Preliminary Report

CRIME in 2004 January through June

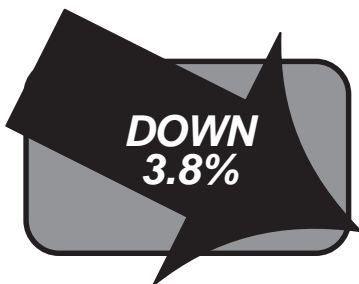

This report compares preliminary crime counts for January through June 2004 with final counts for the same period in 2003 for California law enforcement jurisdictions serving populations of 100,000 or more. The 79 jurisdictions which met this criterion in 2003 and 2004 account for approximately 65 percent of the crimes reported in the state.

Law enforcement jurisdictions are grouped into three categories:

- Police departments (provide law enforcement services to cities).
- Sheriff's departments (provide law enforcement services to unincorporated areas¹ within counties).
- Contract cities (cities that contract for law enforcement services, usually with a sheriff's department, rather than maintain their own police force).

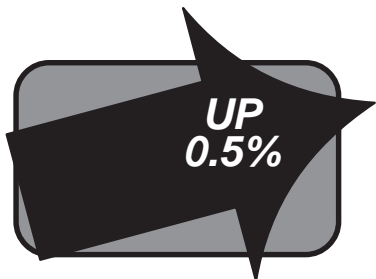

The 2004 crime data used in this report are preliminary and are subject to change. It should also be noted that crime rates are not used in this report but are included in the annual *Crime in California* publication.
