15:30 - 15:50	Q&A Moderator: Mathieu FRANSEN, ACER	
15:50 - 16:00	Closing Remarks Mathieu FRANSEN, ACER	

Webinar objective

On 8 May 2024, ACER [received](#) the electricity system operators' proposal for an EU-wide network code on demand response.

The [proposal](#), submitted by the EU Distribution System Operators Entity (EU DSO Entity) and the European Network of Transmission System Operators (ENTSO-E), also suggests amendments to the related existing legal framework.

ACER has already made several amendments to the system operators' proposal to ensure it aligns with the related legal framework, is proportionate and maintains legal clarity. Now, ACER is consulting on this revised draft to gather stakeholders' views early in the process.

Based on the input from this public consultation, ACER will further amend the draft network code and related legal framework before submitting the final recommendation to the European Commission by March 2025.

Event objective

In this webinar, ACER will:

- explain its proposed revisions and provide clarifications to the stakeholders;
- present the next steps in the process.
