

Integrated Monitoring Initiative for SDG 6

The upcoming UN-Water SDG 6 Data Portal

9th meeting of the IAEG-SDGs
Beirut, 28 March 2019

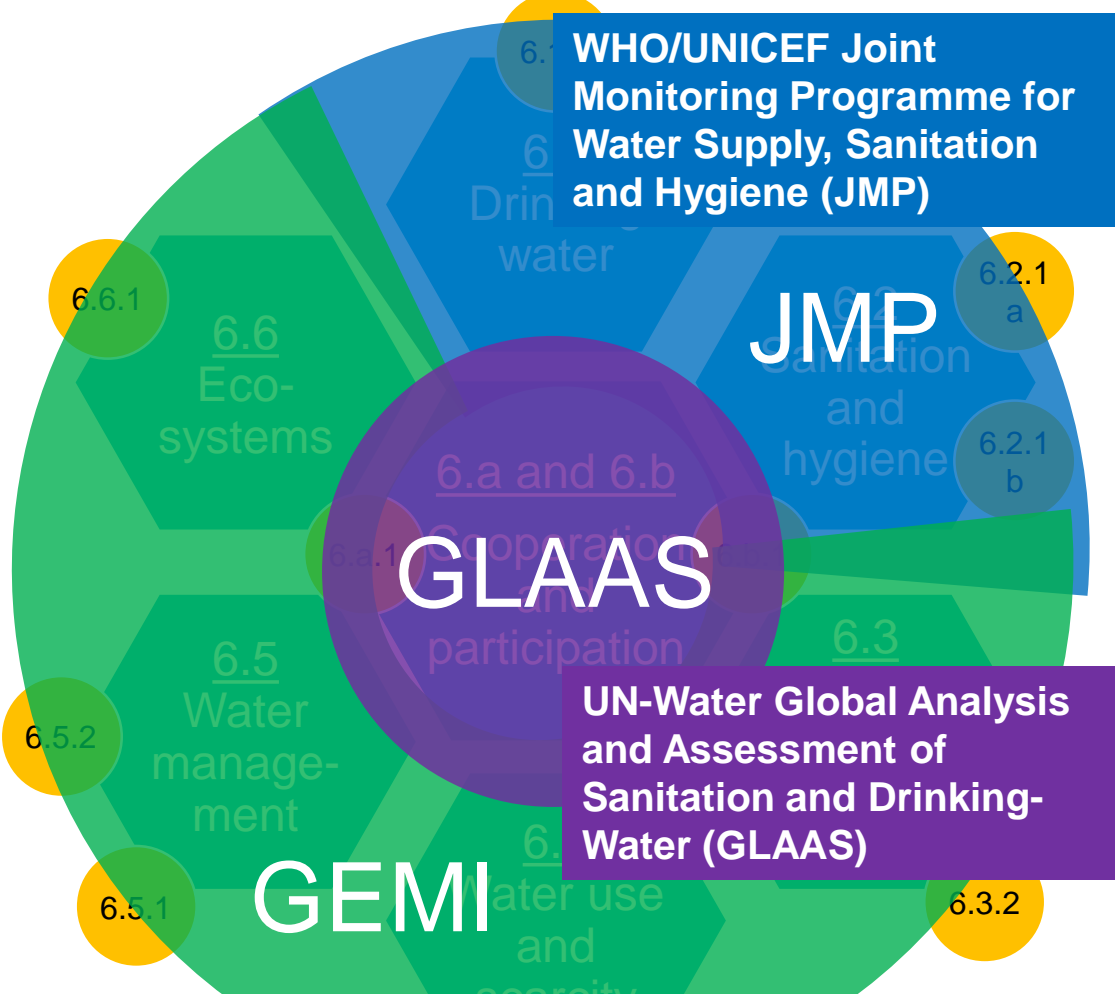

SDG 6 global indicators

6.1.1	Safely managed drinking water services (WHO, UNICEF)
6.2.1	Safely managed sanitation services and hygiene (WHO, UNICEF)
6.3.1	Wastewater safely treated (WHO, UN-Habitat, UNSD)
6.3.2	Good ambient water quality (UNEP)
6.4.1	Water use efficiency (FAO)
6.4.2	Level of water stress (FAO)
6.5.1	Integrated water resources management (UNEP)
6.5.2	Transboundary basin area with water cooperation (UNECE, UNESCO)
6.6.1	Water-related ecosystems (UNEP, Ramsar)
6.a.1	Water- and sanitation-related official development assistance (WHO, OECD)
6.b.1	Participation of local communities in water and sanitation management (WHO, OECD)

UN-Water Integrated Monitoring Initiative for SDG 6

WHO/UNICEF Joint Monitoring Programme for Water Supply, Sanitation and Hygiene (JMP)

UN-Water Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS)

Integrated monitoring of water and sanitation related SDG targets (GEMI)

6.1.1	Safely managed drinking water services (WHO, UNICEF)
6.2.1	Safely managed sanitation services and hygiene (WHO, UNICEF)
6.3.1	Wastewater safely treated (WHO, UN-Habitat, UNSD)
6.3.2	Good ambient water quality (UNEP)
6.4.1	Water use efficiency (FAO)
6.4.2	Level of water stress (FAO)
6.5.1	Integrated water resources management (UNEP)
6.5.2	Transboundary basin area with water cooperation (UNECE, UNESCO)
6.6.1	Water-related ecosystems (UNEP, Ramsar)
6.a.1	Water- and sanitation-related official development assistance (WHO, OECD)
6.b.1	Participation of local communities in water and sanitation management (WHO, OECD)

Objectives of the UN-Water SDG 6 Data Portal

- To provide an overview and access to data and overall progress towards SDG 6
- To provide tailored options for visualization and analysis
- Entry point to the wealth of SDG 6 information available in the UN system
- Integration and broader dissemination of SDG 6 data and information to:
 - raise awareness on the importance of water and sanitation
 - to educate and catalyze action
 - to support policy, decision making and water management
 - to encourage and improve on SDG 6 monitoring
- To support UN-Water's work to improve coordinated action, communications and global campaigns, policy and technical advice, and SDG 6 related interlinkage analysis and synthesis reporting

Coordinating the UN's work on water and sanitation

In this portal we have gathered data so that you can explore how the world is doing in achieving Sustainable Development Goal 6

SNAPSHOTS

Indicator snapshots - global

Drinking water

of the world's population use a safely managed drinking water service (SDG indicator 6.1.1), based on reporting in 2015

Sanitation

of the world's population use a safely managed sanitation service (SDG indicator 6.2.1a), based on reporting in 2015

Hygiene

At the global level, not enough country data were reported in 2015 to estimate the proportion of population with access to a basic handwashing facility (SDG indicator 6.2.1b)

Wastewater

At the global level, not enough country data were reported in 2015 to estimate the proportion of safely treated wastewater (SDG indicator 6.3.1)

Water quality

At the global level, not enough country data were reported in 2017 to estimate the proportion of water bodies with a good ambient water quality (SDG indicator 6.3.2)

Efficiency

is the global value added from the use of water by people and the economy (SDG indicator 6.4.1 on water-use efficiency), based on reporting in

Water stress

of the world's available water resources are being withdrawn, after taking into account environmental flow requirements (SDG indicator 6.4.2 on level of water stress), based on reporting in 2014

IWRM

is the degree of implementation of integrated water resources management (IWRM) at the global level (SDG indicator 6.5.1), based on reporting in 2017 from 156 countries

Transboundary

of transboundary basin area has an operational arrangement for water cooperation (SDG indicator 6.5.2), based on reporting in 2017 from 61 countries

Ecosystems

of the world's vegetated wetlands (approximately) have been lost during the last century (SDG indicator 6.6.1 on water-related ecosystems)

Cooperation

is the global amount of water- and sanitation-related official development assistance disbursed in 2016 (SDG indicator 6.a.1)

Participation

Stakeholder participation is measured through multiple indicators which are not aggregated into one overall value (SDG indicator 6.b.1)

Country and region snapshots – regional example

SDG 6 snapshot in Sub-Saharan Africa

Drinking water

of the population in Sub-Saharan Africa use a safely managed drinking water service (SDG indicator 6.1.1), based on reporting in 2015

Sanitation

of the population in Sub-Saharan Africa use a safely managed sanitation service (SDG indicator 6.2.1a), based on reporting in 2015

Hygiene

of the population in Sub-Saharan Africa has access to a basic handwashing facility (SDG indicator 6.2.1b), based on reporting in 2015

Wastewater

At the regional level, not enough country data were reported in 2015 to estimate the proportion of household wastewater that are safely treated (SDG indicator 6.3.1)

Water quality

At the regional level, not enough country data were reported in 2017 to estimate the proportion of water bodies with a good ambient water quality (SDG indicator 6.3.2)

Efficiency

is the value added from the use of water by people and the economy in Sub-Saharan Africa (SDG indicator 6.4.1 on water-use efficiency), based on reporting in

Water stress

of the available water resources in Sub-Saharan Africa are being withdrawn, after taking into account environmental flow requirements (SDG indicator 6.4.2 on level of water

IWRM

is the degree of implementation of integrated water resources management in Sub-Saharan Africa (SDG indicator 6.5.1), based on reporting in 2017

Transboundary

of transboundary basin area in Sub-Saharan Africa have an operational agreement for water cooperation (SDG indicator 6.5.2), based on reporting in 2017

Ecosystems

is the change in spatial extent of water-related ecosystems in Sub-Saharan Africa in 2016 (compared to the baseline year period of 2001–2005), based on earth observation data (SDG

Cooperation

is the amount of water- and sanitation-related official development assistance received by countries in Sub-Saharan Africa in 2016 (SDG indicator 6.a.1)

Participation

Stakeholder participation is measured through multiple indicators which are not aggregated into one overall value (SDG 6 indicator 6.b.1)

- Download all indicators on harmonized format

DATA LAB

Data lab - example

Function: Identify countries that meet a set of user-defined criteria, and its associated population and land area

Criterion 1 ✕

6.5.1 Degree of integrated water resources management implementation (0-100) (%)>Overall

Overall ▾

Result range(data value)

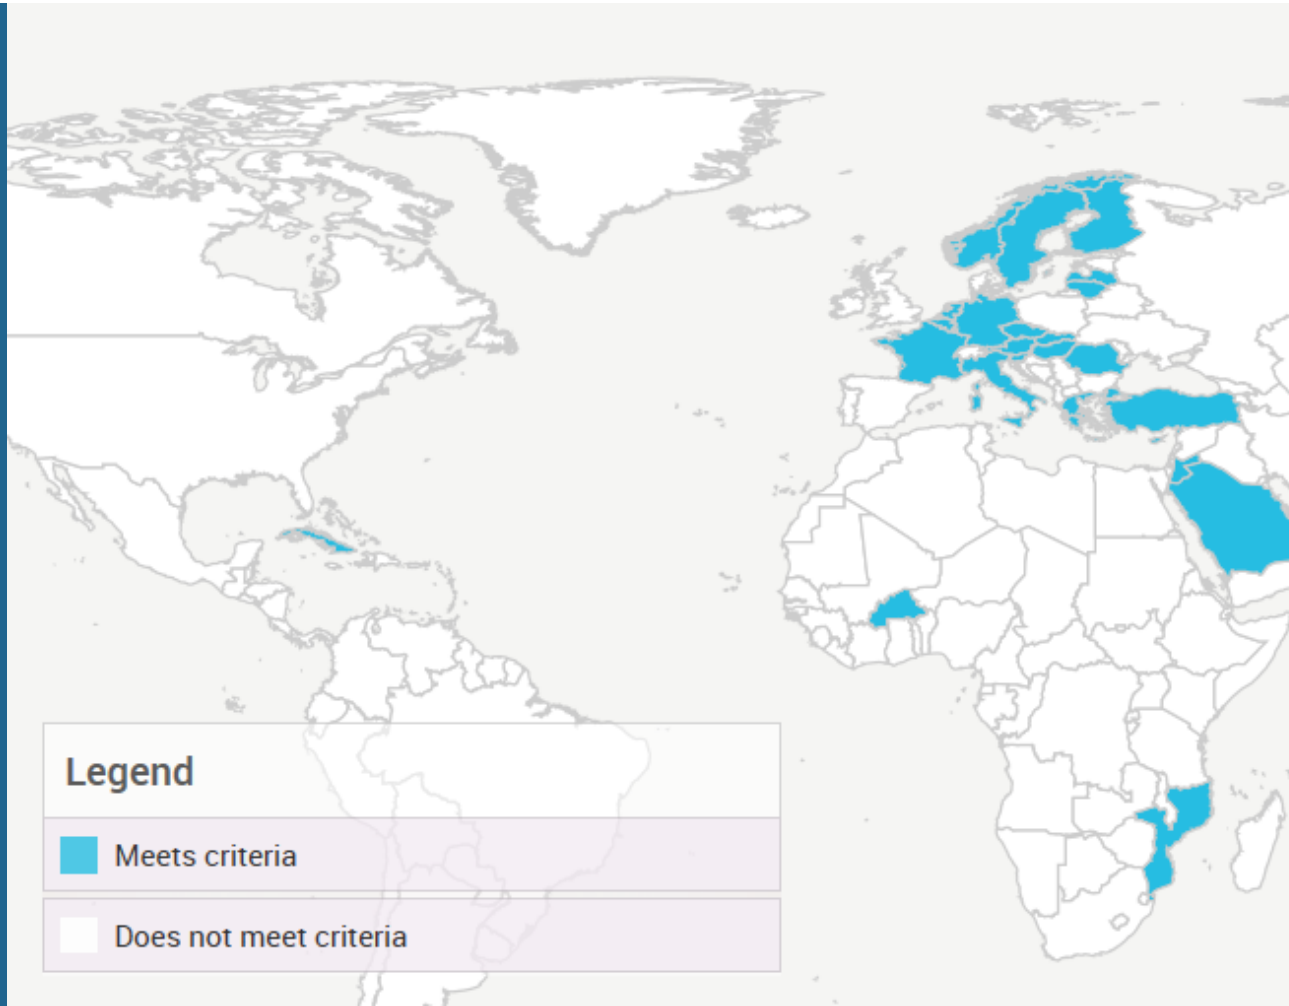

Criterion 2 ✕

6.6.1 Change in the extent of water-related ecosystems over time>Spatial extent of water-related ecosystems from earth observation data>Lakes, rivers, estuaries and artificial water bodies, change in extent from baseline reference 2001-2005 (%)

Lakes, rivers, estuaries and artificial wate... ▾

Result range(data value)

Legend

■ Meets criteria

■ Does not meet criteria

About - Data gaps

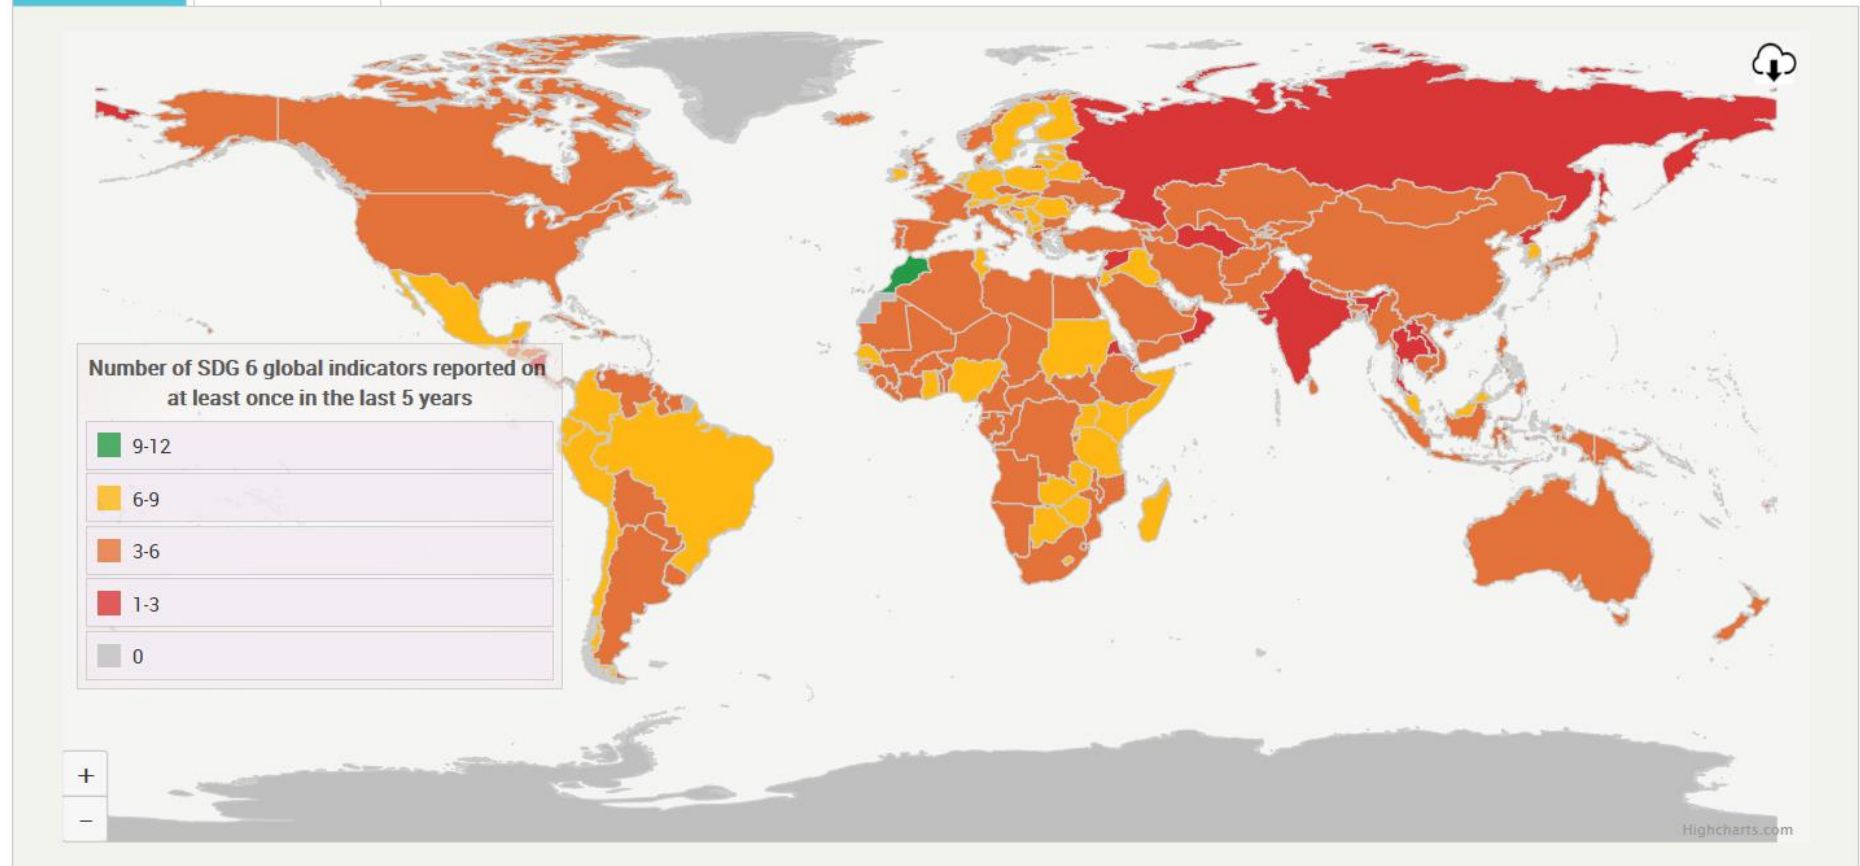

SDG 6 global indicators reported on in the last 5 years

Note that two of the indicators are not applicable to all countries (i.e. 6.5.2 only for countries sharing transboundary waters, and 6.a.1 only for countries receiving official development aid).

by country

by indicator

Next steps

- This presentation of the SDG 6 data portal is a preview, information on work in progress
- Target audience testing will start next week
- We welcome IAEG-SDGs meeting participants to take part in the testing:

<http://www.unwater.org/>

- The UN-Water SDG 6 data portal will go live during 2019, date to be confirmed.
