a serious or extended illness that causes them to miss a number of classes over several days and/or to miss major academic assignments (mid-terms examinations, major presentations), the SHWC will provide verification of the visit to the student directly, and alert the Office of the Dean of Student Life. Verification will not be provided retroactively. It is the student's responsibility to forward the verification to any professors/instructors who request it. For more information, also see this website (https://studentaffairs.jhu.edu/student-life/student-outreach-support/absences-from-class/).

Since the absence from a final examination is excused only for the most serious of circumstances, the SHWC will provide verification of the visit for those students who are seen at the SHWC for treatment at the time of their illness only.

Students should be guided by the following:

1. Ask instructors about expectations for class attendance and what procedures they will follow for students who miss class or assignments. Such policies are determined by each instructor and will differ from course to course.
2. In the event of a missed class or inability to complete course work due to illness, contact the instructor to make necessary arrangements to make up any work.
3. Notify the professor promptly by email. This should be done before the missed class unless it is not possible to do so (for example, if hospitalized or incapacitated). In cases where prior notification is not possible, notify the professor as soon as possible.
4. Misrepresenting personal circumstances to a faculty member, SHWC staff, or any university official constitutes academic dishonesty and is grounds for action by the Academic Ethics Board.

Absence for Religious Holidays

Religious holidays are valid reasons to be excused from class. Students who must miss a class or an examination because of a religious holiday must inform the instructor as early in the semester as possible in order to be excused from class or to make up any work that is missed.

Approved Absences

The university encourages students to participate in varsity athletics and other significant extracurricular activities. Students who must miss a class or an examination because of participation in a scheduled in-season varsity athletic event must notify the course instructor as early in the semester as possible. Approved absences are granted at the discretion of the course instructor. When students must miss a scheduled examination, several solutions have been found by instructors. Students have been permitted to take an examination before leaving for the event, or have had an approved proctor for examinations taken during the athletic event at approximately the same time as the other students in the course. Students have also been allowed to take the examination, or an alternative examination, upon their return from the athletic event.

Academic Standing Policies

New Terminology for Select Academic Actions

Effective with academic review at the end of the Fall 2021 semester, KSAS and WSE have adopted new terminology applicable to all undergraduates. We have introduced the term "academic suspension," and the term "academic dismissal" is now reserved for the third and final failure of a student to return to good academic standing.

Good Academic Standing

Students who maintain a minimum of 12 credits earned and a term GPA of at least 2.0 each semester are considered in good academic standing. In the rare circumstance that a student is given permission prior to the start of the semester to be enrolled in less than 12 credits, that student must complete 100% of the enrolled credits with a term GPA of at least 2.0 to remain in good standing.

Reviewing Academic Standing

Each academic advising office reviews student records at the end of fall and spring semesters to monitor academic standing. Based on this review, students may be placed on academic probation, academically suspended, or academically dismissed.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) refers to minimal standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/.

Academic Probation

At the end of each fall and spring semester, the academic advising offices review the records of all undergraduate students to evaluate the academic standing of each student. Students who earn less than 12 credits or earn a term GPA below 2.0 are placed on academic probation. A letter informing a student of this status and the terms of academic probation are sent to the student in January (for fall performance) or June (for spring performance).

The terms of academic probation are as follows: Students must complete at least 12 credits with a minimum term GPA of 2.0 in the next enrolled fall or spring semester. Students may also be required to achieve a cumulative GPA of 2.0 or above in order to be removed from academic probation. In making the GPA calculation, incomplete grades (I) may be calculated as failures (F). In addition, any grade in a satisfactory/unsatisfactory course may be taken into consideration.

Students who do not meet the terms of academic probation will be academically suspended or academically dismissed. In some circumstances, a student may be continued on academic probation instead of being academically suspended or academically dismissed. A student whose term GPA falls below 1.0 or earns less than 6 credits may be academically suspended without having been on academic probation the previous semester.

The advising offices send written notification to students who are placed on academic probation. Incomplete or missing grades may prevent timely notification. Students with a term grade point average below 2.0 or who earned less than 12 credits should consult with an academic advisor about their academic standing, even if they have not received the letter from their advising office.

Students on academic probation may be restricted from registering for the maximum course load. Engineering students on academic probation are permitted a maximum of 14 credits during the probation semester. Students on academic probation are not precluded by the university from continued participation in co-curricular activities or from representing the university in institution-sanctioned activities (including varsity athletics) while on academic probation.

A student's academic performance during the summer term or intersession will not affect their academic standing.

Academic Suspension

A student on academic probation who has not met the terms of probation will be subject to academic suspension from the university for a minimum of one semester and a summer. A student whose term GPA falls below 1.0 or earns less than 6 credits may be academically suspended without having been on academic probation the previous semester.

Students may direct inquiries about the academic suspension process to the Academic Review Committee of their respective advising office. Students who intend to return to the university in a future semester are encouraged to work with their academic advisor to develop a plan for their time away.

When a student is academically suspended from the university, the:

- Office of the Homewood Registrar cancels the student's registration for the next semester, and in accordance with policy authorizes a refund of tuition paid for that semester;
- Office of Student Financial Services suspends financial aid and work-study aid to the student;
- Community Living Office cancels the student's housing contract if the student is in university housing; and,
- Office of International Services performs duties as required by U.S. federal regulations regarding persons not eligible to study at the university.

Reinstatement after Academic Suspension

The terms for reinstating a student who has been academically suspended are established by the Academic Review Committee of their respective advising office.

Students are reinstated on academic probation and must meet those terms in their returning semester or face academic suspension again or academic dismissal.

Students who receive prior approval to complete courses at another college or university during the period of academic suspension are subject to the university's 12-credit limit on the number of transfer credits that can be applied toward graduation.

Reinstatement Requests

To apply for reinstatement, an academically suspended student must submit a written request to their respective advising office. The request should include an analysis of what went wrong during the preceding two semesters of enrollment, a description of activities while not in attendance, and an academic plan for completing all degree requirements. Supplemental materials such as transcripts of courses taken elsewhere, letters of reference from work or volunteer supervisor, and/or letters of support from a mental/physical health care provider may be required. Students are encouraged to contact their academic advisor prior to submitting a written request for reinstatement. Engineering students should use the reinstatement form provided to them at the time of their academic suspension.

Reinstatement and Financial Aid

Academic suspension and financial aid suspension are two distinct actions and must be addressed separately. The Financial Aid Satisfactory Academic Progress (SAP) appeal process can be found online (https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/). This appeal is in addition to the request for reinstatement to your advising office.

Subsequent Academic Suspension

A student who is academically suspended a second time will be required to separate from the university for a minimum of one year.

Academic Dismissal

A student who has been reinstated following a second academic suspension returns to the university on academic probation. Failure to meet the terms of academic probation that semester will result in academic dismissal from the university. Academic dismissal is permanent. Students will not be permitted to apply for reinstatement.

Eligibility for Financial Aid

Degree-seeking students who are eligible to register are also eligible to apply for financial aid. Only U.S. citizens and eligible non-citizens (e.g., permanent residents) are eligible for Federal Title IV financial aid.

Students should be aware that JHU scholarship and grant funds are awarded for a maximum of eight semesters. Under some circumstances, a ninth semester may be awarded on appeal. Federal and state aid may be available for additional semesters.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) refers to minimum standards for grades and cumulative credits required to receive financial aid. The SAP policy is available at https://finaid.jhu.edu/undergraduate-aid/apply-for-aid/undergraduate-sap/.

External Credit Policies

It is expected that the majority of credits applied towards degree requirements are earned by completion of courses taught at Johns Hopkins University by our faculty. We do recognize that some students may have other sources of college-level credit that could be applicable to some requirements. This section explains the conditions and restrictions regarding credits earned outside of JHU.

Full details about the application of external credits towards degree requirements can be found at KSAS Requirements for a Bachelor's Degree (p. 1587), and KSAS Residency Requirement (p. 1588), or WSE Requirements for a Bachelor's Degree (p. 1086), and WSE Residency Requirement (p. 1087).

Exam Credit

The information below describes the requirements for students entering JHU in Fall 2022 and after. Students who entered JHU prior to Fall 2022 should view the appropriate archived catalogue (http://e-catalog.jhu.edu/archive/).

If a student enters the university with credit from an exam and then earns credit for an equivalent course at the university, the credits from the exam (and lab course waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The exam title remains on the record, but the credit value is converted to zero.

To receive credit based on an external exam program, examinations must be taken no later than the year the student is admitted to the university.

Advanced Placement Exams

If a student enters the university with credit from an Advanced Placement Exam and then earns credit for an equivalent course at the university, the credits from advanced placement (and lab course waiver, if applicable) will be disallowed. The credits and grade for the Hopkins course will appear on the academic record. The Advanced Placement Exam title also remains on the record, but the credit value is converted to zero. This policy also applies to IB credit, GCE credit, and credit from foreign exams.

AP Exam	JHU Course	Score	Credit
Biology	AS.020.151 & AS.020.152[1]	5	6
Chemistry	AS.030.101 & AS.030.102 and labs AS.030.105-AS.030.106[2]	5	8
Chemistry	AS.030.101 and lab AS.030.105[2]	4	4
Environmental Science	TR.270.100	4 or 5	4
Computer Science A	EN.500.112[3]	5	3
Macroeconomics	AS.180.101[4]	5	3
Microeconomics	AS.180.102[5]	5	3
Calculus AB	AS.110.108[6]	5	4
Calculus BC	AS.110.108[6]	3 or 4	4
Calculus BC	AS.110.108 and AS.110.109[6]	5	8
Physics C Mechanics	AS.171.101[7]	4 or 5	4
Physics C Electricity and Magnetism	AS.171.102[7]	4 or 5	4
Statistics	EN.553.111	4 or 5	4

1. Biology: Students who are awarded credit for AP Biology are exempt from taking the corresponding lab courses (AS.020.153 General Biology Laboratory I-AS.020.154 General Biology Lab II). The lab courses are waived but no credit is awarded. Students who have credit for AP Biology who earn credit for AS.020.151 General Biology I and/or AS.020.153 General Biology Laboratory I will lose the three credits for AS.020.151 General Biology I. Students who have credit for AP Biology who earn credit for AS.020.152 General Biology II and/or AS.020.154 General Biology Lab II will lose the three credits for AS.020.152 General Biology II.
2. Chemistry: Students who have credit for AP Chemistry and earn credit by taking an introductory chemistry lecture and/or lab at Hopkins will lose all four AP exam credits for the corresponding introductory chemistry lecture/lab combination. Effective fall 2014, students with a score of 4 on the AP Chemistry exam and therefore, have exam credits for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I may not take AS.030.102 Introductory Chemistry II/AS.030.106 Introductory Chemistry Laboratory II without taking AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I at JHU (forfeiting four AP credits). Students with a score of 4 should take AS.030.103 Applied Chemical Equilibrium and Reactivity w/lab in order to complete the introductory chemistry requirements to retain AP credits. Students with a score of 4 who earn credit for AS.030.101 Introductory Chemistry I and AS.030.105

Introductory Chemistry Laboratory I by taking the course will forfeit their AP credits. Students with a score of 5 and therefore have credits for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I and AS.030.102 Introductory Chemistry II/AS.030.106 Introductory Chemistry Laboratory II who earn credit for AS.030.103 Applied Chemical Equilibrium and Reactivity w/lab will lose four AP credits for AS.030.102 Introductory Chemistry II and AS.030.106 Introductory Chemistry Laboratory II. Students who earn credit for AS.030.101 Introductory Chemistry I/AS.030.105 Introductory Chemistry Laboratory I will forfeit all 8 AP credits.

3 Computer Science: The applicability of AP Computer Science exam credits to the computer programming requirement of a particular major is determined by the academic department responsible for that major. Students may receive credit for either the AP Computer Science A exam or one of the Gateway Computing courses (EN.500.112 Gateway Computing: JAVA, EN.500.113 Gateway Computing: Python, EN.500.114 Gateway Computing: Matlab). Students who have AP Computer Science A credits and earn credit for one of the Gateway Computing courses will lose the three AP Computer Science A exam credits.

4 Macroeconomics: Students who score a 5 on the Macro AP exam are placed out of AS.180.101 Elements of Macroeconomics and receive University credit. However, it does not count as one of the ten courses required for the economics major (or one of the six courses required for the economics minor).

5 Microeconomics: Students who score a 5 on the Micro AP exam, AND who pass a diagnostic test administered by the Economics Department will place out of AS.180.102 Elements of Microeconomics and receive University credit for it. However, it does not count as one of the ten courses required for the economics major (or one of the six courses for the economics minor).

6 Calculus: Students may receive credit for Calculus I via only one exam. Students who have AP Calculus I credits who earn credit for AS.110.106 Calculus I (Biology and Social Sciences) will lose four AP credits for AS.110.108 Calculus I (Physical Sciences & Engineering). Students who have AP Calculus II credits who earn credit for AS.110.107 Calculus II (For Biological and Social Science) or AS.110.113 Honors Single Variable Calculus will lose four AP credits for AS.110.109 Calculus II (For Physical Sciences and Engineering).

7 Physics: Students who are awarded credit for AP Physics are exempt from taking the corresponding lab courses (AS.173.111 General Physics Laboratory I and AS.173.112 General Physics Laboratory II). The lab courses are waived but no credit is awarded. Students who have credit for AP Physics who earn credit for AS.171.101 General Physics: Physical Science Major I or AS.171.103 General Physics I for Biological Science Majors or AS.171.107 General Physics for Physical Sciences Majors (AL) will lose four credits for AS.171.101 General Physics: Physical Science Major I. Students who have credit for AP Physics who earn credit for AS.171.102 General Physics: Physical Science Major II or AS.171.104 General Physics/Biology Majors II or AS.171.108 General Physics for Physical Science Majors (AL) will lose four credits for AS.171.102 General Physics: Physical Science Major II. Students who have AP Physics - Mechanics C credit who earn credit for EN.530.123 Introduction to Mechanics I will lose four credits for AS.171.101 General Physics: Physical Science Major I. Students who earn credit for AS.171.105 Classical Mechanics I or AS.171.106 Electricity and Magnetism I may retain their AP Physics credits.

Higher Level International Baccalaureate Courses

The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to IB exam credits.

Subject	JHU Course	Score	Credit
Biology	AS.020.151 & AS.020.152 (labs AS.020.153 & AS.020.154 waived with no credit)	6 or 7	6
Chemistry	AS.030.101 & AS.030.102 and labs AS.030.105 & AS.030.106	6 or 7	8
Computer Science	TR.601.100	6 or 7	3
Economics	AS.180.101 (Macroeconomics [1]	7	3
Math	AS.110.108 [2]	6 or 7	4
Physics	AS.171.101 (lab AS.173.111 waived with no credit)	6	4
Physics	AS.171.101 & AS.171.102 (labs AS.173.111 & AS.173.112 waived with no credit)	7	8

1 Students will automatically receive three credits for AS.180.101. Students who score a 7 on the Economics IB exam AND who pass a diagnostic test administered by the Economics Department will place out of AS.180.102 Elements of Microeconomics and receive three credits for it. However, it does not count as one of the ten courses required for the economics major (or one of the six courses for the economics minor). Interested students should speak to the Director of Undergraduate Studies in the Economics Department for more information.

2 Either IB math HL course, Mathematics: Analysis and Approaches and Mathematics: Applications and Interpretation, will garner credit as described in the chart.

Foreign Certificate Exams

Credit is awarded for some foreign certificate exams as described below. Additional foreign certificate programs, like the German Abitur, may be considered on a case-by-case basis. The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to foreign exam credits.

General Certificate of Education (A-Levels)

Only Advanced A-Levels are awarded credits. AS and O level exams are not eligible for credit. The rules regarding credit forfeiture described in the Advanced Placement Exam section above also apply to foreign exam credits.

Subject	JHU Course	Grade	Credit
Biology	AS.020.151 & AS.020.152 (labs AS.020.153 & AS.020.154 waived with no credit)	A or B	6
Chemistry	AS.030.101 & AS.030.102 and labs AS.030.105 & AS.030.106	A or B	8
Economics	AS.180.101 (Macroeconomics)	A *	3
Mathematics	AS.110.108 & AS.110.109	A or B	8
Physics	AS.171.101 (lab AS.173.111 waived with no credit)	B	4
Physics	AS.171.101 & AS.171.103 (labs AS.173.111 & AS.173.112 waived with no credit)	A	8

* Students will automatically receive 3 credits for AS.180.101. Students who receive a grade of A and who pass diagnostic test administrated by the Economics Department will place out of AS.180.102 and receive 3 credits for it. However, it does not count as one of the ten courses required for the economics major (or one of the six courses for the economics minor). Interested students should speak to the Director of Undergraduate Studies in the Economics Department for more information.

French Baccalaureate

Credits may be awarded for subjects such as biology, chemistry, math, and physics upon review by the appropriate department. Due to exam revisions beginning in fall 2019, scoring requirements and course equivalencies are not currently available.

Caribbean Advanced Placement Exam

At this time, no scoring or course equivalencies are known for CAPE mathematics options. In Fall 2018, the Physics exam was deemed to be algebra-based and not eligible for credit.

Subject	JHU Course	Grade	Credit
Biology	AS.020.151 & AS.020.152 (labs AS.020.153 & AS.020.154 waived with no credit)	A or B	6
Chemistry	AS.030.101 & AS.030.102 and labs AS.030.105 & AS.030.106	A or B	8

Exam Credits for Foreign Language

The Modern Languages and Literatures Department does not award any credit for Spanish based on AP/IB exams or other foreign certificate exams.

French, German, and Italian will grant six credits for AP scores of 4 or 5 (IB Exams for 6 or 7) only after a student successfully completes two courses in that same language sequence at the intermediate level or higher. It may be possible to earn credits for French or German from the French Baccalaureate or other additional foreign certificate exams, but scoring requirements and course equivalencies are not currently available. Additional information is available under KSAS Registration Restrictions (p. 1596) and WSE Registration Restrictions.

JHU Placement Exams

Some departments may offer placement exams or other evaluations that allow a student to bypass lower-level content in that department, most commonly mathematics and foreign language. No credit is awarded for these departmental exams or evaluations as they are for placement purposes only. In some cases, a waiver of the bypassed course(s) may be noted on the student's academic record. No academic credit is awarded when a course is waived. Students should contact their respective academic advising office for additional information.

The following content is included on this page:

Transfer Credit Limits

Students Admitted Directly from High School

Students who enter the university from high school may transfer up to 12 credits from approved courses taken at other institutions, whether taken before or after matriculation. The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Students Admitted as Transfer Students

Students who enter the university as transfer students into the Krieger School of Arts and Sciences may transfer up to 60 credits towards a degree requiring 120 credits. Students earning degrees requiring more than 120 credits in both KSAS and WSE may bring in more than 60 credits; however at least 60 of the total JHU degree credits must be earned in residence as a full-time student at JHU. See the Requirements for a Bachelors' Degree in the KSAS (p. 1587) and WSE (p. 1086) sections of the catalog for additional residency requirements. All transfer students may transfer up to an additional 12 credits after matriculation.

The 12-credit limit on transfer credits does not include credit from Hopkins summer courses, Advanced Placement examinations, British General Certificate of Education courses, International Baccalaureate courses, or foreign certificate courses.

Transfer Credit Rules

The following rules apply to both online courses and courses taken in a traditional classroom setting.

To be eligible for transfer credit, an approved course must be taken for a grade at an approved college and completed with a grade of C or better. In the United States, an approved institution is a 2-year or 4-year college or university that is accredited by one of the following regional accrediting agencies:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges, Commission on Institution of Higher Education
- North Central Association of Colleges and Schools, The Higher Learning Commission
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools, Commission on Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges
- Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities

Transfer credits from non-US academic institutions must be approved on a case-by-case basis by the academic advising offices in the respective schools. Non-US academic institutions must be degree-granting and recognized and authorized to issue academic records by the appropriate national (or regional) bodies in their home countries.

How the Number of Semester Credits is Determined

For courses offered in semester credits at the host institution, courses will be awarded the same number of semester credits at JHU. For example, if a Calculus I course is offered for 5 semester credits at another institution, it will be transferred to JHU as 5 credits, even though our parallel course is a 4-credit course.

Credit for courses earned at a school using the quarter system will be converted to a comparable number of semester credits. One quarter credit is equivalent to 2/3 of a semester credit.

Other unit systems will be convert to semester credits based on the transcript key provided by the host institution. If a key is not available, credits are evaluated such that one year of full-time coursework at the other school is considered proportional to one year of full-time coursework at JHU.

How Transfer Credits are Posted on a JHU Transcript

The following information is included for each course transferred to JHU:

- name of institution where course was taken
- course title
- JHU course equivalent (if any)
- credits awarded

The grades earned in these courses do not appear on the Hopkins record and therefore do not contribute to the grade point average.

How Transfer Credits are Used Towards a JHU Degree

Courses awarded a direct equivalency to a JHU course will be applied towards any major or minor requirement fulfilled by that equivalent course.

Courses not given a direct equivalency but that are assigned an area designator will apply toward the relevant distribution requirement.

Courses not given a direct equivalency may apply towards major or minor requirements at the discretion of the Director of Undergraduate Studies for the program. They may serve as general electives and credit towards the degree.

Restriction on Courses Taken Without a Letter or Numerical Grade

Ungraded or pass/fail courses taken at another institution prior to matriculation at JHU, if approved, may receive credit if the host school states in writing that the mark represents a grade of C or better.

Restriction on Transferring Duplicate Content

A transfer course will not be approved when the course content has significant overlap with other courses the student has already completed. Likewise, transfer students may not take courses at JHU with significant overlap with prior course content. In cases where a department requires a student to do this, the transfer credit will be zeroed out on the transcript.

Entering Freshman with More than Twelve Transferable Credits

Some students enter the university from high school with additional college course work beyond the 12 credits that may be transferred. If these additional courses are equivalent to subjects that the university accepts for credit by Advanced Placement exams, and if the courses are needed to complete requirements for a major or are prerequisites for higher level courses that the student will take at JHU, then students may request that the department waive the comparable courses at JHU. Waivers do not carry semester credits. Students must contact their respective academic advising office for detailed information about how to obtain a waiver.

Credits Earned at JHU Prior to Matriculation, Including the JHU Pre-College Summer Program

A student who takes JHU courses prior to matriculation as a degree-seeking student may receive credit for those courses completed with grades of C or better, but the grades are not included in the undergraduate record. Because these courses were taken at JHU, they are not subject to the 12-credit transfer rule. Credits earned through this program may be applied to the 100-credit JHU residency requirement (applicable to freshmen matriculating fall 2014 and later). Independent Academic Work (research, study, internship) completed prior to matriculation is not eligible, and will not be reflected on the undergraduate record.

Credits Earned at Other JHU Schools in the Summer

Details about policies related to credits earned at other JHU schools during the summer for KSAS students (p. 1598).

Details about policies related to credits earned at other JHU schools during the summer for WSE students (p. 1096).

Credits Earned Through Study Abroad

For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered “in-residence” and may be included in the 100-credit JHU residency requirement. A student may be awarded a full-year of credit from Hopkins Departmental Programs courses, or up to 30 credits from study abroad courses taken through Hopkins Approved Programs toward their undergraduate degree. Students who earn more than 30 credits in Hopkins Departmental

Programs may apply these additional credits towards the standard 12 credit transfer credit limit with a 42-credit transfer credit maximum from all study abroad and domestic courses combined. Students will be held to the same course load guidelines that apply to course loads and credit overloads in the full-time undergraduate programs in Arts and Sciences and Engineering.

Students may enroll in a combination of semester and/or summer/intersession abroad programs, but students may not enroll in three consecutive fall/spring semesters abroad.

Transfer of Credits from International Institutions without Pre-Approval
Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed and, if acceptable, will be processed as transfer credits, not study abroad credits. Therefore, these credits are subject to the 12 credit transfer maximum.

Deferred Admission
Students who have been accepted to the university may defer admission for up to two years with approval from the director of undergraduate admissions. Freshmen who have deferred admission begin their studies in the fall semester. The purpose of a deferral is to allow students to take time off in order to travel, work, or experience another culture. Deferrals are not granted for the purpose of studying at another institution. Students who wish to pursue academic studies during the deferment period may do so; however, the credits earned during the deferment period will not be applied toward the university's degree requirements.

Special Note for Students on Disciplinary Suspension from Hopkins
While serving a disciplinary suspension, academic work completed at another institution will not be recognized for credit transfer to JHU.

Registering for Courses at Other Colleges and Universities After Matriculation

Students are required to seek pre-approval to transfer credits from courses completed at other institutions. A form for this purpose is available in the advising offices. Directions regarding appropriate signatures and required supplemental materials (typically a detailed course description and/or a course syllabus) are on the form. Courses must be taken for a letter grade and a grade of C or better is required.

In order to transfer credit for previously-approved summer work done elsewhere, students must arrange for an official transcript to be sent to the Office of the Registrar.

International students seeking to take summer courses in their home country must complete International Travel Registration with the Office of Study Abroad prior to submitting pre-approval requests to transfer courses.

Courses at Colleges and Universities in the Baltimore Student Exchange Program (BSEP)
BSEP does not operate during the summer session, therefore courses taken at these institutions during the summer are considered transfer credit and are subject to the same rules and limits as courses from other colleges and universities.

Details about BSEP for KSAS students (p. 1598).

Details about BSEP for WSE students (p. 1096).

Concurrent Registration at JHU and Another Institution
Students may take courses at another institution when registered at JHU and have these courses transfer to JHU only if permission is granted before registering for the courses at another institution. During the fall and spring semesters, students must be registered at JHU for a minimum of 12 credits and the addition of courses at another institution may not exceed our maximum credit limit for the term. During summer term, the total credits across institutions may not exceed the 14 credit maximum. During intersession term, the total credits across institutions may not exceed the 3 credit maximum.

Policies Unique to Students Admitted to JHU as Transfer Students

- Transfer students who completed Advanced Placement or other exams during high school are subject to the same policies as students admitted directly from high school as of the term they matriculate at JHU. We do not transfer exam credits directly from another college or university transcript.
- Students who transfer from the Peabody Conservatory will be granted full credit for performance courses in their major instrument. For performance courses in other instruments, only one credit per semester will be awarded.

Description of Transferable Credit

In order to be transferable, a course does not have to match a currently existing JHU course; however, courses should cover topics that are broadly defined as part of the curriculum at Hopkins. For example, we do not regularly teach a course about horror films. However, since this is a film studies course and we have a major in film and media studies, it's likely that this course would be eligible for transfer. A course can be transferred as either:

1. a direct equivalent to one of our courses, or
2. a generic course affiliated with a field of study.

A course with an identical name at another institution may not transfer as directly equivalent to the course with the same title at JHU.

A maximum of 6 credits may be granted for courses which are in curriculum areas not covered by the fields of study in the School of Arts and Sciences and the School of Engineering.

Additional Details About Course Eligibility for Transfer

- Section One (p. 1107): Common courses not accepted for transfer credit
- Section Two (p. 1108): Common courses with restrictions for transfer credit
- Section Three: (p. 1109) Non-domestic studies
- Section Four (p. 1109): Transferring writing-intensive courses

Section One: Common Courses that will not be Accepted for Transfer Credit
Physical Education or Personal Health and Wellness
Physical Education or Personal Health and Wellness Courses are not accepted.

- However, a maximum of 6 credits in the fields of nutrition, dietetics, or kinesiology may be considered if these courses were part of a curriculum leading to a college degree in the subject.

Study Skills or Career Development
Study Skills or Career Development Courses are not accepted.

- However, courses that are in-depth studies of career paths within a field of study may be considered. Psychology courses in career counseling or learning theory may be accepted.

Math Courses Below the Pre-Calculus Level
Math Courses Below the Pre-Calculus Level are not accepted.

- However, we do accept most introductory statistics courses. We will accept one course designed to review all necessary background for the study of calculus and to introduce the concept of the rate of change of a function.

Theology
Theology Courses are not accepted.

- However, we will consider comparative religion courses or other religion courses that study religion from an academic viewpoint.

Developmental English, English Grammar, or English as a Second Language
Developmental English, English Grammar, or English as a Second Language Courses are not accepted.

- However, we do typically transfer "freshman composition" courses.

Independent Study, Research, or Internship Credits
Independent Study, Research, or Internship Credits are not accepted

- However, hybrid courses that include lectures and graded assignments along with practical experiences are reviewed individually.

Trade Skill
Trade Skill Courses are not accepted.

- Trade skills courses are defined as being part of an educational program leading to a specific trade such as (but not limited to) automotive repair, culinary arts, day care provider, or airplane pilot.

Computer Software
Computer Software Courses are not accepted.

- However, courses that teach some use of software, Internet design and security, basic programming in html or Java, computer aided-design or introduce field-specific software programs may be considered.

Section Two: Common Courses with Restrictions for Transfer Credit
Chemistry
General Chemistry courses intended to serve as a one year sequence for students in the sciences are transferrable. However, because of the variability of these courses, it is often not possible to transfer just one semester of two-semester sequences (or one or two quarters). Syllabi review is required to transfer these courses. Rudimentary introductory chemistry courses intended to prepare students for a year of general chemistry are not transferrable. One-semester chemistry courses intended for non-science majors designed to fulfill general education requirements for non-science student may transfer.

Organic Chemistry Lab
JHU offers a one-semester, three-credit course (AS.030.225 Introductory Organic Chemistry Laboratory or AS.030.227 Chemical Chirality: An Introduction in Organic Chem. Lab, Techniques) that is recognized by medical schools as being equivalent to other institutions' typical year-long introductory organic lab courses that are frequently 1 credit each. To transfer these lab courses from other institutions, students must take both semesters at the other institution, as one semester alone is not transferable. If the course lecture and lab are taught as a single course unit at the other institution, students must take the full year-long sequence of the course lecture and lab in order to transfer the courses to JHU. Our course AS.030.228 Intermediate Organic Chemistry Laboratory is an intermediate level organic chemistry laboratory course intended for only chemistry majors and typically goes beyond other institutions' expectations of students from introductory organic chemistry lab.

Physics
General physics courses, typically covering the topics of mechanics, heat, sound, electricity and magnetism, optics, and modern physics intended to serve as one year of physics study for students in the sciences, may be transferred if the course was taught using the principles of calculus. Those courses that do not require calculus knowledge will not transfer. Rudimentary introductory physics courses intended to prepare students for a year of general physics will not transfer. Introductory one-semester physics or astronomy courses intended for non-science majors, for example those offered to help students fulfill general education requirements, may be transferred.

Finance
We accept transfer credits for corporate finance courses that may include, but are not limited to, understanding the design and functioning of financial markets or modeling financial forecasting and decision making. We do not transfer credit for personal finance courses designed to teach the individual consumer about topics such as money management, budgeting, home mortgages, personal tax, individual insurance, or investing.

Graphic Design
In order to be considered for transfer, graphic design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include design theory and practices. These carry no area designation. Courses that focus solely on software usage will not transfer.

Website Design
In order to be considered for transfer, website design courses must be taught as part of the required curriculum for a major leading to a degree at the offering institution and the course content must include some programming components. Courses that solely focus on usage of productivity software such as word processing, spreadsheet, presentation, database, graphics editing, accounting, statistical processing, or webpage creation will not transfer.

Internet/Social Media
Marketing courses that discuss the effective use of social media concepts and tools, search engine optimization (SEO) or other analytical market analysis techniques, and content creation and management strategies for marketing campaigns will be considered. However, courses teaching effective use of the internet for personal research or educating the lay person about its structural design or usage of social media will not transfer.

Medical Terminology
In order to transfer a course teaching medical terminology, the course must have:

1. an emphasis on etymology from Latin and Greek (as opposed to just learning word parts per se; i.e. the course has to have some direct and explicit treatment of the ancient languages) and

2. a significant historical/cultural component, involving study of the history of medicine (including at least some ancient material).

American Sign Language
If offered for degree credit at the host institution, courses in American Sign Language may transfer. It is at the discretion of a department if the language may be used to fulfill the foreign language requirements of a major or minor.

College/University Orientation
Credit-bearing courses designed to promote student success may be considered for transfer. Courses should include topics such as: learning strategies, study techniques, career readiness, academic planning, and how to engage in the academic/campus community. Courses focused only on campus-specific topics will not transfer.

Section Three: Non-Domestic Studies
For Those Attending Programs Leading to the Medical Profession
In several countries around the world, students enter higher education programs that lead to a medical degree without the completion of the United States equivalent to a bachelor's degree. We do not transfer credits from these types of programs.

US Citizens Who Studied Abroad Prior to Acceptance as a Transfer Student to JHU
Like our international students who studied internationally before transferring to Johns Hopkins, courses taken abroad by US citizens either through study abroad programs or direct matriculation at international institutions will be processed as transfer credits, not as study abroad credits. A transcript from the originating institution will be required.

Composition Courses not Taught in English
Courses taught in a language other than English that mimic the typical "freshman composition" or "expository writing" courses found in the United States will transfer. These courses will be reviewed for transfer credit as potential courses in our English Department (home of our Expository Writing Program), not as foreign language courses. They may not be used to meet the JHU writing-intensive requirement.

Current JHU Students Studying Internationally in Their Home Country
Study Abroad eligibility restrictions during the academic year for KSAS students (p. 1611).

Study Abroad eligibility restrictions during the academic year for WSE students (p. 1109).

During the summer, courses may be taken in a student's home country or country of citizenship. Students follow the procedures for pre-approval of transfer credits. Such courses are subject to the 12-credit transfer rule.

Courses Unique to China
We do not transfer three commonly required courses: Introduction to Mao Zedong Thoughts, Ideological and Moral Cultivation and Fundamentals of Law, and Principles of Marxism.

Transferring of Writing-Intensive Credits

Section Four: Details About Transferring Writing-Intensive Credit
Students may transfer up to 6 credits of writing-intensive credit for a course(s) under these conditions:

1. The course must meet University criteria (http://krieger.jhu.edu/ewp/writing-requirement/) for a writing intensive course.
2. Students must take the course during the regular academic year, in either fall or spring semester (there is no writing-intensive transfer credit for summer courses).
3. Students must have a grade of B or higher in the course.
4. First-year KSAS students cannot be exempted from the Reintroduction to Writing course based on the transfer of another writing course. KSAS transfer students may have a transfer course evaluated to serve as a substitution for the Reintroduction to Writing course.

Review of transfer and study abroad courses for writing intensive credit is conducted by the University Writing Program and student should reach out to uwp@jhu.edu for directions.

Study Abroad Policies

The Johns Hopkins University views international education as an integral component of its academic mission. Not only does the university actively encourage enrollment of a diverse international and multicultural student body, but it strives to provide students with educational opportunities throughout the world. More than 33% of Johns Hopkins undergraduates study abroad.

For undergraduates in the Krieger School of Arts and Sciences and the Whiting School of Engineering, Johns Hopkins University offers a wide variety of international opportunities including departmentally sponsored intersession and summer programs, semester-based programs, and full-year programs at major universities in Europe, Africa, Latin America, Asia, Oceania, and the Middle East.

JHU accepts credit for coursework taken abroad toward major and minor requirements, as well as toward general graduation requirements. The vast majority of students who study abroad graduate on time. What is more, upon successful completion of a program abroad, students may choose to build upon their international experience in graduate or professional school. The advisors in Pre-Professional Advising and the Life Design Lab work with students to maximize the benefits of a program abroad.

Visit https://studyabroad.jhu.edu/ or call (410) 516-8400 for more information.

Study Abroad Programs

Hopkins offers students two options for study abroad: departmental programs and approved external programs. Some programs managed by Hopkins and most programs managed by third-party providers offer the highest level of on-site support. Exchange programs and direct enrollment programs at foreign universities are well suited to more independent students who have prior experience living abroad. We encourage students to consider their personal background and comfort levels when choosing a study abroad option.

Johns Hopkins Departmental Programs

Many academic departments sponsor study abroad programs that directly support major and minor requirements. Whenever possible, qualified students in these majors are encouraged to participate in departmental programs. Some Hopkins programs offer direct course equivalencies or elective credits in the sponsoring department. Hopkins departmental programs vary with regard to the level of support that students receive while abroad. ***Effective Spring 2023** Grades in courses from these programs will post on students' Hopkins transcript and be included in students' Hopkins grade point average only if the courses are taught by Hopkins faculty or if the curriculum has Hopkins faculty oversight. For courses that do not meet this criteria, the grades will not post on the Hopkins transcript or be included in the Hopkins grade point average.

Johns Hopkins Departmental Programs include the following categories:

- BA/MA programs abroad
- Semester and year programs managed by Hopkins or external organizations
- Johns Hopkins exchange programs
- Johns Hopkins Summer Programs Abroad
- Johns Hopkins Intersession Programs Abroad

Approved External Programs

The Office of Study Abroad and its Faculty Advisory Committee have vetted universities and specialized programs that offer courses in specific areas, disciplines, or locations where departmental programs may not be feasible.

Major/minor credits must be pre-approved by the Hopkins Director of Undergraduate Studies (DUS) for students' majors or minors prior to participation. Grades from the programs will not post on the Hopkins transcript or be included in the Hopkins grade point average.

Approved External Study Abroad Programs include the following categories:

- Direct enrollment in a university abroad
    - Students may transfer credit from approved colleges and universities throughout the world. Where possible, students are strongly encouraged to apply to study at international universities through a third-party provider for guaranteed housing and emergency support. Students take regularly scheduled courses with national and international students.
- Third-Party provider programs
    - These specialized programs provide study abroad opportunities for language acquisition, field experience, research, and disciplinary courses— often in less common locations. Third-party providers offer additional support services, including assistance with applications, visas, travel arranging, housing, course registration, emergencies, and onsite support. Students who wish to study at a university abroad are strongly encouraged to apply through a third-party provider.

Non-Approved Programs

Johns Hopkins does not encourage students to participate in non-approved/unvetted programs. Students with sound academic rationales for participation in an unvetted program are required to petition for approval. Note that non-US academic institutions must be degree-granting and recognized and authorized to issue academic records by the appropriate national (or regional) bodies in their home countries. In addition to academic standards, the review committee will vet the program to ensure it meets standards for health, safety, and emergency support.

Eligibility

Students are required to meet with a study abroad advisor prior to applying to study abroad. All study abroad programs must be approved by the Office of Study Abroad prior to participation in order to receive credit toward Hopkins degree requirements.

Eligibility for study abroad can vary by program type. Students must meet the minimum eligibility requirements of both Johns Hopkins University and the program abroad.

Johns Hopkins Eligibility Requirements

- Term GPA of 3.00 or higher the semester of application.
- Students must complete their last semester prior to graduation in residence at the Homewood Campus.
- Students must be in good academic, disciplinary, and financial standing with the university.
    - **Disciplinary Standing:** Students currently on university probation as a result of Student Conduct Code violations may apply for study abroad, but must have completed their probationary period prior to the start of their program abroad. Students with disciplinary sanctions more severe than university probation (e.g. Deferred Suspension, Suspension, or Expulsion) are not eligible to apply for nor participate in study abroad during the pending sanction. If a university disciplinary sanction occurs between the time of acceptance to and the start of a program abroad, Johns Hopkins will review the disciplinary action and may decide to withdraw the student from their program abroad.
    - **Financial Standing:** Students with a financial hold at the time of registration for their program abroad must be cleared by the Office of Student Accounts. Registration and dispersal of financial aid may be affected if financial holds are not lifted prior to the start of a student's program abroad.
- Leave of Absence: Students may not apply for study abroad while on any type of Leave of Absence. Students must be enrolled in residence at the Homewood Campus the semester prior to studying abroad. Study abroad may not be deferred due to a Leave of Absence, and students will be required to reapply for study abroad upon their return from a Leave of Absence.

Program Eligibility Requirements

Many programs have additional eligibility requirements. In some cases those requirements will be more stringent than the Hopkins eligibility requirements.

The program-specific eligibility requirements might include:

- Language proficiency requirements: if required, students must demonstrate language proficiency at the college level, either through courses taken at a U.S. college or university, or through university-administered placement exams
- Cumulative GPA of 3.0 or higher (e. g. Oxford requires a minimum cumulative GPA of 3.7)
- One year or more of college-level education
- Course prerequisites: students must have met course prerequisites, as determined by the program or host institution

Credit and Residency Requirements for Study Abroad (Students Who Enter JHU from High School)

For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered "in-residence" and may be included in the 100-credit JHU residency requirement. A student may be awarded a full year of credit toward their undergraduate degree from courses taken on Hopkins Departmental Programs, or up to 30 credits from courses taken on Hopkins Approved External Programs toward their undergraduate degree. Students who earn more than 30 credits on Hopkins Departmental Programs may apply these additional credits towards the standard 12-credit transfer credit limit with a 42-credit transfer credit maximum for all study abroad and domestic courses combined. Students abroad will be held to the same course load guidelines that apply to course loads and credit overloads in the full-time undergraduate programs in Arts and Sciences and Engineering.

Students may enroll in study abroad in a combination of semester and/or summer/intersession programs abroad, but students may not enroll in three consecutive fall/spring semesters abroad.

Students may participate in summer and intersession programs abroad any term after matriculation and prior to graduation.

Students who enter the university from high school must have completed at least three semesters of undergraduate coursework in Arts and Sciences and/or Engineering at Hopkins prior to enrolling in a semester/academic year program abroad. This means a student may study abroad for a semester, or academic year, beginning with the second semester of their sophomore year through the fall semester of their senior year. An exception to this policy is the Hopkins Oxford St. Anne's College program which offers a full year abroad for sophomore students.

Credit and Residency Requirements for Study Abroad (Transfer Students)

A student may be awarded a full year of credit toward their undergraduate degree from courses taken on Hopkins Departmental Programs, or up to 30 credits from courses taken on Hopkins Approved External Programs. All transfer students must complete at least four full-time semesters in residence at JHU. With the exception of courses taught on Johns Hopkins SAIS Campuses abroad, study abroad programs offered during fall and spring semesters do not count towards this four-semester requirement. Transfer students must be in residence for at least two of their final four semesters, including the final semester prior to graduation.

Students who enter the university as transfer students must complete at least 60 credits at JHU. The only study abroad programs that count toward these 60 credits are courses taught by JHU faculty abroad during summer and intersession or courses taught on one of the Johns Hopkins SAIS Campuses abroad.

Transfer students must have completed at least two semesters of undergraduate coursework in Arts and Sciences and/or Engineering at Hopkins prior to enrolling in a semester/academic year program abroad. Transfer students may participate in summer and intersession programs abroad any term after matriculation and prior to graduation.

Study Abroad in Home Country/Country of Citizenship

International students are encouraged to take full advantage of study abroad opportunities by pursuing studies outside the United States and their home countries. Johns Hopkins will not approve semester or academic year study abroad at locations where students have completed secondary education or where they have lived and/or worked within eight years of matriculation at Johns Hopkins. Students who wish to take courses at universities in their home countries during the fall or spring semesters will be asked to submit a petition for an exception to this policy. Students must present a strong academic rationale for the program.

International students may take courses in their home countries during intersession or summer for transfer credit. There is a two-step process involved with transferring the credits to JHU from an institution within a student's home country.

1. Register the home country study with the Office of Study Abroad (https://jhu-sa.terradotta.com/?FuseAction=Programs.ViewProgramAngular&id=10756)

2. Follow the Transfer Credit process for the appropriate school:

- Krieger School of Arts & Sciences (https://advising.jhu.edu/transfer-courses/current-ksas-undergraduates/)
- Whiting School of Engineering (https://engineering.jhu.edu/advising/advising-questions/)

Academic Policies

Matriculation Status

All students on study abroad programs who have completed the mandatory procedures established by Johns Hopkins prior to departure remain enrolled as full-time, matriculated students. This official status is recorded as off-campus matriculated.

Expectation of Program Completion

Students are required to remain on their programs abroad until their designated "end of the program" as determined by the host institution. The "end of the program" includes mandatory activities, final examinations and revisions that may fall on or after the final day of classes. Students who experience an emergency abroad should follow the directions on the Study Abroad website (https://studyabroad.jhu.edu/about-us/emergencies/).

Students who need to leave a program abroad prior to the "end of the program" for non-emergency reasons must petition and receive approval from the JHU Office of Study Abroad prior to requesting early departure from the host institution. Students must notify the JHU Office of Study Abroad as soon as they are aware of the need to leave a program early. Petitions will not be accepted after the middle of term at the host institution. Once approved by JHU, students are subject to the rules, regulations and protocols governing early departure as defined by the program or host institution.

Students should be aware that final grades and/or credit from the program or host institution may be affected by early departure.

Credits Required for a Semester/Academic Year Abroad

Students are required to enroll in the equivalent of 15 credits per semester while abroad. Students who wish to take fewer than 15 credits, or more than 18.5 (KSAS) credits or 19.5 (WSE) credits, in a semester must submit a petition for approval through the Office of Study Abroad.

Credit for Courses Taken Abroad

For the purposes of fulfilling university residency requirements, up to 30 credits from study abroad courses are considered "in-residence" and may be included in the 100-credit JHU residency requirement. A student may be awarded a full year of credit from Hopkins Departmental Programs courses, or up to 30 credits from study abroad courses taken on Hopkins Approved External Programs toward their undergraduate degree. Students who earn more than 30 credits on Hopkins Departmental Programs may apply these additional credits towards the standard 12-credit transfer credit limit with a 42-credit transfer credit maximum from all study abroad and domestic courses combined. Students abroad will be held to the same maximum course load guidelines that apply to course loads and credit overloads on the Homewood Campus.

As part of the Hopkins application process, students are required to have pre-approval for transfer of credit for all overseas course work prior to studying abroad. Pre-approval of transfer credits toward major and/or minor requirements is granted by the Director of Undergraduate Studies (DUS) in the student's academic department(s). Pre-approval of transfer credit toward distribution requirements is granted by the Director of Study Abroad. Final approval of credit and transfer of courses occurs after students have returned to Hopkins. Transfer of credit for courses taken abroad follows the External Credit Policies (p. 1604) detailed in this catalogue under Undergraduate Academic Policies.

Courses must be completed with a grade equivalent of C or better to be eligible for transfer of credit toward a Hopkins degree. Transcripts from the program abroad should be sent to the Office of Study Abroad for credit evaluation and determination of transfer credit. Students will be notified when their official program transcript has been received.

Students should save electronic copies of syllabi, course descriptions, reading lists, assignments, papers, and examinations. Students may need to submit these to the Office of Study Abroad and/or the DUS for their major(s) and/or minor(s) in order to complete the credit evaluation, and the awarding of transfer credit.

Transfer of Credits from International Institutions without Pre-Approval

Students who pursue coursework at an international institution without pre-approval may request these credits be transferred after completion. However, these credits will be reviewed, and if acceptable, will be processed as transfer credit, not study abroad credit. Therefore, these credits are subject to the 12 credit transfer maximum.

Grades and Transcripts

Courses taken through off-campus programs are entered onto the official Hopkins transcript along with the name of the host institution and the location of the off-campus program.

Hopkins must receive an official transcript, faculty grade report, or the equivalent official evaluation to transfer courses, credits, and/or grades from off-campus programs. Students must take courses for letter or numeric grades at the host institution to be eligible for transfer of credit toward the Hopkins degree. Students will not be eligible to receive credit for courses taken pass/fail on off-campus programs. Students must receive the equivalent of a C (satisfactory) or higher in order to transfer credit from off-campus programs.

Grades from Hopkins Departmental Programs (Select Semester and Year Programs Abroad, Hopkins Summer Abroad and Hopkins Intersession Abroad):
*****Effective Spring 2023: This applies only to courses taught by Hopkins faculty or where the curriculum has Hopkins faculty oversight.*****

- Courses and credits will appear on the JHU transcript as AS/EN/HA with JHU course numbers.
- Grades for courses taught by JHU faculty abroad will post to the JHU transcript and factor into the term and cumulative GPA. They will also appear on the degree audit.
- Grades from courses taken at another institution abroad will be converted to U.S. grade equivalents based on JHU grade conversions in order to determine that a grade of C or better was earned.
- Courses with the HA prefix (HA.xxx.xxx) will be issued letter grades based on the grade conversion. In some cases, an S/U grade may be awarded in lieu of a letter grade, should the academic department determine that this is more appropriate. These grades will post to the JHU transcript and factor into the term and cumulative GPA and will also appear on the degree audit. This is applicable only to the first 30 credits earned through Hopkins Departmental Programs.
- Grades for courses with an AS or EN prefix (EN.xxx.xxx) taken at another institution abroad will be issued the administrative letter grade of SA, which will not post on the JHU transcript; and hence, no grade is calculated in to the term or cumulative GPA. The SA grade will appear on the degree audit. This is applicable to the first 30 credits earned through Hopkins Departmental Programs.
- For programs where more than 30 credits are awarded, the additional credits will be issued an administrative grade of TR and these credits apply towards the student's limit of 12 transfer credits.

*****Effective Spring 2023: Grades from Hopkins Approved Programs (and Hopkins Departmental Semester/Year Programs where courses are not taught or overseen by Hopkins faculty):**

- Courses and credits will appear on the JHU transcript as AS/EN/TR courses with generic department and level designations (e.g. TR.100.300) or a direct equivalency to a JHU course (e.g. AS.020.305).
- Grades from the other institution will be converted to U.S. grade equivalents based on JHU grade conversion in order to determine that a grade of C or better was earned.
- The administrative grade of SA will be issued to each course and it will not post on the JHU transcript; and hence, no grade is calculated into the term or cumulative GPA. The SA grade will appear on the degree audit.
- The maximum number of credits that can be earned in a Hopkins Approved Program is 30.

Housing Policy

Johns Hopkins University vets and approves study abroad programs based on academic quality, cultural immersion, and health/safety practices. Housing is an integral aspect of the abroad experience in that it promotes language and communication skills and provides opportunities for personal growth. In addition, housing organized by program sponsors provides an additional layer of safety and security.

For these reasons, JHU requires the use of program-established housing in homestays, residences, dormitories, or program-provided apartments by all Hopkins students on approved study abroad programs. Furthermore, JHU strongly encourages students to participate in a homestay experience if that option is available. Students who want to arrange independent housing abroad should set up an appointment to meet with a Study Abroad Advisor to discuss options and petition for approval.

Study Abroad at Locations Under U.S. Department of State/CDC Level 3 or 4 Travel Advisories

The U.S. Department of State (DOS) and Centers for Disease Control & Prevention (CDC) issue a Travel Advisory for each country of the world. Travel Advisories follow a consistent format and use plain language to help U.S. citizens find and use important security information. Travel Advisories apply up to four standard levels of advice, describe the risks, and provide clear actions U.S. citizens should take to help ensure their health and safety abroad.

Undergraduate international travel will not be permitted or funded at any locations with a Level 4 “do not travel” designation. Students with a sound academic rationale may petition for an exemption to the policy for sites advising travelers to “reconsider travel” or “avoid non-essential travel” (e.g. DOS Level 3 or CDC Level 3).

Financial Structure of Study Abroad

Departmental Programs (semester/academic year)

Students studying abroad in semester and/or year JHU departmental or exchange programs are charged Hopkins tuition. In most cases, an additional fee is assessed to cover services that might include housing, international health insurance, emergency services, and logistical and academic support. Students are billed through the Homewood Student Accounts Office.

Departmental Programs (intersession/summer)

Students studying abroad in a Hopkins faculty-led summer or intersession program are charged the program fee and billed through the Homewood Student Accounts Office. Fees vary by program, with some including charges for services such as airfare and/or meals.

Approved External Programs (semester/academic year)

Students who study abroad through an approved semester/year external program are charged the cost of their program as established by the host university or provider and a study abroad and registration fee equivalent to 12% of Johns Hopkins tuition. Johns Hopkins is responsible for making direct payments to host universities and providers on behalf of students. Fees will be posted to students’ Hopkins SIS accounts by the Student Accounts Office.

Approved Programs (intersession/summer)

Students who study abroad through an approved intersession or summer external program are charged the cost of their program as established by the host institution or provider and a JHU per-credit study abroad fee. The per-credit study abroad fee is based on a per-credit proration of the JHU 12% study abroad fee (12% of Full-Year Tuition/30 credits = per credit study abroad fee). The per-credit fee will be assessed on the number of credits students wish to apply toward their Johns Hopkins degree, not on the number of credits awarded by the host institution or provider.

Johns Hopkins is generally responsible for making direct payments to host universities and providers on behalf of students. Fees are posted to students’ Hopkins SIS accounts by the Student Accounts Office.

Additional Costs Associated with Any Program Type

Students are responsible for all additional costs that are not included in mandatory fees. Additional costs may include: housing, airfare, personal expenses, meals, visas, and other incidental expenses. Some programs may include costs for many of these services as part of their mandatory fees. In those cases Hopkins will include those fees when making direct payment to the provider on behalf of students.

Billing

Study Abroad fees will be assessed to a student’s SIS account by the Homewood Student Accounts Office. Johns Hopkins makes payments on students’ behalves for tuition and the program deposit.

The Homewood Student Accounts Office posts charges in SIS on or about July 1 for the fall semester, December 1 for intersession, December 1 for the spring semester, and May 1 for summer. Payment arrangements may be made through the Homewood Student Accounts Office.

The Office of Study Abroad creates a program financial budget worksheet for each student which reflects the estimated cost of attendance for their program, and details which fees will be posted on student’s SIS account. The financial budget worksheet should be used to assist students and their parents/guardians in calculating expenses (the cost of attendance) associated with an academic program abroad. Students can find estimated budgets on the specific program pages on the Office of Study Abroad website. Fees are approximate and subject to change. Students should contact the Office of Study Abroad if an estimated budget is not available on the website.

Financial Aid

Johns Hopkins extends portability of federal, state and institutional financial aid to Johns Hopkins Departmental Study Abroad Programs and Approved External Study Abroad Programs for the fall semester, spring semester or academic year. Financial aid, including institutional aid may be applied toward the cost of these programs.

For the semester study abroad, the JHU Grant will not increase, even if the study abroad cost is greater than the cost to attend Hopkins. The JHU Grant for the semester study abroad may decrease if the study abroad cost is less than the cost of attendance at Hopkins. Students’ financial aid will be credited to their SIS account.

Only loan assistance or study abroad scholarships can cover additional expenses. In most cases, financial aid does not apply to summer and intersession programs. Students may be eligible for external study abroad scholarships.

Refund Policy

Students with credit balances may request a refund. Refund requests cannot be processed any earlier than 10 days prior to JHU’s first day of classes for each semester. Refund information is available at https://studentaffairs.jhu.edu/student-accounts/refunds/.

Students should consider study abroad options carefully prior to making a commitment. Students who withdraw from a study abroad program after having committed to either Hopkins or the program provider, are responsible for all non-recoverable costs associated with their program. After receipt of a final billing statement from the student’s program, Hopkins will refund recoverable expenses, excluding non-refundable deposits. Recoverable expenses are determined by the program provider in consultation with JHU.

If for any reason study abroad plans change, the Office of Study Abroad should be contacted immediately so that the financial impact of the voluntary withdrawal can be determined.

Students involuntarily withdrawn or dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad and are responsible for any costs incurred by early dismissal.

Should Hopkins cancel or suspend a study abroad program, the Office of Study Abroad will work with students to either refund recoverable costs or apply fees toward alternate academic programs. Should a provider cancel or suspend a program after the on-site program has begun, the Office of Study Abroad will work with the student and the provider to obtain refunds and to assist in making the student academically whole to the extent possible under the given conditions.

Conduct and Ethics

Conduct

Students are responsible for their own actions, activities and behavior while participating on a program abroad. Serious consideration of health and personal circumstances should be taken in to account by students when applying for or accepting a place on a program abroad.

Students are obligated to be aware of and comply with local laws and customs while abroad. Respect of local customs includes the conscious awareness of cultural attitudes toward alcohol use and sexual behavior. As representatives of JHU in other countries, we ask that students behave in a manner that is respectful of the rights and well-being of others.

Conduct considered unacceptable to Johns Hopkins University includes, but is not limited to, excessive consumption of alcohol; loud and/or abusive behavior; sexual harassment; criminal conduct of any kind, including the purchase, sale, possession or use of drugs other than prescribed medication for legal medicinal purposes. Students' must notify JHU Office of Study Abroad of any disciplinary or legal issues while abroad.

Students participating in programs abroad are expected to adhere to the Johns Hopkins University Undergraduate Student Code of Conduct (https://studentaffairs.jhu.edu/policies-guidelines/student-code/), the policies of the program abroad, and the terms set forth in the Study Abroad Conditions of Participation agreement.

Violations of the Code of Conduct, Conditions of Participation and Program Policies

Students who are alleged to have violated the Hopkins Undergraduate Student Conduct Code, the policies of the program, and/or standards of academic integrity while abroad will be reported to the program director, and the JHU Director of Study Abroad. If a violation is determined to have occurred, the program director in collaboration with the JHU Director of Study Abroad will take appropriate disciplinary action, which may include immediate dismissal from the program.

A student dismissed from a program for cause will receive no refund, may not be eligible for credit for coursework completed on the program abroad, and is responsible for any costs incurred by early dismissal.

Students must maintain both academic and disciplinary eligibility through the designated start of their study abroad program. Students' academic and disciplinary records may be reviewed prior to departure. If records indicate a significant decline in GPA, if a cumulative or term GPA falls below JHU or program requirements, and/or if academic and/or disciplinary sanctions are imposed prior to departure, a student may be involuntarily withdrawn from an approved study abroad program.

Academic Ethics

All study abroad students are bound by the Johns Hopkins University Code of Academic Ethics both during the application process and while abroad. Students are obliged to refrain from acts which they know, or under circumstances have reason to know, violate the academic integrity of the University. Violations of academic ethics include, but are not limited to: cheating; plagiarism; submitting the same or substantially similar work to satisfy the requirements of more than one course without permission; submitting as one's own the same or substantially similar work of another; knowingly furnishing false information to any agent of the University for inclusion in academic records; falsification, forgery, alteration, destruction or misuse of official University documents or seal. All students must sign a Conditions of Participation agreement to adhere to this policy as part of the application process.

Institutional Research Board (IRB)

Students whose research will involve human subjects (including research using surveys, focus groups, or interviews) must apply to the Homewood Institutional Review Board (HIRB) (https://homewoodirb.jhu.edu/) for either an exemption or approval. IRBs are federally mandated and serve to ensure that researchers take appropriate measures to minimize risks for participants, inform participants of any risks that may remain, and obtain participant consent.

To obtain permission, a request should be sent via email to the HIRB Office describing the research, including a detailed description of the topic and research methods. If interviews are a part of the research proposal include sample questions and details about how respondent's privacy will be protected. The HIRB Office will contact applicants and inform them if their research is exempt from review or if the proposal will need to undergo the HIRB process. The review process takes two to six weeks.

Graduation Policies

Applying to Graduate

Students who intend to graduate in the next academic year must complete an Application for Graduation as directed by their respective academic advising office. The graduation application deadlines are also posted on the Homewood Registrar's Office website (https://studentaffairs.jhu.edu/registrar/students/graduation/). The university confers degrees three times per academic year, and there is one annual commencement ceremony in May.

Graduating in May

Most students who enter the university directly from high school graduate in May after eight semesters of full-time enrollment. Full-time enrollment is a minimum of 12 credits. Part-time enrollment is not permitted within a student's first eight semesters. Students are required to have full-time status in the semester immediately prior to graduation, and must therefore be enrolled for at least 12 credits in the final semester even if all course and credit requirements could be met with fewer than 12 credits. The May conferral date is the Thursday before Memorial Day which is usually the University-wide Commencement date.

Graduating in August

A small number of students complete their degree during the summer. Students who have completed eight full-time semesters may graduate in the summer if all degree requirements have been satisfied by the degree conferral date (last weekday before the fall term start in August). Students who have not completed eight full-time semesters should see the Graduating Early (p. 1115) policies.

Graduating in December

A small number of students complete their degree at the end of the fall semester, which does not include Intersession. Students may graduate in December if all degree requirements have been satisfied by the degree conferral date (defined as the last weekday in December). Students are required to maintain full-time status (enrolled for at least 12 credits) in their final semester, unless they are in their ninth semester or later.

Note for students who entered as transfer students:

Transfer students are not subject to the eight semester full-time restrictions as listed above. Transfer students must complete at least four full-time semesters at JHU before they are eligible to graduate.

Completing Graduation Requirements

Students are responsible for completing the requirements for a bachelor's degree as indicated for KSAS student (p. 1587)s, and WSE students

(p. 1086). All grades and credits for courses that are required for graduation must be submitted in time to clear students for graduation.

Each student expecting to graduate will receive a final bill from the university. It is university policy that all outstanding accounts must be paid in full before a student's diploma may be released.

Students who have not completed degree requirements after eight full-time semesters (or four full-time semesters for transfer students) of enrollment may register for less than 12 credits, and pay for courses on a per credit basis. With approval of the director of the student's respective academic advising office and the major department (in the case of courses required for the major), these students may take courses elsewhere to meet the remaining graduation requirements, but must observe the 12 credit limit on transfer credit. These students also may have part-time status in the semester when they graduate. If applicable, students should consult with the Office of Financial Aid prior to part-time enrollment. Part-time undergraduate students are not eligible for coverage if enrolled through JHU's Student Health Benefits.

Graduating students who are taking courses through the Baltimore Student Exchange Program (BSEP) or in other divisions of the university must make arrangements with their instructors on the first day of class to have final grades submitted to the host registrar and then to the Homewood Registrar by the Homewood deadline for submitting grades for graduating students. If such an arrangement cannot be made, students should not remain enrolled in the course.

Students who graduate in December may remain in university housing and/or continue to participate in student organizations only if they enroll for a minimum of 6 credits during the following spring semester.

A student will not be graduated with unresolved outstanding charges of misconduct or academic ethics violations.

The university does not guarantee the award of a degree. The award of degree is conditional upon

1. satisfaction of all degree and instructional requirements in effect at the time of matriculation as a degree-seeking student (as published in the relevant annual catalogue),
2. compliance with the current university and divisional regulations
3. performance meeting the bona fide expectations of the faculty.

No member of the faculty is obliged to provide students or graduates with an evaluation or letter of recommendation which does not accurately reflect the faculty member's true opinion and evaluation of the student's academic performance and conduct.

Students who have completed eight or more undergraduate semesters may take an additional course or two after graduation to complete a second major or minor if they have filed an approved plan with their respective advising office *before* their initial graduation date. For additional details, please review the complete policy in the Student Status section, Alumni Enrollment tab.

Graduating Early (less than 8 semesters)

Students are eligible to graduate early at the end of the fall or spring semester if they have completed all requirements for graduation, including the residency requirement. Students graduating early may not use intersession as a final term to complete remaining graduation requirements. Students may not graduate early during the summer except in the circumstances described below:

- Student has at most two incomplete grades in spring semester required courses, or
- Student has one incomplete grade in a spring semester required course and needs one required course in the summer, or
- Student needs one required course in the summer.

These students must meet with their respective academic advising office prior to the May commencement ceremony to file an August conferral plan. This plan requires proof of summer course registration, if applicable.

Students who graduate in fewer than eight semesters may also take courses after graduation as a full-time or part-time student if not completing an additional major or minor. Students who graduate early lose the opportunity to complete additional majors or minors after graduation.

Incomplete Grades and Graduation Status

Students with incomplete grades or missing grades in required courses at the date of conferral will not graduate.

Students who have completed at least eight full-time semesters and have met the residency requirement and who receive one or more incomplete grades in their last semester in attendance, may complete those incomplete grades and are not required to register for additional coursework unless required for their degree.

Students who have completed less than eight full-time semesters and:

- who receive one or two incomplete grades in required course(s) during their intended last spring semester should review the Graduating Early (p. 1115) policies.
- who receive three or more incomplete grades during their intended last spring semester are required to register for another full-time fall semester (at least 12 credits) in order to complete all degree requirements, including the residency requirement.
- who receive incomplete grades in required course(s) during their intended last fall semester must resolve these incomplete grades no later than the December degree conferral date or register for another full-time spring semester (at least 12 credits) in order to complete all degree requirements, including the residency requirement.

Last Semester Option

In their last semester before graduation, students may request that they be excused from taking the final examination in one or more courses. This option is solely at the discretion of the course instructor. This option is not available to students who are graduating early.

S/U Option in the Last Semester

Students in their final semester, who will have completed at least eight full-time semesters of enrollment when they graduate and who are taking more credits than are needed to complete graduation requirements, may take one or more of the extra courses for S/U credit. Engineering students must have the faculty advisor's permission, indicated by their signature on an add/drop form, to request this option. The faculty advisor's signature indicates that the student will have completed all degree requirements without this course. In addition, a signature from the Engineering advising office is needed to confirm that the senior has applied for graduation in their eighth (or later) semester. Arts & Sciences students must obtain approval from the Academic Advising Office.

Independent Work in the Last Semester

Students in their final semester, who will have completed at least eight full-time semesters of enrollment when they graduate and who are taking more credits than are needed to complete graduation requirements, may take up to 6 credits of independent academic work, either graded or S/U. In addition, the usual limit of no more than 6 credits per year of independent academic work will be waived if the additional credits are for extra credit work done in the final semester.

Graduation Closes the Undergraduate Record

Upon graduation, the undergraduate record is closed. The only permitted changes are the resolution of incomplete grades, missing grades, and grade errors. These changes must be resolved by the first Monday after 30 days have lapsed since the degree conferral date. Students wishing to take additional courses at JHU after graduation should refer to Alumni Enrollment policies.

General and Departmental Honors at Conferral

Students may receive general honors, departmental honors, or both at conferral. General Honors are awarded to students with cumulative grade point averages of 3.50 or better. The final determination is made after all grades have been reported. Departments set their own standards for the award of Departmental Honors. Students should consult with the Director of Undergraduate Studies for their major about the requirements for departmental honors.

General and Departmental Honors are noted on a student's academic record following the student's last undergraduate semester before conferral. In addition, honors are noted in the Commencement program. However, because the program is printed several weeks in advance, not all honors are announced in time for inclusion.

Completing Honors in the Major

Students who are completing requirements for Honors in their major must complete all requirements to earn honors before conferral. For example, students may not stay on after graduation to complete an honors thesis, present a poster or give a presentation, or write a final research summary.

Commencement

The university commencement ceremony (https://commencement.jhu.edu/) is held once each year in May.

The student's respective academic advising office determines whether a student has completed all requirements, and clears the student for conferral and participation in Commencement. Students who graduate in August, December, and May are invited to participate in the Commencement Ceremony in May following their degree completion. Students who graduate in August may receive permission to walk in the May ceremony preceding degree completion if they file an August conferral plan with their respective academic advising office. The diploma and degree will not be awarded until all courses are completed successfully and recorded.

Student Life Policies

Student life policies and guidelines assist students in understanding expectations, processes, and procedures during their time at the University. The Office of the Vice Provost for Student Affairs maintains these Policies & Guidelines (https://studentaffairs.jhu.edu/policies-guidelines/).

Graduate Policies

Johns Hopkins University is proud to offer a rigorous and interdisciplinary graduate education taught by faculty who are academic and research leaders in their fields. Across the nine divisions of the university there are approximately 20,000 full-time and part-time graduate students working in over 180 fields of study. Combined with exceptional university facilities and resources, the endeavors of graduate students have contributed to groundbreaking discoveries, expansive and innovative collaborations, and the advancement of knowledge throughout the university and beyond.

The policies, procedures, resources, and opportunities included in this section are relevant for graduate students enrolled in the full-time degree programs in the Zanvyl Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) on the Homewood campus.

Student Right to Know Information

The Higher Education Act of 1965, as amended in 2008, includes many student disclosures and reporting requirements by universities. These requirements include statistics and/or information on the following subjects:

1. Retention and graduation rates;
2. Financial assistance available to students and requirements and restrictions imposed on Title IV aid;
3. Crime statistics on campus;
4. Athletic program participation rates and financial support; and
5. Other institutional information including: the cost of attendance, accreditation and academic program data, facilities and services available to disabled students, and withdrawal and refund policies.

For the full Student Right to Know page, please visit: https://homewoodgrad.jhu.edu/student-services/student-right-to-know (https://homewoodgrad.jhu.edu/student-services/student-right-to-know/)

Graduate-Specific Policies

Unless noted specifically otherwise. the below policies apply to both continuing and new students.

Note: Students are subject to any and all policies as listed below, and at http://homewoodgrad.jhu.edu/, and at https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/, and at https://krieger.jhu.edu/, and at https://www.jhu.edu/university-policies/, as well as other JHU policies as defined by academic and/or administrative departments.

Statement of the Rights and Responsibilities of Ph.D. Students, and Policy on Mentoring Commitment at Johns Hopkins University

Ph.D. education is fundamental to the University's teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities/), as well as a separate policy about mentoring commitments for PhD students and their advisors (https://provost.jhu.edu/education/graduate-and-professional-education-resources/phd-mentoring-policies-and-resources/). The principles described in these documents are to be realized in policies and practices established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies.

Academic Misconduct and Research Integrity Policies

The Krieger School of Arts and Sciences (KSAS) and the Whiting School of Engineering (WSE) full-time programs and Engineering for Professionals have established the Academic and Research Misconduct Policy to address instances of misconduct by all graduate students enrolled in full-time, part-time or non-degree (special student) Krieger School of Arts and Sciences and Whiting School of Engineering graduate programs.

Procedures for handling allegations of misconduct by full-time and part-time graduate students are available in the Graduate Academic Misconduct Policy. (https://krieger.jhu.edu/hwgradaffairs/wp-content/uploads/sites/35/2018/08/Homewood-WSE_KSAS_-WSE-EP_KSAS-AAP-Graduate-Academic-Misconduct-Policy-2018SU.pdf)

Procedures for handling allegations of research misconduct by full-time and part-time graduate students are available in the The University Research Integrity Policy. (https://www.jhu.edu/assets/uploads/2017/08/university_research_integrity_policy.pdf)

Graduate Student Vacation Policy

To ensure the personal well-being and productivity of our graduate students, safeguard against excessive demands on graduate students' personal time, and introduce a minimum standard across the two Homewood schools regarding leave, the Deans of KSAS and WSE have established guidelines for Graduate Students (not enrolled in a lecture course, etc.) to be able to take leave. A detailed description of the policy can be found here: http://homewoodgrad.jhu.edu/academics/policies/.

Annual Review Policy

Once per academic year, all full#time Homewood graduate programs are required to provide a written review to:

1. all doctoral students, and
2. all master's students conducting thesis research.

Departments should include mention of funding continuation, as appropriate; as well as have a space for discussion about the student's professional development goals, and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self#evaluation. Students who fail to attain a program's minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawal (https://homewoodgrad.jhu.edu/academics/policies/). In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student's control.

The Whiting School of Engineering has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

PhD Advisor/Good Standing Policy

A PhD student conducting research and/or in the writing phase of their degree program will not be able to remain in good standing with their academic and research progress if they do not have a research/dissertation advisor[1]. As such, a student who is unable to secure a research/dissertation advisor within 4 months of either:

1. a curriculum/program requirement to find an advisor and/or
2. leaving/parting ways with a previous advisor

may be placed on probation or terminated from the PhD program due to a lack of faculty-advised progress.

Note that it is typically not the role of a department to find an advisor for a student, but program Directors of Graduate Study and Chairs/Heads are typically able and willing to offer guidance and suggestions for students who are looking for an advisor. Different programs may have specific policies pertaining to the timeline of advisor assignments and grace periods for students switching advisors, but typically should not have a grace period of less than 2 months for a student to find a new advisor. Students should consult with their departmental Academic Staff and/or Director of Graduate Study for guidance.

This policy applies to both continuing and new students.

[1] A research/dissertation advisor is best defined as a departmentally-approved faculty member under whose guidance a student is conducting research/writing their dissertation and, in many cases, in whose lab/group the student is associated and expected to participate.

Grievance Policy

Any faculty member, postdoctoral fellow or graduate student of either school may grieve an adverse action or failure to act, or for a violation of University, School or departmental policy. Typically a complaint or dispute is brought to the attention of a department chair or center director and is resolved through informal discussion. In some circumstances, the Dean is asked to help in the informal resolution of grievances. The formal procedure set forth below is not meant to supplant attempts at resolving complaints through informal means. When at all possible, complaints and disputes should be settled through informal discussion, though there are no circumstances under which a grievance must be settled informally.

Please note that nothing in our policy should be construed to impinge upon the responsibilities of any office and/or regularly constituted body of the University, and should be applied only after every effort has been made to settle disputes informally. Moreover, no action may be taken with respect to a grievance that would conflict with or modify any policy approved by the Board of Trustees of the University, any policy of the University or WSE/KSAS, any federal, state, or local law or regulation, or any contract to which the University is a party.

The university policy and process on filing a grievance is available here. (https://policies.jhu.edu/?event=render&mid=764&pid=32463&fid=policy_32463.pdf&_=0.713895637856)

Jury and Witness Duty

A KSAS or WSE graduate student receiving stipend/salary from the school (i.e., a teaching assistant, research assistant paid by the university, research assistant paid by an external grant/fellowship or hourly worker) summoned for jury duty or subpoenaed to testify, is authorized to be absent from their university obligations for the actual time required by such service. A graduate student employee (salary/hourly) must present the summons or subpoena to their immediate supervisor before a leave can be issued.

Graduate student employees are eligible for paid leave of absence as a juror or court witness. Federal work study funds, however, cannot be used in these instances -- departments should fund this time using other resources.

Jury duty or duty as a court witness is service and time spent away from a University position as a result of a subpoena issued by a court. Service as a volunteer expert witness or other volunteer court duty is not included in the provisions of this leave.

Homewood Schools Policy for Graduate Student Probation, Funding Withdrawal, and Dismissal

This policy addresses consequences of student underperformance, including funding withdrawal. Students who might lose financial support as a result of the termination of funding from an advisor's sponsor should be given prompt notice, whenever possible.

For comprehensive information see the Graduate Student Probation Funding Withdrawal and Dismissal Policy (https://homewoodgrad.jhu.edu/wp-content/uploads/sites/35/2019/11/2018-Homewood-Graduate-Student-Probation-Funding-Withdrawal-and-Dismissal-Policy.pdf). (https://homewoodgrad.jhu.edu/academics/policies/)

Information Technology Policies

All users of Johns Hopkins University computing resources must comply with the University's information technology policies. For the comprehensive policies go to http://it.jhu.edu/policies/itpolicies.html.

G.W.C. Whiting School of Engineering - Specific Policies

See http://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/ and https://homewoodgrad.jhu.edu/academics/policies/

Academic Policies

Much of the material contained in this section gives details pertaining to Krieger School of Arts and Sciences (KSAS) and/or Whiting School of Engineering (WSE), or University-wide policies. However, there are graduate student issues and policies that are department specific. In those instances, students are referred directly to their department administrator or department handbook for further information.

A Note about PhD Education:

Ph.D. education is fundamental to the University's teaching and research mission. For an intellectual community of scholars to flourish, it is important to acknowledge the principles that underlie the compact between Ph.D. students, the faculty, and other members of the University community.

It is in this spirit that the Doctor of Philosophy Board, in collaboration with faculty and students from across the University, has articulated a statement of rights and responsibilities for doctoral students at Johns Hopkins. The principles described in this document are to be realized in policies established by the various Schools of the University; the Schools will also develop mechanisms to monitor and enforce such policies. For more information see the Statement of the Rights and Responsibilities of PhD Students (http://web.jhu.edu/administration/provost/initiatives/phd_board/rights_responsibilities/).

Annual Review Policy

Feedback and Mentoring are crucial to the success of a graduate student. As such, there is a Homewood Annual Review policy (http://e-catalog.jhu.edu/grad-students/graduate-specific-policies/#annual). At least once per academic year, all full#time Homewood graduate programs are required to provide a written review to: (a) all doctoral students, and (b) all master's students conducting thesis research. Annual reviews should be completed before the start of the next academic year, barring unexpected circumstances.

Departments should include mention of funding continuation, as appropriate; as well as have a space for discussion about the student's professional development goals and ways to develop strategies to achieve those goals. This review must include the opportunity for the student to offer self#evaluation. Students who fail to attain a program's minimum level of performance may be placed on academic probation or dismissed using the procedures outlined in the Homewood Schools Policy for Graduate Student Probation, Dismissal, and Funding Withdrawa (https://homewoodgrad.jhu.edu/academics/policies/)l (http://homewoodgrad.jhu.edu/academics/policies/). In making these decisions, particularly that of dismissal, the program will take into consideration extenuating circumstances beyond the student's control.

The Whiting School of Engineering has established a Guide to Effective Annual Reviews (https://engineering.jhu.edu/graduate-studies/academic-policies-procedures-graduate/#accordion-panel-10) to assist both advisors and students make these annual reviews a useful tool in the development of each student.

Student Enrollment Statuses

Graduate students in the full-time Arts and Sciences and Engineering degree programs based at Homewood are initially enrolled as full-time and are given a Resident status. Prior to a student changing their registration status, approval from the student's degree program and appropriate office(s) must first be secured. Degree-seeking KSAS/WSE graduate students are not permitted to be enrolled in another degree-seeking program outside of JHU.

Residency Requirements

Every full-time program KSAS Master's student must register for a minimum of two consecutive semesters as a full-time, resident graduate student.

Every full-time program WSE Master's student must register as a full-time resident graduate student for at least two semesters (does not have to be consecutive). Combined bachelor's-master's degree students are exempt, as are those who enter a WSE master's degree program after two or fewer semesters following completion of a JHU undergraduate degree.

Every full-time PhD Student (WSE and KSAS) must register for a minimum of two consecutive semesters as a full-time, resident graduate student.

Degree-Seeking Graduate Students

Krieger School of Arts and Sciences

Current Policy for Fall 2022: All KSAS full-time students are required to be enrolled in two courses of any level for credit/letter grade, or one course at the 800-level for credit/letter grade. Graduate students who are full-time students are charged full tuition. The office of the deans must approve any exceptions.

New Credit Hour Policy for KSAS Graduate Students, effective Spring 2023: All KSAS Graduate Students must be enrolled in at least 9 credits to maintain full-time status in each fall and spring semester. Summer term is not a required enrollment term, but PhD students (and master's students conducting research, etc.) are expected to continue working on their degree through the summer. Any JHU funded graduate student working on research/writing for their degree full-time over the summer should enroll in at least 9 credits of their program's summer research/graduate course (students should consult with their academic program for more information). More information on KSAS Gradute Credit Hours is forthcoming and may be found at http://homewoodgrad.jhu.edu (http://homewoodgrad.jhu.edu/academics/wse-graduate-credit-hours/)
