## **Snowmobiling**

Idaho has over 7,200 miles of snowmobile trails in 29 grooming programs located throughout the state. Millions of acres of open riding exist on Forest Service, Bureau of Land Management, State and private land. The Forest Service and BLM can provide information

that identifies open and closed areas, closure dates and other details that may help you plan an enjoyable ride. Many county snowmobile programs also provide trail maps of the areas that are groomed. For more on where to ride in Idaho, contact the Department of Parks and Recreation at (208) 334-4199.

## Nordic Skiing

Idaho's unique terrain of mountain valleys, broad sweeps of gently rolling hills and a rugged backcountry that includes the largest wilderness in the continental U.S., offers the Nordic ski enthusiast a very special experience.

Nordic ski instruction and rentals are available at most ski resorts throughout the state. There are also several tour operators who offer Nordic ski packages, including backcountry touring, hut to hut skiing, or groomed trails for easy touring. Numerous Forest Service and privately groomed trails from 5 to 60 kilometers are found throughout the state.

### Park N' Ski Program

The Idaho Department of Parks and Recreation operates a unique program called Park N'Ski through four separate trail systems and four state park ski areas. Many trails are groomed on a regular basis and provide amenities such as restrooms, warming shelters and backcountry huts/yrurts. A season pass cost \$20 and a three-day temporary permit costs \$7.50. Permits may be purchased at a variety of places throughout the state, including sports shops, state parks offices, U.S. Forest Service ranger stations and chambers of commerce. In addition to the Park N'Ski areas, Farragut State Park, Priest Lake State Park, Round Lake State Park and Winchester State Park have cross-country ski trails available for use. For more information, contact the Idaho Department of Parks and Recreation, P.O. Box 83720, Boise, ID 83720-0065, (208) 334-4180 ext. 228.

## Bureau of Land Management

The BLM manages 11.9 million acres of public land in Idaho, most of which is concentrated in the southern part of the State. Every Idaho county contains some BLM-managed land, which accounts for 22 percent of the total Federal acreage within Idaho's borders. Idaho's public lands feature alpine forests, rolling rangeland, and spectacular canyonlands with premier desert white-water streams--the Owyhee, Bruneau, Jarbidge, and Lower Salmon.

Idaho's public lands are rich in environmental, historical, recreational, and economic values. These lands, with historical features that include some of the best remaining original ruts of the Oregon Trail, will attract millions of recreational visits. Many of these visits will be made by the outdoor sportsmen of Idaho, where about one of every three persons owns a fishing or hunting license. BLM-managed lands also support the traditional commodity activities of grazing, mining, and timber production, which are vital to Idaho's rural economies.

### BLM's National Landscape Conservation System

National Conservation Area (NCA)	1 NCA (1.2 million acres)
Wilderness Study Areas (WSAs)	66 WSAs (1.7 million acres)
Wilderness Area	1 area (802 acres)
National Historic Trails	4 trails (436 miles)
National Scenic Trails	1 trail (13 miles)

# Major Land Areas, Sites and Rivers Designated by the U.S. Government

## NATIONAL PARKS AND MONUMENTS

The first National Park (Yellowstone) was designated in 1872. The National Park Service was created in 1916 to advance a new concept of land use to conserve the scenery, natural, historic, and wildlife in perpetuity for the benefit and enjoyment of the people. The U.S. Congress establishes these Parks and Sites.

## NATIONAL RECREATION AREAS

Congress in 1962 passed the National Recreation Area Act to help preserve and expand outdoor recreation opportunities throughout the nation.

## WILDERNESS AREAS

In 1964, Congress passed the Wilderness Act to set aside certain lands from development and to preserve their natural character. The Wilderness Act defines wilderness as an area of undeveloped Federal land, usually 5,000 acres or more, in a substantially natural condition. It is without permanent improvements or human habitation, and has outstanding opportunities for solitude or a primitive and unconfined type of recreation. Such an area may contain ecological, geological, or other features or scientific, educational, scenic, or historical values.

## WILD AND SCENIC RIVERS

In 1968, Congress authorized the Wild and Scenic Rivers System Act which permits State Legislatures and the U.S. Congress to designate certain rivers as wild and scenic to preserve outstandingly remarkable scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values in a natural and free-flowing condition for the benefit and enjoyment of present and future generations.

## NATIONAL NATURAL AREAS AND LANDMARKS

In 1972 Congress directed the Secretary of Interior to investigate and inventory areas which could be designated National Natural Landmarks and for possible inclusion into the National Parks System.

## National Parks, Monuments and Reserves

### Nez Perce National Historical Park

Established: 1965. 24 historical areas in north-central Idaho retrace the history of the Nez Perce Indians, the Lewis and Clark expedition, and numerous other developments of early Idaho history.

Box 93, Spalding, Idaho 83551 (208) 843-2261

### Craters of the Moon Ntl. Monument

Established: 1924. A desolate area illustrating in startling variety the results of violent volcanic action, and representing some of the nation's most recent volcanic outpourings. Last eruptions were about 1,600 years ago.

Box 29, Arco, Idaho 83213 (208) 527-3257

### Yellowstone National Park

Established: 1872. Idaho can also boast of having a portion of the nation's oldest and most famous national park. A thin strip totaling 31,488 acres (of the park's 2 million plus acres) make up part of its western border.

P.O. Box 168, Yellowstone National Park, WY 82190 (307) 344-7381

## National Parks, Monuments and Reserves (continued)

### City of Rocks National Reserve

Established: 1988. Erosion formed from various rock formations and shapes from a granite mountain. An historic landmark, known to emigrants on the California Trail.  
P.O. Box 169, Almo, Idaho 83312-0169 (208) 824-5519

### Hagerman Fossil Bed Ntl. Monument

Established: 1988. A major fossil deposit in North America. Over a dozen zebra-like horse fossils were uncovered by the Smithsonian Institute in the 1930s.  
P.O. Box 570, Hagerman, Idaho 83332 (208) 837-4793

### Hells Canyon N.R.A.

Established: 1976. Straddles a 67 mile long stretch of the Snake River on the west central border. Includes the deepest gorge in the world, Hells Canyon, which averages 6,600 feet in depth. Four-fifths of area is in Oregon: 215,233 acres are classified as wilderness. Wild and Scenic rivers include the Snake and Rapid.  
Route 1, Box 270A, Enterprise, Oregon 97828 (503) 523-6391

### Sawtooth N.R.A.

Established: 1972. To preserve rural, recreational and scenic values in response to a proposed open-pit molybdenum mine at the base of Castle Peak in the White Cloud Mountains. The eastern half contains the White Cloud and Boulder Ranges, while the Sawtooth Range and Wilderness Area lie to the west.  
2647 Kimberly Rd. East, Twin Falls, Idaho 83301 (208) 733-3698

## Wild and Scenic Rivers

### Middle Fork of the Salmon

106 miles Wild; From its origin downstream to the confluence with the main Salmon.

### Main Salmon

46 miles Recreational; From the mouth of the North Fork of the Salmon to Corn Creek. 79 miles Wild; From Corn Creek downstream to Long Tom Bar.

### Middle Fork of the Clearwater

23 miles Recreational; From Lowell downstream to Kooskia, includes the:

**Lochsa.** 70 miles Recreational, from Powell Ranger Station downstream to Lowell and Junction with the Selway, forming the Middle Fork of the Clearwater.

**Selway.** 79 miles Wild; from its origin downstream to Selway Falls. 20 miles Recreational; from Selway Falls downstream to Lowell and junction with the Lochsa, forming the Middle Fork of the Clearwater.

### St. Joe

27 miles Wild; From St. Joe Lake downstream to Spruce Tree Campground. 40 miles Recreational; From Spruce Tree Campground downstream to confluence with the North Fork of the St. Joe.

### Snake

32.5 miles Wild; From Hells Canyon Dam downstream to Pittsburgh landing 34.5 miles Recreational; From Pittsburgh landing downstream to the northern border of the Wallowa-Whitman National Forest.

## **Rapid**

24 miles; From headwaters to the National Forest Boundary, includes the:

**West Fork of Rapid.** From the Hell's Canyon Wilderness Boundary to the confluence with the main stream.

## **Natural Areas**

### **Birds of Prey Natural Area**

Established: 1971. Contains the densest concentration of raptors in the world. Area expanded to include desert floor above canyon to protect bird's food supply.

Parts of Ada, Elmore and Owyhee counties.

## **National Natural Landmarks**

### **Big Southern Butte**

The butte is composed of light-colored silicic volcanic rocks and stands nearly 760 meters above the low relief surface of the Eastern Snake River Plain. The site is an ecological "island" supporting vegetation such as lodgepole pine (*Pinus contorta*), aspen (*Populus* sp.), Douglas fir (*Pseudotsuga menziesii*), and manzanita (*Arctostaphylos* sp.) not common to this region.

### **Big Springs**

The springs emanate from rhyolite lava flows of the Madison Plateau, which comprise one of the largest rhyolite lava fields in the United States. Big Springs is the only first magnitude spring in the United States that issues forth from rhyolitic lava flows.

### **Cassia Silent City of Rocks**

Located in the Cotterrel Range of south central Idaho, the site contains monolithic landforms created by exfoliation processes on exposed massive granitic plutons. The site contains the best example of bornhardts in this region.

### **Crater Rings**

Crater Rings are two closely adjacent pit craters that provide one of the few examples of this type in the continental United States. The crater rings are larger than, but similar to, pit craters along Chain of Craters Road on the southeast flank of Kilauea Volcano, Hawaii.

### **Great Rift System**

The Great Rift System of the eastern Snake River Plain is a dramatic and outstanding example of tensional tectonic forces in the earth's crust. The site also has biological interest as an example of primary vegetation succession on very young lava flows.

### **Hagerman Fauna Sites**

The site contains the world's richest known deposits of Upper Pliocene age terrestrial fossils.

### **Hell's Half Acre Lava Field**

The lava field is an outstanding example of a single event, single process geologic feature that is fully preserved and fully exposed. Fractures, depressions, and small lava caves are common features on the flow, which otherwise has a fairly smooth surface.

### **Hobo Cedar Grove Botanical Area**

This landmark contains a grove of old growth western red cedar in near natural condition. Two communities are represented: mainly western red cedar (*Thuja plicata*)/Oregon boxwood (*Pachistima myrsinites*) on the uplands and western red cedar/ladyfern (*Athyrium filix-femina*) on the lowland portions of the site.

### **Menan Buttes**

The site is an outstanding example of a glassy tuff cone, which is found in only a few places in the world. The buttes are composed of small fragments of basaltic glass formed by sudden chilling of magma.

### **Niagara Springs**

The site is one of a number of large spring sets where the Snake River Plain aquifer drains into the Snake River from the northern cliffs of its canyon. It is illustrative of the enormous volume of water transmitted through this aquifer.

### **Sheep Rock**

The site provides perhaps the best view of the horizontally layered lavas that represent successive flows of the Columbia River Basalt. The Columbia River Basalt covers an area of some 518,000 square kilometers in Idaho, Washington, and Oregon. It represents one of the great lava extrusions of geologic time.

## National Historic Landmarks

**U.S. Assay Office:**  
210 Main Street  
Boise 83702  
Established:  
October 15, 1976

The Boise Assay Office was erected by the U.S. Government in 1870-71. The building is a symbol of the importance of mining in the political, social, economic and legal development of Idaho and the Far West. In 1972 the Idaho State Historical Society assumed ownership, it is presently being used as offices and a museum.

**Cataldo Mission:**  
Clark County  
Established:  
May 10, 1989

Built around 1850 by Jesuit missionaries and Coeur d'Alene Indians, this log and adobe church with Baroque and Greek Revival details is the oldest surviving church in the Pacific Northwest and also the oldest structure in Idaho. The mission restoration project was completed in 1975 and is now a museum administered by the Idaho Department of Parks and Recreation.

**City of Rocks:**  
Near Almo in  
Cassia County  
Established:  
October 15, 1966

One of the great natural landmarks on the California Trail, one of the few places in this country where Precambrian rock is exposed. After 1846 this route was sometimes referred to as the "Applegate Trail" used by Oregon-bound emigrants. The area is managed by the Idaho Department of Parks and Recreation, the U.S. Forest Service, Bureau of Land Management along with some private ownership.

**Experimental  
Breeder Reactor #1**  
Near Arco in Butte  
County  
Established:  
October 16, 1966

On the EBR-1 produced the first usable amounts of electricity created by nuclear means. Operation continued at EBR-1 until 1964. Administered by the Energy Research and Development Administration. The National Park Service conducts tours there from May through September.

**Fort Hall:**  
Bannock County  
Established:  
October 15, 1966

Built by Nathaniel Wyeth as a trading post in 1834, then sold to the Hudson's Bay Company in 1837. The fort is remembered for its association with overland emigration on the Oregon-California Trails and as the most important trading post in the Snake River Valley. A stone monument on the Fort Hall Indian Reservation marks the site of the former fort.

**Lemhi Pass:**  
Salmon Ntl. Forest  
Established:  
October 15, 1966

Located on the Idaho-Montana border in the Salmon and Beaverhead National Forests. This is the point where the Lewis and Clark expedition crossed the Continental Divide leaving the United States and entering into Spanish territory.

**Lolo Trail:**  
Clearwater & Lolo  
National Forests  
Established:  
October 16, 1966

The most difficult stretch of the entire route traveled by Lewis and Clark on their expedition to the Pacific in 1805. This trail was used by the Nez Perce Indians on their trips to the buffalo country.

**Weippe Prairie:**  
Clearwater County  
Established:  
October 15, 1966

The prairie contains three historic campsites of the Lewis and Clark expedition during their west and eastbound journeys. It was here that Lewis and Clark first met the Nez Perce Indians, who proved to be most helpful to the expedition.

## Idaho Historic Sites

The Historic Sites program promotes Idaho history through the preservation, maintenance, and educational use of Idaho's historic properties. The Society owns five significant properties, most managed locally by volunteer organizations.

### **Old Idaho Penitentiary**

Boise. Visitors can take a guided or self-guided walking tour within the wall of the 1870-1973 prison. 208/368-6080

### **Stricker Ranch and Rock Creek Store**

Hansen. The Rock Creek Store was the only supply point on the Oregon Trail between Fort Hall and Boise from 1865 to 1897. 208/423-4000

### **Lorenzo Hill Hatch House**

Franklin. This two-story stone building was built in 1874 and is an exceptionally pure example of the Greek Revival architectural style. The structure is unrestored.

### **Relic Hall**

Franklin. A 1937 log and stone lodge that houses artifacts relating to the history of the area.

### **Pierce Courthouse**

Pierce. Idaho's first courthouse was built in 1862 to serve Shoshone County, then in Washington Territory. The courthouse has been partially restored and contains exhibits interpreting the area's gold mining, settlement, and transportation history.

### **U.S. Assay Office**

Boise. Opened in 1872 and by 1895 the annual deposits reached more than a million dollars. By 1917 the Idaho mines had yielded some \$400 million in gold, silver and lead.

## Hunting and Fishing

The Department of Fish and Game is responsible for management and regulation of the use of fish and wildlife resources of the state. The Department is governed by the six-member Idaho Fish and Game Commission. Commissioners are appointed by the governor for staggered four-year terms and are subject to confirmation by the Idaho Senate. The commission system was established by Idaho's first successful voter initiative in 1938.

Field operations are organized by seven regions statewide and the various functions common to all regions are organized into bureaus (Fisheries, Enforcement, Wildlife, etc.) with statewide coordination from the state office in Boise.

Nonresident licenses and tags may now be purchased using credit cards by calling 1-800-554-8685. Information is available at 1-800-635-7820.

Public outreach, involvement and education are an important function. Legislative action in 1980 made hunter education mandatory. More than 1,000 volunteer instructors reach about 6,500 students per year. A program in landowner relations geared to promoting cooperation between hunters, anglers and landowners encourages ethical behavior as a way to increase access and sporting opportunity on private land. A volunteer coordinator organizes groups and individuals willing to give time to projects in the public interest.

The quarterly *Fish and Game News* reaches 270,000 with timely hunting/fishing/habitat news; *Inside on the Outdoors*, a live call-in talk show Monday evenings on KBOI radio in Boise and KSEI in Pocatello gives one-third of a million listeners a chance to reach the Director; and *Incredible Idaho*, a monthly half-hour television program is produced in cooperation with KTVB in Boise and viewed statewide.

The Habitat Improvement Program utilizes duck and upland game bird stamp funds to construct and maintain habitat improvement projects on public land and assist private landowners with wildlife projects on their land.

The Morrison-Knudsen Nature Center at state headquarters, 600 South Walnut in Boise, began as a habitat demonstration area and was enhanced as a Centennial project during

1990 to include a river observatory complete with underwater viewing of a mountain stream. A learning center has displays, projection room, and computer link to a regional river information system. The Nature Center hosts school groups and individuals amounting to about 1,000 visitors per day. Also a Centennial year project, identification and directional signs guide the public to more than 250 access sites statewide, and a companion booklet lists them by area and gives directions.
