About Us

Associated Pallets was Founded in 1992 by two brothers, John and Allen Shawyer. We pride ourselves being one of the top materials handling packaging suppliers in the UK.

We distribute, manufacture, and recycle wooden pallets, plastic pallets, crates, pallet collars and many more products throughout the UK and Ireland.

We are committed to the protection of the environment, prevention of pollution and continually improve the quality of our products and services. We will always meet the specified requirements of our customers and seek to satisfy or exceed expectations. All of our products are manufactured to comply with industry-specific requirements and regulations.

Securing a Sustainable Future

With earth's temperature at its highest, showing a continuous negative impact, leading to severe weather conditions, flooding, increased droughts and rising sea levels causing the loss of species and food shortages. Now is the time we all need to do our part and take action to secure a brighter and more sustainable future.

As a family business we are very passionate about reducing waste and reducing emissions. Over 95% of our plastic pallets are manufactured from 100% recycled plastic.

We have a large wooden pallet recycling facility, preventing over 300,000 tonnes of wood being sent to landfill each year. We not only recycle wooden pallets but can refurbish them by giving an old, damaged pallet a new life with over 250,000 pallets repaired and recirculated each year. Associated Pallets has introduced systems that will set and review measurable quality and environmental objectives. The directors provide appropriate resources as required to enable the company to meet these objectives.

An aerial photograph of a lush green forest. A narrow, winding path or stream cuts through the dense canopy of trees. In the upper left corner, a dark, calm body of water is visible, reflecting the surrounding greenery. The overall scene is vibrant and natural, emphasizing sustainability and environmental friendliness.

All our plastic pallets have been uniquely selected due to their performance, durability, affordability and sustainability. Over 95% of our plastic pallets are manufactured from recycled material. Most of our plastic pallets are in stock and available for immediate next day delivery!

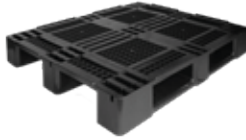

We also offer customization including logo printing, anti-slip plugs and different colour options.

Unsure? we have a dedicated team of experts to provide expert advice for your application requirements.

Display Pallets 800 x 600, 600 x 400mm

Display pallets, commonly called point of sale "POS" are specially designed to set up cardboard POS displays in retail. We have a new fixation system called Easy Fix. This system reduces the order preparation time, guarantees the stability of the box and improves the look of the products. They are also popular for exporting small consignments.

- Fully Recyclable
- 600 Meters in length which is double the amount of other conventional wrap
- Easier to apply than conventional stretch films
- Pre-stretched means less effort is needed to wrap pallets

Our ECO Friendly Vision

At Associated Pallets, we believe in reducing global waste. That's why we use recycled plastic materials for the majority of our plastic pallet product range.

This ensures we're not adding to plastic waste, and reducing our carbon footprint by recycling old plastic pallets and boxes which have come to the end of their life.

Presswood pallets, also known as compressed wood pallets or molded wood pallets, are made from wood particles or fibers that are compressed under high pressure with heat and glue. These pallets are typically manufactured using wood waste from sawmills and other wood processing industries, making them an environmentally friendly option.

1. Manufacturing Process - Presswood pallets are made by compressing wood fibers or particles into the desired shape using hydraulic presses and heat. The pressure and heat bind the wood particles together, creating a durable and stable pallet.

2. Environmentally Friendly - Presswood pallets are considered eco-friendly because they are made from recycled wood waste and do not require the harvesting of new timber. They help reduce the amount of wood waste that ends up in landfills.

3. Lightweight - Presswood pallets are generally lighter than traditional wooden pallets made from solid wood. This lightweight nature makes them easier to handle and transport, reducing shipping costs and labor.

4. Consistent Size and Shape - Presswood pallets are molded into consistent sizes and shapes, which makes them ideal for automated handling systems and storage.

5. Hygienic - Presswood pallets are typically heat-treated to meet international phytosanitary standards, making them suitable for export and use in industries where cleanliness and hygiene are important, such as food and pharmaceutical industries.

6. Recyclable - At the end of their life cycle, presswood pallets can be recycled and used to make new pallets or other wood products, further reducing environmental impact.

What are the benefits of wooden pallet collars?

Effortless Handling – They are easily transported and maneuvered meaning that they are easy to lift and place onto a pallet. The galvanized metal hinges are securely fastened and effortlessly slot onto a pallet. No self-assembly is required.

Cost Effective – They are an affordable solution which gives businesses good value for money.

Strong – The materials used are durable and strong, made from 1st grade needle spar pinewood keeping your goods secure and safe. Each collar has a 20mm thickness which insures a protective durable bubble around your goods.

Space Optimization – When not in use, they can be stored flat packed which saves space in a workplace.

Alternative to Plywood Cases – Our pallet collars are very strong and secure being 20mm thick they have replaced the need for expensive custom built cases.

Perfect for Storage and Shipping – All our pallet collars are supplied Heat treated to ISPM15 standards which insure they comply with strict overseas shipping.

Standard Sizes Available – Immediate availability from our vast stock of over 20,000 collars in a variety sizes.

Customisable Pallet Collars – We can brand your collars with your company logo or any text you require. We also offer a widevariety of colours!

Accessories – More options with our accessory range which include pallets, lids, stacking and label holders.

Kindling - Jumbo Ton Bag

Jumbo Ton Bag Kiln Dried Softwood Sawn New FSC Timber, ideal to light your firewood with ease.

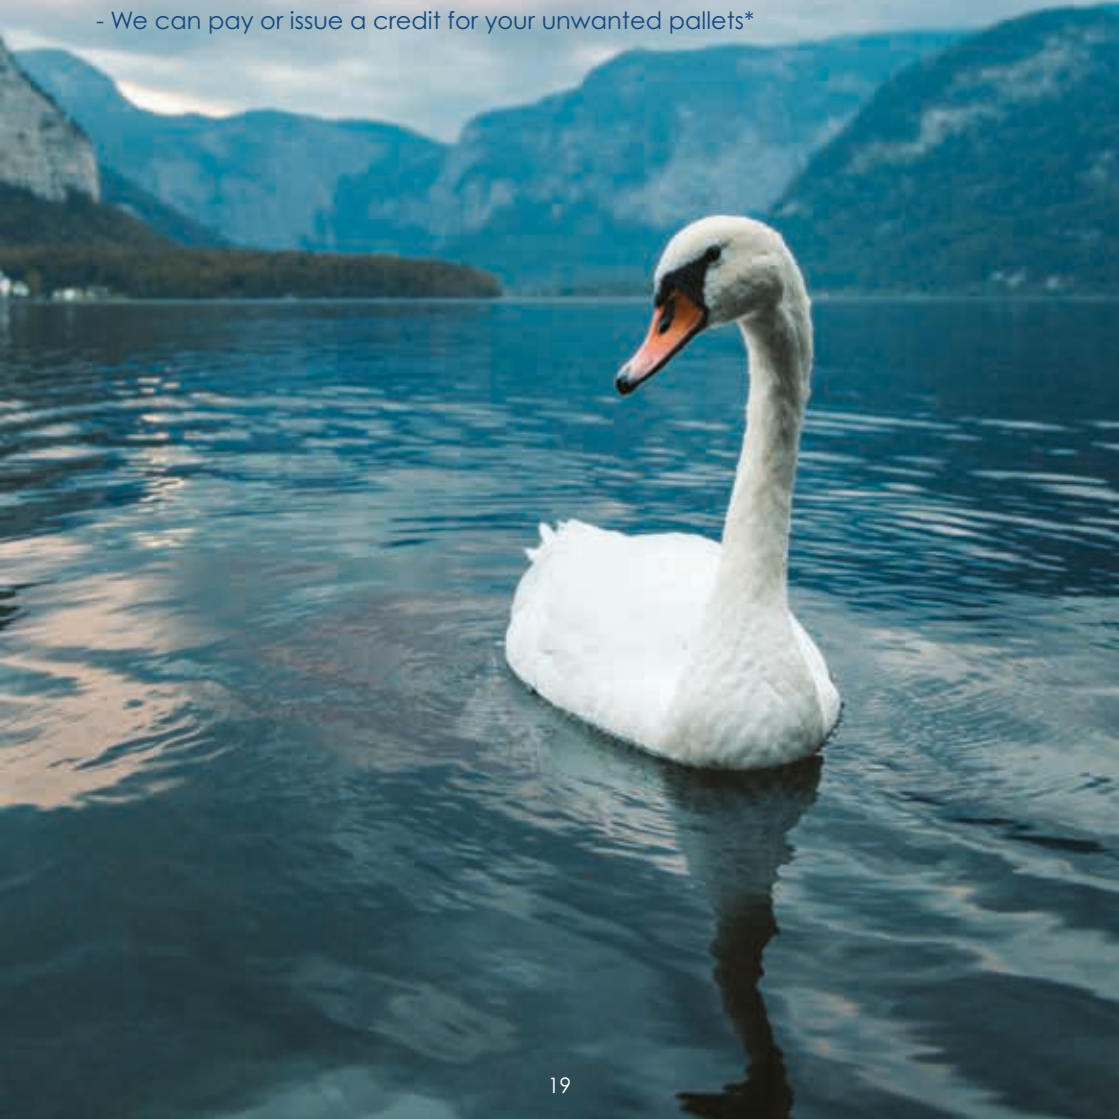

One jumbo bag of sawn off cuts from our new wooden pallet production facility, each piece is 16x75mm. Lengths can vary from 70mm - 200mm. Perfect for stocking up for the winter to help with increasing energy bills!

Delivery nationwide on a pallet.

Pallet Collection & Recycling

We recycle damaged and unused wooden and plastic pallets which can be collected, inspected, repaired if necessary, and then either reused or recycled into usable pallets. Recycling pallets helps reduce waste, conserve resources, and can be a cost-effective solution for businesses that use pallets regularly.

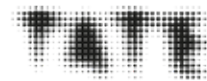

- Expert pallet recycling advise.
- Collections available across the UK*
- Fully certificated to ISO 9001 & 14001 including waste carrier's licence
- We can pay or issue a credit for your unwanted pallets*

Our Client Experience

We have extensive experience working with businesses all over the UK with their packaging requirements.

Here's a selection of some of the businesses we have worked with over the years:

Other Services We Provide:

- We buy wooden & plastic pallets, collars & containers.
- We supply used wooden & plastic containers collars & pallets.
- We offer company visits as well as packaging & recycling advice.
- Our large heat treatment kiln can heat treat pallets, wooden containers and dunnage to ISPM15 standard.
- We also supply new wooden crates, manufactured in ply, osb or slatted.

Great Service and Products from Associated Pallets

Excellent Product, Superb Service - We needed some pallets and collars to sort out our warehouse, pictures look great and when the product arrived we were not disappointed. There we even some schematic drawings so we could plan before the goods arrived. Dispatch was quick and tracking effective so all in all very happy and would buy again, oh and extremely good value for money.
