Notes: Rates may not add to totals because of rounding.  
 Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance (see Table 49).  
 Rates for 2000-2010 were recalculated in 2012 using revised intercensal population data and may not match previously published data.  
 Dash indicates data not available.

<sup>a</sup> Prior to 2005, the Los Angeles Police Department had included child abuse and domestic violence simple assaults in its aggravated assault statistics. This change may have contributed to the large decrease in aggravated assaults from 2004 to 2005.

<sup>b</sup> Includes estimated annual 1995 data provided by the Oakland Police Department.

<sup>1</sup> Data for arson crimes are not available prior to 1980. For additional information, see Appendix 1, Data Characteristics and Known Limitations.

Notes: Statewide arrest data from 1952 through 1965 can be found in Table 16 of *Crime in California, 2006*.

Since 1966 there have been many changes in laws, data collection procedures, etc.; therefore, caution should be used when comparing data for the 1966 through 2013 period.

Juvenile misdemeanor arrest data for 1973 through 2013 are not comparable to prior years because of changes in reporting criteria.

<sup>a</sup> Includes estimated annual data for the Bakersfield Police Department and the Oakland Police Department. For additional information, see Appendix 1, Data Characteristics and Known Limitations.

<sup>1</sup> Status offenses include truancy, incorrigibility, running away, and curfew violations. These offenses can only be committed or engaged in by a juvenile.

<sup>2</sup> Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance (see Table 49). Rates for 2000-2011 have been recalculated using revised intercensal population data and may not match previously published data.

<sup>3</sup> Rates are based on the population at risk for each year. The categories are total (10-69 years of age), adult (18-69 years of age), and juvenile (10-17 years of age) (see Table 49).

<sup>1</sup> Status offenses include truancy, incorrigibility, running away, and curfew violations. These offenses can only be committed or engaged in by a juvenile.

<sup>2</sup> Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance (see Table 49). Rates for 2008-2011 were recalculated in 2012

using revised intercensal population data and may not match previously published data.

<sup>3</sup> Rates are based on the population at risk for each year. The categories are total (10-69 years of age), adult (18-69 years of age), and juvenile (10-17 years of age) (see Table 49).

Notes: This table presents the number and type of final dispositions and sentences for felony arrests reported to the California Department of Justice by law enforcement agencies, district attorneys, and courts. Caution should be used when interpreting this information because final dispositions are underreported. The nature, extent, and reasons for this underreporting vary from agency to agency and from year to year.  
 Data include convictions for both misdemeanors and felonies.  
 Percentages may not add to subtotals or 100.0 because of rounding.

<sup>1</sup> The "state institutions" category includes sentences to death, prison, California Rehabilitation Center (civil addict), and the Division of Juvenile Justice (youth authority).  
<sup>2</sup> The "probation" category includes straight probation, fine, and other (no sentence given, sentence suspended, and sentence stayed).  
<sup>3</sup> Violent offenses include homicide, forcible rape, robbery, assault, and kidnapping.  
<sup>4</sup> Property offenses include burglary, theft, motor vehicle theft, forgery, check and access card offenses, and arson.

<sup>1</sup> Rates are based on the adult population at risk (18-69 years of age) for each year (see Table 49). Rates for 2008-2011 were recalculated in 2012 using revised intercensal population data and may not match previously published data.

<sup>2</sup> "Other" includes transfer of jurisdiction from one county to another, death, sentence vacated, successful appeal, deportation, etc.

<sup>1</sup>The passage of Assembly Bill 196 required that county-level child support programs, previously administered by district attorneys, be operated by local child support agencies. This accounts for the large decrease in prosecution personnel since 2001.

Notes: Data collection began in 1981.  
 Because of the individual nature of the requirements of Penal Code section 832.5(a), reporting definitions and procedures vary among reporting agencies.  
 The data collected under Penal Code section 13012(e) are accurate and complete to the extent that the contributing agencies met reporting obligations.  
<sup>1</sup> Based on a survey conducted in 2004, it is estimated that complaints from inmates in prisons and jails may constitute approximately one-third of all complaints reported by law enforcement agencies.  
<sup>a</sup> The increase in the number of reported non-criminal complaints and the decrease in the number of reported felony complaints result from reporting-policy changes made by two law enforcement agencies.

<sup>1</sup> Penal Code section 13730 does not require that the type of weapon involved in a domestic violence-related call be reported.

<sup>2</sup> Hands, feet, etc.

<sup>3</sup> Prior to 1989, the "personal weapon" category was not recognized by all reporting agencies as a type of weapon. When those agencies began reporting personal weapon calls as cases involving weapons, they did not provide the type of weapon designation. This accounts for the large increase in "not reported" weapons in 1989 and 1990.

<sup>a</sup> In April 2002, law enforcement agencies were instructed to report personal weapons only if the assault resulted in an injury (aggravated assault).

<sup>b</sup> The San Francisco Police Department was unable to provide complete data for 1997, and did not report data for 1998 and 1999 because of computer problems. In 1996, this department reported 6,422 domestic violence-related calls for assistance.

<sup>c</sup> The Oakland Police Department was unable to provide 1995 data. In 1994, this department reported 5,237 domestic violence-related calls for assistance.

<sup>d</sup> Data collection began in July 1986; therefore, only six months of data are available and displayed for 1986.

## Data Characteristics and Known Limitations

### CRIMES

#### Uniform Crime Reporting (UCR) Program

- Crime data from the UCR Program are available from 1952 to 2013.
- The number of reported homicide, forcible rape, and aggravated assault crimes represents known victims; while for robbery, burglary, larceny-theft, motor vehicle theft, and arson, the number represents known incidents.
- If multiple crimes occur during the same event, only the most serious (based upon a hierarchy) is counted. Arson is the exception.
- Law enforcement agencies began submitting arson crimes data in 1979; however, 1980 was the first year of complete reporting. Agencies must report as arson only fires determined through investigation to have been willfully or maliciously set. Attempts to burn are included in this offense, but fires of suspicious or unknown origins are not.
- In 2011, the lower limit of felony theft in California was raised from \$400 to \$950. It was not feasible to adjust the DOJ's data collection process to collect the new lower limit of felony larceny-theft, and consequently, it is no longer possible to distinguish felony from misdemeanor larceny-theft. Therefore, it was decided to include total larceny-theft crime in the property crime category regardless of value.
- Prior to 2005, the Los Angeles Police Department included child abuse and domestic violence simple assaults in its aggravated assault statistics.

### ARRESTS

#### Monthly Arrest and Citation Register (MACR)

- Arrest data from the MACR reporting system are available from 1957 to 2013.
- If a person is arrested for multiple offenses, MACR selects only the most serious offense based on the severity of possible punishment.
- Felony arrest counts may include some misdemeanor warrants for felony offenses.
- The subjectivity of the classification and labeling process must be considered in analyses of race/ethnic group data.
- Beginning in 2004, the population category of "other" for race/ethnic group includes the Department of Finance's race/ethnic group of "multi-racial."
- The Bakersfield Police Department was unable to provide arrest data for February through December 1995. The Oakland Police Department was unable to provide any arrest data for 1995. Estimates for both agencies were added to the 1995 statewide totals for publication trend tables.
- In 2011 there were notable changes in California law that affected arrest data. First, the lower limit of felony theft was raised from \$400 to \$950, contributing to the decline in felony theft arrests and the increase in misdemeanor theft arrests. Second, some misdemeanor marijuana statutes were re-classified as infractions, leading to a significant decline in misdemeanor marijuana arrests.

## **DISPOSITIONS OF ADULT FELONY ARRESTS**

- Only the final disposition of an arrest event is selected for statistical purposes. Intermediate dispositions (diversion programs, suspended proceedings, reopenings, retrials, or subsequent actions) are not included in Offender-Based Transaction Statistics (OBTS) data.
- If a person is arrested for multiple offenses, OBTS selects only the most serious offense based on the severity of possible punishment. If there are multiple court dispositions, OBTS selects the most serious court disposition and the associated offense.
- OBTS data on state institutional commitments may vary from information compiled and reported by other state agencies because of differences in the data collection systems and criteria.
- The OBTS file includes some persons whose age at arrest was under 18. These minors received a final disposition in adult court under provisions of Welfare and Institutions Code sections 602, 707(a), 707(b), 707(c), and 707.1(a).

## **ADULT PROBATION**

- Probation data include adults placed on supervised probation only. Court probation, diversion, and summary probation data are not included.
- Adult probation data are limited to original grants of probation and do not include subsequent grants of probation to those already under supervised probation

in the same county. Probationers are counted for each jurisdiction in which they are on probation.

- From 2001 to 2005, San Francisco did not report adult probation data. San Francisco resumed reporting in 2006.
- Counts for adults on active probation for felony offenses may also include adults on probation for misdemeanor offenses for the following counties and years: Contra Costa (2000–2013), Kern (2010–2013), Lake (2001–2012), Merced (2003–2013), Sacramento (2003–2013), Siskiyou (2000–2012), Tulare (2000–2009), and Yolo (2000–2009).
- Some counties may have counted individuals on Post Release Community Supervision.

## **CRIMINAL JUSTICE PERSONNEL**

- The UCR definition of law enforcement personnel specifies that law enforcement agencies report only personnel paid by funds designated for law enforcement.
- The 1996 data collection survey forms were revised in an attempt to collect counts on the number of criminal justice personnel employed by prosecutors, public defenders, and probation departments, regardless of the funding source. Prior to 1996, counts excluded state and federally funded positions.

### **CITIZENS' COMPLAINTS AGAINST PEACE OFFICERS**

- Data on citizens' complaints against peace officers have been collected since 1981. Data are available as statewide totals only.
- Because of the nature of the requirements of Penal Code section 832.5, reporting definitions and procedures may vary among individual reporting agencies.
- Based on a survey conducted in 2004, it is estimated that approximately one-third of complaints against peace officers were made by inmates in prison and jails.
- In 2007, two law enforcement agencies adjusted their reporting policies, substantially affecting the number of reported non-criminal and felony complaints.

### **DOMESTIC VIOLENCE-RELATED CALLS FOR ASSISTANCE**

- Reporting of domestic violence-related calls for assistance began in July 1986. The first full year of reporting was 1987.
- The definition of "domestic violence" is subject to varying interpretations by law enforcement agencies. As a result, different types of domestic relationships are included in the database.

- The San Francisco Police Department did not report domestic violence data from April 1997 to December 1999.
- Included in the data are any cases that resulted in a report being written by the responding law enforcement agencies. Therefore, data include both cases where an arrest was made and those where circumstances did not warrant an arrest.
- In April 2002, law enforcement agencies were instructed to report personal weapons (hands, fists, or feet) only if the assault resulted in an injury (aggravated assault). This instruction resulted in a notable decrease in the number of personal weapons reported.

### **LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED (LEOKA)**

- LEOKA data from the UCR Program are available from 1990 to 2013.
- State correctional officers and federal agents are not included in LEOKA data.

## Computational Formulas

### CRIMES

**Crime rate** – A crime rate describes the number of crimes reported to law enforcement agencies for every 100,000 persons within a population. A crime rate is calculated by dividing the number of reported crimes by the total population. The result is then multiplied by 100,000. For example, in 2013 there were 53,621 robberies in California and the population was 38,204,597. This equals a robbery crime rate of 140.4 per 100,000.

$$\frac{53,621}{38,204,597} = 0.0014035 \times 100,000 = 140.4$$

**Clearance rate** – A clearance rate describes the percentage of clearances reported to the number of crimes reported. A clearance rate is calculated by dividing the number of clearances by the number of crimes reported. The result is multiplied by 100. For example, in 2013 there were 1,146 clearances for homicide crimes and 1,745 homicides reported. This equals a homicide clearance rate of 65.7 percent.

$$\frac{1,146}{1,745} = 0.65673 \times 100 = 65.7 \text{ percent}$$

### ARRESTS

**Arrest rate** – An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. Regardless of the population used, both rates are calculated in the same manner. An arrest rate is calculated by dividing the number of reported arrests by the desired population. The result is multiplied by 100,000.

For example: 1) In 2013, there were 442,741 total felony arrests and the total population was 38,204,597, which equates to a 1,158.9 arrest rate; 2) In 2013, there were 442,741 total felony arrests and the population at risk (10-69 years of age) was 29,923,597, which equates to a 1,479.6 arrest rate.

$$1) \frac{442,741}{38,204,597} = 0.0115886 \times 100,000 = 1,158.9 \text{ per } 100,000 \text{ population}$$

$$2) \frac{442,741}{29,923,597} = 0.0147957 \times 100,000 = 1,479.6 \text{ per } 100,000 \text{ population at risk}$$

## ADDITIONAL INFORMATION

**Percent change** – A percent change describes the change in number or rate from one year to another. A percent change is calculated by subtracting the base-year data from the current-year data. The result is divided by the base-year data and multiplied by 100. For example, in 2013 the robbery crime rate was 140.4. In 2008, the robbery crime rate was 188.3. The percent change in rate from 2008 to 2013 is a 25.4 percent decrease.

$$\frac{140.4 - 188.3}{188.3} = -0.25438 \times 100 = -25.4 \text{ percent}$$

**Populations at risk** – The Arrest tables in this report (16, 17, 22, and 27) include three comparison populations: total (10–69 years of age), adult (18–69 years of age), and juvenile (10–17 years of age).

When a series of rates is calculated using different populations, the rate calculated for the total will not equal the sum of the rates for the parts. For example, the arrest rate calculated using the total at-risk population will not equal the sum of the juvenile arrest rate (based on the juvenile at-risk population) and the adult arrest rate (based on the adult at-risk population).

Also, the percent changes calculated for these at-risk rates cannot be added. This is because the percent change in the total arrest rate is the result of independent changes in both the number of arrests and the at-risk populations of adults and juveniles.
