7.2.1 G The purpose of the large exposures provisions of the BCD is to limit and control the extent to which credit institutions may commit themselves to large exposures to counterparties individually and in aggregate. Large exposures to a single counterparty and to a limited number of counterparties can create concentrations of risk in the balance sheet of a credit institution. It is the responsibility of each society's board to set its own limits for large exposures, within the general framework set by the BCD and the rules and guidance specific to societies contained in this chapter. The limits set out in this chapter are maxima. Each society should set its own prudential limits in order both to avoid the over-concentration of risk referred to above and to allow a margin for manoeuvre so as to ensure that the limits set out in this chapter can never be exceeded. Each society should set its own internal limits at a lower level than the maxima set out in this chapter.

7.2.2 G The large exposures provisions of the BCD cover all commercial asset exposures, liquid asset exposures, off balance sheet items and exposures to connected undertakings. The limits set out in this chapter therefore apply to all these areas. It should be noted that asset exposures where no counterparty is involved are not covered by the BCD (for example, fixed assets).

7.3 Definitions

7.3.1 G Under the terms of the BCD an exposure means any of the assets or off balance sheet items referred to in Article 43 or Annexes II and IV of the BCD respectively, before the application of risk weightings and credit conversion factors. Those items that are relevant to building societies are identified in Annexes 1B and 1C of chapter 1. In the BCD, an exposure to a counterparty or group of connected counterparties is defined as a large exposure where its value is equal to or exceeds 10% of own funds. The calculation of own funds for building societies is explained in chapter 1, particularly in Annex 1A.

7.3.2 G The BCD excludes from the definition of "exposure" the following:

- (1) all elements entirely covered by own funds provided that such own funds are not included in the calculation of the solvency ratio or of other monitoring ratios provided for in Community acts;
- (2) in the case of foreign exchange transactions, exposures incurred in the ordinary course of settlement during the 48 hours following payment;
- (3) in the case of transactions for the purchase or sale of securities, exposures incurred in the ordinary course of settlement during the five working days following payment or delivery of the securities, whichever is the earlier.

7.3.3 G A society considering the use of the option in paragraph 7.3.2(1) should consult the FSA well before it commits itself to a large exposure. The FSA will consider requests from societies wishing to exercise the option on a case by case basis.

7.3.4 G The calculation of the amount attributable to an off-balance sheet exposure follows the methodology established in the BCD and explained in Annex 1C. Full risk items are counted at full nominal value. For interest rate and foreign exchange contracts, the method set out in Annex 1C is to be used, but without any risk weighting by counterparty.

7.3.5 G Exposures are connected where a group of counterparties are connected: a group of connected counterparties is defined in the BCD as:

- (1) "two or more natural or legal persons who, unless it is shown otherwise, constitute a single risk because one of them, directly or indirectly, has control over the other or others; or
- (2) two or more natural or legal persons between whom there is no relationship of control but who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other or all of the others would be likely to encounter repayment difficulties".

7.3.6 G Control in this context means the relationship between a parent undertaking and a subsidiary undertaking, as defined in Part VII of the Companies Act 1985 or Part VIII of the Companies (Northern Ireland) Order 1986 (which implemented Article 1 of Directive 83/349/EEC), or a similar relationship between any natural or legal person and an undertaking. All individual exposures to the same counterparty or to a group of connected counterparties should be aggregated for the purpose of calculating a large exposure.

7.4 Controls on Large Exposures

7.4.1 G In accordance with the BCD, large exposures of societies which do not have any subsidiary undertakings should be monitored on an unconsolidated basis. Large exposures of societies with subsidiaries should, in general, be monitored on a fully consolidated basis. The basis of consolidation should be that set out in chapter 1. For convenience, the term "supervised group" is used in the following paragraphs to refer to a society and those subsidiaries subject to consolidated supervision, taken together, and in relation to a supervised group "own funds" means the consolidated own funds of the group. Intra-group exposures (i.e. exposures to connected undertakings) are covered separately in paragraphs 7.5.1 to 7.5.3.

7.4.2 G In accordance with the BCD the following limits will apply:

- (1) A society or supervised group should not incur exposure to an individual counterparty or group of connected counterparties in excess of 25% of own funds;
- (2) the aggregate of all large exposures of a society or supervised group should not exceed 800% of own funds; the aggregate of these exposures should not exceed 300% without the FSA's written approval.

7.4.3 G The BCD allows certain exemptions from the limits on large exposures, giving the competent authorities in each Member State the discretion to use these as appropriate. It also allows for certain exposures to be reduced by the application of weighting factors (in effect, partially exempting those exposures). The exemptions which the FSA allows societies are set out in section 7.8.

7.5 Exposures to Connected Undertakings

7.5.1 G The BCD takes a different approach to the control of exposures by a credit institution to counterparties with which it is connected (i.e. typically to other companies in the same group). Under Article 49.2, subject to applicable exemptions, all such exposures, collectively, are subject to a single aggregate limit of 20% of own funds. Building societies, however, have two particular features which are not shared by the generality of credit institutions. First, a building society will always be the parent entity in a group; it cannot be a subsidiary nor form a minor part of a diversified non-financial conglomerate. Second, under the 1986 Act, as originally enacted, building societies were able to carry out certain activities only through subsidiary companies or other associated undertakings. Although subsequent legislation allows activities to be carried out by the parent society which previously had to be carried out by subsidiaries, the FSA anticipates that societies may still wish to carry on certain activities in dedicated subsidiaries. Given this, the FSA applies, in relation to the single aggregate limit of 20% of own funds, an exemption for all exposures to a society's own subsidiaries that are subject to consolidated supervision. At the same time, the FSA limits exposures to individual subsidiaries to 20% of own funds.

7.5.2 G The FSA's approach to consolidated supervision in relation to capital adequacy is set out in chapter 1, including the criteria for excluding a subsidiary undertaking from the calculation of the consolidated solvency ratio. The same approach will apply to the control of large exposures. The limits on a society's exposures to counterparties connected with it are therefore as follows:

- (1) in relation to any single subsidiary undertaking or sub-group of subsidiary undertakings within the supervised group, the society may not incur an exposure in excess of 20% of own funds;
- (2) the aggregate of all exposures of the supervised group to counterparties connected with the society but outside the supervised group may not exceed 20% of own funds;
- (3) large exposures to counterparties connected with the society still count towards the overall limit of 300% of own funds (or 800%, if the FSA agrees as set out in paragraph 7.4.2(2)) unless otherwise exempted.

7.5.3 G The FSA will also allow further partial exemption to societies in respect of exposures of the kind referred to in paragraph 7.5.2(1). This exemption will draw upon the principle of solo consolidation described in section 1.11. An exposure of the kind referred to in paragraph 7.5.2(1) will be exempt from the limits on large exposures in paragraphs 7.5.2(1) to 7.5.2(3) where it is agreed by the FSA that the subsidiary undertaking concerned may be solo consolidated. Subsidiary undertakings which fall into this category will probably be those undertaking core business but where the society has decided for structural reasons to undertake the business through a subsidiary. Section 1.12 sets out the criteria under which the FSA considers applications for solo consolidation for mortgage subsidiaries. In other cases, societies will need to explain on what basis they consider it appropriate or necessary for solo consolidation to be granted. In all cases, the society should specify the maximum exposure that it is planning to incur.

7.6 Reporting and Notification of Large Exposures

7.6.1 G The FSA may require large exposures to be reported quarterly and has included reporting of large exposures on a consolidated basis in Table L of the quarterly return QFS1 for building societies. Table L of QFS1 also collects additional information on off balance sheet exposures.

7.6.2 R A society contemplating a new exposure which will exceed 20% of own funds (or when aggregated with an existing exposure to the same counterparty or group of connected counterparties would exceed 20% of own funds) must give prior notification to the FSA of such exposure, before making any commitment, using the standard reporting form, LEPR1.

7.6.3 R Exposures of between 10% and 20% of own funds must be reported by each society to the FSA. This information should be reported quarterly by means of Table L of QFS1.

7.6.4 G If a society exceeds the 300% aggregate limit (or the 800% limit, if the FSA so agrees), this should be reported immediately to the FSA in writing.

7.6.5 G Societies should also report to the FSA within two months of the end of their financial year:

- (1) confirming that the criteria under which solo consolidation was granted continue to apply. If any do not continue to apply, details of the changed circumstances should be provided;
- (2) confirming that the activities of the subsidiary undertaking(s) continue to be limited to those engaged in at the time that the FSA approved solo consolidation;
- (3) in respect of each case where solo consolidation has been granted, the amount of the current exposure.

7.7 Systems: Rules and Guidance

7.7.1 R Each society must maintain adequate systems and controls which enable it to:

- (1) monitor and control its large exposures in accordance with its large exposures policy (referred to in Rule 7.7.3); and**
- (2) make timely and accurate reports to the FSA on its large exposures.**

7.7.2 G Each society should ensure its internal audit programme covers the system for monitoring and control of large exposures.

7.7.3 R Each society must set out its policy on large exposures as part of its Financial Risk Management, Liquidity and Lending Policy Statements.

7.7.4 G Paragraphs 4.2.5, 4.2.6, 5.2.7, 5.2.9, 6.2.2 and 6.2.3 contain rules about policy statements and rule 7.7.3 should be read in conjunction with those rules.

7.8 Exemptions

7.8.1 G This section sets out the exemptions which the FSA allows to societies. In some cases, the FSA allows partial exemption by applying a weighting to the asset amount. The weighting of asset items means multiplying the asset value in the balance sheet by the percentage weight and including the weighted amount in any calculation of large exposures. This process is distinct from, though having some similarities to, the risk weighting of asset items for solvency ratio purposes and it is important that the two processes, and the respective weightings, are not confused.

7.8.2 G Assets constituting claims on the central government or central banks of Zone A countries are fully exempt. Annex 1G defines Zone A and contains a full list of current Zone A countries. Although the Channel Islands, Gibraltar, Bermuda and the Isle of Man may be

regarded as OECD members for the purpose of calculating a society's solvency ratio they may not be so regarded for large exposure purposes.

7.8.3 G Assets constituting claims carrying the explicit guarantee of the central governments or central banks of the countries set out in paragraph 7.8.2 are fully exempt.

7.8.4 G Other exposures attributable to, or guaranteed by, the central governments or central banks of the countries set out in paragraph 7.8.2 are fully exempt.

7.8.5 G Asset items and other exposures effectively and legally secured by cash deposits with the society or with any subsidiary undertaking of the society which is also a credit institution (defined in the BCD as an undertaking with both a deposit taking and a lending business) are fully exempt. Societies should note that this definition excludes most existing subsidiaries.

7.8.6 G Claims on and exposures to other credit institutions (including to other building societies) are subject to weightings, for the purpose of calculating exposures, as follows:

- (1) Maturity of one year or less: 0% (i.e. fully exempt);
- (2) Subject to prior written agreement from the FSA, societies' derivative exposures to banks, other building societies and investment firms subject to the Capital Adequacy Directive (CAD) (or subject to a regime that the FSA deems to be equivalent to CAD) with a maturity of over one year but under three years: 20% (i.e. partially exempt)

except where the exposure represents the own funds (as defined in the BCD) of the other institution (e.g. subordinated debt), in which case the exemption does not apply.

7.8.7 G Societies should note that the exemptions in paragraph 7.8.6 do not apply to their own subsidiaries, which also happen to be credit institutions or investment firms subject to CAD.

8 Mortgage Indemnity Insurance

8.1 Introduction

8.1.1 G This chapter replaces PN 1998/8 issued by the Commission and contains rules and guidance for societies on mortgage indemnity insurance. The acronym MIG (Mortgage Indemnity Guarantee) is used throughout, as it is widely understood as shorthand for mortgage indemnity insurance.

8.1.2 G The chapter outlines the types of cover available to societies to protect themselves against the risks of high loan to value (“LTV”) lending. These include the use of a captive insurance company, excess of loss and self-insurance as well as MIG provided by an external insurer, which may be the preferred option for most societies. The chapter sets out factors the FSA will take into account in assessing the adequacy of a society’s policy for protecting itself against high LTV risk and comments briefly on capital adequacy and systems.

8.2 Rules

8.2.1 R A society undertaking any new lending at a high LTV ratio must have an adequate policy in place to provide protection against the greater risks involved with such lending. In this rule, “high LTV” means lending with an LTV ratio in excess of 80%.

8.2.2 G The extent of the protection in place will be a factor in determining the society's threshold solvency ratio. Factors that the FSA will consider in assessing the adequacy of the policy required in 8.2.1 are set out in the guidance in the rest of this chapter.

8.3 Factors the FSA will consider in assessing compliance with rule 8.2.1

8.3.1 G In deciding how to manage risk from high LTV lending, societies should assess the monetary value to them of the types of cover available and consider the risks and benefits associated with each type of cover, including the losses they could bear. They should assess the systems and accounting implications of changes to the type and level of cover provided.

8.3.2 G Societies have a number of options for managing risk from high LTV lending. They may dispense with MIG altogether, in conjunction with a change to lending policy to "re-balance" the risk profile of the society's loan portfolio. They may continue MIG cover on the best terms available or approach alternative MIG insurers, to establish whether cover on better terms than the standard MIG contract is available. They can consider other forms of insurance, such as excess of loss, self-insurance, and use of a captive insurance company.

8.3.3 G Whilst societies should regard the covenant of the borrower as their principal source of repayment, a comfortable margin in the value of the security is of vital importance. Past experience suggests that it would be imprudent to continue with high LTV lending without obtaining some form of additional protection against the risks involved.

8.3.4 G Therefore, societies undertaking high LTV lending that end their MIG cover and put nothing else in its place, should reduce substantially the proportion of new high LTV lending they undertake. If societies in this position decide not to reduce the level of high LTV lending, the FSA will take into account the society's increased risk profile in setting its threshold solvency ratio.

8.3.5 G The remainder of this chapter focuses on the types of protection against high LTV risk which are available.

8.4 Captive Mortgage Indemnity Insurance Companies (MIG Captives)

8.4.1 G The use of a MIG captive can be a sensible way to manage risk from high LTV lending. This section sets out the factors the FSA will take into account when assessing whether the use of a captive by a society meets the requirement in rule 8.2.1.

8.4.2 G A captive is a means of retaining and managing risk, wholly or partially, within the group. A society should first consider whether, and to what extent, it wishes to retain risk before deciding on any particular mechanism for risk retention. It should consider what its objectives are for high LTV risk and then assess how various forms of cover, including a MIG captive, could meet the objectives. Under the standard MIG contract, the lender retains a significant portion of risk and a captive may be a suitable means for managing that risk.

8.4.3 G A captive could take on all or part of the society's mortgage indemnity business. A wholly-owned captive should not provide unlimited MIG cover to its parent society: cover should be capped in some way, perhaps with a limit on claims arising from any one year's lending. The terms of cover provided by the captive to the parent, and the premiums charged, should be reviewed at least annually. Very generous cover may mean that the captive cannot fully meet the claims on it, and if a captive is unable to meet those claims the loss will revert to the society.

8.4.4 G For smaller societies an "association captive", owned by a group of societies, can be suitable for handling their mortgage indemnity risks. There may be practical difficulties involved, for example, the need for each society to be comfortable with the lending policy of its fellow-owners and the need to pool information. Proper oversight is likely to be more difficult when a captive is multi-owned.

8.4.5 G Society MIG captives should normally be wholly-owned by one or more building societies and provide MIG cover only to the owner society/societies (or to respective subsidiaries). Any scheme which envisages wider ownership, writing MIG business for other lenders or other lines of insurance business should address the different risks involved. Such a company would, of course, not be a pure MIG captive and the FSA's capital requirements are likely to reflect this.

8.4.6 G Societies should consider how the captive will set its premiums. A sensible starting point might be the amount paid for the equivalent external MIG cover and information about the society's lending book, and its claims propensity, should be collected to enable the business to be rated accurately in future. Initial assumptions about the size and frequency of claims should be tested against actual experience. If the captive underprices the

cover it may be difficult for the society, because of borrower resistance or competitive pressures, if the captive were to increase premiums later.

8.4.7 G Societies should consider over what period income can prudently be recognised by the captive, having regard to industry good practice for this kind of business and the likely timescale for emergence of claims. Regular reviews should compare the profit earning period chosen with actual claims experience. Societies should undertake detailed financial modelling to show what premium the captive can be expected to receive and what claims will arise for each annual tranche of lending over, say, a 10 year period. This will involve a full analysis of the performance of the society's mortgage book and societies should take the appropriate professional, including actuarial, advice.

8.4.8 G A captive is an appropriate vehicle for carrying normal MIG losses but is unsuitable for bearing exceptional losses over and above the normal level. Societies with or intending to establish MIG captives should obtain reinsurance to cover the risk of exceptional losses. Societies should consider what price the captive can pay for reinsurance and still remain commercially viable. Societies should also assess the terms on which reinsurance cover is offered, especially any restrictions on lending criteria, the financial standing of the reinsurer and its commitment to the MIG market.

8.4.9 G A captive may be exposed to greater risk in its early years of operation and societies should consider additional protection during this period. A captive may, for example, take out financial reinsurance or finite risk insurance to smooth cashflow.

8.4.10 G A captive needs capital to ensure that it can meet claims in all circumstances. In setting capital for a captive, societies should consider whether the captive is robust enough to weather exceptional losses arising from a "severe adverse case". Such a case might include high interest rates, a high level of borrower default and falls in both house prices and turnover - comparable to the worst experience during the period 1989-1992. It would be reasonable to assume that the "severe adverse case" would affect three consecutive years' lending.

8.4.11 G The captive should assess its probable maximum liability to claims at any one time, on each year of lending, based on a "severe adverse case". The residual risk to the captive

from each year of lending can be calculated taking into account this probable maximum liability, capped by reinsurance if used, and offset by the amount built up from net premiums and investment income. This is the “risk gap” for that year of lending. The relevant local insurance supervisors (most captives are located offshore) will impose their own capital requirements, and the FSA expects societies to comply with these. However, societies and their advisers should develop their own methodologies for assessing the prudent level of capital for the captive over and above the regulatory minimum. The FSA will take into account the society’s methodology for setting capital (including the concepts set out above) in assessing the adequacy of a society’s policy for managing high LTV risk.

8.4.12 G A society may either make the full amount of its capital commitment available immediately to the captive as fully paid share capital or keep part of its commitment in reserve. At least the capital requirements of the local insurance supervisor should be met through fully paid share capital. Societies can provide part of the overall capital commitment in the form of issued but uncalled, or partly paid share capital - where the captive is entitled to call for payment at any time and at its sole discretion.

8.4.13 G For solvency ratio purposes, a subsidiary MIG captive should be included in the consolidated calculation in accordance with Chapter 1 (Solvency). In calculating the society only solvency ratio, the FSA has adopted a composite treatment for building societies which recognises both that the capital invested in the captive bears a heavier risk of loss than the generality of investments in subsidiaries, and that the captive bears only the society's own lending risk and is not using its capital to "gear up" and assume new external liabilities. Of the total capital committed to the captive, whether fully paid or not, 25% (or, if greater, the capital requirement of the local insurance supervisor) should be deducted from the society's own funds, in the society-only calculation. The remainder should be risk-weighted at 100% as an investment in a subsidiary.

8.4.14 G Societies should consider where any captive should be domiciled and the choice of location should be made according to clear criteria (including convenience to facilitate effective oversight). Whichever location is chosen, the captive will need to obtain authorisation from the local supervisory authority and the FSA will communicate with that body about any application for authorisation.

8.4.15 G The society should put in place controls to oversee the operation of its captive. The captive should be overseen at a high level within the society and within a department (e.g. finance) independent of the lending/marketing function. The society should consider what regular information the captive should provide to the parent to enable proper oversight.

8.4.16 G The captive managers should meet regularly with the captive's board to discuss issues such as the adequacy of reserves and premium rates. The FSA also expects societies to commission an external review of the performance of the captive including actuarial advice on the same issues, say every two years, with a minimum of every three years.

8.4.17 G Local insurance supervisors have detailed rules about the type of asset which count towards the captive's solvency margin. The captive's investment policy should be clearly documented, specifying acceptable types of instrument and counterparties. The captive's directors should set investment policy rather than the captive managers or fund managers. In the early years of the captive's life, the funds should be invested in a prudent combination of bank/building society deposits, government securities and other high quality securities. The captive may deposit funds with the parent society provided the society meets the criteria specified in the captive's investment policy (although local insurance supervisors are unlikely to permit the captive to deposit 100% of its funds back with the parent).

8.4.18 G Societies may consider arrangements whereby a third party, such as a UK composite insurer, owns a captive insurance company which "rents" underwriting capacity to a society for its own MIG business (known in the market as a "rent-a-captive"). Any society intending to follow this route should consider the basis of the cover and the availability of reinsurance cover and, as a result of these factors, how much risk it retains.

8.4.19 G The activities of society-owned MIG captives may be expanded to enable them to write other business including insurance of other risks incurred by the parent society or another part of the society group and reinsurance of other lines of business originated by the parent society group.

8.4.20 G Where such business is written by society-owned MIG captives, sufficient capital and reserves should be maintained to enable the risk gap for MIG business to be met in full.

For these new lines of business, at least the capital requirements of the local insurance supervisor should be met through fully paid share capital.

8.4.21 G To avoid "double gearing", a society's investment in these new lines of business, and loans of a capital nature to finance such business, should be excluded, in full, when calculating its solvency ratio as set out in Chapter 1 (Solvency).

8.4.22 G Capital and reserves maintained for MIG business should be legally "ring-fenced" from the capital and reserves held to meet new lines of business. Captives should therefore adopt an appropriate and effective legal structure.

8.5 Self-Insurance and Non-Insurance

8.5.1 G Self-insurance is another way of containing high LTV risk. This section sets out the factors that the FSA will have regard to when assessing the adequacy of any policy for managing high LTV risk which uses this approach.

8.5.2 G With self-insurance some or all of the risk is retained by the society and either borrowers are charged a "premium" (e.g. a fee or additional interest) or the society absorbs the cost through self-charging. The FSA will consider either to be a prudent approach, provided charges to borrowers or the level of self-charging is adequate.

8.5.3 G With non-insurance some or all of the risk is retained by the society, but no charge or self-charge is made. In such cases, the society will be deemed to have no protection against the risk associated with high LTV lending and should follow the guidance in paragraph 8.3.4.

8.5.4 G Societies may combine an external MIG policy with self-insurance or non-insurance. This will arise, for example, under the co-insurance arrangements applied by many insurers, where the external MIG covers 80% of the risk but the society retains the remaining 20%. Where a society has a co-insurance arrangement or a cap on claims with their MIG insurers, it should consider what action should be taken in respect of that proportion of the risk it retains.

8.6 Charging for Self-Insurance

8.6.1 G Societies which retain some or all of their MIG risk without using a captive will need a methodology for determining the amount of risk being accepted and the level of charge to borrowers (or self-charging) for carrying that additional risk.

8.6.2 G To assess the level of charge or self-charging required, societies should devise a methodology to assess the relative risk from differing loan products, borrower types and types and location of property. Such a methodology should use historical statistical information evaluated using a range of assumptions (future interest rates, property prices etc). Independent specialist advice (e.g. from a firm of actuaries) is highly desirable.

8.7 Excess of Loss Insurance

8.7.1 G Excess of loss or stop loss insurance is another way of protecting against risks arising from high LTV lending. Such policies meet claims once a certain threshold loss to the society (the excess or deductible) has been reached. They usually have a defined upper limit, after which losses revert to the society, and they may involve an element of co-insurance.

8.8 Mortgage Book Acquisitions

8.8.1 G Societies should also consider the risks arising from high LTV lending where they have acquired the loans through a mortgage book acquisition. Following completion of the transaction, the principles of this chapter should be applied to the portfolio of loans acquired. Societies should also ensure that any captive acquired meets the rule and guidance in this chapter within a reasonable time of the acquisition.

8.9 Capital Adequacy

8.9.1 G As set out in Chapter 1 (Solvency), the FSA will consider the lending policy and the MIG arrangements of each society when reviewing its threshold solvency ratio. The

assessment will focus on the degree of risk accepted or retained by the society rather than the mechanism used to manage the risk.

8.9.2 G However, the FSA considers that the magnitude of risk retained by a society that either self-insures its entire MIG risk on-balance sheet, or places its entire MIG risk with a captive without reinsurance or takes no action to cover the uninsured portion of MIG risk under the standard external contract, is such that, other things being equal, the FSA is likely to raise that society's threshold ratio.

8.10 Systems

8.10.1 G Societies should ensure that their systems are adequate to monitor and control the risks arising from high LTV lending. (Systems should, of course be adequate to monitor and control all lending, but this chapter focuses on high LTV lending). For example, where societies self-insure, they should operate adequate systems for collecting charges from borrowers (or self-charging) and should set up systems to collect data on the performance of the loan book to help them set appropriate charge levels and assess likely future losses. Where any kind of captive arrangement is used, a society's systems should collect data on the performance of the loan book to refine the underwriting, pricing and reserving/reinsurance policies of the captive.

Interim Prudential Source Book for Building Societies

9 Systems

9.1 Introduction

9.1.1 G This chapter replaces PN 1996/4 issued by the Commission. It contains rules and guidance on societies' systems of business control and accounting records. It supplements, for building societies, Principle 3 and the rules and guidance on senior management arrangements and systems and controls in SYSC, in particular, rule SYSC3.1.1 ("a firm must take reasonable care to establish and maintain such systems and controls as are appropriate to its business").

9.2 Rules and Evidential Provisions

9.2.1 R A society must have, and ensure that its subsidiary undertakings, if any, have, a fully-documented system of control.

9.2.1(1) G The guidance in section 9.4 applies to the society and any subsidiary undertakings, unless the context clearly dictates otherwise. It is recognised that it may be more convenient for systems of control of the society and any subsidiary undertakings to be integrated, rather than maintained separately.

9.2.2 G Guidance on the documentation of systems of control is given in section 9.5.

9.2.3 E (1) A society should have an internal audit function (this may be either in house or outsourced to a third party).

(2) Contravention of 9.2.3(1) may be relied upon as tending to establish contravention of SYSC3.1.1.

9.2.4 G Guidance on internal audit is given in section 9.6 and in SYSC 3.2.16.

9.2.5 E (1) A society should establish an audit committee consisting of at least three members who are also non-executive directors;

- (2) **Contravention of 9.2.5(1) may be relied on as tending to establish contravention of SYSC3.1.1.**

9.2.6 G Guidance on audit committees is given in section 9.7 and in SYSC3.2.15.

9.2.7 R A society must maintain, and submit to the FSA, a board-approved corporate plan.

9.2.8 R A society making any significant change to its corporate plan must provide the FSA with a copy of the amended plan as soon as possible after it has been adopted.

9.2.9 G Guidance on corporate planning systems is given in paragraphs 9.4.13 to 9.4.18.

9.3 Accounting Records and Systems

9.3.1 G A society is required by SYSC3.2.20 to take reasonable care to make and retain adequate records (including accounting records) and should have appropriate systems and controls in place to fulfil its obligations with respect to adequacy, access, periods of retention and security of records.

9.3.2 G Every building society is also required, under section 71(1) and (2) of the 1986 Act, to keep accounting records which:-

- (1) explain the society's transactions;
- (2) disclose, with reasonable accuracy and promptness, the state of the business of the society at any time;
- (3) enable the directors properly to discharge the duties imposed on them by or under the 1986 Act and their functions of direction of the affairs of the society;
- (4) enable the society properly to discharge the duties imposed on it by or under the 1986 Act.

9.3.3 G The records should contain (see section 71(3) of the 1986 Act) entries in respect of all payments and receipts together with descriptions thereof, entries of all

transactions giving rise to, or likely to give rise to, assets or liabilities and a record of the assets and liabilities of the society, in particular of any class relevant to the “nature limits” in sections 6 and 7 of the 1986 Act.

9.3.4 G The main reasons why a building society should maintain adequate accounting and other records are:

- (1) to provide the directors and management of the society with adequate financial and other information to enable them to conduct its business in a prudent manner on a day-to-day basis;
- (2) to safeguard the assets of the society and the interests of investors;
- (3) to assist directors of the society to fulfil their statutory duties in relation to the preparation of annual accounts;
- (4) to provide the directors and management of the society with sufficient timely and accurate information to assist them to submit the information required or requested by the FSA.

9.3.5 G To achieve this, the society’s accounting systems should disclose, in an orderly and integrated way, with reasonable accuracy and promptness, the state of the business at any time. The records should be maintained to enable financial and business information to be extracted promptly, so that directors and management can monitor and control the performance of the business, the state of its affairs and the risks to which it is exposed. The nature of, and frequency with which, information is prepared, its level of detail, and the amount of narrative analysis and explanation, and who should receive it, is for directors and senior management to decide.

9.3.6 G More detailed guidance on accounting records and systems is set out at Annex 9A, which is derived from the FSA’s guidance in the Interim Prudential Sourcebook for banks. References in Annex 9A to “banks”, and where appropriate “companies”, are taken to include building societies.

9.4 Systems of Business Control

9.4.1 G A society should have systems to enable the directors to control the conduct of its business and to control the accounting and other records. To exercise proper control over the business, the directors should understand the underlying business activities, and how they are carried out. Directors should have procedures in place to identify and assess the risks which may arise through the conduct of that business. Control objectives should be set for each area of the business, controls established and maintained which address appropriately the identified risks to ensure the prudent conduct of the business in accordance with the society's policies, and compliance with all relevant laws and regulations and the FSA's rules.

9.4.2 G A society is required by SYSC3.1.1 to take reasonable care to establish and maintain such systems and controls as are appropriate to its business. In addition, SYSC3.2.6 requires a society to take reasonable care to establish and maintain effective systems and controls for compliance with regulatory requirements and standards. More detailed guidance on internal control systems is set out at Annex 9B, which is derived from the FSA's guidance in the Interim Prudential Sourcebook for banks. References in Annex 9B to "banks" are taken to include building societies.

Organisational control systems

9.4.3 G Societies are required by SYSC2.1.1 to take reasonable care to maintain a clear and appropriate apportionment of significant responsibilities among its directors and senior managers. In addition, SYSC2.1.3 requires the apportionment of the responsibilities and establishment and maintenance of systems and controls to be overseen by a senior individual. SYSC2.2.1 requires societies to keep an up-to-date record of such arrangements.

9.4.4 G Societies should have:

- (1) clearly defined organisational arrangements and a defined structure of authorities, mandates and responsibilities, including reporting lines, which distinguish between decisions to be reserved for the board and those to be delegated to board committees, or managers and employees; and
- (2) arrangements for reviewing the compliance with and effectiveness of organisational controls.

9.4.5 G The composition and operation of the board of a society, and the maintenance of a properly defined structure of board committees, are important elements of high level organisational controls (see chapter 3 Boards and Management).

9.4.6 G The directors of a society should ensure that:

- (1) the society's overall organisational arrangements are adequately defined and documented, usually through an organisation manual;
- (2) the society's decision-making processes, including authority limits and responsibilities, are properly defined and documented, usually through operating manuals; and
- (3) compliance with approved authority limits and stipulated segregation of duties is effectively monitored and controlled.

Management information systems

9.4.7 G More detailed guidance on information for management is set out at paragraphs 6-8 in section 3.2.3 of Annex 9A.

9.4.8 G The board and management of a society should satisfy themselves that:

- (1) the information available is sufficient to enable the board to measure, manage and control risks identified in accordance with paragraph 9.4.1;
- (2) the information available is sufficient for a proper assessment of the potential risks for the society and the proper determination of its need for capital and liquidity;
- (3) the information available is sufficiently comprehensive to provide the board with a clear statement of the performance and financial position of the society;
- (4) management information reports are prepared for the board and management on a regular and timely basis, consistent with the dynamics of the business area reported on. Such reports should allow exposure to be monitored against limits and other parameters set by the board;

- (5) actual performance is compared with prior periods and with budgeted performance at least quarterly and that significant variations are highlighted and explained;
- (6) sufficient attention is focused on key factors affecting income and expenditure, including capital expenditure, and that appropriate performance indicators are employed;
- (7) management information is accurately prepared from the underlying accounting and other records and is presented in a clear, consistent and understandable way.

9.4.9 G The form and content of management information should be reviewed regularly. It should be appropriate and relevant to the current business of the society and to market conditions. Such information should include financial information and other matters such as current market conditions and trends, reporting on the control environment and the status of any current control issues, and the extent of achievement of quantitative and qualitative business targets. Information should clearly indicate the extent of future commitments, as well as the current position arising from treasury management operations.

9.4.10 G In forming a view on whether the management information system is sufficiently comprehensive, the board and management of a society should consider whether the information made available to them provides, for both the society and, where applicable, the group, a clear statement of:

- (1) the capital position;
- (2) the liquidity position;
- (3) the exposures arising from treasury management operations, including an analysis of off-balance sheet positions;
- (4) profits and losses, assets and liabilities, and funds flows;
- (5) the profitability of products, services and subsidiary undertakings;
- (6) the balance sheet ratios in relation to the lending and funding limits in sections 6 and 7 of the 1986 Act;

- (7) the society's actual exposure, in those areas where the board has set a limit, compared to that limit.

9.4.11 G The above matters should be compared against limits, ratios and other parameters set by the board and notified to the FSA or other regulatory authorities.

Information for the FSA

9.4.12 G Information reported to the FSA should be accurate and timely. Societies must complete returns in accordance with the FSA's requirements, set out in chapter 16 of the Supervision Manual, and submit them within the specified timetable. Returns should be reviewed prior to their submission to the FSA at a sufficiently senior level. The procedures should check for consistency between different returns, between the various tables in the same return, and between the returns and information prepared for the board.

Planning systems

9.4.13 G A satisfactory planning system should help a society to comply with its regulatory obligations. It is for each society to decide what is an appropriate planning horizon and to maintain and develop planning systems appropriate to its individual circumstances and the changing business environment.

9.4.14 G Rule 9.2.7 requires each society to maintain, and send to the FSA, a corporate plan. This should deal with longer-term strategic issues, should be reviewed and updated annually and should include:

- (1) views on the markets in which the society competes and the society's position in those markets;
- (2) identification of the society's strengths and weaknesses, market and other opportunities open to it, and threats to the society's business;
- (3) a clear enunciation of the society's strategic aims and action to achieve those aims;
- (4) the resource implications of the strategic aims (including information technology, senior management and staff, and financial resources);

- (5) financial projections, including sensitivity analyses.

9.4.15 G A corporate plan should not simply consist of a number of desirable aims, but should set out the process for achieving these and within what timescale. The board should ensure that there are appropriate policies and procedures in place to implement the strategic plan, as well as mechanisms to monitor achievement against the plan so that, if necessary, appropriate corrective action may be taken.

9.4.16 G The planning systems of a society should also set, review and revise short and medium-term financial and other objectives, consistent with the society's longer-term strategic aims.

9.4.17 G The planning, detailed budgeting and financial accounting systems and processes should be integrated to enable outcomes to be monitored against plan, and for the feedback of results into management decisions and into the planning process. Some of the key features of such processes are:

- (1) There should be clearly-defined short, medium and long-term planning systems, with an unambiguous allocation of responsibilities within the organisation for the development, review, approval and implementation of plans, and for subsequent monitoring of performance against them.
- (2) The elements of any plan should be supported by adequate data, obtained from internal and external sources, and by critical analysis.
- (3) A range of possible outcomes should be considered, relating to varying levels of risk and/or uncertainty, and their financial impact on profitability and capital strength assessed.
- (4) Key indicators should be identified against which actual performance will be tracked. Actual data should be prepared on a basis consistent with the plan, to enable proper comparison to be made.

9.4.18 G Comprehensive arrangements, documented in business recovery plans, should be in place to ensure continuity of business in the event of some unforeseen disaster such as a fire or bomb damage. Information technology ("IT") is an extremely important element, and any business recovery plan should include the possibility of major hardware or software

failure. Planning should cover all aspects of a society's business that might be affected, including premises, personnel and external communications. These arrangements should be regularly reviewed and tested to ensure that they work in practice.

Information Technology

9.4.19 G IT is a major feature of any society's business. Mistakes in this area could be very costly to a society, in terms of money, staff resource and market share. The board of a society should be sufficiently knowledgeable and experienced to appreciate the issues involved and be in a position to exercise proper control over IT systems and developments.

9.4.20 G The board and management of a society should address a wide range of IT issues, some of which are set out below:

- (1) The society should have an IT strategy which is consistent with its longer-term strategic aims.
- (2) Procedures should be in place to ensure that a comprehensive evaluation is made of proposed major IT investment and that the technical and business cases for the investment are clearly demonstrated.
- (3) There should be an appropriate allocation of responsibility for IT issues and an organisation structure which is conducive to a strong IT control environment.
- (4) The security of data and systems is of paramount importance. Controls should be in place to minimise the risk of unauthorised physical and logical access, or the loss of data. Such controls should cover not only centralised mainframe processing but also remote terminals and stand-alone or linked PCs.
- (5) The board should exercise strong control over the development and implementation of new or significantly modified systems. Appropriate technical and project management skills are required and boards should consider seeking expert outside assistance.
- (6) Internal audit should have skills and experience to assess the effectiveness of IT controls. Internal audit should be involved in an advisory capacity during

the development of significant new IT systems, to ensure that appropriate controls are in place.

9.5 Documentation of Systems

9.5.1 G Rule 9.2.1 requires a society's system of control to be fully documented. Documents setting out the systems of control should be available to the board at all times. The documentation helps boards to assess if systems are maintained and controls are operating effectively. It also helps those reviewing the systems to ensure that the controls are those that have been authorised, that they are complete and adequate for their purpose. The use of policy statements documenting the society's policy in a particular area (e.g. lending) is an important element of high level controls.

Form of documentation

9.5.2 G The board and management of a society should determine the form of documentation to be adopted. Considerations should including the following:

- (1) It should be comprehensive. It should cover all material aspects of the operations and business of the society.
- (2) It should be integrated. Separate elements of the system should be interrelated and cross-referred so that the system can be viewed as an integrated totality.
- (3) It should identify risks, and the controls and other arrangements established to manage those risks. The controls should be identified and their purpose defined so that their effectiveness can be evaluated and so that the relationship and interdependence with other controls can be established.
- (4) It should attribute responsibility for operating the controls. There should be named persons or posts for each control operation, alternatives in case of absence, and continuity of standards of control during absence.
- (5) It should state how operation of the control is to be evidenced. Evidence would normally require signatures or initials; records and registers; retention of control documents; staff attendance records.

- (6) It should establish a comprehensive and unambiguous control discipline. The instructions should be clear and precise, avoiding expressions in relation to control functions such as “normally” and “if possible”.
- (7) It should be suitable for practical, day to day use. The separate specifications of controls should have a practical role in the review and improvement of systems, for example, through the inspection function.
- (8) It should be up to date. There should be an accurate description of the system that has been established and is operating. When changes are made to the systems the appropriate systems of control need to be both established and documented by the time the changes become operative.
- (9) It should require confirmation of compliance. Managers in branches and other areas of a society’s business are key control points within the overall control system. They should periodically be required to confirm to the board, to the best of their knowledge and belief, compliance with the controls within the system which has been established.

9.5.3 G The content and level of detail required in documentation prepared for directors and senior management may be different from that required in documentation prepared for the use of more junior staff. In the latter case the main purpose of system documentation is typically to guide staff through the clerical and IT procedures. Such material may be detailed and contain only limited coverage of the control procedures applying to the work of that staff member. The board and senior management require a summarised version, with a wider scope and with a greater emphasis on controls. Whatever form of documentation is adopted it should facilitate an understanding of the society’s systems, procedures and controls, at the level appropriate to the user.

9.5.4 G Societies should make explicit the accounting and other controls which are applicable to their systems, in a separate section of a procedures manual or in a separate document devoted to controls.

9.5.5. G Documentation should not be restricted to “lower-level” clerical and authorisation controls applied in transaction processing, but should also cover “high level” supervisory controls and accordingly should deal with:

- (1) powers to be exercised only by the board, and powers delegated to others;
- (2) the purpose, composition and reporting lines of committees of directors and senior management to whom powers or responsibilities are delegated;
- (3) the specific roles, responsibilities and reporting lines of board members, including the Chairman, executive and non-executive directors;
- (4) the timing, form and purpose of meetings of the directors and the mechanism whereby agreed board strategies, policies and decisions are recorded and their implementation monitored.

IT controls

9.5.6 G The documentation of IT controls should be integrated within the overall documentation of a society's system of business control. Operating manuals provided by a IT supplier can form a useful part of a society's procedures documentation but it is less likely that such manuals will be in a form which enables them to comprise part of the control documentation. The criteria set out in paragraph 9.5.2 apply equally to the controls surrounding IT systems.

9.5.7 G There will be a number of key controls performed within the IT and computer programs and a society should ensure that it documents all such controls if reliance is being placed on them.

9.6 Internal Audit

Purpose of internal audit

9.6.1 G The purpose of internal audit is to:

- (1) provide regular appraisal for management and the board as to the overall effectiveness of the control systems, including all proposed changes, and to recommend improvements where considered desirable or necessary;
- (2) determine whether the systems and controls established by management and the board have operated as laid down (in the society's control documentation)

and comply with policies, procedures, laws, regulations and any other relevant requirements;

- (3) assess whether financial and operating information supplied to management and the board is accurate, pertinent, timely and complete.

9.6.2 G Societies should ensure that their internal audit function adequately covers, in addition to detailed operational activities, the following areas:

- (1) Controls to verify the accuracy and completeness of monitoring returns and other information provided to the FSA.
- (2) Controls to ensure compliance with all regulatory requirements.
- (3) Broader management controls, such as the controls over business planning, systems for monitoring and reporting on financial performance and other key business indicators.
- (4) Controls over new areas of business and other initiatives, whether carried out within the society or through subsidiaries or other associated undertakings.
- (5) “High level” controls, including those referred to in section 9.4.

9.6.3 G The board and management of a society should satisfy themselves that the following considerations have been satisfactorily addressed within the context of the scale, range, complexity and pace of development of the society’s business and accounting systems:

- (1) To maintain its objectivity, the internal audit function should be independent of the functions it inspects.
- (2) The internal audit function should have sufficient manpower resources available to it so that it can achieve its agreed objectives.
- (3) Qualifications, experience and training of the individuals performing the internal audit function should be adequate in relation to the objectives.
- (4) The status and reporting relationship of the head of the internal audit function should be sufficient to maintain the independence and objectivity of the function. The head of internal audit should have the right of direct access at

any time to the highest level of management and the board, including in particular the chairman of the audit committee and the chairman of the society.

9.6.4 G Audit committees have a key role to play in controlling the work of the internal audit function and receiving its reports.

Key elements of an internal audit function

9.6.5 G The key elements of a system of internal audit include:

- (1) terms of reference: these should be specified with precision and should include, amongst other matters, scope and objectives of the internal audit function, and reporting requirements. They should be approved by management and the board. Internal auditors will require a wide-ranging access to records and documents, including material prepared for and by the board. They will also need to be empowered to obtain information and explanations from staff at all levels, including directors. The terms of reference should, accordingly, be framed so as to provide such access.
- (2) risk analysis: risks identified and the controls put in place by management to address those risks should be considered in each area of the society's business. In this context risk will be much wider than just the risk of pecuniary loss, or error or mis-statement in the accounting records. Reputational risk and wider operational and business risks should also be considered. The adequacy of the controls should be assessed. Weaknesses in control should be drawn to the attention of the audit committee or the board as specified in the terms of reference. Full consideration should be given to the high level controls in place within the society.
- (3) audit plan: an audit plan should be developed, covering all aspects of the society's business. The audit plan should identify the scope and frequency of work to be carried out in each area. Audit effort should be focused on those areas identified in the risk analysis as higher risk. However, over a set time-frame, all areas should be covered. The plan should be reviewed and approved by the audit committee before work commences.

- (4) detailed programmes: these should set out the specific tests to be performed in each area of the audit plan.
- (5) working papers: adequate working papers should be maintained to record the audit planning and execution, principal findings and follow-up action. They should evidence the individual who performed the programmed work, how it was controlled and supervised, and record the conclusions reached, with cross-referencing to the reports made and action taken.
- (6) system of reporting: the results of the work performed should be reported to the audit committee, or the board, in accordance with the terms of reference. Such reporting should be carried out on a regular, at least quarterly, and timely basis; obviously serious matters should be raised immediately. The reports should briefly describe the area(s) covered, significant matters arising, recommendations and overall conclusions. Procedures should be established to ensure that recommendations have been implemented or non-implemented validly justified.

9.6.6 G The key elements required for a system of inspection are not affected if internal audit services are outsourced, in whole or in part, to an auditing firm. For smaller societies, in particular, this can be a cost-effective way of obtaining the required level of resource, including appropriate technical skills. However, boards of societies which pursue this route should take into account the guidance in chapter 11 on Outsourcing and consider the following issues:

- (1) It is particularly important that clear and comprehensive terms of reference are laid down. These should specify the anticipated total resources to be provided by the audit firm, including total number of man-weeks and staff grades and/or specialisms. The terms of reference should also make clear how, and under what circumstances, the audit firm would be involved in assignments which may not have been specifically contemplated when the annual internal audit plan was drawn up.
- (2) Boards should satisfy themselves that the timing and frequency of visits by the audit firm is appropriate for the level of assurance which the board requires,

and will also enable the audit firm to be fully up to date regarding business, and control, developments.

- (3) Where there is outsourcing of only one particular element of internal audit – for example, computer audit, or audit of the treasury function - such assignments should be fully integrated into the overall internal audit plan.

Reporting and review

9.6.7 G The board should satisfy itself that the internal audit function is being properly carried out. To enable it to review the overall effectiveness of the inspection function it should consider on an annual basis, or more regularly, the following aspects:

- (1) Adequacy of resources, including number, experience and skills of staff within the internal audit function. There may be circumstances, in situations where specific skills are believed to be deficient, when the board considers it appropriate to obtain these skills from an external source. Societies in these circumstances might consider looking to their external auditors. However there is clearly potential for a conflict of interest to arise, regardless of whether the work would be carried out by persons not directly involved in the audit. External auditors should not be involved in this way, except under exceptional circumstances. Societies should discuss such a proposal with the FSA.
- (2) Adequacy and scope of planning and work performed, including the allocation of audit effort to each area of the society's business.
- (3) Frequency, quality and timeliness of reporting on matters arising from the work of the internal audit function.
- (4) Resolution of points and recommendations raised, and reasons for any rejection of major points.
- (5) Review of overall effectiveness of the internal audit function.

9.7 Board Review and Oversight

Audit committees

9.7.1 G Ultimate responsibility for the effective operation of a society's systems of control rests with the society's board of directors. As with any board committee, the audit committee should have clear and full written terms of reference, that make clear its role, responsibilities and reporting lines.

9.7.2 G A society's board should establish an audit committee of non-executive directors consisting of at least 3 members. Executive directors should not be members of the committee. If the society's chairman is an audit committee member, he or she should not chair the committee. The internal auditor should report directly to the committee and it is usual for the chief executive, and other executives as appropriate, to attend by invitation at least part of the committee meetings. The external auditors should have direct access to the committee, with or without executives present, and should attend some, if not all, meetings, particularly those where matters such as the year end accounts, or systems, are being discussed. The matters with which an audit committee might be involved include:

- (1) the adequacy of the society's systems of business control and, in particular, its arrangements for evaluating risks in relation to its existing and future business and related capital requirements;
- (2) the effectiveness of the society's internal audit function, including an assessment of the scope of work performed by internal audit, the nature and timing of internal audit reports and the adequacy of internal audit resources;
- (3) the preparation and supervision of internal audit's plan and programme;
- (4) the receiving of reports from the internal auditor and reporting to the board on the audit plan together with recommendations for improvements;
- (5) the review of the adequacy of management information and other reports made available to the board;
- (6) the review of the annual accounts prior to their approval by the board;
- (7) assessment of the external audit function.

G

3.2 Accounting and other records**3.2.1 Introduction**

3 The scope and nature of the accounting and other records which a bank should have for its business to be conducted in a prudent manner should be commensurate with its needs and particular circumstances. They should have regard to the factors identified in SYSC3.1.2 and to the manner in which the business is structured, organised and managed, and to the nature, and complexity of its transactions and commitments.

4 The accounting and other records should be located where they will best assist management to conduct the business of the bank.

If the accounting and other records are kept overseas (for example at a UK branch's overseas head office) or by another entity (for example, where processing is outsourced), there should be arrangements which allow local management of the bank to have immediate and unrestricted access to them. In addition, reporting accountants should be allowed access.

3.2.2 General

5 The FSA does not believe it is appropriate to prepare a comprehensive list of the accounting and other records which a bank should maintain. However, they should:-

- (a) capture and record on a timely basis and in an orderly fashion, every transaction and commitment which the bank enters into, with sufficient information to explain:
 - (i) its nature and purpose;
 - (ii) any asset or liability, actual or contingent, which respectively arises or may arise from it; and
 - (iii) any income or expenditure, current or deferred, which arises from it;
- (b) provide details, as appropriate, for each transaction and commitment, showing:-
 - (i) the parties, including, in the case of a loan, advance or other credit exposure, whether (and if so to whom) it is sub-participated;
 - (ii) the amount and currency;
 - (iii) the contract, rollover, value and settlement or repayment dates;

- (iv) the contracted interest rates of an interest rate transaction or commitment;
 - (v) the contracted exchange rate of a foreign exchange transaction or commitment;
 - (vi) the contracted commission or fee payable or receivable, together with any other related payment or receipt;
 - (vii) the nature and current estimated value of any security for a loan or other exposure; the physical location and documentary evidence of such security; and
 - (viii) in the case of any borrowing, whether it is subordinated, and if secured, the nature and book value of any asset upon which it is secured;
- (c) be maintained in such a manner that financial and business information can be extracted promptly to enable management to:-
- (i) identify, measure, monitor and control the quality of the bank's assets and safeguard them, including those held as custodian;
 - (ii) identify, measure, monitor and control its exposures by related counterparties across all products;
 - (iii) identify, measure, monitor and control its exposures to liquidity risk, and foreign exchange and other market risks across all products;
 - (iv) monitor the performance of all aspects of its business on an up-to-date basis; and
 - (v) make timely and informed decisions;
- (d) contain details of exposure limits authorised by management which are appropriate to the type, nature and volume of business undertaken;
- (a) These limits should, where relevant, include counterparty, industry sector, country, settlement, liquidity, interest rate mismatch and securities position limits as well as limits on the level of intra-day and overnight trading positions in foreign exchange, futures, options, future (or forward) rate agreements (FRAs) and swaps.
- (e) provide information which can be summarised in such a way as to enable actual exposures to be readily, accurately and regularly measured against these limits;
- (f) contain details of the factors considered, the analysis undertaken and the authorisation or rejection by management of a loan, advance or other credit exposure; and

- (g) provide, on a memorandum basis, details of every transaction entered into in the name of or on behalf of another party on an agency or fiduciary (trustee) basis where it is agreed that the bank itself is not legally or contractually bound by the transaction.

3.2.3 Information for management

- 6 Every bank should prepare information for directors and management so that they can monitor, assess and control the performance of its business, the state of its affairs and the risk to which it is exposed.
 - (a) This information should be prepared on an individual company and, where appropriate, on a consolidated basis.
 - (b) The frequency with which information is prepared, its level of detail and the amount of narrative analysis and explanation will depend upon the level of management to which it is addressed. Some types of information will be needed on a more frequent basis than others and it may be appropriate for some to be presented on a basis of breaches from agreed limits by way of exception reports.
- 7 It is the responsibility of directors and management to decide what information is required and to decide who should receive it. Appropriate management information should be provided to:-
 - (a) persons responsible for exercising managerial functions or for maintaining accounting and other records;
 - (b) executives who, either alone or jointly, are responsible under the immediate authority of the directors for the conduct of the business of the bank; and
 - (c) the directors of the bank.
- 8 This information should be prepared:-
 - (a) to show the state of affairs of the bank;
 - (b) to show the operational results of the business both on a cumulative basis and by discrete period, and to give a comparison with budgets and previous periods;
 - (c) to provide an analysis of assets and liabilities showing how they have been valued;
 - (d) to provide an analysis of its off-balance sheet positions showing how they have been valued;
 - (e) to provide an analysis of income and expenditure showing how it relates to different categories of asset and liability and off-balance sheet positions; and
 - (f) to show the bank's exposure to each type of risk, compared to the relevant limits set by management.

G

3.3 Internal control systems**3.3.1 Introduction**

9 The scope and nature of adequate control systems should take account of the matters covered in SYSC3.1.2 and:

- (a) the amount of control by senior management over day-to-day operations;
- (b) the degree of centralisation and the extent of reliance on information technology.

10 A system of internal control should be designed and operated to provide reasonable assurance that:

- (a) all the bank's revenues accrue to its benefit;
- (b) all expenditure is properly authorised and disbursed;
- (c) all assets are adequately safeguarded;
- (d) all liabilities are recorded;
- (e) all statutory requirements relating to the provision of accounts are complied with and all prudential reporting conditions are adhered to.

3.3.2 Control environment

11 The strength of the control environment is important for banks, as a weak control environment can undermine an otherwise adequate control system.

- (a) A working definition of 'control environment' is provided in Statement of Auditing Standards ('SAS') 300, issued by the Auditing Practices Board:

'Control environment' means the overall attitude, awareness and actions of directors and management regarding internal controls and their importance in the entity. The control environment encompasses the management style, and corporate culture and values shared by all employees'.

12 Factors relevant to the control environment include:

- (a) the importance which is attached to controls by management;
- (b) the way in which staff are assessed and rewarded (including remuneration and bonus schemes as well as promotion policies);

- (c) controls training, and the methods for reviewing control, including internal audit.

3.3.3 *High level controls*

13 High level controls are the controls which are primarily exercised at director and senior manager level, as distinct from the detailed controls, the operation of which is delegated to others. High level controls typically include:

- (a) the setting of strategy and plans. The strategic plan should be documented and consider the external factors that might impact on the business in the near future, for example macro economic factors and competition. The strategic plan should be reviewed annually and is a key document for the production of the annual business plan that will set out how the bank will achieve its goals for the coming year. Some banks may also consider it appropriate to establish trigger points on key indicators to identify adverse trends in the business that would cause the Board to revisit its strategy or business plan. For banks that are part of a larger group, the strategic plan and annual business plan may be produced on an integrated, group-wide basis;
- (b) approval of risk policies;
- (c) establishment and review of the organisational structure;
- (d) the system for delegation;
- (e) review of high level management information;
- (f) maintaining the framework for monitoring and/or periodic review of risk management and detailed control systems and for the implementation of action points following such a review.

The FSA's requirements for adequate internal control systems will apply to high level as well as to detailed control systems.

3.3.4 *The control system: General*

14 The FSA does not believe it is appropriate to prepare a comprehensive list of internal control procedures which would then be applicable to any bank, nor is it possible to prepare a detailed list of particular procedures which should be undertaken, where appropriate, by all banks. Nonetheless, internal control systems should provide reasonable assurance that:-

- (a) the business is planned and conducted in an orderly and prudent manner in adherence to established policies;
- (b) transactions and commitments are entered into in accordance with management's general or specific authority;

- (c) management is able to safeguard the assets and control the liabilities of the business;
- (d) there are measures to minimise the risk of loss from irregularities, fraud and error, and promptly and readily to identify them when they occur;
- (e) the accounting and other records of the business provide complete, accurate and timely information;
- (f) management is able to monitor on a regular and timely basis, among other things, the adequacy of the bank's capital, liquidity, profitability and the quality of its assets;
- (g) management is able to identify, regularly assess and, where appropriate, quantify the risk of loss in the conduct of the business so that:-
 - (i) the risks can be monitored and controlled on a regular and timely basis; and
 - (ii) appropriate provisions can be made for bad and doubtful debts, and for any other exposures both on and off balance sheet;
- (h) management is able to comply with the FSA's reporting rules (that is to complete returns fully and accurately and in accordance with the FSA's reporting instructions, and to submit them on a timely basis); and
- (i) the bank is able to comply with the other notification requirements under the Act.

15 In seeking to secure reasonable assurance that their internal control objectives are achieved, management needs to exercise judgement in determining the scope and nature of the control procedures to be adopted.

- (a) They should also have regard to the cost of establishing and maintaining a control procedure in relation to the benefits, financial or otherwise, that it is expected to provide.

16 It is a responsibility of directors and management to review, monitor and test its systems of internal control on a regular basis in order to assure their effectiveness on a day-to-day basis and their continuing relevance to the business.

- (a) In many banks an internal audit function assists management by providing an independent review of such systems.
- (b) Such a review should be designed to monitor the effectiveness and operation of the systems and to test compliance with daily procedures and controls (see below).

3.3.5 *Control objectives*

17 The scope and nature of the specific control objectives which should be adopted for the business to be conducted in a prudent manner should be commensurate with a bank's needs and particular circumstances, and should have regard to the manner in which the business is structured, organised and managed, to its size and the nature, volume and complexity of its transactions and commitments.

18 It is not appropriate for the FSA to provide an exhaustive and prescriptive list of detailed control requirements which should apply to all banks. However, the FSA considers that each bank should address the following control objectives:-

- (a) Organisational structure: Banks should have documented the high level controls in their organisation which:
 - (i) define allocated responsibilities;
 - (ii) identify lines of reporting for all aspects of the enterprise's operations, including the key controls and giving outline job descriptions for key personnel.
 - (a) The delegation of authority and responsibility should be clearly specified.
- (b) Risk management: A bank should document its risk management framework setting out how the risks in the business are identified, measured, monitored and controlled. At a high level this might be documented in a matrix, setting out the key risks in the business e.g. credit, interest rate etc, key control procedures, the person responsible for monitoring the risk, and the type and frequency of management information to monitor each risk (see below).
- (c) Monitoring procedures: A bank should have procedures in place to ensure that relevant and accurate management information covering the financial state and performance of the bank and the risk exposures which the bank has entered into is provided to appropriate levels of management on a regular and timely basis. Procedures should also be in place which are designed to provide reasonable assurance of compliance with the bank's policies and practices, including any limits on delegated authority referred to above, and with statutory, supervisory and regulatory requirements.
- (d) Segregation of duties: A prime means of control is the separation of those responsibilities or duties which would, if combined, enable one individual to record and process a complete transaction. Segregation of duties reduces the risk of intentional manipulation or error and increases the element of checking.
 - (a) Functions which should be separated include those of authorisation, execution, valuation, reconciliation, custody and recording.
 - (b) In the case of a computer-based accounting system, systems development and daily operations should be separated.

- (c) For smaller banks, segregation of duties can be difficult due to limited number of staff. In such circumstances, the Board should satisfy itself that the bank is not running undue risk and that there are compensating controls in place e.g. frequent review of the area by internal audit and/or executive directors.
- (e) Authorisation and approval: All transactions should require authorisation or approval by an appropriate person and the levels of responsibility should be recorded as prescribed above.
- (f) Completeness and accuracy: Banks should have controls to ensure that all transactions to be recorded and processed have been authorised, are correctly recorded and are accurately processed.
 - (a) Such controls include:
 - (i) checking the arithmetical accuracy of the records,
 - (ii) checking valuations,
 - (iii) the maintenance and checking of totals,
 - (iv) reconciliations,
 - (v) control accounts and trial balances, and
 - (vi) accounting for documents.
- (g) Safeguarding assets: A bank should have controls designed to ensure that access to assets or information is limited to authorised personnel. This includes both direct access and indirect access via documentation to the underlying assets.
 - (a) These controls are of particular importance in the case of valuable, portable or exchangeable assets and assets held as custodian.
- (h) Personnel: There should be procedures to ensure that personnel have capabilities commensurate with their responsibilities. The proper functioning of any system depends on the competence and integrity of those operating it.
 - (a) The qualifications, recruitment and training as well as the innate personal characteristics of the personnel involved are important features to be considered in setting up any control system.

3.3.6 Controls in an Information Technology Environment

19 The information held in electronic form within a bank's information systems is a valuable asset that needs to be protected against unauthorised access and disclosure. It is the responsibility of management to understand the extent to which a bank relies upon electronic information, to assess the value of that information and to establish an appropriate system of controls.

- (a) The control objectives described above apply equally to operations undertaken in both manual and electronic environments, although there are additional risks associated with electronic environments.

- (b) The FSA recognises that this will usually be achieved by a combination of manual and automated controls, the balance of which will vary between banks, reflecting the need for each to address its particular risks in a manner which is cost effective.

20 The types of risk most often associated with the use of information technology in financial systems may be classified as follows:

(a) fraud and theft:

- (a) Access to information and systems can create opportunities for the manipulation of data in order to create or conceal significant financial loss. Additionally, information can be stolen, even without its physical removal or awareness of the fact, which may lead to loss of competitive advantage. Such unauthorised activity can be committed by persons with or without legitimate access rights.

(b) Errors:

- (a) Although they most frequently occur during the manual inputting of data and the development or amendment of software, errors can be introduced at every stage in the life cycle of an information system.

(c) Interruption:

- (a) The components of electronic systems are vulnerable to interruption and failure; without adequate contingency arrangements this can lead to serious operational difficulty and/or financial loss.

(d) misinformation.

- (a) Problems may emerge in systems that have been poorly specified or inaccurately developed. These might become immediately evident, but can also pass undetected for a period during which they could undermine the veracity of supposedly sound information. This is a particular risk in systems where audit trails are poor and the processing of individual transactions difficult to follow.

21 Management should be aware of its responsibility to promote and maintain a climate of security awareness and vigilance throughout the organisation. In particular, it should give consideration to:

- (a) IT security education and training, designed to make all relevant staff aware of the need for, and their role in supporting, good IT security practice and the importance of protecting company assets;
- (b) IT security policy, standards, procedures and responsibilities, designed to ensure that arrangements are adequate and appropriate.

3.3.7 *Money laundering deterrence*

22 It is a requirement of the Money Laundering Regulations 1993 that authorised banks have policies and procedures in place to guard against their business and the financial system being used for the purpose of money laundering. The Joint Money Laundering Steering Group Guidance Notes ('Money Laundering Guidance Notes for the Financial Sector' revised and consolidated by the Joint

Money Laundering Steering Group in June 1997) provide a practical interpretation of the Regulations. The FSA expects banks to adopt policies and procedures in line with those Guidance Notes.

(a) See also the sourcebook on money laundering.

3.3.8 ***Outsourcing***

23 Authorised banks are required to adequately record and control their business. Where a bank has outsourced an aspect of its operations to another part of the group, or to an external supplier, it should ensure that its records and controls adequately cover that business.

24 Banks should put in place procedures for monitoring and controlling the outsourced operations, and for ensuring that the information requirements of the authorised bank's management with respect to the outsourced operations are satisfied (see chapter OS).

Interim Prudential Sourcebook for Building Societies

10 Securitisation

10.1 Introduction

10.1.1 G This chapter contains new guidance for building societies on securitisation. It replaces the consultation draft Prudential Note issued by the Commission in June 1994.

10.1.2 G This chapter consists of the guidance for banks on securitisation (chapter SE of the Interim PSB for banks) as amended by additional guidance specific to building societies set out in paragraph 10.1.3 and in section 10.3 of this chapter.

10.1.3 G Save as mentioned in paragraph 10.1.3(2), all of the guidance in chapter SE of the IPSB for banks applies to building societies, with the following amendments:

- (1) All references to “banks” should be taken to include building societies.
- (2) Section 1.4 (Grandfathering) of chapter SE does not apply to building societies.
- (3) In paragraph 5 in section 4.3 of chapter SE, the reference to “a bank’s minimum (or “trigger”) capital ratio” should be read as “ a building society’s threshold solvency ratio”.
- (4) In paragraph 7 in section 4.4 of chapter SE, the liquidity implications of securitisation transactions will be assessed for societies by reference to chapter 5 (Liquidity) of this IPSB.

10.2 Areas of the bank guidance which are particularly relevant to societies

10.2.1 G Section 3 of chapter SE outlines the various roles that a bank may play in a securitisation transaction. The following paragraphs direct societies to the parts of the bank guidance that are likely to be most relevant to them.

- (1) Societies planning to securitise mortgages currently on their own balance sheets will act as an “originator”, as described in section 3.2.1 of chapter SE.
- (2) Societies will also act as “servicing agents”, as set out in section 3.3.2, where they continue to administer the mortgages after securitisation.
- (3) Societies may undertake some or all of the secondary roles described in section 3.3.3.

10.3 Additional guidance for building societies

10.3.1 G This section sets out additional guidance on securitisation for building societies over and above that set out in chapter SE of the IPSB for banks. These additions arise as a result of the particular constitutional structure of building societies and the provisions of the 1986 Act. The FSA will expect societies, when planning to securitise, to consider these issues and to adopt a policy to deal with them.

Principal Purpose and Nature Limits

10.3.2 G Section 5(1) of the 1986 Act provides that “*a society may be established ... if its purpose or principal purpose is that of making loans which are secured on residential property and are funded substantially by its members*”. The 1986 Act also gives the FSA certain powers of control in respect of a failure to comply with these provisions. A society will therefore need to ensure that any programme of securitisation does not threaten its continued compliance with its principal purpose.

10.3.3 G The principal purpose is a continuing purpose: it is not just viewed at a single point in time. Whether a society is fulfilling its principal purpose depends on what business it is doing on a continuing basis. For example if, for an extended period of time, a society diverted all its new mortgage business to a special purpose vehicle as part of a securitisation programme, it would arguably not be meeting its principal purpose.

10.3.4 G Sections 6 and 7 of the 1986 Act describe, respectively, the “lending” and “funding” limits, together known as the “nature limits”, which are quantitative criteria which help to determine whether an individual society is complying with its principal purpose. Societies should ensure that any programme of securitisation does not threaten compliance with the nature limits. Sections 6(3) and 7(3) of the 1986 Act respectively make clear that only items included in total assets or total liabilities in a society’s accounts count towards the nature limits.

Provisions of section 9A of the 1986 Act

10.3.5 G Paragraph 6 (i) in section 6.3 of chapter SE sets out some additional guidance for banks which play a primary role in securitisation transactions in respect of undertaking swaps. In addition to the guidance in that paragraph, building societies should also ensure that any swaps they undertake comply with section 9A of the 1986 Act.

Membership of the society

10.3.6 G As mutual institutions, societies have a special responsibility to their customers which, in the context of securitisation, the FSA considers should include maximum openness with affected borrowers. The relationship between a society and its borrowers is qualitatively different to that between a bank and its borrowers because society borrowers are members of the society. Because of this, the FSA will expect societies, when planning to securitise, to consider the issue of membership and to adopt a Board policy to deal with it, which should include a strategy for handling the affected borrowing members.

10.3.7 G The membership issue will not arise if a society intending to undertake a securitisation transaction originates mortgages directly into a vehicle, so that the borrower does not become a member of the society in the first place. In these circumstances, the FSA considers that societies should make clear to borrowers, when they take out the loan, that they do not have membership rights.

10.3.8 G Societies should bear in mind that if they securitise mortgages by means of an equitable transfer, paragraph 5(2) of Schedule 2 to the 1986 Act means that the relevant borrowers will still be members of the society.

10.4 Transitional provisions

10.4.1 G Any securitisation transaction undertaken by a society before 20 June 2000, which conformed to the guidance on securitisation issued by the Commission, is grandfathered. Accordingly, such a transaction may be treated for capital purposes as conforming with the guidance set out in this chapter, without the need to restructure the transaction. A society should, however, satisfy itself that any new pool of assets securitised through a grandfathered structure conforms with the guidance in this chapter.

SECURITISATION AND ASSET TRANSFERS

1 INTRODUCTION

1.1 Application

1 This chapter applies to a UK banks acting in a *primary role* in respect of a transfer of a single asset, pool of assets or securitised portfolio. Where a bank does not meet the terms of this policy, it should regard the assets as remaining on the solo and consolidated balance sheet.

See s3.2

- a) Further details on *primary roles* are set out below.
- b) The FSA's policy does not apply to banks incorporated outside the United Kingdom, even if the special purpose vehicle (SPV) is UK-incorporated.

2 Where a UK bank acts in a *secondary role* in respect of a transfer of a single asset, pool of assets or securitised portfolio, this policy only applies in the following circumstances:

- (a) Where the bank also acts in a primary role. If the bank fails to follow this policy, the FSA will regard the assets as being on the solo and consolidated balance sheet; or
- (b) Where the performer of the primary role is a member of the consolidated group. If the bank fails to follow this policy, the FSA will regard the assets as being on the consolidated balance sheet.

See s3.3

- a) Further details on *secondary roles* are set out below.

See ch CS

- b) The details regarding *consolidated groups* are explained in chapter CS.

3 Where a member of the consolidated group acts in a secondary role in respect of a transfer of a single asset, pool of assets or securitised portfolio, this policy will only apply when the UK bank acts in a primary role. Failure to follow the policy would result in the assets being on the consolidated balance sheet.

4 Where the role policy is followed, the capital consequences are explained below.

1.2 Legal Sources

5 For relevant legal sources see the Legal Sources section of the Capital Overview chapter.

1.3 Notification policy

6 A bank should give prior notification to the FSA when it proposes to act in any of the primary roles, either solely or jointly with one or more other parties. This should take place in reasonable time to allow the FSA to consider the proposal and raise any concerns that it may have.

- a) The responsibility for achieving supervisory non-objection to a proposal rests with the bank itself.

1.4 Grandfathering

7 All securitisation transactions completed prior to the 30th December 1999 will be grandfathered.

8 A bank should satisfy itself that a new pool of assets securitised through a grandfathered structure complies with this policy.

1.5 How this chapter is organised

9 Section 2 outlines the principles and objectives that lie behind the FSA's approach to securitisation and asset transfers. Section 3 then explains the various roles that a bank may take within a securitisation. Section 4 highlights the wider implications of the risks to banks that result from securitisation and loan transfers.

Sections 5, 6, 7 & 8 explain the FSA's general policy applicable to a bank acting in a primary role. Section 5 details the methods of transferring risk effectively and the FSA's policy in each case. Section 6 outlines the FSA's policy for all basic asset transfers or securitisations other than on effective transfers. Section 7 details the policy specifically applying to revolving credit securitisations. Section 8 deals with other specialist schemes.

- Sections 9, 10 & 11 outline the policy applying to banks acting in specific secondary roles. Section 9 outlines the policy on the provision of credit enhancement. Section 10 outlines the policy

on the provision of liquidity facilities. Section 11 outlines the policy on dealing and underwriting of asset backed securities.

2 SECURITISATION, ASSET TRANSFERS AND THE FSA'S APPROACH

2.1 Background

2.1.1 General

1 An *asset transfer* occurs where an asset owned by a bank is *sold* to another legal entity. In doing so, a bank may remove the asset from its supervisory balance sheet, where the conditions of this chapter are met.

See s5

- a) *Sold* means the legal and economic methods of transfer discussed in more detail below.

2 *Securitisation* is generally a process by which assets are sold to a *bankruptcy remote special purpose vehicle* (SPV) in return for an immediate cash payment. The cash payment is raised by the SPV issuing debt securities, usually in the form of tradable notes or commercial paper. A bank performing such a transaction may remove the assets from its supervisory balance sheet, where the conditions of this chapter are met.

- a) In a securitisation, the assets are usually transferred to a vehicle existing specifically for the purpose of securitisation called a *special purpose vehicle* (SPV).
- b) A *bankruptcy remote* SPV is an entity that is considered by the rating agencies to be unlikely to be subject to voluntary or involuntary bankruptcy proceedings.
- c) Although securitisable assets may take other forms, they are generally those with associated streams of principal and interest e.g. mortgages, credit cards and corporate loans.

3 Although this policy is primarily concerned with the sale of loans, the policy also applies to the transfer of other forms of assets.

2.1.2 Rationale for Securitisation

4 A bank may undertake a securitisation for a number of reasons. These include:

- portfolio management;
- reducing the need for capital to support assets on the balance sheet;
- risk management;
- enhancing equity return by allowing the redeployment of capital;

- restructuring the balance sheet for reasons connected with large exposures or sectoral concentrations;
- issuing securities as a means of funding with benefits for both cost and diversification of sources; and
- to provide funding of assets when the originator cannot obtain funding on its own part, for example to fund an acquisition.

2.1.3 *The risks involved*

- 5 In the process of transfer, the functions normally carried out by a lending bank are unbundled. Normally, the various risks in a bank's banking book other than credit risk do not warrant special treatment, as the capital needed to cover credit risk helps to protect a bank against these other risks as well. This is no longer the case, however, where the credit risk lies with a third party and a bank solely carries the risks associated with asset administration or promotion.
- 6 Banks should be aware that although this policy is primarily concerned with capital adequacy, operational and reputational risk may also be incurred. For example, in the transfer of a single asset, the originating bank may have difficulty in avoiding close association with the asset; for a pool of assets, the level of association depends upon the structure used and the number of roles performed. The FSA believes that the risks from close association, which may take a variety of forms with a securitisation scheme, can assume material proportions.
- 7 The solution for the FSA has been to implement the policy of "clean break". A bank, once it has securitised assets, should not have any further involvement with those assets except in accordance with the policy in this chapter. This should be the case both explicitly and implicitly i.e. any reputational linkage between the assets of the originator/sponsor should be broken so far as is possible.

2.2 Objectives

- 7 The framework of the FSA's rules is designed to achieve the following objectives, in that:
- (a) asset sales and packaging achieve their intended effect of passing rights and obligations from the seller to the buyer. Ideally, a completely clean break should be achieved;
 - (b) all the parties to the transaction fully understand the responsibilities and risks they have assumed or retained; and
 - (c) any material risks to buyers or sellers are properly treated in the FSA's supervision of banks.
- 8 The FSA believes that these objectives are best achieved by ensuring that a transfer achieves the following:
- (a) the immediate legal separation of the seller from the assets and their new owner (or the effective economic separation in the case of a transfer by sub-participation);
 - (b) as far as possible, the complete economic separation of the seller from the assets and their new owner;
 - (c) presentational or "moral" separation of the seller from the assets and their new owner; and
 - (d) the identification of the retained risks for capital or other coverage purposes.

3 PRIMARY & SECONDARY ROLES

3.1 General

1 This section outlines the various roles that fall within the scope of this policy.

3.2 Primary roles

3.2.1 *Bank as originator*

See s3.2.2(b) 2 A bank acts as an *originator* when it transfers from its balance sheet a single asset, an asset package or assets that are not investment grade third party financial instruments.

- a) The terms *seller* and *originator* are used interchangeably to mean the bank that is seeking to move assets off its own balance sheet. Note that the terms *seller* and *buyer*, for the party taking on the risk, are used throughout this chapter although in a strict legal sense they may be inaccurate where transfer is by way of sub-participation.

3 Where a bank lends to an SPV in order for that SPV to grant a loan to a borrower as though it were the bank, the bank will be regarded as an originator.

- a) This method of lending is known as *remote origination*.
- b) The bank is regarded as the originator as the SPV is creating an asset that is branded by the bank. The bank will incur reputational risk through the association with the product.

3.2.2 *Bank as sponsor or repackager*

4 A bank acts as a *sponsor* or *repackager* when:

(a) As a sponsor, it repackages *third party* assets *directly* into a *conduit scheme* that funds the purchase by an issue of securities.

See s1.1

- a) *Third Party* means parties other than the members of the bank's wider accounting group.
- b) *Directly* means that the assets have never appeared on the bank's balance sheet.
- c) In a *conduit scheme*, the term sponsor is used to describe the bank promoting the securitisation scheme. A sponsor may be connected to the scheme in ways that may open it to "moral" pressures in the same way as an originator.

- d) Where there is more than one originator in the securitisation the SPV is known as a *multi-seller vehicle*.
 - e) The various sellers usually continue to service the assets, carrying out the functions of collection, administration and the pursuit of arrears.
- (b) As a repackager, it sells *investment grade third party financial instruments* via its balance sheet to an SPV that then rebundles them and resells them to investors.
- a) In a *repackaging scheme*, the repackager is *not* the original lender and is therefore subject to fewer limitations than an originator.
 - b) Where the assets are influenced in credit quality by reference to the repackaging bank, the bank will be regarded as an originator.
- See ch TI s9
- c) For a definition of *investment grade* see the Interest Rate position risk chapter. Where the securities to be repackaged are not rated, the bank should be able to demonstrate that the assets are of a comparable quality.
- See ch CB s3.2.2
- d) For the purposes of this paragraph, *financial instruments* are as defined in Section B of the Annex to the ISD.

5 Where a bank repackages assets that are not investment grade third party financial instruments via its balance sheet the bank will be treated as an originator and should comply with the policy relating to that role except where:

- (a) the bank acts as sponsor and originates up to 10% of the total assets into the scheme; or
- (b) the bank acts as repackager and repackages up to 10% of the total assets in the scheme that are either sub-investment grade securities or securities where it has acted as originator.

Banks should apply the originator treatment for assets falling within this exception, albeit without jeopardising the overall treatment for the scheme.

- a) The rule will be applied at the level of the conduit irrespective of any prior SPVs.

3.3 Secondary Roles

3.3.1 *General*

6 A bank acting in a primary role may also carry out one or more of the secondary roles associated with a securitisation or asset transfer. The number and scope of roles carried out by a bank under a securitised structure affect its treatment under the FSA's policy.

7 If a bank is carrying out only one role, it may be acceptable for it to have greater latitude in that role than if it was carrying out several roles, as the FSA considers the totality of a bank's involvement when assessing the completeness of the clean break and any residual risks.

3.3.2 *Servicing agents*

8 A bank acts in the secondary role of *servicing agent* when it administers or services the securitised assets.

- a) The terms *servicer*, *servicing agent* and *administrator* are used interchangeably to describe a bank which carries out an administrative function with regard to a securitisation scheme.

9 Where a bank acts as servicing agent, it should satisfy itself that it does not have a reputational obligation to support any losses incurred by the scheme. If a bank is unable to do so, it should comply with the policy applying to an originator.

- a) A bank acting as servicing agent can run explicit operational and reputational risks as its identification with the assets can mean that its commercial reputation is committed. The extent of the association depends upon the extent of involvement and the sophistication of the underlying borrowers. The FSA is concerned that a bank in this position may give in to pressure to support losses incurred by the investors/buyers to protect its name.

10 Where a bank acts as serving agent, the bank should be able to demonstrate to investors that it has no reputational obligations to support losses by a clear and unambiguous statement in the offering circular in respect of any implied support.

3.3.3 *Other secondary roles*

11 A bank acts in a secondary role when it carries out any of the following functions:

- See s9 (a) the provider of *credit enhancement*;
- a) A *credit enhancement* is provided to an SPV to cover the losses associated with the pool of assets. The level of the enhancement is reflected in the rating given to the notes by a rating agency.
- See s10 (b) the provider of *liquidity facilities*;
- a) *Liquidity facilities* enable SPVs to assure investors of timely payments. These include smoothing timing differences in the payment of interest and principal on pooled assets and ensuring payments to investors in the event of market disruptions.
- See s11 (c) the *underwriter* and *dealer* in securities issued by the SPV;
- a) *Underwriting* is the arrangement under which a bank agrees to buy, before issue, a specified quantity of securities in a new issue on a given date and at a given price if no other purchaser has come forward.
- b) *Dealing* is acting as principal in both the sale and purchase of notes, in the secondary market of an issued security.
- See s10.4.3 (d) the provider of *bridging loans* to the SPV;
- a) A *bridging loan* is a loan made to an SPV, before the issuance of the notes, to cover a mismatch in time between the date of purchase of the underlying assets and the date of issue of the securities.
- See s6.2.2 (i) (e) the counterparty in swap transactions.

4 IMPLICATIONS OF SCHEMES FOR A BANK'S GENERAL RISKS

4.1 Introduction

1 The following sections of this chapter cover banks acting in a primary and secondary role.

2 No consideration of a securitisation or asset transfer can be concerned solely with the technical rules regarding its structure. It also has wider implications for a bank's risks.

3 The extent of the risks for a bank involved in a securitisation or asset transfer vary according to the comparative size of the bank and the assets involved, as well as the complexity of the structure of transfer.

4.2 Systems & Controls

4 The FSA needs to be satisfied that a bank acting in a primary role has adequate systems and controls in place to deal with all aspects of the securitisation taking place.

a) Some of the systems implications may be significant. The arrangements for controlling the securitisation should be carefully assessed and monitored, and be subject to internal audit.

b) Where appropriate, the FSA may use section 166 reports as part of the monitoring of these systems.

4.3 Operational risks

See ch CO

5 The FSA takes into account any significant operational risks not related to balance sheet items when setting a bank's minimum (or "trigger") capital ratio. In exceptional cases it may wish to apply an explicit capital requirement against this sort of risk.

4.4 Liquidity

6 Where assets may eventually return to the bank's balance sheet, there are particular issues for banks' management of their liquidity.

7 Before the FSA allows assets to be treated as off balance sheet, it needs to be satisfied that the bank can deal with the liquidity implications. These should be handled within a bank's normal liquidity management and assessed using the standard maturity mismatch approach or, in those cases where it is relevant, the sterling stock liquidity approach.

- See s7 a) The liquidity treatment of revolving-credit securitisations is dealt with in more detail below.
- See s10.4.2 (d) 8 The FSA may require sponsors or repackagers that report on a mismatch basis to meet mismatch guidelines out to six months. Similarly the FSA may require sponsors or repackagers reporting on a sterling stock basis to submit additional information (on a mismatch basis) covering the bank's liquidity out to six months.
- See ch LM 9 A bank may be required to arrange committed facilities to be drawn down to the extent necessary to fund assets returning to its balance sheet. The requirements governing these committed facilities will generally be consistent with the FSA's liquidity approach.
- a) Likewise the FSA follows its normal approach on the question of the weighting of such committed facilities by the lending bank for capital adequacy purposes.
- b) Since such commitments need to be available in circumstances where a replacement securitisation does not prove possible, they should not include a "material adverse change" condition in relation to the bank.

4.5 Capital planning

- 10 Where assets may eventually return to the bank's balance sheet -such as in a liquidity asset repurchase agreement - there are particular issues for banks' management of its capital. Returning assets could affect the capital adequacy of the bank.
- See s10.4.2 (e) 11 Where assets could return to the balance sheet the FSA may request a bank to submit a plan to take account of the possible return of the assets to the balance sheet.
- a) A plan should detail how the bank intends *either* to sell the assets, sell other assets or to raise the requisite capital.

4.6 Remaining asset base

- 12 The process of securitising a significant portion of a bank's assets may lead to a change in the profile of the assets on its supervisory balance sheet, in terms of both quality and spread. These implications are considered when assessing any securitisation scheme and may need to be discussed with the bank.
- 13 The FSA may impose limits on the extent to which assets may be securitised in terms of total volume and/or the types of assets securitised in comparison to the total asset base.

- a) The FSA may regard assets removed from a bank's balance sheet through securitisation, even where the bank complies with the policy in this chapter, as carrying some residual risk to the originator.

5 BASIS OF THE POLICY: METHODS OF TRANSFER

5.1 Introduction

1 The FSA considers that the method of transfer of an asset can have an important bearing on the risks assumed by buyer and seller since different methods achieve the desired 'clean break' to varying extents.

2 Each of the four methods set out below may be used to make an effective transfer of a loan off the supervisory balance sheet. The considerations raised in each case apply in all forms of securitisation or asset transfer; the policies set out in section 6 and elsewhere are additional to the policy for identifying adequate forms of transfer.

Sections 5.2 to 5.4 give the FSA's position on transfer methods for on-balance sheet items; section 5.6 for assets which are undrawn.

3 Methods of transfer, other than the four described below may be valid, especially with reference to transfers carried out in other jurisdictions. If a bank proposes to rely upon any other method, it should be supported by legal opinion and the prior approval of the FSA should be obtained.

5.2 Novation

4 A transfer of an asset through *novation* is regarded as a clean transfer and the asset may be therefore excluded from the selling bank's capital ratio and added to the buying bank's.

a) In a *novation*, the existing agreement between the originator and the borrower is cancelled and a new agreement between the investor and borrower is substituted. This effectively transfers all the seller's rights and obligations to the buyer.

b) In the FSA's view, the cleanest transfer of risk is achieved by novation.

5.3 Assignment

5 A legal or equitable *assignment*, if properly structured, can also achieve an effective transfer of the seller's rights - but not his obligations - and the remedies available to him to enforce those rights.

a) An *assignment* transfers from seller to buyer all rights to principal and interest. A loan agreement may impose restrictions on assignability and these bind the buyer. Thus if assignment is prohibited without the consent of the borrower, the borrower's consent should be obtained. In any case, there may be difficulties in assigning the benefit of rights other than the right to principal and interest. The buyer's rights may be impaired by any rights of set-off that exist between the borrower and the seller.

- b) The seller retains any outstanding obligations (for example, to advance further funds).

6 A transfer through an *assignment duly notified* to the borrower is regarded as a clean transfer, provided that the buyer has taken reasonable precautions to ensure that his rights under the transfer are not impaired by an intervening right; for example, a right of set-off between seller and borrower.

- a) At a minimum there should be a warranty from the seller that no such right of set-off exists.

7 A *silent assignment* (i.e. where the borrower is not notified) is usually regarded as a clean transfer. This is subject to the following:

- (a) the volume of assets to individual borrowers sold on a silent assignment basis should be subject to appropriate internal controls;
- (b) the seller should keep under careful review the risks that follow on from this position as it remains the lender of record and therefore will be the focal point for pressure from the borrower.
 - a) The additional risks for the seller as lender of record are that he remains subject to requests to reschedule or renegotiate or advance further funds.
 - b) The buyer also faces additional risks because the absence of notice to the borrower removes some legal protection he would otherwise have had. These need to be kept under careful review.

If it is not satisfied on these points, the FSA may disregard a transfer of an asset through a silent assignment in calculating the capital ratio of the seller.

5.4 Declaration of trust

8 A declaration of trust is regarded as a clean transfer of the assets that is equivalent to a silent assignment, subject to the following:

- (a) The policy on silent assignments detailed above is fulfilled in relation to the trust.
- (b) The bank receives a legal opinion confirming that the trust is effective to transfer the beneficial interest.

If it is not satisfied on these points, the FSA may disregard a transfer of an asset through a declaration of trust in calculating the capital ratio of the seller.

5.5 Sub-participation

- 9 Where an asset is funded in whole or in part via a *sub-participation*, the FSA recognises the transfer of credit risk by excluding it (or the relevant part) from the original lender's capital ratio, and including it in the sub-participant's as a claim on the underlying borrower.
- a) Sub-participation does not transfer any of the seller's rights, remedies or obligations against the borrower to the buyer, but is an entirely separate, back-to-back, non-recourse funding arrangement, under which the buyer places funds with the seller in exchange for acquiring a covenant from the latter under which he passes on to the buyer payments under the underlying asset which the borrower makes to him, but the asset itself is not transferred.
 - b) Sub-participation is accepted as meeting the FSA's criteria for effective transfer as, although not transferring in a legal sense the rights of the original lender, an asset sub-participation aims to have the same economic effect.
 - c) The sub-participant may, but is not required to, obtain a charge over the underlying assets. Such a charge would, among other things, allow the sub-participant to report on the basis of the capital charge on the underlying assets.
 - d) The sub-participant also faces additional risks since it assumes an exposure to the borrower, but is also at risk to the seller, because it relies on the seller to pass through funds received from the borrower.

5.6 Undrawn commitments

- 10 Where banks transfer an *undrawn commitment* to lend (or part thereof), the commitment (or part thereof) is excluded from the selling bank's capital ratio only when:
- (a) the transfer is by novation; or
 - (b) the transfer is by an assignment accompanied by a release by the borrower of the seller from its obligations, an assumption by the buyer of the seller's obligations and a formal acknowledgement from the borrower of a transfer of obligations from the seller to the buyer.
 - a) An acknowledged assignment is regarded as amounting to, in substance, a novation and therefore effectively transfers this obligation.

- 11 A transfer by means of silent assignment, declaration of trust or sub-participation does not lead to the exclusion of the commitment from the selling bank's capital ratio. Instead the commitment is regarded as being to the buyer rather than to the potential borrower.

- a) This treatment is adopted because an undrawn commitment is an obligation on the part of a lender, whilst an assignment is a transfer of rights only. As explained further below, the seller will face a credit risk in the event of the failure of the buyer.
- b) Note that undrawn advised facilities are not extinguished through sub-participation.

See chs BC s4 &
LE

12 The buyer's assumption of a commitment (or part) is included in its capital ratio as a claim on the borrower, irrespective of the method of transfer used.

- a) In the case of an effective transfer of the obligation, this is clearly the necessary corollary, as the risk is no longer being taken into account against the seller.
- b) A form of transfer which does not transfer an undrawn commitment, i.e. under silent assignment or sub-participation, gives the appearance of a double counting of the credit risk since it is taken into account for both the seller and the buyer. This is because there are two, legally separate transactions, even if the intention in entering into them is to achieve a combined effect. There are, therefore, two credit risks.

6 BASIS OF THE POLICY: LIMITING THE ASSOCIATION WITH THE ASSETS

6.1 Scope

1 This section covers the general policy applying to banks acting in a primary role. It covers single assets, parts of assets and the packaging, securitisation and sale of asset pools as well as the transfer of risk under sub-participation agreements.

See s7 & 8

a) This chapter includes guidance applying to specialist schemes for particular asset types, additional to that set out in this section.

See s5

b) This section should be read in conjunction with the sections covering effective forms of transfer; the policy in this section should be met in addition to that in section 5.

2 There are a number of general policies applying to both single asset and asset packages, set out in s6.2, and further general policies for asset package schemes only, set out in s6.3.

3 References to assets in the singular are for convenience only, unless specifically stated.

6.2 Policy relating to all types of assets

4 The following conditions for the transfer of a single asset, part of an asset or package of assets should be met:

(a) The transfer should not contravene the terms and conditions of the underlying asset agreement and all the necessary consents have been obtained;

(b) The performer of the primary role has no residual economic interest in the principal amount of the asset (or that part which has been transferred) and the buyer has no formal recourse to the seller for losses;

a) When a secured asset is transferred and further advances are made by the originator, if these additional advances are to be secured there should be a separate formal agreement with the borrower. A side letter is insufficient for these purposes.

(c) The performer of the primary role has no legal or moral obligation to purchase or repurchase the asset (or fund the repayment of a sub-participation), or any part of it, at any time;

See s6.4

- a) The performer of the primary role may not retain an option to repurchase the assets, except where the loan portfolio has reduced to less than 10% of its maximum value and the option extends only to fully performing assets.
- b) The inclusion of a 'step up' will only be permitted for mortgage securitisations and will be considered on a case by case basis pending a fuller review of the policy. Where a bank can demonstrate that the economic characteristics for the assets that it proposes to securitise are the same as for mortgages, the inclusion of a step up may be considered.
- c) The details regarding the repurchase or purchase of assets are explained below.
- d) An exception to the conditions in this paragraph is where the obligation arises from warranties given in respect of the asset at the time of its transfer, provided that these are not in respect of the future credit-worthiness of the borrower.
 - i) The FSA would not regard this condition as met if warranties were provided by the originator on matters outside its control.
 - ii) Environmental warranties should restrict liability to legislation in force at the time of sale, not at any time in the future otherwise they may be regarded as constituting a warranty on matters outside the originator's control.
- (d) The performer of the primary role can demonstrate, to the satisfaction of the FSA, that it has given notice to the buyer that it is under no legal obligation to repurchase the asset (or fund the repayment of a sub-participation), nor support any losses suffered by the buyer, and that the buyer has acknowledged the absence of obligation;
 - a) Penalty interest imposed at the administrator's option does not constitute a loss caused by borrower default and may therefore be met by the performer of the primary role.
 - b) An SPV has an ongoing credit exposure to the performer of the primary role, because it is dependent on it passing on payments it receives in respect of the securitised assets. A bank may provide a guarantee to the SPV in respect of such an obligation by its subsidiary (if all or part of the assets are originated by the subsidiary) if the effect is only to bring the credit rating of the subsidiary up to that of the parent bank. The commitment by the parent may go no further than commitments the subsidiary could have given itself within the limitations of the FSA's policy.
- (e) The documented terms of the transfer are such that, if the asset is rescheduled or renegotiated, the buyer and not the performer of the primary role would be subject to the rescheduled or renegotiated terms; and

- (f) Where payments are routed through it, the performer of the primary role is under no obligation to remit funds to the buyer unless and until they are received from the borrower.
 - a) Payments voluntarily made by the performer of the primary role to the buyer in anticipation of payments from the borrower should be made on terms under which they can be recovered from the buyer if the borrower fails to perform.

6.3 Additional policy relating to asset packages

- 5 The process of packaging assets together and selling them as a block or pool can compound risks that are often negligible when a single asset is transferred. The commercial reputation of the performer of the primary role is committed because of its close association with the scheme; such a commitment may jeopardise the existence of a clean break and there may be pressure to support any losses of investors.
- 6 When performing a primary role for a package of assets, a bank should meet the following additional conditions, in order to ensure that its role is not seen as being more than acting as an agent, whether or not it retains the servicing role:
 - (a) The FSA expects the performer of the primary role to have evidence available in its records that its legal advisers are satisfied that the terms of the scheme protect it from any liability to investors in the scheme, other than liability for breach of express contractual performance obligations as servicing agent or originator or for breach of warranty made with respect to the assets in conformity with the policy in this chapter, or liability for any other matter wholly within the control of the originator.
 - (b) The FSA expects the performer of the primary role to have evidence available in its records that its auditors are satisfied that the terms of scheme comply with FRS5.
 - (c) The FSA expects the performer of the primary role to confirm in writing to the FSA that it has evidence available in its records that its auditors and legal advisers are satisfied, so far as it is within their professional competence, that the terms of the scheme comply with the FSA's policy.
 - a) Regardless of the bank having obtained opinions from professional advisors and its auditors under the sub-paragraph above, the responsibility for ensuring that the scheme meets these provisions rests with the bank.
 - b) The FSA may request sight of the opinions of the auditors and legal advisers.
 - c) The evidence in the bank's records may be included in a section 166 report.

- (d) The performer of the primary role should be able to demonstrate that it has taken all reasonable precautions to ensure that it is not obliged, nor will feel impelled, to support any losses suffered by the scheme or investors in it.
 - a) This may be met by any offering circular (or other analogous documentation) containing a highly visible, unequivocal statement that the performer of the primary role does not stand behind the issue or the vehicle and will not make good any losses in the portfolio.
 - b) Where an existing funding is part of a proposed securitisation scheme, the FSA may consider that the statement need not be made retrospectively, although it should be inserted in subsequent funding issues.
 - c) The provision of insurance cover by a bank or a subsidiary of the bank against loss, e.g. mortgage indemnity insurance, will be considered on a case by case basis.
- (e) The performer of the primary role may not own any *share capital* or other form of proprietary interest in or control over, either directly or indirectly, any company used as a vehicle for the scheme.
 - a) Where the bank acts in a primary role, this also applies to members of the consolidated group.
 - b) *Share capital* includes for this purpose all classes of ordinary and preference share capital.
- (f) The Board of a company used as vehicle for a scheme should be independent of the performer of the primary role, although may have one director representing it.
 - a) Where the bank acts in a primary role, this also applies to members of the consolidated group.
- (g) The name of a company used as vehicle for a scheme should not include the name of the performer of the primary role nor imply any connection with it.
 - a) Where the bank acts in a primary role, this also applies to members of the consolidated group.
- (h) The performer of the primary role should not bear any of the recurring expenses of the scheme.
 - a) Credit enhancements are considered below.

- b) The failure of the performer of the primary role to charge appropriate fees or other compensation may amount to funding. The agreement should specify fees and, if costs are not covered, should be subject to the approval of the FSA as being at an acceptable level.
- c) If a bank wishes to securitise a mortgage book which includes staff mortgages which are subsidised, such a subsidy will not count as funding the vehicle if paid to the employee; it may do if paid directly to the buyer. The different treatment arises due to the likely events upon default.
- (i) The performer of a primary role may not enter into swap agreements with the SPV that intentionally bear losses.
 - a) However, the bank may enter into interest or exchange rate swap at market prices with the vehicle, either directly or through a third party.
 - b) There should be provision for unintended temporary losses arising from normal administrative procedures, for example delays in changing mortgage rates, to be recovered by the servicing agent as soon as possible;
- (j) The performer of a primary role may not fund a vehicle or scheme (except within the terms of condition (h) above) and in particular may not provide temporary finance to cover cash shortfalls arising from delayed payments or non-performance of loans which it administers.
 - a) This section does not apply to sponsors or repackagers.

6.3.1 *Asset replenishment*

- 7 An originating bank may structure a securitisation scheme to allow for further tranches of assets to be placed into the scheme. It should be able to demonstrate to the FSA that at the time of subsequent transfer:
- (a) the asset quality of the pool is not materially altered by the addition;
 - (b) any change to the quality of the assets remaining with the originating bank is either not material or is acceptable to the FSA;
 - (c) (for revolving credit securitisation only) there is no change in the liquidity implications of the securitisation resulting from the addition; or
 - (d) there are no unacceptable changes to the “moral” risks to the originator signalled by the addition.

- a) The test of material alteration of the quality of asset pool is to be applied to the pool at the time of the proposed addition, not to the quality of the pool at the original securitisation.
- b) A bank may discuss and receive non objection from the FSA for asset replenishment either at the time of each replenishment or once only to establish a framework to apply for several replenishments.

6.4 Repurchasing the assets

6.4.1 *Repurchasing by an originator*

8 An originator should not repurchase the asset securitised from the SPV unless one of the following circumstances apply:

See 6.2.(c)

- (a) The repurchase is for a breach of warranty;
- (b) The repurchase is of fully performing or defaulted assets when the loan portfolio has sunk to less than 10% of the maximum face value of the assets;
 - a) The total size of the pool for these purposes is equal to the maximum total face value of the assets during the life of scheme, prior to the calculation.
 - b) Defaulted assets may be bought back for nominal consideration.
 - c) Repurchases for further advances or product switches from a mortgage pool will be agreed on a case by case basis pending a fuller review of the policy.

Any repurchase should be performed at market prices with no preference of any kind being shown in the terms and is subject to the bank's normal credit approval and review process;

9 A bank may restructure or refinance a securitisation only if the assets remain, at all times, off the balance sheet.

- a) A bank should notify the FSA when wishing to restructure or refinance a securitisation. The restructuring or refinancing will be considered on a case by case basis.

6.4.2 *Repurchasing by a sponsor or repackager*

10 A sponsor may purchase or a repackager may repurchase or purchase the assets from a scheme. At the time of (re)purchase the following conditions should apply:

- (a) The assets are either investment grade or defaulted, in the case of financial instruments, or fully performing or defaulted, for non-financial instruments;

See 6.2.(c)

- a) If the repurchase occurs due to a breach of warranty, the policy in this section need not be followed.
 - b) Defaulted assets may be bought back for nominal consideration.
- (b) The repurchase is performed at market prices with no preference of any kind being shown in the terms and is subject to the bank's normal credit approval and review process.

7 SPECIAL STRUCTURES: REVOLVING CREDITS

7.1 Introduction

1 Compared with other types of securitisation, schemes to securitise *revolving credits* introduce the possibility of increased legal and moral risk. This arises from the complexity of the arrangements, the shared interest of the originating bank and investors, and the eventual reversion in full to the originating bank of the pool of accounts. Additionally, the speed at which assets return to the balance sheet of the originating bank may cause liquidity problems.

2 Although most securitisations to which this policy applies are of credit cards, it is not limited to any particular type of assets but applies whenever the structure has the characteristics described in the above paragraph.

3 If carefully constructed, however, such schemes can result in the originating bank successfully transferring the risk on the share of the pool assets to the investors. This section outlines the conditions that should be met in respect of revolving credit securitisations in order for the assets to be given off-balance sheet treatment for supervisory purposes.

The policy in this section is additional to the general policy set out in section 6 and the conditions for effective transfer in section 5.

- a) The term *revolving credits* refers to loan facilities which permit borrowers to vary the drawn amount within an agreed limit. Repayment may be at the borrower's discretion, subject in some cases to a minimum amount per payment period, or by fixed schedule.
- b) *Securitisation* of such receivables is especially complex because of the nature of the assets as fluctuating and of indefinite maturity.
- c) Typically, schemes insulate investors in the notes from the effects of fluctuating balances by assigning shares in the receivables that are the subject of the securitisation both to the investors (the *investor interest*) and to the originating bank (the *seller interest*). The amount of the investor interest in the outstanding balances normally stays fixed at the amount of their funding (until the notes start to amortise) whereas the amount assigned to the selling bank goes up or down as borrowers make net drawings or repayments.
- d) Schemes are given a fixed maturity by dividing their life into a revolving (or interest-only) period and an amortisation period.
 - i) During the *revolving period*, the investors receive their share of interest payments, but their share of principal repayments by borrowers is reinvested in the pool.

- ii) During the *amortisation period*, the investors' share of principal repayments is used to redeem the securities, with the result that at the end of the scheme the full interest in the outstanding balances has reverted to the originating bank.

7.2 Principles

4 In setting the conditions for off balance sheet treatment of the share of the balances funded by investors, the FSA considers it a fundamental principle that the arrangements for the securitisation should ensure the full sharing of interest, principal, expenses, losses and recoveries on a clear and consistent basis.

- a) This principle implies, among other things, the need for full loss-sharing on the stock of receivables in the pool throughout the revolving period of the securitisation, since the investors' share of the receivables is removed in full from the originating bank's balance sheet for the whole of that period.

5 There is no specific limit on the total volume of outstanding revolving credits that a bank may remove from its balance sheet using securitisations. It is therefore important to ensure:

- (a) that adequate standards apply to the structure of securitisation schemes; and
- (b) that the implications of securitisation for the bank's risks generally are adequately handled.

7.3 Features and treatments

7.3.1 Pooling

6 Schemes typically involve the transfer of a pool of receivables into a trust.

- a) The trust directs the flows on the accounts to the originating bank and to a special purpose vehicle (SPV) according to the proportion of the funding that they are providing.
- b) The SPV in turn directs the flows to the investors who hold the securities.
- c) Schemes usually contain provisions concerning the selection of the original pool of receivables from the assets on the originating bank's balance sheet and the subsequent replenishment, as necessary, of the pool of accounts.

7 These arrangements form the basis of an acceptable structure to allow the share of the balances funded by the SPV to be removed from the originating bank's balance sheet for supervisory purposes.

- 8 A bank may take back the full financing of a pool at the end of the scheme if there is no reason to assume that its performance will have deteriorated in the meantime.
- a) For a scheme to be acceptable, therefore, the FSA needs to be convinced that it contains no features - for example for the substitution of higher-quality accounts into the scheme - as a result of which the performance of the pool systematically favours the investor interest.
 - b) Adequate seasoning of the accounts transferred into the pool - so that they are likely to display the characteristics of fully operational accounts - is usually required; together with the random selection of the assets transferred into the pool, this should normally ensure that investors are not systematically advantaged.
 - c) In addition, the scheme's documentation should ensure that servicing practices are applied consistently to securitised and unsecuritised loans.

7.3.2 *Aggregated and disaggregated*

- 9 Schemes may incorporate one of two main approaches concerning the payments received by the SPV in respect of the pool of accounts transferred:
- Under the *aggregated* approach, the payments received during a period are aggregated and in distributing them shares are applied to that aggregate, treating the receivables as a homogeneous pool.
 - a) The pool of assets is looked upon as though it were one and receipts/advances apportioned between originator and investor.
 - Under the *disaggregated* approach, the amounts paid to investors and the originating bank are linked to particular receivables that they have financed.
 - b) Each advance/receipt is allocated to either the originator or the investor.

Schemes using either approach may be eligible for off balance sheet treatment by the FSA.

7.3.3 *Scheduled amortisation*

- 10 Under the *scheduled amortisation* of the securities, the outstanding balance of receivables reverts to the originating bank after a scheduled date fixed in the terms of the securitisation, in a controlled manner.

The FSA considers that the following conditions should be met by the provision for scheduled amortisation in a scheme:

- (a) There is a need to ensure full loss-sharing on the stock of receivables throughout the revolving period of a securitisation, which has implications for the rate at which schemes may be amortised at the end of that period.
 - a) If an SPV is able to a large extent to derive repayment flows from borrowers who turn over their balances quickly, and relatively little reliance on borrowers who pay only the minimum amount each month, it might be able to make a very rapid exit from the scheme.
 - b) If the borrowers who paid their debts slowly had different risk characteristics from those repaying and renewing credit at a fast rate, this might allow the investors to avoid their full share of losses on the pool at the end of the revolving period.
 - c) The pace of repayment during any set amortisation period should not in normal circumstances be more rapid than would be allowed by straight-line amortisation over the period.
- (b) Amortisations providing for a *clean-up call* - by which an originating bank has the option to buy back the remaining securitised assets - are considered to be acceptable so long as the clean-up can occur only when 10% or less of the receivables at the start of amortisation remain outstanding.
- (c) If the scheme is based on the disaggregated approach, this is an acceptable structure (as long as any assumption that it includes about the length of the amortisation period is reasonable).
 - a) The investor interest is not eliminated until each borrower in whose debts the SPV shares has made sufficient principal payments to cover the balances outstanding at the end of the revolving period - or these have been recognised as in default.
- (d) If the scheme is based on the aggregated approach, this is more complex but may still be acceptable. There is a need to allay the concern that the SPV may be able to exit from the scheme while a substantial proportion of the total amount outstanding at the start of the scheduled amortisation period remains outstanding.
 - a) This may be the result of a scheme in which, after the start of the amortisation period, investors are repaid from a fixed share of the repayments arising from the aggregate gross flows on the accounts, including repayments of new borrowings incurred during the amortisation period.
- (e) For aggregated structures, the originating bank should be able to demonstrate (either on a theoretical basis or on the basis of historical statistics) to the FSA that, by the end of the scheduled amortisation

period, borrowers in the pool should have made sufficient payments to ensure that in aggregate at least 90% of the total debt outstanding at the beginning of the amortisation period will have been repaid or recognised as in default.

- a) Payments are taken to include both principal and interest.

7.3.4 *Early amortisation*

11 *Early amortisation* of the securities provides for the repayment of the investor interest to be brought forward on the occurrence of certain circumstances defined in the terms of the securitisation. Such an occurrence is called a *trigger event*.

12 Various early amortisation triggers have been included in past securitisations, in the United Kingdom and elsewhere. They may be divided into two main kinds: *economic* and *non-economic* triggers.

- (a) *Economic* triggers activate early amortisation because of a deterioration in the performance of the pool of receivables: for example, a fall below a certain level in the yield of the pool net of provisions, interest and other expenses. The FSA considers that *economic* triggers may, therefore, be included only if:
 - (i) there is full sharing of interest, principal, expenses, losses and recoveries on the balances outstanding at the start of the amortisation period, using either the disaggregated approach or the aggregated approach applying the same conditions as outlined in paragraph 10 above; and
 - (ii) that at the point that early amortisation is triggered losses on the pool will have reached a level where the bank will feel able, if necessary and without putting its reputation at risk, to reduce its new lending broadly in line with the amortisation of the investor interest. The bank should be able to demonstrate to the FSA that this is the case.
- a) In some cases, such triggers allow investors to reduce their participation once they begin to experience losses and commit the originating bank to taking back the full financing in these circumstances. Because the FSA is seeking to ensure full loss-sharing, it considers that certain conditions should be met on the inclusion of *economic* triggers if the assets securitised are to be given off balance sheet treatment. The conditions are intended to prevent the inclusion of such triggers providing, in effect, implicit credit support. The aim is to ensure that investors share in losses for as long as these remain unusually high or until the originating bank decides, and feels able, to run down its portfolio in line with the amortisation of the investor interest.

- (b) *Non-economic* early amortisation triggers relate to changes, other than in the performance of the securitised assets, which have significant implications for the securitisation.
- a) Past examples include tax-event and legal-change triggers, triggers relating to the originating bank's material non-performance in its role as servicing agent to the SPV, and triggers relating to the insolvency of the originating bank or SPV.
 - b) In the FSA's view, the presence of these particular types of trigger does not amount to credit support. It therefore considers that such early amortisation triggers may be included in acceptable schemes, and in these limited cases a form of *rapid amortisation* - by which the investor interest may be repaid as fast as is allowed by its share of the inflow of principal payments - may be included.
 - c) The FSA needs to be convinced of the case for allowing any other forms of *non-economic* early amortisation trigger.

7.4 Implications of schemes for a bank's general risks

7.4.1 Context

13 This subsection explains the particular concerns relating to banks involved in revolving credit securitisations. It should be read in conjunction with Section 4 which discusses the implications for securitisations generally; the policy in this section is in addition to that set out in Section 4.

7.4.2 Systems

14 Systems needs are more complex than in other securitisations, because of the active nature of the assets, the consequent need for the identification of loans and payments, and the monitoring of the portfolio's performance.

7.4.3 Liquidity

15 The eventual return in full of the revolving-credit balances to the bank's balance sheet - as a result of either their scheduled or early amortisation - means that such securitisations raise particular issues for originating banks' management of their liquidity.

- a) These liquidity implications should be handled within a bank's normal liquidity management and assessed as under Section 4.4.
- b) In the case of securitisations of credit-card (and similar) receivables, this approach is combined with the FSA's normal liquidity approach for credit cards.

- c) Before the FSA is able to assess whether it is appropriate to treat such assets as off balance sheet, it needs to be satisfied that the bank can deal with these liquidity implications.
- 16 Each scheme should be included in a bank's liquidity management assuming, in normal circumstances, that during its amortisation the bank may be required to find replacement funding for the full amounts previously provided by the investor interest.
- a) This is because it may not be possible to arrange a replacement securitisation, and an across the board withdrawal or reduction of borrowers' facilities would put its reputation at risk.
- b) In each case, the FSA will consider whether an extra margin based on the likely maximum net growth in lending should be added to the funding requirement, and will, if necessary, set this margin in consultation with the bank including whether to include in the funding requirement an estimate based on the likely maximum net growth in lending.
- 17 For scheduled amortisations, before off balance sheet treatment is adopted, a bank should outline how it expects to manage its liquidity. A bank should satisfy the FSA that its liquidity arrangements could cope with the additional need for funding and, where appropriate, that it would build up additional liquid assets for the periods covering amortisation payments.
- a) This should include, at the appropriate maturities, the cash outflows resulting from the scheduled repayments to investors plus any additional growth margin decided on.
- b) The FSA examines banks' proposals to ensure that schemes do not unwind at times and in amounts that would pose difficulties for the bank concerned.
- 18 For early amortisation triggers in a securitisation scheme there are additional complications, since they render uncertain the timing of the potential need for replacement funding.
- (a) For a bank originating a scheme incorporating an early amortisation trigger or triggers, and having it treated as off balance sheet the bank should be able to demonstrate to the FSA that it has adequate funding plans in place to cope with their implications.
- (b) Where schemes include early amortisation triggers, the FSA wherever possible agrees with the originating bank 'warning indicators' that early amortisation might be triggered.
- a) For example, if the scheme allows early amortisation to be triggered after three successive months of negative net yield on the portfolio, a warning indicator might be one month of negative net yield. Following a signal from one of these

warning indicators, the maturity of the scheme will be advanced in the bank's liquidity reporting; in this example, its presumed maturity immediately after the warning indicator would be two months.

- b) For those banks operating using the stock liquidity approach, the FSA where appropriate will seek to agree with the bank the additional liquidity that should be maintained in the event of a signal from a warning indicator.
- (c) Where a scheme includes an early amortisation trigger that does not permit any warning indicator, the originating bank should likewise explain how it would cope with the liquidity implications of its being triggered.

19 There is additional liquidity risk in the case of originators of more than one securitisation with the same early amortisation trigger(s) (whether 'economic' or 'non-economic').

- a) Because the potential liquidity demand on such banks is multiplied if the early amortisation triggers in each can be triggered at the same time, in such cases the FSA needs further reassurance as to the liquidity implications before being able to agree the appropriate off balance sheet treatment of subsequent issues.

20 In order for a bank to satisfy the FSA that it can deal with the liquidity implications of the amortisation of schemes, it may need to arrange committed facilities to be drawn down to the extent necessary to fund receivables returning to its balance sheet.

- a) The policy governing these committed facilities generally is that used elsewhere in the FSA's liquidity approach. Likewise the FSA follows its normal approach on the question of the weighting of such committed facilities for capital adequacy purposes. Since such commitments need to be available in circumstances where a replacement securitisation does not prove possible, they should not include a material adverse change condition in relation to the bank.

7.4.4 Capital

21 For a bank carrying out revolving-credit securitisations amounting to a high percentage of its solo capital base, the FSA monitors and where appropriate discusses with its management the potential capital implications of its involvement in the securitisation market. Consideration here takes account of the size and development of that market.

- a) This is a particular issue where the presence of common early amortisation triggers makes it possible that a significant volume of assets could revert to the bank at the same time, thereby threatening to cause problems both for the bank's liquidity and its capital requirements.

8 OTHER SPECIAL STRUCTURES

8.1 Transfers of receivables arising from the finance of equipment or consumer goods

8.1.1 Introduction

See s2

- 1 The FSA's principal policy objective is to ensure that in any securitisation, all parties fully understand the responsibilities and risks which they assume or retain, and that any material risks to buyers or sellers are properly treated in the supervision of banks.
- 2 The financing of the purchase of equipment or consumer goods (including hire-purchase) can involve particular risks, which it is difficult legally to transfer to a buyer of the receivables, which may adversely affect this objective.
- 3 The policy in this section is additional to the general policy set out in section 5 and 6.

8.1.2 Concerns

- 4 The following concerns are particular to a securitisation of this type of loan:
 - (a) This type of lending can involve lenders in continuing liabilities for the "merchantability" of goods or equipment.
 - (b) If defective goods were to cause personal injury, very substantial costs could arise.
 - (c) In addition to liabilities for the quality of equipment, institutions involved in the finance of equipment hire or leasing may have contractual obligations towards the borrower - for instance to arrange for the servicing or taxation of vehicles.
 - (d) It is difficult legally to transfer these obligations, unless the transfer is done through novation.

8.1.3 The FSA's policy

- 5 The FSA views the following as the necessary steps to address these concerns:
 - (a) The FSA believes that for assets to be viewed as off-balance sheet, sellers should either receive an indemnity from the buyer to cover any liability, or otherwise take steps to minimise the risk of loss (such as taking out insurance to cover the risk).

- a) Lenders against whom claims are made as a result of their liability for the quality of goods or equipment usually have recourse to the manufacturer which, provided the manufacturer has appropriate liability insurance, may limit the risk to the lender. In addition, the FSA has been given to understand that the loss experience of lenders under such claims is historically very small. Nevertheless, the FSA does not view the risk retained by the seller as unimportant.
- (b) In situations where the seller is left with responsibilities of the kind outlined in paragraph 4 above, the FSA has some concern over the position of the buyer (if the buyer is a bank). The FSA reminds buying banks that risks of this nature need careful evaluation. Buyers should satisfy themselves of the seller's competence to fulfil its obligations towards the borrower in a timely manner.
 - a) There is a clear possibility that the borrower will exercise a right to reduce or withhold payments on the loan to reflect his costs - for instance, the cost of repairing the vehicle - if the original lender fails to meet his obligations under the loan agreement.

8.2 Securitisation of a reverse repo

- See s6 6 Where the benefits of a reverse repo are transferred, the transaction is considered to be the securitisation of a single loan. The originator therefore should comply with the policy above for standard schemes.
 - a) A reverse repo is where a bank has bought (or borrowed) trading book securities from a counterparty subject to buyback (or a return clause);
- 7 Whether the securitised loan is considered to be secured or unsecured depends on the structure of the transaction.
 - a) A sub-participation is deemed to be unsecured.
 - b) Where the transactions are through a trust structure (the trust having legal title) it will usually be secured.
- See s7 8 Where the transaction is through a trust structure and the originator retains an interest in the reverse repo, the concerns raised in respect of sharing of interest, principal and losses for revolving schemes should also be addressed by the bank.

9 SECONDARY ROLES: CREDIT ENHANCEMENTS

9.1 Background

See s6.3 (h)

1 The policy on credit enhancements is part of the wider policy on securitisation published by the FSA, and therefore feature in a previous section. Because of their importance and the variety of possible constructions, this section expands upon the basic rules.

9.2 Overview

2 A credit enhancement is an arrangement provided for the SPV that, in form or substance, covers the losses and risks associated with the pool of assets. The level of the enhancement is reflected in the rating given to the notes by a rating agency.

- a) Where a bank demonstrates a pattern of providing (implicit) support, it will be deemed to have provided credit enhancement.
- b) An enhancement can be an integral part of the structure used to manage funds or securitise assets (i.e. driven by cash flow) or may be provided from outside the structure (i.e. provided by the originator or another third party).
- c) Ratings agencies require banks to provide credit enhancement in order to make the paper issued in securitisations more attractive to investors.

3 A bank acting in a primary role may provide credit enhancement to support an SPV (and its investors). The capital charges against the credit risk that should be made are detailed below.

9.3 Structure of credit enhancements

4 A credit enhancement may be structured in a number of forms, examples include:

- (a) A subordinated loan or note facility issued by a bank equal to a maximum amount of credit support being provided.
- (b) Over-collateralisation, where the face value of the assets is greater than the securities issued. The securitisation will amortise more quickly and a buffer is created against losses. On maturity, any residual assets revert to the originator.
 - a) The credit enhancement, for calculating capital requirements, is the over-collateralisation.
- (c) Spread accounts. The interest rate on the assets is usually higher than the coupon on the securities issued, with the difference being

used to cover costs and provide for losses. Utilising all or part of this for credit enhancement purposes means leaving it in the SPV rather than returning it to the originator.

- a) If the funds are to be returned to the originator, the FSA considers that the SPV should not have recourse to the monies thereafter.
- b) The conditions detailed in 9.4 do not apply to credit enhancement in the form of a spread account retained by the SPV.

See ch TI s9

5

Securities issued that are deemed to be investment grade by relevant rating agencies, as defined, are deemed not to constitute credit enhancement if there is already sufficient credit enhancement within the terms of this section.

See 9.6.1

- a) The limitations on the ability to hold such securities are detailed below.

See s11

- b) The limitations on the ability to trade such securities are detailed below.

9.4 Detailed policy

6

Any bank providing credit enhancement should ensure that:

- (a) the facility is limited in amount and duration;
- (b) there is no recourse to the bank beyond the fixed contractual obligations provided for in the facility;
- (c) the SPV and/or investors in a bond issue have the clear right to select an alternative party to provide the facility;
- (d) the facility is documented separately from any other facility provided by the bank;
- (e) the transaction should be undertaken at the initiation of the scheme;
 - a) However, in the event of a scheme having subsequent tranches of assets being placed in to the SPV, within the terms set out above, the credit enhancement can increase at that time, if detailed in the offering circular. The new credit enhancement should not be used to provide, in a disguised way, enhancement for earlier tranches of assets and schemes seeking to be structured in this way should be discussed in advance with the FSA.
- (f) the details of the facility should be disclosed in any offering circular or other appropriate documentation; and
- (g) payment of any fee or other income for the facility is not further subordinated, or subject to deferral or waiver, beyond what is already

explicitly provided for in the applicable order of priority and other payment entitlement provisions.

See s9.6 & 9.7 7 If the above conditions are met, the relevant capital treatment that should be applied is detailed below.

9.5 Definitions of first loss & second loss credit enhancement

9.5.1 General

8 The distinction between the types, *first loss* and *second loss*, is drawn to allow for an understanding of the underlying structure, and for the other implications resulting from this.

9.5.2 Definition of first loss credit enhancement

9 A *first loss facility* represents the first level of financial support to a SPV.

- a) A first loss facility bears, in effect, all of or the bulk of the risk associated with the assets held by a SPV, as part of the process in bringing the paper issued by the SPV to investment grade. Hence the high capital cost.
- b) A payment by a bank to provide cover against losses incurred by an SPV (e.g. to fund a reserve account) or the sale of assets to an SPV for below their book value in the bank's books (where not written down or off against profits) is regarded as a *first-loss facility*.
- c) Capital is not required for *spread accounts* where the funds are held in the SPV.
- d) Additional capital is not required for *over collateralisation* beyond the assets that are effectively written off in providing the margin of assets.

9.5.3 Definition of second loss credit enhancement

10 A *second-loss facility* represents a credit enhancement providing a second (or subsequent) tier of protection to an SPV against potential loss. The share of risk of a second loss facility depends on the coverage provided by any first loss facility. In order to limit the possibility of the second loss facility carrying a disproportionate level of risk, a credit enhancement facility is deemed a second loss facility only if:

- (a) it enjoys the benefit of protection from a substantial first loss facility; and
- (b) it can only be drawn after the first loss facility has been exhausted.

- a) For the purposes of this section, a first-loss facility will be considered substantial where it covers some multiple of historic losses or worst case losses estimated by simulation or other techniques.
- b) A bank providing a second loss facility needs to assess the adequacy of the first loss facility on an arm's length basis in accordance with its normal credit policies. A review of first loss facilities might refer to such factors as:
 - i) the class and quality of the assets held in the SPV;
 - ii) the history of default rates on the assets;
 - iii) the output of any statistical models used by banks to assess expected default rates on the assets; the types of activity permitted the SPV (i.e. whether the risk underlying the credit enhancement facilities extends beyond the asset held);
 - iv) the quality of the parties providing the first loss facility; and
 - v) the opinions or rating letters provided by reputable third parties, such as rating agencies, regarding the adequacy of the first loss protection.
- c) Where a second loss facility provided by a bank would substitute for a first loss facility provided by another party, in the event of that party failing to meet its obligations, the bank should treat the facility it provides as equivalent to a first loss facility.

9.6 Credit enhancements supplied by an originator

9.6.1 *Restrictions upon an originator*

11 An originator should only make a one-off contribution to enhance the credit-worthiness of a vehicle. Any transactions should be funded at the initiation of the scheme and disclosed in the offering circular.

- a) The agent or originator may lend on a long-term subordinated basis to the vehicle only if the loan is made at the outset of the scheme and is repayable only following winding up of the scheme.

See s11

12 An originator may not hold any of the securities issued by the SPV unless it has received a waiver to deal, as detailed below.

- a) Any holdings in excess of the agreed dealing limits will be deducted from capital.

9.6.2 *Treatment for first loss*

- 13 The originating bank may make a choice of either deducting the amount of the credit enhancement from capital or including the assets within their risk weighted asset ratio under normal rules as if there had been no securitisation. The choice should be made at the outset, maintained for the duration of the credit enhancement facility and be advised to the FSA.

9.6.3 *Treatment for second loss*

- 14 An originator providing a second loss facility (in an acceptable form) should deduct the amount of the facility from capital.

9.7 Credit enhancements supplied by a sponsor or repackager

9.7.1 *General*

- 15 Due to the complexity of conduit and repackaging schemes, the definitions of first and second loss facilities may be difficult to apply. In such circumstances, the FSA should be consulted.

- a) For the purposes of this section, the holding of sub-investment grade paper will be deemed to constitute credit enhancement unless there is already sufficient enhancement within the scheme.

9.7.2 *Treatment for first loss*

- 16 First loss credit enhancement facilities provided by a sponsor or repackager should be deducted from capital.

9.7.3 *Treatment for second loss*

- 17 A bank acting as sponsor or repackager which provides a second loss facility, as defined above, may weight the facility as normal, provided that the extent of the bank's involvement is fully and properly explained in any offering circular for the scheme, or is otherwise notified to investors, and it is made unequivocally clear to investors:

- (a) that the bank's responsibilities do not go beyond that which is provided for in the second loss facility in question (as explained in the offering circular); and
- (b) the bank will not support losses beyond the requirements of the second loss facility or generally stand behind the scheme.

10 SECONDARY ROLES: LIQUIDITY FACILITIES

10.1 General

1 *Liquidity facilities* enable SPVs to assure investors of timely payments. These include smoothing timing differences in the payment of interest and principal on pooled assets and ensuring payments to investors in the event of market disruptions. Such facilities can be particularly important where SPVs hold long term assets funded by the issuance of short-term securities.

- a) Ratings agencies require banks to provide liquidity facilities in order to make the paper issued in securitisations more attractive to investors.
- b) The Commercial Paper (CP) markets display some degree of volatility. For example, in the United States, this may cause the \$CP rates to diverge from \$LIBOR from time to time, particularly over the year-end, quarter ends and US tax payment days. SPVs are sometimes therefore set up in such a way that they are not tied to an obligation to fund assets for a full quarter on specific days each quarter so as to avoid such difficult days. A liquidity facility may be key to the flexibility an SPV needs in such circumstances.

10.2 Detailed Policy

2 To guard against the possibility of a facility functioning as a form of credit enhancement, a liquidity facility when provided should satisfy the following conditions:

- (a) the facility is provided on an arm's length basis and is subject to the bank's normal credit review and approval processes;
- (b) the facility may be reduced or terminated should a specified event relating to a deterioration in asset quality occur, e.g. the facility should not be available to be utilised if the assets of the SPV have deteriorated in quality to the extent there is no longer a sufficient level of credit enhancement to cover the amount of any new or existing drawdowns under the facility.
- (c) the facility should be conducted on market terms and conditions;
- (d) the facility is limited in amount and duration;
- (e) there is no recourse to the bank beyond the fixed contractual obligations provided for in the facility;
- (f) the SPV and/or the note trustee representing the investors have the clear right to select an alternative party to provide the facility;

- (g) the facility is documented separately from any other facility provided by the bank;
- (h) payment of any fee or other income for the facility is not further subordinated, or subject to deferral or waiver, beyond what is already explicitly provided for in the applicable order of priority and other payment entitlement provisions;
- (i) the facility may not be drawn for the purposes of credit support;
- (j) the documentation clearly defines the circumstances under which the facility may be drawn and prohibits drawing in any other circumstances;
- (k) the facility will provide for repayment of advances within a reasonable time period;
- (l) funding is provided to (or via) the SPV and not directly to investors;
- (m) proceeds of drawings under the facility cannot be used to provide permanent revolving funding, or be for the express purpose of purchasing underlying assets held by an SPV (although it is permissible for a liquidity facility to be structured as an arrangement in which underlying assets held by the SPV are purchased by the liquidity provider, provided that the assets in question are investment grade);
- (n) funding cannot be used to cover losses recorded by the SPV; and
- (o) drawings under the facility are not subordinated to the interests of investors, except that drawings may be subordinated to other liquidity facilities if a tiered liquidity facilities are used in a scheme. Such subordination should be clearly set out in the offering circular or other appropriate documentation.

3 Failure to satisfy these conditions will cause the facility to be deemed to be serving the economic purpose of a credit enhancement facility and therefore be treated in the same way as a credit enhancement for capital purposes.

- a) The facility may be deemed to be a first or a second loss facility, as appropriate.

10.3 Restrictions on originators

See s6.3

4 An originator should not provide a liquidity facility as it is deemed to be funding. If it does, it is deemed not to have achieved a clean break with

the assets, which will then be considered by the FSA as being on its balance sheet.

- a) The provision of a liquidity facility to cover very short-term timing differences may be considered acceptable. However, there should be no obligation on the bank to make the payment, the vehicle should have sufficient funding to meet any clawback claims and the structure should be covered in the scheme's documentation.
- b) Although originators may not provide a liquidity facility, the workings of the securitisation vehicle may still require one which may, therefore, be provided by a third party bank.

10.4 Restrictions upon sponsors and repackagers

10.4.1 General

See ch BC s4

5 A sponsor or repackager may provide a liquidity facility to a scheme. The facility will be calculated as 100% weighted asset drawn and 0% or 50% undrawn (in the normal way), provided that the extent of the bank's involvement is fully and properly explained in any offering circular for the scheme, or is otherwise notified to investors, and it is made unequivocally clear to investors:

- (a) that the bank's responsibilities do not go beyond that which is provided for in the liquidity facility in question (as explained in the offering circular); and
- (b) the bank will not support losses beyond the requirements of the liquidity facility or generally stand behind the scheme.

6 If these conditions are not met, the bank should treat the scheme as a fully consolidated subsidiary for capital adequacy purposes.

- a) If a bank acting as sponsor is seeking to use the concessionary treatment of section 3.2.2 paragraph 5, (as a partial originator in a multi-seller vehicle, providing a part of the liquidity facility) and fails the tests in this section, then any assets it originates will be considered as remaining on its balance sheet.

10.4.2 Large Exposures

7 Conduits can grow to considerable sizes and consequently a liquidity facility provided by a sponsor or repackager to such a conduit could potentially exceed the bank's large exposures capital base. A bank should only disaggregate facilities where the following general conditions are fulfilled:

- (a) The facilities are provided to separate legal entities;

- See Ch LE s5.2
- (b) The legal entities are not closely related counterparties for large exposure purposes;
- a) The details regarding large exposures are explained in chapter LE.
- See s4.2
- (c) The bank has systems and controls in place to monitor the assets within the conduit;
- a) The need to aggregate the underlying assets involves the use of complex systems and controls. A bank should be able to satisfy the FSA that it is able to control the securitisation properly primarily at notification and through the section 166 process.
- See s4.4
- (d) There are internal systems in place, that have undergone stress testing on mismatch limits, to monitor and/or manage the bank's liquidity out to at least six months; and
- a) It is possible for CP conduits to grow to a significant size. Should there be a disruption to the CP market that requires the drawing of a facility, sizeable funds will be needed to meet the demand. The drawing of these funds may accelerate as each CP fund matures. The sponsor should be able to monitor its liquidity to ensure that it is able to cope with such an effect.
- b) Conduits should manage their CP maturities so that they do not have significant amounts of CP maturing during any one day or week. If the liquidity lines' renewal dates are not concentrated the bank may be less exposed to market disruption as drawing will take place over a longer period of time.
- See s4.5
- (e) The sponsor's capital planning takes account of possible drawings under the facilities i.e. that they are either able to sell the assets, sell other assets or raise the requisite capital. A sponsor should pre-notify the FSA as to how it will provide capital in the event of possible drawings.
- a) If a CP disruption occurs it may result in the sponsor making a large loan or taking a large quantity of assets onto the balance sheet over a short period of time. A sponsor should plan how it will provide capital in the event that this occurs.

8

The FSA considers that it is appropriate for a bank to disaggregate facilities where the following specific conditions are fulfilled:

- (a) For an asset repurchase facility, the exposure to the obligor for each underlying asset held by each special purpose vehicle is aggregated for large exposures purposes with the bank's own exposures to that obligor; or

(b) For a liquidity backstop facility, a bank takes reasonable steps to aggregate, for large exposure purposes, exposures to the obligor of the underlying assets, that represents a significant proportion of the pool, with the bank's own exposure to that obligor.

a) A bank should also take into account any originator, sectoral, country or regional concentrations when providing liquidity to an SPV.

b) A bank should not only aggregate the exposure to the obligors of the underlying assets across the SPVs but also any exposures to closely related counterparties across the SPVs.

See ch LE s9.2.7

10.4.3 Bridging Loans

9 *A bridging loan* is a loan made to a vehicle, prior to the issuance of the notes, to cover a mismatch in time between the date of purchase of the underlying assets and the date of issue of the securities.

a) A sponsor or repackager should not use the practice in this section to establish a remote origination scheme.

See s3.2.1

10 The FSA considers that it is acceptable for a sponsor or repackager to provide a bridging loan to an SPV subject to usual capital and large exposures requirements where the following conditions are met:

(a) The loan is provided at market prices with no preference of any kind being shown in the terms and conditions;

(b) The sponsor or repackager has the senior secured status; and

(c) The term of the loan is limited to three months or less.

a) The maturity of the underlying assets should extend considerably beyond this period.

11 A sponsor or repackager providing a bridging loan for greater than three months should treat the assets as on the balance sheet until the transaction is completed.

a) Assets that are regarded as being on balance sheet for the purposes of this section will be regarded as originated when securitised.

See s3.2.1

11 SECONDARY ROLES: DEALING & UNDERWRITING

11.1 Dealing & underwriting by an originator

1 An originator may underwrite the securities issued by the SPV. The assets will not be regarded as being off balance sheet until 90% of the total issue has been sold to a third party.

- a) The FSA may vary the minimum level of assets that have to be sold to a third party before off balance sheet treatment is considered appropriate.

See s9.6.1

2 Once the assets have been removed from the balance sheet, any holdings in excess of agreed dealing limits should be deducted from capital. The bank should fully comply with the policy on holding the assets, as detailed above, within one month.

3 An originator should not deal in the securities issued by the SPV unless it has discussed its intention with the FSA. The FSA considers that a bank's deals should be limited. Appropriate limits are likely to represent only a small fraction of the total securities issued.

- a) Limit structures should generally be subject to limits specific to individual tiers of securities issued. Limits are likely to be more constraining for trading in securities other than the most senior debt.

See s6.2

- b) It is an accepted role of an originating bank to promote an orderly market in the securities issued by the SPV, but not to the extent that that originator is or appears to be able to support the issue, which would be in contravention of the policy above.

See s9 and Ch TI
s9

- c) The ability to deal in securities is limited to securities deemed to be of investment grade by a relevant rating agency as defined. Securities below investment grade fall within the definition of as credit enhancement as described below.

- d) The policy is not intended to restrict the ability of an SPV to buy back securities it has issued at or below par.

11.2 Dealing & underwriting by a sponsor or repackager

See ch TU

4 A sponsor or repackager may act as underwriter for the securities issued by the SPV subject to the policy in chapter TU.

See s9

- a) At the end of the underwriting concession period any holdings of sub-investment grade paper will be deemed to constitute credit enhancement unless there is already sufficient enhancement within the scheme.

- b) Securities issued that are deemed to be investment grade by relevant rating agencies are deemed not to constitute credit enhancement, provided that there is already sufficient credit enhancement.

5 A sponsor or repackager may act as dealer in the secondary market in the securities issued by the SPV, provided that there is always at least two other third party dealers.

- a) This may be waived where a scheme is small and having multiple dealers is not practicable. However, given that in such schemes, there may more reason for concerns as to liquidity, the sponsor should be able to demonstrate that it is creating an orderly market and not supporting the issue. Banks wishing to follow this approach should obtain the prior approval of the FSA.

Interim Prudential Sourcebook for Building Societies

11 Outsourcing

11.1 Introduction

11.1.1 G This chapter contains new guidance for building societies on outsourcing.

11.1.2 G The rest of this chapter consists of the guidance for banks on outsourcing (taken from chapter OS of the IPSB for banks). This guidance applies in its entirety to building societies with the following amendments and exceptions:

- (1) all references to “banks” should be read as including building societies;
- (2) paragraphs 3(b)(a)(i) and 4 in section 1.1 do not apply to building societies (societies are not currently subject to the RATE process);
- (3) the date referred to in paragraph 8 in section 1.2 is changed from 30 June 1999 to 1 September 2000.

OUTSOURCING

1 INTRODUCTION

1.1 Legal sources

1 Principle 3 of the Principles for Businesses states that a firm must organise and control its affairs effectively which includes having adequate systems and controls (see also the high-level rule in SYSC 3.1.1R). The Threshold Conditions ('Suitability') also includes the need to ensure that a firm conducts its affairs 'soundly and prudently'. Relevant to the meeting of these requirements is a bank's outsourcing arrangements. In considering any outsourcing proposal, a bank should consider whether the outsourcing meets the material outsourcing definition below. Where the proposal meets these criteria, the bank should take into account the system and control implications, including adequate anti-money laundering systems, and the degree to which management control of the task will be relinquished to the supplier. The FSA considers that a bank's management is accountable for the adequacy of systems and controls for the outsourced activity.

See Supervision Manual, chapter 2

2 The FSA has powers under section 165 of the Act to require a bank to provide documents to the FSA which it reasonably requires in connection with the exercise of its functions under the Act. Nevertheless additional steps need to be taken to protect the FSA's access to information in relation to outsourced activities.

3 Material outsourcing is the use of third parties to provide services to a bank which are of such importance to the bank that:

- (a) a weakness or failure in any of the activities outsourced would cast into serious doubt the bank's continuing compliance with the Principles for Business and Threshold Conditions; and
- (b) the outsourcing is by business units which are *significant units*.
 - a) A *significant unit* is one which is covered by the FSA's risk assessment.
 - i) The first step in the FSA's RATE approach is to agree with banks exactly which units are significant: this process is described in paragraphs 26 to 30 (UK banks) and 31 to 33 (overseas banks) of the FSA's June 1998 paper "Risk based approach to supervision of banks".
 - b) The purchase of a standardised service from, for example, Bloombergs or Reuters and the provision of custody arrangements fall outside of the definition of material outsourcing.

- 4 This definition is solely for the purpose of determining the scope of the policy on outsourcing. It is not intended to restrict discussion with the FSA, nor is it intended to limit the issues that the FSA considers as part of the RATE process. A bank should apply its normal tests in deciding which issues should be raised with the FSA.
- 5 If in doubt as to whether a function would be considered material the bank should discuss the definition of material outsourcing with the FSA.
- 6 Although the principles in Section 4 apply to both intra- and extra-group outsourcing, the FSA applies them flexibly where the outsourcing is intra-group or to another regulated entity, particularly where the outsourced activity is a regulated core business function carried out by the supplier for its own purposes, e.g. cheque clearing.

1.2 Application

- 7 The policy set out in this chapter applies to all banks except EEA banks.
- 8 A bank which had outsourcing arrangements in place on 30 June 1999 or which was close to completing outsourcing arrangements on or after this date, is exempt from the application of this policy until the existing contracts become due for renewal. At that time the FSA expects a bank to discuss with it how the bank intends to apply this policy to the renewal of its existing arrangements.

1.3 How this chapter is organised

- 9 Section 2 sets out the basic scope and range of the FSA's approach to outsourcing proposals. Section 3 summarises the main features of the policy.
- 10 Section 4 details the minimum criteria a bank should adopt when it intends to outsource. These range from its due standard of care, to its relationship with the FSA and to its customers.
- 11 Section 5 sets out some points for further consideration regarding the structure of a bank's relationship with the supplier of the outsourced function. It stresses particularly the standards the bank should expect a supplier to meet and how the bank should monitor the relationship. This section does not represent additional minimum criteria, but a bank still needs to have considered the issues raised; the FSA may ask the outsourcing bank what procedures have been put in place to address relevant concerns.
- 12 Section 6 is an appendix setting out the FSA's general approach to *central booking*. It also explains when the FSA regards central booking as a form of material outsourcing for the purposes of sections 2 to 5.

- a) *Central booking* is where the business is carried out in one location or legal entity within a group and booked in the accounting records of another. In some cases, the risks arising from such business may be managed in a third location.

2 THE FSA'S APPROACH TO OUTSOURCING

- 1 Banks frequently decide to outsource aspects of their operations, either to other group companies or to independent third parties. This is sometimes done on grounds of cost, sometimes because the other party can deliver a better service than can be provided in-house, and sometimes a combination of both.
- 2 The FSA recognises that outsourcing can bring significant benefits to banks and their customers. However, the FSA is concerned that when an important function is performed outside a bank, the bank may lose or have reduced control of the outsourced activity. Furthermore, the FSA's ability to exercise its supervisory powers to gather information or to require changes in the way that the outsourced function is carried out may be affected adversely. In addition, there may be some circumstances in which the FSA will need to assess the suitability of the service provider and its key staff. This policy is designed to address these concerns without impeding unduly banks' ability to use outsourcing to further their business objectives.
- 3 The FSA recognises that some of this policy will not be appropriate to intra-group outsourcing. Where a particular principle applies only to outsourcing either solely within or alternatively outside the consolidated group this has been clearly stated. Where there is no such statement it should be assumed that the policy applies to both intra- and extra-group outsourcing.

3 THE MAIN FEATURES OF THE POLICY

This section summarises the main features of the policy applying in relation to outsourcing banks. It should be read in conjunction with section 4 below.

3.1 Informing the FSA

- See s4.1 1 A bank should make the FSA aware, through its normal supervisory channels, of its intention to outsource a task which, materially, either impacts on its systems and controls or affects its risk profile. This should take place in reasonable time to allow the FSA to consider the proposal and to raise any concerns.
- 2 During the course of the outsourcing agreement a bank should make the FSA aware of any material problems encountered with the outsourcing supplier.

3.2 Material outsourcing proposals

- See s4 3 The FSA expects a bank to be able to analyse the impact outsourcing a particular function will have on its overall risk profile and the bank's internal systems and controls.
- See s4.5 4 A bank should ensure that the FSA has access to any information relevant to the outsourced activity reasonably required by the FSA in connection with the exercise of its functions under the Act.
- See s4.6 5 A bank should ensure that its internal and external auditors have access to any relevant information they require to fulfil their responsibilities.

3.3 The FSA's consideration of banks' outsourcing proposals

- See s4.1 6 The FSA will consider a bank's outsourcing proposal and raise any concerns that it has. The FSA is aware of commercial pressures involved in outsourcing contracts and will agree with the bank a suitable timescale for response.

4 PRINCIPLES OF OUTSOURCING

4.1 General

1 A bank should make the FSA aware of a material outsourcing proposal in reasonable time to allow the FSA to consider the potential impact of the proposal on the bank and to raise any concerns. The FSA is aware of commercial pressures involved in outsourcing contracts and will agree with the bank a suitable timescale for response. Once a bank has notified the FSA of a material outsourcing proposal, the FSA will determine the level of its ongoing scrutiny of the process and ask the bank to provide further information accordingly.

See ch GN s3

2 Regardless of whether the outsourcing supplier is inside or outside the group, the FSA holds the bank's management responsible for ensuring that the outsourced function is carried out to a proper standard and that the integrity of the bank's systems and controls is maintained. The FSA would expect a member of the bank's senior management to take responsibility for each material outsourced function; this person should be an approved person (see 3.3.24G).

3 In some limited circumstances it is possible that a person employed by a supplier may be subject to the approved persons requirements under the Act. Further details are given in the Supervision Manual.

- a) The scope and principles of the approved persons requirements are set out in Part V of the Act, the High Level Standards for Business and the Supervision Manual.
- b) Applicants apply to the FSA to become approved persons using Form A in chapter 10 of the Supervision Manual.

4.2 Principles governing a bank's relationship with its supplier

See s5.2

4 A bank should monitor and manage on an ongoing basis its relationship with the supplier so as to seek to ensure the integrity of its systems and controls is maintained.

5 The supplier should be a competent, financially sound firm with good relevant knowledge and expertise. The bank should be able to demonstrate that it has taken proper steps to verify this and that it also has procedures for assessing the supplier's performance on a continuous basis. Additionally, the bank should be able to satisfy the FSA that the supplier is committed for the term of the contract to devoting sufficient, competent resources to providing the service.

- a) Where the supplier is a member of the same group as the bank, the latter is likely to have a greater pre-existing level of knowledge about the former. The level of assessment may therefore be reduced.

6 The agreement between the bank and the supplier should provide that the bank is informed of any developments which may have a material adverse impact on the supplier's ability to meet its obligations. This includes, for example, relevant material control weaknesses identified by the supplier's internal or external auditors. The supplier's auditors do not have a responsibility to report any concerns to the FSA. Nonetheless, the bank should ensure that there is a clear reporting line between the supplier and itself so that any material problems relating to the outsourced activity can be communicated and to enable it (or the FSA) to make any further enquiries of its own into such problems.

- a) Where the supplier operates abroad, the Data Protection Act 1998 sets out legal requirements governing the transfer of data across borders.

7 For outsourcing outside the group there should be a right to terminate the contract in the event that the supplier undergoes a change of ownership or the supplier becomes insolvent or goes into liquidation or receivership.

4.3 Principles covering service level agreements ('SLAs')

See s5.4

8 An *SLA* is a negotiated agreement on the standards of service between the supplier and the end-user (the bank). A bank should always have a written SLA in place with its supplier, where the outsourcing is outside the group. The SLA should also provide for periodic reviews and appropriate remedies should problems arise. Such reviews should allow for the relationship to be amended via the SLA or contract as appropriate, on the basis of performance against specified targets.

- (a) Banks may be asked to submit SLAs to their supervisors.

9 Where the outsourcing is intra-group a SLA may not always be appropriate. This is particularly the case where a service is supplied on a group wide basis. In such circumstances the supplier may wish to provide a statement of the standard of service to be provided to the whole group. This statement may be supported by a wide range of other existing relationship management systems. Where these provide a sufficient performance measurement structure a SLA may not be required.

4.4 Principles affecting contingency planning

See s5.5

10 A bank should have and regularly review contingency plans to enable it to set up new arrangements as quickly as possible, with minimum disruption to business, if the contract is suddenly terminated or the supplier fails. The level of detail in such plans may vary. For example, if there are large

numbers of possible alternative suppliers the outsourcer may simply be able to use one of the alternative supplier(s). However, this may still be a complex and time consuming process and a bank should consider how it would deal with the hand-over process. If, on the other hand, the only option is for the bank to resume the activity itself the plan should be far more detailed.

- a) As the contract with an intra-group supplier is highly unlikely to be terminated through the actions of the supplier, the only significant risk is that the service will be interrupted by another unrelated event. Such events should be covered by the supplier's business continuity plan and therefore a separate contingency plan for the bank may not be appropriate.

4.5 Principles governing supervisors' access to information

11 The contract between the bank and the supplier should ensure that the bank can provide the FSA with any information relating to the outsourced activity that the FSA may require in order to carry out effective supervision, whether the outsourcing is within or without the group, for example, through section 166 reports by a person with relevant professional skill.

12 Where the supplier is based outside the UK, the bank should assess the extent to which the local regulator/regulations may restrict access to information about the outsourced activity.

13 The FSA should be informed if any other regulator raises serious concerns with the bank's proposal to outsource.

4.6 The auditor's role

14 A bank should have processes in place to identify and deal with any weaknesses in the supplier's procedures which could have a material adverse impact on the service provided to the bank. This could include access for the bank's internal and external auditors, independent reports on the supplier and/or monitoring of detailed performance statistics.

15 In line with the FSA's approach to other areas of banking supervision, where internal or external audit raises material problems the bank should alert its supervisor. The bank should also ensure that it has the management capacity to assess and respond to any such concerns so raised.

4.7 Outsourcing internal audit

16 All cases of outsourcing internal audit will be considered material.

- 17 A bank should not outsource its internal audit function to either its skilled persons or its external auditors. A bank should have an internal audit function independent from external audit as this segregation of responsibilities would be compromised if the same firm fulfilled both functions.
- See ch AR s3 18 However, the FSA considers that it may be appropriate for certain internal audit services to be provided by the external auditors/skilled persons where the following conditions are met:
- (a) the work is carried out under the overall supervision and management of the bank's own internal audit staff;
 - (b) ultimate responsibility for the adequacy and effectiveness of internal audit lies with the Head of Internal Audit.
 - (c) the Head of Internal Audit is a senior and experienced individual who is an employee of the bank, or the group of which the bank is a part.
 - (d) the FSA is satisfied that the Head of Internal Audit has satisfactory reporting lines. These lines would typically involve unfettered access to the audit committee or at a minimum a non-executive director.
- 19 A bank wishing to use its external auditor/skilled person to perform any part of internal audit's function should notify the FSA of its intention to do so. It need not, however, notify where individual employees of a bank's external auditors/skilled persons are seconded to work within the internal audit function.
- 20 Where internal audit is outsourced to another firm which is not otherwise involved in the auditing or accounting function of the bank, the independence issue does not arise. Therefore, outsourcing proposals meeting this criterion are assessed in the same way as any other function.

4.8 Principles covering sub-contracting

- 21 The contract should state that if the outsourcing supplier decides to sub-contract further the original outsourcing supplier continues to be contractually liable and the level of service and systems and controls will not deteriorate.
- a) *Sub-contracting* is where the supplier of an outsourced function further contracts out that function to a third party unrelated to the bank or supplier.

5 FURTHER AREAS FOR CONSIDERATION

Banks should have considered the issues raised in this section as the FSA may ask what procedures have been put in place to address these concerns.

5.1 General

- 1 Any voluntary Codes of Conduct adopted by the bank that would have a direct impact on customers could also be observed by the supplier. This step may help to prevent a deterioration in the service received by its customers.

5.2 A bank's relationship with its supplier

5.2.1 General

See s4.2

- 2 The bank may wish to be aware of the material risks to which the supplier is exposed in relation to the service provided to the bank by the supplier and the corresponding control procedures in place. There might also be provision for relevant management information so that problems, such as a deterioration in service, are brought to the attention of the appropriate individuals in the bank at an early stage. The bank may wish to take steps to seek to ensure that it is clear who is accountable at the appropriate level in respect of such problems. One such mechanism may be through establishing clear lines of escalation both within the supplier and the bank.
- 3 It would be prudent for a bank's management to provide adequate resources at appropriately senior levels to ensure that the relationship with the supplier is properly managed and monitored against performance targets.
- 4 Where the outsourcing supplier is in direct contact with the bank's customers, the bank may wish to establish how its customer relations policies will be reflected by the supplier, for example, answering complaints within a certain time period. Such policies could be measured and factored into any consideration of the supplier's performance. This is important to a bank since any material deterioration in customer relations may adversely affect its reputation. This matter has greater significance if the supplier is external to the group since the supplier might have a different culture.

5.2.2 Termination of contract with the supplier

See s4.2

- 5 A bank may wish to make provision in the contract to ensure that it does not lose any work or records which are material to the bank's business and has been carried out by the supplier, should the contract be terminated. In

any case it would be sensible for termination clauses to provide adequate notice for the bank to put in place alternative arrangements.

5.3 Confidentiality

6 Confidentiality may not be a significant issue if the outsourcing is within a bank's group. However, the bank may wish to consider whether the confidentiality constraints below need to be fulfilled.

7 Where a supplier deals with a bank's competitors distinct procedures (such as Chinese Walls) may be advantageous in seeking to ensure that there is no breach of client confidentiality. Where the supplier operates abroad, the Data Protection Act sets out legal requirements governing the transfer of data across borders.

5.4 Service level agreements ('SLAs')

See s4.3

8 In order to ensure that there is no confusion over respective duties banks may wish to clearly define what is to be outsourced in their SLA. Additionally the SLA may incorporate the capacity for change (including technological change) or expansion, set out clearly who is responsible for ensuring that work is completed and incorporate details of the reports that the bank might wish to receive from the supplier and their frequency.

9 Where a supplier provides a service for several banks or the bank has peak periods of service, the bank might wish to seek to ensure that a minimum level of resources will be continuously devoted to provide an agreed level of service.

10 For extra-group outsourcing, the contract may provide the option for regular re-tendering. However, for both intra- and extra-group outsourcing, it may be prudent for the relationship to be reviewed, where and when appropriate, but at least annually to take account of all relevant business and environmental changes and the review may also include a financial strength assessment of the supplier.

11 An agreed standard of service between the supplier and the bank might be particularly relevant in the case of extra-group outsourcing. A bank may wish to consider whether the standard of service operated by the supplier needs to be as high as that operated within the bank. Performance targets might be included within the SLA, along with provision for escalation and termination where the targets are not met.

5.5 Contingency planning

See s4.4

- 12 Daily operations and systems problems, such as temporary disruption/suspension of the service, could be included within a plan although this could be covered in the supplier's own contingency arrangements.
- 13 A bank might wish to ask the supplier for information about its own contingency plans, in order to assess the level of comfort it can draw from these plans and consider the implications for its own contingency planning. Where sufficient comfort cannot be drawn the bank may wish to make alternative contingency arrangements either in-house or through an alternative supplier as appropriate.

6 APPENDIX – CENTRAL BOOKING

Central booking is where the business is carried out in one location or legal entity within a group and booked in the accounting records of another location or legal entity. This general description covers a range of different scenarios, as explained in the remainder of this section: in all cases, the overriding objective is that, however a bank chooses to organise its activities, it must continue to comply with the Principles for Businesses and Threshold Conditions for Authorisation and with its other legal and supervisory obligations, including those relating to the provision of information to the FSA. The FSA expects banks to discuss significant new central booking proposals with their supervisors, in the same way as for any other significant change in its organisational arrangements.

6.1 Central booking between different locations of the bank

1 Banks often record transactions in a different physical location to that in which the business is undertaken. This will never fall within the definition of material outsourcing (because a bank cannot, by definition, outsource to itself). A bank should nevertheless satisfy itself that, wherever the various functions associated with its business are physically carried out, the bank complies with its legal and regulatory obligations including (but not limited to):

- (a) the maintenance of adequate accounting and other records and internal control systems;
- (b) the adequacy of provisions, liquidity and capital (where relevant); and
- (c) the provision of information to the FSA (including periodic reporting such as prudential returns and the notifications on large exposures, controllers and close links, and ad hoc requests for information).

6.2 Central booking between different legal entities

2 A bank should consider both the legal form and the commercial substance of its arrangements with the other entity in order to establish the true nature of the relationship and therefore the procedures which are appropriate to enable the bank to comply with its obligations. The key consideration is the risks to which the bank is exposed as a result of the transactions undertaken and/or its arrangements with the other party.

3 Material outsourcing issues only arises where the bank records, and bears the risk of, business which is initiated by another legal entity in the group acting in the bank's name (so that clients/counterparties believe that they are dealing with the bank's own staff).

- a) In contrast, where another legal entity in the group acts as broker/introducer for example, it provides a discrete service in its own name to both the bank and customers/counterparties.

**THE INTERIM PRUDENTIAL SOURCEBOOK FOR INSURERS
INSTRUMENT 2001**

Introduction

1. The *FSA* makes the rules and guidance in this instrument on 21 June 2001.
2. The provisions of the *Act* listed in Chapter 11 of this instrument are specified for the purpose of section 153(2).
3. This instrument will come into force at the beginning of the day on which section 19 of the *Act* (the general prohibition) comes into force.
4. This instrument is to be interpreted in accordance with, and applies subject to, the general provisions contained in the General Provisions Instrument 2001.
5. This instrument may be cited as the Interim Prudential Sourcebook for Insurers Instrument 2001.
6. This instrument, excluding the provisions in this Introduction, may be cited as the Interim Prudential Sourcebook for Insurers.

By Order of the Board

21 June 2001

Interim Prudential sourcebook: Insurers

**INTERIM PRUDENTIAL
SOURCEBOOK**

INSURERS

VOLUME ONE

RULES

INTERIM PRUDENTIAL SOURCEBOOK FOR INSURERS GUIDANCE

THE PURPOSE OF THE PRUDENTIAL RULES FOR INSURERS AND AN OVERALL DESCRIPTION

1. The prudential rules for an *insurer* are to be seen in the context of the Principles for Businesses. These are high level obligations applying to all authorised persons and are set out in the High Level Standards part of the Handbook (PRIN).
2. So far as an *insurer* is concerned, the Principles for Businesses are particularly relevant to its internal systems and controls. Principle 3, for example, requires a firm to take reasonable care to organise and control its affairs responsibly and effectively, with adequate risk management systems. Principle 4 requires a firm to maintain adequate financial resources.
3. In addition to the general obligations placed on an *insurer*, certain staff of all authorised persons are subject to a number of high level obligations, referred to as Statements of Principle. The FSA has issued a Code of Practice to help determine whether an approved person's conduct has complied with a Statement of Principle. The Statements and the Code are set out in the High Level Standards part of the Handbook (APER).
4. One of the features of a *contract of insurance* is the long period of risk the contract may cover. The prudential rules for *insurers* seek to protect the *policy holder* against the risk that an *insurer* will fail to meet a valid *claim* as it falls due or to fulfil the reasonable expectations of *policy holders*.
5. The Interim Prudential Sourcebook for Insurers (*IPRU (INS)*) starts by limiting the risks to which an *insurer* may be subject.

Rule 1.3 in Chapter 1 requires that the business of an *insurer* is restricted to *insurance business*.

6. The essence of the more detailed rules in Volume 1 and 2 is the requirement to maintain an appropriate *margin of solvency*, ie the excess of the value of assets over the amount of liabilities. The rules in Chapter 2 set out the *required margins of solvency* for an *insurer* having regard to the type and location of its business.
7. Chapter 3 concerns *long-term insurance business*.
8. The extent to which an asset may be taken into account for prudential purposes, and then the method of valuing it, is determined in accordance with the rules in Chapter 4. It is a fundamental part of the approach to prudential regulation for *insurers* that the rules limit the assets which are ‘admissible’ for solvency purposes and prescribe the methods of valuation.
9. Similarly, the amount of a liability is determined in accordance with the rules in Chapter 5.
10. *General insurers* must keep reserves in respect of certain *classes* of business in accordance with the rules in Chapter 6 in order to maintain solvency during a period of abnormal *claims*. These reserves are known as ‘equalisation reserves’.
11. Special provisions in Chapter 7 require a liability in any particular currency to be matched by assets in that currency. Further provisions relate to the location of assets.
12. Under the rules in Chapter 8, a *non-EEA insurer* must make a *deposit* in the United Kingdom or other *EEA State* and certain other additional rules apply.

13. As part of the continuing supervision of an *insurer*, the rules in Chapter 9 require the *insurer* to prepare certain accounts and statements in accordance with the rules and deposit them with the *FSA*. In addition, an *insurer* must make certain statistical returns.
 14. Chapter 10 contains rules relating to the ‘Insurance Groups Directive’, ie Council Directive 98/78/EC on the supplementary supervision of insurance undertakings in an insurance group.
 15. Chapter 11 contains the definitions used throughout *IPRU (INS)* and some general provisions including provisions relating to actions for damages.
 16. Chapter 12 contain transitional provisions.
 17. The Appendices in Volume 2 are part of the rules.
 18. FSA guidance and letters from the Government Actuary are in Volume 3 of *IPRU (INS)*.

APPLICATION RULE AND RESTRICTION OF BUSINESS TO INSURANCE

CONTENTS

Application

1.1 Insurers

1.2 The Society of Lloyd's

Restriction of business to insurance

1.3

Chapter 1

APPLICATION RULE AND RESTRICTION OF BUSINESS TO INSURANCE

Application

Insurers

- 1.1 An *insurer* must comply with *IPRU (INS)* unless it is –
- (a) a *friendly society*¹; or
 - (b) subject to rule 3.6 and 3.7 (application of rules to *linked long-term contracts*), an *EEA insurer* qualifying for authorisation under Schedules 3 or 4 to the *Act*.

The Society of Lloyd's²

- 1.2 No provisions of *IPRU (INS)* apply to the *Society of Lloyd's*, or members of the *Society of Lloyd's* except rules 9.37 and 9.38.

¹ A *friendly society* must comply with *IPRU(FSOC)*.

² *LLD* applies to the *Society*.

Restriction of business to insurance

- 1.3 (1) An *insurer* must not carry on any commercial business in the United Kingdom or elsewhere other than *insurance business* and activities directly arising from that business.

In-house pension funds

- (2) If an *insurer* manages assets of a pension fund solely for the benefit of -
- (a) its 'officers' or 'employees'; or
 - (b) its 'officers' or 'employees' and 'officers' or 'employees' of its *subsidiary* or *holding company* or a *subsidiary* of its *holding company*,

that activity is to be treated as directly arising from the *insurer's insurance business*.

- (3) **Officers** or **employees** include their dependants.
-

Chapter 2

MARGINS OF SOLVENCY

CONTENTS

- 2.1 Basic requirement
 - 2.2 Companies supervised in other EEA States and Switzerland
 - 2.3 Adequacy of assets
 - 2.4 Determination of margins of solvency
 - 2.5 Long term classes I, II, and IX
 - 2.6 Long term classes III, VII and VIII
 - 2.7 Long term classes IV and VI
 - 2.8 Long term class V
 - 2.9 Guarantee fund and minimum guarantee fund
 - 2.10 Valuation
-

Chapter 2

MARGINS OF SOLVENCY

Basic Requirement

- 2.1 (1) Every *insurer* –
- (a) whose head office is in the United Kingdom; or
 - (b) whose business in the United Kingdom is restricted to *reinsurance*,
- must maintain a *margin of solvency* in accordance with the rules in this Chapter (the *Margins of Solvency Rules*).
- (2) Subject to rule 2.1(3), every *insurer* whose head office is not in an *EEA State* must maintain –
- (a) a *margin of solvency*; and
 - (b) a *UK margin of solvency*,
- in accordance with the *Margins of Solvency Rules*.
- (3) Rule 2.1(2) does not apply to an insurer if –
- (a) its business in the United Kingdom is restricted to *reinsurance*;
 - (b) it is a *Swiss general insurer*; or
 - (c) rule 8.1(2) applies to it³,
- but a *UK-deposit insurer* must maintain –
- (d) a *margin of solvency*; and
 - (e) an *EEA margin of solvency*,
- in accordance with the *Margins of Solvency Rules*.
- (4) In the case of an *insurer* that carries on both *long-term insurance business* and *general insurance business*, (1), (2) and (3) have effect as if the requirements to maintain -

³ (ie, it is a *UK-deposit insurer* or an *EEA-deposit insurer*)

- (a) a *margin of solvency*;
- (b) a *UK margin of solvency*; and
- (c) an *EEA margin of solvency*,

were requirements to maintain separate margins in respect of the two kinds of business.

- (5) In calculating *UK margin of solvency*, and *EEA margin of solvency*, the amount of the *insurer's* liabilities must be increased by the amount of any reserve maintained under the *Equalisation Reserves Rules*.

Companies supervised in other EEA States and Switzerland

- 2.2 (1) An *insurer* which is -

- (a) an *EEA-deposit insurer*; or
- (b) a *Swiss general insurer*,

must secure that the value of the assets of the business carried on by it in the United Kingdom does not fall below the amount of the liabilities of that business, that value and amount being determined in accordance with the *Valuation of Assets Rules* and the *Determination of Liabilities Rules*.

Long-term and general insurance business

- (2) In the case of an *insurer* that carries on in the United Kingdom both *long-term* and *general insurance business*, (1) has effect separately in relation to the assets and liabilities of the two kinds of business.

Adequacy of assets

- 2.3 (1) A UK *insurer* must secure -

- (a) that its liabilities under *contracts of insurance* entered into by it, other than liabilities in respect of 'linked benefits', are covered by assets of appropriate safety, yield and marketability having regard to the classes of business carried on; and
- (b) without prejudice to the generality of (a), that its investments are appropriately diversified and adequately spread and that excessive

reliance is not placed on investments of any particular category or description.⁴

- (2) A UK *insurer* which has entered into a ‘linked long-term contract’ must secure that, as far as practicable, its liabilities under the contract in respect of ‘linked benefits’ are covered as follows –
- (a) if those benefits are linked to the value of units in an undertaking for collective investments in transferable *securities* or to the value of assets contained in an internal fund, by those units or assets; and
 - (b) if those benefits are linked to a share index or other reference value not mentioned in (a), by units which represent that reference value, or by assets of appropriate safety and marketability which correspond, as nearly as may be, to the assets on which that reference value is based.⁵
- (3) A UK *insurer* which has entered into a ‘linked long term contract’ must also secure that those of its liabilities under the contract in respect of ‘linked benefits’ which are not covered by contracts of *reinsurance* are covered by assets of a description contained in rule 3.7⁶.

- (4) In this rule –

linked benefits, in relation to a *contract of insurance*, means benefits payable to the policy holder which are determined by reference to the value of or the income from property of any description (whether or not specified in the contract) or by reference to fluctuations in, or in an index of, the value of property of any description (whether or not so specified); and

linked long term contract means a *contract of insurance*,

- (a) the effecting of which constitutes the carrying on of *long-term insurance business*; and
 - (b) under which ‘linked benefits’ are payable.
- (5) In (3), ‘linked long term contract’ does not include a contract to manage the investments of pension funds unless it is combined with a *contract of insurance* covering either conservation of capital or payment of a minimum interest.

⁴ For guidance on appropriate diversification, adequate spread and other matters relating to investments, see **Guidance Note P1** (systems and controls over the investments and counterparty exposure of insurers)

⁵ For guidance on the ‘close matching’ test, see paragraph 2 of **Guidance Note 4.4**

⁶ See footnote 5

Determination of margins of solvency

- 2.4 (1) Subject to (2) to (5), the *margin of solvency* to be maintained by an *insurer* must be determined –
- (a) as regards *long-term insurance business*, in accordance with rules 2.5 to 2.8; and
 - (b) as regards *general insurance business*, by taking the greater of the two sums resulting from the application of the two methods of calculation set out in **Appendices 2.1** and **2.2**.
- (2) Where an *insurer* is required to maintain a *UK margin of solvency* or an *EEA margin of solvency* –
- (a) the *UK margin of solvency* must be determined by applying (1), but only to *insurance business* carried on in the United Kingdom; and
 - (b) the *EEA margin of solvency* must be determined by applying (1), but only to *insurance business* carried on in the *EEA States* taken together.
- (3) For a *contract of insurance* (to which rule 11.8(a) applies), the *required margin of solvency* must be determined by taking the aggregate of the results arrived at by applying –
- (a) in the case of so much of the contract as is within any class of *long-term insurance business*, the appropriate method determined by the *Margins of Solvency Rules* for that class; and
 - (b) in the case of so much of the contract as is within *general insurance business class 1* or *2*, the method of calculation set out in **Appendix 2.1** (excluding paragraphs 6, 7 and 8).
- (4) Where an *insurer* carries on *long-term insurance business* and owing to the nature of that business more than one *margin of solvency* is produced in respect of that business by the operation of the *Margins of Solvency Rules*, the margins in question must be aggregated in order to arrive at the *insurer's required margin of solvency*.
- (5) Where an *insurer* carries on both *long-term* and *general insurance business* and is accordingly required to maintain separate *margins of solvency* in respect of the two kinds of business –
- (a) the *Margins of Solvency Rules* apply for determining *the margin of solvency* for each kind of business separately; and
 - (b) assets other than those representing its *long-term insurance fund* or *funds*, if they are not included among the assets covering the liabilities,

and the *margin of solvency* relating to the *insurer's general insurance business*, may be included among the assets taken into account in covering the liabilities and the *margin of solvency for the insurer's long-term insurance business*.

Long term classes I, II, and IX

- 2.5 (1) For *long-term insurance business* of class I, II or IX the *margin of solvency* must be determined by taking the aggregate of the results arrived at by applying the calculation described in (2) (the *first calculation*) and the calculation described in (3), (4), (5) and (6) (the *second calculation*).
- (2) For the *first calculation* –
- (a) a sum equal to 4% of the *mathematical reserves* for *direct insurance business* and *reinsurance* acceptances without any deduction for *reinsurance cessions* must be taken;
 - (b) the amount of the *mathematical reserves* at the end of the *preceding financial year* after the deduction of *reinsurance cessions* must be expressed as a percentage of the amount of those *mathematical reserves* before any such deduction; and
 - (c) the sum mentioned in (a) must be multiplied –
 - (i) where the percentage arrived at under (b) is greater than 85% (or, in the case of a *pure reinsurer*, 50%), by that greater percentage, and
 - (ii) in any other case, by 85% (or, in the case of a *pure reinsurer*, 50%).
- (3) For the *second calculation* –
- (a) subject to (4), (5) and (6), a sum equal to 0.3% of the ‘capital at risk’ for contracts on which the ‘capital at risk’ is not a negative figure must be taken;
 - (b) the amount of the ‘capital at risk’ at the end of the *preceding financial year* for contracts on which the ‘capital at risk’ is not a negative figure, after the deduction of *reinsurance cessions*, must be expressed as a percentage of the amount of that ‘capital at risk’ before any such deduction; and
 - (c) the sum arrived at under (a) must be multiplied –
 - (i) where the percentage arrived at under (b) is greater than 50%, by that greater percentage, and

- (ii) in any other case, by 50%.
- (4) Where, in a case other than that of a *pure reinsurer*, a contract provides for benefits payable only on death within a specified period and is valid for a period of not more than three years from the date when the contract was first made, the percentage to be taken for the purposes of (3)(a) must be 0.1%; and where the period of validity from that date is more than three years but not more than five years, the percentage to be so taken must be 0.15 %.
 - (5) For the purposes of (4), the period of validity of a contract evidencing a *group policy* is the period from the date when the premium rates under the contract were last reviewed for which the premium rates are guaranteed.
 - (6) In the case of *pure reinsurers*, the percentage to be taken for the purposes of paragraph (3)(a) is 0.1%.
 - (7) For the purposes of the *second calculation*, the **capital at risk** is –
 - (a) in any case in which an amount is payable in consequence of death other than a case falling within (b), the amount payable on death; and
 - (b) in any case in which the benefit under the contract in question consists of the making, in consequence of death, of the payment of an annuity, payment of a sum by instalments or any other kind of periodic payments, the present value of that benefit,

less in either case the *mathematical reserves* in respect of the relevant contracts.
 - (8) When the amount of the *mathematical reserves* referred to in (2)(a), or the amount of the ‘capital at risk’ referred to in (3)(a), is calculated for the purposes of determining the *margin of solvency*, the day as on which that amount is calculated must be the same as that as on which the *margin of solvency* is determined; and the *mathematical reserves* referred to in (7) must also be calculated as on that day when the ‘capital at risk’ in question is that referred to in (3)(a), but must be calculated as at the end of the *preceding financial year* when the ‘capital at risk’ in question is that referred to in (3)(b).

Long term classes III, VII and VIII

- 2.6 (1) For *long-term insurance business* of class III, VII or VIII the *margin of solvency* must be determined in accordance with (2) to (5).
- (2) In so far as an *insurer* bears an investment risk, the *first calculation* must be applied.
- (3) In so far as -
 - (a) an *insurer* bears no investment risk;

- (b) the total expired and unexpired term of the relevant contract exceeds five years; and
- (c) the allocation to cover *management expenses* in the relevant contract has a fixed upper limit which is effective as a limit for a period exceeding five years,

the *first calculation* must be applied, but as if rule 2.5(2)(a) contained a reference to 1% instead of 4%.

- (4) If neither (2) nor (3) applies, then, subject to (5), the *required margin of solvency* is zero.
- (5) Where an *insurer* covers a death risk, a sum arrived at by applying the *second calculation* (disregarding rules 2.5(4) and 2.5(5)) must be added to any *margin of solvency*, including a *required margin of solvency* of zero, arrived at under (2), (3) or (4).

Long term classes IV and VI

- 2.7 For *long-term insurance business* of class IV or VI, the *margin of solvency* must be determined by applying the *first calculation*.

Long term class V

- 2.8 For *long-term insurance business* of class V, the *margin of solvency* must be 1% of the assets of the relevant tontine.

Guarantee fund and minimum guarantee fund

- 2.9 (1) An *insurer* must ensure that its *margin of solvency* does not fall below the 'guarantee fund'⁷.
- (2) Subject to (3) and (4), one-third of the *required margin of solvency* constitutes the **guarantee fund**.
- (3) The 'guarantee fund' must not be less than an amount (the **minimum guarantee fund**) arrived at in accordance with **Appendix 2.3**, whether the *required margin of solvency* is greater or less than that amount.
- (4) In the case of *long-term insurance business*, items that are not *implicit items* must be at least large enough to cover either the 'minimum guarantee fund' or 50% of the 'guarantee fund', whichever is the greater.

⁷ SUP requires the submission of a short term plan to the FSA if this rule is breached.

Valuation

- 2.10 (1) Where an *insurer* has assets equal to or in excess of its liabilities, then, in addition to any other applicable rules, (2) to (5) have effect for determining the extent to which the value of the assets exceeds the amount of liabilities in connection with the *margin of solvency*, the *guarantee fund* and the *minimum guarantee fund*.
- (2) Where -
- (a) an *insurer* has issued shares some or all of which are not ‘fully paid’ and the total paid up value of all the *shares* is equal to or greater than one quarter of their nominal value or, in the case of *shares* issued at a premium, of the aggregate of their nominal value and the premium; or
- (b) at least one quarter of the fund of a *mutual* is paid up,
- an amount not greater than half the total value of the amounts unpaid may be taken into account as an asset; and for the purposes of this paragraph a *share* must not be regarded as **fully paid** if there are any amounts due but unpaid on it.
- (3) Notwithstanding rule 5.2(2), where an *insurer* has issued cumulative preference *shares*, liabilities in respect of such *shares* may be left out of account, in aggregate up to 50% of the *required margin of solvency* save that liabilities in respect of *shares* which are redeemable for the purposes of section 159 of the *Companies Act* may be left out of account, in aggregate only up to 25% of the *required margin of solvency*.
- (4) In the case of a *mutual* carrying on *general insurance business*, any claim which the *mutual* has against its members by way of a call for supplementary contributions for a *financial year* must have its full value for that *financial year*, but the value must not exceed the lesser of -
- (a) 50% of the difference between the maximum contributions and the contributions called in, or
- (b) 50% of the *required margin of solvency*.
- (5) The *implicit items* (which relate to future profits, *zillmerising* and hidden reserves) have no value.
-

- 3.3 Allocations to policy holders
- 3.4 Restriction on transactions with connected persons
- 3.5 Arrangements to avoid unfairness between separate insurance funds, etc

Part II - Linked long-term contracts

- 3.6 Application
 - 3.7 Linked long-term contracts
-

Chapter 3

LONG-TERM INSURANCE BUSINESS

Part I

IDENTIFICATION AND APPLICATION OF ASSETS AND LIABILITIES

Separation of assets and liabilities attributable to long-term insurance business

- 3.1 (1) Where an *insurer* carries on *ordinary long-term insurance business* or *industrial assurance business* or both -
- (a) it must maintain a separate account in respect of each kind of business; and
 - (b) the receipts of each kind of business must be entered in the account maintained for that business and must be carried to and form a separate *long-term insurance fund* with an appropriate name.
- (2) An *insurer* which carries on *ordinary long-term insurance business* or *industrial assurance business* must maintain such accounting and other records as are necessary for identifying -
- (a) the assets representing the fund maintained by it under (1)(b) (but without necessarily distinguishing between the funds or funds if more than one); and
 - (b) the liabilities attributable to each kind of business which it carries on.

Application of assets of insurer with long-term insurance business

Limitation on use of assets in long-term insurance fund

- 3.2 (1) Subject to (2) and (4), *long-term insurance business assets* must -
- (a) be applied only for the purposes of its *long-term insurance business*; and
 - (b) not be transferred so as to be available for other purposes of the *insurer* except where the transfer constitutes reimbursement of expenditure borne by other assets (in the same or the *preceding financial year*) in discharging liabilities wholly or partly attributable to *long-term insurance business*.

First exception: the use of excess assets

- (2) Where an *actuarial investigation* shows that the value of the assets mentioned in (1) exceeds the amount of the liabilities attributable to the *long-term insurance business*, the restriction imposed by that rule does not apply to so much of those assets as represents the excess.

Qualification

- (3) (2) does not authorise a transfer or other application of assets by virtue of an *actuarial investigation* at any time after the date when the abstract of the actuary's report of the investigation has been deposited with the *FSA* in accordance with rule 9.6(1).

Second exception: exchanges at fair market value

- (4) Nothing in (1) precludes an *insurer* from exchanging, at fair market value, *long-term insurance business assets* for other assets of the *insurer*.

Further limitation on use of assets in long-term insurance fund

- (5) Money from an insurer's long-term insurance fund must not be used for the purposes of any other business of the insurer notwithstanding any arrangement for its subsequent repayment out of the receipts of that other business.

Restriction in relation to dividends

- (6) A *long-term insurer* must not declare a dividend at any time when the value of the *long-term insurance business assets*, as determined in accordance with the *Valuation of Assets Rules*, is less than the amount of the *long-term insurance business liabilities* determined in accordance with the *Determination of Liabilities Rules*.⁸

Allocations to policy holders

Allocation of established surplus

- 3.3 (1) Where -
- (a) there is an 'established surplus' in which *long-term policy holders* of any category are eligible to participate; and

⁸ Regulations under section 142 of the *Act* may also apply to restrict a *parent undertaking* of an *insurer* from doing anything to lessen the effectiveness of the *Asset Identification Rules*.

- (b) an amount has been allocated to *policy holders* of that category in respect of a previously ‘established surplus’ in which *policy holders* of that category were eligible to participate,

an *insurer* must not by virtue of rule 3.2(2) transfer or otherwise apply assets representing any part of the surplus mentioned in (a) unless the insurer has –

- (i) allocated to *policy holders* of that category in respect of that surplus an amount not less than the ‘relevant minimum’, or
- (ii) complied with the requirements of (3) and made to those policy holders any allocation of which notice is given under (3)(a).
- (2) Subject to (6) and (7), the **relevant minimum** is the amount represented by the formula -

$$\frac{b \times c}{a} - \frac{c}{200}$$

where -

- a* is the last previously ‘established surplus’ in respect of which an amount was allocated to *policy holders* of the category in question;
- b* is the amount so allocated; and
- c* is the surplus referred to in (1)(a).

Requirements where less than the relevant minimum is to be allocated

- (3) The requirements referred to in (1)(ii) are that the *insurer* -
- (a) at least 14 days before publication has given the *FSA* written notice stating that it proposes to make no allocation or an allocation of an amount (specifying it) which is smaller than the ‘relevant minimum’, and a copy of the statement that it proposes to publish in accordance with (b); and
- (b) has published a statement in the London, Edinburgh and Belfast Gazettes and in two national newspapers explaining the allocation it proposes to make to *policy holders* and the reasons for it,

and that a period of not less than 56 days has elapsed since the date, or the last date, on which the *insurer* has published the statement mentioned in (b) as required by that paragraph.

- (4) In this rule, **established surplus** means an excess of assets representing the whole or a particular part of the *long-term insurance fund* or *funds* over the

liabilities, or a particular part of the liabilities, of the *insurer* attributable to that business as shown by an *actuarial investigation*.

Amounts to be treated as allocated to policy holders

- (5) For the purposes of this rule, an amount is allocated to *policy holders* if, and only if -
- (a) bonus payments are made to them; or
 - (b) reversionary bonuses are declared in their favour or a reduction is made in the premiums payable by them,

and the amount of the allocation is, in a case within (a), the amount of the payments and, in a case within (b), the amount of the liabilities assumed by the insurer in consequence of the declaration or reduction.

Bonus payments in anticipation of established surplus

- (6) For the purposes of this rule, the amount of any bonus payments made in anticipation of an ‘established surplus’ is treated as an amount allocated in respect of the next ‘established surplus’ in respect of which an amount is allocated to eligible *policy holders* generally; and for the purposes of (2) the amount of any surplus in respect of which such an allocation is made is treated as increased by the amount of any such payments.

Unappropriated surplus carried forward

- (7) (1) does not authorise the application for purposes other than those mentioned in rule 3.2(1) of assets representing any part of the surplus mentioned in (1)(a) which the *insurer* has decided to carry forward unappropriated; and for the purposes of (2) the amount of any surplus is treated as reduced by any part of it which the *insurer* has decided to carry forward unappropriated.

Eligibility to participate in an established surplus

- (8) For the purposes of (1), *policy holders* are taken to be eligible to participate in an ‘established surplus’ in any case where they would be eligible to participate in a later ‘established surplus’ representing it if it were carried forward unappropriated.

Restriction on transactions with connected persons

- 3.4 (1) A *long-term insurer* must not enter into a transaction to which this rule applies, and must take reasonable steps to ensure that any ‘subordinate company’ does not enter into such a transaction -
- (a) at a time when the aggregate of the value of the assets and the amount of the ‘liabilities’ attributable to such transactions already entered into

by the *insurer* and its ‘subordinate companies’ exceeds 5% of the total amount standing to the credit of the *insurer’s long term insurance funds*; or

- (b) at any other time when the aggregate of the value of those assets and the amount of those ‘liabilities’ would exceed 5% if the transaction were entered into.

Restricted transactions by the insurer

- (2) This rule applies to any transaction entered into by a *long-term insurer* (whether or not itself a ‘subordinate company’ of another *company*), being a transaction under which -
 - (a) a person ‘connected’ with the *insurer* will owe it money;
 - (b) the *insurer* acquires *shares* in a *company* which is a person ‘connected’ with it; or
 - (c) the *insurer* undertakes a ‘liability’ to meet an obligation of a person ‘connected’ with it or to help such a person to meet an obligation,

if the right to receive the money would constitute a ‘long term asset’ of the *insurer*, the acquisition is made out of its *long term insurance funds* or the ‘liability’ would fall to be discharged out of those funds, as the case may be.

Restricted transactions by the subordinate company

- (3) Without prejudice to (2), this rule applies to any transaction entered into by a ‘subordinate company’ of any *long-term insurer*, being a transaction under which -
 - (a) the *insurer* or a person ‘connected’ with it will owe money to the ‘subordinate company’ (not being money owed by the *insurer* which can be properly paid out of its *long term insurance funds*);
 - (b) the ‘subordinate company’ acquires *shares* in the *insurer* or in a company which is a person ‘connected’ with the *insurer*; or
 - (c) the ‘subordinate company’ undertakes a ‘liability’ to meet an obligation of the *insurer* or of a person ‘connected’ with the *insurer* or to help the *insurer* or such a person to meet an obligation,

but where the ‘subordinate company’ is itself a *long-term insurer*, this rule does not by virtue of this paragraph apply to any such transaction if –

- (i) the right to receive the money would constitute a ‘long term asset’ of the ‘subordinate company’,

(ii) the acquisition is made out of its *long-term insurance fund*, or

(iii) the 'liability' would fall to be discharged out of the fund.

(4) In this rule, **subordinate company**, in relation to a *long-term insurer*, means -

(a) a company having *equity share capital* some or all of which is held by the *insurer* as part of its 'long term assets' where the *share capital* so held by the *insurer* -

(i) amounts to more than half in nominal value of that *share capital*, and

(ii) confers on the *insurer* the power to appoint or remove the holders of all or a majority of the directorship of the company whose *share capital* is held and more than one half of the voting power at any general meeting of that company;

(b) a company having *equity share capital* some or all of which is held by another company which is itself a 'subordinate company' of the *insurer* where the *share capital* held by that other company -

(i) amounts to more than half in nominal value of that *share capital*, and

(ii) confers on that other company the power to appoint or remove the holders of all or a majority of the directorship of the company whose *share capital* is held and more than one half of the voting power at any general meeting of that company,

and for the purposes of this paragraph *share capital* held for any person by a nominee (except where that person is concerned only in a fiduciary capacity) must be treated as held by that person, and *share capital* held by a person in a fiduciary capacity or by way of security must be treated as not held by that person.

(5) For the purposes of this rule, a person is **connected** with a *long-term insurer*, if that person is not a 'subordinate company' of the *insurer* but -

(a) controls, or is a partner of a person who controls, the *insurer*;

(b) being a company, is controlled by the *insurer* or by another person who also controls the *insurer*; or

(c) is a *director* of the *insurer* or the wife or husband or a minor 'son' or 'daughter' of such a *director*.

(6) For the purposes of (5), a person **controls** a company if he is -

- (a) a person in accordance with whose directions or instructions the *directors* of the *insurer* or of a company of which it is a *subsidiary* are accustomed to act; or
 - (b) a person who either alone or with any *associate* or *associates* is entitled to exercise, or control the exercise of, 15% or more of the voting power at any general meeting of the *insurer* or of a company of which it is a *subsidiary*.
- (7) For the purposes of this rule, the value of any assets and the amount of any ‘liabilities’ must be determined in accordance with the *Valuation of Assets Rules* and *Determination of Liabilities Rules*.

- (8) In this rule –

liability includes a contingent liability;

long term assets means assets representing the *long-term insurance fund* or *funds*;

son includes step-son, **daughter** includes step-daughter; and

(without prejudice to section 39(6) of the Adoption Act 1976 and section 39(4) of the Adoption (Scotland) Act 1978) in relation to Northern Ireland, **son** includes step-son and adopted son and **daughter** includes step-daughter and adopted daughter.

Arrangements to avoid unfairness between separate insurance funds etc

- 3.5 (1) An *insurer* which carries on *long-term insurance business* in the UK must have adequate arrangements for securing that transactions affecting assets of the *insurer* (other than transactions outside its control) do not operate unfairly between the *long-term insurance fund* or *funds* and the other assets of the *insurer* or, in a case where the *insurer* has more than one ‘identified fund’, between those funds.
- (2) In this rule, **identified fund** means assets representing the *insurer’s* receipts from a particular part of its *long-term insurance business* which can be identified as such by virtue of accounting or other records maintained by the *insurer*.

Adequacy of premiums

- 3.5A (1) Before entering into a *long-term insurance contract*, a *UK insurer* must satisfy itself that the aggregate of –
- (a) the premiums payable under the contract and the income which will be derived from them; and

- (b) any other resources of the *UK insurer* which are available for the purpose, will be sufficient, on reasonable actuarial assumptions, to meet all *commitments* arising under or in connection with the contract.
- (2) A *UK insurer* must not rely on other resources for the purposes of (1) in such a way as to jeopardise its solvency in the long term.

Part II

LINKED LONG-TERM CONTRACTS

Application

- 3.6 (1) Subject to (2), rule 3.7 applies to *linked long-term contracts* for *ordinary long-term insurance business* which are entered into by -
- (a) *insurers* other than *EEA insurers*; and
 - (b) *EEA insurers* in respect of contracts the effecting of which constitutes the carrying on of *ordinary long-term insurance business* in the United Kingdom.
- (2) (1) does not apply to -
- (a) contracts entered into before, or in pursuance of a contract subsisting at, 1 July 1994⁹ to the extent that they provide for benefits to be determined by reference to the value of, or the income from, property of any description or by reference to fluctuations in, or in an index of property of any description, by reference to which benefits were permitted to be determined before that date;
 - (b) contracts entered into by an *insurer* which are *linked long-term contracts* by reason only that the *policy holder* is eligible to participate in any *established surplus*;
 - (c) contracts entered into by an *EEA insurer* which are *linked long-term contracts* by reason only that the *policy holder* is eligible to participate in an excess of assets representing the whole or a particular part of the *long-term insurance fund or funds* over the liabilities, or a particular part of the liabilities, of the *insurer* attributable to that business as determined in accordance with the law of the *EEA State* in which the head office of the *insurer* is situated;

⁹ ie the date that the *1994 Regulations* came into effect.

- (d) subject to rule 3.7(2), contracts to manage the investments of pension funds that are not combined with *contracts of insurance* covering either conservation of capital or payment of a minimum interest; or
 - (e) contracts entered into before 30 June 1995 to the extent that they provide for benefits to be determined by reference to a *collective investment scheme* which was a *listed security* immediately before 1 July 1994.
- (3) Rule 3.7 does not apply in relation to contracts linked to property of the description in paragraph 11(b) of Part I of **Appendix 3.2** entered into before 1 February 1992 except to the extent that the responsibility mentioned in that paragraph extends at least to acts or omissions after that date.
- 3.7 (1) An *insurer* must not contract to provide benefits under any contract to which this rule applies which are determined, either wholly or partly:
- (a) by reference to the value of, or the income from, or fluctuations in the value of, property of any description other than property of any of the descriptions set out in Part I of **Appendix 3.2**; or
 - (b) whether directly or indirectly, by reference to fluctuations in any index of the value of property other than an index set out in Part II of **Appendix 3.2**.
- (2) Benefits payable under contracts referred to in rule 3.6(2)(d) must not be determined, either wholly or partly, by reference to the value of, or the income from, or fluctuations in the value of *derivative contracts* other than *permitted derivative contracts*.
- (3) Benefits payable under any *linked long-term contract* must not be determined by reference to -
- (a) property of any of the descriptions specified in paragraphs 2, 5(b) or 7 of Part I of **Appendix 3.2**, if the value of such property is determined, either wholly or partly, by reference to the value of, or the income from or fluctuations in the value of or fluctuations in the income from, property other than property of the descriptions in Part I of **Appendix 3.2**;
 - (b) property of the description specified in paragraph 2 of Part I of **Appendix 3.2** in excess of 10% of the aggregate *property linked benefits* under the contract;
 - (c) property of the description specified in paragraph 5(b) of Part I of **Appendix 3.2** which in aggregate exceeds 10% of the *property linked benefits*, unless the contract under which the benefits are payable has been marketed in accordance with any legal restrictions which apply to the marketing of the corresponding *collective investment fund*; or

- (d) property of any of the descriptions specified in Part I of **Appendix 3.2** which has the effect of a *derivative contract* other than a *permitted derivative contract*.
-

Chapter 4

VALUATION OF ASSETS

CONTENTS

- 4.1 Application
 - 4.2 Shares in a group undertaking
 - 4.3 Debts due or to become due from a group undertaking
 - 4.4 Assets sold to or purchased from an approved credit institution or an approved investment firm subject to an agreement for resale or repurchase
 - 4.5 Debts and other rights

Chapter 4

VALUATION OF ASSETS¹⁰

Application¹¹

- 4.1 (1) Subject to (2), the *Valuation of Assets Rules* apply to the determination of the value of assets of *insurers*.
- (2) Where an *insurer* has entered into any contracts providing for the payment of *property linked benefits*, the *Valuation of Assets Rules* do not apply with respect to the determination of the value of the *linked assets* to the extent that they are held to match liabilities in respect of such benefits.
- (3) Any asset to which the *Valuation of Assets Rules* applies (other than cash) for the valuation of which no provision is made in the *Valuation of Assets Rules* must be left out of account for the purposes specified in (1).
- (4) Where in all the circumstances of the case any asset is actually of a lesser value than the amount calculated in accordance with the *Valuation of Assets Rules*, such lesser value must be taken to be the value of the asset.¹²
- (5) For the purposes of (4), in determining whether an asset is of a lesser value than the amount calculated in accordance with the *Valuation of Assets Rules*, regard must be had to the underlying security and, in the case of bonds, *debt securities* and other money and capital market instruments, the credit rating of the *issuer*, including whether the *issuer* belongs to Zone A as defined in Council Directive 89/647/EEC of 18 December 1989 on a solvency ratio for credit institutions and, where the *issuer* is an international organisation, whether it includes at least one *EEA State* among its members.
- (6) Notwithstanding (1) (but subject to the conditions set out in (7)), an *insurer* may, for the purposes of an *actuarial investigation*, elect to assign to any of its assets the value given to the asset in question in the books or other records of the *insurer*.
- (7) The conditions referred to in (6) are that -
- (a) the election does not enable the *insurer* to bring into account any asset for the valuation of which no provision is made in the *Valuation of Assets Rules*; and

¹⁰ For guidance on the *Valuation of Assets Rules*, see **Guidance Note 4.1**

¹¹ For the application of the *Valuation of Assets Rules* to the financial reporting requirements in Chapter 9, see rule 9.10

¹² See Section 4 of **Guidance Note 4.1**

- (b) the value assigned to the aggregate of the assets is not higher than the aggregate of the value of those assets as determined in accordance with rules 4.2 to 4.14.
- (8) Where an *insurer* has entered into a contract for the conversion of currency which satisfies the conditions set out in (9), then for any of the purposes for which the *Valuation of Assets Rules* apply, the *insurer* must treat the conversion as having been made on the *relevant date*.
- (9) The conditions referred to in (8) are that -
- (a) the contract provides -
 - (i) for the conversion into another currency of an amount representing the sale of an asset which has, on the *relevant date*, been sold but not delivered, or
 - (ii) for the purchase of currency for the purpose of settling the purchase of an asset which has, on the *relevant date*, been purchased but not delivered;
 - (b) the conversion is to take place during a period which is -
 - (i) where the contract is in connection with the delivery of a *listed security*, a period commencing on the date of the contract and extending for the usual period of settlement as laid down by the rules of the relevant stock exchange or *regulated market*, or
 - (ii) where the contract is in connection with the delivery of any other asset, a period commencing on the date of the contract and extending for 20 working days thereafter; and
 - (c) the contract is *listed* or has been entered into with an *approved counterparty*.

Shares in a group undertaking

- 4.2 (1) The value of any *shares* held in a *group undertaking* must not exceed:
- (a) where the *shares* held are in an *insurance undertaking* or *insurance holding company* the value, determined in accordance with the *Valuation of Assets Rules* (other than rule 4.14(1)(a) to (c)), of its *surplus assets*;
 - (b) where the *shares* held are not in an *insurance undertaking* or *insurance holding company* the greater of:
 - (i) the value, determined in accordance with *the Valuation of Assets Rules* (other than rule 4.14(1)(a) to (c)) of its *surplus assets*, and

- (ii) the value of those *shares* as determined under rule 4.8.
- (2) The surplus assets of a *group undertaking* are its total assets excluding:
 - (a) the assets that are selected to cover liabilities and, in the case of a *group undertaking* which is an *insurance undertaking*, to cover the *notional required minimum margin*;
 - (b) assets that are interests directly or indirectly held in:
 - (i) the *group undertaking's* own capital (as defined in the relevant regulatory requirements for that undertaking), or
 - (ii) the *insurer's* capital;
 - (c) where the *group undertaking* carries on *long-term insurance business*, profit reserves and future profits;
 - (d) assets which represent either a *long-term insurance fund* or a fund the allocation of which as between *policy holders* and other purposes has yet to be determined;
 - (e) amounts due, or to become due, in respect of *share* capital, or other contributions from members of the *group undertaking*, subscribed or called for but not fully paid up; and
 - (f) assets that cannot effectively be made available or realised to meet losses (if any) arising in the *insurer*, including assets that represent capital not owned, directly or indirectly, by the *insurer*.
- (3) The assets selected in (2)(a) to be excluded from the total assets:
 - (a) where the *group undertaking* is an *insurance undertaking*, must be identified and valued in accordance with *relevant regulatory requirements* as to the value, admissibility, nature, location or matching that apply to the assets available to cover its liabilities (determined under the *relevant regulatory requirements*) and the *notional required minimum margin*;
 - (b) where the *group undertaking* is not an *insurance undertaking*, must be of a value at least equal to the amount of its liabilities, determining that value and that amount in accordance with the *Valuation of Assets Rules* (other than 4.14(1)(a) to (c)) and the *Determination of Liabilities Rules*; and
 - (c) in both cases, must not include:
 - (i) assets falling within (2)(b), or

- (ii) assets falling within (2)(e) where the amount is due, or to become due, from a *group undertaking*.
- (4) For the purposes of (3), the *relevant regulatory requirements* must be treated as if:
- (a) where rule 2.10 (or its equivalent in a *designated state or territory*) applies, the *insurance undertaking* satisfies the condition in rule 2.10(1); and
 - (b) rules 4.14(1)(a) to (c) (or their equivalent in a *designated state or territory*) do not apply.

Debts due or to become due from a group undertaking

- 4.3 The value of any *debt* due, or to become due, from a *group undertaking* must not exceed the amount reasonably expected to be recovered in respect of the *debt* taking into account only the value of:
- (a) the assets identified in 4.2(2)(a); and
 - (b) any *security* held in respect of the *debt*.

Assets sold to or purchased from an approved credit institution or an approved investment firm subject to an agreement for resale or repurchase

- 4.4 (1) Where an *insurer* has sold *securities* to or purchased *securities* from an *approved credit institution* or an *approved investment firm* and such sale or purchase was made subject to an agreement that the *approved credit institution* or *approved investment firm* would, either on demand by the *insurer* or within six months of such sale or purchase, subsequently sell to or purchase from the *insurer* equivalent *securities*, then if at the *relevant date* such subsequent sale or purchase has not taken place and the conditions specified in (2) and either (3) or (4) (as appropriate) are satisfied, the *insurer* -
- (a) must value -
 - (i) *securities* sold by it under such agreement as if such *securities* had been retained by it, and
 - (ii) assets provided by it as consideration for the purchase of *securities* under such agreement as if such consideration had not been provided by it; and
 - (b) must not ascribe a value to -

- (i) any consideration received for the sale of *securities* under such agreement (or any assets purchased by it with such consideration) up to the limit of the value of the *securities* sold, or
 - (ii) any *securities* purchased by it under such agreement (or any assets purchased with the proceeds of the sale of any such *securities*) up to the limit of the consideration (valued in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate to *insurers*) provided by it.
- (2) The condition specified in this paragraph is that where at any time after the sale or purchase of *securities* by the *insurer* under an agreement described in (1) -
 - (a) the amount of the consideration received by the *insurer* for the sale of the *securities* fell below the value of the *securities* sold by it; or
 - (b) the value of the *securities* purchased by the *insurer* fell below the value of the consideration provided by it,

by more than 2.5% of the value of the *securities* sold or purchased, as the case may be, the *insurer* demanded additional consideration whose amount was equal to the shortfall and such demand was complied with before the end of the working day next following the day on which such shortfall occurred.

- (3) The conditions specified in this paragraph are that where the *insurer* purchases *securities* from an *approved credit institution* or an *approved investment firm* and the consideration provided by the *insurer* is other than by way of sale of *securities* -
 - (a) the *securities* purchased are -
 - (i) *approved securities*,
 - (ii) *listed securities*, or
 - (iii) *securities* issued by an *approved credit institution*; and
 - (b) the *securities* purchased -
 - (i) do not include *securities* (other than *approved securities*) issued by the same *counterparty* whose aggregate value amounts to more than 15% of the value of the *securities* purchased, or
 - (ii) in the event that the condition in (b)(i) is not satisfied, do not include *securities* whose value when aggregated with the *insurer's* existing exposure to assets of the same description or

to the same *counterparty* would exceed the appropriate *permitted asset exposure limit* or *permitted counterparty exposure limit* determined in accordance with rule 4.14 and **Appendix 4.2**.

- (4) The conditions specified in this paragraph are that where the *insurer* sells *securities* to an *approved credit institution* or an *approved investment firm* -
- (a) the consideration provided by the *approved credit institution* or *approved investment firm* is -
- (i) cash,
 - (ii) *approved securities*,
 - (iii) *listed securities*,
 - (iv) *securities* issued by an *approved credit institution*,
 - (v) a charge over assets set out in (i) to (iv),
 - (vi) a letter of credit established with an *approved credit institution*, or
 - (vii) a guarantee provided by an *approved credit institution*;
- (b) the consideration does not include -
- (i) except to the extent that the condition in (ii) is satisfied, consideration whose amount when aggregated with the *insurer's* existing *exposure* to assets of the appropriate description or to the relevant *counterparty* would exceed the appropriate *permitted asset exposure limit* or *permitted counterparty exposure limit* determined in accordance with rule 4.14 and **Appendix 4.2**, or
 - (ii) consideration, more than 15% of the aggregate amount of which takes the form of *securities* (other than *approved securities*) issued by, letters of credit established with, guarantees provided by, cash deposited with, a charge over cash deposited with or a charge over *securities* issued by, the same *counterparty*; and
- (c) the consideration to be provided by the *insurer* for the subsequent purchase of *equivalent securities* is -
- (i) where the consideration for the original purchase by the *approved credit institution* or *approved investment firm* was

- (wholly or in part) cash, cash denominated in the same currency, and
- (ii) where the consideration was (wholly or in part) *securities*, *securities* equivalent to the *securities* provided by way of consideration.
- (5) For the purposes of this rule, where the *insurer* has received consideration in respect of any other sale of the kind described in (1), in addition to any other exposure to assets or to a *counterparty* -
- (a) if such consideration takes the form of a letter of credit established with, or a guarantee provided by, an *approved credit institution*, then it must be treated as giving rise to *exposure* to that institution by the amount of the consideration;
- (b) if such consideration takes the form of a charge over *securities*, then it must be treated as giving rise to *exposure to securities* of the same description and to the issuer of those *securities* by the amount of the consideration; and
- (c) if such consideration takes the form of cash deposited with another party for the benefit of the *insurer*, or a charge over cash deposited with another party, then it must be treated as giving rise to *exposure* to that party by the amount of the consideration.
- (6) For the purposes of this rule, the amount of any consideration is -
- (a) where the consideration provided is a letter of credit established with an *approved credit institution*, the lower of the amount made available under the letter of credit and the value of the assets sold;
- (b) where the consideration is a guarantee provided by an *approved credit institution*, the lower of the amount of the guarantee and the value of the assets sold; or
- (c) where the consideration takes the form of assets of the types mentioned in (4)(a)(i) to (iv), or a charge over such assets, the value of the assets determined in accordance with the *Valuation of Assets Rules*.
- (7) Where an *insurer* has entered into a number of agreements described in (1), for the purposes of (3) and (4) of this rule -
- (a) any or all agreements under which the subsequent sale or purchase has not taken place at the *relevant date* may be treated as one agreement; and

- (b) in such case, the 15% limits in (3)(b)(i) and (4)(b)(ii) must be calculated by reference to the aggregate of the value of the *securities* purchased under (3) and the amount of any consideration under (4).

Debts and other rights

- 4.5 (1) The value of any *secured debt* due, or to become due, to an *insurer*, other than a *debt* to which rule 4.3 or (2), (3) or (7) of this rule applies, is -
- (a) in the case of any such *debt* which is due, or will become due, within 12 months of the *relevant date* (including any *debt* which would become due within that period if the *insurer* were to exercise any right to which it is entitled to require payment of it), the amount which can reasonably be expected to be recovered in respect of that *debt* (due account being taken of the nature and quality of the *security* and the terms and conditions for payment); and
 - (b) in the case of any other such *debt*, the amount which would reasonably be paid by way of consideration for an immediate assignment of the *debt* (due account being taken of the nature and quality of the *security* and the terms and conditions for payment).
- (2) Any *debt* due, or to become due, to an *insurer* under a letter of credit must be left out of account for the purposes of the *Valuation of Assets Rules*.
- (3) In the case of *long-term insurance business* carried on by an *insurer*, the value of any *debt* due, or to become due, to the *insurer* which is secured on a *policy* of insurance issued by the *insurer* and which (together with any other *debt* secured on that *policy*) does not exceed the amount payable on a surrender of that *policy* at the *relevant date* must be the amount of that *debt*.
- (4) The value of any *unsecured debt* due, or to become due, to an *insurer*, other than a *debt* to which rule 4.3, (5) or (7) of this rule or rule 4.10 or 4.13 applies, is -
- (a) in the case of any such *debt* which is due, or will become due, within 12 months of the *relevant date* (including any *debt* which would become due within that period if the *insurer* were to exercise any right to which it is entitled to require payment of it), the amount which can reasonably be expected to be recovered in respect of that *debt* (due account being taken of the terms and conditions for payment); and
 - (b) in the case of any other such *debt*, the amount which would reasonably be expected to be paid by way of consideration for an immediate assignment of the *debt* (due account being taken of the terms and conditions for payment).

- (5) Subject to (6), the value of any rights of the *insurer* under a contract of *reinsurance* to which it is a party is the amount which can reasonably be expected to be recovered in respect of those rights.
- (6) (5) does not apply to -
- (a) rights under a contract of *reinsurance* in respect of *long-term insurance business* except to the extent that *debts* are due under such contracts; or
 - (b) *debts* to which rule 4.3 applies which are due or to become due.
- (7) Any *debt* due, or to become due, to the *insurer* -
- (a) from an *intermediary* in respect of money advanced on account of commission to which that *intermediary* is not absolutely entitled at the *relevant date*;
 - (b) in respect of unpaid *share* capital of the *insurer*;
 - (c) from a *company* of which it is a *subsidiary undertaking* where such *debt* is *subordinated debt*; or
 - (d) which is a *debt* to which (8) applies,
- must be left out of account for the purposes of the *Valuation of Assets Rules*.
- (8) For the purposes of (7)(d), this paragraph applies to a *debt* which is a *debt* owed in respect of premiums (due account being taken of rebates, refunds and commissions payable) which is recorded in the *insurer's* accounting records as due and payable and has been outstanding for more than three months.
- (9) In the case of *general insurance business* carried on by an *insurer*, the value of any subrogation rights of the *insurer* is the amount which can reasonably be expected to be recovered by virtue of the exercise of those rights.
- (10) In the case of *general insurance business* carried on by an *insurer*, the value of any *salvage right* of the *insurer* is the amount which can reasonably be expected to be recovered by virtue of the exercise of that right.
- (11) The value of any right to recover assets transferred by way of *initial margin* must be determined -
- (a) where the *initial margin* was a payment in cash, as if there were a *debt* owed to the *insurer* for that amount; and
 - (b) where the *initial margin* took the form of a transfer of *securities*, as if there were a *debt* owed to the *insurer* of an amount equal to the value

of such *securities* as determined in accordance with the *Valuation of Assets Rules*.

- (12) The value of any rights arising under a *derivative contract* to which rule 4.12 does not apply, or under a contract or asset having the effect of a *derivative contract* to which rule 4.12 does not apply, is the value of any right to recover assets transferred by way of *initial margin* together with the value of any other unconditional right to receive a specified amount.
- (13) This rule does not apply to any rights (other than *debts* due) in respect of -
- (a) investments in *group undertakings*;
 - (b) *securities* or beneficial interests in a limited partnership;
 - (c) units or other beneficial interests in a *collective investment scheme*;
 - (d) a *derivative contract*, except as provided under (11) or (12); or
 - (e) a contract or asset which has the effect of a *derivative contract* other than as provided under (11) or (12) or under rule 4.13(4) or (5).

Land

- 4.6 (1) The value given to any land of an *insurer* (other than land held by the *insurer* as security for a *debt* or to which (2) or rule 4.11 applies) must not be greater than the amount which (after deduction of the reasonable expenses of sale) would be realised if the land were sold at a price equal to the most recent *proper valuation* of that land which has been provided to the *insurer*, and any such land of which there is no *proper valuation* must be left out of account for the purposes of the *Valuation of Assets Rules*.
- (2) The value of any interest in land which is determinable upon the death of any person or upon the happening of some other future event or at some future time is the amount which would reasonably be paid by way of consideration for an immediate transfer of it.

Equipment

- 4.7 (1) The value of any computer equipment of an *insurer* -
- (a) in the *financial year* of the *insurer* in which it is purchased, must be not greater than three-quarters of the cost to the *insurer*;
 - (b) in the next *financial year*, must be not greater than one-half of that cost;
 - (c) in the second *financial year* thereafter, must be not greater than one-quarter of that cost; and

- (d) in any subsequent *financial year*, must be left out of account for the purposes of the *Valuation of Assets Rules*.
- (2) The value of any office machinery (other than computer equipment), furniture, motor vehicles and other equipment of an *insurer*, must be, in the *financial year* of the *insurer* in which it is purchased, not greater than one-half of the cost to the *insurer* and must be, in any subsequent *financial year*, left out of account of the purposes of the *Valuation of Asset Rules*.

Securities and beneficial interests in limited partnerships

- 4.8 (1) Subject to (2), this rule applies to the valuation of investments comprising *securities* and beneficial interests in limited partnerships and, for the purposes of (6), **investments** includes loans.
- (2) This rule does not apply to the valuation of *securities* which are -
- (a) *derivative contracts*;
 - (b) [deleted];
 - (c) units or other beneficial interests in *collective investment schemes*, except as provided in rule 4.9(2); or
 - (d) contracts or assets having the effect of *derivative contracts*, except as provided in rule 4.13(4).
- (3) Subject to (5) and (6) and rule 4.13, the value of an investment to which this rule applies is -
- (a) where the investment is transferable and (4) does not apply, the *market value*; and
 - (b) where the investment is transferable and (4) applies, the lower of -
 - (i) the *market value*, and
 - (ii) the amount which would reasonably be expected to be received by way of consideration for an assignment or transfer of the investment at a date not later than 12 months after the *relevant date*, it being assumed that negotiations for the assignment or transfer commenced on the *relevant date* and the assignment or transfer was made other than to the *issuer* or to an *associate* or an associated *company* of the *issuer* or of the *insurer*; and
 - (c) where the investment is not transferable -

- (i) the amount payable on redemption on the *relevant date* or the most recent date before the *relevant date* on which the *issuer* of the investment could have been required to redeem the investment, or
 - (ii) where the investment cannot be redeemed, the amount which would reasonably be paid by way of compensation for the surrender of the interest in the investment.
- (4) This paragraph applies where it is not reasonable to assume that, had negotiations for the assignment or transfer of the investment commenced not more than seven working days before the *relevant date*, the investment could have been assigned or transferred on the *relevant date* for an amount not less than 97.50% of the *market value* other than to the *issuer* or an *associate* or associated *company* of the *issuer* or of the *insurer*.
- (5) (4) is taken not to apply if it applies by reason only that -
- (a) the *listing* of the investment has been temporarily suspended following receipt of price sensitive information by the stock exchange on which the investment is *listed* or the *regulated market* on which facilities for dealing have been granted; or
 - (b) the extent of the holding would prevent an orderly disposal of the investment for an amount equal to or greater than 97.50% of the *market value*.
- (6) Where an *insurer* has made more than one *unlisted* 'investment' (other than a number of 'investments' exclusively comprising loans) and the value of such 'investments' when taken together is greater than the aggregate of the values of each 'investment' valued separately, then such higher value may be ascribed to the 'investments' if it is reasonable to assume that none of the 'investments' would be assigned or transferred separately.

Beneficial interests in collective investment schemes

- 4.9 (1) Subject to (3), this rule applies to holdings of units or other beneficial interests in -
- (a) a scheme falling within the *UCITS Directive*.
 - (b) an authorised unit trust scheme or a recognised scheme within the meaning of Part XVII of the *Act* (not falling within (a)); or
 - (c) any other *collective investment scheme* where -
 - (i) the scheme does not employ *derivative contracts* unless they are contracts to which rule 4.12 applies;

- (ii) the scheme does not employ contracts or assets having the effect of *derivative contracts* unless they have the effect of *derivative contracts* to which rule 4.12 applies; and
 - (iii) the property of the scheme does not include assets other than those for the valuation of which provision is made in the *Valuation of Assets Rules*.
- (2) The value of units or other beneficial interests in a *collective investment scheme* to which this rule applies is -
 - (a) where the *issuer* can be required to purchase the units or other beneficial interests from the holder upon the holder giving notice of one month or less, the price at which the *issuer* would have purchased the units or other beneficial interests on the *relevant date* or the most recent date before the *relevant date* on which it could have been required to make such a purchase; and
 - (b) where the *issuer* cannot be required to purchase the units or other beneficial interests as set out in (a), a value determined in accordance with rule 4.8.
- (3) Other than as provided in rule 4.13(4), this rule does not apply to units or other beneficial interests in a *collective investment scheme* which has the effect of a *derivative contract*.

Deferred acquisition costs

- 4.10 In the case of *general insurance business*, the value of *deferred acquisition costs* is the value as determined in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate to *insurers*.

Reversionary interests etc.

- 4.11 The value of any *long-term insurance business asset* of an *insurer* consisting of an interest in land which is a remainder, reversionary interest, right of fee subject to a life interest or other future interest, whether vested or contingent, is the amount which would reasonably be paid by way of consideration for an immediate transfer or assignment of it.

Derivative contracts

- 4.12 (1) The value of rights (other than rights to recover assets transferred by way of *initial margin*) under a *derivative contract* to which this rule applies is -
- (a) in the case of a *listed derivative contract*, the *market value*; and

- (b) in the case of an *unlisted derivative contract*, the amount which would reasonably be paid by way of consideration for closing out that contract,

in either case taking into account the *market value* of any assets which, at the *relevant date*, have been transferred by way of *variation margin*¹³.

- (2) This rule applies to an ‘approved derivative contract’ which is ‘covered’ and -
 - (a) which is held in connection with a contract or asset of the type described in (3) for the purposes of reduction of investment risks or efficient portfolio management; or
 - (b) which has the effect of an ‘approved derivative contract’ held in connection with a contract or asset of the type described in (3) for such purposes¹⁴.
- (3) The contract or asset described in this paragraph is either -
 - (a) an ‘approved derivative contract’ or a contract or asset having the effect of an ‘approved derivative contract’ either of which, when taken together with the ‘approved derivative contract’ the rights under which are being valued in accordance with this rule, would have the effect that the *insurer* either holds an asset for the valuation of which provision is made in the *Valuation of Assets Rules* or holds an ‘approved derivative contract’ in connection with such an asset; or
 - (b) an asset for the valuation of which provision is made in the *Valuation of Assets Rules*, being neither a *derivative contract* nor a contract or asset having the effect of a *derivative contract*.
- (4) For the purposes of this rule, an ‘approved derivative contract’ is **covered** if it does not require a ‘significant’ provision to be made in respect of it pursuant to rule 5.3¹⁵.
- (5) For the purposes of determining in accordance with (4) whether a required provision is ‘significant’, regard must be had to the obligations of the *insurer* under the contract and the volatility of the assets identified by the *insurer* as being suitable to cover such obligations; and the required provision in respect of any one *derivative contract* must be treated as **significant** if -
 - (a) the aggregate provision required in respect of all contracts having a similar effect is significant; or

¹³ See Section 8 of **Guidance Note 4.2**

¹⁴ See Section 4 of **Guidance Note 4.2**

¹⁵ See Sections 6 and 9 of **Guidance Note 4.2**

- (b) the aggregate provision required in respect of all contracts with which it is connected is significant.
- (6) In this rule **approved derivative contract** means a *derivative contract* which -
- (a) is *listed* or has been entered into with an *approved counterparty*¹⁶;
 - (b) the *insurer* reasonably believes may be readily closed out¹⁷; and
 - (c) is either a *contract for differences* to which (7) applies, or a *futures contract* or an *option* to which (8) applies.
- (7) This paragraph applies to -
- (a) a *contract for differences* under which the amount payable by either party is calculated solely by reference to fluctuations in any of the following, namely -
 - (i) the value of an asset for the valuation of which provision is made in the *Valuation of Assets Rules*;
 - (ii) the amount of income from such an asset over a defined period;
 - (iii) an index of such assets, being an index in respect of which a *derivative contract* is *listed*; or
 - (iv) a national index of retail prices published by or under the authority of a government of a state belonging to Zone A as defined in the *Banking Co-ordination Directive*.
- or an arithmetic average thereof; and
- (b) a contract under which the amount payable by either party is calculated by reference to the difference between the *market value* and the *amortised value* of any asset for the valuation of which provision is made in the *Valuation of Assets Rules*¹⁸.
- (8) This paragraph applies to a *futures contract* or an *option* which in either case provides for the acquisition or disposal of assets for the valuation of all of which provision is made in the *Valuation of Assets Rules* at a price which is determined by one or more of the following methods -

¹⁶ See Section 3 of **Guidance Note 4.2**

¹⁷ See footnote 16

¹⁸ See Section 7 of **Guidance Note 4.2**

- (a) for each date on which the contract may be completed or the *option* exercised, the price is a fixed amount under the terms of the contract or *option*;
- (b) it is determined by reference to the *market value* or the *amortised value* of an asset for the valuation of which provision is made in the *Valuation of Assets Rules* or the amount of income over a defined period from such an asset; or
- (c) it is determined by reference to an index of the kind mentioned in (7)(a)(iii) or (iv) or an arithmetic average thereof.

Contracts and assets having the effect of derivative contracts

- 4.13 (1) Subject to (3), for the purposes of the *Valuation of Assets Rules*, a contract has the effect of a *derivative contract* if it is a contract (other than a *derivative contract*) which provides, whether upon the exercise of a right by the *insurer* or otherwise -
- (a) for payment (at any time) of amounts which are determined by fluctuations in -
 - (i) the value of property of any description;
 - (ii) an index of the value of property of any description;
 - (iii) income from property of any description; or
 - (iv) an index of income from property of any description;
 - (b) for delivery of an asset other than an asset for the valuation of which provision is made in rule 4.7 to or by the *insurer*; or
 - (c) for the conversion of an asset held by the *insurer* or another party to -
 - (i) an asset of a different type, or
 - (ii) a different asset of the same type.
- (2) Subject to (3), for the purposes of the *Valuation of Assets Rules* an asset has the effect of a *derivative contract* if the asset is an asset (other than an *approved security* or an asset falling within rule 4.9(1)(a)) and the holding of the asset confers contractual rights or imposes contractual obligations to make or accept payment, delivery or conversion as set out in (1)(a) to (c).
- (3) A contract or asset does not have the effect of a *derivative contract* by reason only that -

- (a) it provides for the unconditional delivery of assets, or for the payment for unconditional delivery of assets, such delivery or payment to be made within a period commencing at the date of the contract and extending -
 - (i) in the case of a *listed security*, for the usual period for delivery or payment as determined by the rules of the stock exchange or *regulated market* on which the *securities* are *listed* or facilities for dealing have been granted, or
 - (ii) in any other case, for no more than 20 working days;
 - (b) it is a contract of the type described in rule 4.1(8) in respect of which the conditions set out in rule 4.1(9) have been satisfied; or
 - (c) it is a transaction to which rule 4.4(1) applies.
- (4) Rights in respect of a contract or asset which has the effect of a *derivative contract* to which rule 4.12 applies must -
- (a) where the asset is a *security*, be valued in accordance with rule 4.8;
 - (b) where the asset comprises units or other beneficial interests in a *collective investment scheme*, be valued in accordance with rule 4.9; and
 - (c) where the asset is a *debt* or other right, be valued in accordance with rule 4.5.
- (5) Rights in respect of a contract or asset having the effect of a *derivative contract* to which rule 4.12 does not apply must be valued in accordance with rule 4.5(12).
- (6) For the purposes of determining whether a contract or asset has the effect of a *derivative contract* to which rule 4.12 applies, it must be treated as having the effect of a *derivative contract* which is *listed* or transacted with an *approved counterparty* if it is itself *listed* or so transacted.

Assets to be taken into account only to a specified extent

- 4.14 (1) Subject to (5) and (6), the aggregate value of the assets of an *insurer* as determined in accordance with the *Valuation of Assets Rules* must, for any of the purposes for which the *Valuation of Assets Rules* apply, be reduced by an amount representing the aggregate of -
- (a) the amount by which the *insurer* is exposed to assets of any description in excess of the *permitted asset exposure limit* for assets of that description;

- (b) the amount by which the *insurer* is exposed to a *counterparty* in excess of the *permitted counterparty exposure limit* for such *counterparty*;
- (c) the amount by which the *insurer* has an excess concentration with a number of *counterparties*;
- (d) the value of any assets transferred to or for the benefit of the *insurer* in pursuance of a condition in a *derivative contract* to which rule 4.12(2) does not apply or a related contract; and
- (e) the value of any assets transferred to or for the benefit of the *insurer* in pursuance of a contract having the effect of a *derivative contract* to which rule 4.12(2) does not apply or a related contract,

as determined in accordance with **Appendix 4.2**.

- (2) Where an *insurer* is exposed to assets of any description in excess of the *permitted asset exposure limit* for such assets, the reduction required to be made by (1)(a) must be made -
 - (a) by deducting (as far as possible) the amount of the excess from the assets of that description held by the *insurer*; and
 - (b) where the *insurer* does not hold sufficient assets of that description to eliminate the excess (or does not hold any assets of that description) by making an appropriate deduction from the aggregate value of the assets which the *insurer* would otherwise be permitted to take into account for any of the purposes for which the *Valuation of Assets Rules* apply.
- (3) Where an *insurer* is required to make a reduction in accordance with (1)(b), (c), (d) or (e), the reduction must be made by making a deduction from the aggregate value of the assets which the *insurer* would otherwise be permitted to take into account for any of the purposes for which the *Valuation of Assets Rules* apply.
- (4) Where an *insurer* carrying on *long-term insurance business* has attributed assets partly to a *long-term insurance business fund* and partly to its other assets, any reduction required to be made by this rule must be made in the same proportion as the attribution.
- (5) Assets of an *insurer* comprising -
 - (a) *approved securities* or any interest accrued on them;
 - (b) *debts* to which rule 4.5(3) applies;
 - (c) rights to which rule 4.5(5), (9) or (10) applies;
 - (d) *debts* in respect of premiums;

- (e) moneys due from, or guaranteed by, the government of any state which belongs to Zone A as defined in *Banking Co-ordination Directive*;
- (f) *shares* in or *debts* due or to become due from a *dependant*;
- (g) holdings in a scheme falling within the *UCITS Directive*; or
- (h) *deferred acquisition costs*,

must not be taken into account in any of the calculations described in (1).

- (6) Where an *insurer* has entered into any contracts providing for the payment of *index linked benefits*, the provisions of (1)(a) will not apply to assets of that *insurer* to the extent that they are held to match liabilities in respect of such benefits.

Chapter 5

DETERMINATION OF LIABILITIES

Application¹⁹

- 5.1 These *Determination of Liabilities Rules* apply with respect to the determination of the amount of liabilities of an *insurer*.

Long-term and general insurance business

- 5.2 (1) Subject to the *Determination of Liabilities Rules*, the amount of liabilities of an *insurer* must be determined in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*.
- (2) In determining under (1) the amount of liabilities of an *insurer*, all contingent and prospective liabilities must be taken into account including all liabilities in respect of cumulative preference *share* capital but excluding other liabilities in respect of *share* capital²⁰.

Provision for adverse changes

- 5.3 (1) An *insurer* which has or may have (following the exercise of any right by the *insurer* or any other party) an obligation to which this rule applies to deliver assets or make a payment must -
- (a) at all times identify the assets held by it which it considers to be the most suitable to cover such obligations; and
- (b) make prudent provision for the effect on ‘the amount of its excess assets’ of adverse variations between the value of the assets identified and the value of the assets which it is or may be obliged to deliver or the amount of the payment which it is or may be obliged to make.²¹
- (2) For the purposes of (1), the *insurer* must take into account all reasonably foreseeable adverse variations and must have particular regard to past volatility in the value of the assets concerned (or assets of a similar nature) and the possibility of adverse changes in such volatility in the future.
- (3) For the purposes of this rule -

¹⁹ For the application of the *Determination of Liabilities Rules* to the financial reporting requirements in Chapter 9, see rule 9.13

²⁰ For guidance on the treatment of certain hybrid capital instruments, see **Guidance Note 2.1**

²¹ For guidance on this rule in respect of derivatives, see paragraph 9.3 of **Guidance Note 4.2**

the amount of its excess assets means the difference between the aggregate value of its assets (other than *linked assets* to the extent that they are held to match *property linked liabilities*), determined in accordance with the *Valuation of Assets Rules*, and the amount of its liabilities (other than *property linked liabilities* or liabilities for which provision is made in accordance with this rule).

- (4) Subject to (5), this rule applies to an obligation -
- (a) under a contract relating to investments of the kinds mentioned in item C under the heading ‘Assets’ in paragraph 9 of Part I of the *insurance accounts rules* (whether such contract constitutes an asset or liability of the *company*);
 - (b) undertaken for the purposes of, or in connection with the making of, investments of the kind mentioned in (a); or
 - (c) under a contract providing for the purchase, sale or exchange of currency.
- (5) This rule does not apply to a contract to the extent that it relates to, or is for the purposes of the making of an investment in, or is in connection with the making of an investment in, land which is to be occupied by the *insurer* and used by the *insurer* for the conduct of its business.

Provision for related undertakings

- 5.3A (1) An *insurer* must make provision in respect of a *related undertaking* that is an *insurance undertaking* or *insurance holding company*:
- (a) where the *related undertaking* is also a *subsidiary undertaking* of the *insurer*, for the whole of any deficit in the assets available to cover liabilities or represent the *notional required minimum margin*; and
 - (b) in any other case, for the *proportionate share* of any such deficit.
- (2) For the purposes of (1), the identification and valuation of assets available to cover liabilities must be determined in accordance with rule 4.2(3), except that any liability which is a *debt* due to the *insurer* need not be valued at more than the value placed on that debt as an asset of the *insurer*.

General insurance business liabilities

- 5.4 The amount of *insurance liabilities* which are *general insurance business liabilities* must be determined in accordance with the provisions of Section D of Chapter II of Part I of the *insurance accounts rules*.

Relevant co-insurance operations: general insurance business

5.5 Where a *relevant insurer* determines the amount of a liability in order to make provision for outstanding claims arising under a *relevant co-insurance operation*, then, if the *leading insurance undertaking* has informed the *relevant insurer* of the amount of the provision made by the *leading insurance undertaking* for such claims, the amount determined by the *relevant insurer* -

- (a) must be at least as great as the amount of the provision made by the *leading insurance undertaking*; or
- (b) in a case where it is not the practice in the United Kingdom to make such provision separately, must be sufficient, when all liabilities are taken into account, to include provision at least as great as that made by the *leading insurance undertaking* for such claims,

due regard being had in either case to the proportion of the risk covered by the *relevant insurer* and by the *leading insurance undertaking* respectively.

Long-term liabilities

5.6 (1) The determination of the amount of *long-term insurance business liabilities* (other than liabilities which have fallen due for payment before the *relevant date*) must -

- (a) be made on actuarial principles having due regard to –
 - (i) the reasonable expectations of *policy holders*, and
 - (ii) any relevant guidance of the Government Actuary²²; and
- (b) make proper provision for all liabilities on prudent assumptions that include appropriate margins for adverse deviation of the relevant factors.

(2) The determination must take account of all prospective liabilities as determined by the policy conditions for each existing contract, taking credit for premiums payable after the relevant date.

(3) Without prejudice to the generality of (1), the amount of the *long-term insurance business liabilities* must be determined in compliance with rules 5.7 to 5.17 and must take into account, inter alia, the following factors -

- (a) all guaranteed benefits, including guaranteed surrender values;

²² See *IPRU (INS)* Volume 3.

- (b) vested, declared or allotted bonuses to which *policy holders* are already either collectively or individually contractually entitled;
- (c) all options available to the *policy holder* under the terms of the contract;
- (cc) discretionary charges and deductions, in so far as they do not exceed the reasonable expectations of *policy holders*;
- (d) expenses, including commissions; and
- (e) any rights under contracts of *reinsurance* in respect of *long-term insurance business*.

Method of calculation

- 5.7 (1) Subject to (2), (3) and (4), the amount of the *long-term insurance business liabilities* must be determined separately for each contract by a prospective calculation.
- (2) A retrospective calculation may be applied to determine the liabilities where a prospective method cannot be applied to a particular type of contract or benefit, or where the *insurer* can demonstrate that the resulting amount of the liabilities would be no lower than would be required by a prudent prospective calculation.
- (3) Appropriate approximations or generalisations may be made where they are likely to provide the same, or a higher, result than individual calculations of the same amount of the liabilities in respect of each contract.
- (4) Where necessary, additional amounts must be set aside on an aggregated basis for general risks which are not individualised.
- (5) The method of calculation of the amount of the liabilities and the assumptions used must not be subject to discontinuities from year to year arising from arbitrary changes and must be such as to recognise the distribution of profits in an appropriate way over the duration of each *policy*.
- (6) The determination of the amount of liabilities for contracts under which the *policy holder* is eligible to participate in any *established surplus* must have regard to the level of the premiums under the contracts, to the assets held in respect of those liabilities, and to the custom and practice of the *insurer* in the manner and timing of the distribution of profits or the granting of discretionary additions, as the case may be.

Avoidance of future valuation strain

- 5.8 The amount of the liability determined in respect of a group of *contracts of insurance* must not be less than such amount as, if the assumptions adopted for

the valuation were to remain unaltered and were fulfilled in practice, would enable liabilities similarly determined at all times in the future to be covered from resources arising solely from the contracts and the assets covering the amount of the liability determined at the current valuation.

Valuation of future premiums

5.9 (1) Where further specified premiums are payable by the *policy holder* under a contract (not being a *linked long-term contract*) under which the *policy holder* is eligible to participate in any *established surplus* and benefits (other than benefits arising from a distribution of profits) are determined from the outset in relation to the total premiums payable under the contract, then, subject to (4) and rule 5.10 -

(a) where the premiums under the contract are at a uniform rate throughout the period for which they are payable, the premiums to be valued must be not greater than such level premiums as, if payable for the same period as the actual premiums under the contract and calculated according to the rates of interest and rates of mortality or disability which are to be employed in calculating the liability under the contract, would have been sufficient at the outset to provide for the benefits under the contract according to the contingencies upon which they are payable, exclusive of any additions for profits, expenses or other charges; and

(b) where the premiums under the contract are not at a uniform rate throughout the period for which they are payable, the premiums to be valued are to be not greater than such premiums as would be determined on the principles set out in (a) modified as appropriate to take account of the variations in the premiums payable by the *policy holder* in each *financial year*,

but a premium to be valued must in no year be greater than the amount of the premium payable by the *policy holder*.

(2) Where the terms of the contract have changed since the contract was first made (the terms of the contract being taken to change for the purposes of this paragraph if the change is indicated in an endorsement on the policy but not if a new policy is issued), then, for the purposes of (1), one of the following assumptions must be made, namely that-

(a) the change from the date it occurred was provided for in the contract when it was made;

(b) the terms of the contract are those which apply from the date of the change except that a single premium is payable, at the date of the change, of an amount equal to the liability under the *policy* immediately before the change, calculated on a basis consistent with

the *Determination of Liabilities Rules* and with the premiums actually payable from the date of the change; or

- (c) the contract is in two parts, the first of which is for the benefits purchased by the actual premiums payable from the date of the change under the *insurer's* scales of premiums at that date, and the second of which is for all other benefits under the *policy* for which no premiums are payable after that date.
- (3) Where under a contract (not being a *linked long-term contract*) the *policy holder* is eligible to participate in any *established surplus*, and -
- (a) each premium paid increases the benefits (other than benefits arising from a distribution of profits) provided under the contract; or
 - (b) the amount of a premium payable in future is not determinable until it comes to be paid,

future premiums and the corresponding liability may be left out of account so long as adequate provision is made against any risk that the increase in the liabilities of the *insurer* resulting from the payment of future premiums might exceed the amount of the premiums.

- (4) An alternative valuation method to that described in (1) to (3) may be used where it can be demonstrated that the alternative method results in reserves no less, in aggregate, than would result from the use of the method described in those paragraphs.

Acquisition expenses

- 5.10 (1) Subject to (3), in order to take account of acquisition expenses, the maximum annual premium to be valued under rule 5.9 may (subject to (2)) be increased by an amount not greater than the equivalent, taken over the whole period of premium payments and calculated according to the rates of interest and rates of mortality or disability employed in valuing the contract, of 3.5% (or the 'defined percentage', if it is lower than 3.5%) of the relevant capital sum under the contract.
- (2) For the purposes of (1), the **defined percentage** is the percentage arrived at by taking (for all contracts of the same type as the contract in question for which an adjustment is made) the average of the percentages of the relevant capital sum under each such contract that represent the acquisition costs incurred which, after allowing for the effects of taxation, might reasonably be expected to be recovered from the premiums payable under the contract.
- (3) The amount of a future premium valued must not exceed the amount of the premium actually payable by the *policy holder*.
- (4) For the purposes of this rule -

- (a) for contracts other than temporary assurances, the relevant capital sum under a contract must be arrived at in accordance with rule 2.12(4); and
- (b) for temporary assurances, the relevant capital sum must be the sum assured on the *relevant date*.

Rates of interest

- 5.11 (1) The rates of interest to be used in calculating the present value of future payments by or to an *insurer* must be no greater than the rates of interest determined from a prudent assessment of the yields on existing assets attributed to the *long-term insurance business* and, to the extent appropriate, the yields which it is expected will be obtained on sums to be invested in the future.
- (2) For the purposes of (1), the assumed yield on an asset attributed to the *long-term insurance business*, before any adjustment to take account of the effect of taxation, must not exceed the yield on that asset calculated in accordance with (3) to (7), reduced by 2.5% of that yield.
- (3) For the purpose of calculating the yield on an asset -
- (a) the asset must be valued in accordance with the *Valuation of Assets Rules*, excluding any provision under which assets may be taken at lower book values for the purposes of any investigation to which rule 9.4 applies; and
 - (b) the future income from any asset required to be taken into account (whether interest, dividends or repayment of capital) must be reduced by a proportion corresponding to such of the excess *exposure* to assets of that description, calculated in accordance with paragraph 12 of Part I of **Appendix 4.2**, as may reasonably be attributed to such assets.
- (4) For *fixed interest securities*, the yield on an asset, subject to (7), is that annual rate of interest which, if used to calculate the present value of future payments of interest before the deduction of tax and the present value of repayments of capital, would result in the sum of those amounts being equal to the value of the asset.
- (5) For variable interest investments (that is to say, investments which are not *fixed interest securities*) that are equity *shares* other than those within (5A) or land, the yield on an asset, subject to (7), is the ratio to the value of the asset of the income before deduction of tax which would be received in the period of 12 months following the *relevant date* on the assumption that the asset will be held throughout that period and that the factors which affect income will remain unchanged. Account must be taken of any changes in those factors

known to have occurred by the *relevant date* and in particular, without prejudice to the generality of the foregoing, of -

- (a) any known changes in the rental income from property or in dividends on equity *shares*;
 - (b) any forecast changes in dividends which have been publicly announced by the *relevant date*;
 - (c) the effect of any alterations in capital structure; and
 - (d) the value (at the most recent date for which it is known at the *relevant date*) of any determinant of the amount of any future interest payment, that value being deemed to remain unaltered for all subsequent dates.
- (5A) For variable interest investments that are equity *shares* in *companies* subject to, or drawing up accounts as if subject to, legislation implementing the *Accounts Directives*, or which draw up a set of accounts in accordance with International Accounting Standards Committee accounting standards or US generally accepted accounting practice, the yield on an asset, subject to (7A), must be the ratio to the value of the asset of-

(a) $A + B$; or

(b) 2 times A,

whichever is lower,

where A = the income which would be received if it were calculated in accordance with (5),

and B = half the excess (if any) of the 'relevant amount' over A, but if B is less than zero, then it is treated as zero.

- (5B) For the purposes of (5A), the **relevant amount** in relation to equity *shares* must be the issuing *company's* profits after taxation from its ordinary activities for the *preceding financial year*, in so far as attributable to those equity *shares*, so however, without prejudice to the generality of the foregoing, that account is taken of the effect of any alterations in capital structure.
- (5C) For the purposes of (5B), the issuing *company's* profits after taxation from its ordinary activities for the *preceding financial year* must be derived from accounts drawn up in accordance with legislation implementing the *Accounts Directives* or, if accounts are not drawn up in accordance with the *Accounts Directives*, from accounts drawn up in accordance with International Accounting Standards Committee accounting standards or US generally accepted accounting practice.

- (5D) Where (5A) applies, and a *company's* accounting period is longer or shorter than a year, the amount of profits or losses for that period must be annualised, and the annualised figure must be used to calculate the yield.
- (6) Subject to (6A), for variable interest investments (that is to say, investments which are not *fixed interest securities*) other than equity *shares* or land, the yield on an asset, subject to (7), is that annual rate of interest which, if used to calculate the present value of future payments of interest, before deduction of tax, and the present value of repayments of capital, where applicable, would result in the sum of these amounts being equal to the value of the asset, on the assumption that -
- (a) the value of any determinant of the amount of the next interest rate payment and capital repayment made during the following 12 months will be the value of that determinant at the most recent date for which it is known at the *relevant date*;
 - (b) the amount of future interest payments and capital repayments will take account, where appropriate, of -
 - (i) the right of either party to have the investment repaid, and
 - (ii) an assumed yield on other comparable investments made in the future not exceeding an amount determined in accordance with (8) to (10); and
 - (c) indices and all other factors which affect future income payments or capital repayments will remain unchanged after the *relevant date*.
- (6A) For investments in *collective investment schemes* given a value as an asset in accordance with rule 4.9, the yield may be determined as the weighted average of the yields (as determined by this rule) on each of the investments held by the *collective investment scheme*.
- (7) In calculating the yield on an asset under this rule -
- (a) if the asset does not consist of equity *shares* or land -
 - (i) a prudent adjustment must be made to exclude that part of the yield estimated to represent compensation for the risk that the income from the asset might not be maintained or that capital repayments might not be received as they fall due, and
 - (ii) in making that adjustment, regard must be had wherever possible to the yields on risk-free investments of a similar term in the same currency; and
 - (b) for assets which are equity *shares* or land, adjustments to yields must be made as appropriate to exclude that part, if any, of the yield from

each 'category of asset' that is needed to compensate for the risk that the aggregate income from that 'category of asset', taking one year with another, might not be maintained: for this purpose, a **category of asset** comprises assets of a similar nature, type and degree of risk.

- (7A) Notwithstanding (7)(b), for equity *shares* within (5A), adjustments to yields must be made as appropriate to exclude that part, if any, of the yield from each 'category of asset' that is needed to compensate for the risk that the aggregate profits earned by a *company* might not be maintained; and for the purposes of this paragraph, **category of asset** has the same meaning as in (7)(b).
- (8) To the extent that it is necessary to make an assumption about the yields which will be obtained on sums to be invested in future, the yield must be determined in accordance with (9) and (10).
- (9) Where the liabilities are denominated in sterling, the yield assumed, before any adjustment to take account of the effect of taxation -
- (a) on any investment to be made more than three years after the *relevant date* must not exceed the lowest of -
 - (i) the 'long-term gilt yield' current on the *relevant date*,
 - (ii) 3% per annum, increased by two thirds of the excess, if any, of the 'long-term gilt yield' current on the *relevant date* over 3% per annum, or
 - (iii) 6.5% per annum,where **the long-term gilt yield** means the annualised equivalent of the 15 year yield for United Kingdom Government fixed-interest securities jointly compiled by the Financial Times, the Institute of Actuaries and the Faculty of Actuaries; and
 - (b) on any investment to be made three years or less after the *relevant date* must not exceed the assumed yield determined under (2) adjusted linearly over the same three years to the yield determined in accordance with (9)(a).
- (10) Where the liabilities are denominated in currencies other than sterling, the yield must be determined on assumptions that are as prudent as those made under (9).
- (11) In no case may a rate of interest determined for the purposes of (1) exceed the adjusted overall yield on assets calculated as the weighted average of the reduced yields on the individual assets arrived at under (2); and when that weighted average is calculated -

- (a) the weight given to each investment must be its value as an asset determined in accordance with the *Valuation of Assets Rules*, excluding any provision under which assets may be taken at lower book values for the purposes of any investigation to which rule 9.4 applies; and
 - (b) except in relation to the rate of interest used in valuing payments of *property linked benefits*, both the yield and the value of any *linked assets* must be omitted from the calculation.
- (12) For the purpose of determining the rates of interest to be used in valuing a particular category of contracts, the assets may, where appropriate, be notionally apportioned between different categories of contracts.

Rates of mortality and disability

- 5.12 The amount of the liability in respect of any category of contract must, where relevant, be determined on the basis of prudent rates of mortality and disability that have regard to the State of the commitment.

Expenses

- 5.13 (1) Provision for expenses, whether implicit or explicit, must be not less than the amount required, on prudent assumptions, to meet the total net cost, after taking account of the effect of taxation, that would be likely to be incurred in fulfilling contracts if the *insurer* were to cease to transact new business 12 months after the *relevant date*.
- (2) The provision mentioned in (1) must have regard to, among other things, the *insurer's* actual expenses in the last 12 months before the *relevant date* and to the effects of inflation on future expenses on prudent assumptions as to the future rates of increase in prices and earnings.

Options

- 5.14 (1) Provision must be made on prudent assumptions to cover any increase in liabilities caused by *policy holders* exercising options under their *contracts of insurance*.
- (2) Where a contract includes an option whereby the *policy holder* could secure a guaranteed cash payment within 12 months following the *relevant date*, the provision for that option must be such as to ensure that the value placed on the contract is not less than the amount required to provide for the payments that would have to be made if the option were exercised.
- (3) Where a contract includes an option whereby the *policy holder* could secure a cash payment but (2) does not apply, the provision for that option must be such as to ensure that, if the assumptions adopted for the valuation of the contract are fulfilled in practice –

- (a) the resulting value (and therefore the provision) is not less than the amount required to provide for the payment which would have to be made if the option were exercised; and
 - (b) the payment when it falls due is covered from resources arising solely from the contract and from the assets covering the amount of the liability determined at the current valuation.
- (4) For the purposes of (3) the amount of a cash payment secured by the exercise of an option is assumed to be –
- (a) in the case of an *accumulating with-profits policy*, the lower of –
 - (i) the amount which would reasonably be expected to be paid if the option were exercised, having regard to the representations of the *insurer*; and
 - (ii) that amount, disregarding all discretionary adjustments; and
 - (b) in the case of any other *policy* to which this rule applies, the amount which would reasonably be expected to be paid if the option were exercised, having regard to the representations of the *insurer*, without taking into account any expectations regarding future distributions of profits or the granting of discretionary additions in respect of an *established surplus* or in anticipation of such additions.

Contracts not to be treated as assets

5.15 No *long-term insurance contract* may be treated as an asset.

No credit for profits from voluntary discontinuance

5.16 No allowance may be made in the valuation for the voluntary discontinuance of any contract if the amount of the liability so determined would, as a result, be reduced.

Nature and term of assets

5.17 The determination of the amount of *long-term insurance business liabilities* must take into account the nature and term of the assets representing those liabilities and the value placed upon them and must include prudent provision against the effects of possible future changes in the value of the assets on -

- (a) the ability of the *insurer* to meet its obligations arising under the for *long-term insurance business contract* as they arise; and
- (b) the adequacy of the assets to meet the liabilities as determined in accordance with rules 5.7 to 5.16.

Chapter 6

GENERAL INSURANCE BUSINESS: EQUALISATION RESERVES

PART I

PRELIMINARY

- 6.1 For the purposes of these *Equalisation Reserves Rules*, business is *accounted for* on an accident year basis in respect of a *financial year* if, in the accounts and statements required to be deposited with the *FSA* pursuant to rule 9.6, it is *accounted for* using **Forms 21, 22 and 23** under the *Accounts and Statements Rules*, and business is *accounted for* on an underwriting year basis if it is *accounted for* using **Forms 24 and 25** specified in those rules.
- 6.2 In the *Equalisation Reserves Rules*, references to a **numbered class** of *general insurance business* are references to the *class*.
- 6.3 For the purposes of the *Equalisation Reserves Rules*, the rate of conversion from the Euro to the pound sterling is the rate applicable on the last day of the preceding October for which the rate was published in the Official Journal of the Communities.

PART II

BUSINESS OTHER THAN CREDIT INSURANCE BUSINESS

Part II application

- 6.4 (1) Subject to (2), this part of the *Equalisation Reserves Rules* applies to the business listed in (3) when it is carried on by an *insurer* -
- (a) whose head office is in the United Kingdom;
 - (b) whose *insurance business* in the United Kingdom is restricted to *reinsurance*; or
 - (c) whose head office is not in an *EEA State*.
- (2) This part of the *Equalisation Reserves Rules* does not apply to any *insurer* which is an *assessable mutual*.
- (3) This part of the *Equalisation Reserves Rules* applies to *general insurance business* falling within any of the following -

- (a) *accounting class 6* and corresponding *proportional reinsurance treaty business categories*;
 - (b) *direct, facultative and proportional reinsurance treaty consequential loss risks*;
 - (c) *accounting classes 3 and 4* and corresponding *reinsurance treaty business categories*;
 - (d) *nuclear risks*; and
 - (e) *non-proportional reinsurance treaty business categories* corresponding to business in *accounting class 6* and *non-proportional reinsurance treaty consequential loss risks*.
- (4) For the purposes of (3), any business falling within (d) is treated as if it did not fall within (a), (b), (c) or (e).

Part II equalisation reserve

- 6.5 (1) Subject to (2), a *Part II insurer* must maintain an *equalisation reserve* in respect of *Part II business* in accordance with rules 6.6 to 6.10.
- (2) Rules 6.6 to 6.10 do not apply to -
- (a) *Part II business* where *net premiums written* in a *financial year* of an *insurer* in respect of all that business are -
 - (i) less than 1,500,000 Euro, or
 - (ii) less than 4% of *net premiums written* in that *financial year* in respect of all its *general insurance business* and less than 2,500,000 Euro,
 and the *insurer* has no *equalisation reserve* to be brought forward from the previous *financial year*; and
 - (b) *Part II business* carried on outside the United Kingdom by an *insurer* whose head office is not in the United Kingdom.

Business groups

- 6.6 (1) For the purposes of applying this part of the *Equalisation Reserves Rules*, a *Part II insurer* must classify its *Part II business* into separate *business groups* comprising -
- (a) *business group A* - business falling within rule 6.4(3)(a);
 - (b) *business group B* - business falling within rule 6.4(3)(b);

- (c) *business group C* - business falling within rule 6.4(3)(c);
 - (d) *business group D* - business falling within rule 6.4(3)(d); and
 - (e) *business group E* - business falling within rule 6.4(3)(e).
- (2) The *insurer* must further divide its *insurance business* falling within each *business group* into business *accounted for* on an accident year basis and business *accounted for* on an underwriting year basis.

Transfers to and from the equalisation reserve

- 6.7 (1) At the end of each *financial year*, a *Part II insurer* must make transfers to the *equalisation reserve* and transfers from the *equalisation reserve* in accordance with (2) to (6).
- (2) The *insurer* must calculate –
- (a) the aggregate value of transfers to be made to the *equalisation reserve* in accordance with Part I of **Appendix 6.1**; and
 - (b) the aggregate value of transfers to be made from the *equalisation reserve* in accordance with Part II of **Appendix 6.1**.
- (3) Subject to (5), if the aggregate value of transfers to be made to the *equalisation reserve* exceeds the aggregate value of transfers to be made from the *equalisation reserve*, the *insurer* must transfer an amount equal to the excess to the *equalisation reserve*.
- (4) Subject to (5), if the aggregate value of transfers to be made from the *equalisation reserve* exceeds the aggregate value of transfers to be made to the *equalisation reserve*, the *insurer* must transfer from the *equalisation reserve* an amount equal to such excess, or the amount of the *equalisation reserve* brought forward from the *previous financial year* (in this rule referred to as the **previous year's equalisation reserve**), whichever is the lower.
- (5) If the value of the ‘previous year’s equalisation reserve’ together with the aggregate value of transfers to be made to the *equalisation reserve*, less the aggregate value of transfers to be made from the *equalisation reserve*, exceeds the *maximum reserve* calculated in accordance with Part III of **Appendix 6.1**, the *insurer* must transfer such an amount as is necessary to make the *equalisation reserve* equal to the *maximum reserve*.

Transfers of business by insurer

- 6.8 (1) If a *Part II insurer* transfers to another body all its rights and obligations under any *general policies* (whether by novation or pursuant to a transfer approved under Part VII of the *Act*), **Appendix 6.1** applies to that *insurer* at the end of

the *financial year* in which such transfer takes place with the following modifications.

- (2) For the purposes of calculating amounts to be transferred to the *equalisation reserve* (pursuant to Part I of **Appendix 6.1**) and the *business group maximum* applicable to the *insurer's* business (pursuant to Part III of that Appendix), *net premiums written* in respect of policies which were the subject of the transfer must be excluded.
- (3) If all the *insurer's* rights and obligations under all *general policies* falling within a *business group* have been transferred, the *business group maximum* for that *business group* is zero.

Transfers of business to insurer

- 6.9
- (1) If a *Part II insurer* acquires from another body (the **transferor**) all the transferor's rights and obligations under any *general policies* (whether by novation or pursuant to a transfer approved under Part VII of the *Act*), **Appendix 6.1** applies to that *insurer* at the end of the *financial year* in which such acquisition takes place with the following modifications.
 - (2) Where consideration payable in respect of the acquisition is *accounted for* by the *insurer* as an adjustment to premiums -
 - (a) for the purposes of calculating amounts to be transferred to the *equalisation reserve* (pursuant to Part I of **Appendix 6.1**) and the *business group maximum* applicable to the *insurer's* business (pursuant to Part III of that Appendix), *net premiums earned* or *net premiums written*, as the case may be, must be adjusted by any amounts in respect of such consideration; and
 - (b) for the purposes of calculating amounts to be transferred from the *equalisation reserve* (pursuant to Part II of **Appendix 6.1**), *net premiums earned* or *net premiums written*, as the case may be, must include any amounts in respect of such consideration.
 - (3) Where consideration payable in respect of the acquisition is *accounted for* by the *insurer* as an adjustment to *claims* -
 - (a) for the purposes of calculating amounts to be transferred from the *equalisation reserve* (pursuant to Part II of **Appendix 6.1**), *net premiums earned* or *net premiums written*, as the case may be, is such amount as would have been calculated had such consideration been *accounted for* by the *insurer* as an adjustment to premiums; and
 - (b) for the purposes of calculating amounts to be transferred from the *equalisation reserve* (pursuant to Part II of **Appendix 6.1**), *net claims incurred* or *net claims paid*, as the case may be, must be calculated as if such adjustment had not been made.

- (4) For the purposes of (2) and (3), consideration payable in respect of the acquisition must be apportioned between *business groups* (and within each *business group* between business *accounted for* on an accident year basis and business *accounted for* on an underwriting year basis) according to the *business groups* within which the *general policies* which are the subject of the acquisition fall.
- (5) For the avoidance of doubt, an adjustment to premiums or *claims* for the purposes of (2) and (3) may, in either case, be by way of addition or deduction, as appropriate.
- (6) In any *financial year* following that of the acquisition, **Appendix 6.1** applies with the following modifications.
- (7) Where any consideration payable in respect of the acquisition was *accounted for* by the *insurer* as an adjustment to premiums, for the purposes of calculating amounts to be transferred from the *equalisation reserve* pursuant to Part II of **Appendix 6.1**, *net premiums earned* must include an appropriate amount in respect of the consideration for the transfer.
- (8) Where consideration payable in respect of the acquisition was *accounted for* by the *insurer* as an adjustment to *claims*, for the purposes of calculating amounts to be transferred from the *equalisation reserve* pursuant to Part II of **Appendix 6.1**, *net premiums earned* must be taken to be such amount as would have been calculated had the consideration been *accounted for* by the *insurer* as an adjustment to premiums.

Transfers from equalisation reserve where net premiums written fall below specified limits

- 6.10 (1) This rule applies to a *Part II insurer* where -
- (a) the *insurer* has carried on *Part II business* for no less than five *financial years* and *net premiums written* in respect of all that business in two or more of the four *financial years* preceding the *financial year in question* are less than the amounts specified in rule 6.5(2)(a)(i) or (ii), as the case may be; or
 - (b) the *insurer* has carried on *Part II business* for less than five *financial years* and the ‘average net premiums written’ in respect of all that business in those years is less than the amounts specified in rule 6.5(2)(a)(i) or (ii), as the case may be;

and the *insurer* has an *equalisation reserve* to be brought forward from the *preceding financial year*, and *net premiums written* in the *last financial year in question* in respect of *Part II business* are less than the amounts specified in rule 6.5(2)(a)(i) or (ii), as the case may be.

- (2) In this rule, **average net premiums written** means the average amount of *net premiums written* in respect of that business in a *financial year* and any *previous financial years* ending on or after 23 December 1996.
- (3) For the purposes of (2), if any of the *financial years* which the *insurer* is required to take into account for the calculation of ‘average net premiums written’ has been validly extended or shortened, the value of *net premiums written* in that *financial year* is the amount represented by the formula -

$$\frac{\text{NPW} \times 365}{d}$$

where –

NPW means *net premiums written* in the *financial year* concerned; and

d means the number of days falling in that *financial year*.

- (4) The *insurer* to which (1) applies must, as at the end of the *financial year in question*, make a transfer from the *equalisation reserve* of such an amount as is necessary to reduce the *equalisation reserve* to zero.

PART III

CREDIT INSURANCE BUSINESS

Part III application

- 6.11 (1) This part of the *Equalisation Reserves Rules* applies to -
- (a) every *UK insurer* which carries on *credit insurance business*; and
 - (b) every *non-EEA insurer* which carries on *credit insurance business* in the United Kingdom.
- (2) This part of the *Equalisation Reserves Rules* does not apply -
- (a) in the case of a *UK insurer*, where the *net premiums written* in any *financial year* in respect of its *credit insurance business* are less than 4% of the total *net premiums written* by it in that *financial year* and less than 2,500,000 Euro; or
 - (b) in the case of a *non-EEA insurer*, where the *net premiums written* in any *financial year* in respect of its *credit insurance business* carried on through a branch in the United Kingdom are less than 4% of the total *net premiums written* by it in that *financial year* in respect of business carried on through that branch and less than 2,500,000 Euro.

Part III equalisation reserve

- 6.12 *A Part III insurer must maintain an equalisation reserve in respect of credit insurance business carried on by the insurer in accordance with **Appendix 6.2**.*

 - 7.5 Localisation
 - 7.6 Exclusions from rules 7.1 to 7.5
 - 7.7 Location of assets representing margin of solvency of non-EEA insurer
-

Chapter 7

CURRENCY MATCHING AND LOCALISATION

Matching: general requirement

- 7.1 (1) Where an *insurer's* 'liabilities' in any particular currency exceed 5% of its total 'liabilities', the *insurer* must hold sufficient 'assets in that currency' to cover at least 80% of its 'liabilities' in that currency.
- (2) Where an *insurer* carries on both *long-term* and *general insurance business*, the requirements of (1) apply to the 'assets' and 'liabilities' of each kind of business separately.
- (3) Where a *contract of insurance* expresses any 'liability' in terms of a particular currency, that 'liability' must be regarded as a 'liability' in that currency.
- (4) For the purposes of this chapter -

assets means assets of the kind referred to in rule 4.1(2) (linked assets), and assets valued in accordance with the *Valuation of Assets Rules*;

liabilities means provision by an *insurer* to cover liabilities arising under or in connection with *contracts of insurance* (not being liabilities relating to *insurance business* excluded by rule 7.6); and

references to **assets in a currency** (or similar expressions) are construed as references to 'assets' expressed in or capable of being realised (without exchange risk) in that currency; and an 'asset' is capable of being realised (without exchange risk) in a currency if it is reasonably capable of being realised in that currency without risk that changes in exchange rates would reduce the cover of 'liabilities' in that currency.

Matching: property linked benefits

- 7.2 (1) In so far as the 'liabilities' for *property linked benefits* and *index linked benefits* are covered by the assets which determine the benefits payable under a *linked long term contract*, rule 7.1 does not apply.
- (2) In so far as the 'liabilities' for *property linked benefits* are determined by reference to 'assets in a currency' other than that in which the *insurer's* obligations to the *policy holder* are expressed, those 'liabilities' are for the purposes of rule 7.1 to be treated as 'liabilities' in the first-mentioned currency.

Matching: currency of general business liabilities

- 7.3 (1) The currency of an *insurer's general insurance business liabilities* must, for the purposes of rule 7.1, be determined as follows.
- (2) Where the 'liabilities' are not expressed as 'liabilities' in terms of a particular currency, they must be treated as 'liabilities' in the currency of the country in which the risk is situated or, if the *insurer* on reasonable grounds so decides, in the currency in which the premium payable under the contract is expressed.
- (3) However, the *insurer* may treat its 'liabilities' as 'liabilities' in the currency which it will use in accordance with past experience or, in the absence of such experience, in the currency of the country in which it is established -
- (a) for contracts covering risks falling within *general insurance business classes* 4, 5, 6, 7, 11, 12 and 13 (producer's liability only); and
- (b) for contracts covering risks falling within any other *general insurance business class* where, in accordance with the nature of the risks, the *insurer's* 'liabilities' are 'liabilities' to be provided in a currency other than that which would result from the application of (2).
- (4) Where a *claim* has been notified to an *insurer* and the *insurer's* 'liability' in respect of that *claim* is payable in a currency other than one which would result from the application of the above provisions, the *insurer* must regard its 'liability' as a 'liability' in the currency in which the *insurer* is actually obliged to pay it.
- (5) Where a *claim* is assessed in a currency which is known to the *insurer* in advance but which is different from a currency which would result from the application of the above provisions, the *insurer* may regard its 'liability' as a 'liability' in that currency.

Matching: exception for certain liabilities

- 7.4 An *insurer* need not cover its 'liabilities' by 'assets in a particular currency' if application of the *Currency Matching and Localisation Rules* would result in the *insurer* being obliged to hold 'assets in a currency' amounting to 7% or less of the remainder of its 'assets in other currencies'.

Localisation

- 7.5 (1) Subject to (2), 'assets' held pursuant to rule 7.1 must be held -
- (a) if they cover 'liabilities' in sterling, in any *EEA State*;
- (b) if they cover 'liabilities' in any other currency, in any *EEA State* or in the country of that currency.

- (2) In the case of a *relevant co-insurance operation* and a *relevant insurer*, ‘assets’ held pursuant to rule 7.1 must be held in any *EEA State*.
- (3) For the purpose of applying (1) and (2) to tangible ‘assets’ and ‘assets’ consisting of a claim against a debtor or a *listed* or *unlisted* investment -
 - (a) a tangible ‘asset’ is to be treated as held in the place where it is situated;
 - (b) an ‘asset’ consisting of a claim against a debtor is to be treated as held in any place where it can be enforced by legal action;
 - (c) an ‘asset’ consisting of a *listed* investment is to be treated as held in any place where -
 - (i) there is a stock exchange (of the kind described in paragraph (a) of the definition of *listed*) where it is listed, or
 - (ii) there is a *regulated market* where it is dealt in; and
 - (d) an ‘asset’ consisting of an *unlisted* investment issued by a company is to be treated as held in the place where the head office of that company is situated.

Exclusions from rules 7.1 to 7.5

- 7.6 (1) Nothing in rules 7.1 to 7.5 applies to -
- (a) *insurance business* carried on by a *UK insurer* outside the *EEA States*;
 - (b) *insurance business* carried on by any other *insurer* outside the United Kingdom; or
 - (c) *reinsurance* business (unless it is facultative *reinsurance* written by an *insurer* who also carries on *insurance business* that is not *reinsurance*).
- (2) Nothing in rule 7.5 applies to the *classes* of *general insurance business* in the groups numbered 3 and 4 in Part II of Annex 11.2.

Location of assets representing margin of solvency of non-EEA insurer

- 7.7 Without prejudice to rule 7.5 -
- (a) the ‘assets’ covering a *UK margin of solvency* maintained under rule 2.1(2)(b) by a *non-EEA insurer* which is not a *Swiss general insurer* must be held -

- (i) up to an amount at least equal to the appropriate *guarantee fund* or *minimum guarantee fund* (whichever is the greater), within the United Kingdom, and
 - (ii) as to the remainder, within the *EEA States*; and
 - (b) the ‘assets’ covering an *EEA margin of solvency* maintained under rule 2.1(3)(e) by a *non-EEA insurer* which is not a *Swiss general insurer* must be held -
 - (i) up to an amount at least equal to the appropriate *guarantee fund* or *minimum guarantee fund* (whichever is the greater) within the *EEA States* where the *insurer* carries on *insurance business* (or in any one or more of them), and
 - (ii) as to the remainder, within the *EEA States*.

NON-UK INSURERS

Part I

DEPOSITS

Making and amount of deposit

- 8.1 (1) Subject to (2), a *non-EEA insurer* which has permission under the *Act* to carry on *direct insurance business*, other than a *Swiss general insurer*, must make and maintain a deposit in the United Kingdom with an *approved credit institution* which is no less than *the minimum*.
- (2) Where –
- (a) the *insurer* carries on *insurance business* in the United Kingdom and one or more other *EEA States*; and
 - (b) the *FSA* and the appropriate supervisory authority or authorities in the *EEA States* have agreed that this rule should apply,

the *insurer* must make and maintain the deposit with such person as may be agreed between the *FSA* and the other authority or authorities.

Part II

LOCATION OF ACCOUNTS AND RECORDS

- 8.2 A *non-EEA insurer* which is not a *Swiss general insurer* must keep in the United Kingdom proper accounts and records in respect of *insurance business* carried on in the United Kingdom.

Part III

RULES APPLICABLE TO BRANCHES

- 8.3 An *insurer* which has its head office outside the United Kingdom (other than a *pure reinsurer* which has a Treaty right under Schedule 4 to the *Act*, or a *Swiss general insurer*) must appoint and maintain the appointment of a chief executive (who alone or jointly with one or more others, is responsible for the conduct of its business through an establishment in the United Kingdom) and an authorised UK representative (who is resident in the United Kingdom and is authorised to act generally, and to accept service of any document, on behalf of the *insurer* in the United Kingdom).

8.4 A *Swiss general insurer* must appoint and maintain the appointment of an authorised UK representative as described above.

8.5 An *insurer* which has its head office outside the United Kingdom (other than a *pure reinsurer* which has a Treaty right under Schedule 4 to the *Act*) must be entitled to undertake *insurance business* under its national law.

Chapter 9

FINANCIAL REPORTING

Part I

ACCOUNTS AND STATEMENTS

Application

- 9.1 These *Accounts and Statements Rules* apply to every *insurer* other than -
- (a) an *EEA deposit insurer*, in relation to *insurance business* carried on by it outside the United Kingdom; or
 - (b) a *Swiss general insurer*, in relation to *general insurance business* carried on by it outside the United Kingdom.

Interpretation

- 9.2 (1) In rules 9.25 to 9.27, 9.29, 9.30 and 9.32, and in the Appendices relevant to the *Accounts and Statements Rules*, unless the context otherwise requires, words and expressions not defined in *IPRU (INS)* which are used in the *insurance accounts rules* have the same meanings as in those rules.
- (2) In the *Accounts and Statements Rules* –
- (a) any reference to *long-term insurance business* or *general insurance business* is, in relation to an *EEA-deposit insurer*, to *long-term insurance business* or *general insurance business* carried on by it through a branch in the United Kingdom; and
 - (b) any reference to *general insurance business* is, in relation to a *Swiss general insurer*, to *general insurance business* carried on by it through a branch in the United Kingdom,
- and accordingly any reference to, or requirement imposed in respect of, the accounts and balance sheet (including any notes, statements, reports and certificates annexed to them) is to, or imposes a requirement in respect of, *insurance business* carried on through that branch.
- (3) In the *Accounts and Statements Rules*, any reference to *long-term insurance business* or to *general insurance business* is -
- (a) in relation to an *external insurer* (other than a *pure reinsurer*), to its entire *long-term insurance business* or to its entire *general insurance business* and to any *long-term insurance business* or *general insurance business* carried on by it through a branch in the United Kingdom; and

- (b) in relation to a *UK deposit insurer*, to its entire *long-term insurance business* or to its entire *general insurance business* and to any *long-term insurance business* or *general insurance business* carried on by it through a branch in any *EEA State*,

and accordingly any reference to, or requirement imposed in respect of, the accounts and balance sheet (including any notes, statements, reports and certificates annexed to them) relevant to *long-term insurance business* or to *general insurance business* is to, or imposes a requirement in respect of -

- (i) accounts prepared in respect of its entire *long-term insurance business* or entire *general insurance business*; and
- (ii) accounts prepared in respect of the *long-term insurance business* or the *general insurance business* carried on, in the case of an *external insurer*, by the branch in the United Kingdom and, in the case of a *UK deposit insurer*, by the branches in question in the *EEA States* taken together.

(4) In the *Accounts and Statements Rules* –

- (a) any reference to a numbered Form is a reference to the Form so numbered in **Appendices 9.1 to 9.4**; and
- (b) references to a numbered *class* of *insurance business* are references to the *class* so numbered in either **Annex 11.1** or **11.2**.

(5) To the extent there is a contradiction between *SUP 16.3* and the *Accounts and Statements Rules*, the *Accounts and Statements Rules* apply.

Annual accounts and balance sheets

9.3 (1) Subject to (2) and (3), an *insurer* must, with respect to each of its *financial years*, prepare –

- (a) a revenue account for the year;
- (b) a balance sheet as at the end of the year; and
- (c) a *profit and loss account* for the year.

(2) An *insurer* not trading for profit must, with respect to each of its *financial years*, prepare an income and expenditure account for the year.

(3) If a form is required for -

- an account

- a balance sheet
- a note
- a statement
- a report, or
- a certificate attached to any of the above,

the account etc. must be in that form.

- (4) An *insurer's financial year* must be a 12 month period.

Periodic actuarial investigation of long-term insurer

- 9.4 (1) Every *long-term insurer* -

(a) must, once in every period of 12 months, cause an investigation to be made into its financial condition in respect of its *long-term insurance business*, by the person who for the time being is its *appointed actuary* under the rules in *SUP*; and

(b) when such an investigation has been made, or when at any other time an investigation into the financial condition of the *insurer* in respect of its *long-term insurance business* has been made with a view to the distribution of profits, or the results of which are made public, must cause an abstract of the *appointed actuary's* report of the investigation to be made.

- (2) An investigation to which (1)(b) relates must include -

(a) a determination of the liabilities of the *insurer* attributable to its *long-term insurance business*; and

(b) a valuation of any excess over those liabilities of the assets representing the *long-term insurance fund* or *funds* and, where any rights of any long-term *policy holders* to participate in profits relate to particular parts of such a fund, a valuation of any excess of assets over liabilities in respect of each of those parts.

- (3) For the purposes of any investigation to which this rule applies, the value of any assets and the amount of any liabilities must be determined in accordance with the *Valuation of Assets Rules* and the *Determination of Liabilities Rules*.

- (4) The form and contents of any abstract under this rule must be in accordance with the *Accounts and Statements Rules*.

Audit of accounts

- 9.5 (1) The 'accounts and balance sheets' of every *insurer* must be audited in accordance with rule 9.35 by a person qualified in accordance with the rules in *SUP*.

- (2) In (1), the reference to **accounts and balance sheets** includes a reference to any notes or statement or report annexed to them.

Deposit of accounts etc. with the FSA

- 9.6 (1) Every ‘account’, ‘balance sheet’, abstract or statement required by rules 9.3, 9.4 and 9.36A and any report of the auditor of the *insurer* made in pursuance of rules 9.5 or 9.36E must be printed, and the ‘required copies’ must be deposited with the *FSA* within the periods set out in the table below.

<i>financial year ending on or after</i>	deposit period following the <i>financial year end</i>	
	where the deposit is made electronically or under rule 9.36A	otherwise
31 December 2001	4 months	3 months and 15 days
31 December 2002 and following years	3 months	2 months and 15 days

- (2) In (1), the reference to the **required copies** is to -
- (a) five printed copies of the document; or
 - (b) one printed copy of the document and one copy of it in an electronic form which may be readily used or translated by the *FSA*.
- (3) In the case of any document deposited under (1), except an auditor’s report, one of the printed copies, or, as the case may be, the printed copy, of the document must be signed in accordance with rule 9.33.
- (4) In the case of any auditor's report deposited under (1), one of the printed copies, or, as the case may be, the printed copy, of the document must be signed by the auditor.
- (5) If within 24 months of the date of deposit, the *FSA* notifies the *insurer* that a document deposited under (1) appears to it to be inaccurate or incomplete, the *insurer* must consider the matter and within one month of the date of notification it must correct any inaccuracies and make good any omissions and deposit the relevant parts of the documents again.
- (6) There must be deposited with every revenue ‘account’ and ‘balance sheet’ of an *insurer* any report on the affairs of the *insurer* submitted to the shareholders or *policy holders* of the *insurer* in respect of the *financial year* to which the ‘account’ and ‘balance sheet’ relate.
- (7) In this rule, any reference to an **account** or **balance sheet** includes a reference to any note, or statement or report annexed to it by virtue of rule 9.3 and any certificate annexed to it by virtue of rule 9.34.

Right of policy holders to receive copies of deposited documents

9.7 An *insurer* must provide to any person (or the person who has already been provided with a copy under (a)) within 30 days of the date of request (or, in the case of (b), the date of deposit under rule 9.6(5)):

- (a) a copy of any of the documents last deposited by the *insurer* under rule 9.6(1);
- (b) a copy of any document deposited under rule 9.6(5) which corrects or makes good any document provided under (a); and
- (c) a copy of any report deposited with any such document under rule 9.6(6),

where the deposit is made electronically, in the form (whether printed or electronic) requested or, if the deposit is not made electronically, in printed form, but (except in the case of (b)) the *insurer* may make a charge to cover its reasonable costs, including those of printing and postage.

Documents deposited with the FSA

Documents deposited in Northern Ireland

9.9 [deleted]

Value of assets and amount of liabilities

9.10 Unless otherwise provided in the *Accounts and Statements Rules*, in the documents which an *insurer* is required to prepare in accordance with the *Accounts and Statements Rules* -

- (a) the value or amount given for an asset (other than a *linked asset* not required to be valued in accordance with the *Valuation of Assets Rules* by virtue of rule 4.1.(2)) or a liability of the *insurer* is the value or amount of that asset or liability as determined in accordance with the *Valuation of Assets Rules* and the *Determination of Liabilities Rules* at the end of *the financial year in question*; and
- (b) in the case of a *linked asset* of the *insurer* (other than a *linked asset* required to be valued in accordance with the *Valuation of Assets Rules* by virtue of rule 4.1), the value given is the value of that asset as determined in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*.

Content and form of accounts

- 9.11 Every account, balance sheet, note, statement, report and certificate required to be prepared by an *insurer* pursuant to rule 9.3(1), (2) and (3) (annual accounts and balance sheets) must be prepared in the manner set out in the *Accounts and Statements Rules* and must fairly state the information provided on the basis required by the *Accounts and Statements Rules*.

Balance sheet

- 9.12 (1) The balance sheet required to be prepared by an *insurer* under rule 9.3(1) must comply with the requirements of **Appendix 9.1** and must be in **Forms 9 to 15** and **17** of that Appendix completed (as may be appropriate) as specified in (2) to (8).
- (2) **Form 9** must be completed by every *insurer*, other than a *Swiss general insurer* or an *EEA deposit insurer*.
- (3) **Form 10** must be completed by every *insurer*.
- (4) **Forms 11 and 12** must be completed by every *insurer* which carries on *general insurance business*, other than a *Swiss general insurer* or an *EEA deposit insurer*.
- (5) **Form 13** must be completed (as appropriate) -
- (a) by every *insurer* which carries on *long-term insurance business* in respect of -
- (i) its total *long-term insurance business assets*; and
- (ii) the *long-term insurance business assets* appropriated by it in respect of each *long-term insurance fund* or, where such assets have been appropriated for a group of funds, those assets;
- (b) by every *insurer* in respect of its total assets other than *long-term insurance business assets*;
- (c) by every *external insurer* (other than a *pure reinsurer*) in respect of *long-term insurance business* or *general insurance business* carried on by it through a branch in the United Kingdom in respect of those assets which are -
- (i) deposited under rule 8.1,
- (ii) maintained in the United Kingdom, and
- (iii) maintained in the United Kingdom and the other *EEA States*; and

- (d) by every *UK deposit insurer* in respect of *long-term insurance business* or *general insurance business* carried on by it through branches in the *EEA States* in respect of those assets which are -
 - (i) deposited under rule 8.1,
 - (ii) maintained in the United Kingdom and such other *EEA States* where *insurance business* is carried on, and
 - (iii) maintained in the United Kingdom and the other *EEA States*.
- (6) **Form 14** must be completed by every *long-term insurer* in respect of -
 - (a) its total *long-term insurance business liabilities* and margins; and
 - (b) the *long-term insurance business liabilities* and margins for each *long-term insurance fund* or where *long-term insurance business assets* have been appropriate in respect of a group of funds, for the *group*.
- (7) **Form 15** must be completed by every *insurer* except an *insurer* not trading for profit which carries on only *long-term insurance business*.
- (8) For each **Form 13** which an *insurer* is required to complete under (5)(a) or (b), the *insurer* must complete **Form 17** in respect of the same *insurance business*; except that where in respect of that Form all amounts required to be shown would be zero and no supplementary note would be required, **Form 13** may instead be accompanied by a supplementary note to that effect and **Form 17** may be returned in blank.

Profit and loss account

- 9.13 The *profit and loss account* required to be prepared by every *insurer* under rule 9.3 must comply with the requirements of **Appendix 9.1** and must be in **Form 16**.

Revenue account

- 9.14 The revenue account to be prepared by every *insurer* under rule 9.3 -
- (a) in the case of an *insurer* carrying on *general insurance business*, must comply with the requirements of **Appendix 9.2** and must be in **Form 20** and separate accounts must be prepared in **Form 20** in respect of each *accounting class* as well as a summary account in that Form in respect of the whole of the *general insurance business* carried on by it; and

- (b) in the case of an *insurer* carrying on *long-term insurance business*, must comply with the requirements of **Appendix 9.3** and must be in **Form 40** and -
 - (i) separate accounts must be prepared in **Form 40** in respect of each *long-term insurance fund* maintained by it; and
 - (ii) where there is more than one fund for *ordinary long-term insurance business* or for *industrial assurance business*, the *insurer* must also prepare a summary **Form 40** for *ordinary long-term insurance business* or for *industrial assurance business*, as the case may require.

Additional information on general insurance business (accounting classes and discounting)

- 9.15 (1) Every *insurer* which carries on *general insurance business* must, in accordance with the requirements of **Appendix 9.2**, prepare in respect of each *accounting class* -
- (a) **Forms 21, 22 and 23** for *insurance business accounted for* on an ‘accident year basis’; and
 - (b) **Forms 24 and 25** for *insurance business accounted for* on an ‘underwriting year basis’.
- (2) For the purposes of (1), business must be taken to be *accounted for* on an **underwriting year basis** where it relates to risks -
- (a) which have been reported previously under the *Accounts and Statements Rules* on **Forms 24 and 25**;
 - (b) in respect of which the *claims* outstanding for such *insurance business* are calculated using the method described in paragraph 52 of the *insurance accounts rules*; or
 - (c) which have not previously been reported on any Form under the *Accounts and Statements Rules* and which the *insurer* accounts for on an ‘underwriting year basis’,
- and business not *accounted for* on an ‘underwriting year basis’ is taken to be *accounted for* on an **accident year basis**.
- (3) Every *insurer* which, in respect of any *financial year*, includes in **Form 22** or **25** amounts relating to adjustments for *discounting* must prepare **Form 30** in accordance with the requirements of **Appendix 9.2**.

Business categories for general insurance business (reinsurance treaties accepted)

- 9.16 (1) Every *insurer* which carries on *general insurance business* must, for the purposes of this rule, allocate its *insurance business* falling within *accounting classes* 9, 10 and 11 to separate *insurance business* categories, that is to say -
- (a) accident and health (corresponding *general insurance business classes* 1 (other than '1(p)') and 2);
 - (b) motor (corresponding *general insurance business classes* '1(p)', 3 and 10);
 - (c) aviation (corresponding *general insurance business classes* '1(p)', 5 and 11);
 - (d) marine (corresponding *general insurance business classes* '1(p)', 6 and 12);
 - (e) transport (corresponding *general insurance business class* 7);
 - (f) property (corresponding *general insurance business classes* 4, 8 and 9);
 - (g) third party liability (corresponding *general insurance business class* 13); and
 - (h) miscellaneous and pecuniary loss (corresponding *general insurance business classes* 14, 15, 16, 17 and 18),

where **1(p)** means the effecting or carrying out of *contracts of insurance* against risks of death of, or injury to, passengers which normally fall within *class* 1, to the extent that the *insurer* has elected to attribute such risks to *accounting class* 2, 3 or 4, as appropriate.

- (2) An *insurer* may allocate its business falling within *general insurance business class* 7 (goods in transit) to the aviation and marine *insurance business categories* and not to the transport *insurance business category* and where such allocation is made the aviation and marine *insurance business categories* are referred to as **aviation and transport** and **marine and transport** respectively.
- (3) Instead of allocating all *insurance business* falling within the *classes* of *general insurance business* specified in any of (1)(a) to (h) to the *insurance business category* stated in that sub-paragraph, an *insurer* may allocate such *insurance business* to two or more separate *insurance business categories*, each of which must consist only of *insurance business* which would otherwise fall in the first-mentioned *insurance business category*.
- (4) Where *insurance business* is allocated to *insurance business categories* pursuant to (3), the *insurer* must, in the Forms prepared in accordance with the

requirements of **Appendix 9.2**, refer to each *insurance business category* so created by a name which -

- (a) describes the general nature of the *insurance business* included; and
- (b) distinguishes that category from other *insurance business categories*.

Additional information on general insurance business (reinsurance treaties accepted)

- 9.17 (1) Every *insurer* which carries on *general insurance business* must, in relation to each *insurance business category* to which *insurance business* has been allocated for the purposes of rule 9.16, in accordance with the requirements of **Appendix 9.2** prepare -
- (a) **Forms 26 and 27** for *insurance business* reported on **Forms 21, 22 and 23**; and
 - (b) **Forms 28 and 29** for *insurance business* reported on **Forms 24 and 25**.
- (2) Information relating to *reinsurance* treaties accepted which fall within more than one *insurance business category* for the purpose of (1) must be shown -
- (a) in the Forms prepared for each such *insurance business category* (amounts being apportioned as necessary); or
 - (b) in the Forms prepared for the *insurance business category* within which the greater part of the *insurance business* to which the treaty relates falls,

and an explanation must be given in a supplementary note annexed to the relevant form of the method used in any such apportionment or of the business included in a form which falls outside the *insurance business category* to which that form relates, as the case may require.

- (3) Unless an explanation is given in a supplementary note annexed to **Form 26** or **28** (as appropriate) for the allocation of the information in question to a different *insurance business category* -
- (a) where information relating to a *reinsurance* treaty accepted has been given in respect of any *financial year*, information relating to that treaty must be included in the same *insurance business category* in the *return* prepared in respect of each later *financial year*; and
 - (b) where a *reinsurance* treaty accepted relates to risks which are of a similar description to those to which an earlier treaty (in relation to which information has been given in respect of *previous financial year*) related and covers those risks in similar proportions, information

relating to the first-mentioned *reinsurance* treaty must be included in the same *insurance business category* as information relating to the earlier treaty.

Risk groups for general insurance business

- 9.18 (1) Every *insurer* which carries on *general insurance business* must, in the manner provided in this rule and for the purpose of the Forms specified in rule 9.19, classify the *direct and facultative insurance business* carried on by it in each country into risk groups by reference to *accounting classes* 1 to 8 as appropriate.
- (2) Each risk group classified for the purposes of this rule must comprise risks within an *accounting class* insured by the *insurer* in each country which, in the opinion of the *directors*, are not significantly dissimilar, either by reference to the nature of the objects exposed to such risks or by reference to the nature of the cover against such risks provided by the *insurer*.
- (3) Subject to (4), the *insurer* must classify its risks so that -
- (a) risks are not included in the same risk group where, having regard to the patterns of risk, *claims* incurrence and settlement patterns, it is necessary to group them separately for the purposes of applying statistical methods (within the meaning of paragraph 47(1) of *the insurance accounts rules*) in calculating the provision for *claims* outstanding in accordance with generally accepted accounting practice;
 - (b) *claims-made policies* are not included in the same risk group as *policies* which are not *claims-made policies*;
 - (c) *policies* falling within *general insurance business class* 14, 15, 16, 17 or 18 are not included in the same risk group as *policies* falling within any other of those *general insurance business classes*, except that *policies* falling within *general insurance business class* 14 may be included in the same risk group as *policies* falling within *general insurance business class* 15;
 - (d) *policies* in respect of private motor car risks are not included in the same risk group as *policies* in respect of other risks falling within *accounting class* 2;
 - (e) *policies* in respect of comprehensive private motor car risks are not included in the same risk group as *policies* in respect of non-comprehensive private motor car risks; and
 - (f) *policies* transferred to the *insurer* by way of a transfer under Part VII of the *Act* are not included in the same risk group as other *policies*.

- (4) (3) does not apply in relation to the risk groups mentioned in that paragraph where, in the case of any *financial year* –
- (a) the *gross premiums written* for that year in respect of the risk group are less than 2.5% of the world-wide *gross premiums written* for all *accounting classes* for that year, or £500,000; or
 - (b) the *gross premiums written* for that year in respect of the risk groups in which *policies* would in accordance with that paragraph be included (except the largest) are less than 0.5% of the world-wide *gross premiums written* for all *accounting classes* for that year, or £100,000.
- (5) Subject to (2) to (4), an *insurer* may in respect of any *accounting class* include all *insurance business* carried on by it in any country in any *financial year* as a single risk group.
- (6) Notwithstanding the provisions of (2) to (4), an *insurer* may classify all *insurance business* carried on by it in any country in respect of any *accounting class* in any *financial year* as a single risk group, provided that *gross premiums written* for that year in respect of that *insurance business* are less than –
- (a) 5% of the world-wide *gross premiums written* for all *accounting classes* for that year; or
 - (b) £500,000.
- (7) Notwithstanding the provisions of (1) to (4), no risk groups need be classified by an *insurer* in respect of a country if the *gross premiums written* in respect of *insurance business* falling within *accounting classes* 1 to 8 and carried on in that country are less than –
- (a) 1% of the world-wide *gross premium written* for all *accounting classes* for that year; or
 - (b) £100,000.
- (8) For the purposes of this rule and rule 9.19, *home foreign business* is to be treated as though it were carried on in a different country from other *insurance business* carried on in the United Kingdom.

Additional information on general insurance business (direct and facultative business)

- 9.19 (1) Every *insurer* which carries on *general insurance business* must, with respect to the *financial year in question* and in relation to each country and each risk group (as classified by it under rule 9.18), prepare in accordance with the requirements of **Appendix 9.2** –

- (a) **Form 31** for *direct and facultative insurance business*, other than *insurance business* falling within *accounting class 2*, reported on **Forms 21, 22 and 23**;
 - (b) **Form 32** for *direct and facultative insurance business* falling within *accounting class 2* reported on **Forms 21, 22 and 23**; and
 - (c) **Form 34** for *direct and facultative insurance business* reported on **Forms 24 and 25**.
- (2) Where an *insurer* has reported *insurance business* with respect to any *previous financial year* and relating to a country and a risk group in **Form 31, 32 or 34** pursuant to (1), it must continue to report that *insurance business* for that *financial year* in subsequent *financial years* for the same country and risk group in **Form 31, 32 or 34** (as appropriate).
- (3) Where any of **Forms 31, 32 or 34** has been prepared in respect of the entire *insurance business* of an *insurer*, no separate forms need be prepared -
- (a) in the case of an *external insurer*, in respect of *insurance business* carried on by it through a branch in the United Kingdom; and
 - (b) in the case of a *UK deposit insurer*, in respect of *insurance business* carried on by it through a branch in any *EEA State*.

Additional information on general insurance business (direct and facultative reconciliation business)

- 9.20 (1) Every *insurer* which carries on *general insurance business* must, with respect to the *financial year in question* and in accordance with the requirements of **Appendix 9.2**, prepare -
- (a) **Form 33** for *insurance business* reported on **Forms 21, 22 and 23** but not reported on **Form 31 or 32**; and
 - (b) **Form 35** for *insurance business* reported on **Forms 24 and 25** but not reported on **Form 34**.
- (2) No separate **Form 33** or **35** need be prepared where, in the cases referred to in rule 9.19(3)(a) or (b), no separate **Forms 31, 32 or 34** need be prepared.

Currencies other than sterling

- 9.21 Every *insurer* which, in respect of a *financial year*, prepares a Form under rules 9.17 or 9.19 containing figures in a currency other than sterling must prepare **Form 36** in accordance with the requirements of **Appendix 9.2**.

Additional information on general insurance business (other than credit insurance business)

- 9.22 (1) This rule applies to *Part II business* and *Part III business*.
- (2) A *Part II insurer* and a *Part III insurer* must, in accordance with the requirements of **Appendix 9.2**, prepare -
- (a) **Form 37**;
 - (b) **Form 38** for business reported on **Forms 21, 22 and 23**; and
 - (c) **Form 39** for business reported on **Forms 24 and 25**.

Additional information on long-term insurance business

- 9.23 Every *insurer* which carries on *long-term insurance business* must, in respect of the *financial year in question* and in accordance with the requirements of **Appendix 9.3**, prepare -
- (a) **Forms 41 to 45** in respect of each revenue account prepared separately under rule 9.14(b)(i); and
 - (b) summary **Forms 41 to 44** in respect of each summary **Form 40** prepared under rule 9.14(b)(ii).

Forms to be annexed

- 9.24 The forms prepared pursuant to rules 9.15, 9.17 and 9.19 to 9.23 must be annexed to the documents referred to in rules 9.12, 9.13 and 9.14.

Additional information on general insurance business: major treaty reinsurers

- 9.25 (1) Subject to the provisions of rule 9.28, an *insurer* which carries on *general insurance business* must annex to the documents referred to in rules 9.12, 9.13 and 9.14, and relating to the *financial year in question*, a statement of -
- (a) the ‘full name’²³ of each of its ‘major treaty reinsurers’ and the address of the registered office or of the principal office in the country where it is incorporated (or, in the case of an unincorporated body, of the principal office) of each such *reinsurer*;
 - (b) whether (and, if so, how) the *insurer* was at any time in the *financial year* ‘connected’²⁴ with any such *reinsurer*;

²³ for the meaning of ‘full name’ in this rule, see rule 9.28(4)

²⁴ for the meaning of ‘connected’, in this rule, see rule 9.28(1)

- (c) the amount of the *reinsurance* premiums payable in the *financial year* to each such *reinsurer* in respect of -
 - (i) *general insurance business ceded* under proportional *reinsurance* treaties; and
 - (ii) *general insurance business ceded* under non-proportional *reinsurance* treaties;
- (d) the amount of any *debt* of each such *reinsurer* to the *insurer* in respect of *general insurance business ceded* under *reinsurance* treaties, included at line 75 of **Form 13**;
- (e) the amount of any deposit received from each such *reinsurer* under *reinsurance* treaties as included at line 31 of **Form 15**; and
- (f) the amount of any anticipated recoveries from each such *reinsurer* under *reinsurance* treaties to the extent that such recoveries have been taken into account by the *insurer* in determining the *reinsurers'* share of *technical provisions* in respect of *claims* outstanding as shown at line 61 of **Form 13**; except that, in respect of *claims* incurred but not reported, such recoveries need only be included to the extent that they are in respect of any specific occurrences for which provisions have been allocated by the *insurer*,

or a statement that it has no 'major treaty reinsurer'.

- (2) For the purposes of this rule, a **major treaty reinsurer** of an *insurer* is a another *company* -
 - (a) to which (whether alone or with any *company* which is 'connected'²⁵ with the other *company*) the *insurer* has *ceded general insurance business* under one or more *reinsurance* treaties -
 - (i) in the case of proportional *reinsurance*, for which the total amount of the *reinsurance* premiums payable is equal to not less than 2% of the *gross premiums receivable* by the *insurer* in respect of *general insurance business*, or
 - (ii) in the case of non-proportional *reinsurance*, for which the total amount of the *reinsurance* premiums payable is equal to not less than 5% of the total premiums payable by the *insurer* in respect of all such non-proportional *reinsurance*,

²⁵ For the meaning of 'connected', in this rule, see rule 9.28(1).

in the *financial year in question* or in any of the five *preceding financial years* of the *insurer*; or

- (b) in relation to which (whether alone or with any *company* which is ‘connected’ with the other *company*) the aggregate of the amounts referred to in (1)(d) and (f) exceeds 5% of the *insurer's general insurance business amount*.

Additional information on general insurance business: major facultative reinsurers

9.26 (1) Subject to rule 9.28, an *insurer* which carries on *general insurance business* must annex to the documents referred to in rules 9.12, 9.13 and 9.14, and relating to *the financial year in question*, for each ‘major facultative reinsurance contract’, a statement in respect of each ‘major facultative reinsurer’ of -

- (a) its ‘full name’²⁶ and the address of the registered office or of the principal office in the country where it is incorporated (or, in the case of an unincorporated body, of the principal office);
- (b) whether (and, if so, how) the *insurer* was at any time in the *financial year* ‘connected’ with such *reinsurer*;
- (c) the amount of the *reinsurance* premiums payable in the *financial year*;
- (d) the amount of any *debt* to the *insurer* included at line 75 of **Form 13**;
- (e) the amount of any deposit received as included at line 31 of **Form 15**; and
- (f) the amount of any anticipated recoveries to the extent that such recoveries have been taken into account by the *insurer* in determining the *reinsurers’ share of technical provisions* in respect of *claims* outstanding as shown at line 61 of **Form 13**; except that, in respect of *claims* incurred but not reported, such recoveries need only be included to the extent that they are in respect of any specific occurrences for which provisions have been allocated by the *insurer*,

or a statement that it has no ‘major facultative reinsurer’.

- (2) For the purposes of this rule, a **major facultative reinsurance contract** is a contract under which *general insurance business* has been *ceded* by the *insurer* on a facultative basis -

²⁶ for the meaning of ‘full name’ in this rule, see rule 9.28(4)

- (a) under which the total amount of premiums payable to any *reinsurer* (a **major facultative reinsurer**) is equal to not less than 0.5% of *gross premiums receivable* by the *insurer* in respect of *general insurance business*; or
- (b) in relation to which, in respect of any *reinsurer* (a **major facultative reinsurer**) the aggregate of amounts in (1)(d) and (e) exceeds 1% of the *insurer's general insurance business amount*.

Information on major general insurance business: reinsurance cedants

9.27 (1) Subject to rule 9.28, an *insurer* which carries on *general insurance business* must annex to the documents referred to in rules 9.12, 9.13 and 9.14, and relating to the *financial year in question*, a statement of -

- (a) the 'full name' of each of its 'major cedants' and the address of the registered office or of the principal office in the country where it is incorporated (or, in the case of an unincorporated body, of the principal office) of each such cedant;
- (b) whether (and, if so, how) the *insurer* was at any time in the *financial year* 'connected' with any such cedant;
- (c) the amount of the total of the *gross premiums receivable* in the *financial year* from each such cedant in respect of *general insurance business* accepted under *reinsurance* treaties;
- (d) the amount of any deposit made with any such cedant as included at line 57 of **Form 13**; and
- (e) the amount of any *debt* of each such cedant in respect of *general insurance business* accepted under *reinsurance* treaties, included at line 74 of **Form 13**,

or a statement that it has no 'major cedant'.

(2) For the purposes of this rule, a **major cedant** of an *insurer* is another *company* from which (whether alone or with any *company* which is 'connected' with the other *company*) the *insurer* has accepted *general insurance business* under one or more *reinsurance* treaties for which the *gross premiums receivable* exceed the greater of -

- (a) 5% of the *gross premiums receivable* by the *insurer* in respect of *general insurance business* accepted under *reinsurance* treaties; and
- (b) 2% of the *gross premiums receivable* by the *insurer* in respect of *general insurance business*,

in the *financial year in question* or in any of the three *preceding financial years* of the *insurer*.

Provisions supplemental to rules 9.25 to 9.27

9.28 (1) For the purposes of rules 9.25(1)(b) and (2), 9.26(1)(b) and 9.27(1)(b) and (2), a *company* and another person are **connected** with each other if -

(a) the other person is -

(i) a *subsidiary undertaking* of the *company*,

(ii) a *parent undertaking* of the *company*, or

(iii) a *subsidiary undertaking* of the *parent undertaking* of the *company*; or

(b) one of them is 'controlled' by the other or both are 'controlled' by the same person,

but a *company* is not to be taken to be 'connected' with another person if the *insurer* furnishing the statement does not know and could not upon reasonable enquiry be expected to discover that it is so 'connected' with the other person.

(2) Except as provided in (3), for the purposes of (1)(b), a person is taken to **control** a *company* if he is a person -

(a) in accordance with whose directions or instructions the *directors* of the *company* or of a *company* of which it is a *subsidiary* are accustomed to act; or

(b) who, either alone or with an *associate* is entitled to exercise, or 'control' the exercise of, 15% or more of the voting power at any general meeting of the *company* or of a *company* of which it is a *subsidiary*.

(3) In relation to an *insurer* -

(a) making a statement pursuant to rules 9.25 or 9.26, a *reinsurer* is not to be taken by virtue of (2) to be 'connected' with another *reinsurer*; or

(b) making a statement pursuant to rule 9.27, a cedant is not to be taken by virtue of (2) to be 'connected' with another cedant,

for the purposes of paragraph (2) of rules 9.25, 9.26 or 9.27, as the case may be, unless it is also 'connected' by virtue of (1) with the *insurer* making the statement.

(4) In rules 9.25, 9.26 and 9.27 and in this rule, **full name** means -

- (a) in the case of a company, its corporate name; and
 - (b) in the case of an individual or any unincorporated body, the name under which the individual or body lawfully carries on business.
- (5) The following provisions of **Appendix 9.1** apply for the purposes of rules 9.25, 9.26, and 9.27 -
- (a) paragraphs 4 and 5 (which relate to currencies other than sterling);
 - (b) paragraphs 8(1) and 8(2) (which, among other things, relate to amounts due to the *insurer*); and
 - (c) paragraph 9 (which provides for amounts to be shown to the nearer £1,000).
- (6) Rules 9.25(2), 9.26(1)(a) to (c) and 9.27 apply in relation to the members of the *Society* taken together as they apply in relation to an *insurer* and in relation to the members of the *Society* (1) to (4) of this rule do not apply.

Additional information on derivative contracts

- 9.29 (1) Every *insurer* must, in respect of the *financial year in question*, annex to the documents referred to in rules 9.12, 9.13 and 9.14 a statement comprising a brief description of -
- (a) any investment guidelines operated by the *insurer* for the use of *derivative contracts*;
 - (b) any provision made by such guidelines for the use of contracts under which the *insurer* had a right or obligation to acquire or dispose of assets which was not, at the time when the contract was entered into, reasonably likely to be exercised and, if so, the circumstances in which, pursuant to that provision, such contracts would be used;
 - (c) the extent to which the *insurer* was during the *financial year* a party to any contracts of the kind described in (b);
 - (d) the extent to which any of the amounts recorded in **Form 13** would be changed if assets which the *insurer* had a right or obligation to acquire or dispose of under '*derivative contracts*' outstanding at the end of the *financial year* (being, in the case of *options*, only those *options* which it would have been prudent to assume would be exercised) had been so acquired or disposed of;
 - (e) how different the information provided pursuant to (d) would have been if such *options* as were outstanding at the end of the year had

been exercised in such a way as to change the amounts referred to in that sub-paragraph to the maximum extent;

- (f) how different the information provided pursuant to (d) and (e) would have been if, instead of applying to contracts outstanding at the end of the *financial year*, those rules had applied to ‘*derivative contracts*’ outstanding at such other time during the *financial year* as would have changed the amounts referred to in those rules to the maximum extent;
 - (g) the maximum loss which would be incurred by the *insurer* on the failure by any one other person to fulfil its obligations under ‘*derivative contracts*’ outstanding at the end of the *financial year*, both under existing market conditions and in the event of other foreseeable market conditions, together with an assessment of whether such maximum loss would have been materially different at any other time during the *financial year*;
 - (h) the circumstances surrounding the use of any ‘*derivative contract*’ held at any time during the *financial year* which did not fall within rule 4.12 (2), or (where appropriate) the definition of a *permitted derivative contract*; and
 - (i) the total value of any fixed consideration received by the *insurer* (whether in cash or otherwise) during the *financial year* in return for granting rights under *derivative contracts* and a summary of contracts under which such rights have been granted.
- (2) In this rule, **derivative contract** includes a contract or asset which has the effect of a *derivative contract* within the meaning of rule 4.13 and, for the purposes of (1)(h), such a contract or asset must be treated as falling within rule 4.12 (2), or the definition of *permitted derivative contract*, as appropriate, if it has the effect of a *derivative contract* which would fall within that provision.
- (3) For the purposes of this rule, an *insurer* which is a party to -
- (a) a *contract for differences*; or
 - (b) any other contract which is to be, or may be, settled in cash,

is taken to have a right or obligation to acquire or dispose of the assets underlying the contract.

Additional information on controllers

- 9.30 Every *insurer* with its head office in the United Kingdom must, in respect of the *financial year in question*, annex to the documents referred to in rules 9.12, 9.13 and 9.14 -

- (a) a statement naming each person who, to the knowledge of the *insurer*, has been, at any time during the *financial year*, a *controller* of that *insurer*; and
- (b) in the case of each person so named, a statement of -
 - (i) the percentage of *shares* which, to the knowledge of the *insurer*, he held at the end of the *financial year in question* in the *insurer*, or in another company of which the *insurer* is a *subsidiary undertaking*; and
 - (ii) the percentage of the voting power which, to the knowledge of the *insurer*, he was entitled at the end of the *financial year in question* to exercise, or control the exercise of, at any general meeting of the *insurer*, or another company of which it is a *subsidiary undertaking*,

in each case, either alone or with any *associate* or *associates*.

Periodic actuarial investigation

9.31 Save in relation to (b), for the purposes of rule 9.4 *ordinary long-term insurance business* and *industrial assurance business* must be treated separately and the abstract of the report of the *appointed actuary* on *long-term insurance business* –

- (a) must comply with the requirements of **Appendix 9.4** and must contain the information (together with such of **Forms 46 to 49** and **51 to 58** as may be appropriate) specified in that Appendix; and
- (b) except in the case of an *EEA-deposit insurer*, must also include **Form 60** and, where appropriate, **Form 61**.

Additional information on general insurance business ceded

9.32 An *insurer* which carries on *general insurance business* must annex to the documents referred to in rules 9.12, 9.13 and 9.14, and relating to the *financial year in question*, a statement of the information required by **Appendix 9.5**.

Signature of documents

- 9.33 (1) In respect of any document relating to the *insurance business* of an *insurer*, wherever it may be carried on, the signatories for the purposes of rule 9.6 are -
- (a) in any case -
 - (i) where there are more than two *directors* of the *insurer*, at least two of those *directors* and, where there are not more than two *directors*, all the *directors*, and

- (ii) a chief executive, if any, of the *insurer* or (if there is no chief executive) the secretary, if any; and
 - (b) in the case of an abstract under rule 9.4, the actuary who made the investigation to which the abstract relates.
- (2) In respect of any document relating to *insurance business* carried on through a branch in the United Kingdom by a *Swiss general insurer*, an *EEA deposit insurer* or an *external insurer* or through branches in any *EEA State* (taken together) by a *UK deposit insurer*, the signatories for the purposes of rule 9.6(3) are -
- (a) in any case -
 - (i) the authorised UK representative referred to in rule 8.3 or 8.4, as the case may be, and
 - (ii) the chief executive appointed under rule 8.3 or, in the case of a *Swiss general insurer*, a person who alone or jointly with one of more others, is responsible for the conduct of its *insurance business* through the branch; and
 - (b) in the case of an abstract under rule 9.4, the actuary who made the investigation to which the abstract relates.

Certificates

- 9.34 There must be annexed to the documents referred to in rules 9.12, 9.13 and 9.14 -
- (a) a certificate in accordance with the requirements of Part I of **Appendix 9.6** which must be signed by the persons required by rule 9.33 to sign the documents to which the certificate relates; and
 - (b) in the case of an *insurer* which has at any time during the *financial year in question* carried on *long-term insurance business*, a certificate in accordance with the requirements of Part II of **Appendix 9.6** which must be signed by the *appointed actuary*.

Audit and auditor's report

- 9.35 (1) The documents referred to in rules 9.12, 9.13 and 9.14, and every statement, analysis, report or certificate annexed pursuant to rules 9.24 to 9.27, 9.29 and 9.34(a) must be audited by a person, in accordance with the rules in *SUP*, who must make and annex to those documents a report in accordance with the requirements of Part III of **Appendix 9.6**.
- (2) For the purposes of the *Accounts and Statements Rules* -

- (a) section 237(1), (2) and (3) and section 389A(1) of the *Companies Act* and article 245(1), (2) and (3) and article 397A(1) of the *1986 Order* apply as if -
 - (i) the references to the *profit and loss account* contained in the definition of ‘individual accounts’ in section 226(1) of that Act and article 234(1) of that Order, respectively, included references to the revenue account; and
 - (ii) the auditors of the *insurer* were not under a duty for the purposes of preparing their report to carry out any investigation into information given in **Forms 31, 32 and 34** relating wholly or partly to the number of *claims* notified or the amount of payments made prior to the *financial year* of the *insurer* in which the Insurance Companies (Accounts and Statements) Regulations 1980 first applied; and
- (b) section 389A(3) and (4) of the *Companies Act* and article 397A(3) and (4) of the *1986 Order* apply as if the references in them to a ‘parent company’ were references to the *insurer*.

Information on appointed actuary

- 9.36 (1) Subject to the provisions of this rule, there must be annexed to the documents referred to in rules 9.12, 9.13 and 9.14, with respect to every person who, at any time during the *financial year in question*, was the *appointed actuary* to the *insurer*, a statement of the following information -
- (a) particulars of any *shares* in, or debentures of, ‘the *insurer*’ in which the *appointed* ‘actuary’ was ‘interested’ at any time during that year;
 - (b) particulars of any pecuniary interest of ‘the actuary’ in any transaction between ‘the actuary’ and ‘the *insurer*’ and subsisting at any time during that year or, in the case of transactions of a minor character, a general description of such interests;
 - (c) the aggregate amount of -
 - (i) any remuneration and the value of any other benefits (other than a pension or other future or contingent benefit) under any contract of service of ‘the actuary’ with, or contract for services by ‘the actuary’ to, ‘the *insurer*’, and
 - (ii) any emoluments, pensions or compensation as *director* of the *insurer* which are required by Part I of Schedule 6 to the *Companies Act* or Part I of Schedule 6 to the *1986 Order* to be included in a note to the accounts of ‘the *insurer*’ under section 232 of the *Companies Act* and Article 239 of the *1986 Order*,

receivable by 'the actuary' in respect of any period in that year;
and

- (d) a general description of any other pecuniary benefit (including any pension and other future or contingent benefit) received by 'the actuary' from 'the *insurer*' in that year or receivable by him from 'the *insurer*',

together with the statement specified in (2).

- (2) The statement referred to in (1) is a statement that 'the *insurer*' has made a request to 'the actuary' to furnish to it the particulars specified in that paragraph and identifying any particulars furnished pursuant to that request.
- (3) For the purposes of (1)(a) to (d) -
- (a) references to **the actuary** include reference to -
- (i) the spouse and any minor child (including step-child) of 'the actuary',
- (ii) any person who is a business partner of 'the actuary',
- (iii) any person (other than 'the *insurer*') of which 'the actuary' is an employee, and
- (iv) any person (other than 'the *insurer*') of which 'the actuary' is a *director* or which is 'controlled' by him;
- (b) a person is deemed to be **interested** in *shares* or debentures if he is interested in them according to the rules set out in Part I of Schedule 13 to the *Companies Act* with the addition, in paragraph 11 of that Part of that Schedule, of a reference to a scheme under section 25 of the Charities Act (Northern Ireland) 1964; and
- (c) a person is deemed to have an **interest** or benefit if he has a beneficial interest.
- (4) For the purposes of (1)(a) to (d) and of (3)(a), references to **the insurer** include references to any *body corporate* which is 'the *insurer's* *subsidiary undertaking* or *parent undertaking* and to any other *subsidiary undertaking* of its *parent undertaking*.
- (5) For the purposes of (3), a person is taken to **control** a *body corporate* if he is a person -
- (a) in accordance with whose directions or instructions the *directors* of that *body corporate* or of a *body corporate* of which it is a *subsidiary* are accustomed to act; or

- (b) who, either alone or with any other person falling within (3)(a), is entitled to exercise, or control the exercise of, 15% or more of the voting power at any general meeting of the *body corporate* or of a *body corporate* of which it is a *subsidiary*.

Part II

ACCOUNTS AND STATEMENTS FOR A MARINE MUTUAL

Returns

9.36A Subject to rules 9.36B, 9.36C, 9.36D and 9.36E and **Appendix 9.8**, a *marine mutual* may complete an abbreviated *return* which comprises –

- (1) **Forms 11 and 12**; and
- (2) **Forms M1 to M5 in Appendix 9.8**,

and, if so, rules 9.3 to 9.4, 9.12 to 9.28, 9.31 and 9.32 and 9.34 to 9.36 do not apply.

Information to be annexed to the forms

9.36B A *marine mutual* must annex to the *return* provided under rule 9.36A-

- (1) a description of the significant *reinsurance* arrangements which will be in operation in the *financial year* following the *financial year in question*;
- (2) in respect of *insurance business* ceded by way of non-facultative reinsurance in respect of the *financial year in question* or any *previous financial year* ended on or after 20 February 1998, a statement of –
 - (a) in the case of contracts which are subject to no or a limited number of reinstatements, any contract not previously reported to the *FSA* under which it is anticipated that any such limit will be exhausted by such *claims* (including *claims* incurred, but not reported, in respect of any specific occurrence for which provisions have been allocated);
 - (b) the percentage of cover, if in excess of 10%, and if such information was not included in the *return* of the *marine mutual* for the *previous financial year*, which has been *ceded* to *reinsurers* which have ceased to pay *claims* to their reinsureds in full, whether because of insolvency or for any other reason; and

- (c) if the percentage specified in (b) has increased by more than 10% since the *previous financial year* in which it was included in the *marine mutual's return*, that percentage unless, in the opinion of the *directors*, the likelihood of any *claim* being incurred under that *policy* is minimal;
- (3) a statement concerning:
 - (a) the default rates of members (or adjusted default rates, as the case may be) on the supplementary calls collectable during the *financial year in question* and the two *previous financial years*, respectively; and
 - (b) the total amount of each such call, the *financial year* to which it relates, the amount paid and the amount remaining outstanding; and
 - (4) a copy of the rules of association of the marine mutual in force on the date of deposit of the return, unless there has been no change in a copy of the rules deposited with the return for a previous financial year.

Information to FSA

9.36C

A *marine mutual* which provides a *return* under rule 9.36A must, with effect from the date of its deposit with the *FSA* until the date of deposit of the *return* for the following *financial year*, provide the *FSA* with written notice of:

- (1) any change which is proposed in the rules of association of the *marine mutual*, not less than 14 days before the change is put to a meeting;
- (2) any change which has been made in the rules of association, within 7 days of the change;
- (3) any significant change in the *reinsurance* arrangements, a description of which has been annexed to the *return* in accordance with rule 9.36B(1), within 7 days of the change;
- (4) a fall in tonnage entered by its members of 10% net or more since the end of the *financial year in question*, within 7 days of the *marine mutual* becoming aware of this; and
- (5) whether tonnage entered by its members who have withdrawn from membership or who have defaulted on their obligations has increased so as to exceed 10% or more of total tonnage entered, whether before, on or after the date of deposit of the *return*, within 7 days of the date of deposit or of the *marine mutual* becoming aware of this, whichever is earlier.

Directors' certificate

9.36D *A marine mutual* must annex to the *return* provided under rule 9.36A a *directors' certificate* in accordance with Part II of **Appendix 9.8**.

Auditors' report

9.36E *A marine mutual* must annex to the *return* provided under rule 9.36A an auditors' report in accordance with Part III of **Appendix 9.8**.

Part III

STATISTICAL RULES

Insurance statistics: EEA States

9.37 (1) Every *UK insurer* which in any calendar year –

- (a) carries on *general insurance business* in an *EEA State* other than the United Kingdom through a branch in that State; or
- (b) provides general insurance in such a State through an establishment in the United Kingdom or another *EEA State*,

must prepare in respect of the *direct general insurance business* so carried on by it a statement in **Form 91** (analysis of financial particulars – branches), or the direct general insurance so provided by it a statement in **Form 92** (analysis of financial particulars – provision of insurance), in accordance with the requirements of **Appendix 9.7**.

(2) Every *UK insurer* which in any calendar year –

- (a) carries on *long-term insurance business* in an *EEA State* other than the United Kingdom through a branch in that State; or
- (b) provides long-term insurance in such a State through an establishment in the United Kingdom or another *EEA State*,

must prepare in respect of the *direct long-term insurance business* so carried on by it a statement in **Form 93** (analysis of financial particulars – branches), or the direct long-term insurance so provided by it a statement in **Form 94** (analysis of financial particulars – provision of insurance), in accordance with the requirements of **Appendix 9.7**.

(3) The forms mentioned in (1) and (2) must be prepared separately in respect of each *EEA State* in which the *insurer* carries on the *insurance business* or provides the insurance.

(4) The statements required by this rule must be printed, and three copies must be deposited with the *FSA* within nine months after the end of the calendar year

to which they relate; but if in any case it appears to the *FSA* that the circumstances are such that a longer period than nine months should be allowed, the *FSA* may extend that period by such period not exceeding three months as it thinks fit.

- (5) One of the copies of the statement deposited under (4) must be signed by a *director*, a chief executive or the secretary of the *insurer*.
- (6) Subject to (7), where a *UK insurer* which has notified the *FSA* -
 - (a) in accordance with the rules in *SUP*, of its intention to establish a branch in a *EEA State* other than the United Kingdom; or
 - (b) in accordance with those rules, of its intention to provide insurance in such a State,

does not in any calendar year carry on *insurance business* or, as the case may be, provide insurance in that State, it must send to the *FSA* a notification of that fact within nine months after the end of the calendar year to which the notification relates, signed by a *director*, a chief executive or the secretary of the *insurer*.

- (7) (6) does not apply if the *insurer* has, before the beginning of the calendar year, informed the *FSA*, in accordance with the rules in *SUP*, that it has ceased to carry on *insurance business* or, as the case may be, to provide insurance in the State in question.
- (8) If within 24 months of the date of deposit under (4), the *FSA* notifies the *insurer* that a document deposited appears to it to be inaccurate or incomplete, the *insurer* must consider the matter and within one month of the date of notification it must correct any inaccuracies and make good any omissions and deposit the relevant parts of the documents again.

Application of rule 9.37 to the Society of Lloyd's

- 9.38
- (1) Subject to (2) and (3), rule 9.37 applies in relation to the *Society* as it applies in relation to a *UK insurer*.
 - (2) The information required in the case of the *Society* to be included in the statements referred to in rule 9.37(4), or the notification referred to in rule 9.37(6), is that relating to the members of the *Society* taken together.
 - (3) Any such statements, forms or notification must be signed by the Chairman or a Deputy Chairman, for and on behalf of the Council of Lloyd's.

PART IV

MATERIAL CONNECTED-PARTY TRANSACTIONS

- 9.39 (1) If, during the *financial year in question*, an *insurer* has agreed to, or carried out, a *material connected-party transaction*, it must provide a brief description of that transaction by way of a supplementary note to **Form 20** or **Form 40**.
- (2) The description to be provided in accordance with (1) must state –
- (a) the names of the transacting parties;
 - (b) a description of the relationship between the parties;
 - (c) a description of the transaction;
 - (d) the amounts involved;
 - (e) any other elements of the transaction necessary for an understanding of its effect upon the financial position or performance of the *insurer*; and
 - (f) amounts written off in the period in respect of *debts* due to or from *connected parties*.
- (3) Transactions with the same *connected party* may be disclosed on an aggregated basis unless separate disclosure is needed for a proper understanding of the effect of the transactions upon the financial position or performance of the *insurer*.

THE PARENT UNDERTAKING SOLVENCY MARGIN CALCULATION

CONTENTS

Information to be provided

10.1

10.2

Chapter 10

THE PARENT UNDERTAKING SOLVENCY MARGIN CALCULATION

Information to be provided

- 10.1 This chapter applies to an *insurer* (other than a *pure reinsurer*) that is a *subsidiary undertaking* of an *ultimate insurance parent undertaking*.
- 10.2 (1) When it deposits its *return*, an *insurer* must also provide the *FSA* with a declaration of the following information in respect of each member of the *insurance group* (including itself) as at the end of the *financial year in question*:
- (a) the name, location of head office and principal activity;
 - (b) the relationship with each other member of the *insurance group*, including the amounts and descriptions of holdings of *share* capital and voting rights;
 - (c) whether the member of the group is a *subsidiary undertaking* of the *ultimate insurance parent undertaking* and, if different, of the *ultimate EEA insurance parent undertaking*;
 - (d) the *ultimate insurance parent undertaking's proportionate share* of, or if the group member is a *subsidiary undertaking* of that parent the whole of, any deficit in the assets available to cover the group member's liabilities and represent its *notional required minimum margin*;
 - (e) the *ultimate EEA insurance parent undertaking's proportionate share* of, or if the group member is a *subsidiary undertaking* of that parent the whole of, any deficit in the assets available to cover the group member's liabilities and represent its *notional required minimum margin*; and
 - (f) a statement that:
 - (i) the declaration has been properly prepared in accordance with this rule,
 - (ii) proper records have been maintained and adequate information obtained by the *insurer* for the purpose of the declaration required by this rule and the information required by rule 9.39, and
 - (iii) reasonable enquiries have been made by the *insurer* for the purpose of identifying *material connected-party transactions*.

- (2) The declaration required by (1) must also include separate statements in respect of each of the *ultimate insurance parent undertaking* and *ultimate EEA insurance parent undertaking* of:
- (a) the value, as determined in accordance with the *Valuation of Assets Rules* (other than rule 4.14(1)(a) to (c)), of its *surplus assets*;
 - (b) the aggregate of:
 - (i) any deficit in the assets available to cover its liabilities or represent its *notional required minimum margin*, and
 - (ii) the amounts reported in (1)(d) or (e) as applicable (but excluding any amounts that arise from uncovered liabilities to the *parent undertaking* itself);
 - (c) the excess of (b) over (a) (“the aggregate deficit”); and
 - (d) a statement of the reasons why any aggregate deficit has arisen and of any remedial action taken or planned.
- (3) For the purposes of (1) and (2), the amount of any deficit and the identification of *surplus assets* must be determined as though:
- (a) all references in rule 4.2(2)(a), (c), (d), (e) and (3) to the “*group undertaking*” were references to the *ultimate insurance parent undertaking* or *ultimate EEA insurance parent undertaking*, as applicable;
 - (b) rule 4.2(2)(b) was replaced with “assets that are interests directly or indirectly held in the capital of the *ultimate insurance parent undertakings* or *ultimate EEA insurance parent undertakings*, as applicable”; and
 - (c) rule 4.2(2)(f) was replaced with “assets that cannot effectively be made available or realised to make good any deficiency of assets of the *ultimate insurance parent undertakings* or *ultimate EEA insurance parent undertakings*, as applicable”.
- (4) The declaration required by (1) must be signed by the persons described in rule 9.33 (1)(a).

<i>LLD</i>	the Lloyd's Sourcebook
<i>localisation</i>	existence of assets, whether moveable or immovable, in a State
<i>long-term insurance business</i>	the business of effecting or carrying out <i>long-term insurance contracts</i>
<i>long-term insurance business amount</i>	is the higher of - (a) the amount of the <i>insurer's insurance liabilities</i> in respect of <i>long-term insurance business</i> (net of <i>reinsurance ceded</i> and excluding <i>property linked liabilities</i>), together with- (i) the amount of the <i>required margin of solvency</i> (or the amount of the <i>minimum guarantee fund</i> if greater) determined in accordance with rules 2.5 to 2.9 (or, in the case of an <i>insurer</i> whose head office is not in the United Kingdom, that amount

³⁰ For guidance, see paragraph 3 of **Guidance Note 4.1**

	<p>which would apply if its head office were in the United Kingdom) less the amount of any <i>implicit item</i> valued in accordance with a waiver under section 148 of the <i>Act</i>, and</p> <p>(ii) the amount of any <i>deposit-back</i> in connection with a contract of <i>reinsurance</i> in respect of <i>long-term insurance business</i>; or</p> <p>(b) such other amount as the <i>insurer</i> may select not exceeding the value of its assets (other than <i>general insurance business assets</i> and excluding <i>reinsurance recoveries</i> and assets required to match <i>property linked liabilities</i>) in accordance with the <i>Valuation of Assets Rules</i>,</p> <p>except that for the purposes of determining the <i>permitted asset exposure limit</i> under paragraph 2 of Part I of Appendix 4.2, <i>index linked liabilities</i> must also be excluded from (a) and assets required to match such liabilities must be also excluded from (b)</p>
<i>long-term insurance business assets, and long-term insurance business liabilities</i>	respectively assets of an <i>insurer</i> which are, for the time being, identified as representing the <i>long-term insurance fund or funds</i> , and liabilities of an <i>insurer</i> arising under or in connection with its <i>long-term insurance business</i> , including arising from <i>deposit back arrangements</i>
<i>long-term insurance contract</i>	any <i>contract of insurance</i> falling within Annex 11.1
<i>long-term insurance fund</i>	a fund maintained under rule 3.1
<i>long-term insurer</i>	an <i>insurer</i> whose business includes effecting or carrying out <i>long-term insurance contracts</i>
<i>long-term policy holder</i>	a <i>policy holder</i> in respect of a <i>policy</i> the effecting of which by the <i>insurer</i> constituted the carrying on of <i>long-term insurance business</i>
<i>majority shareholder controller</i>	a <i>shareholder controller</i> whose shareholding is such that the <i>insurer</i> is his <i>subsidiary undertaking</i>

<i>management expenses</i>	in relation to <i>long-term insurance business</i> , means all expenses, other than commission, incurred in the administration of an <i>insurer</i> or its business
<i>margin of solvency</i>	is the excess of the value of assets over the amount of liabilities, that value and amount being determined in accordance with the <i>Valuation of Assets Rules</i> and the <i>Determination of Liabilities Rules</i>
<i>Margins of Solvency Rules</i>	the rules in Chapter 2
<i>marine mutual</i>	<p>an <i>insurer</i> -</p> <p>(a) whose <i>insurance business</i> is restricted to the insurance of its members or their <i>associates</i> against loss, damage or liability arising out of marine adventures (including losses on inland waters or any risk incidental to any sea voyage); and</p> <p>(b) whose articles of association, rules or bye laws provide for the calling of additional contributions from, or the reduction of benefits to, the majority of its members, in either case without limit, in order to ensure that the <i>insurer</i> has sufficient financial resources to meet any valid <i>claims</i> as they fall due</p>
<i>market value</i>	the market value as determined in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate to <i>insurers</i>
<i>material connected-party transaction</i>	<p>a <i>connected-party transaction</i> for which (together with any similar transactions):</p> <p>(a) the price actually paid or received for the transfer of assets or liabilities or the performance of services; or</p> <p>(b) the price which would have been paid or received had that transaction been negotiated at arm's length between unconnected parties,</p> <p>exceeds:</p>

	<p>(c) in the case of an <i>insurer</i> that carries on either <i>general insurance business</i> or <i>long-term insurance business</i>, but not both, 5% of the <i>general insurance business amount</i> or <i>long-term business insurance amount</i>, as applicable; or</p> <p>(d) in the case of an <i>insurer</i> that carries on both types of business either –</p> <p>(i) 5% of the <i>long-term insurance business amount</i> where the transaction is in connection with the <i>insurer's long term business</i>, or</p> <p>(ii) in other cases, 5% of the <i>general insurance business amount</i></p>
<i>mathematical reserves</i>	the provision made by an <i>insurer</i> to cover liabilities (excluding liabilities which have fallen due and liabilities arising from <i>deposit back arrangements</i>) arising under or in connection with <i>long-term insurance contracts</i>
<i>maximum reserve</i>	for the purposes of the <i>Equalisation Reserves Rules</i> , the aggregate value of the <i>business group maxima</i> calculated in accordance with Part III of Appendix 6.1
<i>the minimum</i>	in relation to a <i>deposit</i> , means one-half of the <i>minimum guarantee fund</i> appropriate to the <i>margin of solvency</i> which the <i>insurer</i> is required to maintain under rule 2.1(2)(b) or 2.1(3)(e)
<i>minimum guarantee fund</i>	has the meaning given in rule 2.9
<i>mortgage</i>	in relation to Scotland, means a heritable security within the meaning of section 9(8) of the Conveyancing and Feudal Reform (Scotland) Act 1970
<i>mutual</i>	an <i>insurer</i> which -
	<p>(a) if it is a <i>body corporate</i> has no share capital; or</p> <p>(b) a <i>registered society</i></p>

<i>net claims incurred</i>	in respect of a <i>financial year</i> means <i>claims</i> arising from incidents occurring during that <i>financial year</i> (including direct <i>claims</i> handling expenses), net of <i>reinsurance</i> and other recoveries but excluding <i>claims management costs</i>
<i>net claims paid</i>	in respect of a <i>financial year</i> means <i>claims</i> paid during that <i>financial year</i> (including direct <i>claims</i> handling expenses), net of <i>reinsurance</i> and other recoveries but excluding <i>claims management costs</i> , regardless of whether incidents giving rise to such <i>claims</i> occurred during that <i>financial year</i> or any preceding <i>financial year</i>
<i>net operating expenses</i>	the net amount paid in a <i>financial year</i> in respect of commissions, other acquisition expenses, administrative expenses, <i>reinsurance</i> commissions and profit participations
<i>net premiums earned, and net premiums written</i>	respectively, <i>gross premiums earned</i> , net of <i>reinsurance</i> premiums earned and <i>gross premiums written</i> , net of <i>reinsurance</i> premiums payable under <i>reinsurance ceded</i>
<i>non-directive insurer</i>	<p>(1) an <i>insurer</i> whose <i>insurance business</i> is restricted to the provision of benefits which vary according to the resources available and in which the contributions of the members are determined on a flat-rate basis;</p> <p>(2) an <i>insurer</i> whose <i>long-term insurance business</i> is restricted to the provision of benefits for employed and self-employed persons belonging to an undertaking or group of undertakings, or a trade or group of trades, in the event of death or survival or of discontinuance or curtailment of activity (whether or not the <i>commitments</i> arising from such operations are fully covered at all times by <i>mathematical reserves</i>);</p> <p>(3) an <i>insurer</i> which undertakes to provide benefits solely in the event of death where the amount of such benefits does not exceed the average funeral costs for a single death or where the benefits are provided in kind;</p> <p>(4) a <i>mutual</i> (carrying on <i>long-term insurance business</i>) –</p> <p>(a) whose articles of association contain provisions for calling up additional</p>

	<p>contributions from members or reducing their benefits or claiming assistance from other persons who have undertaken to provide it; and</p> <p>(b) whose annual <i>gross premium</i> income (other than from contracts of <i>reinsurance</i>) has not exceeded 500,000 Euro for each of the <i>financial year in question</i> and the two <i>previous financial years</i>;</p> <p>(5) a <i>mutual</i> (carrying on <i>general insurance business</i>) whose –</p> <p>(a) articles of association contain provisions for calling up additional contributions from members or reducing their benefits;</p> <p>(b) business does not cover liability risks, other than <i>ancillary risks</i>, or credit or suretyship risks;</p> <p>(c) <i>gross premium</i> income (other than from contracts of <i>reinsurance</i>) for the <i>preceding financial year</i> did not exceed 1,000,000 Euro; and</p> <p>(d) members provided at least half of that <i>gross premium</i> income;</p> <p>(6) an <i>insurer</i> whose <i>insurance business</i> (other than <i>reinsurance</i>) is -</p> <p>(a) restricted to the provision of assistance for persons who get into difficulties while travelling, while away from home or while away from their permanent residence;</p> <p>(b) carried out exclusively on a local basis and consists only of benefits in kind; and</p> <p>(c) such that the <i>gross premium</i> income from the provision of assistance in the <i>financial year in question</i> did not exceed 200,000 Euro; or</p> <p>(7) a <i>mutual</i> whose liabilities in respect of <i>general insurance contracts</i> are fully reinsured with or guaranteed by other <i>mutuals</i> (including <i>friendly</i></p>
--	---

	<p><i>societies</i>); and</p> <p>whose <i>insurance business</i> is limited to that described in paragraphs (1) to (6)</p>
<i>non-EEA insurer</i>	an <i>insurer</i> , other than a <i>pure reinsurer</i> , whose head office is not in an <i>EEA State</i>
<i>non-linked assets</i>	see <i>linked assets</i>
<i>non-linked contract</i>	see <i>linked long-term contract</i>
<i>non-profit policy</i>	see <i>with-profits policy</i>
<i>non-proportional reinsurance treaty</i>	see <i>proportional reinsurance treaty</i>
<i>notional required minimum margin</i>	<p>(a) in the case of an <i>insurance undertaking</i> (other than a <i>pure reinsurer</i>) that has its head office in a <i>designated state or territory</i>, the amount of the <i>required minimum margin</i>, or equivalent, under the regulatory requirements of that state or territory;</p> <p>(b) in the case of a <i>pure reinsurer</i> that has its head office in a <i>designated state or territory</i>, the amount that would be the <i>required minimum margin</i>, or equivalent, if the regulatory requirements of that state or territory applicable to undertakings carrying on <i>direct insurance business</i> were applied to the <i>pure reinsurer</i>; and</p> <p>(c) in all other cases, the amount of the <i>required minimum margin</i> that would apply if the <i>insurance undertaking</i> were an <i>insurer</i> with its head office in the United Kingdom (whether it is or not)</p>
<i>nuclear installation</i>	any installation prescribed by the Nuclear Installations Regulations 1971
<i>nuclear matter, and nuclear reactor</i>	have the same meanings as in the Nuclear Installations Act 1965
<i>nuclear risks</i>	risks falling within any <i>class</i> of <i>general insurance business</i> and arising in connection with the construction or use of any <i>nuclear reactor</i> or <i>nuclear installation</i> or

	the carriage of any <i>nuclear matter</i>
<i>option</i>	<p>an option to acquire or dispose of –</p> <p>(a) an investment falling within any of articles 76 to 82 or, so far as relevant to those articles, within article 89 of the <i>Regulated Activities Order</i>;</p> <p>(b) a <i>contractually based investment</i>;</p> <p>(c) currency of the United Kingdom or of any other country or territory;</p> <p>(d) palladium, platinum, gold or silver; or</p> <p>(e) an investment falling within this definition by virtue of (a), (b), (c) or (d),</p> <p>or a <i>warrant</i></p>
<i>ordinary long-term insurance business</i>	<i>long-term insurance business</i> which is not <i>industrial assurance business</i>
<i>parent undertaking</i>	is construed in accordance with section 258 of the <i>Companies Act</i> and article 266 of the <i>1986 Order</i>
<i>participating undertaking</i>	an undertaking which holds a <i>participation</i> in the undertaking in question
<i>participation</i>	<p>(a) the holding of a participating interest within the meaning of section 411(2) of the <i>Act</i>; or</p> <p>(b) the holding, directly or indirectly, of 20% or more of the voting rights or capital</p>
<i>Part II business, and Part III business</i>	the <i>insurance business</i> to which Part II and Part III, respectively, of the <i>Equalisation Reserves Rules</i> applies
<i>Part II insurer, and Part III insurer</i>	an <i>insurer</i> to which <i>Part II</i> and <i>Part III</i> , respectively, of the <i>Equalisation Reserves Rules</i> applies

	and their dependants of its <i>subsidiary</i> or <i>holding company</i> or a <i>subsidiary</i> of its <i>holding company</i>
<i>period of risk</i>	the period for which a <i>contract of insurance</i> provides cover
<i>permanent health contract</i>	a contract falling within <i>class IV</i> of <i>long-term insurance contracts</i>
<i>permitted asset exposure limit</i>	has the meaning given in paragraph 2 of Appendix 4.2
<i>permitted connected property</i>	property of any of the descriptions in paragraphs 1 to 8 or 10 of Part I of Appendix 3.2 , which is not property falling within rule 3.7(3)
<i>permitted counterparty exposure limit</i>	has the meaning set out in paragraph 3 of Appendix 4.2
<i>permitted derivative contract</i>	<p>(1) for the purpose of Appendix 3.2, a <i>derivative contract</i> -</p> <p>(a) which is ‘covered’ and -</p> <p>(i) which is held in connection with ‘property’ for the purposes of reduction of investment risk or efficient portfolio management, or</p> <p>(ii) which has the effect of a <i>permitted derivative contract</i> held in connection with ‘property’ for such purposes; and</p> <p>(b) which satisfies the conditions in rules 4.12(6) to (8) except that the references in rule 4.12 to ‘an asset for the valuation of which provision is made in the <i>Valuation of Assets Rules</i>’ is construed as a reference to <i>permitted connected property</i>;</p> <p>(2) property is -</p> <p>(a) <i>permitted connected property</i>, not being a contract or asset having the effect of a <i>derivative contract</i>; or</p>

	<p>(b) a <i>permitted derivative contract</i> or contract or asset having the effect of a <i>permitted derivative contract</i> either of which when taken together with the <i>permitted derivative contract</i> mentioned in (1), has the effect that the <i>insurer</i> holds either <i>permitted connected property</i> or a <i>permitted derivative contract</i> in connection with such property; and</p> <p>(3) a <i>derivative contract</i> is covered if it would not require a significant provision to be made in respect of it pursuant to rule 5.3 if it were a <i>derivative contract</i> to which the <i>Valuation of Asset Rules</i> applied</p>
<i>permitted securities</i>	<i>securities</i> in which cash under the control of or subject to the order of the Supreme Court may be invested pursuant to the relevant rules of court
<i>policy</i>	<p>(a) in relation to <i>long-term insurance business</i> and <i>industrial assurance business</i>, includes an instrument evidencing a contract to pay an <i>annuity upon human life</i>;</p> <p>(b) in relation to <i>insurance business</i> of any other kind, includes any policy under which there is for the time being an existing liability already accrued or under which a liability may accrue; and</p> <p>(c) in relation to capital redemption <i>insurance business</i>, includes any policy, bond, certificate, receipt or other instrument evidencing the <i>contract of insurance</i> with the <i>insurer</i></p>
<i>policy holder</i>	<p>the person who for the time being is the legal holder of the <i>policy</i> for securing the contract with the <i>insurer</i>, and -</p> <p>(a) in relation to such <i>long-term insurance business</i> or <i>industrial assurance business</i> as consists in the granting of <i>annuities upon human life</i>, includes an annuitant; and</p> <p>(b) in relation to <i>insurance business</i> of any other kind, includes a person to whom, under a <i>policy</i>, a sum is due or a periodic payment is payable</p>

<i>preceding financial year</i>	see <i>financial year in question</i>
<i>previous financial years</i>	see <i>financial year in question</i>
<i>profit and loss account</i>	in relation to an <i>insurer</i> not trading for profit, an income and expenditure account
<i>profit reserves</i>	has the same meaning as <i>future profits</i>
<i>proper valuation</i>	in relation to land, a valuation made by a <i>qualified valuer</i> not more than three years before the <i>relevant date</i> which determined the amount which would be realised at the time of the valuation on an open market sale of the land free from any <i>mortgage</i> or charge
<i>property linked benefits</i>	benefits other than <i>index linked benefits</i> provided for under a <i>linked long-term contract</i>
<i>property linked contract</i>	a <i>linked long-term contract</i> conferring <i>property linked benefits</i>
<i>property linked liabilities</i>	<i>insurance liabilities</i> in respect of <i>property linked benefits</i>
<i>proportionate share</i>	in the case of a <i>related undertaking</i> of an <i>insurer</i> , the percentage holding (directly or indirectly) of the <i>related undertaking</i> capital
<i>proportional reinsurance treaty</i>	<p>(a) a <i>reinsurance</i> treaty under which a pre-determined proportion of each <i>claim</i> payment by the <i>cedant</i> under <i>policies</i> subject to the treaty is recoverable from the <i>reinsurer</i>; and</p> <p>(b) for the purposes of the <i>Accounts and Statements Rules</i>, a <i>reinsurance</i> treaty under which in return for a proportion of the premium a pre-determined proportion of each <i>claim</i> payment by the <i>cedant</i> under <i>policies</i> subject to the treaty is recoverable from the <i>reinsurer</i>, and</p> <p>non-proportional reinsurance treaty is construed accordingly</p>
<i>pure reinsurer</i>	an <i>insurer</i> whose <i>insurance business</i> is as a matter of fact restricted to effecting or carrying out contracts of <i>reinsurance</i>

<i>qualified valuer</i>	<p>in relation to any particular type of land in any particular area, means –</p> <p>(a) a person who is a fellow or professional associate of the Royal Institution of Chartered Surveyors or a fellow or associate of the Incorporated Society of Valuers and Auctioneers or a fellow or associate of the Rating and Valuation Association and either –</p> <p>(i) has knowledge of and experience in the valuation of that particular type of land in that particular area, or</p> <p>(ii) has knowledge of and experience in the valuation of land and has taken advice from a valuer who he is satisfied has knowledge of and experience in the valuation of that particular type of land in that particular area; or</p> <p>(b) a person who conforms with (a)(i) or (ii) and immediately before 15 June 1981 was recognised as a qualified valuer by virtue of an approval by the Secretary of State under the Insurance Companies (Valuation of Assets) Regulations 1976 (and for these purposes an approval given under the Insurance Companies (Valuation of Assets) Regulations 1974 is deemed to have been given under the 1976 Regulations)</p>
<i>qualifying contract of insurance</i>	<p>means a <i>long-term insurance contract</i> which is not</p> <p>(a) a <i>reinsurance contract</i>; or</p> <p>(b) a contract in respect of which the following conditions are met –</p> <p>(i) the benefits under the contract are payable only on death or in respect of incapacity due to injury, sickness or infirmity;</p> <p>(ii) the contract provides that benefits are payable on death (other than death due to an accident) only where the death occurs within ten years of the date on which the life of the person in question was first</p>

	<p>insured under the contract, or where the death occurs before that person attains a specified age not exceeding seventy years;</p> <p>(iii) the contract has no surrender value, or the consideration consists of a single premium and the surrender value does not exceed that premium; and</p> <p>(iv) the contract makes no provision for its conversion or extension in a manner which would result in it ceasing to comply with any of the above conditions</p>
<i>readily realisable</i>	<p>in relation to a <i>listed</i> investment means a <i>listed</i> investment to which rule 4.8(4) either does not apply or applies by reason only that -</p> <p>(a) the listing of the investment has been temporarily suspended following receipt of price sensitive information received by the stock exchange on which the investment is <i>listed</i> or the <i>regulated market</i> on which facilities for dealing have been granted; or</p> <p>(b) the extent of the holding would prevent an orderly disposal of the investment for an amount equal to or greater than 97.5% of market value</p>
<i>receivable</i>	<p>in relation to an <i>insurer</i>, a <i>financial year</i> and a premium, means due to the <i>insurer</i> in respect of <i>contracts of insurance incepted</i> during that <i>financial year</i>, whether or not the premium is received during that <i>financial year</i></p>
<i>recoverable</i>	<p>in relation to an <i>insurer</i> and a <i>financial year</i>, means recorded in the <i>insurer's</i> books as due in that year, whether or not the <i>insurer</i> has received any payment</p>
<i>registered friendly society</i>	<p>a society which is –</p> <p>(a) a friendly society within the meaning of section 7(1)(a) of the Friendly Societies Act 1974; and</p> <p>(b) registered within the meaning of that Act</p>

<i>registered society</i>	a society registered or deemed to be registered under the Industrial and Provident Societies Act 1965 or the Industrial and Provident Societies Act (Northern Ireland) 1969
<i>Regulated Activities Order</i>	Financial Services and Markets Act (Regulated Activities) Order (S.I. 2001 No. 544)
<i>regulated activity</i>	is construed in accordance with the <i>Regulated Activities Order</i>
<i>regulated institution</i>	any of the following – <ul style="list-style-type: none"> (a) an <i>EEA insurer</i> or <i>UK insurer</i>; (b) an <i>approved credit institution</i>; (c) a <i>friendly society</i> which is authorised to carry on <i>insurance business</i>; and (d) an <i>approved investment firm</i>
<i>regulated market</i>	a market which is characterised by - <ul style="list-style-type: none"> (a) regular operation; (b) the fact that regulations issued or approved by the appropriate authority of the state where the market is situated - <ul style="list-style-type: none"> (i) define the conditions for the operation of and access to the market, (ii) define the conditions to be satisfied by a financial instrument in order for it to be effectively dealt in on the market, and (iii) require compliance with reporting and transparency requirements comparable to those laid down in articles 20 and 21 of the <i>Investment Services Directive</i>, and (c) in the case of a market situated outside the <i>EEA States</i>, the fact that the financial instruments dealt in are of a quality comparable to those in a <i>regulated market</i> in the United Kingdom

<i>reinsurance, and reinsurer</i>	include retrocession and retrocessionaire respectively
<i>reinsurance recoveries</i>	amounts in respect of <i>claims</i> receivable by an <i>insurer</i> from a <i>reinsurer</i> under a contract of <i>reinsurance</i>
<i>related company</i>	in relation to an <i>insurer</i> – <ul style="list-style-type: none"> (a) a <i>subsidiary undertaking</i> of the <i>insurer</i>; (b) a company of which the <i>insurer</i> is a <i>subsidiary undertaking</i>; or (c) a <i>subsidiary undertaking</i> of a company of which the <i>insurer</i> is a <i>subsidiary undertaking</i>
<i>related undertaking</i>	an undertaking in which a <i>participation</i> is held by another undertaking or which is a <i>subsidiary undertaking</i>
<i>relevant co-insurance operation</i>	has the meaning given in Appendix 5.1
<i>relevant company</i>	an <i>insurer</i> whose <i>insurance business</i> is restricted to <i>reinsurance</i> of the <i>marine mutual</i> on terms that provide that the <i>marine mutual</i> can cancel the <i>reinsurance</i> arrangements at any time and can require the <i>insurer</i> immediately to transfer its assets and liabilities to the <i>marine mutual</i>
<i>relevant date</i>	in relation to the valuation of any asset for any purpose for which the <i>Valuation of Assets Rules</i> apply, the date when the asset falls to be valued for that purpose and in relation to the determination of any liability for any purpose for which the <i>Determination of Liabilities Rules</i> apply, the date when the liability falls to be determined for that purpose
<i>relevant insurer</i>	in relation to a <i>relevant co-insurance operation</i> , an <i>insurer</i> which is concerned in the operation but is not the <i>leading insurance undertaking</i>
<i>relevant regulatory requirements</i>	for the purposes of (2)(b) and (3)(a): <ul style="list-style-type: none"> (a) in the case of a <i>group undertaking</i> that is an <i>insurance undertaking</i> established in a <i>designated state or territory</i>, at the option of the <i>insurer</i>, either:

	<ul style="list-style-type: none"> (i) the regulatory requirements of that state or territory applicable to an undertaking carrying on <i>direct insurance business</i> (even if it only carries on reinsurance business), or (ii) the requirements referred to in (b); and <p>(b) in the case of any other <i>insurance undertaking</i>, the rules in <i>IPRU (INS)</i> applicable to an <i>insurer</i> with its head office in the United Kingdom (whether or not it is such an <i>insurer</i>)</p>
<i>required margin of solvency</i>	a <i>margin of solvency</i> required by rule 2.1
<i>required minimum margin</i>	the greater of the appropriate <i>required margin of solvency</i> and the amount of the appropriate <i>guarantee fund</i> ; and 'required EEA minimum margin' and 'required United Kingdom minimum margin' are construed accordingly
<i>return</i>	the documents required (taken together) to be deposited under rule 9.6(1)

<i>salvage right</i>	any right of an <i>insurer</i> under a <i>contract of insurance</i> to take possession of and to dispose of property by virtue of the fact that the <i>insurer</i> has made a payment or has become liable to make a payment in respect of a loss under the contract
<i>second calculation</i>	is the calculation described in rule 2(5)(1) and 2.5(3) to (6)
<i>secured debt</i>	<p>(1) a <i>debt</i> owed to (or an obligation to be fulfilled for the benefit of) an <i>insurer</i> to the extent it is -</p> <ul style="list-style-type: none"> (a) secured by - <ul style="list-style-type: none"> (i) a letter of credit established with an <i>approved credit institution</i>, or (ii) a guarantee provided by an <i>approved credit institution</i>, <p>where the sum of the aggregate amount available under all letters of credit established for the</p>

	<p>benefit of the <i>insurer</i> with the same <i>counterparty</i>, the aggregate amount of all guarantees issued for the benefit of the <i>insurer</i> by that <i>counterparty</i> and the amount of any <i>exposure</i> of the <i>insurer</i> to that <i>counterparty</i> does not exceed the <i>permitted counterparty exposure limit</i> for that <i>counterparty</i>; or</p> <p>(b) secured by assets for the valuation of which provision is made in the <i>Valuation of Assets Rules</i> and -</p> <p>(i) the value of such assets (after deducting reasonable expenses of sale and the amount of any other <i>debt</i> or obligation secured by the assets having priority to in ranking equally with the <i>debt</i> or obligation) is sufficient to enable the <i>debt</i> or obligation to be discharged in full,</p> <p>(ii) the value of the assets when aggregated with the <i>insurer's exposure</i> to assets of the same description does not exceed the <i>permitted exposure limit</i> for assets of that description (as calculated under rule 4.14 of Appendix 4.2), and</p> <p>(iii) where the assets give rise to <i>exposure</i> to a <i>counterparty</i>, the exposure of the <i>insurer</i> to that <i>counterparty</i>, when added to the aggregate amount available under all letters of credit established for the benefit of the <i>insurer</i> with that <i>counterparty</i>, and to the aggregate amount of all guarantees issued for the benefit of the <i>insurer</i> by that <i>counterparty</i>, does not exceed the <i>permitted counterparty exposure limit</i> for that <i>counterparty</i>;</p> <p>(2) for the purpose of (1) -</p> <p>(a) the aggregate amount available under letters of credit established with a <i>counterparty</i> must be taken not to exceed</p>
--	---

	<p>the sum of the aggregate amount of all <i>debts</i> and the aggregate value of all obligations in respect of which those letters of credit were established;</p> <p>(b) the aggregate amount of guarantees issued by a <i>counterparty</i> must be taken not to exceed the sum of the aggregate amount of all <i>debts</i> and the aggregate value of all obligations so guaranteed; and</p> <p>(c) assets which are securing any other <i>debt</i> owed to (or obligation to be fulfilled for the benefit of) the <i>insurer</i> must be treated as if they were assets of the <i>insurer</i>;</p> <p>and unsecured debt is construed accordingly</p>
<i>securities</i>	includes <i>shares, debt securities, Treasury Bills, Tax Reserve Certificates and Certificates of Tax Deposit</i>
<i>settlement date</i>	any date on which the fulfilment of an obligation under a <i>derivative contract</i> is or may be required
<i>share</i>	has the meaning given in the <i>Companies Act</i> or the <i>1986 Order</i>
<i>shareholder controller</i>	see rule 11.2 for <i>controller</i>
<i>short term deposit</i>	a sum of money which may be withdrawn at the discretion of the lender without penalty or loss of accrued interest by giving notice of withdrawal of one month or less
<i>Society</i>	the society incorporated by Lloyd's Act 1871 by the name of Lloyd's
<i>Statistical Rules</i>	rules 9.37 to 9.38
<i>Stock Exchange</i>	London Stock Exchange plc
<i>subordinated debt</i>	any <i>debt</i> which, on a winding up of the debtor, ranks for payment after the claims of general creditors and is not to be repaid until the claims of all the general creditors outstanding at the time have been settled

<i>subsidiary</i>	is construed in accordance with section 736 of the <i>Companies Act</i> or Article 4 of the <i>1986 Order</i>
<i>subsidiary undertaking</i>	is construed in accordance with section 258 of the <i>Companies Act</i> or Article 266 of the <i>1986 Order</i>
<i>SUP</i>	Supervision manual
<i>surplus assets</i>	has the meaning given in rule 4.2(2)
<i>Swiss general insurer</i>	a <i>non-EEA insurer</i> which has its head office in Switzerland and which has permission under the <i>Act</i> to effect or carry out <i>general insurance contracts</i> in accordance with the Swiss Treaty Agreement of 10 October 1989

<i>technical provisions</i>	the items required by the <i>insurance accounts rules</i> to be shown in the balance sheet of an <i>insurer</i> at liabilities items C.1 to 6
<i>Third Life Directive</i>	Council Directive of 10 November 1992 on the co-ordination of laws, etc and amending Directives 79/267/EEC and 90/619/EEC (92/96/EEC)
<i>Third Non-Life Directive</i>	Council Directive of 18 June 1992 on the co-ordination of laws, etc, and amending Directives 73/239/EEC and 88/357/EEC (92/49/EEC)
<i>Treasury Bills</i>	includes bills issued by Her Majesty's Government in the United Kingdom and Northern Ireland Treasury Bills

<i>ultimate EEA insurance parent undertaking</i>	an <i>EEA insurance parent undertaking</i> that is not itself the <i>subsidiary undertaking</i> of another <i>EEA insurance parent undertaking</i>
<i>ultimate insurance parent undertaking</i>	an <i>insurance parent undertaking</i> that is not itself the <i>subsidiary undertaking</i> of another <i>insurance parent undertaking</i>
<i>UCITS</i>	is an undertaking for collective investments in transferable <i>securities</i>
<i>UCITS Directive</i>	Council Directive 85/611/EEC of 20 December 1985 on the co-ordination of laws, regulations and administrative provisions relating to undertakings for collective investments in transferable <i>securities</i>

<i>UK-deposit insurer</i>	a <i>non-EEA insurer</i> which has made a <i>deposit</i> in the United Kingdom in accordance with rule 8.1
<i>UK insurer</i>	an <i>insurer</i> , other than a <i>pure reinsurer</i> or a <i>non-directive insurer</i> , whose head office is in the United Kingdom
<i>UK margin of solvency</i>	an <i>insurer's margin of solvency</i> computed by reference to the assets and liabilities of the business carried on by that <i>insurer</i> in the United Kingdom under rule 2.4
<i>unlisted</i>	see <i>listed</i>
<i>unsecured debt</i>	see <i>secured debt</i>

<i>Valuation of Assets Rules</i>	the rules in Chapter 4;
<i>variable interest securities</i>	<i>securities</i> which under their terms of issue provide for variable amounts of interest
<i>variation margin</i>	<p>(a) in respect of a <i>derivative contract</i>, or a contract having the effect of a <i>derivative contract</i>³¹, assets (other than assets transferred by way of <i>initial margin</i>) which, at the <i>relevant date</i>, have been transferred by, to, or for the benefit of the <i>insurer</i> in pursuance of a condition in that contract or a related contract; and</p> <p>(b) in respect of an asset having the effect of a <i>derivative contract</i>, assets which, at the relevant date, have been transferred by, to, or for the benefit of, the <i>insurer</i> in pursuance of a contractual right conferred, or obligation imposed, by the holding of the asset having the effect of a <i>derivative contract</i></p>
<i>warrant</i>	an instrument which falls within article 79 of the <i>Regulated Activities Order</i>

³¹ See rule 4.13

<i>with profits fund</i>	for the purposes of the <i>Accounts and Statements Rules</i> – (a) a <i>long-term insurance fund</i> (or that part of such a fund) in which <i>policy holders</i> are eligible to participate in any <i>established surplus</i> ; and (b) where it is an <i>insurer's</i> usual practice to restrict <i>policy holders' participation</i> in any <i>established surplus</i> to that arising from only a part of the fund (or part fund) falling within (a), that part (or that part of the part fund)
<i>with-profits policy</i>	a contract falling within a <i>class of long-term insurance business</i> which is eligible to participate in any part of any <i>established surplus</i> , and non-profit policy is construed accordingly
<i>zillmerising</i>	in relation to the <i>Margins of Solvency Rules</i> , means the method known by that name for modifying the net premium reserve method of valuing a long-term <i>policy</i> by increasing the part of the future premiums for which credit is taken so as to allow for initial expenses

Controller

- 11.2 (1) For the purpose of *IPRU (INS)*, **controller**, in relation to an undertaking ("A"), means a person who falls within any of the cases in (2).
- (2) The cases are where the 'person' –
- (a) holds 10% or more of the 'shares' in A;
 - (b) is able to exercise significant influence over the management of A by virtue of his shareholding in A;
 - (c) holds 10% or more of the 'shares' in a parent undertaking ("P") of A;
 - (d) is able to exercise significant influence over the management of P by virtue of his shareholding in P;
 - (e) is entitled to exercise, or control the exercise of, 10% or more of the 'voting power' in A;

- (f) is able to exercise significant influence over the management of A by virtue of his 'voting power' in A;
 - (g) is entitled to exercise, or control the exercise of, 10% or more of the 'voting power' in P; or
 - (h) is able to exercise significant influence over the management of P by virtue of his 'voting power' in P.
- (3) In (2) the **person** means –
- (a) the person;
 - (b) any of the person's *associates*; or
 - (c) the person and any of his *associates*.
- (4) **Associate**, in relation to a 'person' ("H") holding '*shares*' in an undertaking ("C") or entitled to exercise or control the exercise of 'voting power' in relation to another undertaking ("D"), means -
- (a) the spouse of H;
 - (b) a child or stepchild of H (if under 18);
 - (c) the trustee of any 'settlement' under which H has a life interest in possession (or in Scotland a life interest);
 - (d) an undertaking of which H is a *director*;
 - (e) a person who is an employee or partner of H;
 - (f) if H is an undertaking-
 - (i) a *director* of H,
 - (ii) a *subsidiary undertaking* of H,
 - (iii) a *director* or employee of such a *subsidiary undertaking*; and
 - (g) if H has with any other person an agreement or arrangement with respect to the acquisition, holding or disposal of '*shares*' or other interests in C or D or under which they undertake to act together in exercising their 'voting power' in relation to C or D, that other person.
- (5) **Settlement**, in (4)(c), includes any disposition or arrangement under which property is held on trust (or subject to a comparable obligation).

- (6) **Shares -**
- (a) in relation to an undertaking with *share* capital, means allotted shares;
 - (b) in relation to an undertaking with capital but no *share* capital, means rights to share in the capital of the undertaking; and
 - (c) in relation to an undertaking without capital, means interests -
 - (i) conferring any right to share in the profits, or liability to contribute to the losses, of the undertaking, or
 - (ii) giving rise to an obligation to contribute to the debts or expenses of the undertaking in the event of a winding up.
- (7) **Voting power**, in relation to an undertaking which does not have general meetings at which matters are decided by the exercise of voting rights, means the right under the constitution of the undertaking to direct the overall policy of the undertaking or alter the terms of its constitution.

PART 2

GENERAL PROVISIONS

Powers under which the rules are made

- 11.3 The rules and guidance in the *IPRU (INS)* are made under the following sections of the *Act* -
- (a) section 138 (general rule making power);
 - (b) section 141 (insurance business rules);
 - (c) section 150(2) (actions for damages);
 - (d) section 156 (general supplementary powers);
 - (e) section 157 (guidance); and
 - (f) section 340 (appointment of auditors and actuaries).

Actions for damages

- 11.4 Section 150(1) of the *Act* does not apply to a contravention of the rules in the *IPRU (INS)*.

Use of definitions

- 11.5 A word which is printed in italics is used in the defined sense.
- 11.6 Unless the context otherwise requires, a word or phrase which is defined in a related enactment bears the same meaning as in that enactment.
- 11.7 Unless the context otherwise requires, a word which is related to a defined word is construed by reference to the defined word.

Supplementary and ancillary provisions

- 11.8 For the purposes of this *IPRU (INS)*:
- (a) a *contract of insurance* is to be treated as falling within **Annex 11.1**, notwithstanding the fact that that it contains supplementary provisions falling within *class 1* or *class 2* of **Annex 11.2** if:
 - (i) its principal object is that of a contract falling within **Annex 11.1**, and

- (ii) it is effected or carried out by an *insurer* who has permission to effect or carry out contracts falling within *class I* of **Annex 11.1**; and
 - (b) a *contract of insurance* whose principal risk falls within any of *classes 1 to 18* of **Annex 11.2** is to be treated as falling within that *class* and no other, notwithstanding the fact that it also covers *ancillary risks*.
-

ANNEX 11.1

CLASSES OF LONG-TERM INSURANCE BUSINESS

Number	Description	Nature of business
I	Life and annuity	Effecting or carrying out <i>contracts of insurance</i> on human life or contracts to pay <i>annuities on human life</i> , but excluding (in each case) contracts within <i>class III</i> .
II	Marriage and birth	Effecting or carrying out <i>contracts of insurance</i> to provide a sum on marriage or on the birth of a child, being contracts expressed to be in effect for a period of more than one year.
III	Linked long term	Effecting or carrying out <i>contracts of insurance</i> on human life or contracts to pay <i>annuities on human life</i> where the benefits are wholly or partly to be determined by reference to the value of, or the income from, property of any description (whether or not specified in the contracts) or by reference to fluctuations in, or in an index of, the value of property of any description (whether or not so specified).
IV	Permanent health	<p>Effecting or carrying out <i>contracts of insurance</i> providing specified benefits against risks of persons becoming incapacitated in consequence of sustaining injury as a result of an accident or of an accident of a specified class or of sickness or infirmity, being contracts that -</p> <p>(a) are expressed to be in effect for a period of not less than five years, or until the normal retirement age for the persons concerned, or without limit of time; and</p> <p>(b) either are not expressed to be terminable by the insurer, or are expressed to be so terminable only in special circumstances mentioned in the contract.</p>
V	Tontines	Effecting or carrying out tontines.

VI	Capital redemption	Effecting or carrying out capital redemption contracts.
VII	Pension fund management	Effecting or carrying out- (a) <i>pension fund management</i> contracts; or (b) contracts of the kind mentioned in (a) that are combined with <i>contracts of insurance</i> covering either conservation of capital or payment of a minimum interest.
VIII	Collective insurance etc	Effecting or carrying out contracts of a kind referred to in Article 1(2)(e) of the <i>First Life Directive</i> .
IX	Social insurance	Effecting or carrying out contracts of a kind referred to in Article 1(3) of the <i>First Life Directive</i> .

ANNEX 11.2

CLASSES, AND GROUPS OF CLASSES, OF GENERAL INSURANCE BUSINESS

Part I

Classes of general insurance business

Number	Description	Nature of business
1	Accident	<p>Effecting or carrying out <i>contracts of insurance</i> providing fixed pecuniary benefits or benefits in the nature of indemnity (or a combination of both) against risks of the person insured or, in the case of a contract made by virtue of section 140, 140A or 140B of the Local Government Act 1972, a person for whose benefit the contract is made -</p> <p>(a) sustaining injury as the result of an accident or of an accident of a specified class, or</p> <p>(b) dying as the result of an accident or of an accident of a specified class, or</p> <p>(c) becoming incapacitated in consequence of disease or of disease of a specified class,</p> <p>inclusive of contracts relating to industrial injury and occupational disease but exclusive of contracts falling within <i>class 2</i> or within <i>class IV</i> in Annex 11.1.</p>
2	Sickness	<p>Effecting or carrying out <i>contracts of insurance</i> providing fixed pecuniary benefits or benefits in the nature of indemnity (or a combination of the two) against risks of loss to the persons insured attributable to sickness or infirmity, but exclusive of contracts falling within <i>class IV</i> in Annex 11.1.</p>
3	Land vehicles	<p>Effecting or carrying out <i>contracts of insurance</i> against loss of or damage to vehicles used on land, including motor vehicles but excluding railway rolling stock.</p>
4	Railway rolling	<p>Effecting or carrying out <i>contracts of insurance</i> against loss of or damage to railway rolling stock.</p>
5	Aircraft	<p>Effecting or carrying out <i>contracts of insurance</i> upon aircraft or upon the machinery, tackle, furniture or equipment of aircraft.</p>

6	Ships	Effecting or carrying out <i>contracts of insurance</i> upon vessels used on the sea or on inland water, or upon the machinery, tackle, furniture or equipment of such vessels.
7	Goods in transit	Effecting or carrying out <i>contracts of insurance</i> against loss of or damage to merchandise, baggage and all other goods in transit, irrespective of the form of transport.
8	Fire and natural forces	Effecting or carrying out <i>contracts of insurance</i> against loss of or damage to property (other than property to which <i>classes 3 to 7</i> above relate) due to fire, explosion, storm, natural forces other than storm, nuclear energy or land subsidence.
9	Damage to property	Effecting or carrying out <i>contracts of insurance</i> against loss of or damage to property (other than property to which <i>classes 3 to 7</i> above relate) due to hail or frost or to any event (such as theft) other than those mentioned in <i>class 8</i> above.
10	Motor vehicle liability	Effecting or carrying out <i>contracts of insurance</i> against damage arising out of or in connection with the use of motor vehicles on land including third-party risks and carrier's liability.
11	Aircraft liability	Effecting or carrying out <i>contracts of insurance</i> against damage arising out of or in connection with the use of aircraft, including third-party risks and carrier's liability.
12	Liability for ships	Effecting or carrying out <i>contracts of insurance</i> against damage arising out of or in connection with the use of vessels on the sea or on inland water, including third-party risks and carrier's liability.
13	General liability	Effecting or carrying out <i>contracts of insurance</i> against risks of the persons insured incurring liabilities to third parties, the risks in question not being risks to which <i>class 10, 11 or 12</i> above relates.
14	Credit	Effecting or carrying out <i>contracts of insurance</i> against risks of loss to the persons insured arising from the insolvency of debtors of theirs or from the failure (otherwise than through insolvency) of debtors of theirs to pay their debts when due.

15	Suretyship	<p>Effecting or carrying out–</p> <p>(a) <i>contracts of insurance</i> against risks of loss to the persons insured arising from their having to perform contracts of guarantee entered into by them;</p> <p>(b) contracts for fidelity bonds, performance bonds, administration bonds, bail bonds or customs bonds or similar contracts of guarantee.</p>
16	Miscellaneous financial loss	<p>Effecting or carrying out <i>contracts of insurance</i> against any of the following risks, namely –</p> <p>(a) risks of loss to the persons insured attributable to interruptions of the carrying on of business carried on by them or to reduction of the scope of business so carried on;</p> <p>(b) risks of loss to the persons insured attributable to their incurring unforeseen expense (other than loss such as is covered by contracts falling within <i>class 18</i>);</p> <p>(c) risks neither falling within (a) or (b) nor being of a kind such that the carrying on of the business of effecting or carrying out <i>contracts of insurance</i> against them constitutes the carrying on of <i>insurance business</i> of some other class.</p>
17	Legal expenses	<p>Effecting or carrying out <i>contracts of insurance</i> against risks of loss to the persons insured attributable to their incurring legal expenses (including costs of litigation).</p>
18	Assistance	<p>Effecting or carrying out <i>contracts of insurance</i> providing either or both of the following benefits, namely –</p> <p>(a) assistance (whether in cash or in kind) for persons who get into difficulties while travelling, while away from home or while away from their permanent residence, or</p> <p>(b) assistance (whether in cash or in kind) for persons who get into difficulties otherwise than as mentioned in paragraph (a) above.</p>

Part II
Groups of classes of general insurance business

Number	Description	Nature of business
1	Accident and health	<i>Classes 1 and 2.</i>
2	Motor	<i>Class 1 (to the extent that the relevant risks are risks of the person insured sustaining injury, or dying, as the result of travelling as a passenger) and classes 3, 7 and 10.</i>
3	Marine and transport	<i>Class 1 (to the said extent) and classes 4, 6, 7 and 12.</i>
4	Aviation	<i>Class 1 (to the said extent) and classes 5, 7 and 11.</i>
5	Fire and other damage to property	<i>Classes 8 and 9.</i>
6	Liability	<i>Classes 10, 11, 12 and 13.</i>
7	Credit and suretyship	<i>Classes 14 and 15.</i>
8	General	<i>All classes.</i>

Chapter 12

TRANSITIONAL ARRANGEMENTS

Guidance:

GEN (the part of the *FSA Handbook* in High Level Standards which has the title General Provisions) contains some technical transitional provisions that apply throughout the Handbook and which are designed to ensure a smooth transition at commencement of the *Act*. These include transitional provisions relevant to record keeping and notification rules.

SUP contains transitional provisions which carry forward written concessions relating to pre-commencement provisions.

APPENDIX 2.1 (rule 2.4(1)(b))

GENERAL INSURANCE BUSINESS SOLVENCY MARGIN

FIRST METHOD OF CALCULATION (PREMIUM BASIS)

1. The *gross premiums receivable* in respect of the *insurer's* entire *general insurance business* for the *financial year in question* must be aggregated.
2. From the aggregate arrived at under 1 there must be deducted -
 - (a) any taxes included in the *gross premiums receivable*; and
 - (b) any levies that are related to premiums and are recorded in the *insurer's* books as payable in the *financial year in question* in respect of *general insurance business*.
3. The amount arrived at under 2 must be multiplied by 12 and divided by the number of months in the *financial year*.
4. If the amount arrived at under 3 is more than 10 million Euro, it must be divided into two portions, the former consisting of 10 million Euro and the latter comprising the excess.
5. Where there has been a division into two portions pursuant to 4, there must be calculated and added together 18% and 16% of the two portions respectively; and where there has been no such division, there must be calculated 18% of the amount arrived at under 3.
6. In the case of *general insurance business* consisting of health insurance based on actuarial principles, 5 applies with the substitution of 6% for 18% and 5 and one-third % for 16%, but only if all the 'necessary conditions' are satisfied.
7. For the purposes of 6, the **necessary conditions** are -
 - (a) the *gross premiums receivable* are calculated on the basis of sickness tables appropriate to the *insurance business*;
 - (b) the reserves include provision for increasing age;
 - (c) an additional premium is collected in order to set up a safety margin of an appropriate amount;
 - (d) it is not possible for the *insurer* to cancel the contract after the end of the third year of the contract; and

- (e) the contract provides for the possibility of increasing premiums or reducing payments during its currency.
8. Where 6 applies to an *insurer* whose *general insurance business* consists partly of health insurance based on actuarial principles and partly of other business, the procedure provided in 1 to 6 must operate separately for each part of the *general insurance business*, so as to produce a sum under 6 for the health insurance and a sum under 5 for the other business.
9. (1) If the 'provision for *claims* outstanding' at the end of the *preceding financial year* exceeds the provision for *claims* outstanding at the beginning of that year, the amount of the excess must be added to the 'amount of claims paid' in the *preceding financial year*.
- (2) If the 'provision for *claims* outstanding' at the beginning of the *preceding financial year* exceeds the provision for *claims* outstanding at the end of that year, the amount of the excess must be deducted from the 'amount of *claims* paid' in the *preceding financial year*.
10. (1) For the purposes of 9, the **amount of claims paid**, is the amount that is recorded in the *insurer's* books as at the end of the *financial year* -
- (a) in relation to *general insurance business classes* 1 to 17, as paid by the *insurer* (whether or not payment has been effected in that year) in full or partial settlement of the '*claims*' described in (2) and the 'expenses' described in (3); or
- (b) in relation to *general insurance business class* 18, as being the costs borne by the *insurer* (whether or not borne in that year) in respect of the assistance given,
- less (in either case) any 'recoverable' amounts within the meaning of (4).
- (2) The **claims** mentioned in (1) are *claims* under *contracts of insurance* including *claims* relating to business accounted for over a longer period than a *financial year*.
- (3) The **expenses** mentioned in (1) are expenses (such as legal, medical, surveying or engineering costs) which are incurred by the *insurer*, whether through the employment of its own staff or otherwise, and are directly attributable to the settlement of individual *claims*, whether or not the individual *claims* in question are those mentioned in (1).
- (4) **Recoverable** amounts for the purposes of (1) are amounts recoverable by the *insurer*, in respect of the '*claims*' mentioned in (1) or other *claims*, including amounts recoverable by way of salvage, amounts recoverable from third parties and amounts recoverable from other *insurers* but excluding amounts recoverable in respect of *reinsurance ceded* by the *insurer*.

11. (1) For the purposes of 9, the **provision for claims outstanding**, is (subject to the *Valuation of Asset Rules* and *Determination of Liabilities Rules*) the amount set aside by the *insurer* as at the beginning or end of the *financial year* as being an amount likely to be sufficient to meet -
- (a) the '*claims*' described in (2); and
 - (b) the '*expenses*' described in (3),
- less any '*recoverable*' amounts within the meaning of (4).
- (2) The **claims** mentioned in (1) are *claims* under *contracts of insurance* in respect of incidents occurring -
- (a) in the case of an amount set aside as at the beginning of the financial year, before the beginning of that year; and
 - (b) in the case of an amount set aside as at the end of the *financial year*, before the end of that year,
- being *claims* which have not been treated as *claims* paid including *claims* relating to business accounted for over a longer period than a *financial year*, *claims* the amounts of which have not been determined and *claims* arising out of incidents that have not been notified to the *insurer*.
- (3) The **expenses** mentioned in (1) are expenses (such as legal, medical, surveying or engineering costs) which are likely to be incurred by the *insurer*, whether through the employment of its own staff or otherwise, and are directly attributable to the settlement of individual *claims*, whether or not the individual *claims* in question are those mentioned in (1).
- (4) **Recoverable** amounts for the purposes of (1) are amounts estimated by the *insurer* to be recoverable by it in respect of the '*claims*' mentioned in (1), including amounts recoverable by way of salvage, amounts recoverable from third parties and amounts recoverable from other *insurers* but excluding amounts recoverable in respect of *reinsurance ceded* by the *insurer*.
12. From the amount determined under 9(1) or (2) there must be deducted the total sum recoverable in respect of that amount under *reinsurance* contracts *ceded*.
13. The amount determined under 12 must be expressed as a percentage of the amount determined under 9(1) or (2).
14. The sum arrived at under 5 or 6 or the aggregate of the sums arrived at under those paragraphs, as the case may be, must be multiplied -
- (a) where the percentage arrived at under 13 is greater than 50% but not greater than 100%, by the percentage so arrived at;

- (b) where the percentage so arrived at is greater than 100%, by 100%; and
 - (c) in any other case, by 50%.
-

APPENDIX 2.2 (rule 2.4(1)(b))

GENERAL INSURANCE BUSINESS SOLVENCY MARGIN

SECOND METHOD OF CALCULATION (CLAIMS BASIS)

1. In this Appendix **reference period**, in relation to an *insurer*, means either -
 - (a) the *financial year* which last ended and the two *previous financial years*; or
 - (b) the *financial year in question* and the six *previous financial years* if more than one-half of the *gross premiums receivable* in that period were in respect of all or any of the following, namely, storm (as included in *general insurance business class 8*), hail (as included in *general insurance business class 9*), frost (as included in *general insurance business class 9*) and credit (as included in *general insurance business class 14*).
2. If an *insurer* has not been in existence long enough to acquire a ‘reference period’, this Appendix must be treated as giving a lower result than that given by **Appendix 2.1** and does not otherwise apply to the *insurer*.
3.
 - (1) If the ‘provision for *claims* outstanding’ at the end of the ‘reference period’ exceeds the ‘provision for *claims* outstanding’ at the beginning of the ‘reference period’, the amount of the excess must be added to the ‘amount of *claims* paid’ in the ‘reference period’.
 - (2) If the ‘provision for *claims* outstanding’ at the beginning of the ‘reference period’ exceeds the ‘provision for *claims* outstanding’ at the end of the ‘reference period’, the amount of the excess must be deducted from the ‘amount of *claims* paid’ in the ‘reference period’.
 - (3) For the purposes of this paragraph, the expressions **amount of claims paid** and **provision for claims outstanding** have, in relation to a ‘reference period’, the same meaning as they have in paragraph 9 of **Appendix 2.1**.
4. The aggregate obtained under 3(1) or (2) must be divided by the number of months in the ‘reference period’ and multiplied by 12.
5. If the amount arrived at under 4 is more than 7 million Euro, it must be divided into two portions, the former consisting of 7 million Euro and the latter comprising the excess.
6. Where there has been a division into two portions pursuant to 5, there must be calculated and added together 26% and 23% of the two portions respectively; and where there has been no such division, there must be calculated 26% of the amount arrived at under 4.

7. In the case of *general insurance business* consisting of health insurance based on actuarial principles, 6 applies with the substitution of 8 and two-thirds % for 26% and 7 and two-thirds % for 23%, but only if all the 'necessary conditions' are satisfied.
 8. The **necessary conditions** for the purposes of 7 are the same as those set out in paragraph 7 of **Appendix 2.1**.
 9. In a case of the kind mentioned in 8 of **Appendix 2.1**, that paragraph applies (with the necessary modifications) so as to produce separate sums under 6 and 7.
 10. The sum arrived at under 6 or 7 or the aggregate of the sums arrived at under those paragraphs, as the case may be, must be multiplied by the same percentage as is applicable for the purposes of paragraph 14 of **Appendix 2.1**.
-

APPENDIX 2.3 (rule 2.9)

MINIMUM GUARANTEE FUND

Long-term business

1. Subject to 7, the *minimum guarantee fund* for *long-term insurance business* is-
 - (a) in the case of a *pure reinsurer* which -
 - (i) is the wholly-owned *subsidiary* of an *insurer* carrying on *long-term insurance business*, and
 - (ii) carries on only such *reinsurance* business as is *ceded* to it by that *insurer*, 200,000 Euro;
 - (b) in the case of a *mutual*, 600,000 Euro; and
 - (c) in any other case, 800,000 Euro.

General business

2. Subject to 3 to 7, the *minimum guarantee fund* for *general insurance business* is the amount shown in the table below as applicable to the *general insurance business class* for which the *insurer* has permission under the *Act* (or the highest such amount if the *insurer* has permission for more than one *class*).

General Business	Amount
<i>Class 10, 11, 12, 13, 14, or 15</i>	400,000 Euro
<i>Class 1, 2, 3, 4, 5, 6, 7, 8, 16, or 18</i>	300,000 Euro
<i>Class 9 or 17</i>	200,000 Euro

3. In the case where the risks covered fall within *class 14* and where the annual amount of premiums or contributions of the *insurer* due in respect of that *class* for each of the *financial year in question* and two *previous financial years* exceeded 2,500,000 Euro or 4% of the total amount of premiums or contributions receivable by the *insurer*, for the amount of Euro given in the table in 2 there must be substituted the amount of 1,400,000 Euro.
4. Where an *insurer* carrying on *credit insurance business* is required to increase the amount of Euro pursuant to 3, the *insurer* has -
 - (a) a period of three years in which to bring the fund up to 1,000,000 Euro;
 - (b) a period of five years to bring the fund up to 1,200,000 Euro; and
 - (c) a period of seven years to bring the fund up to 1,400,000 Euro,

such periods to run from the date on which the criteria set out in 3 are fulfilled.

5. An *insurer* which has permission limited to part of a *class* is, for the purposes of 2, treated as having permission for the whole of the *class*.
6. In the case of a *mutual*, the *minimum guarantee fund* required by 2 to 5 is reduced by 25%.

Long-term and general insurance business

7. In relation to a *UK margin of solvency* or *EEA margin of solvency* maintained under rule 2.1(2)(b) or (3)(e), the *minimum guarantee fund* for *long-term* or *general insurance business* is one-half of the amount arrived at by applying the provisions of this Appendix.

APPENDIX 3.2 (rule 3.7)

PERMITTED LINKS

PART I

DESCRIPTIONS OF PROPERTY BY WHICH BENEFITS MAY BE DETERMINED¹

1. *Listed securities* which are *readily realisable*, not being *securities* which are -
 - (a) *approved securities*;
 - (b) loans or deposits of the kinds mentioned in 4 and 7;
 - (c) units or other beneficial interests in a *collective investment fund*; or
 - (d) *derivative contracts*.

2. *Unlisted securities* which are *readily realisable*, not being *securities* which are -
 - (a) *approved securities*;
 - (b) loans or deposits of the kinds mentioned in 4 and 7;
 - (c) units or other beneficial interests in a *collective investment fund*; or
 - (d) *derivative contracts*.

3. Land (including any interest in land) in an *EEA State*, Australia, Canada, the Channel Islands, Gibraltar, Hong Kong, the Isle of Man, New Zealand, the Republic of South Africa, Singapore or the United States of America.

4. Loans -
 - (a) which are fully secured by a *mortgage* or charge on land (or any interest in land) which -
 - (i) is situated in any of the countries referred to in 3, and
 - (ii) in the case of a loan made to a person other than a body corporate, is not used wholly or mainly for domestic purposes; and

¹ See **Guidance Note 4.1** and **Guidance Note 9.1**

- (b) in relation to which the rate of interest and the due dates for the payment of interest and the repayment of principal can be fully ascertained from the terms of any agreement relating to the loan.
5. Units or other beneficial interests in -
- (a) a scheme falling within the *UCITS Directive*; and
 - (b) a *collective investment fund* which satisfies the following conditions -
 - (i) the property of the fund comprises property of any of the descriptions in 1 to 10,
 - (ii) the units are *readily realisable* at a price which represents the net value per unit of the assets and liabilities of the fund, and
 - (iii) the price at which the units may be bought and sold is published regularly.
6. *Approved securities.*
7. Loans to or deposits with an *approved credit institution*, an *approved financial institution* or an *approved investment firm*.
8. Income due, or to become due, in respect of property of any of the descriptions in 1 to 7.
9. *Permitted derivative contracts.*
10. Cash.
11. Units, by whatever name called, in a real or notional fund (not being a scheme or undertaking of a kind mentioned in 5) which is limited to the descriptions of property mentioned above, not being property falling within rule 3.7(3), and which under the contract is to be managed either-
- (a) wholly by the *insurer*; or
 - (b) wholly or to any extent by another person being a person for whose acts and omissions in managing the fund the *insurer* assumes responsibility towards the *policy holder* as if they were the acts or omissions of the *insurer*, and otherwise (if at all) by the *insurer*.

APPENDIX 4.1 (rule 4.3)

VALUE OF DEPENDANTS

[Deleted]

APPENDIX 4.2 (rule 4.14)

ASSETS TO BE TAKEN INTO ACCOUNT ONLY TO A SPECIFIED EXTENT

PART I

EXCESS EXPOSURE: METHOD OF CALCULATION

1. Unless the context otherwise requires, words and expressions contained in this Appendix have the same meaning as in the *Valuation of Assets Rules* and the *Determination of Liabilities Rules*.
2. The *permitted asset exposure limit* for assets of any of the descriptions in Part II of this Appendix is the percentage of the *business amount* set out immediately following the description. In the case of an asset which is not covered by any of the descriptions in Part II of this Appendix (other than a *derivative contract*), the *permitted asset exposure limit* is nil.
3. The *permitted counterparty exposure limit* is -
 - (a) where the *counterparty* is an individual or an unincorporated body of persons, 5% of the *business amount*;
 - (b) where the *counterparty* is a *counterparty* of the type mentioned in (e) in the definition of *counterparty*, 5% of the *business amount*;
 - (c) where the *counterparty* is a *body corporate* or *group*, each of -
 - (i) 20% of the *business amount* or £2 million, whichever is the larger,
 - (ii) 10% of the *business amount* or such lower amount as the *insurer* may decide where the *exposure* arises other than by reason that *debts* are due or to become due as a result of *short term deposits* made with an *approved credit institution*, and
 - (iii) 5% of the *business amount* where the *exposure* is other than to bodies which are *approved counterparties*.

Calculation of exposure to assets

4. A value must be ascribed to assets of each description which must be an amount determined in accordance with the *Valuation of Assets Rules* or, where the assets are of a description for the valuation of which no provision is made in the *Valuation of Assets Rules*, an amount which would reasonably be paid by way of consideration for an immediate assignment or transfer of such assets. The amount by which the *insurer* is exposed to assets of each

description must be determined by adjusting the value of the assets in accordance with 5 to 11A.

Adjustment in respect of futures contracts

5. The figure arrived at under 4 in respect of assets of each description must be increased or decreased by the value of assets of that description which the *insurer* is deemed to have acquired or disposed of pursuant to a *futures contract*.
6. For the purposes of 5, the *insurer* is deemed to have acquired or disposed of assets pursuant to a *futures contract* if, at the relevant date, it has entered into (and not closed out) a *futures contract* which -
 - (a) provides for the acquisition of assets by that *insurer*;
 - (b) is *listed* and provides for the disposal of assets by the *insurer*; or
 - (c) is not *listed* but provides for the disposal of assets by the *insurer* to an *approved counterparty* and it is prudent to assume that such disposal will take place within one year of the *relevant date*.

Adjustments in respect of options

7. The figure arrived at under 4 to 6 in respect of assets of each description must be increased or decreased by the value of assets of that description which the *insurer* is deemed to have acquired or disposed of pursuant to an *option*.
8. For the purposes of 7, the *insurer* is deemed to have acquired or disposed of assets pursuant to an *option* if, at the *relevant date*, it is a party to an *option* and it is prudent to assume that the *option* will be exercised and the *option* is one which -
 - (a) provides for the acquisition of assets by the *insurer*;
 - (b) is *listed* and provides for the disposal of assets by the *insurer*; or
 - (c) is not *listed* but provides for the disposal of assets by the *insurer* to an *approved counterparty* and it is prudent to assume that such disposal will take place within one year of the *relevant date*.

Adjustments in respect of initial margins

9. The figure arrived at under 4 to 8 in respect of assets of each description must be increased by an amount representing the value of any assets of that description which have been transferred by the *insurer* by way of *initial margin*.

Adjustments in respect of an undiversified contract for differences or a contract or asset having the effect of a derivative contract

10. The amount arrived at in accordance with 4 to 9 must be increased or decreased by an amount representing the value of assets which the *insurer* is deemed to have acquired or disposed of under -
- (a) an undiversified *contract for differences*; or
 - (b) a contract or asset other than a diversified *contract for differences* which has the effect of a *derivative contract*.
11. For the purposes of 10, the *insurer* is deemed to have achieved the effect of such contract by entering into appropriate *futures contracts* or *options*. The assets deemed to be acquired or disposed of must be dealt with in accordance with 5 and 7 respectively.

Adjustment in respect of subsidiary undertakings

- 11A. The amount arrived at under 4 to 11 must be increased by an amount representing the *exposure*, if any, of the *insurer's dependants* to assets of that description, calculating that *exposure* by applying 4 to 11 to each *dependant* as if it were an *insurer* (whether it is or not).

Excess asset exposure

12. The amount by which the *insurer* is exposed to assets of a particular description in excess of the *permitted asset exposure limit* must be calculated by subtracting the *permitted asset exposure limit* for assets of that description from the corresponding amount of the *exposure*, calculated in accordance with 4 to 11A. For this purpose, *exposure* to assets must be excluded to the extent that such *exposure* has caused the recognition of excess *exposure* to assets of a different description. If the figure arrived at is negative, it must be taken to be zero.

Calculation of exposure to a counterparty

13. Subject to 14 to 15A, the value of all investments (determined in accordance with rule 4.8) issued by any one *counterparty* and the value of all rights (determined in accordance with rules 4.5, 4.12 and 4.13) against that *counterparty*, in each case up to the amount of the appropriate *permitted asset exposure limit*, must be aggregated. Where the *counterparty* is an issuer of a *collective investment scheme* falling within rule 4.9 (1)(c), the value of units or other beneficial interest in the *collective investment scheme* must be included.
14. Where an *insurer* has rights in respect of an obligation to be fulfilled by a *counterparty* and -
- (a) the obligation is a secured obligation which -

- (i) is secured by cash deposited with, or a letter of credit established with, or *securities* issued by, or a guarantee provided by, an *approved credit institution* or an *approved financial institution*, and
 - (ii) is due to be fulfilled within 12 months of the *relevant date*; or
- (b) the obligation is a secured obligation which is secured by *listed securities* which are *readily realisable* or by *approved securities* which in either case -
- (i) have been deposited with an *approved credit institution*, an *approved financial institution* or an *approved investment firm*, and
 - (ii) are beneficially owned by the *counterparty* but will not be available for the benefit of creditors generally in the event of the winding-up of the *counterparty*,

the aggregation required by 13 need not include the value of such rights.

15. If the *insurer* has liabilities to the *counterparty* which may be offset against the above mentioned assets in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*, then such liabilities may be offset for the purposes of the aggregation required by 13.
- 15A. The amount arrived at in accordance with 13 to 15 must be increased by the amount by which any *dependant* of the *insurer* is *exposed* to the same *counterparty*.

Excess counterparty exposure

16. The amount by which the *insurer* is exposed to a *counterparty* in excess of the *permitted counterparty exposure limit* must be calculated by subtracting from the amount of the *exposure* to such *counterparty* the amount of the *permitted counterparty exposure limit* for such *counterparty*. If the figure arrived at is negative, it must be taken to be zero. If the *insurer* is exposed to a *counterparty* in excess of the *permitted counterparty exposure limit* in more than one of the circumstances set out in 3(c), it must make the deduction required under rule 4.14 (1)(b) only in respect of the circumstances leading to the greatest excess *exposure*.

Excess concentration with a number of counterparties

17. Where there is *exposure* to a *counterparty* of the type mentioned in 3(c)(ii), 40% of the *business amount* must be deducted from the aggregate of such *exposures*. The amount so arrived at is the excess concentration with a number

of counterparties. Where this amount is negative it must be taken to be zero. For the purposes of this paragraph -

- (a) *exposure* to a *counterparty* is to be taken into account only up to the level of the *permitted counterparty exposure limit* for that *counterparty*;
- (b) *exposure* to a *counterparty* is not taken into account if it does not exceed 5% of the *business amount*; and
- (c) *exposure* to a *counterparty* is not taken into account if the corresponding *permitted counterparty exposure limit* does not exceed 5% of the *business amount*.

PART II

DESCRIPTION OF ASSET AND CORRESPONDING BUSINESS AMOUNT

	Description of asset	Percentage of general insurance business amount or long-term insurance business amount
1	A piece of land or a number of pieces of land (or an interest in such pieces of land) to which in the most recent <i>proper valuation</i> of such pieces of land an aggregate value is ascribed which is greater than the value of each of such pieces of land valued separately	5%.
1A	A reversionary interest or a remainder not falling within 1	1%.
2	All <i>debts</i> due or to become due from any one individual (other than an individual who is connected with the <i>insurer</i> within the meaning of rule 3.4(5), being <i>debts</i> which are fully secured on any dwelling or any land appurtenant to it owned or to be purchased by the individual and used or to be used by him for his own residence	1%.
3.	All <i>debts</i> due or to become due from an individual, other than <i>debts</i> specified in 2	0.25%.
4.	All <i>unsecured debts</i> (other than <i>debts</i> arising under the terms of <i>debt securities</i> or <i>debts</i> from a <i>regulated institution</i>) due or to become due from any one <i>counterparty</i> other than an individual, <i>body corporate</i> or group	1%.
5.	All <i>unsecured debts</i> (other than <i>debts</i> arising under the terms of <i>debt securities</i> or <i>debts</i> from a <i>regulated institution</i>) due or to become due from any one <i>company</i> , taken together with all such <i>debts</i> due or to	

- | | | |
|-----|--|-------|
| | become due from a <i>connected company</i> of that <i>company</i> | 1%. |
| 6. | All <i>unsecured debts</i> (other than <i>debts</i> arising under the terms of <i>debt securities</i> or <i>debts</i> from an <i>approved counterparty</i>) due or to become due from any one <i>regulated institution</i> , taken together with all such <i>debts</i> due or to become due from a <i>connected company</i> of that institution | 2.5%. |
| 7. | All <i>debts</i> , other than <i>debts</i> arising under the terms of <i>debt securities</i> , due or to become due from any one <i>counterparty</i> which is not an <i>approved counterparty</i> taken together with all such <i>debts</i> due or to become due from any <i>connected company</i> (other than an <i>approved counterparty</i>) of that <i>counterparty</i> | 5%. |
| 8. | All <i>debts</i> , other than <i>short-term deposits</i> with an <i>approved credit institution</i> or <i>debts</i> arising under the terms of <i>debt securities</i> , due or to become due from any one <i>approved counterparty</i> , taken together with all such <i>debts</i> due or to become due from any <i>connected company</i> of that <i>approved counterparty</i> | 10%. |
| 9. | All <i>debts</i> due or to become due from an <i>approved credit institution</i> (or a <i>connected company</i> of that institution) taken together unless – | |
| | (a) the <i>insurer</i> has notified the <i>FSA</i> that it places deposits with that institution; and | |
| | (b) the total amount of <i>debts</i> due or to become due does not exceed £2 million | 20% |
| 10. | The aggregate of <i>debts</i> of the descriptions in 3, 4 and 5 | 5%. |
| 11. | All investments of a kind which may be valued in accordance with rule 4.8 (other than <i>secured debt securities</i> , <i>debt securities</i> (other than <i>hybrid securities</i>) issued by a | |

regulated institution or investments which are *listed* and *readily realisable*) issued by any one *issuer* taken together with –

- | | | |
|-----|--|-------|
| | (a) all units or other beneficial interests in a <i>collective investment scheme</i> falling within rule 4.9(1)(c) issued by that <i>issuer</i> ; and with | |
| | (b) all investments of the kinds mentioned in this paragraph issued by a <i>connected company</i> of that <i>issuer</i> | 1%. |
| 12. | The aggregate of assets of any of the descriptions in 1A and 11 | 10%. |
| 13. | All <i>shares</i> and hybrid <i>securities</i> issued by any one <i>issuer</i> taken together with all such <i>securities</i> issued by a <i>connected company</i> of that <i>issuer</i> | 2.5%. |
| 14. | All <i>securities</i> issued by any one <i>issuer</i> which is not an <i>approved counterparty</i> taken together with all <i>securities</i> issued by a <i>connected company</i> , other than an <i>approved counterparty</i> , of that <i>issuer</i> | 5%. |
| 15. | All <i>securities</i> issued by any one <i>counterparty</i> | 10%. |
| 16. | All holdings in any one authorised unit trust scheme or recognised scheme | 5%. |
| 17. | All cash | 3%. |
| 18. | All computer equipment | 5%. |
| 19. | All office machinery (other than computer equipment) taken together with all furniture, motor vehicles and other equipment | 2.5%. |

APPENDIX 5.1 (rule 5.5 and *relevant co-insurance operation*)

RELEVANT CO-INSURANCE OPERATIONS

1. An insurance operation is a **relevant co-insurance operation** for the purposes of rule 5.5 if -
 - (a) it is not a *reinsurance* acceptance;
 - (b) it relates to any of the *classes of general insurance business* specified in 2; and
 - (c) it satisfies all the conditions specified in 3.

2. The *classes* referred to in 1(b) are -
 - class 3 (land vehicles),
 - class 4 (railway rolling stock),
 - class 5 (aircraft),
 - class 6 (ships),
 - class 7 (goods in transit),
 - class 8 (fire and natural forces),
 - class 9 (damage to property),
 - class 10 (motor vehicle liability),
 - class 11 (aircraft liability),
 - class 12 (liability for ships),
 - class 13 (general liability), excluding risks which concern damage arising from nuclear sources or from medicinal products,
 - class 14 (credit),
 - class 15 (suretyship), and
 - class 16 (miscellaneous financial loss).

3. The conditions referred to in 1(c) are -
- (a) that the risk is covered by a single contract at an overall premium and for the same period by two or more *insurance undertakings*, each for its own part;
 - (b) that the risk is ‘situated’ (within the meaning of 4 below) within an *EEA State*; and
 - (c) that at least one of the *insurance undertakings* participating in the operation does so through a head office or branch established in an *EEA State* other than that in which the *leading insurance undertaking’s* head office (or if the *leading insurance undertaking* is participating through a branch, that branch) is established.
4. For the purposes of 3(b), a risk is **situated** in an *EEA State* -
- (a) in the case of insurance relating to immovable property, if the property is situated in an *EEA State*;
 - (b) in the case of insurance relating to a registered vessel, aircraft or vehicle (including railway rolling stock), if the vessel, aircraft or vehicle is registered in an *EEA State*; and
 - (c) in any other case, if the *policy holder* is incorporated or has his habitual residence in an *EEA State*.
-

APPENDIX 6.1 (rule 6.7)

METHODS OF CALCULATING THE EQUALISATION RESERVE

Part I

Methods of calculating transfers in

1. Amounts to be transferred to the *equalisation reserve* at the end of a *financial year* must be calculated in accordance with 2 to 3.
2. For *insurance business* falling within a *business group*, the amount to be transferred to the *equalisation reserve* is the percentage specified in the table in 3 of *net premiums written* in that *financial year* including adjustments in respect of all previous *financial years* in respect of that business.
3. The table referred to in 2 is as follows.

Business group	Percentage of net premiums written
A	3%
B	3%
C	6%
D	75%
E	11%

Part II

Methods of calculating transfers out

4. Amounts to be transferred from the *equalisation reserve* at the end of a *financial year* must be calculated in accordance with 5 to 10.
5. For *insurance business* falling within a *business group* which is *accounted for* on an accident year basis, the *insurer* must determine the amount (the **abnormal loss**), if any, by which, taking into account any adjustments in respect of previous years' underwriting, *net claims incurred* in that *financial year* in respect of that business exceed the percentage specified in the table contained in 8 of *net premiums earned* in that *financial year* in respect of that business.
6. For *insurance business* falling within a *business group* which is *accounted for* on an underwriting year basis, the *insurer* must determine the amount (the **abnormal loss**), if any, by which *net claims paid* plus the increase (or less the decrease) in the net *technical provisions* (exclusive of any change in *claims handling expenses* and any *equalisation reserve*) in that *financial year* plus adjustments in respect of all *previous financial years* in respect of that business exceed the percentage specified in the table contained in 8 of *net*

premiums written in that *financial year* plus adjustments in respect of all *previous financial years* in respect of that business.

7. For the purposes of 5 and 6, if *net premiums earned* or *net premiums written*, as the case may be, in respect of any business in any *financial year* are negative, their value is deemed to be zero for the purposes of calculating the ‘abnormal loss’ in respect of that business.
8. The table referred to in 5 and 6 is as follows.

Business group	Percentage of net premiums earned/written
A	72.5%
B	72.5%
C	95%
D	25%
E	100%

9. The ‘abnormal loss’ for each *business group accounted for* on an accident year basis and *business group accounted for* on an underwriting year basis must be aggregated and must, subject to 10, be the amount to be transferred from the *equalisation reserve*.
10. If the ‘abnormal loss’ in respect of any *business group* pursuant to 9 exceeds the relevant ‘business group maximum’ at that date, the loss to be aggregated in respect of that *business group* is the ‘business group maximum’.

Part III

Method of calculating business group maximum

11. The maximum reserve applicable to a *business group* (the **business group maximum**) at the end of a *financial year* must be calculated in accordance with 12.
12. (1) The ‘business group maximum’ at the end of a *financial year* is the percentage specified in the following table of ‘average net premiums written’ in respect of that *business group* -

Business group	Percentage of ‘average net premiums written’
A	20%
B	20%
C	40%
D	600%
E	75%

- (2) For the purposes of (1), the **average net premiums written** in respect of a *business group* means -
- (a) in the case of an *insurer* which has carried on business falling within that *business group* for no less than five *financial years*, the average amount of *net premiums written* in respect of that business in a *financial year*, calculated on the basis of the *financial year in question* and the four *previous financial years*;
 - (b) in the case of an *insurer* which has carried on business falling within that *business group* for less than five *financial years*, the average amount of *net premiums written* in respect of that business in a *financial year*, calculated on the basis of the *financial year in question* and any *previous financial years* ending on or after 23 December 1996.
- (3) For the purposes of (2), if any of the *financial years* which the *insurer* is required to take into account for the calculation of 'average net premiums written' has been validly extended or shortened from 12 months, the value of *net premiums written* in that *financial year* is the amount represented by the formula -

$$\frac{\text{NPW} \times 365}{d}$$

where-

NPW means *net premiums written* in the *financial year* concerned; and

d means the number of days falling in that *financial year*.

Method of calculating the maximum reserve

13. The maximum reserve at the end of a *financial year* is the aggregate value of the 'business group maxima' calculated in accordance with 12.

APPENDIX 6.2 (rule 6.12)

METHOD OF CALCULATING THE EQUALISATION RESERVE FOR CREDIT INSURANCE BUSINESS

1. The *insurer* must maintain a credit insurance *equalisation reserve* to which must be charged, at the end of each *financial year*, any ‘technical deficit’ arising in respect of *credit insurance business* during that *financial year*.
 2. Such reserve must at the end of each *financial year* receive 75% of any ‘technical surplus’ arising in respect of *credit insurance business*, subject to a limit of 12% of *net premiums written* during that *financial year* until the reserve has reached 150% of the highest annual amount of *net premiums written* during the *financial year in question* and the four *previous financial years*.
 3. For the purposes of this Appendix, **technical surplus** or **technical deficit** in respect of *credit insurance business* for a *financial year* means -
 - (a) for business which is accounted for on an accident year basis, the amount by which the aggregate of *net premiums earned* and other technical income exceeds, or falls short of, the aggregate of *net claims incurred, claims management costs* and any technical charges; and
 - (b) for business which is accounted for on an underwriting year basis, the amount by which the aggregate of *net premiums written* and other technical income exceeds, or falls short of, *net claims paid* plus the increase (or less the decrease) in the net *technical provisions* (exclusive of any change in the credit insurance *equalisation reserve*) and *net operating expenses*.
 4. In determining any ‘technical surplus’ referred to in 2, the calculation must be made before tax and before any transfer to or from the credit insurance *equalisation reserve*. Investment income is not included in these calculations.
-

APPENDIX 9.1 (rules 9.12 and 9.13)

BALANCE SHEET AND PROFIT AND LOSS ACCOUNT (FORMS 9 TO 17)

Introduction

1. (1) All the forms included in the part of the *return* to which this Appendix relates (**Forms 9 to 17**) are to be laid out as shown in this Appendix, except that the instructions for the completion of the forms need not be reproduced.
- (2) All amounts, descriptions or other text required to be shown as supplementary notes to a form must not be presented on the face of that form, but must be presented as a separate statement. The title of that statement must identify the form to which it relates.

Completion of Forms

2. Where 'source' appears at the head of a column on a form, the information to be included in the preceding columns of a particular line is to be taken from those items in the *return* to which reference is made on that line in the column headed 'source'. No entries are to be made in the column headed 'source'.
3. (1) The *insurer's* registration number to be entered in every form must be the number provided to the *insurer* by the *FSA* (or a predecessor).
- (2) Boxes marked 'GL/UK/CM' must be completed by inserting -
 - (a) 'UK' in the case of a form which is -
 - (i) prepared by *EEA-deposit insurer* in respect of *long-term* or *general insurance business* carried on through a branch in the United Kingdom;
 - (ii) prepared by an *external insurer* (other than a *pure reinsurer*) in respect of *long-term* or *general insurance business* carried on through a branch in the United Kingdom; or
 - (iii) prepared by a *Swiss general insurer* in respect of *general insurance business* carried on through a branch in the United Kingdom;
 - (b) 'CM' in the case of a form which is prepared by a *UK-deposit insurer* in respect of *long-term* or *general insurance business* carried on through branches in the *EEA States* concerned; or
 - (c) 'GL' in any other case.

- (3) Boxes marked 'Period ended' must be completed so as to show, in numerals, the date of the last day of the *financial year in question*.
- (4) No entry should be made in a box which is shaded or is not labelled.
- (5) In the forms 'this financial year' means the *financial year in question*.

Currency

4. The value of any asset or the amount of any liability denominated in a currency other than sterling must be expressed in sterling as if conversion had taken place at the closing middle rate on the last day for which the appropriate rate is available in the financial year to which the asset or liability relates.
5.
 - (1) The amount of any income or expenditure must be expressed in sterling using such bases of conversion as are in accordance with generally accepted accounting practice.
 - (2) The bases of conversion adopted must be stated by way of supplementary note to **Form 16** or, if there is no **Form 16**, by way of supplementary note to **Form 40**.

Presentation of amounts

6. Negative amounts must be shown between round brackets.
7. Where in any form an amount which is shown as brought forward from a previous year differs from the corresponding amount shown as carried forward from that year and the difference is not due solely to the use of a different rate to express other currencies in sterling, an explanation of the reason for the difference must be given by way of a supplementary note to that form.
8.
 - (1) Except to the extent permitted by (2), amounts due to or from the *insurer* must be shown gross.
 - (2) In calculating amounts due to or from the *insurer* -
 - (a) amounts due from any person may, unless expressly provided otherwise, be included net of amounts which are due to that person, provided that such amounts may be set off against each other under generally accepted accounting practice; and
 - (b) amounts due to any person may, unless expressly provided otherwise, be included net of amounts which are due from that person, provided that such amounts may be set off against each other under generally accepted accounting practice.
 - (3) If amounts shown include amounts calculated on the basis set out in (2), a supplementary note to **Form 13** to that effect must be provided.

(4) This paragraph does not apply to **Form 17**.

9. All amounts are to be shown to the nearer £1,000.

Premiums

10. (1) Notwithstanding the requirements of the *insurance accounts rules*, amounts included in **Forms 11** and **12** in respect of -

(a) *gross premiums receivable*;

(b) *claims* paid;

(c) *claims* outstanding; and

(d) *reinsurance* recoveries,

must be determined in accordance with **Appendices 2.1 to 2.3**.

(2) Where any amount included in **Form 11** or **12** pursuant to (1) differs from the aggregate of the corresponding amounts included in **Forms 21, 22, 24** and **25**, there must be stated by way of supplementary note to **Form 11** or **12**, as the case may be -

(a) the amount of such difference; and

(b) an explanation for such difference.

Counterparty exposure

11. (1) There must be given by way of a supplementary note to **Form 13** -

(a) the maximum extent to which, in accordance with any investment guidelines operated by the *insurer*, it was permitted to be exposed to any one *counterparty* during the *financial year in question*;

(b) the maximum extent to which, in accordance with such guidelines, it was permitted to be exposed to any one *counterparty*, other than by way of exposure to an *approved counterparty*, during the *financial year in question*; and

(c) an account of any occasions during the *financial year* on which either of those amounts was exceeded.

(2) In each case where the exposure of the *insurer* to a *counterparty* at the end of the *financial year in question* exceeds 5% of its *long-term business amount* or *general business amount*, as appropriate -

- (a) the amount of that *exposure*; and
- (b) the nature of the assets held which give rise to that *exposure*,

must be stated by way of a supplementary note to **Form 13**.

- (3) There must be stated by way of supplementary note to **Form 13** the aggregate value of any rights to which paragraph 14 of Part I of **Appendix 4.2**.

Provision for adverse changes

- 12. There must be stated by way of supplementary note to **Form 14** or **15** the methods and assumptions used to determine the amount of any provision made pursuant to rule 5.3 or, if there is no such provision, the methods and assumptions used to determine that no provision is required.

Liabilities

- 13. (1) Subject to (3), the following information must be given by way of a supplementary note to **Form 14** or **15** -
 - (a) in the case of any ‘charge’ over assets of the *insurer*, the particulars specified in (2) or a statement that there are no such ‘charges’;
 - (b) the total potential liability, and the amount provided for that liability, to taxation on capital gains which might arise if the *insurer* disposed of its assets, or a statement that there is no such potential liability;
 - (c) a brief description of any other liabilities being contingent liabilities not included in **Form 14** or **15** (other than liabilities arising under an inwards *contract of insurance* or *reinsurance*) including, where practicable, the amounts or estimated amounts of those liabilities, or a statement that there are no such contingent liabilities;
 - (d) a brief description of any guarantee, indemnity or other contractual commitment, effected by the *insurer* other than in the ordinary course of its *insurance business*, in respect of the existing or future liabilities of any *related companies*, including -
 - (i) the maximum liability of the *company* specified in such guarantee, indemnity or contractual commitment or, where no such amount is specified, a statement to that effect,
 - (ii) the amount of any provision made in respect of such liability, and
 - (iii) the amount reported under (c) in respect of such liability,

or a statement that there are no such guarantees, indemnities or contractual commitments; and

- (e) a description of any other uncertainty where such a description is, in the opinion of the directors, necessary for a proper understanding of the financial position of the *insurer*.
- (2) The particulars referred to in (1)(a) are -
- (a) the nature of the ‘charge’, including a brief description of the terms which are relevant to securing the prior claim of any person to assets which are subject to the ‘charge’;
 - (b) for each line in **Form 13**, the amount included in respect of assets which are subject to the ‘charge’; and
 - (c) for each line in **Form 14** or **15**, the amount included in respect of liabilities which are secured by the ‘charge’.
- (3) (1)(a) and (c) may be disregarded by an *insurer* in the case of -
- (a) one or more ‘charges’ over assets which are attributable to either the *long-term* or the *general insurance business assets* and whose aggregate value (as shown on **Form 13**) does not exceed 2.5% of the *long-term* or *general insurance business amount*, as the case may be; or
 - (b) one or more contingent liabilities whose aggregate value does not exceed 2.5% of the *long-term* or *general insurance business amount*, as the case may be.
- (4) (1)(d) may be disregarded by an *insurer* in respect of one or more guarantees, indemnities or contractual commitments where the aggregate of the maximum liabilities specified in such guarantees, indemnities or contractual commitments does not exceed 2.5% of the *long-term* or *general insurance business amount*, as the case may be.
- (5) For the purposes of this paragraph, **charge** includes any arrangement whatsoever, whether contractual or otherwise, which operates to secure the prior claim of any person over general creditors to any assets on a winding up of the *insurer*.

Reconciliation

14. (1) For an *insurer* (other than a *company* incorporated outside the United Kingdom) an explanation must be given by way of supplementary note to **Form 10** reconciling -

- (a) line 99 of **Form 13** (category of assets '1') less line 59 of **Form 15**; and
 - (b) the amount shown under balance sheet item A 'capital and reserves' in the *insurer's* accounts prepared pursuant to the *insurance accounts rules* for the *financial year in question*.
- (2) Where for an *insurer* (other than a *company* incorporated outside the United Kingdom) there are no accounts pursuant to 1(b) (or the accounts have not yet been prepared), this must be stated by way of supplementary note to **Form 10**.

Derivative contracts

15. Any *derivative contract* entered into by an *insurer* -
- (a) the value of which is taken into account for the purposes of calculating benefits payable to *policy holders* under *property linked contracts*; or
 - (b) in order to match its liabilities in respect of the payment of *index linked benefits*,
- must be excluded from **Form 17**.
16. Where, in respect of any *derivative contract* included in **Form 17**, assets have been transferred to or for the benefit of the *insurer* by way of *variation margin* there must be stated by way of supplementary note to **Form 17** -
- (a) the aggregate amount of any liability to repay such assets or equivalent assets;
 - (b) for each line in **Form 13**, the amount included in respect of such assets; and
 - (c) to what extent any amounts included in **Form 13** have taken account of any requirement to repay such assets or equivalent assets.
17. If -
- (a) the aggregate value of rights under contracts or in respect of assets, either of which have the effect of *derivative contracts*, exceeds 2.5% of the aggregate value of assets shown at line 89 of **Form 13**; or
 - (b) the aggregate amount of liabilities under contracts or in respect of assets, either of which have the effect of *derivative contracts*, exceeds 2.5% of the aggregate of the amounts shown in lines 17 to 39 of **Form 14** or lines 31 to 51 of **Form 15**, as appropriate,

the corresponding value, if not zero, must be stated (by way of supplementary note to **Form 17**) for each line in **Form 13, 14** or **15** and paragraph 16 applies to the *insurer* as if such contracts or assets had been included in **Form 17**.

Amounts included in line 89 attributable to debts due from related insurers, other than those under contracts of insurance or reinsurance	100		

Instructions for completion of Form 13

1. Form 13 must be completed for the total *long-term insurance business assets* of the *insurer* or branch and for each fund or group of funds for which separate assets are appropriated. The words "total *long-term insurance business assets*" or the name of the fund must be shown against the heading "Category of assets". The corresponding code box must contain "10" for the total assets and, in the case of separate funds, code numbers allocated sequentially beginning with code "11".

2. Form 13 must be completed in respect of the total assets of the *insurer* or branch other than any *long-term insurance business assets*. The words "total other than *long-term insurance business assets*" must be shown against the heading "Category of assets", and the corresponding code box must contain "1".

3. (a) In the case of the United Kingdom branch return of an *external insurer* (other than a *pure reinsurer*) Form 13 must be completed for the following categories of assets -

Category	Code - other than <i>long-term insurance business assets</i>	Code - <i>long-term insurance business assets</i>
Assets deposited under rule 8.1	2	6
Assets maintained in the United Kingdom	3	7
Assets maintained in the United Kingdom and the other <i>EEA States</i>	4	8

(b) In the case of an EEA branch of a *UK deposit insurer*, Form 13 must be completed for the following categories of assets -

Category	Code - other than <i>long-term insurance business assets</i>	Code - <i>long-term insurance business assets</i>
Assets deposited under rule 8.1	2	6
Assets maintained in the United Kingdom and the other <i>EEA States</i>	4	8
Assets maintained in the United Kingdom and the <i>EEA States</i> where <i>insurance business</i> is carried on	5	9

4. In lines 11 to 86 -

(a) for the purpose of classifying (but not valuing) assets, headings and descriptions used above, wherever they also occur in the balance sheet format in Schedule 9A to the *Companies Act*, must have the same meaning as in that Schedule,

(b) assets must be valued in accordance with rule 9.10, and

(c) assets of any particular description must be shown after deduction of assets of that description which (for any reason) fall to be left out of account under rule 4.14 (2) (a).

5. The aggregate value of those investments which are:

- (i) *unlisted* investments falling within any of lines 41, 42, 46 or 48 which have been valued in accordance with rule 4.8;
- (ii) *listed* investments falling within any of lines 41, 42, 46 or 48 which have been valued in accordance with rule 4.8 and which are not *ready realisable*;
- (iii) units or other beneficial interests in *collective investment schemes* falling within rule 4.9 (1);
or
- (iv) reversionary interests or remainders in property other than land or buildings,

must be stated by way of a supplementary note to this Form, together with a description of such investments.

- 6. The aggregate value of those investments falling within lines 46 or 48 which are hybrid *securities* are to be stated by way of a supplementary note to this Form.
- 7. Amounts in respect of salvage or subrogation included above other than at line 73 are to be stated by way of a supplementary note.
- 8. The entry at line 85 must be equal to the sum of lines 22.29.3 and lines 25.24.99-99.
- 9. In line 93 "Solvency margin deduction for insurance *subsidiary undertakings*" refers to deductions under rule 4.3(2)(c).
- 10. In line 95 "Assets of a type not valued above" refers to assets left out of account under rule 4.1(3).
- 11. Lines 60 to 63 and 85 relate only to *general insurance business*.
- 12. Lines 60 to 63 and 85 must be left blank for "Category of assets" codes "2", "3", "4" and "5".

Instructions for completion of Form 14

1. The Form must be completed for the total *long-term insurance business liabilities* and margins of the *insurer* or branch and for each fund or group of funds for which separate assets are appropriated. The words “total *long term insurance business assets*” or the name of the fund must be shown against the heading “Category of assets”. The corresponding code box must be completed with the same entries as were used on the corresponding Form 13.
2. The entry at line 11 must equal the sum of lines 21, 43, 44 and 45 of the appropriate Form or Forms 58.
3. The entry at line 12 must equal line 42 of the appropriate Form or Forms 58.
4. The entry at line 13 must equal line 49 of the appropriate Form or Forms 58.
5. The entry at line 14 must equal line 59 of the appropriate Form or Forms 40.
6. The entry at line 51 must be:
 - (a) the value of the *admissible assets* (as included in line 89 of the appropriate Form 13) representing the *long-term insurance funds*, fund or group of funds to which the Form relates, less
 - (b) the amount of those funds, fund or group of funds, being the sum of the amounts shown at lines 14 and 49.
7. The entry at line 63 must be the amount specified in the *appointed actuary's* certificate in accordance with paragraph 8(a)(ii) of Appendix 9.6, but only insofar as it relates to the fund, funds or group of funds to which this Form 14 relates.

Instructions for completion of Form 17

1. Form 17 must be completed in respect of the total *general insurance business assets* and in respect of the total *long-term insurance business assets*, if any, of the *insurer* or branch. Form 17 must also be completed for each fund or group of funds referred to in instruction 1 to Form 13.
2. The codes specified in instructions 1 to 3 to Form 13 must be used as appropriate.
3. *Derivative contracts* must be analysed according to the description of assets shown in the second column of Form 17 which represents the principal subject of the contract.
4. *Derivative contracts* must be reported as assets in column 1 of Form 17 if their value to the *insurer* (gross of *variation margin*) is positive and as liabilities in column 2 of Form 17 if their value (gross of *variation margin*) to the *insurer* is negative.
5. All amounts included at lines 11 to 35 of Form 17 in respect of *derivative contracts* must be determined without making any allowance for *variation margin*.
6. Amounts in respect of a *derivative contract* may only be included net of amounts in respect of any other *derivative contract* if -
 - (a) obligations of the *insurer* under the contracts may be set off against each other under generally accepted accounting practice; and
 - (b) such other contract has the effect (in whole or in part) of closing out the obligations of the *insurer* under the first mentioned contract.
7. The effect of any *variation margin* upon amounts included at lines 11 to 35 of Form 17 must be shown at line 41.
8. The entry at 17.49.1 must be included at 13.44.1.
9. The entry at 17.49.2 must be included at 14.47.1 or 15.49.1. as appropriate.
10. Rights to recover assets transferred by way of *initial margin* must not be shown on Form 17.

APPENDIX 9.2 (rules 9.14 to 9.22)

GENERAL INSURANCE BUSINESS: REVENUE ACCOUNT AND ADDITIONAL INFORMATION (FORMS 20 TO 39)

Introduction

1. All the Forms included in the part of the *return* to which this Appendix relates (**Forms 20 to 39**) are to be laid out as shown in this Appendix, except that the instructions to Forms need not be reproduced.
2. The provisions of paragraph 1(2) and paragraphs 2 to 7 of **Appendix 9.1**, unless otherwise provided, also apply for the purposes of this Appendix.

Currency

3. (1) Notwithstanding the provisions of 2, amounts on **Forms 26 to 29** submitted in accordance with rule 9.17 and on **Forms 31, 32 and 34** submitted in accordance with rule 9.19 in respect of business carried on in any country other than the United Kingdom must be shown in the 'currency of the country concerned', except that figures must be shown in sterling in those columns and lines which the forms indicate are always to contain figures expressed in sterling.
- (2) For every currency other than sterling in which amounts are shown on the Forms referred to in (1), an entry must be made on **Form 36** to show the rate used to convert those amounts to sterling for inclusion elsewhere in the *returns*.
- (3) Notwithstanding the provisions of 2, all amounts included in -
 - (a) columns 1, 2, 3 and 11 of **Forms 23, 26 and 27**;
 - (b) columns 3 and 10 of any **Form 31 or 32** prepared in respect of United Kingdom or *home foreign business*; and
 - (c) columns 1 and 8 of any **Form 34** prepared in respect of United Kingdom or *home foreign business*,must be expressed in sterling as if conversion of every 'major currency' had taken place at the closing middle rate on the last day for which the appropriate rate is available in the *financial year in question*.
- (4) For the purposes of (3), a **major currency** is -
 - (a) in the case of any business carried on outside the UK, the currency of the country;

- (b) in the case of any other business, United States dollars, Canadian dollars, Euro and any other currency which the *insurer* elects to treat as a major currency.
 - (5) A *insurer* need not apply (3) to amounts shown in any line of any of the forms mentioned in that sub-paragraph representing an accident year or underwriting year ending before 23 December 1996.
 - (6) For the purposes of (1), the **currency of the country concerned**, in the case of a country participating in the European Economic and Monetary Union means for Forms completed in respect of a *financial year* ending on or after 31 December 1999, the Euro (whether or not the amounts reported on those Forms relate to accident or underwriting years ending on or after 31 December 1999).
4. All amounts shown in sterling must be shown to the nearer £1,000. Amounts in any other currency on **Forms 26 to 29, 31, 32 and 34** must be shown to the nearer 1,000 principal monetary units of that currency except that, where the rate of exchange of the currency in relation to £1 sterling on the last day of the *financial year in question* exceeded 1,000 principal monetary units of that currency, the amounts must be shown to the nearer 1,000,000 principal monetary units and ‘000,000’ must be inserted in the box labelled ‘Monetary units’. In other cases, this box must be completed by inserting ‘000’.
5. Where premiums are written by a *insurer* or *claims* are incurred by it under a *reinsurance* treaty -
- (1) notwithstanding 2 to 4, amounts shown on **Forms 26 to 29** may be shown in sterling, in United States dollars, in Canadian dollars or in Euro; and
 - (2) if in a *financial year* the proportion of *gross premiums written*, or of *claims* incurred by the *insurer* or outstanding from the *insurer*, in any one currency other than sterling, United States dollars or Canadian dollars exceeds 10% of such premiums or *claims* under all such treaties, **Forms 26 to 29** may be prepared in that currency,

and where these provisions have been applied in respect of a *reinsurance* treaty in relation to a *financial year*, those provisions must be applied in the same manner in respect of that treaty in relation to any later *financial year*.

Accounting classes

- 6. (1) *Direct and facultative insurance business* must be included in the *return* in accordance with the *accounting classes*, save that -
 - (a) where a *insurer* only undertakes business in *accounting class* 4 in respect of risks relating to hovercraft, it may include such business in *accounting class* 3 if it also undertakes business in that class;

- (b) an *insurer* may include in *accounting class 5* business covering liability for loss of, or damage to, goods in transit which would otherwise be included in *accounting class 2*, provided that the policy does not cover damage to vehicles except as an *ancillary risk*; and
 - (c) an *insurer* may include in *accounting class 1* business falling within *general insurance business class 1(p)*.
- (2) *Non-proportional treaty reinsurance* business must be included in *accounting class 9* and *proportional treaty reinsurance* must be included in *accounting class 10* save that -
- (a) an *insurer* may include in *accounting class 11* treaty business falling within *general insurance business classes 1(p), 5, 6, 7, 11 and 12*; and
 - (b) a *insurer* must include in *accounting class 9* proportional retrocessions of *non-proportional treaty reinsurance* business.
7. Where an *insurer* includes *insurance business* in another *accounting class* under 6(1) or 6(2)(a), the following information must be stated by way of a supplementary note to **Form 20** -
- (a) the nature of any business included in another *accounting class* pursuant to 6(1) or 6(2)(a); and
 - (b) the reason for such inclusion.
8. Boxes marked 'Accounting class' must be completed so as to show the number of the *accounting class*. '99' must be shown in the case of the summary account in **Form 20**.

Premiums

9. In **Forms 23, 26, 27, 31 and 32** -
- (a) *gross premiums earned* in respect of an accident year must be such proportion of *gross premiums written* as is attributable to risks borne by the *insurer* during that accident year; and
 - (b) the *reinsurers'* share of premiums earned must be attributed to the same accident years as the corresponding *gross premiums earned*, so as to calculate the *net earned premiums* for each accident year.
10. In **Forms 24, 25, 28, 29 and 34** -
- (a) *gross premiums written* in an underwriting year must be the amount of such premiums arising in respect of *contracts of insurance incepted* during that year, whether or not they are received during that year; and

- (b) the *reinsurers'* share of premiums written must be attributed to the same underwriting years as the corresponding *gross premiums written*.
11. For the purposes of 10 and 14, where an *insurer* has acquired *policies* under a transfer approved under Part VII of the *Act* or its predecessor legislation or approved by the competent authority of another *EEA State* under Article 12 of the *Third Non-Life Directive*, the *policies* transferred to the *insurer* must be taken to have *incepted* on the date of such transfer.
12. In all Forms to which this Appendix relates, amounts required to be shown in respect of premiums must be shown before deduction for commissions.

Claims

13. (1) In **Forms 23, 26, 27, 31 and 32**, where an amount or number is required to be shown for *claims* in respect of an accident year, that amount or number must be determined on the basis of *claims* arising from incidents occurring during that accident year.
- (2) For the purposes of (1), an incident giving rise to a claim under a *claims-made policy* is deemed to occur on the earlier of -
- (a) the date on which it is notified in accordance with the terms of that *policy*; or
 - (b) the date on which the period for which cover is provided under that *policy* expires.
- (3) For the purposes of (1), where an *insurer* has assumed, pursuant to a contract, responsibility (whether wholly or in part) for the payment or reimbursement of *claims* made under *policies* effected by another *insurer*, all incidents occurring prior to the date of such contract and giving rise to *claims* under those *policies* are deemed have occurred on the date of such contract.
- (4) In the application of (3), the reference to responsibility assumed by an *insurer* includes responsibility assumed as a *reinsurer* or under a transfer under Part VII of the *Act* or its predecessor legislation or approved by the competent authority of another *EEA State* under Article 12 of the *Third Non-Life Directive*; and in the case of such a transfer the date of the contract is taken to be the date of the transfer.
14. In **Forms 24, 25, 28, 29 and 34**, where an amount is required to be shown for *claims* in respect of a *financial year*, that amount must be determined on the basis of *claims* arising under *contracts of insurance incepted* during that year.
15. In all Forms to which this Appendix relates, amounts required to be shown for *claims* must not include amounts in respect of *claims management costs*.

UK and overseas business

16. (1) For each *accounting class* there must be stated separately for business accounted for on an accident year basis and on an underwriting year basis the following by way of supplementary note to **Form 20** -
- (a) the total *gross premium written* and the amounts attributable to UK and to overseas business; and
 - (b) the *reinsurers'* amount in respect of each of the amounts required to be stated under (a).
- (2) For the purposes of this Appendix, gross premiums written must be shown or included as UK premiums if, in the case of direct or facultative reinsurance, the contract of insurance was effected in the United Kingdom or if, in the case of a reinsurance treaty, the cedant was an insurer having its head office in the United Kingdom or was a member of the *Society*; and 'overseas premiums' must be construed accordingly.

Transfers of general insurance business

17. (1) If, during the *financial year*, *policies* already effected by another *insurer* have been transferred to the *insurer*, an *insurer* must state, in respect of each *accounting class*, the following by way of supplementary note to **Form 23** and **24** -
- (a) the date of the transfer;
 - (b) whether the transfer was approved under Part VII of the *Act* or its predecessor legislation or approved by the competent authority of another *EEA State* under Article 12 of the *Third Non-Life Directive* or was effected by novation;
 - (c) any amounts included in premiums and *claims* in respect of consideration for the transfer;
 - (d) amounts required to be stated under (c) analysed by risk group and business category;
 - (e) the earliest and latest dates upon which the relevant *policies* *incept*; and
 - (f) whether or not any of the *policies* has a duration of longer than 12 months and, if so, the date by which all *policies* will have expired.
- (2) (1) does not apply in respect of any transfer by way of novation unless the amounts mentioned in (1)(c) exceed in aggregate 2.5% of the insurer's gross premium income for the financial year in question.

Unearned premiums

18. In **Forms 21** and **25**, the basis on which unearned premiums are calculated and the reason for adopting this basis must be stated by way of supplementary note.

Provision for unexpired risks

19. (1) The amount included for the provision for unexpired risks in **Form 22** or **25** prepared in respect of an *accounting class* must be determined without taking into account any surplus expected to arise on the unexpired risks falling within other *accounting classes*.
- (2) Where in determining the amount of the overall provision for unexpired risks (line 13 in **Form 15** less line 62 in **Form 13**) credit has been taken for any aggregate surplus expected to arise on the unexpired risks falling in any accounting class, the amount of that credit must be included as a negative amount at line 19 of **Form 22** or line 23 of **Form 25**, as appropriate, for that accounting class.
20. (1) Where the amount included at column 3 line 19 (provision for unexpired risks) in any **Form 22** or at column 99-99 of line 23 (provision for unexpired risks) in any **Form 25** has been determined after taking into account expected investment return, the following must be stated by way of supplementary note-
- (a) the provision for unexpired risks before taking such investment return into account;
- (b) the rates of investment return assumed; and
- (c) the average interval between the end of the *financial year in question* and the date at which *claims* are expected to be settled in cash.

Cessation of business

21. (1) If the *insurer* has effected no 'new *contracts of insurance*' of any one or more *classes of general insurance business* during the *financial year*, the date on which the last 'new contract' of each such *class* was effected must be stated by way of supplementary note to **Form 20**.
- (2) For the purposes of this paragraph and 22, a **new contract of insurance** is any *contract of insurance* effected by the *insurer* other than in fulfilment of its obligations under subsisting *contracts of insurance*.

Claims management costs

22. (1) In **Forms 22** and **24**, the basis used for the determination of amounts for *claims management costs* payable in the *financial year in question* and carried

forward to the following *financial year* must be stated by way of supplementary note.

- (2) If, in respect of any *accounting class* -
 - (a) no amount for *claims management costs* is shown as being carried forward to the following *financial year*; and
 - (b) an amount for net claims is shown as being carried forward to that year,

the reason for anticipating that there will be no *claims management costs* incurred during the following *financial years* must be included in the note required by (1) .

- (3) If, within an *accounting class*, an insurer has ceased to effect 'new *contracts of insurance*' during the *financial year in question*, the basis upon which any additional costs arising as a result of such cessation have been determined or the reason for anticipating that no such additional costs will be incurred must be included in the note required by (1).
- (4) Where the amount in respect of *claims management costs* carried forward and included in any Form 22 or 24 has been determined after taking into account expected investment return, there must be stated by way of supplementary note to that Form 22 or 24 -
 - (a) the rates of investment return assumed; and
 - (b) the average interval between the end of the *financial year in question* and the date by which the *claims management costs* are expected to be expended.

Acquisition costs

23. The basis used for the determination of amounts for acquisition costs (other than commission) payable in the *financial year in question* and carried forward to the next *financial year*, as shown at line 22 of **Form 22** and line 42 of **Form 24**, must be stated by way of a supplementary note to those Forms.

Underwriting year accounting

24. (1) With reference to the *financial year in question* and in respect of each *accounting class*, the following information must be stated by way of supplementary note to **Form 24** -
 - (a) the reason for accounting for such business on an underwriting year basis;

- (b) the basis for distinguishing between such business and any other business falling within the same *accounting class* accounted for on an accident year basis;
 - (c) the accounting policy adopted for determining the provision for *claims* outstanding; and
 - (d) if the information provided in (a) to (c) differs in respect of risks *incepted* in the *financial year in question* from risks of a similar description *incepted* in *previous financial years*, the reason for that difference.
- (2) Where the provision for *claims* outstanding is set in respect of any business using the ‘non-annual method’, the note required by (1)(a) must include the following information -
- (a) the reason for using the ‘non-annual method’;
 - (b) the basis for distinguishing between such business and other business accounted for on an underwriting year basis falling within the same *accounting class*;
 - (c) the normal period for which an underwriting year is left ‘open’ or, if that period differs for different types of business within an *accounting class* -
 - (i) the basis for distinguishing between the types of business,
 - (ii) the normal period for each type, and
 - (d) where an underwriting year is left ‘open’ for longer than the normal period, the reason for not ‘closing the year’.
- (3) For the purposes of this Appendix -
- (a) **non-annual method** refers to the method described by paragraph 52 of the *insurance accounts rules*; and
 - (b) a year is **open** with respect to any business *incepted* during that year if the provision for outstanding *claims* in respect of that business is set using the ‘non-annual method’ and if so set previously has not now been replaced in accordance with the requirements of paragraph 52(4) of the *insurance accounts rules*, and **closed year** and **closing a year** is construed accordingly.

Business managed together

25. (1) For the purposes of **Forms 25** and **29**, risks may be regarded as managed together if -

- (a) they *incept* in the same *financial year* and are accounted for using the ‘non-annual method’; and
 - (b) they may be treated as managed together under generally accepted accounting practice.
- (2) Where any amount is shown on **Form 25** or **29** for the transfer of anticipated surplus, the following must be stated by way of supplementary note to that Form -
- (a) a description of the business in respect of which the anticipated surplus arises and of the business in respect of which the deficit to be offset arises (including in the case of **Form 25** the risk groups or *business categories* into which such business falls); and
 - (b) the reason for treating the business as managed together.

Application of accounting practice

26. (1) Amounts in respect of inwards and outwards *contracts of insurance* must be classified for inclusion in **Forms 20** to **39** according to their economic substance and in accordance with generally accepted accounting practice.
- (2) Where amounts in respect of an inwards or outwards *contract of insurance* have been excluded from the revenue account, the following must be shown by way of supplementary note to **Form 20** -
- (a) a description of the terms of that contract;
 - (b) a description of the accounting treatment adopted and an explanation for adopting that treatment;
 - (c) a statement of the amounts paid and received during the *financial year* under that contract; and
 - (d) a statement of the amounts in respect of that contract included in each Form prepared under this Appendix or **Appendix 9.1**.
- (3) A *insurer* may elect to show the information required by (1) in respect of groups of contracts which were effected in the same *financial year* with substantially the same contract terms and in respect of which the same accounting treatment has been adopted.

Discounting

27. (1) Sheet 2 of **Form 30** need only be completed if the provision for *claims* outstanding being discounted (before deduction for discounting) exceeds 25%

of the total provision for *claims* outstanding (before deduction for discounting).

- (2) Where in accordance with (1) no Sheet 2 is prepared -
 - (a) lines 21 and 29 of Sheet 1 need not be completed; and
 - (b) lines 11 to 20 need only be completed in respect of those currencies for which the provision for *claims* outstanding being discounted (before deduction for discounting) exceeds 25% of the total provision for that currency for *claims* outstanding (before deduction for discounting).
- (3) For the purposes of **Form 30**, a **major currency** is a currency in respect of which the provision for *claims* outstanding (before deduction for discounting) is not less than 10% of the total provision for *claims* outstanding (before deduction for discounting).
- (4) In **Form 30**, the value of an asset or liability which would be treated as an asset or liability in a particular currency for the purposes of rule 7.1 (disregarding rule 7.6(1)) must be shown in that currency.
- (5) The following must be stated by way of supplementary note to **Form 30** -
 - (a) the risk groups and *business categories* where adjustments for discounting have been made; and
 - (b) in respect of each such risk group or *business category* -
 - (i) the methods used in calculating the deduction for discounting,
 - (ii) the rate of interest used for the calculation of present values,
 - (iii) the expected average interval between the date for settlement of *claims* being discounted and the end of the *financial year in question*, and
 - (iv) the criteria adopted for estimating the period that will elapse before *claims* are settled.

Reinsurance

28. Where the *reinsurers'* share of *claims* incurred (as stated in **Form 22** or **25**) includes amounts expected to be recovered from *reinsurers* more than 12 months after the payment of the underlying gross *claims* by the *insurer*, the following must be stated by way of supplementary note to **Form 22** or **25** (as appropriate) -
 - (a) the amount of such recoveries; and

- (b) the accounting treatment which has been adopted in respect of discounting such recoveries.

Risk groups

29. (1) Subject to (2), the name given in **Forms 31, 32 and 34** to a risk group must include a description of the risks within an *accounting class* included in that risk group.
- (2) Where the name required by (1) is not sufficient to identify the nature of the objects exposed to such risks and the nature of the cover provided against such risks, the information must be stated by way of supplementary note.
- (3) Subject to (1), the name given to a risk group must remain the same when that risk group is reported in subsequent *financial years*.

Continuation sheets

30. Continuation sheets to **Forms 31 and 34** need only be prepared in respect of *accounting class 7*.

	Incidents occurring in this financial year	52						

Instructions for completion of Form 22

1. Amounts included at lines 11 to 18 must be shown undiscounted and related adjustments for discounting must be shown at lines 31 to 39.
2. The values in column 4 are calculated as follows:

for lines 11 to 18 values in columns 2+3-1;
for lines 21 to 29 and lines 41 to 42 values in columns 1+2-3;
for line 19, lines 31 to 39 and lines 51 to 52 values in columns 3-1.
3. Amounts shown at lines 11 to 13, lines 15 to 17 and lines 31 and 32 must exclude amounts in respect of *claims management costs*.

Instructions for completion of Form 23

1. All figures are to be shown net of the *reinsurers'* share.
2. The accident years shown at lines 11 to 20 must correspond to the *financial year in question* and the nine *previous financial years* respectively.
3. Columns 1 to 9 must be shown before deduction for discounting.
4. All amounts shown must exclude *claims management costs*.
5. The percentage shown at column 12 must be the ratio of the columns 3+4+5+6-2 to column 2.
6. The percentage shown at column 13 must be the ratio of columns 1+3+4+5+6 to column 11.
7. $23.29.5 + 23.29.6 = 22.13.3 + 22.17.3$; $23.29.7 + 23.29.8 = 22.13.1$;
 $23.29.10 = 22.31.3 - 22.32.3$; and $23.29.4 = 22.13.2 + 22.17.2$.
8. [deleted]
9. Columns 1, 11 and 13 need not be completed in respect of accident years ended before 23 December 1994.
10. The percentages shown at columns 12 and 13 must be expressed as percentages to one place of decimals.
11. *Insurance business* reported on any Form 33 may be reported on this Form at line 22 and not lines 11 to 21.

Instructions for completion of Form 24

1. The underwriting years shown between the columns headed "29 29" and "99 99" must correspond (in reverse order) to the *financial year in question* and the nine *previous financial years* respectively.
2. Amounts shown in lines 21 to 29 must exclude *claims management costs*.
3. For *accounting classes* 1 to 8 and 10, amounts in respect of underwriting years ended before 23 December 1993 may be included in the prior underwriting years column.
4. The amounts shown at lines 51 to 54 must exclude equalisation provisions.
5. The amounts shown at lines 11 to 49 must be amounts payable or *receivable* during the *financial year in question*.

Instructions for the completion of Form 25

1. The underwriting years shown between the columns headed "29 29" and "99 99" must correspond (in reverse order) to the *financial year in question* and the nine *previous financial years*, respectively.
2. Lines 11 to 15, 19 to 21 and 29 must be completed for open years and lines 11 to 18 and 21 to 29 for closed years.
3. Line 29 must equal line 53 less 54 on Form 24.
4. Lines 11 to 15 must be shown before adjustment for *discounting*.
5. Lines 11 to 14, 16 and 17 must exclude *claims management costs*.
6. For *accounting classes* 1 to 8 and 10, amounts in respect of *financial years* ended before 23 December 1993 may be included in the prior underwriting years column.
7. Amounts may only be included at line 19 in so far as they arise from the offset of anticipated surpluses and deficits on *insurance business* managed together as defined by paragraph 25 of Appendix 9.2.

Instructions for completion of Form 26

1. All figures are to be shown net of the *reinsurers'* share.
2. The accident years shown at lines 11 to 20 must correspond to the *financial year in question* and the nine *previous financial years* respectively.
3. Columns 1 to 9 must be shown before deduction for *discounting*.
4. All amounts shown must exclude *claims management costs*.
5. The percentage shown at column 12 must be the ratio of the columns 3+4+5+6-2 to column 2.
6. The percentage shown at column 13 must be the ratio of columns 1+3+4+5+6 to column 11.
7. The aggregate of the sterling equivalent of an entry on Form 26 for all *business categories* within an *accounting class* must equal the corresponding entry on Form 23 for that *accounting class*.
8. The percentages shown at columns 12 and 13 must be expressed as percentages to one place of decimals.
9. The amounts shown in line 21 must be analysed on continuation sheets by accident year.
10. The box marked "Business category" must be completed by inserting one of the letters "a" to "h" according to which of the sub-paragraphs of rule 9.16(1) describes the *business category* to which the Form relates.

Instructions for completion of Form 27

1. All figures must be shown gross of the *reinsurers'* share.
2. The accident years shown at lines 11 to 20 must correspond to the *financial year in question* and the nine *previous financial years* respectively.
3. Columns 1 to 9 are to be shown before deduction for *discounting*.
4. All amounts shown must exclude *claims management costs*.
5. The percentage shown at column 12 must be the ratio of the columns 3+4+5+6-2 to column 2.
6. The percentage shown at column 13 must be the ratio of columns 1+3+4+5+6 to column 11.
7. $27.29.5+27.29.6 = 22.11.3+22.15.3$; $27.29.7+27.29.8 = 22.11.1$;
 $27.29.10 = 22.31.3$; and $27.29.4 = 22.11.2+22.15.2$.
8. The percentages shown at columns 12 and 13 must be expressed as percentages to one place of decimals.
9. The amounts shown in line 21 must be analysed on continuation sheets by accident year.
10. The box marked "Business category" must be completed by inserting one of the letters "a" to "h" according to which of the sub-paragraphs of rule 9.16(1) describes the *business category* to which the Form relates.

Instructions for completion of Form 28

1. The underwriting years shown between the columns headed "29 29" and "99 99" must correspond (in reverse order) to the *financial year in question* and the nine *previous financial years*.
2. Amounts shown in lines 21 to 29 must exclude *claims management costs*.
3. The amounts shown at lines 51 to 54 must exclude equalisation provisions.
4. For *accounting class 10* (other than *business categories* (c) and (d) and such other categories as have been reported previously on Form 29) amounts in respect of underwriting years ended before 23 December 1993 may be included in the prior underwriting years column and (if so) instruction 5 must not apply to such amounts.
5. The amounts shown in the first column must be analysed on continuation sheets by underwriting year (although amounts in respect of underwriting years beginning prior to 1 January 1983 may be shown in aggregate).
6. The box marked "Business category" must be completed by inserting one of the letters "a" to "h" according to which of the sub-paragraphs of rule 9.16(1) describes the *business category* to which the Form relates.
7. The amounts shown at lines 11 to 49 must be amounts payable or *receivable* during the *financial year in question*.

Instructions for completion of Form 29

1. The underwriting years shown between the columns headed "29 29" and "99 99" must correspond (in reverse order) to the *financial year in question* and the nine *previous financial years*, respectively.
2. Lines 11 to 15, 19 to 21 and 29 must be completed for open years and lines 11 to 18 and 21 to 29 for closed years.
3. Line 29 equals line 53 less 54 on Form 28.
4. Lines 11 to 15 must be shown before adjustment for *discounting*.
5. Lines 11 to 14, 16 and 17 must exclude *claims management costs*.
6. For *accounting class 10* (other than *business categories (c)* and *(d)* and such other categories as have been reported previously on Form 29) amounts in respect of underwriting years ended before 23 December 1993 may be included in the prior underwriting years column and (if so) instruction 7 must not apply to such amounts.
7. The amounts shown in the first column must be analysed on continuation sheets by underwriting year (although amounts in respect of underwriting years beginning prior to 1 January 1983 may be shown in aggregate).
8. The box marked "Business category" must be completed by inserting one of the letters "a" to "h" according to which of the sub-paragraphs of rule 9.16(1) describes the *business category* to which the Form relates.
9. Amounts may only be included at line 19 in so far as they arise from the offset of anticipated surpluses and deficits on business managed together (as defined by paragraph 25 of Appendix 9.2).

General insurance business : Expected income and yield from admissible assets covering discounted provisions

		Company registration number	GL/UK/CM	Period ended			Units
				day	month	year	
		R30					£000
Type of asset		Value of admissible assets as shown on Form 13	Admissible assets hypothecated to cover the provision for outstanding claims being discounted	Expected income from assets included in column 2			Yield %
		1	2	3			4
Land and buildings		31					
Fixed interest securities	Approved securities	32					
	Other	33					
Variable interest and variable yield securities (excluding items shown at line 36)	Approved securities	34					
	Other	35					
Equity shares and holdings in collective investment schemes		36					
Loans secured by mortgages		37					
All other assets	Producing income	38					
	Not producing income	39					
Total		49					

Instructions for completion of Form 30

1. The entry at-
 - 30.31.1 must equal 13.11.1
 - 30.32.1 must equal 13.45.1 + the appropriate part of 13.84.1
 - 30.33.1 must equal 13.46.1 + the appropriate part of 13.84.1
 - 30.34.1 must equal 13.47.1 + the appropriate part of 13.84.1
 - 30.35.1 must equal 13.42.1 +13.48.1 + the appropriate part of 13.84.1
 - 30.36.1 must equal 13.41.1 +13.43.1
 - 30.37.1 must equal 13.50.1 + the appropriate part of 13.84.1
 - 30.49.1 must equal 13.87.1 +13.89.1 - 13.60.1 - 13.61.1 - 13.62.1 - 13.63.1 – 13.85.1.
2. The hypothecated assets shown in column 2 must not be less than (but need not equal) the provision for outstanding *claims* being discounted (column 6 less column 7 on sheet 1). Where specific assets are not hypothecated to cover the provision for outstanding *claims* being discounted, column 2 equals column 1.
3. The income in column 3 must be the amounts before deduction of tax which would be received in the next *financial year* on the assumption that-
 - (i) the assets are held throughout that year, and
 - (ii) the factors which affect income remain unchanged but account is to be taken of any changes in those factors known to have occurred.
4. The yield in column 4 must be-
 - (i) for *securities* with a redemption value, the rate of interest which, when used to obtain a present value of expected future income or capital payments, gives the current asset value, and
 - (ii) for all other assets the ratio of the income included in column 3 to the value included in column 2,or where appropriate an average of the above weighted by reference to the values included in column 2.
5. The methods and assumptions used in determining the yield in accordance with must be stated by way of supplementary note to this Form.
6. Where a particular asset is required to be taken into account only to a specified extent by the application of admissibility limits, the expected income and capital payments from that asset must be included only to the same extent.
7. The treatment of expected income payments from any asset where such payment is in default must be stated by way of supplementary note to this Form.
8. In column 8 "Unwind in discount in the next *financial year*" refers to the expected reduction in the deduction for the discounting between-
 - (i) that shown at the end of the *financial year in question*, and

- (ii) that expected to be shown at the end of the next *financial year* but in respect of *claims* incurred prior to the end of the *financial year in question*.
9. Columns 4 and 9 to 11 must be expressed as a percentage to one place of decimals.
 10. In the above instructions, income excludes capital gains or losses or value adjustments.
 11. The discount rate in column 11 must be the average rate of interest at which the provisions are being discounted, weighted by the provisions contained in column 6.
 12. The references in the Form to “outstanding claims” and “technical provisions” are to those amounts net of *reinsurance*

Instructions for completion of Form 31

1. All figures must be shown gross of the *reinsurers'* share and before any deduction for *discounting*.
2. The accident years at lines 11 to 20 must correspond to the *financial year in question* and the nine *previous financial years* respectively.
3. All amounts shown must exclude *claims management costs*.
4. The percentage shown at column 11 is the ratio of the sum of columns 3 to 6 to column 10.
5. Columns 10 and 11 need not be completed in respect of accident years ended before 23 December 1994.
6. The percentages shown at column 11 must be expressed as percentages to one place of decimals.
7. For risk groups falling in *accounting class 7*, the amounts shown in line 21 must be analysed by accident year on continuation sheets.
8. Columns 1 and 2 need not be completed in respect of *accounting classes 3, 4 and 5*.

Instructions for completion of Form 32

1. All figures must be shown gross of the *reinsurers'* share and before any deduction for *discounting*.
2. The accident years at lines 11 to 20 must correspond to the *financial year in question* and the nine *previous financial years* respectively.
3. All amounts shown must exclude *claims management costs*.
4. The percentage shown at column 11 must be the ratio of the sum of columns 3 to 6 to column 10.
5. Columns 10 to 13 need not be completed in respect of accident years ended before 23 December 1994.
6. The number of vehicle years insured in any accident year is the aggregate of the product for each *contract of insurance* of the period (being the period during that accident year when the contract was in force) and the number of vehicles insured under the contract. Figures are to be rounded to the nearest thousand-vehicle years only after aggregating component figures.
7. The percentage shown at column 13 must be the ratio of the sum of columns 1 and 2 to the product of 1000 and column 12.
8. The percentages shown at columns 11 and 13 must be expressed as percentages to one place of decimals.

			R37		day	month	year	£000
	Business group A (property) 1	Business group B (business interruption) 2	Business group C (marine and aviation) 3	Business group D (nuclear) 4	Business group E (non-proportional treaty) 5	All business groups 6	Credit insurance business 7	
Calculation of the maximum provision								
Total net premiums written in the previous 4 years	11							
Net premiums written in the current year	12							
Maximum provision	13							

Calculation of the transfer to/from the provision

Equalisation provision brought forward	21							
Transfers in	22							
Total abnormal loss	23							
Provisional transfers out	24							
Excess of provisional transfer out over fund available	25							
Provisional amount carried forward (21+22-24+25)	26							
Excess, if any, of 26 over 13	27							
Equalisation provision carried forward (26-27)	28							
Transfer in/(out) for financial year (28-21)	29							

Instructions for completion of Form 37

1. Lines 11 & 12, columns 1 to 5, must include net written premium from the Form 21 (accident year *insurance business*) and/or Form 24 (underwriting year *insurance business*) that in whole or in part covers each *business group*.
2. Only premium for *financial years* covered by the scheme may be included in lines 11 & 12, columns 1 to 5 (see Appendix 6.1, Part 111). Adjustments in respect of prior years must be included at line 12.
3. Any *insurance business* that has been transferred must be excluded from lines 11 & 12, columns 1 to 5 (see rules 6.8 and 6.9).
4. Line 13, columns 1 to 5 must show the maximum provision for each *business group* calculated in accordance with Appendix 6.1. If *insurance business* in a group has been written for less than 5 years, the average of the qualifying years must be used.
5. If all rights and obligations in a *business group* have been transferred, line 13 columns 1 to 5 must be left blank at the appropriate column.
6. Line 22, columns 1 to 5 must be calculated by multiplying the figure at line 12 for each *business group* by the % in paragraph 3 of Part 1 of Appendix 6.1.
7. Line 23 must be, for each *business group*, the total of abnormal losses, if any, brought forward from Forms 38 and 39, line 19. These must be entered in the same columns as they were on Forms 38 and 39.
8. The transfer out for each *business group* at line 24, columns 1 to 5 must not exceed the line 13 maximum provision for that group.
9. The sum of columns 1 to 5 of lines 13, 22 and 24 must be entered in column 6 of the relevant line.
10. In the first year of the scheme, line 21 column 6 must be left blank. In subsequent years this figure must be brought forward from the previous year's figure (normally the figure at Form 15, line 15). Only equalisation provisions required by the *Equalisation Reserves Rules* may be included.
11. The calculations for lines 25 to 29, column 6 must be carried out and the net transfer in or out for the year must be entered at Form 16, line 12, and the provision carried forward entered at Form 15, line 15.
12. Line 13, column 7 must be 150% of the highest annual amount of net premiums written in the last 5 years.
13. Line 21, column 7 must equal the statutory credit equalisation provision, if any, brought forward from the previous year at Form 15, line 14.
14. Line 22, column 7 must be 75% of the technical surplus, if any, brought forward from Forms 38 and/or 39, line 29, subject to a limit of 12% of line 12.
15. Line 24, column 7 must equal the technical deficit, if any, brought forward from Forms 38 and/or 39, line 29.

16. The calculations for lines 25 to 29, column 7 must be carried out and the net transfer in or out for the year must be entered at Form 16, line 12, and the provision carried forward entered at Form 15, line 14.

Instructions for completion of Form 38

1. Apart from *credit insurance business*, any *insurance business* transferred to an *insurer* by novation or under Part VII of the *Act* (or the *1982 Act*) must be accounted for in accordance with rule 6.9.
2. The entries at line 11 must be derived from Form 21, that in whole or in part covers the *business group*, at line 11, column 5 and line 19, column 5.
3. The entries at line 12 must be derived from Form 22, that in whole or part covers the *business group*, at line 13 and 17, column 4.
4. The entries at line 13 must be line 11 (or nil if line 11 is negative) multiplied by the trigger *claims* ratio for the *business group*.
5. For each *business group* the entry at line 19 must be the amount, if any, by which the entry at line 12 for that *business group* exceeds the entry at line 13. If the entry at line 12 does not exceed the entry at line 13, line 19 must be left blank.
6. The entry at line 21 must be derived from Form 21 for *accounting class 8*, at line 11, column 5 and line 19, column 5, to include only *insurance business* in *general insurance business class 14*.
7. The entry at line 22 must be derived from Form 22 for *accounting class 8*, at lines 13 and 17, column 4, to include only *insurance business* in *general insurance business class 14*.
8. The entry at line 23 must be derived from Form 22 for *accounting class 8*, at lines 14 and 18, column 4, to include only *insurance business* in *general insurance business class 14*.
9. The entry at line 24 must be derived from Form 22 for *accounting class 8*, at lines 19 and 29, column 4, to include only *insurance business* in *general insurance business class 14*.

Instructions for completion of Form 39

1. Apart from *credit insurance business*, any *insurance business* transferred to an insurer by novation or under Part VII of the *Act* (or the *1982 Act*) must be accounted for in accordance with rule 6.9.
2. The entries at line 11 must be derived from Form 24, that in whole or in part covers the *business group*, at line 19, column 99-99.
3. The entries at line 12 must be derived from column 99-99 of Forms 24 and 24, that in whole or part covers the *business group*, as follows:

line 29 on Form 24 plus line 29 less line 15 less line 24 on Form 25 less line 29 plus line 15 plus line 24 on Form 25 for the *preceding financial year*.
4. The entries at line 13 must be line 11 (or nil if line 11 is negative) multiplied by the trigger *claims* ratio for the *business group*.
5. For each *business group* the entry at line 19 must be the amount, if any, by which the entry at line 12 for that *business group* exceeds the entry at line 13. If the entry at line 12 does not exceed the entry at line 13, line 19 must be left blank.
6. The entry at line 21 must be derived from Form 24 for *accounting class* 8, at line 19, column 99-99, to include only *insurance business* in *general insurance business class* 14.
7. The entry at line 22 must be derived from Form 24 for *accounting class* 8, at line 29, column 99-99, plus line 53, column 99-99 less line 51, column 99-99, to include only *insurance business* in *general insurance business class* 14.
8. The entry at line 23 must be derived from Form 24 for *accounting class* 8, at line 39, column 99-99, to include only *insurance business* in *general insurance business class* 14.
9. The entry at line 24 must be derived from Form 24 for *accounting class* 8, at line 49 column 99-99, to include only *insurance business* in *general insurance business class* 14.

APPENDIX 9.3 (rule 9.14 and 9.23)

LONG-TERM INSURANCE BUSINESS REVENUE ACCOUNT AND ADDITIONAL INFORMATION (FORMS 40 TO 45)

1. All the Forms included in the part of the *return* to which this Appendix relates (**Forms 40 to 45**) are to be laid out as shown in this Appendix, except that the instructions to Forms need not be reproduced.
2. The provisions of paragraph 1(2) and paragraphs 3 to 7 of **Appendix 9.1** must, unless otherwise provided, also apply for the purposes of this Appendix. All amounts must be shown in sterling to the nearer £1,000 except valuation unit prices which must be shown to the same level as required under **Appendix 9.4**. Percentages must be shown to two decimal places.
3. For the purposes of this Appendix, a contract is to be regarded as a **UK contract** if, in the case of *direct or facultative reinsurance* accepted, the contract was effected in the United Kingdom or if, in the case of a *reinsurance treaty*, the *cedant* was a *insurer* having its head office in the United Kingdom or was a member of the *Society*; and **overseas contracts** is to be construed accordingly.
4.
 - (1) Where a *insurer* maintains more than one *long-term insurance business fund*, there must be stated by way of a supplementary note to **Form 40** the principles and methods applied to apportioning the investment income, increase or decrease in the value of assets brought into account, expenses and taxation between the different funds.
 - (2) Boxes marked 'No. of Fund/Summary' must be completed by the inclusion of a discrete number to identify each fund or, if the Form relates to a part of the fund, the fund of which it is part. Where there is only one fund for *ordinary long-term insurance business* or for *industrial assurance business*, as the case may be, the number '1' must be shown in the box marked 'No. of Fund/Summary'. Where the Form is a summary Form, the number '99' must be inserted in that box. Boxes marked 'No. of Part of Fund' must show a discrete number for each part of a fund or the figure '0' if the Form is a statement of the whole fund.

5. Where arrangements have been made for the provision of management services to an *insurer* by another *company* (whether an *insurer* or not) -
- (a) the *insurer* receiving the services must state, by way of a supplementary note to **Form 40**; and
 - (b) the *company* (if an *insurer*) providing the services must state, by way of a supplementary note to **Form 40**,

that the arrangements have been in force in the *financial year* and naming the parties to them.

FORMS

[**Forms 40 – 45** to follow]

Long term insurance business : Revenue account

Name of insurer

Global business/UK branch business/EEA branch business

Ordinary insurance business/Industrial insurance business

Financial year ended

Name and number of fund/Summary

	Company registration number	GL/UK/CM	Period ended			Units	OB/IB	No of fund/ Summary	No of part of Fund
			day	month	year				
R40						£000			
Items to be shown net of reinsurance ceded							The financial year 1	Previous year 2	
Earned premiums						11			
Investment income receivable before deduction of tax						12			
Increase (decrease) in the value of non-linked assets brought into account						13			
Increase (decrease) in the value of linked assets						14			
Other income						15			
Total income (11 to 15)						19			
Claims incurred						21			
Expenses payable						22			
Interest payable before deduction of tax						23			
Taxation						24			
Other expenditure						25			
Transfer to (from) non technical account						26			
Total expenditure (21 to 26)						29			
Increase (decrease) in fund in financial year (19-29)						39			
Fund brought forward						49			
Fund carried forward (39+49)						59			

Instructions for completion of Form 40

1. The entry at 40.11.1 must be equal to the sum of 41.19.3 and 41.29.3, the entry at 40.21.1 must be equal to 42.59.3, and the entry at 40.22.1 must be equal to 41.49.3
2. Any item of income which cannot properly be allocated to lines 11, 12, 13 or 14 must be entered in line 15, and similarly, any item of expenditure which cannot properly be allocated to lines 21, 22, 23 or 24 must be entered in line 25. Particulars of such items must be specified in a supplementary note.
3. Where an *insurer* decides to allocate to the *long-term insurance business* the whole or any part of investment income and/or net capital gains arising from assets not attributable to its *long-term insurance business*, the amounts in question must be shown as a transfer in line 26 and particulars must be specified in a supplementary note.
4. Where a transfer is made to the non-technical account, the entry at line 26 must show amounts which have been included in line 47 of Form 58. Transfers from or to other funds must be included in line 15 or 25, with transfers to reserves associated with a transfer of contracts from one fund to another specified in a supplementary note.
5. The entry at line 12 must exclude value re-adjustments on investments and gains on the realisation of investments, which must be shown in lines 13 or 14 as appropriate.
6. The entry at line 11 must exclude any change in the provision for unearned premiums.
7. The entry at line 21 must exclude *claims management costs*, which must be included in line 22, and any change in the provision for *claims*.

1	2	3	4	5	6	7	8
Total							

Instructions for completion of Form 43

1. The basis on which the assets have been valued must be stated in a supplementary note.
2. The aggregate value of rights (gross of *variation margin*) and the aggregate amount of liabilities (gross of *variation margin*) under *derivative contracts* (or in respect of contracts or assets which have the effect of a *derivative contract*) must each be stated in a supplementary note. The corresponding figures net of *variation margin* must also be stated. For this purpose, rights and liabilities must not be set off against one another unless
 - (i) such rights and liabilities may be set off against each other in accordance with generally accepted accounting practice, and
 - (ii) such set off results (in whole or in part) from the closing out of obligations under a contract.
3. Where there is a liability to repay *variation margin* and there are no arrangements for netting of amounts outstanding or the arrangements would not permit the accounting of such amounts on a net basis in accordance with generally accepted accounting practice, it must be so stated in a supplementary note.
4. The total of the net asset value in column 8 less the total of column 3 must equal line 59 of Form 44.

Long term insurance business : Aggregate revenue account for internal linked funds

Increase (decrease) in funds in financial year (19-29)						39			
Internal linked funds brought forward						49			
Internal linked funds carried forward (39+49)						59			

Instructions for completion of Form 44

1. Double counting of items arising from cross investment between *internal linked funds* must be eliminated.
2. Any item of income which cannot properly be allocated to lines 11, 12, or 13 must be entered in line 14, and similarly, any item of expenditure which cannot properly be allocated to lines 21, 22, 23, 24 or 25 must be entered in line 26. Particulars of such items must be specified in a supplementary note.
3. The gross value of units created must be shown in line 11. The gross value of units cancelled must be shown in line 21.

Instructions for completion of Form 45

1. Column 3 must show the provisions for tax on unrealised capital gains as a percentage of the taxable unrealised capital gain. Similarly, column 4 must show the provisions for tax on realised capital gains as a percentage of the taxable realised capital gain.
2. The liquidity percentage shown in column 5 must be the sum of the values of *approved securities*, short-term deposits and cash held by the fund, less any liabilities included in column 6 or 7 of Form 43, shown as a percentage of the net asset value in column 8 of Form 43.
3. Where there is more than one series of units for any *internal linked* fund the valuation price of each series of unit must be given in column 6 together with the name of that series of unit.

APPENDIX 9.4 (rule 9.31)

ABSTRACT OF VALUATION REPORT PREPARED BY APPOINTED ACTUARY (FORMS 46 TO 61)

All the Forms included in the part of the *return* to which this Appendix relates (**Forms 46 to 49, 51 to 58, 60 and 61**) are to be laid out as shown in the Appendix, except that the instructions to Forms need not be reproduced.

For the purposes of this Appendix -

- (a) the **report period** means the period from the date to which the previous investigation under rule 9.4 or its predecessor legislation related to the 'valuation date' (as defined in 1);
- (b) the provisions of paragraph 1(2) and paragraphs 3 to 7 of **Appendix 9.1** and paragraph 3 of **Appendix 9.3** must, unless otherwise provided, apply; and
- (c) boxes marked 'UK/OS' must be completed by the insertion of 'UK' for 'UK contracts' and 'OS' for 'overseas contracts'.

All amounts in the Forms must be shown in sterling to the nearer £1,000 except valuation unit prices which must be shown to the level used in the valuation. Yields must be shown as percentages to two decimal places.

The following information must be given, the answers being numbered to accord with the numbers of the corresponding paragraphs of this Appendix.

- 1. The date to which the actuarial investigation relates namely, the **valuation date**.
- 2. The date to which the previous investigation under rule 9.4 related.
- 3. A statement that the valuation has been made in conformity with rule 5.6 or, where this was not the case, such qualification, amplification or explanation as necessary.
- 4. (1) Subject to (2), for each category of *non-linked contract* which -

- (a) comprises *accumulating with-profits policies*, a full description of the benefits, including -
 - (i) the circumstances in which, and the method by which, an adjustment to the identifiable current benefit attributable to a *policy* could be made on the payment of any *claim*, including by full or partial surrender, or upon the determination of the amount of any charges deducted under the *policy* together with a description of the *insurer's* policy and past practice in this regard,
 - (ii) where the discounted value of the liability in respect of current benefits including vested bonuses shown in column 12 of **Form 52** is less than the full amount of the current benefit shown in column 11 and the discounted value assumes the exercise of any discretionary adjustments of the type referred to in (a)(i), a general description of such adjustments made during the 'report period',
 - (iii) any guaranteed investment returns or bonus rates,
 - (iv) any guaranteed surrender values, and
 - (v) any material options;
- (b) comprises *policies* (other than those included in (a)) which provide for benefits to be determined on the basis of interest accrued (at a rate to be determined from time to time) in respect of premiums paid, a full description of the benefits, including -
 - (i) the method used to calculate surrender values,
 - (ii) any guaranteed investment returns,
 - (iii) rates of interest applied during the 'report period',
 - (iv) any guaranteed surrender values, and
 - (v) any material options;

- (c) does not fall within (a) or (b), and which is not sufficiently described by the entry in column 1 of **Form 51**, a full description of the benefits, including any premium rate guarantees and material options.
- (2) Information required under (1) need not be provided for any category of contract -
- (a) where no contracts were effected by the *insurer* during the ‘report period’; and
 - (b) which has been included in **Form 51** or **Form 52** under the miscellaneous headings specified in instruction 8 (vi) or 8 (x) to **Forms 51, 52, 53** and **54**.
5. (1) Subject to (3), for each category of *linked contract* -
- (a) the name given to that category;
 - (b) the type of contract, classified according to the categories set out in instructions 3 to 8 of the instructions for completion of Forms 51, 52, 53 and 54;
 - (c) a statement of the frequency of premiums;
 - (d) a brief description of the benefits under the contract, including any eligibility to participate in profits, any guarantees and any material options;
 - (e) details of any guaranteed investment returns;
 - (f) a description of the way in which the *insurer* recovers out of *policies* its costs (including acquisition expenses and commission, renewal expenses and commission and the costs attributable to the provision of *policy* benefits). Where the *policy* provides for the allocation of units, the annual rate of any management charges must be given. Where the amount of premiums deemed to be invested after allowing for the effect of any charges is greater than the amount of the premiums, an explanation must be given;
 - (g) details of any restrictions on increases in charges;
 - (h) the method used to calculate surrender or transfer values;

- (i) whether benefits are (or may be) determined (whether wholly or in part) by reference to the value of an *internal linked fund*, or to the value of assets or an index. Where the link is to the value of assets or an index, those assets or that index must be specified and details of the relationship between their value and benefits payable to *policy holders* must be given;
- (j) a brief description of any other features of the contract not disclosed above which are material to the method and basis of valuation;
- (k) whether the contract was open to new business in the year to the 'valuation date'; and
- (l) any increases in the rates of charges applied generally to contracts during the 'report period', including charges for the provision of *policy* benefits met by the cancellation of units nationally allocated to contracts,

but where the terms and conditions and the method and basis for determining the amount of the *long-term insurance business liabilities* are not materially different for a number of categories of contract, only one description need be given pursuant to this paragraph, provided that the name of each such category is given in the *insurer's* response to (a).

- (2) For each category of *linked contract* which contains a with-profits option, the information required by 4(1)(a) must also be given.
- (3) Information required under (1)(a) to (k) and (2) need not be provided for any category of contract -
 - (a) where no contracts were effected by the *insurer* during the 'report period'; and
 - (b) which has been included under the miscellaneous heading in **Form 53** or **54**.
- (4) A description of the method, or if there is more than one method of the methods and the types of unit to which each applies, used for the creation and cancellation of units in internal linked funds and determining unit prices for the allocation of units to, and the cancellation of units from, policies.

- (5) A description of the method, or if there is more than one method of the methods and the types of unit to which each applies, used to determine the provision for tax on realised and unrealised capital gains and the percentage or percentages of these gains deducted or provided for during the 'report period'.
 - (6) Wherever units of the type referred to in paragraph 5 of Part I of **Appendix 3.2** are held by an *internal linked fund*, or where *property linked benefits* are linked to such units, the rate of discount, commission or other allowance made to the *insurer* on the purchase, sale or holding of units and the extent to which the *policy holder* benefits from such discount, commission or other allowance.
6. (1) The general principles and methods adopted in the valuation, including specific reference to the following -
- (a) the method by which account has been taken of *derivative contracts* or contracts or assets having the effect of *derivative contracts* in the determination of the amount of the *long-term insurance business liabilities*;
 - (b) the method by which due regard has been given to the reasonable expectations of *policy holders*, as required by rule 5.6, and by which account has been taken of the custom and practice of the insurer in the manner and timing of the distribution of profits or the grant of discretionary additions over the duration of each *policy*, as required by rule 5.7(6);
 - (c) where the net premium method has been used, whether and to what extent it has been modified, for what purposes any such modification has been made and whether any modifications on account of *zillmerising* conform to rule 5.10;
 - (d) whether any negative reserves arose and the steps taken to ensure that no *contract of insurance* was treated as an asset, as required by rule 5.15;
 - (e) whether any specific reserve has been made for future bonuses and, if so, at what rate or rates;
 - (f) the basis of the provision made for any prospective liability to taxation on unrealised capital gains;

- (g) in the case of *linked contracts* and contracts falling within 4(1)(a) and (b), the basis of the reserve made for any investment performance guarantees; and
 - (h) the basis of the reserve made for any guarantees and options (other than investment performance guarantees included in (g)).
- (2) For the purposes of this paragraph, where, in determining the provisions referred to in (f) or the reserves referred to in 7(7) or (8), account has been taken of the fact that the fund has been brought into **Form 58** at book value in accordance with rule 4.1(6), that fact must be stated.
7. (1) Unless shown in **Forms 51, 52, 53 and 54**, the rates of interest and tables of mortality and morbidity assumed in the valuation of each category of contract.
- (2) If the tables used have not been published, full details of the rates of mortality or morbidity used.
- (3) A general description of how the tables of mortality and morbidity assumed in the valuation of the various categories of contract have regard to the State of the *commitment*.
- (4) Details of any allowance made for future reductions in the rates of mortality in the tables of mortality assumed in the valuation of annuity contracts.
- (5) Details of any allowance made, and the amount of any reserve held, for any possible detrimental impact of significant changes in the incidence of disease or developments in medical science on the mortality and morbidity experience of the company in the tables of mortality and morbidity assumed in the valuation of contracts.
- (6) A description of all the scenarios of future changes in the value of assets which have been tested in order to take account of the nature (including currency) and terms of the assets held in determining the amount of the *long-term insurance business liabilities* in accordance with rule 5.17 identifying that scenario which produces the most onerous requirement (whether or not a reserve is required).
- (7) The amount of any reserve made pursuant to rule 5.17(a), together with a brief description of the method used and assumptions made to calculate any such reserve.

- (8) In respect of that scenario described under (6) which produces the most onerous requirement (whether or not a reserve is required), the amount of any reserve made pursuant to rule 5.17(b), together with -
- (a) a description of the changed assumptions made (other than the changed interest rate stated in **Form 57**) in calculating such requirement;
 - (b) a brief description of the method used to calculate such requirement; and
 - (c) resulting from the application of such changed assumptions -
 - (i) the change in the aggregate amount of the *long-term insurance business liabilities*, and
 - (ii) the aggregate amount by which the assets allocated to match such liabilities in the scenario have changed in value from the amount of those assets shown in **Form 13**.
- (9) A general description of how the rates of interest assumed in the valuation of the various categories of contract with liabilities denominated in currencies other than sterling have taken into account the currency of the liabilities.

8. In respect of *non-linked contracts* -

- (a) where appropriate, the proportion of the office premiums explicitly or implicitly reserved for expenses and profits for each type of insurance (as shown in column 8 of **Form 51** or column 10 of **Form 52**);
- (b) the method by which a reserve has been made for expenses after premiums have ceased or where no future premiums are payable or where the method of valuation does not take credit for future premiums as an asset;
- (c) where a prospective method of valuation has not been used, details of the tests made of the adequacy of the method used;
- (d) where, in valuing contracts falling within the circumstances described in rule 5.9(1), future premiums brought into account are not in accordance with that rule, such additional information as is necessary to demonstrate whether the *mathematical reserves* determined in the aggregate for each of the main categories of contract are greater than

an amount for each such category calculated in accordance with rules 5.8 to 5.17,

except that where the *mathematical reserves* (after deduction of *reinsurance cessions*) determined in the aggregate for all categories of contracts referred to in (d) represent less than 5% of the total *mathematical reserves* (after deduction of *reinsurance cessions*) for all *non-linked contracts*, it is sufficient for the actuary to state that the *mathematical reserves* for each such category of contracts are not less than the *mathematical reserves* that would be determined on a net premium reserving basis which, in that case, must be specified by the actuary in the abstract.

9. For each category of *linked contract* -
 - (a) all assumptions made in calculating the valuation net liability in columns 12 and 13 of **Forms 53** and **54**; and
 - (b) where an explicit reserve has not been made for meeting the expenses likely to be incurred in future in fulfilling the existing contracts on the basis of specific assumptions in regard to the relevant factors, details of the basis used in testing the adequacy of the reserves to satisfy rule 5.13(1).
10.
 - (1) The assumed levels of inflation of expenses and the bases used in the valuation to allow for such future inflation.
 - (2) The aggregate amount, grossed up for taxation where appropriate, arising during the 12 months after the 'valuation date' from implicit and explicit reserves made in the valuation to meet expenses in fulfilling contracts in force at the 'valuation date', and a general description of the sources of such amounts.
 - (3) The method and basis of calculation of the requirement (whether or not a reserve is required) in respect of the expenses of continuing to transact new business during the 12 months following the 'valuation date' and the amount of the reserve so calculated.
 - (4) The method and basis of calculation of the requirement (whether or not a reserve is required) to provide for the costs of closure to new business, if the *insurer* were to cease to transact new business 12 months after the 'valuation date' and the amount of the reserve so calculated.

11. (1) A schedule of the sum of the *mathematical reserves* (other than liabilities for *property linked benefits*) and the liabilities in respect of the deposits received from *reinsurers* as shown in **Form 14**, analysed by reference to the currencies in which the liabilities are expressed to be payable, together with the value of the assets, analysed by reference to currency, which match such liabilities.
- (2) In the schedule required by (1), liabilities totalling up to 2% of the total required to be analysed may be grouped together as ‘other currencies’, and the assets matching those liabilities need not be analysed provided that the proportion of such liabilities which are matched by assets in the same currency is stated.
12. (1) For *long-term insurance business ceded* on a facultative basis to a *reinsurer* who is not authorised to carry on *insurance business* in the United Kingdom at any time during the ‘report period’ -
 - (a) the aggregate of premiums payable by the insurer to all such reinsurers (sub-divided according to financial years, if appropriate) and the aggregate amount deposited at the ‘valuation date’ under any deposit back arrangement; and
 - (b) the amount of any such premiums payable by the insurer to any reinsurer which is a connected company of the insurer and the aggregate amount deposited at the ‘valuation date’ under any deposit back arrangement.
- (2) For each treaty of *reinsurance* where the *insurer* is the *cedant* and under which business is in force at the ‘valuation date’ -
 - (a) the name of the *reinsurer*;
 - (b) whether the *reinsurer* is authorised to carry on insurance business in the United Kingdom;
 - (c) whether the *reinsurer* is a *connected company* of the *insurer*;
 - (d) an indication of the nature and extent of the cover given under the treaty;
 - (e) the premiums payable by the *insurer* under the treaty during the ‘report period’;

- (f) the amount deposited at the 'valuation date' in respect of the treaty under any *deposit back arrangements*;
 - (g) the extent to which provision has been made for any liability of the insurer to refund any amounts of *reinsurance* commission in the event of lapses or surrender of the contract; and
 - (h) whether the treaty is closed to new business.
- (3) For each 'financing arrangement' -
- (a) the amount of any undischarged obligation of the insurer and a brief description of the conditions for the discharge of such obligation; and
 - (b) a description of how, if at all, all such undischarged obligations have been taken into account in the valuation.
- (4) In this paragraph -
- (a) **financing arrangement** means any contract entered into by the *insurer*, in respect of *contracts of insurance* effected by the *insurer*, which has the effect of increasing the amount of assets included at line 34 of **Form 9**, representing assets of the insurer which are available to meet its *required minimum margin* for *long-term insurance business*, and which includes terms for -
 - (i) the transfer of assets to the *insurer* or the creation of a debt to the *insurer* (or both), and
 - (ii) either an obligation for the *insurer* to return (with or without interest) some or all of such assets or a provision for the diminution of such *debt*, in each case, in specified circumstances; and
 - (b) paragraphs (1), (2) and (3)(a) of rule 9.32 (which relate to connected persons) have effect for the purposes of this paragraph as they have effect for the purposes of those rules.

13. (1) Subject to (2), for each *with-profits fund*³, except where such information is provided elsewhere in the *return* –
- (a) a revenue account in the format of **Form 40** with a supplementary note stating the amount, if any, of investment income relating to *linked assets* included in line 12; and
 - (b) a statement of liabilities and margins in the format of **Form 14** with a supplementary note stating the amount, if any, of the increase or decrease, as the case may be, in the value of *non-linked assets*.
- (2) Where the amount (or part of the amount) of any increase or decrease in *non-linked assets* has yet to be allocated between *with-profits funds* or between one or more *with-profits funds* and other purposes, the information required by (1)(b) in aggregate for that amount or part amount, with a supplementary note which:
- (a) identifies the *with-profits funds* to which the information relates;
 - (b) provides the information in lines 11 to 49 of **Form 14** separately in respect of each *with-profits fund*; and
 - (c) without prejudice to 14(2), describes the basis upon which increases or decreases in the value of *non-linked assets* are, or will be, allocated between the *with-profits funds* or between the *with-profits funds* and other purposes.
14. (1) The principles on which the distribution of profits among *policy holders* and shareholders is based as described in any or all of the following documents -
- (a) the constitution of the *insurer*;
 - (b) board resolutions of the *insurer*;
 - (c) any policy issued by the *insurer*;
 - (d) any advertisement issued by or on behalf of the *insurer*;

³ *With-profits fund* includes subfunds (whether notional or real).

- (e) any document required to be issued by the *FSA* or any regulatory body recognised under the *Act*; and
 - (f) any other relevant document.
- (2) For each *with-profits fund*, a description of the *insurer's* policy and (insofar as it may be relevant to *policy holders' reasonable expectations*) its past practice as to:
- (a) how the *with-profits fund* is defined, which assets, liabilities, income and expense are allocated to it and how the amounts of such assets, liabilities, income and expense are determined;
 - (b) whether any non-profits *insurance business*, or any profit on it, is attributed to the *with-profits fund* and, if so, the nature and volume of such business;
 - (c) how assets within the *with-profits fund* are invested;
 - (d) the level of surplus or free reserves to be maintained in the *with-profits fund*; and
 - (e) the relationship between the performance of the *with-profits fund* and discretionary benefits allocated to *policy holders* including:
 - (i) whether an asset share methodology, or equivalent methodology, is used or is to be used and, if so, how asset shares are calculated (including whether and how investment income, increases or decreases in the value of investments or other assets, expenses, miscellaneous surpluses and deficits, taxation and other items of income and expense are attributed to asset shares) and how they relate to the benefits actually allocated to *policy holders*,
 - (ii) an indication of how, under different scenarios as to the performance of the fund, discretionary benefits are to be smoothed from period to period,
 - (iii) the pattern of allocation of discretionary benefits over the life of a *with-profits policy*, including the balance between annual and terminal bonuses and how *policies* are treated on surrender or on the exercise of options under the contract,

- (iv) how fairness is maintained between different categories of *policy* and different categories of *policy holder* and between *policy holders* collectively and the *insurer* itself, and
 - (v) any other factors which are material to the allocation of discretionary benefits to *policy holders*; and
 - (f) the principles followed by the *insurer* in setting actual proportions of profits distributed to *policy holders* and shareholders.
- (3) A description of the methods used in order to ensure that the aims described in (2) are achieved.
- (4) Subject to (5), if different principles or bonus policies apply to different categories of *with-profits policies* issued by the *insurer*, the information in (1) to (3) must be given in respect of each category.
- (5) Categories of *with-profits policies* which, apart from this paragraph 14(5), would require separate information in accordance with (4) need only be listed under this paragraph 14(5), and the information in (1) to (3) need not be supplied, provided that -
- (a) the aggregate amount of *established surplus* allocated to *policy holders* in all such categories is less than 10% of the aggregate amount of *established surplus* allocated to all *policy holders* (as reported at line 46 of **Form 58**);
 - (b) the amount of *established surplus* allocated to *policy holders* in any one such category is less than 5% of the aggregate amount of *established surplus* allocated to all *policy holders* (as reported at line 46 of **Form 58**); and
 - (c) none of the categories was introduced during the ‘report period’.
15. (1) Particulars of the bonus allocated to each category of contract, including the basis of calculation and the circumstances and the form in which the bonus is payable, together with -
- (a) where the rates of bonus allocated depend on the original term of the contract or on the period of years a contract has been in force,

specimen rates at 5 year intervals of original term or duration, as the case may be;

- (b) where the rates of bonus allocated depend on the age of the life assured, specimen rates at 10 year intervals of age;
- (c) where the rates of bonus allocated depend on the date of each previous premium payment, specimen rates at 5 year intervals of time since the premium was paid, and for premiums paid in each of the 5 years ending with the report period; and
- (d) in all other cases, full details of the rates of bonus allocated,

but where the rates of bonus allocated depend on a formula or a series of formulae, then the formula or formulae must be listed instead of the specimen rates, and wherever appropriate, rates of bonus must be expressed as a fraction of the attribute of the contract to which they are related, e.g. as rates per £1,000 of the sum assured and existing bonuses.

- (2) Information required under (1) need not be provided for any category of contract -
 - (a) where, no contracts were effected by the *insurer* during the ‘report period’; and
 - (b) which has been included under the miscellaneous heading in **Forms 51, 52, 53 and 54.**

16. A statement of the practice regarding any bonus payments (in addition to those for which the *insurer* has become contractually liable) to be made on *claims* arising in the period up to the next *actuarial investigation*, including the basis of calculation and the form in which the bonus is payable, together with -

- (a) where the rates of bonus depend on the original term of the contract or on the period of years a contract has been in force, specimen rates at 5 year intervals of original term or duration, as the case may be;
- (b) where the rates of bonus depend on the age of the life assured, specimen rates at 10 year intervals of age;
- (c) where the rates of bonus depend on the date of each previous premium payment, specimen rates at 5 year intervals of time since the premium

was paid, and for premiums paid in each of the 5 years ending with the report period; and

(d) in all other cases, full details of the rates of bonus,

but where the rates of bonus depend on a formula or a series of formulae, then the formula or formulae must be listed instead of the specimen rates, and wherever appropriate, rates of bonus are to be expressed as a fraction of the attribute of the contract to which they are related, e.g. as rates per £1,000 of the sum assured and existing bonuses.

17. Separate statements in the form set out in **Forms 46** and **46A** summarising changes in ordinary *long-term insurance business* and *industrial insurance business* for all non-group contracts. For group contracts only the number of contracts in force at the end of the 'report period' must be given in a supplementary note to the appropriate statement.
18. Separate statements in the form set out in **Forms 47** and **47A** showing an analysis of new *ordinary long-term insurance business* and *industrial insurance business*.
19.
 - (1) Separate statements of *long-term insurance business assets* (other than assets held to match *property linked* or *index linked liabilities*) in the form set out in **Forms 48** and **49** in respect of each fund or group of funds for which separate assets are appropriated.
 - (2) A brief description of the extent to which any of the amounts recorded in **Form 48** would be changed if assets which the *insurer* had a right or obligation to acquire or dispose of under *derivative contracts* or contracts having the effect of *derivative contracts* outstanding at the end of the *financial year* (being, in the case of *options*, only those *options* which it would have been prudent to assume would be exercised) had been so acquired or disposed of.
 - (3) A brief description of how different the information provided pursuant to (2) would have been if such *options* as were outstanding at the end of the year had been exercised in such a way as to change the amounts referred to in that paragraph to the maximum extent.
 - (4) A brief description of how different the information provided pursuant to (2) and (3) would have been if, instead of applying to contracts outstanding at the end of the *financial year*, those provisions had applied to *derivative contracts*

outstanding at such other time during the *financial year* as would have changed the amounts referred to in those provisions to the maximum extent.

20. (1) Separate statements in the form set out in **Forms 51, 52, 53** and **54** and separate analyses of unit liabilities in the form set out in **Forms 55** and **56** in respect of each separate fund or part of a fund for which a surplus is determined under rule 9.4.
 - (2) The analyses of unit liabilities must also include the liabilities in respect of any amounts deposited with the *insurer* under a *deposit back arrangement* which are either unit liabilities in respect of *property linked benefits* or investment liabilities in respect of *index linked benefits*.
 - (3) In the event that the liability for a specific fund link is wholly reinsured so that entries in columns 8 and 9 of **Form 55** are omitted in accordance with paragraph 7 of the instructions for the completion of that form a statement, if such be the case, to the effect that the provisions of rule 7.2 have been complied with in accordance with any published guidance in relation to the liabilities so reinsured.
21. (1) Separate statements in the form set out in **Form 57** for each fund or group of funds for which separate assets are appropriated in respect of all *long-term insurance business liabilities* except -
 - (a) unit liabilities in respect of *property linked benefits* as shown in column 12 of **Form 53**;
 - (b) investment liabilities in respect of *index linked benefits* as shown in column 12 of **Form 54**;
 - (c) any reserve in respect of provisions made for tax on unrealised capital gains in arriving at the valuation price of *internal linked funds*; and
 - (d) the liabilities in respect of any amounts deposited with the *insurer* under a *deposit back arrangement* which are either unit liabilities in respect of *property linked benefits* or investment liabilities in respect of *index linked benefits*.
- (2) A general description of the method by which the yield on assets other than equity *shares* and land was adjusted in accordance with rule 5.11(7).

- (3) For assets which are equity *shares* or land, a description of the categories into which such assets were divided for the purposes of rule 5.11(7), together with the method and basis by which the yield on such assets was adjusted in accordance with that rule.
22. Separate statements of the results of the valuation in the form set out in **Form 58** in respect of each separate fund or part of a fund for which a surplus is determined under rule 9.4.
23. (1) A statement of the *required minimum margin* for *long-term insurance business* in the form set out in **Form 60** and of the *required margin of solvency* for supplementary accident and sickness insurance in the form set out in **Form 61**.
- (2) If the gross annual office premiums for supplementary accident and sickness insurance in force on the ‘valuation date’ do not exceed 1% of the gross annual office premiums in force on that date for all *long-term insurance business*, **Form 61** need not be completed as long as it can be stated that the entry in line 10 of **Form 60** exceeds the amount that would be obtained if **Form 61** were to be completed. In this circumstance, the method of estimating the entry in line 10 of **Form 60**, together with a statement of the gross annual office premiums in force at the ‘valuation date’ in respect of supplementary accident and sickness insurance, must be given.)

FORMS

[Forms 46 – 61 to follow]

Instructions for completion of Form 46

1. Information must be gross of *reinsurance ceded* and must be provided separately for United Kingdom *insurance business* and overseas *insurance business*, and in each case for *non-linked* and *linked contracts*.
2. The box marked NL/LN must be completed by the insertion "LN" for a *linked contract*, and "NL" for a *non-linked contract*, as defined in rule 10.1.
3. The figures for annual premiums must include repeated or recurrent single premiums where the level of premium is defined.
4. For *hybrid linked contracts*, movements between linked and non-linked business must be shown in lines 13 and 27 as appropriate.
5. Only *claims* payments which result in the termination of a contract providing cover for other insured events may be shown in line 22.

Long term business : Summary of changes in industrial assurance business

Name of insurer

Global business

United Kingdom business/Northern Ireland business

Financial year ended

		Company registration number	Period ended			Units	UK/NI
			day	month	year		
		R46A				£000	
		Paying			Paid up		
		No of policies	Annual premiums		No of policies		
		1	2		3		
In force at beginning of year		11					
Taken up during year	Weekly business	12					
	Monthly business	13					
Converted to paid-up policies during year		14					
Total 'on'		19					
Discontinued during year by	Deaths	21					
	Maturities	22					
	Surrenders for cash	23					
	Terminations by return of premiums	24					
	Conversions to paid-up policies for full sums assured	25					
	Conversions to paid-up policies for reduced sums assured	26					
Forfeitures without grant of paid-up policy or cash surrender		27					
Total 'off'		29					
In force at end of year		31					

Instructions for completion of Form 46A

1. Separate forms must be prepared in respect of *insurance business* carried on in the United Kingdom and in Northern Ireland but information about the numbers of *policies* in force at the beginning and at the end of the year need not be given in respect of *insurance business* carried on in Northern Ireland.
2. The box marked UK/NI must be completed by the insertion of "UK" for *insurance business* carried on in the United Kingdom, and "NI" for *insurance business* carried on in Northern Ireland.
3. *Policies* discontinued by return of premiums on the death of the assured must be included in line 21 and not in line 24.
4. Paid-up *policies* which are written off must be included in line 21 in the case of whole life *policies* and line 22 in the case of endowments.

Long term insurance business : Analysis of new ordinary long term business

Name of insurer

Global business/UK branch business/EEA branch business

Financial year ended

Company registration number	GL/UK/CM	Period ended			Units
		day	month	year	
R47					£000

Type of insurance 1	Single premium contracts			Regular premium contracts		
	No of contracts 2	Premiums 3	Sums assured, annuities per annum or other measures of benefit 4	No of contracts 5	Annual premiums 6	Sums assured, annuities per annum or other measures of benefit 7

Instructions for completion of Form 47

1. New *insurance business* must be shown gross of *reinsurance ceded* and must include increases to premiums on existing *policies*, and in dealing with such increases, columns 2 and 5 must be left blank.
2. Single premium contracts must consist of those contracts under which there is no expectation of continuing premiums being paid at regular intervals. Additional single premiums paid in respect of existing individual contracts must be included.
3. Regular premium contracts must include those contracts under which premiums are payable at regular intervals during the *policy* year, including repeated or recurrent single premiums where the level of premium is defined.
4. Information must be shown separately and totalled within each section in the sequence specified below:
 - (i) United Kingdom *direct insurance business*,
 - (ii) United Kingdom *reinsurance* accepted,
 - (iii) overseas *direct insurance business*, and
 - (iv) overseas *reinsurance* accepted.
5. The information must be shown separately and totalled within each type of *insurance business* in the sequence specified below:
 - (i) life assurance and general annuity business,
 - (ii) pension business,
 - (iii) permanent health business, and
 - (iv) other business.
6. The information is to be further analysed and sub-totalled in the sequence specified below:
 - (i) *accumulating with-profits policies*,
 - (ii) non-linked *with-profits policies*,
 - (iii) non-linked *non-profits policies*,
 - (iv) *index linked contracts*, and
 - (v) other *linked contracts*.

and where a *policy* falls within more than one of the above categories, it must be placed in the first appropriate category.

7. Within each sub-division required under 5 and 6, the appropriate types of insurance from the following list are to be shown separately:
- (i) whole life assurance,
 - (ii) endowment assurance,
 - (iii) pure endowment assurance,
 - (iv) term assurance,
 - (v) other assurance (to be specified),
 - (vi) deferred annuity,
 - (vii) annuity in payment,
 - (viii) other annuity (to be specified),
 - (ix) permanent health insurance,
 - (x) capital redemption assurance,
 - (xi) annuity certain,
 - (xii) group pension,
 - (xiii) group life,
 - (xiv) group permanent health, and
 - (xv) other group (to be specified).
8. In the case of group contracts, the information must relate to new contracts and increments under existing contracts. The amount of the increment under an existing contract is the increase in the annual premium shown in Form 51, 52, 53 or 54 as appropriate, over the previous level shown in those Forms. Decreases in any year for an existing contract must be ignored.

Long term insurance business : Analysis of new industrial assurance business

Name of insurer

Global business

United Kingdom business/ Northern Ireland business

Financial year ended

		Company registration number	Period ended			Units	UK/NI
			day	month	year	£000	
		R47A					
		Whole life (including joint life)	Endowment assurance (including joint life)	(See instruction 2)	Other tables		
		1	2	3	4		
Number of new assurances	Weekly business	11					
	Monthly business	12					
Sums assured	Weekly business	13					
	Monthly business	14					
Annual premiums	Weekly business	15					
	Monthly business	16					

Instructions for completion of Form 47A

1. Separate forms must be prepared in respect of *insurance business* carried on in the United Kingdom and in Northern Ireland. The box marked UK/NI must be completed by the insertion "UK" for *insurance business* carried on in the United Kingdom, and "NI" for *insurance business* carried on in Northern Ireland.
2. If any table other than those shown in columns 1 and 2 (e.g. a table providing for recurring payments) is of a significant amount, details must be given in column 3 with an appropriate heading. In the case of a table including a recurring payment, the sum assured on death before the date of the first recurring payment must be shown against 'Sums assured' and the amount of the recurring payment must be shown separately in brackets.

Long term insurance business : Expected income from admissible assets not held to match liabilities in respect of linked benefits

Name of insurer

Global business/UK branch business/EEA branch business

Financial year ended

Category of assets

		Company registration number	GL/UK/CM	Period ended			Units	Category of assets
				day	month	year		
		R48					£000	
Type of asset			Value of admissible assets as shown on Form 13 1	Expected income from admissible assets 2	Yield % 3			
Land and buildings		11						
Fixed interest securities	Approved securities	12						
	Other	13						
Variable interest and variable yield securities (excluding items shown at line 16)	Approved securities	14						
	Other	15						
Equity shares and holdings in collective investment schemes		16						
Loans secured by mortgages		17						
All other assets	Producing income	18						
	Not producing income	19						
Total (11 to 19)		29						

Instructions for completion of Form 48

1. Where Form 13 is for the same fund or group of funds the entry at
48.11.1 must equal 13.11.1
48.12.1 must equal 13.45.1 + the appropriate part of 13.84.1
48.13.1 must equal 13.46.1 + the appropriate part of 13.84.1
48.14.1 must equal 13.47.1 + the appropriate part of 13.84.1
48.15.1 must equal 13.42.1 + 13.48.1 + the appropriate part of 13.84.1
48.16.1 must equal 13.41.1 + 13.43.1
48.17.1 must equal 13.50.1 + the appropriate part of 13.84.1
48.29.1 must equal 13.87.1 + 13.89.1 - 13.58.1 - 13.59.1.
2. The word "total" or the name of the fund must be shown against the heading "Category of assets". The corresponding code box must contain "10" for the total assets and, in the case of separate funds, code numbers corresponding to those allocated on completion of Form 13.
3. The appropriate part of the entry at 13.84.1 to be included in lines 12 to 15 of this form must be that part which represents accrued interest on assets included in the relevant line of this form. The amounts so included in each line must be stated in a supplementary note.
4. The expected income must be the amounts before deduction of tax which would be received in the next *financial year* on the assumption that the assets will be held throughout the year and that the factors which affect income will remain unchanged, but account must be taken of any changes in those factors known to have occurred by the *relevant date* (in particular changes of the type (a), (b), (c) or (d) denoted in rule 5.11(5)). The expected income shown in this Form must be that determined before any adjustments considered necessary because of rule 5.11(7).
5. Where a particular asset is required to be taken into account only to a specified extent by the application of the admissibility limits, the expected income from that asset must be included only to the same extent.
6. The treatment of the expected income from any asset where the payment of interest is in default and the amount of interest involved must be stated in a supplementary note.
7. The entries at 48.12.3, 48.13.3, 48.14.3 and 48.15.3 must be equal to 49.19.2, 49.29.2, 49.19.5 and 49.29.5 respectively. The yields to be inserted in column 3 for other categories of asset must be the running yields determined in accordance with rules 5.11(3) to (6A). The entry at 48.29.3 must be the weighted average of the yields in column 3, where the weight given to each asset is the value of that asset applicable for entry into column 1. Assets not producing income must be included in the calculation.
8. Where the yield in column 3 for a type of asset shown in line 17, 18 or 19 above (assumed to be zero for assets in line 19) is significantly different from the weighted average of the yields for each asset of that type determined in accordance with rule 5.11(6), then the latter yield figure must be shown in a supplementary note. For this purpose, the weighted average of the yields means an average yield weighted by the value of each asset of that type as entered in column 1.

9. Where an entry at 13.87.1 has resulted from excess exposure to a *counterparty* or excess concentration with a number of *counterparties*, the aggregate value of the assets of the *insurer* giving rise to *exposure* to such *counterparties* must be stated in a supplementary note, together with the expected income from those assets.

More than twenty years but not more than twenty five years	26							
More than twenty five years	27							
Irredeemable	28							
Total (21 to 28)	29							

Instructions for completion of Form 49

1. The word "total" or the name of the fund must be shown against the heading "Category of assets". The corresponding code box must contain "10" for the total assets and, in the case of separate funds, code numbers corresponding to those allocated on completion of Form 13.
2. The gross redemption yield in columns 2 and 5 for each asset must be calculated as in rule 5.11(3), (4) and (6), leaving out of account any adjustment considered necessary because of rule 5.11(7). Where a number of assets with different gross redemption yields are held, the weighted average gross redemption yield must be calculated using as weights the value of the asset applicable for entry into columns 1 and 4 respectively.
3. The value of higher yielding *admissible assets* to be shown in columns 3 and 6 must be the value of *admissible assets* shown in Form 13 where the gross redemption yield on those assets exceeds the gross redemption yield shown in columns 2 and 5 respectively by at least 1.5%.
4. Where *securities* may be redeemed over a period at the option of the guarantor or the issuer, they must be classified on the assumption that they will be redeemed at the latest possible date or, if it is assumed that they will be redeemed at any earlier date, a supplementary note must be provided explaining what assumption has been made.
5. The entries at 49.19.1, 49.19.2, 49.19.4, 49.19.5, 49.29.1, 49.29.2, 49.29.4 and 49.29.5 must be equal to the values at 48.12.1, 48.12.3, 48.14.1, 48.14.3, 48.13.1, 48.13.3, 48.15.1 and 48.15.3 respectively.
6. The entries at 49.19.2, 49.19.5, 49.29.2 and 49.29.5 must be the weighted average of the yields in columns 2 and 5 as appropriate for lines 11 to 18 and 21 to 28 respectively, where the weight given to each yield is the value shown in columns 1 and 4 respectively.

Instructions for completion of Forms 51, 52, 53 and 54

1. Separate valuation summaries must be completed in respect of each separate fund or part of a fund for which a surplus is determined. The name of the fund or part of a fund is to be shown against the heading "Category of surplus". The corresponding code box must contain code numbers allocated sequentially beginning with code "11".
2. Separate totals for column 5 on Form 51 and columns 5, 6, and 7 on Forms 52, 53 and 54 must be shown for sums assured, for annuities per annum and for other measures of benefit.
3. Information must be shown separately and totalled for each of the following:
 - (i) United Kingdom *insurance business*, and
 - (ii) overseas *insurance business*.
4. The information must be shown on separate pages and totalled for each type of *insurance business* in the sequence specified below:
 - (i) life assurance and general annuity *insurance business*,
 - (ii) pension *insurance business*,
 - (iii) permanent health *insurance business*, and
 - (iv) other *insurance business*.
5. The box marked "Type of business" must be completed by the insertion of "L&GA", "Pens", "PHI" or "Other" respectively for each of the types (i), (ii), (iii) and (iv) specified above.
6. The information is to be further analysed and sub-totalled for:
 - (i) *direct insurance business*,
 - (ii) *reinsurance* accepted, and
 - (iii) *reinsurance ceded*,and totals net of *reinsurance ceded* must also be shown, but where any information to be provided in accordance with (iii) duplicates any information required to be provided in accordance with 7, 8 and 9 in respect of (i) or (ii), then for the purpose of (iii), the total of the *reinsurance ceded* may be shown in respect of the duplicated information.
7. The information must be further analysed and sub-totalled within each basis of participation in profits in the sequence specified below:
 - (i) *with-profits policies*, and
 - (ii) *non-profit policies*.

8. Within each subdivision required under 4, 6 and 7 the appropriate types of insurance from the following list must be shown separately:

- (i) whole life assurance,
- (ii) endowment insurance,
- (iii) pure endowment insurance,
- (iv) term assurance,
- (v) other assurance (to be specified),
- (vi) miscellaneous assurance,
- (vii) deferred annuity,
- (viii) annuity in payment,
- (ix) other annuity (to be specified),
- (x) miscellaneous annuity,
- (xi) permanent health insurance,
- (xii) capital redemption assurance,
- (xiii) annuity certain,
- (xiv) group pension,
- (xv) group life,
- (xvi) group permanent health, and
- (xvii) other group (to be specified),

and particulars must also be shown of any supplementary provisions within *general insurance business class 1* or *2* which by virtue of the Authorisation Manuary are to be taken to be included in *long-term insurance business* of any *class* (Supplementary and sickness insurance - see Form 61).

9. A further sub-division into each separate category of contract is required as follows:

Forms 51 and 52 - each category of contract which is valued on a different valuation basis;

Form 53 - each category of contract which provides different guarantees or options, and each category of unit link. For the purpose of determining the category of the unit link, all authorised unit trusts must be considered to be one category and all internal linked funds must be considered to be one category.

Form 54 - each category of contract which provides different guarantees or options and each category of index. Where the link is to a proportion of an index, each different proportion must be treated as a different category.

10. Any contract which consists of a combination of different types of insurance, as described in 8, must be treated as a number of separate contracts each dealing with one of the different types of insurance so combined and the amount by which the total number of contracts shown in column 4 of any valuation summary exceeds the actual number of contracts to which that valuation summary relates must be stated in a supplementary note.
11. For *linked contracts* with both *property linked* and *index linked benefits*, each benefit must be shown on Form 53 or 54 as appropriate, and a note must be attached describing the manner in which details relating to the number of contracts and the amounts of benefits, premiums and other liabilities have been treated. Where the number of contracts is overstated in aggregate, the amount of the overstatement must be stated in a supplementary note.
12. For *linked contracts* which are also *accumulating with-profits policies*, that part of the benefits which are with-profits must be shown on Form 52 and the remainder of the benefits on Form 53 and/or 54 as appropriate, and a note must be attached describing the manner in which details relating to the number of contracts, and the amounts of benefits, premiums and other liabilities have been treated. Where the number of contracts is overstated in aggregate, the amount of the overstatement must be stated in a supplementary note.
13. Reserves calculated on an aggregate basis (including reserves for taxation on capital gains, for investment performance guarantees or other special reserves) or adjustments must be shown on separate lines in the *mathematical reserves* column and the particulars of such reserves or adjustments must be specified.
14. Contracts the nature of which or the method of valuation of which makes it impossible or inappropriate to give the information in the exact form required by Forms 51, 52, 53 or 54, must be shown on a separate valuation summary with appropriately modified column headings and the reason for the modification stated in a supplementary note.
- 14A. Where a net premium method of valuation is not used for contracts reported on **Form 51** then, notwithstanding 14 –
 - (a) columns 7 and 8 must be left blank;
 - (b) if the method used does not separately identify suitable values to be entered in columns 9 and 10, then the total amount of *mathematical reserves* must be entered in columns 9 and 12, and columns 10 and 11 must be left blank; and
 - (c) if the method used does separately identify suitable values to be entered in columns 9 and 10, then the entry in column 11 must be the amount entered in column 10 less the amount reserved for future expenses, so that the amount in column 12 equals the amount in column 9 less the amount in column 11.

15. Contracts of any description may be grouped together under any "miscellaneous" heading as long as the *mathematical reserves* for *insurance business* shown under all such headings in any one valuation summary do not exceed 5% of the total *mathematical reserves* for all *insurance business* shown in that valuation summary.

Instructions for completion of Form 55

1. The box marked "category of surplus" must be completed in accordance with paragraph 1 of the instructions for completion of Forms 51, 52, 53 and 54.
2. Separate forms must be prepared in respect of *internal linked funds* and directly held assets. The box marked IL/DH must be completed by the insertion of "IL" for *internal linked funds* and "DH" for directly held assets.
3. A separate line must be used for each asset to which benefits are linked and each different type of unit of each *internal linked fund*. Columns 5, 6, 7, 8, 9 and 10 must be sub-totalled for each fund link and totalled for all links.
4. The aggregate of the total figures shown for column 8 (excluding any amount shown in column 8 pursuant to 8) and 9 in each Form prepared in respect of a separate fund or part of a fund must equal the appropriate figure shown as the total of column 12 of Form 53.
5. For links to directly held assets, column 6 must not be used.
6. For *internal linked funds*, the total of column 5 must equal the total of column 8 of the summarised Form 43, and the total of column 6 must equal the total of column 3 of the summarised Form 43.
7. Where the liability shown in column 11 of Form 53 for a specific fund link is wholly *reinsured* with an *insurer*, so that the entries in columns 8 and 9 of this Form would otherwise be identical, the entries in respect of that fund link must be aggregated and shown on a separate line with the name of fund link to be shown in column 1 as "wholly *reinsured*".
8. Any amounts included in this analysis in accordance with paragraph 20 of Appendix 9.4, being unit liabilities in respect of *property linked benefits* deposited with the *insurer* under a *deposit back arrangement*, must, for each *internal linked fund* or directly held asset, be shown in column 8 on a separate line with the name of unit type to be shown in column 2 as "amounts deposited back".

Net total assets			

Instructions for completion of Form 56

1. The box marked "category of surplus" must be completed in accordance with paragraph 1 of the instructions for completion of Forms 51, 52, 53 and 54.
2. Assets and liabilities in column 2 must be listed individually except that where a group of assets of similar type is held which is intended to mirror the performance of an index, a description of the type of assets held may be given. Liabilities must be shown between round brackets and must be fully described.
3. A separate sub-total of assets and liabilities must be used for each index link and for each combination of assets and liabilities matching the *insurer's* liability under any *deposit back arrangement*. Links to different percentages of an index must be treated as different index links.
4. For each index link, the sub-totalled values in column 2 (excluding those held in respect of any *deposit back arrangement*) must match the appropriate entries in column 12 of Form 54 net of *reinsurance ceded*.
5. Assets and liabilities arising from *derivative contracts* (or contracts or assets which have the effect of a *derivative contract*) must be shown separately. Amounts must be shown net of *variation margin* in column 2 and gross of *variation margin* in column 3. Rights to recover assets transferred by way of *initial margin* must not be shown on Form 56.
6. Where there is a liability to repay *variation margin* and there are no arrangements for netting of amounts outstanding or the arrangements would not permit the accounting of such amounts on a net basis in accordance with generally accepted accounting practice, it must be so stated in a supplementary note.
7. Any provision for adverse changes must be determined in accordance with rule 5.3 and shown in a supplementary note.

Instructions for completion of Form 57

1. The word “total” or the name of the fund must be shown against the heading “Category of assets”. The corresponding code box must contain “10” for the total assets and, in the case of separate funds, code numbers corresponding to those allocated on completion of Form 13.
2. Separate Forms must be prepared for sterling and non-sterling liabilities. The box marked “Stg/NonStg” must be completed by the insertion of “Stg” for Sterling liabilities and “NonStg” for non-sterling liabilities.
3. Separate Forms are required for with profit and non-profit contracts within the following types of business:
 - (i) life assurance and annuity business,
 - (ii) pension business,
 - (iii) permanent health business, and
 - (iv) other business.
4. The box marked “L&GA/Pens/PHI/Other” must be completed by the insertion of “L&GA”, “Pens”, “PHI” or “Other” respectively for each of the types (i), (ii), (iii) and (iv) specified above. The box marked “WP/NP” must be completed by the insertion of “WP” for *with-profits policies* or “NP” for *non-profit policies*.
5. Separate Forms must be prepared for each rate of interest used in the valuation in pursuance of rule 5.11(12) and may include all contracts valued at the same rate, subject to 2 and 3. Contracts valued at a lower rate of interest but subject to the same apportionment of assets may also be included as long as the rationale for such inclusion is given in a supplementary note. Each of the valuation rates of interest used must be itemised against the heading “Valuation rate(s) of interest”. The highest valuation rate of interest used must be shown in line 31 or 32 as appropriate and in the code box headed “Valuation rate of interest”.
6. The Forms specified above must exclude the liabilities described in paragraph 21(1) (a) to (d) of Appendix 9.4 and must cover at least 90% of the remaining *long-term insurance business liabilities*.

The balance of the remaining *long-term insurance business liabilities* must be shown in a separate Form in which lines 31 and 32 must be left blank, and details of the contracts covered by the Form must be given in a supplementary note. The word “balance” must be shown against the heading “Valuation rate(s) of interest” and the corresponding code box must contain “98”.
7. A summary of all the separate Forms must be produced as a separate Form in which lines 31 and 32 must be left blank. The word “total” must be shown against the heading “Valuation rate(s) of interest”, and the corresponding code box must contain “99”.
8. The risk adjusted yield in columns 2 and 6 for each asset included in column 1 and 5 respectively must be that calculated as in rules 5.11 (3) to (6), taking account of any adjustment considered necessary because of rule 5.11(7). Where a number of assets with different risk adjusted yields are held, the weighted average risk adjusted yield must be calculated using as weights the value of the asset applicable for entry into columns 2 and 6.

9. The value of each asset included in column 1 must be the value attributed to it in Form 13 and the assets must be grouped according to paragraph 1 of the instructions for completion of Form 48 including adjustments in respect of accrued interest.
10. Where the valuation has been carried out at a net rate or rates of interest, the figure in line 31 must be the net rate grossed up at the corresponding effective rate of tax in respect of the highest valuation rate of interest used in the Form.
11. The *mathematical reserve* in line 33 must include any increase in reserve resulting from the bonus declaration for the year and must be net of reinsurance *ceded*.
12. The entries shown in columns 3, 4, 5 and 6 must be those applicable to the scenario described in the answer to paragraph 7(8) of Appendix 2.2. The entries in column 3 must be the value of the assets shown in column 1 according to the changed assumptions of that scenario. The entries in column 4 must be the value of assets on the changed assumptions for each type of asset notionally re-allocated to cover the *mathematical reserve* or other liability, net of *reinsurance*, in the resilience scenario. The entries in column 5 must equal the sum of the entries in columns 3 and 4.
13. The entries in line 29, column 1 must equal the entries in line 33, column 1. The entries in line 29, column 5 must not be less than the entries in line 33, column 5.

Corresponding percentage at three immediately previous valuations	Latest	(year of valuation)	62	
	Earlier	(year of valuation)	63	
	Earliest	(year of valuation)	64	

Instructions for completion of Form 58

1. Separate statements must be completed in respect of each separate fund or part of a fund for which a surplus is determined. The name of the fund or part of a fund must be shown against the heading "Category of surplus". The corresponding code box must contain code numbers allocated in accordance with paragraph 1 of the instructions for completion of Forms 51, 52, 53 and 54.

The entry at line 11 must be equal to the entry at line 59 in Form 40 for the relevant fund or part of fund.

2. Where interim, mortuary or terminal bonuses are determined in advance of a valuation and are paid in anticipation of surplus arising at the valuation, the amounts of such bonus actually paid in the period up to the *relevant date* must be entered in lines 12 and 41. To the extent that it is the practice of the *insurer* to make special provision for the cost of such bonuses payable on future claims out of surplus arising at a valuation, such amounts must be treated as amounts allocated to *policy holders* at the valuation in question and included in line 44, and the actual amounts paid must not appear at lines 12 and 41 at future valuations. An appropriate supplementary note must identify the various items where necessary.
3. Where *policies* have been transferred from one fund/part of fund to another, the associated transfer of reserves must not be included as a "transfer" in this Form. Where any other transfer has been made, only one positive figure must be inserted in either line 15 or line 34 (depending on the direction of the net transfer) leaving the other line blank. Corresponding entries must be made in either the block comprising lines 13 and 14 or the block comprising lines 32 and 33, as appropriate.
4. Where the entry in line 14 or line 33 represents more than one transaction, each transfer must be separately identified in a supplementary note.
5. Line 61 is line 46 expressed as a percentage of line 48.
6. For each fund/part of fund, the entry at line 18 must equal the total liabilities shown in column 12 of Form 51, and the entries at lines 17, 19 and 20 must equal the total liabilities shown in column 15 of Forms 52, 53 and 54 respectively.
7. The figure at lines 39 and 59 must equal the figure at line 29.
8. The figure at line 47 must equal the figure at line 15.

Instructions for completion of Form 60

1. The appropriate factors must be as specified in rules 2.5(2)(a) and 2.6(3) and (4).
2. For a *pure reinsurer*, the factor of 0.85 is replaced by 0.50.
3. Capital at risk must be shown after distribution of surplus.
4. Line 39 equals line 32 x [line 21 x 0.1% + line 22 x 0.15% + line 23 x 0.3%] for *classes* I, II and IX or line 32 x line 29 x 0.3% for *class* III, VII and VIII.
5. Any additional *mathematical reserves* referred to in the supplementary note to Form 14 (made in accordance with paragraph 4 of the instructions for completion of that Form) must be included at columns 11 or 12, as appropriate.
6. For *class* V business, the amount of the *required margin of solvency* must be stated in a supplementary note to the Form and must be included in line 51.

Supplementary accident and sickness insurance : Calculation of required margin of solvency

Instruction for completion of Form 61

"Supplementary accident and sickness insurance" means insurance falling within *general insurance business classes 1 (Accident) and 2 (Sickness)* which is supplementary to *long-term insurance business* and for which a Part IV permission is not required (see *AUTH*).

APPENDIX 9.5 (rule 9.32)

GENERAL INSURANCE BUSINESS ADDITIONAL INFORMATION ON BUSINESS CEDED

For the purposes of rule 9.35, an *insurer* which carries on *general insurance business* must, in respect of the *financial year in question*, prepare a statement of the following information.

1. Subject to 2, for each *contract of insurance* entered into or modified during the *financial year in question* under which *general insurance business* has been *ceded* by the *insurer* on a non-facultative basis, the *insurer* must prepare a statement of -
 - (a) the type of business covered by reference to risk groups or *business categories*, as appropriate, and if only part of a risk group or *business category* is covered, a description of that part;
 - (b) the type of cover, including such details of the terms and conditions of the contract as are necessary for a proper understanding of the nature of the cover;
 - (c) details of any limits on cover as are necessary for a proper understanding of the contract, including any event limits, limits on the amount of business *ceded*, limits on the number of reinstatements and aggregate limits; and
 - (d) the period of cover.
2. Where a contract of *reinsurance* has been modified during the *financial year in question* -
 - (a) no information need be supplied pursuant to 1 in respect of a contract of reinsurance which was entered into before the beginning of the *financial year* of the *insurer* to which the Insurance Companies (Accounts and Statements) Regulations 1996 first applied; and
 - (b) in any other case, the information to be supplied pursuant to 1 must be limited to any changes to the information previously supplied pursuant to that paragraph or its predecessor legislation in respect of that contract.

3. For every contract reported pursuant to 1, whether in the *return* for the *financial year in question* or any previous *return*, the *insurer* must also prepare, if relevant, a statement of -
 - (a) in the case of contracts which are subject to no or a limited number of reinstatements, any contract not previously reported pursuant to this provision (or its predecessor) under which it is anticipated that such limit will be exhausted by claims (including claims incurred, but not reported, in respect of any specific occurrence for which provisions have been allocated);
 - (b) the percentage of cover, if in excess of 10% and if such information has not already been included in the return of the insurer for any previous financial year, which has been ceded to reinsurers which have ceased to pay claims to their reinsureds in full, whether because of insolvency or for any other reason; and
 - (c) if the percentage specified in (b) has increased by more than 10 percentage points since the previous financial year in which it was included in the insurer's return, a statement of that percentage unless, in the opinion of the directors, the likelihood of any claim being incurred under that policy is minimal.

4.
 - (1) For each *business category* or risk group, or part thereof, in respect of which separate non-facultative *reinsurance* cover has been obtained, the *insurer* must prepare a statement of the 'maximum net probable loss' to the *insurer* from any one *contract of insurance* effected by it and from all such contracts taken together.
 - (2) For the purposes of (1), the **maximum net probable loss** is the maximum loss (net of *reinsurance*) arising from any one incident, or any one series of incidents from the same originating cause, which -
 - (a) the *directors*, at the time they decided upon the *reinsurance* cover in respect of the *financial year in question*, reasonably contemplated to be of a type which might take place during that *financial year*; or
 - (b) has actually occurred during the *financial year in question*.
 - (3) The disclosure required by (1) must be given in respect of all *business categories*, risk groups, or parts thereof, of the *insurance business* carried on by the *insurer* whether or not the *insurer* has purchased any *reinsurance* cover

for that *business category*, risk group, or part thereof, and in (2) deciding upon the *reinsurance* cover includes deciding not to obtain any *reinsurance* cover.

5. For each *accounting class* and separately for contracts of facultative and non-facultative *reinsurance ceded* in respect of the *financial year in question* (as shown on **Forms 21** and **24**), the amount of the *reinsurers'* share of *gross premiums* must be stated.
-

APPENDIX 9.6 (rules 9.34 and 9.35)

CERTIFICATES BY DIRECTORS AND ACTUARY AND REPORT OF THE AUDITORS

Part I

Certificate by directors etc.

1. Subject to 7, the certificate required by rule 9.34(a) must state -
 - (a) in relation to the part of the *return* comprising **Forms 9 to 17, 20 to 45** (including the supplementary notes) and the statements required by rules 9.25 to 9.27, 9.29, 9.30 and 9.32 that -
 - (i) the *return* has been prepared in accordance with the *Accounts and Statements Rules*,
 - (ii) proper accounting records have been maintained and adequate information has been obtained by the *insurer*, and
 - (iii) appropriate systems and controls have been established and maintained by the *insurer* over its transactions and records;
 - (b) that reasonable enquiries have been made by the *insurer* for the purpose of determining whether any person and any *body corporate* are connected for the purposes of rules 9.25, 9.26 and 9.27;
 - (c) that in respect of the *insurer's* business which is not excluded by rule 7.6, the assets held throughout the *financial year in question* enabled the *insurer* to comply with rules 7.1 to 7.5 (matching and localisation); and
 - (d) in relation to the statement required by rule 9.36 -
 - (i) that for the purpose of preparing the statement, proper accounts and records have been maintained, and
 - (ii) that the information given has been ascertained in conformity with that rule.

2. Subject to 7, the certificate required by rule 9.34(a) must also, in the case of a *insurer* which is required by 2.1 to maintain a *margin of solvency*, *EEA margin of solvency* or *UK margin of solvency*, state that the required margin has been so maintained throughout the *financial year in question*.
3. Subject to 7, the certificate required by rule 9.34(a) must also state, separately in respect of *long-term insurance business* and of *general insurance business* -
 - (a) in the case of -
 - (i) an *EEA deposit insurer*, that the value of the *admissible assets* of the *long-term insurance business* or of the general insurance business carried on by the *insurer* through a branch in the United Kingdom was maintained throughout the *financial year in question* at not less than the amount of the liabilities of that business, and
 - (ii) a *Swiss general insurer*, that the value of the *admissible assets* of the *general insurance business* carried on by the insurer through a branch in the United Kingdom was maintained throughout the *financial year in question* at not less than the amount of the liabilities of that business;
 - (b) in the case of an *external insurer* (other than a *pure reinsurer*) -
 - (i) that the *insurer* has kept throughout the *financial year in question* *admissible assets* representing the required United Kingdom *guarantee fund* within the United Kingdom, and has kept *admissible assets* representing any remainder up to the *UK margin of solvency* within the *EEA States*, and
 - (ii) that the *deposit* has been maintained throughout that year at a level equal to at least 'the minimum' as set out in rule 8.2; and
 - (c) in the case of a *UK deposit insurer* -
 - (i) that the *insurer* has kept throughout the *financial year in question* *admissible assets* representing the required EEA *guarantee fund* within the *EEA States* concerned and has kept *admissible assets* representing any remainder up to the *EEA margin of solvency* within the *EEA States*, and

- (ii) that the *deposit* has been maintained throughout that year at a level equal to at least 'the minimum' as set out in rule 8.2.

4. Subject to 7, if the *insurer* carries on *long-term insurance business*, the certificate required by rule 9.34(a) must also state -

- (a) except in the case of a *insurer* which has no shareholders and carries on no business whatsoever other than *long-term insurance business*, that the requirements of rules 3.1 to 3.4 have been complied with and in particular that, subject to the provisions of rule 3.2(2) to (4) and rule 3.3, assets attributable to *long-term insurance business*, the income arising therefrom, the proceeds of any realisation of such assets and any other income or proceeds allocated to the *long-term insurance business fund or funds* have not been applied otherwise than for the purpose of the *long-term insurance business*;
- (b) that any amount payable from or receivable by the *long-term insurance business fund or funds* in respect of services rendered by or to any other business carried on by the *insurer* or by a person who, for the purposes of rule 3.4, is connected with it or is a *subsidiary undertaking* of it has been determined and where appropriate apportioned on terms which are believed to be no less than fair to that fund or those funds, and any exchange of assets representing such fund or funds for other assets of the *insurer* has been made at fair *market value*;
- (c) that all guarantees given by the *insurer* of the performance by a *related company* which would fall to be met by any *long-term insurance business fund* have been disclosed in the *return*, and that the fund or funds on which each such guarantee would fall has been identified in the *return*;
- (d) in respect of any *internal linked fund or funds* maintained by an *insurer*, that the investment policy and practice of the *insurer* was during the *financial year in question* consistent with any representations made to *policy holders* or potential *policy holders* of the *insurer*;
- (e) in the case of a *insurer* having its head office in the United Kingdom, a *pure reinsurer*, a *UK deposit insurer* or an *external insurer*, being a *insurer* which has financial, commercial or administrative links with any other *insurer* carrying on *insurance business*, that the *return* in respect of *long-term insurance business* is not distorted by agreements

between the *insurers* concerned or by any arrangements which could affect the apportionment of expenses and income; and

(f) in the case of a *insurer* to which rule 3.5 applies, that the *insurer* has complied with the requirements of that rule.

5. Subject to 7, where the *directors* are satisfied that -

(a) the systems and controls established and maintained by the *insurer* in respect of its business complied, at the end of the *financial year in question*, with any relevant guidance⁴ and it is reasonable to believe that those systems and controls continued so to comply subsequently and will continue so to comply in future; or

(b) the *return* has been prepared in accordance with any relevant guidance⁵,

it must be so stated, by listing such guidance, in the certificate required by rule 9.34(a).

6. Except in the case of a *insurer* whose head office is in an *EEA State* or a *Swiss general insurer*, the certificate required by rule 9.34(a) must also, subject to 7, state that proper accounting records have been maintained in the United Kingdom in respect of *insurance business* carried on through a branch in the United Kingdom.

7. (1) Where, in the opinion of those signing the certificate, the circumstances are such that any of the statements required by 1 to 6 cannot truthfully be made, the relevant statements must be omitted.

(2) Where, by virtue of (1), any statements have been omitted from the certificate, this fact must be stated in a note to the certificate.

⁴ See **Guidance Notes P1 and P2** and **Guidance Notes** for Insurance and Retail products (issued by the Joint Money Laundering Steering Group)

⁵ See **Guidance Notes 4.1, 4.2 and 9.1**

Part II

Certificate by appointed actuary

8. The certificate required by rule 9.34(b) to be signed by the *appointed actuary* -
- (a) must state -
 - (i) if such be the case, that in the *appointed actuary's* opinion proper records have been kept by the *insurer* adequate for the purpose of the valuation of the liabilities of its *long-term insurance business*,
 - (ii) if such be the case, that the sum of the *mathematical reserves* and the deposits received from *reinsurers* as shown in **Form 14**, together, if the case so requires, with an amount specified in the certificate (being part of the excess of the value of the *admissible assets* representing the *long-term insurance business funds* over the amount of those funds shown in **Form 14**), constitute proper provision at the end of the *financial year in question* for the *long-term insurance business liabilities* (including all liabilities arising from *deposit back arrangements*, but excluding other liabilities which had fallen due before the end of the *financial year*) including any increase in those liabilities arising from a distribution of surplus as a result of an actuarial investigation as at that date into the financial condition of the *long-term insurance business*,
 - (iii) if such be the case, that, for the purposes of (ii), the liabilities have been assessed in accordance with the *Determination of Liabilities Rules* in the context of assets valued in accordance with the *Valuation of Assets Rules*, as shown in **Form 13**;
 - (iv) by way of a list, the professional guidance that has been complied with; and
 - (v) if such be the case, that in the *appointed actuary's* opinion premiums for contracts entered into during the *financial year* and the income earned thereon are sufficient, on reasonable actuarial assumptions, and taking into account the other financial resources of the *insurer* that are available for the

purpose, to enable the *insurer* to meet its commitments in respect of those contracts and, in particular, to establish adequate *mathematical reserves*; and

- (b) must state the amount of the *required minimum margin*, *required EEA minimum margin* or *required United Kingdom minimum margin*, as the case may be, applicable to the *insurer's long-term insurance business* immediately following the end of *the financial year in question* (including any amounts resulting from any increase in liabilities arising from a distribution of surplus as a result of the investigation into the financial condition of the *long-term insurance business*).

9. If the *appointed actuary* considers it necessary, such qualification, amplification or explanation as may be appropriate must be added to the certificate.

Part III

Auditors' report

10. (1) The report required by rule 9.35 must, in addition to any statement required by section 237(2) and (3) of the *Companies Act* or article 245(2) and (3) of the *1986 Order* as applied by rule 9.35 state -
- (a) in the auditors' opinion, whether **Forms 9 to 17, 20 to 45** (including the supplementary notes) and information furnished pursuant to rules 9.25 to 9.27 and 9.29 have been properly prepared in accordance with the provisions of the *Accounts and Statements Rules*;
 - (b) in the auditors' opinion, and according to the information and explanations they have received -
 - (i) whether the certificate required to be signed in accordance with rule 9.34(a), otherwise than in relation to statements to which (2) relates, has been properly prepared in accordance with the *Accounts and Statements Rules*, and
 - (ii) subject to 11, whether it was or was not unreasonable for the persons giving the certificate to have made the statements in it (other than statements to which (2) relates); and
 - (c) the extent to which, in giving their opinion, the auditors have relied -

- (i) in the case of an *insurer* carrying on *long-term insurance business*, on the certificate of the actuary given in accordance with the requirements of Part II of this Appendix with respect to the *mathematical reserves* and *required minimum margin*, required *EEA minimum margin* or required *United Kingdom minimum margin*, as the case may be, of the *insurer*; and
 - (ii) in the case of an *insurer* including *implicit items* on **Form 9**, on the identity and value of any *implicit items* as they have been admitted in accordance with rule 2.10.
 - (2) The statements to which this sub-paragraph relates are those required by -
 - (a) rules 9.30, 9.32 and 9.36;
 - (b) 4(d); and
 - (c) 5 but only in so far as it relates to relevant guidance which relates to controls with respect to money laundering.
 - 11. To the extent that the information and explanations they have received do not allow the auditors to express an opinion on whether it was or was not unreasonable for the persons giving the certificate required to be signed in accordance with rule 9.34(a) to have made the statement required by 5, the auditors must add to their report such qualification, amplification or explanation as may be appropriate.
 - 12. Where the auditors refer in their report or in any note attached to it to any uncertainty, the report must state whether, in the auditors' opinion, that uncertainty is material to determining whether the *insurer* has available assets in excess of its *required minimum margin*, *required EEA minimum margin* or *required UK minimum margin*, as the case may be.
-

APPENDIX 9.7 (rule 9.37)

**INSURANCE STATISTICS: OTHER EEA STATES
(FORMS 91 TO 94)**

The statements to be provided under rules 9.37 and 9.38 must be given in the form set out in **Forms 91 to 94**.

Instruction for completion of Form 91

The box described as "EEA State in which branch is situated" must be completed by inserting the appropriate Code from the *FSA* list of "Country Codes".

General insurance business : Analysis of financial particulars - provision of services

APPENDIX 9.8 (rule 9.36A)

MARINE MUTUALS: ITEMS TO BE DISREGARDED, DIRECTORS' CERTIFICATES AND AUDITORS REPORTS

Part 1

Items to be disregarded

1. In completing the Forms required under rule 9.36A, a *marine mutual* must disregard *reinsurance* arrangements with any *relevant company* and must treat income and expenditure and assets and liabilities of any *relevant company* as, respectively, income and expenditure and assets and liabilities of the *marine mutual*.

Part II

Directors' certificates

2. Subject to 4, every *return* provided by a *marine mutual* under rule 9.36A must include a certificate signed by the persons required by rule 9.33 to sign the documents to which the certificate relates –
 - (a) confirming that –
 - (i) the *return* has been prepared in accordance with the *Accounts and Statements Rules*,
 - (ii) proper accounting records have been maintained and adequate information on which to base the *return* has been obtained,
 - (iii) appropriate systems and controls have been established and maintained by the *marine mutual* with respect to its transactions and records,
 - (iv) the value or amount given for an asset or liability of the *marine mutual* has been determined in accordance with the *Valuation of Assets Rules* and the *Determination of Liabilities Rules*,
 - (v) in respect of the *marine mutual's insurance business* not excluded by rule 7.6, throughout the *financial year in question*

- the *marine mutual* complied with rules 7.1 to 7.5 (currency matching and localisation),
- (vi) the *marine mutual* maintained the *required margin of solvency* throughout the *financial year in question*,
 - (vii) each member of the *marine mutual* which is subject to them has accepted those parts of the *marine mutual's* rules which oblige members to pay their share of any supplementary calls for the year and of calls to meet the *required minimum margin* (including any sum needed to make good failure by other members to pay calls made on them), and
 - (viii) the *marine mutual* is empowered to make supplementary calls on its members which, if met, would produce sufficient assets to meet the *required minimum margin*; and
- (b) giving information about the number of –
- (i) members of the *marine mutual* which are not reinsured members,
 - (ii) fixed premium members (on which supplementary calls may not be made),
 - (iii) reinsured members (that is, members whose *contract of insurance* with the *marine mutual* is a contract of *reinsurance*), and
 - (iv) the tonnage of shipping attributable to each of the above classes of members, taken separately, and covered by the *marine mutual* at the end of the *financial year in question*.

3. Subject to 4, where the *directors* are satisfied that –

- (a) the systems and controls established and maintained by the *marine mutual* in respect of its *insurance business* complied, at the end of the *financial year in question*, with the relevant guidance in Guidance Notes P.1 and P.2 and it is reasonable to believe that those systems and controls continue so to comply and will continue so to comply in future; or

- (b) the *return* has been prepared in accordance with the relevant guidance in Guidance Note 9.1,

it must be so stated in the certificate.

- 4. (1) Where, in the opinion of the *directors*, the circumstances are such that any of the matters specified in 2 and 3 cannot be confirmed or provided, the relevant statements or information must be omitted.
- (2) Where any statements or information have been omitted from the certificate in accordance with (1), this fact must be explained in a note to the certificate.

Part III

Auditor's reports

- 5. Every *marine mutual* must procure an auditor's report, pursuant to *SUP*, stating whether, in the auditors' opinion –
 - (a) the Forms, information and statements required have been properly prepared in accordance with the *Accounts and Statements Rules*;
 - (b) where the auditors refer in their report or in any note to any uncertainty, that uncertainty is material to determining whether the *marine mutual* has *available assets* in excess of its *required minimum margin, required EEA minimum margin, or required UK minimum margin*, as the case may be; and
 - (c) subject to 6, it was or was not reasonable for the persons giving the *directors'* certificate to have made the statements in it.
- 6. Where the information or explanations given to the auditors is insufficient to allow them to be able to express an opinion on the reasonableness of the statements made in the *directors'* certificate, the report must include such qualification, amplification or explanation as may be appropriate.

--	------------	--

Instructions for completion of Form M3

1. Units must be the same as those used in Form M1.
2. In lines 11 to 85 -
 - (a) for the purpose of classifying (but not valuing) assets, headings and descriptions used above, wherever they also occur in the balance sheet format in the *insurance accounts rules*, have the same meaning as in those rules,
 - (b) assets must be valued in accordance with rule 9.10; and
 - (c) assets of any particular description must be shown after deduction of assets of that description which (for any reason) fall to be left out of account under rule 4.14(2).
3. The aggregate value of those investments which are:
 - (a) *unlisted* investments falling within any of lines 41, 42, 46 or 48 which have been valued in accordance with rule 4.8;
 - (b) *listed* investments falling within any of lines 41, 42, 46 or 48 which have been valued in accordance with rule 4.8 and which are not *readily realisable*;
 - (c) units or other beneficial interests in *collective investment schemes* falling within paragraph (c) of rule 4.9(1); or
 - (d) reversionary interests or remainders in property other than land or buildings, must be stated by way of a supplementary note to this Form, together with a description of such investments.
4. The aggregate value of those investments falling within lines 46 or 48 which are *hybrid securities* must be stated by way of a supplementary note to this Form.
5. Amounts in respect of salvage or subrogation included above other than at line 73 must be stated by way of a supplementary note to this Form.
6. In line 93 "Solvency margin deduction for insurance *dependants*" refers to deductions under rule 4.3(2)(c).
7. In line 95 "Assets of a type not valued above" refers to assets left out of account under rule 4.1(3).

Instructions for completion of Form M4

1. Separate Forms must be completed for each *class* of *insurance business*. The relevant description below must be entered against the 'Marine class' heading and the corresponding *class* code entered in the M4 box.

<u>Code</u>	<u>Description</u>
01	Protection and Indemnity
02	Hull and Machinery
03	Freight Demurrage and Defence
04	War risks
05	Strikes
06	Other - nature of business to be detailed in a supplementary note.

2. Units must be the same as those used in Form M1.
3. The *financial year in question* must be stated at line 11 and *preceding financial years* must be listed in reverse chronological order in lines 12 to 25.

Instructions for completion of Form M5

1. Units must be the same as those used in Form M1.
2. *Derivative contracts* must be analysed according to the description of assets shown in the second column of Form M5 which represents the principal subject of the contract.
3. *Derivative contracts* must be reported as assets in column 1 of Form M5 if their value to the *marine mutual* (gross of *variation margin*) is positive and as liabilities in column 2 of Form M5 if their value to the *marine mutual* (gross of *variation margin*) is negative.
4. All amounts included at lines 11 to 35 of Form M5 in respect of *derivative contracts* are to be determined without making any allowance for *variation margin*.
5. Amounts in respect of a *derivative contract* may only be included net of amounts in respect of any other *derivative contract* if -
 - (a) obligations of the *marine mutual* under the contracts may be set off against each other under generally accepted accounting practice; and
 - (b) such other contract has the effect (in whole or in part) of closing out the obligations of the *marine mutual* under the first mentioned contract.
6. The effect of any *variation margin* upon amounts included at lines 11 to 35 of Form M5 must be shown at line 41.
7. The entry at M5.49.1 must be shown at M3.44.1.
8. The entry at M5.49.2 must be included at M2.23.1.
9. Rights to recover assets transferred by way of *initial margin* must not be shown on Form M5.

GUIDANCE NOTE P.1

SYSTEMS AND CONTROLS OVER THE INVESTMENTS (AND COUNTERPARTY EXPOSURE) OF INSURERS WITH PARTICULAR REFERENCE TO THE USE OF DERIVATIVES

Introduction

1. The Principles for Businesses set out the fundamental obligations of a firm. They apply to every regulated firm, not just an *insurer*.
2. Principle 3 requires a firm to organise its affairs effectively. This will, among other things, include keeping adequate and orderly records of its business and internal organisation.
3. This Guidance is designed to assist the *insurer* in complying with this requirement.
4. The Guidance is relevant for purposes of the certificates required to be given by the *directors* and *appointed actuary* and the report to be given by the auditor under rules 9.34 and 9.35 and **Appendix 9.6**.

Investment strategy

5. Suitable controls and management information systems should be in place to enable the *insurer* to implement an appropriate investment strategy. Such a strategy should have due regard to the following -
 - the implications of rule 1.3, insofar as that rule is relevant to the matters covered by this Guidance

(For example, trading in financial instruments for speculative purposes would not necessarily be considered to be investment activity directly arising from the *insurance business* and would therefore risk being in breach of rule 1.3.)
 - the requirements in rule 3.2 concerning the application of assets held in the *long-term insurance fund*
 - the requirements in rule 2.3 concerning the suitability and spread of assets covering *insurance liabilities*, the need for appropriate diversification of assets and the need for close matching of *linked assets* and liabilities

(For example, depending on an *insurer's* financial position, gearing of a fund might easily be inconsistent with the obligations under rule 2.3.)
 - the requirements of the Currency Matching and Localisation Rules
 - any guidance on any of the above topics issued by the *FSA*.

6. Overall responsibility for the determination, implementation and monitoring of such a strategy rests with the board of *directors*.
7. In the case of an *insurer* carrying on *long-term insurance business*, the board should be aware of the responsibilities of the *appointed actuary*, in particular the duty to advise (in accordance with actuarial guidance note GN1) about an appropriate investment policy for the *long term insurance fund* of a *long-term insurer*, and should ensure that the actuary is in a position to discharge those responsibilities.

Controls over exposures

8. Notwithstanding the admissibility limits in **Appendix 4.2**, appropriate procedures should be in place for assessing the credit-worthiness of *counterparties* to whom the *insurer* is significantly exposed and for setting lower internal limits (than those in **Appendix 4.2**) where prudence dictates such a course. This applies in particular to potential exposure to *reinsurers* which is not covered by **Appendix 4.2**.
9. Notwithstanding the admissibility limits in **Appendix 4.2**, appropriate procedures should be in place for setting prudent limits for the *insurer's* aggregate exposure to certain categories of asset. Such limits should take account of the requirements of rule 2.3(1) concerning the suitability of assets to cover *insurance liabilities*. They may take account of the level of the *insurer's* free assets bearing in mind the possibility that such assets might in future be needed to cover *insurance liabilities* or the *required minimum margin* of solvency.
10. Systems should be in place to allow the *insurer* to monitor its aggregate *exposure* to different categories of asset (paying particular attention to the different kinds of instrument under which *exposure* can arise) or to particular *counterparties* relative to the limits set under the procedures described in paragraphs 8 and 9. The issue of monitoring *exposure to counterparties* is developed in **Annex A**.
11. Systems should be in place to ensure that the assets of linked *long-term insurance funds* of the *insurer* comply fully with rules 2.3(2) & (3) and with rule 3.7.

The investment managers

12. The investment strategy should be reflected in clear terms of reference from the *insurer* to its investment managers who should be qualified and competent to carry out their assigned task and whose remuneration package should be consonant with that strategy. The work of the managers should be monitored sufficiently closely to ensure that the *insurer's* strategy is being followed and that the systems mentioned above are effective. These points apply equally where an external manager is used for this purpose, where a separate legal entity within the insurance *group* is used (in either of which cases the *FSA* would expect there to be a formal agreement between the two parties) or where the managers are internal. The issues are developed in **Annex B**.

Use of derivatives and other complex investment instruments

13. Managers should ensure that controls over derivatives and other complex investment instruments have been implemented and are adequate to ensure that risks are properly assessed, regularly reviewed in the light of changing market conditions and experience and consistent with the overall investment strategy. This area is developed in **Annex C**.

Resources allocated

14. Resources allocated to the tasks mentioned above should be appropriate, both in quantity and quality, for ensuring that the controls are effective at all times. This applies particularly in respect of the matters covered in paragraph 13.

Reports to the Board

15. In order to satisfy themselves that investment activity is carried out in accordance with the approved strategy and that adequate controls are in place, the board of *directors* should receive reports at an appropriate frequency with appropriate details as to the investment activities and controls.

Further guidance

16. If you would like to discuss any of the matters raised above further, please contact the *FSA* as set out below -

Insurers: please contact your supervisor.

Other interested parties: please contact –

Annex A (paragraph 10)

Monitoring of aggregate exposures

- A1 ‘Aggregate exposure’ means the amount against which the asset admissibility limits are applied. The limits are expressed as percentages of the *long-term* or *general insurance business amounts* as appropriate. These limits represent maximum amounts which can be valued for solvency purposes; it will often be prudent for

insurers to set internally lower limits in order to comply with the general provisions on suitability of assets.

A2 The asset admissibility limits include some aggregate limits e.g. there is a maximum limit of 10% excluding bank deposits (20% if deposits are included) of the *long-term* or *general insurance business amounts* with any one *counterparty* or *connected company* of that *counterparty* from whatever source. In other words *exposure* needs to be accumulated for -

- all types of investment and other activities of the *insurer* e.g. all derivatives transactions, stock lending, bank deposits and other loans;
- all operations of the *insurer* i.e. including overseas branches. *Exposure* through *subsidiary* operations will also need to be accumulated within these limits where the assets of that *subsidiary* are valued on a look through basis. The explicit limits do not, however apply to exposures generated through a parent or fellow *subsidiary* of the *insurer*. Where the *insurer* has diverse investment operations, then it may be appropriate to set 'local' limits which, even if aggregated, would still fall within the permitted overall limits; and
- all dealings with the *counterparty* concerned or any of its *connected companies*. *Insurers* will therefore need to find out if any of their *counterparties* have *connected companies* and make sure that they are kept informed of any changes to the status of existing *counterparties*. Financial services regulators have required such information for some time and most *counterparties* should be able readily to provide the necessary information.

A3 When assessing the *counterparty exposure*, only the amounts actually owing to the *insurer* need to be considered. For example, derivatives transactions with brokers would be based on the market value of the contract not the nominal value (which would be a much greater amount). *Exposure* could be further reduced by any margin arrangement. Aggregate *exposure* will normally initially be assessed on a gross basis (i.e. total amounts due to the *insurer* from the *counterparty* concerned). But the application of generally accepted accounting practice may allow this to be reduced by amounts which the *insurer* owes the *counterparty* where there is a legal right of set-off.

Credit exposure to reinsurers

A4 Although there are no quantitative limits in the rules for *reinsurance recoveries*, *insurers* should still have regard to their accumulated credit *exposure* to individual *reinsurers*. (In this context *exposure* normally means *debts* due from the *reinsurer* plus anticipated recoveries on outstanding *claims* and IBNR). The *FSA* would not consider an *insurer* to be soundly and prudently managed if it controlled its investment activities but, in the context of its total assets, had unacceptable levels of *exposure* to any one *reinsurer*. In this context, *exposure* would not only relate to the amounts for which credit has been taken in the *insurer's* accounts but would also take into account how the *insurer* was planning to meet its future liabilities. The assessment of what is an 'acceptable' level of exposure to a particular *reinsurer* may

take into account the security provided by any collateral arrangements such as letters of credit and deposits-back as well as the credit worthiness of the *reinsurer* itself.

Insurance groups

- A5 As noted above the detailed admissibility limits generally apply at an *insurer* level rather than for an insurance *group* as a whole. For its own prudential management reasons, *group* management may still wish to ensure that the basic principles apply across the *group*. Monitoring of *exposures* to individual *counterparties* etc. will obviously be more difficult for *groups* but it could be possible to use the “local limits” approach suggested for branches.

Annex B (paragraph 12)

Controls over investment managers

- B1 Where investment management is contracted out to a third party, the *directors* of the *insurer* must nevertheless satisfy themselves that the appropriate controls are in place and are effective. This applies not only where the entire function is contracted out but also where only a specialist element such as derivatives trading is carried out by a third party. The *directors* should ensure in the latter cases in particular that the effects of their own in-house activities are considered in conjunction with the contracted out activities when monitoring aggregate *exposures* to certain types of investment and/or *counterparty*. (It should be noted that the *counterparty* limits apply to the *insurer's* share of investments only, not to the entire portfolio of the investment manager).
- B2 In determining what are appropriate and effective controls the *FSA* would normally expect the *insurer*, at a minimum, to focus on the following areas -
- There should be a clear contract which sets out the parameters in which investment managers may operate. It is unlikely that managers' “standard” contract will be sufficient for this purpose. The *FSA* would expect tailoring to reflect the legislative constraints (e.g. admissibility limits, permitted links), any investment limits set by the *insurer* and more generally the *insurer's* specific circumstances. For example “to invest in whatever the manager considers appropriate” is not good enough. Apart from any specific limits the parameters need to strike an appropriate balance between risk and reward, taking due account of the nature of the *insurer's insurance liabilities* and (as appropriate) the interests and reasonable expectations of its *policy holders*.
 - The extent of reporting by managers should be sufficient to enable the *insurer* to assess whether or not actual operations are in line with the *insurer's* strategy, and in particular meets the risk/reward criteria. Reporting should also provide sufficient information for the *insurer* to check how close it is to relevant asset admissibility limits (or to its own limits if lower).

- Additional more detailed monitoring of managers' operations may be appropriate in certain circumstances.
- If an investment manager is to hold funds on behalf of the *insurer* or to be a *counterparty* to certain investment transactions, then the extent of capitalisation and form of regulation of the manager will need to be taken into account. These considerations will need to be regularly reassessed e.g. manager A may be suitable if placing £10m of business but not for £100m. Similar considerations will also apply where the *insurer* alters its investment strategy and moves into newer forms of investment activity for which the existing investment manager may have little or no experience.

B3 In addition any new corporate manager appointed by the *insurer* must be notified to the *FSA* under the approved persons regime. Third party investment managers are normally notifiable and will need to pass the appropriate fit and proper tests.

Annex C (paragraph 13)

Controls over derivatives

- C1 Directors of an *insurer* should take all reasonable steps (taking account of the nature and scale of use of derivatives) to satisfy themselves that managers -
- fully understand the nature of derivatives trading being undertaken by the organisation and the related risks, and where relevant, are suitably qualified and competent to transact the range and type of transactions being undertaken and understand the nature of the exposures (including both *counterparty* and market risk) which their use will create;
 - have documented clearly the objectives and policies for the use of *derivatives contracts* and monitor, (including the carrying out of compliance audits) to ensure that their use is in line with those objectives and policies. Managers should ensure policy is sufficiently clear and precise to ensure that new types of instrument are not dealt in without due prior consideration. They should also define any associated limits on exposures or volumes that are considered appropriate;
 - have given due regard, in particular, to uncovered transactions (which may be undertaken only in relation to assets which do not match *technical provisions*) in the context of the above controls so that in no circumstances is the *required minimum margin* of solvency endangered nor, in the case of *insurers* carrying on *long-term insurance business*, are *policy holders'* reasonable expectations adversely affected. Systems are needed which are adequate to prevent exposure to unacceptable exceptionally volatile risks and to monitor transactions on a frequency commensurate with volatility and risk (in general terms). The systems should trigger a strategy to hedge or close out

a transaction whenever adverse movements or events threaten a significant worsening of the *insurer's* solvency position;

- have ensured that those who have responsibility for the control of derivatives investment, are sufficiently independent of the day-to-day operators to ensure effective control;
- are capable of analysing and monitoring the risk of all transactions undertaken by the organisation individually and in aggregate (including interest rate risk, foreign exchange risk fraud, error, unauthorised access to confidential information and other operational risks);
- have ensured that the systems cope adequately with the volumes and volatility of transactions undertaken. In particular, the front office systems should not receive the most attention and funding to the detriment of the accounting systems;
- are provided regularly with statistics and information (appropriately summarised) on the trading volumes of *derivatives contracts* by type of product including regular reports of all off-balance sheet transactions, contingencies and commitments;
- are satisfied that sufficient systems and controls relevant to derivative products have been put in place, including independent agreement and reconciliation of positions, independent checking of prices, agreement of managers' profits to accounting profit, appropriate authorisation where dealing limits have been exceeded, etc.; and
- have tested adequately and approved valuation models which are used to value open positions and *derivative contracts* and that amendments to their programmes are controlled. Such models should include an appropriate test of the robustness of the portfolio to stress in changing investment conditions.

C2 In satisfying themselves on the above points, the *directors* collectively should have sufficient expertise to understand the important issues.

GUIDANCE NOTE P.2

SYSTEMS AND CONTROLS OVER GENERAL BUSINESS CLAIMS PROVISIONS

Introduction

1. The Principles for Businesses set out the fundamental obligations of a firm. They apply to all regulated firms, not just an *insurer*.
2. Principle 3 requires a firm to organise its affairs effectively. This includes keeping adequate and orderly records of its business and internal organisation.
3. This Guidance is designed to assist the *insurer* in complying with this requirement.
4. This Guidance is relevant for purposes of the certificates required to be given by the *directors* and *appointed actuary* and the report to be given by the auditor under rules 9.34 and 9.35 and **Appendix 9.6**.

Scope of Guidance

5. This Guidance has been prepared for *insurers* (and *reinsurers*) on the systems and controls which should be in place in order to ensure that the amounts set aside for *claims* handling expenses and *claims* outstanding are appropriately established, properly recorded and effectively monitored.
6. The Guidance has been structured in two parts: ‘Claims handling’ covers the systems and controls over the recording and processing of notified *claims* incurred and the associated costs of handling *claims*, whilst ‘Claims outstanding’ addresses the setting of the technical ‘*claims* provision’.
7. In this Guidance -

***claims* provision** or **provision for *claims* outstanding** means the amount provided in the *insurer’s Returns* to cover the estimated ultimate cost of settling *claims* (including *claims* incurred but not reported and *claims* handling expenses) arising out of events which have occurred by the end of the accounting period, less amounts already paid in respect of those *claims*;

case estimate means an estimate made of an appropriate provision for an individual *claim* outstanding based on information relevant to that *claim*; and

statistical estimate means an estimate made of an appropriate provision for a group of *claims* outstanding, based on information relevant to the group.

8. Certain parts of the Guidance have been amplified by referring to the ‘Areas for senior management to consider...’ points set out in **Annex B and C**. These annexes have been included for illustrative purposes only and the points raised in them should not be taken as exhaustive.

9. The Guidance should be read in conjunction with the explanatory note attached as **Annex A**.

Part I Claims handling

Suitable controls, systems and procedures should be in place to ensure adequate and accurate information is appropriately and promptly recorded to enable a proper assessment to be made of the ultimate cost of all <i>claims</i> or potential <i>claims</i> .

Systems

10. Appropriate and effective systems and controls should be in place to allow the *insurer* to record and monitor its financial liability to *policy holders* in respect of *claims* arising out of *contracts of insurance*.
11. In determining what are ‘appropriate and effective systems’, the *FSA* would normally expect an *insurer* to consider the areas summarised in **Annex B**.

Resources

12. Resources allocated to the *claims* handling function should be appropriate, both in quality and quantity, for ensuring that the systems and controls are effective at all times.
13. Managers should regularly monitor the pertinent indicators of resource pressure (for example, backlogs, inactive files, missed deadlines from the diary, inaccuracies in ‘case estimates’ or ‘statistical estimates’, late or inappropriate amendments to estimates).
14. If external resources are used, managers should take such steps as are reasonable and appropriate to satisfy themselves that the resource is of the appropriate quality, experience and competence.
15. The *insurer* should maintain adequate supervision and control over any external resources used to assist the *claims* handling function.

Function autonomy

16. The *claims* handling department should maintain regular liaison with other key functions within the *insurer*.
17. Notwithstanding paragraph 16, the managers should ensure that the extent of the segregation of functions is appropriate for the nature and size of the business.

(For example, whilst it is necessary for the *claims* handling department (including the reserving function) to have a certain degree of contact with the underwriters, the two groups must maintain a suitable level of independence from each other.)

Data

18. Appropriate systems should be in place to satisfy managers that data are complete and accurate and are being correctly recorded on a timely basis.
19. Considerations which managers should take into account when assessing the suitability of data collection include, but are not limited to, the items listed in **Annex C**.

Part II Provision for claims outstanding

Managers should maintain appropriate systems controls and procedures to ensure that the 'provision for *claims* outstanding' is, at all times, sufficient to cover any liabilities that have been or will be incurred on *contracts of insurance* as far as can be reasonably foreseen.

Resources

20. Resources utilised for the purposes of setting and monitoring the 'provision for *claims* outstanding' should be appropriate, both in terms of skill and experience.
21. In satisfying themselves that resources of appropriate skill and experience are employed in respect of paragraph 20, managers should consider the following points -
 - the value of using appropriately qualified, experienced and proven loss reserving specialists (such as actuaries with general insurance experience);
 - if any part of the process of setting '*claims* provision' is delegated to an external loss reserving specialist, appropriate procedures should be in place to ensure that the specialist selected possesses the appropriate level of skill and experience;
 - it is essential that the individuals responsible for carrying out the calculations to determine the 'provision for *claims* outstanding' are sufficiently familiar with the nature, complexity and size of the business; and
 - managers should ensure the necessary information (gathered, for example, by regular liaison with underwriters, *intermediaries* and *reinsurers*) is available for the determination of the 'provision for *claims* outstanding'.

Data

22. Suitable controls should be in place to ensure that the data used in determining the 'provision for *claims* outstanding' are extracted from the underlying records accurately and to the necessary level of detail.

(In this regard, the level of detail should be sufficient to ensure that the data available to managers in their assessment of 'claims provisions' covers the whole of its insurance liabilities and exposures)

23. Considerations which managers should take into account when assessing the suitability of the data analysis include, but are not limited to, the items listed in **Annex C**.
24. If the *insurer* makes use of an external resource to assist in the process of estimating the 'provision for *claims* outstanding', suitable controls should be in place to ensure that the source data used by the external resource are complete and suitable and procedures should be in place to ensure that the results received from the third party can be relied upon and are reported in the correct format to the necessary level of detail.

Estimation methods

25. Appropriate methods should be applied in estimating the 'provision for *claims* outstanding'.
26. Regard should be given to relevant judicial developments, changes in legislation and economic assumptions.
27. Managers should not be limited to just one estimation method but should consider using one or more alternative approaches before selecting those which may be regarded as most appropriate to the nature of the business.
28. The frequency with which a comparison of estimation methods should be undertaken depends on the type of business and the adequacy of the methods in use, as evidenced by the run-off performance or other pertinent factors.
29. Efforts should be made to identify and understand the reasons for any significant differences between the results from the different approaches.
30. Suitable systems and controls should be in place to ensure that the selected approaches are applied accurately and on a consistent basis.
31. Procedures should be in place to review and monitor, on a regular basis, the out-turn of provisions made in prior years for *claims* outstanding.
32. Evaluation of the out-turn should normally be carried out by line of business and by accident year or underwriting year. The out-turn of the element within the 'claims provisions' which relates to *claims* handling expenses (both direct and indirect) should be monitored separately.

Function autonomy

33. The individuals responsible for setting 'provision for *claims* outstanding' should maintain regular liaison with other key functions within the *insurer*.

34. The work of those responsible for setting ‘provision for *claims* outstanding’ should be subject to regular review by senior management independent from the underwriting function.

Reinsurance

35. Suitable systems should be in place to ensure that *reinsurance recoveries* are identified and appropriately recorded on a timely basis.
36. Procedures should be in place to allow managers to evaluate and monitor the application (and hence the effect) of the *reinsurance* programme to the gross ‘provision for *claims* outstanding’ (including *claims* incurred but not reported).
37. Appropriate systems should be in place to evaluate and monitor the *insurer’s* credit risk exposure to individual *reinsurers*.
38. Managers should update the provision for *reinsurance* bad and doubtful *debts* on a regular basis.

Annex A (paragraph 9)

EXPLANATORY NOTE

- A1 Other *technical provisions*, namely the provision for unearned premiums, the unexpired risk provision and equalisation provisions are not specifically covered by this Guidance, although much of the Guidance deals with issues which are generic to all *technical provisions*.
- A2 The Guidance recognises that the systems and controls required for the *claims* handling function will not be the same as those required for the function of setting the ‘provision for *claims* outstanding’. Whilst the two areas are strongly interrelated, the Guidance is structured to reflect the different management control considerations that apply, recognising that effective controls are required in both areas in order to form the necessary base from which appropriate provisions can be established and reported.
- A3 The Guidance is not intended to define the controls which all *general insurers* must employ, nor is it intended to be prescriptive. Rather, it is a matter for the *directors* to be satisfied that the *insurer’s* control environment is appropriate for the business that it operates. Control objectives can be attained in many different ways, depending on the size and nature of the business. It is the responsibility of the senior management to ensure that adequate resources are available to meet the control objectives.
- A4 Accordingly, the aim of the Guidance is to provide an overview of the key control systems and procedures. This should then enable management to evaluate the *insurer’s* existing control environment in conjunction with the Guidance in order to identify whether there are any worthwhile areas for enhancement.

- A5 The Guidance has been prepared to assist *directors* of *insurers* (and *reinsurers*), their auditors and others who may be concerned in the setting of *general insurance business claims* provisions for the purposes of both the supervisory Returns and the statutory shareholder accounts.
- A6 The *insurer's* usual *FSA* supervisor will be pleased to provide additional assistance.
- A7 For the preparation of the *return*, the *insurer* must value its *technical provisions* in accordance with the *Determination of Liabilities Rules*. Generally, the *general insurance business liabilities* for such *Returns* will be valued under the same rules that apply to the *technical provisions* disclosed in the shareholder accounts.
- A8 This Guidance does not seek to discuss or comment on the advantages of any one *claims* estimation method when compared to another. The appropriateness of an *insurer's* methods in establishing 'provisions for *claims* outstanding' should be assessed by whether the methods used have yielded or are expected to yield an appropriate level of provisions for that *insurer*.

Annex B (paragraph 11)

AREAS FOR SENIOR MANAGEMENT TO CONSIDER WHEN ESTABLISHING APPROPRIATE AND EFFECTIVE CLAIMS HANDLING SYSTEMS AND PROCEDURES

In establishing and maintaining effective *claims* handling systems and procedures senior managers' considerations should include, but not be limited to, the items set out below.

- B1 Appropriate systems and controls should be in place to ensure that all liabilities or potential liabilities notified to the *insurer* are recorded promptly and accurately. Accordingly, the systems and controls in place should ensure that a proper record is established for each notified *claim*.
- B2 Suitable systems should be in place to identify and quantify, for the key *claims* handling procedures, the effects of processing backlogs and to ensure that appropriate corrective action is taken.
- B3 Suitable controls should be maintained to ensure that '*claims* estimates' and 'statistical estimates' are appropriately made on a consistent basis and are properly categorised.
- B4 Regular reviews of the out-turn of the '*claims* estimates' and 'statistical estimates' should be carried out to check for inconsistencies and to ensure that procedures remain appropriate. The reviews should include the use of statistical techniques to

compare the estimates with the eventual cost of settling the *claims*, after deducting the amounts already paid at the time the estimates were made.

- B5 Appropriate systems and procedures should be in place to ensure that *claim* files without activity are reviewed on a regular basis. For example, the use of a ‘diary’ system should identify areas of inactivity, thereby prompting the *claims* handler to examine the file and reassess the priority of the action required.
- B6 Appropriate systems and procedures should be in place to assess the validity of notified *claims* by reference to the underlying *contracts* of *insurance* and *reinsurance* treaties.
- B7 Suitable systems and procedures should be in place to accommodate the use of suitable experts such as loss adjusters, lawyers, accountants, etc. as and when appropriate.
- B8 There should be suitable systems and procedures in place to identify and deal with any large *claims*, including systems to ensure that senior management are involved in the processing of large *claims* from the outset.

Annex C (paragraph 19)

AREAS FOR SENIOR MANAGEMENT TO CONSIDER WHEN ASSESSING THE SUITABILITY OF DATA COLLECTION AND ANALYSIS USED IN DETERMINING THE PROVISION FOR CLAIMS OUTSTANDING

Senior managers should consider the accuracy and completeness of data collection and recording. In the context of utilising data to determine the ‘provision for *claims* outstanding’, the *FSA* would expect an *insurer’s* senior managers’ considerations to include, but not be limited to, the items set out below.

General matters

- C1 Data requirements should be established, having regard to -
- the size of the business,
 - the nature of the business written,
 - the level of business written in foreign currencies,
 - the specific requirements of the users (e.g. the *actuary*),
 - the data sources available,
 - the homogeneity of the groups.

Data for the assessment of the insurer's claims experience

C2 Data should be capable of assisting the *insurer* to assess -

- the type of *claims* experienced,
- the settlement patterns and changes in them,
- the *reinsurance* arrangements,
- *claims* frequency,
- *claims* severity,
- incidence of large *claims*,
- origin of each '*claims* estimate',
- third party recoverables,
- special issues (e.g. requirements for catastrophe data or latent claim data),
- the effect of portfolio transfers and commutations of business.

Data for the assessment of the insurer's claims exposure

C3 Data should be in a format to enable the *insurer* to be provided with -

- the appropriate exposure base for each *class* of business,
 - an appropriate analysis of changes in premium levels,
 - an appropriate analysis of changes in *policy* terms,
 - an appropriate analysis of the effect of specific loss scenarios.
-

GUIDANCE NOTE 2.1

HYBRID CAPITAL: ADMISSIBILITY FOR SOLVENCY

What is this Guidance about?

1. The *FSA* may, by waiver or modification of the rules, allow *insurers* to count the value of certain types of hybrid capital instruments which they issue towards a proportion of their *required margin of solvency*.
2. This Guidance describes the type of instruments that will be eligible for such treatment, the procedure to be followed, the admissibility limits which will apply and the terms which such instruments should meet in order to qualify. These terms are not to be regarded as definitive.
3. Restrictions on cumulative preference share capital under rule 2.10 are not dealt with in this Guidance.

What is hybrid capital?

4. Hybrid capital is essentially loan capital. However, unlike an ordinary loan, the instrument contains conditions which, inter alia, remove some of the lender's usual rights. These conditions allow the loan to be treated like the proceeds from the issue of *shares* for regulatory purposes. Some forms of hybrid capital are closer in nature to *shares* than others.
5. The *Third Life* and *Third Non Life Directive* allow the value of four types of hybrid capital to count as cover for the *required margin of solvency*. They are the following -
 - subordinated members' accounts (in the case of a *mutual*);
 - dated subordinated loan capital;
 - perpetual subordinated loan capital; and
 - perpetual *securities* with defined characteristics.
6. These instruments are not, however, the equivalent of ordinary *share* capital. The *FSA's* main concern is that *insurers* should have sufficient risk capital to meet unexpected pressures on the *insurance business*. The *FSA* will view applications to count loan capital as part of their solvency margin in this light.

What is the procedure?

7. Under the rules, hybrid capital instruments cannot count for the purpose of covering the *required solvency margin* of *insurers* because they give rise to liabilities

offsetting the value of the funds raised. However, the *FSA* does have the discretion to vary the terms of the requirement by making a direction for waiver or modification under section 148 of the *Act*.

8. *Insurers* may apply under SUP for a direction. The application should enclose the following documentation -
- terms and conditions of agreement/instrument/issue (in draft if necessary);
 - copies of any prospectus or offer document or other promotional literature (in draft if necessary);
 - copy of the memorandum and articles or rules of the *insurer* indicating the provisions catering for the issue of *securities* or a legal opinion confirming the *insurer's* right to issue the *securities*.

How long will the process take?

9. As long as the documentation is complete it should normally be possible to deal with straightforward applications in around a month. However, *insurers* should discuss their application with the *FSA* well in advance.

What will the section 148 waiver or modification do?

Solvency margin

10. Under the *Margins of Solvency Rules*, funds raised from the issue of loan capital do not count toward the *required margin of solvency* because the value of the money received would be offset by a corresponding liability to repay the loan with interest. The section 148 direction would probably vary the terms of the *Determination of Liabilities Rules* (specifically rule 5.2) to provide that the liability to repay the value of the loan capital may be excluded. This exclusion would be limited to a value determined by calculating a proportion of the *required margin of solvency* (see paragraphs 17 and 27).

Accounts and Statements Rules

11. The Forms under the *Accounts and Statements Rules* already permit the proceeds of hybrid capital issues to be shown as assets counting towards the *required margin of solvency*.

Valuation of Assets Rules

12. The following would probably not be affected by a waiver or modification. The *Valuation of Assets Rules* contain three rules concerning the holding of hybrid capital. The first is to treat as inadmissible any holding of a parent *insurer's* hybrid capital by a *subsidiary*. This mirrors the position which is achieved by virtue of section 23 of the *Companies Act* in relation to *share* capital. Second, holdings of *listed* hybrid capital are treated as *listed* debentures and subject to the restrictions

that apply to them. Third, holdings of *unlisted* hybrid capital are subject to an admissibility limit.

What terms must the instruments contain?

13. The instruments must at a minimum be compatible with the provisions in Article 16(1) of the *First Non-Life Directive* and Article 18(1) of the *First Life Directive* as appropriate.
14. Indent 1 of Article 16(1) sets out the terms relevant for subordinated members' accounts (relevant only to *mutuals* and referred to in this Guidance as the '**member's account**'). Indent 7 of the same article specifies the minimum conditions for subordinated loan capital; indent 8 defines the basic terms for the perpetual security. The latter two forms of hybrid capital can be issued by all *insurers*. The terms of Article 18(1) are identical in this respect.

Subordinated members' account

15. The subordinated 'member's account' is a loan made by a member of a *mutual* which can be remunerated under certain specified conditions. The conditions are -
 - the subordination should be to all the creditors of the *insurer*;
 - no payments (interest) may be made to members if this would cause the *required margin of solvency* to be breached; and
 - the *FSA* must be notified at least one month in advance of any proposed payment, other than for the individual termination of membership (capital or capital and interest), and because, during the notice period, the *FSA* may act to prohibit any such payment the contract should accommodate this.
16. The 'member's account' is intended to be part of the core capital of the *mutual*, available to meet losses in much the same way as the effective initial fund. Subject to the above, it can count in full towards the *required margin of solvency*. The account is analogous to the perpetual security, the details of which are set out below and the *FSA* will apply the same criteria. Other forms of hybrid capital may not be as acceptable as subordinated 'members' accounts'.

Other hybrid capital instruments

Extent of subordination

17. The instruments should have the effect that in the event of the winding up of an *insurer* the capital and interest accrued but not paid (including any deferred interest) must be subordinate to the claims of all other creditors. The note holders would rank after all other creditors but before the members in any distribution. In the case of a *mutual*, the note holders would rank after members in their capacity as *policy holders*.

18. The Insolvency Act 1986 does not provide for the ranking of subordinated creditors in the event of a winding-up. However, there are at least two well established methods by which creditors can voluntarily subordinate their rights to other creditors. The first is to establish a trust in favour of other creditors. The second is for the amounts payable to the note holder to attract the status of a contingent *debt* so that on a winding up of the *insurer* the required degree of subordination would be achieved.
19. Other methods of subordination may be acceptable, including structural subordinations, provided they satisfy the conditions in paragraph 15. Note holders should not be able to gain any enhancement of their rights through such methods.
20. It should also not be possible to defeat the subordination by applying rights of set off. This will be relevant where the issuer and purchaser do business, each from time to time holding money due to the other. Under English law agreements to waive rights of set off are effective against the parties, but set off is mandatory upon winding up of an *insurer*. The position in other legal jurisdictions varies. In either case where set off is or may be an issue, the *FSA* will probably require evidence that the subordination cannot be undermined.
21. The subordination provisions should also take into account the need to protect the position of with-profits *policy holders* of *long-term insurers*. With-profits funds will include sums being accrued to meet future bonuses to *policy holders*. Such funds are customarily held in the *long-term insurance fund* on which, upon liquidation, other creditors and also shareholders may have a claim.
22. Accordingly, the *FSA* requests that the relevant documentation satisfies the following two requirements. The first is that the loan (capital and interest) should not constitute a liability attributable to the *long-term insurance fund* of an *insurer*. The rights of the note holder should be met from assets held outside the *long-term insurance fund*, including any distribution of a surplus from the fund under rule 3.3. This is to ensure that, as the *insurer* is trading, the position of the with-profits *policy holder* is fully protected.
23. Second, the documentation should have the effect that the rights of the lender are subordinated to all other creditors of the *insurer* in the event of a winding up. This should, in particular, secure that the note holder's claims on the assets of the *insurer* are to be subordinated to the liabilities assessed in respect of all *long-term insurance business policies*, including any amounts payable to reflect the value of bonuses to meet the reasonable expectations of with-profit *policy holders*.
24. The responsibility for achieving effective subordination lies with the *insurer*. Applicants are recommended to seek legal advice from those with relevant expertise in this field since the effectiveness of the subordination provisions will depend on an accurate understanding of the relevant law.

Limits and solvency margin

Limits

25. As far as hybrid capital is concerned, *insurers* will probably be permitted to count the value of loan capital instruments (the aggregate value of all such instruments) as cover for solvency up to 50% of their *required margin of solvency*. Within this overall limit, the value of term stocks (in aggregate) may count for a maximum of 25% of the *required margin of solvency*. An issue the value of which is in excess of this is unlikely to be permitted to count for the purposes of solvency and should continue to be treated as liabilities under the *Determination of Liabilities Rules*.
26. The above should apply in respect of the *long-term* and *general insurance business* of a composite *insurer*, the limits applying to each margin separately where the funds are applied exclusively for the benefit of one or other type of business. Where such an *insurer* wishes to apply the funds raised to its business as a whole (*general* and *long-term insurance business*), the limits set out in the previous paragraph may be permitted to apply to the aggregate of the required margins for both types of business.
27. In either case, it should be noted that in a winding up the liabilities of the *long-term* and *general insurance business* should be discharged separately. It is the applicant's responsibility to ensure that the records of the *insurer* enable the liabilities attributed to a particular type of business to be accurately identified.

Solvency margin condition

28. In addition to notice requirements allowing the *FSA* to prevent early repayment should this imperil the solvency of the *insurer*, directions under section 148 will probably require the non-payment of interest and capital if payment, or any other event, would result in breach of the *required margin of solvency*. For these purposes the treatment of subordinated *debt* and other perpetual *securities* is different.

Subordinated debt

29. In order to provide the *insurer* with a breathing space to recapitalise, subordinated *debt* agreements should provide that the right to petition for winding up of the *insurer* is exercisable only on the day following the second anniversary of default in the payment of interest and/or capital unless the presentation of a petition arises from some other default.

Perpetual securities

30. The terms of perpetual *securities* should provide for the deferment of interest and capital payments on the loan where the *required margin of solvency* is breached in a manner which will not give rise to a winding up. They should also provide for the security holders to bear losses in the same way as a shareholder if the *insurer* is in financial difficulties. This can be achieved, for example, by providing for conversion of the *debt* to ordinary *share* capital or for payments of principal and unpaid interest, in whole or part, to be cancelled in order to allow the *insurer* to continue in business. The trigger for the loss-bearing provisions would be breach of the *required margin of solvency*.

Maturity and early repayment

Maturity

31. If term subordinated *debt* is to count as capital, it should have a maturity of at least five years. The *debt* may be repaid in equal amounts during the last five years of the loan, in which case the amount allowed to count as cover for the *required margin of solvency* will proportionately reduce. Alternatively, the *debt* may be paid back in full on the maturity date and may count in full until that date. In the latter case, the *FSA* will require to be notified no later than one year before maturity. Since the *FSA* may act to prohibit repayments, the contract should provide for this.
32. Perpetual subordinated *debt* containing provisions triggering the determination of a date for repayment may be acceptable, but the *FSA* will probably require at least five years notice. Where such notice is to be given the *FSA* will also require to be informed.
33. Perpetual *securities* should not be repaid other than at the behest of the issuer and the *FSA* will require to be notified.

Early repayment

34. Where early repayment of hybrid capital is in prospect, *an insurer* should write to its supervisor at the *FSA* with an explanation showing how the *required margin of solvency* is to be maintained.
35. Insurers should not make agreements which provide for early repayment triggered by performance conditions, cross-default clauses, negative pledges, or other restrictive conditions. This is not intended to constrain the right of subordinated debt note holders to petition for winding up if there is default in the payment of interest or capital on the due dates (except in the case set out in paragraph 30).

Conversion

36. Where, as in the above example, there is provision for conversion from loan to *share* capital, the *insurer* should ensure that it has adequate authorised *share* capital to accommodate the change. It will also be necessary in these circumstances for the *FSA* to apply its 'fit and proper' checks, if upon conversion the note holder would become a *controller*. It would be appropriate for this to be acknowledged in the agreement. Where the lender could become a *controller*, the relevant provisions of the Act and the rules will apply.

Transfers / mergers

37. It is common when an *insurer* gets into severe financial difficulties to try and arrange a transfer of portfolio to, or a takeover by, another *insurer* to safeguard the position of *policy holders*. *Insurers* should not agree to any restriction which would inhibit or prevent this.

Denomination of debt

38. Issues may be denominated in sterling or a foreign currency. However, in the case of foreign currency issues, *insurers* should be able to demonstrate to the *FSA* how the foreign currency *debt* would be serviced, or alternatively what hedging arrangements exist to reduce the currency risk. Where capital is raised for foreign operations, the *FSA* would expect sufficient income to be generated in the relevant foreign currency to service the commitments under the loan capital agreement.

Interest

39. The basis on which the capital attracts interest should be clearly stated in the agreement. In the case of subordinated loan capital, where payment of interest or capital is suspended, the agreement may provide for the unpaid interest to accumulate. However, the agreement should not permit further penal interest charges to attach as a result of the suspension.
40. Loan capital instruments with a fixed or stepped rate and those with a floating rate are acceptable as cover for the *required margin of solvency*. Floating rates should be expressed in terms of a reference point, for example, the rates from time to time prevailing in the inter-bank market or rates applicable to government securities.
41. Where there is provision for variation of the rates applicable, the extent of this variation should not be such as to induce repayment of the loan by the issuer of the capital.

Accordingly, any provision allowing -

- (a) an increase in fixed interest rates; or
- (b) an increase in any margin on the floating rate (the margin over and above the reference point by which the rate is determined)

which exceeds a maximum of

- (i) 1% in aggregate over five years; or
- (ii) 2% in aggregate without limit of time,

is unlikely to be approved.

42. These figures are not intended to create market norms, merely to act as a guide to indicate the extent of variation which would not be regarded as unusual. In practice, the interest basis will need to be carefully considered in the light of the type of instrument and the principle in paragraph 41.

Disclosure

43. The documentation relating to the issue should explain the key features of the instruments so that small or retail investors in particular are aware of the nature of their investment and the risks associated with the purchase. The listing requirements of the stock exchange may be sufficient to meet the point, as may compliance with disclosure rules under the *Act*. Where the stock is not quoted and the *Act* does not apply, the *FSA* should be consulted about disclosure to potential purchasers if the issue is priced to enable small investors to participate.

Amendments to agreements

44. No amendment to any agreement or instrument governing the issue of a hybrid capital instrument should be possible without 30 days' prior notice in writing to the *FSA* and the recognition that the *FSA* might take steps to prevent such amendments.

Applicable law

45. Agreements may be governed by any law where the required subordination can be given effect. Where a foreign law is to govern the agreement, evidence of the effectiveness of the subordination should accompany the application.

1. INTRODUCTION

- 1.1 This Guidance relates to the *Valuation of Assets Rules*. It has been prepared to assist *directors* of *insurers*, their auditors, and others who may be concerned in the application of the legislation relevant to the valuation and admissibility of assets of *insurers* for the purposes of demonstrating coverage of the technical reserve and the *required solvency margin*.
- 1.2 It is not intended to be prescriptive and cannot be regarded as a substitute for reading the rules themselves and taking professional advice. An *insurer* should contact its usual *FSA* supervisor if there are any areas which it would like to discuss further.
- 1.3 The Guidance deals with the valuation and admissibility of assets belonging to the *insurers* (through either direct ownership or through beneficial interests) and do not necessarily address how these items should be reported in the *FSA Returns*.
- 1.4 This Guidance may be relevant for the purposes of the *directors'* certificate required under paragraph 5 of **Appendix 9.6**.

2. OVERVIEW OF THE RULES

- 2.1 The basic approach of the *Valuation of Assets Rules* is as follows.

Step One

Determine how the asset is to be defined under the rules since a number of definitions are specific to the rules.

Step Two

Once the asset has been defined, apply a series of rules, based on prudent valuation methods which approximate to the value which would be realised in an orderly run-off. The valuation methods will in many cases differ from that used for *Companies Act* accounts which are drawn up on the basis that the company is a going concern. If there is no valuation rule explicitly mentioned in the rules for a particular asset (e.g. for gold), a nil value must be ascribed.

Step Three

The Valuation of Assets Rules provide the appropriate value which can be assigned to an asset. The admissibility rules then determine how much of this value (if any) can be included within the solvency margin calculation. The admissibility rules supply a 'menu-style' set of instructions which detail the admissibility restrictions which apply on the *exposure* to each asset, investment, or *counterparty*. This particular area can be intricate and consequently section 5 is dedicated to providing additional guidance.

This admissibility limits approach is complemented by the general principle of rule 2.3 which requires *insurers* to cover their liabilities with assets with adequate

diversification and of appropriate safety, yield and marketability. Compliance with the admissibility limits does not necessarily mean automatic compliance with rule 2.3 - the *Valuation of Assets Rules* are in addition to the general principle of rule 2.3.

- 2.2 Some aspects of the *Determination of Liabilities Rules* are also relevant to the *Valuation of Assets Rules* - primarily in relation to derivative instruments which are capable of being either an asset or a liability. For property *linked assets* (see paragraph 3.10) none of the *Valuation of Assets Rules* apply - since the liability to *policy holders* is matched by whatever value is placed on the *linked assets*. Instead there are restrictions on what investments linked funds can make – see **Guidance Note 4.4**.

Modification or waivers

- 2.3 At times, strict application of the rules may produce an unintentionally harsh result for an individual *insurer*. Where this occurs, the *FSA* will consider an application for a waiver under section 148 of the *Act* to modify the application of the *Valuation of Assets Rules*. There is no guarantee that such a waiver will be given and it is likely to be given only on a temporary basis and with conditions attached. Where the *Valuation of Assets Rules* implement the requirements of the EC Directives, the *FSA* may be unable to give a direction except ‘in exceptional circumstances, temporarily and under a proper reasoned decision’. Any concession granted under the *1982 Act* may no longer be valid and if an *insurer* wishes to rely on such a concession it should contact the *FSA* supervisor at the earliest opportunity to discuss the position. It is not open to the *insurer* to ignore or to modify the application of the rules to suit its own circumstances otherwise than in accordance with such a waiver.

3. DEFINITIONS AND GENERAL INTERPRETATION

- 3.1 Rule 11.1 lists most of the definitions which are used in the *Valuation of Assets Rules*. In a number of cases, the asset definitions in rule 11.1 may not strictly accord with market parlance. Care must therefore be taken to ensure that the asset is correctly defined under the *Valuation of Assets Rules* since this may have an important impact on the valuation and/or admissibility of the asset. Attention is drawn in particular to the following items.

Approved/regulated institutions

- 3.2 There are definitions for a number of different types of institution and admissibility limits grade the level of *debt* that can be accumulated with any one institution according to the type of institution. The definitions are normally expressed in terms of criteria and in many cases guidance can be gained by referring to lists published periodically by the *FSA* to determine what category applies to a particular institution. The different types of institution in order of credit ‘grading’ are:

approved financial institutions - are listed in rule 11.1 and are largely European central banks.

approved securities - are limited to government *securities* and deposits with approved financial institutions. Only *securities* backed by governments/public authorities of countries classified as Zone A are included. *Debt securities* issued by certain supra-national authorities are also included. Zone A countries are all countries which are full members of OECD, together with those countries which have concluded special lending arrangements with the International Monetary Fund associated with the General Agreement to Borrow. A current list of these countries can be obtained from the FSA (Banking Supervision). It follows that government *securities* from non Zone A countries are therefore subject to the general *debt* rules.

approved credit institutions - are essentially banks and building societies authorised under the Banking Consolidation Directive 2000/12/EC. Note that an *approved credit institution* is also an *approved counterparty* and also a *regulated institution*. The FSA regularly publishes a list of banks authorised in the UK. This list includes UK branches of non-EEA banks which have been authorised directly by the FSA and institutions authorised by other *EEA States* but which have a branch in the UK. It does not, however, include institutions authorised by other *EEA States* which do not operate in the UK but which are nevertheless *approved credit institutions* for the purposes of the *Valuation of Assets Rules*. The European Commission from time to time publishes a full list of all credit institutions authorised under the Directive but in practice this tends to be out of date. It is advisable to contact the competent authority in the *EEA State* concerned for the latest list.

approved counterparties - are *approved credit institutions* plus certain investment firms authorised to engage in wholesale market activities or derivatives transactions. A list of *approved credit institutions* can be obtained from the FSA. For the purposes of calculating aggregate *exposure* for the admissibility limits, the term *counterparty* has been given its own definition. This is dealt with in more detail within section 5.

regulated institutions - are *approved credit institutions* plus all *insurance undertakings* authorised in the EEA (including *friendly societies*) and *approved investment firms*. As a general rule, the vast majority of *approved counterparties* will also fall within the definition of a *regulated institution*.

approved investment firms - are those firms regulated under the *Investment Services Directive*.

Listed securities

- 3.3 Investments are *listed* if they are either officially listed on an EEA stock exchange or the investments have the facility to be traded on a *regulated market*.
- 3.4 The definition of a *regulated market* is expressed in terms of criteria which must be satisfied and it is for the *directors* and auditors to satisfy themselves that these criteria have been met. The key factors which the FSA considers relevant for *insurers* to take into account when considering what is a *regulated market* are set out in **Annex D**.

- 3.5 If an investment falls within the definition of *listed* in rule 11.1 but is, in practice, rarely traded then it is likely that the *insurer* will need to consider whether the investment is *readily realisable*. If a *listed* investment is not *readily realisable*, it must be treated as though it were *unlisted*.
- 3.6 The aim is to distinguish between *securities* which can be disposed of at a price reasonably close to the *market value* from those which are so rarely traded that they are likely to be disposed of at a discount to the quoted market price. Dealings will therefore need to be frequent enough to be able to satisfy this aim. These principles are discussed in section 4.

Hybrid securities

- 3.7 Those *debt securities*, other than *approved securities*, which are akin to equity and are characterised by being either irredeemable or subject to long period repayment terms may fall within the definition of *hybrid securities*.
- 3.8 If this is the case, the *insurer's* holding of such *debt securities* will be treated under the valuation and admissibility rules in the same way as a holding in equity *shares*.
- 3.9 *Subordinated debt securities* may fall within the definition of *hybrid securities*. Because of the nature of a *subordinated debt*, the *debt* will not be entitled to be repaid until all claims from the general creditors have been settled. Since, therefore, the holder of *subordinated debt security* does not possess an unconditional right to payment, *subordinated debt securities* may fall within the definition of *hybrid security*.

Linked assets

- 3.10 The definition of *linked assets* refers only to assets held by an *insurer* and identified in its records as assets by reference to which *property linked benefits* are to be determined (the term 'property' in this context is wider than just land and buildings); it does not refer to assets held to cover *index-linked benefits*. The *Valuation of Assets Rules* allow index linked assets to be treated as *non-linked assets*, although they will be exempt from some of the admissibility limits by virtue of rule 4.14(6). Further guidance on the difference between *index linked contracts* and *property linked contracts* is contained in **Guidance Note 4.4**.

Stock lending and repo

- 3.11 Stock lending and repo transactions are treated on the same footing. Further details of the basic principles and treatment are set out in section 4.

Miscellaneous

- 3.12 In addition to the definitions given in rule 11.1 there are some general points on interpretation. The Interpretation Act 1978 applies to the interpretation of the rules. This means, inter alia, that unless the context requires otherwise -

- (a) any expression in the rules which is also used in the *Act* is to be read in the same sense;
- (b) words in the singular include the plural and words in the plural include the singular;
- (c) ‘land’ includes buildings and other structures, land covered with water, and any estate, interest (such as a lease or option), easement, servitude or right in or over land; and
- (d) ‘person’ includes a body of persons corporate or unincorporate.

4. VALUATION RULES

General principles

- 4.1 Unless a specific valuation rule applies (other than cash which is assigned its face value), no value can be given. In this context, ‘cash’ refers to cash in hand i.e. notes and coins. Cash deposited at a bank is treated under the *Valuation of Assets Rules* as a *debt* due from the bank. It therefore follows that in the case of admissibility limit restrictions, the *counterparty* exposure to the bank will be the aggregate of the cash deposits together with other investments in that bank (see section 5).
- 4.2 Examples of assets which have no value under the *Valuation of Assets Rules* include gold and other commodities, goodwill, expected allocations to shareholders from future life fund surpluses and tax credits recoverable only against tax on future profits (although a deferred tax credit resulting from a short term timing difference which will reverse in the near future may be recognised by way of offset against a current tax liability).
- 4.3 There are two types of valuation rule: those that require an asset to be valued at a certain amount (e.g. a *listed* security valued at its *market value*); and those which specify that the value must be not greater than a certain amount (e.g. land is valued at an amount not greater than the most recent *proper valuation*).

Overriding rule

- 4.4 In all cases there is an overriding rule for all valuations (rule 4.1(4)) which requires that a lesser value must be taken if, in all circumstances of the case, the value required by the rules is unlikely to be realisable. When determining whether or not a lesser value should be taken, regard must be taken to the underlying security of the asset and if a *debt*, the credit standing of the *counterparty*.

Post balance sheet events

- 4.5 In normal circumstances, although not strictly necessary, the *FSA return* for an *insurer* is based on the information included in the *Companies Act* accounts which the *directors* have approved and which the auditor has reported on at a particular date. If, however, there has been a post balance sheet event before the date on which

the *FSA return* is signed which is of such significance that it materially affects the view shown by the *return*, then the *return* should be adjusted and the reasons for the adjustment disclosed in the notes to the *return*. This will apply in cases where either the value of assets or liabilities of the *insurer* are affected.

- 4.6 The extent of the post balance sheet review required between finalisation of the statutory accounts and *Returns* will be a matter of judgement but the *FSA* considers that the general principles contained in SSAP 17 should be applied. Where a post balance sheet *general insurance business liability* is identified, the *FSA* may accept an additional amount to be disclosed as a one line entry on the balance sheet form of the *FSA return* (with appropriate explanation in the notes) without an adjustment to all the detailed analysis Forms.

[paragraphs 4.7, 4.8, 4.9, 4.10, 4.11 and 4.12 deleted]

Debts, deposits and other rights

- 4.13 This is a complex area which requires a three step approach to *debt*, deposits and other rights.
- Firstly, the type of *debt* and other right must be categorised under one of the definitions within rule 11.1.
 - Secondly, the *debt* and other rights must be valued - the rules to be applied are given in rule 4.5.
 - Thirdly, the admissibility rules set out in rule 4.14 and **Appendix 4.2** must be applied in order to determine the amount which can be taken into account for solvency purposes.

The key elements of the rules are described below. For additional guidance, illustrative examples are given in **Annex A**.

What is a debt?

- 4.14 The term *debt* covers a wide variety of rights which are *debts* although not always recognised as such. Such items may include accrued interest and rents receivable. For the purpose of the admissibility limits certain *debts* are given a higher admissibility limit than others. This is dealt with in greater detail in section 5.

Off-set

- 4.15 The valuation and admissibility limits relating to *debts*, including *reinsurers'* share of the technical account, would normally be considered on a gross basis unless any legally enforceable right of set-off existed. For example, *debts* due from one *counterparty* would normally be valued gross of any amounts due by the *insurer* to that *counterparty*. To the extent that rule 5.2 (valuation of liabilities under generally accepted accounting practice) applies, further guidance can be obtained from Financial Reporting Standard No. 5 ('FRS 5') issued by the Accounting Standards

Board in April 1994. The key tests which should be satisfied before assets and liabilities can be offset are set out in paragraph 29 of FRS 5 which may be summarised as follows:

- (a) the *insurer* and the *counterparty* owe each other determinable monetary amounts which are denominated in the same currency or readily convertible;
- (b) the *insurer* has the ability to insist on net settlement and can enforce a net settlement in all situations of default by the *counterparty*; and
- (c) the ability to insist on net settlement is assured beyond doubt and can survive the insolvency of the other party.

Consequently *debts* will not normally be able to be off-set against claims or other provisions. In particular, in relation to derivatives, the provisions for adverse changes cannot be off-set against *debts* due from an *approved counterparty* since the provision for adverse changes is not a determinable amount owed to the other party (i.e. fails test (a)). Note should also be taken of the offset reporting rules in the *Accounts and Statements Rules* - these requirements are not affected by the *Valuation of Assets Rules*. In this respect, therefore, the reporting requirements for the *FSA return* are applied independently after the *Valuation of Assets Rules* have been applied.

Basic valuation rule

- 4.16 The *Valuation of Assets Rules* apply similar valuation rules for both *secured* and *unsecured debts*. The rules differ only by the fact that for *secured debts*, due account must be taken of the quality and nature of the security. The *Valuation of Assets Rules* then apply, differently, depending on the timing of the *debt* as shown in the following chart. The definition of a *secured debt* is discussed in more detail in paragraphs 4.28 to 4.35.

Length of debt	Valuation rule
Due within 12 months	Amount that can reasonably be expected to be recovered
Due in more than 12 months	Immediate assignment value

- 4.17 ‘Immediate assignment’ value does not necessarily mean that there must be a specific buyer for the *debt* identified but that it would be possible to find someone to assign the *debt* to immediately. It also means that in valuing the *debt*, account should be taken of the time value of money which reflects the term of the *debt*, interest rates, status of the borrower and any other relevant conditions. *Unlisted, unsecured* deep discount or zero coupon bonds will certainly need to be discounted in order to arrive at a realistic assignment value.

Reinsurance recoveries/debts

- 4.18 Rules 4.5(5) and (6) distinguish between differing types of *reinsurance recoveries* for *long-term insurance business*. The distinction is made between *debts* actually due at the *relevant date* (which will include, in the main, *reinsurance recoveries* due against liabilities which have already been discharged by the *insurer*) and rights to future recoveries under long-term contracts of *reinsurance*.
- 4.19 The rules for amounts due or to become due under contracts of *reinsurance* can be summarised as follows.

Type of right under a contract of reinsurance	Valuation rule	Admissibility
Rights under a long-term contract of <i>reinsurance</i> which are not <i>debts</i> which have crystallised as being due at the relevant date	The amount of the right is offset against the related liabilities (provided this is standard actuarial treatment). Thus, the liability will be reduced by the amount of the rights	100% (since admissibility limits do not apply to liabilities)
Rights/ <i>debts</i> due from a <i>group undertaking</i>	Rule 4.2(4)	<i>Group undertaking</i> rules apply (rule 4.3)
Rights under a contract of <i>reinsurance</i> (others)	Rule 4.5(5)	100% (rule 4.14(5))

Other debts

- 4.20 Aside from *reinsurance recoveries*, there are a number of exceptions to the basic rule. The main types of exemptions are described in the table below which indicates where the relevant rules are to be found in the *Valuation of Assets Rules*.

Type of debt	Valuation rule	Comment
Amounts due under a letter of credit	Nil value (rule 4.5(2))	This is essentially a double counting provision (i.e. any underlying <i>debt</i> which is secured by a LOC is admissible but credit may not also be taken for the LOC in addition to the underlying <i>debt</i>).
Any <i>debt</i> secured on a long-term insurance <i>policy</i> issued by the <i>insurer</i> .	If fully secured, the amount of the <i>debt</i> (rule 4.5(3))	If not fully secured, usual <i>debt</i> rules will apply. The <i>secured</i> element of the <i>debt</i> remains within the secured <i>debt</i> rules.
Advance commission to intermediaries (contingent asset)	Nil value (rule 4.5(7))	This relates primarily to contingent commission advanced in relation to the sale of long-term insurance <i>policies</i> before such commission has actually been fully earned.
Unpaid <i>share</i> capital	Nil value (rule 4.5(7))	See paragraph 4.21
<i>Subordinated debt</i> due from an undertaking of which it is a <i>group undertaking</i>	Nil value (rule 4.5(6))	See paragraph 4.22
Premium <i>debts</i> more than 3 months overdue	Nil value (rule 4.5(7) and (8))	See paragraph 4.24
Premium <i>debts</i> (other)	The amount expected to be recovered (rule 4.5(1) and (4))	100% admissible (rule 4.14(5))
Quasi-derivatives	Depends on the circumstances	See paragraph 4.26

Unpaid share capital

- 4.21 Rule 4.5(7)(b) requires any *debt* due in respect of unpaid *share* capital of the *insurer* to be left out of account. There are circumstances under rule 2.10 where an *insurer* which has issued partly paid *shares* is able to count one-half of the unpaid amount towards its solvency requirements, provided that the admissible value of the *insurer's* other assets is at least equal to its liabilities. The relevant conditions which need to be met are principally that at least one-quarter of the nominal value and *share* premium has been paid up.

Subordinated debt

- 4.22 *Subordinated debt* is defined in rule 11.1, and is any *debt* that ranks after general creditors, in the event of a winding up of the debtor, and that is not to be repaid until the *claims* of those general creditors have been settled. There is, however, an express provision in rule 4.5(7) which prohibits an *insurer* from assigning a value to such *subordinated debt* if issued by its holding company.
- 4.23 For admissibility purposes, *subordinated debt* falls within the definition of *hybrid security* and will therefore benefit from the same admissibility limits as investments in equity *share* capital.

Premium debtors and the 'three month rule' - applies to all premium debts

- 4.24 The three month rule applies to all premium *debts* whether in relation to *direct insurance business* or inwards *reinsurance* business. *Debts* in relation to outwards *reinsurance* (i.e. essentially *reinsurance recoveries*) are not caught by these premium *debt* rules.
- 4.25 Under the *Valuation of Assets Rules*, any premiums which have been recorded in the *insurer's* records as due and payable and have been outstanding for more than three months can have no value for solvency purposes. The key to determining valuation is to establish when the clock starts running for the purpose of the 'three month' test. In general the due date will run from the time the *insurer* books the *debt* as due and therefore the three month period will run from after the expiry of any agreed credit terms. For example, in the case of an instalment premium, an instalment not due until six months time will only fail the 'three month' test if it has still not been paid within nine months (i.e. three months from the date it is due). In relation to London market bureaux business, a *debt* would normally be considered to be due from the bureau settlement date for the particular transaction concerned, i.e. the *debt* would not need to be linked back to the original signing date of the *policy* each time there is a subsequent treaty statement or premium adjustment. In all cases, the *FSA* would expect the *insurer* to be able to demonstrate clearly from its records when the *debt* is actually due for payment. If an *insurer* has recorded a *debt* but simply not yet made any effort to collect then it cannot claim that the amount is therefore not yet payable. Similarly it is unlikely that an *insurer* would be considered to have fulfilled the requirements if it were to grant extended credit terms beyond those needed for

normal commercial purposes (especially if granted to a *connected company*) in order to extend the admissibility of its premium *debts*.

Quasi-derivatives

- 4.26 Except in limited circumstances (which are described in paragraph 4.90), contracts having the effect of *derivative contracts* (e.g. where the principal is repayable in full and it is simply the coupon which is linked to an unapproved index) are given a nil value. However, any 'true debt' element which is receivable under an unconditional right can be assigned a value using the normal *debt* rules.

Amounts due from the long-term insurance fund

- 4.27 The rules do not specifically cover balances due between the *long-term insurance fund* and shareholders' funds or between separate *long-term insurance funds* maintained by an *insurer*. Given the requirement for separate identification of the *long-term insurance fund* by rules 3.1 to 3.5, such balances do arise in practice and may feature in the shareholders' accounts. There is a difficulty in reflecting these in the *return* since the *long-term insurance fund* is not a separate legal entity and, legally speaking, there is not a 'debt' that can be valued under the rules. The *FSA's* view is that the allocation of assets between the *long-term insurance funds* and shareholders' funds should be made to ensure that no such 'interfund' balances exist.

Secured debts

- 4.28 The *Valuation of Assets Rules* make the distinction between *secured* and *unsecured debts*. Moreover, the rules allow a *debt* to be split into a secured element and an unsecured element and the two parts are able to be treated separately when applying the *Valuation of Assets Rules* and the admissibility rules. The *Valuation of Assets Rules* do not expressly distinguish between types of *security* (e.g. floating or fixed) but instead set out the criteria against which each type of *security* should be assessed to determine whether it allows the *debt* to rank as 'secured' under the *Valuation of Assets Rules*.
- 4.29 The extent to which a *debt* is to be regarded as 'secured' is set out in the definition of *secured debt* in rule 11.1.
- 4.30 A *debt* is treated as secured only to the extent that it is secured by -
- (1) a letter of credit established with an *approved credit institution*Ⓞ;
 - (2) a guarantee provided by an *approved credit institution*Ⓞ; or
 - (3) assets which are of a value which is sufficient to allow the *debt* to be discharged in full (provided the assets can themselves be valued under the *Valuation of Assets Rules* and provided that the exposure to that class of assets does not exceed the permitted *exposure* limits once the assets providing security have been aggregated with the other exposures to that class of assets).

① as long as the LOC/guarantee does not cause a breach of the *permitted counterparty exposure limit*.

- 4.31 In the case of 4.30 (1) and (2), the letter of credit or guarantee can only count as security to the extent that the *counterparty exposure* to the credit institution does not exceed the permitted limits once the letter of credit or guarantee has been aggregated with the other *exposures*.
- 4.32 The *Valuation of Assets Rules* are broadly the same for both *secured* and *unsecured debts* (paragraph 4.16) - the only difference being that for *secured debt*, due account should be taken of the quality and nature of the security. The main difference in treatment between *secured* and *unsecured debts* is in relation to the admissibility limits which are discussed further in section 5.
- 4.33 When assessing *counterparty exposure* to credit institutions which have provided guarantees to act as security, the *FSA* would expect *insurers* to bear in mind their potential *counterparty exposure* to that credit institution in the context of rule 2.3 (the requirement to have assets appropriately spread).
- 4.34 A letter of credit is normally different in economic terms from a guarantee since under a LOC scheme, the credit institution operating the scheme is in effect ensuring that the debtor will honour the *debt* by holding assets which belong to the debtor and only permitting them to be released to the benefit of the *insurer* in settling the *debt* due. This is quite different from the credit institution acting as guarantor of the amount due. When looking at *counterparty exposure*, if letters of credit are involved, *insurers* will need to look at the legal structure of their own arrangements in each case but, in general, the *FSA* would not expect amounts due under LOCs operating as described above to be included within the overall *counterparty exposure* for the credit institution operating the scheme. An exception to this generality is that when assessing whether a LOC can count as security for a *debt* rule 11.1 states that the *counterparty exposure* to the credit institution should be taken into account (paragraph 4.31 refers).
- 4.35 The *secured debt* rules can be difficult to interpret and hence some worked examples of how *secured debts* are valued is given in **Annex A**.

Stock lending and repo transactions

- 4.36 The rules permit stock lending transaction and repos to be treated on the same footing.

Basic principles

- 4.37 The overall principle which is applied to ‘approved’ stock lending and repos is to ‘look through’ the transaction. That is, provided certain conditions are met, values are ascribed to the stock lent as though it were still retained by the *insurer*, but no value is ascribed to the collateral ‘transferred in’. This principle is detailed in rule 4.4(1).

4.38 In summary, the transaction must be with an *approved credit institution* or an *approved investment firm* and the maturity period must not exceed six months or must be ‘on demand’. Finally, the transaction must satisfy the conditions set out in rule 4.4(2) together with those set out in -

- (a) rule 4.4(3) (which caters for *securities* purchased); or
- (b) rule 4.4(4) (which caters for *securities* sold or lent).

Many of the conditions in rule 4.4 relate to the nature and quantum of the collateral. The *Valuation of Assets Rules* operate in a significantly smoother fashion if the *insurer* has ensured that its transactions are appropriately collateralised and can benefit from the ‘look through’ approach. Since it is assumed that the vast majority of *insurers* will carry out stock lending and repo transactions with appropriate collateral, it is not proposed to offer detailed guidance of the calculations required if an arrangement has collateral which fails the conditions within rule 4.4. Insurers should be aware, however, that if the collateral is such that the conditions in rule 4.4 fail, and the look through approach is not permitted, the *insurer* will then have to endure a number of additional calculations in order to apply the *Valuation of Assets Rules* using first principles (i.e. would treat the outward and reverse transactions as futures contracts, requiring therefore that account be taken of *counterparty exposure* etc.).

The conditions set out in rule 4.4(2)

4.39 The conditions described in rule 4.4 broadly require the collateral to maintain a value which does not fall below 97.5% of the value of the stock sold. If the value does fall through this level, additional collateral is required by the end of the next working day to bring it back up to the 100% level.

The conditions set out in rule 4.4(3)

4.40 If, under the agreement, it is the *insurer* which has purchased the *securities*, using consideration which is other than by way of a sale of *securities*, then the conditions which must be met to allow the ‘look through’ approach are set out in rule 4.4(3) and are as follows:

- (a) the *securities* purchased must be gilts, *listed securities* or *securities* issued by an *approved credit institution*; and
- (b) the *securities* purchased must satisfy extra conditions (see 4.41).

4.41 For the ‘look through’ approach to apply where an *insurer* purchases *securities*, it is a condition that the *securities* purchased must not include -

- (a) *securities* issued by the same *counterparty*, the aggregate value of which exceeds 15% of the value of the total package of *securities* purchased,

or, if (a) is not satisfied,

- (b) *securities* which, if aggregated with the *insurer's* existing other holdings, would cause a breach of the relevant admissibility limits.

These conditions do not apply if the assets transferred to the *insurer* are gilts or other types of *approved securities*.

The conditions set out in the rules at 4.4(4)

4.42 If, on the other hand, it is the *insurer* which has sold securities to an *approved credit institution* or an *approved investment firm*, then the conditions in rule 4.4(4) apply as follows -

- (a) the 'consideration' received must be of a certain nature;
- (b) the 'consideration' (unless in the form of gilts or cash) received must satisfy extra conditions;
- (c) if cash was received as collateral, then cash must be returned in the same currency; and
- (d) if *securities* were offered as collateral, then *equivalent securities* must be returned.

Consideration in this context comprises –

- *securities* (other than gilts and other *approved securities* issued by,
- letters of credit established with,
- guarantees provided by,
- cash held with,
- a charge over cash held with,
- a charge over *securities* issued by,

the same *counterparty*.

4.43 For the 'look through' approach to apply where an *insurer* sells *securities*, the conditions require that the 'collateral' received must not include -

- (a) 'consideration' which causes *exposure* to the same *counterparty* to exceed 15% of the value of the total package of the 'collateral',

or, if (a) is not satisfied

- (b) 'consideration' which, if aggregated with the *insurer's* existing other holdings, would cause a breach in the relevant admissibility limits.

The conditions would not, in practice, apply if the 'collateral' received by the *insurer* is gilts or other types of *approved securities*.

Look through approach for stock purchased

- 4.44 If the conditions are met, the *insurer* should value the ‘consideration’ as if such consideration had been retained by it. At the same time, no value is to be given to the stock ‘purchased’, except to the extent that the stock is non-returnable and represents payment for services rendered.

Look through approach for stock sold

- 4.45 Under similar ‘look through’ principles, providing the conditions are satisfied, the *insurer* should value the stock sold as if such stock had been retained by it. At the same time, no value is to be given to the collateral which the *insurer* received as part of the transaction, except to the extent that the assets received as 'collateral' are non-returnable and represent payment for services rendered.

Admissibility implications

- 4.46 Those assets to which a value can be given (see 4.44 and 4.45) will be included within the *insurer's exposure* to assets of the same description. At the same time, if the conditions are satisfied, there will be no *counterparty exposure* to the assignee by virtue of the fact that no value may be given to the assets received by the *insurer*.
- 4.47 Rule 4.4(7) allows *insurers* to adopt a pragmatic approach where the *insurer* has entered into a number of stock lending or repo transactions. It allows the agreements which are yet to mature at the *relevant date* to be aggregated and treated (for the purposes of testing the conditions also set out in rules 4.4(3) and (4)) as though they were one agreement. In practical terms, therefore, when an *insurer* assesses whether the collateral causes a breach of any of the permitted *exposure* limits, it can look at all such collateral collectively.

What if the conditions are not met?

- 4.48 In such instances, the transaction should be assessed using first principles. In the majority of cases, stock lending and repo transactions will be a series of *futures contracts* and should be treated under the *Valuation of Assets Rules* and admissibility rules accordingly. This will undoubtedly require a number of additional calculations to be carried out (the section on futures and options contracts in section 5 may also be relevant). The purpose of the conditions set out in rule 4.4 is to provide a simple, pragmatic treatment for the preferred types of stock lending and repo transactions.

What if the *insurer* reinvests the collateral?

- 4.49 In certain instances, it may be considered commercially advantageous to reinvest the ‘collateral’ received when the *insurer* has ‘sold’ *securities* under a stock lending or repo transaction. If the conditions set out in rules 4.4(2) and (4) are satisfied, then the ‘look through’ approach applies not only to the original collateral, but also to any assets which have been acquired as a result of the reinvestment. In other words, the original collateral, or any assets purchased by it, are given a nil value.

- 4.50 However, in such circumstances, the *insurer* must consider the effects of rule 5.3(1)(b) which caters for imprudent reinvestment of collateral received under a stock lending or repo transaction. The rule requires the *insurer* to provide for, as an additional liability, any adverse variations (taken in the context of the overall level of assets party to this and similar transactions) which may occur between the value of the original assets received as collateral and the assets it has acquired upon reinvestment of the collateral.
- 4.51 Rule 5.3(1)(b) is reliant on the *insurer* being able to earmark assets to match the obligation it has taken on under the transaction – under rule 5.3(1)(a). For pragmatic reasons, it is reasonable for an *insurer* to have regard to the overall availability of the assets of the description in question before carrying out the earmarking process. For example, if the *insurer* were to identify cash as a suitable asset to cover its obligation, and if the *insurer* had an abundance of cash reserves elsewhere, it would be unnecessary for the *insurer* to earmark specific pound notes and coins for the purpose of rule 5.3(1)(a).

FSA return reporting

- 4.52 For the purposes of the *FSA Returns*, the asset sold or lent will be reported in the line of **Form 13** appropriate to the asset to which title has been transferred, and not as a *debt*. This is consistent with existing practice for most *insurers*.

Land and buildings

- 4.53 Rule 4.6 requires that land is valued on the basis of the most recent *proper valuation* after deduction of reasonable expenses of sale. If there has been no *proper valuation*, the land has a nil value. By virtue of the Interpretation Act 1978 'land' includes any interest in land such as a lease or option and also includes buildings, but does not include a remainder or a reversionary interest which in the case of *long-term insurers*, must be valued under rule 4.11 and will have no value for *general insurers*. It does not include debts secured on land.
- 4.54 The definitions of *proper valuation* and *qualified valuer* in rule 11.1 are extremely important. The former makes clear that any *mortgage* or charge is to be excluded from consideration; it is not the equity of redemption which is to be valued as might have been thought to be the case without this specific reference. If the *insurer* has used a valuer who does not hold one of the specified qualifications, then the land will have a nil value unless specific exemptions have been granted under a section 148 direction.
- 4.55 It is a condition of a *proper valuation* that the valuation is made not more than three years earlier by a *qualified valuer*. This is, however, a 'no greater than' provision. If circumstances likely to affect the realisable value have become less favourable since such a valuation was made, or if there is any other adverse consideration arising from a qualification in the valuer's report (for example calling for other professional advice), an appropriate lower value must be taken. Where a property has been acquired at open *market value* after obtaining a professional valuation, this valuation is likely to be adequate for the purposes of rule 4.6.

- 4.56 Valuation of buildings should normally be under the Royal Institute of Chartered Surveyors (RICS) guidelines for the valuation of properties of *insurers*. The deduction for reasonable expenses of sale, which the RICS guidance recommends that the valuer leaves to the *insurer* to assess, may need to include relocation costs where the *insurer* occupies its own premises.
- 4.57 Where the *insurer* or a *related company* occupies the property, then the valuation should be on a vacant possession basis, not sale and lease back, unless a lower value is more appropriate. This rule applies to the situation where the *general insurer* occupies a building owned by the *long term insurance fund* of a *related company*.
- 4.58 Where a number of pieces of land are valued together they may attract a collective admissibility limit under paragraph 1 of Part II of **Appendix 4.2**
- 4.59 Rule 4.6(2) provides that the amount of any interest in land which is determinable upon a future event (including the death of any person) is the immediate transfer value of the interest.

Equipment

- 4.60 Rule 4.7 provides for the rapid write off of all forms of operating equipment. This is a 'not greater than' rule and so a faster rate of write down should be used if that is considered reasonable for particular items of equipment. Such a circumstance may arise if, for example, an *insurer's* computer equipment has become outmoded because of technological developments and would, therefore, have little realisable value.
- 4.61 There is no definition of computer equipment in rule 11.1, but in practice the *FSA* considers it appropriate to continue with the general practice that computer hardware would be included, but not computer software.
- 4.62 Rule 4.7 only applies to equipment owned by the *insurer* and leased assets would have to be left out of account. In the interests of consistency, there is no need in these circumstances to provide for the accounting liability in respect of future finance lease payments which would appear in the shareholder accounts by virtue of SSAP 21. However, where the present value of future lease payment commitments exceeds the value of the assets (valued under the appropriate *Valuation of Assets Rules*), then the net liability (or the cost of breaking the lease if lower) should be included as a liability for the purposes of assessing solvency.

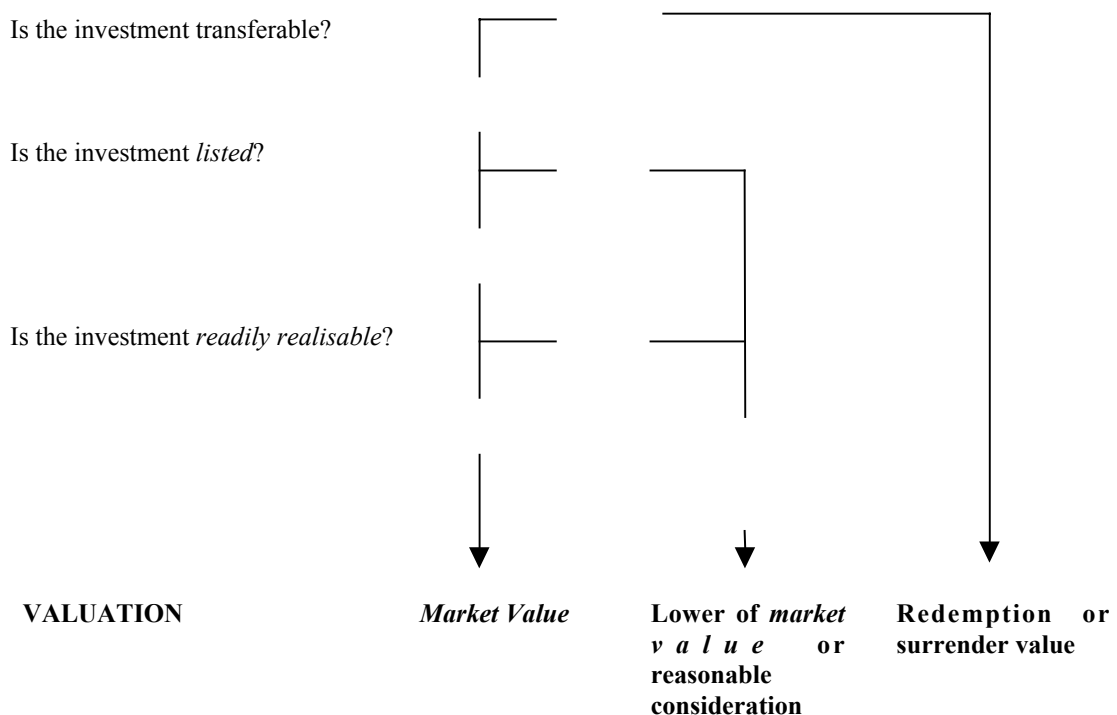

Securities and beneficial interests in limited partnerships

Overview

- 4.63 All *securities* and all beneficial interests in limited partnerships are valued under rule 4.8. There are three exceptions: interests in *collective investment schemes*, *derivative contracts* and contracts having the effect of derivative contracts must be valued using their own more specific rules 4.9, 4.12 and 4.13 respectively.

- 4.64 The same valuation rules apply regardless of whether the security is *listed* or *unlisted*. However, there is a distinction between *listed* and *unlisted securities* in the admissibility rules. The admissibility rules are described in section 5.
- 4.65 The question as to whether *securities* are *readily realisable* has a direct impact on both the valuation rule and the admissibility rule.
- 4.66 *Readily realisable securities* include those which it would be reasonable to assume that, had they been sold at the *relevant date*, the selling price would have been at least 97.5% or more of the *market value*. *Readily realisable securities* are subject to different valuation and admissibility rules. The underlying principles are further explained in paragraphs 4.73 to 4.77.
- 4.67 Rule 4.8 itself does not allow a lower valuation than that required. Consequently, there is no option to show an amount other than that under the rules in the *returns*. As with all valuations, this is subject to the application required of the ‘overriding rule’ in rule 4.1(4) (see 4.4). In addition, the valuation must be under UK GAAP which, in itself, allows the necessary degree of flexibility when valuing *securities*. *Directors* must, however, be able to support and justify the valuation methods used to the *insurer's* auditors.

Summary of the Valuation of Assets Rules

Unlisted investments

- 4.68 The *insurer* must value *unlisted securities* under UK GAAP. The *insurer's* auditor is responsible for forming an opinion on whether the methodologies used in valuing

unlisted investments fall within the scope of UK GAAP and give an appropriate estimation of the investment's value.

4.69 When estimating the value of *unlisted securities*, matters for consideration should include the following.

- For bonds: comparison with a range of similar *securities*, or obtain an independent quotation from an investment firm; and
- For equities and other investment interests: have regard to the valuation guidelines given by the British Venture Capital Association document, 'Guidelines for the Valuation and Disclosure of Venture Capital Portfolios', or obtain an independent quotation from an investment firm.

Consideration should also be given to the average price at which the *unlisted securities* were traded at the *relevant date*, if it is the case that a market exists for such investments.

4.70 The *Valuation of Assets Rules* are not intended to require an *insurer* to assign a 'forced sale' valuation to such *securities*. This may be particularly relevant when assessing the value under rule 4.8(3)(b)(ii).

Listed investments

4.71 Rule 4.8 caters for *listed debt securities* (including local authority capital issues and *listed Eurobonds*) and *listed shares*.

4.72 Other *listed* investments are assigned the *market value* as determined under UK GAAP, except for *securities* (*listed* or *unlisted*) which have the effect of an inadmissible *derivative contract* (in which case the valuation issues are discussed below). Similarly, it follows that fixed interest redeemable investments should also be shown at their *market value* as determined by UK GAAP and hence may not be valued on an amortisation basis.

Investments which are readily realisable

4.73 Rule 4.8(4) requires the *insurer* to assess whether it would have been able to sell the investment at the ascribed value. The *security* would fail the *readily realisable* test if it is reasonable to assume that, if the investment had been sold at the *relevant date*, the maximum selling price which could have been achieved would not be sufficiently close to the ascribed value.

4.74 In order to determine whether the investment is *readily realisable*, the *insurer* should first assign the *market value* (i.e. the value ascribed using UK GAAP) to the *security*. The *insurer* should then be in a position to be able to demonstrate to its auditors that the investment could have been sold or transferred under an orderly arms' length sale at the *relevant date* (having had 7 days to negotiate the sale), at a selling price which is not less than 97.5% of the ascribed value.

- 4.75 If the *insurer* is unable so to demonstrate, then the investment will not be considered *readily realisable* and it will be treated under the admissibility rules as though it were *unlisted* (see the summary rules table above). This then has the knock on effect that *listed* but not *readily realisable* investments are included, together with *unlisted securities*, within the aggregate limit in paragraph 12 of Part II of **Appendix 4.2**. This is in contrast to the treatment of *readily realisable listed* investments, where there are no aggregate limits.
- 4.76 The rules allow certain investments which may, on the face of it, otherwise fail the test in rule 4.8(4), nonetheless still to be classed as *readily realisable*. An investment does not fail the *readily realisable* test if (but only if) it failed the requirements of rule 4.8(4) owing to either -
- (a) a temporary suspension of the listing; or
 - (b) the size of the holding being so large that it would not be possible to carry out an orderly arms' length sale on the *relevant date* of that entire holding at the ascribed value.

Non-transferable securities

- 4.77 Any investment, regardless of whether it is *listed* or *unlisted*, which is not transferable will be assigned a value which would be payable on surrender or redemption of the investment at the *relevant date*. In this regard, the 'transferable test' is not intended to define investments which are 'not readily transferable'. Instead, the intention is to make a distinction for those *securities* where there is a prohibition on any transfer.

Traded debt securities ('Eurobonds')

- 4.78 The term '*listed debt securities*' includes all *debt securities* in respect of which there has been granted and not withdrawn a listing on any stock exchange in an *EEA State* and includes all *debt securities* which have been granted a trading facility on a *regulated market*. *Debt securities* are catered for under rule 4.8.

Other commercial paper

- 4.79 Commercial paper which is not *listed* will be treated as an *unlisted debt security* and will be valued under rule 4.8. The admissibility limits which cater for *debt securities* are described in section 5. Since the valuation rule ascribes *market value* to such items, it is possible for the value of the commercial paper to be stated inclusive of accrued interest.

Valuation rules - unit trusts and other collective investment schemes

- 4.80 Rule 4.9 describes the characteristics of those *collective investment schemes* which can be given a value. Provided the criteria are satisfied, the holding/beneficial interest in the scheme can be valued and admitted for solvency margin purposes. All *UCITS* are incorporated within rule 4.9.

- 4.81 The valuation of *collective investment schemes* where the *issuer* cannot be required to buy back the units is determined by applying the provisions set out in rule 4.8.
- 4.82 The admissibility rules distinguish between *collective investment schemes* recognised under the *UCITS Directive* (which are admissible without restriction) and other authorised/recognised schemes (which are admissible up to 5% of the business amount).
- 4.83 Schemes which are not authorised, or are not recognised by the *FSA*, can be ascribed a value provided certain conditions are met. The admissibility limit for such schemes is 1% of the *business amount*.

Derivatives

- 4.84 Rule 4.13 defines the criteria which apply for a contract to be treated under the *Valuation of Assets Rules* as though it were a *derivative contract*. Rule 4.13 is intended to catch investments which, although they may not have the legal form of a *derivative contract*, nevertheless have the effect of or operate in the same manner as a derivative. Both those contracts which are derivatives and those which have the effect of *derivative contracts* are to be treated on an equal footing.
- 4.85 Rule 4.12 defines an ‘approved derivative contract’ for purposes of the rule. Only such a contract can be given a value for solvency purposes. A contract which gives rise to a liability (whether ‘approved’ or not) must be valued under UK GAAP, under rule 5.2.
- 4.86 (1) The conditions which must all be satisfied in order for the contract to be treated as an ‘approved derivative contract’ are -
- (a) the contract can be readily closed out;
 - (b) the contract is *listed* or if OTC (‘Over The Counter’) is with an *approved counterparty*;
 - (c) the investment is for the purpose of efficient portfolio management or a reduction in investment risks;
 - (d) the contract is held in connection with assets which are themselves admissible under the *Valuation of Assets Rules* for the purposes set out in (c);
 - (e) the contract is covered - i.e. the *insurer* will have, as far as can reasonably be foreseen, appropriate assets at the settlement date to be able to fulfil its obligations under the *derivative contract*;
 - (f) the contract must satisfy the ‘in connection with’ test;
 - (g) the contract must use a prescribed pricing basis.

- (2) The rights to recover the *initial margin* are now catered for under rule 4.5.
- 4.87 A *derivative contract* would not be ‘covered’ if, under rule 5.3, it would require a significant provision to be made. Although it is a matter ultimately for the *directors* to agree with their auditors, the *FSA* takes the view that the term ‘significant provision’ should be taken in the context of the value of the contract - not in the context of the fund within which the contract is used.
- 4.88 *Listed derivative contracts* are valued at their *market value*; the valuation for *unlisted* contracts remains as before, being the amount which would reasonably be paid for closing out the contract. The value of both *listed* and *unlisted derivative contracts* must be reduced by any amounts which have already been received by the *insurer* under the contract, for example by way of a *variation margin*.
- 4.89 Rule 5.3 should also be considered when valuing *derivative contracts* to determine whether an additional liability should be made in respect of a provision for adverse changes.
- 4.90 Whilst the above paragraphs provide an overview of the derivatives rules within the *Valuation of Assets Rules*, fuller guidance on the valuation and admissibility of derivatives is given in Guidance Note 4.2 ‘The use of *derivative contracts* in insurance funds’. This more detailed guidance should be referred to when seeking to value *derivative contracts* for solvency margin purposes.
- 4.91 Rule 4.13 sets out the valuation rules for contracts or assets which have the effect of *derivative contracts*. In essence, such contracts or assets are valued at *market value*. Those which have the effect of inadmissible *derivative contracts* have a nil value, except in respect of an unconditional right to receive a specified amount. Such an amount is treated as a *debt* and valued accordingly.

Implicit items: future profits

- 4.92 (1) *Insurers* may apply for a waiver from rule 2.10 so that the *implicit item* relating to future profits may be valued at not more than 50% of the full amount of future profits.
- (2) For the purposes of (1), the full amount of future profits is the estimated annual profit multiplied by a factor which, as closely as possible, represents the average number of years remaining to run on *policies*, but does not exceed 10.
- (3) For the purposes of (2) -
- (a) the estimated annual profit is one-fifth of the profits made in *long-term insurance business* over a period of five years (the **relevant period**) ending on the last day of the most recent *financial year* for which a valuation under rule 9.4 has been carried out, substantial items of an exceptional nature being excluded; and

- (b) the average number of years remaining to run on *policies* is calculated-
- (i) by multiplying the number of years to run on each *policy* by the actuarial value of the benefits payable under the *policy*, adding together the products so obtained and dividing the total by the aggregate of the actuarial values of the benefits payable under all the *policies*, or
 - (ii) by an approximation to this method of calculation suitable to the circumstances of the case, including, where appropriate, an approximation involving the grouping of contracts,

appropriate allowance being made in either case for premature termination of contracts.

- (4) For the purposes of (3)(a) -
- (a) where a valuation under rule 9.4 has been carried out annually in relation to the 'relevant period', the profits made in *long-term insurance business* for any particular year of the 'relevant period' is the surplus (if any) arising in the *long-term insurance fund* since the last such valuation, and the profit so made for that period is the aggregate of those surpluses less any deficiencies in the *long-term insurance fund* during that period;
 - (b) where an *insurer* has carried on *long-term insurance business* throughout the 'relevant period' but valuations under rule 9.4 have not been made annually in that period, the profits so made for that period are the aggregate of surpluses arising in the *long-term insurance fund* since the last valuation preceding the 'relevant period' less any deficiencies in the *long-term insurance fund* since that last valuation, except that the surplus or deficiency arising in the period ending with the first valuation within the 'relevant period' is proportionately reduced to allow for any period of time falling outside the relevant period; and
 - (c) where an *insurer* has not carried on *long-term insurance business* throughout the 'relevant period', the profits made in *long-term insurance business* for the 'relevant period' are the aggregate of any surpluses arising in the *long-term insurance fund* during that part of the 'relevant period' for which *long-term insurance business* was carried on less any deficiencies in the *long-term insurance fund* during that part of that period.

Implicit items: zillmerising

- 4.93 (1) *Insurers* may apply for a waiver from rule 2.10 so that, where *zillmerising* is appropriate, but either is not practised or is at a rate less than the loading for acquisition costs included in the premium, then, subject to (6), the *implicit item* relating to *zillmerising* may be valued at an amount not exceeding the difference between -
- (a) the *non-zillmerised* or partially *zillmerised* figure for *mathematical reserves* maintained by the *insurer*; and
 - (b) a figure for *mathematical reserves* (not less than those required by the *Determination of Liabilities Rules*) *zillmerised* at a rate equal to the loading for acquisition costs included or allowed for in the premium.
- (2) Where *zillmerising* is not practised, then, subject to (6), the value given by (1) (less any amount relating to temporary assurances) may not exceed 3.5% of the aggregate of the difference between -
- (a) the ‘relevant capital sums’ for *long-term insurance business* activities; and
 - (b) the *mathematical reserves* (excluding *mathematical reserves* for temporary assurances).
- (3) Where *zillmerising* is practised but is at a rate less than the loading for acquisition costs, then, subject to (6), the value given by (1) (less any amount relating to temporary assurances) together with the difference between the partially *zillmerised mathematical reserves* and the *non-zillmerised mathematical reserves* may not exceed 3.5% of the aggregate of the difference between -
- (a) the ‘relevant capital sums’ of *long-term insurance business* activities; and
 - (b) the *mathematical reserves* (excluding *mathematical reserves* for temporary assurances).
- (4) In (2) and (3), **relevant capital sums** means -
- (a) for whole life assurances, the sum assured;
 - (b) for *policies* where a sum is payable on maturity (including *policies* where a sum is also payable on earlier death), the sum payable on maturity;
 - (c) for deferred annuities, the capitalised value of the annuity at the vesting date (or the cash option if it is greater);

- (d) for capital redemption contracts, the sums payable at the end of the contract period; and
- (e) for *linked long-term contracts*, notwithstanding (a) to (d), the lesser of -
 - (i) the amount for the time being payable on death, and
 - (ii) the aggregate of the value for the time being of the units allocated to the contract (or, where entitlement is not denoted by means of units, the value for the time being of any other measure of entitlement under the contract equivalent to units) and the total amount of the premiums remaining to be paid during such of the term of the contract as is appropriate for *zillmerising* or, if such premiums are payable beyond the age of seventy-five, until that age,

excluding in all cases any vested reversionary bonus and any capital sums for temporary assurances.

- (5) Where, under the contract relating to any such business as is mentioned in (4), the payment of premiums is to stop before the sum assured becomes due, then, notwithstanding (4), **relevant capital sums** in (1) to (3) means the *mathematical reserves* appropriate for that contract at the end of the premium-paying term.
- (6) For the purposes of this guidance -
 - (a) reserves for vested reversionary bonuses will not be regarded as *mathematical reserves*; and
 - (b) the result given by (1), (2) or (3) will be reduced by the amount of any undepreciated acquisition costs brought into account as an asset.

Implicit items: hidden reserves

- 4.94 *Insurers* may apply for a waiver of rule 2.10 so that the *implicit item* relating to hidden reserves, if it consists of hidden reserves resulting from the underestimation of assets and overestimation of liabilities (other than *mathematical reserves*), may, in so far as the hidden reserves in question are not of an exceptional nature, be given its full value.

5. ADMISSIBILITY LIMITS

General principles

- 5.1 The admissibility rules are contained in rule 4.14 and **Appendix 4.2** and cover STEP THREE referred to in paragraph 2.1 of this Guidance, that of encouraging *insurers*

to maintain a prudent spread of investments. This is achieved in Part II of **Appendix 4.2** by tabulating percentages of defined yardsticks which represent the maximum value for a particular asset or category of assets that may be taken into account for solvency purposes. Rule 4.14(5) sets out the exemptions from the admissibility rules for certain assets and rule 4.14(6) sets out the special considerations that apply to index linked assets. In essence, if an asset falls within one of the exemptions catered for in rule 4.14(5), then it is fully admissible without restriction. Paragraph 5.25 provides a list of such assets.

- 5.2 An *insurer* is not prohibited from holding a greater amount of a particular asset, but it will receive no credit for the excess holding in determining whether it has complied with solvency requirements. While this may not be unduly significant for a *insurer* with a substantial excess of available assets over the *required minimum margin*, an *insurer* with less of a cushion will need to be careful to ensure that undue concentrations in particular assets do not lead to statutory solvency requirements being breached.
- 5.3 **Appendix 4.2** promotes the concept of aggregate *exposure* to particular assets or classes of assets. The limits are graded so that more restrictive treatment is applied to assets which are subject to higher risks and/or have lower security (both in terms of collateral provided and status of the *counterparty*). The rules relating to *counterparty exposure* place restrictions on large *exposures* to any particular *counterparty* or any of its *connected companies*. Both aggregate *exposure* and *counterparty exposure* are discussed more fully below.
- 5.4 The limits relate to amounts determined by calculating the ascribed percentages of the *general business amount* and the *long-term insurance business amount*. An *insurer* carrying on only *general insurance business* will restrict all its assets by reference to the *general business amount* and a *insurer* carrying on only *long-term insurance business* will restrict all its *non-linked assets*, whether shareholder or *policy holder*, by reference to the *long-term insurance business amount*. A composite will restrict its *long-term insurance business assets* by reference to the *long-term insurance business amount* and its other than *long-term insurance business assets* by reference to the *general business amount*.
- 5.5 If an *insurer* only undertakes *long-term insurance business* and has assets which are partly attributable to both the *policy holders* and the shareholders, then any reduction because of admissibility restrictions must be made to the *long-term insurance business assets* in the same proportion as the attribution to the *policy holders* under rule 4.14(4). Similarly, the same principle applies if an *insurer* has more than one *long-term insurance fund* for which assets are separately appropriated and a reduction is required that will affect more than one fund.
- 5.6 The calculations of *general business amount* and *long-term insurance business amount* are discussed in 5.48 to 5.50. The broad principle is that the *general business amount/long-term insurance business amount* approximates to the higher of the net technical liabilities plus a notional solvency margin or net admissible assets.

Calculation of admissible assets

- 5.7 The admissibility rules adopt a menu-style approach. Firstly the assets are required to be valued in accordance with the *Valuation of Assets Rules* and secondly, a series of admissibility adjustments is applied in turn. Rule 4.14(1) provides the framework for the necessary admissibility adjustments and can be summarised as follows.

STEP	GUIDANCE/RULE	AMOUNT
Value the assets in accordance with the <i>Valuation of Assets Rules</i>	Section 4 of this Guidance Note	Gross amount
Deduct excess of the permitted asset exposure	Rule 4.14(1)(a). See paragraph 5.18 - 5.21 of this Guidance Note	(A)
Deduct excess of the permitted <i>counterparty</i> exposure	Rule 4.14(1)(b). See paragraph 5.22 - 5.27 of this Guidance Note	(B)
Deduct excess of the permitted concentration with a number of <i>counterparties</i>	Rule 4.14(4)(1)(c). See paragraph 5.28 - 5.29 of this Guidance Note	(C)
Deduct an amount representing the value of assets transferred by way of an inadmissible <i>derivative contract</i>	Rule 4.14(4)(1)(d)&(e). See paragraph 5.30 of this Guidance Note	(D)
		Admissible amount

For reporting purposes, the difference between the ‘gross amount’ and the ‘admissible amount’ (being the total amount by which the assets exceeded the admissibility limits in **Appendix 4.2**) is separately disclosed in **Form 13** of the *FSA return*.

- 5.8 The adjustments, in the main, are as a result of excess *exposure* to any one particular asset class or any one *counterparty*. The concept of ‘aggregate *exposure*’ has been introduced to take into account the fact that *insurers* can be exposed to movements in the value of assets other than those which it actually held at the relevant date e.g. where it has entered into a *derivative contract* or where it has taken a particular asset as security for a *debt*.
- 5.9 The admissibility rules operate in order that the amounts which are able to be counted toward the solvency margin calculation are restricted if there is too much concentration toward one particular type of asset or one particular *counterparty*.
- 5.10 The approach to admissibility restrictions is first to set out the rules to allow the *insurer* to calculate its *exposure* to assets or *exposure* to *counterparties* and secondly to define what the ‘excess *exposure*’ should be.

Calculation of exposure to assets

- 5.11 The aggregate *exposure* to assets of a particular description is determined by applying the calculation now included in Part I of **Appendix 4.2**. The calculation is laid out in menu style format which applies as follows.

Aggregate exposure to assets are -

- (1) assets held directly; plus or minus
 - (2) assets which the *insurer* is treated as having acquired or disposed of under *futures contracts*; plus or minus
 - (3) assets which the *insurer* is treated as having acquired or disposed of under *options*; plus or minus
 - (4) assets which the *insurer* is treated as having acquired or disposed of under other *derivative contracts* (other than *futures contracts* and *options* already taken into account above); plus
 - (5) assets which have been transferred by the *insurer* by way of an *initial margin* (under a *derivatives contract*); plus
 - (6) assets which have been taken as security for a *debt*.
- 5.12 Item (6) is not referred to in **Appendix 4.2** itself, but nevertheless must be taken into account when calculating the ‘aggregate *exposure*’ when assessing whether a *debt* is ‘*secured*’ (see paragraph 1(b)(ii) of the definition of *secured debt* in rule 10.1). The worked examples in **Annex A** provide additional guidance on how this operates in practice.
- 5.13 Paragraphs 4.36 to 4.52 describe those stock lending and repo transactions which do not have to be taken into account for aggregate *counterparty exposure* calculations.

Futures and options contracts

- 5.14 The underlying principle for *futures contracts* and *options* is that, provided certain conditions are met, for the purposes of aggregate *exposure* calculations the *insurer* is deemed to have already acquired or disposed of the asset as at the relevant date. Part 1 of **Appendix 4.2** sets out these conditions. In brief, (on the assumption that these conditions are met) the treatment is as follows:
- (a) If the contract provides for the acquisition of assets, the *insurer* is deemed to have already acquired them at the *relevant date*.
 - (b) If the contract provides for the disposal of assets, the *insurer* will be deemed to have already disposed of them at the *relevant date* only if -

- (i) the contract is *listed*, or
- (ii) the contract is not *listed* but provides for the disposal of the assets by the *insurer* to an *approved counterparty* within one year of the *relevant date*.

For *options*, if it appears prudent to assume that the *insurer* will exercise the option, the *insurer* will be deemed to have exercised the *option* at the *relevant date*. (Note that ‘prudent to assume’ should be a considerably stiffer test than a simple balance of probabilities). If the *insurer* is deemed to have exercised the *option*, (a) and (b) will apply.

- 5.15 The principles for the treatment of *futures* can be applied to stock lending or repo transactions which are not able to benefit from the look through approach. The guidance on ‘stock lending and repo transactions’ in section 4 refers.
- 5.16 As *derivative contracts* are part of the aggregate *exposure* calculation, it is possible for the admissibility reduction which is required for a particular class of asset will be larger than the value of the assets which are actually held. In such cases, rule 4.14(2) provides that the necessary reduction is first applied to the assets actually held and any ‘unutilised’ part of the reduction will be applied as a deduction against ‘other assets’. For reporting purposes, a separate line is included in **Form 13** of the *FSA return* for such a deduction. Example 2 in 5.47 illustrates this point.
- 5.17 **Guidance Note 4.2** provides additional guidance relating to *derivative contracts* and should be referred to when valuing *derivative contracts* under the *Valuation of Assets Rules*. The adjustments in relation to stock lending and *secured debts* are discussed in section 4.

Excess of the permitted asset exposure

- 5.18 Once the total aggregate *exposure* to an asset type has been calculated, the *insurer* must restrict the amount which can count toward solvency margin calculations. The restriction is any amount over and above the *permitted asset exposure limit*. The *permitted asset exposure limit* is determined by multiplying the *business amount* by the relevant percentage, as found in the table set out in Part II of **Appendix 4.2**. If an asset is not covered by Part II of **Appendix 4.2**, then unless it falls within one of the exemptions rule 4.14(5), its *permitted asset exposure limit* is nil.
- 5.19 The calculation to determine the ‘*excess asset exposure*’ is –

$$(A) = (\text{total exposure to assets of that description}) - (\text{permitted asset exposure limit})$$

If the figure arrived at is negative then it is taken to be zero (i.e. the excess is nil).

- 5.20 It is possible for an asset to interact with more than one admissibility restriction (e.g. the asset could be a preference share issued by an *approved counterparty*, hence paragraphs 11, 12 and 15 of Part II of **Appendix 4.2** interact). In such cases, the lower admissibility limit bites first. The reduction required by the first limit is taken

into account when calculating the excess *exposure* in applying the second limit. In other words, if an asset has already been partly disallowed by virtue of one limit, only the admissible element needs to be considered when applying a second limit. This approach is set out in paragraph 12, Part I of **Appendix 4.2**.

- 5.21 In circumstances where the *insurer* does not hold sufficient assets of that description to eliminate the excess, a deduction is made against 'other assets' as described under 5.16.

Calculation of exposure to a counterparty

- 5.22 *Exposure* to any one *counterparty* (when taken together with its *connected companies*) also falls under the admissibility restrictions.
- 5.23 The rules require the value of all investments in, *debts* due from and rights against a *counterparty* to be aggregated in order to calculate the *counterparty exposure*. The values which are entered into the *counterparty exposure* calculation are the amounts arrived at after taking account of the permitted asset *exposure* rules, thus avoiding 'double counting' of the admissibility limits.
- 5.24 Certain secured obligations, which may include stock lending and repo transactions, are permitted to be excluded from the aggregation calculation, provided certain conditions are met. The conditions, which relate to the nature of the security given, are set out in paragraph 14 of Part I of **Appendix 4.2**.
- 5.25 Not all assets are subject to admissibility restrictions. Rule 4.14(5) lists those assets which are permitted without limit -
- (a) *approved securities* or interest accrued on them (the definition of *approved securities* should be considered),
 - (b) *debts* due under *reinsurance* contracts,
 - (c) *salvage rights*,
 - (d) subrogations *recoverable*,
 - (e) premium *debts*,
 - (f) amounts due from public bodies of any state in Zone A,
 - (g) for *long-term insurance business*, *debts* due, which are secured by a *policy* of insurance,
 - (h) *general insurance deferred acquisition costs*
 - (i) *UCITS*, and
 - (j) *shares* in, or *debts* due from, a *dependant*.

Hence, such assets are left out of the calculation for *counterparty exposure*.

Calculation of permitted counterparty exposure limit

- 5.26 The definition of *permitted counterparty exposure limit*, is set out in paragraph 3 of Part I of **Appendix 4.2**. The table below provides an illustrative guide as to how the definition operates. As a rule of thumb, the lower limit will always bite first, so the higher limit does not apply.

	Permitted counterparty exposure	Explanation
Unincorporated body of persons	5%	Paragraph 3(a) applies
Individual	5%	Paragraph 3(a) applies
Non Zone A public body	5%	Paragraph 3(b) applies
Manufacturing company	5%	Paragraph 3(c)(iii) bites first
<i>Approved counterparty</i>	10%	Paragraph 3(c)(iii) does not apply Paragraph 3(c)(ii) bites
<i>Approved credit institution</i> – excluding deposits	10%	Paragraph 3(c)(iii) does not apply Paragraph 3(c) (ii) bites
<i>Approved credit institution</i> – including deposits	20% or £2 million, whichever is higher	Paragraph 3(c)(iii) does not apply Paragraph 3(c)(ii) does not apply to the deposit element Paragraph 3(c)(i) bites on the aggregate of the deposit coupled with the other assets

Excess of the permitted counterparty exposure

- 5.27 The calculation to determine the excess *counterparty exposure* is -:

(B) = (total *exposure to counterparty*) - (*permitted counterparty exposure*).

If the figure arrived at is negative, it is taken to be zero (i.e. the excess is nil).

Excess concentration with a number of counterparties

- 5.28 The calculation to determine the *excess concentration with a number of counterparties* can be described as -

(C) = (sum of all the *exposures* which exceed 5% of the *business amount*) - (40% of the *business amount*).

If the figure arrived at is negative, it is taken to be zero (i.e. the excess is nil).

- 5.29 Owing to the restrictions of paragraph 3 of Part I of **Appendix 4.2**, it is only *exposures to approved counterparties* which are able to exceed 5% of the *business amount*, but can be no more than 10%. The rules place an aggregate limit of 40% of the *business amount* on those *exposures to approved counterparties* which exceed 5%, but are not greater than 10% of the *business amount*. If the *counterparty exposure* is less than 5% of the *business amount*, then it will not form part of the *excess concentration with a number of counterparties* calculation. i.e. there is no aggregation limit for *counterparty exposures* of 5% or less.

Assets transferred by way of an unapproved derivative contract

- 5.30 Rules 4.14(1)(d) and (e) define the scope for the necessary deduction of such amounts from the value as determined under the *Valuation of Assets Rules*. **Guidance Note 4.2** includes a number of worked examples which illustrate the operation of the admissibility limits when the *insurer* is party to *derivative contracts*.

Operation of the limits

- 5.31 The limits are set out in Part II of **Appendix 4.2**. There are some important points to note.
- (1) Some aggregate limits apply so that in many cases more than one limit may apply - both an individual limit, e.g. an *exposure* to ABC shares, and an aggregate limit e.g. all *unlisted securities* combined.
 - (2) The *debt* limits have been 'graded' so that the higher the limits that apply the greater the security or liquidity of the *debt*. Security in this context refers to the status of the *counterparty* concerned as well as to any physical collateral arrangements in place.
- 5.32 The aggregate limits take two forms: first as a limit on the total permitted in a particular category of assets and second as a limit on *exposure* to a single *counterparty* and any of its *connected companies* from whatever source.
- 5.33 Given the complexity of some of the limits, it is important to consider each paragraph of **Appendix 4.2** in turn. Note that all percentages relate to percentage of the *general insurance business amount* or *long-term insurance business amount*. The admissibility of *debts* is particularly complex and the flowchart in **Annex B** summarises the different limits which apply. In addition some worked examples on the valuation and admissibility of *debts* are given in **Annex A**. Each paragraph operates on a stand alone basis and consequently more than one paragraph may apply in any one instance. If a particular asset falls within the limits of more than one paragraph, all the limits will need to be applied and in practice, therefore, the lower limit will bite first.

- 5.34 An asset must be expressly described within Part II of **Appendix 4.2** otherwise the asset is inadmissible. This does not apply to any of the asset types which are 100% admissible by virtue of their exclusion from **Appendix 4.2** under the provisions of rule 4.14(5).

Paragraph 1 - land, 5%

- 5.35 This restricts any single piece of land to 5%. This restriction also extends to a number of pieces of land or buildings close enough to each other to be considered as one investment. Adjacent sub-leases of parts of the same building would not normally fall to be considered as separate pieces of land. Adjacent pieces of land would normally be considered separately only for the purposes of assessing the impact of the admissibility restrictions where there is a clear and distinct difference in land usage.

Paragraph 2 - individual mortgage debts, 1%

- 5.36 This paragraph relates to *debts* due from individuals which are secured by land or buildings used as that individual's own residence. The individual concerned must not fall within the definition of a 'connected' person in 3.4(5) i.e. must not be a *controller* or *director* of the *company* (or related to a *director*).

Paragraphs 3 to 8 - debts; individual limits, 10% - 0.25%

- 5.37 **Annex B** provides a decision tree which gives further guidance through the various admissibility paragraphs of **Appendix 4.2** which affect *debts*. The table below summarises the position in respect of admissibility for a number of example *debts*.

Type of debt	Admissibility limit for each individual issuer	Aggregate exposure to debt of this type, for all issuers
1. Sovereign or supranational issuer	No limit (rule 4.14(5))	None
2. Fully secured debt due from an approved counterparty	10% (paragraph 8 of Part II of Appendix 4.2)	None
3. Fully secured debt – other	5% (paragraph 7 of Part II of Appendix 4.2)	None
4. Unsecured debt due from an approved counterparty, including regulated institutions which are approved counterparties	10% (paragraph 8 of Part II of Appendix 4.2)	None
5. Unsecured debt due from a regulated institution, which is not an approved counterparty	2.50% (paragraph 6 of Part II of Appendix 4.2)	None

6. <i>Unsecured debt</i> from any one unincorporated body	1% (paragraph 4 of Part II of Appendix 4.2)	5% (paragraph 10 of Part II of Appendix 4.2)
7. <i>Unsecured debt</i> – other	1% (paragraph 5 of Part II of Appendix 4.2)	5% (paragraph 10 of Part II of Appendix 4.2)
8. <i>Debt</i> due from an individual (other than those under paragraph 2 of Part II of Appendix 4.2)	0.25% (paragraph 3 of Part II of Appendix 4.2)	5% (paragraph 10 of Part II of Appendix 4.2)

When looking at whether a *debt* is *secured* or *unsecured*, the definition allows a partially secured *debt* to be split into two elements: a fully secured element and the remainder (which is not covered by the security) to be treated as unsecured. Consequently, the fully secured element will be able to take advantage of the higher admissibility limits which usually apply to *secured debts*. *Debt securities* are excluded from the limits in paragraphs 4-10 of Part II of **Appendix 4**. These are dealt with in paragraphs 14 and 15 of Part II of **Appendix 4.2** which are described below. Reference should also be made to the exclusions in rule 4.14(5) which have the effect of allowing 100% admissibility for those asset types listed within that rule.

Approved counterparty or regulated institution?

The *FSA* is not aware of any *approved counterparties* which do not also fall under the definition of a *regulated institution*. In practice, therefore *unsecured debts* due from *approved counterparties* will generally be exempt from paragraphs 4 to 7, Part II **Appendix 4.2**. Clearly, however, if there are any such bodies which whilst being an *approved counterparty* do not qualify as being a *regulated institution*, then the lower limit will apply. Similarly, if an *approved counterparty* is an individual, then paragraphs 2 and 3 of Part II **Appendix 4.2** would apply first.

Paragraph 10 - unsecured debts; aggregate limit, 5%

- 5.38 This paragraph applies an aggregate 5% limit to *unsecured debts* due from *companies*, individuals or unincorporated bodies of persons. *Debts* due from a *regulated institution* and all *debt securities* are excluded from this aggregate limit.

Paragraph 9 - deposits and debts with approved credit institutions, 20% or £2 million

- 5.39 This paragraph covers all *debts* including monies held in *short term deposit* accounts that are held with any one credit institution and any of its *connected companies*. This is in contrast to paragraph 8 of Part II of **Appendix 4.2** which excludes amounts which are *short term deposits* and applies a 10% limit to all other *debts* (other than *debt securities*) due from any one *approved counterparty*. The definition of *short term deposit* is sufficiently flexible to allow a deposit to pass the ‘no penalties’ test if

it is ascribed a value for solvency purposes which is net of any redemption penalties which are incurred if notice for withdrawal is one month or less.

Paragraph 11 - unlisted (or listed but not readily realisable) investments, unit trusts, 1%

Paragraph 12 - aggregate limit, 10%

5.40 Paragraph 11 applies a limit of 1% to investments in any one body made up of the asset types described in paragraph 11 and 11(a).

Paragraph 11, which excludes *secured debt securities*, applies the limit of 1% exposure to any one body of investments which fall within the valuation rules set out in rule 4.8 other than *listed* and *readily realisable* investments, which are excluded from this paragraph. In other words, paragraph 11 covers -

- (a) *shares* in the *insurer* and any of its *connected companies* (other than *shares* in an open ended investment company);
- (b) *unsecured debt securities*; and
- (c) beneficial interests in a limited partnership.

Paragraph 11(a) places a 1% limit on units in a *collective investment scheme* (which fall under the valuation rule described in rule 4.9) which are managed by that *insurer* and any of its *connected companies*. Such *collective investment schemes* are those where the scheme only includes assets which can be ascribed a value under the *Valuation of Assets Rules* and does not employ unapproved *derivatives contracts*.

Paragraph 11(b) is required in order to extend the limits in paragraphs 11 and 11(a) to *connected companies* of the body.

Paragraph 12 applies an overall aggregate limit of 10% to total investments of types described in paragraph 11.

Paragraph 13 - shares and hybrid securities, 2.5%

5.41 The table below summarises the position.

Type of Hybrid	Admissibility limit for each individual issuer (and any of its connected companies)	Aggregate exposure to hybrid securities of this type, for all issuers
<i>Listed preference shares</i>	2.5% (paragraph 13 of Part II of Appendix 4.2)	None
<i>Unlisted or listed but not readily realisable preference shares</i>	1% (paragraph 11 of Part II of Appendix 4.2)	10% (paragraph 12 of Part II of Appendix 4.2)

<i>Listed hybrid securities (other) (including subordinated debt)</i>	2.5% (paragraph 13 of Part II of Appendix 4.2)	None
<i>Unlisted or listed but not readily realisable, hybrid securities (other) (including subordinated debt)</i>	1% (paragraph 11 of Part II of Appendix 4.2)	10% (paragraph 12 of Part II of Appendix 4.2)

Paragraph 14 - all securities - other, 5%

- 5.42 Paragraphs 14 and 15 are applicable to all *securities* including *debt securities*. Paragraph 14 applies the aggregate limit for all *securities* (whether equity, preference *shares* or *debt securities*) in any one *insurer* or any of its *connected companies*. Investments in *approved counterparties* are excluded and are caught instead by paragraph 15 of Part II of **Appendix 4.2**.

Paragraph 15 - all securities issued by any one counterparty, 10%

- 5.43 Paragraph 15 applies to *approved counterparties (issuers* which are not approved counterparties are caught by paragraph 14 of Part II of **Appendix 4.2** first). The rule applies an aggregate limit for all security types (whether equity, preference *shares* or *debt securities*) issued by any one *counterparty*. Total *exposure* by way of *securities* to any one *approved counterparty* is limited to 10%.

The table below summarises the position.

	Type of bond	Admissibility limit for each individual issuer	Aggregate exposure to bonds of this type, for all issuers
1	Sovereign or supranational <i>issuer</i>	No limit (rule 4.14(5))	None
2	Fully secured bonds issued by an <i>approved counterparty</i> (either <i>listed</i> or <i>unlisted</i>)	10% (paragraph 15 of Part II of Appendix 4.2)	None
3	Fully secured bonds – other (either <i>listed</i> or <i>unlisted</i>)	5% (paragraph 14 of Part II of Appendix 4.2)	None
4	Unsecured <i>listed</i> bonds issued by an <i>approved counterparty</i>	10% (paragraph 15 of Part II of Appendix 4.2)	None
5	Unsecured <i>listed</i> bonds (other)	5% (paragraph 14 of Part II of Appendix 4.2)	None

6	Unsecured <i>unlisted</i> (or <i>listed</i> but not <i>readily realisable</i>) bonds	1% (paragraph 11 of Part II of Appendix 4.2)	10% (paragraph 12 of Part II of Appendix 4.2)
---	---	--	---

Paragraph 16 - unit trusts, 5%

- 5.44 This paragraph limits holdings in any single authorised unit trust scheme or recognised scheme to 5%. *Collective investment schemes* recognised under the *UCITS Directive* are allowed 100% admissibility by virtue of rule 4.14(5).

Paragraph 17- cash 3%

- 5.45 This limit relates to pure cash in hand i.e. money held at a bank is not subject to this 3% limit.

Paragraphs 18 and 19 - equipment, 2.5% - 5%

- 5.46 These paragraphs set limits of 5% for computer equipment and 2.5% for other office equipment.

Aggregate exposure - illustrative examples

- 5.47 This paragraph contains three examples of the treatment of aggregate *exposures*.

Example 1

Insurer 1 holds £500 of equity *shares* in ABC, a *listed company* which is not an *approved counterparty*, has £750 of *listed debentures* in that *company*; has £200 of equity *shares* which it has 'transferred' under a stock lending agreement; and has entered into a *futures contract* to sell 500 *shares* in ABC in three months time at a price of £1 (the current price of the equity being 75p). The *general insurance business amount* of the *insurer* is £10,000. The *insurer's* aggregate *exposure* to ABC is as follows.

Description	Equities £	Debts £	Exposure to ABC £	Reason
actual holding of equity	500			
holding lent under stock loan	200			
<i>shares</i> due to be sold 500 @ 75p	(375)			Note 1
total <i>exposure</i> : ABC equity <i>shares</i>	325		325	
<i>listed debentures</i>		750	750	

Admissibility restrictions

Paragraph 13, 2.5% <i>general insurance business amount</i> for <i>shares</i>	(75)		(75)	
---	------	--	------	--

Paragraph 14, 5% <i>general insurance business amount</i> for <i>debt securities</i>	(250)	(250)	
Paragraph 14, 5% <i>general insurance business amount</i> for all <i>securities</i> in any one <i>counterparty</i>	(250)	(250)	Note 2
Admissible elements	<u>---</u> <u>250</u>	<u>---</u> <u>250</u>	<u>---</u> <u>500</u>

Note 1

In determining the aggregate *exposure*, *exposure* to numbers of *shares* under *derivative contracts* is converted to a monetary amount by reference to the current *market value* of those *shares*. The actual monetary value of the *derivative contract* itself is not relevant for these purposes as in many cases it will be negligible compared to quantum by which it alters the *insurer's* economic exposure to certain assets.

Note 2

This deduction can be made against the equities or the debentures - it would make no difference to the overall level of the admissible elements. In this example, the deduction is against the debentures.

Example 2

Insurer 2 holds £200 of *listed equity shares* in DEF and has entered into a *futures contract* to buy 800 *shares* in DEF in two months time at a price of 50p. The current *share price* is 60p. The *insurer's general insurance business amount* is £10,000. The *insurer's aggregate exposure* to DEF is as follows.

	£	Reason
Actual holding	200	
<i>shares</i> due to be bought 800 @ 60p	<u>480</u>	Note 1
Total <i>exposure</i> DEF <i>equity shares</i>	680	
Admissibility restrictions		
Paragraph 13, 2.5% <i>general insurance business amount</i> for <i>shares</i>	<u>(430)</u>	Note 2
Admissible elements	<u>250</u>	

Note 1

As with Example 1, in determining the aggregate *exposure*, *exposure* to numbers of *shares* under *derivative contracts* is converted to a monetary amount by reference to the current *market value* of those *shares*.

Note 2

In this case the inadmissible element is greater than the value of the *shares* actually held. Rule 4.14(2)(b) therefore applies. This requires that the equity asset admissibility is written down to nil, but the remaining restriction (£230) should be deducted from the aggregate value of the other assets. It is not necessary to try and allocate this further deduction against any one particular class of asset and

therefore an additional line in Form 13 ('deduction for inadmissible items') has been introduced specifically for disclosure of such items.

Example 3

Insurer 3 has *unsecured debts* due from the following corporate bodies, none of which is a *regulated institution*.

X - £250, Y - £150, Z - £200.

It also has *unsecured debts* due from 25 different individuals of £50 each. The *general insurance business amount* of the *insurer* is £10,000. The maximum *exposure* for these *debts* is as follows.

	£	Reason
<i>debt</i> from X	250	
<i>debt</i> from Y	150	
<i>debt</i> from Z	200	
<i>debts</i> from individuals	<u>1,250</u>	25 @ £50 each
Total of <i>unsecured debts</i>	1,850	

Admissibility restrictions

Paragraph 5, 1% <i>general insurance business amount</i> for X <i>debt</i>	(150)	
Paragraph 5, 1% <i>general insurance business amount</i> for Y <i>debt</i>	(50)	
Paragraph 5, 1% <i>general insurance business amount</i> for Z <i>debt</i>	(100)	
Paragraph 3, 0.25% <i>general insurance business amount</i> for <i>debts</i> from individuals	(625)	25 @ £25 each
Sub-total	925	
Paragraph 6, 5% <i>general business amount</i> for the aggregate of all <i>unsecured debts</i>	(425)	
Admissible elements	<u>500</u>	

Calculation of the general insurance business amount/long-term insurance business amount

- 5.48 The bases for calculating the general insurance and long-term insurance business and units are given in the definitions in rule 11.1.

An *insurer* which prepares a UK branch *return* may base the amounts for the UK branch *return* on its global figures (since the definitions of *general insurance business amount/long-term insurance business amount* refer to liabilities 'of the *insurer*').

General insurance business amount

5.49 The *general insurance business amount* is calculated as the higher of:

EITHER:

1. The *insurer's* technical liabilities (i.e. amounts calculated in accordance with the rules in respect of items C and D of the shareholder accounts, net of *reinsurance*),

PLUS

2. the greater of -
 - 400,000 Euros, and
 - 20% of the *general premium income*.

General premium income for the purposes of the *general insurance business amount* represents, in effect, written accounted premiums gross of commission but net of *reinsurance*.

OR:

A higher amount not exceeding the net admissible assets determined in accordance with the *valuation of assets rules*.

Long-term business amount

5.50 The *long-term insurance business amount* is calculated as the higher of:

EITHER:

1. The *insurer's* technical liabilities (i.e. amounts calculated in accordance with the rules in respect of items C and D of the shareholder accounts, net of *reinsurance*)¹,

PLUS

2. the amount of any deposit back under a contract of long-term *reinsurance*,

¹ when calculating the *permitted asset exposure limit*, exclude linked liabilities and when calculating the *permitted counterparty exposure limits* or the *excess concentration with a number of counterparties*, exclude *property linked liabilities*.

PLUS

3. the *margin of solvency* (or *minimum guarantee fund* if greater) which the *insurer* –
 - (a) if its head office is in the United Kingdom, is required to maintain, or
 - (b) if its head office is elsewhere would be required to maintain if its head office were in the United Kingdom,

MINUS

4. any *implicit item* valued in accordance with a waiver under section 148 of the Act (see paragraphs 4.92).

OR:

A higher amount not exceeding the net admissible assets determined in accordance with the *Valuation of assets rules*.

Annex A

RULES FOR VALUATION OF DEBTS

The valuation and admissibility of *debts* under the *Valuation of Assets Rules* are addressed in sections 4 and 5. This annex illustrates the basic rules with a few worked examples. For simplicity all examples below use the GBA as the yardstick by which to compare the admissibility limit but the examples could apply equally where the LTBA is to be used. In addition, all examples assume that the *approved counterparties* are also *regulated institutions*.

Example 1 Operation of overall counterparty exposure limits

Facts

An *insurer* has an *unsecured debt* of £450m due from Y which is an *approved credit institution*. The *insurer* also has *short term deposits* with Y of £1,200m, *listed equity shares* in Y of £475m and rights under *derivative contracts* due from Y of £400m. The *insurer's* GBA is £10,000m and there are no other assets except Government bonds (which are not subject to any **Appendix 4.2** limits).

Application of the rules

The first stage is to identify and apply the individual admissibility limits which impact each separate asset and then to look to the aggregate limits for that class of asset. In this example, the relevant limits are:

Unsecured debt

Following the steps set out in the flowchart in Annex B, this is not a *listed* debenture but is an *unsecured debt* due from an *approved counterparty*. Hence, as seen from the table in paragraph 5.26 of this Guidance, the individual limit is 10% of GBA (**Appendix 4.2** Pt II, para 8).

Deposits – **Appendix 4.2** Pt II Para 9, 20% of GBA (subject to minimum £2 million)

Listed equity shares – **Appendix 4.2** Pt II Para 13, 2.5% of GBA

Rights under derivative contracts – No specific limit within **Appendix 4.2** Pt II, but are for inclusion within the aggregate *counterparty exposure* calculation in **Appendix 4.2** Pt II.

In tabular format, the admissibility limits can be described as follows.

	£m
<i>Unsecured debt</i> from Y	450
<i>Listed shares</i> in Y *	475
Rights under <i>derivative contracts</i> due from Y	<u>400</u>
	1,325
Admissibility restrictions (individual)	
Para 13, 2.5% (two and a half) GBA for <i>shares</i>	(225)
Total <i>counterparty exposure</i> to Y excluding deposits	1,100
Admissibility restrictions (counterparty)	
Appendix 4.2 , Pt I, Para 3(c)(ii)	<u>(100)</u> Note 1
	1,000
Deposits with Y	1,200
<i>Counterparty exposure</i> to Y, including deposits	2,200
Admissibility restrictions (counterparty)	
Appendix 4.2 , Pt I, Para 3(c)(i)	(200) Note 1
Admissible assets	<u>2,000</u>

Note 1

Although there is an individual limit of 20% GBA for deposits, when coupled with the other assets the *counterparty exposure* to Y reaches 2,200. It is necessary therefore to look to **Appendix 4.2** Para I, and paras 3(c)(i), (ii) and (iii).

- Sub-para 3(c)(iii) is excluded because the *exposure* is to an *approved counterparty*.
- Sub-para 3(c)(ii) applies *exposure* to all asset types, but excluding deposits with *approved credit institutions*. The allowed *exposure* under sub-para 3(c)(ii) is 10%. The deposits are caught under sub-para 4(c)(i).
- Sub-para 3(c)(i) applies to *exposure* from all sources (including, therefore, the deposits) to any *body corporate* or group and allows maximum *exposure* of 20% GBA.

Consequently, the permitted *exposure* to Y is 20% GBA made up in this example of 10% deposits and 10% all other assets.

Example 2 Unsecured debts

Facts

An *insurer* has a *general insurance business amount* of £10,000 and the following *unsecured debts*:

£250 due from A which is a chemical company;
£150 due from B which is a retail company;
£300 due from C which is a UK authorised insurance company;
£1,275 due from D which is an *approved counterparty*;
£280 due from E which is due from a manufacturing company.

Application of the rules

The first stage (STEP ONE- para 2.1 of this Guidance) is to categorise the *debts* under the definitions in the rules. The flow chart in Annex B provides additional help. The *debts* are therefore categorised as follows:

A, B, E *unsecured, unlisted debts* from *companies* which are not *regulated institutions* or *approved counterparties*.

C *unsecured, unlisted debt* from a *regulated institution* which is not an *approved counterparty*

D *unsecured, unlisted debt* from an *approved counterparty*

Section 5 of this Guidance assists in identifying the relevant admissibility limits. In tabular form, the result can be described as follows:

	£
<i>Debt</i> from A	250
<i>Debt</i> from B	150
<i>Debt</i> from C	300
<i>Debt</i> from D	1,275
<i>Debt</i> from E	<u>280</u>
	2,255

Admissibility restrictions (individual)

Para 5, 1% GBA – A	(150)
Para 5, 1% GBA - B	(50)
Para 6, 2.5% GBA – C	(50)
Para 8, 10% GBA - D	(275)
Para 5, 1% GBA - E	<u>(180)</u>
	1,550

The aggregate limit which applies to all *unsecured debts* (other than *debts* due from a *regulated institution* or *approved counterparty*) is 5% GBA (**Appendix 4.2**, Pt II, Para 7) but it does not bite in this example.

Example 3 - secured debts (secured by assets)

Facts

An *insurer* has a *debt* due from ABC plc (a chemical company) of £550 which is fully secured by land. There are no other charges on the land concerned and the *insurer* itself also owns £200 of the same piece of land. The *insurer* also has *listed debentures* in ABC plc of £450 and *listed shares* of £325. The *insurer* does not have any other 'large counterparties' and its GBA is £10,000.

Application of the rules

STEP ONE, determine what definition applies, i.e. does the *debt* fall within the definition of *secured debt* in rule 10.1:

rule at 10.1	Not a <i>secured debt</i>
para (1)(b)(i) of the definition	condition satisfied, since land security is of a value which is sufficient to discharge the <i>debt</i> in full
para (1)(b)(ii) of the definition	aggregate <i>exposure</i> to this piece of land is £750. This exceeds the permitted limit of £500 (5% GBA) for any one piece of land. Hence, £250 of the land offered for security cannot count as 'security' for the purposes of the <i>Valuation of Assets Rules</i> since it would breach the permitted <i>exposure</i> limit.

The *debt* from ABC plc can be split into two elements, being £300 secured, £250 unsecured.

In tabular form, the admissibility can be described as follows:

	£	
<i>Unsecured</i> element of the <i>debt</i>	250	
<i>Secured</i> element of the <i>debt</i>	300	
Listed shares in ABC	325	
Listed debentures in ABC	<u>450</u>	
	1,325	
Admissibility restrictions (assets)		
Para 5, 1% GBA, <i>unsecured debts</i>	(150)	
Para 7, 5% GBA for all <i>debts</i>	(-) Note 1	
Para 13, 2.5% GBA for <i>shares</i>	(75)	
Para 14, 5% GBA for debentures and <i>shares</i> combined	(200) Note 2	
	<u>900</u>	
Admissibility restrictions (counterparty)	<u>(400)</u>	Note 3
Admissible amount	500	

NOTE 1

Although total *debts* are £550, the *unsecured* element has already been restricted by £150. This leaves £400 of the *debt* to be considered under **Appendix 4.2**, Pt II, para 7 and hence there is no further restriction since £400 < 5% GBA.

NOTE 2

Similarly, although the 'gross' value of the *shares* and debentures combined is £775, the *shares* have already been restricted by £75. Hence, this leaves a potential admissible combined amount of £700 to be considered under paragraph 14. The 5% GBA maximum of para 14 equates to £500 and so a further restriction of £200 is necessary.

NOTE 3

An *insurer* which is not an *approved counterparty* is not permitted to raise the admissible *exposure* to a *counterparty* from 5% (**Appendix 4.2** Pt I Para 3(c)(iii)) to 10%. See paragraph 5.28 of this Guidance.

In this example, therefore, since ABC plc is not an *approved counterparty* the admissibility limit is 5% GBA, i.e. £500 - hence a further restriction of £400 is required.

What if ABC plc was an *approved counterparty* instead?

If, in the example above, ABC plc is an *approved counterparty*, then the *permitted counterparty exposure limit* to such a *counterparty* would be 10%. Such large *exposures* to *approved counterparties* are caught by the aggregate limit of 40% of the *business amount*.

In this example, we have assumed there are no other large *counterparties* and hence the aggregate restrictions of **Appendix 4.2** Pt I, para 17 would not apply.

The admissibility limit for *approved counterparties* is 10% GBA, i.e. £1,000 - hence the exposure of £900m would not require any further restriction.

Example 4 - secured debts (secured by bank guarantee)

Facts

The same as example 3 above, but instead of the ABC plc debt being secured by land, it is secured by a guarantee from Bank Z. The *insurer* also has *exposure* to Bank Z in the form of deposits of £900m, *listed shares* in Z £350 and *debts* due from Z of £400m. The *insurer* has no other large *counterparties* apart from Z and ABC plc.

Application of the rules

Exposure to ABC plc

In this example, the *debt* will be fully secured since it falls within para (1)(a)(ii) of the definition of *secured debt*.

In tabular form, the *exposure* to ABC plc can be seen as:

	£ m	
<i>Secured debt</i> from ABC	550	
<i>Listed shares</i> in ABC	325	
<i>Listed debentures</i> in ABC	<u>450</u>	
Total <i>exposure</i> to ABC	1325	
Admissibility restrictions (assets)		
Para 7, 5% GBA for all <i>debts</i>	(50)	
Para 13, 2.5% GBA for <i>shares</i>	(75)	As in 3 above
Para 14, 5% GBA for debentures and <i>shares</i> combined	<u>(200)</u>	As in 3 above
	1,000	
Admissibility restrictions (<i>counterparty</i>)	(500)	
Admissible element of <i>exposure</i> to ABC	<u>500</u>	

ABC is not an *approved counterparty* and the *counterparty exposure limit* is therefore 5% of the *business amount*. Hence a restriction of £500m applies.

Exposure to Bank Z

In addition the *insurer* also has *exposure* to the bank Z as follows:

	£ m	
<i>Debts</i> due from Z	400	
<i>Listed shares</i> in Z	<u>350</u>	
	750	
Admissibility restrictions (assets)		
Para 13, 2.5% GBA for <i>shares</i>	<u>(100)</u>	
sub-total of <i>admissible assets</i>	650	
Guarantee supporting the <i>debt</i> from ABC	<u>550</u>	
Total <i>counterparty exposure</i> to Z excluding deposits admissibility restrictions (<i>counterparty</i>)	1,200 (200)	Note 1
Deposits with Z	<u>900</u>	
Total <i>counterparty exposure</i> to Z including deposits	1,900	Note 2

Note 1

Appendix 4.2, Pt I, para 3(c)(ii) applies *exposure* limits to all asset types, but excluding deposits with *approved credit institutions*. The allowed *exposure* under para 3(c)(ii) is 10% GBA (since the bank is an *approved counterparty*) and therefore a restriction to non-deposit *exposures* of £200m is required.

Note 2

With deposits, the admissible *exposure* to an *approved credit institution* can be 20% of the *business amount* **Appendix 4.2**, Pt I, para 9. In this example, this equates to £2,000m and so no further restriction is required.

Example 5 - stock lending and secured debts

Facts

An *insurer* engages in stock lending activities with *counterparty* X using a variety of collateral arrangements. The *insurer* also has the following investments:

debts due from Bank Y of £400, *listed shares* of £100 in Bank Y; *listed shares* in PQR plc of £125.

Counterparty X falls within the definition of an *approved investment firm*.
The GBA is £10,000.

There are five different stock lending arrangements. In cases where the *insurer* has lent stock, for the purposes of rule 4.4(4)(b)(ii) the collateral provided for all of the *insurer's* stock lending arrangements can be taken together when assessing whether each individual item of collateral breaks the '15%' test outlined in rule 4.4(b)(ii). If the collateral fails the '15%' test then the *insurer* looks to rule 4.4(4)(b)(i) to see whether the collateral, when aggregated to the *insurer's* existing *exposures*, would cause a breach in the admissibility limits.

In this example, unless stated otherwise, it is assumed that each piece of collateral satisfies the conditions of rule 4.4(4)(b)(i).

- (a) £250 of mixed equities (with no single large holding) are lent to Broker X. Broker X supplies cash collateral equal in value to the *shares* 'lent'.

Rule 4.4(2) is satisfied since the collateral equals the value of the stock 'lent'. Rule 4.4(4)(a) is satisfied since the collateral is cash; rule 4.4(4)(b)(i) is satisfied, since it is assumed that the cash received would not cause the *insurer* to breach its *exposure* to cash or to deposits with *approved credit institutions*. Hence, rule 4.4(1) dictates that there is no need to include the collateral in the aggregate *exposure* calculations - i.e. the 'look through' approach can be applied. The mixed equities 'lent' should be treated as though they were still retained by the *insurer*.

- (b) £150 of gilts are lent to X and secured by a 'pool' of gilts under a DBV (delivery by value) arrangement whereby the value of the pool is topped up daily to reflect price movement and the value of the collateral exceeds the value of the stock lent by a small margin to cater for intra day movements.

Rule 4.4(2) is satisfied since the collateral equals the value of the stock 'lent'. Rule 4.4(4)(b)(ii) is satisfied since the collateral is mixed (with no single large holding) and is in the form of *approved securities* (sub-para (4)(a)). Rule 4.4(1) dictates that the 'look through approach' is taken.

- (c) £175 of mixed equities are lent to X for a letter of credit.

Rule 4.4(2) is satisfied since the collateral equals the value of the stock 'lent'. Rule 4.4(4)(a) may apply (depending on whether the letter of credit is established with an *approved credit institution*); rule 4.4(4)(b)(i) is assumed to be satisfied (the *insurer* needs to aggregate the collateral with its own holding to see if any of the collateral breaches any permitted *exposure* limits). Hence, the 'look through' approach can be applied.

- (d) £150 of debentures are lent to X for a bank guarantee from Bank Y.

Rule 4.4(2)(a) is satisfied since the collateral equals the value of the stock 'lent'. Rule 4.4(4)(a) is satisfied; rule 4.4(4)(b)(i) is assumed to be satisfied (the *insurer* needs to aggregate the collateral with its own holding to see if any of the collateral breaches any permitted *exposure* limits). Hence, the 'look through' approach can be applied.

(e) £100 of mixed equities are lent to X for collateral of *listed shares* in PQR plc.

Rule 4.4(2) is satisfied since the collateral equals the value of the stock 'lent'. Rule 4.4(4)(a) is satisfied. Rule 4.4(4)(b)(i) is satisfied, since the collateral of £100 if added to the *insurer's* own holding of £125 does not cause a breach in the allowed limit of 2.5% GBA (£2507). Hence, the 'look through' approach can be applied.

Aggregation of collateral with the *insurer's* own holdings

Counterparty X

For the conditions in rule 4.4(4)(b)(i) to be satisfied, the *insurer* must not be *exposed to counterparty X* in excess of the *permitted counterparty exposure*. In this example, the *exposure to X* can be seen as:

	£
Stock lent:	
(a)	250
(b)	150
(c)	175
(d)	150
(e)	<u>100</u>
Total <i>counterparty exposure to X</i>	825

If the *counterparty exposure* had exceeded 10% GBA (i.e. £1,000), the *insurer* would be required to treat those transactions which cause the excess to occur, under first principles (i.e. as though the arrangements were a series of *futures contracts*). This would, of course, involve a significant number of additional calculations because of the need to apply other asset valuation and admissibility limit rules.

Bank Y

Similarly, the *exposure to Bank Y* will need to be calculated to see whether any of the collateral fails the conditions of rule 4.4(4)(b)(i). The *exposure to Y* can be seen as:

£	
<i>Debts due from Y directly</i>	400
Guarantee given as security for stock loan with Broker X	150
<i>Listed shares in Y directly</i>	<u>100</u>
Total <i>counterparty exposure to Y</i>	650

In this example, the *exposure to Bank Y* is within the 10% GBA limit and hence the collateral (i.e. the guarantee) satisfies rule 4.4(4)(b)(i).

ADMISSIBILITY OF DEBTS, OTHER THAN DEBT SECURITIES

Counterparty Description

		<p>— Paragraphs 3 and 10 apply 0.25% individual, 5% aggregate</p>
		<p>— Paragraphs 4, 10 and 7 apply 1% individual, 5% aggregate for unsecured 5% individual for all debts (secured and unsecured taken together)</p>
		<p>— Paragraphs 5, 10 and 7 apply 1% individual, 5% aggregate for unsecured 5% individual for all debts (secured and unsecured taken together)</p>
		<p>— Paragraphs 6 and 7 apply 1% individual, 5% aggregate for unsecured 5% individual for all debts (secured and unsecured taken together)</p>
		<p>— Paragraphs 8 applies 5% individual for all debts (secured and unsecured taken together)</p>

[Annex C deleted]

What is a regulated market for the purposes of the definition of listed in the Valuation of Assets Rules?

1. The definition of *regulated market* is broadly based on the definition in the *Third Life and Third Non-Life Directives* which in turn draws on the definition used in the *Investment Services Directive* (ISD). It may be necessary in cases of doubt to refer directly to the ISD. The definition of *regulated market* feeds into the definition of *listed* as explained in section 3 of this Guidance.
2. There is no official list of *regulated markets*. Instead the *directors* (and auditors) must be satisfied that the criteria set out in the definition have been met.

Definition

3. The key characteristics of a *regulated market*:
 - (a) regular operation;
 - (b) regulations have been issued or approved by the appropriate authority of the state where the market is situated which:
 - (i) define the conditions of operation and access to the market,
 - (ii) define the conditions to be satisfied for an investment to be effectively dealt in on the market, and
 - (iii) require compliance with reporting and transparency requirements comparable to those laid down in articles 20 and 21 of the ISD;
 - (c) for markets situated outside the *EEA*, the investment dealt in on the market should be of a quality comparable to those in a *regulated market* in the UK.
4. In particular, the following areas are considered to be important.

Liquidity

5. The *directors* should have regard to the overall liquidity of the market or exchange; whether *securities* and/or derivatives can be bought and sold in a reasonable time, at best execution and in adequate amounts; and the procedures and restrictions (if any) on the repatriations of funds to the UK.

Regulated

6. The market or exchange must be subject to supervision by an authority which should be a statutory body, an agency of a national or state Government, a department of such Government, or another body designated for the purpose by one of these. Additionally, *directors* will need to take into account:

- (a) the degree to which members of the market/exchange and the supervising body, and in particular whether that supervision includes capital adequacy requirements;
- (b) the powers of the market/exchange and the supervision body to intervene in members' business in the event of misconduct, financial difficulties or otherwise, including the power to reject applicants terminate membership and de-list a security;
- (c) the initial listing standards and ongoing supervision of securities trade on the markets/exchange including the publications of prospectuses and audited financial statements;
- (d) requirements concerning the issue of contract notes (or their equivalents);
- (e) whether the clearance and settlement arrangements normally used for transactions on the market/exchange are prompt and secure;
- (f) the risk of loss in the event of insolvency of a member of the market/exchange;
- (g) how the market/exchange investigates and deals with complaints.

Reporting and transparency requirements

Directors will need to consider:

- (a) the everyday availability of current information about securities, derivatives, quotations, transactions, prices and spreads;
- (b) whether there is a requirement for trade reporting to the market/exchange or other supervisory body of the *securities/derivatives* which the *insurer* intends to buy.

Recognised

7. The market/exchange must be recognised or registered as a market/exchange and/or self regulatory organisation by an authority which should be a statutory body, or an agency of a national or state Government, a department of such Government or another body designated for the purpose by one of these.

Operating regularly

8. The market/exchange must have regular trading hours during which the investments listed or admitted to dealing on that market may be dealt in. Additionally *directors* will need to take into account:

- (a) the availability and timing of price and volume information and the way it is distributed; and
- (b) in respect of *securities*, the degree to which and the speed at which companies listed on the market/exchange must release price sensitive information, and the medium through which that information is distributed.

Open to the public

9. Investments listed or admitted to dealing on the market exchange must be freely available for trading by the public directly, or through members of the market/exchange, during normal trading hours. Additionally, *directors* will need to take into account the extent to which overseas investors are permitted to hold *securities* listed on the market/exchange.
-

USE OF DERIVATIVE CONTRACTS IN INSURANCE FUNDS

1. **Introduction**

1.1 This Guidance discusses valuation issues surrounding the use of *derivative contracts* in those funds of an *insurer* which are subject to the *Valuation of Assets Rules*. It is therefore relevant to the statutory solvency valuation of all the ‘other than long-term insurance business’ funds of a general business or composite insurer and of the long-term non-linked and index-linked funds of a long-term or composite insurer. Many of the same principles are relevant to the use of derivatives in property-linked funds, which is also covered in this Guidance. It is not relevant to valuation for the purposes of published accounts.

1.2 In accordance with the traditional UK approach, there is no restriction (except in linked funds) on the *derivative contracts* which *insurers* may transact (subject to over-riding conditions such as the need for *insurers* to be managed in accordance with the *FSA*’s principles for business (where most of the criteria of sound and prudent management now rest). However, the *Valuation of Assets Rules* do set out:

- (a) rules to be satisfied before a derivative which is an asset to the *insurer* may be given an admissible value;
- (b) the valuation rule in the event that the conditions at (a) are satisfied;
- (c) the rule for the determination of the liability under any *derivative contract* which, at the moment, is a liability to the *insurer*;
- (d) rules for determining the effect of derivative contracts on the admissibility of holdings in the underlying assets;
- (e) a rule requiring recognition of a contingent liability in any case where a derivative contract is not strictly covered by the underlying assets.

1.3 Rules of the nature of (a), (b) and (c) above are familiar from the *Valuation of Assets Rules* for other kinds of transaction. Item (d) is needed because the policy is to restrict the admissibility of economic exposure to specific assets. Depending on the nature of the contract, derivatives can increase, decrease or cancel the economic exposure of *insurers* to the underlying assets.

1.4 Item (e) is needed because some derivatives can change rapidly from being an asset to being a liability; moreover, in some cases the liability can be theoretically unlimited. If an *insurer* uses such derivatives without proper cover, it could rapidly use up not only its free assets but also eat into its

required minimum margin of solvency. For prudential reasons, therefore, it is necessary for the company to recognise an appropriate contingent liability in respect of contracts which are not properly covered, even in cases where they are currently an asset to the insurer. Rule 5.3 establishes this obligation (the 'provision for adverse changes').

What kind of derivatives?

- 1.5 Rule 4.12 refers to *options, futures contracts and contracts for differences*. *FSA's* view is that these terms cover all current basic types of derivative instrument. For example, swaps fall under *contracts for differences*; *warrants* fall under the extended definition for insurance purposes of *options*.
- 1.6 Rule 4.1 provides that forward currency contracts are not to be treated as derivatives, where they are for the purpose of settling the sale or purchase of an asset and are to be effected within a short period defined in that regulation.
- 1.7 The rules described below are relevant also to instruments which take some other legal form but which have characteristics of derivatives. The issues are discussed in Section 10.

The status of the guidance

- 1.8 This guidance, in particular the examples throughout this Guidance, is intended to illustrate the *FSA's* view of how the above conditions are to be interpreted in practice. (The *FSA* view is not of course definitive; that would be available only from the courts.) Many of the examples address the conditions set out in paragraph 2.1 (or 2.3) below. However, they tend to deal with only one or two of those conditions without reference to whether the other conditions are satisfied.
- 1.9 None of the examples carries the *FSA's* 'seal of approval'. Whether or not they are sensible courses of action depends heavily on the circumstances of the *insurer*. Moreover, there may be other equally acceptable - or even preferable - ways of achieving the same objective.
- 1.10 Finally, although several of the examples illustrate traps for the unwary, it is inevitable that there are other traps which have not been illustrated in this Guidance. There can be no substitute for testing any proposed course of action against the 'first principles' set out in paragraphs 2.1 or 2.3 below.

2. Conditions governing admissibility; conditions governing use of derivatives in linked funds

Admissibility of derivatives which are assets of the insurer

2.1 Derivative instruments which, at the time of the valuation, are an asset to the *insurer* may be given an admissible value only if they satisfy the seven conditions set out below:

- (a) are for the purposes of reduction of investment risks or efficient portfolio management – rule 4.12(2);
- (b) satisfy the ‘in connection with’ test – rule 4.12(2) and (3);
- (c) are covered – rule 4.12(2) and (4);
- (d) are listed on a *regulated market* or transacted with an *approved counterparty* - rule 4.12(6)(a);
- (e) are capable of being readily closed out – rule 4.12(6)(b);
- (f) are based on underlying assets which are themselves admissible, an index of such assets or an official index of retail prices – rule 4.12(7) and (8);
- (g) have a prescribed pricing basis – rule 4.12(8).

2.2 Failure to satisfy any one of these conditions means that the contract has no admissible value. On the other hand, where a *derivative contract* is currently a liability to the *insurer*, that liability must be recognised whether or not the above conditions are satisfied.

Linked funds

2.3 Use of derivatives in linked funds (whether currently an asset or a liability to the *insurer*) is permitted only if all the conditions below are satisfied. These are very similar to those summarised in paragraph 2.1, the only significant difference being at condition (f). The derivatives:

- (a) should be for the purposes of reduction of investment risks or efficient portfolio management
- (b) should satisfy the ‘in connection with’ test
- (c) should be covered
- (d) are listed on a *regulated market* or transacted with an *approved counterparty*
- (e) are capable of being readily closed out
- (f) are based on underlying assets which are themselves permitted links, an index of such assets or an official index of retail prices

(g) have a prescribed pricing basis.

3. **Liquidity**

Regulated markets and approved counterparties

3.1 The purpose of conditions (d) and (e) of paragraph 2.1 is to ensure that the *derivative contract* is acceptably liquid. Rule 4.12(6)(a) refers to a *listed contract*, which (by tracking through the definitions is seen to require that the contract is *listed* on a *regulated market*. This is not likely to be problematical in practice. A main derivatives exchange of a developed country is likely to qualify as a *regulated market* although *insurers* are responsible for satisfying themselves on this point.

3.2 The descriptions of *approved counterparties* (banks and investment firms authorised in the UK and other *EEA States*) are set out in the Valuation of Assets Rules. In the case of UK *counterparties*, current lists can be obtained from the *FSA*. There are one or two traps for the unwary here. For example, a *subsidiary* of an authorised bank or investment firm would not count as an *approved counterparty* unless it was itself an authorised bank or investment firm. Where a derivatives transaction was arranged with the head office of a non-EEA bank (as opposed to a transaction arranged through an authorised branch in an *EEA State*), the bank would not necessarily qualify as an *approved counterparty* for the purpose of that transaction. Last, we do not believe it is possible for an *EEA insurance undertaking* to satisfy the definition of *approved counterparty* because of a restriction in the *First Life and Non-Life Insurance Directives* (reflected in the UK in rule 1.3). To the extent that this is so, derivative transactions between two *insurers* or between two funds of the same *insurer* would not satisfy the *approved counterparty* test. However, there is nothing to prevent a non-insurance *subsidiary* of an *EEA insurer* from qualifying as an *approved counterparty*.

Capable of being readily closed out

3.3 Rule 4.12(6)(b) sets a test that the *insurer* reasonably believes that the contract may be readily closed out. The appropriate interpretation of ‘readily’ is that the *insurer* cannot reasonably foresee any circumstances in which it would need to close out part or all of the contract at a few days notice and would not be able to do so. ‘Readily’ may therefore mean very different things, depending on the nature of the contract.

Example A

An insurer has sold a 12 month OTC Turkish Lira forward to hedge the currency risk in its Turkish equity portfolio.

It will need to be able to close out the forward at short notice if it decides subsequently to disinvest in Turkey. To regard this contract as capable of being readily closed out, it must satisfy itself either that there is adequate liquidity on the foreign exchange market for Turkish Lira or that it would be able to close out the original transaction with an *approved counterparty* (not necessarily the one who transacted the original forward) at short notice.

Example B

An insurer has bought an index-linked contract for differences to match exactly its policy holder liability (apart from death benefit) under a group of 5-year index-linked bonds. The terms of the contract are such that, on early surrender, the benefits are limited to whatever can reasonably be realised for the underlying assets, less reasonable expenses.

In such circumstances, it is entirely reasonable to arrange for partial realisation to pay death claims and early surrenders once a month, say, so as to minimise realisation expenses. An agreement with an *approved counterparty* to this effect would certainly satisfy the 'may be readily closed out' test.

4. **Reduction of investment risks; efficient portfolio management**

4.1 The *FSA* does not propose to try to distinguish absolutely between the two terms; in practice, they overlap. Since they are alternative components of the set of conditions summarised in paragraph 2.1, it is not necessary to decide whether a particular transaction is consistent with one of these terms rather than the other. Provided that a transaction is for the purposes either of reduction of investment risks or efficient portfolio management, condition (a) of paragraph 2.1 is satisfied. (In particular, a particular case may not be justifiable as efficient portfolio management but qualify as reduction of risks; or vice versa.)

4.2 ***Reduction of investment risks*** is to be interpreted broadly. To qualify, a transaction must achieve the following:

- (a) in any case where a group of assets is 'earmarked' to match specific *policy holder* benefits where the *policy holder* bears an investment risk (notably in the case of linked liabilities), there must either be:
 - (i) a reduction in the risks to the *insurer* of mismatching of those assets and liabilities, while having a neutral or beneficial effect on the investment risks of the *policy holder*; or
 - (ii) a reduction in the investment risks of the *policy holder*, while having a neutral or beneficial effect on the risks to the *insurer* of mismatching
- (b) in any case where there is no such earmarking of assets, it must reduce the risks to the *insurer* of mismatching between its assets and liabilities at large.

4.3 In either case, exactly what constitutes a reduction in risks is not very straightforward. Most *derivative contracts* will leave the *insurer* worse off than if the contract had not been transacted under some foreseeable circumstances. (For example, a purchased *option* might bring benefits to the *insurer*; or it might expire worthless, leaving it worse off than if it had not transacted the *option*.) If the *FSA* were to insist that a contract aimed at

reduction of risks could never leave the *insurer* or *policy holder* worse off, practically nothing would qualify. In practice *FSA* takes a much less extreme view. A contract which brings benefits (to *insurer* or *policy holder*, as appropriate) under some circumstances while having adverse consequences under other circumstances can be said to be reducing investment risks if:

- (a) any adverse consequences of the contract are unforeseeable; or
- (b) the extent of any adverse consequences is insignificant, in particular:
 - (i) small; and
 - (ii) reasonable, given the benefits resulting under other circumstances

4.4 It is also worth stating the obverse of the conclusion in the previous paragraph. A *derivative contract* which has any significant adverse consequences on investment risks cannot qualify as reduction of investment risks. It is not a case of balancing the advantages and the disadvantages; rather, there must be no significant disadvantages. Having said that, *derivative contracts* which change the investment risks without necessarily reducing them may qualify as efficient portfolio management in some circumstances.

Example C

An insurer, wishing to improve matching between its assets and liabilities decides to shift the economic balance of part of its portfolio from equities to gilts. To achieve a rapid switch of exposure, it decides to retain the equities, to sell a FTSE-100 future and to buy a gilt future. Both futures are margined daily, thereby minimising the insurer's exposure to its counterparty.

The purpose of the FTSE future is to reduce exposure to equities. Adverse consequences could only arise from this if there was a serious possibility that the fortunes of the *insurer's* equity portfolio would depart significantly from those of FTSE. Similarly, the purpose of the gilt future is to buy exposure to gilts of a particular term. The mean term of the *insurer's* liabilities might be different, in which case there would be a risk that gilts of that term might behave significantly differently from the gilt future.

Drawing on the criteria in paragraphs 4.2 and 4.3, this transaction could indeed be taken to 'reduce risks' over the short to medium term in circumstances where the congruence between portfolio and future (and between mean terms of the gilt future and the *insurance liabilities*) was good. (In the longer term, repeated costs of rolling over the futures might make such an assessment problematical.) Moreover, if the intention was to hold the futures only for a short time, to give the *insurer* the opportunity to decide which equities to sell and gilts to buy, it is most unlikely that there would be any problem about justifying a 'reduction of risks', even where congruence was not at a particularly high level.

Example D

An insurer, fully invested at present, believes that equity prices will rise. It decides to anticipate future cash inflows (for example, receipt of dividends declared but not yet distributed) by purchasing an index call option, due to expire after the relevant cash will have been received.

Once the dividends had been received, it would clearly be acceptable for the *insurer* to invest the receipts in equities immediately. Use of the *option* anticipates such a future risk profile while giving the *insurer* the option not to invest if the market does not behave as expected. This can be regarded as reduction of risks.

However, where the *insurer* significantly gears the fund (for example, where the amount of cash notionally required to ensure rights can be exercised is significantly in excess of a prudent estimate of the aggregate of cash currently available and net cash inflows), the adverse risk consequences are clearly inconsistent with reduction of risks.

Example E

An insurer, has a portfolio of short and medium-dated fixed interest securities, backing a set of liabilities with a longer average maturity date. In order to improve matching of its assets and liabilities, it decides to purchase a Long Gilt exchange-traded future with the intention of rolling over the future on each settlement date for the foreseeable future.

At first sight, this transaction appears to be gearing the fund. However, short-dated fixed interest *securities* behave rather like cash so that the gearing effect should not be significant. It is perfectly possible that this transaction could justify treatment as reduction of investment risks.

In principle, adverse risk consequences arise from the retention of exposure to short-dated stocks (as opposed to realisation for cash) and any mismatch between the characteristics of the security underlying the gilt future and those of the ideal security for matching purposes. It might be possible to reduce the first element of this risk by selling a short or medium gilt OTC forward.

Example F

An insurer wishes to hedge a sectoral portfolio of UK stocks in a linked fund. It cannot find a suitable sectoral hedging instrument and therefore decides to use a FTSE-based put option.

Assuming (taking into account the historical record) there was good reason to expect a rough correlation between the performance of the sectoral portfolio and FTSE, use of a FTSE option to hedge such a portfolio is consistent with reduction of investment risks. The downside for the *policy holder* is that the option expires worthless at a time when the sectoral portfolio had declined in value (i.e. that FTSE and the sectoral performance move in opposite directions). If it happens, the fund will only be worse off (compared with the alternative strategy of doing nothing) to the extent of the cost of the option. But, under the above assumptions, this is relatively unlikely, the costs are relatively small and outweighed by the benefits from the *option* in the event of any significant downside in the equity values generally. This instrument therefore passes the tests in paragraph 4.3.

A *futures contract*, rather than an *option*, might also be used to protect the fund under the above circumstances and it is possible that this would qualify as reduction of investment risks. However, this requires rather better prospects of correlation between the relative performances of FTSE and the portfolio than is necessary to justify use of an *option* in this

context (because the downside is considerably more severe). Even where a *futures contract* can not be justified as reducing risks, it may be possible to justify using one for efficient portfolio management. See Example G.

4.5 The concept of efficient portfolio management is related to the question of how an *insurer* manages its assets so as to fulfil its prudent adopted investment strategy. When assessing whether a transaction caused a reduction of investment risks, the appropriate comparison was with a ‘do nothing’ strategy. But when considering efficient portfolio management, the right comparison is with a non-derivative strategy having broadly the same economic effect. The fact that a derivative transaction increases asset risk (i.e. the risk that the value of the portfolio will drop) does not necessarily prevent it from being regarded as for the purposes of efficient portfolio management. The same increase in asset risk might well have been achievable by trading in the underlying assets. However, a *derivative contract* which gives rise to a significant adverse consequence which could not result from a prudent strategy of investing in or disinvesting from (as the case may require) the assets underlying the transaction can never be consistent with efficient portfolio management. It follows that use of derivatives which has the effect of significantly gearing the total investment return on the fund is incompatible with efficient portfolio management.

4.6 Subject to the over-riding condition that there must be no reasonably foreseeable significant adverse risk consequences arising from the use of derivatives (as opposed to arising from investing in or disinvesting from the underlying assets), we believe that a transaction is consistent with efficient portfolio management if, under normal circumstances, it will assist the *insurer* to make progress towards its investment objectives:

- (a) more quickly; and/or
- (b) more easily; and/or
- (c) more efficiently; and/or
- (d) more cheaply; and/or
- (e) more flexibly

than can be achieved without the use of a transaction of that nature.

4.7 Where there are no material benefits from using derivatives other than saving of tax, the question arises whether this is sufficient for the efficient portfolio management test to be satisfied. From the point of view of the *insurer*, its future tax position is not completely under its control and there is always a theoretical possibility that instruments which attract favourable tax treatment today may be adversely treated next year. Nevertheless, some tax changes are more foreseeable than others. Provided that it is not reasonable to foresee that a tax advantage might be removed (or even reversed) with retrospective

effect, it can legitimately be invoked to justify efficient portfolio management.

4.8

In assessing whether an adverse risk consequence arises, the *insurer's* investment risk position must be considered in all cases. Further, in any case where a group of assets is earmarked to match specific *policy holder* benefits where the *policy holder* bears an investment risk (notably in the case of linked liabilities), the consequences of the use of derivatives on the asset risk of the earmarked assets must also be taken into account.

Example G

An insurer judges that the UK equity market is going to drop significantly. To reduce exposure to the market immediately (and to minimise transaction costs if its view changes subsequently), it sells a daily-margined exchange-traded FTSE future with principal equal to the value of a significant part of its well-diversified portfolio.

This is an example of efficient portfolio management provided that the *insurer's* portfolio is reasonably congruent with the equities making up FTSE. The comparison to be made here is with the strategy of selling the appropriate part of its portfolio (in contrast to Example F). The only circumstances in which the *insurer* will be worse off than under the alternative strategy arise when FTSE rises (giving rise to a loss on the index future) at the same time as the value of the *insurer's* equity portfolio falls. If congruence is good, the chances of a significant adverse effect on asset values resulting from the use of derivatives can be regarded as unforeseeable.

Even if congruence between portfolio and FTSE was good, a fund manager pursuing such a strategy would not necessarily be immune from criticism. By purchasing an *option* rather than selling a future, he could have protected his portfolio while leaving himself in a position to benefit from (unexpected) growth in the index.

Which is the better strategy - or indeed, whether either strategy is appropriate - can only be a matter for professional judgement in the light of the circumstances of the *insurer* and the tests for efficient portfolio management set out in paragraph 4.6.

Example H

An insurer, currently with mainly fixed-interest investments, wishes to gain exposure to the equity market. It decides to retain its fixed interest income while achieving exposure to the capital gain potential of equities, at the same time saving transaction costs. It proceeds by selling a gilt future while buying a FTSE future.

This is consistent with efficient portfolio management, provided that there is good reason to believe that fluctuations in the market value of the fixed interest portfolio, would be well-correlated with fluctuations in the price of the relevant gilts underlying the future. Otherwise, the transaction might give rise to adverse risk consequences, of a size which is inconsistent with efficient portfolio management. This is particularly the case if the position were to be retained over a considerable period.

Example I

An insurer sees the opportunity to generate additional income (over money market deposit rates) by purchasing a basket of FTSE 100 stocks and selling FTSE futures at above 'fair value'.

Occasionally there is an opportunity to generate income through risk-free arbitrage of this kind, even after taking expenses and tax into account. Provided that the basket of stocks was congruent with FTSE, this would constitute efficient portfolio management.

Example J

An insurer is fully invested in equities, apart from a cash balance of around £1m which it expects to stay roughly constant for the foreseeable future. Seeking additional equity exposure, it transacts a contract for differences under which it would receive the product of £1m and 150% of any percentage rise in FTSE above the level current on the day of the transaction; it would pay the product of £1m and 150% of any fall in FTSE.

This kind of geared risk profile cannot be achieved by buying or selling the underlying stocks. Under no circumstances can it be regarded as efficient portfolio management.

Example K

An insurer buys call options relating to stocks whose current value represents a significant proportion of the value of the insurer's fund. The options are mainly well out-of-the-money.

We would normally regard purchase of out-of-the-money call *options* (which, under normal circumstances, would be likely to expire worthless) as being speculative in nature. Although there might occasionally be a big gain, most of the time the premium will be lost. Accordingly, such use of derivatives will lead to increased volatility in fund performance; if significant, it is inconsistent with efficient portfolio management.

In contrast, it is easy to see that covered out-of-the-money put *options* can be used for 'reduction of investment risks', for example to provide portfolio protection (but see Example L).

Example L

An insurer has the practice of transacting a derivative which has the effect of providing 'portfolio insurance' for a short period over its financial year-end (but, as a general rule, not at other times of the year).

It is quite possible that this is an example of grossly inappropriate portfolio management. The question to be asked is why the portfolio should need protection only around the year-end. Unless there is a satisfactory answer, the transaction is unlikely to count as either reduction of risks or efficient portfolio management.

4.9

One further dimension to risk needs to be considered, namely whether it arises from the possibility of market movements or of failure of a *counterparty* to honour its obligations. The *FSA* regard a contract which decreased market risk but gave rise to a significant increase in *counterparty* risk as having adverse risk consequences and therefore inconsistent with either reduction of investment risks or efficient portfolio management. What is significant in this context is a matter for professional judgement in the light

of the circumstances of the *insurer*. But, as a guide, the *FSA* would normally regard a contract which, under reasonably foreseeable circumstances, would increase the *insurer's exposure* to a *counterparty* to somewhere near the prescribed admissibility limit (or the company's own limit, where lower) as giving rise to a significant increase in *counterparty* risk and therefore having adverse risk consequences. In a linked fund, admissibility limits are irrelevant; it will probably be necessary for the *insurer* to set its own benchmarks as to significance, which may reasonably vary to some extent according to the investment objectives of the fund.

Example M

An insurer wishes its funds to gain exposure to the Japanese stock-market but is content to track the Nikkei index rather than attempt to out-perform it by stock selection. It therefore buys a Nikkei future and covers it with a short-notice deposit of appropriate size. Every 3 months, it simply rolls over the future.

This kind of use of derivatives has traditionally not been allowable for UK unit trusts categorised as *securities* funds. With one caveat however, the economic effect should be extremely close to that of an outright purchase of the stocks underlying the index, in the appropriate proportions.

However, the caveat is important. Unless the contract is margined regularly (probably at least weekly), the *insurer* would expect to build up a significant volume of *counterparty* risk as the index rises. This in itself would be sufficient to fall outside the terms of efficient portfolio management. But provided that the *counterparty* risk and the costs of rollover are kept to an insignificant level, there is no reason why such an arrangement cannot fall within the interpretation of efficient portfolio management set out in paragraph 4.6.

The continuing nature of the test

4.10

A derivative which initially satisfies the efficient portfolio management or reduction of risks tests will not necessarily continue to do so. This is particularly the case with derivatives which are some way out of the ordinary. A derivative which fails the test cannot be admissible (or a permitted link) even if it passed the test at the outset. This possibility should be kept under review.

Example N

An insurer buys a barrier option to protect its UK equity portfolio at a time when FT-SE 100 is at 3000. The barrier is set at 2400; no amount is payable unless FT-SE has fallen through the barrier at some point. Thereafter, the option behaves as a standard option.

It is possible that this kind of *option* would satisfy the reduction of risks test at the time it was transacted. For example, it could be a method whereby a life *insurer* is able to satisfy the resilience test. However, if FT-SE falls close to the barrier, the instrument becomes a highly speculative one. It now has a significant market value although the exercise value remains at nil for the time being. Retention of the *option* becomes a gamble as to whether the index will fall through the barrier or not and would no longer be consistent either with reduction of risks or efficient portfolio management. (Nor, incidentally, would it pass the 'in connection with' test at this stage - see paragraph 4.19.) At this point, the admissible value is nil and a *insurer* wishing to protect its portfolio for solvency purposes would need to close out the *option* (and conceivably, although not necessarily, purchase another barrier

option with a lower barrier).

The 'in connection with' test

- 4.11 As a general rule, free-standing derivatives are inadmissible. The usual requirement is that a derivative must be used 'in connection with' an asset of a different type for the purposes of efficient portfolio management or reduction of investment risks. However, under rules 4.12(2) and 4.12(3), free-standing derivatives or combinations thereof can be admissible provided that they satisfy certain conditions. We refer to the alternative tests jointly as the 'in connection with' test. An analogous test applies in linked funds.
- 4.12 The following combinations also pass the 'in connection with' test, provided that they are used for the purposes of efficient portfolio management or reduction of investment risks:
- (a) a derivative which has the effect of an *approved derivative contract* used in connection with an *admissible asset* (or permitted link) for such purposes
 - (b) a combination of derivatives which synthesise an *admissible asset* (or permitted link)
 - (c) a combination of derivatives which synthesise the combination of an *admissible asset* (or permitted link) and an *approved derivative contract*
- 4.13 In each of the above cases, although the drafting of rule 4.12 (or **Appendix 3.2**) is not explicit on this point, a derivative, an *admissible asset* or a permitted link is to be read as covering one or more instruments in each case.
- 4.14 An *admissible asset* must be admissible in its own right. A chain of connected derivatives (other than a combination which falls within conditions (b) or (c) of paragraph 4.12) pass the 'in connection with' test if the first derivative in the chain is used in connection with some other kind of admissible instrument. For example, see Example Y below.
- 4.15 The 'in connection with' test is part of the barrier to admissibility for speculative derivative instruments. The connection must be for the purposes of efficient portfolio management or reduction in investment risks, not merely incidental to it. This leads to two corollaries, one obvious, the other perhaps less so.
- 4.16 The first corollary is that there must be a relevant asset to be connected to. The derivative in Example O below fails the in connection with test.

Example O

An insurer buys a listed put option on a particular stock or index, without holding either the relevant stock (or, if appropriate, basket of stocks) or an appropriate future or call option.

There is no asset of the fund with which this *option* can be connected for the relevant purposes. Therefore, even though the degree of ‘speculation’ is limited to the initial cost of the *option*, no admissible value can be given to such an asset.

Example P

An insurer buys an index call option whose exercise index level is approximately equal to the current level of the index.

It is perfectly legitimate to regard a purchased call option on an individual asset as being used in connection with cash or other *readily realisable* assets which would enable the *option* to be exercised. Moreover, provided that the underlying asset was one that the fund could reasonably hold, then (as illustrated in Example F) the transaction should qualify as being for the purposes of reduction of investment risks unless it gave rise to significant adverse risk consequences (see paragraph 4.3). By analogy, an index call *option* could certainly be regarded as being used in connection with sufficient cash or ‘near-cash’ (see paragraph 6.12) to allow the underlying stocks to be purchased at the exercise price.

However, taking this example to an extreme, if a fund invested in purchased call *options* to the extent that the cash or ‘near-cash’ in the fund fell significantly short of the amounts notionally needed to exercise the *options*, this would not be consistent with efficient portfolio management. (‘Significantly’ should be interpreted here in the context of the size of the fund. But a number of such transactions may be individually insignificant but nevertheless significant in aggregate.) Such use of derivatives would certainly give rise to significant adverse risk consequences (i.e. gearing). This applies even though an index call *option* would normally be cash-settled, there being no intention to purchase the assets underlying the index.

- 4.17 The above examples might be interpreted as illustrating a rule that the combination of call *options* plus cash satisfies the ‘in connection with’ test while the combination of put *options* plus cash fails it. However, this is not invariably the case.

Example Q

An insurer purchases an index call option with a (variable) exercise price struck at $(2L-K)$ where K is the index level at the time of purchase of the *option* and L is the index level at the time the *option* is exercised. It has sufficient cash in its fund to notionally exercise the *option*.

This *option* is constructed to have the same payoff as a conventional put option with price struck at K. The conclusion is as in Example O therefore; any connection with the cash in the fund is incidental to the purposes of reduction of risks or efficient portfolio management and the *option* is inadmissible.

- 4.18 The second corollary mentioned in paragraph 4.15 is that the value of the derivative must be small at the time the transaction is initiated by comparison with the value of the asset it is connected with. (Moreover, there must be a reasonable possibility that it will remain small.) Otherwise, where the value

of the derivative is very likely to become too large compared to the value of the connected asset, the connection is incidental to the purposes of efficient portfolio management, rather than for those purposes.

- 4.19 This issue does not commonly arise when using derivatives for hedging or shifting the balance of a portfolio. However, it would arise in the case of a derivative whose value is capable of fluctuating strongly and to a considerable size compared to the value of the underlying asset (for instance, the barrier *option* in Example N). The issue can also arise when derivatives are used to give a precise match to guaranteed benefits. It is considered further in paragraph 10.

5. **Admissibility of underlying assets; underlying assets a permitted link**

- 5.1 Under the *Valuation of Assets Rules*, a *derivative contract* based on a category of asset which is not admissible can never have an admissible value. For example, gold is not considered to be a suitable asset to cover insurance liabilities. By the same token, it would be anomalous if an *insurer* were able to assign an admissible value to an *option* or future on gold.

- 5.2 The *FSA* will not entertain any request for a waiver where derivatives based on inadmissible assets are purchased in pursuance of a general investment strategy. However, there might be special cases where holdings of derivatives based on inadmissible assets represent a sensible method of hedging assets covering a specific liability or, more generally, of managing the company's liabilities. Under such circumstances, the *FSA* would be prepared to consider granting a waiver to allow such derivatives to be admitted.

- 5.3 Very similar considerations apply in linked funds. A derivative cannot be a permitted link unless it is wholly based on property, or indices, which are themselves permitted links.

6. **Cover**

- 6.1 The penultimate condition which must be satisfied by an *insurer* who wishes to value a derivative as an asset is that the transaction must be covered by assets which have been earmarked for the purpose. The *Valuation of Assets Rules* allow reasonable flexibility as to which assets may be considered to provide cover.

- 6.2 In order to satisfy the cover condition in the *Valuation of Assets Rules* the *insurer* must be sure that it is not exposing itself to any significant basis risk. That is to say, there is no reasonably foreseeable possibility that it will suffer a significant loss as the result of acquiring or realising investments in order to satisfy its obligations under the *derivative contract*.

- 6.3 Where, at the present time, the *insurer* holds the assets due to be delivered under the contract (and expects to continue to hold them until delivery date), the *FSA* will say that the contract is strictly covered. Similarly, other

derivative contracts which will deliver (or would deliver following exercise of an *option* by the *insurer*) the appropriate assets before the exercise date of the former contract can also constitute strict cover.

- 6.4 Digressing temporarily from asset admissibility, there is another important angle to cover which applies whether a derivative is currently an asset or a liability to the *insurer* and, if the former, whether it is admissible or not. A contract which is not covered or covered only approximately will give rise to the requirement to make a provision for adverse changes, as discussed in paragraph 9. Indeed, the formal cover requirement set out in 4.12(4) is that a significant provision for adverse changes is not required in respect of the contract.
- 6.5 A contract which is strictly covered cannot give rise to a provision for adverse changes. A contract which is covered but not strictly covered must logically give rise to such a provision. But in many practical cases, the provision is likely to be immaterial.
- 6.6 To sum up, the *Valuation of Assets Rules* do not require an admissible derivative to be strictly covered; but they do require it to be covered reasonably strictly. And a derivative which is not covered reasonably strictly and therefore inadmissible, will certainly give rise to a provision for adverse changes.
- 6.7 It follows from the above that the question of cover does not arise in respect of contracts which can never impose obligations on the *insurer* (e.g. purchased *options*, *warrants*). On the other hand, contracts where the liability is potentially unlimited can be covered only by an appropriate holding of the corresponding assets. Finally, as illustrated in Example O, the ‘in connection with’ test (and, indeed, the other conditions set out in paragraph 2.1) remain relevant even where the question of cover does not arise.

Cover and basis risk

- 6.8 It is not always practicable to arrange for a contract to be strictly covered. However, we do not propose to set numerical limits governing whether the basis risk is to be regarded as significant. In determining this for a particular case, we would expect the insurer to have regard to:
- (a) the size of the transaction. A relatively large basis risk (expressed as a percentage of the value of the underlying assets) would constitute a breach of the cover requirement where the value of the notional principal is sizeable; it may be acceptable if the value of the notional principal is a very small percentage of the value of the fund.
 - (b) aggregation of risks. The basis risk on a particular transaction may not be significant; but when aggregated with that on a number of other similar transactions, it can become so.

- (c) inherent volatility of the fund. A particular quantum of basis risk is more likely to be regarded as significant in the context of a fund with reasonably stable investment performance than in one which is rather volatile in nature (e.g. a long-term linked Hong Kong Fund). The test is whether the derivative itself adds significantly to the existing investment risk.
- (d) the fact that basis risk is, of its nature, very volatile.

‘Unforeseeable’ circumstances?

- 6.9 It is impossible to give general guidance as to what is foreseeable. But a few considerations may help. In assessing what might happen to the value of any assets, an *insurer* is entitled to have regard to market experience in recent years. It is certainly not ‘unforeseeable’ that a certain security might become virtually worthless. However, a huge general decline in asset values might legitimately be regarded as ‘unforeseeable’.
- 6.10 Similarly, an *insurer* would be expected to make an exceptionally prudent assessment of its cash outflows in the period before the settlement date of a *derivatives contract* before concluding that it had sufficient cash to cover its liabilities. It would be far from ‘unforeseeable’ that its best estimate of cash outflows would be exceeded in practice.

Other pre-requisites for cover?

- 6.11 In assessing cover, the *insurer* must obviously first allow for all assets which will be needed to meet a prudent estimate of all other liabilities which will be due for settlement before delivery date. Moreover, assets which are earmarked for a different purpose must not be counted as cover for a derivatives transaction. Examples of the latter would be assets earmarked for repayment of a *debt* or to provide cover for another derivatives transaction.

Example R – suitability for covering for a commitment to deliver a fixed amount of cash (The following list is not intended to be exhaustive.)

Acceptable as strict cover

Cash already paid to the *counterparty* by way of initial margin

A *derivatives contract* guaranteed to deliver to the *insurer* sufficient cash to cover its liabilities (e.g. a sold future may cover a bought future)

A holding guaranteed to deliver income of the right magnitude at the right times to cover payment obligations (e.g. an interest rate swap is covered by the appropriate underlying holding)

Cash or ‘near-cash’

May be acceptable as partial cover, subject to the magnitude of the basis risk

A holding in gilts, other than those which count as near-cash

A well-diversified portfolio of *readily realisable* equities

Unacceptable, even as partial cover

Borrowed assets

Assets covering another derivatives transaction

Assets providing security for a *debt*

Dividends due before delivery date but not yet declared

A portfolio of *securities* which is not well diversified or containing significant holdings of *securities* not readily realisable in the short term

Debts (including anticipated tax recoveries), other than those which count as 'near-cash'

Example S

An insurer with a portfolio of US equities wishes to remain exposed to the US market for the next 3 months. It wishes to protect itself against the risk of the dollar weakening and considers it unlikely that it will strengthen. It decides to sell a dollar future (i.e. dollars sold to buy sterling) to the current value of half of its US equity portfolio, for settlement in 3 months time.

Provided that the portfolio of equities is well-diversified and *readily realisable*, it may be possible to consider it to be covering the future, despite the fact that it is at first sight not obviously appropriate for the purpose. The following argument justifies this treatment.

Leaving aside movements in the US market, the *insurer* can never suffer a cash loss as a result of movements in the exchange rate. If the dollar falls, the gain in the forward currency contract matches the fall (in sterling terms) of half the equity portfolio. If the dollar rises, the reverse is true. Under the latter circumstances, the *insurer* might need to sell some of his equity portfolio (which would have appreciated in value in sterling terms) in order to meet his obligation to supply dollars under the forward currency contract. Because the portfolio has been assumed to be well-diversified, this should not be a problem. The same assumption could not necessarily be made of a holding of equities traded on a market which was often turbulent.

There is nevertheless basis risk associated with this contract reflecting the eventuality that the dollar might strengthen and the US equities fall in value over the period. The *insurer* would have to consider whether this risk was significant, bearing in mind the tests in paragraph 6.8, before classifying this transaction as 'covered'.

Similar considerations apply if the *insurer* decides to hedge the currency risk on the whole of its portfolio, rather than just half of it. However, in the latter case, there is in principle a considerable risk that the portfolio could fall in value, leaving the insurer 'over-hedged'. Assuming this reached levels which could not be regarded as insignificant, the currency hedge could neither be regarded as for the purposes of reduction of investment risks nor efficient portfolio management under the interpretation of Section 4. But naturally, in assessing the risks, the *insurer* would be entitled to place due weight on any systems it had in place to close out any 'excess hedging' beyond insignificant levels, as it arose.

Example T – suitability for covering a commitment to deliver physical assets (or cash to the value of those assets).

(The following list is not intended to be exhaustive.)

Acceptable as strict cover

A holding of the assets in question

A *derivatives contract* guaranteed to deliver to the *insurer* sufficient assets to cover its liabilities (e.g. a bought future can cover a written call *option*)

May be acceptable as partial cover, subject to the magnitude of the basis risk

Cash or ‘near-cash’

A holding in gilts

A well-diversified portfolio of *readily realisable* equities

Unacceptable, even as partial cover

Borrowed assets

Assets covering another derivatives transaction

Assets providing security for a *debt*

Dividends due before delivery date but not yet declared

A portfolio of *securities* which is not well diversified or containing significant holdings of *securities* which are not readily realisable

Debts (including anticipated tax recoveries) other than those which count as ‘near-cash’

Example U

An insurer has purchased an index put option to hedge its entire holding of Japanese equities. It has the opportunity to sell some of those assets at a favourable price. It proposes to retain the whole of the option contract.

Purchased *options* do not require cover. However, the other conditions in paragraph 2.1 remain relevant. In particular, the ‘in connection with’ test remains relevant. After the asset sale, part of the *option* is no longer in connection with any relevant assets.

By analogy with Example O, the ‘excess’ part of the *option* cannot be an *admissible asset*. The remaining part would be admissible provided of course that it passed the appropriate tests in the first place.

Example V

An insurer has sold an index future which is covered by an appropriate holding of assets. It has the opportunity to sell some of those assets at a favourable price. It proposes to retain the whole of the futures contract.

The asset sale will partly uncover the future, unless the *insurer* simultaneously tops up the cover by earmarking other suitable assets. Where the *insurer* does not hold such suitable assets, it can regard the *derivatives contract* as being split in two for asset valuation

purposes. One part would definitely not be covered; the other part could be if the basis risk remained insignificant. Obviously, this would require that the remaining assets were reasonably representative of the index.

‘Near-cash’?

6.12 ‘Near-cash’ means cash which is reasonably certain to be received by the *insurer* before delivery date or assets which could, with reasonable certainty, be converted into a known amount of cash before delivery date, at the *insurer's* discretion. The principal examples are:

- (a) Amounts deposited with or loaned to authorised banks and building societies which are redeemable before delivery date (including a prudent estimate of interest due before delivery date)
- (b) *Approved securities* which can be redeemed before delivery date (including a prudent estimate of interest due in the meantime)
- (c) Dividends declared but not yet paid
- (d) An exceptionally prudent estimate of net cash inflows expected before delivery date. (A prudent estimate of the net position may of course be negative! In that case, the *insurer* would be obliged to regard that as a prospective liability, to be taken into account as described in paragraph 6.11.)

Example W

An insurer has sold a FTSE-100 future.

On the delivery date, it will receive cash if the original index level price is greater than the market price; otherwise it will have to pay cash. Because of the basis risk, it is not possible to cover this contract substantially with cash or ‘near-cash’. For example, if the value of the contract was £1m per 100 index points, at least several £m in addition to the cover of the underlying principal (depending partly on the length of the interval before delivery date) of cash or ‘near-cash’ would be needed as cover before the *insurer* could be reasonably certain that this would not be completely eroded by a sharp rise in FTSE. It is most unlikely that this could be regarded as an insignificant basis risk. In passing, it is also most unlikely that this could be justified as reduction of investment risks or efficient portfolio management.

The contract could expediently be covered by a well-diversified portfolio of *securities* making up the FTSE index (the primary cover) of approximately the right value (i.e. the market value of the basket of FTSE *securities* underlying the transaction), together with a secondary holding in cash or ‘near-cash’ equal to the provision for adverse changes (see Section 9), if any. If the performance of the actual portfolio can reasonably be assumed to be closely correlated with that of FTSE, the basis risk is likely to be minimal.

However, if the covering *securities* providing the primary cover were to be replaced by ones which were either:

- (a) not well diversified; or
- (b) not well-matched to the FTSE-100 index; or

(c) of insufficient value to provide full cover

the basis risk could be substantial. If so, the contract could no longer be regarded as covered.

Example X

An insurer wishes to rebalance his portfolio by selling UK equities and buying US equities. He wishes to change market exposure immediately but to give himself time to realise his UK holdings and select appropriate US holdings. He sells a FTSE future, buys a dollar future from an approved counterparty and an S&P future, all for settlement on the same date and all to the value of the UK equity portfolio.

The S&P future is covered by the dollar future. Assuming that the portfolio of equities is a well-diversified selection of stocks making up FTSE-100, the proceeds of the sale plus the balance on the FTSE future should in aggregate realise approximately enough to cover the obligation to deliver sterling under the dollar future. The amount will be insufficient to the extent that the actual stocks underperform between the current date and the date of realisation, relative to FTSE-100. Provided that the basis risk was insignificant, then the equity portfolio, taken together with an appropriate holding in cash or 'near-cash' (to allow for the mismatch between the portfolio and the index) would cover this contract.

It is also instructive to consider the 'in connection with' test. Use of the currency forward and the index futures appears to be consistent with efficient portfolio management. The FTSE future is clearly being used 'in connection with' the UK equity portfolio. But the natural interpretation is that the currency forward is used in connection with the FTSE future and the S&P future in connection with the currency forward. In the situation above, if the FTSE future is covered, it becomes an *admissible asset*. So the currency forward is used 'in connection with' an *admissible asset*; it is itself admissible. The same argument works for the S&P future.

Example Y

Same situation as in Example X except that the various contracts are not all due for settlement on the same date.

The analysis is very similar to that of Example X. The basis risk would also include the risk of adverse movements in currencies and/or indices between the settlement dates of the various contracts. Obviously, the size of this additional risk will depend on the intervals between settlement dates and the perceived volatility of indices, equity portfolio and exchange rates. Nevertheless, it is by no means out of the question that these derivatives could be regarded as covered.

Cover Fallacies

6.13

The following are illustrative examples of fallacies.

Example Z

I have sold an index future which is currently showing a slight profit to me on the basis of current market value. It does not require cover.

WRONG! It may in future show a considerable loss. It is difficult to arrange for strict cover because of small changes in the composition of the index from time to time. An appropriate diversified selection of the assets underlying the index is however likely to be regarded as covering this transaction, depending of course on the size of the basis risk.

Example AA

Earmarking of assets of sufficient current value to cover the basis risk will always ensure that the relevant derivative contract is covered

WRONG! The assets may not be suitable (e.g. because of volatility or non-realisability) for cover. And of course, if the basis risk is significant, the contract cannot be regarded as being covered.

Example BB

A margined contract is automatically covered.

WRONG! Margining guarantees only that the *insurer* can cover adverse market movements to date. It confers no assurance that it will be able to cover any foreseeable future market movement.

Example CC

I have entered into an OTC arrangement for 3 months whereby I sold an index futures contract on day 1. On each subsequent day, I am committed to closing out my futures position and simultaneously re-selling another index future for the original end-date at the close-out price. (In view of the nature of the arrangement, my counterparty has offered extremely favourable terms on dealing costs!) The basis risk for any pair of sale and purchase contracts is small and the contract therefore requires minimal cover.

WRONG! No doubt, little will go wrong with this arrangement from one typical day to the next. But over a period, a lot could go wrong with it. Having regard to the point in paragraph 6.8 on 'aggregation of risks', it is clear that the contract requires cover as if a normal 3 month index future had been sold.

Cover for derivatives in linked funds

- 6.14 Although the drafting of the *Valuation of Assets Rules* makes it hard going to verify this fact, there is in practice no difference in the nature of the cover criterion, whether a derivative is used 'in connection with' *linked* or *non-linked assets*. That is to say, a derivative covered by assets of a linked fund would be covered if the fund were a non-linked one; and vice versa. (However, a derivative in a linked fund is of course legally required to be covered, unlike a derivative in a non-linked fund.)

7. **The pricing basis**

- 7.1 The final condition to be satisfied by an admissible (or permitted) derivative is that it satisfies the prescribed pricing basis. This is usually unproblematic. Assets acquired or disposed of under *options* or *futures contracts* are normally transferred at a fixed price, specified at the time the contract is transacted. Nevertheless, more exotic price structures do occur. The *Valuation of Assets Rules* allow considerable (but not total) flexibility. The paragraphs below cover the conditions to be satisfied by *admissible assets*. The conditions for *permitted derivative contracts* in property-linked funds are equivalent.

- 7.2 Under rule 4.12(7), amounts payable under an admissible contract for differences may be calculated by reference to the value of any *admissible asset* or income from any *admissible asset*. Contracts based on an index of such asset values or income are equally acceptable. So are contracts based on the difference between current and *amortised value*, provided that there is a generally accepted accounting practice for determining the *amortised value* of the asset in question. Finally, contracts based on fluctuations in a national index of retail prices for any Zone A country (in particular the RPI) pass the test.
- 7.3 Rule 4.12(8) prescribes the pricing methods allowable for an admissible *option* or *futures contract*. The exercise or contract price may be fixed (the traditional approach) or may be determined by reference to any of the quantities mentioned in the previous paragraph or by any combination of these.
- 7.4 The most significant exclusions from the above prescribed pricing bases are where a contract value, or buying or selling price of an asset, is determined partly by reference to:
- (a) an inadmissible asset; or
 - (b) the *amortised value* of an asset where there is no generally accepted accounting practice (for insurance companies) for the determination of such *amortised value*.

Example DD

A company transacts an option to buy listed shares in ABC plc at a price which is related to the price of (listed) DEF shares on the exercise date.

This satisfies the pricing basis requirements set out in rule 4.12(8). Of course, it still needs to satisfy all the other requirements of rule 4.12 before it could be given an admissible value. The 'capable of being readily closed out' and 'efficient portfolio management or reduction of risks' tests would undoubtedly need particularly careful justification.

8. **The valuation rule for derivatives which are assets**

- 8.1 The basic rule set out in rule 4.12 is that derivatives which satisfy the conditions described in paragraph 2.1 above shall be valued at current value, taking into account any amounts paid or transferred to the *insurer*, whether by way of *variation margin* or otherwise. Current value is defined to be market value, in the case of a *listed* derivative, or close-out value in the case of an OTC derivative. Under this rule, fully-margined derivatives clearly have a value of zero; the intrinsic value of the contract is represented either by a deposit in the margin account or by assets already transferred to the *insurer* by the *counterparty*.
- 8.2 It might appear at first sight, therefore, that full credit can be taken for any fully-margined *derivative contract*, irrespective of whether it satisfies the conditions summarised in paragraph 2.1. This is not the case. Margining (or

collateralisation) cannot legitimise a *derivative contract* which would not otherwise have an admissible value. Rule 4.14(1) provides that *admissible assets* equal in value to any such margin paid or transferred to the *insurer* must be left out of account if the margin is in respect of a *derivative contract* which does not satisfy all the conditions described in paragraph 2.1. Therefore, although the *insurer* has received assets equal to the intrinsic value of the contract, it is required to leave an equal value of assets out of account. In effect, the net benefit of having transacted the *derivative contract* is nil, for the purposes of statutory valuation.

8.3 Notwithstanding the above strictures, we do of course encourage *insurers* to margin (or collateralise) their contracts wherever appropriate as a means of reducing credit exposure of the fund to the *insurer's counterparty*.

9. **Liabilities arising from derivative contracts**

9.1 The starting point is that a derivative which is currently a liability to the *insurer* (leaving aside the effect of any margin which has already been paid, received or transferred) should be valued at its current value. In the case of an exchange-traded derivative, this is its market value; in any other case, it is what the *insurer* would reasonably expect to pay to close out all its obligations under the contract. This applies irrespective of whether or not the conditions summarised in paragraph 2.1 apply.

9.2 Moreover, as noted in paragraph 2.3, no derivative (whether currently an asset or a liability) may be used in a property-linked fund unless all the conditions of that paragraph apply.

Example EE

An insurer with a well-diversified portfolio of FTSE stocks in a linked fund believes that UK equity prices are likely to fall in the foreseeable future but recover in the medium term. It decides to sell a FTSE-100 call option (adequately covered by its portfolio - see Section 6).

This is a somewhat problematical case. Particularly careful justification will be needed before written *options* can be taken to be for the purposes of reduction of risks or efficient portfolio management.

Suppose, for example that the *insurer's* investment strategy is to reduce exposure to FTSE stocks. When assessing whether selling an *option* counts as efficient portfolio management, it is necessary to consider the non-derivative alternative, in this case to sell the relevant stocks. If the index in fact rises above the strike level, the *insurer* will effectively lose any gain above that level. However, that is irrelevant to the current discussion; the *insurer* would clearly also have given up the gain if it had sold the stocks.

If the index falls below the strike level, the *option* will expire worthless. The *insurer* will therefore benefit from the *option* premium but will nevertheless still be exposed to severe falls in the stocks. In the terms of paragraph 4.8, this is an adverse risk consequence of the derivative strategy. If the transaction is to count as efficient portfolio management, the *insurer* would need to be convinced that the adverse risk consequence was insignificant; in other words, that the risk of the market falling sufficiently far that the *insurer* was left significantly worse off than by selling the stocks could be neglected. This could only be

resolved on a case by case basis, taking into account the volatility of the market, the price of the *option*, the difference between initial market and *option* strike levels and respective tax considerations.

The above gives an analysis for one particular investment strategy; it might be quite different for any other strategy.

Provision for adverse changes

9.3

In addition, where a contract is not strictly covered, the *insurer* must make an appropriate provision for adverse changes under the terms of rule 5.3. This applies to any contract that:

- (a) may give rise to an obligation on the *insurer*, irrespective of whether it is an asset or a liability at the current time; and
- (b) where an adverse change would affect the level of free assets of the *insurer*.

Example FF

An insurer has sold a call option on a stock which it does not hold. On a best estimate basis, it has just sufficient assets in its fund to allow it to buy the stock necessary to perform the obligation.

This contract is not covered and could not therefore be used in a linked fund. It is perfectly foreseeable that the value of the assets in its fund or those underlying the derivative will change to the extent that the *insurer* needs more than its best estimate in order to perform its obligations under the contract. A provision for adverse changes will be needed.

In passing, it is also clear that such a transaction gives rise to significant adverse consequences in the investment risk profile of the portfolio. Under the condition described in paragraph 4.6 above, it could not be regarded as being consistent with efficient portfolio management. Nor, clearly, does it satisfy the 'in connection with' test.

Example GG

An insurer considers selling a put option on an equity holding which, if exercised, will require it to pay £1m for the holding. It currently has a cash balance of £0.5m but expects a net cash outflow, apart from new premium income, of £0.3m. However, due to estimating uncertainties, such net cash outflow might be as high as £0.6m. Taking account of new premium inflows, can this contract be regarded as covered?

Prudence requires the most pessimistic assumption for net outflows, namely £0.6m. This gives rise to a cash shortfall of £0.1m, leaving aside the cash needed to cover the *option*. It follows that new premium inflows would have to be at least £1.1m, on an exceptionally prudent assumption, for the contract to be regarded as covered.

A provision for adverse changes would be required in respect of the uncovered part of the contract.

9.4

The provision must be sufficiently large to cover the basis risk. It follows that a contract which is covered, but not strictly covered requires, in principle, a provision for adverse changes to be established. However, in many practical circumstances, such provision may be immaterial.

- 9.5 The starting point for assessment of the provision is a comparison between the assets underlying the *derivative contract* and the assets notionally attributed by the company to meet its liabilities (including prospective or contingent liabilities) under the contract. For this purpose, it is necessary to identify particular assets of the relevant fund (the ‘identified assets’) as being available to meet liabilities under the contract in question.
- 9.6 Where the contract is not strictly covered, the *insurer* should consider the potential variation between the value of the assets underlying the *derivative contract* and the ‘identified assets’. This will lead to an assessment of the potential liability which could arise from the lack of strict cover. Such variation may of course arise either from general market movements (e.g. if gilts are attributed against an equity index future) or of specific stock value changes (e.g. if a small number of stocks are attributed against an equity index future).
- 9.7 It will be necessary to take account of the potential volatility of each block of assets, including the possibility that prices of the blocks will move in different directions. The assessment would be based initially on historical volatility but would also have regard to the possibility that volatility might be different in future.
- 9.8 The level of provision may also depend on the insurer’s techniques for monitoring (and, where appropriate, hedging or closing out transactions so as to reduce exposure) and the frequency with which *exposures* are monitored by senior management. However, a general intention to manage the *exposure* as the need is perceived to arise is not sufficient to obviate the need for, or even reduce, a provision.
- 9.9 As a general rule, we would expect *insurer’s* to set provisions on bases which are at least as prudent as the following:
- (a) in the case of a derivative based on a broadly-based equity index:
 - (i) that a 25% adverse movement in the index occurs in the near future; and
 - (ii) the possibility of a greater adverse movement should be allowed for, to the extent that this is consistent with the historical record or, otherwise, where it would be imprudent to ignore the possibility;
 - (b) in the case of a derivative whose value depends significantly on the value of a small number of assets, the assumptions in (a) will be insufficiently prudent. Conversely, the assumptions in (a) may be too severe in other cases. (For example, a 25% adverse movement in a short gilt index might be considered extremely unlikely);

- (c) analogous assumptions should be made in respect of the attributed assets (see paragraph 9.5);
- (d) the effect of adverse changes to the value of the derivative and the attributed assets should be compounded (on a probabilistic rather than arithmetical basis), assessing the (positive or negative) correlation between the two variables in a very prudent manner. For example, in the case of long-dated gilts attributed against an equity future, independent 25% adverse movements should be assumed.

The provision for adverse changes and linked funds

- 9.10 A provision for adverse changes ought not to arise in the case of derivatives used in property-linked funds. A contract which was strictly covered would not give rise to a provision in any case. And a contract which was not covered would be illegal in a property-linked fund.
- 9.11 But perhaps the most common case relates to a contract which is covered but not strictly covered. By virtue of condition (b) of paragraph 9.3, a provision cannot arise for such a contract in a linked fund because its fortunes have no effect on the level of the free assets (since any change in its value is matched by an equal change in the total linked benefits payable to *policy holders*). By contrast, as noted in paragraph 6.5, a derivative in a non-linked fund which was covered but not strictly covered would in principle require a provision. Therefore, although the criteria for determining whether a contract is covered (or strictly covered) do not differ between linked and non-linked funds, the consequences of the absence of strict cover do differ between the two cases.

Responsibility for calculation of the provision

- 9.12 Responsibility for calculation of the provision rests with the directors. Even in a *long-term insurer*, it is not one of the long-term liabilities. As with the remaining ‘other than *long-term insurance business*’ liabilities, it will be liable to review by the auditors. However, for *derivative contracts* transacted ‘in connection with’ assets of the *long-term insurance fund*, it will often be appropriate for the *appointed actuary* to take account of the provision in his assessment of the long-term liabilities under rule 5.17, in accordance with professional guidance notes.

Overlap with the Resilience Test

- 9.13 Under some circumstances, there may be an element of overlap between the provision for adverse changes and the provision required in respect of *long-term insurance business* under rule 5.17. Double-counting of the provision is however unnecessary! To the extent that the provision for adverse changes relates to general market movements (as opposed to movements in one or two specific holdings), it may be notionally released in calculating (subsequently) the provision required under rule 5.17.

10. **Quasi-derivatives**

10.1 Certain more traditional types of instrument acquired in the normal course of trading (for example, convertible stocks and partly-paid *shares*), as well as traditional types of practice such as sub-underwriting, have the characteristics of derivatives. In addition, derivatives also exist in securitised form. To illustrate the latter point, there is little difference between investing in a bond whose maturity value is determined according to the level of some market index and transacting a *contract for differences* based on that index (especially if, in practice, it is unforeseeable that the notional principal representing the investment could be eaten away completely by adverse market movements). This section considers how all these ‘quasi-derivatives’ are dealt with by the *Valuation of Assets Rules* and what are the practical implications.

10.2 The aim of rule 4.13 is to make the treatment of ‘quasi-derivatives’ more transparent. Essentially (and with certain defined exceptions), a contract or asset is to be treated as having the effect of a *derivative contract* if it embeds an *option* or obligation to acquire, dispose of or convert an asset or provides for payments akin to those which would be made under a *contract for differences*.

Example HH

Examples of instruments which ‘have the effect of a derivative contract’

- (a) Partly-paid *shares*
- (b) An agreement to underwrite or sub-underwrite a *share* issue
- (c) Bonds convertible to equity
- (d) Stock lending and REPO agreements which do not satisfy the conditions set out in paragraphs (2) and (3) (or (4)) of rule 4.4
- (e) Instruments which provide an income (or maturity value) set by reference to fluctuations in the value of some specified asset or by reference to fluctuations in an index
- (f) *Futures contracts* and *options* funds

Examples of instruments which do not ‘have the effect of a derivative contract’

- (a) *Shares* (unless the rights conferred by the shareholding are such that the income or maturity value is partly or wholly determined by reference to the value of some specified asset or index)
- (b) Gilts issued by a state in Zone A
- (c) Holdings in *collective investment schemes* which fall under the *UCITS Directive*
- (d) Stock lending and REPO transactions which satisfy the conditions set out in paragraphs (2) and (3) (or (4)) of rule 4.4
- (e) Contracts for sale or purchase of assets (i.e. *securities*, land) within a defined period (the normal settlement period for on-exchange transactions in the case of *listed securities* and 20 working days in other cases)
- (f) Contracts for conversion of currency in connection with sale or purchase contracts of the type mentioned in the previous bullet point
- (g) Contracts for sale or purchase of equipment.

N.B. Neither of the above lists should be taken as exhaustive!

- 10.3 An asset having the effect of a *derivative contract* is an *admissible asset* if the corresponding (hypothetical) *derivative contract* would satisfy the conditions set out in paragraph 2.1. It is a permitted link if the corresponding hypothetical *derivative contract* would satisfy the conditions set out in paragraph 2.3.

Example II

A company buys an unlisted bond issued by a manufacturing company, whose maturity value is determined according to the value of FT-SE 100 on the maturity date.

This is not an *admissible asset* or permitted link. It has the effect of a *contract for differences* (of an admissible class) used in connection with a loan. But it is neither *listed* nor transacted with an *approved counterparty*. However, a similar product transacted with an *approved counterparty* would be admissible provided that the efficient portfolio management and reduction of risks criteria could be justified.

- 10.4 Where the conditions of paragraph 2.1 are satisfied, the value of the ‘quasi-derivative’ is, as usual, the current value (i.e. the market value in the case of a listed asset). Where the conditions are not satisfied, the ‘quasi-derivative’ has no value except in respect of any payments whose value is guaranteed. By virtue of rule 4.13(4), such payments are to be given an assignment value, as if they were *debts*.

Example JJ

A company buys a bond whose maturity value is equal to the product of

- (i) the issue price; and**
- (ii) the ratio of the price of gold on maturity and the price of gold at issue,**

with a guarantee that the maturity value will not be less than the issue price.

This product has the same economic effect as a *debt* (to repay the issue price) plus a *contract for differences* based on the gold price. The latter would not be admissible (since gold is not an *admissible asset*). Therefore the value of this instrument for solvency purposes would be the limited to the assignment value of a *debt* to repay the issue price.

- 10.5 The above examples are perhaps a little exotic. With more commonly met examples (such as listed convertibles, partly-paid *shares*, sub-underwriting), there will not usually be a problem over justifying that the conditions of paragraphs 2.1 or 2.3 are satisfied. Clearly, however, cases need to be examined on their merits. Where such instruments are used to an abnormal extent, in particular where they give rise to a significant level of gearing of the fund, there must be grave doubts as to whether this is consistent with efficient portfolio management. If not, they could only be valued in accordance with the rule in rule 4.13(4) described in paragraph 10.4.

Example KK

A company holds a listed convertible bond giving it the right to convert to a specified number of equity shares of the issuer during a specified period.

This is clearly an asset having the effect of a *derivative contract*, in accordance with rule 4.13(1)(c). It is equivalent to a vanilla bond held in connection with a pair of *options*, one to sell the bond and the other to buy equity, the *options* being exercisable either as a pair or not at all. The test set by rule 4.13(4) is whether the hypothetical *options* would satisfy the conditions set out in rule 4.12(2). It is easy to see that they would do so, provided that they were consistent with reduction of investment risks or efficient portfolio management. We would expect this to be justifiable in normal circumstances.

- 10.6 Where the embedded derivative could place the *insurer* under a liability to take some action, the question of a provision for adverse changes arises. Traditional practices do not appear inherently very likely to give rise to a material provision, however, although each case must be considered on its merits.

Example LL

An insurer sub-underwrites a new share issue.

The insurer has effectively granted the underwriter an *option* to sell a number of *shares* at an agreed price. Provided there is sufficient cash or 'near-cash' in the fund to cover the whole of the purchase, if the underwriter should exercise its *option*, a provision for adverse changes is not required. This is separate from the question of whether the *insurer* should make a prudent provision for the contingent liability it has taken on.

Structured products and the 'in connection with' and 'efficient portfolio management' tests

- 10.7 Instruments which are hybrid in form between loan and derivative, sometimes referred to as structured products, are commonly free-standing instruments, not used in connection with anything. Nevertheless, they may satisfy the 'in connection with' test, by virtue of rule 4.12(2)(b). They satisfy the test provided that once they have been notionally separated into bond element and derivative element, the latter can be considered as held 'in connection with' the former (for the purposes of reduction of investment risks or efficient portfolio management).
- 10.8 Such structured products are often used to provide a precise match to the *policy holder* benefits promised under long-term products such as guaranteed income or equity bonds. There is a tendency for these products to become ever more exotic, to the extent that it is rather difficult to decompose them hypothetically into a combination of basic instruments such as loans and options having the same economic effect. Nevertheless, this must in principle be done in order to ensure that the 'in connection with' and other tests are being observed. This is sometimes not very easy!

10.9

It is sometimes argued that a product which provides a precise match to the *policy holder* liabilities automatically satisfies the reduction of risks test. This is a fallacy. Precise matching may well be essential, in order to satisfy rule 2.3. However, as paragraph 4.8 above sets out, the impact of the use of a derivative structure on the *policy holder* risk must also be considered. If the effect of the derivative element is adversely to affect some aspect of the risk to *policy holders* in a significant way, that would cause the product to fail both the efficient portfolio management and reduction of risks tests.

Example MM

A company offers a guaranteed income bond which offers 11% income on the amount invested per annum for 5 years. The bond has a minimum maturity value of 20% of the original investment (less initial charge), when FTSE falls by 5% or more over 5 years. It Returns the original investment (less initial charge) if FTSE ends the 5 year period at or above its opening value. Between these two limits, the maturity value varies pro rata to the fall in FTSE. The insurer purchases a structured product which matches its policy holder liability closely.

The analysis should in principle be carried out on the structured product purchased by the insurance company rather than the *policy holder* benefit structure. In practice it may not matter much.

Clearly, the purchased structured product can be separated notionally into loan and derivative components. However, the derivative component cannot be regarded as reducing investment risks. Even though it allows the *insurer* to match its *policy holder* liability precisely, it certainly cannot be said to have a broadly neutral effect on the investment risks of *policy holders*. If the index falls slightly (unlikely on the basis of its past record, but far from inconceivable), the *policy holder* will be considerably worse off than if he had invested in the assets underlying the index.

Moreover, since the derivative component increases asset risk to the *policy holder*, it cannot be regarded as being for the purposes of efficient portfolio management.

Such a derivative would be inadmissible. A derivative having similar characteristics in a long-term linked fund would be illegal.

10.10

Notwithstanding the instrument illustrated in Example MM, rather similar instruments can be admissible (or permitted in a long-term linked fund). To assess this, the following steps are appropriate:

Step 1 - Identify a broadly comparable non-derivative investment strategy

As discussed above, the investment will not satisfy the efficient portfolio management or reduction of investment risks tests if it gives rise to a significant increase in the *policy holder's* risk. It is therefore appropriate to consider how the *insurer* might have constructed a broadly similar investment strategy without using derivatives. The *policy holder's* risk can then be compared for the derivative and benchmark non-derivative strategy.

Step 2 – Compare the risks inherent in the two strategies

The task here is to identify instances in which the derivative strategy under-performs the non-derivative strategy. It is quite likely to be the case that sometimes one out-performs, sometimes the other but that neither is clearly 'better' than the other. However, that is irrelevant. The test set out in paragraph 4.6 requires that any underperformance by the

derivative strategy should be either insignificant or not reasonably foreseeable.

In making the comparison of risks, it will usually be appropriate to consider how the strategies would have performed historically. However, it will hardly ever be appropriate to argue that because one strategy would have out-performed another historically, the risks of underperformance in the future can be ignored. As a general rule, historical data may be used to calibrate a statistical model of future performance. But where the future values of model parameters can reasonably be expected to be different from their historical counterparts, suitably cautious assumptions should be made.

Step 3 - Identify any reasons why the comparison is unfair to the derivatives strategy and whether such unfairness is the main reason for comparative under-performance

One popular technique is for derivatives strategies to incorporate a minimum performance guarantee, using some kind of embedded *option*. Such a guarantee cannot be provided free and will therefore give rise to some degree of under-performance. Its effect should in principle be stripped out before making the comparison above.

10.11 Bearing in mind the practical difficulties mentioned above, we would not object to a structured product which provides a precise match to *policy holder* liabilities being deemed to satisfy the 'in connection with' and efficient portfolio management tests provided that:

- (a) the analysis above has been carried out; and
- (b) either:
 - (i) any underperformance by the derivative strategy is either insignificant or not reasonably foreseeable;
 - or:
 - (ii) significant underperformance by the derivative strategy occurs only at levels of total investment return well above the risk-free rate and arises wholly or mainly as a result of the incorporation of a guarantee (or some similar benefit) amongst the benefits provided by the derivative strategy;

10.12 In making a comparison above between the performance of derivative and non-derivative strategies, it is always the total return to the *insurer* (after making appropriate allowance for tax and reasonable investment management expenses) which should be considered. If part or all of the investment risks under either strategy are assumed by the *insurer*, then it is the appropriate product allowance which the *insurer* would make to cover those risks which would be taken into account.

10.13 The above method of analysis relies on an assessment of the significance of underperformance. It is difficult to be very precise about what is significant. But under prevailing investment conditions, we would certainly regard a 20 percentage point underperformance over a 5-year term as significant in circumstances where the total return on the non-derivative strategy is at levels up to the risk-free rate. Under the same conditions, a 5%

underperformance could not reasonably be regarded as significant. Moreover, at very high levels of return, it might be reasonable to deem an underperformance above 20 percentage points to be insignificant.

Example NN

An insurer issues a 5 year stock-market bond linked to FT-SE 100, offering the following return on the initial investment (after deduction of initial charge):

If the index stays constant or falls, the initial investment will be reduced by the percentage fall in the index, except that the maturity value is guaranteed not to be less than 80% of the initial investment.

If the index rises by up to 100%, the initial investment will be increased by the product of the percentage rise in the index and 110%.

If the index rises by more than 100%, the maturity value will be 210% of the initial investment.

The insurer transacts a structured product with an approved counterparty which exactly matches these terms.

Where the index falls or rises by up to 100%, this product clearly satisfies condition (b)(i) of paragraph 10.11. Since a 100% rise over 5 years is significantly in excess of the risk free rate of return, the capping at 210% easily satisfies condition (b)(ii).

10.14 The conditions described in paragraph 10.11 are not intended to be an absolute requirement. Other structures may be admissible (or permitted) provided it can be shown from first principles that they satisfy the various tests.

11. **The effect of derivatives on admissibility of the underlying holdings**

11.1 As explained in **Guidance Note 4.1** on asset valuation, the approach in the *Valuation of Assets Rules* is to limit aggregate *exposure* to certain types of asset for solvency purposes, rather than to limit holdings in those assets. Where a *insurer's* aggregate *exposure* exceeds the prescribed limit, excess assets have to be left out of account. (**Guidance Note 4.1** covers the mechanics of this.) In principle, derivatives may have the effect of increasing or decreasing exposure to underlying assets; their effect must obviously be taken into account in assessing the aggregate *exposure*.

11.2 However, the *Valuation of Assets Rules* provide that it is unnecessary to consider changes in *exposure* resulting from *contracts for differences* based on well-diversified indices (e.g. FTSE futures). It would be most unlikely that such contracts could have a significant effect on underlying *exposure* to particular assets (e.g. to specific equities).

11.3 Rule 4.14 provides that, for the purposes of computing aggregate exposure:

- (A) where a *derivative contract* places an *insurer* under an obligation to buy certain assets, it is deemed to have bought those assets

- (B) where a *derivative contract* places an *insurer* under an obligation to sell certain assets, the sale is deemed to have taken place only if the contract is *listed* or if the sale is due within 12 months to an *approved counterparty*
- (C) where a contract gives the *insurer* an *option* or could oblige it to buy certain assets, it is deemed to have bought them if it is prudent to assume that they will be bought
- (D) where a contract gives the *insurer* an *option* or could oblige it to sell certain assets, it is deemed to have sold them only if the sale is due within 12 months to an *approved counterparty* and if it is prudent to assume that they will be sold
- (E) a *contract for differences* (other than one based on a well-diversified index) or a contract or asset having the effect of a *derivative contract* is treated in the same way as an appropriate combination of *options* or *futures contracts* having equivalent economic effect

11.4

The treatment of *futures contracts* is fairly straightforward. However, the treatment of *options* is more complex. One issue surrounds when it is prudent to assume something for the purposes of cases (C) and (D) above. The point here is that prudence has to be construed in the context of limiting aggregate *exposure*. Where the situation is unclear, it will be more prudent to assume higher *exposure* than lower *exposure*. Therefore for the purposes of Case C, it will generally be prudent to assume that the *option* to buy has been exercised. The only exception would be where the *option* was so far out of the money that it was clear that it would not be exercised. Similarly, for Case D, it will generally be prudent to assume that the *option* to sell would not be exercised. The only exception would be where the *option* was so far in the money that it was very unlikely that it would not be exercised.

Example OO

An insurer transacts a contract for differences with an approved counterparty under which it receives (pays) £1000 for every £1 rise (fall) in the value of ABC shares and also receives (pays) £1000 for every £1 rise (fall) in XYZ shares above the strike levels of:

ABC shares - £2.50
XYZ shares - £3.50

with the rise being determined on the basis of the market price in 6 months time.

Any payment by the insurer will be limited to a maximum reached when the share prices fall to

ABC shares - £2.00
XYZ shares - £3.00

The current share prices are:

ABC shares - £1.75

XYZ shares - £1.00

The analysis gets a little tortuous and can most conveniently be considered by imagining that the *insurer* had transacted two separate *contracts for differences*, one in respect of ABC *shares* and one in respect of XYZ *shares*. These are considered in Examples PP and QQ below.

The conclusion is that the effect of the *contract for differences* is to increase the current aggregate *exposure* of the *insurer* to ABC by £1750; there would be no increase in the *insurer's* aggregate *exposure* to XYZ.

Example PP – Company ABC – see Example OO for details

This contract has the same economic effect as the following combination:

- (a) a *futures contract* to purchase the *shares* (today) at the strike price (£2.50)
- (b) a (purchased) *option* to sell those *shares* at £2.00 per share to an *approved counterparty*
- (c) an agreement to sell the *shares* in 6 months time at the then current price, assuming that the *option* at (b) has not been exercised

Drawing on the considerations in paragraph 11.4, the *insurer* has to take into account the effect of hypothetical contracts (a) and (b) above for the purposes of computing current aggregate *exposure*. However, for the purposes of computing aggregate *exposure*, contract (c) is to be disregarded.

Therefore, under Case A of paragraph 11.3, it is necessary to assume that the shares have been purchased. On the other hand, if the conditions set out in Case D are satisfied, it may be possible to regard them as being subsequently sold. The hypothetical *option* (b) is due for exercise within 12 months with an *approved counterparty*. It therefore satisfies the first leg of the test in Case D. On the other hand, it would not be 'prudent to assume' that the *option* to sell the ABC *shares* would be exercised. The *share* price might easily recover above the exercise price of £2.

The conclusion, therefore, is that the effect of the *contract for differences* is to increase the *insurer's* aggregate *exposure* to ABC *shares* by £1750, the current value of 1000 *shares*.

Example QQ – Company XYZ - see Example OO for details

This contract has the same economic effect as the following combination:

- (a) a *futures contract* to purchase the *shares* (today) at the strike price (£3.50)
- (b) a (purchased) *option* to sell those *shares* at £3.00 per share to an *approved counterparty*
- (c) an agreement to sell the *shares* in 6 months time at the then current price, assuming that the *option* at (b) has not been exercised.

As in Example PP, the *insurer* is deemed to have bought the *shares*. Under normal circumstances, it would seem very unlikely that the market price of XYZ *shares* would exceed the exercise price on maturity of the contract. Therefore it would be 'prudent to assume' that the *option* to sell the XYZ *shares* would be exercised. For the purposes of

Case D, such *shares* would be assumed to be sold. The contract does not give rise to any aggregate *exposure* to XYZ *shares*.

- 11.5 It is not possible, simply to leave an asset out of account. All assets have to be assessed as to their effect on aggregate *exposure*. However, where an *insurer* holds an *option*, it is obviously not possible for it to be worse off than if he simply discarded the *option*!

Example RR

An insurer, with holdings in the equity of ABC company to the extent of 1% of its Business Amount, purchases a call option on the same equity in respect of a holding equivalent to 4% of its Business Amount. The exercise price is close to the current market price of the equity.

Case C of paragraph 11.3 applies. Suppose for a moment that the *option* has to be deemed to have been exercised. Under Case C, the exercise date of the *option* is not relevant. The *insurer* would be deemed to have bought the assets.

The aggregate *exposure* to ABC would therefore be 5%. 2.5% would be inadmissible. The *insurer* must leave out of account not only its 1% holding in ABC but also a further 1.5% of assets which would otherwise be admissible. Although the *option* would have a value, it would be unlikely to exceed the value of assets which would be admissible in the absence of the *option* but which are now to be left out of account on the grounds of excess aggregate exposure to ABC. In other words, the *insurer* holds an asset - which can never turn into a liability - which leaves it worse off than if it did not hold that asset!

Clearly, for the purposes of computing aggregate *exposure*, it cannot be sensible - let alone prudent - to assume that the *option* will be exercised in full. On the other hand, bearing in mind the argument in paragraph 11.4, it would certainly be prudent to assume that *exposure* is increased. The solution is to assume that the *option* is exercised in part, to the extent that the admissibility position is no less favourable than if the *insurer* simply disregarded the *option*. Following this analysis, the aggregate *exposure* in this example would be slightly in excess of 2.5%, the excess being equal to the current value of the entire *option*. The value of the *option* would be cancelled out by the value of the *admissible assets* left out of account.

Example SS

Same as Example RR, except that insurer has written a put option (rather than purchased a call option)

The analysis is more straightforward than Example RR. Again Case C of paragraph 11.3 applies. However, in this case, it is clearly prudent to assume that the *option* will be exercised. The aggregate *exposure* to ABC would be 5%. The *insurer* must leave out of account not only its 1% holding in ABC but also a further 1.5% of assets which would otherwise be admissible.

The effect on admissibility of closing out a derivative contract

- 11.6 While the closing out of a *derivative contract* eliminates the market risk associated with that contract, it does not of itself eliminate the credit risk to the original *counterparty*. In general therefore, closure will cancel the impact of the derivative on aggregate *exposure* to the underlying assets. But the *insurer's* aggregate *exposure* to the original *counterparty* will not be affected by closure.

11.7 Even where a contract is closed out with the original *counterparty*, the credit risk can not necessarily be taken to be eliminated. This will only be achieved if the closing-out transaction is drawn up in such a way as to provide for the legal right of offset between amounts due under the two contracts.

GUIDANCE NOTE 4.4

LINKED CONTRACTS

1. Introduction

- 1.1 The purpose of this guidance is to offer guidance on the interpretation of Chapter 3 Part II dealing with *linked long-term contracts of insurance*. [Deleted]
- 1.2 A linked long-term contract is one under which benefits are determined partly or wholly by reference to the value of specified assets or indices, such benefits being known as linked benefits. A contract offering both linked and non-linked benefits is a *linked contract*. All long-term *class III* (see **Annex 11.1**) contracts are therefore *linked contracts* as are some *class VII* contracts. But these are not the only ones. *Class IV* and *class VI* contracts may each offer linked benefits, as interpreted above, as may certain contracts commonly (but incorrectly) classified as *class I*. (This is discussed further in paragraphs 2.14 to 2.17.) Such contracts are therefore also linked contracts.
- 1.3 Linked benefits may be determined only by reference to the so-called ‘permitted links’, as set out in Part I (assets) and Part II (indices) of **Appendix 3.2**. In addition, the ‘permitted links’ must, where relevant, satisfy the conditions set out in rule 3.7. Frequently, the links are to the assets of an ‘internal linked fund’. However, this guidance is relevant whether or not the assets are maintained in such a fund.
- 1.4 This guidance applies to all *linked contracts*, whatever the *class* of business. However, the bulk of the ‘permitted links’ rules (described in sections 5 and 6 below) do not apply to linked *class VII* business (i.e. pensions fund management business); but the ‘permitted derivatives’ rules described in section 7 apply to all *linked contracts*.
- 1.5 The guidance is not intended to be a complete description of the rules governing *linked contracts*. Rather, it concentrates on those aspects which are relatively new or potentially problematical.
- 1.6 [Deleted]
- 1.7 The *FSA* expects an *insurer’s* systems and controls to pay due regard to this guidance. In particular it will be relevant to the responsibilities of the *appointed actuary* of the *insurer*. Furthermore, if a *insurer* were to choose to act in contravention of the guidance, we would expect it, as a matter of prudent management, to discuss the matter with us beforehand.

2 **Close Matching**

2.1 An *insurer* must hold assets whose value matches their unit liability as closely as possible. The corresponding provisions in Chapter 2 of the *Third Life Directive* were drafted with the intention of prohibiting mismatching of the reserves in respect of linked benefits. This ‘close matching’ test applies both to *property-linked* and *index-linked* (the ‘unit liability’) contracts. It applies to all *linked contracts* irrespective of whether they constitute contracts in the nature of investments.

2.2 As a general rule, where the benefits are linked to the value of certain assets, a *insurer* is not permitted to hold different assets and cover the mismatching risk by means of a reserve. However, in certain circumstances, it is permissible for the *insurer* to hold assets other than any which determine the unit liability provided that they are ‘assets of appropriate safety and marketability’ whose value matches those of the unit liability ‘as nearly as may be’. This arises commonly in the case of *index-linked contracts* and also where the unit liability is partly or wholly reinsured.

2.3 Moreover, the ‘close-matching’ test does not prevent surplus assets being kept within a linked fund (but see paragraph 3.6). Temporary and unplanned small shortfalls of assets which match the unit liability are also permitted provided that a satisfactory mismatching reserve is held.

Reinsurance of the unit liability

2.4 The rules do not explicitly restrict *reinsurance* of the unit liability under *linked contracts*. Nevertheless, certain restrictions flow implicitly from the ‘close matching’ requirement discussed above. The following paragraphs discuss 3 aspects of this requirement - ‘appropriate safety’ (paragraphs 2.5 to 2.10), ‘as nearly as may be’ (paragraph 2.11) and ‘appropriate marketability’ (paragraph 2.12).

‘Appropriate safety’

2.5 The right to receive reimbursement of the unit liability under a *reinsurance* contract cannot automatically be considered to be an asset ‘of appropriate safety’ because of the risk, however small, that the *reinsurer* will default. In particular, The *FSA* would not usually accept that a *reinsurance* contract from a *reinsurer* not supervised by an *EEA State* provided appropriate safety in this context, in the absence of additional guarantees such as the examples in paragraphs 2.6 and 2.7.

Deposit-back

2.6 It is clear that where the direct *insurer* arranges for *deposit-back* of the *reinsurance* premium and the contract is such that it has the legal right to retain the assets in the event of a *reinsurance* default, the required close matching can be achieved.

Reinsurance contract guaranteed by third party

- 2.7 As an alternative to *deposit-back*, the *reinsurer* may secure a third party guarantee from an *approved credit institution* which will enable the direct *insurer* to have recourse to that party in the event of a default by the *reinsurer*. This may satisfy the ‘appropriate safety’ test provided that the credit-worthiness of the guarantor is satisfactory and provided that the terms of the guarantee are such that there is no likelihood that the direct *insurer* would have any difficulty in obtaining reimbursement from the guarantor if it were needed. The *FSA* would not accept that a guarantee from anything other than an *approved credit institution* would provide ‘appropriate safety’.

Reinsurance business regulated in UK

- 2.8 The *FSA* would be prepared to accept that a *reinsurance* contract issued by UK-regulated *reinsurer* usually provides ‘appropriate safety’ for these purposes without any additional safeguards. This is not to say that such a contract can always be regarded as providing appropriate safety. If an *insurer* has good reason to doubt the credit-worthiness of the *reinsurer* in question, such a contract cannot provide appropriate safety without additional safeguards such as those mentioned above.

Reinsurance business established outside the UK

- 2.9 Outside the UK, practices as to the supervision of *reinsurance* vary considerably amongst *EEA States*. In particular, our understanding is that *pure reinsurers* are rarely subject to supervision outside the UK. The fact that the *reinsurer* is supervised (probably by virtue of writing *direct insurance business*) may provide some comfort. But unless it is clear that the financial security of the *reinsurer* is beyond reasonable doubt, we believe that some additional security (such as those mentioned in paragraphs 2.6 and 2.7 above) is necessary in order to satisfy the ‘appropriate safety’ test.

Reinsurance within the group

- 2.10 The *FSA* is not prepared to accept that the fact that the reinsurer is a member of the same group as the *insurer* of itself provides ‘appropriate safety’ in all circumstances. However, many of the common situations have been covered above. Additionally, where the *reinsurer* is a regulated subsidiary of the ceding *insurer*, it may be possible to satisfy the ‘appropriate safety’ test even without additional security.

‘As nearly as maybe’

- 2.11 In order to satisfy this requirement, the terms of the *reinsurance* contract must be such that the direct *insurer* would be able to call for reimbursement under the *reinsurance* contract whenever it was under an obligation to pay

benefits to the *policy holder* (including non-discretionary benefits on early surrender).

‘Appropriate marketability’

2.12 The condition in paragraph 2.11, together with ‘appropriate safety’, is also sufficient to ensure that the marketability is ‘appropriate’ in the particular case of *reinsurance*. However, in other cases it could not be assumed that assets which matched the liability ‘as nearly as may be’ were necessarily of ‘appropriate marketability’. Each case needs to be looked at on its merits.

2.13 *Insurers* should review all their arrangements for *reinsurance* of linked liabilities to determine whether or not they satisfy the ‘close matching’ test. The *FSA* is happy to give guidance on individual cases. If in doubt, it is recommended that the *insurer* discusses the situation with their supervisor, as there is a risk that they will be in breach of 2.3.

Linked contracts not in the nature of investments

2.14 By virtue of the interpretation of a *linked contract* in paragraph 1.2, a contract may be regarded as ‘linked’ even if it is not in the nature of an investment. For example, a *permanent health contract* which provides disability benefits in payment which are guaranteed to rise in line with the RPI would be an (*index*) *linked contract* and the close-matching rule described above would apply to the reserves held in respect of those benefits. The same applies for an RPI-linked pension or annuity in payment. (Indeed, these are *class III* contracts notwithstanding the fact that *insurers* may have traditionally reported such business as *class I*.)

2.15 The ‘close-matching’ rule described above applies to matching of all linked benefits. Therefore, in the examples quoted in the previous paragraph, the *technical provisions* covering, respectively, the RPI-linked PHI benefits in payment and the RPI-linked annuity payments must be closely-matched by appropriate *RPI-linked assets*. While the issue is not entirely free from doubt, The *FSA* considers that the reserves covering any of the following general types of benefit are subject to the close-matching rule:

- all linked benefits under *class III* contracts
- all linked benefits under any other *class* (principally but not exclusively *class VII*) of contract in the nature of an investment
- all linked benefits in payment under any *class* of contract

Under this interpretation, the reserves in respect of other types of linked benefit (for example, RPI-linked term assurance) are not covered by the ‘close matching’ rule. We would nevertheless expect *insurers* to maintain appropriate assets to cover such benefits.

2.16 There is an apparent practical problem in that *insurers* may not monitor on a continuous basis what their liabilities in respect of linked benefits in payment. How do they satisfy the ‘close-matching’ rule in practice? In such cases, we would expect that *insurers* will:

- re-assess their liabilities regularly (once per quarter may be sufficient depending on how quickly the book of business is evolving)
- hold an appropriate portfolio of index-linked instruments which provides a close match against the liabilities, as most recently assessed

2.17 For the avoidance of doubt, it may be helpful to refer here to the *FSA* reporting regime for *linked contracts*. Life assurance and annuity contracts which confer linked benefits (whether or not they also confer non-linked benefits) are correctly classified as *class III* business and should all be so reported in the *FSA returns* (albeit that many *insurers* have traditionally reported RPI-linked insurance and annuities as *class I*). All *permanent health contracts* and capital redemption contracts are however *classes IV* and *VI* respectively, whether or not they are linked. The disclosures specific to *linked contracts* (for example, paragraph 5 of **Appendix 9.4**) should be made for all *linked contracts*, not merely for those in the nature of ‘investments’.

3 The Valuation of Assets Rules

3.1 Where the benefits under a linked policy are determined by reference to the value of specific assets, those (‘property linked’) assets are exempt from the *Valuation of Assets Rules*. The corresponding unit liability does not count towards the *long-term insurance business amount*.

3.2 Where the benefits are determined by reference to an index, the index linked assets are subject to the *Valuation of Assets Rules*. However, index linked assets are only partly subject to the diversification rules imposed by virtue of rule 4.14 and **Appendix 4.2**. The *permitted asset exposure limits* set out in Part II of **Appendix 4.2** do not apply to index linked assets, but the *permitted counterparty exposure limits* do apply.

3.3 The corresponding unit liability counts towards the *long-term business amount*, but only for the purpose of assessing compliance with the *counterparty exposure limits*. There are, therefore, 2 versions of the *long-term business amount*, depending on whether compliance with the *permitted asset exposure limits* or compliance with the *counterparty exposure limits* is being assessed.

3.4 Where an *insurer* holds assets in connection with a *property linked benefit* but in excess of those required to match the unit liability, the excess assets are not property linked assets. They are therefore subject to the *Valuation of Assets Rules* for the purposes of assessing solvency (but not for assessing the amount of the unit liabilities). Similarly, excess holdings of assets over

index-linked liabilities lose their exemption from the majority of **Appendix 4.2**.

- 3.5 Material excesses (such as where an *insurer* holds its otherwise non-linked equity portfolio as excess assets in its equity-linked fund) would need to be revalued in accordance with the *Valuation of Asset Rules*. (The revaluation is on the proportionate holdings the excess represents and can be performed on an approximate basis if the linked fund is broadly invested.) A material excess is one which satisfies either of the following tests:
- (i) the value of the assets of the fund materially exceeds the unit liability of that fund; or
 - (ii) the total excess is material in the context of the *long-term business amount*
- 3.6 Notwithstanding the comments above, an *insurer* will commonly hold *linked assets* whose value exceeds the amount of the unit liability. Where a fund has current liabilities, other than to *policy holders*, the unit liability will be determined by the value of the *linked assets*, net of the current liabilities. The difference here is that the *insurer* needs the additional assets in order to match the unit liability. They are not ‘excess’ assets. Circumstances where this arises include the following:
- (a) *Debts* are due to brokers in respect of *linked assets* which have been purchased but where settlement has not yet taken place.
 - (b) The main *linked asset* is a derivative structure which has been collateralised by means of a loan which is re-invested by the *insurer* in money market instruments. In such a case, the money market instruments might or might not be *linked assets*, depending on how the contract with the *policy holder* had been constructed.
- 3.7 Where the *insurer* holds assets whose value mirrors that of a permitted index, it may not be immediately clear whether the assets are to be treated as property linked or index linked for the purposes of applying the rules. This is a point of some significance since the *Valuation of Assets Rules* apply in the second case, but not in the first.
- 3.8 There is a simple rule for determining this question. If the *insurer* bears the whole risk of *counterparty* default (so that *policy holder* benefits are wholly, determined by the performance of the index) then the assets are index linked. If, however, the contract is such that the benefits would be reduced (from those which would be calculated by reference to the index) to reflect part or all of the reduction in the value of the *linked assets* resulting from any *counterparty* default, then the assets are property linked.
- 3.9 The *insurer* may have more assets than are necessary to cover the *linked benefits* (for example, excess assets in an *internal linked fund*). As noted in

paragraph 3.6, there is an 'excess' only where the total assets net of current liabilities (for example, borrowing by an internal fund, *debts* due to brokers) exceeds the unit liability to *policy holders*.

4 **The required solvency margin**

4.1 If the *insurer* bears any type of investment risk, the *required solvency margin* is covered by rule 2.6(2). If it bears no investment risk, the appropriate rules are 2.6(3) and 2.6(4). Instances of an investment risk which the *insurer* may bear include:

- (a) the risk that a *counterparty* to a *derivative contract* may default on its obligations, or
- (b) the risk that a *reinsurer* may default on its obligations to *reinsure* the unit liability.

4.2 Where there is an investment risk, rule 2.6(2) applies only to that part of the linked liabilities which give rise to the investment risk. For example, where part of the linked liabilities is reinsured and an investment risk thereby arises, the 4% solvency margin applies only to the *reinsured* part of the liabilities.

4.3 As noted in section 3, the *insurer* always bears an investment risk in the case of *index linked contracts* (even if only a *counterparty* risk). In the case of *property linked contracts*, the *insurer* may or may not bear an investment risk, depending on the construction of the contract and the nature of any *reinsurance* arrangements.

4.4 The term 'bears an investment risk' is not defined in the rules. The point is of practical significance when considering whether an investment risk can arise for the *insurer* as a result of reinsuring the linked liability or from a stock-lending agreement.

4.5 As regards *reinsurance*, the *FSA* accepts that the techniques for satisfying close-matching set out in section 2 would also go a long way towards ensuring that no investment risk arises for the purposes of rule 2.6. In particular, barring special circumstances, the *FSA* accepts that the *insurer's* investment risk could be disregarded in the following circumstances.

- (a) *deposit-back* or guarantee by *approved credit institution*, as discussed in paragraphs 2.6 and 2.7; or
- (b) - *reinsurer* regulated in *EEA State*;
- no reason to suspect the security of the *reinsurer*;
- precise matching between unit liability and liabilities under the *reinsurance* contract; and

- the *reinsurer* itself holds assets which pass the close-matching test in respect of its liabilities under the relevant contract.

For the avoidance of doubt, the *FSA* regards the above conditions as sufficient conditions, rather than necessary conditions. Other sets of conditions may also be sufficient in particular circumstances.

- 4.6 The *FSA* considers that where stock-lending satisfies the close-matching requirements, as discussed in paragraphs 8.5 to 8.11 below, the *insurer's* investment risk can be disregarded for solvency purposes. Nevertheless, there can clearly be rare circumstances where the *counterparty's* likelihood of honouring a stock-lending agreement is called into question sometime after the agreement comes into effect, even though the 'appropriate safety' test had been satisfied originally. In such a case, the 4% solvency margin would apply.

5 **Property to which benefits may be linked**

- 5.1 This section describes the list of permitted links.

Transferable securities (other than derivatives) paragraphs 1&2 of Appendix 3.2

- 5.2 *Securities* are categorised as to whether they are:

- *listed* or *unlisted*; and
- *readily realisable* or not,

in both cases, as defined for the purposes of the *Valuation of Assets Rules*.

- 5.3 *Securities* which are *listed* and *readily realisable* may be held in a linked fund without limit. Those which are *unlisted* may be held up to the limit of 10% of the unit liability of the fund, provided that they are *readily realisable*. **Guidance Note 4.1** on the *Valuation of Assets Rules* gives more detail on how the *listed* and *readily realisable* criteria are to be interpreted.

- 5.4 In practice, the *FSA* may make a section 148 waiver allowing the use of *securities* which are not *readily realisable*, particularly within the context of a *collective investment fund* investing in such assets (see paragraph 5.6 below), provided that the *insurer* is able to satisfy us:

- that the liquidity of the linked fund investing in such assets will be satisfactory; and
- that there is some reasonable basis for pricing units, given that such investments are not *readily realisable*.

Collective investment funds - paragraph 5 of Appendix 3.2

5.5 A wide category of *collective investment fund* may qualify as permitted links. The term is not explicitly defined although it goes wider than *collective investment schemes*. The rules cover 2 categories of fund:

- schemes (whether in the form of unit trusts or open-ended investment company) which meet the requirements to be a *UCITS* (irrespective of whether they have applied for and been granted the ‘single passport’), as set out in the *UCITS Directive*: and
- other *collective investment funds* which satisfy certain additional requirements.

5.6 The additional requirements to be satisfied by non-*UCITS* funds are:

- they invest in assets all of which are themselves permitted links;
- the holdings may be readily sold to or purchased from the managers at a price which represents net *asset* value;
- the sale or purchase price is published regularly; and
- the *linked contracts* have been marketed in accordance with any restrictions which apply to the marketing of the *collective investment funds* unless such funds represent less than 10% of the unit liability under the *linked contracts*.

Funds which are listed but not permitted (or recognised) under the Financial Services and Markets Act

5.7 All authorised or recognised unit trusts fall under one or other of the criteria of paragraph 5.5 above. However, the criteria of paragraph 5.6 go wider than that and include *collective investment schemes* which are regulated offshore but which are not ‘recognised unit trusts’. Some of those schemes originally qualified as permitted links by virtue of being listed on an EC stock exchange. However, they are very unlikely to meet the definition of *readily realisable* even if *listed*. Therefore such schemes need to qualify under the criteria of paragraph 5.5 to retain their status as permitted links (without limit). (They may of course be eligible to be treated as *listed securities*, not *readily realisable*. In this case, they would be permitted links, subject to the 10% limit described in paragraph 5.3.)

Linked funds of another insurer

5.8 The *FSA* believe that a linked fund of another *insurer* would usually qualify under paragraph 5(b) of **Appendix 3.2**. This is of practical significance since a number of *insurers* offer ‘self-invested’ plans where the *policy holder* makes his own investment arrangements. Some may wish to expose

themselves to the investment performance of an *insurer* other than the plan provider.

- 5.9 However, there is a potential problem in this area. Except where the contract between *policy holder* and first *insurer* is a *class VII* managed pension contract, the *FSA*'s considers that the second *insurer* would be in breach of rule 1.3 if it accepted such funds for investment; such activity is neither *insurance business* nor an activity directly arising from that business. (This issue does not however arise if the first *insurer* reinsures the investment liability to the second *insurer* under a *contract of insurance*.)

Debts - paragraph 7 of Appendix 3.2

- 5.10 Not all *debts* are permitted links. Nevertheless, loans to investment firms may be assets of a linked fund.

Derivatives and quasi-derivatives – Rule 3.7

- 5.11 *Derivative contracts* may be used in linked funds, subject to the special considerations described later in section 7. Contracts or assets which have the effect of a *derivative contract* may be used only if the corresponding (hypothetical) *derivative contract* would be a permitted link. Guidance on the types of contract which are considered to have the effect of a *derivative contract* is given in **Guidance Note 4.2** dealing with derivatives.

Broker funds - paragraph 11 of Appendix 3.2

- 5.12 *Collective investment funds* managed by *intermediaries* and accessible only through the medium of a linked life policy ('broker funds') are unlikely to satisfy the requirements described in paragraph 5.5. Nevertheless, these can still be permitted links by virtue of paragraph 11 of **Appendix 3.2** which sets a condition that the *insurer* must accept responsibility for errors and omissions of the *intermediary* towards the *policy holder*. The 'look-through' requirement described in paragraph 5.13 has now been applied to these funds.

Look-through – Rule 3.7

- 5.13 A look-through rule applies to *securities* (other than those which are *listed* and *readily realisable*), to *collective investment funds* (including broker funds) and to *debts* due from *approved credit institutions* and *investment firm* to determine whether the link is permissible. However, *collective investment funds* 'falling within the *UCITS Directive*' are exempt from look-through.

Bank accounts with returns linked to an external reference value

- 5.14 It is not permitted to link to an account at a bank, for example whose balance varied by reference to the value of assets which were not themselves permitted links.

Collective investment funds investing in non-permitted link.

- 5.15 Similarly, it is illegal to link to *collective investment funds* (other than *UCITS*) which invest in property which would not itself be a permitted link. One such example would be where a unit trust (other than a *UCITS*) invested directly in gold or other commodities.

Funds ‘falling within the UCITS Directive’

- 5.16 The *FSA* take the view that this phrase (which occurs in paragraph 5(a) of **Appendix 3.2** and which determines whether or not look-through is necessary) refers to those schemes which fulfil the minimum requirements set out in that Directive to receive the ‘single passport’, whether or not they have applied for that status. The *FSA* takes the view that all UK-authorized funds classified as *securities* funds ‘fall within’ the Directive and all others fall outside.

Futures and Options Funds (FOFs)

- 5.17 FOFs are subject to the look-through requirement. A particular issue concerns the use of derivatives within a FOF. Provided this is consistent with the interpretation of efficient portfolio management or reduction of investment risks set out in **Guidance Note 4.2** (and satisfies all the other conditions which apply to *permitted derivative contracts*), this would not prevent a FOF from being a permitted link. Geared futures and *options* funds (GFOFs) seem very unlikely in practice to satisfy those conditions and therefore to be a permitted link.

Transitional provisions in respect of linked contracts issued before July 1994

- 5.18 In the limited number of cases where the *1994 Regulations* forbid linkage to an *asset* or an index which was a permitted link under the *1981 Regulations*, that linkage may nevertheless continue in respect of contracts entered into before 1 July 1994 or in pursuance of a contract subsisting at 1 July 1994.

6 Permitted indices for linked contracts

- 6.1 There is no approval of any specific stock market indices; the rules set out criteria which an index must satisfy in order to be a permitted link.
- 6.2 Equity indices on the basis of which index *options* or futures are traded on a regulated market qualify by virtue of sub-paragraph (c) of the definition of *approved index* in rule 11.1. The main indices of other significant stock markets will satisfy the conditions of sub-paragraph (a). While linkage to a matched basket of equities can give a roughly comparable effect to linkage to other indices which do not satisfy the above-mentioned criteria, it would be a

breach of the permitted links rules to determine benefits by reference to such an index itself, rather than by reference to the actual equities.

- 6.3 The UK Retail Prices Index and analogous indices in other Zone A states are permitted indices. The correct classification of RPI-linked investment contracts, such as annuities, is *class III* rather than *class I*, notwithstanding the traditional view that they belonged in *class I*. (Naturally, such contracts are also required to be reported as *linked contracts* in the *FSA returns*.)

7. **Special consideration regarding the use of derivatives (and quasi-derivatives) in linked funds**

- 7.1 Derivative instruments are permitted links only if they satisfy each of the seven conditions set out below:

- (a) are listed or transacted with an *approved counterparty*
- (b) are capable of being readily closed out
- (c) are for the purposes of reduction of investment risks or efficient portfolio management
- (d) satisfy the ‘in connection with’ test
- (e) are based on underlying assets which are themselves permitted links
- (f) are covered
- (g) satisfy the prescribed pricing basis.

- 7.2 The conditions are very similar to those which determine whether or not a derivative in a non-linked fund is an *admissible asset*. Guidance can be found in **Guidance Note 4.2**. There is however one significant difference between the use of derivatives in linked and non-linked funds. Use in a linked fund of a derivative which did not satisfy the conditions in paragraph 7.1 above would be a breach of rule 3.7.

Margining and collateralisation

- 7.3 We encourage *insurers* to margin or collateralise their *derivative contracts* wherever appropriate as a means of reducing credit *exposure* of the fund to the *insurer’s counterparty*. (Indeed, in some cases this may be a necessary pre-requisite for a contract to count as reduction of risks or efficient portfolio management.) However, margining cannot under any circumstances legitimise the use of a contract which is not a *permitted derivative contract* and whose use in linked funds is, therefore, a breach of the rules.

- 7.4 The use of *derivative contracts* in linked funds, falling within the category of *permitted derivative contracts*, is a permitted link. However, the use of

margined *derivative contracts* in linked fund. is not permitted, unless such contracts are *permitted derivative contracts*.

Warrants

7.5 *Warrants* are *options* and, as such, are covered by the general rules on derivatives described above. However, some fund managers have habitually used *warrants* to a fairly limited extent, without necessarily having sufficient cash in the fund to exercise the *warrant*. They have asked whether this practice may continue.

7.6 On the assumption that the terms of the *warrant* can never place the holder under an obligation to exercise, the cover requirement does not apply. However all the remaining conditions mentioned in paragraph 7.1 need to be considered. In particular, excessive use of *warrants* to gear the fund would fail the 'efficient portfolio management' test. We do not propose to lay down hard and fast rules. But a small single-figure percentage of the net assets of the fund invested in *warrants* which were in the money or not too far out of it seem most unlikely to raise any concerns about breach of that test. Even *warrants* which were a long way 'out of the money' could satisfy this test if issued free.

Quasi-derivatives

7.7 A further condition is imposed on permitted links in respect of instruments which have the equivalent effect to *derivative contracts*. Such instruments, of whatever legal form, may now be permitted links only if the effect is equivalent to that of a *permitted derivative contract*. Thus, for example, an instrument which had the effect of a highly geared *derivative contract*, whose use was not consistent with efficient portfolio management, could not be a permitted link even if it took some other legal form - say, that of a *listed security*.

7.8 Some *securities* (for example equity *shares* in gold mining companies) have a rather similar effect to *derivative contracts*. The question has arisen whether such *shares* 'have the effect of' a gold future; the trading price of the *shares* will be fairly highly correlated with the price of gold. It is clear, however, that these *shares* do not satisfy the criteria in the rules for 'assets which have the effect of a *derivative contract*'. This is the right result. Their effect may be similar to that of a derivative. But it is not equivalent since the *share* price would also be expected to depend significantly on factors internal to the company.

8 Special considerations regarding the use of stock-lending and repo agreements in linked funds

8.1 Neither stock loans nor REPO transactions are explicit permitted links. It is therefore appropriate to consider how such instruments may be used in linked

funds and what issues arise. The first point to consider is what are the permitted links. The following analysis assumes that:

- At time 1, the assets of the linked funds are listed *securities*.
- At time 2, the *securities* have been sold pursuant to a REPO agreement. As part of that agreement, a forward contract has been transacted with the same *counterparty* for repurchase of the *securities*. A commission has been negotiated to be paid by the *counterparty*.
- At time 3, the *securities* have been repurchased and the linked fund has also benefited from the commission.

In reality, there would of course be other assets in the linked fund.

8.2 There are two variants, described in below. For either variant, a very similar analysis can be carried out to deal with other analogous transactions. such as:

- traditional stock-lending agreement where collateral (e.g. letter of credit, CREST DBV, charge over assets) is offered rather than cash to effect the outward transaction; or
- agreement where the commission is accounted for by way of adjustment to the purchase or repurchase price and not paid separately.

The Two variants

Variant A: Fund follows the fortunes of the REPO

Time period	Link	Close match
1	<i>Securities</i>	Perfect match
2	Cash + bought future + accrued income	Perfect match
3	<i>Securities</i> and income	Perfect match

Variant B: Link always to 'permanent' assets of the fund

Time period	Link	Close match
1	<i>Securities</i>	Perfect match
2	Cash + bought future + accrued income	Perfect match

3	<i>Securities + income</i>	Perfect match

Analysis of Variant A: Fund ‘follows the fortunes’ of the REPO or stock loan

- 8.3 Variant A implies that the investment risk (of loss on the REPO) is borne by the fund. It is permissible only if the undertaking of REPO transactions is consistent with the policy conditions and with the stated investment philosophy of the fund; and if the forward (for repurchase) constitutes a *permitted derivative contract*. The *FSA* believes that the conditions necessary to justify the latter status are likely to be satisfied in practice although it is the responsibility of the *insurer* either to lay down appropriate general conditions which provide the necessary justification or else to verify on a case by case basis.

Analysis of Variant B: Link always to ‘permanent’ assets of the fund

- 8.4 Variant B implies that the investment risk of the transaction is borne, partly or wholly, outside the linked fund. Since, during period 2, the *insurer* no longer holds the assets to which the *policy holders'* benefits are linked, the question arises of whether the ‘close-matching’ test discussed in section 2 is satisfied.
- 8.5 We do not believe that it is likely to be difficult to justify satisfying the close-matching test for traditional forms of stock-lending (or similar REPO), provided that accepted best practices are followed. Under the standard types of stock-lending agreement, the loans are made to institutions which are regulated by the *FSA*. Moreover, they are fully collateralised either by *securities* which are not unduly volatile (relative to movements in the value of *securities* being lent), or by a guarantee from an *approved credit institution*. Further, they are returnable at very short notice. Provided that stock-lending meets these conditions, we believe that the assets held by the *insurer* are capable of satisfying the ‘close-matching’ test. Where loans are made to institutions not subject to regulation by the *FSA*, *insurers* should satisfy themselves that the arrangements provide equivalent safety in all respects to that inherent in stock-lending to *regulated institutions*.
- 8.6 However, collateral whose value may diverge sharply from the value of the stock lent (e.g. a package of volatile equities as collateral for gilts), as a result of normal market fluctuations during the lifetime of the loan, should not be accepted. Some divergence in value between stock lent and collateral is to be expected. Regular (e.g. daily) adjustment of the collateral in line with market movements will of course mitigate this problem considerably. Moreover, collateral should be *readily realisable*. Otherwise, the assets covering the liability (that is, the promise to repay under the stock-lending agreement) cannot be considered to be ‘assets of appropriate safety and marketability’.

- 8.7 As a general rule, collateral should be diversified, using the test at rule 4.4(4)(b)(ii) ('not more than 15% exposure of the collateral to any one issuer or group') as a benchmark. The diversification test may be performed on the aggregate of collateral received by the fund, rather than separately for each deal. It must in principle be performed separately for each fund (although a *insurer* might reasonably choose to pro-rate its collateral across a number of funds).
- 8.8 In the UK, the gilt REPO market is fairly new. REPO arrangements for other *securities* may also in due course be commonly used in parallel with stock-lending. In principle, the rules on *linked contracts* should provide a level playing field for stock-lending and REPO arrangements. The considerations outlined in the previous four paragraphs for stock-lending should apply to REPO also. However, a few points are worth highlighting.

Fixed period stock-lending and REPO

- 8.9 We understand that fixed term asset exchanges are likely to be more common in the REPO market than the 'return on demand' arrangements which are usual in current stock-lending agreements. Assets which have been REPO'd to another party for a matter of weeks or months can, in isolation, hardly be considered to be 'of appropriate marketability' (from the point of view of the linked fund) during that period.
- 8.10 It is legitimate to take a view on marketability in the context of the total investments of that type. For example, a fixed interest fund which REPO'd 5% of its medium term gilts for a fixed period of 3 months but had no other REPO or stock-lending arrangements in place might reasonably be regarded as containing 'appropriately marketable' *securities*; while this could not be said if the corresponding percentage were 25%. Each case will need to be considered on its merits. But the general principle is that fixed period REPO or stock-lending arrangements of more than a few days needs special justification.

Covered transactions

- 8.11 Another point which stands out to a greater extent for REPO than for stock-lending (although the principle applies equally) is that the transaction must be covered (at least to the extent prescribed in rule 4.4 in respect of transactions covered by the *Valuation of Assets Rules*) at all times. Otherwise, the assets of the fund fail the 'as nearly as may be' and 'appropriate safety' tests. The considerations are very much the same as those for covered derivatives transactions, discussed in **Guidance Note 4.2**. Clearly, a *insurer* which receives cash in exchange for a gilt REPO is permitted to invest that cash. But it may only make investments which are guaranteed (barring unforeseeable circumstances) to deliver approximately enough cash to repurchase the gilts in accordance with the REPO agreement. Deposits at credit institutions or short-term fixed interest securities issued by

organisations of good credit standing seem easily the most likely investments to satisfy the 'as nearly as may be' and 'appropriate safety' tests in these particular circumstances.

Stock-lending/REPO and policy holders' reasonable expectations

- 8.12 For either variant, it is of course necessary to ensure that *policy holders'* reasonable expectations must be satisfied. The extent to which the long-term fund or the linked *policy holders* bear the investment risk of a *counterparty* default must be transparent. (Admittedly, this risk should usually be a very limited one in the case of stock-lending or REPO transactions which comply with the guidance above.) Where the linked *policy holders* bear the whole of the investment risk (assuming this to be consistent with the investment philosophy of the fund), they should receive the whole of the recompense (net of appropriate fees and expenses). Even where the whole of the risk of *counterparty* default is being borne outside the fund, it is appropriate for the linked fund to receive a significant portion of the net recompense. This is because the *linked assets* have been earmarked for the benefit of the linked *policy holders*, albeit that they are not legally ring-fenced; fairness demands that the linked *policy holders* receive a reasonable share of any profits deriving from their use. Finally, under no circumstances could any part of the profits (as opposed to payment of fees or reimbursement of expenses) from stock-lending or REPO transactions on long-term assets be credited outside the *insurer's* long-term fund. In the *FSA's* view, this would represent a clear breach of rule 3.2.

9 Diversification of assets

Explicit diversification requirements

- 9.1 As a general rule, there is no requirement for diversification of assets in linked funds. There are some explicit exceptions, however. *Securities* which are unlisted may not account in aggregate for more than 10% of the *linked benefits* under a contract. A similar percentage limit applies to holdings in *collective investment schemes* other than:

- those qualified to be *UCITS*; or
- those which have been marketed to the *policy holder* in accordance with the marketing rules which apply to the *collective investment schemes* in question.

Implicit diversification requirements derived from marketing material

- 9.2 There are also some important implicit requirements for diversification, derived from the wording of the marketing material used. In assessing any possible breach of *policy holders'* reasonable expectations in this area, the *FSA* would of course pay attention to the letter of the wording. But it would equally pay due regard to its sense.

9.3 For example, a *insurer* offers a *linked contract* which is designed to deliver income of 7% per annum net. Inspection of the marketing material reveals the following statement, which is given reasonable prominence:

‘The fund will be invested in assets offered by major financial institutions. In the unlikely event that one of these institutions defaults on its obligations, you may receive less than promised above.’

9.4 We consider that such wording, in particular the use of the phrase ‘major financial institutions’ conveys an expectation of a reasonable level of diversification. One *counterparty* would be completely unacceptable in this case. It would be even less acceptable if that *counterparty* turned out to be a *connected company* of the *insurer*, however major a financial institution that *connected company* happened to be.

Counterparty exposure and derivatives

9.5 There may also be an implicit requirement for diversification of *counterparty exposure* arising from the use of derivatives, in particular where derivatives are used to provide a precise match to the *promised policy holder* benefits. The situation is not entirely straightforward as not all *linked contracts* which use derivatives to provide precise matching need the *counterparty* risk to be diversified (although this may still be a sensible course in some cases, even if not absolutely required by the rules). To distinguish between the cases, it is necessary to go back to the first principles governing use of derivatives in linked funds set out in **Guidance Note 4.2**.

9.6 As set out in paragraph 7.1 above derivatives may be permitted links only if they satisfy a number of conditions, including the rule that they must be used only for the purposes of reduction of investment risks or efficient portfolio management. According to that interpretation, if the use of derivatives brings with it any significant additional risk, such use is incompatible with ‘reduction of risks’ or ‘efficient portfolio management’, even if other risks are reduced.

9.7 A significant risk is one where there is a reasonably foreseeable risk of significant loss, either to the *insurer* or to the *policy holder*. It follows from this that:

- where a *insurer* uses derivatives to match benefits under *index linked contracts*, *counterparty* risk diversification is necessary only to ensure that the matching derivatives are fully admissible and to ensure that the *insurer’s* solvency position is not significantly affected.
- where a concentration of *counterparty* risk is inherent in (or usual for) the type of contract in question and use of derivatives gives rise to

essentially the same *counterparty* risk, *counterparty* risk diversification is not required.

- 9.8 Where there is significant *counterparty* exposure, an assessment must be carried out of whether or not it is the use of derivatives which gives rise to such *exposure*. For a *property linked contract*, ‘significance’ is to be viewed in the context of the size of the linked fund (i.e. the effect of a *counterparty* failure on the *policy holder* benefits). The threshold of significance will vary according to the nature of the contract.
- 9.9 A fund where the benefits are linked to the performance of the FTSE index would not (if invested in the equities themselves) have built up *counterparty exposures* beyond a few per cent of the value of the fund, determined by the market capitalisation of the biggest companies contributing to the index. Where derivatives are used to replicate the index, *counterparty exposure* of a similar size (say 5% of the value of the fund) would therefore be regarded as significant.
- 9.10 At the other extreme, a *insurer* might offer a ‘ABC Bank fixed interest plus’ fund, offering (assuming that ABC Bank meets its obligations in full) something close to the market rate for fixed interest contracts, together with, small participation in the upside of equity markets. Such a contract would probably rely on use of derivatives. In substance, the benefits are very close to an ‘ABC Bank fixed interest fund’ which would, of course, be a perfectly acceptable property linked fund, even without any diversification of *counterparty exposure*, if properly explained to prospective *policy holders*. In the case of such a ‘fixed interest plus’ fund, therefore, although there is concentration of *counterparty risk exposure*, it is reasonable to conclude the use of derivatives is incidental to this concentration.
- 9.11 The following assessment procedure appears to be a practical one for assessing whether the derivatives have given rise to significant *counterparty* risk:
- First, consider how the benefits could be provided if derivatives were not used and what would be the resulting *counterparty exposure*.
 - In cases where the precise benefit structure can be achieved only with derivatives, consider the *counterparty exposure* (in the absence of derivatives) under broadly equivalent benefit structures provided without use of derivatives. (Such a broadly equivalent structure must exist or else there is no real prospect of satisfying the ‘efficient portfolio management’ or ‘reduction of risks’ tests.)
 - Finally, compare the *counterparty exposure* in the ‘with derivatives’ and ‘without derivatives’ cases. It will be apparent whether use of derivatives has given rise to significant additional *counterparty exposure* or whether such exposure would exist without derivatives:

9.12 Examples of contracts where the use of derivatives does - or does not - give rise to significant *counterparty* risk are at paragraphs 9.9 and 9.10 above. In practice, structures intermediate between these two extremes are common; some of the *counterparty* risk concentration may be inherent in the benefit structure while use of derivatives gives rise to additional concentration of risk. While it would be theoretically possible to attempt to apportion the risk between these two causes, we do not recommend this as a practical procedure. Nor would we welcome the opportunity of giving an opinion on particular cases. In such cases, the *FSA* suggests that the *insurer* takes the view that the whole of the *counterparty* risk needs to be diversified.

9.13 Although the above paragraph recommends erring on the side of *counterparty* risk diversification, this still does not mean that risk diversification is necessary for all contracts which use derivatives for precise matching. We suggest the following rule of thumb. A contract may be considered to be a 'fixed interest contract' if the benefits approximate to the benefits which would be receivable if the fund invested in appropriate fixed interest *securities*. 'Fixed interest contracts' which use derivatives will therefore not require *counterparty exposure* reduction techniques under the 'derivatives rules' - although such techniques may be necessary for other reasons, for example to reflect what the *policy holder* has been told, or not told, about the nature of the risks.

9.14 In the absence of special justification, contracts

- which use derivatives; and
- where (in the absence of *counterparty exposure* reduction techniques) it is reasonably foreseeable that the return will be less than that of 'fixed interest contracts'

will require such techniques. In this context:

- 'approximate to' means that the gross redemption yield will not be more than 1 percentage point less, as far as can reasonably be foreseen, than the rate for a fund which invests in appropriate fixed interest *securities*
- 'benefits receivable' need only be considered at maturity date for a fixed period bond but need to be considered on any day where switches are permitted from the respective linked fund to another fund
- 'appropriate fixed interest securities' would be *securities* issued by sovereign or supra-national issuer, denominated in the appropriate currency and of similar term to the length of the contract.

Management of risk concentrations

- 9.15 Where derivatives naturally give rise to a *counterparty exposure* which is significant (in the above terms), this must be managed appropriately to allow the 'efficient portfolio management' test to be satisfied. There are various techniques for this, including margining and collateralisation. However, these techniques are effective for these purposes only if they achieve:
- substantial risk diversification; or
 - transfer of *counterparty* risk from the original *counterparty* to a 'risk free' sovereign or supranational issuer (e.g. collateralisation by UK gilts).
- 9.16 In this context, 'substantial risk diversification' means that the additional *counterparty* risk arising from use of derivatives must be reduced as far as practicable. Residual *counterparty exposure*, after risk diversification, to the extent of 20% of the value of the fund could be acceptable but:
- only just acceptable; and
 - acceptable only if it would be unduly onerous to reduce it further.
- 9.17 It would be reasonable to take into account the size of the fund in assessing whether or not a further reduction in maximum *counterparty exposure* was unduly onerous; but a small fund is not entitled to ignore the 20% limit on the grounds that its small size means that diversification poses severe practical problems.
- 9.18 For example, consider a contract where derivatives are used to give a precise match to the benefits promised, and
- where the contract was not a 'fixed interest contract', in the terms mentioned in paragraph 9.14 above;
 - where use of derivatives unarguably gives rise to significant *counterparty* risk concentration: and
 - where, on reasonable assumptions, the maximum single *counterparty exposure* was expected to be between 40% and 60% of the net value of the fund and other *counterparty exposures* would be insignificant.

As noted in paragraph 9.12 above, the *FSA* would not encourage *insurers* to attempt to attribute the single *counterparty exposure* between 'caused by derivatives' and 'not caused by derivatives'. Further, the *FSA* believes that it will not usually be unduly onerous to arrange for margining and spread the margined amounts amongst *securities* issued by 4 or 5 different issuers. That should mean that the maximum *counterparty* concentration arising from derivatives would not be expected to exceed 12% of the value of the fund.

Fallacies

- 9.19 It has been argued that the ‘efficient portfolio management’ test is automatically satisfied if the *policy holder* has been told that there will be significant *counterparty exposure* as a result of the use of derivatives. This is fallacious. The test is an independent one and therefore does not depend on what the *policy holder* has or has not been told. (By analogy, the fact that a *policy holder* may have been told that his benefits will be linked to the price of gold does not make gold a permitted link)
- 9.20 It has also been argued that there would normally be 100% exposure to a particular *counterparty* in the case of a property linked deposit fund; and that therefore 100% exposure to a banking group in the case of a property linked fund which uses derivative structures to give equity-like performance is equally acceptable. This is also fallacious. Derivatives are required to satisfy the above-mentioned tests. The requirements derive from the *Third Life Directive* and cannot be waived.
- 9.21 Further, it has been argued that where the *counterparty* has a high credit rating, there is no need to consider the *counterparty* risk. Again, this is a fallacy. The mathematical expectation of loss is not the key determinant of ‘risk’ to be taken into account here. Even though a highly-rated *counterparty* is most unlikely to fail, if the linked fund is substantially or completely exposed to that *counterparty*, the effect on *policy holder* benefits will be catastrophic. While it would be perfectly reasonable to use credit rating to decide which *counterparties* to deal with and for the purpose of setting maximum *exposure* limits, it is not reasonable to disregard the risk completely. A sensible spread of *exposure* amongst *counterparties* of acceptably high rating will strike a reasonable balance between the competing objectives of maintaining *counterparty* quality and keeping the consequences of a single catastrophic failure within acceptable bounds.
- 9.22 There are two other points worth mentioning. First, *counterparty exposure* reduction does not necessarily mean ‘removal’. It is acceptable to have some *counterparty exposure* to the derivatives *counterparty*. Second, *counterparty exposure* reduction does not mean ‘transfer’. Arranging for margin (or collateral), only to invest it wholly in the *securities* of one particular issuer no more achieves efficient portfolio management or reduction of investment risks than leaving the contract unmargined.

Counterparty exposure arising from use of derivatives in asset management

- 9.23 High concentrations of *counterparty exposure* do not usually arise from the traditional use of derivatives in *asset* management, for example:
- to effect an immediate switch of *exposure* from one asset *class* to another: or

- to hedge a position with an exchange traded *option*.

Even if a major portion of the fund's assets is being switched or hedged, the transaction is normally fairly short-term in nature which limits the scope for large *exposures* to build up. However, the principle is the same as that discussed above. A significant *exposure*, interpreted as in paragraph 9.16 above, would be inconsistent with efficient portfolio management

Counterparty exposure in property linked contracts and the ‘reduction of risks’ test

9.24 The *FSA* considers that significant *counterparty exposure* was inconsistent with the ‘permitted links rules’ where derivatives are being used for efficient portfolio management of equity-type assets. However, where a derivative is genuinely being used to reduce risks, a significant *counterparty exposure* could easily arise if the adverse event insured against actually comes to pass. Although this *counterparty* risk would not exist but for the use of derivatives, the fund will be no worse off than if the derivative had not been transacted. In such cases, there is no absolute requirement to diversify the *counterparty* risk in advance. However, we would consider that some diversification mechanism (such as margining) is a normal prudent practice. And to the extent that the derivative underpins some *non-linked benefit* offered under the contract (such as a guarantee of investment performance), it would be essential.

9.25 While it is sometimes not very clear whether a contract is for the purposes of efficient portfolio management or reduction of risks, the *FSA* is clear that use of derivatives which introduces new risks does not fall into either category. Thus, for example, an asset structure which provides:

- performance in line with FT-SE 100, apart from
- a floor on performance if FT-SE falls, and
- concentrated *exposure* to the derivatives *counterparty*

is not justifiable under these headings, except as a small component of a diversified fund. Although market risk is being reduced, this does not provide justification for the significant increase in *counterparty* risk (compared with ‘traditional’ investment in a basket of equities) to be overlooked.

Counterparty exposure and index-linked or non-linked contracts

9.26 The remarks in the preceding paragraphs apply mainly to *counterparty exposure* in the context of property linked funds. Where a ‘guaranteed’ or similar product is arranged as an *index-linked* or *non-linked contract*, the significance of any *counterparty exposure* has to be viewed in the context of the totality of the *non-linked assets*. An *insurer* should, as a matter of course,

have a policy on the maximum acceptable *counterparty exposure* for any *counterparty* it deals with. Provided this is a prudent limit, in the context of the considerations mentioned in paragraph 9.7 above, *counterparty exposure* is unlikely to give rise to failure of the ‘efficient portfolio management’ or ‘reduction of risks’ tests.

10 **Non permitted links**

10.1 From time to time, an *insurer* may find that a linked fund contains assets which are not permitted links, either as a result of unforeseeable circumstances or of error on the part of the fund manager. The rules set an absolute requirement. Such an occurrence represents a breach of the rules if it affects the *policy holder* benefits

10.2 It would not be safe for an *insurer* to plan to have a holding of 9.9% in *unlisted securities* when normal market movement could easily lead to a breach of the 10% limit.

10.3 Nevertheless, if such an event happens, it must be managed. If it does the *FSA* would expect the *insurer* to take the following steps:

- (a) where such a breach occurs as a result of unforeseeable circumstances, it must be repaired without delay; and
- (b) where a breach has occurred whose possibility was reasonably foreseeable or which was not (for whatever reason) repaired without delay, and if such breach has led to a reduction in the net assets of the fund and it was reasonably foreseeable that this could be the result, the notion of fairness to customers demands that the *insurer* should make good the loss: and
- (c) inform the *FSA* and the *insurer's* auditors of the breach and the steps it proposes to take (except where the circumstances described below apply).

10.4 The only cases which the *FSA* is unlikely to need to consider are where all the following conditions are satisfied:

- (a) the financial effect of the breach is minimal;
- (b) the breach is a ‘one-off’ event and far from likely to recur;
- (c) it casts no doubt on the integrity of the company's control system.

In particular, where the breach showed a failure of the *insurer's* control systems, the *FSA* would wish to consider whether appropriate repairs to those systems had been put in place, even where the financial effect of the breach was indeed negligible. As a general rule, we would expect *insurers* and

auditors to err on the side of informing us, except where it is beyond doubt that all the above criteria are satisfied.

GUIDANCE NOTE 9.1

PREPARATION OF RETURNS

CONTENTS

1. THE STATUTORY REQUIREMENT TO PREPARE RETURNS

- 1.1 The basic requirement
- 1.2 The regulatory basis of the return
- 1.3 Deposit of returns with the FSA
- 1.4 Inaccurate or incomplete returns
- 1.5 Other documents to be deposited with the returns
- 1.6 Insurance fees
- 1.7 Disclosure of the returns and other documents deposited with the FSA
- 1.8 Modification or waiver of rules under section 148 of the Act

2. THE TYPES OF RETURN

- 2.1 An overview
- 2.2 The detailed requirements

3. INTERPRETATION OF THE RULES

- 3.1 Definitions
- 3.2 Valuation of assets and liabilities
- 3.3 Requirement to state information fairly

4. CONVENTIONS FOR THE COMPLETION OF ALL FORMS

- 4.1 Scope
- 4.2 Completion of forms
- 4.3 Currency
- 4.4 Presentation of amounts
- 4.5 Comparative amounts and brought forward figures
- 4.6 Supplementary notes

5. FORMS 9 TO 17: STATEMENT OF SOLVENCY, BALANCE SHEET AND NON-TECHNICAL ACCOUNT

- 5.1 Statement of Solvency (Form 9)
- 5.2 Statement of Net Assets (Form 10)
- 5.3 Calculation of required margin of solvency (Forms 11 and 12)
- 5.4 Analysis of admissible assets (Form 13)
- 5.5 Long term business liabilities and margins (Form 14)
- 5.6 Liabilities – other than long term business (Form 15)
- 5.7 Profit and loss account (non-technical account) (Form 16)
- 5.8 Analysis of derivative contracts (Form 17)

- Annex A: Examples of the completion of the reconciliations at the foot of Forms 10 and 13.
- Annex B: Examples of completion of Forms 13, 14, 15 and 17 in respect of derivative holdings.

6. THE RULE 9.29 STATEMENT: DERIVATIVES

- 6.1 Scope of the statement
- 6.2 Contents of the statement

7. THE RULE 9.30 STATEMENT: SHAREHOLDER CONTROLLERS

8. ACCIDENT YEAR AND UNDERWRITING YEAR ACCOUNTING

- 8.1 The basic rule
- 8.2 Accounting for premiums, claims and expenses
- 8.3 The annual and non-annual methods
- 8.4 The relationship between the reporting basis and method of profit recognition
- 8.5 The non-annual method – ‘closed’ and ‘open’ years
- 8.6 Conversion from the non-annual to the annual method
- 8.7 Supplementary note disclosure

9. ACCOUNTING CLASSES, BUSINESS CATEGORIES AND RISK GROUPS

- 9.1 An overview of the forms
- 9.2 Accounting classes
- 9.3 Business categories
- 9.4 Risk groups

10. FORMS 20 TO 36: THE GENERAL BUSINESS TECHNICAL ACCOUNT

- 10.1 Form 20
- 10.2 Form 21
- 10.3 Form 22
- 10.4 Form 23
- 10.5 Form 24
- 10.6 Form 25
- 10.7 Forms 26 and 27
- 10.8 Forms 28 and 29
- 10.9 Form 30
- 10.10 Forms 31, 32 and 34
- 10.11 Forms 33 and 35
- 10.12 Form 36

Annex: Country codes

11. FORMS 37 TO 39: EQUALISATION RESERVES

- 11.1 Introduction
- 11.2 Rules governing the Equalisation Reserves Rules: other than credit business
- 11.3 Completion of Forms 37 to 39 for other than credit business
- 11.4 The Equalisation Reserves Rules: credit business
- 11.5 Completion of Forms 37 to 39 for credit business

12. THE RULE 9.25, 9.26 AND 9.27 STATEMENTS: MAJOR TREATY REINSURERS, MAJOR FACULTATIVE REINSURERS AND MAJOR CEDANTS

- 12.1 Major treaty reinsurers
- 12.2 Major facultative reinsurers
- 12.3 Major cedants
- 12.4 Connected companies
- 12.5 Nil Returns

13. THE RULE 9.32 STATEMENT: BUSINESS CEDED

- 13.1 Overview
- 13.2 Paragraphs 1 and 2
- 13.3 Paragraph 3(a)
- 13.4 Paragraphs 3(b) and (c)
- 13.5 Paragraph 4
- 13.6 Paragraph 5

14. FORMS 40 TO 45: THE LONG TERM BUSINESS REVENUE ACCOUNT

- 14.1 Form 40
- 14.2 Forms 41 to 45

15. FORMS 46 TO 61: THE ABSTRACT OF THE ACTUARIAL VALUATION

- 15.1 Overview
- 15.2 Paragraph 4 – non-linked contracts
- 15.3 Paragraph 5 – linked contracts
- 15.4 Paragraphs 6 to 12 – bases, principles, methods etc.
- 15.5 Paragraphs 13 to 16 – profit distribution
- 15.6 Paragraphs 17 to 19 – Forms 46 to 49
- 15.7 Paragraph 20 – Forms 51 to 56
- 15.8 Paragraph 21 – Form 57
- 15.9 Paragraph 22 – Form 58
- 15.10 Paragraph 23 – Forms 60 to 61

16. THE RULE 9.36 STATEMENT: INFORMATION ON THE APPOINTED ACTUARY

17. CERTIFICATES BY DIRECTORS AND ACTUARY AND REPORT OF AUDITORS

17.1 Certificate by the directors etc.

17.2 The actuary's certificate

17.3 The auditors' report

18. STATISTICAL RETURNS: FORMS 91 TO 94

18.1 Background

18.2 The requirement to deposit Forms 91 to 94

18.3 Inaccurate or incomplete Returns

18.4 Conventions for completing the Forms

18.5 Accounting rules

18.6 Forms 82 to 85

19 TREATMENT OF INDIVIDUAL SAVINGS ACCOUNT ('ISA') BUSINESS

19.1 Forms 41 and 42

19.2 Forms 46, 47, 51 to 54 and 57

1. THE STATUTORY REQUIREMENT TO PREPARE RETURNS

The basic requirement

- 1.1 The *returns* must be prepared by, with certain exceptions, all *insurers* to which rule 9.1 applies, whether established within or outside the United Kingdom, which carry on business within the United Kingdom.

The regulatory basis of the return

- 1.2 The outline content of the *returns* is laid down by three rules:
- (a) rule 9.3 requires the *insurer* to prepare a profit and loss account, revenue account and balance sheet, together with notes, statements and reports and certificates annexed thereto;
 - (b) rule 9.4 requires the *insurer* to provide an abstract of the annual investigation of the *appointed actuary*; and
 - (c) rule 9.5 requires the *insurer* to obtain an auditor's report.

Deposit of returns with the FSA

- 1.3 (1) Rule 9.6(1) requires that every document prepared under rules 9.3, 9.4 or 9.5 be printed and five copies be deposited with the *FSA* within 2 – 4 months of the end of the period to which the documents relate. Rule 9.6(1) sets out which time limits apply. The *FSA* requests that one of the unsigned copies is left unbound held together with a treasury tag in the top left-hand corner. An *insurer* which opts for electronic submission (see below) has slightly larger filing deadlines and need only deposit one printed copy, which should be a bound, signed copy.
- (2) Rule 9.6(3) requires that one copy of every document (other than the auditor's report) be signed by the person or persons specified under rule 9.33. Rule 9.6(4) requires that one copy of the auditors' report be signed. Further guidance on the signature of *returns* is given in section 4.
- (3) [Deleted]
- (4) An *insurer* wishing to deposit *returns* electronically may do so. A separate document 'Electronic Submission of *returns* - Technical Specification' details the format in which an electronic *return* may be presented. The document described in 1.4(3) details the validation rules which must be applied at source in the generation of the *return*. There are software packages commercially available for the generation of the *returns*. It is likely that a *return* generated using such a package will be acceptable to the *FSA*. An *insurer* wishing to use another package or bespoke software will

need to satisfy the *FSA* that the technical specification referred to above is met in full. *Insurers* considering electronic submission should apply to -

Inaccurate or incomplete returns

- 1.4 (1) Under rule 9.6(5) the *FSA* may notify the *insurer* at any time within 24 months of the date of deposit if any document deposited under rule 9.6(1) appears to it to be inaccurate or incomplete, with a view to the correction of any inaccuracies and making good any omissions.
- (2) Under rule 9.6(5) the *FSA* may draw attention to an apparent inaccuracy or incompleteness and ask for an explanation or it may also ask for the inaccurate or missing documents to be (re) submitted. In either case, the *insurer* should consider the points raised and respond within one month of the date of notification either explaining why there is not in fact any inaccuracy or incompleteness, or (re) submitting the inaccurate or missing documents.
- (3) The validation of *returns* by the *FSA* takes place at two levels. First, certain absolute relationships are expected always subject to any modifications or waivers of rules under section 148 of the *Act* to be present between data items in the *return* (and between those items and the data items in the previous *return*). Secondly, the reasonableness of the data items is reviewed. This includes comparing data with other published sources such as the *Companies Act* accounts, to test its consistency and completeness. A listing (in the form of a systems specification) of the absolute relationships which are validated is available on request from the *FSA* (see 1.3 (4)).

Other documents to be deposited with the returns

- 1.5 (1) Rule 9.6(6) requires that an *insurer* deposit with its *return* any report on the affairs of the *insurer* submitted to the shareholders or *policyholders* of the *insurer* in respect of the *financial year* to which the *return* relates. This includes, but is not limited to, the report and accounts of the *insurer* prepared under the *insurance accounts rules* (or in the case of an overseas *insurer* prepared under section 700 of the *Companies Act*).

- (2) [Deleted]

Insurance fees

- 1.6 No later than when depositing the *returns* and other documents referred to above, an *insurer* should separately send a completed insurance fees form to the address shown on the form and, where a fee is due, a cheque in payment. The insurance fees form should be returned even if it only evidences that no fees are payable.

Disclosure of the returns and other documents deposited with the FSA

- 1.7 (1) The *returns* and the documents deposited with them are publicised in two ways:
- (a) First, under rule 9.7(1) an *insurer* must send a copy to any *policy holder* who requests it, and
 - (b) Second, the *FSA* will deposit with the Registrar of Companies the *returns* and other documents deposited with it. The documents deposited with the registrar of companies are available for public inspection.
- (2) Under section 148 of the *Act* the *FSA* may on the application or with the consent of an *insurer* direct that the above requirements do not apply or are to apply with such modifications as are specified in the direction.
- (3) It is anticipated that such a direction will only be given in exceptional circumstances, e.g. where disclosure would reveal that an *insurer* had significant trading links with two states at war with each other and would thereby seriously prejudice its ability to continue to trade in one or both of those states.

Modification or waiver of rules under section 148 of the Act

- 1.8 (1) As indicated above, under section 148 of the *Act*, the *FSA* may, on the application or with the consent of an *insurer*, direct that all or any prudential rules for *insurers* are not to apply to an *insurer*, or are to apply as modified. A direction under this section need not be confined to the preparation of the *returns*.
- (2) An *insurer* which wishes to apply for a modification or waiver should do so in accordance with *SUP* 8. The application should identify the circumstances which the *insurer* considers justify the granting of a modification or waiver. It is important that an application is made as early as possible, preferably as soon as the circumstances which justify it are known to have arisen.

2. THE TYPES OF RETURN

An overview

2.1 There are three basic types of *return*:

- (a) a global *return* which reports the entire worldwide business of the *insurer*;
- (b) a UK branch *return* which reports only the business carried on through a branch in the United Kingdom; and
- (c) an EEA branches *return* which reports the entire business carried on through all branches in *EEA States* (including the UK).

The detailed requirements

2.2 (1) The following table summarises the types of *return* which *insurers* are required to prepare.

Type of company	Location of Head Office		
	United Kingdom	An <i>EEA State</i> (other than U.K.)	Rest of the World ⁽¹⁾
<i>Pure reinsurer</i>	Global <i>return</i>	Global <i>return</i>	Global <i>return</i>
<i>UK- deposit insurer</i>			Global <i>return</i> and EEA branches <i>return</i>
<i>EEA-deposit Insurer</i>			UK branch <i>return</i>
All other <i>insurers</i>	Global <i>return</i>	Exempt	Global <i>return</i> and UK branch <i>return</i> .

(1) Special rules apply for Switzerland. A *Swiss general insurer* reports as for an *insurer* with its head office in the EEA. Other Swiss companies' report as for companies with their head office in the 'rest of the world'.

(2) The above table summarises the requirements of rule 9.2.

3. INTERPRETATION OF THE RULES

Definitions

Unless the context otherwise requires, words and expressions in any form (including the instructions to any form), or in any rule requiring a statement to be annexed to the forms, are to have the same meaning as applies in rule 9.2.

3.1 (1) [Deleted]

Valuation of assets and liabilities

3.2 (1) Rule 9.10 requires that, unless otherwise more specifically provided, *assets* (other than *linked assets*) and liabilities included in any document in the *return* should be valued using the *Valuation of Assets Rules*.

(2) *Linked assets*, to the extent that they are held to match liabilities in respect of *property linked benefits*, should be valued in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*.

Requirement to state information fairly

3.3 Rule 9.11 requires that every revenue account, profit and loss account, balance sheet, note, statement, report and certificate required to be prepared under rule 9.3 be prepared in the manner specified and fairly state the information provided on the basis of the rules. This is a closely analogous requirement to the 'true and fair' concept for *Companies Act* accounts. As with that concept it includes the concept of materiality where properly applied.

4. CONVENTIONS FOR THE COMPLETION OF ALL FORMS

Scope

4.1 (1) The accounting rules and conventions described in this chapter apply (except where the contrary is explicitly stated) to all documents in the *return* other than the forms, notes, statements and certificates required under, **Appendices 9.4, 9.5 and 9.6**.

(2) The accounting rules and many of the conventions for preparing the *return* which are presented in this chapter derive from paragraphs 1 to 17 of **Appendix 9.1**. The other conventions although not directly arising from the rules are merely cosmetic and are requested to facilitate the *FSA's* processing of the *returns*.

Completion of forms

Signature of forms

- 4.2 (1) The first form in the *return* (normally **Form 9** or **Form 10**) should be signed. If the *return* consists of more than one bound volume then the front form of each volume should be signed. Where space does not allow the signatures to be affixed to the foot of this form a covering sheet should be used. The covering sheet should have the same header information as **Form 9** or **Form 10** as the case may be and should be entitled ‘Covering sheet to **Form 9**’, or ‘**Form 10**’ as the case may be.
- (2) A global *return* should be signed by at least two *directors* and the chief executive. If there is only one *director*, he or she and the chief executive should sign. If there is no chief executive, or if there is only one *director* (other than the chief executive), the secretary must also sign. A UK branch *return* or EEA branches *returns* must be signed by the *authorised UK representative* and the branch ‘Chief Executive’. See rule 9.33.

Use of own forms

- (3) An *insurer* may either submit its *return* on forms printed by the *FSA* or print its own forms. However in the latter case it should make sure that they are laid out exactly as the forms in the relevant appendices. *Insurers* wishing to print their own forms are requested to contact their normal supervisory contact at the *FSA*. In general, the *FSA* will accept *returns* produced using a recognised forms generation package. Where an *insurer* is using a bespoke software application, it will be requested to send specimen blank forms to the *FSA* well before it intends to use them.

Headings

- (4) After the heading ‘Name of company’ the full registered name of the *insurer* should be given without abbreviation.
- (5) In the heading ‘Global business/UK branch business/EEA branch business’ all except one of the three alternatives should be deleted according to whether the form is part of a global *return*, UK branch *return* or EEA branches *returns* (see paragraph two).
- (6) The heading ‘Financial year ended’ should be followed by the date of the last day of the *financial year* written in the style ‘dd-month-yy’, e.g. ‘31 December 1996’.
- (7) The ‘company registration box’ should be completed with the number originally used for submission of *returns* under the *1983 Regulations*. An *insurer* making a *return* for the first time should use the full registration number given by the Cardiff, Edinburgh or Belfast Registrar of Companies. If the *insurer* does not have such a number it should agree a suitable number

with the *FSA*. An overseas *insurer* should use its F-series number issued by the Registrar of Companies.

- (8) The 'GL/UK/CM' should be completed with one of the three alternatives according to whether the form is part of a global *return*, UK branch *return* or EEA branches *returns* (see paragraph two).
- (9) The 'Period ended' box should be completed so as to show, in numerals, the date of the last day of the *financial year* to which the *return* relates. The 'month' box should always be completed with a two-digit number, incorporating a leading zero where necessary.

Typewritten entries

- (10) The *FSA* prefers typewritten entries to hand-written ones, but there should be not more than 5 characters per centimetre or 12 per inch.

Other text

- (11) No text or figures should be included in any box in a form or anywhere else on the face of the form other than as required by the rules. In particular no entries should be made:
 - (a) in any unused line or column on **Forms 26 to 29, 31, 32 and 34** after the last accident year or underwriting year required to be reported,
 - (b) in any column headed 'Source', and
 - (c) in any shaded box.

Currency

- 4.3 (1) All forms (other than some of the **Forms 26 to 29 and 31, 32 and 34**) are to be completed in sterling with:
 - (a) assets and liabilities converted at the *financial year* end exchange rate, and
 - (b) income and expenditure converted using such bases of conversion as are in accordance with generally accepted accounting practice.
- (2) Accounting practice allows several alternative accounting bases for the translation of income and expenditure. The *FSA* expects companies to choose the same basis as it uses in its *Companies Act* accounts. Where the *Companies Act* accounts are drawn up in a currency other than Sterling it is acceptable for the *insurer* also to maintain the underlying records upon which the *return* is based, in that currency and to translate those currency amounts into Sterling at the rate ruling at the year end.

- (3) The above conversion rules do not apply to certain entries on **Forms 23, 26, 27, 31, 32 and 34**. The rules for these forms are explained in chapter ten.

Presentation of amounts

- 4.4 (1) Negative amounts should be shown between round brackets. A minus sign or 'DR' should not be used.
- (2) All sterling amounts in the forms (except valuation prices on **Form 45**) should be shown in units of £1000 rounded to the nearest £1000. This is required even if particular figures are so large or small that under normal accounting conventions it would be deemed inappropriate. If the entry in any box to be rounded is less than £500 that box should be left blank. The entry '0' should not be used.
- (3) Amounts required to be shown denominated in foreign currency in a form should be shown in units of 1000 (of the principal monetary unit of that currency) rounded to the nearest 1000, and the entry '000' should be made in the 'units' box of that form. However if the £ to principal monetary unit exchange rate at the year end was in excess of 1000, amounts should be shown in units of 1,000,000 and '000,000' should be inserted in the 'currency' box.
- (4) Figures which are totals of other figures (whether or not on the same form) should be rounded after totalling the unrounded detail figures.

Comparative amounts and brought forward figures

- 4.5 (1) Columns are included on **Forms 9 to 17, 20 and 40** for the disclosure of comparative amounts for the previous *financial year*. These amounts should be reported as stated in the previous *return* (after any correction under rule 9.6(5) - see 1.4), but without restatement for any prior year adjustment even where such restatement is permitted under generally accepted accounting practice.
- (2) Other than to reflect exchange rate reconversion, brought forward figures on the detailed *general insurance business (Forms 21 to 39)* should not, as a general rule, be restated as this destroys the continuity of the historical data triangles which the *FSA* derives from these forms. However the *FSA* recognises that in exceptional cases, e.g. the correction of a fundamental error, restatement for other reasons may be desirable. The *FSA* requests *insurers* that wish to restate amounts (other than to reflect exchange rate reconversion), to discuss the proposed restatement with their usual supervisory contact at the *FSA* prior to submitting their *return*.
- (3) Where any brought forward amount is restated (other than to reflect exchange rate reconversion) the reason for the restatement should be given in a supplementary note to the form upon which the brought forward amount appears. (See **Appendix 9.1**, paragraph 7).

- (4) Special difficulties with brought forward and comparative figures arise for an established overseas *insurer* newly authorised in the UK by the *FSA* and preparing its first global *return*. Such an *insurer* may wish to seek guidance from its normal supervisory contact at the *FSA*.

Supplementary notes

- 4.6 (1) Supplementary notes should not be shown on the face of a form, but should be shown on a separate sheet or sheets of paper. The notes for all forms should be bound together toward the end of the *return* (but before the certificates) and should not be interleaved with the forms to which they relate.
- (2) The requirements to prepare supplementary notes are variously located in the actual text of the rules, the appendices to the rules and in the instructions to the forms. However in each case the requirement to prepare the note identifies the form to which it is to relate.
- (3) In the guidance for each form (under **Appendices 9.1 to 9.3 and 9.8**) a complete list of the required supplementary notes is provided. Each note in the list is given a unique reference code. The first two digits of the code are the number of the form and the final two digits the number of the note. For example the 5th note in the list for **Form 13** is coded '1305'.
- (4) Each supplementary note included in the *return* should be given a title which identifies the form or forms to which it relates. In respect of forms prepared under **Appendices 9.1 to 9.3 and 9.8** this should be done by including the code as the first element in the title. For example the title for note 1601 might be:

'1601 Basis of conversion of foreign currency'

If there is more than one form of the same number (e.g. **Forms 24** for several *accounting classes*) only one title of the above type need be used to cover all such forms.

- (5) Where an *insurer* wishes to include an extra note (beyond those required under the rules) it should identify the form to which it relates and give the note the next unused sequential code number for that form. For example the rules specify seventeen coded notes for **Form 13** which are respectively coded 1301 to 1317. If an extra note is to be added it should be coded 1318. The code 1318 should be used even if for the particular *insurer* there is no note 1317 (because the circumstances in which that note is required do not arise for that *insurer*).
- (6) Where the rules require a form to be submitted, but all entries (including comparatives) would be blank, that form may be omitted provided that a note coded FF00 (where FF is the form number) is included stating that this is

why the form has been omitted. This note is not needed where a form is omitted because the rules do not require it. For example a non-life *insurer* is not required to submit Life **Forms 40 to 45** and so does not need supplementary notes 4000 etc.

- (7) Two or more supplementary notes should not be combined as a single text with a single title except where this avoids unnecessary repetition or leads to a clearer explanation. Where two or more supplementary notes are combined the codes of all the notes should be listed at the beginning of combined title.
- (8) Some supplementary notes are always required whenever the form to which the note refers is required. Others are only required on an exception reporting basis. The detailed guidance below on each supplementary note brings out this distinction.

5. **FORMS 9 TO 17: STATEMENT OF SOLVENCY, BALANCE SHEET AND NON-TECHNICAL ACCOUNT**

Statement of Solvency (Form 9)

Completion of the form

- 5.1 (1) **Form 9** is to be prepared by every *insurer* other than an *EEA insurer*, a *Swiss general insurer* or a *EEA-deposit insurer* - see rule 9.12.
- (2) **Form 9** shows separately for *general insurance business* and *long-term insurance business*:
 - (a) the *required minimum margin of solvency*,
 - (b) the available assets,
 - (c) any *implicit items* (for *long-term insurance business*), and
 - (d) any contingent liabilities.
- (3) The entries on **Form 9**, other than for *implicit items*, derive from other forms within the *return*.
 - (a) The *general insurance business required margin of solvency* derives from **Forms 11** and **12** and the *long-term insurance business required margin of solvency* from **Form 60**.
 - (b) The available assets derive from **Form 10**. A composite *insurer* may apportion part of its 'other than long-term insurance business - available assets' (line 29 on **Form 10**) to count against the *required minimum margin* for its *long-term insurance business* provided that

such assets are in excess of the amount needed to match its *general insurance business required margin of solvency* - see rule 2.4(5)(b).

- (c) The *long-term insurance business liabilities* derive from **Form 14**.
 - (d) The contingent liabilities for *general insurance business* and *long-term insurance business* derive from supplementary notes to **Forms 15** and **14** respectively.
- (4) *Implicit items* are certain special types of asset, i.e. future profits, *Zillmerising* and hidden reserves, specified in rule 2.10. They may be counted against an *insurer's required margin of solvency* but only if, and to the extent, specifically allowed by an order issued by the *FSA* under section 148 of the *Act*. An *insurer* wishing to count such items against its solvency requirement should apply its normal supervisory contact in to the *FSA* for the appropriate order.

Supplementary notes

Two supplementary notes may be required to this form: -

- (a) Where a direction under section 148 of the *Act* has been issued disapplying or modifying any of the provisions of *Accounts and Statements Rules*, a note to **Form 9** explaining the effect of the order is usually required. The requirement for such a note would be specified in the direction itself. [Code 0901].
- (b) Where a direction under section 148 of the *Act* has been issued to an *insurer* permitting it to take into account *implicit items* on *long-term insurance business*, that order may specify that a note is to be included in the *return* explaining such items. That note should be included as a note to **Form 9**. [Code 0902].

Statement of net assets (Form 10)

Completion of the form

- 5.2 (1) **Form 10** is to be prepared by all *insurers* – see rule 9.12(3).
- (2) Lines 11 and 12 are to be completed only by an *insurer* carrying on *long-term insurance business* and respectively derive from **Forms 13** and **14**. An *insurer* which carries on *long-term insurance business* is required by rule 3.1 to maintain a separate fund for that business. Line 11 shows the value of the *admissible assets* in that fund. Lines 11 and 12 should equal each other.
- (3) All other lines on **Form 10** must be completed by every *insurer*, other than a mutual without share capital (or subordinated loan capital) which only carries on *long-term insurance business*. Line 56 is to be completed with the balancing figure so as to ensure that line 59 equals line 29.

- (4) Line 23 shows the net *admissible assets*, i.e. *admissible assets* less liabilities. Lines 24 and 25 show two types of *asset* which may not be taken into account in determining the net *admissible assets* but which, provided that net *admissible assets* are not negative, may (to a limited extent) be added to net *admissible assets* for the purpose of determining whether the *insurer* meets its *required margin of solvency*. Similarly lines 26 and 27 show two types of liability which are taken into account in net *admissible assets* but which, provided that net *admissible assets* are not negative, may (to a limited extent) be added-back for the purpose of determining whether the *insurer* meets its *required margin of solvency*. Thus where line 23 is negative no amounts may be included at lines 24 to 27. See rule 2.10 for the detailed rules applicable to these types of assets and liabilities.
- (5) Line 51 should include the share premium account.

Reconciliation of balance of net assets brought forward and carried forward

- (6) Line 61 to 69 reconcile the balance of net assets, (line 56), brought forward and carried forward. For these purposes the brought forward amount shown at line 61 should not be restated for any reason, even for exchange differences.
- (7) The three most frequent reasons for a movement in the net assets are listed respectively at lines 62 to 64. They are:
- (a) the retained profit or loss for the *financial year* - sourced from **Form 16**;
 - (b) movements in the difference between the value of assets (other than long term assets) under the *FSA* valuation rules and under the GAAP valuation rules - sourced from **Form 13**; and
 - (c) a decrease or increase in the provision for adverse changes (which is a provision made for *FSA* purposes, but which does not arise under GAAP) - sourced from **Form 15**.
- (8) Movements in the net assets which are not attributable to the three reasons given in (7) should be included at line 65 and explained by way of supplementary note to the form. [Code 1002].
- (9) The retained profit or loss (line 62) is sourced from **Form 16** and, therefore, is for other than *long-term insurance business* determined in accordance with the same generally accepted accounting practice ('GAAP') as apply in UK *Companies Act* accounts. The *long-term insurance business* retained profit departs from GAAP in that it is based on the 'statutory' method of reporting, not the 'modified statutory' method.
- (10) The annex to this chapter gives two examples of this reconciliation.

Reconciliation of net assets to the accounts

- (11) In addition to the reconciliation in (9), which appears on the face of **Form 10**, a further reconciliation is required by way of supplementary note to the form. This takes net assets as per the *return* and reconciles them to net assets as they appear in the shareholder accounts. This reconciliation is required for every *insurer* which is not incorporated outside the UK, and which in consequence has to prepare *Companies Act* accounts in accordance with the *insurance accounts rules*. See paragraph 14 of **Appendix 9.1**.
- (12) For purposes of the reconciliation in (11), net assets as per the *return* should be taken not from **Form 10**, but by netting assets taken from line 99 of the **Form 13** (for the category of assets ‘1’) and liabilities from line 59 of **Form 15**. The net assets as per the *Companies Act* accounts should be the amount shown under balance sheet item A ‘capital and reserves’.
- (13) The reason for taking assets and liabilities from these sources within the Annual *return* is to eliminate from the reconciliation differences due to the dissimilar asset and liability valuation rules as between the *return* and *Companies Act* accounts. Lines 91 to 99 of **Form 13** reconcile the valuation of assets as per the *return* rules and as per the *Companies Act* accounts rules. Line 99 shows the value after that reconciliation, i.e. the value as per the *Companies Act* accounts rules. Similarly line 59 of **Form 15** shows liabilities sub-totalled excluding items which do not appear as liabilities in the *Companies Act* accounts, e.g. the provisions for adverse changes etc.
- (14) As a result, the reconciliation in (11) only needs to deal with differences which arise for other reasons. Such differences would include the following:
 - (a) the value of net assets within the *long-term insurance business* fund. This is included in the net assets taken from the *Companies Act* accounts (item A ‘capital and reserves’) but is not included in net assets as sourced from **Form 13** (category of assets ‘1’) and **Form 15**; and
 - (b) The amount of any subordinated loan capital. This is not deducted as a liability in the net assets as sourced, inter alia, from line 59 of **Form 15**, but is deducted as a liability in the net assets as sourced from the *Companies Act* accounts (item A ‘capital and reserves’).
- (15) Other than as noted in (14), *insurers* should only rarely have any differences to report under this reconciliation; e.g. where there is a material adjusting post-balance sheet event which occurs after the date of sign off of the *Companies Act* accounts but before the date of sign off of the *returns*.
- (16) Where for any reason an *insurer* (other than one incorporated outside the UK) either does not prepare or has not yet prepared its *Companies Act* accounts, a statement that this is the case must be included in the

supplementary note instead of the above reconciliation. The reason why accounts have not been prepared, (e.g. because they are drawn up to different year ends from the *return*), should also be stated.

- (17) The annex to this guidance gives an example of this reconciliation.

Supplementary notes

- (18) Three supplementary notes are specified -
- (a) the supplementary note described in (11) to (17) - see paragraph 14 of **Appendix 9.1**; [Code 1001]
 - (b) particulars of any other movements shown at line 65; and [Code 1002]
 - (c) particulars of any direction under section 148 of the *Act* allowing subordinated loan capital not to be treated as a liability for the purposes of determining whether the *insurer* holds net assets which match its *required margin of solvency* - the requirement for this note will be specified in the direction itself. [Code 1003]

Calculation of required margin of solvency (Forms 11 and 12)

The margins of solvency

- 5.3 (1) **Forms 11 and 12** must be completed by every *insurer* which carries on *general insurance business*, other than an *EEA insurer*, a *Swiss general insurer* or an *EEA-deposit insurer* – see rule 9.12(4).
- (2) All *insurers* (subject to certain exceptions described below) are required to maintain a *required margin of solvency* throughout the *financial year*. **Forms 11 and 12** in the *global return* show the calculation of this *required margin of solvency* in respect of *general insurance business*.
- (3) For an *insurer* (other than a *pure reinsurer*) with its head office outside the UK this *required margin of solvency* relates to its entire worldwide business. Such an *insurer* (unless an *UK deposit insurer*) must also maintain a UK *required margin of solvency* in respect of its business carried on in the United Kingdom. **Forms 11 and 12** in the *UK branch return* show the calculation of the UK *required margin of solvency* in respect of *general insurance business*. A *UK deposit insurer* must also maintain an EEA *required margin of solvency* in respect of its business carried on within *EEA States*. **Forms 11 and 12** in the *EEA branches return* show the calculation of the EEA *required margin of solvency* in respect of *general insurance business*.
- (4) The exceptions in (2) are *EEA insurers*, *Swiss general insurers* and *EEA-deposit insurers*. They are excluded (under UK law) from the requirement to

maintain any of the above types of *required margin of solvency*. This is because they are subject to equivalent solvency rules imposed by their home state or by another *EEA State*. These *insurers* are not required to complete forms **Forms 11** and **12**.

- (5) The text on the face of the forms only presents in outline the method of calculation of the *general insurance business* margins of solvency. The detailed rules for the calculation are to be found in **Appendices 2.1 to 2.3**, to which companies preparing these forms should refer. The forms should be interpreted in the light of these rules - see paragraph 10(1) of **Appendix 9.1**.

Margins of Solvency

- (6) The *Margin of Solvency Rules* lay down that the margins of solvency are to be calculated as the highest result from the application of three alternative methods. These are the premium basis, the claims basis and the *minimum guarantee fund*. The first method is shown on **Form 11** and the latter two methods together with the comparison of all three methods are shown on **Form 12**.

Form 11: the first method (i.e. the premium basis)

- (7) Line 11: determine the **gross premium receivable** in the *financial year*.
- (a) ‘gross premium’ means premiums after deduction of discounts, refunds and rebates of premium and before deduction of premiums for *reinsurance* ceded and of commission payable. It includes premiums receivable from *reinsurance* contracts accepted by the *insurer*. In effect, this has the same meaning (subject to one important exception described in (d)) as *gross premiums written* as it occurs in the other forms in the *return*.
- (b) the amount of gross premium to be taken is limited by the words ‘receivable’ and means recorded in the company's books as due to the *insurer* in respect of risks incepted in the *financial year*. Policies transferred to an *insurer* under Part VII of the *Act* (or a transfer under the equivalent law of another *EEA State*) should be considered to be incepted on the date of transfer.
- (c) as a result subject to the exception described in (d), gross premiums receivable may be treated as being the same as that portion of *gross premiums written* which is in respect of risks incepted in the *financial year*. This may be derived from the other forms in the *return* as follows: take the sum of the entries in columns 1 and 2 for lines 13 to 15 on all **Forms 21** and of the entry at line 11 for the current underwriting year on all **Forms 24**. In algebraic notation this is: $\Sigma (21.13.1 + 21.13.2 + 21.14.1 + 21.14.2 + 21.15.1 + 21.15.2)$ for all **Forms 21** + $\Sigma 24.11.(mm-yy)$ for all **Forms 24**; where mm-yy is the current *financial year*.

- (d) the exception in (c) occurs where premiums receivable are excluded from *gross premiums written* as shown in **Forms 21 and 24** by virtue of the rule in paragraph 26 of **Appendix 9.2**. This says that amounts in respect of inwards and outwards *contracts of insurance* must be classified for inclusion in **Forms 20 to 39** according to their economic substance in accordance with generally accepted accounting practice. This, in effect, means that the accounting treatment for so-called financial reinsurances is to be the same in these *return* forms as in the *Companies Act* accounts. This is explained more fully in 8.2.2. The point to note here is that even where, under this rule, the consideration receivable under a *contract of insurance* is not classified as *gross premiums written* for the purposes of those *FSA* forms, it must be included as premiums receivable on **Form 11**. The **Form 11** premiums receivable should include all consideration receivable in respect of contracts which constitute carrying on *insurance business* under the *Act*, and which therefore require authorisation.
- (8) Line 12: deduct premium taxes and levies, but only to the extent that: (i) in the case of taxes they are included in premiums and (ii) in respect of levies they are related to premiums and are recorded in the *insurer's* books as payable in the last preceding *financial year* in respect of *general insurance business* - see paragraph 2 of **Appendix 2.1**. Under generally accepted accounting practice the UK Insurance Premium Tax is excluded from the amount shown for premiums. It should not, therefore, be deducted at line 12 on the form. The anticipated Financial Services Compensation Scheme levy in respect of business written during the year may be deducted, but only to the extent that a provision for that anticipated liability has been established.
- (9) Line 14: adjust the sub-total derived from the above to an annual figure if the *financial year* runs for more or less than 12 months.
- (10) Lines 15 to 19: (i) analyse the amount arrived at in line 14 between other and health insurance based on actuarial principles; (ii) in the case of each amount, if appropriate, divide into two portions of 10 million Euros and the excess over 10 million such units and (iii) apply the appropriate percentages (18, 16, 6 or $5\frac{1}{3}$, as the case may be) to the totals arrived at, and add together the resultant sums to determine the *Sub-total B* - see paragraphs 4 to 8 of **Appendix 2.1**. The *FSA* will advise, if requested, whether business carried on under a particular policy falls within the definition of health insurance based on actuarial principles. The £/Euro rate of exchange to be used is that prevailing at the previous 31 October and is advised to *insurers* each year in an *FSA* market letter.
- (11) Lines 21 to 29: Determine (i) gross *claims paid* in the *financial year*; (ii) gross *claims outstanding* carried forward; and (iii) gross *claims outstanding* brought forward. Determine the gross claims incurred, *Sub-total C*, as (i) plus (ii) less (iii).

- (a) *claims* paid and *claims* outstanding are defined in detail by paragraphs 10 to 11 of **Appendix 2.1**. In essence they refer to the amounts recorded in the *insurer's* books as -
- (i) paid in full or partial settlement of or set aside as likely to be sufficient to meet *claims* under *contracts of insurance*; or as
 - (ii) expenses incurred or set aside as likely to be incurred which are directly attributable to the settlement of individual *claims*; less
 - (iii) related salvage recoveries, recoveries from third parties and recoveries from other *insurers* (but not *reinsurance* recoveries).
- (b) the definition of *claims* outstanding includes the provision for *claims* incurred but not reported.
- (c) although the rules are not expressed in these terms, the definitions in (11) of *claims* paid and *claims* outstanding are equivalent (subject to one important exception described in (f)) to the corresponding amounts included in **Forms 22** and **25**, but excluding the *claims* management costs.
- (d) for *claims* paid, the equivalent amount is the sum of the amounts at lines 11 and 15 in column 2 in all **Forms 22** and of the amounts line 21 of the total column in all **Forms 24**. In algebraic notation this is: $\Sigma (22.11.2 + 22.15.2)$ for all **Forms 22** + $\Sigma 24.21.(99-99)$ for all **Forms 24**.
- (e) for *claims* outstanding, the equivalent amount is the sum of the amounts at lines 11 and 15 in column 3 in all **Forms 22** and of the amounts lines 11 and 13 of the total column in all **Forms 25**. In algebraic notation this is: $\Sigma (22.11.3 + 22.15.3)$ for all **Forms 22** + $\{25.11.(99-99) + 25.13.(99-99)\}$ for all **Forms 24**. (NB. for an *insurer* which discounts its *claims* outstanding this requires that the undiscounted provision be taken.) If necessary the brought forward amount (here and on **Form 12**) should be restated as undiscounted.
- (f) the exception referred to in (c) arises for the same reason as described in 7(d). Amounts are classified for inclusion in **Forms 22**, **24** and **25** according to their economic substance in accordance with generally accepted accounting practice. However in **Forms 11** and **12** *claims* paid and *claims* outstanding should include all amounts paid or set aside for *claims* under contracts which constitute carrying on *insurance business* under the *Act*, and which therefore require authorisation, even where such amount are not classified as *claims* paid under generally accepted accounting practice.

- (12) Lines 30 to 39 :determine the net claims incurred, *Sub-total D*, by deducting from the gross *claims* incurred, *Sub-total C*, the total sum recoverable in respect of that amount under *reinsurance* contracts ceded, see paragraph 12 of **Appendix 2.1**. Line 30 should only include amounts classified for inclusion as *reinsurance* in **Forms 22, 24 and 25** according to their economic substance in accordance with generally accepted accounting practice except that where gross premium has been included in line 11 only by virtue of 11(1), all *reinsurance* of that gross premium (whatever its economic substance) may be included in *Sub-total C*.
- (13) Line 41 :determine the *first result* by multiplying the *Sub-total B* by the ratio of the *Sub-total D* to the *Sub-total C*, (or if that fraction is less than one half, by one half; or if the fraction is more than one, by one). See paragraph 13 and 14 of **Appendix 2.1**.

Form 12: the second (i.e. the claims basis)

- (14) Determine the reference period. If an *insurer* has not been in existence long enough to acquire a reference period this should be indicated by entering a zero at the box in line 11 and lines 21 to 41 ignored. For the majority of *insurers* the reference period will be the last three *financial years*. See paragraphs 1 and 2 of **Appendix 2.2**.
- (15) Establish the amount of claims incurred in a similar way to that explained in (11), but related throughout to the reference period rather than to the *financial year*. For example where the reference period is the last three *financial years* the *claims* incurred should be derived (using the formulae described in (11)) from the amounts reported in the *returns* for those last three years - see paragraph 3 of **Appendix 2.2**. However it is acceptable to restate amounts of *claims* incurred for currency movements.
- (16) Reduce the sum derived to an annual figure by multiplying by 12 and dividing by the number of months in the reference period.
- (17) Lines 32 to 39: (i) analyse *Sub-total F* between other and health insurance based on actuarial principles ; (ii) in the case of each amount, if appropriate, divide into two portions of 7 million Euros and the excess over 7 million Euros and (iii) apply the appropriate percentages (26, 23, 8.66 or 7.66, as the case may be) to the totals arrived at and add together the resultant sums to determine *Sub-total G* - see paragraphs 5 to 9 **Appendix 2.2**. The definition of health business and the £/Euro rate are the same as apply in (10).
- (18) Line 41: determine the *second result* by multiplying *Sub-total G* by the ratio of *Sub-total D* to *Sub-total C*, (or if that fraction is less than one half, by one half; or if the fraction is more than one, by one). See paragraphs 13 and 14 of **Appendix 2.1**.

Form 12: the third method (i.e. the minimum guarantee fund)

- (19) The amount of the *minimum guarantee fund* (line 44 on **Form 12**) is calculated by reference to the classes of business for which the *insurer* has permission under the *Act* – see **Appendix 2.3**. In most cases, it will be 400,000 Euros translated to sterling.

Supplementary notes

- (20) Two supplementary notes are specified.
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see **Appendix 9.1**; [Codes 1101 and 1201]
- (b) if any of the amounts included in either **Form 11** or **12** differ from the corresponding amounts in **Forms 21** to **25**, the amount of difference and the reason for it should be stated - see paragraph 10 of **Appendix 9.1**. The expected correspondence between amounts in **Forms 11 & 12** and in **Forms 21** to **25** and the reasons why they might differ are explained in (7) and (11). [Codes 1102 and 1202]

Analysis of admissible assets (Form 13)

Different types of Form 13

- 5.4 (1) **Form 13** is to be prepared by every *insurer* for one or more categories of assets – see rule 9.12(5).
- (a) every *insurer*, (other than a *mutual* without *share* capital which only carries on *long-term insurance business*), must prepare a **Form 13** for its total other than long term assets; and
- (b) every *insurer* which carries on *long-term insurance business* is to prepare a **Form 13** for its total *long-term insurance business assets*.
- (2) The *long-term insurance business* assets are the assets required by rule 3.1 to be maintained in the separate fund for *long-term insurance business*. Where separate assets within the rule 3.1 fund are appropriated for separate long term funds or groups of funds, (other than *internal linked funds*), additional **Forms 13** should be completed in respect of each such fund or group of funds.
- (3) An *external insurer*, (other than a *pure reinsurer*), and a *UK- deposit insurer* must complete certain additional forms. These are described in instruction 3 to **Form 13**.

- (4) The different **Forms 13** are identified by the entry in the ‘category of assets’ box in the heading. A list of codes to be used in the completion of that box is given in the instructions to **Form 13**.

Completion of the form

- (5) **Form 13** consists of three parts.
- (a) lines 11 to 89 provide a ‘line by line’ analysis of the assets valued in accordance with the rule 9.10.
- (b) lines 91 to 99 provide a reconciliation of the total assets as valued in accordance with rule 9.10 and as valued in accordance with the *Companies Act* accounts rules.
- (c) line 100 discloses the value of the *debts* due from related companies, other than those under *contracts of insurance or reinsurance*.
- (6) The classifications used in lines 11 to 89 are based on those used in the balance sheet format in Schedule 9A of the *Companies Act*, i.e. those which are required to be used in the preparation of the *Companies Act* accounts. In many cases, however, a single item in the *Companies Act* format is subdivided. The subdivisions typically reflect distinctions between types of assets found in the *Valuation of Assets Rules*.
- (7) Lines 11 to 89 refer to the descriptions used in the *Companies Act* accounts balance sheet format solely for the purposes of indicating how assets are to be classified, i.e. to show at which line they are to be included. The *Companies Act* valuation rules are not to be followed. Assets at lines 11 to 89 are instead to be valued in accordance with rule 9.10 - see instruction 4 to the form. Reference should also be made to **Guidance Note 4.1**.
- (8) Rule 9.10 provides that:
- (a) assets (other than referred to in (b)) are to be valued in accordance with the *Valuation of Assets Rules*, and
- (b) assets matching *property linked benefits* are to be valued in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*. See (12) below.
- (9) Lines 11 to 86 show asset values after deductions for excesses over *permitted asset exposure limits* - see rule 4.14. Where such a deduction relates to assets included at more than one line of **Form 13** it should be apportioned pro rata. Negative amounts should not be shown at lines 11 to 86. If a deduction is more than the value of the assets to which it relates the excess element of the deduction should be shown at line 87, as also should

deductions for excesses over permitted *counterparty* limits and for excess concentrations over a number of *counterparties*. See rule 4.14(3).

- (10) Where the value of any asset is denominated in a currency other than sterling it is to be converted into sterling using the year end closing middle rate - see paragraph 4 of **Appendix 9.1**.
- (11) The amount of any asset in **Form 13** should be shown gross of any set-off against any corresponding liability (which liability should be shown on **Forms 14** or **15** as appropriate). The only exception to this is where:
 - (a) amounts are owed from and to the same person; and
 - (b) such netting is permitted under generally accepted accounting principles. See in particular FRS5.

In (a), 'person' refers not only to individuals but also to *corporate bodies* and unincorporated associations.

- (12) The guidance in (10) usually prevents the set-off of amounts due from and to the same broker/*intermediary* unless they relate to the same client of the broker/*intermediary*. This is because typically such amounts are in law owed from and to not the broker/*intermediary* but the client. The broker/*intermediary* merely acts as a collecting agent.
- (13) Lines 54 and 55: Deposits with *approved credit institutions* and *approved financial institutions* should only show relevant deposits subject to a time restriction on withdrawal. Such *deposits* not subject to such a time restriction should be shown at line 81. In the analysis between lines 54 and 55, (withdrawal subject to a time restriction of one month or less and withdrawal subject to a time restriction of more than one month), the time restriction is to be measured relative to the date of the end of the *financial year* and not, if different, the date on which the *deposits* were originally made.
- (14) Lines 58 and 59 together show the assets held to match linked liabilities. This expression has the same meaning as in the *Companies Act* accounts and the items to be classified for inclusion under these lines should be the same as those included under the heading of the same name in the *Companies Act* accounts. However the valuation of the items to be included is not necessarily the same. The *Valuation of Asset Rules* apply to all items included at these lines other than those exempted by rule 4.1(2). This only exempts *linked assets* (to the extent they are held in compliance with rule 2.3) which match liabilities in respect of *property linked benefits*.
- (15) The *FSA* doubts whether either the heading in the *Companies Act* accounts or at lines 58 and 59 on **Form 13** is apt to include assets backing surplus units in *internal linked funds*. However where such assets are included under this heading in the *Companies Act* accounts they should also be included at lines

58 and 59 on **Form 13**. NB, as such surplus assets are not exempted by rule 4.1(2), they must be valued in accordance with the *Valuation of Assets Rules*). See also 15.7(10). The *FSA* is also aware that *insurers* adopt different treatments in their *Companies Act* accounts for *index linked liabilities* backed by a derivative. Some include the derivative, any margining loan back (as a deduction) and the investments arising from the margining loan in 'assets covering linked liabilities'. Others only include some of these items under that heading and, perhaps, include the margining loan back as a liability. The *FSA* doubts whether all of these treatments necessarily always conform to GAAP, e.g. showing assets net of the margining loan is not permissible where there is no legal right of set-off. However where an *insurer* has adopted a treatment in its *Companies Act* accounts (and so implicitly come to the view the treatment accords with GAAP) it should adopt the same treatment in the *returns*.

- (16) Line 73 (salvage and subrogation recoveries) should only be used for such recoveries which fall to be classified as debtors arising from insurance operations. Occasionally some salvage or subrogation recoveries may be classified under other headings in the *Companies Act* accounts in which case the same heading should be used in **Form 13**, but a supplementary note [Code 1303] is required. If salvage and subrogation recoveries are shown in the *Companies Act* accounts as a deduction from liabilities rather than as an asset, the same treatment should be adopted in the *returns*. That is, line 73 should be left blank and the amount of liabilities shown on **Form 14** should be shown net of the salvage and subrogation recoveries.
- (17) Line 80 should include leased tangible assets that are held under a finance lease and are brought into account as an asset in the *Companies Act* accounts in accordance with Statement of Standard Accounting Practice 21.
- (18) Line 83 'Other assets' refers to the balance sheet heading in the *Companies Act* accounts of 'Other assets – other' (item Fv. in the balance sheet format in Schedule 9A to the *Companies Act*). It should not be used for any other type of asset and even where used for an asset falling under the *Companies Act* account Fv. heading it should show only the admissible value, if any.
- (19) Lines 91 to 99 reconcile the *admissible assets* to the total assets determined in accordance with the *Companies Act* accounts rules. For guidance on the distinction between the different types or reconciling item (lines 92 to 95) - see examples 1 to 3 in **Annex A**. This reconciliation must be completed by all *insurers* whether or not they prepare *Companies Act* accounts. In this reconciliation a particular problem is caused by those assets which the *Companies Act* permits to be shown either as assets or as a deduction from liabilities. The main classes of such assets are-
 - (a) the *reinsurers'* share of *technical provisions*; and
 - (b) the *deferred acquisition costs*.

- (20) For *general insurance business* these assets, to the extent admissible, should always be shown at lines 60 to 63 and 85 respectively. Further, the total shown at line 99 (assets determined in accordance with shareholder accounts rules) should always include such assets, even where they are actually shown as a deduction from liabilities in the *Companies Act* accounts. For *long-term insurance business* these assets should never be shown at lines 60 to 63 and 85 and should never be included in the total at line 99, even where they are shown as an asset in the shareholder accounts. In the category of assets **Forms 3 to 5** lines 60 to 63 (*reinsurers' share of technical provisions*) and line 85 (*deferred acquisition costs*) should be left blank. There is no requirement to maintain such assets either within the UK or any *EEA States*.
- (21) Apart from the assets in (19), an item should be classified as an asset or a deduction from liabilities on **Form 13** (line 99) and **Forms 14/15** in the same way as in the *Companies Act* accounts. The same applies to the classification of an item as a liability or a deduction from assets. Different methods of grossing up should be avoided. For the treatment of leased assets see (17).
- (22) The *insurance accounts rules* allow for some investments to be valued either at current value or at amortised cost. An *insurer* which does not prepare *Companies Act* accounts should choose the current value method for disclosure at line 99 on **Form 13**. Any other *insurer* should choose the same method for line 99 on **Form 13** as it chooses for its *Companies Act* accounts.
- (23) Asset valuation differences arising in respect of shares in, or *debts* due or to become due from, *dependants* should be included:
- (a) at line 92 in so far as they arise from the application of admissibility limits to the assets of that *dependant*;
 - (b) at line 93 in so far as they arise from a solvency margin deduction made either because that *dependant* is itself an *insurer* or because (directly or indirectly) it has invested in another *dependant* which is an *insurer*; and
 - (c) at line 94 in respect of any other causes of differences.

Line 95 should not be used for differences arising in respect of *shares* in, or *debts* due or to become due from, *dependants*. Such *shares* or *debts* are not themselves 'assets of type not valued', and this is still true even if the *dependants* themselves invest in assets of a type not valued.

Supplementary notes

- (24) There are nine specified supplementary notes. Each note, other than the note in (c), should be given separately for *long-term insurance business* and other than *long-term insurance business*, (i.e. separately for the category of assets '1' and '10' **Forms 13**). Further separate disclosure for category of assets

'2' to '5' or '11' onwards is not needed. The notes are coded 1301 to 1307, 1314 & 1315 for other than *long-term insurance business* and 1308 to 1313, 1316 & 1317 for *long-term insurance business*:

- (a) the aggregate value of (i) *unlisted* investments, (ii) certain *listed* investments, (iii) units or beneficial interests in certain *collective investment schemes* and (iv) reversionary interests or remainders in property other than land or buildings, together with a description of the assets in question - see instruction 5 to the form; [Codes 1301 and 1308]
- (b) the aggregate value of hybrid *securities* - see instruction 6 to the form; [Codes 1302 and 1309]
- (c) the amounts of any non-debtor salvage or subrogation recoveries - see instruction 7 to the form; [Code 1303];
- (d) a statement that amounts have been set off to the extent permitted by generally accepted accounting principles (if this option has been exercised) - see paragraph 8 of **Appendix 9.1**; [Code 1304 and 1310]
- (e) the maximum *counterparty* limit permitted by the *insurer's* investment guidelines (and any separate limit for *counterparties* other than *approved counterparties*) together with an account of any breaches during the year of those limits - see paragraph 11(1) of **Appendix 9.1**; [Code 1305 and code 1311]
- (f) the amount and nature of the exposure at the year end to large *counterparties* (i.e. greater than 5% of the *general insurance business* or *long-term insurance business* amounts) - see paragraph 11(2) of **Appendix 9.1**; [Code 1306 and 1312]
- (g) the aggregate value of certain fully secured rights - see paragraph 11(3) of **Appendix 9.1**; [Code 1307 and 1313]
- (h) the amount of any tangible leased assets should be included at line 80 even though not required by the rules; and [Code 1314 and 1316]
- (i) particulars of any other assets included at line 83 - see the face of the form. [Code 1315 and 1317].

Note 1

- (25) A single figure with a simple description will suffice. For example: 'The insurer held £xm in unlisted securities and £ym in unregulated collective investment schemes, almost all of which was of the latter type'. The assets covered by this note are those which count towards the 10% *permitted asset exposure limit* at paragraph 12 of Part II of **Appendix 4.2**. For detailed

descriptions of the type of assets to be included, see the *Valuation of Assets Rules*.

Note 2

- (26) A single aggregate figure is sufficient disclosure. This should only include salvage and subrogation rights (other than shown at line 73) brought into account under the valuation rule in rule 4.5(10). The exercise of salvage rights which have resulted in the *insurer* acquiring an asset which is admissible in its own right, (e.g. land and buildings received by a direct mortgage indemnity insurer), need not be included.

Note 3

- (27) The amounts set off do not need to be disclosed in this note.

Note 4

- (28) The precise content of this account of any breach is not specified in the rules. However the *FSA* expects it typically at least to include an estimate of the amount of the excess and the reasons why it was permitted to arise. The requirement to give an account of any breaches during the year should not be read as implying that real-time monitoring of the exposures is necessary. Rather, the frequency of the monitoring should be appropriate to the make-up of the investment portfolio.
- (29) For the purposes of making the disclosures required by supplementary notes 1305, 1306, 1311 and 1312, *counterparty* has the same meaning as in paragraph 1 of **Appendix 4.2**. Also, the amount of any *counterparty exposure* should be calculated using the rules laid down in paragraphs 13 to 15 of that appendix, except that asset values should not be limited to the amounts of any permitted asset limits. The amount of any *counterparty exposure* should be stated before deduction of any excess *counterparty exposure* or excess concentration with a number of *counterparties*.
- (30) Assets excluded from the scope of the *counterparty exposure* rules may also be disregarded for the purposes of these supplementary notes disclosure. This excludes -
- (a) linked assets held to match *property linked liabilities*; and
 - (b) assets of the type listed in rule 4.14(5). For a list of such *asset* types see paragraph 5.25 of **Guidance Note 4.1**.

Note 5

- (31) The limit of 5% of the *long-term insurance business* amount should be used for *counterparty exposures* which arise from the *long-term insurance business assets* and such other than *long-term insurance business assets* as

are allocated toward the *long-term insurance business required minimum margin* (see line 22 of **Form 9**). This does not apply to a composite *insurer* which must use the *general insurance business amount* for such assets. The limit of 5% of the *general insurance business* amount should be used for all other *counterparty exposures*.

- (32) 29 and 30 also apply to this note.

Note 6

- (33) This disclosure covers those secured assets which are exempted from counting towards the appropriate permitted *counterparty exposure* limit by virtue of paragraph 14 of Part I of **Appendix 4.2**. (NB By no means all secured assets are so exempted). Secured assets which are exempted from the limit by virtue of some other provision, (e.g. rule 4.4 in relation to stock-lending collateral), should not be included. A single aggregate figure is sufficient disclosure.

Note 7

- (35) cf. (17).

Note 8

- (36) cf. (18).

Long term business liabilities and margins (Form 14)

Completion of the form

- 5.5 (1) **Form 14** should be completed by every *insurer* which carries on *long-term insurance business* in respect of:
- (a) its total *long-term insurance business liabilities* and margins; and
 - (b) the *long-term insurance business liabilities* and margins for each separate *long-term insurance business fund* or group of funds for which separate assets have been appropriated (see rule 9.12(b)).
- (2) The effect of item (1)(b) is that a separate **Form 14** is required for each fund or group of funds whenever a separate **Form 13** is required for that fund or group of funds - see 5.4(2). The category of assets box in the header of **Form 14** is to be completed with the same codes as are used for the corresponding box in the header of **Form 13**, except that there are no **Forms 14** required which correspond to the **Form 13** category of assets 1 to 9.
- (3) **Form 14** shows the liabilities and margins in respect of *long-term insurance business*. It is helpful to consider these under three separate headings:

- (a) the liabilities, (lines 11, 12 and 15 to 49);
- (b) the margins, (lines 13 and 51); and
- (c) the footnote to the form, (lines 61 to 63).

Liabilities

- (4) There are three basic types of liability which fall to be disclosed:
 - (a) *long-term insurance business liabilities* not yet fallen due, (lines 11, 12 and 23);
 - (b) accounting liabilities including *long-term insurance business liabilities* which had fallen due, (lines 15 to 22 and 31 to 39); and
 - (c) the provision for adverse changes, (line 41).

Different rules apply for determining the amount of each of these types of liability. *Long-term insurance business liabilities* (other than liabilities which had fallen due for payment before the *relevant date*) are determined on actuarial principles and the accounting liabilities are determined using generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for insurance companies - see the *Determination of Liability Rules*. In effect accounting liabilities are to be determined for inclusion in **Form 14**, (lines 15 to 22 and 31 to 39), in the same way as for *Companies Act* accounts. However if the *Companies Act* accounts are signed off earlier or later than the *returns* differences may still arise despite the application of the same rules. This might be due to, say, the occurrence of an adjusting post-balance sheet event in the intervening period. It is important to identify whether a liability falls to be determined under the actuarial or accounting rules as they may produce very different results.

- (5) *Long-term insurance business liabilities* are liabilities arising under or in connection with contracts for *long-term insurance business*, including liabilities arising from *deposit back arrangements*. Liabilities from *deposit back arrangements* (line 23) should be determined on actuarial principles in accordance with rules 5.6 to 5.17. They include the amount of the *deposit* (as disclosed under paragraph 12(2)(f) in the Abstract of Valuation Report prepared by the *appointed actuary* – **Appendix 9.4**) together with any additional provision which the *appointed actuary* considers to be required in accordance with actuarial principles. *Mathematical reserves* are defined so as to include all long term liabilities (other than those fallen due) with the exception of liabilities arising from *deposit back arrangements*. They are shown, other than for cash bonuses, at line 11 and, for cash bonuses, at line 12. The amounts shown are taken from the *appointed actuary's* valuation as recorded in **Form 58** - see instructions 2 and 3 to **Form 14** - and include any increases resulting from the allocation of bonuses to *policyholders* as a result of the valuation. Subject to one exception, the accounting liabilities (lines 15

to 22 and 31 to 39) should not include any amounts in respect of *technical provisions* and the fund for future appropriations which appear in *Companies Act* accounts as these are already, to the extent necessary, taken into account in setting the *mathematical reserves*. The exception is *claims* outstanding which had fallen due for payment at or prior to the *financial year end* - see lines 15 to 17 on **Form 14**.

- (6) The *FSA* interprets liabilities arising under or in connection with contracts for *long-term insurance business* to include liabilities arising under reinsurances of those contracts for *long-term insurance business*. This includes liabilities under financial reinsurances and by extension, even liabilities under non-reinsurance financing arrangements, provided the liability under the financing arrangement is closely linked to the performance of contracts for *long-term insurance business*. Therefore liabilities under financial reinsurances and such analogous financing arrangements - subject to the exception of liabilities which had fallen due - are to be determined under actuarial principles. This is important as the crystallisation of such liabilities is often - although not invariably - linked to the emergence of future profits. Future profits are not in themselves an asset admissible to match liabilities and may not be included on **Form 13**, (lines 11 to 89). However, provided the reinsurance or financing liability is repayable - as a matter of legal form and economic substance - only upon the emergence of the future profit, actuarial principles may sometimes allow the future profit to be taken into account in determining the amount of the liability. Accounting rules do not permit this treatment. They prohibit the offset of an asset against a liability except where they are amounts due to and from the same person and also impose other conditions - see Financial Reporting Standard 5.
- (7) The provision for adverse changes is an extra provision in addition to that which would be required under either actuarial or accounting principles. It arises when an investment (or transaction associated with an investment) will, or may, give rise to a liability in future and the company does not have the appropriate assets to cover that liability. (Most commonly, but not exclusively, this issue arises in respect of *derivative contracts*.) The provision is to be determined in accordance with rule 5.3.

Margins

- (8) The margins are the amounts by which the net *admissible asset* value of any *long-term insurance business fund* exceeds the *mathematical reserves* and cash bonuses for that fund. The margins are to be calculated in two stages as follows:
- (a) firstly, the amount of the *long-term insurance business fund* as per **Form 40** is compared with the *mathematical reserves* including cash bonuses (lines 11 and 12 on **Form 14**). The amounts of any excess/(deficit) is to be shown at line 13; and

- (b) secondly, the net *admissible asset* value of the long term fund - being the assets as per line 89 on **Form 13** less the liabilities as per line 49 on **Form 14** - is to be compared with the value of the long term fund as per **Form 40**. The amount of any excess is to be shown at line 51. An excess may only arise in those cases where the *insurer* has chosen to report its *long-term insurance business funds* on **Form 40** at a value other than the value of net *admissible asset*, e.g. using book costs for asset values. It is not permissible to report the fund at a value on **Form 40** which is higher than the value of net *admissible assets*. Therefore a deficit should never need to be shown at line 51.

The footnotes to the form

- (9) Lines 61 and 62 to the form show respectively the amounts included in the total liabilities and margins which is attributable to:
- (a) liabilities to related companies, other than those under *contracts of insurance*; and
- (b) liabilities in respect of *property linked benefits*.
- (10) The scope (but not the value) of the line 62 disclosure corresponds to *technical provisions* in the shareholder accounts (i.e. headings C and D in the balance sheet format in Schedule 9A to the *Companies Act*), but only in so far as they relate to *property linked benefits*. Line 62 shows the amounts of those liability items shown at heading C and D in the *Companies Act* accounts, but evaluates them using the **Form 14** valuation rules and not (where different) the *Companies Act* rules. The **Form 14** valuation rules are discussed at (4) to (7) above. NB. The effect of this guidance is that line 62 shows the amount of the *property linked liabilities* which are excluded from the calculation of the *long-term insurance business amount* for the purpose of applying *counterparty* limits - cf. paragraph 2 of **Appendix 4.2**.
- (11) Line 63 requires an *insurer* to disclose whether any part of the amount shown at line 51 represents an amount taken into account by the actuary to support the *mathematical reserves* (as shown in **Form 58**) in giving his certificate. This issue arises because the assets shown on **Form 9**, which are sourced from **Form 13**, are shown at their admissible value even where the *long-term insurance business fund* is maintained and brought into account in the **Appendix 9.4** report on the basis of lower book values. In such circumstances the *mathematical reserves* shown in **Form 58** may not always constitute an appropriate assessment of the liabilities for the purposes of comparison with the assets stated at admissible value. For this reason in certifying the long term liabilities as required under Part II of **Appendix 9.6**, the actuary may find it necessary in some circumstances to make an addition to the *mathematical reserves* on the **Appendix 9.4** basis shown at line 11 of **Form 14**.

Supplementary notes

- (12) Two supplementary notes are specified:
- (a) the methods and assumptions used to determine the amount of any provision for adverse changes (as shown at line 41 of the form), or if there is no such provision the methods and assumptions used to determine that no provision is required, should be stated - see paragraph 12 of **Appendix 9.1**. [Code 1401]
 - (b) specified details should be stated of (i) any charges over assets, (ii) potential capital gains tax liability, (iii) contingent liabilities, (iv) guarantees, indemnities or other contractual commitments effected other than in the ordinary course of *insurance business* and in respect of related companies, and (v) any other fundamental uncertainty - see paragraph 13(1) of **Appendix 9.1**. [Code 1402]. This note is to be given in respect of *long-term insurance business assets and liabilities*. A similar note (code 1502) is to be given in respect of other than *long-term insurance business assets and liabilities*. The guidance given for that note under 5.6(16) to (30) also applies here.

Liabilities - other than long term business (Form 15)

Completion of the form

- 5.6 (1) **Form 15** should be completed by all *insurers* except an *insurer* not trading for profit (i.e. a *mutual*) carrying on only *long-term insurance business* - see rule 9.12(7).
- (2) **Form 15** shows all liabilities of the *insurer* other than *long-term insurance business liabilities*, which are shown instead on **Form 14**.
- (3) **Form 15** consists of three parts:
- (a) lines 11 to 59 provide a line by line analysis of the liabilities (other than share capital and reserves and exclusively *long-term insurance business* items) corresponding to the balance sheet format in Schedule 9A of the *Companies Act*, i.e. the format required to be used in the preparation of the *Companies Act* accounts. In a few cases, however, a single item in that format is subdivided in **Form 15**;
 - (b) lines 61 to 63 list three further items of liability - (i) the provision for adverse changes, (ii) cumulative preference *share* capital and (iii) subordinated loan capital; and
 - (c) line 71 discloses the value (as included in the above items) of the liabilities to related companies, other than those under *contracts of insurance* or *reinsurance*.

Determination of liabilities

Lines 11 to 59

- (4) The liabilities at lines 11 to 59 should be valued in accordance with the *Determination of Liabilities Rules*, the main provision of which is rule 5.2 which provides that:
- (a) the amount of liabilities of an *insurer* must be determined in accordance with generally accepted accounting concepts, bases and policies or other generally accepted methods appropriate for *insurers*; and
 - (b) in determining under (a) the amount of liabilities of an *insurer*, all contingent and prospective liabilities must be taken into account including all liabilities in respect of cumulative preference *share* capital but excluding other liabilities in respect of *share* capital.
- (5) (4)(b) above does not require that the amount of every prospective and contingent liability be set equal to the full extent of its nominal value regardless of the remoteness of the contingency it represents. The requirement is merely that all prospective and contingent liabilities be taken into account, i.e. considered. The amount of every liability whether present, prospective or contingent should be set as required under (4)(a) in accordance with generally accepted accounting concepts.
- (6) The requirement in (4)(a) that generally accepted accounting concepts be used means, in effect, that the liabilities at lines 11 to 59 are to be valued for the *returns* in the same way as for the *Companies Act* accounts. For *technical provisions* this is indeed explicitly stated by rule 5.4, which refers to the rules in Section D of Chapter II of Schedule 9A to the *Companies Act*.
- (7) However, (6) does not mean that the value shown for such liabilities in the *return* will always necessarily be the same as that shown in the *Companies Act* accounts. Exceptionally differences may occur if the *return* and *Companies Act* accounts are either:
- (a) drawn up to different balance sheet dates; or
 - (b) even if drawn up to the same balance sheet date, signed off at different dates.
- (8) In the (7)(b) case it is possible that a material adjusting post-balance sheet event may have occurred between the date of the sign off of the *Companies Act* accounts and the date of the sign off of the *return* (or vice versa).
- (9) The *technical provision* for *claims* outstanding (line 12) should be shown before or after reduction for anticipated salvage and subrogation recoveries

according to the treatment adopted in preparing **Form 13**. See 5.4(16), but compare the possibly different treatment in the technical account, **Forms 20 to 39** - see 8.2(6).

Lines 61 to 63

- (10) The provision for adverse changes (line 61) is an extra provision which arises when an investment (or transaction associated with an investment) will, or may, give rise to a liability in future and the *insurer* does not have the appropriate assets to cover that liability. (Most commonly, but not exclusively, this issue arises in respect of *derivative contracts*). The provision is in addition to any liability which would be required to be provided in accordance with generally accepted accounting practice. It is required to be determined in accordance with rule 5.3.
- (11) *Share* capital is not normally to be considered a liability for the purposes of completing the *return* - see rule 5.2(2). The only exception (see rule 2.10(3)) is cumulative preference *share* capital, but this exception is in turn subject to a partial exception as explained in (12) and (13).
- (12) In determining whether an *insurer* has assets in excess of its liabilities, the full nominal value (plus any premium on redemption if redeemable) of all cumulative preference share capital is to be counted as a liability. If the assets exceed liabilities then part (sometimes all) of the liability from the preference *share* capital may be disregarded in determining whether the net assets exceed the *required margin of solvency*.
- (13) In **Form 15** (line 62) the full value of cumulative preference *share* capital is to be shown, i.e. the value to be used in determining whether the *insurer* has assets in excess of liabilities. This full value then forms part of the total liabilities which are taken from **Form 15** to **Form 10** where they are compared with the total assets taken from **Form 13**. If assets exceed liabilities the part of the liability for preference share capital which may be disregarded in determining whether the net assets exceed the required margin of solvency, is added back as an adjustment to net assets on **Form 10**. No adjustment is to be made on **Form 15**. See 5.2(6), concerning **Form 10**, for further guidance.
- (14) Subordinated loan capital is to be valued according to rule 5.2, i.e. in accordance with generally accepted accounting concepts. Where a *insurer* has been granted a direction under section 148 of the *Act* permitting it to disregard all or part of the liability for its subordinated loan capital in determining whether its net assets exceed its required minimum margin, the adjustment for the amount to be disregarded is to be made solely on **Form 10** and not on **Form 15**. (The reason for this treatment of the add-back is the same as that described above for the add-back in respect of preference *share* capital).

Supplementary notes

- (15) Three supplementary notes are specified:
- (a) the methods and assumptions used to determine the amount of any provision for adverse changes (as shown at line 51 of the form), or if there is no such provision, the methods and assumptions used to determine that no provision is required, should be stated - see paragraph 12 of **Appendix 9.1**. [Code 1501]
 - (b) specified details should be stated of (i) any charges over assets, (ii) potential capital gains tax liability, (iii) contingent liabilities, (iv) guarantees, indemnities or other contractual commitments, effected other than in the ordinary course of *insurance business*, in respect of related companies, and (v) any other fundamental uncertainty - see paragraph 13(1) of **Appendix 9.1**. Guidance is given in (16) to (30) on each of the items (i) to (v) to be included in this note and in the corresponding note [Code 1403] to **Form 14**, (see 5.5(12)); and [Code 1502]
 - (c) the aggregate amount of any accrued dividend on any cumulative preference *share* capital issued by the *insurer* should be stated - see instruction 2 to **Form 15**. [Code 1503]

Guidance on Note 1502

- (16) Where for any of the items 15(b)(i) to (v) there is no charge, potential capital gains tax liability, contingent liability, guarantee etc., or fundamental uncertainty to report this should be stated.

Item (15)(b)(i)

- (17) The details to be disclosed of any charge over assets are:
- (a) the nature of the charge, including a brief description of the terms which are relevant to securing the prior claim of any person to assets which are subject to the charge;
 - (b) for each line in **Form 13**, the amount included in respect of assets which are subject to the charge; and
 - (c) for each line in **Form 14** or **15**, the amount included in respect of liabilities which are secured by the charge.
- (18) ‘Charge’ is given a wide definition - see paragraph 13(5) of **Appendix 9.1**. It includes not merely formal charges over assets which are registered under the *Companies Act* but also any arrangement whatsoever, whether contractual or otherwise, which operates to secure the prior claim of any

person to any assets in preference to the general creditors on a winding up of the *insurer*. Amongst other items 4 includes:

- (a) arrangements whereby assets of the *insurer* are placed in trust for the prior benefit of only some creditors;
 - (b) assets held as collateral by creditors or by issuers of letters of credit;
 - (c) fixed and floating charges; and
 - (d) equivalent arrangements under the laws of overseas countries.
- (19) It also, in principle, applies to set offs, i.e. where a person owed amounts by the *insurer* may in a winding up set off amounts owed by it to the *insurer*. However, in practice where the *insurer* has accounted for set offs in accordance with generally accepted accounting practice, the assets shown in **Form 13** will already be net of such set offs and so no disclosure under this note will be needed. Amounts due to preferential creditors (e.g. PAYE) need not be disclosed.
- (20) A charge should be disclosed even where it only serves to secure the prior claim of a contingent or potential creditor which has not resulted in any provision for liability in either **Forms 14** or **15**.
- (21) (15)(b)(i) refers to any charge, thus in principle requiring separate disclosure of each arrangement which falls within the definition of a charge. However, where clarity or brevity require, it is acceptable to disclose in aggregate charges which arise from the same related series of transactions, or charges which are of the same nature and have substantially the same relevant terms.
- (22) The disclosure of charges is subject to a de minimis exemption. One or more charges need not be disclosed, provided that the aggregate value (as show on **Form 13**) of all the assets subject to the non-disclosed charges does not exceed 2.5% of the *general insurance business amount* or *long-term insurance business amount*, as appropriate.

Item (15)(b)(ii)

- (23) The total potential liability should be calculated on the basis of a hypothetical disposal of all assets immediately after the year end. It should include liability to foreign taxes on capital gains.

Item (15)(b)(iii)

- (24) Financial Reporting Standard 12 (FRS 12) defines a contingency as a condition which exists at the balance sheet date where the outcome will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events. A contingent liability is a loss dependent on a contingency. FRS 12 distinguishes between contingent liabilities which are

probable or remote. A remote contingent liability need not be disclosed in this note.

- (25) 'Inward' in the expression 'inward *contracts of insurance and reinsurance*' is intended to exclude from the exemption contracts of *reinsurance* where the reporting *insurer* is the reinsured.
- (26) The disclosure of contingent liabilities is subject to a de minimis exemption. One or more contingent liabilities need not be disclosed provided that the aggregate value of the non-disclosed contingent liabilities does not exceed 2.5% of the *general insurance business amount* or *long-term insurance business amount*, as appropriate.

Item (15)(b)(iv)

- (27) *Related company* is defined as:
 - (a) a *dependant* of the *insurer*;
 - (b) a company of which the *insurer* is a *dependant*; or
 - (c) a *dependant* of a company of which the *insurer* is a *dependant*-
- (28) In the *FSA's* view, a guarantee, indemnity or other contractual commitment should not be considered as given other than in the ordinary course of an *insurer's* business where guarantees, indemnities or other contractual commitments on substantially the same terms and conditions are not regularly given to non-related entities in similar circumstances. An example of a contractual commitment which need not be disclosed might be where a motor *insurer* insures the motor car fleet of a related company using the same underwriting principles as it uses for its other fleet business.
- (29) 15(b)(iv) refers to (i) 'maximum liability ... specified in such guarantee, indemnity or contractual commitment', (ii) 'amount of provision' and (iii) 'amount reported under (15)(b)(iii), (i.e. reported as a contingent liability). The distinction between these three items may be illustrated by an example.

An *insurer* guarantees the bank overdraft of its two fellow subsidiaries up to an aggregate of £100,000. At the year end:

- (a) fellow subsidiary A is insolvent and has an overdraft of £5000; and
- (b) fellow subsidiary B is believed (on the balance of probabilities) to be solvent and has an overdraft of £10,000.

A provision of £5000 (in respect of A) would be made in **Form 15** and a contingent liability of £10,000 (in respect of B) would be included in the disclosure under (15)(b)(iii).

The disclosure under (15)(b)(iv) would then be:

- (i) maximum liability specified in the guarantee = £100,000;
- (ii) provision = £5,000; and
- (iii) contingent liability = £10,000;

together, of course, with a brief description of the terms and circumstances of the guarantee, including the identity of the person to whom the guarantee is given and of the persons in respect of whom it was given and of the relationship with the latter (and, if applicable, with the former).

Item (15)(b)(v)

- (30) This is intended to cause to be disclosed the circumstances of any uncertainty which is of a fundamental nature. Note that, unlike (15)(b)(iii), this does not exclude uncertainties arising from inward *contracts of insurance* or *reinsurance*.

Profit and loss account (non-technical account) (Form 16)

Completion of the form

- 5.7
- (1) **Form 16** should be completed by all *insurers* - see rule 9.13. However, for a *mutual insurer* carrying on only *long-term insurance business*, the form usually will include no entries. Where this is the case for both the current and previous *financial year*, the blank form may be omitted provided the supplementary note [Code 1600] under 4.6(6) is included in the *return*.
 - (2) The headings used on **Form 16** are based on those used in the 'Profit and Loss Account - Non Technical Account' format in Schedule 9A of the *Companies Act* (i.e. the format to be used in preparing *Companies Act* accounts) and, except where referenced to other Forms, the amounts included under those headings should be determined using the same rules as apply for the *Companies Act* accounts.
 - (3) One such exception occurs at line 13 (Transfer from the *long-term insurance business* revenue account) which is referenced to **Form 40**. As a result, for *long-term insurance business* **Form 16** presents a profit for the *financial year* determined on the statutory basis and not the modified statutory basis.
 - (4) Unrealised gains and losses on investments (other than for investments in the long term fund) should be included in their entirety at lines 15 and 18, even if different accounting treatment is adopted in the *Companies Act* accounts. Unrealised gains and losses should be measured by reference to the value included for the investment at line 99 on **Form 13**, i.e. the *Companies Act* accounts value. An *insurer* which includes investments at amortised cost at

line 99 on **Form 13** (see 5.4(22)) should show the unrealised gain and loss relative to that amortised cost not to current *market value*.

Supplementary notes

- (5) Four supplementary notes are specified:
- (a) the bases of conversion adopted in respect of foreign currency for income and expenditure should be stated - see paragraph 5(2) of **Appendix 9.1**; [Code 1601]
 - (b) in addition to (a), where any brought forward amounts on any Form are restated due to currency reconversion this fact should be briefly stated in a supplementary note to **Form 16**. A simple statement of this fact is all that is needed, e.g. 'Some of the brought forward amounts shown in the forms xx to xx have been restated from the corresponding carried forward amounts included in the previous years *return* due to the reconversion of foreign currency amounts at a different rate of exchange'. No further details need be given. This note is required to facilitate the *FSA's* computerised validation of the *return*; [Code 1602]
 - (c) particulars of any amounts included at lines 21 on **Forms 16** should be stated - see the face of **Form 16**; and [Code 1603]
 - (d) particulars of any amounts included at lines 41 on **Forms 16** should be stated - see the face of **Form 16**. [Code 1604]

Analysis of derivative contracts (Form 17)

- 5.8 (1) A **Form 17** should be submitted for each category of assets for which a **Form 13** is submitted (other than categories of assets '2' to '9') - see rule 9.12(5) and instruction 1 to the **Form**.
- (2) The paragraphs below consider the following points:
- (a) which derivatives need to be entered on the form;
 - (b) what needs to be recorded in respect of the amounts of margin paid or received;
 - (c) what reconciliation there is to other forms; and
 - (d) what approach is needed for instruments which are required, under the *Asset Valuation Rules*, to be treated as derivatives even though they may have some other legal form (i.e. quasi-derivatives or contracts or assets having the effect of a *derivative contract*).

- (3) Derivatives used for the purpose of matching *index linked* or *property linked liabilities* are not to be recorded on **Form 17**. (These are covered on **Forms 55** or **56**.) However, to the extent that the *insurer* holds *derivative contracts* in connection with *linked contracts*, but additional to the amounts necessary to match linked liabilities, these should be recorded on **Form 17**. For example, if an *insurer* has transacted a tranche of derivatives to match linked liabilities in the expectation of selling a particular volume of linked business, but where the actual volume fell short of expectations, the excess would be recorded on **Form 17**. Similarly, if an *insurer* retains excess derivatives no longer necessary for matching purposes (for example, as a result of policy surrenders), these would also be recorded on **Form 17**.
- (4) Quasi-derivatives are not recorded on the face of **Form 17**, but are required to be shown as a supplementary note [Code 1702] - see (25) and (26).
- (5) Where a provision for adverse changes is required in accordance with rule 5.3, no adjustment is to be made on **Form 17** to the value of the derivative which gave rise to the provision. The provision itself is to be shown on **Form 14** or **15**, as appropriate.

Instructions to the Form

- (6) *Instruction 1*: A **Form 17** should be completed for the other than long term assets and the long term assets separately. Each *long-term insurance business fund* separately accounted for by a separate **Form 13** should also have a **Form 17** completed - see instruction 1 to the Form. A sub fund whose accounting details are only given as part of **Appendix 9.4** should be covered by a commentary in that Appendix.
- (7) *Instruction 2*: The same codes should be used for the category of assets header box on **Form 17** as on the corresponding **Form 13**.
- (8) *Instruction 3*: Analysis is by the principal underlying asset. When there is a mixture of asset types, the derivative should be split if it is sensible to do so, if not then it should be categorised under the most significant asset type.
- (9) *Instruction 4*: Derivatives are to be assigned to the assets and liabilities columns according to whether the gross position is an asset or a liability and irrespective of the net position after margin.
- (10) *Instruction 5*: The asset values to be shown are gross of any *variation margins* received (or, unusually, paid) - i.e. assuming such margin has been reversed. The asset values are to be as determined under the *Asset Valuation Rules*, i.e. before the further liability under rule 5.3 (which of course can apply to an uncovered asset). **Form 17** does not, therefore, deal with economic exposure to various asset classes (as for example, in a 'LIFFE-style' presentation). This issue is dealt with in the supplementary information provided in accordance with rule 2.10.

- (11) *Instruction 6*: Netting of derivative positions may be permissible for the purpose of completing **Form 17**, provided it would be permissible under generally accepted accounting practice. However, there are additional pre-conditions to netting. Within a **Form 17**, derivatives which partly or wholly offset one another (for example, a bought future and a sold future on the same index) cannot be netted to one net asset or liability figure unless there is a legal right of set off with the *counterparty* concerned, or between the *counterparties* concerned. Where the derivatives are with the same *counterparty* and legal set off applies, but the derivatives are not symmetrical, i.e. they do not cancel or part cancel out a given position, then gross figures should be shown. Where a legal right of set off applies, but the derivatives have to be reported on separate **Forms 17**, they should be shown gross in each form.
- (12) *Instruction 7*: The aggregate amount of *variation margin* then to be offset is to be shown at line 41.
- (13) *Instruction 8*: The assets shown at line 49, column 1 should be included at line 44 in **Form 13**. Where line 49, column 1 also includes deductions for applicable margins these should be included either in **Forms 14** or **15** as liabilities or in **Form 13** as deductions from assets according to the same accounting treatment as is adopted in the *Companies Act* accounts, (or if there are no such accounts according to generally accepted accounting practice). Other general buffer or good faith margins paid out (*initial margins*) should appear on **Form 13**, probably on line 78.
- (14) *Instruction 9*: Similarly the liabilities shown at line 49, column 2 should be in **Form 14** (if long term) or **Form 15** (if other than long term) at lines 38 and 49 respectively. Also deductions for applicable margins which are included at line 49, column 2 should be included in **Form 13**, or **14/15** according to the same accounting treatment as adopted in the *Companies Act* accounts (or if there are no such accounts, according to generally accepted accounting practice).
- (15) *Instruction 10*: No entry is to be made on **Form 17** in respect of *initial margin* paid or received.

Further points on margins

- (16) The *variation margin* received for assets acts as an offset to the value of the derivative that flows through to **Form 13**, and such margin then needs to be categorised itself in **Form 13**, probably under *deposits* if the margin payment is deposited with the *insurer's* bankers. *Initial margins* should however appear in **Form 13**, normally line 78, i.e. unsecured amounts due to the *insurer*, unless the *insurer* has more unusually received initial margin and so the amount is due to a creditor. It should be noted that the definition of *variation margin* may be wider than a market understanding as it includes all collateral arrangements. It is this wider definition which should be applied in completion of **Form 17**.

- (17) In the unusual situation of a *variation margin* payment to the broker on a asset, then such an amount should appear on **Form 17** as a positive entry at line 41, and thus an appropriate increase to the asset.
- (18) Liabilities follow the normal accounting rules of rule 5.2. Again, the inclusion of all *variation margins* is necessary, even if this makes the resultant entry on **Forms 14** of **15**, as appropriate, become negative. The offset of margins paid against the amount of the liability means no further entries are needed, as the net entry at line 47 of **Forms 14** or **15** encapsulates the offset of the derivative liability and the sums put up in surety for such liability. In the unusual case of amounts received from the broker on a liability such amount should appear in **Form 17** as a positive entry at line 41, thus an appropriate increase to the liability.
- (19) Asset and liability margin payments must be accounted for separately. Margin is that actually received as cash or *securities* from a broker or paid to a broker. Amounts due to be paid by either party, or amounts held in an account at the broker, where the *insurer* has no legal rights over such account, are not transferred margin and should not be presented as such. **Form 17** must demonstrate the margins actually received into the possession of the *insurer* or released by the *insurer*. Thus, at any reporting date, even daily margined contracts may be a day behind as the margin process is not instantaneous.
- (20) Margin received or paid to different *counterparties* cannot be offset under any circumstances, even where the *counterparties* are *connected companies*. Similarly, margin paid to and received from a single *counterparty* cannot be offset, where no legal right of offset applies. Thus one over-margined asset cannot have its deduction for margin on **Form 17** reduced to allow the reduction of a **Form 17** margin on an over-margined liability, unless legal rights of offset apply.
- (21) Margin must mean the amounts transferred back and forth under the terms of the derivative. Only amounts closely connected to the derivative under a formal agreement that has legal rights of offset between the margin payment and the settlement of the derivative should be included, and not other deposits from or with the *counterparty*.
- (22) Where margin payment is by pledges of assets, such as short gilts, then the same approach should be followed. Unconditional granting of title to a broker will mean the asset can no longer be recorded as that of the *insurer*, and has been replaced by a *debt* due from the broker.

Supplementary notes

- (23) Two supplementary notes are specified in paragraphs 16 and 17 of **Appendix 9.1**, covering treatment of variation margin [Code 1701] and use of quasi-derivatives [Code 1702].

Note 1

- (24) This note (see paragraph 16 of **Appendix 9.1**) needs three separate items, as follows:
- (a) the aggregate amount of an excess *variation margin* which has been received by the *insurer*, the excess being due to market movements which have subsequently been partly or wholly reversed;
 - (b) how *variation margin* received is distributed amongst the different lines of **Form 13**;
 - (c) the extent to which the amount recorded in any line of **Form 13** has been reduced to reflect the liability to repay any excess referred to above.

Note 2

- (25) A further supplementary note is prescribed covering quasi-derivatives - see paragraph 17 of **Appendix 9.1**. These are exempt from special disclosure, provided that, in aggregate, they are below the 'materiality threshold' set out in paragraph 17. Separate thresholds apply for assets and liabilities and are to be calculated prior to any adjustment for *variation margin*.
- (26) For quasi-derivatives which are assets, the test at paragraph 17 of **Appendix 9.1** is whether the aggregate value of all such quasi-derivatives exceeds 2.5% of the total **Form 13** asset value (i.e. for the *long-term insurance business fund* or a *long-term insurance business* sub fund the *non linked, property linked* and *index linked* assets totalled at line 89 of the particular **Form 13**). No attempt should be made to value the derivative component of a quasi-derivative separately and apply the materiality test to that component; the test should be applied to the value of the instrument as a single entity.
- (27) For quasi-derivatives that are liabilities, the test of disclosure is in some ways more demanding, being whether the aggregate liability of all such quasi-derivatives would exceed 2.5% of the non insurance liabilities of **Forms 15** or the relevant **Form 14**, as appropriate. Any provision under rule 5.3 would count towards this aggregate liability, even where it arises from a quasi-derivative that is currently an asset.
- (28) If the holdings are sufficiently significant to trigger disclosure, then the (non-zero) amounts contributed by quasi-derivatives to each line in **Forms 13, 14** and **15** should be stated. In addition, the information specified under Note 1 is also required in respect of such contracts.
- (29) Leaving aside quasi-derivatives used for the purpose of matching linked liabilities, it would be a little unusual for quasi-derivatives to be subject to margining arrangements. In any event, the *Valuation of Assets Rules* and

Determination of Liabilities Rules make no provision for valuation of quasi-derivatives net of value of margin (or collateral) and the appropriate values for the purposes of this disclosure are therefore the gross asset or liability values. Any margins paid or received should appear in **Forms 13, 14** or **15** as debtor or creditor items.

- (30) An example of the disclosure required when the materiality test is passed is as follows:

‘A FTSE-linked bond with embedded option to achieve a guaranteed maturity value of £10m was included in line 48 of **Form 13**. The current value of the bond is £11m. The bond is not margined and was held for the full year.’

Examples

- (31) A number of illustrative examples of completion of **Form 17** are given in **Annex B**.

ANNEX A TO PARAGRAPH 5

Examples of the completion of the reconciliation at the foot of Forms 10 and 13

5.A.1 Example one: the reconciliation on Form 13

In this example an *insurer* shows the following assets in its *Companies Act* accounts.

<i>Assets</i>	<u>1996</u>	<u>1995</u>
Shares in UK insurance subsidiary	1000	1000
Cash at bank	2000	1500
Gold	100	-
	<hr/> 3100	<hr/> 2500

In preparing **Form 13** of its *return* the *insurer* must revalue its assets using the valuation rules. Let us say the revised values are as follows.

Balance sheet: Assets	<u>1996</u>	<u>1995</u>
<i>Investment in insurance dependant</i>		
Basic 'look through' value	900	800
Disallowed under admissibility rules	(100)	(100)
Solvency margin deduction	(200)	(200)
	<u>600</u>	<u>500</u>
<i>Cash at bank</i>		
Valuation	2000	1500
Disallowed under admissibility rules	(200)	(100)
	<u>1800</u>	<u>1400</u>
<i>Gold</i>		
	nil	nil

Form 13 should be prepared with the following entries.

Form 13		<u>1996</u>	<u>1995</u>
UK insurance <i>dependants</i> - shares	21	600	500
Cash at bank - <i>deposits</i>	82	1800	1400
Grand total of <i>admissible assets</i>	89	<u>2400</u>	<u>1900</u>
Reconciliation			
Total - as per line 89 above	91	2400	1900
Total assets in excess of admissibility limits ⁽¹⁾	92	300	200
Solvency margin deduction ⁽²⁾	93	200	200
Other differences ⁽⁴⁾	94	100	200
Assets of a type not valued above ⁽³⁾	95	100	-
Total assets determined in accordance with the shareholder accounts rules	99	<u>3100</u>	<u>2500</u>

Explanations of the above

- (1) 300 = 100 + 200; being the amounts shown above as disallowable under the admissibility limits respectively for the investment in *dependant* (100) and the cash at bank (200).
- (2) This is the solvency margin deduction for the insurance *dependant*.

- (3) This is the value of the gold as per the *Companies Act* accounts. There is no valuation rule, and hence nil value, for gold under the rules.
- (4) This is the total of all other valuation differences not dealt with at lines 92, 93 or 95. In this examples there is only one such difference: that is the difference between the *Companies Act* accounts value of the insurance *dependant* (£1000) and the basic 'look through' value (£900).

5.A.2 Example two: the reconciliation on Form 10 for a general business company

In this example an *insurer* has the same assets as in example one above and shows the following amounts for liabilities in its *Companies Act* accounts.

Balance sheet: liabilities	<u>1996</u>	<u>1995</u>
<i>Share capital</i>	1000	1000
Profit and loss account	1000	700
	<hr/>	<hr/>
	2000	1700
<i>Technical provisions</i>	1000	700
Creditors	100	100
	<hr/>	<hr/>
	3100	2500

The *insurer's* **Form 13** is as in example one above and its **Form 10** as follows.

Form 10⁽¹⁾	<u>1996</u>	<u>1995</u>
Other than Ltb - <i>admissible assets</i> ⁽²⁾	21 2400	1900
Other than Ltb - liabilities ⁽³⁾	22 1,100	800
Available assets	29 <hr/> 1300	<hr/> 1100
Represented by		
Paid up <i>share</i> capital	51 1000	1000
Balance of net assets ⁽⁴⁾	56 300	100
Total - equal to line 29 above	59 <hr/> 1300	<hr/> 1100
Movement of balance of net assets		
Balance brought forward	61 100	50 ⁽⁶⁾
Retained profit	62 300	50 ⁽⁶⁾
Movement in asset valuation difference ⁽⁵⁾	63 (100)	
Balance carried forward as per line 56	69 <hr/> 300	<hr/> 100

Explanations of the above

- (1) Blank lines have been omitted.
- (2) This is taken from line 89 in **Form 13** - see example one above.
- (3) This is *technical provisions* (1000) plus creditors (100).
- (4) This is the balancing figure.
- (5) This is the difference for lines 92 to 95 on **Forms 13** between the comparative amounts, (200 + 200 + 200) and the present year amounts (300 + 200 + 100 + 100) – 5.A.1, example one.
- (6) The comparative amounts at lines 61 and 62 are illustrative only. They cannot be derived from the other data given in this example.

5.A.3 Example three: the reconciliation on Form 10 for a long-term insurance business company

In this example an *insurer* shows the following amounts in its *Companies Act* accounts.

Assets	<u>1996</u>	<u>1995</u>
Investments	1000	1200
Cash	800	400
<i>Deferred acquisition costs</i>	40	20
	1840	1620
<i>Share capital</i>	100	100
Profit & loss account	350	220
Fund for future appropriations	700	600
<i>Technical provisions</i>	490	400
Creditors	200	300
	1840	1620

The profit and loss account for 1996 shows a transfer to the Fund for Future Appropriations of 100 and a retained profit of 130. In the *return* the following items are shown on **Forms 13 to 16**.

Form 13		<i>Long-term Insurance Business</i>		<i>Other than long-term insurance business</i>	
		<u>1996</u>	<u>1995</u>	<u>1996</u>	<u>1995</u>
Equity shares	41	600	650	200	250
Cash at bank - <i>deposits</i>	81	700	300	100	105
Grand total of <i>admissible assets</i>	89	1300	950	300	355
Excess of admissibility limits	92	100	150	100	145
Total assets determined in accordance with the shareholder accounts rules ⁽¹⁾	99	1400	1100	400	500

(1) This amount should not include *long-term insurance business deferred acquisition costs* -see 5.4(20).

Form 14 (part)		<u>1996</u>	<u>1995</u>
<i>Mathematical reserve</i>	11	507	404
Balance of long term funds	13	193	156
		700	560
Creditors etc.	49	150	100
Excess assets etc.	51	450	290
Total	59	1300	950

Form 15 (part)		<u>1996</u>	<u>1995</u>
Total liabilities	59	50	200
Provision for adverse changes	61	18	12
Total	69	68	212

Form 16 (part)		<u>1996</u>	<u>1995</u>
line 59 - retained profit		50	100

Form 10 should now be completed as follows.

Form 10		<u>1996</u>	<u>1995⁽⁵⁾</u>
<i>Long term insurance business - assets</i>	11	1300	950
<i>Long term insurance business - liabilities</i>	12	1300	950
Other than LTB - assets	21	300	355
Other than LTB - liabilities	22	68	212
Available assets	29	232	143
Paid up <i>share</i> capital	51	100	100
Balance of net assets	56	132	43
	59	232	143
Balance of net assets - b/f	61	43	73
Retained profit ⁽¹⁾	62	50	100
Movement in asset valuation differences ⁽²⁾	63	45	(90)
Increase in provision for adverse changes ⁽³⁾	64	(6)	(40)
Other movements ⁽⁴⁾	65	-	-
Balance of net assets - c/f	69	132	43

<u>1002 Reconciliation to shareholder accounts</u>	<u>1996</u>	<u>1995</u>
	<u>£'000</u>	<u>£'000</u>
<u>Net assets as per return</u>		
line 99 on Form 13 (OLTB)	400	500
line 59 on Form 15	(50)	200
	<u>350</u>	<u>300</u>
<u>Capital and reserves as per shareholder accounts</u>	<u>450</u>	<u>320</u>
Difference due to assets retained in the <i>long-term insurance business fund</i> in excess of the fund for future appropriations ⁽⁶⁾	<u>100</u>	<u>20</u>

Explanations of the above.

- (1) This is the retained profit as per **Form 16**.
- (2) This is the difference for lines 92 to 95 on **Forms 13** between the comparative amounts, (145) and the present year amounts (100).
- (3) This the increase in the provision for adverse changes as shown on **Form 15** only.
- (4) This is the balancing figure, i.e. the differences not shown at the other lines.
- (5) The comparative amounts at lines 61 to 69 of **Form 10** are illustrative only. They cannot be derived from the other data given in this example.
- (6) This is taken from the *Companies Act* accounts as follows: value of assets in the *long-term insurance business fund* (1400 + 40) less *long-term insurance business technical provisions* (490) less *long-term insurance business creditors* (150) less fund for future appropriations (700).

ANNEX B TO PARAGRAPH 5

Examples of completion of Forms 13, 14, 15 and 17 in respect of derivative holdings

5.B.1 Introduction to the examples

- (1) The examples introduced below illustrate the inter-relationship between **Forms 13, 14 (or 15) and 17**. Some relate to illustrative examples described in **Guidance Note 4.2**. The derivatives used in the examples are described in section 5.B.2.
- (2) The examples can be summarised as follows.

Example 1 - Derivatives used to rebalance portfolio (much as example C in **Guidance Note 4.2** but reversed to illustrate treatment of assets). *Initial margin* not accounted for on **Form 17**.

Example 2 - Treatment of simple derivative (*option*) which is a liability. Illustration that, in accordance with instruction 4 to **Form 17** (see 5.8(9)), negative assets or liabilities can arise as a result of margining.

Example 3 - Two equity futures and a currency forward (as example X in **Guidance Note 4.2**).

Example 4 - Direct asset, derivative and both inadmissible asset and rule 5.3 items (as example SS in **Guidance Note 4.2**, amended slightly to allow inadmissibility offset). Provision for adverse changes also required.

Example 5 - Range of direct assets and derivative with *counterparty* inadmissibility. The asset inadmissibility has been ignored to avoid making the example overly complex.

Example 6 - Sterling to DM interest rate swap. Illustrates provision for adverse changes on uncovered swap.

5.B.2 Derivatives used in the examples

- (1) These are defined here so that the examples can refer to the instruments involved in a more abbreviated form. The example defines whether the derivative is bought or sold.

Futures

- (2) A traded long gilt *futures contracts* from 7/12/94 for settlement March 1995 at a price then of 101 15/32. This was valued at 31/12/94 at 100 23/32 (after 100 15/32 on 30/12/94) giving a liability per bought contract of £50,000 times 24/32ths or £375.
The *initial margin* was £1000 per contract and *variation margin* of £500 per contract had been paid to date.

- (3) A currency forward for US dollars for settlement in March 1995. This was valued at 31/12/94 at a 3 month rate of exchange of 0.6393 when the cash market was 0.6391, taken (for simplicity of illustration) as a liability of £(0.6393-0.6391) per \$1,000,000 purchase or £200

Options

- (4) A traded BP call *option* at 420p from 7/12/94 for expiry by April 1995. This was valued at 25p at 31/12/94 (after 26p at 30/12/94) and thus 25p x 1000 or £250 per contract. *Initial margin* as writer £1000 and *variation margin* of £50 paid to date.
- (5) A traded BP put *option* at 420p from 7/12/94 for expiry by April 1995. This was valued at 14p at 31/12/94 (after 13p at 30/12/94) and thus 14p x 1000 or £140 per contract. *Initial margin* as writer £1000 and no *variation margin* to date.
- (6) A traded FTSE 100 call *option* at 3100 from 7/12/94 for expiry by June 1995. This was valued at 143 at 31/12/94 (after 145 at 30/12/94) and thus

143 x £10 or £1430 per contract. *Initial margin* as writer £1000 and *variation margin* to date of £1450.

Contracts for differences

- (7) A traded FTSE 100 future from 7/12/94 for settlement March 1995 at a price then of 3036. This was valued at 31/12/94 at 3092 (cash market 3065.5) after 3077 on 30/12/94 and thus $(3092-3036) \times £25$ or £1400 per contract. The *initial margin* was £2000 per contract and *variation margin* of £1025 per contract had been paid to date.
- (8) A traded S&P 500 future from 7/12/94 for settlement March 1995 at a price then of 457.0. This was valued at 31/12/94 at 461.35 (cash market 459.27) after 464.6 on 30/12/94 and thus $(461.35-457.0) \times \$500$ or \$2175 per contract. The maintenance margin was \$1500 per contract and had been topped up by \$4000 per contract to date.
- (9) A swap of sterling to DM short interest rates on £30m of sterling, expiring May 1995. This was valued at a liability of £500,000 at 31/12/94.

5.B.3 Example one: much as example C in **Guidance Note 4.2**

100 bought Traded FTSE 100 *future contracts*, total asset £140,000

150 sold Traded Long Gilt *future contracts*, total asset £56,250

Total margin £97,500 on FTSE 100 future with broker, £200,000 paid to broker as *initial margin* and £102,500 received from broker as *variation margin*.

Total margin £75,000 on Long Gilt with broker, £150,000 paid to broker as *initial margin* and £75,000 received from broker as *variation margin*.

Initial margin taken to line 56 of **Form 13**, receipt of *variation margin* assumed on deposit, thus line 54 of **Form 13**.

TOTAL (11 to 42)		51	83	40

5.B.6 Example four - much as example SS in Guidance Note 4.2

400,000 holding of BP *shares* at 425.5p per share, total asset £1,702,000.

3000 written traded BP put *option* at 420p, valued at £420,000 liability.

Total margin £3,000,000 on traded *option*, all initial.

General insurance business Amount (GBA) £400m. 2.5% of GBA equals £10m and total *exposure* is to 3.4m *shares* worth £14,467,000. Inadmissible asset is thus £4,467,000, with first offset to direct equity holding and balance to line 87 of **Form 13**.

Rule 5.3 liability taken as say 50% fall in price i.e. $(4.255 \times 50\% - 4.20) \times 1000 \times 3000$ thus £6,217,500, less any rule 5.2 liability (i.e. £420,000), less any relief from inadmissibility that such a fall would cause (£3,616,000 - see below) therefore £2,181,500 provision.

The inadmissibility offset and provision for adverse changes are calculated as follows

£000s	Year end 50% fall		
Margin deposit	3000	3000	
Direct <i>shares</i>	1702	851	
Put <i>option</i>	(420)	(6218)	
Inadmissibility deduction	(4467)	-	3.4m <i>shares</i> worth under 2.5%
Total	(185)	(2367)	difference i.e. £ 2181.5k is minimum rule 5.3 amount

FORM 15 (part)		
Liabilities (other than long-term insurance business)	As at the end of the financial year	
Other Creditors	49	420
Provision for adverse changes	61	2182
TOTAL	69	2602

FORM 13 (part)		
Admissible assets	As at the end of the Financial Year	
Equity shares	41	0 (i.e. 1702 less 1702)
Rights under derivative contracts	44	
Deposits less than 1 month	54	
Deposits more than 1 month	55	
Other financial investments - other	56	3000
Deduction for inadmissible assets	87	(2765)
TOTAL	99	235

TOTAL (11 to 42)			51	420

5.B.7 Example five

£450,000 debt due from XYZ stockbrokers.
£1,200,000 deposit with XYZ Bank (an approved credit institution) on a 15 month fixed term.
£250,000 worth of shares in XYZ Holdings.
2000 BP traded call options at 420p with XYZ Market makers (an approved counterparty) worth £500,000 but offset by £100,000 received from broker as variation margin and put on deposit with a non XYZ bank.

General insurance business amount is £20,000,000.

Total inadmissible by counterparty limits is £300,000. (None of above exposures are via short-term deposits, therefore 10% counterparty exposure limit applies.) Inadmissibility of exposure to BP shares (via call options) ignored for simplicity.

FORM 15 (part)

6. THE RULE 9.29 STATEMENT: DERIVATIVES

Scope of the statement

- 6.1 (1) Every *insurer* is required to make a rule 9.29 statement, whether or not it used derivatives in the year in question. For this purpose, derivatives is defined by the rule to include not only contracts which have the legal form of a *derivative contract* but also the quasi-derivatives defined in rule 4.13 of the *Valuation of Assets Rules*. The latter category includes a number of instruments which are in common use and which have certain characteristics of a derivative, such as partly-paid *shares* and convertible bonds. It is likely, therefore, that many *insurers* will have something of substance to say in their statement, even though they would not normally consider themselves to be users of derivatives.
- (2) For those *insurers* whose policy and practice is to use neither derivatives nor quasi-derivatives, a short statement to this effect is all that is necessary.

Contents of the statement

- 6.2 (1) Rule 9.29 calls for a brief description of certain details of the use of derivatives. There is no subtlety about the use of the term brief description. What is needed is a description which is just long enough to give the reader a reasonable flavour of the use of derivatives, including certain key points concerning use of derivatives to effect significant switches in the balance of portfolio, or use of unusual or exotic derivatives. The detailed requirements of the statement are set out in (2) to (4), referenced by the sub-paragraphs of rule 9.29(1).

- (2) (a) any investment guidelines ... for the use of *derivative contracts*

The *insurer's* policy needs to be explained, even if that policy is not to use derivatives. (In this context it is worth remembering that forward currency derivatives are not derivatives for the purposes of the rules if they satisfy the requirements of rule 4.1(9). A statement that derivatives are only used to match policy liabilities is, however, too brief and a fuller description of the criteria used must be given.

- (3) (b) ... guidelines ... for the use of contracts ... not ... reasonably likely to be exercised

The *insurer* must state whether such contracts are allowable under its guidelines. Thus the restriction of the use of derivatives to those bought and sold to deal at prices close to the market price of the underlying asset at outset would allow a negative reply to this question. Conversely, if the guidelines allow the practice, for example, of selling *options* out of the money, or purchasing barrier *options*, neither of which were expected to be called, this would need detailing together with its purpose. Where such contracts have been entered into in the year, or subsisted over the year, then a brief description is required under (3) of the size (in economic exposure) of the contracts and the approximate market movement that would trigger them.

- (4) (d) ... amounts recorded in **Form 13**

Insurers may find a LIFFE style report the most suitable to present the changes to **Form 13**, i.e. a presentation of the current **Form 13** by broad asset class amended by the impact of futures on economic exposure. The prudence required in the context of *options* is not the same as that when considering the inadmissibility limits of rule 4.14 where the maximum exposure to an asset is in question. *Options* that are currently expected to be exercised should be assumed to be exercised. This would normally follow the value of the *option* at the accounting date: if of high value then exercise is likely but if close to valueless then exercise is unlikely. Further information is required under (6) only if the impact of derivatives in amending economic exposure has been materially different at other times of

the year, not merely if the overall economic *exposure* of the *insurer* has been different.

(5) (e) ... to the maximum extent

Under (4) the expected changes to exposure should be stated. Under (5) same information as (4) is required but assuming that derivatives are exercised against the *insurer*, so as to create the largest changes in the economic exposures of the *insurer* in its major asset classes. While derivative positions that net out, or can be used to net out exposures, will not contribute to this presentation, any other optional derivative positions should be assumed to be exercised so as to create the most extreme exposures potentially possible.

(6) (f) how different other time of the financial year ... maximum extent

This requires the analysis of (4) and (5) to be tested for other points of the year. Where a more significant position occurred other than at the *financial year* end the position then needs to be described. As noted above for the test under (4) the *insurer* must look for times when the use of derivatives to amend economic exposure has been significantly different at other times of the year, not when the direct exposure of the *insurer* has been different. For the test under (5) the purpose is to gauge whether during the year the *insurer's* use of more exotic or obscure derivatives has been greater than at the *financial year* end. The description may thus need to refer to several different times during the year where there was significant activity that was different in nature.

(7) (g) maximum loss:

The requirement for the maximum exposure to a *counterparty* failure at the year end requires this to be tested as well in the event of other foreseeable market conditions. This means a test of individual *counterparty exposure* (not just the *counterparty* giving the maximum *exposure* at the accounting date) under typical market movements and the current margining arrangements. If this gives a higher figure (perhaps due to infrequent margining) then this higher figure should be stated.

(8) (h) ... does not fall within rule 4.12(2) .. or ... paragraph 15:

Structured products that fail the test in rule 4.13(4), and are thus valued purely as unconditional *debt* under the terms of rule 4.13(5), should be described under this section. (To save correspondence, the value assigned to such assets in the relevant **Form 13** should be stated). Other derivatives that are not permitted (or admissible) derivatives held in the internal property linked funds, the rest of the *long-term insurance business fund*, or the other than *long-term insurance business fund* must also be described here.

- (9) (i) ... fixed consideration:

A note is required of what fixed sums have been earned by the *insurer* (for example, premiums received by the *insurer* for selling *options*), and a summary of the contracts involved over the period of the *returns* (not merely those in force at the year end).

7. THE RULE 9.30 STATEMENT: SHAREHOLDER CONTROLLERS

- 7.1 (1) The rule 9.30 statement is required from every *insurer* with its Head Office in the UK other than a *pure reinsurer* or a *non-directive insurer*.
- (2) Rule 9.30 imposes substantially the same requirements as SUP 16.4 and if a statement under rule 9.30 is filed as part of an *insurer's return*, a separate statement need not be filed under SUP 16.4.

8. ACCIDENT YEAR AND UNDERWRITING YEAR ACCOUNTING

The basic rule

- 8.1 (1) The basic rule is that an *insurer* may choose whether to account for its business on an accident year basis or an underwriting year basis. This choice may be made separately for each *accounting class* and, indeed, separately for any clearly definable part of an *accounting class*.
- (2) Where risks are accounted for on an accident year or underwriting year basis the run-off of those risks should continue to be accounted for on the same basis. The *insurer* remains free, however, to account for the renewals of such business on either basis.
- (3) Run off of risks should be reported on the underwriting year basis. The run off of risks previously reported on the annual accounting Forms (21 to 23) should now be reported on the accident year basis.
- (4) In section 8.3 below it is explained that under the rules there is no direct link between the basis of reporting (i.e. underwriting year or accident year) and the method of profit recognition (i.e. annual or non-annual). As is explained more fully below an *insurer* may change its basis of profit recognition, even for risks previously reported, from non-annual to annual. However even where it makes such a change it must continue to report the run-off of such risks on an underwriting year basis.

Accounting for premiums, claims and expenses

The accounting rules

- 8.2 (1) The amounts shown in the *return* for:
- (a) 'gross premiums written', 'reinsurers' share', 'earned premiums' etc.;

- (b) 'claims outstanding', 'claims incurred', 'gross amount', 'reinsurers' share' etc;
- (c) 'provision for unearned premiums', 'provision for unexpired risks', 'deferred acquisition costs'; and
- (d) 'net operating expenses', 'acquisition costs', 'administrative expenses' and 'reinsurance commissions and profit participations'

should be determined:

- (e) using the same rules as apply for the preparation of *Companies Act* accounts (see rule 3(2)(b) which aligns definitions with those in shareholder accounts rules, i.e. Schedule 9A of the *Companies Act*); and
 - (f) in accordance with generally accepted accounting practice (see, for example, paragraph 26(1) of **Appendix 9.2**).
- (2) In particular contracts of financial (re)insurance whether inward or outward should be classified for inclusion in the forms in accordance with Financial Reporting Standard 5 'Reporting the Substance of Transactions' and the statement 'FRAG 35/94: The Application of FRS 5 to Non-Life Insurance Transactions'. Thus where the consideration receivable and payable for transactions which have the legal form of *contracts of insurance* or *reinsurance* would not be accounted for as premiums and *claims* in the preparation of *Companies Act* accounts they should not be included as premiums and *claims* in **Forms 20 to 39**. Instead they should be accounted for in the *return* using the same principles as are applied in the preparation of *Companies Act* accounts. (But see 5.3(7) and 5.3(11) for the different treatment in **Forms 11 and 12**).
- (3) An exception to (1) (i.e. the alignment of definitions with those in Schedule 9A to the *Companies Act*) is that claims amounts shown in the forms should exclude:
- (a) *claims management costs*, and
 - (b) adjustments for discounting.

Some forms exclude these items altogether and other forms provide for their separate disclosure. See paragraph 15 to **Appendix 9.2** and the instructions to the forms themselves.

- (4) Another exception is that the rules for *Companies Act* accounts analyse net operating expenses into (i) acquisition costs; (ii) administrative expenses; and (iii) *reinsurers* commissions and profit participations, whereas the forms sub-analyse the first item into commissions and 'other acquisition expenses'.

- (5) *Claims management costs* are basically those overhead costs of the *claims* department (or of the out-sourced provider of the claims management function) which are required to be included in the amount for incurred *claims* shown in the *Companies Act* accounts.
- (6) In **Forms 20-39**, (as in the technical account in the *Companies Act* accounts) *claims* incurred include any reduction for salvage and subrogation recoveries. (cf. the different treatment in the balance sheet - see 5.6(9)).
- (7) Paragraphs 9 to 14 of **Appendix 9.2** lay down rules as to how premiums and *claims* are to be allocated to accident years and underwriting years. These paragraphs are explained in (8) to (11) and (12) to (13).

Accident year accounting

- (8) For accident year accounting, premium is allocated to accident years on the basis of when it is earned and *claims* are allocated on the basis of when the incident which gives rise to the claim occurred. Special rules apply for (i) *claims-made policies*; and (ii) the *reinsurance* (or transfer under Part VIII of the *Act* or equivalent transfer under the laws of another *EEA State*) of policies covering incidents which had already occurred at the time of the *reinsurance* (or transfer). These are explained below.
- (9) An incident giving rise to a loss under a *claims-made policy* is deemed to occur on the earlier of date of notification or the last date of the period for which cover is provided. The latter of the two alternative dates would usually only be relevant if the *claims-made policy* is not renewed and if upon non-renewal the policy allows a sunset period, (i.e. a period during which claims relating to events which took place prior to the end of the cover period may still be notified).
- (10) Where an *insurer* reinsures, (or receives by way of transfer under Part VII of the *Act* or equivalent EEA transfer), policies covering incidents which had already occurred prior to the date of the contract of *reinsurance* (or of the transfer), all such incidents are deemed to occur at that date.
- (11) Net operating expenses should be allocated to accident years so as to match the premium earned and *claims* incurred to which they relate. Usually this will result in the bulk of administrative expenses being allocated to the youngest accident year. Note that administrative expenses do not include the overhead expenses of running the *claims* department. These are included in *claims management costs*.

Underwriting year accounting

- (12) For underwriting year accounting premiums, and *claims* are allocated to underwriting years on the basis of when policies incept. For these purposes:

- (a) a policy providing continuous cover is deemed to incept on each anniversary of the policy; and
 - (b) policies received by way of a transfer under Part VII of the *Act* (or equivalent transfer under the laws of another *EEA State*) are deemed to incept on the date of the transfer.
- (13) Net operating expenses should be allocated to underwriting years so as to match the premium earned and *claims* incurred to which they relate. Usually this will result in the administrative expenses being allocated to the youngest underwriting year except to the extent that it represents the adjustment for under- or over-provisions of such expenses in the prior years. Note that administrative expenses do not include the overhead expenses of running the claims department. These are included in *claims management costs*.

The annual and non-annual methods

- 8.3
- (1) The annual and non-annual methods refer to the way in which profit is recognised. Under the annual method the profit (and losses) on business written during the *financial year* is recognised at the end of that *financial year* by setting up provisions for outstanding *claims*, unearned premiums and unexpired risk provisions and by deferring an appropriate portion of acquisition costs.
 - (2) Under the non-annual method (sometimes referred to as fund accounting) the recognition of profits (but not losses) is deferred for one, two or three years after the end of the *financial year* in which business incepts. During the period of the deferral the *technical provision* for such business is the excess of premiums written over claims and expenses (increased where necessary to the extent of any losses expected to arise on such business). At the end of the deferral period this *technical provision* is replaced by a *technical provision* determined under the same rules as apply for the annual method, (i.e. a *technical provision* which consists of provisions for outstanding *claims*, unearned premiums and unexpired risk provisions), and by the deferral of an appropriate portion of acquisition costs. The choice of the deferral period should usually be consistent from year to year, but may differ from one type of business to another.
 - (3) The detailed rules for the non-annual method are to be found in paragraphs 51 and 52 of Schedule 9A of the *Companies Act*. Note: Schedule 9A *Companies Act* as such strictly only applies to the preparation of *Companies Act* accounts. However rule 5.4 requires that the *insurance accounts rules* on the valuation of *general insurance business liabilities* should be followed for *FSA* solvency purposes. Also of relevance is the ABI SORP in so far as it is a statement of generally accepted accounting concepts, bases and policies, or other generally accepted methods appropriate for *insurers*. See rule 5.2, which requires such generally accepted concepts etc. to be followed for *FSA* solvency purposes.

The relationship between the reporting basis and method of profit recognition

- 8.4 (1) An *insurer* which wishes to apply the annual method may report that business on either the accident year forms or the underwriting year forms. However if it wishes to apply the non-annual method it must report such business on the underwriting year forms. This relationship is summarised by the table which follows below.

<i>Reporting basis</i>	<i>Profit recognition method</i>
Underwriting year basis	Annual method, or Non-annual method
Accident year basis	Annual method

The non-annual method - ‘closed’ and ‘open’ years

- 8.5 (1) Business to which the non-annual method of profit recognition is applied is classified into open and closed underwriting years.
- (2) As already described in 8.3, under the non-annual basis a *technical provision* is originally set up as the excess of premiums written over *claims* paid and expenses (increased where necessary to the extent of any losses expected to arise on such business). At the end of the deferral period this *technical provision* is replaced by one determined on the same basis as applies under the annual method. An underwriting year is termed closed with respect to any business if the replacement of the *technical provision* has been made in respect of that business, otherwise it is termed open.
- (3) Significantly less disclosure is required on the underwriting year forms for open years than for closed years. See, for example, instruction 2 to **Form 25**. Business reported on the underwriting year forms, but to which the annual method has been applied, are subject to the same level of disclosure on those forms as applies for closed years business.
- (4) The *technical provision* for an open year for an *accounting class* is the fund represented by:
- + premiums written (net)
 - claims paid (net)
 - expenses incurred

- (5) Any excess, over the fund, of present and future liabilities from business incepting in that year falling in that accounting class is termed a deficit. Any excess of the fund, over the present and future liabilities from business incepting in that year falling in that accounting class is termed a surplus.
- (6) A deficit on any open year for any *accounting class* must be dealt with by either:
 - (a) offsetting the deficit against surpluses arising on business falling in other accounting classes which is managed together with the business giving rise to the deficit; and/or
 - (b) increasing the *technical provision*.
- (7) Business may only be regarded as managed together if it:
 - (a) is accounted for on an underwriting year basis;
 - (b) incepts in the same accounting year; and
 - (c) may be regarded as managed together under generally accepted accounting practice.

This definition of managed together is given in paragraph 25 of **Appendix 9.2**.

Conversion from the non-annual to the annual method

- 8.6
- (1) An *insurer* which has previously reported business on a non-annual basis (on accounting year forms) which wishes to convert to an annual basis may do so in one of two ways. It may either:
 - (a) continue to report that business (including new business and renewals) on the underwriting year forms, but close all underwriting years including the youngest year; or
 - (b) report new business and renewals on the accident year forms, but continue to report old business (i.e. risks incepting prior to the current year) on the underwriting year forms and close all underwriting years on those forms.
 - (2) An *insurer* may not transfer business previously reported on underwriting year forms (as opposed to renewals of such business) to the accident year forms. The basic rule is that when any risks are reported on either underwriting year or accident year forms the run-off of those risks must continue to be reported on the same forms.

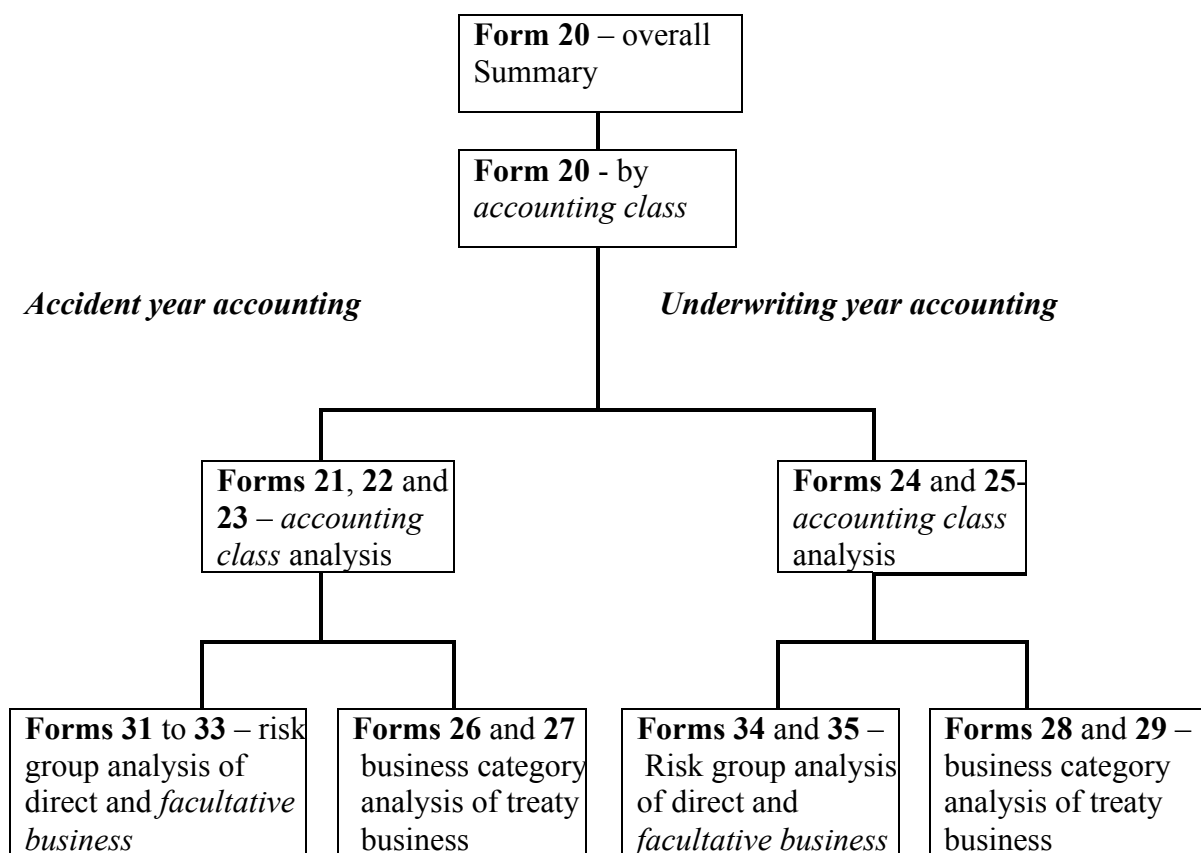

Supplementary note disclosure

- 8.7 (1) Paragraph 24 of **Appendix 9.2** requires that the following be stated by way of supplementary note, [Code 2402], to **Form 24** in respect of each *accounting class* which (in whole or in part) is reported on the underwriting year forms:
- (a) the reason for accounting for such business on an underwriting year basis;
 - (b) the basis for distinguishing such business and any other business falling within the same *accounting class* accounted for on an accident year basis; and
 - (c) the accounting policy adopted for determining the provision for *claims* outstanding (i.e. the annual method or the non-annual method).
- (2) The above information need only be given in respect of risks incepted during the *financial year*. However if the information differs from that which applies for risks of a similar description incepting in the previous *financial year* the difference should be described and the reason for it given.
- (3) If the non-annual method is disclosed as the accounting policy adopted the following should also be stated in the supplementary note [Code 2402]:
- (a) the reason for using the non-annual method;
 - (b) the basis for distinguishing between such business and other business in the same *accounting class* reported on the underwriting year forms; and
 - (c) the normal period for which an underwriting year is left open, or if that period differs for different types of business within an *accounting class*:
 - (i) the basis of distinguishing between different types of business; and
 - (ii) the normal period for each type; and
 - (d) where an underwriting year is left open for longer than the normal period the reason for not closing the year.

9. **ACCOUNTING CLASSES, BUSINESS CATEGORIES AND RISK GROUPS**

An overview of the forms

- 9.1 (1) Reporting of *general insurance business* in the *return* forms takes place separately for business accounted for on an accident year basis and on an underwriting year basis and for each at three levels of detail:
- (a) a summary level,
 - (b) an *accounting class* level, and
 - (c) a sub-*accounting class* level.
- (2) The sub-*accounting class* divisions of business are referred to as ‘risk groups’ for *direct insurance business* and facultative *reinsurance business*; and as ‘business categories’ for treaty business.
- (3) The reporting of business within the *return* is summarised by the following diagram:

For simplicity the equalisation reserve **Forms (37 to 39)**, the discounting **Form (30)** and the currency rates **Form (36)** have been omitted.

Accounting classes

- 9.2 (1) As already noted above the division of *general insurance business* in the *returns* takes place in two stages. First business is divided into *accounting classes* and then each *accounting class* is further sub-divided into either risk groups (in respect of direct insurance and facultative *reinsurance*) or business categories (in respect of treaty *reinsurance* business).
- (2) There are eight direct and facultative *accounting classes* and three treaty *accounting classes*. The following table summarises the definition.

Accounting classes for direct insurance and facultative reinsurance	1	accident and health
	2	Motor
	3	Aviation
	4	Marine
	5	Transport
	6	Property
	7	third party liability
	8	Miscellaneous and pecuniary Loss
Accounting classes for treaty reinsurance	9	non-proportional treaty
	10	proportional treaty
	11	marine, aviation and transport (MAT) treaty

- (3) The *accounting classes* (other than the special case of accounting class 11 which is explained in (6) correspond closely to those used in the rules. The only differences are that:
- (a) death or injury to passengers may now be included in either *accounting class* 1 or split across *accounting classes* 2, 3 and 4 (see (4)); and
 - (b) inwards proportional retrocessions of non-proportional treaty *reinsurance* should be included in accounting class 9.
- (4) There is some flexibility to include the following items in a different *accounting class* from that which would be required by the above table:
- (a) hovercraft business;
 - (b) liability for loss of, or damage to, goods in transit;

- (c) death or injury to passengers.
- (5) Refer to paragraph 6 of **Appendix 9.2** for the detailed rules. A supplementary note to **Form 20** is required if this option is used. It should state the nature of the business included in a different *accounting class* and the reason for such inclusion. The nature of business included in a different *accounting class* should be consistent from year to year.
- (6) *Accounting class* 11 calls for special comment. The basic rule is that all treaty business should be included as either proportional (in *accounting class* 10) or non-proportional (in *accounting class* 9). No business is thus included in *accounting class* 11. However because not all *insurers* were required under the *1983 Regulations* to split MAT business between proportional and non-proportional, the *FSA* recognises that not all necessarily have the accounting records to enable them to do so now as required by the basic rule. In consequence the rules allow an alternative to the basic rule. An *insurer* may choose to include (some or all) of its MAT treaty business in *accounting class* 11, but if it does so it must state in a supplementary note the nature of the business so included and the reason for the inclusion. The nature of business included in *accounting class* 11 should (subject to comments in 9.3) be consistent from year to year. An *insurer* should apply the basic rule wherever its accounting records contain the necessary information to allow it to do so. Where records only enable the basic rule to be used with effect from a particular underwriting or accident year, it should be applied with effect from that year rather than reporting all business in class 11.

Business categories

- 9.3 (1) Rule 9.16 requires an *insurer* to allocate the business within each treaty accounting class (i.e. 9, 10 and 11) into business categories. The following table gives the eight standard business categories.

	Standard business categories
(a)	accident and health
(b)	Motor
(c)	Aviation
(d)	Marine
(e)	Transport
(f)	Property
(g)	third party liability
(h)	Miscellaneous and pecuniary loss

Category (e) may be omitted and transport treaty business allocated instead to categories (c) and (d), in which case these categories are renamed respectively aviation and transport and marine and transport.

- (2) An *insurer* may adopt the standard business categories or its own bespoke categories. However if it adopts its own bespoke categories these must be

subdivisions of the standard categories. Each bespoke category must be given a name which identifies the general nature of the business included within it and distinguishes it from any other categories used (whether bespoke or standard).

- (3) It should be noted that it is not possible for *accounting class* 11, if used, to include any business other than that which falls within business categories (c), (d) and (e).
- (4) Special rules apply for treaty *reinsurances* accepted which fall within more than one business category. Amounts (i.e. premiums, claims etc.) in respect of such a treaty should be either:
 - (a) apportioned between business categories; or
 - (b) allocated to the business category within which the greater part of the business to which the treaty relates falls; and

an explanation must be given (in a supplementary note to **Forms 26 to 29**):

- (c) in case (a) of the method used in any such apportionment; and
 - (d) in case (b) of the (nature) of the business allocated other than to the business categories to which it strictly relates.
- (5) Once the apportionment or allocation in (4) has been made for a particular *reinsurance* treaty, amounts reported in future *returns* in respect of that treaty should be apportioned or allocated in the same manner, unless an explanation for a different treatment is given (in a supplementary note to **Forms 26 to 29**).
- (6) Where a later treaty *reinsurance* is accepted which relates to risks which are of a similar description to those to which the earlier treaty related, the method of apportionment or allocation for the latter treaty should be the same as for the earlier treaty unless an explanation for a different treatment is given (in a supplementary note to **Forms 26 to 29**).

Risk groups

Overview

- 9.4 (1) Rule 9.18 requires an *insurer* to classify its direct and *facultative business* into risk groups. This must be done separately for each country in which business is carried on with respect to each *accounting class* (i.e. classes 1 to 8). The classification of business into risk groups thus takes place in three stages as follows:
 - (a) first business is classified by country;

- (b) then the business for each country is classified in the *accounting classes*; and
- (c) finally each *accounting class* within each country is classified into risk groups.

Each of these stages is subject to de minimis limits under (9).

- (2) The classification of business into risk groups takes place every year with respect to business on-risk/incepted in that *financial year*, and once classified the risk groups remain fixed for that *financial year* for reporting in all subsequent the *returns*. Risk groups classified under the rules for *financial years* ended before 23 December 1996 should continue to be used for reporting business in those *financial years*.
- (3) Business classified into risk groups is reported (by country by *accounting class* by risk group) on **Forms 31 & 32** and **Form 34** (respectively for accident year and underwriting year accounting).

Classification by country

Carrying on *insurance business*

- (4) Business is classified by country according to where it is carried on. *Insurance business* is defined as the 'effecting or carrying out of *contracts of insurance* etc.'. The country where business is carried on thus depends upon where this activity takes place and not necessarily upon the location of the risks covered by the insurance, (but see the comments below on home and *home foreign business*). An *insurer* therefore usually only carries on business in a country if it has a branch, agency or other establishment located in that country.
- (5) For the purposes of classifying risk groups 'home' and '*home foreign*' are treated as two separate countries. An example of where the risk commences in the U.K. but primarily relates to outside the U.K. is an overseas construction risk, where the contractor is a UK firm. Subject to these exclusions, *home foreign business* includes business written on a services basis (under the EEA single passport) into other *EEA State*.

The country-level de minimis limit

- (6) If *gross premiums written* for direct and *facultative business* carried on in a country is less than 1% of the worldwide *gross premiums written* for all business (i.e. direct and facultative and treaty) risk groups need not be classified for that business.
- (7) The aggregate for all countries of such small country business is reported on **Forms 33** and **35** (respectively for accident year and underwriting year accounting).

Classification by accounting class within each country

- (8) The accounting classes have already been described in 9.2. However it should be noted that only the accounting classes 1 to 8 are relevant. *Accounting classes* 9 to 11 relate exclusively to treaty business.

The *accounting class* within a country de minimis limit

- (9) If the *gross premium* written for any *accounting class* within any country is less than:
- (a) 5% of the worldwide *gross premiums written* for all business (i.e. direct and facultative and treaty); or
 - (b) £500,000

the *insurer* may ignore the detailed rules under (10) to (17) for the classification of the business in that *accounting class* within that country into risk groups, but may instead classify all of that business as a single risk group. This single risk group should be given the name 'total'.

Classification into risk groups by accounting class within each country

- (10) These rules consist of two parts: a basic rule and a list of supplementary requirements. The supplementary requirements (but not the basic rule) are subject to a de minimis limit.

The basic rule

- (11) The basic rule is that each risk group should comprise risks which in the opinion of the *directors*, are not significantly dissimilar, either:
- (a) by reference to the nature of the objects exposed to such risks; or
 - (b) by reference to the nature of the cover given against such risks.
- (12) As an example of (11)(a), the *FSA* would normally not expect Marine Hull risks and Marine Liability risks to be considered objects so similar in nature as to be reported in the same risk group. As an example of (11)(b), the *FSA* would normally not expect ground-up direct property risks and high-layer facultative risks to be considered covers so similar in nature as to be reported in the same risk group.
- (13) However, the *FSA* recognises that *directors* would have regard to the size and relative size of business involved when considering any division into risk groups. In the examples in (12), if the total Marine Liability element is very small (either in absolute terms or relative to the class) or the total of the higher-layer facultative risks is very small, the *FSA* would not expect a

separate risk group. Similarly, a miscellaneous risk group could be acceptable but only if it is small by comparison with the rest of the class.

- (14) As further instances, the *FSA* would not normally expect to see significant amounts of: commercial and personal lines business appearing in the same property risk group; professional indemnity / D&O and public / products business appearing in the same liability risk group; domestic mortgage indemnity and other guarantee business appearing in the same pecuniary loss risk group. Overall, the *FSA* looks to *directors* to provide a sufficient but sensible breakdown which allows the ordinary reader to understand the nature of, and the analyst to review the details of, the *insurer's* business.

The supplementary requirements:

- (15) The supplementary requirements are as follows.
- (a) risks may not be included in the same risk group where, having regard to the patterns of risk, claims incurrence and settlement patterns, it is necessary to group them separately for the purposes of applying statistical methods in calculating the provision for *claims* outstanding in accordance with generally accepted accounting practice. In effect this means that where two or more types of risk are sufficiently dissimilar to require the data for each type to be separately identified for the purposes of calculating the provision for *claims* outstanding, each type should be classified in a separate risk group;
 - (b) *claims-made policies* may not be included in the same risk group as non *claims-made policies*. A *claims-made policy* is defined basically as a liability insurance policy which requires a loss incident to be notified either during the policy period or up to three years thereafter;
 - (c) policies for (i) credit and suretyship; (ii) legal expenses; (iii) assistance; and (iv) miscellaneous should not be included in the same risk group. These four categories make up *accounting class 8*;
 - (d) private motor car risks should not be included in the same risk group as other motor risks;
 - (e) comprehensive private motor car risks should not be included in the same risk group as non-comprehensive private motor car risks; and
 - (f) policies transferred to the company (under Part VII of the *Act*, or equivalent legislation of another *EEA State*) should not be included in the same risk group as other policies.

The de minimis limit for the supplementary requirements

- (16) Two or more sets of risks/policies which would be required by any of the supplementary requirements in (15) to be classified as separate risk groups may be combined provided that either:
- (a) the *gross premium written* for all business (i.e. *direct*, facultative and treaty) from the resulting risk group is less than 2.5% of total worldwide *gross premiums written* or than £500,000; or
 - (b) the *gross premium written* for all business (i.e. *direct*, facultative and treaty) from each of the sets being combined (other than the largest) is less than 0.5% of total worldwide *gross premiums written* or than £100,000.
- (17) It should be noted that the above de minimis limit only applies to exempt *insurers* from compliance with the supplementary requirements in (15) and not the basic rule, in (11) to (14). The de minimis limit cannot, therefore, be used to create a large miscellaneous risk group - see the comments in (3) to (5).

10. FORMS 20 TO 36: THE GENERAL BUSINESS TECHNICAL ACCOUNT

Form 20

Completion of the form

- 10.1 (1) **Form 20** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on) and also in summary. The entry '99' should be inserted in the *accounting class* box for the summary form.
- (2) **Form 20** presents the '*General insurance business: technical account*' (excluding equalisation provisions). It consists of four parts:
- (a) a technical account for this accident year (lines 11 to 19);
 - (b) a technical account for prior accident years (lines 21 to 29);
 - (c) the balance from underwriting year accounting (line 31 to 39); and
 - (d) the investment return allocated to the technical account (line 51).
- (3) The two accident year technical accounts only relate to business accounted for on an accident year basis. **Form 24** presents the technical account for underwriting year business and it is from this that the balance at line 31 derives.
- (4) The items in the two accident year technical accounts derive from **Form 21** (earned premiums) and **Form 22** (claims, expenses etc.). The only item

which does not derive from other forms is 'Other technical income or charges' (lines 16 and 25). If any amount is entered in these lines particulars must be stated in a supplementary note [Code 2005].

- (5) Line 32 of the form accommodates other technical income and charges arising from business accounted for on an underwriting year basis. NB. such other income and charges should not be included on **Form 24**. As for lines 16 and 25 (see (4)) a supplementary note [Code 2006] is needed.
- (6) The allocated investment income (line 51) is linked to line 20 of **Form 16**. The allocation, if any, should be the same as in the *Companies Act* accounts.

Supplementary notes

- (7) Six notes are specified:
 - (a) where a *insurer* exercises any of the options (described in 9.2(4) to (5)) to report business in a different *accounting class* it should state (i) the nature of the business it has included in that different *accounting class*; and (ii) the reason for such inclusion - see paragraph 7 of **Appendix 9.2**. [Code 2001]
 - (b) for each *accounting class* an *insurer* should state separately for business accounted for on an accident year basis and on an underwriting basis the split of (i) total *gross premium written*; and (ii) *reinsurers'* share of *gross premium written* between business attributable to the UK and to overseas business - see paragraph 16 of **Appendix 9.2**. For these purposes *direct and facultative* business is UK business if the contract was made in the UK and treaty *reinsurance* is UK if the *cedant* has its head office in the UK or is a member of the *Society*; [Code 2002]
 - (c) if an *insurer* has effected no new *contracts of insurance* of any one or more classes for which it is authorised during the *financial year*; it should state the date on which the last new contract of each such class was effected - see paragraph 21 of **Appendix 9.2**. A new contract is any contract other than one effected in fulfilment of an obligation under an already existing *contract of insurance*; [Code 2003]
 - (d) as already explained in 8.2(2), both inwards and outward *contracts of (re)insurance* should be classified for inclusion in the forms in accordance with generally accepted accounting practice. Extensive note disclosure is required where this leads to inwards or outwards *contracts of (re)insurance* not being reported as such on the forms (i.e. because although they fall within the legal definition of a *contract of insurance* or *reinsurance* they do not fall within the GAAP definition). See paragraph 26 of **Appendix 9.2** for details of the disclosure to be given; [Code 2004]

- (e) particulars should be stated of any amounts included at lines 16 or 25 ('accident year accounting - other technical income or charges') - see the text on those lines of the form; and [Code 2005]
- (f) particulars should be stated of any amounts included in line 32 ('underwriting year accounting - other technical income or charges') - see the text of that line of the form. [Code 2006].

Form 21

Completion of the form

- 10.2 (1) **Form 21** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on). The form presents an analysis of premiums for business accounted for on an accident year basis.
- (2) Lines 13 to 15 of the **Form 21** should include premiums actually received prior to the *financial year*, but relating to risks incepted in the *financial year* and exclude premiums received during the *financial year*, but relating to risks incepting after the end of the *financial year*. In **Forms 13** and **15** the accounting treatment adopted for premiums received in respect of risks incepting in future *financial years* should be the same as that adopted in the shareholder accounts or, if there are no shareholder accounts, should be in accordance with generally accepted accounting practice. If this results in different amounts for the provision for unearned premium (either gross or the *reinsurers' share*) being shown in **Forms 13** or **15** as compared to **Form 21**, the difference should be identified and explained in a supplementary note, [Code 2103].

Supplementary notes

- (3) Three notes are specified:
- (a) the reason should be stated for any difference in the unearned premiums brought forward and the corresponding amount carried forward from the previous year (i.e. if 21.16.1 + 21.16.2 does not equal 21.19.2 in the previous *return* or 21.16.3 + 21.16.4 does not equal 21.19.4 in the previous *return*) - see paragraph 7 of **Appendix 9.1**; and [Code 2101]
 - (b) the basis upon which the provision for unearned premium is calculated and the reason for adopting that basis should be stated - see paragraph 18 of **Appendix 9.2**. The reason stated should include an explanation of any change in the basis from previous *financial years*. [Code 2102]
 - (c) the supplementary note referred to in 10.2(2). [Code 2103]

Form 22

Completion of the form

- 10.3 (1) **Form 22** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on). The form presents an analysis of *claims*, expenses and *technical provisions* for business accounted for on an accident year basis.
- (2) The rules for the allocation of premiums, *claims* and expenses to accident years are explained in section nine. Business which is shown as reconciliation business on **Form 23**, see 10.4(5), should be also be split between the prior *financial years* and this *financial year* headings in this form. However where such amounts are not material it is acceptable to include them in their entirety under 'prior to this financial year'.
- (3) The amount included for the provision for unexpired risks (at line 19) in the **Form 22** for any *accounting class* should be determined without taking into account any surplus expected to arise on the unexpired risks falling within other *accounting classes*.
- (4) However, in determining the total provision for unexpired risks (which is disclosed in **Form 15** at line 13 and in **Form 13** at line 62), deficits and surpluses in different *accounting classes* may be offset (to the extent permitted by generally accepted accounting practice). Any surplus for an *accounting class* thus offset against deficits in other *accounting classes* should, to the extent it relates to business accounted for on an accident year basis, be shown as a negative provision at line 19 on the **Form 22** for that *accounting class*.
- (5) Lines 41 and 42 show the split of operating expenses between prior *financial years* and this *financial year*. Special care should be taken when completing column 1 – 'amount brought forward from previous financial years'. The entry at column 1 for line 42 should equal the sum of the entries at column 3 in the previous years' *return* for lines 41 and 42. The entry at column 1 for line 41 should ordinarily be nil, i.e. it should be left blank. This is because the split at lines 41 and 42, column 4, is used (on **Form 20**) to match expenses against earned premiums.

Supplementary notes

- (6) Six notes are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; [Code 2201]
- (b) the basis for determining the *claims management expenses* payable and carried forward should be stated - see paragraph 22(1) of

Appendix 9.2. The the payable part of the disclosure, amongst other items, should include an explanation of how overheads are allocated as between *claim management expenses* and net operating expenses. If there are no *claims management expenses* carried forward but there are *claims* outstanding carried forward, the reason for believing these outstanding *claims* can be run-off without incurring *claims management expenses* should be stated - see paragraph 22(2) of **Appendix 9.2.** If the *insurer* has, for any *accounting class*, ceased during the *financial year* to effect new contracts, the basis upon which any additional costs (payable or carried forward) from such cessation have been determined, or the reason for believing there are no such additional costs should be stated - see paragraph 22(3) of **Appendix 9.2;** [Code 2202]

- (c) where, for any *accounting class*, investment income has been taken into account in determining the *claims management costs* carried forward, an *insurer* should state for each such class (i) the rates of interest used; and (ii) the average interval to the date at which the carried forward costs are expected to be expended - see paragraph 22(4) of **Appendix 9.2;** [Code 2203]
- (d) the basis for determining acquisition expenses (other than commission) payable and carried forward should be stated - see paragraph 23 of **Appendix 9.2.** The payable part of the disclosure, amongst other items, should include an explanation of how overheads are allocated as between other acquisition expenses, and the other components of net operating expenses especially administrative expenses. The *FSA* expects the carried forward part of the disclosure should include an explanation of how the appropriate proportion of acquisition expenses (other than commission) to match the unearned premium carried forward was determined; [Code 2204]
- (e) where, for any *accounting class*, the provision for unexpired risks has been determined after taking investment income into account, an *insurer* should state for each such class (i) the provision before taking investment income into account; (ii) the rates of interest used; and (iii) the average interval to the date at which claims are expected to be settled in cash - see paragraph 20 of **Appendix 9.2.** This note should be present even if, as a result of taking investment income into account, the provision for unexpired risks is nil; and [Code 2205]
- (f) where, for any *accounting class*, the *reinsurer's* share of *claims* incurred includes amounts expected to be recovered from reinsurers more than 12 months after the payment of the underlying gross *claims*, there should be stated for that class (i) the amount of such recoveries; and (ii) the accounting treatment which has been adopted in respect of discounting such recoveries - see paragraph 28 of **Appendix 9.2.** [Code 2206]

Form 23

Completion of the form

- 10.4 (1) **Form 23** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on). The form presents an analysis of by accident year of net *claims* and premiums. It consists of three parts:
- (a) the last ten accident years (lines 11 to 20);
 - (b) the reconciliation business (line 22); and
 - (c) the prior accident years (line 21).
- (2) The rules for the allocation of premiums, *claims* and expenses to accident years are explained in chapter eight. Reconciliation business is not allocated to accident years but shown at line 22.
- (3) The amount of earned premium shown at column 11 for each accident year should be updated each *financial year* end to take account of over- or under-estimates of premium for that accident year.
- (4) Reconciliation business is any business which falls below the country de minimis limit in the classification of risk groups (see 9.4(7)) and any business which was reported as reconciliation business under the *1983 Regulations*. The reconciliation business should be reported at line 22 net of the *reinsurers'* share.
- (5) Special rules apply for the re-conversion of the premiums and *claims* amounts in columns 1, 2, 3 and 11 of **Form 23**. All amounts denominated in a major currency should be reconverted into sterling using the exchange rate ruling at the end of the current *financial year*. Amounts denominated in a non-major currency need not be re-converted (although they may be if the *insurer* wishes). Where a claim or premium amount is not reconverted it should be reported at the exchange rate which ruled for the *financial year* in which it first arose.
- (6) A major currency is:
- (a) for business carried on in any overseas country (i.e. by a branch, agency or other establishment in that country), the currency of that country; and
 - (b) for all other business Euros, United States dollars, Canadian dollars and any other currency the *insurer* wishes to treat as a major currency.

Supplementary notes

- (7) Two notes are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; [Code 2301]
 - (b) if during the *financial year* business is transferred (under Part VII of the *Act* or under the equivalent legislation of another *EEA State*) to the *insurer*, certain specified details of that business must be stated - see paragraph 17 of **Appendix 9.2**. [Code 2302]

Form 24

Completion of the form

- 10.5 (1) **Form 24** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on). The form reconciles the *technical provisions* brought forward to that carried forward with premiums, *claims*, expenses and profits/losses as the reconciling items.
- (2) The column headings (between columns 29-29 and 99-99) should be completed respectively from right to left with the dates of the end of this *financial year* and of each of the nine preceding *financial years*.
- (3) A transitional concession applies for all *accounting classes* except 9 and 11. Amounts for underwriting years ended before 23 December 1993 may be included in the prior years column. (If this is done the end-date for such years should not be entered in the column headings.) *Insurers* should only take advantage of this concession to the extent that full completion of the form is impracticable, (e.g. full completion of **Form 24** for class 10 would not be impracticable where business of that class was previously reported on the **Form 29**).
- (4) Business reported as reconciliation business on **Form 35** should be reported on this form (net of the *reinsurers'* share) analysed by underwriting year.
- (5) All premium amounts at lines 11 and 12 should be shown gross of commission.
- (6) Net operating expenses (lines 41 to 49) should not include the increase or decrease in *deferred acquisition costs*, ('DAC'). Instead the DAC brought forward and carried forward should be included respectively at lines 51/52 and 53/54. DAC is part of the fund - see line 24 on **Form 25**.
- (7) For an open underwriting year line 54 ('Technical provisions - carried forward - adjustment for discounting') should show the extent to which future investment Return has been taken into account in deciding whether

and, if so, by how much to increase the fund (i.e. premiums written less *claims* and expenses) to make it sufficient to meet all present and future obligations attributable to the underwriting year, i.e. the amount shown at line 53 ('Technical provisions - carried forward – undiscounted') should be the fund augmented by the full amount needed to make it sufficient to meet all such obligations without taking future investment return into account.

- (8) The amount shown at line 54 for an open year should be included as one of the component items included in the balance shown at line 20 on **Form 25**, even if that results in a negative amount at that line. Lines 16 to 18 on this form should not include amounts for open underwriting years.

Supplementary notes

- (9) Six notes are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; [Code 2401]
 - (b) certain specified details of the reporting basis and basis of profit recognition should be stated - see paragraph 24 of **Appendix 9.2**. Guidance is given in 8.7; [Code 2402]
 - (c) if during the *financial year* business is transferred (under Part VII of the *Act* or under the equivalent legislation of another *EEA State*) to the *insurer*, certain specified details of that business must be stated - see paragraph 17 of **Appendix 9.2**; [Code 2403]
 - (d) the basis for determining the *claims management costs* payable and carried forward should be stated - see paragraph 22 of **Appendix 9.2**. The payable part of the disclosure, amongst other items, should include an explanation of how overheads are allocated as between *claims management costs* and net operating expenses. If there are no *claims management costs* carried forward but there are *claims* outstanding carried forward, the reason for believing these outstanding *claims* can be run-off without incurring *claims management costs* should be stated. If the *insurer* has for any *accounting class* ceased during the *financial year* to effect new contracts, the basis upon which any additional costs (payable or carried forward) from such cessation have been determined, or the reason for believing there are no such additional costs, should be stated; [Code 2404]
 - (e) where, for any *accounting class*, investment income has been taken into account in determining the *claims management costs* carried forward, an *insurer* should state for each such class (i) the rates of interest used; and (ii) the average interval to the date at which the

carried forward costs are expected to be expended - see paragraph 22(4) of **Appendix 9.2**; [Code 2405]

- (f) the basis for determining acquisition expenses (other than commission) payable and carried forward should be stated - see paragraph 23 of **Appendix 9.2**. The payable part of the disclosure, amongst other items, should include an explanation of how overheads are allocated as between other acquisition expenses and the other components of net operating expenses, especially administrative expenses. The carried forward part of the disclosure should include an explanation of how the appropriate proportion of acquisition expenses (other than commission) to match the unearned premium carried forward was determined. [Code 2406]

Form 25

Completion of the form

- 10.6 (1) **Form 25** should be prepared separately for each *accounting class* (where any business falling in that *accounting class* has been carried on). The form analyses the *technical provisions* carried forward.
- (2) The guidance given in 10.5 the completion of **Form 24** also applies for this form.
- (3) The extent to which the form is to be completed differs for open and closed years - see instruction 2 to the form. For this purpose business accounted for under the annual method should be regarded as closed year business. See also 8.5 for further guidance. For open years, line 21 should equal line 29, which should equal line 53 less line 54 on **form 24**. The balancing figure required to achieve this should be entered at line 20.
- (4) Line 20 'Balance of fund' should not be confused with the undeclared profit on an open year. It includes such profit (if any), but also includes all other elements of the fund not shown separately for open years, i.e. the items listed at lines 16 to 18 and 22 to 25 which are not used for open years.
- (5) Lines 13 and 14 refer for both open and closed years to 'claims incurred but not reported'. For closed years this does not include provisions for *claims* not incurred, i.e. *claims* expected to be incurred after the end of the *financial year*. For closed years such yet-to-be-incurred expected claims are provided against by the provisions for unearned premiums and unexpired risks, (lines 23 and 24). For open years such yet-to-be-incurred expected *claims* may either be included at lines 13 and 14 or included as one of the elements represented by the balance of the fund, (line 20). For both open and closed years lines 13 and 14 require the analysis of 'claims incurred but not reported' between the 'gross amount' and 'reinsurer's share'. Where this analysis is not provided, e.g. by reporting the net amount as if it were the

gross amount, the form has not been properly prepared in accordance with the rules.

- (6) the offset of surpluses and deficits on open years from business managed together should be shown at line 19. A surplus on the underwriting year which is to be offset against deficit(s) arising elsewhere should be shown as a positive amount. A deficit on the underwriting year which is to be offset against surplus(es) arising elsewhere is to be shown as a negative amount. See 8.5 for further guidance.
- (7) For closed years, the amount included for the provision for unexpired risks (at line 23) in the **Form 25** for any *accounting class* should be determined without taking into account any surplus expected to arise on the unexpired risks falling within other *accounting classes*.
- (8) However, in determining the total provision for unexpired risks (which is disclosed in **Form 15** at line 13 and in **Form 13** at line 62), deficits and surpluses in different *accounting classes* may be offset (to the extent permitted by generally accepted accounting practice). Any surplus for an *accounting class* thus offset against deficits in other *accounting classes* should, to the extent it relates to business accounted for on an underwriting year basis, be shown as a negative provision at line 23 on the **Form 25** for that *accounting class*.

Supplementary notes

- (9) Five notes are specified:
 - (a) the basis upon which the provision for unearned premium is calculated and the reason for adopting that basis should be stated - see paragraph 18 of **Appendix 9.2**. The reason stated should include an explanation of any change in the basis from previous *financial years*; [Code 2501]
 - (b) where, for any *accounting class*, the provision for unexpired risks has been determined after taking investment income into account, an *insurer* should state for each such class (i) the provision before taking investment income into account; (ii) the rates of interest used; and (iii) the average interval to the date at which *claims* are expected to be settled in cash. The note should be present even if as a result of taking investment income into account the provision for unexpired risks is nil - see paragraph 20 of **Appendix 9.2**.
 - (c) where, for any *accounting class*, the *reinsurers'* share of *claims* incurred includes amounts expected to be recovered from reinsurers more than 12 months after the payment of the underlying gross *claims*, there should be stated for that class (i) the amount of such recoveries; and (ii) the accounting treatment which has been adopted

in respect of discounting such recoveries - see paragraph 28 of **Appendix 9.2**; [Code 2503]

- (d) where a surplus for offset is shown at line 19, the following should be stated:
 - (i) a description of the business in respect of which the anticipated surplus and of the business in respect of which the anticipated deficit to be offset arise (including identification of the risk groups or business categories into which the business falls); and
 - (ii) the reason for treating the business as managed together. (See paragraph 25(2) of **Appendix 9.2**; and [Code 2504])
- (e) particulars of any amounts included at lines 25 on **Forms 25** should be stated - see the face of **Form 25**. [Code 2505]

Forms 26 and 27

Completion of the forms

- 10.7 (1) **Forms 26 and 27** present an analysis by business category of the business reported on **Forms 23** for the treaty *accounting classes* 9 to 11. The format of **Forms 26** is identical to the format of **Form 23** except for:
- (a) the inclusion in the heading of a business category and a currency box; and
 - (b) the use of a continuation sheet; and
- the format of **Form 27** is identical to that of **Form 26** except that it is to be completed gross of the *reinsurers'* share, whereas **Form 26** is to be completed net. The guidance given in 10.4 on the completion of **Form 23** also applies to these forms – see 10.4(4) to 10.4(7).
- (2) **Forms 26 and 27** should be completed separately for each business category of each treaty *accounting class* (where any business is carried on in that business category for that *accounting class*). The entries in any box on all **Form 26** for any *accounting class* should in aggregate (converted into sterling where necessary) equal the corresponding entry on **Form 23** for that *accounting class*.
 - (3) An *insurer* may prepare a single **Forms 26 and 27** for business carried on in all currencies (with all amounts converted into sterling). Alternatively it may prepare separate forms in any one or more of:
 - (a) sterling;

- (b) United States dollars;
 - (c) Canadian dollars;
 - (d) Euros; or
 - (e) any other currency where the *gross premiums or claims* incurred for the business carried on in that currency exceeds 10% of the total for all treaty business.
- (4) Business transacted in a currency for which no separate form is prepared should be included in the sterling form (converted into sterling) unless the *insurer* considers it more appropriate to include it in the form for another currency (converted into that currency). The reporting of treaties on separate currency forms should be consistent from year to year. See paragraph 5 of **Appendix 9.2**.
- (5) The amount of earned premium shown at column 11 for each accident year should be updated each *financial year* end to take account of over- or under-estimates of premium for that accident year.
- (6) The category box in the heading should be completed with one of the letters a to h according to the table in 9.3(1). If any of these standard categories is divided into bespoke business categories (see 9.3(2)) these bespoke categories should be distinguished by inserting the numbers 1, 2, 3 etc. after this letter. (For example if the standard business category c is divided into four bespoke categories, the heading entry for each of these should be respectively c1, c2, c3 and c4). The currency box in the heading should be completed with the country code for that currency, (see the **Annex** to this paragraph for these codes).
- (7) The category names to be used in the title lines to the form are described in 9.3(1). A bespoke category should be given a name which:
- (a) describes the general nature of the business included; and
 - (b) distinguishes it from other business categories.

Supplementary notes

- (8) Five notes are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; [Code 2601]
 - (b) the basis of allocating or apportioning *reinsurance* treaties accepted which fall within more than one business categories should be stated-see rule 9.17(2). Further guidance is given in 9.3(5); [Code 2602]

- (c) where the allocation or apportionment to business categories of any *reinsurance* treaties accepted which have previously been reported differs from that adopted previously, an explanation of the nature of the change and the reasons for it should be given - see rule 9.17(3)(a). Further guidance is given in 9.3(6) to 9.3(7) above; [Code 2603]
- (d) where the allocation or apportionment to business categories of any *reinsurance* treaties accepted differs from that adopted previously for *reinsurance* treaties relating to similar risks, an explanation of the nature of the change and the reasons for it should be given - see rule 9.17(3)(a). Further guidance is given in 9.3(6) to 9.3(7); [Code 2604]

Forms 28 and 29

Completion of the forms

- 10.8 (1) **Forms 28 and 29** present an analysis by business category of the business reported on **Form 24** and **25** for the treaty *accounting classes* 9 to 11. The formats of **Forms 28** and **29** are identical respectively to the formats of **Forms 24** and **25** except for:
- (a) the inclusion in the heading of a business category and a currency box, and
 - (b) the use of a continuation sheet; and
- the guidance given above on the completion of the headings of those forms also applies to these forms - see 10.5(2).**
- (2) **Forms 28** and **29** should be completed separately for each business category of each treaty *accounting class* (where any business is carried on in that business category for that *accounting class*). The entries in any box on all **Forms 28** and **29** for any *accounting class* should in aggregate (converted into sterling where necessary) equal the corresponding entry on **Forms 24** and **25** for that *accounting class*.
 - (3) The guidance given in 10.7(3) to (6) on the completion of **Forms 26** and **27** also applies to these forms.
 - (4) A transitional concession applies for proportional treaty business (*accounting class* 10) which was not previously reported on the *1983 Regulations Form 29*, either because it did not fall in the MAT business categories or because it was not the subject of a direction under section 148 of the *Act*. Amounts for underwriting years ended before 23 December 1993 may be included in the prior years column and need not be analysed on the continuation sheet. (If this is done only post-1993 year-end dates should be entered in the column headings).

- (5) All premium amounts at lines 11 and 12 should be shown gross of commissions.
- (6) For an open underwriting year, line 54 of **Form 28** ('Technical provisions - carried forward - adjustment for discounting') should show the extent to which future investment return has been taken into account in deciding whether and, if so, by how much to increase the fund (i.e. premiums written less *claims* and expenses) to make it sufficient to meet all present and future obligations attributable to the underwriting year, i.e. the amount shown at line 53 ('Technical provisions - carried forward – undiscounted') should be the fund augmented by the full amount needed to make it sufficient to meet all such obligations without taking future investment return into account.
- (7) The amount shown at line 54 for an open year should be included as one of the component items in the balance shown at line 20 on **Form 29**, even if that results in a negative amount at that line. Lines 16 to 18 on this form should not include amounts for open underwriting years.

Supplementary notes

- (8) Six notes are specified:
 - (a) the first five are the same as described in 10.7(8) for **Forms 26** and **27**, but are in respect of treaty business accounted for on an underwriting basis; and [Codes 2801 to 2805]
 - (b) where a surplus for offset is shown at line 19 of **Form 29**, the following should be stated:
 - (i) a description of the business in respect of which the anticipated surplus and of the business in respect of which the anticipated deficit to be offset arise (including identification of the risk groups or business categories into which the business falls); and
 - (ii) the reason for treating the business as managed together. See paragraph 25(2) of **Appendix 9.2**. [Code 2901]

Form 30

Completion of the form

- 10.9 (1) **Form 30** consists of two sheets. The form should be completed whenever an amount for adjustment for discounting is included in any **Form 22** or **25** - see rule 9.15 and also paragraph 27 of **Appendix 9.2**. However de minimis rules (explained) apply for the completion of sheet 2 and parts of sheet 1.
- (2) Sheet 1 calls for an analysis of assets and liabilities etc. by major currency. A major currency is any currency in respect of which the 'provision for

claims outstanding' (before deduction for *discounting*) is not less than 10% of the total provision for *claims* outstanding (before deduction for *discounting*). In terms of the form each major currency line should have a column 6 entry which is not less than 10% of the column 6 total.

- (3) In sheet 1 of **Form 30**, assets and liabilities should be allocated to particular currencies using, basically, the same rules as apply for the purpose of the matching and localisation requirements. However, for the purpose of completing **Form 30** the rules should be applied to all the assets and liabilities of the *insurer*, (including assets and liabilities in respect of business to which the obligation to match and localise assets does not apply). Rules 7.1(5) and 7.3(2) to 7.3(5) apply.
- (4) Instructions 1 to 4 (and 6 & 10) respectively explain the entries to be made in columns 1 to 4 of sheets 1 and 2. Two points will be noted here:
 - (a) The reference in column 2 to hypothecated assets should not be read as imposing any requirement on *insurers* to hypothecate particular assets to particular liabilities. It merely allows *insurers* who have chosen so to hypothecate to report this on the form. *Insurers* which do not hypothecate should include all assets in column 2, (i.e. column 2 will equal column 1);
 - (b) the expected income and yield to be shown at columns 3 and 4 are to relate only to those assets included in column 2; and
 - (c) the *admissible assets* shown at column 1 are the total *admissible assets*, but excluding the *reinsurers'* share of *technical provisions*, and *deferred acquisition costs*.
- (5) In sheet 1:
 - (a) column 5 should show all *technical provisions*, i.e. including the provisions for unearned premiums and unexpired risks;
 - (b) columns 5 to 7 are to be completed net of *reinsurance*. Column 5 should include all *technical provisions* except the *equalisation reserve* (as there is no rule by which the latter may be allocated across currencies). Columns 6 and 7 ('Provision for claims outstanding being discounted') should include any provisions for *claims management costs* which are being discounted;
 - (c) column 8 should show the unwind of the discount in the next *financial year* calculated in accordance with instruction 8; and
 - (d) column 11 should show the average rate calculated in accordance with instruction 11.

- (6) An example of the calculation of the unwind of the discount in the next *financial year* is given below:

An *insurer* has claims outstanding (including IBNR) of £250k at the end of 1996 which it estimates it will pay as follows -

31.5.97 £150k

31.5.98 £100k

Its discount rate of interest is 5% and so in the 1996 *return* it presents the following amounts in columns 6 and 7 of **Form 30** -

Claims outstanding -

before deduction for *discounting* £250k

deduction for *discounting* £10k

where the latter figure is calculated as -

$$£9.7k = £250k - £150k/(1.05)^{5/12} + £100k/(1.05)^{(1+5/12)}.$$

The unwind of the discount in the next *financial year* is then calculated as follows -

- (a) estimate the expected *claims* outstanding at the 1997 year end (using the same assumptions as are used to estimate the actual claims outstanding at the 1996 year end) but only in respect of accident/underwriting years 1996 and prior.

$$\text{Expected } \textit{claims} \text{ outstanding at 1997 in} \\ \text{respect of accident years 1996 and prior} = \quad \underline{£100k}$$

- (b) estimate the deduction for *discounting* at the 1997 year end (using the same assumptions as are used to estimate the actual deduction for *discounting* at the 1996 year end) but only in respect of accident/underwriting years 1996 and prior.

$$\text{Expected deduction for } \textit{discounting} \text{ at 1997 in} \\ \text{respect of accident years 1996 and prior} = £100k - £100k/(1.05)^{5/12} \\ = \quad \underline{£2.0k}$$

- (c) then subtract the expected deduction for *discounting* at 1997 (as calculated in (b) above) from the actual deduction for *discounting* at 1996 as follows.

'Unwind of discount in the next financial year' = £9.7k - £2.0k = £7.7k = £8k (rounded)

Supplementary note

- (7) Three supplementary notes are specified:
- (a) the methods and assumptions used in determining the yield in accordance with instruction 4 to the form should be stated - see instruction 5; [Code 3001]
 - (b) the treatment of expected income payment (in arriving at the amounts shown at columns 3 and 4) from any asset where such payment is in default should be stated – see instruction 7; and [Code 3002]
 - (c) a note should state the risk groups and business categories where an adjustment for *discounting* has been made and, for each such risk group or business category:
 - (i) the method used in calculating the deduction for *discounting*;
 - (ii) the rate of interest used;
 - (iv) the expected average interval between the date of settlement for *claims* being discounted and the end of the *financial year*; and
 - (v) the criteria adopted for estimating the period that will elapse before *claims* are settled. See paragraph 27(5) of **Appendix 9.2**. [Code 3003]

Forms 31, 32 and 34

Completion of the forms

- 10.10 (1) **Forms 31, 32 and 34** provide the risk group analysis of the gross *claims* and *gross premiums* information for the business (see the diagram in 9.1(3)). **Forms 31** and **32** are used for accident year business, whilst **Form 34** is used for underwriting year business.
- (2) Separate **Forms 31, 32 and 34** are not needed for a UK branch *return* or EEA branches *returns* where a global *return* including these forms is being submitted.
- (3) **Form 31** should be prepared separately for each risk group in each country for all *direct and facultative accounting classes* (other than the *direct and facultative motor class 2*). **Form 32** should be prepared separately for each risk group in each country for *accounting class 2*. **Form 34** should be

prepared separately for each risk group in each country for all *direct and facultative accounting classes*. See rule 9.19.

- (4) The classification of business into risk groups is explained in 9.
- (5) The three forms are similar in format. **Form 32** only differs from **Form 31** by the inclusion of a column 12 (vehicle years) and column 13 (*claims* frequency). **Form 31** only differs from **Form 34** by the inclusion of columns 1 and 2 (*claims* numbers). However instruction 7 to **Form 31** provides that *claims* numbers need not be reported for marine, aviation and transport business reported on that form.
- (6) The *claims* numbers on **Forms 31** and **32** only relate to reported *claims* outstanding. Estimates of *claims* numbers for IBNR are not required. Column 1 of **Forms 31** and **32** show the cumulative *claims* numbers only for *claims* settled at some cost and column 2 the *claims* numbers of reported *claims* outstanding. Where a *claim* was previously reported as closed at some cost but is subsequently reopened, it remains one *claim*. If necessary it should be transferred from column 1 and included in the *claims* number in column 2.
- (7) The amounts shown for *gross premium* for each accident/underwriting year in column 10 on **Forms 31** and **32** and in column 8 on **Form 34** should be updated each *financial year* end to take account of over- or under- estimates of premiums for that year.
- (8) The instructions to the forms also provide that:
 - (a) all figures are to be shown gross of *reinsurers'* shares, before any deduction for *discounting* and exclusive of any *claims management costs*; and
 - (b) all percentages are to be expressed to one place of decimals.
- (9) Instruction 6 to **Form 32** explains how vehicle years are to be calculated. The percentages shown in that form for the *claims* frequency, (column 13), should be calculated as the ratio of (column 1 + column 2) to (1000 x column 12).
- (10) On all forms the accident/underwriting year end dates inserted at lines 11 to 20 should be the year end dates of the current *financial year* and the 9 previous *financial years*.
- (11) **Forms 31** and **34** have continuation sheets. These are only to be used for risk groups falling into *accounting class 7* (third-party liability). The continuation sheets analyse the amounts shown at line 21 (prior accident/underwriting years) and should be prepared where any amount is shown at this line.

- (12) On all **Forms 31, 32 and 34** the risk group name shown (in the titles lines to the Forms) should include a description of the risks within the *accounting class* included in that risk group - see paragraph 29(1) to **Appendix 9.2**. This requires, amongst other things, that the description should be sufficient to distinguish the risk group from other risk groups for the same country falling in the same *accounting class*.

Supplementary notes

- (13) Two supplementary notes are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return*, the reason should be stated - see paragraph 7 of **Appendix 9.1**; and [Code 3101, 3201 or 3401]
 - (b) if for any risk group the name given to it (see 10.10(10)) is not sufficient to identify, for the business included in that risk group, the nature of the objects exposed to risks and the nature of the cover provided against such risk, this information should be stated in a supplementary note - see paragraph 29(2) of **Appendix 9.2**. [Code 3102, 3202 or 3402]

Forms 33 and 35

Completion of the forms

- 10.11 (1) If the *insurer* has any reconciliation business then it should complete **Form 33** (for accident years) and **Form 35** (for underwriting years) - see rule 9.20. Separate **Forms 33** and **35** are not needed for a UK branch *return* or EEA branches *returns* where a global *return* including these forms is being submitted.
- (2) In (1), Reconciliation business is any direct and facultative business not classified into risk groups and so not reported on **Forms 31, 32 and 34**. It arises from two sources:
- (a) small country business - see 9.4(6) to (7); and
 - (b) business which was reported on reconciliation forms under the *1983 Regulations*.
- (3) Only one **Form 33** and one **Form 35** should to be prepared covering all *accounting classes*.
- (4) The instructions to the forms also provide that all figures are to be shown gross of *reinsurers'* shares, before any deduction for *discounting* and exclusive of any *claims management costs*.

Supplementary notes

- (5) Only one supplementary note is specified. If any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**. [Code 3301 or 3501]

Form 36

- 10.12 (1) **Form 36** should be prepared whenever any of the business category **Forms (26 to 29)** or the risk group **Forms (31 to 35)** is prepared in a foreign currency. **Form 36** reports the rates of exchange used for the conversion of amounts reported on those forms in foreign currency for inclusion in other forms in sterling. Where a different rate is used for premiums and *claims* incurred/paid/ earned during the year than for *claims* outstanding at the year end, the former rate should be stated. Where more than one such rate is used during the year the average rate should be stated.
- (2) The country codes are listed in the **Annex**.
- (3) There are no supplementary notes specified to this form.

11. FORMS 37 TO 39: EQUALISATION RESERVES

Introduction

- 11.1 (1) The *Equalisation Reserves Rules* require *insurers* to keep two *equalisation reserves*. One for credit business, and one for those writing property, consequential loss, marine, aviation and nuclear business, referred to collectively as ‘other than credit business’.
- (2) This guidance seeks to explain the rules in areas that are thought likely to be helpful to those responsible for the calculation and audit of *equalisation reserves*.
- (3) This guidance does not deal with tax matters.
- (4) Each of **Forms 37 to 39** is used for both types of *equalisation reserves* (i.e. credit and other than credit), but since the rules for credit and other than credit are different, the guidance is divided into two parts dealing with each of them separately. Sections 11.2 to 11.3 cover the other than credit *equalisation reserves*, and sections 11.4 to 11.5 cover the *equalisation reserves* for credit business.
- (5) All the *returns* from *insurers* carrying on *general insurance business* in the categories prescribed by the *Equalisation Reserves Rules* should include the *equalisation reserve* forms, or a note explaining why they are not included. The note should be prepared in accordance with instructions for supplementary notes under 4.6(6).

Rules governing the Equalisation Reserves Rules: other than credit insurance business

Application

- 11.2 (1) The *Equalisation Reserves Rules* apply to every *insurer*:
- (a) whose head office is in the UK;
 - (b) whose business in the UK is restricted to *reinsurance*; or
 - (c) whose head office is not in an *EEA State*.
- (2) *Assessable mutuals* are excluded from the requirement.
- (3) Business carried on outside the United Kingdom by an *insurer* whose head office is not in the United Kingdom (rule 6.5(2)(b) is also excluded from the requirement.

Coverage

- (4) This is detailed in rule 6.4(3). The business for which *equalisation reserves* are required is set out in five sub-paragraphs. Rule 6.6 requires *insurers* to classify this business into five *business groups*. These are set out in the table in (10).
- (5) *Business group A* – ‘Property’ should be straightforward. In most cases the only business that will be needed to be removed from that reported for *accounting class 6* is any nuclear business. The *direct and facultative* business should be that reported for *accounting class 6* on **Forms 21/22** or **24/25**. The proportional treaty business should be that reported for *accounting class 10*, business category (f), on **Forms 26/27** or **28/29**.
- (6) *Business group B* - Consequential loss is less straightforward in that it will generally comprise only part of *accounting class 8*. Consequential loss risks are defined in the interpretation section of the *Equalisation Reserves Rules*. This covers the risks described at *class 16 (a)* of **Annex 11.2** and it may also be helpful to refer to this. Any nuclear business needs to be removed. The *direct and facultative* business should be a part of that reported for *accounting class 8*. The proportional treaty business should be part of business category (h) that is reported on **Form 26/27** or **28/29** as a break down of *class 10*.
- (7) *Business group C* – ‘Marine and aviation’ covers all relevant *direct and facultative* and treaty business. The group does not include transport business and any nuclear business should be removed. The *direct and facultative* business should be that reported for *accounting classes 3* and *4*. The treaty business will be derived from business categories (c) and (d) for *accounting classes 9, 10* and *11*.
- (8) *Business group D* - The nuclear *business group*, includes both liability and damage business that comes within the definitions in the interpretation section of the *Equalisation and Reserves Rules*. The scope of the description goes beyond the business written by the British Insurers (Atomic Energy) Committee pool, but participants in that pool are expected to be able to include all that business. Liability should be part of *accounting class 7*. Damage should be mainly from *accounting classes 6, 9* and *10*. Some MAT business may need to be included.
- (9) *Business group E* – ‘Non-proportional treaty’ covers property and consequential loss business except such nuclear business which should be included in group D. The property business should be that reported on **Form 26/27** or **28/29** for *accounting class 9*, business category (f). The consequential loss business should be part of business category (h) that is reported on **Form 26/27** or **28/29** as a break down of *accounting class 9*.

(10) The guidance in (4) to (9) is summarised in the following table:

Business Group	Description
Property	<i>Direct and facultative - accounting class 6.</i> Proportional treaty - <i>accounting class 10</i> , business category (f) 'property'.
Consequential loss	<i>Direct and facultative - part of accounting class 8</i> Proportional treaty – <i>accounting class 10</i> , part of business category (h) 'miscellaneous and pecuniary loss'.
Marine and aviation	<i>Direct and facultative - accounting classes 3 and 4.</i> Treaty – <i>accounting classes 9, 10 and 11</i> -business categories (c) and (d) NB Transport is excluded.
Nuclear	<i>Nuclear risks</i> Both damage and liability business. Nuclear business needs to be removed from the other <i>business groups</i> .
Non-proportional treaty property and consequential Loss	Treaty – <i>accounting class 9</i> , business categories (f) 'property' and part of (h) 'miscellaneous and pecuniary loss'.

De minimis rules

- (11) De minimis rules apply in two sets of circumstances. First where an *insurer* has never had an *equalisation reserve*. Secondly where an *insurer* has been required to set up an *equalisation reserve* in previous years, but where the level of business in the current year has dropped below the level where a transfer in is required. The rules that apply in these circumstances are set out in rules 6.5 and 6.10 of the *Equalisation Reserves Rules*.
- (12) Rule 6.5 provides that these rules do not apply to *insurers* who do not already have an *equalisation reserve* if in respect of all other than credit business net premiums written in a *financial year* are:
- (a) less than 1,500,000 Euros; or
 - (b) less than 4% of all its *general insurance business* and less than 2,500,000 Euros.

- (13) Rule 6.10 sets out rules where an *insurer* has an *equalisation reserve* to bring forward, but where the net premiums written in the *financial year* being reported on are less than the limits at 12(a) and (b). The calculation varies according to the number of years an *insurer* has been writing the business. Where a five year reference period is available, the number of years where the *insurer* has been below the thresholds is used. Where less than five years is available, the average net premium is used. In both cases *financial years* may need to be adjusted to 365 day periods. These calculations will produce a result indicating that either the reserve should be carried forward or be reduced to zero.
- (14) If the rule 6.10 reserve calculations result in a reduction of the reserve to zero, line 13 of **Form 37** should be left blank. This will result in the carried forward also being blank.

Treatment of business transfers

- (15) Rules 6.8 and 6.9 of the *Equalisation Reserves Rules* apply respectively to the transferor and transferee of a transfer under Part VII of the *Act*.
- (16) Rule 6.8 requires that the transferor should not include any of the business that has been transferred in *business group maximum* calculations, and that, if all rights and obligations have been transferred, the *business group maximum* at **Form 37**, line 13 should become zero.
- (17) Rules 6.9(1) to 6.9(5) apply to transferees at the end of the year in which the transfer takes place. The prescribed treatment varies according to whether such business is accounted for as an adjustment to premiums or *claims*.
- (18) Rules 6.9(6) to 6.9(8) provide guidance for subsequent years. Appropriate amounts should be included in net premiums.

Completion of Forms 37 to 39 for other than credit insurance business

Form 37

- 11.3 (1) Columns 1 to 6 of this form should be used for other than *credit insurance business*.
- (2) **Form 37** presents the net premiums written, the maximum size of the reserve, the *equalisation reserve* brought and carried forward and transfers to or from it. It consists of two parts:
- (a) calculation of the maximum provision; and
- (b) calculation of the transfer to/from the provision.
- (3) The net premium (i.e. the premium, net of *reinsurance* but gross of commission) for each of the *business groups*, for which business has been

written, should be entered in columns 1 to 5 of line 12 for the current year. These figures include previously unbooked premiums adjustments relating to risks incepted in prior *financial years*.

- (4) The total for the previous four years, or for such years as are available for inclusion, (this applies to all companies during the first four years of the rules, or where the company has recently commenced writing business in a *business group*), should be entered in line 11. *Financial years* ending before 23 December 1996 should not be brought into the calculation. (See *Equalisation Reserves Rules*, **Appendix 6.1**, Part II, paragraph 12(2)).
- (5) The maximum provision can be calculated as the sum of lines 11 and 12 divided by the number of years premiums these figures reflect and multiplying by the percentages shown in the *Equalisation Reserves Rules*, **Appendix 6.1**, Part III. The products of these calculations should be entered in line 13 and then added together and the total entered in line 13 column 6.
- (6) The figure at line 21, column 6, should be available from the previous year's *return*, unless it is the first year of the scheme or a *insurer* has newly commenced writing business covered by the rules, in which case the line should be left blank. Line 22, columns 1 to 5, can be calculated by multiplying the figure in the same column at line 12 by the percentage specified in the *Equalisation Reserves Rules*, **Appendix 6.1**, Part I. Line 22, column 6, is the sum of columns 1 to 5.
- (7) Line 23, columns 1 to 5, derives from the same *business groups* at either **Form 38** line 19 or **Form 39** line 19, according to whether accident year or underwriting year accounting is being used, or possibly the sum of both. Line 24, columns 1 to 5, will be the same as line 23, unless for a *business group* considered in isolation the figure at line 23 is higher than that at line 13. If this is the case for any *business group*, the provisional transfer out will be the maximum reserve figure at line 13. Columns 1 to 5 should be added together and the sum entered in column 6.
- (8) The rest of the calculation only uses column 6. Lines 25 to 29 show the transfer for the year and the *equalisation reserve* carried forward. Line 25 limits any transfer out to the sum available. Line 27 limits the *equalisation reserve* carried forward to the maximum allowable reserve.
- (9) Line 29 should carry forward to **Form 16**, line 12 and line 28 to **Form 15**, line 15. NB, the amounts in **Form 16**, line 12 and **Form 15**, line 15 may also include any non-UK statutory *equalisation reserves* which the *insurer* has been required by overseas law to set up in respect of its overseas operations.
- (10) Instructions 1 to 11 to the form provide guidance for its completion.

Form 38: accident year accounting

- (11) Lines 11 to 19 should be used for other than credit business covered by the *Equalisation Reserves Rules*. Separate calculations are made for each *business group*.
- (12) The form presents the abnormal loss, if any, for business accounted for on an accident year basis.
- (13) The coverage of the five *business groups* is explained in 11.4.
- (14) The net premium includes previously unbooked premium adjustments (i.e. amounts at **Form 21**, line 11, column 5). It should be noted that *claims* incurred excludes *claims management costs* i.e. those *claims management costs* required by the shareholder accounts rules (note (4) to the profit and loss account format) to be included in *claims* incurred other than those which, whether or not incurred through the employment of the *insurer's* own staff, are directly attributable to particular *claims*.
- (15) Lines 13 and 19 are simple arithmetical calculations explained in the instructions to the form.
- (16) Care needs to be taken to comply with the rules for transferred business, particularly in the year of transfer. See rules 6.8 and 6.9.
- (17) Instructions 1 to 5 on the reverse of the form provide guidance for its completion.

Form 39: underwriting year accounting

- (18) Lines 11 to 19 should be used for other than *credit insurance business* covered by the *Equalisation Reserves Rules*. Separate calculations should be made for each *business group*.
- (19) The form presents the abnormal loss, if any, for business accounted for on an underwriting year basis.
- (20) The coverage of the five *business groups* is explained in 11.2(4) to (10).
- (21) The net premium written derives from the total column on **Form 24** (line 19) and, therefore, includes previously unbooked premium adjustments from prior underwriting years.
- (22) The amount shown for 'claims, net of reinsurance', line 12 instruction 3 in **Form 39**, is derived from the amounts shown in **Forms 24 & 25**, but excluding *claims management costs* and *deferred acquisition costs*.
- (23) Lines 13 and 19 are simple arithmetical calculations explained in the instructions to the form.

- (24) Care needs to be taken to comply with the rules for transferred business, particularly in the year of transfer. See rules 6.8 and 6.9 of the *Equalisation Reserves Rules*.
- (25) Instructions 1 to 5 on the reverse of the form provide guidance for its completion.

The Equalisation Reserves Rules: credit insurance business

Application

- 11.4 (1) The *Equalisation Reserves Rules* for *credit insurance business* apply to:
- (a) every *UK insurer* which carries on *credit insurance business*; and
 - (b) every *non-EEA insurer* which carries on *credit insurance business* in the United Kingdom.

De minimis

- (2) Where net written premiums are less than 4% of total net premiums in a *financial year* and less than 2,500,000 Euros a *credit insurance equalisation reserve* need not be kept. See Part III of the *Equalisation Reserves Rules*.

Completion of Forms 37 to 39 for credit insurance business

Form 37

- 11.5 (1) Column 7 of this form should be used for *credit insurance business* where any *non-reinsurance* business falling within *class 14*, including mortgage indemnity business, (above the limits noted in 11.4(3)), has been carried on.
- (2) **Form 37** presents the net premiums written in the year, the maximum size of the reserve, the *equalisation reserve* brought and carried forward and transfers to or from it. It consists of two parts:
- (a) calculation of the maximum provision; and
 - (b) calculation of the transfer to/from the provision.
- (3) The maximum provision cannot be calculated from the information on the form. The rules require that this be 1.5 times the highest net premiums written during the previous 5 years.
- (4) The figure at line 21 should be available from the previous year's *return*. Lines 22 and 24 derive from either **Form 38** or **Form 39**, according to whether underwriting year or accident year accounting is being used, or just possibly both. Two tests must be applied to the technical surplus brought

forward to complete line 22. It must be limited to 75% of the surplus, or 12% of line 12, net premiums written for the year, whichever is the lower.

- (5) Lines 25 to 29 enable the presentation of the transfer for the year and the *equalisation reserve* carried forward. These figures should carry forward to **Form 16**, line 12 and **Form 15**, line 14.
- (6) Instructions 12 to 16 on the reverse of the form provide guidance for its completion.

Form 38

- (7) Lines 21 to 29 should be used for *credit insurance business*.
- (8) **Form 38** presents the technical surplus for *credit insurance business* that has been *accounted for* on an accident year basis.
- (9) *Equalisation Reserves Rules, Appendix 6.2*, section 4 specifies that in determining any technical surplus the calculation must be made before tax and before any transfer to or from the credit insurance *equalisation reserve*. Investment income should not be included in these calculations.
- (10) Where there are technical income or charges for items not specified on the form, for example movements in the provision for unexpired risks, these should be accommodated by adjusting line 24.
- (11) Instructions 6 to 9 on the reverse of the form provide guidance for its completion.

Form 39

- (12) Lines 21 to 29 should be used for *credit insurance business*.
- (13) **Form 39** presents the technical surplus for *credit insurance business* that has been *accounted for* on an underwriting year basis.
- (14) *Equalisation Reserves Rules, Appendix 6.2*, section 4 specifies that in determining any technical surplus the calculation is to be made before tax and before any transfer to or from the credit insurance *equalisation reserve*. Investment income must not be included in these calculations.
- (15) Where there are technical income or provisions for items not specified on the form, these should be accommodated by adjusting line 24.
- (16) Instructions 6 to 9 on the reverse of the form provide guidance for its completion.

12. **THE RULE 9.25, 9.26 AND 9.27 STATEMENTS: MAJOR TREATY REINSURERS, MAJOR FACULTATIVE REINSURERS AND MAJOR CEDANTS**

Major treaty reinsurers

- 12.1 (1) Rule 9.25(1) requires every *insurer* which carries on *general insurance business* to prepare a statement of its major treaty *reinsurers*. The items to be included in that statement are listed in rule 9.25(1). The statement is intended to inform the reader of the *returns* of the *insurer's exposure* to particular treaty *reinsurers* where they are material.
- (2) Rule 9.25(2) lays down two tests for identifying major treaty *reinsurers*:
- (a) a premium *ceded* limit; and
 - (b) a *debt* plus anticipated recoveries limit.
- (3) A major treaty *reinsurer* is any *reinsurer* which either exceeds the 'premium *ceded*' limit in the current or any of the five immediately preceding *financial years*, or exceeds the '*debt* plus anticipated recoveries' limit at the current year end. The limits are applied in aggregate, (i.e. to the sum of all amounts from all treaties ceded to that *reinsurer*), except that the 'premium *ceded*' limit is applied separately for, and differs for, proportional and non-proportional treaty aggregates.
- (4) The 'premium *ceded*' limits are:
- (a) for proportional treaty *reinsurance* 2% of total worldwide *gross premiums written* of the *insurer* or branch;
 - (b) for non-proportional treaty *reinsurance* 5% of the total premium payable in respect of all non-proportional *reinsurance*.
- (5) The '*debt* plus anticipated recoveries' limit is 5% of the *insurer's general insurance business* amount. (Paragraph 5.49 of **Guidance Note 4.1** explains how the *general insurance business* amount is calculated.) The '*debt* plus anticipated recoveries' which are compared with this limit should include the amount of any *debt* due or *reinsurance* recovery anticipated from the *reinsurance* in respect of treaty *reinsurance ceded*, but only to the extent that they are taken into account in **Form 13** (lines 61 and 75), i.e. net of any specific bad or doubtful *debt* provision. Further the anticipated recoveries need only be included to the extent they arise from the *reinsurer's* share of the gross provision for:
- (a) notified outstanding *claims*; and

- (b) *claims* incurred but not reported arising from specific occurrences to which provisions have been allocated.
- (6) The latter category is intended to refer to situations where the *insurer* is aware that a catastrophe event (e.g. hurricane, earthquake etc.) has occurred and sets up a specific IBNR reserve for that catastrophe.
- (7) If two or more *reinsurers* are connected to each other, the ‘premium *ceded*’ and ‘*debt* plus anticipated recoveries’ limits should be compared to their total business. If either limit is exceeded all the connected *reinsurers* should be considered major treaty *reinsurers* and the items referred to in rule 9.25(1) listed separately for each.

Major facultative reinsurers

- 12.2 (1) Rule 9.26 requires every *insurer* which carries on *general insurance business* to prepare a statement of its major facultative *reinsurers*. The items to be included in that statement are listed in rule 9.26(1). The statement is intended to inform the reader of the *returns* of the *insurer’s* exposure to particular facultative *reinsurers* where they are material.
- (2) The definition of major facultative *reinsurer* and the items to be included in the statement are similar to those in 12.1 for the major treaty *reinsurers*. The differences are explained below.
- (3) The ‘premium *ceded*’ and ‘*debt* plus anticipated recoveries’ limits are applied separately for each facultative *reinsurance* contract. The items to be stated for the major facultative *reinsurer* need only be in respect of the major facultative *reinsurance* contract (and, if there is more than one major facultative *reinsurance* contract for that *reinsurer*, should be stated separately for each). Other (smaller) facultative *reinsurances* of the same *reinsurer* may be ignored.
- (4) The ‘premium *ceded*’ limit is 0.5% of total *gross premiums written*. The *debt* plus anticipated recoveries limit is 1% of the *general insurance business amount*. A major facultative *reinsurance* is a facultative *reinsurance* which exceeds either limit in the current *financial year*. Note unlike for treaty *reinsurance* there is no reference back to the five *preceding financial years* in applying the ‘premium *ceded*’ limit. Nor are connected *reinsurers* aggregated in applying either limit.

Major cedants

- 12.3 (1) Rule 9.27 requires every *insurer* which carries on *general insurance business* to prepare a statement of its major *cedants*. The items to be included in that statement are listed in rule 9.27(1). The statement is intended to inform the reader of the *returns* of the major sources of the *insurer’s* inward treaty *reinsurance* business.

- (2) A major *cedant* is any *insurer* from which the *gross premiums written* in respect of the total business accepted under treaty *reinsurances* exceeds the greater of:
- (a) 5% of the total *gross premiums written* under all treaty *reinsurances* accepted; or
 - (b) 2% of *gross premium written* from all sources;
- for the current or any of the three immediately *preceding financial years*.
- (3) If two or more cedants are connected to each other, the above limits should be compared to their total business. If either limit is exceeded all the connected cedants should be considered major cedants and the items referred to in (1) separately listed for each.

Connected companies

- 12.4 (1) Rule 9.28 defines when *insurers* should be regarded as connected for the purposes of rules 9.25 to 9.27. The need to define ‘connected’ arises in two contexts:
- (a) firstly, as explained in 12.1 and 12.3, in identifying major treaty *reinsurers* and major cedants, *reinsurers* connected to each other and cedants connected to each other are respectively grouped; and
 - (b) secondly, one of the items to be disclosed in respect of each major treaty *reinsurer*, major facultative *reinsurer* and major cedant is whether (and, if so, how) it is connected to the *insurer*.
- (2) The test of connectedness differs somewhat for uses in 12.4(1)(a) and (b). In both uses a person (i.e. individual or *body corporate*) and a *body corporate* are considered connected if the person is:
- (a) a *subsidiary undertaking* of the *body corporate*;
 - (b) a *parent undertaking* of the *body corporate*; or
 - (c) a *subsidiary undertaking* of a *parent undertaking* of the *body corporate*.
- (3) In the use in 12.4(1)(b), a person and *body corporate* would also be considered connected if one of them is controlled by the other or they are both controlled by the same person. For these purposes a special definition of control applies - see rule 9.28(2) and (3) which define ‘control’ for these purposes.

- (4) Both the above definitions of ‘connected’ are subject to the exception that a person and a *body corporate* are not to be considered connected if the reporting *insurer*:
- (a) does not know; and
 - (b) could not upon reasonable enquiry be expected to find out that the connection exists.
- (5) Other than in the exceptional circumstance, the reporting *insurer* should know of any connections between its *reinsurers* (or cedants) and itself or *insurers* with which it is connected. However, the *insurer* making the *return* may not in all cases be aware of connections between its *reinsurers* (or cedants) where they are not in turn connected to the *insurer*. In order to comply with the requirement to make reasonable enquiry, it will suffice for the *insurer* making the *return* to refer to the latest available published accounts or recognised industry reference document (provided that, in all cases, the source to which reference is made has been published within twelve months of the end of the *financial year* to which the *return* relates). Alternatively the *insurer* may request any or all of its *reinsurers* (or cedants) to provide details of their connected *insurers*. If no information is available from acceptable published material, or obtained in response to a specific approach to a *reinsurer* (or cedant), in the usual case, the obligation to make a reasonable enquiry will have been satisfied. However, possible breaches of the rules will be considered case by case.
- (6) The rules covered by the guidance in (1) to (5) do not apply in respect of *reinsurers* who are members of the *Society*. For the purposes of preparing the rules 9.25, 9.26 and 9.27 statements, all members of *Lloyd's* are taken as a whole.

Nil returns

- 12.5 (1) Where there are no disclosable major treaty *reinsurers*, major facultative *reinsurances* or major cedants, statement under rules 9.25, 9.26 and 9.27 should state that this is the case.

13. THE RULE 9.32/APPENDIX 9.5 STATEMENT: BUSINESS CEDED

Overview

- 13.1 The statement required under **Appendix 9.5** should be prepared by all *insurers* which carry on *general insurance business*. The statement is intended to give an overview of the *insurer's* outward non-facultative *reinsurance* protections. Its minimum contents are prescribed in paragraphs 1 to 5 of **Appendix 9.5**, which provide as follows.

Paragraphs 1 & 2

- 13.2 (1) Paragraph 1 requires a description to be given for each outward non-facultative *reinsurance* contract entered into, or modified, during the *financial year*. The description includes:
- (a) type of business covered by reference to risk groups;
 - (b) type of cover; and
 - (c) policy limits.
- (2) Refer to the text of paragraph 1 in **Appendix 9.5** for a fuller description of the disclosure required.
- (3) A contract is modified when the terms of the original contract are altered by mutual agreement of the parties. The exercise by one party to the contract of an option (e.g. to extend cover) which the other party has no right to refuse is not a modification. The existence of the option should be included, if material to an understanding of the policy, in the 'type of cover' description given at the time when the policy was originally effected.
- (4) Information on contracts modified during the *financial year* need only be given if, and to the extent that, the modification renders the information originally disclosed either inaccurate or materially incomplete. Modifications of contracts originally entered into prior to the first *financial year* covered by the new *returns* need not be reported.
- (5) The lay-out and presentation of the information required by **Appendix 9.5**, paragraph 1 is at the discretion of the *insurers* provided that is fairly presented (see rule 9.11), legible and complete. In particular the information may be presented, wholly or in part, in the form of a table or chart. However, information on *reinsurances* which cover the same type of business for similar periods of cover should be laid out together.

Paragraph 3(a)

- 13.3 (1) This sub-paragraph requires extra disclosure for outward *reinsurance* contracts which are subject to no, or a finite number of, reinstatements. Where it is anticipated that *claims* arising from incidents which occurred during or prior to the *financial year* will fully exhaust the *reinsurance* (including all reinstatements) this should be disclosed.
- (2) Any *reinsurance* reported under **Appendix 9.5**, paragraph 1, whether in the present or previous *returns* should be disclosed. The disclosure need only be given once, i.e. if a particular *reinsurance* is reported under paragraph 3(a) it need not be so reported under that paragraph in subsequent *returns*.

Paragraphs 3(b) & (c)

- 13.4 (1) These sub-paragraphs require extra disclosure where *reinsurers* representing a 10% or more participation in any *reinsurance* have ceased to pay *claims* to their reinsureds in full. This refers to where a *reinsurer* ceases to pay *claims* in full, as they fall due, to all or substantially all of its reinsureds. It does not require that the *reinsurer* should have actually refused to pay (in full) the particular *insurer* preparing the *return*. Nor does it include situations where the *reinsurer* is refusing to pay that particular *insurer* (e.g. due to a dispute) but is continuing to pay the general body of its reinsureds.
- (2) The cessation of *claims* payment in full, referred to in (1), would typically arise where the *reinsurer* is in liquidation, provisional liquidation, or is paying less than 100% of claims under the provisions of a scheme of arrangement, (or is subject to similar insolvency processes under the laws of foreign countries). However it would also include situations where the *reinsurer* was operating a *claims*-moratorium outside the protection of a formal insolvency legal process.
- (3) Under these sub-paragraphs of **Appendix 9.5** any *reinsurance* reported under **Appendix 9.5** paragraph 1 whether in the present or previous *returns* should be disclosed.
- (4) The disclosure in (3) should identify the *reinsurance* contract and state the participation in that *reinsurance* represented by *reinsurers* which have ceased to pay *claims* in full, but it is not necessary to name those *reinsurers*. Once this disclosure has been made for a particular reinsurance contract it need not be repeated in subsequent *returns* unless, due to further reinsurers ceasing to pay *claims* in full, the percentage has increased by more than ten percentage points.
- (5) The percentage to be disclosed is the full percentage participation for a *reinsurer* even if that *reinsurer* is still making partial payments on *claims*. For example if ABC Reinsurance Co. has a 10% line on a *reinsurance* policy and ABC is now paying *claims* at 60 pence in the pound, the full 10% should be disclosed. The fact that 60 pence on the pound on that 10% participation, is still being paid may also be disclosed, but there is no requirement to do so.

Paragraph 4

- 13.5 (1) This paragraph requires disclosure of the *insurer's* maximum probable loss (net of *reinsurance*) from:
- (a) any one contract; and
 - (b) all contracts taken together.
- (2) Sub-paragraph 4(2) in **Appendix 9.5** defines 'maximum net probable loss' (MPL). It, amongst other things, refers to any one incident or series of

incidents arising from the same originating cause. This wording is intended to require the aggregation of losses from a single incident or series of incidents for reporting of MPL's where they would have to be aggregated for the purpose of making recoveries on the company's (higher layers) *reinsurance*. It is self-evident that all contracts taken together MPL cannot be less than the any one contract MPL. It is also self-evident that both must be non-zero or both zero.

- (3) The disclosure is required separately for each risk group or business category, or part thereof in respect of which separate non-facultative *reinsurance* cover has been obtained. The disclosure is required for a risk group or business category even if no *reinsurance* has been obtained for that risk group or business category.
- (4) The practice (adopted by some companies for the 1997 *returns*) of showing a separate MPL for every non-facultative *reinsurance* policy is not correct and often led to nonsensical disclosures. One, and one only, MPL on each of the bases any one contract effected by the company and all contracts taken together, should be disclosed for each group, business category or part thereof as described in (2). This MPL should be net of all reinsurance protecting the risk group, business category or part thereof.
- (5) The MPL should not be confused with the deductible or retention on the company's lowest level of *reinsurance* protection. It may only equal that amount where (i) the maximum probable gross loss is not expected to exceed the *reinsurance* protection; (ii) the *reinsurance* protection is fully placed, i.e. no *co-reinsurance*; and (iii) recovery from the *reinsurance* protection does not result in liability for additional premiums.

Paragraph 5

13.6 This paragraph requires that the split of *reinsurance* premiums (as shown on **Forms 21** and **24**) for each *accounting class* between facultative and non-facultative *reinsurance* be disclosed.

14. **FORMS 40 TO 45: THE LONG TERM BUSINESS REVENUE ACCOUNT**

Form 40

Different types of Form 40

- 14.1 (1) **Form 40** presents a revenue account for *long-term insurance business*. It should be prepared separately for each *long-term insurance business fund* maintained by the *insurer*. If there is more than one such fund for either *ordinary* or industrial *long-term insurance business* a summary **Form 40** for *ordinary* or industrial *long-term insurance business* (as the case may be) should be prepared. See rule 9.14(b).

- (2) The separate **Forms 40** for different funds and for the summary are distinguished by the entry in the heading box 'No. of Fund/Summary'. Paragraph 4(2) of **Appendix 9.3** specifies how this is to be completed.
- (3) For each with-profits fund paragraph 13 of **Appendix 9.4** requires that the *appointed actuary* include in his/her valuation report:
 - (a) a revenue account for each such sub-fund in the format of **Form 40** with a supplementary note stating the amount, if any, of investment income relating to linked assets included in line 12; and
 - (b) a statement of liabilities and margins in the format of Form 14 with a supplementary note stating the amount, if any, of the increase or decrease, as the case may be, in the value of non-linked assets;

where this information is not provided elsewhere.

- (3A) where the amount of the increase or decrease in non-linked assets has yet to be allocated, paragraph 13.(2) of Appendix 9.4 requires enhanced disclosure in Form 14 and the notes to Form 14.
- (4) It has been the practice of some *insurers* to provide:
 - (a) **Forms 40** for each sub-fund; and
 - (b) the description of principles etc. as a supplementary note to those forms;

within the **Appendix 9.3** part of the *return*, which is signed off by the *directors* and is subject to audit. Where this is the case the *insurer* should also prepare a **Form 40** for the whole fund. The **Forms 40** for the sub-funds should be distinguished by the entry in the heading box 'No. of part of fund'. Paragraph 4(2) of **Appendix 9.3** specifies how this is to be completed.

Relationships with other forms and between different Forms 40

- (5) The amounts included in the form for earned premiums, *claims* incurred and expenses payable are to be derived from **Forms 41** and **Form 42** in accordance with instruction 1.
- (6) Where an *insurer* decides to allocate to the *long-term insurance business* the whole or any part of investment income and/or net capital gains arising from assets not attributable to its *long-term insurance business*, both the income and any associated investment management charges, must first be included in the non-technical account (**Form 16**), with the amount to be allocated to the *long-term insurance business* shown as a transfer at line 13 of **Form 16**, line 26 of **Form 40** and in **Form 58**. See instruction 3.

- (7) The amount shown for transfers to the non-technical account (line 26) should agree with the equivalent amount disclosed at line 47 on **Form 58** - see instruction 4. However, if there is a net transfer into the fund, the entry at line 26 will be negative, and by virtue of instruction 3 to **Form 58** there will be a positive entry in line 34, lines 15 and 47 remaining blank.
- (8) The amount of any transfer to and from other funds should be included in the **Form 40** of the transferee and transferor funds respectively at line 15 and line 25 - see instruction 4.

Completion of the form

- (9) The instructions to the form specify the rules for its completion. These rules differ in several respects from those which are used in the preparation of the *Companies Act* accounts. The following table identifies for each line in the form the most closely corresponding items from *long-term insurance business* technical account specified in the *Companies Act* and describes some major differences between the accounting rules for those items and for **Form 40**.

Line in Form 40	Item(s) in the technical Account	Major points of difference in accounting treatment
<u>Line 11</u> - Earned premiums	<u>II.1</u> Earned premiums	In preparing the technical account the company may choose whether or not to include the change in the provision for unearned premiums under this item. In Form 40 only the latter treatment is acceptable, i.e. the change in unearned premiums must be excluded. This is also by far the more commonly used of the two permitted treatments in the technical account.
<u>Line 12</u> – Investment income receivable before deduction of tax	<u>II.2</u> Investment income, (but excluding items <u>II.2</u> .(c) and (d) - see below).	The items II.2(c) and (d) under the heading investment income in the technical account refer to value re-adjustments and realised gains on investments. In Form 40 no amounts for gains or loss on investments should be included in investment income. The treatment in the <i>returns</i> of tax borne on franked investment income should be consistent with guidance issued for the <i>Companies Act</i> accounts by the Accounting Standards Board and the Association of British Insurers.

Line in Form 40	Item(s) in the technical account	Major points of difference in accounting treatment
<p><u>Line 13</u> – Increase (decrease) in the value of <i>non-linked assets</i>, brought into account</p> <p><u>Line 14</u> – increase (decrease) in the value of <i>linked assets</i></p>	<p><u>II.2.(c)</u> Investment income - value readjustments on investments</p> <p><u>II.2(d)</u> Investment income - gains on realisation of investments</p> <p><u>II.3</u> Unrealised gains on investments</p> <p><u>II.9(b)</u> Investment expenses and charges - value readjustments on investments</p> <p><u>II.9(c)</u> Investment expenses and charges – losses on realisation of investments</p> <p><u>II.10</u> Unrealised losses on investments</p>	<p>(1) The technical account includes <u>all</u> investment gains and losses (realised and unrealised). In Form 40 such gains and losses (other than in respect of <i>linked assets</i>) are only included to the extent they are brought into account. Form 40 includes all gains and losses in respect of <i>linked assets</i>.</p> <p>(2) In Form 40 the increase/(decrease) in value shown includes the changes in the valuation differences shown at lines 92 to 95 of Form 13 (for <i>long-term insurance business assets</i>).</p>
<p><u>Line 15</u> – Other Income</p>	<p><u>II.4</u> Other technical income, net of <i>reinsurance</i></p>	
<p><u>Line 21</u> - <i>Claims</i> incurred</p>	<p><u>II.5</u> <i>Claims</i> incurred, net of <i>reinsurance</i></p> <p><u>II.7</u> Bonuses and rebates, net of <i>reinsurance</i> but only to the extent that they are cash bonuses (which do not therefore increase technical reserves).</p>	<p>(1) In the technical account <i>claims</i> incurred includes <i>claims management costs</i>. In Form 40 these are to be included under expenses payable not <i>claims</i> incurred.</p> <p>(2) In the technical account <i>claims</i> incurred includes the change in the provision for <i>claims</i> outstanding. In Form 40 this change (except to the extent it relates that part of the provision not included in <i>mathematical reserves</i>) is not to be included as it is already taken into account in the movement of the fund shown at line 39. The <i>mathematical reserves</i> take into account outstanding <i>claims</i> except where they have already fallen due at the valuation date.</p>

Line in Form 40	Item(s) in the technical account	Major points of difference in Accounting treatment
<u>Line 22</u> – Expenses payable	<i>Claims management costs</i> included in item <u>II.5</u> above. <u>II.8</u> Net operating expenses <u>II.9(a)</u> Investment expenses and charges – investment management expenses, including interest	(1) In the technical account net operating expenses are adjusted to take account of the change in the amount carried forward for <i>deferred acquisition costs</i> . In Form 40 all acquisition expenses incurred during the year should be included at line 22 and no amounts should be carried forward. (2) Any interest payable included in net operating expenses in the technical account should be included in Form 40 at line 23 not line 22.
<u>Line 23</u> - Interest payable before deduction of tax	Interest included in item <u>II.9(a)</u> above. Interest included in item <u>II.8</u> above.	
<u>Line 24</u> – Taxation	<u>II.12</u> Tax attributable to <i>long-term insurance business</i>	
<u>Line 25</u> – Other Expenditure	<u>II.11</u> Other technical charges, net of <i>reinsurance</i>	

<p><u>Line 26</u> – Transfer to (from) non-technical account</p>	<p><u>II.12</u> Allocated investment return transferred to (from) the non-technical account</p> <p><u>II.13</u> Balance on the technical account - <i>long-term insurance business</i></p>	<p>The main reasons for differences between the amounts transferred to the non-technical account and the technical account are typically -</p> <p>(1) the deferral in the technical account of acquisition expenses;</p> <p>(2) the transfer in the technical account of amounts to or from the fund for future appropriations;</p> <p>(3) valuation differences as between <i>mathematical reserves</i> in the <i>return</i> and <i>technical provisions</i> in the technical account; and</p> <p>(4) investment gains not brought into account in Form 40.</p>
--	--	---

Line in Form 40	Item(s) in the technical account	Major points of difference in accounting treatment
<p><u>Line 39</u> – Increase in fund in <i>financial year</i></p>	<p><u>II.7</u> Bonuses and rebates, net of <i>reinsurance</i> but only to the extent that they increase the <i>technical provisions</i></p> <p><u>II.6</u> Change in other <i>technical provisions</i>, net of <i>reinsurance</i>, not shown under other headings</p> <p><u>II.12a</u> Transfers to or from the fund for future appropriations</p>	<p>These items are not directly comparable as different valuation rules apply in the <i>returns</i> and <i>Companies Act</i> accounts.</p>

Supplementary notes

- (10) Eight supplementary notes are specified to **Form 40**:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; [Code 4001]

- (b) particulars of the amounts included at lines 15 and 25 for other income and other expenditure should be stated - see instruction 2 to the form; [Code 4002]
- (c) particulars of the amount of any investment income and/or net capital gains allocation included at line 26 in **Form 40** should be stated - see instruction 3 to the form (and also 14.1(11)); [Code 4003]
- (d) a specification of any transfer of reserves associated with a transfer of contracts from one fund to another should be stated - see instruction 4 to the form; [Code 4004]
- (e) unless already stated in a note to **Form 16**, the bases of conversion adopted in respect of foreign currency for income and expenditure should be stated - see paragraph 5(2) of **Appendix 9.1**; [Code 4005]
- (f) where a *insurer* maintains more than one *long-term insurance business* fund, it should state the principles and methods applied to apportioning the investment income, the increase or decrease in the value of assets brought into account, expenses and taxation between the different fund - see paragraph 4(1) of **Appendix 9.3**; [Code 4006]
- (g) [Deleted]
- (i) where arrangements have been in force during the *financial year* for the provision either by or to the *insurer* of management services, this fact should be stated together with the name of the other party (to whom or from whom such services were provided or received) - see paragraph 5 of **Appendix 9.3**. This statement is only needed where a substantial part of the day-to-day administration of an *insurer* is undertaken by another company or vice versa. Note that where the arrangement is between two *insurers*, the directors will need to consider very carefully the form of their certificate under **Appendix 9.6**, Part I paragraph 4(e). [Code 4008]

Forms 41 to 45

Completion of the forms

- 14.2 (1) **Forms 41 to 45** should be prepared separately for each fund and sub-fund for which a **Form 40** is prepared and also (except for **Form 45**) in summary where a summary **Form 40** is prepared - see rule 9.23. These forms supplement **Forms 40**. **Form 41** provides an analysis of premiums and expenses, **Form 42** of *claims*, **Form 43** a summarised balance sheet for *internal linked funds*, **Form 44** an aggregate revenue account for *internal linked funds* and **Form 45** supplementary information on *internal linked funds*.

- (2) Instruction 2 to **Form 41** provides for the reporting of repeated or recurrent single premium business as regular premium business. The purpose of this is to differentiate business which may be expected to produce an ongoing premium income for the *insurer* (regular premium) from business which is one-off in nature (single premium). It is typical of regular premium business that the office will issue a renewal notice for the expected amount of premium, albeit that the policyholder may have a contractual right to pay a different amount, or nothing at all. Another characteristic might be that premium collection is by a direct debit or other payment order. Contracts set up to receive minimum contributions from the Department of Social Security should be treated as single premiums. This differentiation between single and regular premiums used in **Form 41** should also be used in **Form 46** and **Form 47**, and the total single premiums on **Form 41** should equal that for **Form 47** - see 15.6(2).
- (3) The instructions to the forms provide, amongst other items, for:
- (a) the reporting of industrial assurance *claims* incurred on survival in respect of periodical benefits as surrenders (**Form 42**);
 - (b) the reporting of *derivative contracts* (**Form 43**);
 - (c) the elimination of cross-investment between *internal linked funds* (**Form 44**);
 - (d) the separate disclosure of gross units created and gross units cancelled in *internal linked funds* (**Form 44**) so that turnover can be monitored. Each day's movements may be netted or recorded as two separate entries, one positive and one negative, as is administratively convenient; the total net positive and negative movements will be recorded on lines 11 or 21 as appropriate; and
 - (e) the method of disclosure of the provision for capital gains tax on unrealised and realised capital gains in *internal linked funds* and of the valuation price of units in *internal linked funds* (**Form 45**).
- (4) In addition to the above the following points should be noted:
- (a) the differentiation between UK contracts and overseas contracts (**Forms 41** and **42**) must be in accordance with paragraph 3 to **Appendix 9.3**. The definition does not correspond with the definitions of overseas life assurance business for Inland Revenue purposes;
 - (b) the earned premiums shown in **Form 41** should include that part of the premium which was or will be recoverable from the Inland Revenue;

- (c) the expenses shown in **Form 41** should be those which relate only to the company's *long-term insurance business*. Those relating to the company's other business cannot, by virtue of rule 3.2(1)(a) (subject to the exception in rule 3.2(1)(b), be paid out of the long term funds and must therefore be shown in the *general insurance business* technical account (**Form 20**) or the non-technical account (**Form 16**);
- (d) In dividing management expenses between lines 43, 44 and 45 of **Form 41**:
 - (i) costs of a non-recurring nature, such as those incurred in developing new systems, new premises, or the costs of corporate restructuring, should normally be reported in line 45;
 - (ii) the costs incurred in writing new business (or in obtaining incremental (but not indexed) premiums on existing business), such as underwriting, policy issue, setting up (or amending) records and the maintenance and development of the sales and marketing organisation should be reported at line 43; and
 - (iii) the balancing item will be expenses related to the ongoing costs throughout the year of maintaining the business in force (including any investment management costs) and should be reported in line 44; and
- (e) commission payable to employees of the *insurer* whose job is to sell policies should be included under management expenses (lines 43 and 44 of **Form 41**). On the other hand any commission payable to employees who sell policies on a casual basis should be included under Commission (lines 41 and 42) along with that paid to other *intermediaries* and to cedants;
- (f) all assets held within *internal linked funds* must be included in **Form 43**, even if their value exceeds the amount at the unit liability, cf. paragraph 3.6 of **Guidance Note 4.4**. Note: the *Valuation of Assets Rules* apply in full to these excess assets (see rule 4.1(2));
- (g) The figures shown in column 2 of **Form 45** shall be those appropriate at the end of the *financial year*, net of any indexation allowances. Each percentage shown in column 3 shall be the appropriate figure shown in column 5 of **Form 43** expressed as a percentage of the appropriate figure in column 2 of **Form 45**; and
- (h) The figures shown in column 4 of **Form 45** shall be the total deductions made from each fund for the *financial year* in respect of tax on realised capital gains (as included in line 24 of **Form 44**) expressed as a percentage of the taxable net realised capital gains arising in the period.

Supplementary notes

- (5) Three supplementary notes to **Form 43** are specified:
- (a) the basis on which assets have been valued should be stated - see instruction 1; [Code 4301]
 - (b) the aggregate value of rights and liabilities, both gross and net of *variation margin*, under *derivative contracts* should be stated - see instruction 2; and [Code 4302]
 - (c) certain specified details on the netting of the liability to repay *variation margin on derivative contracts* (and contracts having the effect of *derivative contracts*) should be stated - see instruction 3. [Code 4303]
- (6) Two supplementary notes to **Form 44** are specified:
- (a) if any of the brought forward amounts differs from the corresponding carried forward amounts in the previous *return* the reason should be stated - see paragraph 7 of **Appendix 9.1**; and [Code 4401]
 - (b) particulars of items reported as other income or other expenditure on **Form 44** should be stated - see instruction 2. [Code 4402]

15. **FORMS 46 TO 61: THE ABSTRACT OF THE ACTUARIAL VALUATION**

Overview

- 15.1 (1) **Appendix 9.4** prescribes the format of the abstract of the report of the *appointed actuary* on his investigation into the financial condition of the *long-term insurance business*, required under rule 9.4.
- (2) The preamble to **Appendix 9.4** provides for certain provisions to be applied to the report from **Appendix 9.1** and **Appendix 9.3**. These include the requirement that supplementary notes to forms shall be separate statements and not footnotes, the method for completing the identification boxes on the forms, the treatment of currencies other than sterling, negative numbers within round brackets, dealing with differences between brought forward numbers and last year's *return*, and the definition of UK and overseas contracts. More information on these can be found in the notes relating to the relevant appendix. The *appointed actuary* should note that throughout the appendix and in these notes, references to 'surrender' should be taken to include all similar expressions, including transfer as applied to pension contracts. The preamble also requires that the answers provided by the *appointed actuary* be numbered to accord with the numbers of the

corresponding paragraphs. This instructions is also intended to apply to the numbering of the sub-paragraphs.

- (3) Paragraph 3 of **Appendix 9.4** refers to the requirement that the valuation is conducted so that the liabilities conform to rule 5.6. Sufficient information should be provided within the report to enable the *FSA* to form a view, and in particular that the reserves meet each of the minimum standards required under rules 5.7 to 5.17 of those rules. It is not normally necessary to supply detailed supporting information, except where otherwise stated in these notes or in the rules.
- (4) The preamble to **Appendix 9.4** also defines the report period in terms of the period since the last investigation under rule 9.4. Paragraph 2 also requires the date of this last investigation to be given. This relates to any investigation under the section, which includes any interim valuation for publication or distribution of profits which has been fully dealt with under the requirements, but does not apply to any informal valuation, nor normally to one produced pursuant to an actuarial investigation required by the *FSA* under its own initiative powers.
- (5) Certain paragraphs of **Appendix 9.4** relate exclusively to *non-linked contracts* (e.g. paragraph 4), some are related exclusively to *linked contracts* (e.g. paragraph 5), while others relate to both types of contract. The definition of a *linked contract* includes any contract under which linked benefits as defined rule 2.3(4) are provided. This includes a number of types of contract not traditionally regarded as linked (e.g. RPI-linked annuities) - see **Guidance Note 4.4** for further guidance. Except where there are specific requirements to do otherwise, a contract with both linked and non linked benefits is to be treated as a *linked contract*.

Paragraph 4 - non-linked contracts

- 15.2 (1) Paragraph 4 of **Appendix 9.4** requires specific information to be given in respect of two types of *non linked contract. Accumulating with profits policies* which are to be reported under sub-paragraph (1)(a) of **Appendix 9.4**. Broadly speaking these are policies of the type sometimes known as unitised with-profits, but the definition is slightly broader. First, it is not necessary that the benefits are in any way ‘unitised’ for the definition to apply. In particular, any with profits deposit administration contract would normally fall within this definition. Further, most recurrent single premium with profits contracts are also likely to fall within this definition. It is not considered that a traditional single premium with profits policy falls within this definition where the guaranteed benefit is fully expressed in terms of the amount payable at maturity if that sum is not explicitly related to the premiums, and more importantly to any additional premiums which may be allowed under the contract. Contracts where there is doubt should be reported under this heading.

- (2) Sub-paragraph 4(1)(a)(i) of **Appendix 9.4** requires the description of all deductions from the current benefit used in determining values under the policy. This will include all charges fixed under the policy, as well as any discretionary charges permitted. In particular, where there is a provision for a 'market value adjustment' or a similar deduction, this should be disclosed in terms of when it might apply. This does not refer to when it is in practice being applied.
- (3) Sub-paragraph 4(1)(a)(ii) of **Appendix 9.4** requires the description of how any discretionary adjustments such as are covered in (i) have been applied if the determination of the *mathematical reserves* (excluding any reserves under rule 5.17 including a resilience reserve) has taken credit for these adjustments. Where there are powers to vary an adjustment which is laid down in the policy (as may be the case with initial or capital units), but the *insurer* has not exercised its discretion to vary these adjustments from the levels prescribed in the policy, this need not be considered as triggering this sub-paragraph. Where any discretion has been exercised in respect of a charge taken credit for in the valuation, or where the charge is provided for but no level is specified in the policy, then it is necessary to describe all such discretionary charges levied in the report period.
- (4) Paragraph 4 of **Appendix 9.4** also requires specific information in respect of a further class under sub-paragraph (1)(b) of **Appendix 9.4** which is intended to include policies of the type known as deposit administration, unless they are with profits policies, which should be included under (a). Sub-paragraph (1)(c) of **Appendix 9.4** covers any other types of non linked policy not covered under (a) or (b) which require amplification of the entry in **Form 51**. This will include any contracts which have any supplementary guarantees or options which the *appointed actuary* considers to be significant.
- (5) All sections of paragraph 4 of **Appendix 9.4** require information to be supplied on any material options. 'Options' should be interpreted widely, though it is for the *appointed actuary* to decide what is material. An option to surrender on guaranteed terms, or to convert on guaranteed terms to another form of benefit, or to increase benefits without evidence of health, should generally be considered material. Guarantees on interest rates include both fixed guarantees and guarantees which may be related to some external reference rate. Guaranteed surrender values may similarly be guaranteed by amount or by reference to some formula.
- (6) Sub-paragraph (2) of **Appendix 9.4** provides an exemption from the disclosure requirements of sub-paragraph (1) but only where both of conditions (a) and (b) are satisfied.

Paragraph 5 - linked contracts

- 15.3 (1) Paragraph 5 of **Appendix 9.4** provides for information to be supplied on *linked contracts*. Similar considerations to those described in 15.2, and in particular 15.2(5), in relation to paragraph 8 of **Appendix 9.4** apply also to

this paragraph. Paragraph 5.2 of **Appendix 9.4** requires any with profits option to be reported as under paragraph 4(1)(a) of **Appendix 9.4**.

- (2) Paragraph 5(4) of **Appendix 9.4** requires the disclosure of the methods used in creating and cancelling units and in their allocation to and de-allocation from policies. This requirement should include information on the basis of valuation of assets and how it is selected (for example, offer basis for net creations of units and bid basis for net cancellations), including the timing of the asset valuation used in respect of such operations in relation to the time at which both the operation is decided upon and effected. When at any one time different pricing bases may apply to different policies, then details of the circumstances which give rise to the difference should be provided. Where assets are units in *collective investment schemes* or similar assets, particular reference should be made to precisely what price is used, and the relationship between the last opportunity to deal at that price and the time of the valuation. In summary, the *FSA* should be provided with sufficient information to demonstrate that incoming, outgoing and continuing *policyholders* are treated equitably. It will be acceptable for reference to be made to compliance with published guidance to the extent that such guidance covers the above issues.
- (3) The information under paragraph 5(5) of **Appendix 9.4** should include the treatment of any tax on notional realisations where provision for these is made under the Taxes Acts. In particular, reference should be made to whether the liability for such tax, when it falls due, is retained within an internal fund, or has been transferred out of that fund in exchange for a tax deduction. The rate of such tax deduction should be stated.

Paragraphs 6 to 12 - bases, principles, methods etc.

- 15.4 (1) When providing the information on the general principles and methods adopted in the valuation under paragraph 6 of **Appendix 9.4**, the *appointed actuary* should provide sufficient explanation to enable the *FSA* to take a view, in relation to the issues specifically referred to in paragraph 6(1), on the adequacy of the reserving basis in relation to rules 5.6 to 5.17. Where the *appointed actuary* has not undertaken any specific tests implicit in the points raised in paragraph 6, as he considers the margins in his basis are already sufficiently large to meet each of the minimum requirements of rules 5.7 to 5.17 and of rule 5.6, he should indicate this either directly or indirectly; he should, however, justify his basis if it is not self-evident that there are sufficient margins. The *appointed actuary* should include broad details of the type of investigations he has conducted to meet the requirements of professional guidance in respect of sub-paragraph (1)(b) of **Appendix 9.4**.
- (2) Rule 5.17 requires the *appointed actuary* to take into account the nature and term of the assets and the value at which these have been brought into account when determining the appropriate provision against the effects of possible future changes in the value of the assets on their adequacy to meet the liabilities. If the assets in **Appendix 9.4** are brought in at book values

below the values in accordance with **Form 13**, and in determining the provision under this rule the *appointed actuary* has had regard to this fact, paragraph 6(2) of **Appendix 9.4** requires a statement to this effect. This applies also when the basis of the provision made for any prospective liability for tax on unrealised capital gains is determined in the context of assets taken at their book value rather than their **Form 13** value.

- (3) Paragraph 7(3) of **Appendix 9.4** requires reference to how the tables of mortality and morbidity assumed have regard to the State of commitment. This is a reflection of the requirements of the *Third Life Directive*, and if the *appointed actuary* has determined that the degree of variation of mortality or morbidity between states does not give rise to a material effect in the valuation, it is sufficient for this to be stated.
- (4) Paragraph 7(4) of **Appendix 9.4** requires details of any allowance made for future reductions in the rates of mortality in tables used in valuing annuities. Many such tables have a built-in allowance, and it is not necessary for the *appointed actuary* to give explicit details of this allowance if the table is in common usage in the United Kingdom. To the extent that the *appointed actuary* has determined to make additional allowance to that intrinsic to such a table, he should give details. This includes the making of an adjustment to the table which is intended to allow for future reductions, but does not include any adjustment made in respect of reductions already evidenced at the *relevant date*.
- (5) Paragraph 7(5) of **Appendix 9.4** will include any allowance made for the effects of the Human Immuno-Deficiency Viruses, but is not necessarily limited to those viruses. It does not require the *appointed actuary* to make an allowance for any particular change, but to disclose any allowance he may have made.
- (6) Paragraphs 7(6), (7) and (8) of **Appendix 9.4** cover the requirements of rule 5.17. Paragraph 7(6) requires only a description of the various scenarios tested and identification of the most onerous of those scenarios. It does not require the results of such scenarios to be stated. It should be noted that currency variations are included in this requirement.
- (7) It is not always straight-forward to divide the reserve under rule 5.17(a) from that under rule 5.17(b). Reserves under rule 5.17(b) will often exceed those under rule 5.17(a), particularly where there is a significant volume of with-profits business, and in this case, if the conditions giving rise to the envisaged change in the value of assets embrace those tested under rule 5.17(a), it is sufficient to state this in paragraph 7(7) of **Appendix 9.4**. However, it is not necessarily the case that the most onerous conditions under rule 5.17(b) allow for all the effects under rule 5.17(a), and the response to paragraph 7(7) of **Appendix 9.4** must make clear to what extent the reserve under rule 5.17(b) is taken into account.

- (8) The information required under paragraph 7(8) of **Appendix 9.4** is only in respect of that scenario tested which gives rise to the greatest requirement, but it applies even if the reserve required is zero. If no scenario gives rise to an additional reserve, the most onerous scenario is that which allows the smallest reduction in reserves, whilst the basis remains consistent with the rules. Sub-paragraph (8)(a) of **Appendix 9.4** requires any changes in assumptions, excepting only the interest rate, to be described. This includes, for example, the introduction of a zillmer adjustment within that permitted in the rules, the application of any adjustment to accumulating with profits policies reserves to reflect discretionary charges on surrender, the reduction of bonuses allowed for in the valuation, or any other change in assumptions whether explicit or implicit. Sub-paragraph (8)(b) requires a description of the method used in determining the requirement. This should only to be sufficiently detailed to enable the *FSA* to understand the techniques employed, any changes in the hypothecation of assets to liabilities, assumed changes in the exercise of discretion, and other changes outside the valuation basis or otherwise.
- (9) The additional information to be provided in paragraph 8(d) of **Appendix 9.4** (where the contracts do not fall within the circumstances of the proviso) must be sufficient to constitute the required demonstration. The information could take several different forms. For example the requirement would usually be met if the results of a net premium valuation for each of the relevant main categories of contract in the format of **Form 51** or **52** were given, specifying the valuation rates of interest and mortality used, the zillmer adjustment and any other relevant information. Where a full net premium valuation has not been made, the requirement could be met by a comparison of specimen reserves for each of the main categories of contracts for various ages and durations on the basis used by the *appointed actuary* in his report and on an appropriate net premium basis (specifying particulars of the basis as above) together with information about the distribution of the business in the form of appropriate weightings. In principle a method of demonstration which involved sampling could also be acceptable.
- (10) The information to be supplied in paragraph 9 of **Appendix 9.4** should normally include the expenses of administration per policy for each policy type, the rate of future inflation, and the rate of unit price growth (both gross and net of any relevant taxation, but before management charges) assumed in the valuation/test and the extent to which account has been taken of any increases in management charges, including those increasing with reference to a published index, which are allowed under the terms of the policy. Other parameters will normally include the mortality and morbidity rates and the rate of interest earned on sterling reserves assumed in the valuation/test.
- (11) Paragraph 10 of **Appendix 9.4** is intended to identify the contribution towards future management expenses derived from the assumptions made by the *appointed actuary* in the valuation basis for meeting future expenses. It is a request for statements of the actual results of applying the valuation basis. Thus sub-paragraph (1) requires a description of the rates of inflation

assumed and how inflation is allowed for in the valuation. Sub-paragraph (2) calls for the aggregate amount of expense contributions over the first year, with a general description of the sources, whether they be differences between net premiums and office premiums, or explicit allowances in the basis. Where with profits business valued on a net premium basis is concerned, it is not necessary to determine a precise split between the amount set aside for expenses and that for future bonuses. It is sufficient for the *appointed actuary* to describe the amount he considers appropriate to set aside for expenses on the basis of information readily available at the time. There should be a correlation between the amount disclosed by the *appointed actuary* and the figure included in line 44 of **Form 41**.

- (12) Sub-paragraph 10(3), of **Appendix 9.4** requires a description of the method and details of the basis used to calculate whether there is a need for a reserve in respect of continuing to write new business. This will require general statements as to the levels of business assumed for this purpose (perhaps in relation to that written the previous year), and broad assumptions as to costs (such as stating that he has assumed the continuation of the previous year's costs plus inflation, or by stating that he has used company budgets), product terms (such as stating the *appointed actuary* has assumed the continuation of the products on offer at the *relevant date*, or that he has reflected changes made after the *relevant date* but before the date of the certificate) etc. It does not require identification of explicit items in monetary terms, nor details of the precise assumptions. This is similarly true of sub-paragraph 10(4), where for example the *appointed actuary* might disclose that redundancy costs have been taken into account, if such be the case, or the costs of terminating management agreements, but not the amount of such costs.
- (13) Paragraph 11 of **Appendix 9.4** is a requirement to identify the extent of currency matching. The requirement is driven from the liabilities, and requires the liabilities included within the actuarial certificate (which includes liabilities in respect of deposits received from *reinsurers*), but excluding property-linked liabilities, to be analysed by currency. The assets reported as matching these liabilities, which should correspond with those reported for the same liabilities in other matching schedules within the *returns*, are similarly to be analysed by currency. The de minimis exemption for 2% of the liabilities is intended to avoid unnecessary detail for small exposures, but the degree of mismatching still needs to be given. This mismatching should be taken as the sum of all liabilities reported in the other currencies heading matched by assets in other currencies divided by the total liabilities under that heading. This figure should be given as a percentage and to the nearest whole number.
- (14) The information on *reinsurance* required under paragraph 12 of **Appendix 9.4** is largely self explanatory. It is acceptable for the *appointed actuary* to aggregate arrangements with a single reinsurer that are similar in nature. The requirements under paragraph 12(3) relate to both facultative and treaty *reinsurance*. The definition of a financing arrangement is intended to be wide and may include arrangements with non-insurance companies. It is

likely that many original terms *reinsurances* with advanced commissions will constitute financing arrangements. Financing arrangements cease to be such once all elements of the financing have been repaid, earned or otherwise reduced to zero. The *appointed actuary* should exercise reasonable discretion in reporting under this heading, particularly in relation to *facultative business*. It is acceptable where the financing arises from facultative *reinsurances* under a common overall agreement as to the general terms, for a grouped figure to be provided for the agreement, rather than for each contract.

Paragraphs 13 to 16 - profit distribution

- 15.5 (1) Where, in accordance with paragraph 13 of **Appendix 9.4**, a revenue account for a particular part of a *long-term insurance business* fund is included in the abstract of the *appointed actuary's* report, analyses of premiums, expenses and claims in the format of **Forms 41** and **42** are not required. The *appointed actuary* should provide information on the principles and methods applied in apportioning various items in any such revenue account included in **Appendix 9.4**, and in any revenue account of a with-profit sub-fund which is given in **Appendix 9.3** where the principles and methods of apportionment are not disclosed in that Appendix.
- (2) Paragraph 14 of **Appendix 9.4** is intended to supply sufficient information to enable the *FSA* to understand the criteria used in setting bonus rates. Sub-paragraph 14(1) is a widened version of the previous requirement. It is important the information which is derived from each of the sources is identified, and if the various sources differ in any respect, the information must be identified by source. In this context 'advertisement' has a wide meaning, and should include any sales and marketing literature. The references to policies issued by the *insurer*, and to advertisements, should be taken to mean any policy still in force, or any advertisement issued in a period from which with profits policies are still in force. It is not necessary to refer to policies which no longer exist. Sub-paragraphs 14(2) and (3) are intended to describe in broad terms how the bonus scales are arrived at. Although an answer that the distributions are based upon asset shares might be acceptable, it is necessary to indicate the approach to smoothing which it is intended to apply, the particular application to deaths and maturities, and the extent to which any 'charges' on asset shares are applied to maintain equity between classes or generations. The descriptions of the method should include any items excluded from or charged to any asset shares if that is the basic method.

Paragraphs 17 to 19 - Forms 46 to 49

- 15.6 (1) In **Forms 46, 46A, 47** and **47A**, the term 'annual premiums' refers to the total amount of premium payable, under the terms of the contract, each year. In **Forms 46** and **47** any contract which consists of a combination of different types of insurance (as defined by instruction 5 to **Form 47**) is to be treated as a number of separate contracts each dealing with one of the

different types of business so combined. The amounts by which the total number of contracts shown on each of the forms exceed the total number of contracts to which the forms relate should be stated by way of a supplementary note. In determining whether or not a contract consists of a combination of different types of business, the *appointed actuary* should exercise his discretion in interpreting differences in the same way as for **Forms 51 to 54**. Where the information given in **Forms 51 to 54**, together with any additional information required by Instruction 10 regarding the number of contracts does not enable a reconciliation to be made with the information supplied in **Form 46**, an explanation should be given. The instruction in respect of *hybrid linked contracts* should be interpreted in accordance with the definition in rule 10.1. In **Form 47**, any contract which falls within more than one of the categories described in instruction 6 shall be shown only once, in the most appropriate category.

- (2) Attention is drawn to the instructions to **Forms 46 and 47** in respect of regular premium and recurrent single premium contracts, and in respect of increases to existing contracts. It is essential that consistent treatment of individual contracts is adopted between **Forms 46 and 47**, and that all new business is reported under some heading within **Form 47**. Contracts set up to receive minimum contributions from the Department of Social Security should be treated as single premium business. Additional single premiums paid in respect of existing individual contracts should be shown separately from new business in **Form 47**. In **Form 47**, a single premium contract where there is a likelihood that there will be future premiums, but which do not meet the definition of regular premium contracts because their level of premiums is not defined, should be considered as not having an expectation of continuing premiums at regular intervals, and therefore be included within the single premium categories. (See also 14.2(2)).
- (3) In **Forms 48 and 49** the element of accrued interest or income in respect of any *asset* is required to be allocated to that *asset* class. Thus any accrued income on a government stock shall be reported under *approved securities*, and not under other assets. The yields required should be calculated with the value of the stock including this accrued interest or income element, but with full credit for the whole interest payment being taken in the expected receipts. Separate forms should be produced if and only if funds have assets separately appropriated. The treatment of tax borne on franked investment income should be consistent with guidance issued by the Accounting Standards Board and the Association of British Insurers. A supplementary note to the forms is needed where for any *asset* the payment of interest is in arrears. It should state the treatment of expected income from any such *asset* and the amount of the interest involved. See paragraph 6 to **Form 48**.
- (4) The required statements in respect of derivatives under paragraph 19 of **Appendix 9.4** the *appointed actuary* should follow the same principles as are described in 6 in respect of *asset* values. It is not generally necessary to quantify the changes in yields on **Form 48** which would arise. A broad description would normally suffice, unless the options concerned have the

effect of locking in particular yields not immediately identifiable from the description. Where, and to the extent that, the information provided by the *insurer* under rule 9.29 is sufficiently complete to answer this requirement, it is sufficient for the *appointed actuary* to refer to that information in the *return*.

Paragraph 20 - Forms 51 to 56

- 15.7
- (1) The aggregate of the amounts standing to the credit of *policy holders'* accounts should be shown in column 5 of **Form 51** for non-linked, non profit deposit administration schemes, and should be distinguished from any other measures of benefit shown in that column for such contracts.
 - (2) In **Forms 51** to **54**, wherever different rates of interest are used, the results should be shown separately.
 - (3) In **Forms 53** and **54**, if discounting applies to any type of contract, then columns 11 and 12 must be completed for all contracts. Column 12 may be left blank only if there is no discounting at all for that valuation summary. In **Form 53**, details of units which are discounted at different rates of interest (e.g. capital and accumulation units) should be shown separately.
 - (4) Where a *linked contract* includes *non-linked benefits* except where there are *accumulating with profits* benefits, these should be shown separately on whichever of **Forms 53** or **54** includes the *linked benefits*. Where *accumulating with profits* benefits are included, the treatment should follow instruction 12, and other *non linked benefits* may be included with either the *linked or accumulating with profits* benefits, provided the treatment is disclosed in the note required under instruction 12.
 - (5) Within **Forms 51** to **54** it is required to report separately under instruction 10 combinations of different types of insurance. The *Appointed actuary* is required to determine when such different types of insurance are present in one contract. If he considers that such separate reporting would be misleading, or would not materially alter the amounts reported under each type of insurance, due to the trivial nature of one or more types of insurance in a contract, this would be an indication that there may not, in practice, be more than one type of insurance present. This is not likely to be the case, however, where supplementary benefits of a different class of business under Annex 10.1 to Chapter 10 of the rules are concerned. For this purpose, it should be noted that non linked benefits under a *linked contract* still fall within class III.
 - (6) Risk premium *reinsurance* may be aggregated, separately for, and shown as a separate class in **Forms 51**, **52**, **53** and **54** respectively. Where risk premium *reinsurance* applies to a contract which is split between forms, the risk premium *reinsurance* should be reported on the same form as the benefits to which it applies. Where it is not possible to do this, the reason shall be given in a supplementary note, and the treatment shall be described.

- (7) Note the proviso to instruction 6 to **Forms 51-54**, which allows duplicate data on *reassurance ceded* to be aggregated. A similar easing of reporting requirements is provided by instruction 7 to **Form 55** in respect of unit liabilities wholly *reinsured*. However in this case paragraph 20(3) requires a statement that rule 7.2 has been complied with.
- (8) Valuation summaries for sub-funds for which surpluses are required to be determined under rule 9.4, and valuation summaries for non-linked, *accumulating with profits*, property linked and index linked business should be treated as separate for the purpose of Instruction 15 for the completion of **Forms 51 to 54**.
- (9) The relationships between **Forms 55 and 56** and the related items in **Appendices 9.1 and 9.3** are important. Considering first **Form 55** (property linked), **Form 13** line 59 which shows assets matching linked liabilities does not necessarily include the assets backing the surplus units in **Form 55**. See 5.4(15). Where the reconciliation between the amounts shown in **Form 55** and line 59 of **Form 13** is not readily apparent it should be described in a supplementary note to **Form 55**. Also, **Form 55** should, where appropriate, correspond with the assets in **Form 43**, which includes all assets in an internal fund, and reconciliation with that form should be readily apparent.
- (10) Similarly for **Form 56** (index-linked) the assets shown do not necessarily correspond with those shown in line 58 of **Form 13**. See 5.4(15). Where the reconciliation between the amounts shown in **Form 56** and line 58 of **Form 13** is not readily apparent it should be described in a supplementary note. Note, also, that **Form 56** represents holdings of assets, not liabilities, and that the long-term liability represented by the *mathematical reserve* on **Form 54** should not be entered on the form. **Form 56** recognises that index-linked liabilities will often be matched by derivative or quasi-derivative instruments, the nature of which may contain elements both of asset and of liability and this is reflected in the heading to the form and in column 2.
- (11) For both **Forms 55 and 56** the *appointed actuary* should include a note of any circumstances which make the natural relationships break down (e.g. particular tax treatments).
- (12) Where unit liabilities are reassured and deposited back with the ceding *insurer*, the amounts deposited back are to be treated in accordance with paragraph 20(2) of **Appendix 9.4** in all respects as though they are unit liabilities.

Paragraph 21 - Form 57

- 15.8 (1) Paragraph 21 of **Appendix 9.4** refers to **Form 57** and requires the forms submitted to cover all long term liabilities except unit liabilities in respect of property and *index-linked benefits*, CGT reserves and unit liabilities deposited back for *linked contracts*. The intention of the form is to identify

suitable blocks of assets which can notionally be allocated to cover each block of liabilities. Note that there is no provision that the form must include all of the non-linked assets in **Form 13**. However, the assets covering any resilience or mis-matching reserve (rule 6.17) should be included, generally on the balance form provided under instruction 6. For each form completed, the total assets for the valuation entered at line 29, column 1 should be equal to the liability entered at line 33, column 1.

- (2) An analysis of the same assets and liabilities in (1) is also required under the most onerous scenario identified by the *appointed actuary* in sub-paragraph 7(6) of **Appendix 9.4**. Column 3 re-values the assets included in column 1 on the assumptions of the resilience scenario; column 4 shows the value of any assets notionally re-allocated to the block of liabilities in order that they are still covered under the resilience scenario; and columns 5 and 6 show the new re-allocation in total. For each form completed, the total assets for the valuation entered at line 29, column 5 should be equal to or greater than the liability entered at line 33, column 5. In most circumstances, one would expect the assets allocated to the resilience reserve and included on the balance form under the valuation to be re-allocated so that this liability and its matching assets disappear from the balance form under the resilience scenario.
- (3) The instructions to **Form 57** require separate forms to be prepared among other reasons for each rate of interest used in the valuation. However, in respect of Instruction 5, where a contract or group of contracts is valued at a lower rate of interest to reflect an implicit margin for expenses described in the abstract, or to reflect an implicit provision for future bonuses, then they may be amalgamated with contracts valued at the higher rate without such implicit margins, and reported as if valued at the higher rate. Where this has been done, a supplementary note should record this. Instruction 5 also provides for contracts valued at a lower rate of interest to be grouped together with those at a higher rate, provided that the rationale for doing so is explained in a note. Note, however, that it is not acceptable to combine the separate forms required by instructions 2 and 3. Where more than one form is provided for a particular rate of interest, a supplementary note should identify the contracts included in each form. The totals under the resilience scenario recorded in column 5 shall be those under the scenario which is most onerous and is the subject of paragraph 7(8) (see 15.4(6)).
- (4) In relation to the risk adjustments disclosed in answering paragraph 21 of **Appendix 9.4**, it is not necessary to disclose these for individual assets, nor to provide any individual justifications for the adjustment. The *appointed actuary* should supply such justification to the *FSA* if it is not clear the basis upon which the adjustment was determined.

Paragraph 22 - Form 58

- 15.9 (1) When an *insurer* records a transfer to the non-technical account or to another fund or part of the fund in a revenue account (**Form 40**) for a particular

period, the amount of which has been derived from a valuation completed at the end of that period, that transfer should be shown in 58.13 or 58.14 as appropriate so that the true surplus appears in 58.29.

- (2) Where an *insurer* decides to allocate to the *long-term insurance business* the whole or any part of the investment income and/or net capital gains arising from assets not attributable to its *long-term insurance business*, the allocation should be included in **Form 58** as a transfer from the non-technical account (see 14.1(6)). This transfer should be included in either lines 13 and 15, or 32 and 34, depending on whether there is an overall net transfer out of or into the fund (or part of the fund) respectively (see Instruction 3 for the completion of **Form 58**).
- (3) Where, under rule 9.4(2)(b) a surplus is determined for a part of a fund where the rights of any policyholders to participate in profits relates to that sub-fund, paragraph 22 of **Appendix 9.4** requires a company to provide a **Form 58** both in respect of the sub-fund and the fund of which it is a part.
- (4) In general, line 61 of **Form 58** corresponds to the proportion which has to satisfy the criteria laid down in rule 3.3 but this will not always be so. For example, where the with-profits *policyholders* are entitled to, say, 90% of the profits from the with-profit business but are also eligible to share in the profits arising on the non-profit business on a discretionary basis, line 61 would be relevant for the purpose of rule 3.3 (which relates to 'eligibility') only in the **Form 58** for the long term fund as a whole and not in the **Form 58** for the sub-fund.
- (5) The surplus shown in **Form 58**, in keeping with the definition, represents the excess of the amount of the fund over the liabilities, but the wording in lines 29 and 49 is intended to make it clear that the surplus is not to be regarded as synonymous with disposable profits. The solvency margin requirements implementing the *First Life Directive* make it imperative for a clear distinction to be drawn between the liabilities and the margins available to count towards an *insurer's* solvency margin. The surplus should not include any part of the *mathematical reserves* which the *appointed actuary* considers are required to constitute the proper provision envisaged by rule 5.6 (these should be included in **Forms 51 to 54** as appropriate), but it may include contingency and other reserves held which count towards the solvency margin.

Paragraph 23 - Forms 60 to 61

- 15.10 (1) **Forms 60 and 61** set out the calculation of the *required minimum margin* (i.e. the greater of the *required margin of solvency* and the *minimum guarantee fund*) for *long-term insurance business*. The legislation provides for a solvency margin in respect of an *insurer's long-term insurance business* as a whole and where more than one *long-term insurance business* fund is maintained the information in **Forms 60 and 61** will relate to all funds combined, including industrial business where this is transacted. Provision is

made for the *mathematical reserves* and the calculation of the solvency margin to be shown separately for the main classes of *long-term insurance business* and, for the purposes of reconciliation, *mathematical reserves* attracting a nil rate of solvency margin are to be included. *Class III* includes contracts where the benefits are partially linked to investment funds or indices and any reserves for non-linked benefits under such contracts, including those relating to *accumulating with profits* benefits, should be included under *Class III* business in the appropriate column in **Form 60**. The presence of non-linked benefits, including *accumulating with-profits* benefits, does not generally alter the appropriate column for linked benefits.

- (2) In **Form 60**, line 51 should equal the figure in line 59 of **Form 61**, together with any class V margin included in the note under instruction 6.
- (3) Where cash bonuses have been allocated to *policyholders* and are due to be paid, they are in the nature a current liability. As such they should not be included in the amount of *mathematical reserves* included in **Form 60**. No factor need to be applied to cash bonuses in calculating the *required margin of solvency*.

16. THE RULE 9.36 STATEMENT: INFORMATION ON THE APPOINTED ACTUARY

- 16.1 (1) Rule 9.36 calls for a statement of the information specified in rule 9.36(1)(a) to (d). The *insurer* is required to make a further statement that it has asked the *appointed actuary* to provide it with the particulars set out in the subparagraphs and to identify in the statement the information which has been so provided. The *insurer* must supplement these particulars if there is further information of which it is aware additional to that provided by the *appointed actuary*.
- (2) Rule 9.36 (1)(a) and (b) refer to ‘particulars’ but this word is not defined in the rule. In the case of investments, the particulars should include at least a general description of the investments, the name of the holder of the investment, the nominal or principal amount outstanding and, where applicable, the rate of interest and terms of repayment. In the case of a life policy or policies, it will usually be sufficient to show total annual premiums. In the case of transactions of a minor character falling under rule 9.36(1)(b), a general description should be given and full particulars are not required.
- (3) As a result of rule 9.36(3)(a) the particulars which have to be given apply not only to the interests of or amounts paid to the actuary but also to other person specified in that rule. It is worth noting, however, that rule 9.36(4) provides for the reporting *insurer* and other *insurers* within the same group to be treated as one for the purpose of rule 9.36(3)(a). The effect of the words in parenthesis in rule 9.36(3)(a)(iii) and (iv), taken with rule 9.36(4), is that payments made to the reporting *insurer* and to companies related to it will be excluded from the disclosure requirement.

- (4) Rule 9.36(3)(b) and (c) set out the circumstances in which a person shall be deemed to have an interest or benefit for the purpose of the rule. Rule 9.36(5) describes the circumstances in which a person shall be taken to control a *body corporate* for the purpose of rule 9.36(3).
- (5) The information required by rule 9.36 should be given in respect of each person who was the *appointed actuary* at any time during the *financial year*. Also it is good practice to give the information in respect of the person who prepared the **Appendix 9.4** report for the *financial year*, even if he or she was only appointed as actuary after the year end. It is also good practice to name each *appointed actuary* especially if more than one is referred to in the rule 9.36 disclosure.

17. **CERTIFICATES BY DIRECTORS AND ACTUARY AND REPORT OF AUDITORS**

Certificate by the directors etc.

- 17.1 (1) Part I of **Appendix 9.6** specifies the statements to be included in the *directors'* certificate. These vary according to the type of *insurer* and the types of business which it writes.
- (2) Where in the opinion of those signing the certificate, the circumstances are such that any of the statements required by paragraphs 1 to 6 of **Appendix 9.6** cannot truthfully be made, the relevant statements shall be omitted, (see paragraph 7(1) of **Appendix 9.6**). Where any statements have been omitted, this fact shall be stated in a note, (see paragraph 7(2) of **Appendix 9.6**) and reasons given.
- (3) For *insurers* which fall within the circumstances of the first half of paragraph 4(e) of Part I of **Appendix 9.6**, the *directors* will need to consider carefully whether the *returns* are distorted by any management services agreements - for example, where a parent *insurer* subsidises its *subsidiary* in its infancy.
- (4) Paragraph 5 of Part 1 of **Appendix 9.6** covers *directors'* certificates in respect of two types of published guidance - systems of control and preparation of *returns* guidance. The *FSA* will circulate from time to time a list of the published guidance which it considers relevant for this purpose.
- (5) In order to certify compliance with systems of control guidance, it is necessary for the *directors* to be satisfied that the control system was in place at the end of the *financial year* in question and that it was reasonable to believe that the systems continued to be in place after that date and will continue to be in place for the foreseeable future. In this instance the beliefs which the *directors* hold at the time of signature of the *returns* are the relevant ones. For example, if the system was believed to be in place at the end of the *financial year* in question, had clearly - but unexpectedly - failed shortly afterwards and was once again believed to be in place at the time of signature of the *returns*, the certificate could not properly be given.

- (6) As to the standard of compliance required, the *FSA* recognises that absolute assurance is most unlikely to be achieved. By way of illustration, an isolated human error would not of itself be considered a failure of the system provided that the system is capable of recognising and rectifying the error swiftly. Frequent or repeated errors would however cast doubts on the integrity of the system.
- (7) A list of the guidance complied with is sufficient. Where only part of a published guidance note is complied with, it is acceptable to claim compliance with that part. Where *directors* do not know or cannot satisfy themselves whether guidance has been complied with, such guidance should be omitted from the list. It is not necessary to state which guidance has not been complied with except in rare cases when no published guidance has been complied with (in which case the negative disclosure referred to in (2) comes into play).

The actuary's certificate

- 17.2
- (1) Part II of **Appendix 9.6** sets out the statements to be included in the *appointed actuary's* certificate.
 - (2) The rule in SUP 4.3.9 lays down that an *actuary* must be a Fellow of the Institute of Actuaries or the Faculty of Actuaries and have the required skill and experience to perform his functions under the regulatory system.
 - (3) Where an overseas *insurer* wishes to appoint an *actuary* with an overseas actuarial qualification, the *FSA* will consider the issue of a direction under section 148 of the *Act* permitting this in appropriate cases.
 - (4) If an *insurer* appoints a firm of consulting actuaries, each of the partners in the firm must possess the prescribed qualifications. Where an individual member of a firm is appointed only that individual need be qualified.

The auditors' report

- 17.3
- (1) Rule 9.35 specifies the scope of the audit. The contents of the auditors' report are set out in Part III of **Appendix 9.6**. The rules on auditors' qualifications are found in SUP 3.4.
 - (2) The Auditing Practices Board issues separate guidance notes specifically for auditors of *insurers* and auditors should refer to these.
 - (3) The parts of the *return* which are subject to audit are:
 - (a) **Forms 9 to 17, and 20 to 45;**
 - (b) the statements furnished under rules 9.25, 9.26, 9.27 and 9.29.

- (4) The unaudited parts of the *return* are:
- (a) the statements furnished under rules 9.30, 9.31 and 9.36;
 - (b) the information provided in accordance with **Appendix 9.4** (including **Forms 46 to 61**);
 - (c) the certificate of the *appointed actuary* prepared under Part II of **Appendix 9.6**.
- (5) The auditors are also required to report on whether the *directors'* certificate except for paragraph 4(d) of the certificate and, in so far it relates to published guidance which relates to controls with respect to money laundering, except for paragraph 5 of the certificate. The auditor's report must state whether the certificate has been properly prepared in accordance with the rules and whether or not it was unreasonable for the persons giving that certificate to have made the statements contained in it. Paragraph 11 provides that to the extent the information and explanations the auditors have received do not allow them to express this opinion they should add to their report such qualification, amplification or explanation as may be appropriate.
- (6) It is appropriate for compliance with most, but not necessarily all, relevant published guidance to be subject to the audit opinion described above. When, periodically, a list of relevant published guidance is circulated (see 17.1), the *FSA* will make clear whether or not it would normally expect an audit opinion in respect of compliance with that guidance. Where audit of compliance with a guidance note is inappropriate (or has not been carried out for some reason), the auditor would be expected to invoke paragraph 11 of **Appendix 9.6** to record the fact.
- (7) Paragraph 10(c) of **Appendix 9.6** provides for the auditors to state the extent to which, in giving their opinion, they have relied on the *appointed actuary's* certificate with respect to the *mathematical reserves* and *required minimum margins* and on a direction by the *FSA* under section 148 of the *Act* for the identity and value of any *implicit items* which are admitted.
- (8) **Forms 31** and **34** relating to years of origin prior to 1981 will contain figures which include information about claims notified and payments made prior to the *1980 Regulations* coming into force. Such information was not subject to audit under those rules and the relevant figures are excluded from audit under the *1983 Regulations* and this exemption was carried forward in the *1996 Regulations* and subsequently the Interim Prudential Sourcebook by rule 9.35(2)(a). This is now only relevant to **Forms 31** and **34** for *accounting class 7*, as these forms for the other *accounting classes* have a ten-year cut off.
- (9) Paragraph 12 of **Appendix 9.6** provides that where the auditors refer in their report or in any note attached thereto to any uncertainty, the report shall also state whether in the auditor's opinion that uncertainty is material to

determining whether the *insurer* has available assets over the appropriate solvency margin. This paragraph should not be read as requiring the auditors to refer to an uncertainty. It merely provides that if they do so an additional opinion is required. An uncertainty should be treated as material for these purposes if, upon the crystallisation of so much of the uncertainty as is not remote, the required level of available assets would not be met.

18. STATISTICAL RETURNS: FORMS 91 TO 94

Background

- 18.1 (1) **Forms 91 to 94** do not form part of the *returns* but constitute a separate return which must be deposited with the *FSA*, ('the statistical return').
- (2) The statistical return reports *insurance business* transacted by a *UK insurer* in other *EEA States* either through a branch in that country or on a services basis into that country from an establishment in the UK or another *EEA State*.
- (3) *UK insurers* who wish to establish a branch in or provide services into another *EEA State* must make the requisite notification to the *FSA* under *AUTH*.

The requirement to deposit Forms 91 to 94

- 18.2 (1) The requirement to prepare and deposit **Forms 91 to 94** is set out in rule 9.37.
- (2) A *UK insurer* which in any calendar year:
- (a) carries on *general insurance business* in an *EEA State* (other than the UK) through a branch in that state should prepare **Form 91**;
 - (b) provides general insurance in an *EEA State* (other than the UK) through an establishment in the UK or in another *EEA State* should prepare **Form 92**;
 - (c) carries on *long-term insurance business* in an *EEA State* (other than the UK) through a branch in that state should prepare **Form 93**; or
 - (d) provides long term insurance in an *EEA State* (other than the UK) through an establishment in the UK or in another *EEA State* should prepare **Form 94**.
- (3) The forms in (1) should be prepared separately in respect of each *EEA State* in which the *insurer* carries on business or provides insurance.
- (4) The forms in (1) relate to calendar years not necessarily *financial years*. Three copies of each form (where required) should be deposited with *FSA*

within nine months of the end of each calendar year. One of the copies should be signed by a *director*, chief executive or secretary of the *insurer*.

- (5) Where the *insurer* has made a notification of its intention to establish a branch in an *EEA State* or to provide insurance in an *EEA State* (see 18.1(3)) but does not in any calendar year carry on *insurance business* or provide insurance in that *EEA state*, it should send notification of that fact to the *FSA* within nine months of the end of each calendar year signed by a *director*, chief executive or secretary of the *insurer*.
- (6) **Forms 91 to 94** are not subject to audit.
- (7) No direction under section 148 of the *Act* may be granted modifying or exempting *insurers* from the requirement to deposit **Forms 91 to 94**.

Inaccurate or incomplete returns

- 18.3 (1) Rule 9.37 requires the *FSA* to consider the **Forms 91 to 94** or notification deposited under that rule and, if any such document appears to it to be inaccurate or incomplete, to communicate with the company with a view to the correction of any such inaccuracies and the supply of deficiencies.
- (2) The procedure is similar to that described in 1.4 above for the *returns* and the listing of validation rules described in that paragraph as available upon request includes **Forms 91 to 94**.

Conventions for completing the Forms

- 18.4 (1) The conventions described in 4 for the *return* forms should also be applied to the preparation of these forms, (other than in respect of signature of the *returns* for which see 18.2(4)).
- (2) The box in the heading entitled '*EEA State* in which branch is situated' or '*EEA State* in which risk is situated' should be completed with the country code of that *EEA State* to which the form relates. See the **Annex** to paragraph 10 for these codes.

Accounting rules

- 18.5 The forms variously call for amounts in respect of premiums, *claims*, commissions etc. in respect of the branch or services business in the *EEA State* to which they relate. These amounts should be determined using the same accounting rules as are applied in the preparation of the *returns*.

19. **TREATMENT OF INDIVIDUAL SAVINGS ACCOUNT ('ISA') BUSINESS**

19.1 **Forms 41 and 42**

Earned premiums and *claims* arising from ISA business should be included under 'Other contracts' in **Forms 41 and 42** respectively. The extent to which an entry under 'Other contracts' is attributable to ISA business should be disclosed separately by way of a supplementary note. [Codes 4101 and 4201]

19.2 **Forms 46, 47, 51 to 54 and 57**

ISA business should be included under 'Other business' in **Forms 46, 47, 51 to 54 and 57**. The extent to which an entry under 'Other business' is attributable to ISA business should be disclosed separately by way of a supplementary note.

GUIDANCE NOTE 9.2 (rule 9.3)

**ACCOUNTS AND STATEMENTS FOR A MARINE MUTUAL COMPANY
(FORMS M1 TO M5)**

The Managing Director
All companies authorised by the Treasury
to carry on long-term business

3 July, 1998

Dear Managing Director

USE OF DERIVATIVES - LINKED PRODUCTS

I am writing to remind you of the position of current legislation and guidance notes on the use of derivatives by insurance companies, and to set out the Treasury's view in respect of linked insurance (usually single premium) products backed by these instruments. If your company offers, or is intending to offer, such products then the issues covered in this letter will need your personal attention or that of one of your senior board colleagues; but, in any case, please pass a copy to the Appointed Actuary and to the auditors of the company.

Derivatives and the Legislation

Current UK legislation requires that for a derivative to be given an admissible value or to be a permitted link in the case of index-linked or property-linked business respectively it must be possible to demonstrate that, amongst other things, it is being used in connection with a contract or asset for the purposes of "efficient portfolio management" or "reduction of investment risks". The main guidance note on the use of derivatives, Prudential Note 1995/3, provides guidance and illustrative examples on how these conditions are to be interpreted in practice and, in particular, makes clear that an investment strategy using derivatives will not satisfy the efficient portfolio management or reduction in risk criteria if it gives rise to a significant increase in risk to the policyholder. The test of how this should be assessed is introduced in Section 4.5 of the Note and expanded upon in Section 10.10 et seq., namely that the derivative strategy must be "benchmarked" against a broadly comparable non-derivative investment strategy.

This guidance is still in place and it is the Treasury's view that the above test remains fundamental. It follows, therefore, that we consider where a non derivative strategy that has broadly the same economic effect cannot be identified it will not be possible to demonstrate that the derivative strategy has met the criteria of efficient portfolio management. Similarly, it will not be possible to satisfy the reduction in risks test where there is no non-derivative strategy against which changes in risk can be assessed. A derivative used under such a scenario to back an index-linked product could therefore be given no admissible value (bar that which may be possible under Regulation 48 of

the Insurance Companies Regulations 1994, as amended), and in a property-linked product would be illegal.

The Case of Multi-Index Bonds

The appropriate comparison with what constitutes a broadly equivalent non-derivative strategy can be a complex issue, and may not always be straightforward to implement in practice. Nevertheless the task must be done, and it is a cause of concern to us that in the development of the recent generations of what are usually termed guaranteed equity or income bonds, where policyholder benefits are determined by the performance of two or more equity indices and which are backed by derivatives, the above test does not appear to have been given the prominence it requires when determining whether the regulatory criteria have been met.

As set out in the examples contained in Prudential Note 1995/3, the test in the case of products based upon a single stockmarket index involves a comparison of the derivative strategy with the, transparently similar, non-derivative alternative of direct investment in the assets underlying that index. However this transparency fails away in the case of multi-index bonds, and the Treasury are unable to see how for such products a comparable non-derivative strategy having *broadly the same economic effect* can either be identified, or used to demonstrate an insignificant under performance by the derivative strategy. This latter point is of particular relevance to products where the benefits are linked to "the worse performance" of two or more indices. It is germane to this view that we do not consider it feasible to seek to satisfy the regulatory requirements through comparison with a non-derivative strategy that would, in practice, mimic a derivatives strategy. It should be noted that the above concerns do not extend to bonds where the benefits reflect simple weighted averages of two or more indices which clearly could be replicated by similarly weighted direct holdings in the underlying assets.

As I have already stressed, failure to meet the criteria of efficient portfolio management or reduction in risks renders the use of a derivative non-compliant with the Regulations. Companies which are holding derivatives to back the above multi-index linked products should therefore contact their normal supervisor without delay to discuss how the position is to be regularised.

Yours sincerely

Martin Roberts

Dear Appointed Actuary

RECOMMENDED AIDS RESERVING POLICY

Emerging experience has shown the AIDS epidemic to be of less significance for mortality in the UK than had originally been feared. Nonetheless, it remains the case that there are still a material number of deaths occurring as a result of infection by HIV, and that this number is expected to continue to rise over the next few years. The insured population has seen lower levels of AIDS-related mortality than the general population, but it is not necessarily the case that deaths in future years will be as concentrated in groups which are underrepresented in the insured population.

Taking these factors into account, and bearing in mind that actuaries are required to provide on a prudent basis for adverse deviations in mortality experience in their normal mortality assumptions, it now seems appropriate to revise the advice previously issued to Appointed Actuaries.

For traditional with-profits business, and for those types of unit-linked or accumulating with-profits policy where mortality charges can be varied within a relatively short timescale (say less than two years), it will often be sufficient to allow for the possible impact of AIDS within the actuary's margin for adverse deviations, and not to hold an explicit reserve. This may also be true for classes where an explicit allowance is unnecessary due to insensitivity of the reserves to the mortality assumption.

For classes where mortality or morbidity risk is of more critical importance, it still seems appropriate to make an explicit provision in the reserving basis. It is likely that for most companies an allowance for deaths from HIV and AIDS at a level of about one-third of basis R6A of Bulletin No 5 of the AIDS Working Party will be sufficient (or about one-sixth of basis R). GAD will normally expect to see evidence of reserving for AIDS mortality at this level, but will not insist on maintenance of the additional mortality at the peak level in years after it has been reached.

RESILIENCE TEST

There has been some doubt expressed as to the intended treatment of property under the resilience test. For the avoidance of doubt, I would confirm that the GAD expect the assumed fall in property values to be 20% in those scenarios where equities are assumed to fall by 25%, and a fall of 10% in the scenario where equities fall by 10%.

Where a life insurance company has material holdings of index-linked gilts, the existing three tests should be modified to include a component for changes in real yields on index-linked gilts as follows:

In test (1) a fall in real yields on indexed gilts of 25% (e.g. from 4% to 3%)

In test (2) a rise in real yields on indexed gilts of 10% (e.g. from 4% to 4.4%)

In test (3) a rise in real yields on indexed gilts of 25% (e.g. from 4% to 5%)

Yours sincerely

Dear Appointed Actuary

Pensions Review: Reserving for Guarantees

Several insurance companies have indicated that they would like to consider guaranteeing pension benefits linked to individuals' salaries, in the event that they will not be able to secure reinstatement of service within the relevant occupational pension scheme. I understand that S113/PIA will require such a guarantee to incorporate an undertaking to pursue reinstatement where it is possible, along the lines set out in the SIB Guidance of October 1994 and November 1996. For those investors whose scheme will not allow reinstatement, the guarantees could be structured in several different ways, from replicating the benefits forgone to broad financial correspondence for the key benefits.

The Securities and Investments Board have published criteria which proposals have to meet in order to satisfy the regulators that investors' interests are being adequately and fairly addressed. They require that guarantees should provide pension and other benefits corresponding in value to the benefits of the occupational pension scheme. Approval to the provision of guarantees must be given by the appropriate regulator. In addition reserves for any guarantees must meet the required insurance company solvency requirements. If approval is given, the result will be the creation of longterm insurance liabilities to the Third Life Directive and the relevant UK legislation, with the particular requirement to establish prudential reserves. Accordingly, the result may be considerably higher than the cash equivalent of pension benefits on a GN 11 basis. As these liabilities will not have fallen due, they must be valued by the Appointed Actuary within the mathematical reserves. The annex to this letter sets out the views of the GAD on the required reserving standard for these salary-linked guarantees, issued as a response to the need to compensate for mis-sold personal pensions. Similar considerations, omitting only the allowances for salary progression, -apply where the guarantees are linked to national average earnings. Guarantees linked to RPI or LPI raise no new issues for life office reserving and are not covered in the annex.

Initially, the full information required to set up reserves on an individual basis may not be readily available. In addition, it may take considerable time to obtain and verify that

information. The SIB and PIA consider that, if issuing an offer to guarantee equivalent benefits is, accepted as a satisfactory precursor to seeking reinstatement. then the process of making an offer need not be delayed on an individual basis until the quote for reinstatement is available. Where reinstatement is discovered not to be available, the guarantee to provide corresponding benefits, if accepted, remains in effect. However, where companies accept that investors have been disadvantaged, even in advance of performing a loss assessment, the issuing of offers to guarantee benefit will be seen as a way to overcoming delays in making offers of redress caused by data collection, as well as delays caused by seeking reinstatement.

The Third Life Directive permits reserving on an aggregate basis, providing that the total reserves are at least equal to the total of the individual reserves. If the individual reserves cannot be calculated because the required information is not available, it is incumbent on the Appointed Actuary to make prudent assumptions about the missing information. That would be in addition to the level of prudence normally required. Appointed Actuaries should keep the GAD informed of their approach to these additional reserves.

Further, because some measure of current salary is such a key parameter in these arrangements, no insurance company should be committed to an offer to guarantee a benefit unless that information has been obtained from the investor.

Insurance companies must continue to seek missing information. As relevant information is received, the Appointed Actuary will be able to review the level of the additional reserves. In order to monitor the development of the reserves throughout the duration of the guarantee, the Appointed Actuary will need information about any relevant changes which will affect the level of guarantee (e.g. salary rises). If such information, or any other information required by the Actuary, is not obtained, the Actuary must once again make prudent assumptions. It is understood that SIB/PIA require that once a guarantee has been given to an individual, such guarantee would not lapse if continuing information were not forthcoming.

Please note that these guidelines are relevant only to the special situation arising from the pensions review. They do not indicate any change of view on the inappropriateness of insurance companies entering into contracts linked to salary, earnings or indices thereof.

Yours sincerely

C D Daykin

0597-09

Reserving For Guarantees Arising From Mis-selling of Personal Pensions

1 This note should be read in conjunction with the Dear Appointed Actuary letter of 29 May 1997.

2. Assumptions of a Continuing PP Policy

Whenever there is a guarantee there will also be a continuation of the insurance policy previously entered into. The conversion of the existing policy into one which mirrors the pension scheme exactly is not an acceptable option. The SIB require that the guarantee must be in the form of a legally binding and enforceable contract between the life office and the investor. The DTI considers that this contract will either be separate and additional to, or possibly an amendment of the PP contract, which will in any case remain in force. DTI need to see the form of the additional contract although the responsibility for ensuring that it meets the needs of investor protection lies with the financial services regulator.

The life office should take steps to avoid the personal pension being invested in very volatile unit-linked funds, and as far as possible require it to be switched to with profits, or at least a less volatile unit-linked fund. Otherwise there will be very significant mismatching and resilience issues to address, including a perverse incentive for the policyholder to take exceptional risks, secure in the knowledge that the downside is met by the guarantee.

3. **Proposed Reserving Principles**

3.1 General Basis

It should be assumed that salary inflation (excluding increases arising from promotion, performance or scale increases) will be at 2% a year above the inflation rate as measured by increases in the RPI.

3.2 Deriving the Value of Liabilities - Method 1

3.2.1 Implicit allowance for inflation as measured by increases in the RPI should be made by using a net discount rate, determined according to paragraph 3.2.3 below.

Explicit allowance for salary inflation in excess of increases in the RPI should be made according to paragraphs 3.2.2 and 3.5

3.2.2 The liabilities would be determined assuming an effective salary inflation rate of 2½% (being the 2% differential in paragraph 3.1 above plus an allowance for possible underperformance of assets and for prudence) together with a further allowance for salary progression (discussed in paragraph 3.5 below). The liabilities would be discounted at the modified net interest rate derived in paragraph 3.2.3.

3.2.3 It should be assumed that:-

- (a) The RPI remains constant for the purposes of determining regulation 69 yields on RPI linked assets - as provided in paragraph (6) to that regulation.
- (b) Equity shares, and those land assets where such an assumption is appropriate, are assumed to be linked to RPI for the most of this exercise only.
- (c) The effective yield on fixed interest investments, or on any other investments which do not carry a prospect of capital appreciation related to inflation, should be reduced by an implicit inflation rate so calculated as a *mismatching adjustment*. The required implicit rate of RPI increase is to be taken as the difference between the yield on the FTSE Actuaries 15 year medium coupon gilt index and the FTSE Actuaries over 5 year (inflation 5% per annum) index-linked gilt yield.
- (d) Risk adjustments would then be made in the normal way, and the yield reduced by 2½% in accordance with regulation 69(2).

3.3 Deriving The Value of Liabilities - Method 2

3.3.1 The Appointed Actuary may elect to use the full yield determined in accordance with regulation 69, in which case the salary inflation rate would need to be assumed to be the implicit inflation rate derived in paragraph 3.2.3(c) above, plus at least 3%, being the 2% differential in paragraph 3.1 above plus a 1% allowance for possible underperformance of assets. It would still be necessary to allow for salary progression as set out in paragraph 3.5.

3.4 **Resilience Test**

Resilience tests, whether Method 1 or 2 is adopted, would be carried out in a standard way by applying the scenario to the assets prior to carrying out the chosen steps. The implicit inflation rate in paragraph 12.3(c) would be recalculated by adjusting the indices in a natural manner consistent with the assumptions for assets. In particular this will allow for mismatching approaching retirement.

3.5 **Allowing for salary progression**

3.5.1 The Future

Appropriate allowance should be made for future salary increases arising from promotion, performance or scale increases. The assumptions should have regard to any relevant and available published scales, and to age and occupation. The Appointed Actuary may assume that the basic salary assumption contains a sufficient margin for prudence to cover this area as well, and therefore adopt a "best" estimate approach for this element of the basis.

3.5.2 Data

To ensure the reasonableness of the reserve, the Appointed Actuary should obtain data, normally annually if possible (although triennial data adjusted for inflation is acceptable), to update current salaries and nature of employment

3.6 Other points

3.6.1 Future interest rates

Assumptions about future interest rates, including any implicit in future annuity rate assumptions, must accord with regulation 69(8/9). Where an assumption as to the future yield on index-linked gilts is required, this should not exceed 3% a real.

Resilience tests should incorporate changes in the regulation 69(8/9) yield.

3.6.2 Marital status

For prudence, all persons should be assumed to have a qualifying spouse at the date of death if before retirement. It should also be assumed that all members are married at the date of retirement, but that no re-marriage will take place after the later death of a spouse.

3.6.3 Leaving service

No assumptions should be made in respect of savings from future withdrawals from service.

3.6.4 Mortality

Mortality assumptions need to make prudent allowance for future improvements.

3.6.5. Expenses

When setting overall expense reserves, the Appointed Actuary will need to take into account the additional costs of administering these guarantees.

3.6.6. Unit-linked business

For unit-linked business the reserve for the guaranteed pension benefit (and associated expenses) should be determined along the lines described above, with the assets underlying the relevant unit fund(s) determining the yield for discounting in accordance with paragraph 3.2.3 or 3.3.1. Allowance for a resilience test should be made in accordance with 3.4, again based on the assets underlying the unit fund(s). In order to be consistent with the rest of the basis, allowance for inflation of renewal expenses should be made at the rate of 2% pa., rather than at the rate used when assessing the standard non-unit reserve.

The above calculations will produce a reserve for the guaranteed benefits. There will also be a unit and non-unit reserve calculated for the contract in the normal way. The additional reserve required is the difference between the reserve for the guaranteed benefit and the sum of the standard unit and non-unit reserves, subject to a minimum of zero.

3.6.7 Resilience effects on the associated personal pension

When assessing the liabilities, particular care is required to ensure that the effect of resilience scenarios on the associated personal pension liability, are taken into account. This may mean that, in a resilience scenario, two 'hits' are suffered. The assets backing* the guarantee fall in value, but also the cost of the guarantee rises from the diminution of the value of the personal pension policy, whether this is unit-linked or with profit.

3.6.8 Special benefit rules

Some schemes have special features, which can increase the liability, or make identification of a closed-off liability difficult. These include the public sector schemes which allow re-entrants to restore their preserved rights based upon current salary, and others which provide a boost to pensions after a given number of years' reckonable service.

3.6.9 Negative Reserves

In accordance with regulation 73, the reserve for the guarantee must be non-negative.

13 January, 1999

The Appointed Actuary
All insurance companies authorised to
carry on long-term business

Dear Appointed Actuary

RESERVING FOR GUARANTEED ANNUITY OPTIONS

Further to Martin Roberts' letter of 18 December regarding the costs of guaranteed annuity options in the context of policyholders' reasonable expectations, he has agreed that it would be helpful if I were to provide some guidance to Appointed Actuaries of companies on the advice I have given him on the application of the existing reserving requirements in respect of contracts containing a guaranteed annuity.

2. I consider that Part IX of the Insurance Companies Regulations 1994 (ICR 1994) requires a life office to calculate its liabilities (and hence to reserve) on the basis of all the benefits offered under the contract. Regulation 64 of the Regulations requires long-term liabilities to be determined "on actuarial principles", and to "make proper provision for all liabilities on prudent assumptions". Regulation 64(2) makes clear that the determination must "take account of all prospective liabilities as determined by the policy conditions".

3. Contracts providing for a guaranteed annuity typically take two main forms either:

- a contract to provide an annuity with an option to secure a cash fund; or

- a contract to provide a cash fund with the option to convert the benefits into an annuity at a guaranteed rate.

4. I would expect the reserving requirements to be very similar (if not identical) irrespective of whether the guaranteed annuity is the principal benefit under the contract or only an option. This is on the basis that in substance a policyholder will be entitled to the same choice of benefits irrespective of which is the principal benefit and which is the option.

5. In my view it is clear that, where a contract provides for a guaranteed level of annuity, then the effect of Part IX of the ICR 1994 is to require the company to reserve fully for its liabilities to provide annuity benefits to the value guaranteed under the contract. In addition it will be necessary to reserve fully in respect of any facility for policyholders to select an alternative form of benefits.

6. In assessing the extent of these liabilities, the company will need to make a prudent assessment of the extent to which any options are likely to be exercised. In this context I consider that, where the cost of meeting the guaranteed annuity benefits at maturity is significantly greater than the value of any alternative benefits, prudence will require the company to reserve for the contract at a level close to the full value of the guaranteed annuity. In general it would not in my view be prudent to assume that policyholders will choose a benefit form that is of significantly lower nominal value to them, although some limited allowance (of a few percentage points of the reserve) could in some cases be made for a reduction in the liability on the grounds of the additional flexibility or other perceived advantages to policyholders of any alternative benefits.

7. Where the levels of terminal bonus are to be adjusted with the aim of bringing the value of the guaranteed annuity option closer to the value of the alternative benefits, there might at first sight appear to be some room for argument that it was not necessary to reserve on the assumption that almost all policyholders will take the guaranteed annuity benefit. However, it needs to be remembered that, although the benefits formally "guaranteed" under the alternative form of benefit may be lower than those under the guaranteed annuity option, the company's discretion in setting the value of terminal bonus applied to the alternative benefit is limited as a result of the existence of the guaranteed annuity. It is likely that close to 100% of policyholders will exercise the annuity guarantee unless the company maintains terminal bonus at a level which ensures that the value to the policyholder of the alternative benefit is at least equal to the value of the guaranteed annuity. Accordingly, this constraint will need to be reflected in the valuation assumptions made about either the proportion of policyholders opting for the alternative benefit or the value of that alternative benefit. Consequently any reduction in the reserves held by the insurer by more than a few percentage points below the full value of the guaranteed annuity for this reason would require very careful justification by the actuary.

8. I am aware that many policyholders have in the past exercised their right to take up to 25% of the benefits of their pension policy in the form of a tax free lump sum. However, I would not consider it prudent to use past experience alone in this regard as a basis for reducing the percentage of benefits assumed to be taken in guaranteed annuity form. In my view there is a significant risk that there may be a marked change in policyholder practice if policyholders and their advisers view annuity guarantees as valuable and something that

should be utilised to the full. For instance, there is the possibility that in future individuals with more than one pension policy will seek to maximise their benefits by exercising in full any guaranteed annuity option and only taking cash from those policies that do not carry a guarantee. In addition any further increase in the value of the annuity benefits relative to cash has the potential to lead to a significantly greater take up of annuity guarantees. As a result I would only consider it prudent to make significant allowance for a proportion of available policy proceeds to be taken as cash, to the extent that policyholders are obliged to take some of the benefits as cash. Where policyholders are not obliged to take some benefits in cash, then the principles described in the above two paragraphs of this letter would apply.

9. In addition to holding mathematical reserves to cover their liabilities for annuity guarantees, companies will need to assess the extent to which a resilience reserve is required. I expect companies to apply the recommended resilience tests and other general advice in my letter (DAA6) of 30 September 1993 (as amended slightly in my letter of 24 November 1998 - DAM0) in determining the need for a resilience reserve. The need to hold substantial mathematical reserves to cover guaranteed annuity options would not in my view be a sound argument for reducing the stringency of the resilience test applied.

10. The level of reserves established for guaranteed annuity options is likely to be one of the features of companies' 1998 annual returns which FSA and GAD will want to review particularly closely. It should be remembered that Schedule 4 of the Insurance Companies (Accounts and Statements) Regulations 1996 requires the actuary's report in the annual returns to include detailed information about the contracts written.

11. In particular, paragraphs 4(1) and 5(1) of the Schedule require the provision of a description of the benefits of the contracts written, including any material options. I would expect such a description to provide an indication of the form of any annuity guarantee offered. In addition, in accordance with paragraph 6(1)(h), actuaries should provide a description of the way in which reserves for any annuity guarantees and options have been determined (including an indication of the interest rate and mortality assumptions used). I would also expect that, in accordance with Instruction 9 to forms 51-54, categories of contracts containing annuity guarantees would be shown separately in those forms.

12. The annual returns should include sufficient information for the FSA and GAD to make an assessment of the extent of the guarantees offered, the reserving basis adopted by the company and hence the scope for guaranteed annuity options to impact on the financial position of the company.

13. The above is my considered view and is without prejudice to any decision of the courts which may affect it.

Yours sincerely

C D Daykin

Dear Appointed Actuary

RESERVING FOR GUARANTEED ANNUITY OPTIONS

As you will recall, I wrote to you and other Appointed Actuaries on 13 January this year regarding the application of the reserving requirements in Part IX of the Insurance Companies Regulations 1994 in respect of contracts containing a guaranteed deferred annuity and a cash or other alternative.

Having now reviewed, at least provisionally, the majority of companies' 1998 annual returns, it is apparent that some aspects of this guidance have been interpreted in a variety of ways. It is clearly important that there should be consistency in the approach taken, and therefore the FSA has concluded that it would be helpful if I were to provide some further clarification on the reserving standards that would normally be expected to be seen in future HNTIFSA returns.

In my view, in determining the reserve for a contract containing a guaranteed annuity it would not generally be prudent to assume that policyholders will choose a benefit form that is of significantly lower nominal value to them than the guaranteed annuity. I indicated previously that I would expect any allowance for the reduction in the liability on the basis of policyholders making such choices to be limited to "a few percentage points" of the reserve. I would like to clarify that I was referring here to the total aggregate allowance that might prudently be made for all other benefit forms (whether cash or other forms of annuity) and that in my view an allowance in excess of 5% would not be considered to represent "a few percentage points".

There may be considered to be a stronger case for making an allowance for policyholders choosing to take a proportion of their benefits in the form of a tax free cash lump sum. However, I would not consider it prudent to assume that more than 20% of policyholders exercised the option to take the maximum cash lump sum permitted under the terms of the

contract. In the case of most pension contracts, such an assumption would equate with a 5% reduction in reserve, the maximum aggregate allowance indicated above as likely to be accepted as prudent.

I am also reviewing the level of disclosure made by each company in their 1998 annual returns regarding the assumptions made to determine the level of reserve for contracts containing a guaranteed annuity. For the avoidance of any doubt, we would expect to see full disclosure of the proportions of policyholders assumed to take any available guaranteed annuity, along with the underlying mortality and interest rate assumptions. I should also add in this context that we would expect to see prudent allowance made for future mortality improvement both before and after the assumed retirement date, taking proper account of the recommendations in the latest CMI reports.

Yours sincerely

DAA14

RESILIENCE TEST

The following is the text of a letter dated 15 May 2000 from the Government Actuary to Appointed Actuaries.

Other Material: ‘Dear Appointed Actuary’ Letter DAA14 on Resilience Testing (replacing DAA6 and DAA12) issued by the Government Actuary

Your reference:

Our reference: DAA14

15 May 2000

Dear Appointed Actuary

Resilience Test

The revisions to the Insurance Companies Regulations 1994 made by HM Treasury recently include a revised formula for determining the yield on investment made more than three years in the future, with consequent effects on shorter term assumptions. This reintroduces a prudent margin on future investment assumptions, but has the effect of making the linkage of the future investment assumption to current yields more dynamic than applied in the past. Three scenarios were originally promulgated in my letter of 30 September 1993 and were amended most recently in DAA12 dated 30 September 1999. Two of these, in the context of the new regulation, now appear unnecessarily severe in their effects, given that the new regulations do allow for the effect of a sustained reduction in long-term interest rates.

I have, therefore, discussed with the Financial Services Authority revisions to the resilience test which FSA and GAD consider appropriate for current conditions. These revisions will apply from the date of coming into force of the amendment regulations.

For with profits offices, and others where it might be appropriate to do so, we consider the three scenarios which should constitute our benchmark to be:

- (1) a combination of
 - (i) a fall in the value of equities of 10%;
 - (ii) for fixed interest securities
 - (a) of less than five years outstanding term to redemption, and for short term deposits, a fall in the risk free yield of 20%
 - (b) for fixed interest securities of fifteen or more years outstanding term to redemption, a fall in the risk free yield of 10%
 - (c) for fixed interest securities of more than five but less than fifteen years outstanding term to redemption, a fall in the risk free yield of $(25 - \{\text{outstanding term in years and part years}\})\%$
- (iii) a fall in property values of 10%

- (iv) a fall in the real yields on indexed gilts of 25% (e.g. from 2% to 1.5%)
- (2) a combination of
 - (i) a fall in the value of equities of the greater of
 - (a) 25%, subject to the fall being restricted to such as would not produce a P/E ratio on the FTSE Actuaries All Share Index lower than 75% of the inverse of the long term gilt yield (as defined in regulation 69(9)) before the assumed fall in paragraph (ii), and
 - (b) 10%
 - (ii) for fixed interest securities
 - (a) a fall in the yields on risk free securities of less than five years outstanding term to redemption and on short-term deposits to the level which is calculated under regulation 69(9) for future investments (or remain constant if already at or below this level),
 - (b) the yields on risk free securities of at least fifteen years duration remaining constant,
 - (c) a fall in the yields on risk free securities of more than five but less than fifteen years outstanding term to redemption to levels obtained by interpolating between the figures given by (a) above and the 15 year gilt index yield (or remain constant if already at or below this level),
 - (iii) a fall in property values of 20%, and
 - (iv) a rise in the real yields on indexed gilts of 10% (e.g. from 2% to 2.2%)
- (3) a combination of
 - (i) a fall in the value of equities of 25%,
 - (ii) a rise in the risk free fixed interest yields of 3 percentage points,
 - (iii) a fall in property values of 20%, and
 - (iv) a rise in the real yields on indexed gilts of 1 percentage point.

For those fixed interest securities which are not risk free, we would expect actuaries to assume the yield differential to risk free does not reduce in a resilience test.

As mentioned in my 1993 letter, appointed actuaries should also consider the possibility of more extreme financial conditions in the future, and the extent to which the solvency margin

would be sufficient to enable the office to meet its liabilities in such circumstances. Cash flow analyses should also be carried out on prudent assumptions.

The tests can be appropriately modified for other situations, in a similar way to that in my 1993 letter. As I indicated in my letters of November 1998 and September 1999, I do not consider it is appropriate to include in the test any component which, taken overall, serves to reduce the prudential effect of the test. For example, the actuary to an office which has only unit linked business, some of which carries a guaranteed annuity rate, should not necessarily assume equity values fall in applying tests for lower interest rates. Indeed actuaries to such offices should consider their resilience to a rise in equity values combined with falling interest rates.

In arriving at these benchmarks, we have been mindful of the existence of the current professional working party, and have endeavoured not to anticipate their possible recommendations. This has led us to maintain for the time being the core features of the previous tests, whilst introducing appropriate modifications in the context of the revised regulation.

Yours sincerely

**INTERIM PRUDENTIAL SOURCEBOOK
FOR INVESTMENT BUSINESSES INSTRUMENT 2001**

Preface

1. The Financial Services Authority makes, gives, issues and designates the provisions in this instrument.
2. The provisions of the Financial Services and Markets Act 2000 (the "Act") relevant to the making of rules and listed in the Schedule to this instrument entitled "Powers exercised" are specified for the purpose of section 153(2).
3. This instrument shall come into force at the beginning of the day on which section 19 of the Act (the general prohibition) comes into force.
4. This instrument may be cited as the Interim Prudential Sourcebook for Investment Businesses Instrument 2001.
5. The provisions set out in Annex C may be cited as the Interim Prudential sourcebook for investment businesses, or IPRU(INV).

By order of the Board, 21 June 2001

Schedule

Part A – Powers exercised: New Provisions

1. The following powers in the *Act* have been exercised by the *FSA* to make the *rules* in *IPRU(INV)* other than those referred to in Part B (Powers Exercised: Continued Provisions):
 - (a) Section 138 (General rule-making power)
 - (b) Section 149 (Evidential provisions)
 - (c) Section 156 (General supplementary powers)
2. The following powers in the *Act* have been exercised by the *FSA* to give the *guidance* in *IPRU(INV)* other than *guidance* referred to in Part B (Powers Exercised: Continued Provisions):

Section 157(1) (Guidance)
3. The following powers in the *Act* have been exercised by the *FSA* to make the *directions* in *IPRU(INV)*:

Section 318 (Exercise of powers through Council)

Part B – Powers Exercised: Continued Provisions

4. The powers in articles 4(1) of the The Financial Services and Markets Act 2000 (Transitional Provisions and Savings) (Rules) Order 2001 have been exercised by the *FSA* to designate the provisions identified in the tables in Annex A as they are in force at the date of this instrument (the "continued provisions").
5. The powers in article 11(1) of the The Financial Services and Markets Act 2000 (Transitional Provisions and Savings) (Rules) Order 2001 and section 157(1) of the *Act* have been exercised by the *FSA* to give the *guidance* on the continued provisions reproduced in *IPRU(INV)*.
6. The continued provisions are applicable to:
 - (a) *securities and futures firms* (as defined by the Glossary annexed to the General Provisions Instrument 2001) to the extent that they were provisions made by the Securities and Futures Authority Limited and appearing as part of its rulebook;
 - (b) *investment management firms* (as defined by the Glossary annexed to the General Provisions Instrument 2001) to the extent that they were provisions made by the Investment Management Regulatory Organisation Limited and appearing as part of its rulebook;
 - (c) *personal investment firms* (as defined by the Glossary annexed to the General Provisions Instrument 2001) to the extent that they were provisions made by the Personal Investment Authority Limited and appearing as part of its rulebook;

and are modified:

- (1) so as to be interpreted in accordance with and to apply subject to the General provisions contained in the General Provisions Instrument 2001;
- (2) in the manner identified in the tables in Annex A.

The continued provisions are to be treated as having effect under section 138 of the Act (General rule making power).

Part C – Rules that can be waived

7. All of the *rules* in IPRU(INV) can be *waived* using the powers exercisable under section 148 of the *Act*.
8. The directions in IPRU(INV) cannot be *waived*.

ANNEX A

[The Continued Provisions]

Provisions made by the Securities and Futures Authority Limited and appearing as part of its rulebook		
Designated Provision	Modifications	
	Changes in text	Where the designated provision (as modified) appears in IPRU(INV)
1-11(1)(d)	Delete the words "the <i>Financial Rules</i> but only in respect of" and substitute "This chapter does not apply to an <i>oil market participant</i> unless"	3-1A
3-10 and guidance	In 3-10(2)(a), delete "a member of SFA" and replace with "regulated by the <i>FSA</i> or a predecessor regulator" In 3-10(2)(c) delete "required by SFA"; delete "a member of SFA" and replace with "regulated by the <i>FSA</i> or a predecessor regulator"; delete " <i>rules of SFA</i> " and replace with "rules of the <i>FSA</i> "	3-10
3-11	Delete 3-11(1)(a) In 3-11(1)(c) delete "(a) or"	3-11
3-12	Delete 3-12(3)	3-12
3-13	In 3-13(1)(d) delete "SFA" and replace with "the <i>FSA</i> " In 3-13(4)(a) delete "SFA" and replace with "the <i>FSA</i> "	3-13
10-10 and guidance	In 10-10(2)(a), delete "a member of SFA" and replace with "regulated by the <i>FSA</i> or a predecessor regulator" In 10-10(2)(c) delete "required by SFA"; delete "a member of SFA" and replace with "regulated by the <i>FSA</i> or a predecessor regulator"; delete " <i>rules of SFA</i> " and replace with "rules of the <i>FSA</i> " In 10-10(3) delete "SFA" and replace with "the <i>FSA</i> "; delete paragraphs (f) to (l)	10-10
10-11	None	10-11
10-12	None	10-12
Appendix 20	In the heading delete the footnote; delete "rules" and replace with "rule"; delete "and 10-11(4)"	IPRU(INV) 3 Appendix 20

	<p>In paragraph 1 delete "rules" and replace with "rule"; delete "and 10-11(4)"</p> <p>In paragraph 4 delete "(see rules 3-41(3) and 10-41(3))"</p> <p>In paragraph 6(a) delete "member of SFA" and replace with "<i>firm</i>"</p> <p>In paragraph 6(b) delete "This is consistent with the concept of a "dormant" <i>customer</i> in paragraph 4 of the guidance to the <i>safekeeping rules</i>."</p> <p>In paragraph 9 delete "rules" and replace with "rule"; delete "and 10-11(4)"</p> <p>In paragraph 10 delete "SFA" in the first line; delete "Rules 3-11(3) and 10-11 only require" and replace with "Rule 3-11(3) only requires"; delete "SFA agreed that"</p> <p>In paragraph 11 delete "Rules 3-11(3) and 10-11(6) require" and replace with "rule 3-11(3) requires"; delete "SFA"; delete "rules 3-11(1)(d) and 10-11(4)" and replace with "rule 3-11(1)(d)"</p> <p>In paragraph 12 delete "for SFA"</p>	
Appendix 20	<p>In the heading delete the footnote; delete "rules" and replace with "rule"; delete "3-11(1)(d) and"</p> <p>In paragraph 1 delete "rules" and replace with "rule"; delete "3-11(1)(d) and"</p> <p>In paragraph 4 delete "(see rules 3-41(3) and 10-41(3))"</p> <p>In paragraph 6(a) delete "member of SFA" and replace with "<i>firm</i>"</p> <p>In paragraph 6(b) delete "This is consistent with the concept of a "dormant" <i>customer</i> in paragraph 4 of the guidance to the <i>safekeeping rules</i>."</p> <p>In paragraph 9 delete "rules" and replace with "rule"; delete "and 3-11(1)(d) and"</p> <p>In paragraph 10 delete "SFA" in the first line; delete "Rules 3-11(3) and 10-11 only require" and replace with "Rule 10-11 only requires"; delete "SFA agreed that"</p> <p>In paragraph 11 delete "Rules 3-11(3) and 10-11(6) require" and replace with "rule 10-11(6) requires"; delete "SFA"; delete "rules 3-11(1)(d) and 10-11(4)" and replace with "rule 10-11(4)"</p>	IPRU(INV) 10 Appendix 20

	In paragraph 12 delete "for SFA"	
--	----------------------------------	--

Provisions made by the Investment Management Regulatory Organisation Limited And appearing as part of its rulebook (in section 3 of Chapter V)		
Designated Provision	Modifications	
	Changes in text	Where the designated provision (as modified) appears in IPRU(INV)
3.1(1)	(1) In line 2 and in both sub-paragraphs (c) (i) and (ii) delete “IMRO” and replace with “the <i>FSA</i> ”. (2) In line 3 insert “must” immediately after “records”, and delete the initial word “must” in sub-paragraphs (a), (b) and (c).	5.3.1(1)
3.1(1)	Convert the Note at the end of the rule into a separate guidance provision.	5.3.1(2)
3.1(3)	(1) In paragraph (c), line 2 delete “Client Money Regulations” and replace with “ <i>client money rules</i> ”. (2) Convert the Note at the end of the rule into a separate guidance provision. (3) In line 2 of the Note delete “Regulations 4.03 to 4.06 of the Financial Services (Client Money) Regulations 1991” and replace with “ <i>COB 9.3</i> ”.	5.3.1(4) 5.3.1(5)
3.1(4)	In line 1 delete “Rules 3.(1) to (3)” and replace with “rule 5.3.1(1) to (4)”.	5.3.1(6)

Provisions made by the Personal Investment Authority Limited and appearing as part of its rulebook		
Designated Provision	Modifications	
	Changes in text	Where the designated provision (as modified) appears in IPRU(INV)
5.1.1(1)	Delete "A <i>Member</i> must" and replace with "A <i>firm</i> must take reasonable steps to ensure that it" Delete "the Rule Book" and replace with "this chapter"	13.1.10
5.1.1(3)	Delete " <i>Member</i> " and replace with " <i>firm</i> " throughout Delete "The accounting records of a <i>Member</i> in <i>Category 1, 2, or 3</i> must be kept up to date and must" and replace with "A <i>firm</i> must ensure that its records are being kept up to date and" In paragraph (3)(a) delete "disclose" and replace with "show" In paragraph (3)(c)(ii) delete "PIA's" and replace with "the relevant"	13.1.12
5.1.3	Delete " <i>Member</i> " and replace with " <i>firm</i> " throughout Delete "PIA" and replace with "the <i>FSA</i> " throughout In paragraph (1)(b) delete "(unless they are taped records required by PIA's Rules)" and delete "or to a <i>customer</i> or his <i>agent</i> in accordance with Rule 5.1.6" In paragraph (2) delete "Where the <i>Member</i> " and replace with "If a <i>firm</i> "; delete "of its <i>relevant business</i> "; delete "in writing, in such form and at such times as PIA may require" and replace with "in accordance with the provisions of SUP 15" In paragraph (4) delete "a particular <i>customer</i> or group of <i>customers</i> or to a <i>particular transaction</i> or <i>group of transactions</i> " and replace with "financial resource requirements"	13.1.14
5.1.4	Delete " <i>Member</i> " and replace with " <i>firm</i> "	13.1.15

5.1.5	Delete " <i>Member</i> " and replace with " <i>firm</i> "	13.1.16
5.1.7 (1)	Delete "(1) Subject to (2) below, (a)" Delete " <i>a Member</i> " and replace with " <i>A firm</i> " Delete (i) Delete "(ii) (if not)" Delete "these Rules" and replace with "the <i>rules</i> or the rules of a <i>previous regulator</i> " Delete (b)	13.1.17
TABLE 5 (second paragraph)	In the first sentence, delete "however, Members" and replace with " <i>firms</i> " Delete the second sentence In the third sentence, delete "without delay"; delete "of the nature and extent"; and delete "Member's current business, the competence of its staff and (where PIA is its prudential regulator) its" and replace with " <i>firm's</i> " Delete the final sentence	13.1.11 13.1.13

ANNEX B

[Statement of Purpose and Compatibility for Continued Provisions]

The purpose of the continued provisions is to supplement the requirements of the new provisions contained in IPRU(INV) that a firm must maintain adequate financial resources, taking into account the nature and scale of its business. The continued provisions provide for accounting records to be kept by firms, and for the continuation of an existing provision relating to firms involved in the oil markets.

Statement of compatibility with the FSA's regulatory objectives

The FSA considers that including the continued provisions in the IPRU(INV) will contribute to meeting two of the FSA's regulatory objectives – maintaining market confidence and consumer protection. In particular they will contribute to the reduction of the risk of investment business firms being unable to meet their liabilities and their commitments to investors and counterparties as they fall due. Although the continued provisions are not intended to contribute to the regulatory objectives of increasing public awareness and reducing financial crime, the FSA believes them to be compatible with those objectives.

Market confidence

IPRU(INV) (including the continued provisions) sets out standards relating to minimum financial resources, risk management and notifications. The continued provisions set out standards relating to accounting records to be kept by firms. Requiring firms to meet these standards will reduce the risk that firms are unable to meet their commitments as they fall due.

Consumer Protection

As with the market confidence objective, requiring firms to meet prudential standards and to keep appropriate accounting records will reduce the risk that firms are unable to meet their commitments, including their commitments to consumers, as they fall due. Inadequate financial resources relative to the scale and nature of a firm's commitments or inadequate systems and controls expose an investment firm to the risk of failure, for example in stressed market conditions, leading to potential loss to customers as well as disruption to the market. Prudential standards, where complied with fully, do not eliminate the risk of such failure but can reduce the likelihood of failure or minimise the adverse consequences for customers where a failure does occur. The FSA has had regard to the matters set out in section 5(2) of the Act, but they are not directly relevant to the continued provisions.

How the continued provisions are most appropriate for meeting the regulatory objectives

IPRU(INV) is based on the prudential standards set out in the legislation, rulebooks and other material of the previous regulators. For the reasons described above its provisions (including those of the continued provisions) will contribute to meeting at least two of the regulatory objectives. The continued provisions add to the carry forward of existing regulatory standards. The FSA considers that this particular approach is the most appropriate way of meeting the objectives at this stage (i.e. when the new legislation takes effect) because:

- ◇ it builds on existing regulators' approaches to setting standards for the same risks; and
- ◇ it is consistent with enabling us to introduce a new set of standards covering all market sectors over the medium term, leaving adequate time for the preparation and implementation of such standards and taking account as far as possible of recent international developments in the area of prudential standards.

Principles of good regulation

Section 2(3) of the Act sets out various principles to which the FSA must have regard in exercising its general functions. The FSA's reasons for believing that making the provisions of IPRU(INV) are compatible with these principles are set out below.

The need to use its resources in the most efficient and economic way

IPRU(INV) essentially carries forward the prudential standards contained in various legislation and rulebooks for firms previously regulated by IMRO, PIA, SFA and FSA (formerly SIB), professional firms, wholesale market brokers and non-bank principals.

An alternative approach would have been to introduce an Integrated Prudential Sourcebook at N2. However, we took the view that the most appropriate approach would be to introduce such a sourcebook in the medium term and that the market, firms and the FSA would be best served by preserving continuity for firms through the carry forward of existing standards.

For this reason, we believe that the most efficient and economic way to set standards regarding accounting records and for oil market participants is to maintain the existing standards contained in the continued provisions.

The responsibilities of those who manage the affairs of authorised persons

Nothing in IPRU(INV) or the continued provisions removes from the senior management of firms the obligation to run their businesses in a sound and prudent way.

The principle that a burden or restriction...should be proportionate to the benefits, considered in general terms, which are expected to result from the imposition of that burden or restriction

Given that the continued provisions maintain an existing standard, we do not believe that any cost benefit issues will arise for a firm in maintaining that standard. As explained above, we believe that carrying forward the continued provisions is a proportionate approach at this stage.

The desirability of facilitating innovation in connection with regulated activities

The continued provisions will not restrict the scope of management to develop their regulated activities in an innovative manner, provided they meet the business standards set out in other parts of the Handbook.

The international character of financial services and markets and the desirability of maintaining the competitive position of the United Kingdom

Given that the continued provisions maintain an existing standard, we do not believe that they will have any impact on the competitive position of the United Kingdom.

The need to minimise the adverse affects on competition that may arise from any exercise of its general functions

Although the continued rules carry forward existing differences in the regulatory regimes of the previous regulators, we believe that any adverse effects on competition are small and are outweighed by the advantages of maintaining the existing standards as explained above.

The desirability of facilitating competition between those who are subject to any form of regulation by the Authority

The FSA intends to consult on an integrated approach to setting prudential standards in the near future, which should lead to a harmonisation of standards. As explained above, we believe that until those integrated standards are ready, the most appropriate approach is to maintain the existing standards.

INTERIM PRUDENTIAL SOURCEBOOK FOR INVESTMENT BUSINESSES

1 Chapter 1: Application and General Provisions

1.1 PURPOSE

- 1.1.1 G The Interim Prudential Sourcebook for Investment Businesses (*IPRU (INV)*) sets out the detailed financial resources and prudential standards which the *FSA* applies to certain *firms* on an interim basis pending the introduction of a single prudential sourcebook applying to all *firms* regulated by the *FSA* – (the Integrated Prudential Sourcebook).
- 1.1.2 G The *rules* and *guidance* in this sourcebook will assist the *FSA* to meet the statutory objectives of protecting consumers and maintaining market confidence. This sourcebook does so by setting minimal capital and other risk management standards thereby mitigating the possibility that *firms* will be unable to meet their liabilities and commitments to *consumers* and counterparties.
- 1.1.3 G The general scheme of this sourcebook is, wherever appropriate, to apply the financial and other prudential standards which applied to a *firm* immediately prior to it becoming authorised by the *FSA* under the *Act*. For convenience, the chapter numbers adopted in this sourcebook correspond with those of the rulebooks of *previous regulators*.
- 1.1.4 G This sourcebook does not apply to *banks, building societies, insurers, the Society of Lloyd's* (except in relation to *underwriting agents*), *friendly societies* and certain other categories of *firm* and *members' advisers*.
- 1.1.5 G On becoming authorised by the *FSA* a *firm* will have to comply with the particular chapter of this sourcebook appropriate to its business. The *firm* will be able to seek guidance on this during the authorisation procedure. If subsequently, the business for which a *firm* has *permission* changes it may be necessary for it to comply with a different set of financial resources requirements. *Firms* will be able to discuss this aspect with the *FSA* during the application process.
- 1.1.6 G The *Supervision manual* sets out provisions relating to the periodic reporting and notification of financial information to the *FSA* or to the auditing of accounts. However, this sourcebook contains a few additional notification requirements (*notification rules*) arising out of EU Directives.

1.2 APPLICATION

- 1.2.1 R The Glossary annexed to the General Provisions Instrument 20001 applies to this chapter (*IPRU(INV) 1*), *IPRU(INV) 2*, *IPRU(INV) 4* and *IPRU(INV) 6*.
- 1.2.2 R (1) *IPRU (INV)* applies to:
- (a) a *members' adviser*;
 - (b) an *investment management firm*;
 - (c) a *personal investment firm*;
 - (d) an *authorised professional firm*;
 - (e) a *securities and futures firm*;
 - (f) a *service company*; and
 - (g) the *Society of Lloyd's* (in relation to *underwriting agents*).
- (2) *IPRU (INV)* does not apply to:
- (a) a *lead regulated firm*; or
 - (b) a *media firm*;
- (3) The definitions in the *Glossary* (which is applicable to the *Handbook* generally) apply to this chapter.
- 1.2.3 G For the avoidance of doubt, *IPRU (INV)* does not apply to any of the following:
- (a) a *bank*; or
 - (b) a *building society*; or
 - (c) a *friendly society*; or
 - (d) an *ICVC*; or
 - (e) an *incoming EEA firm* or an *incoming Treaty firm* which does not have a *top up permission*; or
 - (f) an *insurer*; or
 - (g) a *UCITS* qualifier.

OBLIGATION TO COMPLY

1.2.4 R A *firm* of a kind listed in the left-hand column of Table 1.2.4R must comply with the provisions of *IPRU (INV)* shown in the right hand column.

1.2.5 R Table

This table belongs to *IPRU (INV)* 1.2.3R

<i>Professional firm</i>	Chapters 1 and 2
<i>Securities and futures firm</i> (which is not an <i>ISD investment firm</i>) or a <i>category D firm</i> (as defined in <i>IPRU (INV)</i> 10 App1)	Chapters 1 and 3
<i>The Society of Lloyd's</i> (in relation to <i>underwriting agents</i>) and <i>members' advisers</i>	Chapters 1 and 4
<i>Investment management firm</i>	Chapters 1 and 5
<i>Service company</i>	Chapters 1 and 6
<i>Securities and futures firm</i> (which is also an <i>ISD investment firm</i>) or a <i>category D firm</i> (as defined in <i>IPRU (INV)</i> 10 App1)	Chapters 1 and 10
<i>Personal investment firm</i>	Chapters 1 and 13

CAPITAL SUBSTITUTES: TRANSITIONAL PROVISION

1.2.6 G The financial resource requirements of the Financial Services Act regulators permitted certain types of borrowings or facilities to be treated as part of a *firm's* capital resources. The most common example is that of a subordinated loan which met the relevant conditions. The following provisions permit *firms* to continue to use these borrowings or facilities in the same way as under the relevant *previous regulator's* rules, provided that certain conditions are met.

1.2.7 R (1) If a *firm* was, immediately before *commencement* permitted to treat "relevant funds" as part of its capital resources under the financial resource rules of a *previous regulator* applicable to the *firm*, it may treat those funds in an equivalent manner under the corresponding provisions of *IPRU (INV)*, provided that the conditions in (3) are met.

(2) For the purposes of this *rule* "relevant funds" are funds provided to the *firm* under the terms of

- (a) a subordinated loan agreement; or
 - (b) qualifying undertaking; or
 - (c) any other instrument treated in an equivalent manner under the financial resources *rules* applicable to the *firm*.
- (3) The conditions referred to in (1) are either:
- (a) in the case of a subordinated loan agreement, qualifying undertaking or other relevant instrument to which the *firm's previous regulator* is not party:
 - (i) the parties to it treat all rights (including, without limitation, rights to notice) which the agreement, undertaking or instrument grants to the *firm's previous regulator* as having been granted to the *FSA*; and
 - (ii) if there is a variation of the commercial terms the parties include, in the terms of the instrument executed to effect the variation, provision to substitute reference to the *FSA* in place of any reference to the *firm's previous regulator*; or
 - (b) in the case of a subordinated loan agreement, qualifying undertaking or other relevant instrument to which the *firm's previous regulator* is party, the parties treat the rights accorded to the self regulating organisation under the relevant instrument as having been assigned to the *FSA* immediately before *commencement*.

1.2.8 G An instrument treated in an equivalent manner would, for example, include (in relation to a *personal investment firm*) a "PASS loan".

2 Chapter 2: Professional firms

2.1 Application

- 2.1.1 R (1) This chapter applies to an *authorised professional firm* in accordance with *IPRU (INV)* 2.1.2R and 2.1.3R.
- (2) The definitions in the *Glossary* annexed to the General Provisions Instrument 2001 (which is applicable to the *Handbook* generally) apply to this chapter.
- 2.1.2 R (1) An *authorised professional firm* of a kind falling within (2) must comply with such of *IPRU (INV)* 3, 5, 10 or 13 which in accordance with *IPRU (INV)* 2.1.4R, most appropriately correlates to the type and scale of the business which it conducts.
- (2) The type of *authorised professional firm* to which (1) applies is one:
- (a) which is also an *ISD investment firm*;
 - (b) which acts as a *market maker*;
 - (c) which acts as a *stabilising manager*;
 - (d) which acts as the trustee or operator of a *regulated collective investment scheme*;
 - (e) which acts as a *broker fund adviser* or otherwise participates in a *broker fund* arrangement;
 - (f) whose main business, having regard to (3), is not the practice of its profession or professions; or
 - (g) whose permission includes a requirement that it acts in conformity with the financial resources *rules* applicable to another type of *firm*.
- (3) For the purposes of (2)(f), a *firm's* professional business practice is not the “main business” of the *firm* unless the proportion of income it derives from *professional fees* is, during its annual accounting period, at least 50% of the *firm's* total income (a temporary variation of not more than 5% may be disregarded for this purpose).

(4) An *authorised professional firm* which, in accordance with (1), is required to comply with *IPRU (INV) 3, 5, 10 or 13* must immediately give notification of that fact to the *FSA* in accordance with *SUP 15.7* (Forms and method of notification).

2.1.3 R An *authorised professional firm* which does not fall within *IPRU (INV) 2.1.2R* must comply with sections 2.2, 2.3 and 2.4 of this chapter.

2.1.4 R This table belongs to *IPRU (INV) 2.1.1R*

TYPE OF BUSINESS ACTIVITY	CHAPTER OF SOURCEBOOK
<p>(i) <i>managing investments</i> other than for <i>private customers</i>; or</p> <p>(ii) <i>OPS activity</i>; or</p> <p>(iii) acting as the manager or trustee of an <i>AUT</i>; or</p> <p>(iv) acting as the <i>ACD</i> or <i>depository</i> of an <i>ICVC</i>; or</p> <p>(v) <i>establishing, operating or winding-up</i> other <i>collective investment schemes</i>; or</p> <p>(vi) <i>safeguarding and administering investments</i>;</p>	<p><i>Investment management firm - IPRU (INV) 5</i></p>
<p>(i) <i>advising on, or arranging deals in, packaged products</i>; or</p> <p>(ii) <i>managing investments for private customers</i>;</p>	<p><i>Personal investment firm - IPRU (INV) 13</i></p>
<p>(i) a <i>regulated activity</i> carried on as a member of an <i>exchange</i>; or</p> <p>(ii) acting as a <i>market maker</i> in <i>securities</i> or <i>derivatives</i>; or</p> <p>(iii) <i>corporate finance business</i>; or</p>	<p><i>Securities and futures firm - IPRU (INV) 10 (ISD firm)</i>; or</p> <p><i>Securities and futures firm - IPRU (INV) 3 (non ISD firm)</i></p>

<p>(iv) dealing or arranging deals in securities or derivatives, other than inter-professional investments; or</p> <p>(v) the provision of clearing services as a clearing firm; or</p> <p>(vi) spread betting;</p>	
--	--

2.1.5 G An *authorised professional firm* will be an *ISD investment firm* if its business activities include the provision of a *core investment service* for a third party. An *authorised professional firm* will not however be an *ISD investment firm* if it falls within one of the exclusions contained in paragraph 2 of Article 2 of the directive. Paragraph 2(c) of Article 2 provides an exclusion for an *authorised professional firm* which provides *core investment services* in an incidental manner in the course of a professional activity (provided that activity is regulated by the *firm's designated professional body*).

2.1.6 G The *FSA* considers the scope of this exclusion cannot be precisely defined. Ultimately questions of interpretation are for the Court to determine. The *FSA* considers that to satisfy the exclusion the services cannot be the major part of the practice of the *firm*. The *FSA* also considers the following factors to be among those that are relevant:

- (1) the scale of *regulated activity* in proportion to other professional services provided;
- (2) whether and to what extent activities that are *regulated activities* are held out as separate services;
- (3) the impression given as to how the *firm* provides *regulated activities*, for example through its advertising or other promotions of its service.

2.2 Financial Resources Requirements

2.2.1 R (1) **A *firm* must be able to meet its liabilities as they fall due.**

(2) **In complying with (1) a *firm* may use any assets which are available to meet any of its liabilities.**

2.2.2 G *Firms* are reminded that:

- (1) requirements relating to the systems and controls which *firms* must establish and maintain for ensuring compliance with financial resources and other requirements are set out in SYSC.
- (2) the financial reports that a *firm* is required to make to the *FSA* are set out in SUP 16.

2.3 Professional Indemnity Insurance

- 2.3.1 R A *firm* must effect and maintain at all times adequate professional indemnity insurance cover for all the business activities which it carries on, or for which it is responsible.
- 2.3.2 E (1) To effect and maintain adequate professional indemnity insurance cover a *firm* should obtain cover which is at least equivalent to the requirements of its *designated professional body* which were in force immediately before *commencement*.
- (2) Compliance with (1) may be relied upon by the *FSA* as tending to establish compliance with *IPRU (INV)* 2.3.1.
- (3) Contravention of (1) may be relied upon by the *FSA* as tending to establish contravention of *IPRU (INV)* 2.3.1.

2.4 Bonding Requirement for Accountants

- 2.4.1 R This section applies to a *firm* of accountants practising as such in the UK.
- 2.4.2 R (1) If the aggregate value of *client money* and *bonded investments* a *firm* holds for a *client* is over £50,000 then the *firm* must ensure that it holds a bond for the excess over £50,000.
- (2) A *firm* must:
- (a) ensure that the bond is in the form prescribed by the *FSA*;
- (b) ensure that the *person* specified to act as trustee in the bond is a *designated professional body* or a solicitor practising as such in the UK;
- (c) ensure that the bond is lodged with the trustee; and
- (d) be able at all times to show that the amount of the bond is sufficient to meet the requirements of (1).
- 2.4.3 R A *firm* must notify the *FSA* immediately:
- (1) of any bond taken out specifying the amount and where it is lodged; and
- (2) of the arrangements it has made to comply with *IPRU (INV)* 2.4.2R if a bond is not renewed or is cancelled.

- 2.4.4 G (1) *Firms* which hold *client money* or *bonded investments* for more than one *client*, may hold one bond to cover all of the *clients* concerned. The bonding requirements may be complied with by taking out a global bond. In firms with numerous offices compliance may be achieved in practice by calculating the requirement based on figures supplied by offices which is likely to be at least quarterly. These figures would need to be supplied and assessed soon after the end of each quarter.
- (2) To ensure the global cover is sufficient, this approach would require an estimated safety margin to be incorporated, to allow for changes in the amounts of *client money*, *investments* or assets held. An additional prudent measure would be to ensure that exceptional amounts of these assets are notified by branch offices so that the *firm* can check whether the safety margin can absorb them and reconsider whether the total global bond cover remains sufficient.
- 2.4.5 G *Firms* which do not expect to hold *bonded investments* or *client money* in excess of the value limit need not hold a bond. However, *firms* may wish to make contingency arrangements with a surety whereby a bond facility is available and can be executed and delivered at short notice.

- 3 Chapter 3: Financial resources for Securities and Futures Firms which are not Investment Firms**
- 3-A R** The definitions in the glossary at Appendix 1 apply to this chapter.
- 3-1 R** This chapter applies to a *securities and futures firm* which is not an *investment firm* or a *category D firm*.
- 3-1A R** This chapter does not apply to an *oil market participant* unless it is a member of a *recognised* or *designated investment exchange* which is, under the rules of that exchange, entitled to trade with other members.
- G An *oil market participant* to which this chapter does not apply is still subject to the requirement of *Principle 4* to have adequate financial resources.
- 3-2 R** A *firm* must at all times have available the amount and type of *financial resources* required by the rules of the *FSA*.
- 3-5 R** A *firm* must notify the *FSA* immediately it becomes aware that it is in breach of, or that it expects shortly to be in breach of, rule 3-2.
- 3-10** Keeping of records
- Records to be up-to-date
- 3-10(1) R** A *firm* must keep accounting records in accordance with rules 3-10 to 3-13 on a continual basis so that at all times records are up-to-date or able to be brought up-to-date within a reasonable time.
- Adequacy of records
- 3-10(2) R** A *firm* must keep accounting records in such a manner that they are sufficient to show and explain the *firm's* transactions and commitments (whether effected on its own behalf or on behalf of others) and in particular so that these records:
- (a) disclose with reasonable accuracy the financial position of the *firm* at any point in time within the previous six years when the *firm* was a member of the *FSA* or a predecessor regulator;
 - (b) demonstrate whether or not the *firm* is or was at that time complying with its *financial resources requirement*; and

- (c) enable the *firm* to prepare within a reasonable time any *financial reporting statement* as at the close of business of any date within the previous six years when the *firm* was regulated by the *FSA* or a predecessor regulator, and such that the statement complies with the requirements of the rules of the *FSA*.

Content of records

3-10(3)

A *firm* must ensure that its accounting records shall as a minimum contain:

- (a) entries from day to day of all sums of money received and expended by the *firm* whether on its behalf or on behalf of others, and the matters in respect of which the receipt and expenditure takes place;
- (b) a record of all income and expenditure of the *firm* explaining its nature;
- (c) a record of all assets and liabilities of the *firm* including any commitments or *contingent liabilities*;
- (d) entries from day to day of all purchases and sales of *investments* by the *firm* distinguishing those which are made by the *firm* on its own account and those which are made by or on behalf of others;
- (e) entries from day to day of the receipt and dispatch of *documents of title* which are in the possession or control of the *firm*; and
- (f) a record of all *investments* or *documents of title* in the possession or control of the *firm* showing the physical location, the beneficial owner, the purpose for which they are held and whether they are subject to any charge.

- G The *FSA* does not consider it possible to prepare an exhaustive and prescriptive list of record keeping requirements applicable to all *firms*. The detailed requirements will vary according to the manner in which the business is structured, organised and managed; its size; and the nature, volume and complexity of its transactions and commitments. The overriding principle, however, is that the records and systems must be adequate to fulfil the general requirements set out in rule 3-10.

3-11 Reconciliation of firm's balances

Reconciliation

- 3-11(1) R (b) **A firm must reconcile all balances and positions with exchanges, approved exchanges, clearing houses and intermediate brokers as recorded by the firm to the balance or position on a statement or circularisation obtained by the firm from the exchange etc and must correct any differences by agreement with the exchange etc on a timely basis.**
- (c) **A firm must perform reconciliations under (b) above as frequently as is appropriate for the volume of transactions on the accounts and in any event not less than once every five weeks.**
- (d) **A firm must reconcile all balances and securities positions with each market counterparty which is a member of an exchange or approved exchange as recorded by the firm to the balance or position on a statement or circularisation obtained by the firm from the market counterparty except to the extent that the balances and securities positions due to and from the market counterparty have been agreed by other means, and must correct any differences by agreement with the market counterparty on a timely basis. ***
- (e) **A firm must perform reconciliations under (d) above as frequently as is appropriate for the volume of transactions on the accounts and in any event not less than once every year.**

Circularisation

- 3-11(2) **A firm must circularise or request statements from banks, building societies, exchanges, approved exchanges, clearing houses, intermediate brokers and market counterparties which are members of exchanges or approved exchanges in good time in order to be able to comply with (1) above.**

Response to requests

- 3-11(3) **A firm must use its best endeavours to respond within one month of receipt to any circularisation from another firm requesting confirmation of outstanding balances.**

* For guidance notes on the reconciliation of a firm's balances with market counterparties see, **Appendix 20**

3-12 Risk management and internal control

Exposure limits

- 3-12(1)** R **A *firm* must ensure that its accounting and other records contain details of exposure limits for trading positions, and for commitments under its *ACMP*, which are appropriate to the type, nature and volume of business undertaken and that the information contained in the records is capable of being summarised in such a way as to enable actual exposures to be measured readily and regularly against these limits.**

Management information

- 3-12(2)** R **A *firm* must maintain its records in a manner such that they disclose, or are capable of disclosing, in a prompt and appropriate fashion, the financial and business information which will enable the *firm's* management to:**
- (a) identify, quantify, control and manage the *firm's* risk exposures;**
 - (b) make timely and informed decisions;**
 - (c) monitor the performance of all aspects of the *firm's* business on an up-to-date basis;**
 - (d) monitor the quality of the *firm's* assets; and**
 - (e) safeguard the assets of the *firm*, including assets for which the *firm* is responsible belonging to *customers* and other persons.**

3-13 Nature, accessibility and retention of records

Nature of records

- 3-13(1)** R **(a) A *firm* may keep a record in a form other than a document or copy of a document provided that the record can be reproduced in hard printed form.**
- (b) Where all the records relating to a *counterparty* are not kept together, a *firm* must ensure that each location where documents relating to that *counterparty* are retained contains an indication that other records relating to that *counterparty* exist and how access to them can be obtained.**

- (c) **A *firm* may accept and rely on records supplied by a third party so long as those records are capable of being and are reconciled with records held by the *firm*.**
- (d) **A *firm*'s records must generally be in English but may be in another language if the *firm* has facilities for producing a translation of the record into English within a reasonable time of any request for production of such a translation being made by the *FSA* or the *firm*'s auditor or *reporting accountant*.**

Audit trail

- 3-13(3) A *firm* must record the information required by rules 3-10 to 3-13 in such a way as to enable a particular transaction to be identified at any time and traced through the accounting systems of the *firm*, in particular in such manner as to enable early identification of aggregates and of the particular items which have contributed to those aggregates.**

Prompt access

- 3-13(3) R A *firm* must ensure that all records are arranged, filed and indexed so as to permit prompt access to any particular record.**

Retention of records

- 3-13(4) R**
- (a) **A *firm* must keep all records required by rules 3-10 to 3-13 as well as any working papers necessary to show the preparation of any *reporting statement* or any other periodic return to the *FSA*.**
 - (b) **A *firm* must keep these records and working papers for a period of six years after the date on which they are first made or prepared.**
 - (c) **During the most recent of those years, a *firm* must keep these records and working papers either at a place where the *firm* carries on business or in such a manner that they can be produced at such a place within 24 hours of their being requested and after the first year in such a manner that they can be produced at a place of business of the *firm* within 48 hours.**

Security of records

- 3-13(5) R A *firm* must maintain adequate procedures for the maintenance, security, privacy and preservation of records, working papers and *documents of title* belonging to the *firm* or others so that they are reasonably safeguarded against loss, unauthorised access, alteration or destruction.**

Valuation of positions *

- 3-41(9) R** A *firm* must value a position on a prudent and consistent basis, as well as having regard to the liquidity of the instrument concerned and any special factors which may adversely affect the closure of the position, and must adopt the following general policies:
- (a) a position must be valued at its close out price (close out price means that a long position shall be valued at current bid price and a short position at current offer price); where firm two way prices are not available a *firm* must value its position in accordance with the notes to this rule; *
 - (b) where a *firm* is entitled to use a risk assessment model in the calculation of its *PRR* on *options* positions, it may value its *options* using the values derived from the model;
 - (c) where a *firm* does not use a model as described in (b) above and prices are not published for its *options* positions, a *firm* must determine the *mark to market* value as follows:
 - (i) for purchased *options*, the *mark to market* value must be the product of:
 - (aa) the *in the money* amount; and
 - (bb) the quantity underlying the *option*;
 - (ii) for written *options* the *mark to market* value must be the initial premium received for the *option* plus the product of:
 - (aa) the amount by which the current *in the money* amount exceeds either the *in the money* amount at the time the contract was written, or zero if the contract was *out of the money* at the time it was written; and
 - (bb) the quantity underlying the *option*;
 - (d) a *firm* must calculate the value of a *swap* contract or an *FRA* having regard to the net present value of the *future* cash flows of the contract, using current interest rates relevant to the periods in which the cash flows will arise;

* For notes on the valuation of positions, see Appendix 21

- (e) notwithstanding (d) above, a *firm* may refrain from marking a *swap* or an *FRA* to market where it enters into such transactions on a matched principal basis, provided that it is confident that such positions are fully matched;**
 - (f) a *firm* that is a partnership which experiences *exceptional* administrative or technical difficulties complying with the valuation procedure outlined above should notify the *FSA* immediately; and**
 - (g) in the case of interest rate *swaps*, currency *swaps* and *FRAs*, a *firm* may limit the bid/offer valuation required under (a) to its net position.**
- G The *FSA* does not lay down a precise formula for calculating the value of *swaps* and *FRAs* for the purposes of this rule. However, it will expect a *firm* to employ a valuation formula which accords with generally accepted market practice.
- G The *FSA* may permit by modification or waiver of this rule an alternative arrangement if it is satisfied that neither the *firm* nor its *counterparties* will be put at risk by the adoption of that alternative procedure.

3-60 FIRMS TO WHICH RULES 3-61 TO 3-182 APPLY

Broad scope firms

- 3-60(1)** R Rules 3-61 to 3-182 apply to a *broad scope firm* except that rules 3-80 to 3-178 do not apply to a *venture capital firm*.

Arrangers

- 3-60(2)** R Rules 3-61 to 3-182 apply to an *arranger*, except that:

- (a) Rule 3-61 and rules 3-63 to 3-182 do not apply to a *corporate finance advisory firm* or a *derivative fund manager*; and
- (b) rules 3-80 to 3-178 do not apply to a *venture capital firm*.

Corporate finance advisory firms

- 3-60(3)** R Rule 3-61 and rules 3-63 to 3-182 do not apply to a *corporate finance advisory firm* which must instead comply with the following two capital requirements at all times:

- (a) *tangible net worth* must exceed £10,000; and
- (b) net current assets (as calculated for the purposes of producing a balance sheet in accordance with Format 1 of the Balance Sheet Format of Schedule 4 to the Companies Act 1985) must exceed £10,000.

Advisers and locals/traded options market makers

- 3-60(4)** R Rules 3-61 to 3-182 do not apply to an *adviser* or *local/traded options market maker* which must instead comply with the following capital requirements at all times:

- (a) *tangible net worth* must be positive;
- (b) in the case of an *adviser*, net current assets (as calculated for the purposes of producing a balance sheet in accordance with Format 1 of the Balance Sheet Format of Schedule 4 to the Companies Act 1985) must be positive; and
- (c) in the case of a *local/traded options market maker*, the *firm* must be able to meet its liabilities as they fall due.

Derivative fund managers

- 3-60(5)** R Rule 3-61 and rules 3-63 to 3-182 do not apply to a *derivative fund manager* which must instead comply with the following two capital requirements at all times:

- (a) ***tangible net worth*** must exceed £10,000; and
- (b) **net current assets** (as calculated for the purposes of producing a balance sheet in accordance with Format 1 of the Balance Sheet Format of Schedule 4 to the Companies Act 1985), excluding investment in any pooled fund or *unregulated collective investment scheme* which it manages, must exceed £10,000.

Dematerialised instruction transmitters

3-60(6) R Rules 3-61 to 3-182 apply to a *dematerialised instruction transmitter*.

3-61 THE BASIC COMPUTATION

3-61(1) R A firm must, at all times, maintain *financial resources* in excess of its *financial resources requirement*.

3-61(2) R A firm must calculate its *financial resources* and its *financial resources requirement* in accordance with the table below and rules 3-62 to 3-182.

R Table 3-61. The basic financial resources calculation

Financial resources	Financial resources requirement
Capital ("A") the sum of - - ordinary share capital - preference share capital - share premium account - profit and loss account - other approved reserves, and - partners' current and capital accounts Intangible assets ("B") $A - B = \textit{tangible net worth}$ ("C")	Primary requirement ("E") the sum of - - base requirement - total liquidity adjustment - charged assets - <i>contingent liabilities</i> - deficiencies in <i>subsidiaries</i>
Eligible capital substitutes ("D") the sum of - - subordinated loans - <i>approved bank bonds</i> - approved undertakings	Total PRR ("F") Total CRR ("G")
$C + D = \textit{financial resources}$	$E + F + G = \textit{financial resources requirement}$

- 3-62** Tangible net worth
- Calculation
- 3-62(1)** R **A firm must calculate its *tangible net worth* in accordance with table 3-61, subject to (2), (3) and (4) below.**
- Redeemable shares
- 3-62(2)** R **A firm may include redeemable *share* capital as part of *tangible net worth* only if:**
- (a) **the firm's memorandum and articles of association or a shareholders' agreement contain provisions that:**
 - (i) **redemption may not occur if the firm's financial resources after redemption would be less than or equal to 120% of its financial resources requirement;**
 - (ii) **dividends may not be paid if the firm's financial resources after payment would be less than or equal to 120% of its financial resources requirement; and**
 - (iii) **in the case of a shareholder's agreement, any assignee of the shares is subject to the provisions of the agreement; and**
 - (b) **the firm, before issuing any preference shares, notifies the FSA of its intention to do so.**
- Notice of redemption
- 3-62(3)** R **A firm must provide the FSA with six months' written notice of redemption of any of its redeemable shares.**
- Approved reserves
- 3-62(4)** R **A firm may not include reserves other than retained profits as part of *tangible net worth*.**
- G **A firm that wishes to include other reserves will need to apply for a modification or waiver of this rule.**

3-63 Eligible capital substitutes

Calculation

3-63(1) R A firm must calculate its *eligible capital substitutes* in accordance with table 3-61, subject to (2) to (9) below.

Approved eligible capital substitutes

3-63(2) R A firm may treat a subordinated loan, *approved bank bond* or approved undertaking as an *eligible capital substitute* only if it is:

(a) drawn up in accordance with the relevant standard form obtained from the *FSA*; and

(b) signed by authorised signatories of all the parties.

G If a *firm* wishes to use a form which differs from the standard form it will need to seek a modification to, or modification or waiver of, this rule.

G A *firm* may, under the provisions of IPRU(INV) 1.2.5R continue to treat a subordinated loan, bank bond or approved undertaking as an eligible capital substitute if it was entitled to do so immediately prior to the *specified day*, and the other conditions set out in IPRU(INV) 1.2.5R are met.

Approved lenders

3-63(3) R A firm may treat a subordinated loan as an *eligible capital substitute* only if the lender is:

(a) the *firm's controller*;

(b) a *regulated banking institution*;

(c) an *approved person*; or

(d) a *regulated financial institution*.

G If the *firm* wishes to include as an *eligible capital substitute* a subordinated loan from a lender not within the above list, it will need to apply for a modification or modification or waiver of 3-63.

Notice of repayment and termination

- 3-63(4) R** **A firm must provide the FSA with five business days written notice of any repayment, prepayment or termination of a subordinated loan, approved bank bond or approved undertaking, except when the firm's financial resources after payment of interest or principal etc would be less than or equal to 120% of its financial resources requirement, in which case the firm must not repay, prepay or terminate any subordinated loan, approved bank bond or approved undertaking otherwise than in accordance with the terms of the relevant agreement.**

Amounts repayable within three months

- 3-63(5) R** **A firm may not treat any amount of a subordinated loan which is repayable within three months as an eligible capital substitute.**

Limit on eligible capital substitutes

- 3-63(6) R** **The total amount of eligible capital substitutes which a firm may take into account in its financial resources must not exceed four times tangible net worth.**

Limit on approved bank bonds

- 3-63(7) R** **The total of approved bank bonds which a firm may treat as an eligible capital substitute must not exceed:**
- (a) 30% of the base requirement; and**
 - (b) CRR on exchange-traded-margined-transactions plus concentrated risk to one counterparty arising from exchange-traded-margined-transactions calculated under rules 3-173A and 3-175.**

Limit on approved undertakings

- 3-63(8) R** **A firm may only treat approved undertakings as an eligible capital substitute to the extent that its approved bank bonds are less than 30% of its base requirement.**

Approved undertakings

- 3-63(9) R** **A firm may treat an undertaking as an eligible capital substitute only if the provider of the undertaking is:**
- (a) a regulated banking institution; or**
 - (b) a regulated financial institution;**

- G A *firm* that wishes to include an undertaking where the provider is neither of the above, it will need to seek a modification or waiver from the FSA.

PRIMARY REQUIREMENT

Definition of primary requirement - General rule

- 3-70 R A *firm's primary requirement* is the sum of:
- (a) the base requirement calculated in accordance with rule 3-71;
 - (b) the total liquidity adjustment calculated in accordance with rule 3-75;
 - (c) charged assets calculated in accordance with rule 3-76;
 - (d) *contingent liabilities* calculated in accordance with rule 3-77; and
 - (e) deficiencies in *subsidiaries* calculated in accordance with rule 3-78;

Base requirement - General rule

- 3-71 R A *firm's base requirement* is the highest of:
- (a) the absolute minimum requirement, calculated in accordance with rule 3-72;
 - (b) the expenditure requirement, calculated in accordance with rule 3-73; or
 - (c) the volume of business requirement, calculated in accordance with rule 3-74.

Absolute minimum requirement - General rule

- 3-72 R A *firm's absolute minimum requirement* is:
- (a) for an *arranger*: £10,000;
 - (b) for a *financial bookmaker*: £50,000;
 - (c) for an *agency broker*: £50,000;
 - (d) for a *firm* which handles *client money* and assets relating to *margined transactions* and segregates all *money* received from clients as *client money*: £50,000;
 - (e) for a *non clearing floor member*: £50,000;

(f) for a *broad scope firm* other than one within (b) to (e) above: £100,000; or

(g) for a *dematerialised instruction transmitter*: £50,000.

3-73 Expenditure requirement

General rule

3-73(1) R A *firm's* expenditure requirement is:

(a) for an *investment manager* or an *introducing broker* who is not responsible for its *counterparties'* performance or a *venture capital firm* which is an *arranger* or a *model A clearing firm* or a *dematerialised instruction transmitter*: 6/52nds of relevant *annual expenditure*; or

(b) for any other *firm*: 1/4 of relevant *annual expenditure*.

Calculation of relevant annual expenditure

3-73(2) R Subject to (3) and (4) below, a *firm* must calculate its *relevant annual expenditure* with reference to the *firm's* most recent *audited annual financial statements* submitted to the *FSA*, as follows:

(a) its total revenue; and

(b) any loss before taxation;

less the aggregate of the following items:

(c) profit before taxation;

(d) *bonuses*;

(e) *profit shares* and other appropriations of profit, except for fixed or guaranteed remuneration of a partner which is payable even if the *firm* makes a loss for the year;

(f) paid *commissions shared*, other than to *employees*, *directors*, half commission men or *appointed representatives* of the *firm*;

(g) fees, brokerage and other charges paid to *clearing houses*, *exchanges*, *approved exchanges* and *intermediate brokers* for the purposes of executing, registering or clearing transactions;

(h) interest payable to *counterparties*;

(i) interest payable on borrowings to finance the *firm's investment business* and *associated business*; and

- (j) **exceptional or extraordinary items**, provided that it first notify the *FSA* in writing of the nature and amount of the item(s) concerned.

Absence of audited annual financial statements

- 3-73(3) R** If a *firm* does not have **audited annual financial statements**, it must:
- (a) where it has just commenced trading or has not been authorised long enough to have submitted **audited annual financial statements** to the *FSA* (or to the *FSA*'s predecessor), base its **relevant annual expenditure** on budgeted or other accounts which it submitted to the *FSA* (or to the *FSA*'s predecessor) as part of its application; or
 - (b) where its accounts do not represent a 12 month period, calculate **relevant annual expenditure** on a proportionate basis agreed by the *FSA*.

Adjustments to relevant annual expenditure

- 3-73(4) R** A *firm* must use a **relevant annual expenditure** adjusted to take account of its circumstances where:
- (a) there has been a significant change in the circumstances or activities of the *firm*; or
 - (b) the *firm* has a material proportion of its expenditure incurred on its behalf by third parties and such expenditure is not fully recharged to the *firm*.
- G FSA would for example consider an application to vary a *firm*'s permitted activity as a significant change.
- G FSA would consider 10% of a *firm*'s expenditure incurred on its behalf by third parties to be material for the purposes of 10-73(4)R.
- G If a *firm* is in any doubt, it should always seek guidance from the *FSA*.

Application

- 3-74(1) R** The volume of business requirement applies only to a *firm* which settles **marginised transactions for counterparties**.

Marginised transactions

- 3-74(2) R** A *firm*'s volume of business requirement is 3.5% of the aggregate gross amounts of any initial margin (as calculated in (3) below) of the *firm*'s counterparties at the relevant time.

Initial margin

- 3-74(3) R A counterparty's initial margin for the purposes of (2) above is the sum of the following amounts:**
- (a) in respect of exchange traded transactions, the counterparty's initial margin requirement; and**
 - (b) in respect of OTC transactions, the amount of margin that the counterparty is required by the firm to deposit.**

3-75 Liquidity adjustment

General rule

- 3-75(1) R A firm's total liquidity adjustment is the sum of amounts specified as liquidity adjustments below.**

Intangible assets

- 3-75(2) R The liquidity adjustment for intangible assets is nil (these must be deducted from capital to arrive at tangible net worth under 3-62).**

Tangible fixed assets

- 3-75(3) R The liquidity adjustment for tangible fixed assets is the total net book value of such assets, with the exception of land and buildings used as security for non recourse loans or other loans which a firm must treat under (4) and (5) below.**

Land and buildings used as security for non recourse loans

- 3-75(4) R The liquidity adjustment for land or buildings used as security for a non recourse loan is the difference between the net book value of the land or building and the loan principal outstanding, except where the loan principal outstanding is higher than the net book value in which case there is no liquidity adjustment.**

Land and buildings used as security for other loans

- 3-75(5) R The liquidity adjustment for land or buildings used as security for loans other than non recourse loans is the difference between the net book value of the land or building and the lower of:**
- (a) 85% of a professional valuation of the land and buildings (which must have been carried out in the last two years); or**
 - (b) the principal outstanding,**

except where both (a) and (b) are higher than the net book value in which case there is no liquidity adjustment.

Physical stocks

- 3-75(6) R** The liquidity adjustment for physical stocks is the balance sheet value of such stocks, except for stock positions associated with the *firm's investment business* which are:
- (a) *physical commodities* for which the full contract price has been paid;
 - (b) work in progress and finished goods which result from the processing of *physical commodities*; or
 - (c) raw materials which will be combined with *physical commodities* to produce a finished processed commodity,

in which case there is no liquidity adjustment (but see *PRR* rules).

Investments in connected companies

- 3-75(7) R** The liquidity adjustment for an *investment* in a *connected company* is the balance sheet value of the *investment*, except where the *investment* is a *marketable investment* which is not in a *subsidiary*, in which case there is no liquidity adjustment but such *investment* must be subject to the *PRR* rules.

Other investments

- 3-75(8) R** Other *investments* have no liquidity adjustment but instead are subject to the *PRR* rules.

Prepayments

- 3-75(9) R** The liquidity adjustment for a prepayment is the balance sheet value of that prepayment, except that there is no liquidity adjustment to the extent that it relates to goods and services to be received or performed in the next three months (or six weeks in the case of an *investment manager*; an *introducing broker* who is not responsible for its *counterparties'* performance; a *venture capital firm* which is an *arranger*; or a *model A clearing firm*).

Debtors arising from investment business or dealing activities

- 3-75(10) R** Debtors arising from *investment business* or *dealing activities* have no liquidity adjustment but instead are subject to the *CRR* rules.

Other debtors

- 3-75(11) R** The liquidity adjustment for debtors other than debtors arising from *investment business or dealing activities* is the balance sheet value of the debtor, except that there is no liquidity adjustment in the following circumstances:
- (a) amounts due from *connected companies* which are *adequately secured* and are repayable within 90 days;
 - (b) unsecured amounts due at the request of the *firm* from a *connected company* which is a *regulated banking institution* within 90 days;
 - (c) unsecured amounts due at the request of the *firm* from a *connected company* which is a *regulated financial institution* within seven days;
 - (d) having given prior written notice to the *FSA*, unsecured amounts receivable at the request of the *firm* from a *connected company* within seven days under an *approved treasury arrangement*, up to a maximum of the *firm's* excess of *financial resources* over its *financial resources requirement* before taking into account the *approved treasury arrangement*;
 - (e) amounts receivable in respect of cash dividends declared by either *exchange traded companies* or *authorised persons* which have been outstanding for 30 days or less from the date the dividends were due to be paid;
 - (f) amounts accrued or receivable in respect of interest on *marketable investments* which have been outstanding for 30 days or less from the date the interest was due to be paid;
 - (g) amounts receivable on U.K. value added tax which have been outstanding for 30 days or less from the date that the value added tax return was due to be received by HM Customs & Excise; and
 - (h) amounts receivable on taxation other than U.K. value added tax which have been agreed with the appropriate tax authorities and have been outstanding for 30 days or less from the date that the amounts were due to be received.

Cash deposits

- 3-75(12) R** The liquidity adjustment for a cash deposit is the balance sheet value of the deposit, except for *qualifying deposits* and those other deposits which are subject to rule 3-180.

Other assets

- 3-75(13) R** The liquidity adjustment for assets other than those specifically stated above is the balance sheet value of the asset concerned.

Charged assets - General rule

- 3-76 R** A *firm* must calculate the *primary requirement* for charged assets as the aggregate balance sheet value of each asset of the *firm* over which a third party has the right of *sale* or retention on default by the *firm* except:

- (a) to the extent of any liability of the *firm* plus a reasonable margin in respect of the charged asset; or
- (b) where the asset is collateral for a transaction which is subject to the *CRR* rules.

Contingent liabilities - General rule

- 3-77 R** A *firm* must calculate a *primary requirement* for each of its *contingent liabilities*.

Deficiencies in subsidiaries - General rule

- 3-78 R** A *firm* must calculate the *primary requirement* for deficiencies in *subsidiaries* as an amount equal to any deficiency in shareholders' funds at any time of a *subsidiary* of the *firm* except to the extent that:

- (a) provision has already been made by the *firm*; or
- (b) the *firm* has already calculated a liquidity adjustment or *CRR* because the deficiency arises or partially arises out of a liability of the *subsidiary* to the *firm*.

POSITION RISK REQUIREMENT

3-80 GENERAL PRINCIPLES OF PRR

Application

- 3-80(1) R Rules 3-80 to 3-169B apply to any *arranger or broad scope firm*, except a *venture capital firm* or a *corporate finance advisory firm*.**

Obligation to calculate PRR *

- 3-80(2) R A *firm* must calculate a minimum *PRR* in respect of any position according to one of the methods available to it under the rules below, as appropriate, but may calculate a higher *PRR* in any other way at its option.**

- G Notwithstanding the methods available for calculating the *PRR*, a *firm* may, in respect of any individual position, calculate a *PRR* which is more conservative than that calculated under the appropriate rule. However, in that case, the *firm* will need to be able to demonstrate that, in all circumstances, the calculation being employed does give rise to a higher *PRR* for the position.

Frequency of calculation

- 3-80(3) R A *firm* must be able to monitor its *total PRR* on an intra-day basis and must re-calculate it in a full and detailed manner before executing any trade which is likely to increase it to such a level that the *firm's financial resources requirement* might exceed the *firm's financial resources*.**

Marking to market

- 3-80(4) R A *firm* must *mark to market* its positions, whether or not on the balance sheet, in accordance with the valuation rule 3-41(9) at least once every *business day* and more frequently as appropriate.**

Marketable investments

- 3-80(4A) R A *firm* must calculate the *PRR* for any position which is a *marketable investment* as 8% of the *mark to market* value of the position, other than in respect of a derivative (whatever the nature of the underlying instrument) or off balance sheet contract, when the *PRR* is 8% of the value of the notional position underlying the contract.**

* For guidance notes as to which methods to apply, see **Appendix 20**

Non marketable investments

- 3-80(5) R** **A firm must calculate the PRR for any position which is not a marketable investment as 100% of the mark to market value of the position, other than in respect of a derivative (whatever the nature of the underlying instrument) or off balance sheet contract, when the PRR is 100% of the value of the notional position underlying the contract.**

Instruments for which no PRA has been specified

- 3-80(6) R** **A firm must calculate the PRR for any on or off balance sheet position in a marketable investment for which no PRA is specified under the PRR rules as an appropriate percentage of the current mark to market value of any position or notional position underlying the contract and must notify the FSA of the terms of the instrument and the proposed PRR treatment.**

- 3-80(6A) E** (1) In 3-80(6) “an appropriate percentage” is:
- (a) 100%; or
 - (b) A percentage which takes account of the characteristics of the instrument concerned and of discussions with the FSA or a predecessor regulator;
- (2) Compliance with (1) may be relied on as tending to establish compliance with 3-80(6).
- (3) Contravention of (1) may be relied on as tending to establish contravention of 3-80(6).

Group hedging arrangements

- 3-80(7) R** **A firm may amend its PRR to take account of a group hedging arrangement to which the firm is party, provided the group hedging arrangement is recorded by an agreement in writing between all the relevant parties and the firm first notifies the FSA in writing of the terms of the arrangement and of the proposed amendment to the PRR.**

Alternative treatments

- 3-80(8) R** **Where a firm has the alternative of treating a position under two or more different methods or treatments within methods, it must treat the position under one of those methods.**

Simpler approach to PRR calculation

- 3-80(9) R As a simpler approach to calculating PRR, a firm may calculate the total PRR by multiplying all positions in marketable investments by the relevant percentage stated in the table below and summing the results.**

TABLE 3-80(9)

Position risk requirement - simpler approach

C: Stock positions in *physical commodities*

Stock positions in <i>physical commodities</i> associated with a firm's investment business	30% of realisable value
---	-------------------------

D: Certain *derivatives* and foreign exchange

<i>Exchange traded futures</i> and written <i>options</i>	4 x initial margin requirement
<i>OTC futures</i> and written <i>options</i>	Apply the percentage shown in C above to the <i>mark to market</i> value of the underlying position
Purchased <i>options</i>	Apply the percentage shown in C above to the <i>mark to market</i> value of the underlying position but the result may be limited to the <i>mark to market</i> value of the <i>option</i>
<i>Contracts for differences</i>	20% of the <i>mark to market</i> value of the contract
Foreign exchange exposure	10% of the net open long position

F: Other investments

Single premium unit linked bonds and units in a <i>regulated collective investment scheme</i>	50% of realisable value
Any other <i>investments</i>	100% of <i>mark to market</i> value of <i>investment</i> or underlying instrument
Notes	
	Percentage
1	A percentage means, unless otherwise indicated, a percentage of the <i>mark to market</i> value of the aggregate of the long and the short positions in the particular category.

	Netting	
2	The long or (short position) in a particular instrument is the net of any long or short positions held in that same instrument (i.e. a long position in ICI shares can be offset on a <i>share for share</i> basis against a short position in ICI shares) but positions in similar instruments (e.g. ICI shares against BP shares) cannot be offset in this way.	
	Stock positions in physical commodities	
3	A stock position in <i>physical commodities</i> is the <i>mark to market</i> value of the sum of -	
	(i)	commodities where the full contract price has been paid;
	(ii)	work in progress and finished goods which result from the processing of commodities; and
	(iii)	raw materials which will be combined with commodities to produce a finished processed commodity.
4	A stock position in <i>physical commodities</i> is regarded as being associated with a <i>firm's investment business</i> if the contract associated with the <i>physical commodity</i> was made for <i>investment</i> rather than commercial purposes. Indications of this are -	
	(i)	the contract is <i>exchange traded</i> or
	(ii)	the performance of the contract is guaranteed by an <i>exchange</i> an <i>approved exchange</i> or a <i>clearing house</i> .

Models approach to PRR calculation

- 3-80(10) G A *firm* that wishes to use its internal model to calculate *PRR* in respect of all, or some, of its positions will need to apply for a modification or waiver of the relevant *FSA* rules.
- G Further guidance on the criteria which such models must meet, and the review process, can be obtained from the *FSA*.

FOREIGN CURRENCY EXPOSURES AND FOREIGN CURRENCY DERIVATIVES METHODS

Summary of foreign currency exposures and derivatives methods

3-150 R A firm must calculate an additional *PRR* under the *foreign currency exposures* or *foreign currency derivatives method* where it has any asset or liability or any off-balance sheet contract which is denominated in a currency other than the currency of its books of account. For these purposes, gold must be treated as another currency.

3-151 Types of exposures to be treated as foreign currency exposures

General rule

3-151(1) R A firm must apply the *foreign currency exposures* or *foreign currency derivatives method* to the following positions, identifying each currency separately including the currency of its books of account:

- (a) any currency *future* at the nominal value of the contract;**
- (b) any currency *option*;**
- (c) any forward contract for the purchase or *sale* at the contract value, including any future exchange of principal associated with *cross-currency swaps*, but excluding any purchase or *sale* of known but unaccrued future income or expense;**
- (d) any other balance sheet asset or liability; and**
- (e) any other off balance sheet commitment to purchase or sell an asset denominated in that currency.**

Dual currency bonds

3-151(2) R In respect of a *dual currency bond*, a firm must include within the *foreign currency exposures method* a notional *forward* contract:

- (a) for the purchase of the redemption currency derived from the *dual currency bond*, for an amount determined by reference to the terms of issue of the *dual currency bond*; or**
- (b) for the *sale* of the issue currency, for an amount equal to the *mark to market* value of the *dual currency bond*, with a deemed settlement date equal to the maturity of the bond.**

Determining the currency of investments

3-151(3) R For the purposes of determining the currency in which a position in an *investment* is denominated, a firm must apply the following principles:

- (a) where the price of an instrument is quoted in only one currency, a position in that instrument must be treated as an asset or liability in that currency;
- (b) where the price of an instrument is quoted in more than one currency, a position in that instrument must be treated as an asset or liability in the currency in which the *firm* accounts for the instrument; and
- (c) notwithstanding (a) and (b) above, a position in an American depository receipt or similar form of instrument must be treated as a position, translated at current spot rate, in the currency of the underlying instrument.

3-152 Application of *foreign currency exposures* and *derivatives* methods to foreign currency *derivatives*

Risk assessment models

3-152(1) G A *firm* may seek a modification or waiver from the FSA to use a risk assessment model in respect of its currency *options* to calculate notional positions which may be included in the *foreign currency exposures method*, provided the model forms part of the day to day management supervision of the *firm's options* business and meets other criteria (further guidance on the criteria for the approval of such models can be obtained from the FSA).

Obligatory use of foreign currency derivatives method

3-152(2) R A *firm* must apply the *foreign currency derivatives method* to any currency *option* which is less than 5% “in the money”.

Optional use of foreign currency derivatives method

3-152(3) R Subject to (2) above, a *firm* may apply the *foreign currency derivatives method* to any *exchange traded currency option* or *future* instead of applying the *foreign currency exposures method*.

Obligatory use of foreign currency exposures method

3-152(4) R A *firm* must apply the *foreign currency exposures method* to any *OTC currency future*.

Calculation of “in the money”

3-152(5) R For the purposes of this rule, a *firm* must determine the extent to which the *option* contract is “in the money” by reference to the difference between the exercise price and the current forward rate for the final date on which the *option* may be exercised as a percentage of that forward rate.

3-153 Foreign currency derivatives method

Exchange traded futures and options

- 3-153(1) R** (a) **A firm must calculate the *PRR* of an *exchange traded* foreign currency *future* or *option* as 100% of the *initial margin requirement* of the *exchange* or *approved exchange* or, where the *initial margin requirement* is zero, under (2) below.**
- (b) **Where the *exchange* or *approved exchange* calculates the margin requirement on an overall basis, the *PRR* must equal that margin requirement.**
- (c) **Where the *exchange* offsets *futures* and *options* in the margin calculations, the *firm* may take into account such offsetting.**

OTC foreign currency options

- 3-153(2) R** **A firm must calculate the *PRR* of an *OTC* foreign currency *option* as 5% of the nominal value of the contract, adjusted as follows:**
- (a) **long position: the *PRR* may be restricted to the *mark to market* value of the *option*; and**
- (b) **short position: the *PRR* may be reduced (but to no less than zero) by any excess of the exercise value over the *mark to market* value for a *call option* or vice versa for a *put option*.**

3-154 Foreign currency exposure method

Application

- 3-154(1) R** **A firm must apply the *foreign currency exposure method* to any foreign currency exposure for which the *firm* has not calculated a *PRR* under the *foreign currency derivatives method*.**

Calculation of PRR

- 3-154(2) R** **A firm must calculate a *PRR* for its *foreign currency exposures* as 5% of the aggregate of its net open long positions in each currency, including the currency of the *firm's* books of account when this is a long open position.**

Calculation of net open position

- 3-154(3) R** (a) **A firm must calculate a net open position for all currencies including the currency of the *firm's* books of account by netting all *foreign currency exposures* to which the method applies.**

- (b) The net open position for the currency of the *firm's* books of account may be calculated as the difference between the aggregate net open long positions and aggregate net open short positions of all other currencies.

COMMODITIES METHOD

Types of positions to be included in the commodities method

3-166

General rule

- 3-166(1) R A firm must calculate PRR on all positions in commodities in accordance with one of the four approaches set out in rules 3-167 to 3-169A. All spot, physical trading, derivative and other off balance sheet items whose price is affected by changes in commodities prices must be included in the calculation.**

G In general, a commodity is a physical product which is or can be traded on the secondary market. Commodities include precious metals (except gold, which is to be treated as a foreign currency), agricultural products, minerals and base metals, oil and other energy products.

- 3-166(2) R A firm must calculate the PRR for each commodity separately, except that:**

- (a) different sub-categories of the same commodity that are deliverable against each other may be treated together; and
- (b) commodities which are close substitutes for each other, and whose price movements over a minimum period of one year can be shown by the *firm* to exhibit a stable and reliable correlation of at least 0.9, may be treated together.

G The onus is on the *firm* to show that the correlation referred to in (b) above exists on a continuing basis.

- 3-166(3) R (a) Positions which are purely stock financing may be omitted from the calculation of PRR on commodities positions under rule 3-166 and a firm may net notional long and short government securities arising from swaps, FRAs, futures and options on interest rates and debt securities, cash borrowings, qualifying deposits, the cash legs of "repurchase or similar agreements", forward foreign exchange and foreign currency futures against each other, provided:**

- (i) they are in the same currency;
- (ii) the interest rates are within 15 basis points;

- (iii) (aa) if the maturity dates are less than one month, the dates are the same;
- (bb) if the maturity dates are between one month and one year, the dates are within seven days of each other; or
- (cc) if the maturity dates are over one year, the dates are within 30 days of each other;
- (iv) for a cash borrowing, the next interest rate refix date is within two years and repayment is within two years; and
- (v) for a *qualifying deposit*, the next interest rate refix date is within three months.

- (b) In respect of a cash borrowing or *qualifying deposit*, the maturity date is the earlier of the *repayment date* and the next interest rate refix date.
- (c) “Repurchase or similar agreement” means a *repurchase, reverse repurchase, securities or physical commodities lending, securities or physical commodities borrowing, sale and buy back, buy and sale back, undocumented sale and buy back, or undocumented buy and sale back agreement*.

G Stock financing is defined under the Capital Adequacy Directive. Where physical stock has been sold forward, the cost of funding must be locked in until the date of the forward *sale*.

3-167 Simplified approach

- 3-167(1) R All positions in commodities or commodity *derivatives* must be expressed in terms of the standard unit of measurement for that commodity (such as tonnes, barrels or kilos).
- 3-167(2) R A *firm* must multiply the position in each commodity by the current spot price for the commodity converted to the *firm's* reporting currency at current spot rates, and calculate the *PRR* as the sum of:
 - (a) the overall net position multiplied by 15%; and
 - (b) the gross position multiplied by 3%.
- 3-167(3) R A *firm* must sum the results for each commodity to arrive at the total *PRR* for positions treated under the simplified approach.

3-168 Maturity ladder approach

3-168(1) R All positions in each commodity or commodity *derivatives* must be expressed in terms of the standard unit of measurement for that commodity (such as tonnes, barrels or kilos) or in terms of value. A *firm* must allocate net positions on any given day to the appropriate maturity band in the table below. Physical stock must be assigned to the first band.

Table 3-168

Maturity Bands for Maturity Ladder Approach	
0-1 month	1-2 years
1-3 months	2-3 years
3-6 months	over 3 years
6-12 months	

3-168(2) R A *firm* may then offset long and short positions within and between maturity bands in accordance with the following:

- (a) For markets which have daily delivery dates, a *firm* may offset contracts in the same commodity against each other provided that the expiry dates are within 10 *business days* of each other.
- (b) For each maturity band, the *firm* must sum all the open long positions, and sum all the open short positions. The *firm* may then subtract the shorts from the longs to form the overall net position. The amount subtracted is the “matched amount”. The *firm* must multiply twice the matched amount by the spread rate of 1.5%, and then by the spot price for the commodity to arrive at the spread risk charge.

G If the total of all longs in a maturity band is 100, and the total of all shorts is 75, the “matched amount” is 75 and the overall net position 25. Algebraically, if the total of all longs is A, and the total of all shorts is -B, the “matched amount” is $\min\{A,B\}$, and the overall net position is $A-B$.

- (c) The *firm* may then carry backwards or forwards all or part of the overall net position within a band to an adjacent maturity band for further netting allowances. Where this is the case, the *firm* must calculate:

- (i) a carry charge by multiplying the amount carried by the carry rate of 0.6%, and
- (ii) a spread charge, in accordance with (b) above, where the carried position is matched against a position in an adjacent maturity band.

The *firm* may repeat the procedure for carrying positions through to other maturity bands as appropriate. An additional carry charge and spread charge must be calculated at each stage of the process.

- (d) The *firm* must multiply any positions remaining after the permitted offsetting by the outright rate of 15%, and then by the spot price of the commodity to arrive at the outright charge.
- (e) The total *PRR* for each commodity is the sum of the spread risk charge, the carry charge, and the outright charge converted to the *firm's* reporting currency at current spot rates.

Extended maturity ladder approach

- 3-169 R** A *firm* may adopt the same approach as that outlined under rule 3-168(2), but apply the rates in the table below, if the *firm*:
- (a) undertakes significant commodities business, and
 - (b) has a diversified commodities portfolio.

Table 3-169

	Precious metals	Base metals	Soft commodities	Other commodities
Spread rate %	1.0	1.2	1.5	1.5
Carry rate %	0.3	0.5	0.6	0.6
Outright rate %	8.0	10.0	12.0	15.0

Models approach

- 3-169A G** A *firm* may seek a modification or waiver from the *FSA* to use a VaR model as the basis for calculating the *PRR* on its commodity positions.
- G** The *FSA* will grant a modification or waiver permitting the use of a VaR model only where a number of qualitative and quantitative standards are met. In assessing the VaR model the *FSA* will have regard to the matters set out in Chapter TV of IPRU(BANK).

3-169B Options

Proprietary options pricing models

3-169B (1) G A *firm* may seek a modification or waiver from the *FSA* permitting it to use its proprietary *options* pricing model to calculate the *PRR* on *options* positions and their related hedges. The application for a modification or waiver may request that the *firm* be permitted to include an *option* in the maturity ladder approach.

G A *firm* may propose any methodology that it believes will capture spread, carry and outright risks and that reflects its own day-to-day risk management. A *firm* is strongly advised to contact the *FSA* at the earliest point if it is considering introducing a model or adapting an existing one.

No models

3-169B (2) R A *firm* may only include an *option* in the maturity ladder approach, the extended maturity ladder approach or the simplified approach if it is in the money by more than the appropriate outright rate. Such *options* must be included as a position in the underlying commodity, of an amount equal to the “tonnage” underlying the *option* (long or short as appropriate), and with a maturity equal to the expiry date of the spot, forward or futures contract underlying the *option*.

3-169B (3) R An *option* which does not satisfy the condition in rule 3-169B(2) attracts a *PRR* in accordance with the following:

(a) In the case of a purchased *option*, the *PRR* must be the *mark to market* value of the full position underlying the *option* multiplied by the appropriate outright rate, but the result may be limited to the *mark to market* value of the *option*.

(b) In the case of a written *option*, the *PRR* must be the *mark to market* value of the full position underlying the *option* multiplied by the appropriate outright rate, reduced by the out-of-the-money amount. The *PRR* must be limited to zero if the calculation results in a negative number.

G The out-of-the-money amount is any excess of the exercise value over the *mark to market* value of the underlying commodity in the case of a *call option*, or vice versa for a *put option*.

COUNTERPARTY RISK REQUIREMENT

3-170 GENERAL PRINCIPLES OF CRR

Application

- 3-170(1) R (a) Rules 3-170 to 3-182 apply to a *broad scope firm*, except a *venture capital firm* which is subject only to rules 3-180 to 3-182.
- (b) Rules 3-180 to 3-182 apply to an *arranger*, except a *corporate finance advisory firm*.

General rule

- 3-170(2) R A firm must calculate its total CRR on exposures to counterparties as the sum of all the amounts calculated in accordance with the rules referred to in the table below.

- R Table 3-170(2) - Counterparty Risk Requirement

Rules

3-171	Cash against documents transactions
3-173	Free deliveries of physical securities and commodities
3-173A	Derivatives transactions
3-175	Concentrated risk to one counterparty
3-176	Repurchase and reverse repurchase, securities lending and borrowing and sale and buy back agreements
3-177	Money brokers
3-178	Options purchased for a counterparty
3-180	Qualifying and other deposits
3-181	Loans to counterparties
3-182	Other amounts owed to a firm arising out of investment business or investment dealing activities

Frequency of calculation

- 3-170(3) R A firm must calculate its CRR at least once each *business day*; for the purposes of the relevant calculations the firm may use prices of *investments and physical commodities* as at the close of business on the previous day.

Negative amounts

3-170(4) R A firm must not include any CRR if it is a negative amount.

Instruments for which no CRR has been specified

3-170(5) R Where a firm is in doubt as to the classification of an item for the purposes of CRR, the firm must add to its CRR an appropriate part of the exposure on the item concerned and must immediately notify the FSA in writing of details of the transaction, the counterparty and the proposed CRR treatment.

3-170(5A) E (1) In 3-170(5) “an appropriate part” is:

(a) the whole; or

(b) A proportion which takes account of the characteristics of the transaction and the counterparty concerned, and of discussions with the FSA or a predecessor regulator.

(2) Compliance with (1) may be relied on as tending to establish compliance with 3-170(5).

(3) Contravention of (1) may be relied on as tending to establish contravention of 3-170(5).

Provisions

3-170(6) R A firm may reduce the exposure on which its CRR is calculated to the extent that it makes provision for a specific counterparty balance.

Connected companies

3-170(7) R For the avoidance of doubt, a firm must calculate a CRR as appropriate on exposures to or from connected companies.

Basis of valuation

3-170(8) R For the purposes of valuing instruments and physical commodities at market value in the calculation of CRR, a firm must be consistent in the basis it chooses and may use either mid market value or bid and offer prices (as appropriate).

Acceptable collateral

- 3-170(9) R** **A firm may reduce the exposure to a counterparty on which its CRR is calculated to the extent that it holds acceptable collateral from that counterparty.**

Nil weighted counterparty exposures

- 3-170 (10) R** **A firm may disregard any counterparty exposure calculated in accordance with rules 3-171 to 3-182, if the counterparty is or the contract is guaranteed by or is subject to the full faith and credit of a sovereign government or province or state thereof (or a corporation over 75% owned by such government, province or state), which is a member of the OECD and the government, province, state or corporation has not defaulted, or entered into any rescheduling or similar arrangement, or announced the intention of so doing, in respect of itself or its agency's debt within the last five years.**

Netting

- 3-170 (11) R** **A firm which has offsetting exposures in similar types of transactions with a counterparty may offset these in accordance with rules 3-171(2A), 3-173(2A), 3-173A(3), 3-176(3), 3-180(2A), 3-181(1) and 3-182(4A) when calculating CRR if it has a contractual netting agreement with that counterparty, which:**
- (a) covers the transactions which the firm is seeking to net;**
 - (b) creates a single obligation in each currency or a single overall obligation to pay (or receive) a net sum of cash in the event of default, bankruptcy, liquidation or similar circumstances;**
 - (c) does not include a walkaway clause;**
 - (d) is supported by written and reasoned independent legal opinions to the effect that, in the event of a legal challenge, the relevant courts would find the firm's exposure to be the single net amount mentioned in (b) above.**

G Legal opinions should relate to:

- (a) the law of the jurisdiction in which the counterparty is organised;**
- (b) the law of the jurisdiction in which any branch involved is located;**
- (c) the law that governs the agreement and, if different, the law that governs individual transactions pursuant to it; and**
- (d) the law that governs the legal status of the counterparty who is entering into transactions of the type which the firm is seeking to net.**

- G Where a *firm* uses an industry standard agreement and the *firm's* netting/set-off clauses follow the form of that standard agreement, provided a legal opinion has already been obtained on the standard agreement which addresses the capacity of *counterparties* of the type with which the *firm* wishes to contract, that may be relied upon.
- G Legal opinions on netting agreements should be obtained from independent legal advisers with sufficient expertise and experience in this area of law. Opinions from in-house counsel will not be acceptable. Where the regulator of the *counterparty* is not satisfied that the netting agreement is enforceable under its laws, the netting agreement cannot be relied upon regardless of the opinions obtained by the *firm*.

3-171 Cash against documents transactions

General rule

- 3-171(1)** R **A *firm* which enters into a transaction on a cash against documents basis must calculate the *counterparty* exposure for transactions still unsettled 16 calendar days after *settlement day* as set out in (2) below and must then multiply this by the appropriate percentage set out in the table below to calculate a *CRR* for each separate unsettled transaction.**

- R **Table 3-171(1) - Percentage to be applied to the counterparty exposure**

Calendar days after settlement day	Percentage
0 – 15	Nil
16 – 30	25%
31 – 45	50%
46 – 60	75%
Over 60	100%

Counterparty exposure calculation

- 3-171(2)** R (a) **Where a *firm* has neither delivered *securities* or *physical commodities* nor received payment when purchasing *securities* or *physical commodities* for, or selling *securities* or *physical commodities* to, a *counterparty*, the positive *counterparty* exposure is the excess of the contract value over the market value of the *securities* or *physical commodities*.**
- (b) **Where a *firm* has neither received *securities* or *physical commodities* nor made payment when selling *securities* or *physical commodities* for, or purchasing *securities* or *physical commodities* from, a *counterparty*, the positive *counterparty* exposure is the excess of the market value over the contract value of the *securities* or *physical commodities*.**

Netting

- 3-171 (2A)** R **A *firm* may offset positive and negative *counterparty* exposures, calculated in accordance with (2) above, before it multiplies the residual exposure by the appropriate percentage in Table 3-171(1) provided that:**
- (a) the exposures arise on transactions with the same *counterparty*; and**
 - (b) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 3-170(11).**

Sub-total

- 3-171(3)** R **The sum of the amounts calculated in accordance with (1) above is the *firm's* total *CRR* for cash against documents transactions.**

3-173 Free deliveries of physical commodities and securities

General rule

- 3-173(1)** R **When a *firm* makes delivery to a *counterparty* of *physical commodities* or *securities* without receiving payment or pays for *securities* without receiving the certificates of good title, the *firm* must calculate the *free delivery* value for each transaction.**

Free delivery value calculation

- 3-173(2)** R **A *firm* must calculate the *free delivery* value for each transaction as set out below and multiply this value by the appropriate percentage in Table 3-173(2) A for free deliveries of *physical commodities* and Table 3-173 (2) B for free deliveries of *securities* as follows:**
- (a) if the *firm* has delivered *physical commodities* or *securities* to a *counterparty* and has not received payment, the *free delivery* amount is the full amount due to the *firm* (i.e. the contract value);**
 - (b) if the *firm* has made payment to a *counterparty* for *securities* and not received the certificates of good title, the *free delivery* amount is the market value of the *securities*; and**
 - (c) if a *firm* pays for *physical commodities* without receiving delivery or *documents of title* the exposure is to be treated as an unsecured loan to which rule 3-181 applies.**

R Table 3-173(2)A - Percentage to be applied to free deliveries relating to physical commodities

	Nature of counterparty to whom free delivery is made	Business days since delivery		
		0 - 3	4 - 15	earlier of 15 days or agreed contractual payment date
1	<i>Firm does not have an ACMP and delivery of physical commodities is made</i>	15%	100% of contract value	100% of contract value
2	<i>Firm has an ACMP and delivery of physical commodities is made with a settlement day longer than three days from delivery date</i>	15% of contract value		100% of contract value

R Table 3-173(2)B - Percentage to be applied to free deliveries relating to securities

	Nature of counterparty to whom free delivery is made	Business days since delivery		
		0 - 3	4 – 15	over 15
1	A <i>counterparty</i> to whom <i>securities</i> have been delivered or to whom payment for <i>securities</i> has been made	nil	100% of contract or market value	100% of contract or market value
2	A <i>regulated financial institution</i> or <i>regulated banking institution</i> to whom <i>securities</i> have been delivered or payment made with the expectation that market practice will result in a <i>settlement day</i> longer than three days from delivery date	15% of contract or market value		100% of contract or market value
2A	A <i>counterparty</i> to whom <i>securities</i> have been delivered which settle through the Crest system or to whom payment for such <i>securities</i> has been made	15% of contract or market value		100% of contract or market value
3	A manager, underwriter, sub-underwriter or member of a selling syndicate or issuer to whom payment for <i>securities</i> has been made; or a manager of a <i>regulated collective investment scheme</i> to whom units of the scheme have been delivered or payment for units of the scheme has been made	nil		100% of contract or market value or, if the issue is in one of the countries specified in Appendix 46, 15% of contract or market value until the end of the period referred to in that Appendix

Netting

**3-173
(2A)**

R A firm may reduce the *free delivery* value for a transaction calculated in accordance with (2) above, before it multiplies the residual exposure by the appropriate percentage in Table 3-173(2)A or B, by:

- (a) the value of any free payment received from the *counterparty*; or**
- (b) the contract value of any *securities* received free from the *counterparty*,**

provided that:

- (i) the exposures arise on transactions with the same *counterparty*; and
- (ii) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 3-170(11).

Partners and connected persons

- 3-173(3) R** For the purpose of this rule, a *firm* must treat any amount due from a partner or his *connected person* in respect of *investment business* as a *free delivery to a counterparty*.

Sub-total

- 3-173(4) R** The sum of the amounts calculated in accordance with (1), (2) and (3) above is the *firm's* total *CRR* for free deliveries of *physical commodities* and *securities*.

3-173A Derivative transactions

General rule

- 3-173A (1) R** A *firm* must calculate for each *derivative* transaction a *CRR* either:
- (a) by multiplying the *counterparty* exposure calculated in accordance with (2) and (3) below by the appropriate percentage in Table 3-173A(4)A or B, except for single premium *options* purchased on behalf of a *counterparty* and *traditional options* purchased for the *firm's* own account or on behalf of a *counterparty*, which shall be subject to rule 3-178; or
 - (b) after notifying the *FSA* in writing, in accordance with rule 10-174.

Counterparty exposure

- 3-173A (2) R** A *firm* must calculate the *counterparty* exposure on *derivative* transactions in accordance with either (a) or (b) below:
- (a) where a *counterparty* has not fully paid an *initial margin requirement* or *variation margin requirement* on a transaction in a *derivative* listed on an *exchange* or *approved exchange* or met it through the deposit of *acceptable collateral* not otherwise used, the *firm* must calculate the *counterparty* exposure as the shortfall;
 - (b) where the *counterparty* exposure arising from a transaction in a *derivative* is not listed on an *exchange* or *approved exchange*, the *counterparty* exposure is the credit equivalent amount calculated in accordance with Table 3-173A(2A).

R Table 3-173A(2A) – Method of calculating credit equivalent amount

Type of derivative transaction	Credit equivalent amount	
	If A is positive	If A is negative
Interest rate swaps: single currency		
(a) floating rate swapped against floating rate	A	nil
(b) fixed rate swapped against floating rate:		
- under one year to maturity	A	nil
- over one year to five years	A + 0.5% of N	0.5% of N
- over five years	A + 1.5% of N	1.5% of N
Cross-currency interest rate swaps		
- under one year to maturity	A + 1% of N	1% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 7.5% of N	7.5% of N
Other interest rate contracts*		
- under one year to maturity	A	nil
- over one year to five years	A + 0.5% of N	0.5% of N
- over five years	A + 1.5% of N	1.5% of N
Foreign exchange and gold contracts*		
- exchange rate contracts with an original maturity of 14 days or less	nil	nil
- under one year to maturity	A + 1% of N	1% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 7.5% of N	7.5% of N
Equity contracts*		
- under one year to maturity	A + 6% of N	6% of N
- over one year to five years	A + 8% of N	8% of N
- over five years	A + 10% of N	10% of N
Precious metal (not gold) contracts*		
- under one year to maturity	A + 7% of N	7% of N
- over one year to five years	A + 7% of N	7% of N
- over five years	A + 8% of N	8% of N
Commodity contracts*		
- under one year to maturity	A + 10% of N	10% of N
- over one year to five years	A + 12% of N	12% of N
- over five years	A + 15% of N	15% of N
Notes		
<i>FRAs, swaps, futures, purchased options, and other contracts for differences</i>		
A = the replacement cost of the contract		
N = the notional or actual principal amount underlying the contract		

For contracts with multiple exchanges of principal, the % of N has to be multiplied by the remaining number of payments still to be made according to the contract.

In the case of a derivative referenced on a bond which satisfies the criteria for a *qualifying debt security*, the %N applicable to interest rate derivatives may be utilised to calculate the credit equivalent amount. For a derivative referenced on a 'non-qualifying' bond, the credit equivalent amount must be calculated with reference to the %N applicable to equity derivatives.

For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be equal to the time until the next reset date. In the case of interest-rate contracts that meet these criteria and have a remaining maturity of over one year, the percentage is no lower than 0.5%.

R If a firm uses the extended maturity ladder approach to calculate PRR under rule 3-169, it may use Table 3-173A(2B).

R Table 3-173A(2B) – Method of calculating credit equivalent amount for commodities

Type of derivative transaction*	Credit equivalent amount	
	If A is positive	If A is negative
Precious metals (except gold) <ul style="list-style-type: none"> - under one year to maturity - over one year to five years - over five years 	A + 2% of N A + 5% of N A + 7.5% of N	2% of N 5% of N 7.5% of N
Base metals <ul style="list-style-type: none"> - under one year to maturity - over one year to five years - over five years 	A + 2.5% of N A + 4% of N A + 8% of N	2.5% of N 4% of N 8% of N
Softs (agricultural) <ul style="list-style-type: none"> - under one year to maturity - over one year to five years - over five years 	A + 3% of N A + 5% of N A + 9% of N	3% of N 5% of N 9% of N
Other commodity <ul style="list-style-type: none"> - under one year to maturity - over one year to five years - over five years 	A + 4% of N A + 6% of N A + 10% of N	4% of N 6% of N 10% of N
Notes <i>FRAs, swaps, futures, purchased options, and other contracts for differences</i> A = the replacement cost of the contract N = the notional or actual principal amount underlying the contract For contracts with multiple exchanges of principal, the % of N has to be multiplied by the remaining number of payments still to be made according to the contract.		

In the case of a derivative referenced on a bond which satisfies the criteria for a *qualifying debt security*, the %N applicable to interest rate derivatives may be utilised to calculate the credit equivalent amount. For a derivative referenced on a 'non-qualifying' bond, the credit equivalent amount must be calculated with reference to the %N applicable to equity derivatives.

For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be equal to the time until the next reset date. In the case of interest-rate contracts that meet these criteria and have a remaining maturity of over one year, the percentage is no lower than 0.5%.

Netting

- 3-173A (3)** **R** **A firm may offset counterparty exposures arising on derivative transactions calculated in accordance with (2) above before it multiplies the residual exposure by the appropriate CRR percentage as follows:**
- (a) variation margin payable to a counterparty against an initial margin requirement or variation margin requirement receivable from a counterparty;**
 - (b) variation margin payable to a counterparty against a positive “A” as calculated in accordance with Table 3-173A(2A);**
 - (c) a negative “A” as calculated in accordance with Table 3-173A(2A) against an initial margin requirement or variation margin requirement receivable from a counterparty;**
 - (d) a negative “A” against a positive “A” in each case as calculated in accordance with Table 3-173A(2A);**
 - (e) losses on a closed out derivative transaction which has not been settled against variation margin payable to a counterparty; or**
 - (f) losses on a closed out derivative transaction which has not been settled against negative “A” calculated in accordance with Table 3-173A(2A),**
 - (g) profit on a closed out derivative transaction which has not been settled against an initial margin requirement or variation margin requirement receivable from a counterparty;**
 - (h) profit on a closed out derivative transaction which has not been settled against a loss on a closed out derivative transaction;**
 - (i) profit on a closed out derivative transaction which has not been settled against a positive “A” as calculated in accordance with Table 3-173A(2A);**
 - (j) premium receivable in respect of written options against variation margin payable, initial margin payable or a closed out profit payable to the counterparty or a negative “A” as calculated in accordance with Table 3-173A(2A);**
 - (k) positive “A” on purchased options calculated in accordance with Table 3-173A(2A) against negative “A” on written options; or**
 - (l) in the case of perfectly matched contracts these may be treated as a single contract with a notional principal equivalent to the net receipts; or**

(m) where transactions are subject to (3)(c) above, the potential future credit exposures (PFCE) on transactions with the same *counterparty* (i.e. % on N) may be netted in accordance with Table 3-173A(3) below,

provided that:

- (i) the exposures arise on transactions with the same *counterparty*; and
- (ii) the *firm* has a written agreement, supported by a legal opinion obtained in accordance with rule 3-170(11).

Table 3-173A(3)

The netted PFCE is the sum of:	
step one	40% of gross PFCE
step two	60% of gross PFCE multiplied by the net-to-gross ratio (NGR)
<p>Notes:</p> <p>NGR = $\frac{\text{(net replacement cost)}}{\text{(gross replacement cost)}}$</p> <p>The NGR must be calculated on all contracts included in a legally valid bilateral netting agreement with a given <i>counterparty</i>.</p>	

CRR percentages

- 3-173A (4)** **R (a)** **Where a *firm* does not offset *counterparty* exposures arising on *derivative* transactions in accordance with (3) above, it must multiply the *counterparty* exposure by the appropriate percentage from:**
- (i)** **Table 3-173A(4)A if the *counterparty* exposure arises on a transaction in a *derivative* listed on an *exchange* or *approved exchange*; or**
 - (ii)** **Table 3-173A(4)B if the *counterparty* exposure arises on a transaction in a *derivative* not listed on an *exchange* or *approved exchange*,**
- but may opt to calculate *CRR* using the highest available credit percentage in Tables 3-173A(4)A or B below in order to avoid undue complication.**
- (b)** **Where a *firm* does offset *counterparty* exposures on *derivative* exposures in accordance with (3) above, it must multiply the residual net *counterparty* exposure by the appropriate percentage from Table 3-173A(4)A or B.**
- (c)** **A *firm* may opt to calculate the *CRR* using the highest available *CRR* percentage in the tables below in order to avoid undue complication.**

Table 3-173A(4)A - CRR percentages for transactions in derivatives listed on an exchange or approved exchange

Counterparty		Business days since exposure occurred	
		0 - 3	over 3
1	<i>Firm</i> has an <i>ACMP</i> and <i>counterparty</i> is not a <i>market counterparty</i>	10%	10%
2	<i>Firm</i> has an <i>ACMP</i> and <i>counterparty</i> is a <i>market counterparty</i>	5%	5%
3	<i>Firm</i> does not have an <i>ACMP</i>	10%	100%

Table 3-173A(4)B - CRR percentages for transactions in derivatives not listed on an exchange or approved exchange

	Status of the counterparty	%
1	<i>A firm, a supranational organisation, a United Kingdom discount house, a gilt edged market maker, a stock exchange money broker, a regulated banking institution, a building society under the Building Societies Act 1986, a United Kingdom local authority, a regulated financial institution.</i>	2%
2	<i>Any other counterparty</i>	5%

Exposures to locals

- 3-173A (5) R** **A firm must calculate a 100% CRR for amounts of initial and variation margin not met with acceptable collateral or a positive equity balance owed to a firm by a local in respect of transactions in derivatives listed on an exchange or approved exchange from the date of any shortfall. However, a firm may use an alternative treatment if it:**
- (a) **participates in the profits or losses of the local for 25% or more when the firm may include the local position in its own position which will then be subject to PRR; or**
 - (b) **calculates PRR for locals in which case its requirement will be the sum of the following:**
 - (i) **10% of the PRR result for each local; and**
 - (ii) **the excess over the “net liquidating balance” of the PRR applied to the positions of each local; and**
 - (c) **for the purposes of (b) above, “net liquidating balance” means the cash amount which would remain in a local account if all positions were liquidated and there were added (1) cash balances (2) the value of marketable investments, and (3) letters of credit and guarantees issued by a regulated banking institution which is not the counterparty or an associate of the counterparty in the control of the firm; and there were deducted all loans and overdrafts from, and other liabilities to the firm; and to the extent that a firm includes an exposure in the net liquidating balance calculation, it does not also need to apply the liquidity adjustment in rule 3-75 or the CRR to those exposures.**

Sums due for payment or owed on closed out derivative transactions

3-173A (6) R When a *counterparty* has not fully met amounts owed to a *firm* arising out of losses on closed out *derivative* transactions by depositing, *acceptable collateral* or, has not fully settled amounts owed in respect of periodic or final settlement of transactions, a *firm* must calculate a *CRR* equal to the amount outstanding after three days, unless:

- (a) the *firm* has offset the amount owed against variation margin payable in accordance with (3)(e) above; or
- (b) the *firm* has offset the amount owed against a negative “A” in accordance with (3)(f) above,

in which case the *firm* must calculate a *CRR* equal to the residual amount outstanding after three days.

Equivalent contracts

3-173A (7) R Rule 3-173A(2)(b) also applies to contracts which, although they are listed on an *exchange* or *approved exchange*, are fully dependent upon the issuer for performance (e.g. covered warrants).

Regulated connected companies

3-173A (8) R Where a *firm* carries out significant *swaps* business with a *connected company* which has adequate regulation applied to it, the *firm* need not comply with all or part of rule 3-173A so far as it applies to interest rate or foreign exchange *swaps* with that *connected company*, provided that it has given prior written notice of this to the *FSA*.

Sub-total

3-173A (9) R The sum of the amounts calculated in accordance with this rule is the *firm's* total *CRR* for *derivative* transactions other than those subject to rule 3-178.

3-175 Concentrated risk to one counterparty

General rule

3-175(1) R When the total amount due to a *firm* arising from *exchange traded* variation margins or free deliveries of *physical commodities* from a single *counterparty* (or several *counterparties* grouped together by the *firm* for margin or credit treatment) is outstanding under a credit line granted in accordance with an *ACMP* and exceeds 25% of the *firm's* *financial resources*, the *firm* must calculate an additional *CRR* according to the table below.

Table 3-175(1) - Concentrated risk percentages

% of financial resources exposed to counterparty	Standard CRR for variation margin	Standard CRR for free delivery	Additional CRR
0 - 25%	10%	15%	nil
25% - 50%	10%	15%	lower of (1) the excess or (2) the sum of 15% for variation margin plus 10% for free deliveries
over 50%	10%	15%	lower of (1) the excess or (2) the sum of 40% for variation margin plus 35% for free deliveries

Use of approved bank bonds

- 3-175(2) R** If an *approved bank bond* forms a part of a *firm's financial resources*, a *firm* may include it in *financial resources* for the purposes of (1) above at its face value.

Sub-total

- 3-175(3) R** The sum of the amounts calculated in accordance with (1) above is the total *CRR* for concentrated risk to one *counterparty*.

- 3-176** Repurchase and reverse repurchase, securities lending and borrowing and sale and buy back agreements

Repurchase, securities lending and sale and buy back agreements

- 3-176(1) R** Where a *firm* has entered into any *repurchase, securities or physical commodities lending or sale and buy back agreement* in respect of *securities or physical commodities*, it must calculate, subject to (3) below, a *CRR* for each such agreement in accordance with the table below.

Table 3-176(1) - Repurchase, securities lending and sale and buy back agreements

Type of security sold or lent	CRR
<i>Qualifying debt securities</i>	The “mark to market value” of the <i>securities</i> less 105% of the <i>acceptable collateral</i> under the agreement, if the net figure is positive.
<i>Other securities or physical commodities</i>	The “mark to market value” of the <i>securities</i> or <i>physical commodities</i> less 110% of the <i>acceptable collateral</i> under the agreement, if the net figure is positive.

Reverse repurchase, securities borrowing and buy and sale back agreements

3-176(2) R Where a *firm* has entered into any *reverse repurchase, securities or physical commodities borrowing or buy and sale back agreement* in respect of *securities or physical commodities*, it must calculate, subject to (3) below, a *CRR* for each such agreement in accordance with the table below.

R Table 3-176(2) - Reverse repurchase, securities borrowing and buy and sale back agreements

Type of security purchased or borrowed		CRR
1	For all transactions where the <i>firm</i> has in its possession a “written agreement” evidencing the transaction, in accordance with rule 3-176(5)	
a)	<i>qualifying debt securities</i>	The amount paid or collateral given for the <i>securities</i> less 105% of the current “mark to market value” of the <i>securities</i> received (see note), if the net figure is positive
b)	<i>other securities or physical commodities</i>	The amount paid or collateral given for the <i>securities</i> or <i>physical commodities</i> less 110% of the current “mark to market value” of the <i>securities</i> or <i>physical commodities</i> received (see note), if the net figure is positive

2	Where a <i>firm</i> does not have in its possession a “written agreement” evidencing the transaction, in accordance with rule 3-176(5)	The appropriate requirements from 1 plus the market value of the <i>securities</i> or <i>physical commodities</i> multiplied by the appropriate <i>PRA</i>
Note: the <i>securities</i> or <i>physical commodities</i> received can be included only where they are held under the control of the <i>firm</i> or where they were delivered into the control of the <i>firm</i> upon initiation of the agreement.		

Netting

3-176(3) R A *firm* may reduce the *CRR* by netting where it has more than one exposure to an individual *counterparty* provided that it has a written agreement supported by a legal opinion obtained in accordance with rule 3-170(11) as follows:

- (a) in the case of *sale and buy back, repurchase* or *securities* or *physical commodities* lending agreements (Table 3-176(1)), a *firm* may reduce the *CRR* by the excess of the total value of collateral received, including accrued interest, over the “mark to market” value of any other *sale and buy back, repurchase* or *securities* or *physical commodities* lending agreements with the same *counterparty*;
- (b) in the case of *sale and buy back, reverse repurchase* or *securities* or *physical commodities* borrowing agreements (Table 3-176(2)), a *firm* may reduce the *CRR* by the excess of the “mark to market value” over the total value of collateral given, including accrued interest, of any other of *buy and sale back, reverse repurchase* or *securities* or *physical commodities* borrowing agreements with the same *counterparty*; and
- (c) to the extent that an excess has not been used under (a) or (b) above to reduce the *CRR*, a *firm* may use an excess on a *sale and buy back, repurchase* or *securities* or *physical commodities* lending agreement respectively to reduce the *CRR* on a *buy and sale back, reverse repurchase* or *securities* or *physical commodities* borrowing agreement and vice versa provided the agreements are with the same *counterparty*.

Margin percentages

- 3-176(4) R** A *firm* may opt to calculate the *CRR* using the lower collateral rate (105%) in order to avoid undue complication.
- “Written agreement”
- 3-176(5) R** For the purpose of this rule and rule 3-177(2), a “written agreement” must, whether in a general agreement or in respect of specific occasions, include the following elements:
- (a) the names of the persons involved;
 - (b) the type and quantity of *securities* or *physical commodities* subject to the *reverse repurchase, securities or physical commodities* borrowing, or *buy and sale back agreement*;
 - (c) the type and quantity of collateral;
 - (d) the commencement date of the *reverse repurchase, securities or physical commodities* borrowing or *buy and sale back agreement*;
 - (e) the completion date of the *reverse repurchase, securities or physical commodities* borrowing or *buy and sale back agreement*, where appropriate;
 - (f) interest or fee arrangements, where appropriate;
 - (g) arrangements for adjustments in the amount or type of *securities* or *physical commodities* to be returned, if appropriate;
 - (h) arrangements for the calling of margin, if appropriate; and
 - (i) agreements for completion,
- except that having given prior written notice to the *FSA*, a *firm* may disregard certain of the “written agreement” requirements where it can show there are adequate *internal controls* to evidence the arrangements.
- “Mark to market value”
- 3-176(6) R** For the purposes of this rule, the current “mark to market value” of *securities* and the value of cash lodged must include accrued interest.

Daily valuation

- 3-176(7) R A firm must value collateral and securities or physical commodities lent or sold, or borrowed or purchased, at least daily.**

Settlement failure and pre deliveries

- 3-176(8) R Where:**
- (a) simultaneous delivery of securities or physical commodities and collateral cannot be confirmed immediately due to settlement failure, or**
 - (b) a firm has delivered collateral or securities or physical commodities prior to the receipt of securities or physical commodities or collateral,**
- the firm is not required to calculate a CRR for three business days from the date of payment or delivery by the firm.**

Additional acceptable collateral

- 3-176(9) R Where the firm has called for additional acceptable collateral from the other party to the agreement, a firm is not required to calculate a CRR if that call has been outstanding for no more than one business day.**

Exclusions

- 3-176 (10) R All repurchase, reverse repurchase, securities or physical commodities lending or borrowing sale and buy back and buy and sale back agreements with a stock exchange, clearing house, Cedel or Euroclear are exempt from this rule.**

Sub-total

- 3-176 (11) R The sum of the amounts calculated in accordance with this rule is the total CRR for repurchase and reverse repurchase, securities or physical commodities lending and borrowing and sale and buy back agreements.**

- 3-177 Money brokers
- Application
- 3-177(1) R This rule applies to *money brokers*.
- Lending money
- 3-177(2) R When a *money broker* is lending money it must calculate a 100% *CRR* except to the extent that it holds *acceptable collateral*; except where the broker does not have a “written agreement” in accordance with rule 3-176(5) between the *firm* and *counterparty* specifying, inter alia, the interest rate on the loan and stating that the loan is repayable on demand or for a term no longer than 30 days, when the *CRR* is 100% of the amount outstanding.
- Lending and borrowing securities etc
- 3-177(3) R For all *reverse repurchase* and *repurchase agreements*, *securities borrowing* and *lending* agreements and *buy and sale back* and *sale and buy back agreements* other than where *securities* are lent or sold or borrowed or purchased through an approved payments system, a *money broker* must calculate an additional *CRR* of 0.5% applied to the value of all *securities* transferred.
- Sub-total
- 3-177(5) R The sum of the amounts calculated in accordance with (2) and (3) above is the *firm’s* total *CRR* for *money brokers*.
- 3-178 Options purchased for a counterparty
- Single premium options
- 3-178(1) R Where a *firm* has purchased a single premium *option* on behalf of a *counterparty* and the *counterparty* has not paid the full *option* premium cost by three *business days* after trade date, a *firm* must calculate a *CRR* as the amount by which the *option* premium owed to the *firm* exceeds the market value of the *option* or *acceptable collateral*.
- Traditional options
- 3-178(2) R Where a *firm* has purchased a *traditional option* for its own account or a *counterparty* and paid the *option* premium, it must calculate a *CRR* equal to the value of the *option* premium.

Sub-total

3-178(3) R The sum of the amounts calculated in accordance with (1) and (2) above is the *firm's CRR* in respect of purchased *options*.

3-180 Qualifying and other deposits

General rule

3-180(1) R Subject to (2) below, a *firm* must calculate a *CRR* for a deposit referred to in the table below by multiplying the value of the deposit by the appropriate percentage contained in the table below.

R Table 3-180(1) - Qualifying and other deposit risk percentages

Type of deposit	%
<i>Qualifying deposits</i>	nil
Other deposits with an <i>approved bank</i> related to a transaction creating an offsetting liability for the <i>firm</i> or subject to an agreement with the bank allowing its use as collateral for a loan that may be withdrawn within -	
- three months to one year	2.5%
- over one year	4.0%
Note: all other deposits are subject to a liquidity adjustment (see rule 3-75(12))	

Timing

3-180(2) R *Qualifying deposits* and other deposits outstanding three days after a repayment request has been made or more than three days past maturity date are subject to a full *CRR*.

Netting

3-180 (2A) R A *firm* may reduce the value of the deposit by an amount owed by the *firm* to a *counterparty* before it multiplies the residual exposure by the appropriate percentage in Table 3-180(1) provided that:

- (a) the exposures arise with the same *counterparty*; and**
- (b) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rules 3-170(11).**

Sub-total

3-180(3) R The sum of the amounts calculated in accordance with Table 3-180(1) is the *firm's CRR* for *Qualifying deposits* and other deposits.

3-181 Loans to counterparties

General rule

3-181(1) R A *firm* must calculate a 100% *CRR* on the amount by which a loan to a *counterparty* is not:

(a) secured by *acceptable collateral*; or

(b) offset against amounts owed by the *firm* to the *counterparty* where the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 3-170(11).

Sub-total

3-181(2) R The sum of the amounts calculated in accordance with this rule is the *firm's CRR* for loans to *counterparties*.

3-182 Other amounts owed to a firm arising out of investment business or investment dealing activities

Nil CRR items

3-182(1) R The following receivables arising out of *investment business* or *investment dealing activities* do not require a *CRR* at any time:

(a) any debt not covered elsewhere in the *CRR* rules to the extent that it is *adequately secured*;

(b) amounts in respect of 30 day items specified in (3) below which have been outstanding for less than 30 days from the date on which they were first recorded on the *firm's* balance sheet; and

(c) accrued income for interest on *marketable investments*, except where it has been outstanding for more than 30 days after the date that the interest was due to be received.

CRR on amounts owed to a firm in respect of international underwriting and stabilisation activities

3-182(2) R (a) Where management or other fees are owed to a *firm* in respect of international underwriting or stabilisation activities, the *firm* must calculate full *CRR* on any amounts remaining unpaid 30 days after they first appeared on the *firm's* balance sheet.

- (b) **A firm acting as stabilising manager must also calculate a CRR equal to 100% of any income accrued as a result of net profit on stabilising activities while the stabilising account remains open.**

CRR on 30 day items

- 3-182(3) R A firm must calculate a 100% CRR in respect of the following receivables due to the firm if they have been outstanding for more than 30 days from the date on which they were first recorded on the firm's balance sheet:**
- (a) commissions and fees earned in connection with the firm's investment business;**
 - (b) commissions and fees earned which are due and payable from client bank accounts;**
 - (c) repayments of marketable investments at maturity or call;**
 - (d) the value of scrip issues and rights issues;**
 - (e) proceeds arising from takeovers and mergers;**
 - (f) domestic underwriting or stabilisation fees; and**
 - (g) accrued income and work in progress.**

100% CRR items

- 3-182(4) R A firm must calculate a 100% CRR in respect of other receivables arising from investment business and investment dealing activities not covered elsewhere in this rule from the time that the receivable is recorded on the balance sheet.**

Netting

- 3-182 (4A) R A firm may reduce the value of the amounts owed to the firm by an amount owed by the firm to a counterparty before it multiplies this by 100% provided that:**
- (a) the exposures arise with the same counterparty; and**
 - (b) the firm has a written agreement supported by a legal opinion obtained in accordance with rule 3-170(11).**

Sub-total

- 3-182(5) R The sum of the amounts calculated in accordance with this rule is the CRR for other amounts owed to the firm arising out of investment business or investment dealing activities**

- 3-300** ACMPs
- 3-300(1) R** **A firm may only use an ACMP for the purposes of rules 3-170 to 3-182 if:**
- (a) the policies and procedures making up the proposed ACMP are at all times adequate and appropriate to the firm and its business; and**
 - (b) the firm gives to the FSA at least three months' notice in writing of its intention to use an ACMP for the purposes of these rules.**
- 3-300(2) R** **The notice referred to in (1)(b) above must include all relevant details of the policies and procedures making up the proposed ACMP.**
- 3-300(3) R** **The notice referred to in (1)(b) is not required if the firm was permitted under the relevant requirements of a predecessor regulator, as they were in force immediately prior to the specified day, to use the proposed ACMP for the purposes of those requirements.**
- 3-300(4) E**
- (a) A firm's policies and procedures should take full account of the principles described in Appendix 56.**
 - (b) Compliance with 3-300(4)(a) may be relied on as tending to establish compliance with 3-300(1)(a).**
 - (c) Contravention of 3-300(4)(a) may be relied on as tending to establish contravention of 3-300(1)(a).**
- G** On receipt of notice under (1)(b) the FSA is likely to review the policies and procedures proposed by the firm and the degree to which they take full and appropriate account of the matters described in Appendix 56. The FSA's review will take account of the context in which the policies and procedures are to operate and the relevant circumstances of the firm. The FSA will indicate to the firm its views on the adequacy and appropriateness of the proposals in the light of its review and may make recommendations of improvements.
- G** The FSA may make a further review of the policies and procedures making up an ACMP at any time after their implementation for the purposes of these rules as part of its supervision of the firm. Any review after implementation will broadly follow the lines described above.

APPENDIX 1 – GLOSSARY OF TERMS FOR IPRU(INV) 3

Note: If a defined term does not appear in the glossary below, the definition appearing in the Glossary annexed to the General Provisions Instrument 2001 applies.

<i>acceptable collateral</i>	means any of the following items of collateral provided to a <i>firm</i> by a <i>counterparty</i> - <ul style="list-style-type: none">(a) cash;(b) letters of credit and guarantees to the extent of their face value, issued by a <i>regulated banking institution</i> which is not the <i>counterparty</i> nor an <i>associate</i> of the <i>counterparty</i>;(c) letters of credit and guarantees to the extent of their face value, issued by a bank which is not a <i>regulated banking institution</i> (not being the <i>counterparty</i>, an <i>associate</i> of the <i>counterparty</i> nor an <i>affiliated company</i>) which has been accepted under the <i>firm's ACMP</i>;(d) gold and silver bullion and coinage; and(e) <i>marketable investments</i>, to which the following conditions apply - <ul style="list-style-type: none">(i) the <i>firm</i> must have an unconditional right to apply or realise the <i>acceptable collateral</i> for the purpose of repaying the <i>counterparty's</i> obligations;(ii) <i>marketable investments</i> must -<ul style="list-style-type: none">(aa) be <i>marked to market</i> daily using the valuation principles in rule 3-41(9);(bb) not be issued by the <i>counterparty</i> nor by an <i>associate</i> of the <i>counterparty</i>; and(cc) be discounted by 8% (before allowances for hedging or diversification); and(iii) each item of <i>acceptable collateral</i> must be discounted by 5% if it is denominated in a different currency to the <i>counterparty's</i> obligation;
<i>ACMP</i>	means, subject to rule 3-300, a credit management policy and procedures according with the principles discussed in Appendix 56 ;
<i>Act</i>	means the Financial Services and Markets Act 2000;
<i>adequately secured</i>	means secured by cash or by <i>marketable investments</i> - <ul style="list-style-type: none">(a) in respect of which the firm has an unconditional right to apply or realise for the purpose of repaying the <i>counterparty's</i> obligations to the <i>firm</i>;(b) which, in the case of <i>marketable investments</i>, are <i>marked to market</i> daily by the <i>firm</i> using the valuation principles in

	rule 3-41(9);
	(c) with, in the case of <i>marketable investments</i> , a marked to market value not lower than the current value of that obligation after being discounted -
	(i) by 8% (before allowances for hedging or diversification); and
	(ii) at an additional 5% if it is denominated in a different currency to the obligation; and
	(d) which, in the case of <i>marketable investments</i> , must not be issued by the <i>counterparty</i> nor by an <i>associate</i> of the <i>counterparty</i> ;
<i>adviser</i>	means a <i>firm</i> which -
	(a) has <i>counterparties</i> who are investors or potential investors;
	(b) restricts its <i>investment business</i> to activities within article 53 (advising on investments) of <i>the Regulated Activities Order</i> ;
	(c) does not hold, receive or control money or property belonging to another person, nor has a mandate over a <i>customer's</i> bank account;
	(d) does not introduce its <i>counterparties</i> to other persons as its main business; and
	(e) does not deal as principal or <i>agent</i> in <i>investments</i> or <i>physical commodities</i> ;
<i>affiliated company</i>	in relation to a <i>firm</i> , means any <i>body corporate</i> controlled by the <i>firm</i> , any parent company of the <i>firm</i> , and any <i>body corporate</i> controlled by a parent company of the <i>firm</i> ;
<i>agency broker</i>	means a <i>broad scope firm</i> which deals as principal only on an incidental basis;
<i>agent</i>	in relation to a person, means any person (including an <i>employee</i>) who acts on that person's behalf;
<i>allotment date</i>	means the date on which allotments are first made in respect of the <i>securities</i> being offered;
<i>annual accounting reference date</i>	means the date as at which the <i>audited annual financial statements</i> are prepared as initially notified by the <i>firm</i> to the <i>FSA</i> or as subsequently notified under rule 3-31 for all other purposes and which may not be more than 55 weeks since the previous <i>annual accounting reference date</i> or, if applicable, the date on which the <i>firm</i> commenced trading;
<i>appointed representative</i>	(in accordance with section 39 of the <i>Act</i>) means a person (other than an <i>authorised person</i>) who:
	(a) is a party to a contract with an <i>authorised person</i> (his

principal) which:

- (i) permits or requires him to carry on business of a description prescribed in the Financial Services and Markets Act 2000 (Appointed Representatives) Regulations 2001 (SI 2001/1217); and
 - (ii) complies with the requirements prescribed in those Regulations; and
- (b) is someone for whose activities in carrying on the whole or part of that business his principal has accepted responsibility in writing;

approved bank

(in relation to a bank account opened by a *firm*) means:

- (a) if the account is opened at a branch in the *United Kingdom*:
- (i) the Bank of England; or
 - (ii) the central bank of a member state of the *OECD*; or
 - (iii) a *bank*; or
 - (iv) a *building society* which offers, unrestrictedly, banking services; or
 - (v) a bank which is supervised by the central bank or other banking regulator of a member state of the *OECD*; or
- (b) if the account is opened elsewhere:
- (i) a bank in (a); or
 - (ii) a *credit institution* established in an *EEA State* other than the United Kingdom and duly authorised by the relevant *Home State regulator*; or
 - (iii) a bank which is regulated in the Isle of Man or the Channel Islands; or
- (c) a bank supervised by the South African Reserve Bank; or
- (d) any other bank that:
- (i) is subject to regulation by a national banking regulator;
 - (ii) is required to provide audited accounts;
 - (iii) has minimum net assets of £5 million (or its equivalent in any other currency at the relevant time) and has a surplus revenue over expenditure for the last two financial years; and
 - (iv) has an annual audit report which is not materially qualified;

approved bank bond

means any instrument, by whatever name called, provided by an *approved bank* which -

- (a) provides for the immediate payment of a stated sum to the *firm* on demand whether by the *firm* or the *FSA*;
- (b) provides that the bank shall have no recourse to the assets of the *firm* in respect of the bond and that no other person shall have recourse to the assets of the *firm* arising in respect of the bond, until payment in full of all other creditors;
- (c) prohibits the bank from terminating the bond unless -
 - (i) the beneficiary will have *financial resources* equal to at least 120% of its *financial resource requirement* after termination; or
 - (ii) receives authority from the *FSA* to do so;
- (d) prohibits any automatic early termination of the bond whether arising out of any act or default of the *firm* or otherwise;

approved exchange means an investment exchange listed as such in **Appendix 33**;

approved person means a *person* in relation to whom the *FSA* has given its approval under section 59 of the *Act* (Approval for particular arrangements) for the performance of a controlled function;

approved treasury arrangement means an arrangement notified to the *FSA* in writing whereby a group of *connected companies* including the *firm* transfers all cash surpluses to one specified *connected company* of the *firm* for the sole purpose of obtaining preferential interest rates on money market deposits;

arranger means a *firm* -

- (a) whose sole *investment business* consists of activities within the following articles of the Regulated Activities Order -
 - (i) articles 14 (dealing in investments as principal) or 21 (dealing in investments as agent) if -
 - (aa) the *firm* is a *venture capital firm*; or
 - (bb) the activity is own account business which would be excluded from being *investment business* by the provisions of article 16 of the Regulated Activities Order but for the fact that the *firm* is an *authorised person*; or
 - (ii) article 25(1) (arranging deals in investments);
 - (iii) article 37 (managing investments); and
 - (iv) article 49 (advising on investments);
- (b) whose *permission* is subject to a *limitation* or *requirement* preventing it from holding money or property belonging to other persons and does not have a mandate over a

	<i>customer's</i> bank account;
<i>associate</i>	in relation to a person ("A"), means - <ul style="list-style-type: none"> (a) an undertaking in the same <i>group</i> as A; (b) an <i>appointed representative</i> of A or of any undertaking in the same <i>group</i> as A; and (c) any other person whose business or domestic relationship with A or its <i>associate</i> might reasonably be expected to give rise to a community of interest between them which may involve a conflict of interest in dealings with third parties;
<i>associated business</i>	means business which is carried on in connection with <i>investment business</i> ;
<i>audited annual financial statements</i>	means statements drawn up in accordance with Schedule 4 to the Companies Act 1985 as at the <i>firm's annual accounting reference date</i> together with an <i>auditor's report</i> thereon;
<i>auditor's report</i>	means a report drawn up in the format required by the <i>Supervision manual</i> which a <i>firm</i> must submit to the <i>FSA</i> in conjunction with the <i>firm's audited annual financial statements</i> ;
<i>authorised person</i>	means (in accordance section 31 of the <i>Act</i> (Authorised persons)), one of the following: <ul style="list-style-type: none"> (a) a <i>person</i> who has a <i>Part IV permission</i> to carry on one or more <i>regulated activities</i>; (b) an <i>incoming EEA firm</i>; (c) an incoming <i>Treaty firm</i>; (d) a <i>UCITS qualifier</i>; (e) an <i>ICVC</i>; (f) the <i>Society of Lloyd's</i>;
<i>authorised unit trust scheme</i>	means a <i>collective investment scheme</i> authorised for the purposes of the <i>Act</i> ;
<i>bank</i>	means: <ul style="list-style-type: none"> (a) a <i>firm</i> with a <i>Part IV permission</i> which includes <i>accepting deposits</i>: <ul style="list-style-type: none"> (i) which is a <i>credit institution</i>; or (ii) whose <i>Part IV permission</i> includes a <i>requirement</i> that it comply with IPRU(BANK); <p style="margin-left: 40px;">but which is not a <i>building society</i>, a <i>friendly society</i> or a <i>credit union</i>; or</p> (b) an <i>EEA bank</i>;
<i>body corporate</i>	means (in accordance with section 417(1)(Definitions))any body corporate, including a body corporate constituted under the law of

<i>bonus</i>	a country or territory outside the United Kingdom, of the Act; means that part of the remuneration paid by a firm to its <i>employees</i> (including <i>directors</i>) which is: (a) not a <i>profit share</i> ; and (b) awarded by management entirely on a discretionary basis, to the extent that it does not exceed the profit for the financial year of the <i>firm</i> before accounting for such bonus;
<i>bought deal</i>	means an <i>offering</i> where a <i>firm</i> on its own gives an outright binding commitment to the issuer or seller to purchase or subscribe for the <i>securities</i> to be offered;
<i>broad scope firm</i>	means any <i>firm</i> which is not an <i>adviser</i> , an <i>arranger</i> or a <i>local</i> ;
<i>business day</i>	means any day, except Saturday, Sunday, bank holidays and public holidays (not being bank holidays);
<i>buy and sale back agreement</i>	see <i>reverse repurchase agreement</i> ;
<i>call option</i>	means an <i>option</i> to buy an <i>investment</i> , other instrument, foreign currency or <i>physical commodity</i> at a given price on or before a given date;
<i>cap</i>	means an agreement in respect of a borrowing under which a <i>counterparty</i> contracts to pay any interest costs arising as a result of an increase in rates above an agreed rate: the effect being to provide protection to the holder against a rise above that agreed rate;
<i>category D firm</i>	means a <i>firm</i> , the only <i>core investment service</i> for which it has <i>permission</i> is receiving and transmitting on behalf of investors orders in relation to one or more of the instruments listed in Section B of the Annex to the ISD, and whose <i>permission</i> is subject to a <i>limitation</i> or <i>requirement</i> preventing it from holding <i>client money</i> or <i>clients' assets</i> and for that reason may not at any time place itself in debit with its <i>clients</i> , which benefits from the freedom of establishment or to provide services under Articles 14 or 15 of the <i>ISD</i> ;
<i>certificate of deposit</i>	means a negotiable or non-negotiable certificate issued by a bank;
<i>clearing firm</i>	means a <i>firm</i> which accepts primary responsibility (including legal liability) for the settlement of transactions for <i>counterparties</i> ;
<i>clearing house</i>	means a clearing house through which transactions on an <i>exchange</i> may be cleared;
<i>client</i>	means any <i>person</i> with or for whom a <i>firm</i> conducts or intends to conduct <i>designated investment business</i> or any other <i>regulated activity</i> ; and: (a) every client is a <i>customer</i> or a <i>market counterparty</i> ;

- (b) "client" includes:
 - (i) a potential client;
 - (ii) a client of an *appointed representative* of a *firm* with or for whom the *appointed representative* acts or intends to act in the course of business for which the *firm* has accepted responsibility under section 39 of the *Act* (Exemption of appointed representatives);
 - (iii) a *collective investment scheme* even if it does not have separate legal personality;
 - (iv) if a *person* ("C1"), with or for whom the *firm* is conducting or intends to conduct *designated investment business*, is acting as agent for another *person* ("C2"), either C1 or C2 in accordance with COB 4.1.5R (Agent as client);
- (c) "client" does not include:
 - (i) a trust beneficiary;
 - (ii) a *corporate finance contact*;
 - (iii) a *venture capital contact*.

<i>client money</i>	subject to the <i>client money rules</i> , means <i>money</i> of any currency which, in the course of carrying on <i>designated investment business</i> , a <i>firm</i> holds in respect of any <i>investment agreement</i> entered into, or to be entered into, with or for a <i>client</i> , or which a <i>firm</i> treats as <i>client money</i> in accordance with the <i>client money rules</i> ;
<i>client money rules</i>	means COB 9.3;
<i>close relative</i>	in relation to a person, means the person's spouse, his children and step-children, his parents and step-parents, his brothers and sisters and his step-brothers and step-sisters;
<i>closing date</i>	means the date on which payment for the <i>securities</i> is due to be made to the issuer or seller, or, if payment is made in instalments, payment of the first instalment;
<i>collective investment scheme</i>	means a collective investment scheme, as defined in section 235 of the <i>Act</i> (Collective Investment Schemes), which is in summary: <ul style="list-style-type: none"> (a) any arrangements with respect to property of any description, including money, the purpose or effect of which is to enable <i>persons</i> taking part in the arrangements (whether by becoming owners of the property or any part of it or otherwise) to participate in or receive profits or income arising from the acquisition, holding, management or disposal of the property or sums paid out of such profits or income; and (b) which are not excluded by the Financial Services and Markets Act (Collective Investment Schemes) Order 2001

	(SI 2001/1062);
<i>commissions shared</i>	means that part of the remuneration paid by a <i>firm</i> which is determined on the basis of the number, size or profitability of individual deals carried out;
<i>connected company</i>	and “ <i>connected credit institution</i> ” mean, in relation to a <i>firm</i> which: <ul style="list-style-type: none"> (a) is a <i>body corporate</i>, a <i>body corporate</i> or <i>credit institution</i> satisfying any of the following conditions - <ul style="list-style-type: none"> (i) the same person is the <i>controller</i> of each <i>body corporate</i> or <i>credit institution</i>; (ii) if a group of two or more persons are <i>controllers</i> of each <i>body corporate</i> or <i>credit institution</i> and the group either consists of the same persons or could be regarded as consisting of the same persons by treating a member of either group as replaced by - <ul style="list-style-type: none"> (aa) that member’s <i>close relative</i>; (bb) a person with whom that member is in partnership; or (cc) a <i>body corporate</i> of which the member is an officer; or (iii) both <i>bodies corporate</i> are members of the same group; or (b) is not a <i>body corporate</i>, a <i>body corporate</i> or <i>credit institution</i> which is controlled - <ul style="list-style-type: none"> (i) by the <i>firm</i>; (ii) by a <i>partner</i> in the <i>firm</i>; (iii) by a <i>close relative</i> of a <i>partner</i> in the <i>firm</i> or, if the <i>firm</i> is a <i>sole trader</i>, by a <i>close relative</i> of the <i>sole trader</i>; or (iv) collectively by any of the <i>partners</i> in the <i>firm</i> or their <i>close relatives</i>;
<i>connected credit institution</i>	see “ <i>connected company</i> ”;
<i>connected person</i>	has the same meaning as given in section 346 of the Companies Act 1985 and a person described therein as being connected with a <i>director</i> will similarly be deemed to be connected with a <i>partner</i> of a <i>firm</i> ;
<i>contingency</i>	means a future event the outcome of which is uncertain;
<i>contingent liability</i>	means a liability dependent upon the occurrence or non-occurrence of one or more uncertain future events;
<i>contract for differences</i>	means (as specified in article 85 of the Regulated Activities

Order (Contracts for differences etc)), rights under:

- (a) a contract for differences; or
- (b) any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss by reference to fluctuations in:
 - (i) the value or price of property of any description; or
 - (ii) an index or other factor designated for that purpose in the contract;

controller

means -

- (a) in relation to a *body corporate* -
 - (i) a person, who alone or with any *associate* or *associates*, has a direct or indirect holding in the *body corporate* which represents 10% or more of the capital or of the voting rights; and
 - (ii) any person who has a direct or indirect holding in the *body corporate* which makes it possible to exercise a significant influence over the management of the *body corporate*; and
- (b) in relation to an unincorporated association -
 - (i) any person in accordance with whose directions or instructions the officers of the association are accustomed to act (but disregarding advice given in a professional capacity);
 - (ii) any person who is entitled to exercise, or control the exercise of, 10% or more of the voting power at any general meeting of the association; and
 - (iii) any person who has a direct or indirect holding in the association which makes it possible to exercise a significant influence over the management of the association;

and “*control*” shall be construed accordingly;

convertible

means a *security* which gives the investor the right to convert the *security* into equity at an agreed price or on an agreed basis;

core investment service

means a service listed in Section A of the Annex to the *ISD* the text of which is set out in Schedule 2 of the Regulated Activities Order;

corporate finance advisory firm

means a *firm* which is an *arranger* and whose *permission* includes a *requirement* that it must not conduct *investment business* other than *corporate finance business*;

corporate finance business

means –

- (a) *designated investment business* carried on by a *firm* with or for:

- (i) any *issuer*, holder or owner of *designated investments*, if that business relates to the *offer*, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, those *investments*, or any related matter;
 - (ii) any *market counterparty* or *intermediate customer*, or other *body corporate*, *partnership* or supranational organisation, if that business relates to the manner in which, or the terms on which, or the *persons* by whom, any business, activities or undertakings relating to it, or any *associate*, are to be financed, structured, managed, controlled, regulated or reported upon;
 - (iii) any *person* in connection with:
 - (A) a proposed or actual *takeover or related operation* by or on behalf of that *person*, or involving *investments* issued by that *person* (being a *body corporate*), its *holding company*, *subsidiary* or *associate*; or
 - (B) a merger, de-merger, reorganisation or reconstruction involving any *investments* issued by that *person* (being a *body corporate*), its *holding company*, *subsidiary* or *associate*;
 - (iv) any shareholder or prospective shareholder of a *body corporate* established or to be established for the purpose of effecting a *takeover or related operation*, where that business is in connection with that *takeover or related operation*;
 - (v) any *person* who, acting as a *principal* for his own account:
 - (A) is involved in negotiations or decisions relating to the commercial, financial or strategic intentions or requirements of a business or prospective business; or
 - (B) (provided he is acting otherwise than solely in his capacity as an investor) assists the interests of another *person* with or for whom the *firm*, or another *authorised person* or *overseas person*, is undertaking business as specified in (a)(i),(ii),(iii) or (iv), by himself undertaking all or part of any transactions involved in such business;
 - (vi) any *person* undertaking business with or for a *person* as specified in (a)(i), (ii), (iii), (iv) or (v) in respect of activities described in those sub-paragraphs;
- (b) *designated investment business* carried on by a *firm* as a

principal for its own account where such business:

- (i) is in the course of, or arises out of, activities undertaken in accordance with (a); and
 - (ii) does not involve transactions with or for, or *advice on investments* to, any other *person* who is a *private customer* in respect of such business;
- (c) *designated investment business* carried on by a *firm* as *principal* for its own account if such business:
- (i) is in the course of, or arises out of:
 - (A) the *offer*, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*, or any related matter; or
 - (B) a proposed or actual *takeover or related operation* by or on behalf of the *firm*, or involving *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*; or
 - (C) a merger, de-merger, reorganisation or reconstruction involving any *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*; and
 - (ii) does not involve giving *advice on investments* to any *person* who is a *private customer*;

in this definition, “share warrants” and “debenture warrants” mean any *warrants* which relate to *shares* in the *firm* concerned or, as the case may be, *debentures* issued by the *firm*;

<i>counterparty</i>	means any person with or for whom a <i>firm</i> carries on, or intends to carry on, any <i>regulated business</i> or <i>associated business</i> ;
<i>credit institution</i>	means an undertaking whose business is to receive deposits or other repayable funds from the public and to grant credits for its own account;
<i>CRR</i>	means the counterparty risk requirement, as calculated 3-170 to 3-182;
<i>customer</i>	means a <i>client</i> who is not a <i>market counterparty</i> ;
<i>dealing activities</i>	means all <i>dealing activities</i> as <i>principal</i> or <i>agent</i> in <i>investments</i> and <i>physical commodities</i> ;
<i>debenture</i>	means the investment specified in article 77 of the Regulated Activities Order (Instruments creating or acknowledging indebtedness), which is in summary: any of the following which are not <i>government and public securities</i> : <ul style="list-style-type: none">(a) debentures;

	(b) debenture stock;
	(c) loan stock;
	(d) bonds;
	(e) certificates of deposit;
	(f) any other instruments creating or acknowledging indebtedness;
<i>dematerialised instruction transmitter</i>	means a firm - (a) which restricts its <i>investment business</i> to activities within article 45 (sending dematerialised instructions) of the Regulated Activities Order; and (b) which does not hold or receive money or property belonging to another person nor has a mandate over another person's bank account;
<i>derivatives</i>	means <i>options, futures and contracts for differences</i> ;
<i>derivative fund manager</i>	means an <i>arranger</i> - (a) whose <i>investment business</i> consists of discretionary management of funds which are invested predominately in <i>derivatives</i> ; and (b) whose income is not related to the volume of business transacted on behalf of the funds managed by him;
<i>designated investment exchange</i>	means any investment exchange which is listed as such in Appendix 33 ;
<i>director</i>	in relation to a <i>body corporate</i> includes - (a) any person occupying the position of <i>director</i> by whatever name called; (b) any person in accordance with whose directions or instructions (not being advice given in a professional capacity) the <i>directors</i> are accustomed to act; or (c) in the case of an <i>overseas firm</i> , any person who occupies a position analogous to that of a <i>director</i> of a company registered under the Companies Act 1985;
<i>documents of title</i>	means documents of title and documents evidencing title to <i>investments</i> and commodities;
<i>domestic offering</i>	means an <i>offering</i> or a tranche of an <i>offering</i> which is directed primarily to investors in the United Kingdom and which uses methods normal in the United Kingdom domestic capital markets;
<i>dual currency bonds</i>	means debt securities, the issue price and coupon of which are fixed in one currency whilst the redemption value is fixed in a different currency;
EEA	means the area established by the agreement on the European Economic Area signed at Oporto on 2 May 1992 and which

	consists of the <i>EEA States</i> ;
<i>EEA State</i>	means (in accordance with paragraph 8 of Schedule 3 to the Act (EEA Passport Rights)) a State which is a contracting party to the agreement on the European Economic Area signed at Oporto on 2 May 1992, as it has effect for the time being; as at 21 June 2001, the following are the <i>EEA States</i> : Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom;
<i>eligible capital substitute</i>	means a subordinated loan, <i>approved bank bond</i> or approved undertaking which a <i>firm</i> may treat as an <i>eligible capital substitute</i> in accordance with rule 3-63;
<i>employee</i>	in relation to any person, means an individual - <ul style="list-style-type: none"> (a) who is employed by that person under a contract of service, a contract for services, or any other contract under which the individual will provide services to the person; (b) who is a <i>director</i> of the person where the person is a <i>body corporate</i>; (c) who is a <i>partner</i> of the person where the person is a partnership; (d) who, where the person is an unincorporated association, is a member of its governing body, the secretary or treasurer; or (e) whose services are, under an arrangement between the person and a third party, placed at the disposal and under the control of the person;

<i>European Communities</i>	means Euratom (European Atomic Energy Community), the European Coal and Steel Community and the European Economic Community;
<i>exceptional items</i>	means those items which derive from events or transactions within the ordinary activities of the business of a <i>firm</i> and which are both material and not expected to recur frequently or regularly;
<i>exchange</i>	means a <i>recognised investment exchange</i> (as defined in the Act) or <i>designated investment exchange</i> ; *
<i>exchange traded</i>	means an <i>investment</i> which is traded or listed <i>on exchange</i> or on an <i>approved exchange</i> ; or an <i>offering</i> where an investment pari

* For the list of designated investment exchanges, see **Appendix 33**

	passu to that being offered is traded or listed <i>on exchange</i> or on an <i>approved exchange</i> ;
<i>exchange-traded-margined-transaction</i>	means a <i>margined transaction</i> effected by a <i>firm</i> under the rules of an <i>exchange</i> or an <i>approved exchange</i> or <i>clearing house</i> ;
<i>extraordinary items</i>	means those items which derive from events or transactions outside the ordinary activities of the business of a <i>firm</i> and which are both material and not expected to recur frequently or regularly;
<i>financial bookmaker</i>	means a <i>firm</i> which conducts only spread-betting business;
<i>financial reporting statement</i>	means the periodic financial and other reporting statements required to be provided to the <i>FSA</i> under the provisions of Chapter 16 of the <i>Supervision manual</i> ;
<i>financial resources</i>	means the sum of the <i>firm's tangible net worth</i> and <i>eligible capital substitutes</i> ;
<i>financial resources requirement</i>	means the sum of the <i>firm's primary requirement, PRR</i> and <i>CRR</i> ;
<i>financial rules</i>	means the financial rules in Chapter 3 of the <i>FSA's Interim Prudential Sourcebook for Investment Businesses (IPRU(INV)3)</i> ;
<i>firm</i>	means an <i>authorised person</i> ;
<i>floor</i>	means an agreement in respect of a deposit under which a <i>counterparty</i> contracts to pay any lost income arising as a result of a fall in rates below an agreed rate: the effect being to provide protection to the holder against a fall below that agreed interest rate;
<i>foreign currency derivatives method</i>	means the method of calculating <i>PRR</i> under rule 3-153;
<i>foreign currency exposures method</i>	means the method of calculating <i>PRR</i> under rule 3-154;
<i>forward</i>	means a <i>security</i> which is transacted for a settlement date beyond that which would normally apply in the market concerned, and where that forward settlement date is not yet passed;
<i>FRA</i>	means <i>forward rate agreement</i> , i.e. an agreement in which two parties agree on the payment by one party to another of an amount of interest based on an agreed interest rate for a specified period from a specified settlement date applied to an agreed principal amount; no commitment is made by either party to lend or borrow the principal amount; their exposure is only the interest difference between the agreed and actual rates at settlement;
<i>free delivery</i>	means - <ul style="list-style-type: none"> (a) the delivery of <i>securities</i> or <i>physical commodities</i> which takes place before the seller receives payment; or (b) payment made in settlement of a credit balance arising

from a sale on behalf of, or a purchase from a counterparty in respect of which the *securities* are undelivered;

FRN means floating rate note, i.e. all debt *securities* which pay interest at a rate which varies in response to general interest rates (including floating rate collateralised mortgage obligations);

FSA means the Financial Services Authority;

future means the investment, specified in article 84 of the Regulated Activities Order (Futures), which is, in summary: rights under a contract for the sale or delivery of a commodity or property of any other description under which delivery is to be made at a future date and at a price agreed on when the contract is made;

geared futures and options fund means an *authorised fund* dedicated to *derivatives* (where most or all of the extent of investment is limited by the amount of property available to be put up as initial outlay), whether with or without *transferable securities*;

government & public securities means the *investment*, specified in article 78 of the *Regulated Activities Order* (Government and public securities), which is in summary: a loan stock, bond or other instrument creating or acknowledging indebtedness, issued by or on behalf of any of the following:

- (a) the government of the United Kingdom; or
- (b) the Scottish Administration; or
- (c) the Executive Committee of the Northern Ireland Assembly; or
- (d) the National Assembly of Wales; or
- (e) the government of any country or territory outside the United Kingdom; or
- (f) a local authority in the United Kingdom or elsewhere; or
- (g) a body the members of which comprise:
 - (i) states including the United Kingdom or another *EEA State*; or
 - (ii) bodies whose members comprise states including the United Kingdom or another *EEA State*;

but excluding:

- (A) the instruments specified in article 77(2)(a) to (d) of the *Regulated Activities Order*;
- (B) any instrument creating or acknowledging

indebtedness in respect of:

- (I) money received by the Director of Savings as *deposits* or otherwise in connection with the business of the National Savings Bank; or
- (II) money raised under the National Loans Act 1968 under the auspices of the Director of Savings or treated as so raised under section 11(3) of the National Debt Act 1972;

group

except in relation to a *marketing group*, means (in accordance with section 421 of the Act (Group)), in relation to a person ("A"), A and any person who is:

- (a) a parent undertaking of A;
- (b) a subsidiary undertaking of A;
- (c) a subsidiary undertaking of a parent undertaking of A;
- (d) a parent undertaking of a subsidiary undertaking of A;
- (e) an undertaking in which A or an undertaking in (a) to (d) has a participating interest;
- (f) if A or an undertaking in (a) or (d) is a *building society*, an associated undertaking of that *building society*;
- (g) if A or an undertaking in (a) or (d) is an *incorporated friendly society*, a *body corporate* of which that *friendly society* has joint control (as defined in section 13(9)(c) or (cc) of the Friendly Societies Act 1992);

in this definition:

- (i) "participating interest" has the same meaning as in Part VII of the Companies Act 1985 or Part VIII of the Companies (Northern Ireland) Order 1986; but also includes an interest held by an individual which would be a participating interest for the purposes of those provisions if he were an undertaking;
- (ii) "associated undertaking" has the meaning given in section 119(1) of the Building Societies Act 1986.

holding company

has the meaning given to it in section 736 of the Companies Act 1985;

in the money

means, in relation to *call options* and *warrants*, that the exercise price is less than the current *mark to market* value of the *underlying instrument* and, in relation to *put options*, that the current *mark to market* value is less than the exercise price;

incoming EEA firm

means (in accordance with section 193(1)(a) of the Act (Interpretation of this Part)) an *EEA firm* which is exercising, or

has exercised, its right to carry on a *regulated activity* in the *United Kingdom* in accordance with Schedule 3 to the *Act* (EEA Passport Rights).

initial margin requirement

means the total amount which under the rules of the relevant *exchange* or *exchanges* or *clearing house* or *clearing houses* the *firm* or an *intermediate broker* would be required to deposit in cash as a fidelity deposit in respect of all the *client's* open positions in *margined transactions* at that time, irrespective of any unrealised profit or loss on such positions, on the assumption that those transactions were the only transactions undertaken under the rules of that *exchange* or those *exchanges* or that *clearing house* or those *clearing houses* by the *firm* or the *intermediate broker* at that time;

intermediate broker

in relation to a *margined transaction*, means any person through whom the *firm* undertakes that transaction;

intermediate customer

means a *client* who is not a *market counterparty* and who is:

- (a) a local authority or public authority;
- (b) a *body corporate* whose *shares* have been *listed* or *admitted to trading* on any *EEA* exchange;
- (c) a *body corporate* whose *shares* have been *listed* or *admitted to trading* on the primary board of any *IOSCO* member country official exchange;
- (d) a *body corporate* (including a *limited liability partnership*) which has (or any of whose *holding companies* or *subsidiaries* has) (or has had at any time during the previous two years) called up share capital or net assets of at least £5 million (or its equivalent in any other currency at the relevant time);
- (e) a *special purpose vehicle*;
- (f) a *partnership* or unincorporated association which has (or has had at any time during the previous two years) net assets of at least £5 million (or its equivalent in any other currency at the relevant time) and calculated in the case of a limited *partnership* without deducting loans owing to any of the *partners*;
- (g) a trustee of a trust (other than an *occupational pension scheme*, *SSAS* or *stakeholder pension scheme*) which has (or has had at any time during the previous two years) assets of at least £10 million (or its equivalent in any other currency at the relevant time) calculated by aggregating the value of the cash and *designated investments* forming part of the trust's assets, but before deducting its liabilities;
- (h) a trustee of an *occupational pension scheme*, *SSAS* or *stakeholder pension scheme* where the trust has

(or has had at any time during the previous two years):

- (i) at least 50 members; and
 - (ii) assets under management of at least £10 million (or its equivalent in any other currency at the relevant time);
- (i) another *firm*, or an *overseas financial services institution*, when, in relation to *designated investment business*, or related *ancillary activities*, conducted with or for that *firm* or institution, that *firm* or institution is an *intermediate customer* in accordance with COB 4.1.7R (Classification of another firm or an overseas financial services institution);
 - (j) an *unregulated collective investment scheme*;
 - (k) a *client* when he is classified as an *intermediate customer* in accordance with COB 4.1.9R (Expert private customer classified as intermediate customer);

but excluding:

- (A) a *regulated collective investment scheme*; and
- (B) a *client* who would otherwise be an *intermediate customer*, when he is classified in accordance with:
 - (I) COB 4.1.12R (Large intermediate customer classified as market counterparty); or
 - (II) COB 4.1.14R (Client classified as private customer);

internal controls

means the whole system of controls, financial or otherwise, established by the management in order to -

- (a) carry on the business of the *firm* in an orderly and efficient manner;
- (b) ensure adherence to management policies;
- (c) safeguard the assets of the *firm* and assets for which the *firm* is responsible belonging to *customers* and other persons; and
- (d) secure as far as possible the completeness and accuracy of the *firm's* records (including those necessary to ensure continuous compliance with the requirements for financial resources under the rules of the *FSA*);

international offering

means an *offering* which is not a *domestic offering* or, where an *offering* has a tranche which is a *domestic offering*, those tranches which are not;

inter-professional

for the purposes of *repurchase*, *reverse repurchase*, *sale and buy back* and *buy and sale back agreements* means an

agreement with a counterparty which is one of the following -

- (a) a *Zone A credit institution*;
- (b) an *investment firm*;
- (c) a *recognised third country investment firm*;
- (d) a *recognised exchange*;
- (e) a *recognised clearing house*;

introducing broker

means an *arranger* who introduces all transactions in *investment business* or *dealing activities* arranged for *counterparties* to a *clearing firm* where the *clearing firm* accepts primary responsibility (including legal liability) for the settlement of those transactions;

investment

means (for the purposes of this chapter) any of the following investments specified in Part III of the Regulated Activities Order (Specified investments):

- (a) life policies (subset of article 75);
- (b) shares (article 76);
- (c) debentures (that is, instruments creating or acknowledging indebtedness) (article 77);
- (d) government and public securities (article 78);
- (e) warrants (that is, instruments giving entitlement to investments) (article 79);
- (f) certificates representing certain securities (article 80);
- (g) units (article 81);
- (h) stakeholder pension scheme (article 82);
- (i) options (article 83);
- (j) futures (article 84);
- (k) contracts for differences (article 85);
- (l) rights to or interests in an investment within (a) to (k) (article 89);¹

investment agreement

means any agreement the making or performance of which by either party constitutes an activity which is *investment business*;

investment business

means any of the following regulated activities specified in Part II of the Regulated Activities Order and which is carried on by way of business:

- (a) dealing in investments as principal (article 14), but disregarding the exclusion in article 15 (Absence of holding out etc);

¹ These are the same investments as are included in the definition of "designated investment" used in the main Handbook glossary.

- (b) dealing in investments as agent (article 21);
- (c) arranging deals in investments for another person (article 25(1)) but only in relation to *investments*;
- (d) making arrangements for deals in investments (article 25(2)) but only in relation to *investments*;
- (e) managing investments (article 37);
- (f) safeguarding and administration of assets (article 40);
- (g) sending dematerialised instructions (article 45(1));
- (h) causing dematerialised instructions to be sent (article 45(2));
- (i) establishing, operating or winding up a collective investment scheme (article 51(1)(a));
- (j) acting as trustee of an authorised unit trust scheme (article 51(1)(b));
- (k) acting as the depository or sole director of an open-ended investment company (article 51(1)(c));
- (l) advising on investments (article 53);
- (m) agreeing to carry on the activities in (a) to (h) and (l) (article 64);²

investment firm means any legal or natural person established in the *EEA*, the regular occupation or business of which is the provision of core *investment services* for third parties on a professional basis, in accordance with the *ISD*, excluding any person to whom the *ISD* does not apply by virtue of the provisions of paragraph 2 of article 2 of that directive;

investment manager means a person who, acting only on behalf of a *customer*, either -

- (a) manages an account or portfolio in the exercise of discretion; or
- (b) has accepted responsibility on a continuing basis for advising on the composition of the account or portfolio;

investment services means -

- (a) activities undertaken in the course of carrying on investment business; and
- (b) activities undertaken in connection with an ISA where those activities do not constitute investment business;

ISA means an account which is a scheme of investment satisfying the conditions prescribed by the Individual Savings Account Regulations;

² These are the same activities as are included in the definition of "designated investment business" used in the Main Handbook Glossary.

<i>launch</i>	means the time when any announcement, specifying the issuer or the guarantor of and indicating the final <i>pricing terms</i> of the <i>offering</i> is made for the first time to the public or the press or any <i>exchange</i> or <i>approved exchange</i> or information service;
<i>local</i>	means a <i>firm</i> which is a member of a futures and options exchange and whose <i>permission</i> includes a <i>requirement</i> that: <ul style="list-style-type: none"> (a) the <i>firm</i> will not conduct <i>designated investment business</i> other than: <ul style="list-style-type: none"> (i) <i>dealing</i> for its own account on that futures and options exchange; (ii) <i>dealing</i> for the accounts of other members of the same futures and options exchange; or (iii) making a price to other members of the same futures and options exchange; and (b) the performance of the <i>firm's</i> contracts must be guaranteed by and must be the responsibility of one or more of the clearing members of the same futures and options exchange;
<i>margined transaction</i>	means a transaction effected by a <i>firm</i> with or for a <i>customer</i> relating to an <i>investment</i> of any description referred to in articles 83, 84 and 85 of the Regulated Activities Order (or any right or any interest in such an <i>investment</i>) under the terms of which the <i>customer</i> will or may be liable to make a deposit in cash or collateral to secure performance of obligations which he may have to perform when the transaction falls to be completed or upon the earlier closing out of his position;
<i>mark to market</i>	means to value an <i>investment</i> at its current market value in accordance with rule 3-41(9);
<i>market counterparty</i>	means a <i>client</i> who is: <ul style="list-style-type: none"> (a) a properly constituted government (including a quasi-governmental body or a government agency) of any given country or territory; (b) a central bank or other national monetary authority of any country or territory; (c) a supranational whose members are either countries or central banks or national monetary authorities; (d) a State investment body, or a body charged with, or intervening in, the management of the public debt; (e) another <i>firm</i>, or an <i>overseas financial services institution</i>, except in relation to <i>designated investment business</i>, and related <i>ancillary activities</i>, conducted with or for that <i>firm</i> or institution, when that <i>firm</i> or institution is an <i>intermediate customer</i> in accordance with COB 4.1.7R (Classification of another firm or an

overseas financial services institution);

- (f) any *associate* of a *firm* (except an *OPS firm*), or of an *overseas financial services institution*, if the *firm* or institution consents;
- (g) a *client* when he is classified as a *market counterparty* in accordance with COB 4.1.12R (Large intermediate customer classified as a market counterparty);

but excluding:

- (A) a *collective investment scheme*; and
- (B) a *client*, who would otherwise be a *market counterparty*, when he is classified as a *private customer* in accordance with COB 4.1.14R (Client classified as private customer);

marketable investment means -

- (a) an *investment* which is traded on or under the rules of an *exchange* or an *approved exchange*;
- (b) a debt instrument which may be transferred without the consent of the issuer or any other person (including a collateralised mortgage obligation);
- (c) a *physical commodity*;
- (d) a *warrant*, *option*, *future* or other instrument which entitles the holder to subscribe for or acquire -
 - (i) an *investment* or *physical commodity* which falls under (a) to (c) above;
 - (ii) any currency; or
 - (iii) any combination of (i) and (ii) above;

<i>regulated banking institution</i>	means any banking institution which has paid up share capital and reserves of over £5,000,000 as shown by its latest published audited accounts, and which is authorised by the <i>FSA</i> or supervised by the central bank or other regulatory authority of a member state of the <i>OECD</i> in which the bank is incorporated;
<i>regulated business</i>	means <i>investment business</i> which is - <ul style="list-style-type: none"> (a) business carried on from a permanent place of business maintained by a <i>firm</i> (or its <i>appointed representative</i>) in the United Kingdom; and (b) other business carried on with or for <i>customers</i> in the United Kingdom, unless that business is - <ul style="list-style-type: none"> (i) business carried on from an office of a <i>firm</i> outside the United Kingdom which, if that office were a separate person, would fall within the overseas persons exclusions set out in article 72 of the Regulated Activities Order; or (ii) business of an <i>appointed representative</i> of the <i>firm</i> which is not carried on in the United Kingdom;
<i>regulated clearing firm</i>	means a <i>clearing firm</i> which is an <i>authorised person</i> ;
<i>regulated collective investment scheme</i>	means an <i>authorised unit trust scheme</i> , including an <i>ICVC</i> , or a <i>recognised scheme</i> ;

<i>regulated financial institution</i>	<p>means a <i>firm</i>, or an institution which is authorised to conduct <i>investment business</i> involving the execution of transactions on <i>exchanges</i> or on <i>securities</i> or <i>derivatives exchanges</i> by one or more of the following regulators -</p> <p>(a) any regulator of <i>investment business</i> in any member state of the European Community (other than the United Kingdom) established by law in that state; or</p> <p>(b) a body referred to in Part 1 of Appendix 35;</p> <p>provided, in the case of any such institution that the <i>firm</i> has no reason to suppose that the institution is in breach, in any material respect, of the rules enforceable by the relevant regulator;</p>
<i>relevant annual expenditure</i>	means the relevant annual expenditure of a <i>firm</i> calculated in accordance with rule 3-73;
<i>reporting accountant</i>	<p>means an accountant appointed:</p> <p>(a) by the <i>FSA</i>; or</p> <p>(b) by a <i>firm</i>, having been nominated or approved by the <i>FSA</i> under section 166 of the <i>Act</i> (Reports by skilled persons);</p> <p>to report on one or more aspects of the financial position of the <i>firm</i>, including <i>internal controls</i> and reporting returns;</p>
<i>reporting statement</i>	<p>means any one or more of the following types of report as required by the <i>Supervision manual</i>:</p> <p>(a) <i>audited annual financial statements</i>;</p> <p>(b) <i>annual reporting statement</i>;</p> <p>(c) <i>auditor's report</i>;</p> <p>(d) internal control letter;</p> <p>(e) quarterly reporting statement;</p> <p>(f) position risk reporting statement;</p> <p>(g) counterparty risk reporting statement;</p> <p>(h) annual reconciliation;</p> <p>(i) monthly reporting statement; and</p> <p>(j) the audited accounts of a <i>subsidiary</i> of the <i>firm</i>;</p>
<i>repurchase agreement</i>	(and <i>sale and buy back agreement</i>) means an agreement for the sale of <i>securities</i> or <i>physical commodities</i> subject to a commitment to repurchase from the same person the same or similar <i>securities</i> or <i>physical commodities</i> ;
<i>requirement</i>	means a requirement included in a <i>firm's Part IV permission</i> under section 43 of the <i>Act</i> (Imposition of requirements), section 45(4) of the <i>Act</i> (Variation etc on the Authority's own initiative) or section 46 of the <i>Act</i> (Variation of permission on acquisition of <i>control</i>);

<i>reverse repurchase agreement</i>	(and “ <i>buy and sale back agreement</i> ”) means an agreement for the purchase of <i>securities or physical commodities</i> subject to a commitment to resell to the same person the same or similar <i>securities or physical commodities</i> ;
<i>sale</i>	includes any disposal for valuable consideration;
<i>sale and buy back agreement</i>	see <i>repurchase agreement</i> ;
<i>scheme management activity</i>	means the management by an <i>operator</i> of a <i>collective investment scheme</i> of the property held for or within a <i>collective investment scheme</i> of which it is the <i>operator</i> and includes the management of the property of an <i>open-ended investment company</i> by the company itself as its <i>operator</i> but excludes the management of an <i>open-ended investment company</i> by another person as its <i>operator</i> (and excludes in all cases activities relating to transactions in units, <i>shares</i> or interests in the <i>collective investment scheme</i>);
<i>securities and futures firm</i>	means a <i>firm</i> whose <i>permitted activities</i> include <i>designated investment business</i> , which is not an <i>authorised professional firm, bank, building society, credit union, friendly society, ICVC, insurer, media firm, service company, incoming EEA firm</i> (without a <i>top-up permission</i>), <i>incoming Treaty firm</i> (without a <i>top-up permission</i>) or <i>UCITS qualifier</i> , whose <i>permission</i> does not include a <i>requirement</i> that it comply with <i>IPRU(INV) 5</i> (Investment management firms) or 13 (Personal investment firms), and which is within (a), (b), (c) or (d): <ul style="list-style-type: none"> (a) a <i>firm</i> (other than one falling within (d)): <ul style="list-style-type: none"> (i) which was a member of <i>SFA</i> immediately before <i>commencement</i>; and (ii) which was not, immediately before <i>commencement</i>, subject to the financial supervision requirements of the <i>FSA</i> (under section 43 of the Financial Services Act 1986), <i>PIA</i> or <i>IMRO</i> under lead regulation arrangements; (b) a <i>firm</i> whose <i>permission</i> includes a <i>requirement</i> that it comply with <i>IPRU(INV) 3</i> or 10 (Securities and futures firms); (c) a <i>firm</i>: <ul style="list-style-type: none"> (i) which was given a <i>Part IV permission</i> after <i>commencement</i>, or which was authorised under section 25 of the Financial Services Act 1986 immediately before <i>commencement</i> and not a member of <i>IMRO, PIA</i> or <i>SFA</i>; and (ii) for whom the most substantial part of its gross income, including <i>commissions</i>, from the <i>regulated activities</i> included in its <i>Part IV permission</i> is derived from one or more of the following activities (based,

for a *firm* given a *Part IV permission* after *commencement*, on the business plan submitted as part of the *firm's* application or, for a *firm* authorised under section 25 of the Financial Services Act 1986, on the *firm's* financial year preceding its *authorisation* under the Act):

- (A) an activity carried on as a member of an exchange;
 - (B) making a market in *securities* or *derivatives*;
 - (C) *corporate finance business*;
 - (D) *dealing*, or *arranging (bringing about) deals in investments*, in *securities* or *derivatives*;
 - (E) the provision of clearing services as a *clearing firm*;
 - (F) *managing investments*, where those *investments* are primarily *derivatives*; and
 - (G) activities relating to *spread bets*;
- (d) a *firm* that is:
- (i) an *ex-section 43 firm* which was not authorised under the Financial Services Act 1986 immediately before *commencement*; or
 - (ii) an *ex-section 43 lead regulated firm*;

security

means, as defined in article 3(1) of the Regulated Activities Order, any of the following investments specified in that Order:

- (a) shares (article 76);
- (b) debentures (that is, instruments creating or acknowledging indebtedness) (article 77);
- (c) government and public securities (article 78);
- (d) warrants (that is, instruments giving entitlement to investments) (article 79);
- (e) certificates representing certain securities (article 80);
- (f) units (article 81); and
- (g) stakeholder pension scheme (article 82); and
- (h) rights to or interests in investments in (a) to (g) (article 89);

settlement day

means the day on which under the recognised practice of an *exchange* or *approved exchange*, bargains are contracted for settlement; and in the case of bargains not transacted on an *exchange* or *approved exchange*, or entered into for forward settlement, 20 days from the date of the transaction, or, if earlier, the contractual due date;

<i>share</i>	means the investment, specified in article 76 of the Regulated Activities Order (Shares etc), which is, in summary: a share or stock in the share capital of: (a) any <i>body corporate</i> (wherever incorporated); (b) any unincorporated body constituted under the law of a country or territory outside the United Kingdom;
<i>sole trader</i>	means a <i>firm</i> which is not a <i>body corporate</i> and not a <i>partnership</i> ;
<i>stock exchange moneybroker</i>	is a <i>moneybroker</i> which is an <i>authorised person</i> and acts as an intermediary in the gilt market;
<i>subsidiary</i>	has the meaning given to it in section 736 of the Companies Act 1985;
<i>supervisory authority</i>	in relation to another member state, means an authority in that state which has regulatory functions in relation to one or more listed activities, <i>core investment services</i> or <i>non-core investment services</i> ;
<i>supranational organisation</i>	means any organisation referred to in Part 2 of Appendix 35 ;
<i>swap</i>	means a transaction in which two <i>counterparties</i> agree to exchange streams of payments over time according to a predetermined basis;
<i>Takeover Code</i>	means the City Code on Takeovers and Mergers and the Rules Governing Substantial Acquisitions of Shares published by the Takeover Panel;
<i>takeover or related operation</i>	means: (a) any offer to which the <i>Takeover Code</i> applies and any transaction or arrangement which is of such a nature that the <i>Takeover Code</i> would have applied to it had it concerned a company whose shares are listed under Part VI of the <i>Act</i> and whose head office and place of central management are in the United Kingdom; (b) any offer, transaction or arrangement relating to the purchase of <i>securities</i> with a view to establishing or increasing a strategic holding of a person, or of a person together with his <i>associates</i> in the <i>securities</i> concerned; (c) any transaction or arrangement entered into in contemplation or furtherance of any offer, transaction or arrangement falling within (a) or (b) above; and (d) any transaction or arrangement entered into by way of defence or protection against any offer, transaction or arrangement falling within (a), (b) or (c) above which has taken place or which is contemplated;
<i>Takeover Panel</i>	means the Panel on Takeovers and Mergers;
<i>tangible net worth</i>	is the tangible net worth of a <i>firm</i> calculated in accordance with

	rule 3-62;
<i>tender offer</i>	means an unconditional offer as a principal to buy <i>securities</i> ;
<i>total PRR</i>	means the sum of all the amounts calculated as a <i>PRR</i> under rules 3-80 to 3-169B;
<i>traditional option</i>	means any <i>option</i> arranged but not traded under the rules of the London Stock Exchange;
<i>trust beneficiary</i>	means a beneficiary under a trust (not being the settlor) who benefits from the performance by a <i>firm</i> as trustee of <i>investment services</i> relating to the management of the trust assets;
<i>underwriting</i>	means a commitment to take up <i>securities</i> where others do not acquire or retain them;
<i>underwriting price</i>	means the price at which the <i>firm</i> is committed to take up the securities or the price at which it is committed to do so if required under the <i>underwriting</i> commitment less any commissions or discounts paid or allowed in connection with the transaction, except to the extent that the <i>firm</i> has taken credit for them in its accounts;
<i>unregulated collective investment scheme</i>	means a <i>collective investment scheme</i> which is not a <i>regulated collective investment scheme</i> ;
<i>variable rate note</i>	means a debt <i>security</i> with the characteristics of an <i>FRN</i> except that the margin with respect to the index rate of interest is subject to variation depending on periodic negotiations;
<i>variation margin requirement</i>	means in relation to a <i>counterparty</i> the value of any amounts which the <i>firm</i> or <i>intermediate broker</i> would be required to pay under the rules of an <i>exchange</i> , <i>approved exchange</i> or <i>clearing house</i> to meet any <i>marked to market</i> losses occurring on contracts undertaken for that <i>counterparty</i> at that time on the assumption that those transactions were the only transactions undertaken on the <i>exchange</i> , <i>approved exchange</i> or <i>clearing house</i> by the <i>firm</i> or <i>intermediate broker</i> at that time;
<i>venture capital business</i>	means the business of: <ul style="list-style-type: none"> (a) investing in, advising on, managing or arranging transactions in <i>venture capital investments</i>; or (b) advising, managing or operating portfolios or <i>collective investment schemes</i> which (apart from funds awaiting investment) invest only in <i>venture capital investments</i>; (c) any <i>custody</i> activities provided in connection with the activities in (a) and (b); or (d) any related ancillary activities;
<i>venture capital firm</i>	means a <i>firm</i> whose <i>permission</i> includes a <i>requirement</i> that it must not conduct <i>investment business</i> other than <i>venture capital business</i> ;
<i>venture capital</i>	means an <i>investment</i> which, at the time the investment is made,

<i>investment</i>	<p>is:</p> <ul style="list-style-type: none"> (a) in a new or developing company or venture; or (b) in a management buy-out or buy-in; or (c) made as a means of financing the investee company or venture and accompanied by a right of consultation, or rights to information, or board representation, or management rights; or (d) acquired with a view to, or in order to facilitate, a transaction falling within (a) to (c);
<i>venture capital schemes</i>	means a scheme for providing capital to a <i>body corporate</i> whose equity is not traded or listed on an <i>exchange</i> ;
<i>walkaway clause</i>	means a provision which permits a non-defaulting counterparty to make only limited payments, or no payment at all, to the estate of the defaulter, even if the defaulter is a net creditor;
<i>warrant</i>	means the investment specified in article 79 of the Regulated Activities Order (Instruments giving entitlement to investments), which is, in summary: a warrant or other instrument entitling the holder to subscribe for a share, debenture or government and public security;
<i>warrant fund</i>	means a scheme which is dedicated to <i>transferable securities</i> except that it is permitted to invest entirely in <i>warrants</i> ;
<i>zone A</i>	means any country which is a full member of the <i>OECD</i> or has concluded special lending arrangements with the IMF associated with the IMF's General Arrangements to Borrow, provided it has not rescheduled its external sovereign debt to official or commercial bank creditors in the previous five years (Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany (including any pre-unification claims on East Germany), Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Portugal, Saudi Arabia, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States, the Channel Islands, Gibraltar, Bermuda and the Isle of Man); and
<i>zone B</i>	means any country not in <i>Zone A</i> .

Appendix 20

GUIDANCE NOTES ON RECONCILIATION OF FIRM'S BALANCES WITH A COUNTERPARTY WHICH IS A MEMBER OF AN EXCHANGE (rule 3-11(1)(d))

Introduction

- 1 The purpose of this guidance is to state how under rule 3-11(1)(d) the reconciliation process with counterparties which are also members of exchanges should be performed.

Scope

- 2 The reconciliation to be performed with counterparties should cover all outstanding balances and *securities* positions with such counterparties from all sources except to the extent that the components of such balances and *securities* positions have been agreed by other means. Agreement by other means shall include (but is not to be limited to) those which have been—
 - (a) matched or cleared through an exchange, clearing house or clearing system; or
 - (b) verified by dispatch to or receipt from the counterparty of a confirmation or statement. Such verification should have been evidenced in writing or by electronic media.
- 3 The reconciliation should cover all remaining outstanding items including, for example, fee-based items, dividends where these are on the *firm's* balance sheet, coupons, amounts arising under *OTC* contracts, *repurchase* and *reverse repurchase agreements* and *securities* lending and borrowing.
- 4 The items to be included should be all those past trade date which is consistent with *trade date accounting*.
- 5 Where necessary a *firm* should initially circularise a list of all relevant open items as set out above rather than a net balance. A *firm* should identify the assumptions made by them in ascertaining which balances (or types of balances) have been included in the reconciliation. A *firm* should also identify where the balances or *securities* positions with a counterparty arise from different accounts operated by them with that counterparty.
- 6 The scope of the rule is intended to cover nil balances although these may be covered on a sample basis only. They are included because discrepancies in such balances may only come to light as being incorrectly stated on the performance of a circularisation. However, reconciliations of nil balances do not need to be performed where—
 - (a) the counterparty is also a *firm*; or

- (b) there has been no outstanding balance with the counterparty at any point during the year.

Timing

- 7 It is considered preferable for a *firm* to be aware in advance at which periods of the year they will receive reconciliations requests. This may be of use to a *firm* in enabling it to plan in advance the allocation of staff for the performance of the reconciliations. Thus, it is suggested that a *firm* submits such circularisations, where possible, at calendar quarter end dates. It is considered that, in any case, the majority of *firms* would be likely to circularise such statements at these dates. However, a *firm* will be eligible to circularise at other dates as, for example, when its own *annual* or *quarterly accounting reference dates* do not coincide with the calendar quarter end.
- 8 A *firm* may perform the reconciliation in conjunction with the work undertaken by its auditors for the purposes of the annual audit.

The obligation on firms

- 9 Where a *firm* receives a statement from a counterparty during the year, the recipient *firm* is not also required by virtue of rule 3-11(1)(d) to send a further statement to that counterparty in the same year.
- 10 A recipient of a circularisation request from another *firm* must use its best endeavours to respond. Notwithstanding paragraphs 7 and 8 above, this obligation will apply even if this request is received more frequently than once a year from the same counterparty or is wider in scope than required by paragraphs 2 to 6 above (for example, by also covering balances which have already been agreed by other means). Rule 3-11 only requires that specific balances be covered. This is intended as a minimum requirement and not necessarily as the norm. If a *firm* need not reply to a request more than once a year or which covered balances of a wider scope, *firms* would be discouraged from requesting such reconciliations.
- 11 Rule 3-11(3) requires a *firm* to respond, within one month of receipt, to a circularisation request received from another *firm*. The one month response period should also be observed in relation to circularisation requests received under rule 3-11(1)(d).
- 12 It is not considered necessary to issue detailed guidance for the procedure to be adopted in cases where the recipient does not reply to a circularisation request sent by a *firm*. It is intended that a *firm* need only take reasonable steps to obtain any such reply. However, before a *firm* has taken such steps, it should not assume that the circularisation is agreed merely due to the absence of a reply from the counterparts.

Appendix 21

GUIDANCE NOTES ON THE VALUATION OF POSITIONS

(rule 3-41(9))

Introduction

- 1 Rule 3-41(9) states that a position must be valued at its close out price, where close out price means that a long position should be valued at current bid price and a short position at current offer price. In addition, rule 3-41(9) states that a *firm* must value a position on a prudent and consistent basis, and have regard to the liquidity of the instrument concerned and any special factors that may adversely affect the closure of the position.
- 2 The following paragraphs give general indications to *firms* on the appropriate valuation methodology. However, it is emphasised that prudence should be the overriding influence in the valuation exercise and that, where uncertainty exists as to the most appropriate price, the *firm* should use that price which gives the most conservative valuation.

General principles

- 3 *Firms* should value positions by reference to market prices, but where necessary should add a prudent and appropriate buffer to the bid or offer price to account for factors which would adversely affect the *firm's* ability to realise the close-out value, such as -
 - (a) the liquidity of the *security* in question;
 - (b) the size of the position held in that *security* relative to the sizes at which prices are quoted;
 - (c) the direction of the position (long or short) relative to the current direction of the market;
 - (d) the exposure of the *firm* to the relevant market as a whole;
 - (e) any conversion or foreign exchange costs that would be incurred if the position were closed out;
 - (f) any other factors which may affect the close-out price.
- 4 Where a mid-market or single price only is available for the *security* in question, *firms* must adjust this price by a prudent and appropriate buffer as outlined in paragraph 3 above.
- 5 With respect to paragraphs 3 and 4 above, *firms* should be able to demonstrate at all times how they determined the final price applied to any position in a *security*.

Appendix 26 (rules 3-81 to 3-165)
SUMMARY TABLES OF WHICH METHOD OF PRR TO APPLY TO AN INSTRUMENT

INSTRUMENT		CIRCUMSTANCES	METHOD	RULES
1	<i>note issuance facilities</i>	all circumstances	<i>note issuance facilities</i>	3-80
2	foreign currency asset or capital or liability	all circumstances	<i>foreign currency exposures</i>	3-150 to 3-154
3	currency <i>option</i> and <i>future</i>	see rule 3-152	<i>foreign currency exposures</i> or <i>foreign currency derivatives</i>	3-150 to 3-154

The International Bank for Reconstruction and Development (World Bank);
The International Finance Corporation;
The International Monetary Fund;
The Nordic Investment Bank.

Appendix 37 (rule 3-177)

GUIDANCE NOTES FOR MONEY BROKERS

Application Of The Counterparty Risk Requirement

Introduction

- 1 This Appendix offers guidance to *money brokers* on the application of rule 3-177 relating to the counterparty risk requirement.

Calculation of 0.5% additional CRR

- 2 A *money broker* should calculate the additional *CRR* requirement as follows -
 - (a) if a *money broker* is satisfied that it has a legal right to net off exposures with an individual *counterparty*, valid and enforceable in the United Kingdom or any other relevant country, it may do so in accordance with the rule 3-176(3). The obligation rests with the broker to demonstrate that the method it uses is reasonable and justifiable. It is stressed that this right to net is at the option of the *firm* and is not mandatory;
 - (b) a *money broker* should then aggregate its total level of *securities* subject to a *repurchase* or *reverse repurchase agreement*, *securities* lending or borrowing agreement and *sale and buy back* or *buy and sale back agreement* (either net or gross) to or from individual *counterparties* outside an *approved payments system* and money lent against *Talisman short-term certificates*. A capital requirement of 0.5% of this sum should then be calculated.

Approved payments systems

- 3 The following are *approved payment systems* when the systems concerned provide for settlement on a delivery versus payment basis -
 - Austraclear New Zealand
 - Banca D'Italia's Giornaliera
 - Banque Nationale de Belgique
 - Bank of Spain Interbank Bond Settlements System
 - Banque de France's SATURNE
 - BOJ-NET DVP
 - Cedel
 - Central Gilts Office
 - Depository Trust Company
 - Euroclear
 - Fedwire - see The Federal Reserve System
 - Kassenverein
 - Necigef

- SICOVAM (Relit settlement only)
- Sociedad de Compensacion y Liquidacion de Valores
- The Canadian Depository for Securities Ltd
- The Federal Reserve System (Fedwire), and
- Vardepapperscentralen VPC AB

Collateral

- 4** It is recognised that letters of credit may be used as collateral and may have a value in excess of the amount of the *securities* transferred. Provided it is clearly established that claims cannot be made on the letter of credit in excess of the value of the *securities* borrowed, no *CRR* will be imposed on the amount by which the letter of credit exceeds the value of the *securities* borrowed. *Firms* are reminded that the definition of *acceptable collateral* includes *marketable investments* which may take the form of money market instruments.

Appendix 43
GUIDANCE NOTES ON THE FINANCIAL RESOURCES AND ACCOUNTING
TREATMENT OF SOFT COMMISSION AGREEMENTS

(rules 3-73 and 3-182(3))

1 Introduction

This Appendix contains detailed guidance to the following rules–

Rules	
3-73	Expenditure requirement
3-182(3)	<i>CRR</i> requirement on other amounts owed to a <i>firm</i> arising out of <i>investment business</i> or <i>investment dealing activity</i>

2 The *FSA* is of the view that it is not responsible for setting accounting policies in relation to a *firm's audited annual financial statements*. However, the *FSA* considers that it is preferable for all *firms* participating in "soft commission agreements" to have consistent accounting policies. Without such consistency, certain *firms* would have a competitive advantage in terms of their *financial resources*. Therefore, for the purposes of completing *financial reporting statement* submitted to the *FSA*, appropriate accounting policies should be used. The guidance and interpretations made in this Appendix should be considered in this context.

3 The guidance applies to all *firms* which participate in "soft commission agreements" whether or not this is the sole *investment business* of the *firm*.

4 Definition

A soft commission agreement means–

"any agreement, whether oral or written, under which a *firm* which deals in *securities* on an advisory basis, or in the exercise of discretion, receives goods or services in return for an assurance that not less than a certain amount of such business will be put through or in the way of another person;"

5 Description

A "soft commission agreement" is understood as being one in which a fund manager agrees, either formally or informally, to provide a broker with a certain amount of commission in any one period in return for the provision of services "free". Those services may be provided in-house or by third parties and may take the form of specific research provided by analysts, portfolio valuation systems, or information packages, plus the associated computer hardware and software.

- 6 Under traditional broking arrangements, the full service broker normally receives commission in return for the total servicing of a fund manager's account, a package which includes execution, perhaps custodianship and, almost certainly, research, also "free". The services provided under traditional broking arrangements are in-house i.e. within a broking group, and mostly are not conditional upon receipt by the broker of a certain level of commission, although there is usually an understanding which may never be articulated, that a certain volume of business will be generated.

7 Existing difference in accounting policies

The accounting policies used can in general be divided into those which are "profit & loss" based and those which are "balance sheet" based. Under the former, the *firm* will write-off such expenditure to its profit & loss account but will usually not accrue a liability in its *financial reporting statements* for commissions received in advance. Consequently, the "normal" profit & loss based accounting systems for expenses incurred and commissions received will be used. It should be noted that such *firms*, as they are fundamentally participating in traditional broking arrangements, may not have legally enforceable "soft commission agreements" with their counterparties, such that there may be no absolute contractual liability on the *firm* or counterparty to provide expenditure or commission.

- 8 *Firms* using the "balance sheet" approach will accrue for liabilities but will also tend to capitalise their expenditure under "soft commission agreements". This may be the policy used by *firms* which specialise in legally enforceable "soft commission agreements" and reflects the legal status of such agreements. These may contract the counterparty to pay a level of commission related to the level of expenditure incurred by the *firm* (and vice versa if the counterparty has paid advance commission in excess of the expenditure paid by the *firm*).

9 Expenditure and balances receivable

Once expenditure is incurred for a counterparty, the soft commission broker may claim that contractually the counterparty is bound to pay him a certain multiple of that expenditure in the form of commission within a certain period of time from the date the expenditure was incurred. Consequently, certain *firms* have previously capitalised their expenditure and shown it as an asset for the purposes of calculating their *financial resources*.

10 Required treatment

Where a *firm* incurs expenditure on behalf of a counterparty or counterparties in respect of "soft commission agreements" (whether or not it is incurred in relation to a written contract), the *firm* should immediately write off such expenditure to its profit & loss account.

- 11 Notwithstanding the above, expenditure may be capitalised (as an asset) in the balance sheet of the company which incurred the expenditure, **only**

where this amount is recoverable under a legally enforceable contract (see paragraph 18 below). Where such expenditure is capitalised it will be subject to rule 3-182(3).

12 Income and balances payable

Once commission income is received from a counterparty, the *firm* may recognise that contractually it is bound to pay the counterparty a certain proportion of that income, in the form of the counterparty's expenses, within a certain period. Although certain *firms* are including this amount as a liability on their balance sheet (and thus reducing their *financial resources*), other *firms* are making no such provision.

13 Required treatment

Where a *firm* has a contractual liability to, or on behalf of, a counterparty or counterparties which arises from a legally enforceable "soft commission agreement", the *firm* should accrue in its *financial reporting statements* a liability for the relevant proportion of any advanced commission income received from the counterparty that will have to be subsequently incurred as an expense by the *firm* in the form of a payment on behalf of the counterparty for allowable goods and services.

14 Expenditure requirement

Once expenditure is incurred for a counterparty, the soft commission broker may claim that contractually the counterparty is bound to pay him a certain multiple of that expenditure in the form of commission within a certain period and thus such expenditure should not be included in the *firm's* expenditure requirement.

15 Required treatment

Expenditure incurred by soft commission brokers should be included in a *firm's* expenditure requirement, unless it is incurred under a legally enforceable "soft commission agreement" when it may be excluded from the expenditure requirement calculation.

16 The reasoning behind this treatment is that the expenditure of a *firm* participating in soft commission arrangements is similar to shared commissions and can, therefore, be treated as though it were shared commissions under rule 3-73(2)(f), except to the extent that such expenses are irrecoverable, i.e. except where there is no enforceable legal agreement.

17 It is considered that certain *firms* may have been under the misapprehension that there was a concession for all expenditure related to "soft commission agreements" regardless of whether the agreement was legally enforceable. Where a *firm* undertakes a mixture of business between legally enforceable contracts and informal arrangements (all of which the *firm* would classify as

"soft commission agreements"), it must take great care in allocating expenditure between legally enforceable contracts and others. Alternatively, it may decide to include all expenditure in the expenditure requirement regardless of source.

18 Legally enforceable contracts

For the purposes of this guidance, for a "soft commission agreement" to be legally enforceable there should be a specific written legal contract governing the arrangements. The contract should be legally enforceable by the *firm* involved, both in the UK and in any other relevant country.

Appendix 46 (Table 3-173(2)B)

COUNTRIES/TERRITORIES IN WHICH CRR ON ISSUING MARKET FREE DELIVERIES MAY BE RELAXED

Introduction

This Appendix lists the countries/territories in which *free deliveries* made in the issuing market are subject to a reduced *CRR* of 15% of the *free delivery* value, and the time limit on this reduced *CRR*.

Country/Territory	Business days since delivery
Hong Kong SAR	20
Indonesia	30
Malaysia	30
Philippines	75
Singapore	21
Thailand	45

Appendix 56

Guide To Adequate Credit Management Policy (ACMP) (rules 3-173 to 3-175, 3-300 and "ACMP")

Introduction

- 1 This appendix contains general guidance on the standards which the FSA expects a *firm's ACMP* to meet.

Objective

- 2 the FSA's objective is to ensure that adequate procedures and controls are in place to manage effectively the granting of credit and the monitoring and controlling of credit risk.

Scope

- 3 The guidance applies to any *firm* which wishes to take advantage of the lower *CRR* percentages (by which counterparty exposures must be multiplied).
- 4 Before a *firm* may use the lower percentages in calculating *CRR* and in preparing its financial reporting statements, it must meet the requirements set by 3-300. The *ACMP* and its operation will be reviewed periodically by the *FSA* and, where it is no longer operating effectively, the *firm* may be in breach of those requirements.

Background

- 5 The *FSA* is aware that *firms* grant credit to counterparties in many different ways, including for example, loans to cover actual margin calls as a result of delays between trade date and final settlement or of late settlement etc. This guidance is designed to cover all instances where a *firm* becomes exposed to credit risk although, depending on the way in which credit risk arises, the procedures for managing it may differ.
- 6 In considering the credit management policies of a *firm*, the *FSA* will expect the *firm* to operate a robust control structure which is appropriate to the size, scale and nature of its business and the diversity and complexity of its exposures. The *FSA* recognises that different approaches to and styles of credit management can create an effective operational control environment. Therefore, it is not appropriate for the *FSA* to lay down prescriptive standards which it would expect a *firm* to meet, but rather to suggest a broad framework which is flexible, allows for individualised solutions and can accommodate and encourage evolutionary developments.
- 7 The prime components of a sound credit risk management process are:
 - the definition by a *firm* of what constitutes a credit exposure/risk and is therefore covered by the *firm's ACMP*;

- a comprehensive credit risk measurement approach;
- the existence of guidelines and other parameters used to determine credit limits and govern the level and types of risk taken; together with
- a strong management information system for controlling, monitoring and reporting exposures.

Thus, when the *FSA* reviews a *firm's* credit management process, it will seek comfort that credit exposures are managed and controlled in a highly disciplined manner and that the relevant staff are well versed in the *firm's* credit procedures.

- 8 Where a *firm's* credit risk management is controlled or overseen by its parent or an affiliate in the same group, provided that the *firm* can identify reasonable grounds for believing that the level of control is suitable, this should not impede use of the *firm's* *ACMP*.

General principles

- 9 In forming its view as to the adequacy of a *firm's* credit risk management process, the general characteristics which the *FSA* may take into account include the following:

Role of senior management

- (a) whether the framework of credit risk management, i.e. a *firm's* policies and procedures, is overseen by the board of directors or an equivalent management body;

Procedures

- (b) whether there are clearly established lines of responsibility and levels of authority for:
- the granting of credit to a counterparty;
 - extending its permitted use to cover risk arising on a product new to the counterparty;
 - increasing existing credit facilities; and
 - the monitoring and controlling of all credit risk;
- (c) the extent to which the functions of granting, measuring, monitoring and controlling credit risk are managed independently of the front office with a direct reporting line to the senior management ultimately responsible for credit risk management;
- (d) whether good channels of communication exist which ensure that the *firm's* credit management procedures are well understood and followed by all relevant personnel;

- (e) whether procedures exist for identifying unintentional credit exposures and dealing with counterparty which has failed to settle its obligations to the *firm*, (whether merely due to a delay or actual default), or which is expected not to settle its obligations on the due date; including arrangements for closing out transactions. In addition, the *FSA* may consider whether a *firm* has the ability to identify and attempt to predict, as well as quantify, any shortfall as it arises and on an aged basis;
- (f) whether mechanisms exist for a daily comparison of exposures with credit limits, including the production of exception reports, and the procedures to be followed to deal with the results of those exception reports;

Documentation

- (g) whether a *firm's* credit management policies and procedures are properly documented and reviewed by the *firm* on a regular and thorough basis to ensure that they continue to remain appropriate and sound;
- (h) whether records are kept in respect of each counterparty (identified on an individual legal entity basis) indicating in sufficient detail, the level of credit risk to a counterparty to which the *firm* is willing to expose itself. Where a *firm* grants a credit facility similar to a loan to cover, for example, margin calls, such records might give details of the credit facility extended to a counterparty together with any information gathered in support of the decision to grant that credit facility, the types of transaction which the *firm* may enter into with the counterparty and to which the credit facility may be allocated. Credit information relating to counterparties should be regularly updated and reviewed by the *firm* to ensure that any credit facility granted remains appropriate;

Collateral and margin

- (i) whether the *firm* has written policies relating to the margining and collateral arrangements with its counterparties. Terms of business or customer agreements would normally detail the circumstances when margin might be called, and the type and level of collateral which would be acceptable to the *firm* on the basis of its liquidity, volatility and ability to be realised. In addition, it may be relevant to consider the degree to which a *firm's* collateral records are kept up to date and include details of the practical procedures for the realisation of such collateral.

Measurement and monitoring of exposures

- (j) whether a *firm* has mechanisms for identifying the level of concentration of credit risk exposures to each individual counterparty, and each group of connected counterparties, etc on a regular and timely basis;

- (k) where a *firm* uses risk reduction techniques (such as master agreements, netting agreements, collateralisation arrangements or the taking of third party credit enhancements, including letters of credit and guarantees), whether the *firm* has procedures for scrutinising documents and assessing their impact on the credit risk of the *firm* and assessing the quality of any guarantees or letters of credit;
- (l) depending on the nature of the credit exposures to which a *firm* is subject, whether the *firm's* mechanisms for measuring such exposures are appropriate to cover the type or level of risk to which they give rise.

Additional Guidance on the FSA's Assessment of ACMPs

Preamble

This document is intended as a guide to those areas of Credit Management Policies which the *FSA* will address when considering their adequacy.

A definition of credit and the measurement of credit risk

The *FSA* expects that *firms* have a clear definition of what is considered to be “credit risk” (by whatever name it is known) within the *firm*.

The *FSA* expects *firms* to consider in depth the measurement of the extent of Credit Risk which is incurred vis a vis any given counterparty. *Firms* should be aware that the extent of credit risk incurred will not necessarily be the same as the nominal value of contracts entered into (“value at risk” concept).

The *FSA* will expect that firms measure and monitor the extent of Credit Risk incurred vis a vis any given counterparty by reference to a system of limits showing the maximum Credit Risk which the *firm* considers it prudent to incur vis a vis that counterparty having regard for the financial strength of the counterparty.

The *FSA* expects there to be adequate procedures within the *firm* for the recognition of where credit risk may be incurred, for the approval of incurring such risk, and, once incurred, for the monitoring of that risk to ensure the satisfactory recovery of all amounts owed to the *firm* by a counterparty.

The decision to grant credit

If there is a formal decision making body (e.g. a “Credit Committee”) which reviews applications for credit:

- How does it derive its authority?
- What is the extent of any Credit Committee’s authority as regards:
 - amount of credit granted
 - tenor of credit granted
 - products for which credit lines may be approved
 - industry sectors for which credit lines may be approved?
- How is any Credit Committee constituted?

- What are the qualifications of any Credit Committee's members to make the decisions required of them?
- Independence of Committee from profit centres
- Recording of Approvals

If there is no formal committee, what procedures exist to ensure adequate collective responsibility for credit decisions giving regard for the duality ("four eyes") principle and independence of decisions made from profit centres likely to benefit from income? e.g.

- "round robin" circulation of papers to Directors/Credit Management
- individual sign off on each transaction/deal

Many of the comments noted above concerning a "Credit Committee" will be relevant also where no formal Committee meets, as will the following remarks concerning the documentation provided to those making credit decisions.

What documentation is provided to those charged with reaching decision to grant credit?

Cover sheet detailing proposed credit.

- Name of proposed counterparty (identify correct legal entity)
- Address of proposed counterparty
- Amount of credit
- Currency of credit
- Tenor of credit
- Collateral/Security proposed (where applicable)
- Remuneration for credit granted
- Products
- Existing exposure to counterparty (in case of increase/review)
- Previous payment performance of counterparty (in case of increase/review)

Financial information on proposed counterparty.

In order to ascertain the financial strengths and weaknesses of a proposed counterparty the FSA expects *firms* to revert to financial information, some examples of which are given below.

- Annual report and accounts
- Analysis of annual reports and accounts
- Credit reference agency reports e.g. Dun and Bradstreet
- Rating agency reports e.g. Standard and Poors, Moody's
- Brokers reports
- Bank status reports
- Statements of net worth

“Credit memorandum” or other internally produced paper outlining the reason for proposing the granting of credit to the counterparty.

Some areas which might be covered by such a memorandum are as follows:

- Background information on relationship with proposed counterparty
- Commentary/analysis of financial information
- Future prospects (for profitability, growth etc.)
- Reason for present proposal
- What benefit will it bring to a *firm's* relationship with company?
- Perceived risks in providing the credit proposed
- What measures have been taken to mitigate these risks?
- Provision of management accounts
- imposition of financial covenants
- Taking of security
- Comments on the collateral or security to be taken
- Comments on legal documentation to be employed
- Industry exposure
- Country exposure
- Spread of counterparties - large exposures

The monitoring of credit exposure

Once a proposal to grant credit has been approved the *FSA* will expect that there are adequate procedures in place to ensure the proper monitoring of all credit exposures entered into.

The *FSA* expects the monitoring function to be separate from and managed independently of those profit centres which may benefit from the incurring of credit risk.

In order to ensure adequate monitoring of credit exposure it will be necessary for firms to ensure that decisions concerning credit matters are communicated promptly and efficiently to those who are responsible for their utilisation and monitoring. firms may wish to consider how such matters are communicated to:

- Those entitled to commit the *firm*
- Credit Control Officers
- Senior Management
- Documentation Staff

The *FSA* will consider the methods by which this information is communicated e.g. memorandum, manual lists, credit procedures manuals etc.

Computer systems

Where use is made of computer systems the *FSA* will consider the various methods by which the integrity of databases is ensured. These could include

- Password protection/access rights
- Accuracy/key verification
- Duality principle
- Physical security of systems
- Back up

Where information is transferred between computer systems e.g. for reporting purposes or to PC based systems the *FSA* will consider any reconciliations which are performed.

Reporting

The *FSA* expects there to be an adequate reporting system for the monitoring of credit exposure. Many *firms* make use of a series of reports, analysing their credit exposure based on a number of different criteria. Examples of the kinds of reports which may be found useful by *firms* are given below.

- Excess reports/Exception reports
- Exposure reports
 - by customer/group/connected customers
 - by industry
 - by country
- Overdue payments reports
- Facilities due for review
- Facilities by collateral/security type
- Collateral/security held
- Large Exposures

The *FSA* will give consideration to the frequency of production of reports used in monitoring credit risk.

Credit Risk Management/Control

The *FSA* will expect to be given details of the action taken where monitoring shows that any aspect of credit exposure is not in line with previously agreed parameters.

For example where exposure is in excess of approved limits the *FSA* will expect to be informed about what action is taken, where payments are not received, how this is followed up. If a counterparty's financial standing deteriorates, what action is taken to attempt to mitigate possible credit loss?

Documentation

The *FSA* expects *firms* to have adequate procedures in place to be certain that all transactions which require documentation are documented and that this occurs within an acceptable time frame, and that any transactions which fail to be documented are identified and reported to Senior Management for appropriate action to be taken.

The *FSA* expects any staff responsible for documentation to be separate from front office/profit centres and have an independent reporting structure. This will ensure that the commercial wish to trade and do business does not cloud the negotiation of effective and binding legal documentation.

- Suitability of documentation to be used
- Preparation of documentation
- Qualification of staff (or choice of solicitors to be instructed)
- Training of documentation staff
- Tenacity of documentation staff

Basic documentation to be obtained from all counterparties might include

- Certificate of incorporation
- Memorandum and articles of association (M&AA)
- Board Resolution

Other documents which a *firm* may wish to call for prior to entering into transactions would include:

- a statement of officers authorised to act for the counterparty and to commit it to transactions
- a list of authorised signatories where one exists
- an audited annual report or interim figures
- credit reference report or bank status report

Other areas for consideration could include:

- Prompt execution of documentation
- Monitoring response to documents sent out
- Chasing where no response
- Reporting missing documentation to senior management
- Proper execution
- Secure storage of documentation
- Regular review of documentation held

Ongoing review of credit risk

The *FSA* expects firms to have in place adequate procedures for the annual (or more frequent) review of credit risk.

- Scope of the review
- Financial information
- Action where concern is raised
- Possible need for more frequent review
- Monitoring of counterparties' performance
- Defaults and delinquent and bad debts
- Provisioning policy

The *FSA* will expect a *firm* to be able to explain what action may be taken as the result of review e.g. reduction of credit limit, calling for further collateral etc. where the review indicates cause for concern.

Documentation of credit policies and procedures and customer files

The *FSA* will expect *firms* to consider the manner in which their Credit Policies are documented. Areas for comment could include:

- Credit Procedures manuals and the context in which they are used
- Internal Board Minutes showing delegated authority
- Credit Committee Minutes
- Operations manuals
- Training material for staff
- Internal memorandum detailing credit policy
- Customer Credit files, to contain
 - credit analysis information
 - copies of decisions to grant credit
 - copies of relevant documentation

- press cuttings
- copies of data input documents

Appendix 57

List Of Exchanges And Clearing Houses Recognised for the purposes of IPRU(INV)3

The following lists are not lists of the Recognised Investment Exchanges and the Recognised Clearing Houses to which the RIE and RCH Sourcebook (REC) applies. Inclusion of an exchange or clearing house in the following lists does not imply its recognition under Part XVIII of the Financial Services and Markets Act 2000. The following lists of exchanges and clearing houses are solely for the purposes of IPRU(INV)3.

1 Exchanges recognised for the purposes of IPRU(INV)3

American Stock Exchange LLC
Amsterdam Exchanges (AEX)
AmStock Exchange of Lower Saxony Hannover (Niedersächsische Börse zu Hannover)
Athens Stock Exchange (ASE) - Thessaloniki Stock Exchange Centre (TSEC)
Australian Stock Exchange Ltd.
Baden-Wurtemberg Stock Exchange Stuttgart (Bayrische Börse)
Barcelona Stock Exchange (La Bolsa de Valores de Barcelona)
Bavarian Stock Exchange Munich (Bayrische Börse)
Belgian Futures and Options Exchange (BELFOX)
Berlin Stock Exchange (Berliner Wertpapierbörse)
Bilbao Stock Exchange (Bolsa de Bilbao)
Bourse de Montréal
Bremen Stock Exchange (Bremer Wertpapierbörse)
Canadian Venture Exchange
Chicago Board of Trade
Chicago Mercantile Exchange
Chicago Board Options Exchange Inc.
Copenhagen Stock Exchange (Københavns Fondsbørs)
Deutsche Börse AG
Eurex Deutschland
Eurex Zurich
Euronext Amsterdam NV
Euronext Brussels Ltd.
Euronext Paris SA
Frankfurt Stock Exchange (Frankfurter Wertpapierbörse)
Hanseatic Stock Exchange Hamburg (Hanseatische Wertpapierbörse Hamburg)
Helsinki Exchanges

Hong Kong Exchanges and Clearing
International Petroleum Exchange of London Ltd.
Irish Stock Exchange
Italian Exchange
Bolsa de Valores de Lisboa e Porto (BVLP)
London International Financial Futures and Options Exchange (LIFFE)
London Metal Exchange Ltd.

4. Chapter 4: Lloyd's firms

4.1 APPLICATION

- 4.1.1 R This chapter applies to the *Society* and *members' advisers*.
- 4.1.2 R This chapter does not apply to a *members' adviser* which is subject to another chapter of *IPRU(INV)*.
- 4.1.3 D The directions in *IPRU(INV)* 4.4.1D to 4.4.5D and 4.5.1D are given to the *Council* and to the *Society* acting through the *Council*.

4.2 PURPOSE

- 4.2.1 G This chapter identifies the financial resource requirements and requirements as to accounts and statements to be met by certain *firms* conducting business at Lloyd's.
- 4.2.2 G The directions in *IPRU(INV)* 4.4.1D to 4.4.5D and 4.5.1D are given under section 318 of the *Act* (Exercise of powers through Council), for the purpose of achieving the objective specified, as required by section 318(2) of the *Act*, in *IPRU(INV)* 4.3.1D.
- 4.2.3 G *Underwriting agents* are subject to regulation by the *Society* as well as by the *FSA*. In particular, they are subject to requirements as to their financial resources and as to making and maintaining accounting records, set by the *Society*. The *FSA* is satisfied that *underwriting agents* will be subject to adequate financial resource and accounting requirements as long as they remain subject to and comply with requirements at least equivalent to Lloyd's Capital and Solvency Requirements 2001 and the relevant parts of, or requirements made under Lloyd's Underwriting Agents Byelaw (No. 4 of 1984), in each case as amended and in force immediately before *commencement*. Accordingly, instead of imposing an obligation directly on *underwriting agents*, the directions in *IPRU(INV)* 4.4.1D to 4.4.5D and 4.5.1D require the *Society* to require those firms to comply with the relevant requirements.
- 4.2.4 G A *members' adviser* is not regulated by the *Society* and accordingly this chapter specifies the financial resource and accounting requirements to be met. *Firms* which fall within the scope of this chapter will be *firms* with *permission* only to advise persons on *syndicate* participation at Lloyd's. The nature of that advisory business is akin to corporate finance advice and so the applicable requirements are those in *IPRU(INV)* 3 relevant to *firms* giving corporate finance advice. *Firms* with other *permissions* will fall within the scope of other chapters of *IPRU(INV)*.

4.3 SPECIFICATION OF OBJECTIVE

- 4.3.1 D The directions in *IPRU(INV)* 4.4.1D to 4.4.5D and 4.5.1D are given in relation to the exercise of the powers of the *Society* and of the *Council* generally, with a view to achieving the objective that *underwriting agents* have adequate financial resources to support, and keep and preserve adequate accounting records in respect of their business at Lloyd's.

4.4 FINANCIAL RESOURCE REQUIREMENTS

- 4.4.1 D The *Society* must maintain appropriate and effective arrangements to require *underwriting agents* to meet and continue to meet financial resource requirements at least equivalent to the requirements set out in Lloyd's Capital and Solvency Requirements 2001, as they are in force immediately before *commencement*.
- 4.4.2 D The *Society* must give the *FSA* a report on each *underwriting agent's* compliance with the financial resource requirements referred to in *IPRU(INV) 4.4.1D* as at the end of each quarter (determined by reference to each *underwriting agent's accounting reference date*).
- 4.4.3 D The report referred to in *IPRU(INV) 4.4.2D* must reach the *FSA* within two months of the end of the relevant quarter and must state:
- (1) whether the *Society* has any information indicating or tending to indicate that, during the quarter to which the report relates, the *underwriting agent* failed to meet the financial resource requirements referred to in *IPRU(INV) 4.4.1D*;
 - (2) whether, at the end of the quarter to which the report relates, the *underwriting agent* failed to meet the financial resource requirements referred to in *IPRU(INV) 4.4.1D*; and
 - (3) the nature and extent of any failure to comply reported under (1) or (2) and the actions taken or to be taken by the *Society* in response to this.
- 4.4.4 D In addition to the reports required under *IPRU(INV) 4.4.2D*, the *Society* must give the *FSA* an annual report on each *underwriting agent's* compliance or non-compliance with financial resource requirements as at the end of that *underwriting agent's* financial year.
- 4.4.5 D The report in *IPRU(INV) 4.4.4D* must reach the *FSA* within seven months of that *underwriting agent's* accounting reference date and must:
- (1) confirm that:
 - (a) the *Society* has received from that *underwriting agent* in respect of the financial year to which the report relates, all relevant attachments to the Annual Financial Return that the *underwriting agent* is required to make to the *Society* under the requirements identified in *IPRU(INV) 4.4.1D*;

(b) that *underwriting agent* met the applicable financial resource requirements at the end of the financial year to which the report relates; and

(c) the *Society* is not aware of any matters likely to be of material concern to the *FSA* relating to that *underwriting agent's* compliance with financial resource requirements during the year to which the report relates, or arising from the attachments referred to in (a); or

(2) if the *Society* is unable to give any of the confirmations required under *IPRU(INV)* 4.4.5D (1)(a), (b) or (c), set out in each case the reasons why it is unable to give that confirmation.

4.4.6 R A *members' adviser* must comply with the requirements of *IPRU(INV)* 3-60(3) and 3-62.

4.5 ACCOUNTING RECORDS

4.5.1 D The *Society* must maintain appropriate and effective arrangements to require *underwriting agents* to meet the obligation to keep and preserve accounting records, set out in Lloyd's Underwriting Agents Byelaw (No 4 of 1984), Section III, paragraph 53B, as it is in force immediately before *commencement*.

4.5.2 R A *members' adviser* must comply with the requirements of *IPRU(INV)* 3-10 to 3-14.

Interim Prudential Requirements for Former IMRO Firms

5 CHAPTER 5: FINANCIAL RESOURCES

5.1.1 APPLICATION

APPLICATION OF CHAPTER 5

5.1.1(1)(a) R This chapter applies to an *investment management firm*, other than a *European investment firm*, as set out in Table 5.1.1(1)(a).

(b) R This chapter does not apply to a *European investment firm*.

	ISD Firms	OPS Firms (see Note 1 below)	Non-OPS Life Offices and Non-OPS Local Authorities	Individuals admitted to membership collectively
Financial resources rules				
5.2.1(1) to 5.2.7(5)	Yes	No	No	Yes
Accounting records rules				
5.3.1(1) to 5.3.1(6)	Yes	Yes	Yes	Yes
Financial notification rules				
5.5.1(1)	Yes	No	No	No
Consolidated supervision rules				
5.7.1(1) to 5.7.1(4)	Yes	No	No	Yes

	Individuals whose sole investment business is giving investment advice to institutional or corporate investors	Firms subject to "lead regulator arrangements"	All other Firms
Financial resources rules			
5.2.1(1) to 5.2.7(5)	No	No (see Note 2 below)	Yes
Accounting records rules			
5.3.1(1) to 5.3.1(6)	Yes	Yes	Yes
Financial notification rules			
5.5.1(1)	No	No	No
Consolidated supervision rules			
5.7.1(1) to 5.7.1(4)	No	No	Yes
Note 1. <i>Firms</i> are referred to the specific compliance reports for <i>OPS firms</i> required by Chapter 16 of the Supervision Manual.			
Note 2. A <i>firm</i> subject to "lead regulator arrangements" whereby a body other than <i>the FSA</i> is responsible for its financial regulation shall comply with the corresponding financial resources rules and financial returns rules of that body, and a breach of such rules shall be treated as a breach of the rules of <i>the FSA</i> .			

INTERPRETATION

(c) R The definitions in the glossary at Appendix 1 apply to this chapter.

5.2.1 GENERAL REQUIREMENT

ADEQUACY OF FINANCIAL RESOURCES

- 5.2.1(1) R A *firm* must at all times have available the amount and type of *financial resources* required by the *rules* in this chapter.

BASIC REQUIREMENT

- 5.2.1(2) R A *firm* must ensure that, at all times, its *financial resources* are not less than its *financial resources requirement*.

FINANCIAL RESOURCES

- 5.2.1(3) R A firm's financial resources means:
- (a) its *own funds*, if the *firm* is subject to an *own funds requirement* under rule 5.2.3(2); or
 - (b) its *liquid capital*, if the *firm* is subject to a *liquid capital requirement* under paragraph (a) of rule 5.2.3(1); or
 - (c) where the *firm* is an *ISD firm* subject to an *own funds requirement* and a *liquid capital requirement* under paragraph (b) of rule 5.2.3(1), its *own funds* and its *liquid capital*; or
 - (d) where the *firm* is an *ISD firm* and a trustee of an *authorised unit trust scheme* subject to paragraph (c) of rule 5.2.3(1), its *own funds* or its *liquid capital*.

5.2.2 FINANCIAL RESOURCES

OWN FUNDS

- 5.2.2(1) R A *firm* must calculate its *own funds* in accordance with Table 5.2.2(1).

LIQUID CAPITAL

- 5.2.2(2) R A *firm* must calculate its *liquid capital* in accordance with Table 5.2.2(1).

5.2.3 FINANCIAL RESOURCES REQUIREMENT

DETERMINATION OF REQUIREMENT

- 5.2.3(1)(a) R The *financial resources requirement* for a *firm* which is not an *ISD firm* is a *liquid capital requirement*, determined in accordance with paragraph (a) of rule 5.2.3(4), unless the *firm* falls within any of the exceptions in rule 5.2.3(2).
- (b) R The *financial resources requirement* for a *firm* which is an *ISD firm* is an *own funds requirement* determined in accordance with paragraph (b) of rule 5.2.3(3), and a *liquid capital requirement* calculated in accordance with paragraph (b) or (c) of rule 5.2.3(4).
- (c) R The *financial resources requirement* for a *firm* which is an *ISD firm*, but which is also a trustee of an *authorised unit trust scheme* or a *depository* of an *ICVC*, is the higher of an *own funds requirement* determined in accordance with paragraph (a)(i) of rule 5.2.3(3) and a *liquid capital requirement* calculated in accordance with paragraph (b) of rule 5.2.3(4).

EXCEPTIONS FROM THE LIQUID CAPITAL REQUIREMENT

- 5.2.3(2) R The *financial resources requirement* for a *firm* which is not an *ISD firm* is an *own funds requirement* determined in accordance with paragraph (a) of rule 5.2.3(3) if:
- (a) the *firm's permitted business* does not include the holding of *customers' monies* or assets and it neither executes transactions (or otherwise arranges deals) in *investments* nor has such transactions executed for itself or its *customers*; or
- (b) the *firm's permitted business* includes the activities as in (a) above, but only in respect of *venture capital investments* for *non-private customers*; or
- (c) the *firm* is a trustee of an *authorised unit trust scheme* whose *permitted business* consists only of trustee activities and does not include any other activity constituting *specified trustee business* or the *firm* is a *depository* of an *ICVC* whose *permitted business* consists only of *depository* activities.

OWN FUNDS REQUIREMENT

- 5.2.3(3)(a) R** The *own funds requirement* for a *firm* subject to rule 5.2.3(2) is:
- (i) £4,000,000 for a *firm* which is a *trustee* of an *authorised unit trust scheme* or a *depository* of an *ICVC*;
 - (ii) £5,000 for any other *firm*.
- (b) R The *own funds requirement* for an *ISD firm* subject to paragraph (b) of rule 5.2.3(1) is an amount determined in accordance with Table 5.2.3(3)(b).

LIQUID CAPITAL REQUIREMENT

- 5.2.3(4)(a) R** The *liquid capital requirement* for a *firm* subject to paragraph (a) of rule 5.2.3(1) is the greater of:
- (i) £5,000; and
 - (ii) its *total capital requirement* calculated in accordance with rule 5.2.3(5).
- (b) R The *liquid capital requirement* for an *ISD firm* subject to paragraph (b) or (c) of rule 5.2.3(1) is its *total capital requirement* calculated in accordance with rule 5.2.3(5), unless paragraph (c) of rule 5.2.3(4) applies.
- (c) R The *liquid capital requirement* for an *ISD firm* whose *expenditure based requirement* consists of 6/52 of its *annual audited expenditure*, determined in accordance with Table 5.2.3(5)(a), is the greater of:
- (i) one quarter of its *annual audited expenditure* calculated in accordance with rule 5.2.4(1); and
 - (ii) its *total capital requirement* calculated in accordance with rule 5.2.3(5).

TOTAL CAPITAL REQUIREMENT

- 5.2.3(5) R** A *firm's total capital requirement* is the sum of its:
- (a) *expenditure based requirement* calculated in accordance with Table 5.2.3(5)(a);

- (b) ***position risk requirement*** calculated in accordance with Table 5.2.3(5)(b);
- (c) ***counterparty risk requirement*** calculated in accordance with Table 5.2.3(5)(c);
- (d) ***foreign exchange requirement*** calculated in accordance with Table 5.2.3(5)(d); and
- (e) ***other assets requirement*** calculated in accordance with Table 5.2.3(5)(e).

5.2.3(6) G A *firm* which discloses clients' money or assets on its balance sheet need not calculate the requirements under paragraphs (b) to (e) of rule 5.2.3(5) on such items where these do not represent assets or liabilities of the *firm* itself.

5.2.4 ANNUAL AUDITED EXPENDITURE

DETERMINATION

5.2.4(1) R ***Annual audited expenditure is:***

- (a) **the amount described as total expenditure in the most recent *annual financial return*, less the following items (if they are included within such expenditure):**
 - (i) **staff bonuses, except to the extent that they are guaranteed;**
 - (ii) ***employees'* and *directors'* shares in profits, except to the extent that they are guaranteed;**
 - (iii) **other appropriations of profits;**
 - (iv) **shared commission and fees payable which are directly related to commission and fees receivable which are included within total revenue;**
 - (v) **interest charges in respect of borrowings made to finance the acquisition of the *firm's readily realisable investments*;**
 - (vi) **interest paid to *customers* on *client money*;**
 - (vii) **interest paid to counterparties;**
 - (viii) **fees, brokerage and other charges paid to clearing houses, exchanges and intermediate brokers for the purposes of executing, registering or clearing transactions;**

(ix) foreign exchange losses; or

(b) where the previous accounting period does not include twelve months' trading, an amount calculated in accordance with paragraph (a) above pro-rated to an equivalent annual amount; or

(c) where a *firm* has not prepared an *annual financial return* or *annual accounts* since the commencement of its *permitted business*, an amount based on forecast expenditure included in the budget for the first twelve months' trading, as submitted with its application for membership.

5.2.4(2) G A *firm's financial resources requirement* will be recalculated and audited annually when its *annual financial return* is prepared. The *firm* must maintain *financial resources* sufficient to meet its new *financial resources requirement* from the date on which the *annual financial return* is approved by the auditor. The *expenditure based requirement* applicable at the *accounting reference date* to which the *annual financial return* is prepared will be that based on the previous year's figures. This will usually be the same as that used in the fourth quarter's *quarterly financial return* prepared to the same *accounting reference date*.

5.2.5 QUALIFYING SUBORDINATED LOANS

CHARACTERISTICS OF LONG TERM QUALIFYING SUBORDINATED LOANS

5.2.5(1) R A long term *qualifying subordinated loan* (item 11 of Table 5.2.2(1)) must have the following characteristics:

(a) the loan is repayable only on maturity or on the expiration of a period of notice in accordance with paragraph (c) below or on the winding up of the *firm*;

(b) in the event of the winding up of the *firm*, the loan ranks after the claims of all other creditors and is not to be repaid until all other debts outstanding at the time have been settled; and

(c) either:

(i) the minimum original maturity of the loan is 5 years; or

(ii) the loan does not have a minimum or fixed maturity but requires 5 years notice of repayment.

AMOUNT ALLOWABLE IN THE CALCULATION OF OWN FUNDS

- 5.2.5(2) R A *firm* may only take into account the paid-up amount of a long term *qualifying subordinated loan* in the calculation of its *own funds*. This amount must be amortised on a straight-line basis over the five years prior to the date of repayment.

REQUIREMENTS APPLICABLE TO SHORT-TERM QUALIFYING SUBORDINATED LOANS

- 5.2.5(3)(a) R A short term *qualifying subordinated loan* (item 15 of Table 5.2.2(1)) must have the characteristics set out in rule 5.2.5(1) save that the minimum period set out in paragraph (c) of rule 5.2.5(1) shall be two years.
- (b) R A *firm* must not make any payment of principal or interest which would result in a breach of rule 5.2.1(2).

FORM OF QUALIFYING SUBORDINATED LOAN AGREEMENT

- 5.2.5(4) R A *qualifying subordinated loan* must be in the form prescribed by *the FSA* for the purposes of this rule.
- 5.2.5(5) G *Firms* wishing to initiate a subordinated loan agreement other than in the prescribed form are advised to contact *the FSA*.

CONDITIONS APPLICABLE TO QUALIFYING SUBORDINATED LOANS

- 5.2.5(6) R A *firm* wishing to include a *qualifying subordinated loan* in its calculation of *liquid capital* must:
- (a) provide *the FSA* with a copy of the agreement not less than 10 business days before the loan is to be made; and
- (b) certify to *the FSA* that the loan agreement complies with *the FSA's prescribed subordinated loan agreement*.

REQUIREMENTS ON A FIRM IN RELATION TO QUALIFYING SUBORDINATED LOANS

- 5.2.5(7) R A *firm* including a qualifying subordinated loan in its calculation of *liquid capital* must not:
- (a) secure all or any part of the loan;
- (b) redeem, purchase or otherwise acquire any of the liabilities of the borrower in respect of the loan;

- (c) amend or concur in amending the terms of the loan agreement;
- (d) repay all or any part of the loan otherwise than in accordance with the terms of the loan agreement; or
- (e) take or omit to take any action whereby the subordination of the loan or any part thereof might be terminated, impaired or adversely affected.

5.2.6 QUALIFYING PROPERTY AND QUALIFYING UNDERTAKINGS

QUALIFYING PROPERTY AND QUALIFYING AMOUNT DEFINED

5.2.6(1) R **Qualifying property** is any freehold or leasehold (or the equivalent tenure in Scotland or other territories) land and buildings purchased or secured by way of a mortgage (or other form of secured long-term arrangement) where the security for the liability is the property (and does not include any other allowable assets). The **qualifying amount** is the lowest of:

- (a) 85 per cent of the current market value of the property (if known);
- (b) 85 per cent of the net book value of the property;
- (c) the amount of the liability outstanding under mortgage or other secured long term arrangement, excluding any part of the liability repayable within one year.

5.2.6(2) G Rule 5.2.6(1) can be illustrated as follows:

Current market value	£200,000
Net book value	£100,000
Mortgage	£70,000, including £5,000 payable within one year

Qualifying amount is the lowest of:

- (a) $85\% \times £200,000 = £170,000$
- (b) $85\% \times £100,000 = £85,000$
- (c) $£70,000 - £5,000 = £65,000$

i.e. £65,000

QUALIFYING UNDERTAKINGS

- 5.2.6(3) R** ***A qualifying undertaking*** is an arrangement between a *firm* and an *approved bank* which:
- (a) is in the form prescribed by *the FSA* for the purposes of this rule; and
 - (b) complies with the appropriate limitations set out in paragraph (7) of Part II to Table 5.2.2(1).

5.2.7 LARGE EXPOSURES

- 5.2.7(1) G *Firms* should note that rules 5.2.7(2) to (4) only apply to *ISD firms*; they have no application to *non-ISD firms*.

GENERAL REQUIREMENT

- 5.2.7(2) R** ***An ISD firm*** must be able to monitor its individual *large exposures*, and the total of its *large exposures*, on a daily basis, and must re-calculate its *large exposures* position in a full and detailed manner before executing any transaction which may result in a breach of the limits set out in rule 5.2.7(3).

LARGE EXPOSURE LIMITS

- 5.2.7(3) R** Subject to rule 5.2.7(4), an *ISD firm* must ensure that:
- (a) each *large exposure* does not exceed 25 per cent of its *own funds*, or 20 per cent of *its own funds* where the exposure is to an *associate* of the *firm*; and
 - (b) the aggregate of its *large exposures* does not exceed 800 per cent of its *own funds*.

EXCEPTION TO THE LARGE EXPOSURE LIMITS

- 5.2.7(4) R** ***An ISD firm*** may exclude an *exempt exposure* from the calculation of its *large exposures*, and may reduce that calculation by an appropriate amount, where an *exposure* is a *partially exempt exposure*.

TRANSITIONAL ARRANGEMENTS

- 5.2.7(5) R** *A large exposure to which a firm was legally bound, on or before 5 February 1993, may be continued until its contractual maturity.*

TABLE 5.2.2(1) CALCULATION OF OWN FUNDS AND LIQUID CAPITAL

**PART I
METHOD OF CALCULATION**

A firm must calculate its own funds and liquid capital as shown below, subject to the detailed requirements set out in Part II.

Financial resources	Category	Part II Para
Tier 1		
(1) Paid-up share capital (excluding preference shares)	A	2
(2) Share premium account		
(3) Audited reserves		
(4) Non-cumulative preference shares		
Less: (5) Investments in own shares	B	
(6) Intangible assets		3
(7) Material current year losses		4
(8) Material holdings in credit and financial institutions		5
Tier 1 capital = (A-B)	C	
Plus: TIER 2		1
(9) Revaluation reserves	D	
(10) Fixed term cumulative preference share capital		1(a)
(11) Long-term Qualifying Subordinated Loans		1(a); 6

(12) Other cumulative preference share capital and debt capital		
(13) Qualifying arrangements		7
"Own Funds" = (C+D)	E	
Plus: TIER 3		
(14) Net trading book profits	F	1(b)(i); 8
(15) Short-term Qualifying Subordinated Loans and excess Tier 2 capital		1(b)(ii); 1(c); 9
Less: (16) Illiquid assets	G	10
Add: (17) Qualifying Property		11
"Liquid Capital" = (E+F+G)		

PART II DETAILED REQUIREMENTS	
1 Ratios (Items 10, 11 and 15)	<p>(a) For a <i>firm</i> which is an <i>ISD firm</i>, in calculating <i>own funds</i>, the following restriction applies:</p> <p style="padding-left: 40px;">the total of fixed term cumulative preference shares (item 10) and long-term <i>qualifying subordinated loans</i> (item 11) that may be included in Tier 2 capital is limited to 50 per cent of Tier 1 capital. (But see sub-paragraph (b)(ii) below.)</p> <p>(b) For a <i>firm</i> which is an <i>ISD firm</i>, in calculating <i>liquid capital</i>:</p> <p style="padding-left: 40px;">(i) Tier 2 capital must not exceed 100 per cent of Tier 1 capital;</p> <p style="padding-left: 40px;">(ii) capital which would otherwise qualify as Tier 2 capital but for the operation of paragraphs 1(a) and 1(b)(i) may be treated as Tier 3 capital subject to sub-paragraph (iii) below; and</p>

	<p>(iii) the total of the excess of Tier 2 capital so treated as Tier 3 capital and short-term <i>qualifying subordinated loans</i> (item 15) may not exceed 250 per cent of an amount equal to Tier 1 capital less the <i>other assets requirements</i> calculated in accordance with Table 5.2.3(5)(e).</p> <p>(c) A <i>firm</i> which is not an <i>ISD firm</i> and which is subject to a <i>liquid capital requirement</i> under rule 5.2.3(1)(a) may take into account <i>qualifying subordinated loans</i> in the calculation of <i>liquid capital</i> up to a maximum of 400% of its Tier 1 capital.</p>
<p>2 Non corporate entities</p>	<p>(a) In the case of partnerships or sole traders, the following terms should be substituted, as appropriate, for items 1 to 4 in Tier 1 capital:</p> <p>(i) partners' capital accounts (excluding loan capital);</p> <p>(ii) partners' current accounts (excluding unaudited profits and loan capital);</p> <p>(iii) proprietors' account (or other term used to signify the sole trader's capital but excluding unaudited profits).</p> <p>(b) Loans other than <i>qualifying subordinated loans</i> shown within partners' or proprietors' accounts must be classified as Tier 2 capital under item 12.</p>
<p>3 Intangible assets (Item 6)</p>	<p>Intangible assets comprise:</p> <p>(a) formation expenses to the extent that these are treated as an asset in the <i>firm's</i> accounts;</p> <p>(b) goodwill, to the extent that it is treated as an asset in the <i>firm's</i> accounts; and</p> <p>(c) other assets treated as intangibles in the <i>firm's</i> accounts.</p>
<p>4. Material current year losses (Item 7)</p>	<p>Losses in current year operating figures must be deducted when calculating Tier 1 capital if such losses are material. For this purpose profits and losses must be calculated quarterly or monthly, as appropriate. If this calculation reveals a net loss it shall only be deemed to be material for the purposes of this Table if it exceeds 10 per cent of the <i>firm's</i> Tier 1 capital.</p>

<p>5 Material holdings in credit and financial institutions (Item 8)</p>	<p>Material holdings comprise:</p> <p>(a) where the <i>firm</i> holds more than 10 per cent of the equity share capital of the institution, the value of that holding and the amount of any subordinated loans to the institution and the value of holdings in <i>qualifying capital items</i> or <i>qualifying capital instruments</i> issued by the institution;</p> <p>(b) in the case of holdings other than those mentioned in (a) above, the value of holdings of equity share capital in, and the amount of subordinated loans made to, such institutions and the value of holdings in <i>qualifying capital items</i> or <i>qualifying capital instruments</i> issued by such institutions to the extent that the total of such holdings and subordinated loans exceeds 10 per cent of the <i>firm's own funds</i> calculated before the deduction of item 8.</p>
<p>6 Long term qualifying subordinated loans (Item 11)</p>	<p>Loans having the characteristics prescribed by rule 5.2.5(1) may be included in item 11, subject to the limits set out in paragraph (1) above.</p>
<p>7. Qualifying arrangements (Item 13)</p>	<p>(a) An <i>ISD firm</i> may only include a <i>qualifying undertaking</i> or other arrangement in item 13 if it is a <i>qualifying capital instrument</i> or a <i>qualifying capital item</i>.</p> <p>(b) A <i>firm</i> which is not an <i>ISD firm</i> may only include <i>qualifying undertakings</i> in its calculation of <i>liquid capital</i> if:</p> <p>(i) it maintains <i>liquid capital</i> equivalent to 6/52 of its <i>annual audited expenditure</i> in a form other than <i>qualifying undertakings</i>; and</p> <p>(ii) the total amount of all <i>qualifying undertakings</i> plus <i>qualifying subordinated loans</i> does not exceed the limits set out in paragraph (1)(c) above.</p>
<p>8 Net trading book profits (Item 14)</p>	<p>For <i>non-ISD firms</i> the unaudited profits can be included at item 14. For <i>ISD firms</i> the amount which may be included at item 14 must comprise the <i>firm's trading book</i> profits less any foreseeable charges or dividends and any losses suffered in respect of its other business, save to the extent that these have been taken into account in calculating item 3 and/or item 7 of Part I.</p>

Note

Non-trading book interim profits may only be included in Tier 1 of the calculation if they have been independently verified by the *firm's* external auditors.

For this purpose, the external auditor should normally undertake at least the following:

- (a) satisfy himself that the figures forming the basis of the interim profits have been properly extracted from the underlying accounting records;
- (b) review the accounting policies used in calculating the interim profits so as to obtain comfort that they are consistent with those normally adopted by the *firm* in drawing up its annual financial statements;
- (c) perform analytical review procedures on the results to date, including comparisons of actual performance to date with budget and with the results of prior periods;
- (d) discuss with management the overall performance and financial position of the *firm*;
- (e) obtain adequate comfort that the implications of current and prospective litigation, all known claims and commitments, changes in business activities and provisions for bad and doubtful debts have been properly taken into account in arriving at the interim profits; and
- (f) follow up problem areas of which the auditors are already aware in the course of auditing the *firm's* financial statements.

A *firm* wishing to include interim profits in Tier 1 capital in a *financial return* should submit to *the FSA* with the *financial return* a verification report signed by its external auditor which states whether the interim results are fairly stated.

Profits on the sale of capital items or arising from other activities which are not directly related to the *investment business* of the *firm* may also be included within the calculation of *liquid capital* if they can be separately verified by the *firm's* auditors. In such a case, such profits can form part of the *firm's* Tier 1 capital as audited profits.

<p>9 Short term qualifying subordinated loans (Item 15)</p>	<p>Loans having the characteristics prescribed by rule 5.2.5(3) may be included in item 15 subject to the limits set out in paragraph (1) above. Tier 2 capital which exceeds the ratios prescribed by paragraph (1)(a) and (b) may be included in item 15 subject to paragraph (1) above.</p>
<p>10 Illiquid assets (Item 16)</p>	<p>Illiquid assets comprise:</p> <p>(a) tangible fixed assets;</p> <p>Note</p> <p>In respect of tangible fixed assets purchased under finance leases the amount to be deducted as an illiquid asset shall be limited to the excess of the asset over the amount of the related liability shown on the balance sheet.</p> <p>(b) holdings in, including subordinated loans to, <i>credit or financial institutions</i> which may be included in the <i>own funds</i> of such <i>institutions</i> unless they have been deducted under item 8;</p> <p>(c) any <i>investment</i> in undertakings other than <i>credit institutions</i> and other <i>financial institutions</i> where such <i>investments</i> are not readily realisable;</p> <p>(d) any deficiency in net assets of a <i>subsidiary</i>;</p> <p>(e) deposits not available for repayment within 90 days or less (except for payments in connection with margined futures or options contracts);</p> <p>Note</p> <p>Where cash is placed on deposit with a maturity of more than 90 days but is repayable on demand subject to the payment of a penalty, then this is not required to be deducted as an illiquid asset but a deduction is required for the amount of the penalty.</p> <p>(f) loans, other debtors and accruals not falling due to be repaid within 90 days or which are more than one month overdue by reference to the contractual payment date;</p>

- (g) physical stocks (except where subject to the *position risk requirement* as set out in Table 5.2.3(5)(b); and
- (h) prepayments to the extent that the period of prepayment exceeds six weeks in the case of a *firm* subject to the *6/52 expenditure based requirement* or thirteen weeks in the case of a *firm* subject to the *13/52 expenditure based requirement* or where a *firm* is required to meet the requirement in rule 5.2.3(4)(c)(i).

11 *qualifying property*
(Item 17)

This item comprises the qualifying amount calculated in accordance with rule 5.2.6(1).

Table 5.2.3(3)(b) OWN FUNDS REQUIREMENT

**PART I
DETERMINATION OF REQUIREMENT**

- 1 Subject to paragraph 2 below, an *ISD firm's own funds requirement* is:
- (a) Euro730,000 for a *firm* whose *permitted business* includes dealing for its own account and/or underwriting issues; *or*
 - (b) Euro125,000 for a *firm* whose *permitted business* includes holding *customers' monies* or assets, but does not include dealing for its own account or underwriting issues; *or*
 - (c) Euro50,000 for a *firm* whose *permitted business* does not include holding *customers' monies* or assets, dealing for its own account or underwriting issues;

unless, in each case, the *firm* qualifies for a lower amount in accordance with Part II.

- 2 An *ISD firm* will not require permission to deal for its own account for the purposes of determining its *own funds requirement* if it holds positions and:
- (a) (i) such positions arise as a result of the *firm's* failure to match investors' orders precisely;
 - (ii) the positions are incidental and provisional in nature, only lasting long enough to complete the transaction in question; and
 - (iii) the total market value of all such positions does not exceed 15 per cent of the *firm's* Tier 1 capital; or
- (b) such positions are held for investment, and not for short term trading, purposes; or
- (c) such positions arise in the course of correcting a dealing error connected with a *customer transaction*.

PART II
OWN FUNDS TRANSITIONAL PROVISIONS

- 1 Subject to paragraph 4 below, an *ISD firm's own funds requirement* may be set at a lower level than the appropriate amount in paragraph 1 of Part I if such *firm*:
- (a) was authorised before 1 July 1995;
 - (b) was permitted by the Investment Management Regulatory Organisation at the commencement date of these *rules* to calculate its *own funds requirement* in accordance with the own funds transitional provisions of that Organisation; and
 - (c) complies with the requirements of paragraph 2 below.
- 2 (a) A *firm* to which this Part applies must at the end of each six-month period calculate the average daily level of its *own funds* for the six-month period preceding the date of calculation.
- (b) The *firm* must report (an "*own funds return*") each such calculation to *the FSA* by the date for submission of its *quarterly return* due next after the date to which the calculation is made.
- (c) The highest level calculated by the *firm* before 1 January 1996 is the *firm's* first reference level for the purposes of this Part.
- (d) Each time that the *firm's* six-monthly calculation results in a level higher than any preceding it, that higher level becomes its relevant level for the purposes of this Part.
- 3 The *own funds* of a *firm* to which this Part applies must not fall below its reference level.

- 4 This Part will cease to apply to a *firm* if:
- (a) its *own funds* equal or exceed the applicable level specified in Part I; or
 - (b) it has a change of *controller*, except a change of control resulting from:
 - (i) the first transfer by inheritance after 31 December 1995 (in this case the *firm* must comply with Part 1 from the tenth anniversary of the date of the transfer);
 - (ii) a change in the composition of the *firm* which is a partnership, if at least one partner who was a partner on 31 December 1995 remains in the partnership (in this case the *firm* must comply with Part I by 31 December 2005); or
 - (iii) a merger of two or more *firms* subject to the Capital Adequacy Directive (No. 93/6/EEC), where the merged *firm* does not have the appropriate minimum level of initial capital (in this case, the reference level will become the *firm's* total of *own funds* at the time of the merger).

Table 5.2.3(5)(a) EXPENDITURE BASED REQUIREMENT

**PART I
CALCULATION OF REQUIREMENT**

A firm's expenditure based requirement is a fraction of its *annual audited expenditure* determined in accordance with Part II of this Table.

**PART II
FRACTIONS**

- 1 The fraction is 6/52 where:
- (a) the *firm* is an *authorised unit trust manager*; or
 - (b) the *firm* acts only as an *authorised corporate director* of an *ICVC*; or
 - (c) the *firm* is an *investment manager* (including the *operator* of an *unregulated collective investment scheme* in relation to which the *firm* carries on the activity of an *investment manager*), unless paragraph 2 applies.
- 2 The fraction is 13/52 where the *firm* is an *investment manager* as in paragraph 1(c) above, or is a *custodian*, and the *firm* either:
- (a) itself holds *customers' monies* or assets; or
 - (b) procures the appointment as *custodian* of its *customers' monies* or assets of an *associate* of the *firm* which is not an *approved bank*.

Note: Paragraph 1(a) above includes a *firm* which acts as both an *authorised unit trust manager* and as an *authorised corporate director* of an *ICVC*.

Table 5.2.3(5)(b) POSITION RISK REQUIREMENT

**PART I
CALCULATION OF REQUIREMENT**

A *firm's* position risk requirement is determined by calculating on a daily mark to market basis, the sum of the weighted value of each position held by the *firm*. The weighted value for each position must be calculated by multiplying its current market value by the appropriate factor set out in Part II.

Note: This requirement does not attach to items deducted in full as illiquid assets.

**PART II
WEIGHTINGS**

Instrument		Requirement			
		Maturity	0-2 years	2-5 years	>5 years
A	Debt				
	Central Government		2%	5%	13%
	Qualifying debt securities				
	• fixed rate		8%	8%	15%
	• floating rate		10%	10%	15%
	Non-qualifying debt securities				
	• fixed rate		10%	20%	30%
	• floating rate		30%	30%	30%

B	Equities	
•	Traded on a <i>recognised</i> or <i>designated investment exchange</i> .	25%
•	other	100%
C	Stock position in physical commodities	
•	Physical positions associated with <i>firm's investment business</i>	30% of realisable value
D	Derivatives	
•	Exchange traded futures and written options	4 x initial margin requirement.
•	otc futures and written options	Apply the appropriate percentage shown in Sections A, B, & C above to the market value of the underlying position.
•	Purchased options	Apply the appropriate percentage shown in Sections A, B & C above to the market value of the underlying position but the result may be limited to the market value of the option.
•	Contracts for differences	20% of the market value of the contract.
E	Other <i>investments</i>	
•	units in <i>regulated collective investment schemes</i>	25% of realisable value (see Section F).
•	with profit <i>life policies</i>	20% of surrender value.
•	other	100% of the value of investment or underlying instrument.

F Determination of disallowed value of units

The disallowed value of units held in a *unit trust manager's* box is the difference between:

- (a) the amount at which stocks of units in the box are valued in the balance sheet; and
- (b) the adjusted value of the units, being the value of the units calculated at cancellation prices less the value calculated at cancellation prices of the units multiplied by the following percentages based on the types of *investments* in the individual *unit trust schemes*:

Quoted, fixed or floating rate interest bearing securities: 3%

Equities:

USA, Japan, Canada 5%

Europe 6%

Far East and other 10%

Note

This can be illustrated as follows:
100 units, comprising Far East equities, with unit cancellation price of 100 pence.

	£	£
Balance sheet value		104
Value of cancellation price	100	
Less £100 x 10%	10	90
Disallowed	—————	————— 14

Note

The percentages in the requirement column are applied to the market value (unless otherwise stated) of gross positions i.e. both longs and shorts in each category; netting and off-setting are prohibited. The long or short position in a particular instrument is the net of any long or short positions held in that same instrument.

Table 5.2.3(5)(c) COUNTERPARTY RISK REQUIREMENT (CRR)

1 Receivables

In the case of receivables due to the *firm* in the form of fees, commission, interest, dividends and margin in exchange-traded futures or options contracts, which are directly related to items included in the *trading book*, the CRR is calculated as follows:

$$\text{CRR} = A \times \text{RF}, \text{ where}$$

A = the amount of the sum due; and

RF = the appropriate risk factor derived from Table 5.2.3(5)(c)(ii).

Note

This requirement attaches only to balances arising from proprietary activity falling within the definition of the *trading book*.

Note

This requirement does not attach to items deducted in full as illiquid assets.

2 Delivery of cash against documents

Where a *firm* enters into a *trading book* transaction and the transaction is to be settled by delivery of cash against documents, the *firm's* CRR in respect of that transaction is calculated as follows:

$$\text{CRR} = (\text{SP} - \text{MV}) \times \text{RF}, \text{ where}$$

SP = agreed settlement price;

MV = current market value;

RF = the appropriate risk factors derived from Table 5.2.3(5)(c)(i).

The CRR should only be calculated where the difference between SP and MV would involve a loss if borne by the *firm*.

<p>3 Free deliveries</p>	<p>Where a <i>firm</i> enters into a <i>trading book</i> transaction and the <i>firm</i> pays for the securities before it receives documents of title or delivers documents of title before receiving payment, the CRR in respect of that transaction is calculated as follows:</p> <p>CRR = V x RF, where</p> <p>V = (i) the full amount due to the <i>firm</i> (i.e. the contract value) where the <i>firm</i> has delivered securities to a counterparty and has not received payment; or</p> <p>(ii) the market value of the securities, where the <i>firm</i> has made payment to a counterparty for securities and has not received documents of title; and</p> <p>RF = the appropriate risk factor derived from Table 5.2.3(5)(c)(ii).</p>
<p>4 Settlement outstanding 30 days or more</p>	<p>In the case of trading book transactions entered into by a <i>firm</i> where the <i>firm</i> pays for the securities before it receives documents of title or delivers documents of title before receiving payment and settlement has not been effected within 30 days of falling due, CRR = V.</p>
<p>5 Repos/Stock Lending and Reverse Repos/Stock Borrowing</p>	<p>Where a <i>firm</i> enters into a transaction based on securities included in the trading book under the terms of a repurchase agreement or a securities lending agreement the <i>firm's</i> CRR in respect of that transaction is calculated as follows:</p> <p>CRR = V x RF, where</p> <p>RF = the appropriate risk factor derived from Table 5.2.3(5)(c)(ii); and</p> <p>for repos/stock lending:</p> <p>V = the excess of the market value of the securities over the value of the collateral provided under the agreement, if the net figure is positive; or</p>

for reverse repos/stock borrowing:

V = the excess of the amount paid or the collateral given for the securities received under the agreement, if the net figure is positive.

6 otc derivatives

In the case of a transaction entered into by a *firm* as principal in an *otc derivative* the CRR is calculated as follows:

CRR = A x RF, where

A = the appropriate credit equivalent amount derived from Table 5.2.3(5)(c)(iii); and

RF = the appropriate risk factor derived from Table 5.2.3(5)(c)(ii).

This calculation shall not apply to contracts for interest rate and foreign exchange which are traded on a *recognised investment exchange* or *designated investment exchange* where they are subject to a daily margin requirement and foreign exchange contracts with an original maturity of 14 calendar days or less.

A *firm* may net off contracts with the same counterparty in the same *otc derivative* contract for settlement on the same date in the same currency provided that the *firm* is legally entitled under the terms of the contracts with such a counterparty to net such contracts by novation.

Table 5.2.3(5)(c)(i)

COUNTERPARTY RISK FACTOR – CASH SETTLEMENTS

Number of working days after due settlement date	Risk Factor
0-4	0%
5-15	8%
16-30	50%
31-45	75%
46 or more	100%

Table 5.2.3(5)(c)(ii) COUNTERPARTY RISK REQUIREMENT

Type of counterparty		Risk Weighting	Solvency Ratio	Risk Factor
1	A counterparty which is, or the contract of which is, explicitly guaranteed by a <i>category a body</i> .	NIL	8%	NIL
2	A counterparty which is, or the contract of which is, explicitly guaranteed by a <i>category b body</i> .	20%	8%	1.6%
3	Any other counterparty.	100%	8%	8%

Table 5.2.3(5)(c)(iii)

OTC DERIVATIVES CALCULATION OF CREDIT EQUIVALENT AMOUNT

- A** By attaching current market values to contracts (marking to market), obtain the current replacement cost of all contracts with positive values.
- B** To obtain a figure for potential future credit exposure, the notional principal amounts or values underlying the *firm's* aggregate positions are multiplied by the following percentages:

Residual Maturity	Interest-Rate Contracts	Foreign-Exchange Contracts
One year or less	nil	1%
More than one year	0.5%	5%

- C** The credit equivalent amount is the sum of current replacement cost and potential future credit exposure.

Note

Except in the case of single-currency "floating/floating interest rate" swaps in which only the current replacement cost will be calculated, bought OTC equity options and covered warrants shall be subject to the treatment accorded to exchange rate contracts.

Table 5.2.3(5)(d) FOREIGN EXCHANGE REQUIREMENT

Calculation of Requirement

- (1) A firm's foreign exchange requirement is determined by calculating the excess of its foreign exchange position (FEP) above 2 per cent of its own funds and multiplying this excess by 8 per cent.
- (2) The FEP is the greater of:
 - (a) the total in the reporting currency of the net short positions in each currency other than the reporting currency; and
 - (b) the total in the reporting currency of the net long positions in each currency other than the reporting currency;

where the conversion to the reporting currency is performed using spot rates.

Note

For this purpose, long and short positions in the same currency can be netted to produce the net position.

- (3) In calculating the FEP, a firm must include relevant foreign exchange items.

EXCHANGE POSITION FOR HEDGING PURPOSES

Any positions which the firm has taken in order to hedge against the adverse effect of exchange rates on an item already deducted in the calculation of liquid capital may not be excluded from the calculation of net open currency positions.

Table 5.2.3(5)(e) OTHER ASSETS REQUIREMENT

**PART I
CALCULATION OF REQUIREMENT**

The requirement to be met in respect of the assets set out in Part II of this Table, other than those to which *position risk requirements* and *counterparty risk requirements* apply or which have been deducted in full as illiquid assets, and in respect of off-balance sheet items set out in Part II of this Table, must be calculated as follows:

A = AV x RF where

A = the amount of the requirement;

AV = the current asset value; and

RF = the appropriate risk factor derived from Part II of this Table.

**PART II
RISK FACTORS**

Assets and Off-Balance Sheet Items	Risk Factor
---	--------------------

Assets

Cash at bank and in hand and equivalent items Assets secured by acceptable collateral including deposits and certificates of deposit with lending institutions	NIL
---	-----

Amount due from trustees of authorised unit trusts	NIL
---	-----

Note

This only applies to *firms* who are *authorised unit trust managers*.

Other receivables due from or explicitly guaranteed by or deposits with <i>category a</i> <i>bodies</i>	NIL
---	-----

Other receivables due from or explicitly guaranteed by or deposits with <i>category b</i> <i>bodies</i>	1.6%
---	------

Pre-payments and accrued income (See paragraph 10 of Part II of Table 5.2.2(1))	8%
All other assets	8%
OFF-BALANCE SHEET ITEMS	
Full Risk Items e.g.	
Charges granted against assets	8% x counterparty weight (see Table 5.2.3(5)(c)(ii))
Guarantees given	
Medium Risk Items e.g.	
Undrawn credit facilities granted by the <i>firm</i> with an original maturity of more than one year	4% x counterparty weight (see Table 5.2.3(5)(c)(ii))
Low Risk Items e.g.	
Undrawn credit facilities granted by the <i>firm</i> with an original maturity of one year or less	Nil

Note

- (1) In determining the appropriate *other assets requirement* (OAR) for guarantees given in a group context, a *firm* should follow the calculation below:
 - (a) Categorise the guarantee agreements into:
 - (i) those with the character of credit substitutes; or
 - (ii) those not having the character of credit substitutes; or
 - (iii) agreements to provide guarantees.
 - (b) Calculate the weighted value.
 - (i) For guarantees falling under (1)(a)(i), the weighted value will be 100% of the estimated current year liability under the guarantee.
 - (ii) For guarantees falling under (1)(a)(ii) the weighted value will be 50% of the estimated current year liability under the guarantee.
 - (iii) For guarantees falling under (1)(a)(iii), the weighted value will be nil.
 - (c) The OAR is calculated as:

Weighted value x 8% x counterparty weighting (Table 5.2.3(5)(c)(ii))
- (2) For the purpose of this requirement, in assessing whether the guarantee has the characteristics of a credit substitute the following factors should be considered:
 - (a) do the agreements allow for periodic or ad-hoc calling of funds;
 - (b) have the guarantees been drawn upon on a regular basis;
 - (c) do *firms* in the group rely on such guarantees to meet their working capital or regulatory capital requirements.
- (3) Where a *firm* is part of a group including other *FSA* regulated entities which together have entered into cross group guarantee arrangements which give rise to an OAR, the estimate of the potential liability under the guarantee may be apportioned between the regulated entities for the purpose of calculating each *firm's* OAR.

5.3.1 RECORDS

RECORDING REQUIREMENTS

- 5.3.1(1) R **A *firm* must ensure that it maintains adequate accounting records and must prepare and submit such reports as are required by *the FSA* in a timely manner. A *firm's* records must:**
- (1) **be up to date and must disclose, with reasonable accuracy, at any time, the *firm's* financial position at that time;**
 - (2) **enable the *firm* to demonstrate its continuing compliance with its *financial resources requirements*; and**
 - (3) **provide the information:**
 - (a) **which the *firm* needs to prepare such financial statements and periodical reports as may be required by *the FSA*; and**
 - (b) **which the *firm's* auditor (where *the FSA* requires one to be appointed) needs to form an opinion on any statements of the *firm* on which the auditor is required to report.**
- 5.3.1(2) G Where a *firm* appoints a third party to maintain the *firm's* accounting records, these records remain the responsibility and property of the *firm*, which must ensure that they are maintained in accordance with the *rules*.

FIRM'S OWN TRANSACTIONS

- 5.3.1(3) R **A *firm* must ensure that proper accounting records are kept in English to show and explain the *firm's own account transactions*, distinguishing between *trading book* and *non-trading book* transactions.**

CUSTOMERS' ACCOUNTING RECORDS

- 5.3.1(4) R **A *firm* must ensure that proper accounting records are kept in English which:**
- (1) **record all purchases and sales of *customers' assets* effected by the *firm*;**
 - (2) **record all receipts and payments of money belonging to *customers* which arise from transactions effected by the *firm*;**
 - (3) **in relation to *client money*; have regard to the requirements of the *Client Money Rules*;**

- (4) disclose the assets and liabilities of a *firm's customers* individually and collectively, to the extent that they are managed by the *firm*;
- (5) record all *customers' assets* (including *customer investments*) in the possession of the *firm* or of another person who is holding such assets for, or to the order of, the *firm*, showing the location of the assets, their beneficial owner and the extent to which they are subject to any charge of which the *firm* has been notified.

5.3.1(5) G The requirement to maintain adequate records of movements and holdings of *client money* and any interest paid on *client money* balances, are set out in COB 9.3.

RETENTION OF ACCOUNTING RECORDS

5.3.1(6) R The accounting records required by rule 5.3.1(1) to (4) must be maintained for a minimum period of six years. During the first two of these years they must be kept either at a place where the *firm* carries on business or in such a manner that they can be produced at such a place within 24 hours of their being requested.

5.5.1 FINANCIAL NOTIFICATION

NOTIFICATION REQUIREMENTS FOR ISD FIRMS

5.5.1(1) R An *ISD firm* must notify *the FSA* in writing as soon as it has reason to believe that any of the following has occurred:

- (a) a counterparty in a repo or reverse repo transaction or a securities lending or borrowing transaction has defaulted; or
- (b) the *firm* is in breach of the requirement to maintain *own funds* in excess of its *own funds requirement*; or
- (c) it is in breach of the large exposures limits set out in rule 5.2.7(3).

5.7.1 CONSOLIDATED SUPERVISION

APPLICATION OF CONSOLIDATION

5.7.1(1) R A *firm* will be subject to *consolidated supervision* by *the FSA* unless rule 5.7.1(2) or (3) applies.

CASES WHERE CONSOLIDATED SUPERVISION BY *THE FSA* WILL NOT APPLY

- 5.7.1(2) R A *firm* will not be subject to consolidated supervision where either of the following conditions are fulfilled:
- (a) the *financial resources rules* do not apply to the *firm* by virtue of Table 5.1.1(1)(a); or
 - (b) the *firm* is included in the supervision on a consolidated basis of the group of which it is a member by another *competent authority*.
- 5.7.1(3) R A *firm* will not be subject to consolidated supervision if:
- (a) each member of the group which is an *ISD firm* or a *European investment firm*:
 - (i) is subject either to a *liquid capital requirement* in accordance with rule 5.2.3(1), or to an equivalent capital regime;
 - (ii) complies with its *financial resources requirement* and the *large exposures* requirements set out in rules 5.2.7(2) to (5), or with the equivalent rules of its regulator; and
 - (iii) has systems to monitor and control the sources of capital and funding of all other *financial institutions* within the group;
 - (b) each member of the group which is regulated by *the FSA* notifies *the FSA* of any serious risks that could undermine the financial stability of the group, and follows any corrective action required by *the FSA*; and
 - (c) the *firm* has applied for and obtained from *the FSA* a waiver from rule 5.7.1(1).

OBLIGATION TO PROVIDE INFORMATION

- 5.7.1(4) R A *firm* which is subject to rule 5.7.1(1) must provide such information as is required to enable *the FSA* to assess the risks to which the *firm* may be subject as a member of the group of which it is a member.

APPENDIX 1 (INTERPRETATION)

GLOSSARY OF TERMS FOR CHAPTER 5 (FORMER IMRO FIRMS)

The following words or terms throughout Chapter 5 are to have the meanings given to them below if not inconsistent with the subject or context. If a defined term does not appear in the Chapter 5 glossary below, the definition appearing in the Glossary annexed to the General Provisions Instrument 2001 ("the *Glossary*") applies.

Term	Meaning
<i>accepting deposits</i>	means the <i>regulated activity</i> , specified in article 5 of the <i>Regulated Activities Order (Accepting deposits)</i> , which is in summary: <i>accepting deposits</i> if: (a) money received by way of <i>deposit</i> is lent to others; or (b) any other activity of the person accepting the <i>deposit</i> is financed, wholly or to a material extent, out of the capital of or interest on money received by way of <i>deposit</i> .
<i>accounting reference date</i>	means: (a) the date to which a <i>firm's</i> accounts are prepared in order to comply with the <i>Companies Act</i> or, in the case of a <i>firm</i> not subject to the <i>Companies Act</i> , the equivalent date selected by the <i>firm</i> ; and (b) in the case of an <i>OPS firm</i> which is not subject to the <i>Companies Act</i> , the date to which the accounts of the <i>OPS</i> in respect of which the <i>firm</i> acts are prepared.
<i>Act</i>	means the Financial Services and Markets Act 2000.
<i>advice or advising on investments</i>	means the <i>regulated activity</i> , specified in article 53 of the <i>Regulated Activities Order (Advising on investments)</i> , which is in summary: advising a person if the advice is (a) given to the person in his capacity as an investor or potential investor, or in his capacity as agent for an investor or a potential investor; and (b) advice on the merits of his doing any of the following (whether as principal or agent): (i) buying, selling, subscribing for or underwriting a particular <i>investment</i> which is a <i>designated investment</i> , or (ii) exercising any right conferred by such an <i>investment</i> to buy, sell, subscribe for or underwrite such an <i>investment</i> .
<i>admission procedures</i>	means the procedures set out in the Authorisation Manual together with any other procedures which the <i>Board</i> resolves, either generally or in relation to any specific case, should apply to the admission of <i>firms</i> and the admission of <i>approved persons</i> .
<i>ancillary activity</i>	means an activity that is not a <i>regulated activity</i> but is: (a) carried on in connection with a <i>regulated activity</i> ; or (b) held out as being for the purposes of a <i>regulated activity</i> .
<i>annual accounts</i>	means accounts prepared to comply with the <i>Companies Act</i> or other statutory obligations.
<i>annual audited expenditure</i>	has the meaning given in rule 5.2.4(1) (Determination).
<i>annual financial return</i>	means the return referred to in the Supervision Manual.
<i>appointed representative</i>	(in accordance with section 39 of the <i>Act</i>) a <i>person</i> (other than an <i>authorised person</i>) who: (a) is a party to a contract with an <i>authorised person</i> (his <i>principal</i>) which: (i) permits or requires him to carry on business of a description prescribed in the Financial Services and Markets Act 2000 (Appointed Representatives) Regulations 2001 (SI

2001/1217); and

(ii) complies with such requirements as are prescribed in those Regulations; and

(b) is someone for whose activities in carrying on the whole or part of that business his *principal* has accepted responsibility in writing;

and who is therefore an *exempt person* in relation to any *regulated activity* comprised in the carrying on of that business for which his *principal* has accepted responsibility.

approved bank

(in relation to a bank account opened by a *firm*):

(a) if the account is opened at a branch in the *United Kingdom*:

(i) the Bank of England; or

(ii) the central bank of a member state of the *OECD*; or

(iii) a *bank*; or

(iv) a *building Society* which offers, unrestrictedly, banking services; or

(v) a bank which is supervised by the central bank or other banking regulator of a member state of the *OECD*; or

(b) if the account is opened elsewhere:

(i) a bank in (a); or

(ii) a *credit institution* established in an *EEA* state other than the *United Kingdom* and duly authorised by the relevant *Home State regulator*; or

(iii) a bank which is regulated in the Isle of Man or the Channel Islands; or

(c) a bank supervised by the South African Reserve Bank; or

(d) any other bank that:

(i) is subject to regulation by a national banking regulator;

(ii) is required to provide audited accounts;

(iii) has minimum net assets of £5million (or its equivalent in any other currency at the relevant time) and has a surplus revenue over expenditure for the last two financial years; and

(iv) has an annual audit report which is not materially qualified.

approved person

means a person in relation to whom the *FSA* has given its approval under section 59 of the *Act* (Approval for particular arrangements) for the performance of a *controlled function*.

associate

in relation to person ("A"), means:

(a) an undertaking in the same *group* as A;

(b) an *appointed representative* of A or of any undertaking in the same *group* as A; and

(c) any other person whose business or domestic relationship with A or its *associate* might reasonably be expected to give rise to a community of interest between them which may involve a conflict of interest in dealings with third parties.

authorised corporate director

means the *director* of an *ICVC* who is the authorised corporate director of the *ICVC* in accordance with CIS 7.2.1R (The directors).

authorised person

as defined in section 31 of the *Act* (*Authorised persons*), means one of the following persons authorised for the purposes of the *Act*:

(a) a person who has a Part IV permission to carry on one or more *regulated activities*;

(b) an *EEA firm* qualifying for authorisation in accordance with Schedule 3 to the *Act* (*EEA Passport Rights*);

(c) an *incoming Treaty firm*;

	(d) a <i>UCITS qualifier</i> ;
	(e) an <i>ICVC</i> ;
	(f) a person who is otherwise authorised by a provision of, or made under the <i>Act</i> .
<i>authorised unit trust manager</i>	means the manager of an <i>authorised unit trust scheme</i> .
<i>authorised unit trust scheme</i>	(as defined in section 237(3) of the <i>Act</i> (Other definitions)), means a <i>unit trust scheme</i> which is authorised for the purposes of the <i>Act</i> by an authorisation order.
<i>best execution</i>	in relation to the effecting of a transaction, means the effecting of that transaction in compliance with COB 7.5.
<i>Board</i>	means the board of <i>directors</i> of <i>FSA</i> or any duly authorised committee of such board.
<i>body corporate</i>	means any body corporate, including a body corporate constituted under the law of a country or territory outside the <i>United Kingdom</i> , in accordance with section 417(1) (Definitions) of the <i>Act</i> .
<i>branch</i>	means: <ul style="list-style-type: none"> (a) in relation to a <i>credit institution</i>, a place of business which forms a legally dependent part of a <i>credit institution</i> and which carries out directly all or some of the transactions inherent in the business of <i>credit institutions</i>; (b) in relation to an <i>investment firm</i>, a place of business which is a part of an <i>investment firm</i>, not being the principal place of business, which has no separate legal personality and which provides <i>investment services</i> for which the <i>investment firm</i> has been authorised; (c) for the purposes of the <i>ISD</i>, all the places of business set up in the same <i>member state</i> by an <i>investment firm</i> with headquarters in another <i>member state</i> are to be regarded as a single <i>branch</i>.
<i>category a body</i>	means: <ul style="list-style-type: none"> (a) the government or central bank of a <i>zone a country</i>; or (b) the European Communities; or (c) the government or central bank of any other country, provided the receivable in question is denominated in that country's national currency.
<i>category b body</i>	means: <ul style="list-style-type: none"> (a) the <i>EIB</i> or a multi-lateral development bank; or (b) the regional government or local authority of a <i>zone a country</i>; or (c) an <i>investment firm</i> or <i>credit institution</i> authorised in a <i>zone a country</i>; or (d) a <i>recognised clearing house</i> or <i>exchange</i>; or (e) an <i>investment firm</i> or <i>credit institution</i> authorised in any other country, which applies a financial supervision regime at least equivalent to the Capital Adequacy Directive (No. 93/6/EEC).
<i>certificates representing securities or</i>	the <i>investment</i> specified in article 80 of the <i>Regulated Activities Order</i> (Certificates representing certain securities), which is, in summary: a certificate or other instrument which confers contractual or property rights (other than rights consisting of options):
<i>certificates representing certain securities</i>	(a) in respect of any share, debenture, <i>government and public security</i> or warrant) held by a <i>person</i> other than the person on whom the rights are conferred by the certificate or instrument; and <ul style="list-style-type: none"> (b) the transfer of which may be effected without requiring the consent of that person; but excluding any certificate or other instrument which confers rights in respect of two or more <i>investments</i> issued by different persons or in respect of two or more different <i>government and public securities</i> issued by the same person.
<i>chief executive</i>	means:

	(a) (in relation to a <i>firm</i> whose principal place of business is within the United Kingdom) the person who, alone or jointly with one or more others, is responsible under the immediate authority of the <i>directors</i> for the conduct of the whole of its business;
	(b) (in relation to a <i>firm</i> whose principal place of business is outside the United Kingdom) the person who, alone or jointly with one or more others, is responsible for the conduct of its business within the United Kingdom.
<i>client money</i>	means, subject to the <i>Client Money Rules</i> , money of any currency which, in the course of carrying on <i>designated investment business</i> , a <i>firm</i> holds in respect of any <i>investment agreement</i> entered into, or to be entered into, with or for a client or which a <i>firm</i> treats as <i>client money</i> in accordance with the <i>Client Money Rules</i> .
<i>Client Money Rules</i>	COB 9.3.
<i>close relative</i>	as defined in article 3(1) of the <i>Regulated Activities Order</i> (in relation to any person) means: <ul style="list-style-type: none"> (a) his spouse; (b) his children and step-children, his parents and step-parents, his brothers and sisters and his step-brothers and step-sisters; and (c) the spouse of any person within (b).
<i>collective investment scheme (CIS)</i>	a collective investment scheme, as defined in section 235 of the <i>Act</i> (Collective Investment Schemes), which is in summary: <ul style="list-style-type: none"> (a) any arrangements with respect to property of any description, including money, the purpose or effect of which is to enable persons taking part in the arrangements (whether by becoming owners of the property or any part of it or otherwise) to participate in or receive profits or income arising from the acquisition, holding, management or disposal of the property or sums paid out of such profits or income; and (b) which are not excluded by the Financial Services and Markets Act (Collective Investment Schemes) Order 2001 (SI 2001/1062).
<i>Companies Act</i>	means the Companies Acts 1985 to 1989 and their equivalent in Northern Ireland.
<i>company</i>	means a <i>body corporate</i> or an unincorporated association and, where the context permits, includes a partnership.

control in relation to the acquisition, increase or reduction of control of a *firm*, means the relationship between a person and the *firm* or other undertaking of which the person is *controller*.

controlled function means a function relating to the carrying on of a *regulated activity* by a *firm* which is specified, under section 59 of the *Act* (Approval for particular arrangements), in the Table of Controlled Functions at SUP 10.4.5.R.

controller (as defined in section 422 of the *Act* (Controller))

in relation to a *firm* or other undertaking ("A"), means a person who:

- (a) holds 10% or more of the *shares* in A; or
- (b) is able to exercise significant influence over the management of A by virtue of his shareholding in A; or
- (c) holds 10% or more of the *shares* in a parent undertaking ("P") of A; or
- (d) is able to exercise significant influence over the management of P by virtue of his shareholding in P; or
- (e) is entitled to exercise, or *control* the exercise of, 10% or more of the voting power in A; or
- (f) is able to exercise significant influence over the management of A by virtue of his voting power in A; or
- (g) is entitled to exercise, or control the exercise of, 10% or more of the voting power in P; or
- (h) is able to exercise significant influence over the management of by virtue of his voting power in P.

and in this definition

(A) "person" means:

- (a) the person; or
- (b) any of the person's *associates*; or
- (c) the person and any of his *associates*;

(B) "associate", in relation to a person (H) holding shares in an undertaking (C) or entitled to exercise or control the exercise of voting power in relation to another undertaking (D) means:

- (a) the spouse of H
- (b) a child or stepchild of H (if under 18);
- (c) the trustee of any settlement under which H has a life interest in possession (or in Scotland a life interest);

- (d) an undertaking of which H is a *director*;
 - (e) a person who is an *employee* or *partner* of H;
 - (f) if H is an undertaking:
 - (i) a *director* of H;
 - (ii) a *subsidiary* undertaking of H;
 - (iii) a *director* or *employee* of such a *subsidiary* undertaking; and
 - (g) if H has with any other person an agreement or arrangement with respect to the acquisition, holding or disposal of shares or other interests in C or D or under which they undertake to act together in exercising their voting power in relation to C or D, that other person;
- (C) "settlement" includes any disposition or arrangement under which property is held on trust (or subject to a comparable obligation);
- (D) "shares" means;
- (a) in relation to an undertaking with a share capital, allotted shares;
 - (b) in relation to an undertaking with capital but no share capital, rights to share in the capital of the undertaking;
 - (c) in relation to an undertaking without capital, interests:
 - (i) conferring any right to share in the profits, or liability to contribute to the losses, of the undertaking; or
 - (ii) giving rise to any obligation to contribute to the debts or expenses of the undertaking in the event of a winding up.

core investment service means a service listed in Section A of the Annex to the *ISD*, the text of which is set out in Schedule 2 to the *RAO*.

corporate finance business means:

- (a) *designated investment business* carried on by a *firm* with or for:
 - (i) any issuer, holder or owner of *designated investments*, if that business relates to the offer, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, those *investments*, or any related matter;
 - (ii) any market counterparty or *intermediate customer*, or other *body corporate*, partnership or supranational organisation, if that business relates to the manner in which, or the terms on which, or the persons by whom, any business, activities or undertakings relating to it, or any *associate*, are to be financed, structured, managed, controlled, regulated or reported upon;
 - (iii) any person in connection with:
 - (A) a proposed or actual *takeover or related operation* by or on behalf of that person, or involving investments issued by that person (being a *body corporate*), its *holding company*, *subsidiary* or *associate*; or
 - (B) a merger, de-merger, reorganisation or reconstruction involving any investments issued by that person (being a *body corporate*), its *holding company*, *subsidiary* or *associate*;
 - (iv) any shareholder or prospective shareholder of a *body corporate* established or to be established for the purpose of effecting a *takeover or related operation*, where that business is in connection with that *takeover or related operation*;
 - (v) any person who, acting as a *principal* for his own account:
 - (A) is involved in negotiations or decisions relating to the commercial, financial or strategic intentions or requirements of a business or prospective business; or
 - (B) (provided he is acting otherwise than solely in his capacity as an investor) assists

the interests of another person with or for whom the *firm*, or another *authorised person* or *overseas person*, is undertaking business as specified in (a)(i),(ii),(iii) or (iv), by himself undertaking all or part of any transactions involved in such business;

- (vi) any person undertaking business with or for a person as specified in (a)(i), (ii), (iii), (iv) or (v) in respect of activities described in those sub-paragraphs;
- (b) *designated investment business* carried on by a *firm* as a *principal* for its own account where such *business*:
 - (i) is in the course of, or arises out of, activities undertaken in accordance with (a); and
 - (ii) does not involve transactions with or for, or *advice* to, any other person who is a *private customer* in respect of such business;
- (c) *designated investment business* carried on by a *firm* as *principal* for its own account if such *business*:
 - (i) is in the course of, or arises out of:
 - (A) the offer, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, shares, share warrants, *debentures* or debenture warrants issued by the *firm*, or any related matter; or
 - (B) a proposed or actual *takeover or related operation* by or on behalf of the *firm*, or involving shares, share warrants, *debentures* or debenture warrants issued by the *firm*; or
 - (C) a merger, de-merger, reorganisation or reconstruction involving any shares, share warrants, *debentures* or debenture warrants issued by the *firm*; and
 - (ii) does not involve giving *advice on investments* to any person who is a *private customer*; in this definition, “share warrants” and “debenture warrants” means any *warrant* which relates to shares in the *firm* concerned or, as the case may be, *debentures* issued by the *firm*.

counterparty means any person with or for whom a *firm* carries on *regulated business* or an *ancillary activity*.

counterparty risk requirement has the meaning given in Table 5.2.3(5)(c) (Counterparty risk requirement).

credit institution (as defined in article 1(1) of the Banking Consolidation Directive No. 2000/12/EEC) means an undertaking whose business is to receive *deposits* or other repayable funds from the public and to grant credits for its own account.

custodian means:

- (a) an *approved bank*;
- (b) an approved *depository*;
- (c) a member of a *recognised investment exchange* or *designated investment exchange*;
- (d) a *firm* which is permitted by the *FSA* to conduct safekeeping and administration of *investments*;
- (e) a regulated clearing *firm*;
- (f) where it is not feasible to use a *custodian* in (a) to (e), and there are reasonable grounds to show that a person outside the *United Kingdom*, whose business includes the provision of custodial services, is able to provide such services which are appropriate to the client and in the client's best interest to use, that person.

custody in relation to clients' assets, means safekeeping and administration of *investments*.

customer see the meaning given to the term in the *Glossary*

customer investment means an *investment*, or a document of title or a certificate or other record evidencing title to an *investment*, (other than an *investment* falling within articles 83, 84 and 85 of the *RAO*) which is legally or beneficially owned by a *customer* of a *firm*.

<i>customer transaction</i>	does not include an <i>own account transaction</i> .
<i>debenture</i>	means the investment specified in article 77 of the <i>Regulated Activities Order</i> (Instruments creating or acknowledging indebtedness), which is in summary: any of the following which are not <i>government and public securities</i> : <ul style="list-style-type: none"> (a) debentures; (b) debenture stock; (c) loan stock; (d) bonds; (e) certificates of deposit; (f) any other instruments creating or acknowledging indebtedness.
<i>deposit</i>	means the investment, specified in article 74 and defined in articles 5(2) and 5(3) of the <i>Regulated Activities Order</i> , which is, in summary: a sum of money (other than one excluded by any of articles 6 to 9 of the <i>Regulated Activities Order</i>) paid on terms: <ul style="list-style-type: none"> (a) under which it will be repaid, with or without interest or a premium, and either on demand or at a time or in circumstances agreed by or on behalf of the person making the payment and the person receiving it; and (b) which are not referable to the provision of property (other than currency) or services or the giving of security; <p>in this definition, money is paid on terms which are referable to the provision of property or services or the giving of security if, and only if:</p> <ul style="list-style-type: none"> (a) it is paid by way of advance or part payment under a contract for the sale, hire or other provision of property or services, and is repayable only in the event that the property or services is or are not in fact sold, hired or otherwise provided; or (b) it is paid by way of security for the performance of a contract or by way of security in respect of loss which may result from the non-performance of a contract; or (c) without prejudice to (b), it is paid by way of security for the delivery up or return of any property, whether in a particular state of repair or otherwise.
<i>depository</i>	<ul style="list-style-type: none"> (1) (in relation to an <i>ICVC</i>) the <i>person</i> to whom is entrusted the safekeeping of all of the <i>scheme property</i> of the <i>ICVC</i> and who has been appointed for this purpose in accordance with regulation 5 (Safekeeping of scheme property by depository) of and Schedule 1 (Depositaries) to the <i>OEIC Regulations</i>. (2) (in relation to an <i>AUT</i>) the <i>trustee</i>. (3) (in relation to any other <i>unit trust scheme</i>) the <i>person</i> holding the property of the <i>scheme</i> on trust for the <i>participants</i>. (4) (in relation to any other <i>collective investment scheme</i>) any <i>person</i> to whom the property subject to the <i>scheme</i> is entrusted for safekeeping.
<i>designated investment</i>	see the meaning given to the term in the <i>Glossary</i>
<i>designated investment business</i>	see the meaning given to the term in the <i>Glossary</i>

<i>designated investment exchange</i>	see the meaning given to the term in the <i>Glossary</i>

<i>regulated business</i>	means <i>designated investment business</i> .
<i>regulated collective investment scheme</i>	means: (a) an <i>ICVC</i> ; (b) an <i>authorised unit trust scheme</i> ; or (c) a <i>recognised scheme</i> ; whether or not the units are held within a <i>PEP</i> , <i>ISA</i> , or <i>pension contract</i> .
<i>regulated friendly society</i>	means, as respects <i>investment business</i> carried on for or in connection with any of the purposes mentioned in Schedule 1 to the Friendly Societies Act 1974, or, as the case may be, to the Friendly Societies Act (Northern Ireland) 1970, means a society which is a friendly society within the meaning of section 7(1)(a) of the Friendly Societies Act 1974 and is registered within the meaning of that Act or is a friendly society within the meaning of section 1(1)(a) of the Friendly Societies Act (Northern Ireland) 1970 and is registered or deemed to be registered under that Act; and (a) under its rules, has its registered office at a place situated in Great Britain or, as the case may be, Northern Ireland; and (b) carries on <i>investment business</i> in the UK.
<i>relevant foreign exchange items</i>	means: (a) all assets less liabilities, including accrued interest, denominated in the currency (all investments at market or realisable value); (b) any currency future, at the nominal value of the contract; (c) any forward contract for the purchase or sale of the currency, at the contract value, including any future exchange of principal

	associated with currency swaps;
	(d) any foreign currency options at the net delta (or delta-based) equivalent of the total book of such options;
	(e) any non-currency option, at market value;
	(f) any irrevocable guarantee;
	(g) any other off-balance sheet commitment to purchase or sell an asset denominated in that currency.
<i>reporting currency</i>	means the currency in which the <i>firm</i> 's books of account are maintained.
<i>rule or rules</i>	in accordance with section 417(1) of the <i>Act</i> (Definitions), means a rule made by the <i>FSA</i> under the <i>Act</i> , including: <ul style="list-style-type: none"> (a) a Principle; and (b) an evidential provision.
<i>SARs</i>	means the Rules Governing Substantial Acquisition of Shares issued on the authority of the Takeover Panel.
<i>scheme</i>	means a <i>collective investment scheme</i> .
<i>small business investor</i>	means: <ul style="list-style-type: none"> (a) a <i>company</i> or partnership; or (b) a <i>trustee</i> acting for a trust; which does not satisfy a size requirement enabling the <i>company</i> , partnership or <i>trustee</i> to be treated as an <i>ordinary business investor</i> .
<i>sole trader</i>	means an individual who is a <i>firm</i> .
<i>specified trustee business</i>	1. means any <i>investment business</i> carried on in the UK by a <i>trustee firm</i> , but excluding each of the following activities: <ul style="list-style-type: none"> (a) Dealing or arranging deals in investments <ul style="list-style-type: none"> (i) where the deal is transacted or arranged by a <i>trustee firm</i> with or through a <i>PTP</i>; or (ii) where the dealing or arranging is done in the course of, or is incidental to, an activity of management falling within paragraph (b) below; or (iii) where the trust is a <i>unit trust scheme</i> and the deal is or the arrangements are made with a view to either an issue or sale of units in such a <i>scheme</i> to, or a redemption or repurchase or conversion of such units or a dealing in investments for such a <i>scheme</i> carried out by with or through, the <i>operator</i> or on the instructions of the <i>operator</i>; or (iv) where the <i>trustee firm</i>, being a bare trustee (or, in Scotland, a nominee) holding <i>investments</i> for another person, is acting on that person's instructions; or (v) where any arrangements do not or would not bring about the transaction in question. (b) Managing Investments <ul style="list-style-type: none"> (i) where the <i>trustee firm</i> has no general authority to effect transactions in <i>investments</i> at discretion; or (ii) if and to the extent that all day-to-day decisions in relation to the management of the <i>investments</i> or any discrete part

of the *investments* are or are to be taken by a *PTP*; or

- (iii) if and to the extent that investment decisions in relation to the *investments* or any discrete part of the *investments* are or are to be taken substantially in accordance with the advice given by a *PTP*; or
 - (iv) where the *trustee firm* is a personal representative or executor and is acting in that capacity; or
 - (v) where the trust is a *unit trust scheme* and all day-to-day investment decisions in the carrying on of that activity are or are to be taken by the *operator* of the *scheme*.
- (c) **Investment advice**
- (i) where the relevant advice:
 - (A) does not recommend the entry into any investment transaction or the exercise of any right conferred by any *investment* to acquire, dispose of, underwrite or convert such an *investment*; and
 - (B) is accompanied by a recommendation that independent advice be obtained; or
 - (ii) if and to the extent that the relevant advice is in substance the advice of a *PTP*; or
 - (iii) where the relevant advice is given by the *trustee firm* acting in the capacity of personal representative or executor.
- (d) **Establishing, operating or winding up a collective investment scheme including acting as trustee of an authorised unit trust scheme** but only to the extent that such activities do not otherwise constitute *specified trustee business*.
- (e) **Any trustee activity undertaken as trustee of an issue of debentures or government or public securities**
- (i) where the issue is made by a company listed on a *recognised investment exchange* or on a *designated investment exchange* (or by a wholly-owned subsidiary of such a company); or
 - (ii) where the issue is listed or traded either on a *recognised investment exchange* or on a *designated investment exchange* or on the Société de la Bourse de Luxembourg; or
 - (iii) where the issue is made by a government, local authority or international organisation; or
 - (iv) where the aggregate amounts issued (pursuant to the trust deed or any deed supplemental thereto and ignoring any amounts redeemed, repurchased or converted) exceed the sum of £10,000,000.

2. For the purpose of this definition of “*specified trustee business*”:

- (a) a transaction is entered into through a person if that person:
 - (i) enters into it as agent; or
 - (ii) arranges for it to be entered into as principal or agent by another person and the arrangements are such that they bring about the transaction in question;

- (b) **investment transaction** means a transaction to purchase, sell, subscribe for or underwrite a particular investment and “investment decision” means a decision relating to an investment transaction;
- (c) **debentures** means any securities falling within article 77 of the *RAO*;
- (d) **government or public securities** means any securities falling within article 78) of the *RAO*;
- (e) *government, local authority or international organisation* means:
 - (i) the government of the *United Kingdom*, of Northern Ireland, or of any country or territory outside the United Kingdom;
 - (ii) a local authority in the *United Kingdom* or Anywhere; or
 - (iii) an international organisation the members of which include the *United Kingdom* or another *EEA State*.
- (f) in determining the size of an issue of debentures or government or public securities made in a currency other than sterling, the amount of the issue shall be converted into sterling at the exchange rate prevailing in London on the date of issue.

statutory rules means the rules made by *FSA* under the Act.

subsidiary means, as defined in section 736 of the Companies Act 1985, (in relation to another body corporate ("H")), a body corporate of which H is a *holding company*.

Takeover Code means the City Code on Takeovers and Mergers issued by the Takeover Panel.

takeover or related operation means:

- (a) any transaction falling within paragraph 4(b) (Companies and Transactions to which the Code applies) of the introduction to the *Takeover Code*;
- (b) any transaction subject to the *SARs*;
- (c) any transaction which would have fallen within (a) were it not for the fact that the company which is the subject of the transaction does not satisfy the tests set out in paragraph 4(a) (Companies and Transactions to which the *Code* applies) of the introduction to the *Takeover Code* and, for this purpose, an offer for non-voting, non-equity share capital is to be regarded as falling within the *Takeover Code* even if not required by rule 15 of that Code;
- (d) any transaction which would have been subject to the *SARs* but where the shares the subject of the transaction are in a company which does not satisfy the test of residency set out in the second and third paragraphs of Section 2 Scope of the Introduction to the *SARs*;
- (e) any offer, transaction or arrangement relating to the purchase of securities with a view to establishing or increasing a strategic holding of a person, or of a person together with his associates in the securities concerned;
- (f) any transaction or arrangement entered into in contemplation or furtherance of any offer, transaction or arrangement falling within (a) to (e); and
- (g) any transaction or arrangement entered into by way of defence or protection against any offer, transaction or arrangement falling within (a) to (f) which has taken place or which is contemplated.

total capital requirement has the meaning given in rule 5.2.3(5) (Total capital requirement).

trading book in relation to a *firm*'s business or *exposures*, means:

- (a) its proprietary positions in financial instruments:
 - (i) which are held for resale and/or are taken on by the *firm* with the intention of benefiting in the short term from actual and/or expected differences between their buying and selling prices or from other price or interest-rate variations;
 - (ii) arising from matched principal broking;

	(iii) taken in order to hedge other elements of the <i>trading book</i> ;
	(b) <i>exposures</i> due to unsettled securities transactions, free deliveries, <i>OTC derivative</i> instruments, repurchase agreements and securities lending transactions based on securities included in (a)(i) to (iii) above, reverse repurchase agreements and securities borrowing transactions based on securities included in (a)(i) to (iii) above; and
	(c) fees, commission, interest and dividends, and margin on exchange-traded derivatives which are directly related to the items included in (a) and (b) above.
<i>trust beneficiary</i>	means a beneficiary under a trust (not being the settlor) who benefits from the performance by a <i>firm</i> as <i>trustee</i> of <i>investment services</i> relating to the management of the trust assets (in accordance with section 2372 of the <i>Act</i> (Other definitions)).
<i>trustee</i>	(in accordance with section 237(2) of the <i>Act</i> (Other definitions) (in relation to a unit trust scheme) the person holding the property in question on trust for the participants.
<i>trustee activity</i>	means, in relation to a <i>firm</i> , any activity undertaken in the course of or incidental to the exercise of any of its powers, or the performance of any of its duties, when acting in its capacity as a trustee.
<i>trustee firm</i>	means a <i>firm</i> which is not an <i>OPS firm</i> and which is acting as: <ul style="list-style-type: none"> (a) a <i>trustee</i>; or (b) a personal representative.
<i>UCITS qualifier</i>	see the meaning given to the term in the <i>Glossary</i>
<i>UK authorised investment firm</i>	means an <i>investment firm</i> . Note: A <i>UK authorised investment firm</i> is not necessarily a <i>firm</i> for the purposes of the <i>rules</i> .
<i>United Kingdom (UK)</i>	means England and Wales, Scotland and Northern Ireland, but not the Channel Islands or Isle of Man.
<i>unit trust manager</i>	means the manager of a <i>unit trust scheme</i> .
<i>unit trust scheme</i>	(as defined in section 237(1) of the <i>Act</i> (Other definitions)) means a <i>collective investment scheme</i> under which the property in question is held on trust for the participants.
<i>units</i>	means the rights or interests (however described) of the participants in a <i>collective investment scheme</i> .
<i>unregulated collective investment scheme</i>	means a <i>collective investment scheme</i> which is not a <i>regulated collective investment scheme</i> .
<i>venture capital investment</i>	means a <i>designated investment</i> which, at the time the investment is made, is: <ul style="list-style-type: none"> (a) in a new or developing company or venture; (b) in a management buy-out or buy-in; (c) made as a means of financing the investee company or venture and accompanied by a right of consultation, or rights to information, or board representation, or management rights; or (d) acquired with a view to, or in order to facilitate, a transaction falling within (a) to (c).
<i>warrant</i>	means the investment specified in article 79 of the <i>Regulated Activities Order</i> (Instruments giving entitlement to <i>investments</i>), which is, in summary: a <i>warrant</i> or other instrument entitling the holder to subscribe for a share, <i>debenture</i> or government and public security.
<i>zone a country</i>	means a country which is a member of the <i>OECD</i> , or which has negotiated special lending arrangements with the IMF. Note: Countries which currently fall within this definition are Australia, Austria, Belgium,

Bermuda, Canada, Denmark, Finland, France, Germany, Gibraltar, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, The Netherlands, New Zealand, Norway, Portugal, Saudi Arabia, Spain, Sweden, Switzerland, Turkey, UK, Channel Islands, Isle of Man and United States.

Note: For the purpose of determining whether a bank is in a *zone a* or *zone b country*, the place of incorporation is the relevant factor to be considered rather than the location of the branch.

zone b country means a country which is not a *zone a country*.

6 Chapter 6: Service Companies

6.1 APPLICATION

6.1.1 R This chapter applies to *service companies*.

FINANCIAL RESOURCES REQUIREMENTS

6.1.2 R (1) A *service company* must be able to meet its liabilities as they fall due.

(2) In complying with (1) a *firm* may use any assets which are available to meet any of its liabilities.

10 Chapter 10: Financial resources for Securities and Futures Firms which are Investment Firms

10-A R The definitions in the glossary at Appendix 1 apply to this chapter.

APPLICATION

10-B R This chapter applies to a *securities and futures firm* which is an *investment firm* and to a *category D firm*.

G Consequently this chapter does not apply to *lead regulated firms* and *passported institutions* (without a top-up permission).

10-10 Keeping of records

Records to be up-to-date

10-10(1) R A *firm* must keep records in accordance with rules 10-10 to 10-12 on a continual basis so that at all times records are up-to-date or able to be brought up-to-date within a reasonable time.

Adequacy of records

10-10(2) R A *firm* must keep records in such a manner that they are sufficient to show and explain the *firm's* transactions and commitments (whether effected on its own behalf or on behalf of others) and in particular so that these records:

- (a) disclose with reasonable accuracy the financial position of the firm at any point in time within the previous six years when the firm was authorised by the *FSA* or a predecessor regulator;**
- (b) demonstrate whether or not the *firm* is or was at that time complying with its *financial resources requirement*; and**
- (c) enable the *firm* to prepare within a reasonable time any *financial reporting statement* as at the close of business of any date within the previous six years when the *firm* was authorised by the *FSA* or a predecessor regulator, and such that the statement complies with the requirements of the rules of the *FSA*.**

Content of records

10-10(3) A firm must ensure that its records contain as a minimum:

Financial

- (a) entries from day to day of all sums of money received and expended by the *firm* whether on its behalf or on behalf of others, and the matters in respect of which the receipt and expenditure takes place;**
- (b) a record of all income and expenditure of the *firm* explaining its nature;**
- (c) a record of all assets and liabilities of the *firm* including any commitments or *contingent liabilities*;**
- (d) entries from day to day of all purchases and sales of *investments* by the *firm* distinguishing those which are made by the *firm* on its own account and those which are made by or on behalf of others;**
- (e) any working papers necessary to show the preparation of any *reporting statement* or any other periodic return to the *FSA*;**

Risk management

- (m) details of exposure limits for trading positions and counterparty credit limits which are appropriate to the type, nature and volume of business undertaken, in such a way that they are capable of being summarised to enable actual exposures to be measured readily and regularly against these limits;**
- (n) management information records maintained in a manner such that they disclose, or are capable of disclosing, in a prompt and appropriate fashion, the financial and business information which will enable the *firm's* management to:**
 - (i) identify, quantify, *control* and manage the *firm's* risk exposures;**
 - (ii) make timely and informed decisions;**
 - (iii) monitor the performance of all aspects of the *firm's* business on an up-to-date basis;**
 - (iv) monitor the quality of the *firm's* assets; and**

- (v) **safeguard the assets of the *firm*, including assets for which the *firm* is accountable belonging to other persons.**

G The FSA does not consider it possible to prepare an exhaustive and prescriptive list of record keeping requirements applicable to all *firms*. The detailed requirements will vary according to the manner in which the business is structured, organised and managed; its size; and the nature, volume and complexity of its transactions and commitments.

Reconciliation of firm's balances

10-11

Reconciliation

- 10-11(1) R **A *firm* must reconcile all balances with banks or building societies (other than a client bank account subject to the Client Money Rules) as recorded by the *firm* to the balance on the statement issued by the bank or building society and must correct any difference forthwith, unless it arises solely as a result of identified differences in timing between the records of the *firm* and the bank or building society.**
- 10-11(2) R **A *firm* must reconcile all balances and positions with *exchanges*, *clearing houses* and *intermediate brokers* as recorded by the *firm* to the balance or position on a statement or circularisation obtained by the *firm* from the *exchange* etc and must correct any differences by agreement with the *exchange* etc on a timely basis.**
- 10-11(3) R **A *firm* must perform *reconciliations* under (1) and (2) above as frequently as is appropriate for the volume of transactions on the accounts and in any event not less than once every five weeks.**
- 10-11(4) R **A *firm* must reconcile all balances and *securities* positions with each counterparty which is a member of an *exchange* as recorded by the *firm* to the balance or position on a statement or circularisation obtained by the *firm* from the counterparty except to the extent that the balances and *securities* positions due to and from the counterparty have been agreed by other means, and must correct any differences by agreement with the counterparty on a timely basis*.**
- 10-11(5) R **A *firm* must perform *reconciliations* under (4) above as frequently as is appropriate for the volume of transactions on the accounts and in any event not less than once every year.**

* For guidance notes on the *reconciliation* of a *firm's* balances with a *counterparty* which is a member of an *exchange*, see Appendix 20

Response to requests

- 10-11(6) R **A *firm* must use its best endeavours to respond within one month of receipt to any circularisation from another *firm* requesting confirmation of outstanding balances.**

10-12 Nature, accessibility and retention of records

Nature of records

- 10-12(1) R **A *firm* may keep a record in any form provided that the record can be reproduced promptly in hard printed form in English.**

- 10-12(2) R **Where all the records relating to a counterparty are not kept together, a *firm* must ensure that each location where documents relating to that counterparty are retained contains an indication that other records relating to that counterparty exist and how access to them can be obtained.**

- 10-12(3) R **A *firm* may accept and rely on records supplied by a third party so long as those records are capable of being and are reconciled with records held by the *firm*.**

Audit trail

- 10-12(4) R **A *firm* must record the information required by rules 10-10 to 10-13 in such a way as to enable a particular transaction to be identified at any time and traced through the accounting systems of the *firm*, in particular in such a manner as to enable early identification of aggregated transactions and of the particular items which have contributed to those aggregated transactions.**

10-12(5) R Retention of records

- (a) **A *firm* must ensure that all records relating to the current year are arranged, filed and indexed so as to permit prompt access to any particular record.**
- (b) **During the most recent year, a *firm* must keep these records either at a place where the *firm* carries on business or in such a manner that they can be produced at such a place within 24 hours of their being requested and thereafter, within 48 hours.**
- (c) **A *firm* must keep all records required by rules 10-10 to 10-12 for a period of six years after the date on which they are first made or prepared.**

Security of records

- 10-12(6) R** **A firm must have adequate procedures for the maintenance, security, privacy and preservation of records, working papers and other documents of title belonging to the firm or others so that they are reasonably safeguarded against loss, unauthorised access, alteration or destruction.**

Notification requirements for category A, B and C firms

Application

- 10-32(1) R** **This rule applies only to category A, B and C firms.**

Counterparty default on a repurchase transaction etc.

- 10-32(2) R** **A firm must notify the FSA as soon as it has reason to believe that a counterparty with which it has entered into a repurchase, reverse repurchase, securities or physical commodities lending, securities or physical commodities borrowing, sale and buy back or buy and sale back agreement has defaulted on its obligations.**

Large exposures

- 10-32(3) R** **Subject to (7) below, a firm must notify the FSA of the following:**
- (a) at the end of each quarter, all large exposures which have occurred during the preceding quarter, stating the amount of the highest large exposure and the name of the third parties concerned;**
 - (b) as soon as it has reason to believe that it is or will be in breach of the limits specified in rule 10-193, stating the amount and cause of the exposure and the name of the third parties concerned, together with details of the steps which it is taking, or has taken to remedy or prevent the breach.**
- 10-32(5) R** **Subject to (7) below, a firm must notify the FSA:**
- (a) at the end of each quarter, all group large exposures which have occurred during the preceding quarter, stating the amount of the highest large exposure and the third parties involved;**

- (b) as soon as it has reason to believe that it is or will be in breach of the limits specified in rule 10-193, stating the amount and cause of the *exposure* and the name of the third parties involved, together with details of the steps which it is taking, or has taken to remedy or prevent the breach.

10-32(6) R A *firm* which is subject to the waiver from consolidated supervision in accordance with rule 10-204 is exempt from (5) above.

10-32(7) R A *firm* is not required to notify the *FSA* of the following:

- (a) *large exposures* to or guaranteed by *Zone A* central governments and central banks and by the *European Communities*; and
- (b) *large exposures* secured by *securities* issued by *Zone A* central governments and central banks and by the *European Communities*.

Repurchase and reverse repurchase, securities or physical commodities lending and borrowing and sale and buy back agreements

10-41(7) R Where a *firm* has entered into a *repurchase, reverse repurchase, securities or physical commodities* lending, *securities or physical commodities* borrowing, *sale and buy back, or buy and sale back agreement* (whether or not *undocumented*), it must:

- (c) *mark to market* the cash borrowed or lent; except that if the residual maturity of the transaction is less than one month, a *firm* may instead provide for accrued interest on the amount borrowed or lent;

10-41 (7A) R (a) Cash borrowed or lent under a *repurchase or reverse repurchase agreement*, or under any similar agreement in which cash is lent or borrowed against security and at a fixed interest rate, as well as *trading book* deposits and cash borrowings, must be included in the interest rate method as outlined in Rule 10-101(14) and (15).

- (b) If less than one month remains until maturity, a *firm* may choose to omit such transactions from its *PRR* calculations.

Valuation of positions*

- 10-41(9) R** A *firm* must value both *trading book* positions and *non-trading book investment* positions on a prudent and consistent basis, as well as having regard to the liquidity of the instrument concerned and any special factors which may adversely affect the closure of the position, and must adopt the following general policies:
- (a) a position must be valued at its close out price (close out price means that a long position shall be valued at current bid price and a short position at current offer price); where firm two way prices are not available a *firm* must value its position in accordance with the notes to this rule; *
 - (b) where a *firm* has been granted a modification or waiver by the *FSA* to use a risk assessment model in the calculation of its *PRR* on *options* positions (as described in the guidance at 10-82(4) and 10-101(2)), it may value its *options* using the values derived from the model;
 - (c) where a *firm* does not use a model as described in (b) above and prices are not published for its *options* positions, it must determine the *mark to market* value of standard European and American *options* as follows:
 - (i) for purchased *options*, the *mark to market* value must be the *in the money* amount multiplied by the quantity underlying the *option*;
 - (ii) for written *options*, the *mark to market* value must be the sum of:
 - (aa) the *in the money* amount multiplied by the quantity underlying the *option*; and
 - (bb) the initial premium received for the *option*;
- G If a written *option* was *in the money* at the time the contract was written, *in the money* amount in (aa) may be taken to be the current *in the money* amount less the *in the money* amount at the time the contract was written.
- (d) a *firm* must calculate the value of a *swap* contract or an *FRA* having regard to the net present value of the *future* cash flows of the contract, using current interest rates relevant to the periods in which the cash flows will arise.

* For notes on the valuation of positions, see **Appendix 21**

(e) in the case of interest rate swaps, currency swaps and FRAs, a firm may limit the bid/offer valuation required under (a) above to its net position.

- G The FSA does not consider it appropriate to lay down a precise formula for calculating the value of swaps and FRAs. However, it will expect a firm to employ a valuation formula which accords with generally accepted market practice.

Instruments of non-standard form

- 10- 41(10) G If a firm holds a position in an instrument that is not of a standard form, it should seek guidance from the FSA about the valuation treatment which it will apply to that instrument.

Initial Capital and Financial Resources

10-60 FIRMS TO WHICH RULES 10-61 TO 10-204 APPLY

Category A, B and C firms

10-60(1) R Rules 10-61 to 10-204 apply to a *category A, B or C firm*.

Category D firms

10-60(2) R Rules 10-61 to 10-176 apply to a *category D firm*, except that a *corporate finance advisory firm* which is a *category D firm* must instead comply with rules 3-60(3), 3-62, 10-61 and 10-63.

10-61 INITIAL CAPITAL

General rule

10-61(1) R A *firm* must:

- (a) on authorisation, hold *initial capital*, calculated in accordance with Table 10-61(1)A below, in excess of its *initial capital* requirement as detailed in (8) below; and**
- (b) at all times, maintain *own funds*, calculated in accordance with Table 10-61(1)B below, in excess of its *initial capital* requirement as detailed in (8) below.**

R TABLE 10-61(1)A - Initial capital

the sum of - ordinary share capital non cumulative preference share capital share premium account reserves excluding revaluation reserves audited retained earnings externally verified interim net profits or current account partners' capital account
<i>initial capital</i>

R TABLE 10-61(1)B - Own funds

the sum of - ordinary share capital non cumulative preference share capital share premium account reserves excluding revaluation reserves audited retained earnings externally verified interim net profits or current account partners' capital account	
<i>initial capital</i>	(A)
the sum of - investments in own shares intangible assets material interim year net losses	(B)
$A - B = \textit{original own funds}$	(C)
the sum of - non fixed term cumulative preference shares fixed term cumulative preference shares non fixed term long term subordinated loans fixed term long term subordinated loans revaluation reserves	(D)
<i>material holdings in credit and financial institutions</i>	(E)
$C + D - E = \textit{own funds}$	(F)

Preference share capital

10-61(2) R A firm may include preference share capital in financial resources only if:

- (a) there is an agreement between the firm and the holders of those shares which provides that redemption of the shares may not take place, if after such redemption the firm would be in breach of rule 10-62(1); and**
- (b) the firm notifies the FSA in writing before issuing any preference shares of its intention to do so.**

Non cumulative preference share capital

- 10-61(3) R A firm may include preference *share capital* in *initial capital* only where the dividends are not cumulative.**

Externally verified interim net profits or current account

- 10-61(4) R A firm may include interim net profits or current account when calculating *initial capital* to the extent that they have been:**
- (a) verified by the *firm's* external auditor; and**
 - (b) a copy of his opinion thereon, drawn up in accordance with the relevant requirements of Appendix 58, has been submitted to the *FSA*,**

and are net of any foreseeable charge, dividend or proprietor's drawings.

Intangible assets

- 10-61(5) R A firm must deduct from *initial capital*, when calculating *original own funds*, the full balance sheet value of intangible assets including goodwill, capitalised development costs, licences, exchange seats held as part of its trading requirement, trademark and similar rights etc.**

Material interim losses

- 10-61(6) R A firm must deduct from *initial capital* when calculating *original own funds* all material unaudited interim losses arising from its *trading book* and *non-trading book* business which exceed 10% of its *initial capital*.**

Material holdings in credit and financial institutions

- 10-61(7) R A firm must deduct the full value of its *material holdings* in *credit* or *financial institutions*, in accordance with Table 10-61(1)B, unless:**
- (a) the *firm* has been granted a waiver from rules 10-200 to 10-203, in which case it must:**
 - (i) deduct in full from *original own funds* those *material holdings* in *credit* or *financial institutions* which would have been included in the scope of consolidation in accordance with rule 10-200(3) if the waiver had not been granted; and**

- (ii) deduct in full as an *illiquid asset* any *material holding* in a *credit* or *financial institution* which would not have been included in the scope of consolidation, unless it is included in the *firm's trading book*, in which case the *firm* may treat it under the *PRR* rules; or
- (b) the *firm* has notified the *FSA* in writing that it intends to calculate its *financial resources* in accordance with Table 10-62(2)C, in which case it must deduct in full as an *illiquid asset* any *material holding* in a *credit* or *financial institution*, unless it is included in the *firm's trading book*, in which case the *firm* may treat it under the *PRR* rules; or
- (c) the *material holding* is a *trading book* position, in which case the *firm* must deduct in accordance with Table 10-61(1)B the full value of that proportion of the holding which exceeds 10% of the *firm's own funds*, and that segment of the *material holding* which falls below the 10% of *own funds* threshold may instead be treated in accordance with the *PRR* rules.

Initial capital requirement

10-61(8) R A *firm's initial capital* requirement must be:

- (a) for a *category A firm* : euro 730,000;
- (b) for a *category B firm* : euro 125,000;
- (c) for a *category C firm* : euro 50,000; or
- (d) for a *category D firm* : euro 50,000.

10-62 FINANCIAL RESOURCES

General rule

10-62(1) R A firm must, at all times, maintain *financial resources* in excess of its *financial resources requirement* as detailed in rule 10-70 below.

Calculation of financial resources

10-62(2) R A firm must calculate its *financial resources* in accordance with Table 10-62(2)A below, unless:

(a) it has been granted a waiver from rules 10-200 to 10-203, in which case it must calculate *financial resources* in accordance with Table 10-62(2)B; or

(b) the *firm* has notified the *FSA* in writing that it intends to calculate its *financial resources* in accordance with Table 10-62(2)C.

G The *FSA* expects a *firm* to calculate *financial resources* on a consistent basis and only change the version which it follows in exceptional circumstances. A *firm* that wishes to change the basis of calculation should inform the *FSA* in writing of its reasons for changing the basis for its calculation of *financial resources*.

10-63 SUBORDINATED LOAN

Calculation

10-63(1) R A firm may take into account subordinated loan capital in its *financial resources* in accordance with Tables 10-62(2)A, B and C subject to (2) to (12) below.

Approved of subordinated loans

10-63(2) R A firm may include a subordinated loan in its *financial resources* only:

- (a) if it is drawn up in accordance with the standard forms obtained from the FSA;**
- (b) if it is signed by authorised signatories of all the parties; and**
- (c) to the extent that it is paid up by the lender.**

G If a *firm* wishes to use a form which differs from the standard form it will need to seek a modification to, or waiver from, this rule.

G A *firm* may, under the provisions of IPRU(INV) 1.2.5R continue to include a subordinated loan in its *financial resources* if it was entitled to do so immediately prior to the *specified day*, and the other conditions set out in IPRU(INV) 1.2.5R are met.

Approved lenders

10-63(3) R A firm may treat a subordinated loan as part of *financial resources* only if the lender is:

- (a) the *firm's controller*;**
- (b) a *credit institution*;**
- (c) an *approved person*; or**
- (d) an *EEA or recognised third country investment firm*.**

G If the *firm* wishes to treat as part of its *financial resources* a subordinated loan from a person not within the above categories, it will need to seek a modification or waiver from the FSA.

Type of subordinated loan

10-63(4) R A firm's subordinated loans must be classified as one or other of the following:

- (a) long term subordinated loan; or**
- (b) short term subordinated loan.**

Long term subordinated loan

- 10-63(5) R A firm's long term subordinated loan must have an original maturity of at least five years.**

Repayment of long term subordinated loan

- 10-63(6) R A firm must not (except in accordance with the terms of the loan):**
- (a) repay, prepay or terminate a long term subordinated loan before the agreed repayment date unless it has provided the FSA with at least five years' written notice; and**
 - (b) make any payment of interest if after such action the firm's financial resources will fall below 120% of its financial resources requirement.**

Amounts repayable within five years

- 10-63(7) R A firm must reduce the extent to which the long term subordinated loan may contribute to its financial resources on a straight line basis over the last five years of its life.**

Short term subordinated loan

- 10-63(8) R A firm's short term subordinated loan must have an original maturity of at least two years.**

Repayment of short term subordinated loan

- 10-63(9) R A firm must not (except in accordance with the terms of the loan):**
- (a) repay, prepay or terminate a short term subordinated loan before the agreed repayment date; and**
 - (b) make any payment of interest or principal if after such action the firm's financial resources will fall below 120% of its financial resources requirement.**

- 10-63 (9A) R If a firm has a surplus of long term subordinated loan, which it may not include in its financial resources, because it would breach the gearing limits in rule 10-63(10) and (11), it may substitute such surplus long term subordinated loan in place of short term subordinated loan in accordance with Tables 10-62(2)A and B, provided that it continues to comply with the gearing limits in rules 10-63(12).**

Limits on subordinated loans, cumulative preference shares and revaluation reserves

- 10-63 (10)** R **The total amount of long term subordinated loan, cumulative preference shares and revaluation reserves which a *firm* may take into account in its *financial resources* must not exceed 100% of *original own funds* as specified in Table 10-62(2)A, B or C as appropriate.**
- 10-63 (11)** R **The total amount of fixed term long term subordinated loan and fixed term cumulative preference shares which a *firm* may take into account in its *financial resources* must not exceed 50% of *original own funds* in Table 10-62(2)A, B or C as appropriate.**
- 10-63 (12)** R **The total amount of short term subordinated loan (including any surplus long term subordinated loan) which a *firm* may take into account in its *financial resources* must not exceed:**
- (a) for a *firm* which calculates its *financial resources* in accordance with Table 10-62(2)A, 200% of the *original own funds* left after the items calculated as line “E” in Table 10-62(2)A have been deducted;**
 - (b) for a *firm* which calculates its *financial resources* in accordance with Table 10-62(2)B, 250% of *original own funds* left after the items calculated as lines “D” and “F” in Table 10-62(2)B have been deducted; or**
 - (c) for a *firm* which calculates its *financial resources* in accordance with Table 10-62(2)C, 250% of *original own funds* left after the items calculated as line “E” in Table 10-62(2)C have been deducted.**
- G In respect of (a) above, a *firm* may use the items of capital listed in “D” in Table 10-62(2)A to cover the items in line “E” before it uses *original own funds* to cover the items in line “E”.
- G In respect of (b) above, a *firm* which has been granted a waiver from rules 10-200 to 10-203 may use the items of capital listed in “E” in Table 10-62(2)B to cover the items in line “F” before it uses *original own funds* to cover the items in line “F”.
- G In respect of (c) above, any other *firm* which the *FSA* has agreed may calculate its *financial resources* in accordance with Table 10-62(2)C may use the items of capital listed in “D” in Table 10-62(2)C to cover the items in “E” before it uses *original own funds* to cover the items in line “E”.

10-64 LIQUIDITY ADJUSTMENT

General rule

10-64(1) R A *firm's* liquidity adjustment for its assets must be calculated -

- (a) for *illiquid assets*, other than commodities, in accordance with rule 10-65; and
- (b) for other *non-trading book* assets, other than commodities, in accordance with rule 10-66;
- (c) for all commodities in accordance with rule 10-166 (commodities method) and rule 10-170 (CRR).

Intangible assets

10-64(2) R The liquidity adjustment for intangible assets is nil (these must be deducted from *initial capital* to arrive at *original own funds* in accordance with rule 10-61(5)).

Debtors arising from trading book business

10-64(3) R Debtors arising from *trading book* business have no liquidity adjustment but instead are subject to the *CRR* rules.

Netting

10-64(4) R A *firm* which has offsetting exposures in similar types of transactions with a counterparty may offset these in accordance with rules 10-65(13) and 10-66(6) when calculating its liquidity adjustment if it has a contractual netting agreement with that counterparty, which:

- (a) covers the transactions which the *firm* is seeking to net;
- (b) creates a single obligation in each currency or a single overall obligation to pay (or receive) a net sum of cash in the event of default, bankruptcy, liquidation or similar circumstances;
- (c) does not include a *walkaway clause*; and
- (d) is supported by written and reasoned independent legal opinions to the effect that, in the event of a legal challenge, the relevant courts would find the *firm's* exposure to be the single net amount mentioned in (b) above.

G Legal opinions should relate to:

- (a) the law of the jurisdictions in which the counterparty is organised;

- (b) the law of the jurisdiction in which any branch involved is located;
 - (c) the law that governs the agreement and, if different, the law that governs individual transactions pursuant to it; and
 - (d) the law that governs the legal status of the counterparty who is entering into transactions of the type which the *firm* is seeking to net.
- G Where a *firm* uses a standard netting agreement and the netting/set-off clauses therein follow the form of that standard agreement, provided a legal opinion has already been obtained on the standard agreement which addresses the capacity of counterparties of the type with which the *firm* wishes to contract, that may be relied upon.
- G Legal opinions on netting agreements should be obtained from independent legal advisers with sufficient expertise and experience in this area of law. Opinions from in-house counsel will not be acceptable.
- G Where the regulator of the counterparty is not satisfied that the netting agreement is enforceable under its laws, the netting agreement cannot be relied upon regardless of the opinions obtained by the *firm*.
- G A *firm* may not net balance sheet payables and receivables arising from derivative transactions in the *non-trading book* against other exposures arising in the *non-trading book*.
- G A *firm* wishing to net counterparty balances in the *non-trading book* against counterparty balances in the *trading book* should apply to the FSA for relevant modification or waivers.

10-65 LIQUIDITY ADJUSTMENT ON ILLIQUID ASSETS

General rule

- 10-65(1) R A *firm's* total liquidity adjustment on its *illiquid assets* is the sum of the amounts calculated in accordance with (2) to (12) below, applying either:**
- (a) 8% multiplied by the appropriate counterparty weight* (where applicable), for *firms* who calculate their *financial resources* in accordance with Table 10-62(2)A; or**
 - (b) 100%, for *firms* who calculate their *financial resources* in accordance with Table 10-62(2)B or C.**

* for details of counterparty weights see **Appendix 47**

Tangible fixed assets

- 10-65(2) R** The liquidity adjustment for tangible fixed assets is either 8% or 100% of the total net book value of such assets, except that where a *firm* calculates its *financial resources* in accordance with Table 10-62(2)B or C it may calculate the liquidity adjustment for land and buildings used as security for *non recourse loans* or other loans in accordance with (3) and (4) below.

Land and buildings used as security for non recourse loans

- 10-65(3) R** The liquidity adjustment for land and buildings used as security for a *non recourse loan* is the difference between the net book value of the land or building and the loan principal outstanding, except where the loan principal outstanding is higher than the net book value in which case there is no liquidity adjustment.

Land and buildings used as security for other loans

- 10-65(4) R** The liquidity adjustment for land and buildings used as security for loans other than *non recourse loans* is the difference between the net book value of the land or building and the lower of:
- (a) 85% of a professional valuation of the land and buildings (which must have been carried out in the last two years); and
 - (b) the principal outstanding,

except where both (a) and (b) are higher than the net book value in which case there is no liquidity adjustment.

Physical stocks

- 10-65(5) R** The liquidity adjustment for physical stocks is either 8% or 100% of the balance sheet value of such stocks, except for stock positions in physical commodities associated with the *firm's investment business*, which are subject to the *PRR* rules, in which case there is no liquidity adjustment.

Investments in credit institutions and financial institutions

- 10-65(6) R** The liquidity adjustment for an *investment* in either a *credit institution* or *financial institution*, which may be included in the *own funds* of that institution is either 8% multiplied by the appropriate counterparty weight* applicable to the issuer of the *investment* or 100% of the balance sheet value of the *investment*, except where the *investment* is:
- (a) a *material holding* in a *credit institution* or *financial institution*, in which case it must be treated in accordance with (12) below; or
 - (b) not a *material holding* and is included in the *firm's trading book*, in which case there is no liquidity adjustment but such an *investment* must be subject to the *PRR* rules.

Other investments

- 10-65(7) R** The liquidity adjustment for other *investments* is either 8% multiplied by the appropriate counterparty weight* applicable to the issuer of the *investment* or 100% of the balance sheet value of the *investment*, except where:
- (a) the *investment* is included in the *firm's trading book*, in which case there is no liquidity adjustment but such an *investment* must be subject to the *PRR* rules; or
 - (b) the *investment* is suspended, in which case the *firm* must calculate a liquidity adjustment of 100% of the value of the *investment*.

Other debtors

- 10-65(8) R** The liquidity adjustment for debtors other than debtors arising from *trading book* business, where the debt is not due to be repaid within 90 days, is either 8% multiplied by the appropriate counterparty weight*, or 100% of the balance sheet value of the debtor, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

* for details of counterparty weights see **Appendix 47**

Other cash deposits

- 10-65(9) R** The liquidity adjustment for a cash deposit other than a *qualifying deposit* is either 8% multiplied by the appropriate counterparty weight*, or 100% of the balance sheet value of the deposit, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Loans

- 10-65 (10) R** The liquidity adjustment for a loan granted by a *firm* which is not due to be repaid within 90 days is either 8% multiplied by the appropriate counterparty weight*, or 100% of the balance sheet value, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Other assets

- 10-65 (11) R** The liquidity adjustment for assets other than those specifically stated above where the asset is not due to be repaid within 90 days, is either 8% multiplied by the appropriate counterparty weight*, or 100% of the balance sheet value, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Material holdings in credit and financial institutions

- 10-65 (12) R** The liquidity adjustment for a *material holding* in either a *credit* or *financial institution* is:
- (a) for a *firm* which calculates its *financial resources* in accordance with Table 10-62(2)A: zero, such an *investment* must be deducted in accordance with Table 10-61(1)B;
 - (b) for a *firm* which has been granted a waiver from rules 10-200 to 10-203: 100%, unless it is:
 - (i) a *material holding* in a *credit* or *financial institution* which would have been included in the scope of consolidation in accordance with rule 10-200(3) if the waiver had not been granted, in which case it must be deducted in full from *original own funds*; or
 - (ii) is included in the *firm's trading book*, in which case the *firm* may treat it under the *PRR* rules; or

* for details of counterparty weights see Appendix 47

- (c) for a *firm* which calculates its *financial resources* in accordance with Table 10-62(2)C: 100%, unless the holding is included in the *firm's trading book*, in which case the *firm* may treat it under the *PRR* rules.

Netting

- 10-65 (13) R A *firm* may offset positive and negative counterparty exposures, calculated in accordance with (8), (9) and (10) above, before it multiplies the residual exposure by the appropriate percentage provided that:
- (a) the exposures arise on transactions with the same counterparty; and
 - (b) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 10-64(4).

10-66 LIQUIDITY ADJUSTMENT ON OTHER NON-TRADING BOOK ASSETS

General rule

- 10-66(1) R A *firm's* total liquidity adjustment on its other *non-trading book* assets which are not *illiquid assets* is the sum of amounts specified as liquidity adjustments below.

Qualifying deposits

- 10-66(2) R The liquidity adjustment for a *non-trading book qualifying deposit* is 8% of the balance sheet value of the deposit multiplied by the appropriate counterparty weight*, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Loans

- 10-66(3) R The liquidity adjustment for a loan granted by a *firm* which is due to be repaid within 90 days is 8% of the balance sheet value multiplied by the appropriate counterparty weight*, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Prepayments

- 10-66(4) R The liquidity adjustment for a prepayment is 8% of the balance sheet value of that prepayment, multiplied by the counterparty weight* appropriate to the third party to whom it has been made, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Other assets

- 10-66(5) R** The liquidity adjustment for *non-trading book* assets other than those specifically stated above where the asset is due to be repaid within 90 days, is 8% of the balance sheet value multiplied by the appropriate counterparty weight*, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*.

Netting

- 10-66(6) R** A *firm* may offset positive and negative counterparty exposures, calculated in accordance with (2), (3) and (4) above, before it multiplies the residual exposure by the appropriate percentage provided that:
- (a) the exposures arise on transactions with the same counterparty; and
 - (b) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 10-64(4).

CHARGED ASSETS

General rule

- 10-67 R** A *firm* must calculate the requirement for charged assets as 8% of the aggregate balance sheet value of each asset of the *firm* over which a third party has the right of sale or retention on default by the *firm* multiplied by the appropriate counterparty weight*, except:
- (a) to the extent of any liability of the *firm* plus a reasonable margin in respect of the charged asset;
 - (b) where the asset is collateral for a transaction which is subject to the *CRR* rules;
 - (c) to the extent that the *firm* has calculated a liquidity adjustment or *PRR* in respect of the charged asset.
- G If the *firm* wishes to apply a different approach it will need to seek a modification or waiver from this rule from the *FSA*.

* for details of counterparty weights, see **Appendix 47**

CONTINGENT LIABILITIES

General rule

- 10-68 R** A *firm* must calculate a requirement for each of its contingent liabilities arising from *non-trading book* activities as 8% of the value of the *contingent liability* multiplied by the appropriate counterparty weight* except:
- (a) to the extent of any liability of the *firm* plus a reasonable margin in respect of the *contingent liability*; or
 - (b) where the *contingent liability* is collateral for a transaction which is subject to the *CRR* rules.
- G If the *firm* wishes to apply a different approach it will need to seek a modification or waiver from this rule from the *FSA*.

DEFICIENCIES IN SUBSIDIARIES

General rule

- 10-69 R** A *firm* must calculate the requirement for deficiencies in *subsidiaries* as an amount equal to 100% of any deficiency in shareholders' funds at any time of a *subsidiary* of the *firm* except to the extent that:
- (a) provision has already been made by the *firm*; or
 - (b) the *firm* has already calculated a liquidity adjustment or *CRR* because the deficiency arises or partially arises out of a liability of the *subsidiary* to the *firm*.

Financial resources requirement

CALCULATION OF FINANCIAL RESOURCES REQUIREMENT

10-70 R A firm's financial resources requirement is the sum of:

- (a) the primary requirement; and
- (b) the secondary requirement.

PRIMARY REQUIREMENT

10-71 R A firm's primary requirement is the higher of:

- (a) the sum of its *PRR*, *FER*, *CRR*, *LER* and base requirement (calculated in accordance with rule 10-72); or
- (b) the *firm's initial capital* requirement for a *category A, B, C or D firm*, calculated in accordance with 10-61(8).

BASE REQUIREMENT

10-72 R A firm's base requirement must be calculated in accordance with the following formula:

$$\text{base requirement} = \text{expenditure requirement} \times \left[\frac{\text{expenditure requirement}}{PRR + FER + CRR + LER + \text{expenditure requirement}} \right]$$

10-73 EXPENDITURE REQUIREMENT

General rule

10-73(1) R A firm's expenditure requirement must be:

- (a) for a *category D firm* which is not responsible for its counterparties' performance: 6/52nds of its relevant annual expenditure calculated in accordance with (2) to (4) below; or
- (b) for any other *firm*: 1/4 of its relevant annual expenditure calculated in accordance with (2) to (4) below.

Calculation of relevant annual expenditure

10-73(2) R Subject to (3) and (4) below, a *firm* must calculate its relevant annual expenditure with reference to the *firm's* most recent *audited annual financial statements* submitted to the *FSA*, as follows:

- (a) its total revenue; plus
- (b) any loss before taxation;

less the aggregate of the following items:

- (c) profit before taxation;
- (d) *bonuses* paid out of the relevant year's profits and not guaranteed;
- (e) *profit shares* and other appropriations of profit, except for fixed or guaranteed remuneration which is payable even if the *firm* makes a loss for the year;
- (f) paid *commissions shared*, other than to *employees, directors, half commission men or appointed representatives* of the *firm*;
- (g) fees, brokerage and other charges paid to clearing houses, *clearing firms*, exchanges, and *intermediate brokers* for the purposes of executing, registering or clearing transactions;
- (h) interest payable to counterparties;
- (i) interest payable on borrowings to finance the *firm's investment business and associated business*; and
- (j) *exceptional items*, provided that the *firm* first notifies the *FSA* in writing of the nature and amount of the *exceptional items*; and
- (k) losses arising on the translation of foreign currency balances.

Absence of audited annual financial statements

- 10-73(3) R** If a *firm* does not have *audited annual financial statements*, it must:
- (a) where it has just commenced trading or has not been authorised long enough to have submitted *audited annual financial statements* to the *FSA* (or to the *FSA's* predecessor), base its relevant annual expenditure on budgeted or other accounts which it submitted to the *FSA* (or to the *FSA's* predecessor) as part of the *firm's* application; or
 - (b) where its accounts do not represent a 12 month period, calculate relevant annual expenditure on a proportionate basis.

Adjusting relevant annual expenditure

- 10-73(4) R** A *firm* must adjust its relevant annual expenditure where:
- (a) there has been a significant change in the circumstances or activities of the *firm*; or
 - (b) the *firm* has a material proportion of its expenditure incurred on its behalf by third parties and such expenditure is not fully recharged to the *firm*.

G FSA would for example consider an application to vary a *firm's* permitted activity as a significant change.

G The FSA would consider 10% of a *firm's* expenditure incurred on its behalf by third parties to be material for the purposes of 10-73(4)R.

G If a *firm* is in any doubt, it should always seek guidance from the FSA

10-74 SECONDARY REQUIREMENT

General rule

- 10-74(1) R** A *firm* must include a secondary requirement in accordance with (2), (3) and (4) below.

Illiquid assets

- 10-74(2) R** A *firm* which calculates its *financial resources* in accordance with Table 10-62(2)A must calculate a secondary requirement as the higher of:
- (a) an amount equal to 92% of the excess of total *illiquid assets* over 25% of *initial capital* plus interim profit and loss account; and

- (b) an amount equal to 92% of the value of any individual *illiquid asset* which has a value greater than 10% of the *firm's initial capital* plus interim profit and loss account.

Risk profile

- 10-74(3) R A *firm* must include in its secondary requirement any amount specified in any *requirement* to cover an unusual risk profile.

Operational risks

- 10-74(4) R A *firm* must include in its secondary requirement any amount specified in any *requirement* to cover the inadequate management of operational risk to which a *firm* is exposed.

- G In assessing whether to impose a *requirement* on a *firm* to cover *illiquid assets*, risk profile or operational risks, the *FSA* will consider various criteria. Further detailed guidance is set out in Appendix 48.

POSITION RISK REQUIREMENT

10-80

General principles of PRR

Application

10-80
(1)

R ***A firm must calculate a PRR in respect of all trading book and physical commodities and physical commodities derivatives items.***

Obligation to calculate PRR

10-80
(2)

R ***A firm must calculate a minimum PRR in respect of any position according to one of the methods available under the rules below but may calculate a higher PRR in any other way at its option, provided it is able to demonstrate that, in all circumstances, the calculation being employed does give rise to a higher PRR for the position.***

G *A firm that wishes to use its internal model to calculate PRR in respect of all, or some, of its positions should apply for a modification or waiver from the relevant rules from the FSA.*

G *Further guidance on the criteria which such models must meet, and the review process, can be obtained from the FSA.*

Frequency of calculation

10-80
(3)

R ***A firm must be able to monitor its total PRR on an intra-day basis, and, before executing any trade, must be able to re-calculate PRR to the level of detail necessary to ensure that the firm's financial resources requirement does not exceed the firm's financial resources.***

Marking to market

10-80(4)

R ***A firm must mark to market its positions, whether or not on the balance sheet, in accordance with rule 10-41(9) at least once every business day and more frequently as appropriate.***

Non trading book items

10-80(5)

R ***Positions in instruments which are non-trading book items must be treated under rule 10-65.***

Instruments for which no PRR treatment has been specified

- 10-80(6)** **R** **Where the *firm* has a position in an instrument for which no *PRR* treatment has been specified, it must calculate a *PRR* of an appropriate percentage of the current *mark to market* value of the position and the *firm* must immediately notify the *FSA* of the details of the instrument, the *PRR* calculated and the reasons for the calculation.**

Instruments of non standard form

- 10-80(7)** **R** **Where an instrument is not of a standard form, the *firm* must calculate a *PRR* of an appropriate percentage of the current *mark to market* value of the position and the *firm* must immediately notify the *FSA* of the details of the instrument, the *PRR* calculated and the reasons for the calculation.**

- 10-80(7A) **E** (1) In 10-80(6) and 10-80(7) “an appropriate percentage” is:
- (a) 100%; or
 - (b) a percentage which takes account of the characteristics of the instrument concerned and of discussions with the *FSA* or a predecessor regulator.
- (2) Compliance with (1) may be relied on as tending to establish compliance with 10-80(6) or 10-80(7) as appropriate.
- (3) Contravention of (1) may be relied on as tending to establish contravention of 10-80(6) or 10-80(7) as appropriate.
- G** The methodologies which have been developed assume instruments with standard characteristics. There are many examples, however, of instruments which, although based on a standard contract, contain structural features which make the rules, as stated, inappropriate.

Alternative treatments

- 10-80(8)** **R** **Where a *firm* has the alternative of treating a position under two or more different methods or treatments within methods, it must treat the position under one of those methods.**

EQUITY METHOD

10-81 Types of positions to be included in the equity method

Securities

10-81(1) R **A firm must apply the equity method to the following *trading book* positions (whether or not *forward* positions):**

- (a) a share;
- (b) a *convertible preference security* (the interest rate method must be applied to a *non-convertible preference security*);
- (c) a depository receipt; and
- (d) a *convertible debt security*;

except for:

- (e) an offering of an equity, to the extent that the issuing market method applies;
- (f) an equity position hedging an *option or company issued warrant*, where the equity is of a type suitable for delivery, and up to a maximum of the extent to which the nominal amount of the equity is matched by the nominal amount of the equity underlying the *option or company issued warrant*, which may at the discretion of the *firm* be treated under rule 10-93(2);
- (g) a suspended stock, which must be treated in accordance with rule 10-65(7)(b);
- (h) a *convertible*, which may at the discretion of the *firm* be treated under the interest rate method subject to (2) below;
- (i) a *tender offer* as principal on an equity, which must be treated as an *OTC option* under rule 10-93(4); and
- (j) a *material holding* in a *credit or financial institution* which must be treated in accordance with rule 10-61(7).

Convertibles

10-81(2) R (a) **A firm must apply the equity method to any *convertible* if:**

- (i) less than three months remain to the first date at which conversion may take place (or less than one year until the next date if the first date has passed); and

- (ii) the *convertible* is trading at a “premium” of less than 10%.
- (b) “Premium” is the current *mark to market* value of the *convertible* less the current *mark to market* value of the underlying equity, expressed as a percentage of the current *mark to market* value of the underlying equity.
- (c) A *firm* may apply the equity method or the interest rate method to any *convertible* which is not subject to (a) above.

Equity swaps

- 10-81(3)
- R
 - (a) Where a *firm* has a position in an equity swap, the *firm* must divide the position into an interest rate leg, which must be treated under (b) below, and an equity leg, which must be treated under (c) below.
 - (b) The interest rate leg must be included in the interest rate method as a bond with characteristics determined in accordance with the provisions for interest rate swaps under rule 10-101(10).
 - (c) Where the *firm* pays (or receives) an amount which is based on the change in value of an equity, basket of equities or equity index, the *firm* must apply the equity method to the equity leg as a notional short (or long) position in the more appropriate of:
 - (i) an OTC *future* on an equity, basket of equities or equity index; or
 - (ii) an OTC *option* on an equity, basket of equities or equity index,

and must apply either the equity *derivatives* method or the equity method to the position, according to the provisions of those methods.
 - G Provided that an equity swap includes an interest rate leg treated under (b) above as well as an equity leg treated under (c) above, then *firms* are not required to calculate an interest rate add-on for the equity leg.

Optional inclusion of equity derivatives

10-
81(4)

R A *firm* may apply the equity method to the following equity *derivative* or *company issued warrant* positions:

- (a) an *exchange* traded or OTC *future* on an equity, basket of equities or equity index;
- (b) an *exchange* traded, OTC or traditional *option* on an equity, basket of equities, or narrow-based equity index provided the *option* is *in the money* by at least the equity method 1 *PRA* appropriate to the underlying instrument, shown in Appendix 49;
- (c) an *exchange* traded or OTC *option* on a broad-based equity index, provided the *option* is at least 8% *in the money*;
- (d) a position in a *company issued warrant* which is *in the money* by at least the equity method 1 *PRA* appropriate to the underlying equity, shown in Appendix 49;
- (e) a synthetic long or short position in an equity, basket of equities or equity index, which may be treated as a *future* on that instrument, provided that:
 - (i) the synthetic long consists of a long call *option* and a short put *option* on the same underlying instrument with the same maturity dates and strike prices; and
 - (ii) the synthetic short position consists of a short call *option* and a long put *option* on the same underlying instrument with the same maturity dates and strike prices; and
 - (iii) if the *options* do not entitle the holder to dividends, the *firm* must be able to demonstrate that the underlying instrument is unlikely to go ex-dividend over the *option* period;

G (f) A *firm* that wishes to apply this method to the notional positions arising from risk assessment models for *options* should apply for the relevant modification or waivers from the *FSA*.

G (g) A *firm* that wishes to apply this method to any other equity *derivative* should apply for the relevant modification or waivers from the *FSA*.

10-82 **CALCULATION OF EQUITY EQUIVALENT POSITIONS**

General rule

- 10-82 (1)** **R** **(a)** **Provided the *firm* is permitted, and has chosen, to apply the equity method to an equity *derivative*, a *convertible*, or a *company issued warrant*, it must derive an equity equivalent position in accordance with this rule.**
- (b)** **Where a *firm* includes an actual or notional position arising from a *forward*, *future* or *option* on an equity, basket of equities, equity index or *company issued warrant*, in equity method 1, 2, 3 or 4 an additional *PRR* must be calculated in accordance with rule 10-86 to cover the interest rate risk.**

Convertibles

- 10-82(2)** **R** **(a)** **The equity equivalent position is the *mark to market* value of the equity underlying the *convertible*.**
- (b)** **Where a *firm* treats a *convertible* under the equity method, an adjustment shall be made to the *PRR* which shall be:**
- (i) an addition equal to any loss on conversion; or**
- (ii) a deduction equal to any profit on conversion, subject to a maximum deduction which would reduce the *PRR* of the net position of all underlying and equivalent positions to zero.**

Options on equities

- 10-82(3)** **R** **Subject to (4) below, a *firm* must take the equity equivalent position of an *option* on an equity to be the *mark to market* value of the underlying equity.**

Options on equities, baskets of equities and equity indices treated under risk assessment models

- 10-82(4) **G** **A *firm* that wishes to use a risk assessment model in respect of its equity and equity index *options* to calculate equity equivalent positions which may be included in the equity method will need to seek the appropriate modification or waivers from the *FSA*.**
- G** **The *FSA* will consider an application for a modification or waiver provided the model forms part of the day to day management supervision of the *firm's options* business and meets other criteria. Further guidance on the criteria for the review of such models can be obtained from the *FSA*.**

Futures and options on a single country equity basket or index

- 10-82(5) R **A firm must treat the *mark to market* value of a notional equity portfolio underlying a basket of equities or equity index, where the constituent equities are from one country, as either:**

- (a) a single equity equivalent position; or
- (b) notional positions in the constituent equities.

Futures and options on a multiple country equity basket or index

- 10-82(6) R **A firm must split the *mark to market* value of a notional equity portfolio underlying a basket of equities or equity index whose constituents are from more than one country into either:**

- (a) a number of single equity equivalent positions, one for each of the countries which is represented in the index, in the proportion of that country's representation in the index; or
- (b) notional positions in all the constituent equities.

- G Where a *firm* chooses to treat a basket of equities or equity index as a single equity equivalent position, rather than breaking it down into the constituent stocks, it should apply the *PRA* for a single stock of the appropriate category unless the number and nature of the constituent equities are such that the basket or index is broad-based and will behave as "the market". In such circumstances the position will attract zero specific risk. Where a *firm* is in any doubt it should apply the single stock weight and consult the *FSA*.

Options

- 10-82(7) R **A firm must treat a purchased call *option* or written put *option* as a long equity equivalent position and a purchased put *option* or written call *option* as a short equity equivalent position.**

Company issued warrants

- 10-82(8) R **Subject to (9) below, a firm must derive the equity equivalent position of a position in a *company issued warrant* as the *mark to market* value of the underlying equity.**

Equity warrant alternative method

- 10-82(9) G A *firm* which is a significant dealer in *company issued warrants* may use an alternative method to calculate *PRR*, the details of which are available from the *FSA* on request, provided it obtains the relevant modification or waivers from the *FSA*.

- G If it grants approval, the *FSA* would generally expect a *firm*:
- (a) consistently to hold positions in not less than 100 *company issued warrant* issues of the country for which the *firm* wishes to apply the method; and

(b) to have a well diversified *company issued warrant* book, such that no single trading position amounts to 10% or more of the relevant book and the largest 20 issues do not exceed 60% of the relevant book by *mark to market* value.

G However, the *FSA* will consider relaxing these numbers if it is satisfied that they would be excessive in relation to the total number of traded *company issued warrant* issues of a particular country and that the *firm's* business is spread over a sufficient number of issues to justify the use of the alternative method.

10-83 NETTING OF EQUITY AND EQUITY EQUIVALENT POSITIONS BEFORE APPLYING THE EQUITY METHOD

Netting of positions

10-83(1) R A *firm* may net a long against a short position only where the positions are in the same actual instrument (including equity equivalent positions arising from *convertibles, derivatives* and *company issued warrants* in respect of that instrument).

Netting of tranches

10-83(2) R A *firm* may net a long position in one tranche of a *security* against a short position in another tranche of the same *security* only where the relevant tranches:

(a) rank pari passu in all respects; and

(b) become fungible within 180 days and thereafter the *securities* of one tranche can be delivered in settlement of the other tranche.

10-84 CATEGORISATION OF EQUITY POSITIONS

General rule

10-84(1) R A *firm* must separate its equity and equity equivalent positions included in the equity method by country.

Depository receipts

10-84(2) R A *firm* must allocate a share represented by a depository receipt to the same country as the underlying share.

10-85 **CALCULATION OF PRR UNDER THE EQUITY METHOD**

General rule

10-85(1) **R** **A *firm* which is permitted to apply the equity method to a position may choose whether to apply equity method 1, 2, 3 or 4 to that position, except that:**

- (a) a *firm* may apply equity method 2, 3 or 4 only to those positions in a country portfolio which individually do not exceed 20% of the gross value of that country portfolio; and**
- (b) where a position exceeds 20% of the gross value of the country portfolio, the amount up to 20% may be treated under equity method 2, 3 or 4 but the excess amount shall be restricted to equity method 1; and**
- (c) a *firm* may apply only one of equity methods 2 and 3; and**
- (d) a *firm* may apply equity method 4 only to portfolios in qualifying countries.**

Total equity method PRR

10-85(2) **R** **A *firm* must calculate the equity method *PRR* as the sum of:**

- (a) the *PRR* for positions for which equity method 1 is used; and**
- (b) the *PRR* for positions for which equity method 2 is used; and**
- (c) the *PRR* for positions for which equity method 3 is used; and**
- (d) the *PRR* for positions for which equity method 4 is used; and**
- (e) the interest rate add-on for *derivatives*.**

10-86 **CALCULATION OF INTEREST RATE ADD-ON FOR DERIVATIVES**

10-86(1) **R** **Where a *firm* includes an actual or notional position in an “equity derivative” in the equity method, an additional *PRR* must be calculated to cover the interest rate risk, using one of the methods described in this rule.**

10-86(2) **R** **An “equity derivative” is a *forward, future, option or company issued warrant* on an equity, basket of equities, or equity index.**

10-86(3) R The add-on to cover interest rate risk must be calculated before any netting which is permitted under rule 10-83.

Basic method

10-86(4) R A *firm* must calculate the interest rate risk of each underlying instrument for each expiry date separately, as follows:

- (a) multiply the *mark to market* value of the position in the notional equity or equity portfolio underlying the *derivative* contract by the percentage in the table below; and
- (b) where the amount calculated in (a) is negative, the sign must be reversed; and
- (c) the results must be aggregated to form the total interest rate add-on.

R TABLE 10-86(4)

Time to expiry	Percentage
0-3 months	0.20
3-6 months	0.40
6-12 months	0.70
1-2 years	1.25
2-3 years	1.75
3-4 years	2.25
4-5 years	2.75
over 5 years	3.75

Alternative method

- 10-86(5)** **R** **For each position in an “equity derivative”, a *firm* must include in its interest rate method calculations a notional government bond, in accordance with rule 10-101(12).**

Modelling method

- 10-86(6)** **G** *A firm* that wishes to use another method of calculating the interest rate risk of “equity derivatives” will need to seek the relevant modification or waivers from this rule from the FSA; in general, a modification or waiver permitting a *firm* to use another method will only be given where a *firm* has been granted a modification or waiver permitting use of a risk assessment model in respect of “equity derivatives”.

10-87 **EQUITY METHOD 1**

Method

- 10-87(1)** **R** **A *firm* must calculate the *PRR* for each country as the aggregate of the *mark to market* value of the positions multiplied by the equity method 1 *PRA* appropriate for the country, as shown in Appendix 49.**

Total

- 10-87(2)** **R** **A *firm* must sum the results for each country to arrive at the *PRR* for positions for which equity method 1 is used.**

10-88 **EQUITY METHOD 2**

- 10-88(1)** **R** **A *firm* must calculate the equity method 2 *PRR* on a country by country basis as the sum of the specific risk and the general market risk, as set out in (2) to (4) below.**

Specific risk

- 10-88(2)** **R** **For each country, the equity method 2 specific risk *PRR* is calculated as the aggregate of the *mark to market* value of positions treated under equity method 2 multiplied by the appropriate specific risk *PRA* shown in Appendix 49.**

General market risk

- 10-88(3)** **R** **For each country, a *firm* must calculate the equity method 2 general market risk *PRR* in the following way:**
- (a) each position shall be multiplied by the appropriate general market risk *PRA* shown in Appendix 49;**
 - (b) the results in (a) shall be netted; and**
 - (c) where the amount in (b) is negative, the sign must be reversed.**

Total

- 10-88(4)** **R** **A *firm* must sum the results for each country portfolio to arrive at the *PRR* for positions for which equity method 2 is used.**

10-89 **EQUITY METHOD 3**

- 10-89(1)** **R** **Where a *firm* chooses to use equity method 3 it must calculate the equity method 3 *PRR* as the higher of:**
- (a) calculation 1 - the result of applying rules (2) to (7) below; and**
 - (b) calculation 2 - the result of applying rules (8) to (10) below.**

Calculation 1

- 10-89(2)** **R** **(a) A *firm* must allocate positions on the basis of the categories set out in Appendix 50, calculate a *PRR* in respect of each country portfolio separately, and aggregate the results.**
- (b) A *firm* must calculate the *PRR* for a country portfolio as:**

$$\left[\begin{array}{c} \text{aggregate long} \\ \text{positions} \end{array} + \begin{array}{c} \text{aggregate short} \\ \text{positions} \end{array} \right] \times \text{Column 1 } \mathbf{PRA} \text{ in Appendix 50}$$

unless the country portfolio is an “eligible country portfolio”, as defined below, in which case the *firm* must calculate the *PRR* for that country portfolio as:

$$\frac{\sqrt{\text{(basic risk x liquidity adjustment factor)}}}{100}$$

(c) Notwithstanding (a) and (b) above, a *firm* may calculate the *PRR* in respect of a UK, US or Japan “eligible country portfolio” as:

$$\frac{\sqrt{\text{(modified basic risk x modified liquidity adjustment factor)}}}{100}$$

G No benefit will be derived under (c) unless the *firm* has “eligible country portfolios” in at least two of the three countries mentioned.

Eligible country portfolio

10-89(3)

- R (a) A *firm* may only include in an “eligible country portfolio” positions in those categories of equity which have a figure in columns 2 and 3 of Appendix 50.
- (b) An “eligible country portfolio” means:
- (i) a UK, US or Japan country portfolio which contains at least 10 long or 10 short positions; or
 - (ii) for any other country listed in section D of Appendix 50, a portfolio of equities which:
 - (aa) comprises constituents of the FT-Actuaries World Indices; and
 - (bb) contains at least 5 long or 5 short positions.

Basic risk calculation

10-89(4)

- R (a) Calculate the square of the net *mark to market* value (i.e. long positions less short positions) of the “eligible country portfolio”.
- (b) Multiply the figure in (a) above by the appropriate figure in column 3 of Appendix 50.
- (c) Calculate the square of the value of each position, excluding positions arising from broad-based equity index contracts, and total the squared amounts for each country.

- (d) Multiply the total calculated under (c) above by the appropriate figure shown in column 2 of Appendix 50 and add the figure calculated in (b) to obtain the basic risk of the “eligible country portfolio”.

Liquidity adjustment factor

10-89(5)

- R** A firm must calculate the liquidity adjustment factor for the UK, US and Japan country portfolios as follows (for other “eligible country portfolios” the liquidity adjustment factor is 1):
- (a) calculate the aggregate *mark to market* value (i.e. long positions plus short positions) of each category and the aggregate *mark to market* value of the “eligible country portfolio”;
- (b) calculate in respect of the relevant aggregate *mark to market* values the following proportions:
- A the constituents of the FT-SE 100 Index category portfolio as a proportion of the UK “eligible country portfolio”;
- B the FT All-Share Index category, excluding FT-SE 100 stocks, as a proportion of the UK “eligible country portfolio”;
- C the constituents of the Nikkei 225 Index category portfolio as a proportion of the Japan “eligible country portfolio”; and
- D the constituents of the Standard & Poor’s 500 Index category portfolio as a proportion of the US “eligible-country portfolio”;
- (c) for each of the US and Japan “eligible country portfolios”, the liquidity adjustment factor is the result of the following calculation performed separately for each country (the reference to “proportion” is as calculated in (b) above):

$$\frac{6}{(\text{proportion} \times 4) + 2}$$

- (d) for the UK “eligible country portfolio”, the liquidity adjustment factor is calculated as:

$$\frac{6}{(\text{proportion A} \times 4) + 2 + \text{proportion B}}$$

Modified basic risk calculation

- 10-89(6)** **R** (a) For each “eligible country portfolio” calculate the basic risk of the portfolio as in (4) above and add the figures for such portfolios together.
- (b) Calculate the net *mark to market* value (i.e. long positions less short positions) for each “eligible country portfolio”, and multiply the net *mark to market* value for pairs of countries by each other, and then by the factor shown below (there will be one pair where two countries are included and three pairs where three countries are included).

TABLE 10-89(6)

Net mark to market values relating to	Factor
UK & US	17
UK & Japan	11
US & Japan	11

- (c) The modified basic risk figure is the total of the figure calculated under (a) above and the those calculated in (b) above.

Modified liquidity adjustment factor

- 10-89(7)** **R** **A firm must calculate the modified liquidity adjustment factor for UK, US and Japan “eligible country portfolios” as follows:**
- (a) calculate the total of the aggregate *mark to market* values (i.e. long positions plus short positions) of all “eligible country portfolios” to obtain the aggregate *mark to market* value;
- (b) calculate the aggregate *mark to market* values of each of the following portfolios as a proportion of the amount calculated in (a) above:
- A** the portfolio comprising the FT-SE 100 Index category portfolio, the Nikkei 225 Index category portfolio and the Standard & Poor’s 500 Index category portfolio; and
- B** the FT All-Share Index category portfolio, excluding FT-SE 100 stocks;
- (c) the modified liquidity adjustment factor is:

$$(\text{proportion A} \times 4) + 2 + \text{proportion B}$$

Calculation 2

- 10-89(8)** **R** **A firm must calculate the equity method 3 PRR on a country by country basis as the sum of the specific risk and the general market risk, as set out in (9) and (10) below, and sum the results across all countries.**

Specific risk

- 10-89(9)** **R** **For each country, the equity method 3 specific risk PRR is calculated as the aggregate of the *mark to market* value of positions treated under equity method 3 multiplied by the appropriate specific risk PRA shown in Appendix 49.**

General market risk

- 10-89(10)** **R** **(a) For each country, the equity method 3 general market risk PRR is calculated as the net *mark to market* value of the portfolio multiplied by 8%; and**
- (b) where the amount in (a) is negative, the sign must be reversed.**

10-90 **EQUITY METHOD 4**

- 10-90(1)** **R** **A firm must calculate the equity method 4 PRR as the sum of the specific risk and the general market risk, as set out in (2) to (5) below.**

Specific risk

- 10-90(2)** **R** **For each qualifying country portfolio, the equity method 4 specific risk PRR is calculated as the aggregate of the *mark to market* value of positions treated under equity method 4 multiplied by the appropriate specific risk PRA shown in Appendix 49.**

General market risk

10-90(3) R **A firm must calculate the equity method 4 general market risk *PRR* as the sum of:**

- (a) the *PRR* for the combined general market risk; and**
- (b) the *PRR* for the residual general market risk.**

Combined general market risk

10-90(4) R **A firm must calculate the combined general market risk as follows:**

- (a) for each country, multiply the net *mark to market* value of the portfolio by 8% to obtain the risk-weighted position; and**
- (b) subject to the criteria listed in (i) to (iii) below, calculate a combined general market risk *PRR* for these portfolios as:**

$$\sqrt{\omega_i^2 + \omega_j^2 + \omega_k^2 + \Lambda + \omega_m^2}$$

where each ω_i represents the risk-weighted position for a single country portfolio; provided that:

- (i) the calculation includes at least four qualifying country portfolios;**
- (ii) the risk-weighted position of each country portfolio does not exceed 30% of the total of the risk-weighted positions in the calculation; and**
- (iii) the sum of the risk-weighted positions equals 0 (i.e., $\Sigma\omega = 0$), where overall long positions in a country portfolio have a positive sign and overall short positions have a negative sign.**

Residual general market risk

10-90(5) R **For all risk-weighted positions in a country portfolio not included in the calculation in (4) above, a firm must calculate the combined general market risk as the aggregate of the risk-weighted positions.**

TREATMENT OF EQUITY DERIVATIVES OUTSIDE THE EQUITY METHOD

Types of positions to be included under the equity derivatives method

- 10-91 R** **A firm must apply the equity derivatives method to a position of any of the following types, except to the extent that the firm is required, or is permitted and chooses, to apply the equity method to the position:**
- (a) a *future* or *option* on an equity, basket of equities or equity index;**
 - (b) a *tender offer* on an equity, which must be treated as a written *option* on the equity under 10-93(4) below;**
 - (c) an equity position hedging an *option* or *company issued warrant* on that equity (provided the equity is of a type suitable to satisfy delivery), up to a maximum of the extent to which the nominal amount of the equity is matched by the nominal amount of the equity underlying the *option* or *company issued warrant*;**
 - (d) an equity leg of an equity *swap* based on the change in value of an equity, a basket of equities or an equity index; and**
 - (e) a *company issued warrant*.**

Total equity derivatives method PRR

- 10-92 R** **A firm must calculate the total equity derivatives method PRR as the sum of:**
- (a) the PRR for positions for which the hedging method is used;**
 - (b) the PRR for positions for which the margin requirement method is used;**
 - (c) the PRR for positions for which the basic method is used; and**
 - (d) the interest rate add-on for derivatives.**

10-93 Alternative methods

Summary of alternative methods

- 10-93(1) R** **A firm must apply one of the methods outlined in the following table:**

TABLE 10-93(1) - Equity derivative positions: alternative methods

1	<p>Hedging method</p> <p>(a) In respect of an equity hedging an <i>option</i> or <i>company issued warrant</i> on that equity, a <i>firm</i> may choose to apply the hedging method under (2) below to the equity and the related <i>option</i> or <i>company issued warrant</i> to the extent that the nominal amount of the equity underlying the <i>option</i> or <i>company issued warrant</i> matches the nominal amount of the equity.</p> <p>(b) To the extent that the nominal amount of the equity exceeds the nominal amount of the equity underlying the <i>option</i> or <i>company issued warrant</i>, a <i>firm</i> must apply the equity method</p>
2	<p>Margin requirement method</p> <p>Where an exchange listed in Appendix 51 has a positive initial margin requirement, a <i>firm</i> may apply the margin requirement method under (3) below to any <i>derivative</i> traded on that exchange.</p>
3	<p>Basic method</p> <p>Where a <i>firm</i> is not permitted, or chooses not to apply any other available method, it must treat equity <i>derivatives</i> under the basic method, as set out in (4) below.</p>

Hedging method

- 10-93(2) R **When using the hedging method for an equity hedging an *option* or *company issued warrant* on that equity, a *firm* must calculate the *PRR* for the equity position and the *option* or *company issued warrant* position in accordance with the provisions of Appendix 52.**

Margin requirement method

- 10-93(3) R (a) **A *firm* may apply the margin requirement method to a *derivative* which is traded on an exchange listed in Appendix 51, provided that the exchange charges a positive initial margin requirement.**
- (b) **When using the margin requirement method for an exchange traded *derivative* on an equity or equity index, a *firm* must:**
- (i) **take 100% of the initial margin requirement of the exchange; and**
- (ii) **multiply the result by the factor shown in Appendix 51.**
- (c) **Where the exchange calculates the margin requirement on an overall basis, or offsets *futures* and *options* in the margin calculation, this may be taken into account.**

Basic method

- 10-93(4) R When using the basic method for a *future, option or company issued warrant* on an equity, basket of equities or equity index, a *firm* must calculate the *PRR* as:
- (a) a purchased *option* or a long *company issued warrant* position: the *PRR* must be the equity equivalent position multiplied by the appropriate *PRA*, but the result may be limited to the *mark to market* value of the *option or company issued warrant*;
 - (b) a written *option*: the *PRR* must be the equity equivalent position underlying the *option* multiplied by the appropriate *PRA*, reduced by any excess of the exercise value over the *mark to market* value of the underlying instrument in the case of a call *option* or vice versa for a put *option*, but limited to nil if it would otherwise be negative;
 - (c) a short *company issued warrant* position: the *mark to market* value of the equity underlying the *company issued warrant* multiplied by the equity method 1 *PRA* for the underlying equity; and
 - (d) an OTC *future* or an equity or equity index: the *PRR* must be the equity equivalent position multiplied by the appropriate *PRA*.

Calculation of equity equivalent positions

- 10-93(5) R A *firm* must derive the amount of the equity equivalent position as follows:
- (a) a *future or option* on an equity index: the *mark to market* value of the underlying contract;
 - (b) an *option* on an equity: the *mark to market* value of the underlying equity; and
 - (c) an equity *swap*: the nominal value of the equity *swap*.

Appropriate *PRA* for basic method

- 10-93(6) R A *firm* must determine the appropriate *PRA* for the basic method as follows:
- (a) a *future, option or swap* on a single stock: the *PRA* is the equity method 1 *PRA* applicable to the underlying instrument;
 - (b) a *future, option or swap* on a basket of equities or narrow-based equity index: the *PRA* is the equity method 1 *PRA* applicable to an appropriate equity position; and

(c) a *future, option* or *swap* on a broad-based equity index: the *PRA* is 8%.

10-94 Calculation of interest rate add-on for derivatives

10-94(1) R Where a *firm* includes an actual or notional position in an “equity derivative” in the equity derivatives method an additional *PRR* must be calculated to cover the interest rate risk, using one of the methods described in this rule.

10-94(2) R An “equity derivative” is a *forward, future, option* or *company issued warrant* on an equity, basket of equities, or equity index.

Basic method

10-94(3) R A *firm* must calculate the interest rate risk of each underlying instrument for each expiry date separately, as follows:

- (a) multiply the *mark to market* value of the position in the notional equity or equity portfolio underlying the *derivative* contract by the percentage in the table below;
- (b) where the amount calculated in (a) is negative, its sign should be reversed; and
- (c) the results must be aggregated to form the total interest rate add-on.

R Table 10-94(3)

Time to expiry	Percentage
0-3 months	0.20
3-6 months	0.40
6-12 months	0.70
1-2 years	1.25
2-3 years	1.75
3-4 years	2.25
4-5 years	2.75
over 5 years	3.75

Alternative method

- 10-94(4) R For each position in an “equity derivative”, a *firm* must include in its interest rate method calculations a notional government bond, in accordance with rule 10-101(12).**

Modelling method

- 10-94(5) G *A firm* that wishes to use another method of calculating the interest rate risk of “equity derivatives” will need to seek a modification or waiver from this rule from the *FSA*; in general, a modification or waiver permitting use of another method will only be given where a *firm* has been granted a modification or waiver permitting use of a risk assessment model in respect of “equity derivatives”.

INTEREST RATE METHOD

- 10-100** Types of positions to be included in the interest rate method

Securities, cash borrowings, qualifying deposits, and repurchase and similar agreements

- 10-100 (1) R A *firm* must apply the interest rate method to the following *trading book* positions (whether or not *forward* positions):**

- (a) a debt security;**
- (b) a non-convertible preference security;**

- (c) an interest rate exposure embedded in a financial instrument; and
- (d) a cash borrowing or a *qualifying deposit*, whether secured or unsecured,

except for:

- (e) an offering of debt *securities*, to the extent that the issuing market method applies;
- (f) a *qualifying debt security* hedging an *option* or *company issued warrant*, where the *qualifying debt security* is of a type suitable for delivery to satisfy the *option* or *warrant*, and up to a maximum of the extent to which the nominal amount of the debt is matched by the nominal amount of the debt underlying the *option* or *warrant*, which may at the discretion of the *firm* be treated under rule 10-111(2);
- (g) a *tender offer* as principal on a debt *security*, which must be treated as an *OTC option* under the interest rate *derivatives* method;
- (h) a cash borrowing or *qualifying deposit*, whether secured or unsecured, with a residual maturity of less than one month, which may be treated in accordance with rule 10-41(7)(c); and
- (i) a *material holding* in a *credit* or *financial institution* which must be treated in accordance with rule 10-61(7).

- G The 'residual maturity' may be determined with reference to the time of the next interest rate fixing, if this is earlier than the repayment date.

Convertibles

- 10-100 (2) R A *firm* may apply the interest rate method to a *convertible* only where permitted to do so under rule 10-81(2).

Dual currency bonds

- 10-100 (4) R A *firm* must derive two positions in respect of a dual currency bond as follows:
 - (a) a debt *security* denominated in the currency in which the dual currency bond is issued which must be treated under the interest rate method; and
 - (b) a *forward* contract for the purchase of the redemption currency which must be treated under rule 10-101(11) below, and is also subject to a foreign exchange requirement.

Obligatory inclusion of debt and interest rate derivatives

- 10-100 (5) R** **A firm must apply the interest rate method to a position in the following interest rate *derivatives*:**
- (a) an *OTC future* which relates to a notional or actual *qualifying debt security* or interest rate;**
 - (b) an *FRA* or other *contract for differences* (including *swaps* other than *equity swaps*) whose values are based on generally available interest rates;**
 - (c) a forward foreign exchange position (see rule 10-101(11));**
 - (d) a currency future; and**
 - (e) an interest rate leg of an *equity swap* (see rule 10-81(3)).**

Optional inclusion of debt and interest rate derivatives

- 10-100 (6) R** **A firm may apply the interest rate method to a position in the following interest rate *derivatives*:**
- (a) an exchange traded *future* which relates to an interest rate or to a notional or actual *debt security*;**
 - (b) an exchange traded *option* which relates to a notional or actual *debt security* or an interest rate, or to an exchange traded *future* which would meet the requirements of (a) above, provided the contract is *in the money* by more than the appropriate *PRA*;**
 - (c) an *OTC option* which relates to a notional or actual *qualifying debt security* or an interest rate, or to an exchange traded *future* which meets the requirements of (a) above, provided the contract is *in the money* by more than the appropriate *PRA*;**
 - (d) an *option* on a *swap* provided the *option* is *in the money* by more than the *PRA* on a *government security* in the relevant currency with maturity equal to the length of the *swap*;**
 - (e) a *company issued warrant* which relates to a *qualifying debt security*, provided the *warrant* is *in the money* by more than the appropriate *PRA*;**
 - (f) a synthetic long or short position in a *debt security*, which may be treated as a *future* on that instrument, provided that:
 - (i) the synthetic long consists of a long call *option* and a short put *option* on the same underlying instrument with the same maturity dates and strike prices; and****

(ii) **the synthetic short position consists of a short call *option* and a long put *option* on the same underlying instrument with the same maturity dates and strike prices.**

- G (g) A *firm* that wishes to include the notional positions arising from risk assessment models for *swaps* or *options* (see rule 10-101(2)) will need to seek the relevant modification or waivers from the *FSA*.

Optional inclusion of interest rate component of equity derivatives

10-100 (7) R A *firm* may apply the interest rate method to calculate the interest rate risk *PRR* on its positions in equity *derivatives*.

Appropriate *PRA*

10-100 (8) R A *firm* must determine the appropriate *PRA* in (6) above using the following principles:

- (a) **in the case of an *option* or a *future* or a *company issued warrant* on an actual or notional debt *security*, the appropriate *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* attributable to the underlying debt *security*;**
- (b) **in the case of an *option* on a *future*, where the *future* relates to an actual or notional debt *security*, the appropriate *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* attributable to that debt *security*; and where the *future* relates to an interest rate, the appropriate *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* attributable to a government *security* of the same currency and maturity as the notional deposit underlying the contract.**

10-101 Calculation of debt equivalent positions for derivatives

General rule

10-101 (1) R Provided the *firm* is permitted to apply the interest rate method to an interest rate *derivative*, it must use this rule to derive the debt equivalent amount in accordance with 10-101(3) to 10-101(15).

Risk assessment models

10-101 (2) G A *firm* may seek a modification or waiver from 10-101(1) from the *FSA* to permit the *firm* to use a risk assessment model in respect of its *swaps*, *FRAs*, *caps* and *floors*, *options* on *swaps* or debt *options* to calculate debt equivalent positions which may be included in the interest rate method, provided the model forms part of the day to day management supervision of the *firm's* business and meets other criteria

- G Further guidance on the criteria for the review of such models can be obtained from the *FSA*.

Options on debt securities

10-101 R An *option* on a debt *security* or interest rate must be included in the interest rate method:

(3)

- (a)** in the case of an *option* on a debt *security*, as a position in that debt *security*, with a value equal to the *mark to market* value of the underlying *security*; and
- (b)** in the case of an *option* on an interest rate, as a position in a zero coupon government *security*, with value equal to the quantity underlying the *option*, and maturity equal to the sum of the time to expiry of the *option* and the length of the period for which the interest rate is fixed;

and which:

- (c)** must be a long debt equivalent position in the case of a purchased call *option* or a written put *option*; and
- (d)** must be a short debt equivalent position in the case of a purchased put *option* or a written call *option*.

Futures on interest rates

10-101 R For each position in a *future* on an interest rate, a *firm* must include in the interest rate method a notional long debt equivalent position and a notional short debt equivalent position in a zero coupon government *security* with the following maturities:

(4)

- (a)** where the *firm* has fixed the rate of interest it will pay at some time in the future (for example, it “sells” an interest rate *future* or “buys” an *FRA*):
 - (i)** the notional short position has a maturity equal to the time to expiry of the *future* plus the maturity of the borrowing period; and
 - (ii)** the notional long position has a maturity equal to the time to expiry of the *future*; and
- (b)** where the *firm* has fixed the rate of interest it will receive at some time in the future:
 - (i)** the notional short position has a maturity equal to the time to expiry of the *future*; and
 - (ii)** the notional long position has a maturity equal to the time to expiry of the *future* plus the maturity of the deposit period.

Options on futures on interest rates

- 10-101 (5) R** **An *option* on a *future* on an interest rate must be included in the interest rate method as a position in the *future*, as described in (4) above.**

Forwards and futures on debt securities

- 10-101 (6) R** **For each position in a *forward* or *future* on a debt security, a firm must include in the interest rate method a notional long debt equivalent and a notional short debt equivalent position of a type and maturity as follows:**

(a) where the *firm* has bought the *future*:

- (i) a long position in the underlying security, or where the contract is satisfied by delivery of a range of securities, the cheapest to deliver; and**
- (ii) a short position in a zero coupon government security with maturity equal to the time to expiry of the *futures* contract; and**

(b) where the *firm* has sold the *future*:

- (i) a short position in the underlying security, or where the contract is satisfied by delivery of a range of securities, any deliverable security; and**
- (ii) a long position in a zero coupon government security with maturity equal to the time to expiry of the *futures* contract.**

Options on futures on debt securities

- 10-101 (7) R** **An *option* on a *future* on a debt security must be included in the interest rate method as a position in the *future*, as set out in (6) above.**

Futures and options based on an index of prices

- 10-101 (8) R** **Where the settlement amount of a *future* or *option* is based on an index of the prices of a range of notional or actual debt securities, the *firm* must treat the contract as the notional position in the longest of these securities.**

Options on interest rate and currency swaps

- 10-101 (9) R** **For a position in an *option* on an interest rate or currency swap, a firm must apply the interest rate method to a notional position in a government security with a maturity equal to that of the swap, which:**

- (a) must be a short position if on exercise the *firm* is committed to pay fixed rate interest and a long position if the *firm* is entitled to receive fixed rate interest;
- (b) has a coupon equal to that rate of interest; and
- (c) has a value equal to the principal amount of the *swap*.

Interest rate and currency swaps

- 10-101 (10) R** Where a *firm* enters into an interest rate or currency *swap*, it must treat each leg of the *swap* as a notional position in a government *security* in the currency concerned, which:
- (a) must be a long position if the *firm* is receiving interest and a short position if the *firm* is paying interest,
 - (b) has maturity:
 - (i) in the case where the *firm* is paying or receiving fixed rate interest, equal to the length of the *swap*; and
 - (ii) in the case where the *firm* is paying or receiving floating rate interest, equal to the period remaining to the next interest rate reset date; and
 - (c) has a coupon equal to the rate of interest payable or receivable on the leg.

Forward foreign exchange and currency futures

- 10-101 (11) R** Where a *firm* enters into a forward foreign exchange or currency futures contract, it must treat the position for the purpose of calculating interest rate risk as two notional zero coupon government *securities* in the currencies concerned, which:
- (a) must be a long position for the currency purchased and a short position for the currency sold; and
 - (b) must have a maturity date equal to the settlement date of the contract.
- G Forward foreign exchange positions and currency futures must also be included in a *firm*'s calculation of its *FER*.

Equity Derivatives

- 10-101 (12) R** (a) Where a *firm* has chosen to use the interest rate method to calculate the interest rate risk on an “equity derivative”, it must create for each position a notional position in a zero coupon government security in the currency concerned with value equal to the *mark to market* value of the notional equity position underlying the contract which:
- (i) must be a short position if the notional equity position underlying the contract is a long position and a long position if the notional equity position underlying the contract is a short position; and
 - (ii) has maturity equal to the expiry of the “equity derivative” contract.
- (b) An “equity derivative” is a *forward, future, option or company issued warrant* on an equity, basket of equities, or equity index.

Offerings of debt securities

- 10-101 (13) R** Where a *firm* has chosen to use the interest rate method to calculate the general market risk *PRR* on an offering of debt *securities* in accordance with rule 10-133(4), it must include its net commitment as a long position in the *security* concerned.

Cash legs of repurchase and similar agreements

- 10-101 (14) R** (a) For each forward cash leg of a “repurchase or similar agreement”, a *firm* must include in the interest rate method a notional debt equivalent position in a government *security* in an amount equal to the *mark to market* value of the cash position, with maturity equal to the maturity date under the agreement and a sign as follows:
- (i) where the forward leg represents a purchase of the underlying *security or physical commodity*, a short position; and
 - (ii) where the forward leg represents a sale of the underlying *security or physical commodity*, a long position.
- (b) “Repurchase or similar agreement” means a *repurchase, reverse repurchase, securities or physical commodities lending, securities or physical commodities borrowing, sale and buy back, buy and sale back, undocumented sale and buy back, or undocumented buy and sale back agreement*.

- G The coupon attributable to the debt equivalent position should be determined by the number of payments remaining: if the next interest payment date coincides with the maturity date, the coupon should be zero; otherwise, the coupon on the debt equivalent position should be the same as the interest rate on the underlying agreement.

Cash borrowings and qualifying deposits

- 10-101 (15) R** **A cash borrowing or *qualifying deposit* must be included in the interest rate method as a notional debt equivalent position in a zero coupon government *security*, whose value is equal to the *mark to market* value of the relevant position, whose maturity coincides with that of the earlier of the next interest rate fixing date and the maturity of the borrowing or deposit, and which must be:**

- (a) a long position in the case of a *qualifying deposit*; and
- (b) a short position in the case of a cash borrowing.

10-102 Netting

Netting of positions

- 10-102 (1) R** **Subject to (3) and (4) below, a *firm* may net a long against a short position only where the positions are in the same actual instrument (including debt equivalent positions arising from *convertibles*, *derivatives* and *company issued warrants* in respect of that instrument).**

Netting of tranches

- 10-102 (2) R** **A *firm* may net a long position in one tranche of a *security* against a short position in another tranche of the same *security* only where the relevant tranches:**

- (a) rank *pari passu* in all respects; and
- (b) become fungible within 180 days and thereafter the *securities* of one tranche can be delivered in settlement of the other tranche.

Netting of notional securities arising from swaps, FRAs, futures and options on interest rates and debt securities, cash borrowings, qualifying deposits, the cash legs of repurchase or similar agreements, forward foreign exchange and foreign currency futures

- 10-102 R (3)**
- (a) A firm may net notional long and short government securities arising from swaps, FRAs, futures and options on interest rates and debt securities, cash borrowings, qualifying deposits, the cash legs of “repurchase or similar agreements”, forward foreign exchange and foreign currency futures against each other, provided:**
- (i) they are in the same currency;**
 - (ii) the interest rates are within 15 basis points;**
 - (iii) (aa) if the maturity dates are less than one month, the dates are the same;**
 - (bb) if the maturity dates are between one month and one year, the dates are within seven days of each other; or**
 - (cc) if the maturity dates are over one year, the dates are within 30 days of each other;**
 - (iv) for a cash borrowing, the next interest rate refix date is within two years and repayment is within two years; and**
 - (v) for a qualifying deposit, the next interest rate refix date is within three months.**
- (b) In respect of a cash borrowing or qualifying deposit, the maturity date is the earlier of the repayment date and the next interest rate refix date.**
- (c) “Repurchase or similar agreement” means a repurchase, reverse repurchase, securities or physical commodities lending, securities or physical commodities borrowing, sale and buy back, buy and sale back, undocumented sale and buy back, or undocumented buy and sale back agreement.**

Netting of notional securities arising from futures, options and options on futures which may be satisfied by delivery of a range of securities

- 10-102 (4) R** **A firm may apply one of the following netting procedures to notional securities arising from futures, options and options on futures which may be satisfied by delivery of a range of securities:**
- (a) a firm may include the contract as though it were a position in the security which is the cheapest to deliver and thereby may net a short (or long) notional position in the cheapest to deliver against a long (or short) actual position in the cheapest to deliver; or**
 - (b) if the future or option gives rise to a short debt equivalent position, a firm may include the contract as though it were a position in any deliverable security and may net the short notional position against a long actual position in the same deliverable security, but only up to 90% of the common amount, with residual amounts being treated as separate positions within the interest rate method.**

Options on swaps

- 10-102 (5) R** **A firm must not net a debt equivalent position arising from an option on a swap against any other notional or actual position in a government security.**

Options on futures based on debt instruments

- 10-102 (6) R** **A firm may apply the same netting to a debt equivalent position arising from an option on a future based on a debt instrument as is permitted for the underlying contract.**

- 10-103** Categorisation of interest rate positions

General rule

- 10-103 (1) R** **A firm must separate its debt and debt equivalent positions included in the interest method by currency.**

Maturity bands

- 10-103 (2) R** **A firm must allocate each position to a maturity band by reference to the period remaining to:**
- (a) final maturity; or**

(b) the next call or next put date, where the *mark to market* value of the debt *security* is greater than the call value or lower than the put value respectively.

G Floating rate instruments should be allocated to maturity bands based on the time remaining to redetermination of the coupon.

10-104 Application of the interest rate method

General rule

10-104 (1) R A firm must calculate the *PRR* for each individual currency as the specific risk plus the general market risk and must aggregate the results for each currency to arrive at the total interest rate method *PRR*.

Specific risk

10-104 (2) R A firm must assign each net position to the appropriate category in Appendix 53 and apply the percentage shown to arrive at the specific risk for the position.

G The appropriate category for a floating rate instrument should be determined with reference to its maturity date.

G Where a *firm* uses the interest rate method for the purpose of calculating its general market risk *PRR* on a position in an offering of debt *securities*, the specific risk *PRR* should be calculated according to the issuing market method (rule 10-133(4)).

General market risk

10-104 (3) R (a) A firm may choose to apply the maturity-based approach or the duration-based approach in order to calculate the general market risk, but must apply the chosen method, by currency, on a consistent basis.

(b) Where a firm applies the maturity-based approach, it may choose to treat a position under method 1 or method 2.

10-105 Maturity-based approach method 1

Calculation

10-105 R A firm must calculate for each category
(1)

$$\left[\begin{array}{l} \text{aggregate} \\ \text{long} \\ \text{positions} \end{array} \right] + \left[\begin{array}{l} \text{aggregate} \\ \text{short} \\ \text{positions} \end{array} \right] \times \text{maturity-based general} \\ \text{market risk PRA for} \\ \text{category}$$

Total

10-105 R A firm must sum the results for each category to arrive at the general
(2) **market risk for positions treated under the maturity-based approach**
method 1.

10-106 Maturity-based approach method 2

Method

10-106 R A firm must apply the following procedures separately to each
(1) **currency portfolio and must then sum the resultant figures to arrive at**
the general market risk for the maturity-based approach method 2.

Price index linked debt securities

10-106 R Where a firm chooses to calculate the PRR for price index linked debt
(2) **securities with over one year to maturity under the maturity-based**
approach method 2, this must form a calculation separate from other
debt securities.

Calculation

- 10-106 R (a) Categorise positions into bands and zones on the basis of**
(3) **maturity and coupon, as set out in Appendix 53.**
- (b) Multiply the gross long and gross short positions in each**
maturity band within each category by the maturity-based
general market risk PRA for that band and that category as set
out in Appendix 53 to arrive at risk-weighted positions.

(c) Match the risk-weighted long positions against the risk-weighted short positions, as permitted in A to D below, according to the procedure described in (d) and (e) below:

A the same maturity band;

B the same zone;

C adjacent zones; and

D non-adjacent zones.

(d) Multiply one side of the common amount of the matched positions by the appropriate maturity-based matching factor set out in Appendix 53 and aggregate all the results.

(e) Aggregate all the unmatched amounts and add to the total in (d) above to arrive at the general market risk calculated under the maturity-based approach method 2 for the currency.

10-107 Duration-based approach

Method

10-107 (1) R A firm must apply the following procedures separately to each currency portfolio and must then aggregate the resultant figures to arrive at the general market risk for the duration-based approach.

Calculation

10-107 (2) R (a) Categorise all debt and debt equivalent positions into zones, as shown in the table below, on the basis of the modified duration of each instrument.

(b) Calculate the duration-weighted position of each instrument by multiplying its market value by its modified duration and by the assumed interest rate change shown in the following table (where qualifying currencies are defined in Appendix 53).

TABLE 10-107(2)(b) - Duration-based general market risk PRAs

Zone	Modified duration (in years)	Assumed interest rate change for qualifying currencies	Assumed interest rate change for other currencies
One	0-1	1%	2%
Two	1-3.6	0.85%	1.7%
Three	more than 3.6	0.7%	1.4%

(c) Match the duration-weighted long positions against the duration-weighted short positions, as permitted in A to C below, according to the procedure described in (d) and (e) below:

- A the same zone;
- B adjacent zones;
- C zone 1 and zone 3.

(d) Multiply one side of the common amount of the matched positions by the percentages shown in the following table and aggregate all the results:

TABLE 10-107(2)(d) - Duration-based general market risk matching factors

	<i>Matching factor</i>
Positions in the same zone	2%
Positions in adjacent zones	40%
Positions spanning zones 1 and 3	150%

(e) Aggregate all the unmatched amounts and add to the amount calculated under (d) above to arrive at the general market risk calculated under the duration-based approach.

TREATMENT OF INTEREST RATE DERIVATIVES OUTSIDE THE INTEREST RATE METHOD

10-110 Types of positions to be included under the interest rate derivatives method

General rule

10-110 (1) R A *firm* must apply the interest rate *derivatives* method to a position in the following debt *securities* or interest rate *derivatives*, except to the extent that the *firm* is required, or is permitted and chooses, to apply the interest rate method to the position:

- (a) an OTC *future* on a debt *security*;
- (b) an exchange traded *future*;
- (c) an *option* on a debt *security*;

- (d) an *option* on:
 - (i) a *future* on a debt security; and
 - (ii) an interest rate *future*;
- (e) an *option* on a *swap*;
- (f) a *tender offer* on a debt security, which must be treated as an OTC written *option* on the debt security;
- (g) a *qualifying debt security* hedging an *option* on:
 - (i) that *qualifying debt security*; or
 - (ii) a *future* on that *qualifying debt security*

(provided the debt security is of a type suitable to satisfy delivery of an *option* of the type held), up to a maximum of the extent to which the nominal amount of the debt security is matched by the nominal amount of the debt security underlying the *option*;
- (h) a *cap* or *floor*; and
- (i) a *company issued warrant* on a debt security.

G The *firm* may apply for a modification or waiver from the *FSA* to use a risk assessment model for its *caps* and *floors* (see 10-101(2)).

Netting

- 10-110 (2) R A *firm* must not net long and short positions except:
- (a) a position in a purchased interest rate *derivative* may be netted with a written interest rate *derivative* only where the characteristics of the two *derivatives* are identical in all respects; and
 - (b) a *firm* may net a purchased *cap* (or *floor*) against a written *cap* (or *floor*) provided they expire within 30 days of each other and all other terms are identical (*caps* may not be netted against *floors*).

10-111 Alternative methods

Summary of alternative methods

10-111 (1) R A *firm* must apply one of the methods outlined in the following table:

R TABLE 10-111(1) - Interest rate derivative positions: alternative methods

1	<p>Hedging method</p> <p>(a) In respect of a <i>qualifying debt security</i> hedging an <i>option</i> or <i>company issued warrant</i> on that <i>security</i> a <i>firm</i> may choose to apply the hedging method under 10-111(2) below to the <i>qualifying debt security</i> and the related <i>option</i> or <i>warrant</i> to the extent that the nominal amount of the debt <i>security</i> underlying the <i>option</i> or <i>company issued warrant</i> matches the nominal amount of the debt <i>security</i>.</p> <p>(b) To the extent that the nominal amount of the debt <i>security</i> exceeds the nominal amount of the debt <i>security</i> underlying the <i>option</i> or <i>warrant</i>, a <i>firm</i> must apply the interest rate method.</p>
2	<p>Margin requirement method</p> <p>Where an exchange listed in Appendix 51 has a positive initial margin requirement, a <i>firm</i> may apply the margin requirement method under 10-111(3) below to any <i>derivative</i> traded on that exchange.</p>
3	<p>Basic method</p> <p>Where a <i>firm</i> is not permitted, or chooses not to apply any other available method, it must treat interest rate <i>derivative</i> positions under the basic method, as set out in 10-111(4) below.</p>

Hedging method

- 10-111 (2) R** When using the hedging method for a *qualifying debt security* hedging an *option* or *company issued warrant* on that *security*, a *firm* must calculate the *PRR* for the debt *security* position and the *option* or *warrant* position in accordance with the provisions of Appendix 54.

Margin requirement method

- 10-111 (3) R**
- (a) A *firm* may apply the margin requirement method to a *derivative* which is traded on an exchange listed in Appendix 51, provided that the exchange charges a positive initial margin requirement.
- (b) When using the margin requirement method for an exchange traded interest rate *derivative*, a *firm* must:
- (i) Take 100% of the initial margin requirement of the exchange; and
- (ii) Multiply the result by the factor shown in Appendix 51.
- (c) Where the exchange calculates the margin requirement on an overall basis, or offsets *futures* and *options* in the margin calculation, this may be taken into account.

Basic method

- 10-111 (4) R** When using the basic method for a debt *derivative*, a *firm* must calculate the *PRR* for debt equivalent positions as follows:
- (a) a purchased *option* or long *company issued warrant* position: the *PRR* must be the *mark to market* value of the position underlying the *option* or *warrant* multiplied by the appropriate *PRA*, but the result may be limited to the *mark to market* value of the *option* or *warrant*;
 - (b) a written *option*: the *PRR* must be the *mark to market* value of the position underlying the *option* multiplied by the appropriate *PRA*, reduced by any excess of the exercise value over the *mark to market* value of the underlying instrument in the case of a call *option* or vice versa for a put *option*, but limited to nil if it would otherwise be negative;
 - (c) a short *company issued warrant*: the *PRR* must be the *mark to market* value of the bond underlying the *warrant* multiplied by the appropriate *PRA*;
 - (d) an OTC *future* on a debt *security*: the *PRR* must be the *mark to market* value of the *future* multiplied by the appropriate *PRA*;
 - (e) a *cap* or *floor*: the *PRR* must be the notional or actual amount underlying the contract multiplied by the appropriate *PRA*, but in the case of a long position the result may be limited to the *mark to market* value of the *cap* or *floor*.

Appropriate *PRA* for basic method

- 10-111 (5) R** A *firm* must determine the appropriate *PRA* for the basic method for interest rate *derivatives* as follows:
- (a) a *future* on a debt *security*: the *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* applicable to the debt *security*, as set out in Appendix 53;
 - (b) an *option* or *company issued warrant* on a debt *security* or an *option* on a *future* on a debt *security*: the *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* applicable to the debt *security*, with a maturity equal to the time to expiry of the *option*, as set out in Appendix 53;

- (c) an *option* on an interest rate or an interest rate *future*: the *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* applicable to a zero coupon government *security* in the currency concerned with a maturity equal to the sum of the time to expiry of the contract and the length of the period on which the settlement amount of the contract is calculated, as set out in Appendix 53;
- (d) an *option* on a *swap*: the *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* applicable to a zero coupon government *security* in the currency concerned with a maturity equal to the length of the *swap*;
- (e) a *cap* or *floor*: the *PRA* is the sum of the specific risk *PRA* and the maturity-based general market risk *PRA* applicable to a zero coupon government *security* in the currency concerned with a maturity equal to the remaining period of the *cap* or *floor*.

Collective investment schemes

- 10-120 **A firm must calculate the *PRR* for a position in a *collective investment scheme* as the *mark to market* value of the *firm's* aggregate position multiplied by:**
- (a) 16% in the case of an *eligible collective investment scheme*; and
 - (b) 100% in the case of any other *collective investment scheme*.

ISSUING MARKET METHOD

- 10-130 Application of issuing market method
- 10-130 R **A firm may apply the issuing market method only where, in respect of new *securities* or *securities* which are new to the market, the *firm*:**
- (1) (a) has given a commitment to an issuer to purchase, underwrite or distribute those *securities*; or
 - (b) is a member of the syndicate for the underwriting or distribution of those *securities*.
- 10-130 R **Where a *firm* is permitted, but chooses not to apply the issuing market method to a commitment, a *PRR* must be computed in respect of the net commitment under another permitted rule from the date of commencement of the commitment.**
- (2)

10-131 Types of position to be included under the issuing market method

General rule

10-131 (1) R **A *firm* which applies the issuing market method must apply it to:**

- (a) any commitment to an issuer of *securities* to purchase underwrite or distribute new *securities* and *securities* which are new to the market;**
- (b) any sub-underwriting commitment obtained by the *firm* from others; and**
- (c) any allotment, purchase or sale of the *securities* in respect of which the *firm* has given a commitment under (a) or (b) above.**

Timing

10-131 (2) R **Where a *firm* is permitted and chooses to apply the issuing market method, a *PRR* must be calculated from the date of the commencement of the commitment until six days after “working day zero”, where “working day zero” is:**

- (a) in respect of a bond issue and other issues which utilise similar underwriting processes, the later of the allotment date and the *payment date*;**
- (b) in respect of a UK domestic equity issue and other issues which utilise similar underwriting processes, the later of the subscription date and the announcement of allocations; and**
- (c) in the case of a rights issue, the first day after the subscription period has ended; and**

thereafter the *firm* must calculate *PRR* for any remaining position under other permitted methods.

G For Large exposures Monitoring (LEM) only, reporting will be from the date of the commencement of the commitment, rather than “working day zero”.

Existing securities which are exchange traded

10-131 (3) R **A *firm* may apply the issuing market method to a commitment to purchase existing *securities* which are exchange traded only if:**

- (a) the *firm* first notifies the *FSA* in writing; and**
- (b) the purchase of existing *securities* has the characteristics of an offering of new *securities* which are new to the market, by reference to:**

- (i) the extent of the publicity;
- (ii) the method of distribution;
- (iii) how widely the offering is to be made; and
- (iv) the type of documentation to be used,

in which case the seller of the *securities* for the purposes of this rule shall be treated as an issuer.

10-132 Net commitment

Calculation of net commitment

10-132 R (1) **A *firm's* net commitment is the amount of the gross commitment adjusted for:**

- (a) underwriting or sub-underwriting commitments obtained from others;
- (b) purchases and sales of the *securities*; and
- (c) allocations granted or received.

Calculation of LER

10-132 R (2) **Where a *firm* treats an underwriting commitment under the issuing market method, the net position shall be included in the calculation of *LER* from “working day zero”. For equities underwritten using the issuing market method, the method 1 *PRA* is required (10-133(1)), as detailed in Appendix 49. The *PRA* includes both specific and general risk. The general risk should be deducted from the *PRA* to give specific risk weightings for *LER* purposes.**

10-133 Calculation of PRR

General rule - equities

10-133 R (1) **The *PRR* for an issue of equities under the issuing market method shall be calculated as the net commitment multiplied by the equity method 1 *PRA* discounted by the percentage in Table 10-133(5).**

General rule - debt securities

10-133 R (2) **A *firm* may calculate the *PRR* for an issue of debt *securities* using either the basic method or the hybrid method, except that only one method may be applied to each issue.**

Basic method

- 10-133 (3) R** The *PRR* for an issue of debt *securities* under the issuing market method shall be calculated as the net commitment multiplied by the sum of the specific risk *PRA*, discounted by the percentage in Table 10-133(5), and the full maturity-based general market risk *PRA*.

Hybrid method

- 10-133 (4) R**
- (a) For the purpose of calculating general market risk *PRR*, a *firm* must include the net commitment in the interest rate method; and
 - (b) the specific risk *PRR* must be calculated as the net commitment multiplied by the appropriate specific risk *PRA*, discounted by the percentage in Table 10-133(5).

- 10-133 (5) R** TABLE 10-133(5) - Discount percentages for issuing market method

Time band	Bond issues and similar	Domestic equity issues, rights issues and similar
	Specific risk	Specific risk and general market risk
From initial commitment until "Working day zero"	100%	90%
Working day one	90%	90%
Working day two	75%	75%
Working day three	75%	75%
Working day four	50%	50%
Working day five	25%	25%
After working day five	Issuing market method no longer applies	

FOREIGN EXCHANGE REQUIREMENT

Summary of FER

10-150 R A *firm* must calculate an *FER* where it has any asset or liability or any off-balance sheet contract which is denominated in, or gives rise to an exposure in, a currency other than the currency of its books of account. For the purposes of *FER*, gold should be treated as another currency.

10-151 Types of exposures to be included in the FER

General rule

10-151 (1) R A *firm* must calculate an *FER* for the following positions, identifying each currency separately, including the currency of its books of account:

- (a) any currency *future* at the nominal value of the contract;
- (b) any *forward* contract for the purchase or sale, at the contract value, including any future exchange of principal associated with cross-currency *swaps*;
- (c) any currency *option*;
- (d) irrevocable guarantees, and similar instruments, which are certain to be called;
- (e) any future income or expense which is:
 - (i) known but not yet accrued; and
 - (ii) fully hedged by forward foreign exchange transactions; and
 - (iii) details of which are notified to the *FSA* in writing;
- (f) any other balance sheet asset or liability; and
- (g) any other off-balance sheet commitment to purchase or sell an asset denominated in that currency;

except that:

- (h) a *firm* may exclude from its *FER* calculation any positions that are of a non-trading or structural nature, and have been deliberately entered into in order to hedge against the effect of adverse exchange rate movements on the value of:

- (i) the *firm's* capital; or
- (ii) items that the *firm* has deducted in full when calculating its *financial resources requirement*, or that are subject to a 100% capital requirement under the *PRR* or *CRR* rules,

provided that the *firm* has provided details of these positions in writing to the *FSA*.

- G The interest rate risk of forward foreign exchange and currency futures contracts must be calculated in accordance with the interest rate method.

Dual currency bonds

- 10-151 (2) R In respect of a dual currency bond, a *firm* must calculate an *FER* on a notional forward contract with a deemed settlement date equal to the maturity of the bond:

- (a) for the purchase of the redemption currency derived from the dual currency bond, for an amount determined by reference to the terms of issue of the dual currency bond; and
- (b) for the sale of the issue currency, for an amount equal to the *mark to market* value of the dual currency bond.

Determining the currency of investments

- 10-151 (3) R For the purposes of determining the currency in which a position is denominated, a *firm* must apply the following principles:

- (a) where the price of an instrument is quoted in only one currency, a position in that instrument must be treated as an asset or liability in that currency;
- (b) where the price of an instrument is quoted in more than one currency, a position in that instrument must be treated as an asset or liability in the currency in which the *firm* accounts for the instrument;
- (c) notwithstanding (a) and (b) above, a position in an American depository receipt or similar form of instrument must be treated as a position, translated at current spot rate, in the currency of the underlying instrument; and
- (d) where a position is denominated in or gives rise to an exposure in a composite currency, it may be decomposed into the constituent currencies according to the quotas in force.

10-152 Treatment of foreign exchange options

Risk assessment models

- 10-152(1) G A *firm* may, seek a modification or waiver from the *FSA* to use a risk assessment model in respect of its foreign exchange *options* to derive notional *forward* foreign exchange positions, provided the model forms part of the day to day management supervision of the *firm's options* business and meets other criteria.
- G Further guidance on the criteria for the review of such models can be obtained from the *FSA*.

10-152 (1A) R A *firm* must apply either Method 1 or Method 2 to a foreign exchange option.

Method 1

10-152 (2) R A *firm* must calculate the *FER* of a foreign exchange option as 8% of the nominal value of the contract, adjusted as follows:

- (a) a purchased *option*: the *FER* may be restricted to the *mark to market* value of the *option*; and
- (b) a written *option*: the *FER* may be reduced (but to no less than zero) by any excess of the exercise value over the *mark to market* value for a call *option*, or vice versa for a put *option*.

Method 2

- 10-152 (3) R (a) A *firm* must include currency positions arising from foreign exchange options in the *FER* method if the option is at least 8% in the money, in which case the resulting currency positions must be based on the nominal amount of the contract valued at current spot rates.**
- (b) A *firm* must compute, in respect of a foreign exchange option which is less than 8% in the money, currency positions based on the nominal amount of the contract valued at current spot rates; and
- (i) Where such a currency position would increase the net open position in that currency, the position must be included in the *FER* method; and
- (ii) Where such a currency position would decrease the net open position in that currency, the position must not be included in the *FER* method.

Calculation of in the money

- 10-152 (4) R** For the purposes of this rule, a *firm* must determine the extent to which the *option* contract is “*in the money*” by reference to the difference between the exercise price and the current forward rate for the final date on which the *option* may be exercised.

10-153 FER method

Calculation of net open position

- 10-153 (1) R** A *firm* must calculate a net open position for all currencies excluding the currency of the *firm*'s books of account, and must translate them to the reporting currency using the prevailing spot rates.

Calculation of FER

10-153 (2) R A *firm* must use the *FER* method 1.

- G A *firm* wishing to use an internal model will need to seek a modification or waiver from this rule.

FER method 1

10-153 (3) R A *firm* must calculate the *FER* under the *FER* method 1 as 8% of the higher of:

(a) the aggregate of the net open long positions in each currency;
and

(b) the aggregate of the net open short positions in each currency.

10-153(4) G A *firm* may seek a modification or waiver to use its internal model to calculate *FER* in respect of all, or some, of its positions.

- G Further guidance on the criteria which such models must meet, and the review process, can be obtained from the *FSA*.

Currency pairs subject to binding inter-governmental agreements

10-153(5) G A *firm* may seek a modification or waiver from the *FSA* to use an alternative method to calculate *FER* on its matched positions in currency pairs that are subject to legally binding inter-governmental agreements limiting their variation relative to each other.

- G Details of the method are available from the *FSA* on request.

COMMODITIES METHOD

Types of positions to be included in the commodities method

- 10-166** General rule
- 10-166(1)** **R** **A firm must calculate PRR on all positions in commodities in accordance with one of the four approaches set out in rules 10-167 to 10-169A. All spot, physical trading, derivative and other off balance sheet items whose price is affected by changes in commodities prices must be included in the calculation.**
- G** In general, a commodity is a physical product which is or can be traded on the secondary market. Commodities include precious metals (except gold, which is to be treated as a foreign currency), agricultural products, minerals and base metals, oil and other energy products.
- 10-166(2)** **R** **A firm must calculate the PRR for each commodity separately, except that:**
- (a) different sub-categories of the same commodity that are deliverable against each other may be treated together; and**
- (b) commodities which are close substitutes for each other, and whose price movements over a minimum period of one year can be shown by the firm to exhibit a stable and reliable correlation of at least 0.9, may be treated together.**
- G** The onus is on the firm to show that the correlation referred to in (b) above exists on a continuing basis.
- 10-166(3)** **R** **Positions which are purely stock financing may be omitted from the calculation of PRR on commodities positions under rule 10-166 and treated instead under the interest rate method (rule 10-102(3)(a)).**
- G** Stock financing is defined under the Capital Adequacy Directive. Where physical stock has been sold forward, the cost of funding must be locked in until the date of the forward sale.
- 10-167** Simplified approach
- 10-167(1)** **R** **All positions in commodities or commodity derivatives must be expressed in terms of the standard unit of measurement for that commodity (such as tonnes, barrels or kilos).**
- 10-167(2)** **R** **A firm must multiply the position in each commodity by the current spot price for the commodity converted to the firm's reporting currency at current spot rates, and calculate the PRR as the sum of:**
- (a) the overall net position multiplied by 15%; and**
- (b) the gross position multiplied by 3%.**

10-167(3) R **A firm must sum the results for each commodity to arrive at the total PRR for positions treated under the simplified approach.**

10-168 Maturity ladder approach

10-168(1) R **All positions in each commodity or commodity derivatives must be expressed in terms of the standard unit of measurement for that commodity (such as tonnes, barrels or kilos) or in terms of value. A firm must allocate net positions on any given day to the appropriate maturity band in the table below. Physical stock must be assigned to the first band.**

Table 10-168

Maturity Bands for Maturity Ladder Approach	
0-1 month	1-2 years
1-3 months	2-3 years
3-6 months	over 3 years
6-12 months	

10-168(2) R **A firm may then offset long and short positions within and between maturity bands in accordance with the following:**

- (a) **For markets which have daily delivery dates, a firm may offset contracts in the same commodity against each other provided that the expiry dates are within 10 business days of each other.**
- (b) **For each maturity band, the firm must sum all the open long positions, and sum all the open short positions. The firm may then subtract the shorts from the longs to form the overall net position. The amount subtracted is the “matched amount”. The firm must multiply twice the matched amount by the spread rate of 1.5%, and then by the spot price for the commodity to arrive at the spread risk charge.**

G If the total of all longs in a maturity band is 100, and the total of all shorts is 75, the “matched amount” is 75 and the overall net position 25. Algebraically, if the total of all longs is A, and the total of all shorts is -B, the “matched amount” is $\min\{A,B\}$, and the overall net position is A-B.

- (c) **The firm may then carry backwards or forwards all or part of the overall net position within a band to an adjacent maturity band for further netting allowances. Where this is the case, the firm must calculate:**

- (i) a carry charge by multiplying the amount carried by the carry rate of 0.6%, and
- (ii) a spread charge, in accordance with (b) above, where the carried position is matched against a position in an adjacent maturity band.

The *firm* may repeat the procedure for carrying positions through to other maturity bands as appropriate. An additional carry charge and spread charge must be calculated at each stage of the process.

- (d) The *firm* must multiply any positions remaining after the permitted offsetting by the outright rate of 15%, and then by the spot price of the commodity to arrive at the outright charge.
- (e) The total *PRR* for each commodity is the sum of the spread risk charge, the carry charge, and the outright charge converted to the *firm's* reporting currency at current spot rates.

Extended maturity ladder approach

10-169 R Until 31 December 2006 a *firm* may adopt the same approach as that outlined under rule 10-168(2), but apply the rates in the table below, if the *firm*:

- (a) undertakes significant commodities business, and
- (b) has a diversified commodities portfolio.

Table 10-169

	Precious metals	Base metals	Soft commodities	Other commodities
Spread rate %	1.0	1.2	1.5	1.5
Carry rate %	0.3	0.5	0.6	0.6
Outright rate %	8.0	10.0	12.0	15.0

Models approach

- 10-169A G A *firm* may seek a modification or waiver from the *FSA* to use a VaR model as the basis for calculating the *PRR* on its commodity positions.
- G The *FSA* will grant a modification or waiver permitting the use of a VaR model only where a number of qualitative and quantitative standards are met. In assessing the VaR model the *FSA* will have regard to the matters set out in chapter TV of IPRU(BANK).

- 10-169B Options
- Proprietary options pricing models
- 10-169B (1) G A *firm* may seek a modification or waiver from the *FSA* permitting it to use its proprietary *options* pricing model to calculate the *PRR* on *options* positions and their related hedges. The application for a modification or waiver may request that the *firm* be permitted to include an *option* in the maturity ladder approach.
- G A *firm* may propose any methodology that it believes will capture spread, carry and outright risks and that reflects its own day-to-day risk management. A *firm* is strongly advised to contact the *FSA* at the earliest point if it is considering introducing a model or adapting an existing one.
- No models
- 10-169B (2) R **A *firm* may include an *option* in the maturity ladder approach, the extended maturity ladder approach or the simplified approach only if it is in-the-money by more than the appropriate outright rate. Such *options* must be included as a position in the underlying commodity, of an amount equal to the “tonnage” underlying the *option* (long or short as appropriate), and with a maturity equal to the expiry date of the spot, forward or futures contract underlying the *option*.**
- 10-169B (3) R **An *option* which does not satisfy the condition in rule 10-169B(2) attracts a *PRR* in accordance with the following:**
- (a) **In the case of a purchased *option*, the *PRR* must be the *mark to market* value of the full position underlying the *option* multiplied by the appropriate outright rate, but the result may be limited to the *mark to market* value of the *option*.**
- (b) **In the case of a written *option*, the *PRR* must be the *mark to market* value of the full position underlying the *option* multiplied by the appropriate outright rate, reduced by the out-of-the-money amount. The *PRR* must be limited to zero if the calculation results in a negative number.**
- G The out-of-the-money amount is any excess of the exercise value over the *mark to market* value of the underlying commodity in the case of a *call option*, or vice versa for a *put option*.

Counterparty Risk Requirement

10-170 General principles of CRR

General rule

10-170 (1) R **A firm must calculate its total CRR on counterparty exposures arising from its *trading book* business and its *physical commodities* business as the sum of all the amounts calculated in accordance with the rules referred to in the table below.**

R **TABLE 10-170(1) - Counterparty risk requirement**

Rules	
10-171	Cash against documents transactions
10-172	Free deliveries of physical commodities and securities
10-173	Repurchase and reverse repurchase, securities lending and borrowing and sale and buy back agreements
10-174	Derivative transactions
10-175	Other amounts owed to a firm arising out of trading book business
10-176	Trading book deposits

10-170 (2) R **A firm must calculate CRR on a counterparty exposure arising from the *trading book* of another undertaking which the firm has guaranteed as a counterparty exposure of the firm itself.**

Frequency of calculation

10-170 (3) R **A firm:**

- (a) must calculate its CRR at least once each *business day*;
- (b) must, before executing any transaction, be able to re-calculate CRR to the level of detail necessary to ensure that the firm's *financial resources requirement* does not exceed the firm's *financial resources*; and
- (c) may for the purposes of the relevant calculations, use prices of *investments* and *physical commodities* as at the close of business on the previous day.

Negative amounts

- 10-170 (4)** R **A *firm* must not include any *CRR* if it is a negative amount.**

Instruments for which no *CRR* has been specified

- 10-170 (5)** R **Where a *firm* is in doubt as to the classification of an item for the purposes of *CRR*, it must add to its *CRR* an appropriate part of the counterparty exposure on the item concerned, and must immediately notify the *FSA* of the instrument or transaction, the counterparty and the treatment the *firm* adopts.**

Instruments of non standard form

- 10-170 (6)** R **Where an instrument is not of a standard form, a *firm* must add to its *CRR* an appropriate part of the counterparty exposure on the item concerned, and must immediately notify *the FSA* of the instrument or transaction, the counterparty and the treatment the *firm* adopts.**

- G The methodologies which have been developed assume instruments with standard characteristics. There are many examples, however, of instruments which, although based on a standard contract, contain structural features which make the rules, as stated, inappropriate. Examples of such instruments are (i) path dependent and other exotic *options*, (ii) *swaps* with cash flows subject to a multiplier, (iii) *securities* with embedded *options*. In such circumstances a *firm* should consult the *FSA*. Where a *firm* is in any doubt, it should always seek guidance from the *FSA*.

- 10-170(6A) E (1) In 10-170(5) or 10-170(6) “an appropriate part” is:
- (a) the whole; or
 - (b) a proportion which takes account of the characteristics of the transaction and the counterparty concerned, and of discussions with the *FSA* or a predecessor regulator.
- (2) Compliance with (1) may be relied on as tending to establish compliance with 10-170(5) or 10-170(6) as appropriate.
- (3) Contravention of (1) may be relied on as tending to establish contravention of 10-170(5) or 10-170(6) as appropriate.

Provisions

- 10-170 (7)** R **A *firm* may reduce the counterparty exposure on which its *CRR* is calculated to the extent that it makes provision for a counterparty balance.**

Connected companies

- 10-170 (8)** **R** **For the avoidance of doubt, a *firm* must calculate a *CRR* as appropriate on counterparty exposures to or from *connected companies*.**

Basis of valuation

- 10-170 (9)** **R** **For the purposes of valuing instruments and *physical commodities* at *mark to market* value in the calculation of *CRR*, a *firm* must be consistent in the basis it chooses and may use either mid market value or bid and offer prices (as appropriate).**

Netting

- 10-170 (10)** **R** **A *firm* which has offsetting exposures in similar types of transactions with a counterparty may offset these in accordance with rules 10-171(4), 10-172 (5), 10-173(10), 10-174(6) and 10-175(4) when calculating *CRR* if it has a contractual netting agreement with that counterparty, which:**

- (a) covers the transactions which the *firm* is seeking to net;**
- (b) creates a single obligation in each currency or a single overall obligation to pay (or receive) a net sum of cash in the event of default, bankruptcy, liquidation or similar circumstances;**
- (c) does not include a *walkaway clause*; and**
- (d) is supported by written and reasoned independent legal opinions to the effect that, in the event of a legal challenge, the relevant courts would find the *firm's* exposure to be the single net amount mentioned in (b) above.**

G Legal opinions should relate to:

- (a) the law of the jurisdictions in which the counterparty is organised;**
- (b) the law of the jurisdiction in which any branch involved is located;**
- (c) the law that governs the agreement and, if different the law that governs individual transactions pursuant to it; and**
- (d) the law that governs the legal status of the counterparty who is entering into transactions of the type which the *firm* is seeking to net.**

- G Where a *firm* uses a standard netting agreement and the netting/set-off clauses therein follow the form of that standard agreement, provided a legal opinion has already been obtained on the standard agreement which addresses the capacity of counterparties of the type with which the *firm* wishes to contract, that may be relied upon.
- G Legal opinions on netting agreements should be obtained from independent legal advisers with sufficient expertise and experience in this area of law. Opinions from in-house counsel will not be acceptable.
- G Where the regulator of the counterparty is not satisfied that the netting agreement is enforceable under its laws, the netting agreement cannot be relied upon regardless of the opinions obtained by the *firm*.

10-171 Cash against documents transactions

General rule

10-171 (1) R **A *firm* which enters into a transaction on a cash against documents basis must calculate the counterparty exposure for transactions still unsettled 5 *business days* after *settlement day* as set out in (3) below and must then multiply this by the appropriate percentage set out in the table below to calculate a *CRR* for each separate unsettled transaction.**

R **TABLE 10-171(1) – Percentage to be applied to the counterparty exposure**

Business days after settlement day	Percentage
0-4	Nil
5-15	8%
16-30	50%
31-45	75%
46 or more	100%

Collateral

10-171 (2) R **A *firm* may reduce the counterparty exposure on which its *CRR* is calculated to the extent that it holds *acceptable collateral* to cover that exposure.**

Counterparty exposure

- 10-171 (3)** R (a) Where a *firm* has neither delivered *securities* or *physical commodities* nor received payment when purchasing *securities* or *physical commodities* for, or selling *securities* or *physical commodities* to, a counterparty, the positive counterparty exposure is the excess of the contract value over the market value of the *securities* or *physical commodities*.
- (b) Where a *firm* has neither received *securities* or *physical commodities* nor made payment when selling *securities* or *physical commodities* for, or purchasing *securities* or *physical commodities* from, a counterparty, the positive counterparty exposure is the excess of the market value over the contract value of the *securities* or *physical commodities*.

Netting

- 10-171 (4)** R A *firm* may offset positive and negative counterparty exposures, calculated in accordance with (3) above, before it multiplies the residual exposure by the appropriate percentage in Table 10-171(1) provided that:
- (a) the exposures arise on transactions with the same counterparty; and
- (b) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 10-170(10).

Sub-total

- 10-171 (5)** R The sum of the amounts calculated in accordance with (1) to (4) above is the *firm's* total *CRR* for cash against documents transactions.

10-172 Free deliveries of physical commodities and securities

General rule

- 10-172 (1)** R When a *firm* makes delivery to a counterparty of *physical commodities* or *securities* without receiving payment or pays for *physical commodities* or *securities* without receiving the *physical commodities* or *securities*, the *firm* must calculate *CRR* for each such *free delivery* in accordance with (2), to (6) below.

Collateral

10-172 (2) R **A firm may:**

- (a) reduce the counterparty exposure on which its *CRR* is calculated to the extent that it holds *acceptable collateral* to cover that exposure; and
- (b) where it does not have an *ACMP*, may continue to multiply the counterparty exposure by 8% multiplied by the counterparty weight, to the extent that the *firm* holds *adequate collateral* to cover that exposure.

Counterparty exposure

10-172 (3) R **A firm must calculate the counterparty exposure for each *free delivery* as set out below and multiply this amount by the appropriate percentage in Table 10-172(2) as follows:**

- (a) if the *firm* has delivered *physical commodities* or *securities* to a counterparty and has not received payment, the counterparty exposure is the full amount due to the *firm* (i.e. the contract value);
- (b) if the *firm* has made payment to a counterparty for *physical commodities* or *securities* and not received them, the counterparty exposure is the *mark to market* value of the *physical commodities* or *securities* respectively.

R TABLE 10-172(3) - Percentage to be applied to counterparty exposures relating to free deliveries

Nature of counterparty to whom counterparty exposure exists	Business days since delivery			
	0-15	16-30	31-45	46 or more
A counterparty granted a credit line under an <i>ACMP</i>	8% x counterparty weight.			
A counterparty not granted a credit line under an <i>ACMP</i>	8% x counterparty weight*	50% x counterparty weight*	75% x counterparty weight*	100%

Cross border deliveries

- 10-172 (4) R** If settlement of the transaction is effected across a national border, the *firm* will be granted a window of one *business day* from the time of payment or delivery, during which the appropriate percentage will be zero.

Netting

- 10-172 (5) R** A *firm* may reduce the counterparty exposure for a transaction calculated in accordance with (2) above, before it multiplies the residual exposure by the appropriate percentage in Table 10-172(2), by:
- (a) the value of any free payment received from the counterparty; or
 - (b) the contract value of any *physical commodities or securities* received free from the counterparty,

provided that:

* for details of counterparty weights see **Appendix 47**

- (c) the exposures arise on transactions with the same counterparty; and
- (d) the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 10-170(10).

Sub-total

10-172 (6) R The sum of the amounts calculated in accordance with (2) to (5) above is the *firm's* total *CRR* for *free deliveries of physical commodities and securities*.

10-173 Repurchase and reverse repurchase, securities or physical commodities lending and borrowing and sale and buy back agreements
General rule

10-173 (1) R Where a *firm* has entered into any *repurchase, reverse repurchase, securities or physical commodities lending, securities or physical commodities borrowing, sale and buy back or buy and sale back agreement, undocumented sale and buy back or undocumented buy and sale back agreement*, it must calculate a *CRR* for each such agreement in accordance with (2) to (11) below.

Counterparty exposure

10-173 (2) R The counterparty exposure for:

- (a) any *repurchase, securities or physical commodities lending or sale and buy back or undocumented sale and buy back agreement* in respect of *securities or physical commodities* is the excess of the *mark to market* value of the *securities or physical commodities* over the value of *adequate collateral* under the agreement, if the net figure is positive; and
- (b) any *reverse repurchase, securities or physical commodities borrowing buy and sale back or undocumented buy and sale back agreement* in respect of *securities or physical commodities* is the excess of the amount paid or collateral given for the *securities or physical commodities* over the *mark to market* value of the *securities or physical commodities* received under the agreement, if the net figure is positive.

G The *securities or physical commodities* received can be included only where they are held under the control of the *firm* or where they were delivered into the control of the *firm* upon initiation of the agreement.

Percentages

- 10-173 (3)** R **A firm must calculate CRR:**
- (a) where the counterparty is granted a credit line under an *ACMP* as 8% multiplied by the counterparty weight*, multiplied by the counterparty exposure; and
 - (b) where the counterparty is not granted a credit line under an *ACMP* as 8% multiplied by the counterparty weight*, multiplied by the counterparty exposure except where the counterparty exposure is greater than:
 - (i) 5% of the value of the *securities* where the *securities* are *qualifying debt securities*; or
 - (ii) 10% of the value of the *securities* or *physical commodities* where they are any other *securities* or *physical commodities*,
- in which case the *firm* must in addition calculate a *CRR* of 100% of the excess of the counterparty exposure over these limits.

Additional CRR

- 10-173 (4)** R **Where a firm has entered into an *undocumented buy and sale back agreement* or an *undocumented sale and buy back agreement*, it must calculate an additional *CRR* equal to the *CRR* calculated in accordance with (3) above.**

Margin percentages

- 10-173 (5)** R **A firm may opt to calculate the *CRR* in (3)(b) above using the lower margin percentage (5%) in order to avoid undue complication.**

Mark to market value

- 10-173 (7)** R **For the purposes of this rule, the current *mark to market* value of *securities* and the value of cash lodged must include accrued interest.**

Daily valuation

- 10-173 (8)** R **A firm must *mark to market* collateral and *securities* or *physical commodities* lent or sold, or borrowed or purchased, at least daily.**

* for details of counterparty weights, see **Appendix 47**

Additional adequate collateral

- 10-173 (9)** R Where the *firm* has called for additional *adequate collateral* from the other party to the agreement and the counterparty exposure exceeds the margin limits in (3)(b) above, a *firm* may calculate a *CRR* as if the margin limit had not been exceeded for no more than one *business day*.

Netting

- 10-173 (10)** R Where a *firm* has a portfolio of *repurchase, reverse repurchase, securities or physical commodities* lending, *securities or physical commodities* borrowing, *sale and buy back* and *buy and sale back agreements* which it has entered into with the same counterparty, it may calculate the counterparty exposure on those transactions as the total of all *securities or physical commodities* and cash lent or given as collateral to the counterparty less the total of all *securities or physical commodities* and cash received from the counterparty, provided that the *firm* has a written agreement supported by a legal opinion obtained in accordance with rule 10-170(10).

Sub-total

- 10-173 (11)** R The sum of the amounts calculated in accordance with this rule is the total *CRR* for *repurchase and reverse repurchase, securities or physical commodities* lending and borrowing *sale and buy back* and *undocumented sale and buy back agreements*.

10-174 Derivative transactions

General rule

- 10-174 (1)** R A *firm* must calculate for each *derivative* transaction a *CRR* by multiplying the counterparty exposure calculated in accordance with (2) and (3) below, by the appropriate percentage in Table 10-174(5) below.

Collateral

- 10-174 (2)** R A *firm* may:
- (a) reduce the counterparty exposure on which its *CRR* is calculated to the extent that it holds *acceptable collateral* to cover that exposure; and

- (b) where it does not have an *ACMP*, may continue to multiply the counterparty exposure by 8% multiplied by the counterparty weight, to the extent that the *firm* holds *adequate collateral* to cover that exposure.

Counterparty exposure

- 10-174 (3)** **R** **A *firm* must calculate the counterparty exposure on *derivative* transactions in accordance with either (a), (b) or (c) below:**
- (a) where a counterparty has not fully paid a *margin requirement* on a *derivative* transaction listed on an *exchange* or cleared through a clearing house, or met it through the deposit of *acceptable collateral* not otherwise used, a *firm* must calculate the counterparty exposure as the shortfall;
 - (b) where a *firm* sells or writes an *option* to a counterparty or buys an *option* on behalf of a counterparty and the counterparty has not paid the full *option* premium, or met it through the deposit of *acceptable collateral* not otherwise used, it must calculate the counterparty exposure as the uncovered premium on the transaction; or
 - (c) a *firm* must calculate the counterparty exposure arising from a *derivative* transaction other than a written or sold *option* or a *derivative* transaction listed on an *exchange* or cleared through a clearing house, as the credit equivalent amount calculated in accordance with Table 10-174(3), not covered by the deposit of *acceptable collateral* not otherwise used.

R Table 10-174(3A) – Method of calculating credit equivalent amount

Type of derivative transaction	Credit equivalent amount	
	If A is positive	If A is negative
Interest rate swaps: single currency		
(a) floating rate swapped against floating rate	A	nil
(b) fixed rate swapped against floating rate:		
- under one year to maturity	A	nil
- over one year to five years	A + 0.5% of N	0.5% of N
- over five years	A + 1.5% of N	1.5% of N
Cross-currency interest rate swaps		
- under one year to maturity	A + 1% of N	1% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 7.5% of N	7.5% of N
Other interest rate contracts*		
- under one year to maturity	A	nil
- over one year to five years	A + 0.5% of N	0.5% of N
- over five years	A + 1.5% of N	1.5% of N
Foreign exchange and gold contracts*		
- exchange rate contracts with an original maturity of 14 days or less	nil	nil
- under one year to maturity	A + 1% of N	1% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 7.5% of N	7.5% of N
Equity contracts*		
- under one year to maturity	A + 6% of N	6% of N
- over one year to five years	A + 8% of N	8% of N
- over five years	A + 10% of N	10% of N
Precious metal (not gold) contracts*		
- under one year to maturity	A + 7% of N	7% of N
- over one year to five years	A + 7% of N	7% of N
- over five years	A + 8% of N	8% of N
Commodity contracts*		
- under one year to maturity	A + 10% of N	10% of N
- over one year to five years	A + 12% of N	12% of N
- over five years	A + 15% of N	15% of N

Notes

* *FRAs, swaps, futures, purchased options, and other contracts for differences*

A = the replacement cost of the contract

N = the notional or actual principal amount or value underlying the contract

For contracts with multiple exchanges of principal, the % of N has to be multiplied by the remaining number of payments still to be made according to the contract.

In the case of a derivative referenced on a bond which satisfies the criteria for a *qualifying debt security*, the %N applicable to interest rate derivatives may be utilised to calculate the credit equivalent amount. For a derivative referenced on a 'non-qualifying' bond, the credit equivalent amount must be calculated with reference to the %N applicable to equity derivatives.

For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be equal to the time until the next reset date. In the case of interest-rate contracts that meet these criteria and have a remaining maturity of over one year, the percentage is no lower than 0.5%.

If a firm uses the extended maturity ladder approach to calculate PRR under rule 10-169, it may use Table 10-174(3B).

R Table 10-174(3B) – Method of calculating credit equivalent amount for commodities

Type of derivative transaction*	Credit equivalent amount	
	If A is positive	If A is negative
Precious metals (except gold)		
- under one year to maturity	A + 2% of N	2% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 7.5% of N	7.5% of N
Base metals		
- under one year to maturity	A + 2.5% of N	2.5% of N
- over one year to five years	A + 4% of N	4% of N
- over five years	A + 8% of N	8% of N
Softs (agricultural)		
- under one year to maturity	A + 3% of N	3% of N
- over one year to five years	A + 5% of N	5% of N
- over five years	A + 9% of N	9% of N
Other commodity		
- under one year to maturity	A + 4% of N	4% of N
- over one year to five years	A + 6% of N	6% of N
- over five years	A + 10% of N	10% of N
Notes
