- 7.3.46 G Cliquets on *equities, baskets of equities* or *equity indices* do not attract an *interest rate PRR*. *BIPRU 7.3.45R* excludes them from the basic *interest rate PRR* calculation and the table in *BIPRU 7.2.4R* (Table: Instruments which result in notional positions) excludes them from the scope of the *interest rate PRR* calculation in *BIPRU 7.2* (Interest rate PRR).
- 7.3.47 R Table: Percentages used in the basic interest rate PRR calculation for equity instruments
This table belongs to *BIPRU 7.3.45R(1)*

Time to expiration	Percentage (%)
$0 \leq 3$ months	0.20
$> 3 \leq 6$ months	0.40
$> 6 \leq 12$ months	0.70
$> 1 \leq 2$ years	1.25
$> 2 \leq 3$ years	1.75
$> 3 \leq 4$ years	2.25
$> 4 \leq 5$ years	2.75
$> 5 \leq 7$ years	3.25

Time to expiration	Percentage (%)
$> 7 \leq 10$ years	3.75
$> 10 \leq 15$ years	4.50
$> 15 \leq 20$ years	5.25
> 20 years	6.00

Additional capital charge in relation to equity indices

- 7.3.48 R If a *firm* nets off *positions* in one or more of the *equities* constituting an *equity index future, forward* or *CFD* against one or more *positions* in the *equity index future, forward* or *CFD* itself, the *firm* must apply an additional *equity PRR* to the netted *position* to cover the risk of loss caused by the value of the *future, forward* or *CFD* not moving fully in line with that of its constituent *equities*. The same applies if a *firm* holds opposite *positions* in a *future, forward* or *CFD* on an *equity index* that are not identical in respect of either their maturity or their composition or both.

7.4 Commodity PRR

General rule

- 7.4.1 R A *firm* must calculate its *commodity PRR* by:
- (1) identifying which *commodity positions* must be included within the scope of the *PRR* calculation (see *BIPRU 7.4.2R*);
 - (2) expressing each such *position* in terms of the standard unit of measurement of the *commodity* concerned;
 - (3) expressing the spot price in each *commodity* in the *firm's base currency* at current spot foreign exchange rates;
 - (4) calculating an individual *PRR* for each *commodity* (see *BIPRU 7.4.20R*); and
 - (5) summing the resulting individual *PRRs*.

Scope of the commodity PRR calculation

- 7.4.2 R A *firm's commodity PRR* calculation must, regardless of whether the *positions* concerned are *trading book* or *non-trading book positions*:
- (1) include *physical commodity positions*;
 - (2) (if the *firm* is the transferor of *commodities* or guaranteed rights relating to title to *commodities* in a *repurchase agreement* or the lender of *commodities* in a *commodities* lending agreement) include such *commodities*;
 - (3) include notional *positions* arising from *positions* in the instruments listed in the table in *BIPRU 7.4.4R*; and
 - (4) exclude *positions* constituting a *stock financing* transaction.
- 7.4.3 R Gold *positions* are excluded from the scope of the *commodity PRR*. Instead, they are included within the scope of the *foreign exchange PRR* (*BIPRU 7.5*).

- 7.4.4 R Table: Instruments which result in notional positions
This table belongs to *BIPRU 7.4.2R(3)*

Instrument	See
<i>Forwards, futures, CFDs, synthetic futures and options on a single commodity (unless the firm calculates a PRR on the option under BIPRU 7.6 (Option PRR))</i>	<i>BIPRU 7.4.8R</i>
A commitment to buy or sell a single <i>commodity</i> at an average of spot prices prevailing over some future period	<i>BIPRU 7.4.10R</i>
<i>Forwards, futures, CFDs, synthetic futures and options on a commodity index (unless the firm calculates an PRR on the option under BIPRU 7.6)</i>	<i>BIPRU 7.4.13R - BIPRU 7.4.14R</i>
<i>Commodity swaps</i>	<i>BIPRU 7.4.16R - BIPRU 7.4.17R</i>
A warrant relating to a <i>commodity</i> must be treated as an <i>option</i> on a <i>commodity</i> .	

- 7.4.5 G *BIPRU 7.4.2R* includes a *trading book position* in a *commodity* that is subsequently repo'd under a *repurchase agreement* or lent under a stock lending agreement. Clearly, if the *commodity* had initially been obtained via a *reverse repurchase agreement* or stock borrowing agreement, the *commodity* would not have been included in the *trading book* in the first place.

- 7.4.6 G *Firms* are reminded that the table in *BIPRU 7.6.5R* (Table: Appropriate PRR calculation for an option or warrant) divides *commodity options* into:

- (1) those which must be treated under *BIPRU 7.6*; and
- (2) those which must be treated under either *BIPRU 7.4* or *BIPRU 7.6 (Option PRR)*, the *firm* being able to choose whether *BIPRU 7.4* or *BIPRU 7.6* is used.

Derivation of notional positions: General

7.4.7 G *BIPRU 7.4.8R - BIPRU 7.4.19G* convert the instruments listed in the table in *BIPRU 7.4.4R* into notional *positions* in the relevant *commodities*. These notional *positions* are expressed in terms of quantity (tonnes, barrels, etc), not value. The maturity of the *position* is only relevant where the *firm* is using the *commodity maturity ladder approach* or the *commodity extended maturity ladder approach*.

Derivation of notional positions: Futures, forwards, CFDs and options on a single commodity

7.4.8 R Where a *forward, future, CFD, synthetic future* or *option* (unless already included in the *firm's option PRR* calculation) settles according to:

- (1) the difference between the price set on trade date and that prevailing at contract expiry, the notional *position*:
 - (a) equals the total quantity underlying the contract; and
 - (b) has a maturity equal to the expiry date of the contract; and
- (2) the difference between the price set on trade date and the average of prices prevailing over a certain period up to contract expiry, there is a notional *position* for each of the reference dates used in the averaging period to calculate the average price, which:
 - (a) equals a fractional share of the total quantity underlying the contract; and
 - (b) has a maturity equal to the relevant reference date.

7.4.9 G (1) The following example illustrates *BIPRU 7.4.8R(2)*.

(2) A *firm* buys a Traded Average Price Option (TAPO - a type of Asian option) allowing it to deliver 100 tonnes of Grade A copper and receive \$1,750 in June. If there were 20 *business days* in June the short notional *positions* will each:

- (a) equal 5 tonnes per day (1/20 of 100 tonnes); and
- (b) have a maturity equal to one of the *business days* in June (one for each day).

(3) In this example as each *business day* in June goes by the quantity per day for the remaining days does not change (5 tonnes per day) only the days remaining changes. Therefore, halfway through June there are ten, 5 tonne short notional *positions* remaining each for the ten remaining *business days* in June.

Derivation of notional positions: Buying or selling a single commodity at an average of spot prices prevailing in the future

7.4.10 R Commitments to buy or sell at the average spot price of the *commodity* prevailing over some period between trade date and maturity must be treated as a combination of:

- (1) a *position* equal to the full amount underlying the contract with a maturity equal to the maturity date of the contract which is:
 - (a) long, where the *firm* will buy at the average price; or
 - (b) short, where the *firm* will sell at the average price; and
- (2) a series of notional *positions*, one for each of the reference dates where the contract price remains unfixed, each of which:
 - (a) is long if the *position* under (1) is short, or short if the *position* under (1) is long;
 - (b) equals a fractional share of the total quantity underlying the contract; and
 - (c) has a maturity date of the relevant reference date.

7.4.11 G The following guidance provides an example of *BIPRU* 7.4.10R. In January, a *firm* agrees to buy 100 tonnes of copper for the average spot price prevailing during the 20 *business days* in February, and will settle on 30 June. After entering into this agreement, the *firm* faces the risk that the average price for February increases relative to that for 30 June. Therefore, as highlighted in the table below:

- (1) the short *positions* reflect the fact that this could occur because any one of the remaining forward prices for February increase; and
- (2) the long *position* reflects the fact that this loss could occur because the forward price for 30 June falls.

7.4.12 G Table: Example of buying at the average spot price prevailing in the future
This table belongs to *BIPRU* 7.4.11G

	Application of <i>BIPRU</i> 7.4.10R(1)	Application of <i>BIPRU</i> 7.4.10R(2)
From trade date to start of averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	A series of 20 notional short <i>positions</i> each equal to 5 tonnes of copper. Each <i>position</i> is allocated a maturity equal to one of the <i>business days</i> in February (one for each day).

	Application of <i>BIPRU</i> 7.4.10R(1)	Application of <i>BIPRU</i> 7.4.10R(2)
During averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	As each <i>business day</i> goes by in February the price for 5 tonnes of copper is fixed and so there will be one less notional short <i>position</i> .
After averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	No short <i>positions</i> .

Derivation of notional positions: CFDs and options on a commodity index

7.4.13 R *Commodity index futures and commodity index options* (unless the *option* is included in the *firm's option PRR* calculation), must be treated as follows:

- (1) Step 1: the total quantity underlying the contract must be either:
 - (a) treated as a single notional *commodity position* (separate from all other *commodities*); or
 - (b) divided into notional *positions*, one for each of the constituent *commodities* in the index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant *commodity* in the index;
- (2) Step 2: each notional *position* determined in Step 1 must then be included:
 - (a) when using the *commodity simplified approach* (*BIPRU* 7.4.24R), without adjustment; or
 - (b) when using the *commodity maturity ladder approach* (*BIPRU* 7.4.25R) or the *commodity extended maturity ladder approach* (*BIPRU* 7.4.32R), with the adjustments in *BIPRU* 7.4.14R.

7.4.14 R Table: Treatment of commodity index futures and commodity index options
This table belongs to *BIPRU* 7.4.13R(2)(b)

Construction of index	Notional <i>position</i> (or <i>positions</i>) and maturity

Construction of index	Notional <i>position</i> (or <i>positions</i>) and maturity
Spot level of index is based on the spot price of each constituent <i>commodity</i>	Each quantity determined in Step 1 as referred to in <i>BIPRU 7.4.13R</i> is assigned a maturity equal to the expiry date of the contract.
Spot level of index is based on an average of the forward prices of each constituent <i>commodity</i>	Each quantity determined in Step 1 as referred to in <i>BIPRU 7.4.13R</i> is divided (on a pro-rata basis) into a series of forward <i>positions</i> to reflect the impact of each forward price on the level of the index. The maturity of each forward <i>position</i> equals the maturity of the relevant forward price determining the level of the index when the contract expires.

- 7.4.15 G (1) An example of using *BIPRU 7.4.13R* and the table in *BIPRU 7.4.14R* is as follows.
- (2) A *firm* is long a three-month *commodity index future* where the spot level of the index is based on the one, two and three month forward prices of aluminium, copper, tin, lead, zinc and nickel (18 prices in total).
- (3) Step 1: the *firm* should decide whether to treat the full quantity underlying the contract as a single notional *commodity position* or disaggregate it into notional *positions* in aluminium, copper, tin, lead, zinc and nickel. In this case the *firm* decides to disaggregate the contract into notional *positions* in aluminium, copper, tin, lead, zinc and nickel.
- (4) Step 2: if the *firm* uses the *commodity simplified method*, nothing more need be done to arrive at the notional *position*. In this case the *firm* uses the *commodity maturity ladder approach* and so subdivides each *position* in each metal into three because the level of the index is based on the prevailing one, two and three month forward prices. Since the *future* will be settled in three months' time at the prevailing level of the index, the three *positions* for each metal will have maturities of four, five and six months respectively.

Derivation of notional positions: Commodity swaps

- 7.4.16 R A *firm* must treat a *commodity swap* as a series of notional *positions*, one *position* for each payment under the *swap*, each of which:

- (1) equals the total quantity underlying the contract;
- (2) has a maturity corresponding to the payment date; and
- (3) is long or short according to *BIPRU 7.4.17R*.

7.4.17 R Table: Treatment of commodity swaps
This table belongs to *BIPRU 7.4.16R*

	Receiving amounts which are unrelated to any <i>commodity's</i> price	Receiving the price of <i>commodity 'b'</i>
Paying amounts which are unrelated to any <i>commodity's</i> price	N/A	Long <i>positions</i> in <i>commodity 'b'</i>
Paying the price of <i>commodity 'a'</i>	Short <i>positions</i> in <i>commodity 'a'</i>	Short <i>positions</i> in <i>commodity 'a'</i> and long <i>positions</i> in <i>commodity 'b'</i>

7.4.18 G The table in *BIPRU 7.4.17R* shows that where the legs of the *swap* are in different *commodities*, a series of forward *positions* are created for each *commodity* (that is, a series of short *positions* in *commodity 'a'* and a series of long *positions* in *commodity 'b'*).

7.4.19 G The table in *BIPRU 7.4.17R* also covers the case where one leg is unrelated to any *commodity's* price. This leg may be subject to a *PRR* under another part of *BIPRU 7*; for example, an interest rate based leg would have to be included in a *firm's interest rate PRR* calculation.

Calculating the *PRR* for each commodity: General

7.4.20 R A *firm* must calculate a *commodity PRR* for each *commodity* separately using either the *commodity simplified approach* (*BIPRU 7.4.24R*), the *commodity maturity ladder approach* (*BIPRU 7.4.25R*) or the *commodity extended maturity ladder approach* (*BIPRU 7.4.32R*).

7.4.21 R A *firm* must use the same approach for a particular *commodity* but need not use the same approach for all *commodities*.

7.4.22 R (1) A *firm* must treat *positions* in different grades or brands of the same *commodity-class* as different *commodities* unless they:

- (a) can be delivered against each other; or

(b) are close substitutes and have price movements which have exhibited a stable correlation coefficient of at least 0.9 over the last 12 months.

(2) If a *firm* relies on (1)(b) it must then monitor compliance with the conditions in that paragraph on a continuing basis.

7.4.23 R If a *firm* intends to rely on the approach in *BIPRU 7.4.22R*(1)(b):

(1) it must notify the *FSA* in writing at least 20 *business days* prior to the date the *firm* starts relying on it; and

(2) the *firm* must, as part of the notification under (1), provide to the *FSA* the analysis of price movements on which it relies.

Calculating the PRR for each commodity: Simplified approach

7.4.24 R A *firm* which calculates a *commodity PRR* using the *commodity simplified approach* must do so by summing:

(1) 15% of the net *position* multiplied by the spot price for the *commodity*; and

(2) 3% of the gross *position* (long plus short, ignoring the sign) multiplied by the spot price for the *commodity*;

(and for these purposes the excess of a *firm's* long (short) *positions* over its short (long) *positions* in the same *commodity* (including notional *positions* under *BIPRU 7.4.4R*) is its net *position* in each *commodity*).

Calculating the PRR for each commodity: Maturity ladder approach

7.4.25 R A *firm* using the *commodity maturity ladder approach* must calculate the *commodity PRR* following the steps in *BIPRU 7.4.26R* and then sum all spread charges, carry charges and outright charges that result. A *firm* must use a separate maturity ladder for each *commodity*.

7.4.26 R (1) A *firm* must calculate the charges referred to in *BIPRU 7.4.25R* as follows.

(2) Step 1: offset long and short *positions* maturing:

(a) on the same day; or

(b) (in the case of *positions* arising under contracts traded in markets with daily delivery dates) within 10 *business days* of each other.

(3) Step 2: allocate the *positions* remaining after step 1 to the appropriate maturity band in the table in *BIPRU 7.4.28R* (*physical commodity positions* are allocated to band 1).

- (4) Step 3: match long and short *positions* within each band. In each instance, calculate a spread charge equal to the matched amount multiplied first by the spot price for the *commodity* and then by the spread rate of 3%.
- (5) Step 4: carry unmatched *positions* remaining after step 3 to another band where they can be matched, then match them. Do this until all matching possibilities are exhausted. In each instance, calculate:
 - (a) a carry charge equal to the carried *position* multiplied by the spot price for the *commodity*, the carry rate of 0.6% and the number of bands by which the *position* is carried; and
 - (b) a spread charge equal to the matched amount multiplied by the spot price for the *commodity* and the spread rate of 3%.
- (6) Step 5: calculate the outright charge on the remaining *positions* (which will either be all long *positions* or all short *positions*). The outright charge equals the remaining *position* (ignoring the sign) multiplied by the spot price for the *commodity* and the outright rate of 15%.

7.4.27 G The matched amount in *BIPRU* 7.4.26R is the lesser (ignoring the sign) of either the total long *position* or the total short *position*. For example, a band with 1000 long and 700 short results in a matched amount of 700. The unmatched amount would be 300.

7.4.28 R Table: Maturity bands for the maturity ladder approach
This table belongs to *BIPRU* 7.4.26R

Band	Maturity of <i>position</i>
Band 1	$0 \leq 1$ month
Band 2	> 1 month ≤ 3 months
Band 3	> 3 months ≤ 6 months
Band 4	> 6 months ≤ 1 year
Band 5	> 1 year ≤ 2 years
Band 6	> 2 years ≤ 3 years
Band 7	> 3 years

7.4.29 G *BIPRU 7.4.30G* is an example illustrating the calculation of the *commodity PRR* on an individual *commodity* using the *commodity maturity ladder approach* (*BIPRU 7.4.26R*). After the *firm* has carried out the pre-processing required by *BIPRU 7.4.26R(2)* (that is, step 1), it follows steps 2 to 5 as shown below. Because the *firm* is using the *commodity maturity ladder approach* the spread rate is 3%, the carry rate is 0.6% and the outright rate is 15%. The example assumes that the spot price for the *commodity* is £25.

7.4.30 G Table: Example illustrating the commodity maturity ladder approach
This table belongs to *BIPRU 7.4.29G*

Band	Step 2	Step 3	Step 4a	Step 4b	Step 6
	Allocate remaining <i>positions</i> to appropriate maturity bands	Match within bands. Each matched amount incurs a spread charge.	Carry across bands. Each carried amount incurs a carry charge.	Match within band. Each matched amount incurs a spread charge.	Remaining <i>position(s)</i> incur an outright charge.
$0 \leq 1$ month					
>1 month ≤ 3 months	1000 long 700 short	700 matched	300 carried		
>3 months ≤ 6 months					
>6 months ≤ 1 year					
>1 year ≤ 2 years	600 short	Nothing matched	100 carried	400 matched	200 short remains
>2 years ≤ 3 years					
> 3 years	100 long	Nothing matched			
Spread charges	$700 * \pounds 25 * 3\% + 400 * \pounds 25 * 3\%$		=	£825	
Carry charges	$300 * \pounds 25 * 0.6\% * 3 + 100 * \pounds 25 * 0.6\% * 2$		=	£165	
Outright charge	$200 * \pounds 25 * 15\%$		=	£750	
				£1740	

Calculating the PRR for each commodity: Extended maturity ladder approach

- 7.4.31 R A *firm* may use the *commodity extended maturity ladder approach* to calculate the *commodity PRR* for a particular *commodity* provided the *firm*:
- (1) has a diversified *commodities* portfolio;
 - (2) undertakes significant *commodities* business;
 - (3) is not yet in a position to use the *VaR model approach* to calculate *commodity PRR*; and
 - (4) at least twenty *business days* before the date the *firm* uses that approach notifies the *FSA* in writing of:
 - (a) its intention to use the *commodity extended maturity ladder method*; and
 - (b) the facts and matters relied on to demonstrate that the *firm* meets the criteria in (1) - (3).
- 7.4.32 R A *firm* using the *commodity extended maturity ladder approach* must calculate its *commodity PRR* by:
- (1) following the same steps as in *BIPRU 7.4.26R* but using the rates from the table in *BIPRU 7.4.33R* rather than those in *BIPRU 7.4.26R*; and
 - (2) summing all spread charges, carry charges and outright charge that result.
- 7.4.33 R Table: Alternative spread, carry and outright rates
This table belongs to *BIPRU 7.4.32R*

	Precious metals (excluding gold)	Base metals	Softs (agricultural)	Other (including energy)
Spread rate (%)	2	2.4	3	3
Carry rate (%)	0.3	0.5	0.6	0.6

	Precious metals (excluding gold)	Base metals	Softs (agricultural)	Other (including energy)
Outright rate (%)	8	10	12	15

- 7.4.34 G For the purposes of *BIPRU 7.4.31R(1)* a *firm* has a diversified *commodity* portfolio where it holds *positions* in more than one *commodity* in each of the categories set out in the table in *BIPRU 7.4.33R* and holds *positions* across different maturities in those individual *commodities*. A *firm* would not have a diversified *commodity* portfolio if it held *positions* in only one *commodity* in each of the categories set out in the table in *BIPRU 7.4.33R*. This is because the rates in the table in *BIPRU 7.4.33R* assume *firms* have *positions* in more than one of that category's *commodities*. Different *commodities* within a given category are likely to exhibit different volatilities, so where a *firm* does not have a diversified *commodity* portfolio in that category, the rates applying to that category might underestimate the regulatory capital required for a certain *commodity* at certain times.
- 7.4.35 G What constitutes significant business in *BIPRU 7.4.31R(2)* will vary from *firm* to *firm*. The more regularly the *firm* undertakes trades in *commodities* and the more consistently it has *positions* in the relevant *commodity*, the more likely it is to be undertaking significant business for the purposes of *BIPRU 7.4.31R(2)*.
- 7.4.36 R Where a *firm* is:
- (1) treating a *commodity* index derivative as if it was based on a single separate *commodity* (see *BIPRU 7.4.13R(1)(a)*); and
 - (2) using the *commodity extended maturity ladder approach* to calculate the *commodity PRR* for that *commodity*;
- it must determine which index constituent incurs the highest rate in the table in *BIPRU 7.4.33R* and apply that rate to the notional *position* for the purposes of *BIPRU 7.4.32R*.
- 7.4.37 G Where an index is only based on precious metals, *BIPRU 7.4.13R* and *BIPRU 7.4.36R* allow the *firm* to treat the single notional *position* as precious metal for the purposes of *BIPRU 7.4.32R*. However, if the index contained a mix of precious metals and base metals the *firm* would have to treat the notional *position* under *BIPRU 7.4.36R* as a base metal because base metals attract a higher rate than precious metals in the table in *BIPRU 7.4.33R*.

Liquidity and other risks

- 7.4.38 R If a short *position* to which *BIPRU 7.4* applies falls due before a long *position* to which *BIPRU 7.4* applies, a *firm* must also guard against the risk of a shortage of liquidity which may exist in some markets.
- 7.4.39 G In particular, where *BIPRU 7.4.38R* applies and the short *position* constitutes a material *position* compared to a *firm's* total *commodity positions*, it should consider a further *commodity PRR* charge in respect of that *position* depending on the likelihood of a shortage of liquidity in that market.
- 7.4.40 R A *firm* must safeguard against other risks, apart from the delta risk, associated with *commodity options*.
- 7.4.41 R The interest-rate and foreign-exchange risks not covered by other provisions of *BIPRU 7.4* or by the provisions of *BIPRU 7.2* (Interest rate PRR) or *BIPRU 7.5* (Foreign currency PRR) must be included in the calculation of *general market risk* for traded debt *securities* and in the calculation of *foreign currency PRR*.

7.5 Foreign currency PRR

General rule

7.5.1 R A *firm* must calculate its *foreign currency PRR* by:

- (1) identifying which *foreign currency* and *gold positions* to include in the *PRR* calculation;
- (2) calculating the net *open position* in each currency in accordance with this section (including where necessary the *base currency* calculated in the same way as it is for *foreign currencies*) and in gold;
- (3) calculating the *open currency position* for *foreign currencies* as calculated under *BIPRU 7.5.19R* and the net gold position (see *BIPRU 7.5.20R*); and
- (4) multiplying the sum of the absolutes of that *open currency position* and that net gold *position* by 8%.

7.5.2 G An example of the operation of *BIPRU 7.5.1R* is as follows. A *firm* has an *open currency position* of £100 and a net gold *position* of £50. The sum (ignoring the sign) is £150, and so the *foreign currency PRR* is £12.

Scope of the foreign currency PRR calculation

7.5.3 R A *firm's foreign currency PRR* calculation must include the following items regardless of whether they are *trading book* or *non-trading book positions*:

- (1) all gold *positions*;
- (2) all spot *positions* in *foreign currency* (that is, all asset items less all liability items, including accrued interest, in the *foreign currency* in question);
- (3) all forward *positions* in *foreign currency*;
- (4) all *CRD financial instruments* and other items which are denominated in a *foreign currency*;
- (5) irrevocable guarantees (and similar instruments) that are certain to be called and likely to be irrecoverable to the extent they give rise to a *position* in gold or *foreign currency*; and
- (6) notional *positions* arising from the instruments listed in the table in *BIPRU 7.5.5R*.

7.5.4 R (1) The following are excluded from a *firm's foreign currency PRR* calculation:

- (a) *foreign currency* assets which have been deducted in full from the *firm's capital resources* under the calculations under the *capital resources table*;
 - (b) *positions* hedging (a);
 - (c) *positions* that a *firm* has deliberately taken in order to hedge against the adverse effect of the exchange rate on the ratio of its *capital resources* to its *capital resources requirement*; and
 - (d) transactions to the extent that they fully hedge net future *foreign currency* income or expenses which are known but not yet accrued.
- (2) If a *firm* uses an exclusion under (1) it must:
- (a) notify the *FSA* before it makes use of it;
 - (b) include in the notification in (a) the terms on which the relevant item will be excluded;
 - (c) not change the terms of the exclusion under (b); and
 - (d) document its policy on the use of that exclusion in its *trading book policy statement*.
- (3) A *position* may only be excluded under (1)(b) or (c) if it is of a non-trading or structural nature.

7.5.5 R Table: instruments which result in notional foreign currency positions
This table belongs to *BIPRU 7.5.3R(6)*.

- 7.5.6 G *Firms* are reminded that the table in *BIPRU 7.6.5R* (Table: Appropriate PRR calculation for an option or warrant) divides *foreign currency options* and *warrants* into:
- (1) those which must be treated under *BIPRU 7.6* (Option PRR); and
 - (2) those which must be treated under either *BIPRU 7.5* or *BIPRU 7.6*, the *firm* being able to choose whether *BIPRU 7.5* or *BIPRU 7.6* is used.
- 7.5.7 R When determining the currency of denomination *firms* must:
- (1) use the currency in which the *firm* accounts for the instrument where an instrument is quoted in more than one currency; and
 - (2) treat depository receipts as *positions* in the underlying *security*.
- 7.5.8 G Instruments denominated in a foreign currency include, amongst other things, assets and liabilities (including accrued interest); *non-foreign currency derivatives*; *net underwriting positions*; *reduced net underwriting positions*; and irrevocable guarantees (or similar instruments) that are certain to be called.
- 7.5.9 R Where a contract is based on a basket of currencies, the *firm* can choose either to derive notional *positions* in each of the constituent currencies or treat it as a single notional *position* in a separate notional currency.
- Derivation of notional positions: General
- 7.5.10 G *BIPRU 7.5.11 - BIPRU 7.5.18R* derive notional currency *positions* for the instruments listed in the table in *BIPRU 7.5.5R*.
- Derivation of notional positions: Foreign exchange forwards, futures, CFDs and synthetic futures
- 7.5.11 R
- (1) A *firm* must treat a *foreign currency forward, future, synthetic future* or *CFD* as two notional currency *positions* as follows:
 - (a) a long notional *position* in the currency which the *firm* has contracted to buy; and
 - (b) a short notional *position* in the currency which the *firm* has contracted to sell.
 - (2) In (1) the notional *positions* have a value equal to either:
 - (a) the contracted amount of each currency to be exchanged in the case of a *forward, future, synthetic future* or *CFD* held in the *non-trading book*; or

- (b) the present value of the amount of each currency to be exchanged in the case of a *forward, future, synthetic future* or *CFD* held in the *trading book*.

- 7.5.12 G (1) The following example illustrates *BIPRU 7.5.11R*. In this example, a *firm* contracts to sell \$106 for €108 in one year's time and the present values of each cash flow are \$100 and €100 respectively.

- (2) In the *non-trading book*, this *forward* would be treated as a combination of a €108 long *position* and a \$106 short *position*.
- (3) In the *trading book*, this *forward* would be treated as a combination of a €100 long *position* and a \$100 short *position*.
- (4) *Firms* are reminded that *foreign currency forwards* held in the *trading book* should also be included in the *firm's interest rate PRR* calculation (see *BIPRU 7.2.4R* (Instruments which result in notional *positions* for the purpose of the *interest rate PRR*)).

Derivation of notional positions: Foreign currency swaps

- 7.5.13 R (1) A *firm* must treat a *foreign currency swap* as:
- (a) a long notional *position* in the currency in which the *firm* has contracted to receive interest and principal; and
- (b) a short notional *position* in the currency in which the *firm* has contracted to pay interest and principal.
- (2) In (1) the notional *positions* have a value equal to either:
- (a) the nominal amount of each currency underlying the *swap* if it is held in the *non-trading book*; or
- (b) the present value amount of all cash flows in the relevant currency in the case of a *swap* held in the *trading book*.

- 7.5.14 G (1) The following example illustrates *BIPRU 7.5.13R*. In this example a *firm* enters into a five year *foreign currency swap* where it contracts to pay six month US\$ Libor on \$100 in return for receiving 6% fixed on €100. The present values of each leg are \$100 and €98 respectively.
- (2) In the *non-trading book*, this *swap* would be treated as a combination of a €100 long *position* and a \$100 short *position*.
- (3) In the *trading book*, this *swap* would be treated as a combination of a €98 long *position* and a \$100 short *position*.
- (4) *Firms* are reminded that *foreign currency swaps* held in the *trading book* should also be included in the *firm's interest rate PRR* calculation (see *BIPRU 7.2.4R* (Instruments which result in notional *positions* for the purpose of the *interest rate PRR*)).

Derivation of notional positions: Foreign currency options and warrants

- 7.5.15 R Where included in *BIPRU 7.5's PRR* calculation (see the table in *BIPRU 7.5.5R*), a *foreign currency option* or *warrant* must be treated as a *foreign currency forward*.

Derivation of notional positions: Gold forwards, futures, synthetic futures and CFDs

- 7.5.16 R A *forward, future, synthetic future* or *CFD* on gold must be treated as a notional *position* in gold with a value equal to the amount of gold underlying multiplied by the current spot price for gold.

Derivation of notional positions: Gold options

- 7.5.17 R If included in the *PRR* calculation under *BIPRU 7.5* (see the table in *BIPRU 7.5.5R*), a gold *option* must be treated as a gold *forward*.

Derivation of notional positions: CIUs

- 7.5.18 R (1) This *rule* deals with *positions* in *CIUs*.
- (2) The actual *foreign currency positions* of a *CIU* must be included in a *firm's foreign currency PRR* calculation under *BIPRU 7.5.2R*.
- (3) A *firm* may rely on third party reporting of the *foreign currency positions* in the *CIU*, where the correctness of this report is adequately ensured.

- (4) If a *firm* is not aware of the *foreign currency positions* in a *CIU*, the *firm* must assume that the *CIU* is invested up to the maximum extent allowed under the *CIU's* mandate in *foreign currency* and the *firm* must, for *trading book positions*, take account of the maximum indirect exposure that it could achieve by taking leveraged *positions* through the *CIU* when calculating its *foreign currency PRR*. This must be done by proportionally increasing the *position* in the *CIU* up to the maximum exposure to the underlying investment items resulting from the investment mandate.
- (5) The assumed *position* of the *CIU* in *foreign currency* calculated in accordance with BIPRU 7.5.18(4) must be treated as a separate currency according to the treatment of investments in gold, subject to the modification that, if the direction of the *CIU's* investment is available, the total long *position* may be added to the total long open *foreign currency position* and the total short *position* may be added to the total short open *foreign currency position*. No netting is allowed between such *positions* prior to this calculation.

Open currency position

7.5.19 R A *firm* must calculate its *open currency position* by:

- (1) calculating the net *position* in each *foreign currency*;
- (2) converting each such net *position* into its *base currency* equivalent at current spot rates;
- (3) summing all short net *positions* and summing all long net *positions* calculated under (1) and (2); and
- (4) selecting the larger sum (ignoring the sign) from (3).

Net gold position

7.5.20 R A *firm* must calculate its net gold *position* by:

- (1) valuing all gold *positions* using the prevailing spot price for gold (regardless of the maturity of the *positions*);
- (2) offsetting long and short *positions*; and
- (3) converting the resulting net *position* into the *base currency* equivalent using the current spot *foreign currency* rate.

7.6 Option PRR

Option PRR calculation

7.6.1 R A *firm* must calculate its *option PRR* by:

- (1) identifying which *option positions* must be included within the scope of the *option PRR* calculation under *BIPRU 7.6.3R - BIPRU 7.6.5R*;
- (2) calculating the derived *position* in each *option* in accordance with *BIPRU 7.6.9R - BIPRU 7.6.15R*;
- (3) calculating the *PRR* for each derived *position* in accordance with *BIPRU 7.6.16R - BIPRU 7.6.31R*;
- (4) summing all of the *PRRs* calculated in accordance with (3).

7.6.2 G *Firms* are reminded that the table in *BIPRU 7.2.4R* (Instruments which result in notional *positions* for the purposes of the *interest rate PRR*) and the table in *BIPRU 7.3.3R* (Instruments which result in notional *positions* for the purposes of the *equity PRR*) also require an *interest rate PRR* to be calculated for *options* on *equities*, baskets of *equities* or *equity* indices. The interaction between *BIPRU 7.6* and the rest of Chapter 7 is illustrated in *BIPRU 7.6.33G*.

Scope of the option PRR calculation

7.6.3 R Except as permitted under *BIPRU 7.6.5R*, a *firm's option PRR* calculation must include:

- (1) each *trading book position* in an *option* on an *equity*, interest rate or debt *security*;
- (2) each *trading book position* in a *warrant* on an *equity* or debt *security*;
- (3) each *trading book position* in a *CIU*; and
- (4) each *trading book* and *non-trading book position* in an *option* on a *commodity*, currency or gold.

7.6.4 G *BIPRU 7.6.3R(2)* includes *net underwriting positions* or *reduced net underwriting positions* in *warrants*.

7.6.5 R Table: Appropriate PRR calculation for an option or warrant
This table belongs to *BIPRU 7.6.3R*

<i>Option type (see BIPRU 7.6.18R) or warrant</i>	<i>PRR calculation</i>
<p>American <i>option</i>, European <i>option</i>, Bermudan <i>option</i>, Asian <i>option</i> or <i>warrant</i> for which the <i>in the money</i> percentage (see <i>BIPRU 7.6.6R</i>) is equal to or greater than the <i>appropriate PRA</i> (see <i>BIPRU 7.6.7R</i> and <i>BIPRU 7.6.8R</i>)</p>	<p>Calculate either an <i>option PRR</i>, or the most appropriate to the underlying <i>position</i> of:</p> <ul style="list-style-type: none"> (a) an <i>equity PRR</i>; or (b) an <i>interest rate PRR</i>; or (c) a <i>commodity PRR</i>; or (d) a <i>foreign currency PRR</i>; or (e) a <i>collective investment undertaking PRR</i>.
<p>American <i>option</i>, European <i>option</i>, Bermudan <i>option</i>, Asian <i>option</i> or <i>warrant</i>:</p> <ul style="list-style-type: none"> (a) for which the <i>in the money</i> percentage (see <i>BIPRU 7.6.6R</i>) is less than the <i>appropriate PRA</i> (see <i>BIPRU 7.6.7R</i> and <i>BIPRU 7.6.8R</i>); or (b) that is <i>at the money</i>; or (c) that is <i>out of the money</i>. 	<p>Calculate an <i>option PRR</i></p>
<p>All other types of <i>option</i> listed in <i>BIPRU 7.6.18R</i> (regardless of whether <i>in the money</i>, <i>at the money</i> or <i>out of the money</i>).</p>	

The *in the money* percentage

7.6.6 R (1) The *in the money* percentage is calculated in accordance with this *rule*.

- (2) For a call *option*:
- $$\frac{\text{Current market price of underlying} - \text{Strike price of the } \textit{option}}{\text{Strike price of the } \textit{option}} * 100$$
- (3) For a put *option*:
- $$\frac{\text{Strike price of } \textit{option} - \text{Current market price of underlying}}{\text{Strike price of the } \textit{option}} * 100$$
- (4) In the case of an *option* on a basket of *securities* a *firm* may not treat the *option* as being *in the money* by the relevant percentage so as to enable the *firm* not to apply an *option PRR* under *BIPRU 7.6.5R* unless the conditions in *BIPRU 7.6.5R* are satisfied with respect to each kind of underlying investment.
- (5) (4) also applies to an *option* on a *CIU* if a *firm* is using one of the *CIU look through methods*.

The appropriate PRA

- 7.6.7 R (1) The *appropriate PRA* for a *position* is that listed in the table in *BIPRU 7.6.8R* against the relevant underlying *position*.
- (2) If the *firm* uses the *commodity extended maturity ladder approach* or the *commodity maturity ladder approach* for a particular *commodity* under *BIPRU 7.4* (Commodity PRR) the *appropriate PRA* for an *option* on that *commodity* is the outright rate applicable to the underlying *position* (see *BIPRU 7.4.26R* (Calculating the PRR for each commodity: Maturity ladder approach) and *BIPRU 7.4.33R* (Table: Alternative spread, carry and outright rates)).
- (3) If a *firm* does not have *commodity positions* treated under *BIPRU 7.4* or does not have *positions* in the *commodity* in question treated under *BIPRU 7.4* the restrictions in *BIPRU 7.4* that regulate when a *firm* can and cannot use a particular method of calculating the *commodity PRR* apply for the purpose of establishing the *appropriate PRR* for the purposes of *BIPRU 7.6*.
- (4) If a *firm* is using one of the *CIU look through methods* for an *option* on a *CIU* the leveraging requirements in *BIPRU 7.7* (Position risk requirements for collective investment undertakings) apply (see *BIPRU 7.7.11R*). For this purpose the amount of the *appropriate PRAs* under *BIPRU 7.6.6R(5)* is increased by the amount of that leveraging (expressed as a percentage) as calculated under *BIPRU 7.7*, subject to a maximum *appropriate PRA* of 32%.

- 7.6.8 R Table: Appropriate PRA
This table belongs to *BIPRU 7.6.7R*

<i>Underlying position</i>	<i>Appropriate PRA</i>
<i>Equity</i>	The <i>PRA</i> applicable to the underlying <i>equity</i> or <i>equity</i> index in the table in <i>BIPRU 7.3.30R</i> (Simplified equity method)
Interest rate	The sum of the <i>specific risk PRA</i> (see <i>BIPRU 7.2.43R</i> to <i>BIPRU 7.2.51G</i> (Specific risk calculation)) and the <i>general market risk PRA</i> (as set out in <i>BIPRU 7.2.57R</i> (General market risk PRAs)) applicable to the underlying <i>position</i>
<i>Debt securities</i>	The sum of the <i>specific risk PRA</i> (see <i>BIPRU 7.2.43R</i> to <i>BIPRU 7.2.51G</i> (Specific risk calculation)) and the <i>general market risk PRA</i> (as set out in the table in <i>BIPRU 7.2.57R</i> (General market risk PRAs)) applicable to the underlying <i>position</i>
<i>Commodity</i>	18% (unless <i>BIPRU 7.6.7R</i> requires otherwise)
Currency	8%
Gold	8%
<i>CIU</i>	32% (subject to <i>BIPRU 7.6.6R</i> and <i>BIPRU 7.6.7R</i>)

Calculating derived positions

- 7.6.9 R A *firm* must calculate the derived *position* specified in the table in *BIPRU 7.6.13R* for each *position* included in its *option PRR* calculation.

Netting positions

- 7.6.10 R A *firm* may calculate a derived *position* for its net *position* in an *option* or a *warrant*, if the relevant *options* or *warrants* are identical or may be treated as identical under *BIPRU 7.6.11R* or *BIPRU 7.6.12R*.
- 7.6.11 R A *firm* may treat *options* or *warrants* as identical if they have the same strike price, maturity (except for an interest rate cap or floor – see *BIPRU 7.6.12R*) and underlying.
- 7.6.12 R A *firm* may treat as identical a purchased interest rate cap (or floor) and a written interest rate cap (or floor) only if they mature within 30 days of each other and all other terms are identical (a cap may not be netted against a floor).

Derived positions

7.6.13 R Table: Derived positions
This table belongs to *BIPRU 7.6.9R*

Underlying	Option (or warrant)	Derived <i>position</i>
<i>Equity</i>	<i>Option (warrant) on a single equity or option on a future/forward on a single equity</i>	A notional <i>position</i> in the actual <i>equity</i> underlying the contract valued at the current market price of the <i>equity</i> .
	<i>Option (warrant) on a basket of equities or option on a future/forward on a basket of equities</i>	A notional <i>position</i> in the actual <i>equities</i> underlying the contract valued at the current market price of the <i>equities</i> .
	<i>Option (warrant) on an equity index or option on a future/forward on an equity index</i>	A notional <i>position</i> in the index underlying the contract valued at the current market price of the index.
Interest rate	<i>Option on an interest rate or an interest rate future/FRA</i>	A zero coupon <i>zero-specific-risk security</i> in the currency concerned with a maturity equal to the sum of the time to expiry of the contract and the length of the period on which the settlement amount of the contract is calculated valued at the notional amount of the contract.
	<i>Option on an interest rate swap</i>	A zero coupon <i>zero-specific-risk security</i> in the currency concerned with a maturity equal to the length of the <i>swap</i> valued at the notional principal amount.
	Interest rate cap or floor	A zero coupon <i>zero-specific-risk security</i> in the currency concerned with a maturity equal to the remaining period of the cap or floor valued at the notional amount of the contract.

Underlying	Option (or warrant)	Derived <i>position</i>
Debt securities	<i>Option (warrant) on a debt security or option on a future/forward on a debt security</i>	The underlying debt <i>security</i> with a maturity equal to the time to expiry of the <i>option</i> valued as the nominal amount underlying the contract at the current market price of the debt <i>security</i> .
	<i>Option (warrant) on a basket of debt securities or option on a future/forward on a basket of debt securities</i>	A notional <i>position</i> in the actual debt <i>securities</i> underlying the contract valued at the current market price of the debt <i>securities</i> .
	<i>Option (warrant) on an index of debt securities or option on a future/forward on an index of debt securities</i>	A notional <i>position</i> in the index underlying the contract valued at the current market price of the index.
Commodity	<i>Option on a commodity or option on a future/forward on a commodity</i>	An amount equal to the tonnage, barrels or kilos underlying the <i>option</i> with (in the case of a <i>future/forward</i> on a <i>commodity</i>) a maturity equal to the expiry date of the <i>forward</i> or <i>futures</i> contract underlying the <i>option</i> . In the case of an <i>option</i> on a <i>commodity</i> the maturity of the <i>position</i> falls into Band 1 in the table in BIPRU 7.4.28R (Table: Maturity bands for the maturity ladder approach).
	<i>Option on a commodity swap</i>	An amount equal to the tonnage, barrels or kilos underlying the <i>option</i> with a maturity equal to the length of the <i>swap</i> valued at the notional principal amount.

Underlying	Option (or warrant)	Derived <i>position</i>
<i>CIU</i> (These provisions about <i>CIUs</i> are subject to <i>BIPRU</i> 7.6.35R)	<i>Option (warrant)</i> on a single <i>CIU</i> or <i>option</i> on a <i>future/forward</i> on a single <i>CIU</i>	A notional <i>position</i> in the actual <i>CIU</i> underlying the contract valued at the current market price of the <i>CIU</i> .
	<i>Option (warrant)</i> on a basket of <i>CIUs</i> or <i>option</i> on a <i>future/forward</i> on a basket of <i>CIUs</i>	A notional <i>position</i> in the actual <i>CIUs</i> underlying the contract valued at the current market price of the <i>CIUs</i> .
Gold	<i>Option</i> on gold or <i>option</i> on a <i>future/forward</i> on gold	An amount equal to the troy ounces underlying the <i>option</i> with (in the case of a <i>future/forward</i> on gold) a maturity equal to the expiry date of the <i>forward</i> or <i>futures</i> contract underlying the <i>option</i> .
Currency	Currency <i>option</i>	The amount of the underlying currency that the <i>firm</i> will receive if the <i>option</i> is exercised converted at the spot rate into the currency that the <i>firm</i> will sell if the <i>option</i> is exercised.

Combinations of options which can be treated as one option

7.6.14 R A *firm* may treat (for the purpose of calculating an *option PRR* under *BIPRU* 7.6) an *option* strategy listed in the table in *BIPRU* 7.6.15R as the single *position* in a notional *option* specified against that strategy in the table in *BIPRU* 7.6.15R, if:

- (1) each element of the strategy is transacted with the same *counterparty*;
- (2) the strategy is documented as a single structure;
- (3) the underlying for each part of the composite *position* (including any actual holding of the underlying) is the same under the *PRR identical product netting rules*;
- (4) the netting achieved does not result overall in a greater degree of netting in the calculation of the *market risk capital component* than would be permitted under the other *standard market risk PRR rules*;

- (5) each *option* in the structure has the same maturity and underlying; and
- (6) the constituent parts of the structure form an indivisible single contract, so that neither party can unwind or default on one part of the structure without doing so for the contract as a whole;

except that (1) and (6) only apply to the extent possible with respect to any part of the composite *position* held by the *firm* that consists of an actual holding of the underlying.

7.6.15 R Table: Option strategies
This table belongs to *BIPRU 7.6.14R*

Option strategy (and an example)	Notional option (and rule it must be treated under)
Bull Spread (e.g. buy 100 call and sell 101 call)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i>)
Bear Spread (e.g. sell 100 put and buy 101 put)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i>)
Synthetic Long Call (e.g. long underlying and buy 100 put)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i> or <i>BIPRU 7.6.24R</i>)
Synthetic Short Call (e.g. short underlying and sell 100 put)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i> or <i>BIPRU 7.6.24R</i>)
Synthetic Long Put (e.g. short underlying and buy 100 call)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i> or <i>BIPRU 7.6.24R</i>)
Synthetic Short Put (e.g. buy underlying and sell 100 call)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i> or <i>BIPRU 7.6.24R</i>)
Long Straddle (e.g. buy 100 call and buy 100 put)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i>)

Option strategy (and an example)	Notional option (and rule it must be treated under)
Short Straddle (e.g. sell 100 call and sell 100 put)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i> but with no reduction for the amount the <i>option</i> is out of the money)
Long Strangle (e.g. buy 101 call and buy 99 put)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i>)
Short Strangle (e.g. sell 99 call and sell 101 put)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i> but with no reduction for the amount the <i>option</i> is out of the money)
Long Butterfly (e.g. buy one 100 call, sell two 101 calls, and buy one 102 call)	One purchased <i>option</i> (treat under <i>BIPRU 7.6.20R</i>)
Short Butterfly (e.g. sell one 100 put, buy two 101 puts, and sell one 102 put)	One written <i>option</i> (treat under <i>BIPRU 7.6.21R</i> but with no reduction for the amount the <i>option</i> is out of the money)

The option PRR for an individual positions

- 7.6.16 R A *firm* must calculate the *option PRR* for each individual derived *option position* using the method specified in the table in *BIPRU 7.6.18R*, or, if more than one method is permitted, using one of those methods.
- 7.6.17 R A *firm* must convert its *positions* into its *base currency* in accordance with the procedures that apply for whichever of the other *PRR charges* is appropriate (see *BIPRU 7.2.1R(3)*, *BIPRU 7.3.1R(2)*, *BIPRU 7.4.1R(3)*, *BIPRU 7.5.19R(2)*, *BIPRU 7.5.20R(3)* and *BIPRU 7.7.1R(3)*).

7.6.18 R Table: Option PRR: methods for different types of option
This table belongs to *BIPRU 7.6.16R*

Option	Description	Method
American option	An <i>option</i> that may be exercised at any time over an extended period up to its expiry date.	<i>Option standard method</i> or <i>option hedging method</i> if appropriate
European option	An <i>option</i> that can only be exercised at expiry.	
Bermudan option	A cross between an American <i>option</i> and European <i>option</i> . The Bermudan <i>option</i> can only be exercised at specific dates during its life.	
Asian option	The buyer has the right to exercise at the average rate or price of the underlying over the period (or part of the period) of the <i>option</i> . One variant is where the payout is based on the average of the underlying against a fixed strike price; another variant is where the payout gives at expiry the price of the underlying against the average price over the <i>option</i> period.	<i>Option standard method</i> or <i>option hedging method</i> if appropriate
Barrier option	An <i>option</i> which is either cancelled or activated if the price of the underlying reaches a pre-set level regardless of the price at which the underlying may be trading at the expiry of the <i>option</i> . The knock-out type is cancelled if the underlying price or rate trades through the trigger; while the knock-in becomes activated if the price moves through the trigger.	
Corridor option	Provides the holder with a pay-out for each day that the underlying stays within a defined range chosen by the investor.	

Option	Description	Method
Ladder <i>option</i>	Provides the holder with guaranteed pay-outs if the underlying trades through a pre-agreed price(s) or rate(s) at a certain point(s) in time, regardless of future performance.	
Lock-in <i>option</i>	An <i>option</i> where the pay-out to the holder is locked in at the maximum (or minimum) value of the underlying that occurred during the life of the <i>option</i> .	
Look-back <i>option</i>	A European style <i>option</i> where the strike price is fixed in retrospect, that is at the most favourable price (i.e. the lowest (highest) price of the underlying in the case of a call (put)) during the life of the <i>option</i> .	
Forward starting <i>option</i>	An <i>option</i> that starts at a future date.	
Compound <i>option</i>	An <i>option</i> where the underlying is itself an <i>option</i> (i.e. an <i>option</i> on an <i>option</i>).	<i>Option standard method</i> or <i>option hedging method</i> if appropriate
Interest rate cap	An interest rate <i>option</i> or series of <i>options</i> under which a counterparty contracts to pay any interest costs arising as a result of an increase in rates above an agreed rate: the effect being to provide protection to the holder against a rise above that agreed interest rate.	<i>Option standard method</i> , but no reduction for the amount the <i>option</i> is <i>out of the money</i> is permitted
Interest rate floor	An interest rate <i>option</i> or series of <i>options</i> under which a counterparty contracts to pay any lost income arising as a result of a fall in rates below an agreed rate: the effect being to provide protection to the holder against a fall below that agreed interest rate.	

Option	Description	Method
Performance <i>option</i>	An <i>option</i> based on a reference basket comprising any number of assets, where the pay-out to the holder could be one of the following: the maximum of the worst performing asset, or 0; the maximum of the best performing asset, or 0; the maximum of the spreads between several pairs of the assets, or 0.	<i>Option standard method</i> or <i>option hedging method</i> - using the highest <i>PRA</i> of the individual assets in the basket
Quanto	Quanto stands for “Quantity Adjusted <i>Option</i> ”. A quanto is an instrument where two currencies are involved. The payoff is dependent on a variable that is measured in one of the currencies and the payoff is made in the other currency.	Subject to <i>BIPRU 7.6.31R</i> , the <i>option standard method</i>
Cliquet <i>option</i>	A cliquet <i>option</i> consists of a series of forward starting <i>options</i> where the strike price for the next exercise date is set equal to a positive constant times the underlying price as of the previous exercise date. It initially acts like a vanilla <i>option</i> with a fixed price but as time moves on, the strike is reset and the intrinsic value automatically locked in at pre-set dates. If the underlying price is below the previous level at the reset date no intrinsic value is locked in but the strike price will be reset to the current price attained by the underlying. If the underlying price exceeds the current level at the next reset the intrinsic value will again be locked in.	<i>Option standard method</i> for a purchased cliquet, or the method specified in <i>BIPRU 7.6.30R</i> for a written cliquet
Digital <i>option</i>	A type of <i>option</i> where the pay-out to the holder is fixed. The most common types are all-or-nothing and one-touch <i>options</i> . All-or-nothing will pay out the fixed amount if the underlying is above (call) or below (put) a set value at expiry. The one-touch will pay the fixed amount if the underlying reaches a fixed point any time before expiry.	The method specified in <i>BIPRU 7.6.29R</i>

Option	Description	Method
Any other <i>option</i> or <i>warrant</i>		The method specified for the type of instrument whose description it most closely resembles.

7.6.19 G (1) The *option standard method* is described in *BIPRU 7.6.20R - BIPRU 7.6.22R*.

(2) The *option hedging method* is described in *BIPRU 7.6.23G - BIPRU 7.6.28R*.

The standard method: Purchased options and warrants

7.6.20 R Under the *option standard method*, the *PRR* for a purchased *option* or *warrant* is the lesser of:

(1) the market value of the derived *position* (see *BIPRU 7.6.9R*) multiplied by the *appropriate PRA* (see *BIPRU 7.6.8R*); and

(2) the market value of the *option* or *warrant*.

The standard method: Written options and warrants

7.6.21 R Under the *option standard method*, the *PRR* for a written *option* or *warrant* is the market value of the derived *position* (see *BIPRU 7.6.9R*) multiplied by the *appropriate PRA* (see *BIPRU 7.6.8R*). This result may be reduced by the amount the *option* or *warrant* is *out of the money* (subject to a maximum reduction to zero).

The standard method: Underwriting or sub-underwriting an issue of warrants

7.6.22 R Under the *option standard method*, the *PRR* for *underwriting* or *sub-underwriting* an issue of *warrants* is the *net underwriting position* (or *reduced net underwriting position*) multiplied by the current market price of the underlying *securities* multiplied by the *appropriate PRA*, but the result can be limited to the value of the *net underwriting position* (or *reduced net underwriting position*) calculated using the issue price of the *warrant*.

The hedging method

7.6.23 G The *option hedging method* involves the *option PRR* being calculated on a combination of the *option* and its hedge.

- 7.6.24 R Under the *option hedging method* a *firm* must calculate the *option PRR* for individual *positions* as follows:
- (1) for an *option* or *warrant* on an *equity*, basket of *equities* or *equity* index and its *equity* hedge(s), the *firm* must, to the extent specified or permitted in the table in *BIPRU 7.6.26R*, use the calculation in the table in *BIPRU 7.6.27R*;
 - (2) for an *option* or *warrant* on a *debt security*, basket of *debt securities* or *debt security* index and its *debt security* hedge(s), the *firm* must, to the extent specified or permitted in the table in *BIPRU 7.6.26R*, use the calculation in the table in *BIPRU 7.6.27R*;
 - (3) for an *option* on gold and its gold hedge, the *firm* must, to the extent specified or permitted in the table in *BIPRU 7.6.26R*, use the calculation in the table in *BIPRU 7.6.27R*; and
 - (4) for an *option* on a currency and its currency hedge, the *firm* must, to the extent specified or permitted in the table in *BIPRU 7.6.26R*, use the calculation in the table in *BIPRU 7.6.28R*.
- 7.6.25 R (1) A *firm* may not use the *option hedging method* for:
- (a) an interest rate *option* and its hedge; or
 - (b) a *commodity option* and its hedge; or
 - (c) a *CIU option* and its hedge.
- (2) A *firm* may only use the *option hedging method* if the item underlying the *option* or *warrant* is the same as the hedge of the *option* or *warrant* under the *PRR identical product netting rules*.

7.6.26 R Table: Appropriate treatment for equities, debt securities or currencies hedging options
This table belongs to *BIPRU 7.6.24R*

Hedge	PRR calculation for the hedge	Limits (if hedging method is used)	Naked position
An <i>equity</i> (hedging an <i>option</i> or <i>warrant</i>)	The <i>equity</i> must be treated in either <i>BIPRU 7.3</i> (equity <i>PRR</i>) or the <i>option hedging method</i> (see the table in <i>BIPRU 7.6.27R</i>)	The <i>option hedging method</i> must only be used up to the amount of the hedge that matches the notional amount underlying the <i>option</i> or <i>warrant</i>	To the extent that the amount of the hedge (or <i>option</i> or <i>warrant</i>) exceeds the notional amount underlying the <i>option</i> or <i>warrant</i> (or hedge), a <i>firm</i> must apply an <i>equity PRR</i> , interest rate <i>PRR</i> or <i>foreign currency PRR</i> (or the <i>option standard method</i>)
A debt <i>security</i> (hedging an <i>option</i> or <i>warrant</i>)	The debt <i>security</i> must be treated in <i>BIPRU 7.2</i> (interest rate <i>PRR</i>) or the <i>option hedging method</i> (see the table in <i>BIPRU 7.6.27R</i>)	As for the first row	As for the first row
Gold (hedging a gold <i>option</i>)	The gold must be treated in either <i>BIPRU 7.5</i> (Foreign currency <i>PRR</i>) or the <i>option hedging method</i> (see the table in <i>BIPRU 7.6.27R</i>)	As for the first row	As for the first row

Hedge	PRR calculation for the hedge	Limits (if hedging method is used)	Naked <i>position</i>
A currency or currencies (hedging a currency <i>option</i>)	The currency must be treated in either <i>BIPRU 7.5</i> (Foreign currency PRR) or the <i>option hedging method</i> (see the table in <i>BIPRU 7.6.28R</i>)	As for the first row	As for the first row

7.6.27 R Table: The hedging method of calculating the PRR (equities, debt securities and gold)
This table belongs to *BIPRU 7.6.24R(1) - (3)*

	PRR			
	<i>Option or warrant position</i>	<i>In the money by more than the PRA</i>	<i>In the money by less than the PRA</i>	<i>Out of the money or at the money</i>
Long in <i>security</i> or gold	Long put	Zero	Wp	X
	Short call	Y	Y	Z
Short in <i>security</i> or gold	Long call	Zero	Wc	X
	Short put	Y	Y	Z
Where:				
Wp means	$\left\{ (PRA-100\%) \times \text{The underlying position valued at strike price} \right\} + \text{The market value of the underlying position}$			
Wc means	$\left\{ (100\% + PRA) \times \text{The underlying position valued at strike price} \right\} - \text{The market value of the underlying position}$			
X means	The market value of the underlying <i>position</i> multiplied by the <i>appropriate PRA</i>			

Y means	The market value of the underlying <i>position</i> multiplied by the <i>appropriate PRA</i> . This result may be reduced by the market value of the <i>option</i> or <i>warrant</i> , subject to a maximum reduction to zero.
Z means	The <i>option hedging method</i> is not permitted; the <i>option standard method</i> must be used.

7.6.28 R Table: The hedging method of calculating the PRR (currencies)
This table belongs to *BIPRU 7.6.24R(4)*

<i>PRR</i>			
<i>Option position</i>	<i>In the money</i> by more than 8%	<i>In the money</i> by less than 8%	<i>Out of the money</i> or <i>at the money</i>
Long calls & long puts	Zero	W_L	X
Short calls & short puts	Zero	Y	X
Where:			
W_L means	$(1.08\% \times U)$ - The market value of the underlying <i>position</i>		
U means	The amount of the underlying currency that the <i>firm</i> will receive if the <i>option</i> is exercised, converted at the strike price into the currency that the <i>firm</i> will sell if the <i>option</i> is exercised		
X means	The market value of the underlying <i>position</i> multiplied by 8%.		
Y means	The market value of the underlying <i>position</i> multiplied by 8%. This result may be reduced by the market value of the <i>option</i> , subject to a maximum reduction to zero.		

Specific methods and treatments: Digital options

7.6.29 R The *option PRR* for a digital *option* is the maximum loss of the *option*.

Specific methods and treatments: Written cliquet options

7.6.30 R The *option PRR* for a written cliquet *option* is the market value of the derived *position* (see *BIPRU 7.6.9R*) multiplied by the *appropriate PRA* (see *BIPRU 7.6.8R*) multiplied by F+1 (see the following provisions of this paragraph). This result may be reduced by the amount the *option* is *out of the money* (subject to a maximum reduction to zero). The *option PRR* for a written cliquet *option* is therefore defined by the following formula:

$$[PRA * \text{underlying} * (F + 1)] - OTM$$

where:

$$(1) \quad F = \min \left[FR, \max \left(\frac{FR}{2}, Y \right) \right]$$

(2) FR= Number of forward re-sets

(3) Y= Years to maturity

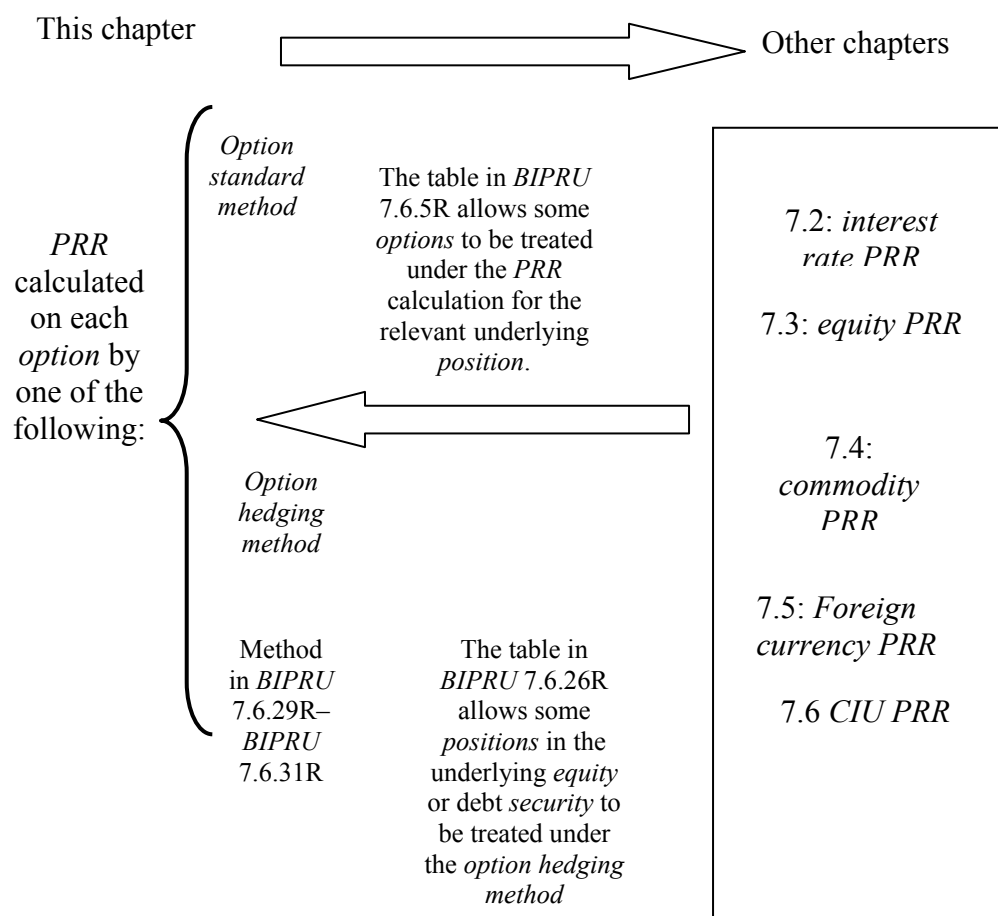

(4) OTM= the amount by which the *option* is *out of the money*

Specific methods and treatments: Quantos

7.6.31 R If the pay-out to the holder of a quanto *option* is fixed at the inception of the transaction a *firm* must add 8% to the *PRA* when applying the *option standard method*.

Interaction with other chapters

- 7.6.32 G The application of an *option PRR* to a *position* does not prevent any of the other *PRR charges* from applying if they would otherwise do so. In particular if a *firm* applies an *option PRR* to an *equity derivative* an *interest rate PRR* will also generally apply.
- 7.6.33 G The following diagram illustrates the relationship between *BIPRU 7.6* and the rest of *BIPRU 7*.

Options on a commodity

- 7.6.34 R *BIPRU 7.4.38R* to *BIPRU 7.4.41R* (Liquidity and other risks) apply to *commodity options* treated under *BIPRU 7.6* as well as to those treated under *BIPRU 7.4* (Commodity PRR).

Options on a CIU

- 7.6.35 R For the purpose of identifying the appropriate treatment for the purpose of *BIPRU 7.6.5R*, the underlying *position* for the purpose of *BIPRU 7.6.8R* and the derived *position* under *BIPRU 7.6.13R* a *firm* may choose between treating an *option* on a *CIU* as being:
- (1) a *position* in the *CIU* itself; or
 - (2) (if the conditions in *BIPRU 7.7* (Position risk requirements for collective investment undertakings) for the use of the method in question are satisfied) *positions* in the underlying investments or assumed *positions* arising through the use of the *standard CIU look through method* or the *modified CIU look through method*.
- 7.6.36 G (1) This paragraph gives an example of how the *appropriate PRA* should be calculated for the purpose of deciding whether or not an *option* on a *CIU* is sufficiently *in the money* for the *firm* to have a choice whether or not to apply an *option PRR*. This example assumes that there is no leveraging (see *BIPRU 7.7.11R* (CIU modified look through method)).
- (2) Say that the *CIU* contains underlying *equity positions* and the *firm* is using one of the *CIU look through methods*. The *appropriate PRA* for some is 8% and for the others is 12%. The *firm* should identify the highest *appropriate PRA* for the underlyings. In this case it is 12%. Therefore in this case the *option* would need to be *in the money* by more than 12% in order for the *firm* to have a choice between applying the *option PRR* or one of the other *PRR charges*.
 - (3) However if the *firm* is not using one of the *CIU look through methods* the *option* would need to be *in the money* by more than 32% in order for the *firm* to have a choice between applying the *option PRR* or the *CIU PRR*.
- 7.6.37 G *BIPRU 7.6.10R - BIPRU 7.6.12R* are subject to *BIPRU 7.7.3R* (netting). *BIPRU 7.7.4R* (use of third party) applies for the purpose of *BIPRU 7.6*.

7.7 Position risk requirements for collective investment undertakings

Collective investment undertaking PRR calculation

- 7.7.1 R A *firm* must calculate its *CIU PRR* by:
- (1) identifying which *CIU positions* must be included within the scope of the *PRR* calculation (see *BIPRU 7.7.2R*);
 - (2) identifying which *CIU positions* are to be subject to the *CIU PRR* and which *positions* are to be subject to one of the other *PRR charges*;
 - (3) converting on a daily basis net *positions* into the *firm's base currency* at the prevailing spot exchange rate before their aggregation;
 - (4) calculating an individual *PRR* for each *position* in a *CIU* (see *BIPRU 7.7.5R*);
 - (5) summing the resulting individual *PRRs*.

Scope of the PRR calculation for collective investment undertakings

- 7.7.2 R (1) A *firm's PRR* calculation must include all *trading book positions* in *CIUs*.
- (2) A *firm's CIU PRR* calculation must include all *trading book positions* in *CIUs* unless they are treated under one of the *CIU look through methods* and included in the *PRR* calculations for the relevant underlying investments or subject to an *option PRR*.
- (3) A *firm's PRR* calculation for *CIUs* must include notional *positions* arising from *trading book positions* in *options* or *warrants* on *collective investment undertakings*.

General rules

- 7.7.3 R Unless noted otherwise, no netting is permitted between the underlying investments of a *CIU* and other *positions* held by a *firm* for the purposes of calculating the *PRR charge* for a *position* in a *CIU*.
- 7.7.4 R A *firm* may rely on a third party to calculate and report *PRR* capital requirements for *position risk* (*general market risk* and *specific risk*) for *positions* in *CIUs* falling within *BIPRU 7.7.9R* and *BIPRU 7.7.11R*, in accordance with the methods set out in *BIPRU 7.7*, provided that the correctness of the calculation and the report is adequately ensured.

Calculation of the collective investment undertaking PRR

- 7.7.5 R Without prejudice to other provisions in *BIPRU 7.7*, a *position* in a *CIU* is subject to a *collective investment undertaking PRR* (*general market risk* and *specific risk*) of 32%. Without prejudice to provisions in *BIPRU 7.5.18R* (*Foreign currency PRR* for *CIUs*) or, if the *firm* has a *VaR model permission*, *BIPRU 7.10.44R* (*Commodity risks* and *VaR models*) taken together with *BIPRU 7.5.18R*, where the modified gold treatment set out in those *rules* is used, a *position* in a *CIU* is subject to a *securities PRR* requirement for *position risk* (*general market risk* and *specific risk*) and a *foreign-exchange PRR* of no more than 40%.

Look through methods: General criteria

- 7.7.6 R A *firm* may determine the *securities PRR* requirement for *positions* in *CIUs* which meet the criteria set out in *BIPRU 7.7.7R*, by one of the following methods:
- (1) the *standard CIU look through method* (*BIPRU 7.7.4R* and *BIPRU 7.7.7R - BIPRU 7.7.10R*); or
 - (2) the *modified CIU look through method* (*BIPRU 7.7.4R*, *BIPRU 7.7.7R - BIPRU 7.7.8R* and *BIPRU 7.7.11R - BIPRU 7.7.12R*).
- 7.7.7 R The general eligibility criteria for using the methods in *BIPRU 7.7.4R* and *BIPRU 7.7.9R - BIPRU 7.7.11R*, for *CIUs* issued by *companies* supervised or incorporated within the *EEA* are that:
- (1) the *CIU's* prospectus or equivalent document must include:
 - (a) the categories of assets the *CIU* is authorised to invest in;
 - (b) if investment limits apply, the relative limits and the methodologies to calculate them;
 - (c) if leverage is allowed, the maximum level of leverage; and
 - (d) if investment in OTC financial derivatives or repo-style transactions are allowed, a policy to limit counterparty risk arising from these transactions;
 - (2) the business of the *CIU* must be reported in half-yearly and annual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;
 - (3) the units/shares of the *CIU* are redeemable in cash, out of the *undertaking's* assets, on a daily basis at the request of the unit holder;
 - (4) investments in the *CIU* must be segregated from the assets of the *CIU* manager; and

- (5) there must be adequate risk assessment, by the investing *firm*, of the *CIU*.

7.7.8 R Third country *CIUs* are eligible if the requirements in *BIPRU 7.7.7R(1) - BIPRU 7.7.7R(5)* are met.

Standard *CIU* look through method: General

- 7.7.9 R
- (1) Where a *firm* is aware of the underlying investments of the *CIU* on a daily basis the *firm* may look through to those underlying investments in order to calculate the *securities PRR* for *position* risk (*general market risk* and *specific risk*) for those *positions* in accordance with the methods set out in the *securities PRR* requirements or, if the *firm* has a *VaR model permission*, in accordance with the methods set out in *BIPRU 7.10* (Use of a Value at Risk Model).
 - (2) Under this approach, *positions* in *CIUs* must be treated as *positions* in the underlying investments of the *CIU*. Netting is permitted between *positions* in the underlying investments of the *CIU* and other *positions* held by the *firm*, as long as the *firm* holds a sufficient quantity of units to allow for redemption/creation in exchange for the underlying investments.

Standard *CIU* look through method: Index or basket funds

- 7.7.10 R
- (1) A *firm* may calculate the *securities PRR* for *position* risk (*general market risk* and *specific risk*) for *positions* in *CIUs* in accordance with the methods set out in the *securities PRR* requirements or, if the *firm* has a *VaR model permission*, in accordance with the methods set out in *BIPRU 7.10* (Use of a Value at Risk Model), to assumed *positions* representing those necessary to replicate the composition and performance of the externally generated index or fixed basket of *equities* or *debt securities* referred to in (a), subject to the following conditions:
 - (a) the purpose of the *CIU's* mandate is to replicate the composition and performance of an externally generated index or fixed basket of *equities* or *debt securities*; and
 - (b) a minimum correlation of 0.9 between daily price movements of the *CIU* and the index or basket of *equities* or *debt securities* it tracks can be clearly established over a minimum period of six months.
 - (2) Correlation as referred to in (1)(b) means the correlation coefficient between daily returns on the *CIU* and the index or basket of *equities* or *debt securities* it tracks.

CIU modified look through method

- 7.7.11 R Where a *firm* is not aware of the underlying investments of the *CIU* on a daily basis, the *firm* may calculate the *securities PRR* for *position* risk (*general market risk* and *specific risk*) in accordance with the methods set out in the *securities PRR* requirements, subject to the following conditions:
- (1) it must be assumed that the *CIU* first invests to the maximum extent allowed under its mandate in the asset classes attracting the highest *securities PRR* for *position* risk (*general market risk* and *specific risk*), and then continues making investments in descending order until the maximum total investment limit is reached;
 - (2) the *firm* must take account of the maximum indirect exposure that it could achieve by taking leveraged *positions* through the *CIU* when calculating its *securities PRR* for *position* risk, by proportionally increasing the *position* in the *CIU* up to the maximum exposure to the underlying investment items resulting from the investment mandate; and
 - (3) should the *securities PRR* for *position* risk (*general market risk* and *specific risk*) under this approach exceed that set out in *BIPRU 7.7.5R*, the *PRR charge* must be capped at that level.
- 7.7.12 R For the purpose of *BIPRU 7.7.11R(1)* the *position* in the *CIU* must be treated as a direct holding in the assumed *position*.

CAD 1 models and VaR models

- 7.7.13 G Where *BIPRU 7.7* permits a *firm* to calculate the *PRR charge* for a *position* in a *CIU* using the *rules* in *BIPRU 7* relating to the underlying investment, a *firm* that has:
- (1) a *CAD 1 model waiver* that covers *positions* in *CIUs* may use the *rules* as modified by that *waiver*; and
 - (2) a *VaR model permission* that covers *positions* in *CIUs* may use its *VaR model*.

Options on a CIU

- 7.7.14 G An *option* on a *CIU* should be treated in accordance with *BIPRU 7.6.35R* to *BIPRU 7.6.37G* (Options on a *CIU*).

7.8 Securities underwriting

General rules

- 7.8.1 G *BIPRU 7.8 sets out the method for calculating a net underwriting position or reduced net underwriting position, which is then included in the PRR calculation in other parts of BIPRU 7. It also deals with concentration risk. BIPRU 7.8 only relates to new securities, which is defined in BIPRU 7.8.12R.*
- 7.8.2 R *A firm which underwrites or sub-underwrites an issue of securities must, for the purposes of calculating its market risk capital component and its concentration risk capital component:*
- (1) *identify commitments to underwrite or sub-underwrite which give rise to an underwriting position (see BIPRU 7.8.8R);*
 - (2) *identify the time of initial commitment (see BIPRU 7.8.13R); and*
 - (3) *calculate the net underwriting position (set out in BIPRU 7.8.17R), reduced net underwriting position or the net underwriting exposure.*
- 7.8.3 R *A firm must include the net underwriting position or reduced net underwriting position in whichever one or more of the following is or are relevant:*
- (1) *BIPRU 7.2.3R(1) where debt securities are being underwritten;*
 - (2) *BIPRU 7.3.2R(1) where equities are being underwritten;*
 - (3) *BIPRU 7.6.22R where warrants are being underwritten; and*
 - (4) *BIPRU 7.5.3R where the equities, debt securities or warrants being underwritten are denominated in a foreign currency.*
- 7.8.4 R *A firm must comply with BIPRU 7.8.3R from initial commitment (as determined under BIPRU 7.8.8R) until the end of the fifth business day after working day 0 (as determined under BIPRU 7.8.23R).*
- 7.8.5 G *Sub-underwriting is a commitment given by one firm to someone other than the issuer or seller of the securities to sub-underwrite all or part of an issue of securities.*
- 7.8.6 G *The net underwriting position calculated in BIPRU 7.8.17R will also be used in calculating the net underwriting exposure under BIPRU 7.8.34R.*

- 7.8.7 G The *net underwriting position* or *reduced net underwriting position* arising from *underwriting* or *sub-underwriting* a rights or *warrants* issue should be calculated using the current market price of the underlying *security* for the purposes of the *equity PRR* or *option PRR*. However, the *PRR* will be limited to the value of the *net underwriting position* calculated using the initial issue price of the rights or *warrants*. Where there is no market price because the rights or *warrants* are in relation to a new class of *securities* and the initial price has not been set the *net underwriting position* or *reduced net underwriting* is the amount of the commitment.

Commitment to underwriting securities

- 7.8.8 R (1) For the purpose of *BIPRU 7.8.2R(1)*, a *firm* has a commitment to *underwrite* or *sub-underwrite* an issue of *securities* where:
- (a) it gives a commitment to an issuer of *securities* to *underwrite* an issue of *securities*; or
 - (b) (where *BIPRU 7.8.12R(2)* applies) it gives a commitment to a seller of *securities* to *underwrite* a sale of those *securities*;
 - (c) it gives a commitment to a *person*, other than the issuer of *securities* or, if *BIPRU 7.8.12R(2)* applies, the seller of the *securities*, to *sub-underwrite* an issue of *securities*; or
 - (d) it is a member of a syndicate or group that gives a commitment of the type described in (1)(a)-(c).
- (2) Unless a *rule* deals with them separately or the context otherwise requires, a provision of *BIPRU 7.8* that deals with *underwriting* also applies to *sub-underwriting*.

Exclusions from *BIPRU 7.8*

- 7.8.9 G (1) Block trades, including bought deals, and private placements are not within the scope of *BIPRU 7.8* because they involve an outright purchase by the *firm* of the relevant *securities*.
- (2) For the purpose of *BIPRU 7.8* *securities* include debt and *equity* instruments and *convertibles* but excludes loans.

Grey market transactions

- 7.8.10 R (1) A *firm* that buys and sells *securities* before issue is dealing in the grey market for the purposes of *BIPRU 7.8*.
- (2) *BIPRU 7.8* does not apply to a *firm* with respect to its dealings in the grey market unless the *firm*:
- (a) has an *underwriting* commitment to the issuer in respect of those *securities*; or

BIPRU 7: Market risk

- (b) has a sub-*underwriting* commitment in respect of those *securities* and is using the grey market solely for the purpose of reducing that sub-*underwriting* commitment.
 - (3) *BIPRU 7.8* does not apply to a *firm* with respect to its dealings in the grey market if the transaction is undertaken by the proprietary trading part of the *firm* or is undertaken for proprietary trading purposes.
 - (4) *BIPRU 7.8* does not apply to a *firm* with respect to its dealings in the grey market except as described in *BIPRU 7.8.17R*.
- 7.8.11 G In *BIPRU 7.8* the grey market is the market in which dealers "buy" and "sell" *securities* ahead of issue. In reality the dealers are buying and selling promises to deliver the *securities* when issued.

New securities

- 7.8.12 R For the purposes of *BIPRU 7.8*, a *firm* must treat *securities* as being new for the purposes of the definition of *underwriting* if they are:
- (1) *securities* that, prior to the allotment following the *underwriting*, were not in issue; or
 - (2) *securities* that do not fall within (1) but that have not previously been offered for sale or subscription to the public and have not been admitted to trading on a market operated by a *recognised investment exchange* or an *overseas investment exchange*.

Time of initial commitment

- 7.8.13 R Subject to *BIPRU 7.8.14R*, the time of *initial commitment* is the earlier of:
- (1) (in the case of *underwriting*) the time the *firm* agrees with the issuer of *securities* to *underwrite* those *securities*; or
 - (2) (in the case of *underwriting* falling under *BIPRU 7.8.12R(2)*) the time the *firm* agrees with the seller of *securities* to *underwrite* those *securities*; or
 - (3) (in the case of sub-*underwriting*) the time the *firm* agrees with the *person* referred to *BIPRU 7.8.8R(1)(c)* to sub-*underwrite* those *securities*; or
 - (4) (in the case of *BIPRU 7.8.8R(1)(d)*) the time the group or syndicate in question (or a member of that group or syndicate on behalf of the others) agrees with the issuer or other *person* to whom the commitment is given as referred to in *BIPRU 7.8.8R(1)(d)* to *underwrite* or sub-*underwrite* the *securities* in question; or

BIPRU 7: Market risk

- (5) (if the *firm* at that time has a commitment, whether legally or binding or not) the time the price and allocation of the issue or offer are set.
- 7.8.14 R If a *firm* has an irrevocable and unfettered right to withdraw from an *underwriting* commitment, exercisable within a certain period, the commitment commences (and thus the time of *initial commitment* occurs) when that right expires.
- 7.8.15 G Subject to the existence of a right described in *BIPRU 7.8.14R* an *underwriting* commitment commences even if it is subject to formal, legal or other conditions that would normally be expected to be satisfied.
- 7.8.16 G A force majeure or material adverse change clause would not be a right of the sort referred to in *BIPRU 7.8.14R*.

Calculating the net underwriting position

- 7.8.17 R A *firm* must calculate a *net underwriting position* by adjusting the gross amount it has committed to *underwrite* for:
- (1) any sales or sub-*underwriting* commitments received that have been confirmed in writing at the time of *initial commitment* (but excluding any sales in the grey market as defined in *BIPRU 7.8.10R(1)*);
 - (2) any *underwriting* or sub-*underwriting* commitments obtained from others since the time of *initial commitment*;
 - (3) any purchases or sales of the *securities* since the time of *initial commitment* (other than purchases or sales in the grey market as defined in *BIPRU 7.8.10R(1)*);
 - (4) (in the case of sales in the grey market as defined in *BIPRU 7.8.10R(1)*) any sales of the *securities* as at the time of *initial commitment* or since the time of *initial commitment* subject, in both cases, to the following conditions:
 - (a) any sales of the *securities* as at the time of *initial commitment* must be confirmed in writing at the time of *initial commitment*; and
 - (b) sales must be net of any purchases in the grey market as defined in *BIPRU 7.8.10R(1)*; and
 - (5) any allocation of *securities* granted or received, arising from the commitment to *underwrite* the *securities*, since the time of *initial commitment*.
- 7.8.18 R If the allocation of *securities* has not been fixed a *firm* must calculate the gross amount of its commitment, for the purposes of *BIPRU 7.8.17R*, by reference to the maximum amount it has committed to *underwrite* until the time the allocation is set.

- 7.8.19 R An *underwriting* commitment may only be reduced under *BIPRU 7.8.17R* on the basis of a formal agreement.
- 7.8.20 G Allocations may arise, after date of *initial commitment*, from the agreement to *underwrite*. For example obligations or rights may be allocated to or from the issuer, the *underwriting* group or syndicate.

Over-allotment options

- 7.8.21 R (1) This *rule* deals with the treatment of short *positions* that arise when a *firm* commits to distribute *securities* that it is *underwriting* in an amount that exceeds the allocation to the *firm* made by the issuer of the *securities* being *underwritten*.
- (2) When calculating its *net underwriting position*, a *firm* may use an over-allotment option granted to it by the issuer of the *securities* being *underwritten* to reduce the short *positions* in (1).
- (3) A *firm* may also use an over-allotment option granted to another member of the *underwriting* syndicate for the purpose in (2).
- (4) (2) and (3) only apply from *working day 0*.
- (5) (2) and (3) only apply to the extent that the treatment is consistent with the terms of the over-allotment option.
- 7.8.22 R Except as provided in *BIPRU 7.8.21R*, a *firm* must not take into account an over-allotment option granted to it or another member of the *underwriting* syndicate in calculating its *net underwriting position*.

Working day 0

- 7.8.23 R For the purposes of *BIPRU 7.8* *working day 0* is the *business day* on which a *firm* that is *underwriting* or sub-*underwriting* becomes unconditionally committed to accepting a known quantity of *securities* at a specified price.
- 7.8.24 G For debt issues and *securities* which are issued in a similar manner, *working day 0* is the later of the date on which the *securities* are allotted and the date on which payment for them is due.
- 7.8.25 G For *equity* issues and *securities* which are issued in a similar manner, *working day 0* is the later of the date on which the offer becomes closed for subscriptions and the date on which the allocations are made public.
- 7.8.26 G For rights issues, *working day 0* is the first day after the date on which the offer becomes closed to acceptances for subscription.

Calculating the reduced net underwriting position

BIPRU 7: Market risk

7.8.27 R To calculate the *reduced net underwriting position* a firm must apply the reduction factors in the table in BIPRU 7.8.28R to the *net underwriting position* (calculated under BIPRU 7.8.17R) as follows:

- (1) in respect of debt *securities*, a firm must calculate two *reduced net underwriting positions*; one for inclusion in the firm's interest rate PRR *specific risk* calculation (BIPRU 7.2.43R), the other for inclusion in its interest rate PRR *general market risk* calculation (BIPRU 7.2.52R); and
- (2) in respect of *equities*, a firm must calculate only one *reduced net underwriting position*, and then include it in the *simplified equity method* (see BIPRU 7.3.29R).

7.8.28 R Table: Net underwriting position reduction factors
This table belongs to BIPRU 7.8.27R

Underwriting timeline	Debt		Equity
	<i>General market risk</i>	<i>Specific risk</i>	
Time of <i>initial commitment</i> until <i>working day 0</i>	0%	100%	90%
<i>Working day 1</i>	0%	90%	90%
<i>Working day 2</i>	0%	75%	75%
<i>Working day 3</i>	0%	75%	75%
<i>Working day 4</i>	0%	50%	50%
<i>Working day 5</i>	0%	25%	25%
<i>Working day 6 and onwards</i>	0%	0%	0%

7.8.29 G The table in BIPRU 7.8.30G gives an example of the *reduced net underwriting position* calculation. The example is based on the firm starting with a commitment to underwrite £100 million of a new *equity* issue. Firms are reminded that in the case of an *equity*, the *reduced net underwriting position* should be treated under the *simplified equity method* (see BIPRU 7.3.27R (Simplified and standard equity methods) and BIPRU 7.8.27R).

7.8.30 G Table: Example of the reduced net underwriting position calculation
This table belongs to *BIPRU 7.8.29G*

Time	<i>Net underwriting position</i> (see <i>BIPRU 7.8.17R</i>)	Percentage reduction (see <i>BIPRU 7.8.28R</i>)	Reduced net underwriting position
At initial commitment 9.00am Monday	£100m gross amount is reduced by £20m due to sales/sub-underwriting commitments confirmed in writing at the time of initial commitment (see <i>BIPRU 7.8.17R(1)</i> and (4)). = £80m	90%	£8m
Post initial commitment 9.02am Monday	Remaining £80m is reduced by £40m due to further sales, sub-underwriting commitments obtained and allocations granted (see <i>BIPRU 7.8.17R(2) – (5)</i>). = £40m	90%	£4m
At the end of working day 1	Remaining £40m is reduced to £20m due to further sales. = £20m	90%	£2m
End of working day 3	Remaining £20m is reduced to £5m due to further sales. = £5m	75%	£1.25 m
End of working day 4	Remaining £5m is reduced to £2m due to further sales. = £2m	50%	£1m
End of working day 5	Remaining £2m is reduced to £1m due to further sales. = £1m	25%	£0.75 m

BIPRU 7: Market risk

Time	<i>Net underwriting position</i> (see <i>BIPRU 7.8.17R</i>)	Percentage reduction (see <i>BIPRU 7.8.28R</i>)	Reduced net underwriting <i>position</i>
Start of <i>working day 6</i>	£1m remaining = £1m	0%	£1m

Large exposure risk from underwriting securities: Calculating the net underwriting exposure

- 7.8.31 R For the purposes of calculating the total amount of its *trading book exposures* to a *person* for concentration risk purposes, a *firm* must include *net underwriting exposures* to that *person*.
- 7.8.32 R A *firm* must include any other *exposures* arising out of *underwriting* (including any counterparty *exposures* to any sub-*underwriters*) for the purposes of calculating the total amount of its *trading book exposures* to a *person* for concentration risk purposes .
- 7.8.33 R A *firm*, before entering into a new *underwriting* commitment, must be able to recalculate the *concentration risk capital component* to the level of detail necessary to ensure that the *firm's capital resources requirement* does not exceed the *firm's capital resources*.
- 7.8.34 R Except where otherwise specified by a *requirement* on its *Part IV permission*, a *firm* must calculate the *net underwriting exposure* to an issuer by applying the relevant reduction factors in the table in *BIPRU 7.8.35R* to its *net underwriting position* calculated under *BIPRU 7.8.17R*.
- 7.8.35 R Table: Calculation of net underwriting exposure
This table belongs to *BIPRU 7.8.34R*

Time	Reduction factor to be applied to net underwriting <i>position</i>
<i>Initial commitment to working day 0</i>	100%
<i>Working day 0</i>	100%
<i>Working day 1</i>	90%
<i>Working day 2</i>	75%
<i>Working day 3</i>	75%

BIPRU 7: Market risk

Time	Reduction factor to be applied to net underwriting <i>position</i>
<i>Working day 4</i>	50%
<i>Working day 5</i>	25%
<i>Working day 6 onwards</i>	0%

- 7.8.36 G The effect of *BIPRU 7.8.34R* is that there is no concentration limit for *net underwriting exposures* between *initial commitment* and the end of *working day 0*, except where specified by a *requirement* on a *firm's Part IV permission*.

Large exposure risk from underwriting securities: Monitoring and reporting concentration risk

- 7.8.37 R For the purposes of concentration risk monitoring only, a *firm* must report its *net underwriting exposure* both before and after the application of the reduction factors in the table in *BIPRU 7.8.35R*.

Risk management

- 7.8.38 R A *firm* must take reasonable steps to establish and maintain such systems and controls to monitor and manage its *underwriting* and *sub-underwriting* business as are appropriate to the nature, scale and complexity of its *underwriting* and *sub-underwriting* business. In particular, a *firm* must have systems to monitor and control its *underwriting exposures* between the time of the *initial commitment* and *working day one* in the light of the nature of the risks incurred in the markets in question.
- 7.8.39 G A *firm* should take reasonable steps to:
- (1) allocate responsibility for the management of its *underwriting* and *sub-underwriting* business;
 - (2) allocate adequate resources to monitor and control its *underwriting* and *sub-underwriting* business;
 - (3) satisfy itself that its systems to monitor *exposure* to counterparties will calculate, revise and update its *exposure* to each counterparty arising from its *underwriting* or *sub-underwriting* business;
 - (4) satisfy itself of the suitability of each *person* who performs functions for it in connection with the *firm's underwriting* and *sub-underwriting* business having regard to the *person's* skill and experience; and

BIPRU 7: Market risk

- (5) satisfy itself that its procedures and controls to monitor and manage its *underwriting* business address, on an on-going basis, the capacity of sub-*underwriters* to meet sub-*underwriting* commitments.

7.9 Use of a CAD 1 model

Introduction

- 7.9.1 G A *firm* is required under *GENPRU 2.1.52R* (Calculation of the market risk capital requirement) to calculate its *market risk capital requirement* using the rules in *BIPRU 7*. However, the *FSA* may at the *firm's* request modify *GENPRU 2.1.52R* to allow the *firm* to calculate all or part of the *PRR* for the *positions* covered by that model by using a *CAD 1 model* (for *options* risk aggregation and/or interest rate pre-processing) or a *VaR model* (value at risk model) instead. *BIPRU 7.10* (Use of a Value at Risk Model) deals with *VaR model permissions*.
- 7.9.2 G The purpose of *BIPRU 7.9* is to provide *guidance* on the *FSA's* policy for granting *CAD 1 model waivers* under section 148 of the *Act* (Modification or waiver of rules). The policy recognises that *CAD 1 models* may vary across *firms* but, as a minimum, the *FSA* will need to be satisfied:
- (1) about the quality of the internal controls and risk management relating to the model (see *BIPRU 7.9.19G - BIPRU 7.9.23G* for further details);
 - (2) about the quality of the model standards; and
 - (3) that the *CAD 1 model* captures and produces an accurate measure of the risks inherent in the portfolio covered by the *CAD 1 model* (see *BIPRU 7.9.25G - BIPRU 7.9.53G* for further details).
- 7.9.3 G *BIPRU 7.9* also explains how the output from the *CAD 1 model* is fed into the *market risk capital requirement* calculation.
- 7.9.4 G If a *CAD 1 model waiver* is granted by the *FSA*, the *waiver* will contain certain requirements. In order adequately to address individual circumstances, these may differ from what is set out in *BIPRU 7.9*. The *waiver* will also identify the *rules* to which the *waiver* applies and the scope of model recognition granted to the *firm*.
- 7.9.5 G *Waivers* permitting the use of models in the calculation of *PRR* will not be granted if that would be contrary to the *CAD*. Any *waiver* which is granted will only be granted on terms that are compatible with the *CAD*. Accordingly, the only *waivers* permitting the use of models in calculating *PRR* that the *FSA* is likely to grant are *CAD 1 model waivers* and *VaR model permissions*.

Scope of CAD 1 models

- 7.9.6 G The *FSA* recognises two types of *CAD 1 model*. The table in *BIPRU 7.9.7G* describes them.

7.9.7 G Table: Types of CAD 1 model
 This table belongs to *BIPRU 7.9.6G*

	Options risk aggregation models	Interest rate pre-processing models
Brief description and eligible instruments	<p>Analyse and aggregate <i>options</i> risks for:</p> <ul style="list-style-type: none"> • interest rate <i>options</i>; • <i>equity options</i>; • <i>foreign currency options</i>; • <i>commodity options</i>; and • <i>CIU options</i>. 	<p>May be used to calculate duration weighted <i>positions</i> for:</p> <ul style="list-style-type: none"> • interest rate <i>futures</i>; • <i>forward rate agreements (FRAs)</i>; • forward commitments to buy or sell debt <i>securities</i>; • <i>options, swaps</i> or <i>warrants</i> on interest rates or debt <i>securities</i> and <i>options</i> on such <i>swaps</i>; • amortising bonds; • <i>equity futures, forwards, warrants</i> and <i>options</i> (but only in relation to the interest rate risk inherent in these products); and • <i>foreign currency futures, forwards, swaps</i> and <i>options</i>, but only in relation to the interest rate risk inherent in these products.

	Options risk aggregation models	Interest rate pre-processing models
The output and how it is used in the <i>PRR</i> calculation	Depending on the type of model and the requirements in the <i>CAD 1 model waiver</i> granted, the outputs from an <i>options</i> risk aggregation model are used as an input to the <i>market risk capital requirement</i> calculation.	Depending on the type of model and the requirements in the <i>CAD 1 model waiver</i> granted, the individual sensitivity figures produced by this type of <i>CAD 1 model</i> are either input into the calculation of <i>interest rate PRR</i> under the <i>interest rate duration method</i> (see <i>BIPRU 7.2.63R</i>) or are converted into notional <i>positions</i> and input into the calculation of <i>interest rate PRR</i> under the <i>interest rate maturity method</i> (see <i>BIPRU 7.2.59R</i>).

- 7.9.8 G Currently the *FSA* only envisages allowing recognition for *options* on *CIUs* if the *CIU* satisfies one of the following conditions:
- (1) it is a *regulated collective investment scheme*; or
 - (2) the *firm* can demonstrate that it has characteristics that are similar to or better than an *undertaking* in (1) from the point of view of transparency and liquidity.

The *CAD 1* model waiver application and review process

- 7.9.9 G Details of the general *waiver* process are set out in *SUP 8* (Waiver and modification of rules). Further details of the *waiver* process applicable to certain *waivers* relating to *BIPRU* (including *CAD 1 model waivers*) can be found in *BIPRU 1.3* (Applications for advanced approaches). Because of the complexity of a *CAD 1 model waiver*, it is recommended that, as set out in *SUP 8.3.4G* and *BIPRU 1.3.21G*, a *firm* contact its usual contact at the *FSA* to discuss its proposed application. It should also be noted that the *waiver* recognition process in the case of a *CAD 1 model* may take longer than the timescales indicated in *SUP 8.3.5G*.
- 7.9.10 G In order to consider a *CAD 1 model waiver* request, the *FSA* may undertake a review to ensure that it is adequate and appropriate for the *PRR* calculation.

- 7.9.11 G The model review process may be conducted through a series of visits covering various aspects of the *firm's* control and IT environment. Before these visits the *FSA* may ask the *firm* to provide some information relating to its *waiver* request accompanied by some specified background material. The model review visits are organised on a timetable that allows a *firm* being visited sufficient time to arrange the visit and provide the appropriate pre-visit information.
- 7.9.12 G As part of the model review process, the following may be reviewed: organisational structure and personnel; details of the *firm's* market position in the relevant products; profit and risk information; valuation and reserving policies; operational controls; IT systems; model release and control procedures; risk management and control framework; risk appetite and limit structure and future developments relevant to model recognition.
- 7.9.13 G The *FSA* will normally require meetings with senior management and staff from the front office, financial control, risk management, operations, systems development, information technology and audit areas.
- 7.9.14 G A review by a *skilled person* may be used before a *CAD 1 model waiver* is granted to supplement the *waiver* process or after the *waiver* has been granted to review the *CAD 1 model*.
- 7.9.15 G If the *FSA* grants a *CAD 1 model waiver*, the *waiver* direction will specify the particular *rule* which has been modified, and set out the requirements subject to which the *waiver* has been granted. These requirements may include:
- (1) the details of the calculation of *PRR*;
 - (2) the *CAD 1 model* methodology to be employed;
 - (3) the products covered by the model (e.g. *option* type, maturity, currency); and
 - (4) any notification requirements relating to the *CAD 1 model waiver*.
- 7.9.16 G Where a *firm* operates any part of its *CAD 1 model* outside the *United Kingdom*, the *FSA* may take into account the results of any review of that model carried out by any overseas regulator concerned. The *FSA* may wish to receive information directly from that regulator.

Maintenance of model recognition

- 7.9.17 G No changes should be made to a *CAD 1 model* unless the change is not material. Material changes to a *CAD 1 model* will require a renewed *waiver* to be issued. Materiality is measured from the time that the *waiver* is granted or, if the *waiver* has been varied in accordance with section 148 of the *Act*, any later time that may be specified in the *waiver* for these purposes. If a *firm* is considering making material changes to its *CAD 1 model*, then it should notify the *FSA* at once. If a *firm* wishes to change the products covered by the model it should apply for a variation of its *CAD 1 model waiver*.
- 7.9.18 G If the *CAD 1 model* ceases to meet the requirements of the *waiver*, the *firm* should notify the *FSA* at once. The *FSA* may then revoke the *waiver* unless it is varied in accordance with section 148 of the *Act*. If the *CAD 1 model waiver* contains conditions it is a condition of using the *CAD 1 model approach* that the *firm* should continue to comply with those conditions.

Risk management standards

- 7.9.19 G A *firm* with a complex portfolio is expected to demonstrate more sophistication in its modelling and risk management than a *firm* with a simple portfolio.
- 7.9.20 G A *firm* should be able to demonstrate that the risk management standards set out in *BIPRU 7.9* are satisfied by each legal entity with respect to which the *CAD 1 model approach* is being used (even though they are expressed to refer only to a *firm*). This is particularly important for *subsidiary undertakings* in *groups* subject to matrix management where the business lines cut across legal entity boundaries.
- 7.9.21 G
- (1) A *firm* should have a conceptually sound risk management system which is implemented with integrity and should meet the minimum standards set out in this paragraph.
 - (2) A *firm* should have a risk control unit that is independent of business trading units and reports directly to senior management. The unit should be responsible for designing and implementing the *firm's* risk management system. It should produce and analyse daily reports on the risks run by the business and on the appropriate measures to be taken in terms of the trading limits.
 - (3) A *firm's* senior management should be actively involved in the risk control process and the daily reports produced by the risk control unit should be reviewed by a level of management with sufficient authority to enforce reductions of *positions* taken by individual traders as well as in the *firm's* overall risk exposure.
 - (4) The risk control group should have a sufficient number of staff with appropriate skills in the use of models.

- (5) A *firm* should have established procedures for monitoring and ensuring compliance with a documented set of appropriate internal policies and controls concerning the overall operation of the risk measurement and control framework. This should take into account the front, middle and back office functions.
- (6) A *firm* should conduct, as part of its regular internal audit process, a review of the systems and controls relating to its *CAD 1 model*. This review should include the valuation process, compliance with the *CAD 1 model waiver's* scope and the activities of the business trading units and the risk control units. This review should be undertaken by staff independent of the areas being reviewed.

7.9.22 G In assessing whether the risk management and control framework is implemented with integrity, the *FSA* will consider the IT systems used to run the *CAD 1 model* and associated calculations. The assessment will include, where appropriate:

- (1) feeder systems; risk aggregation systems; the integrity of the data (i.e. whether it is complete, coherent and correct); reconciliations and checks on completeness of capture; and
- (2) system development, change control and documentation; security and audit trails; system availability and contingency procedures; network adequacy.

7.9.23 G A *firm* should take appropriate steps to ensure that it has adequate controls relating to:

- (1) the derivation of the *PRR* from the *CAD 1 model* output;
- (2) *CAD 1 model* development, including independent validation;
- (3) reserving;
- (4) valuation (see *GENPRU* 1.3 (Valuation)), including independent validation; and
- (5) the adequacy of the IT infrastructure.

Model standards

7.9.24 G A *firm* should take appropriate steps to ensure that its *CAD 1 model* captures and produces an accurate measure of the risks inherent in the portfolio covered by the *CAD 1 model*. These risks may include, but are not limited to, gamma, vega and rho.

Options risk aggregation models

7.9.25 G For a *firm* to obtain a *CAD 1 model waiver* for its *options* risk aggregation model, it should have in place an appropriate *options* valuation model.

- 7.9.26 G The *FSA* does not specify the methodology that a *firm* should employ in order to produce the appropriate outputs from its *options* risk aggregation *CAD 1 model*. However, *BIPRU 7.9.27G - BIPRU 7.9.43G* provide details of how a *firm* could meet the requirement to capture gamma, vega and rho risks using a scenario matrix approach. Where a *firm* adopts the scenario matrix approach then the standards set out in *BIPRU 7.9.27G - BIPRU 7.9.43G* should be followed. The *firm* should also take into account other risks not captured by the scenario matrix approach. If a *firm* does not use the scenario matrix approach it should use an equivalent methodology. If a *firm* uses an equivalent methodology it should be able to demonstrate that the approach used meets the requirements of *BIPRU 7.9*.
- 7.9.27 G A scenario matrix is an approach by which an *options* portfolio is revalued given a number of simultaneous shifts in both the spot level of the underlying and the implied volatility.
- 7.9.28 G The scenario matrix approach may be employed for all types of *options* on all types of underlying asset.
- 7.9.29 G
- (1) This paragraph provides an outline of the initial steps to be taken when using the scenario matrix approach.
 - (2) A value for an *option* should be obtained using the *firm's options* valuation model.
 - (3) The inputs into the *options* valuation model for implied volatility of the underlying asset and the price of the underlying asset should then be altered so that a new value for the *option* is obtained (details of the amount by which the implied volatility and the price of the underlying should be amended are set out in *BIPRU 7.9.30G - BIPRU 7.9.36G*).
 - (4) The difference between the original value of the *option* and the new value obtained following the alterations should be input into the appropriate cell in the matrix. The value in the central cell where there is no change in implied volatility or price of the underlying should therefore be zero.
 - (5) The process of obtaining a new price for the *option* should be repeated until the matrix is completed.

- 7.9.30 G The alteration to the implied volatility (known as the implied volatility shift) referred to in *BIPRU 7.9.29G(3)* may be a proportional shift. The size of the shift depends on the remaining life of the *option* and the asset class of the underlying. The table in *BIPRU 7.9.32G* sets out the shifts that should be applied where a proportional shift is used. Alternatively, a *firm* may use a single shift across all maturities or use an absolute rather than a proportional implied volatility shift. Where a single shift or an absolute shift is used it should be at least as conservative as the proportional shifts. Any use of a single shift or an absolute shift should be reviewed and, if necessary updated, on a regular basis.
- 7.9.31 G A *firm* may choose to use a less detailed term structure than that in the table in *BIPRU 7.9.32G*, but the shifts used should be no less conservative than those set out in that table. For example, a *firm* that uses one <3 month band, rather than the two bands (≤ 1 month and 1-3 months) set out in the table, should use the most conservative shift set out in the table for the bands covered. In this example that shift is 30%.
- 7.9.32 G Table: proportional implied volatility shifts
This table belongs to *BIPRU 7.9.30G*

Remaining life of option	Proportional shift	
	<i>Equities, foreign currency and commodities</i>	Interest rates and <i>CIUs</i>
≤ 1 month	30%	30%
$> 1 \leq 3$ months	20%	20%
$> 3 \leq 6$ months	15%	15%
$> 6 \leq 9$ months	12%	12%
$> 9 \leq 12$ months	9%	9%
$> 1 \leq 2$ years	6%	9%
$> 2 \leq 4$ years	4.5%	9%
> 4 years	3%	9%

- 7.9.33 G The size of the underlying price/rate shift depends on the asset class of the underlying as referred to in *BIPRU 7.9.29G(3)* and is set out in the table in *BIPRU 7.9.34G*.

7.9.34 G Table: underlying price/rate shifts
This table belongs to *BIPRU 7.9.33G*

Underlying asset class	Shift
<i>Equities</i>	±8%
<i>Foreign currency</i>	±8%
<i>Commodities</i>	±15%, (but a <i>firm</i> may use the percentages applicable under the <i>commodity extended maturity ladder approach</i> if it would qualify under <i>BIPRU 7.4 (Commodity PRR)</i> to use that approach).
Interest rates	±100bp (but a <i>firm</i> may use the sliding scale of shifts by maturity as applicable to the <i>interest rate duration method</i>).
<i>CIU</i>	±32%, (but a <i>firm</i> may use the percentages applicable to the underlyings if the <i>firm</i> applies one of the <i>CIU look through methods</i> under <i>BIPRU 7.7 (Position risk requirements for collective investment undertakings)</i>).

7.9.35 G The shifts outlined in the table in *BIPRU 7.9.34G* are the maximum shifts required; in addition there will be a number of intermediate shifts as a result of the minimum matrix size criteria set out in *BIPRU 7.9.36G*.

7.9.36 G The minimum size of the scenario matrix should be 3x7, that is, three observations for implied volatility (including the actual implied volatility) and seven observations for the price of the underlying (including the actual price of the underlying). A *firm* should be able to justify its choice of granularity. Greater granularity may be required where the portfolio contains, for example, a large proportion of barrier *options*.

7.9.37 G

- (1) A different scenario matrix should be set up for each underlying asset type in accordance with this paragraph.
- (2) For *equities* (including single *equities*, baskets and indices) there should be a separate matrix for each national market or non-decomposed basket or non-decomposed multi-national index.
- (3) For *foreign currency* products there should be a separate matrix for each currency pair where appropriate.

- (4) For *commodity* products there should be a separate matrix for each *commodity*. The question whether two items are the same *commodity* should be decided in accordance with *BIPRU 7.4* (Commodity PRR).
- (5) For interest rate products there should be a separate matrix for each currency. In addition, a *firm* should not offset the gamma and vega exposures (except in the circumstances set out in *BIPRU 7.9.38G*) arising from any one of the following types of product with the gamma and vega exposures arising from any of the other products in the list:
 - (a) swaptions (*options* on interest rates);
 - (b) interest rate *options* (including *options* on exchange-traded deposit or bill *futures*);
 - (c) bond *options* (including *options* on exchange-traded bond *futures*); and
 - (d) other types of *options* required by the *CAD 1* model *waiver* to form their own separate class of underlying asset.
- (6) The other types of *options* referred to in (5)(d) will generally be exotic *options* that do not fall easily into (5)(a) - (c).
- (7) For *CIUs* there should be a separate matrix for each *CIU* fund. If the *firm* applies one of the *CIU look through methods* under *BIPRU 7.7* (Position risk requirements for collective investment undertakings), then (1) – (6) apply based on what the underlyings are.

- 7.9.38 G A *firm* may offset gamma and vega exposures arising from the products listed in *BIPRU 7.9.37G(5)* where it can demonstrate that it trades different types of interest rate-related *options* as a portfolio and takes steps to control the basis risk between different types of implied volatility. To the extent that this is the case an individual matrix is not required for each of the products listed in *BIPRU 7.9.37G(5)* and a combined scenario matrix may be used.
- 7.9.39 G Where it is imprudent fully to offset long-dated and short-dated vega exposure owing to the risk of non-parallel shifts in the yield curve, a *firm* should use an appropriate number of scenario matrices to take account of non-parallel shifts in the yield curve according to the maturity of the *option* or underlying.
- 7.9.40 G Following the steps outlined in *BIPRU 7.9.29G*, a *firm* then removes the portion of the values in the matrix that can be attributed to the effect that delta has had on the change in the value of the *option* (a process known as delta-stripping).

- 7.9.41 G Once the effect of delta has been removed from the matrix, the values left in the matrix relate to gamma and vega risk. A *firm's PRR* in relation to gamma and vega risk on the individual *option* is the absolute of the most negative cell in the scenario matrix produced. Where all cells are positive the *PRR* is zero. The total *PRR* for the gamma and vega risk on the portfolio of *options* is a simple sum of the individual requirements. This amount should then be fed into a *firm's PRR* calculation.
- 7.9.42 G The values that have been obtained for the delta-equivalent *positions* of instruments included in the scenario matrix should then be treated in the same way as *positions* in the underlying. Where the delta obtained relates to interest rate *position* risk, the delta equivalent *positions* may be fed into the *firm's* interest rate pre-processing model to the extent that the *positions* fall within the scope of interest rate pre-processing models as set out in *BIPRU 7.9.7G* and provided that the *firm's CAD 1 model waiver* allows the *firm's CAD 1 model* to be used in this way. Alternatively, the delta obtained should be fed into the standard *PRR* calculations in *BIPRU 7.2* (Interest rate *PRR*), *BIPRU 7.3* (Equity *PRR* and basic interest rate *PRR* for equity derivatives), *BIPRU 7.4* (Commodity *PRR*) or *BIPRU 7.5* (Foreign currency *PRR*) as appropriate.
- 7.9.43 G In using the scenario matrix approach, none of the steps followed will take specific account of a *firm's* exposure to rho risk. Where a *firm* can demonstrate that for interest rate-related *options* the rho sensitivity is effectively included in the delta sensitivities produced, there is no separate capital requirement relating to rho. For all other *options* except *commodity options*, a *firm* should calculate a rho sensitivity ladder by currency using its *CAD 1 model* and either feed this into the *interest rate maturity method* or *interest rate duration method* calculation or, where the *firm's CAD 1 model waiver* allows the *firm's CAD 1 model* to be used in this way, feed that ladder into an interest rate pre-processing model. Generally a *CAD 1 model* does not need to deal specifically with rho risk for *commodity options*.

Interest rate pre-processing models

- 7.9.44 G To the extent that a *firm's CAD 1 model waiver* is for the use of an interest rate pre-processing model the *firm* should use it for the pre-processing of the instruments set out in *BIPRU 7.9.7G*, from which the residual *positions* are fed into the *interest rate maturity method* or *interest rate duration method* calculation.
- 7.9.45 G There are a number of different methods of constructing pre-processing models but all should comply with *BIPRU 7.9.45G - BIPRU 7.9.53G*. All pre-processing models should generate *positions* that have the same sensitivity to defined interest rate changes as the underlying cash flows.
- 7.9.46 G In an interest rate pre-processing model each transaction is converted into its constituent cash flows. The cash flows are discounted using zero coupon rates derived from the *firm's* own yield curves.

- 7.9.47 G The cash flows are then calculated again using the *firm's* own yield curve shifted by the amount set out in *BIPRU 7.9.49G*.
- 7.9.48 G The difference between the present values calculated using the *firm's* own yield curve and those calculated using the *firm's* curve shifted under *BIPRU 7.9.47G* are known as the sensitivity figures. Alternatively, a *firm* may shift the yield curve by one basis point and multiply up the sensitivity figures by the appropriate amount in order to achieve the shifts set out in *BIPRU 7.9.47G*. These sensitivity figures are then allocated to each of the 15 maturity bands set out in *BIPRU 7.9.49G*.
- 7.9.49 G Table: yield curve shifts
This table belongs to *BIPRU 7.9.47G*

Zone	Modified duration	Assumed interest rate change (percentage points)
1	$0 \leq 1$ months	1.00
	$> 1 \leq 3$ months	1.00
	$> 3 \leq 6$ months	1.00
	$> 6 \leq 12$ months	1.00
2	$> 1.0 \leq 1.9$ years	0.90
	$> 1.9 \leq 2.8$ years	0.85
	$> 2.8 \leq 3.6$ years	0.85
3	$> 3.6 \leq 4.3$ years	0.75
3	$> 4.3 \leq 5.7$ years	0.70
	$> 5.7 \leq 7.3$ years	0.70
	$> 7.3 \leq 9.3$ years	0.70
	$> 9.3 \leq 10.6$ years	0.70
	$> 10.6 \leq 12$ years	0.70
	$> 12.0 \leq 20$ years	0.70
	> 20 years	0.70

- 7.9.50 G Sensitivity figures calculated by a *firm* using an interest rate pre-processing model are usually produced in the format of a net sensitivity by maturity bucket or by discrete gridpoint. These maturity buckets or gridpoints should then be allocated to the 15 bands set out in *BIPRU 7.9.49G*. The number of maturity buckets or gridpoints used to represent a yield curve can be referred to as granularity. The granularity should always be adequate to capture the material curve risk in the portfolio. Curve risk can be defined as the risk associated with holding long and short *positions* at different points along the yield curve.
- 7.9.51 G Positive and negative amounts placed in each of the different maturity bands in *BIPRU 7.9.49G* under the sensitivity calculation in *BIPRU 7.9.50G* should then be netted off to produce one figure for each of the bands. There is no capital requirement for this netting process.
- 7.9.52 G The individual sensitivity figures produced should then be input into the *interest rate duration method* calculation. The individual sensitivity figures for each band should be included with the other *positions* in the appropriate column in the table in *BIPRU 7.2.65R* (Table: Assumed interest rate change in the interest rate duration method).
- 7.9.53 G Instead of using the approach in *BIPRU 7.9.52G* a *firm* may use an approach based on the *interest rate maturity method*, making appropriate adjustments to the sensitivity figures.

7.10 Use of a Value at Risk Model

Application

7.10.1 R *BIPRU 7.10 applies to a firm with a VaR model permission.*

Introduction and purpose

- 7.10.2 G *BIPRU 7.10 provides details of when the FSA expects to allow a firm to use a VaR model (value at risk model) for the purpose of calculating part or all of its PRR. It introduces the concept of a VAR model, the methodology behind it and the link to the standard market risk PRR rules. It then goes on to detail the application and review process. The bulk of BIPRU 7.10 specifies the model standards and risk management standards that firms will be required to meet in order to use a VAR model. It further stipulates requirements for stress testing, backtesting, capital calculations and finally the reporting standards expected by the FSA.*
- 7.10.3 G *The models described in BIPRU 7.10 are described as VaR models in order to distinguish them from CAD 1 models, which are dealt with in BIPRU 7.9 (Use of a CAD 1 model). A VaR model is a risk management model which uses a statistical measure to predict profit and loss movement ranges with a confidence interval. From these results PRR charges can be calculated. The standards described in BIPRU 7.10, and which will be applied by the FSA, are based on and implement Annex V of the Capital Adequacy Directive.*
- 7.10.4 G *The aim of the VaR model approach is to enable a firm with adequate risk management systems to be subject to a PRR requirement that is more closely aligned with the risks to which it is subject than the PRR requirements generated by the standard market risk PRR rules. This provides a firm with an incentive to measure market risks as accurately and comprehensively as possible. It is crucial that those responsible for managing market risk at a firm should be aware of the assumptions and limitations of the firm's VaR model.*
- 7.10.5 G *There are a number of general methodologies for calculating PRR using a VaR model. The FSA does not prescribe any one method of computing VaR measures. Moreover, it does not wish to discourage any firm from developing alternative risk measurement techniques. A firm should discuss the use of any alternative techniques used to calculate PRR with the FSA.*
- 7.10.6 G *A firm should not use the VaR model approach to calculate PRR unless it has a VaR model permission. If a firm does not have such a permission it should use the standard market risk PRR rules. Therefore, a firm needs to apply for a VaR model permission in order to calculate its PRR using a VaR model instead of (or in combination with) the standard market risk PRR rules.*

Conditions for granting a VaR model permission

- 7.10.7 G A *waiver* or other permission allowing the use of models in the calculation of *PRR* will not be granted if that would be contrary to the *Capital Adequacy Directive* and any *VaR model permission* which is granted will only be granted on terms that are compatible with the *Capital Adequacy Directive*. Accordingly, the *FSA* is likely only to grant a *waiver* or other permission allowing the use of models in the calculation of *PRR* if it is a *VaR model permission* or a *CAD 1 model waiver*.
- 7.10.8 G *BIPRU 7.10* sets out the minimum standards that the *FSA* expects *firms* to meet before granting a *VaR model permission*. The *FSA* will not grant a *VaR model permission* unless it is satisfied that the requirements of *BIPRU 7.10* are met and it is satisfied about the procedures in place at a *firm* to calculate the *model PRR*. In particular the *FSA* will not normally grant a *VaR model permission* unless it is satisfied about the quality of:
- (1) the internal controls and risk management relating to the *VaR model* (see *BIPRU 7.10.56G - BIPRU 7.10.82R*);
 - (2) the *VaR model* standards (see *BIPRU 7.10.24R-BIPRU 7.10.55G*); and
 - (3) stress testing and backtesting procedures relating to a *VaR model* (see, in addition to (2), *BIPRU 7.10.83R - BIPRU 7.10.112G*).
- 7.10.9 G The *FSA* recognises that the nature of *VaR models* will vary between *firms*. The scope of and the requirements and conditions set out in a *VaR model permission* may therefore differ in substance or detail from *BIPRU 7.10* in order to address individual circumstances adequately. However any differences will only be allowed if they are compliant with the *Capital Adequacy Directive*. A *VaR model permission* will implement any such variation by modifying *BIPRU 7.10*. A *VaR model permission* may also include additional conditions to meet the particular circumstances of the *firm* or the model.

The VaR model permission application and review process

- 7.10.10 G Details of the general process for applying for a *VaR model permission* are set out in *BIPRU 1.3* (Applications for advanced approaches). Because of the complexity of a *VaR model permission*, it is recommended that a *firm* discuss its proposed application with its usual contact at the *FSA* before it makes the application.
- 7.10.11 G In order for a *VaR model permission* to be granted, the *FSA* is likely to undertake a review to ensure that it is adequate and appropriate for the *PRR* calculation.

- 7.10.12 G The *VaR model* review process may be conducted through a series of visits covering various aspects of a *firm's* control and IT environment. Before these visits the *FSA* may ask the *firm* to provide some information relating to the *firm's VaR model permission* request accompanied by some specified background material. The *VaR model* review visits are organised on a timetable that allows the *firm* being visited sufficient time to arrange the visit and provide the appropriate pre-visit information.
- 7.10.13 G As part of the process for dealing with an application for a *VaR model permission* the following may be reviewed: organisational structure and personnel; details of the *firm's* market position in the relevant products; revenue and risk information; valuation and reserving policies; operational controls; information technology systems; model release and control procedures; risk management and control framework; risk appetite and limit structure; future developments relevant to model recognition.
- 7.10.14 G A visit will usually involve the *FSA* wishing to meet *senior management* and staff from the front office, financial control, risk management, operations, systems development, information technology and internal audit areas.
- 7.10.15 G The *FSA* may complement its own review of a *VaR model permission* request with one or more reviews by a *skilled person* under section 166 of the *Act* (Reports by skilled persons). Such a review may also be used where a *VaR model permission* has been granted to ensure that the requirements *BIPRU 7.10* and of the *VaR model permission* continue to be met.

Conditions for a VaR model outside the United Kingdom

- 7.10.16 G Where a *VaR model* used outside the *United Kingdom* differs from that used in the *United Kingdom* the *FSA* may request details of the reasons for using different models.
- 7.10.17 G Where a *firm* operates any part of its *VaR model* outside the *United Kingdom*, the *FSA* may take into account the results of the home supervisor's review of that model. The *FSA* may wish to receive information directly from the home supervisor.

Scope of VaR models

- 7.10.18 R A *firm* must use the *VaR model approach* to calculate the *PRR* for a *position*:
- (1) to the extent that the risks in relation to that *position* are within the scope of the *VaR model permission* (see *BIPRU 7.10.136R* (Link to standard *PRR* rules: Incorporation of the model output into the capital calculation)); and
 - (2) if the *position* is of a type that comes within the scope of the *VaR model permission*.

- 7.10.19 G In accordance with *BIPRU 7.10.18R(1)* a *VaR model permission* will set out the risk categories that it covers, which are expected to be one or more of the following types:
- (1) interest rate *general market risk*;
 - (2) interest rate *specific risk* (in conjunction with interest rate *general market risk*);
 - (3) *equity general market risk*;
 - (4) *equity specific risk* (in conjunction with *equity general market risk*);
 - (5) *CIU risk*;
 - (6) *foreign currency risk*; and
 - (7) *commodity risk*.
- 7.10.20 G A *VaR model permission* will generally set out the broad classes of *position* within its scope. It may also specify how individual products within one of those broad classes may be brought into or taken out of the scope of the *VaR model permission*.
- 7.10.21 G The broad classes of *position* referred to in *BIPRU 7.10.20G* are as follows:
- (1) linear products, which comprise *securities* with linear pay-offs (e.g. bonds and *equities*) and *derivative* products which have linear pay-offs in the underlying risk factor (e.g. interest rate *swaps*, *FRAs*, total return *swaps*);
 - (2) European, American and Bermudan put and call *options* (including caps, floors and swaptions) and *investments* with these features (see *BIPRU 7.6.18R* (Table: Option PRR: methods for different types of option) for an explanation of some of these terms);
 - (3) *Asian options*, *digital options*, *single barrier options*, *double barrier options*, *lookback options*, *forward starting options*, *compound options* and *investments* with these features (see *BIPRU 7.6.18R* for an explanation of some of these terms); and
 - (4) all other *option* based products (e.g. *basket options*, *quantos*, *outperformance options*, *timing options*) and *investments* with these features (see *BIPRU 7.6.18R* for an explanation of some of these terms).
- 7.10.22 G The categorisation described in *BIPRU 7.10.21G* may be amended or replaced in the case of a particular *firm's VaR model permission*.

- 7.10.23 G It is the *FSA*'s view that, where a *firm* uses a *VaR model* for one risk category as described in *BIPRU 7.10.19G*, it is good practice to extend its model over time to calculate all of its *PRR* risk categories. A *firm* will typically be expected to have a realistic plan in place to do this.

Model standards: General

- 7.10.24 R A *firm* must comply with the minimum standards set out in *BIPRU 7.10.26R* - *BIPRU 7.10.53R* in calculating the *model PRR*.

- 7.10.25 G The *FSA* accepts that the scope and nature of *VaR models* varies across *firms*. This means that different *firms* are likely to calculate different estimates of market risk for the same portfolio. Systematic differences are due to length of data series, choice of methodology (historical or Monte Carlo simulation or variance-covariance method or a hybrid of these), differences in aggregating risks within and across broad risk factors, the treatment of *options* and other non-linear products and the specification of risk factors.

Model standards: Frequency of calculations and confidence level

- 7.10.26 R The *model PRR* must be computed at least once every *business day*, using a 99% one-tailed confidence limit.
- 7.10.27 G A *firm* may meet the requirement in *BIPRU 7.10.26R* by using different model parameters and employing a suitable adjustment mechanism to produce a figure which is equivalent to the figure produced using the parameters set out in *BIPRU 7.10.26R*. For example, a *firm's* model may use a 95% one-tailed confidence limit if the *firm* has a mechanism to convert the output of the model to reflect a 99% one-tailed confidence limit.

Model standards: Holding period

- 7.10.28 R In calculating the *VaR number*, a *firm* must either use a ten *business day* holding period, or use a holding period converted to a ten *business day* holding period. However if the *firm's VaR model permission* specifies that the *firm* must use a specific method, the *firm* must do so.
- 7.10.29 G If a *firm* uses a holding period other than 10 *business days* and converts the resulting *VaR measure* to a ten *business day* equivalent measure, it should be able to justify the choice of conversion technique. For example, the square root of time method will usually be justifiable. The *FSA* considers it good practice ultimately to move towards the application of an actual ten *business day* holding period, rather than using different holding periods.

Model standards: Observation period

- 7.10.30 R Subject to *BIPRU 7.10.31R*, the calculation of *VaR numbers* must be based on an effective historical observation period that is the longest possible consistent with a prudent *VaR number*. That period must be at least one year or such longer period as may be set out in the *firm's VaR model permission*. However if using that prescribed observation period does not result in a sufficiently prudent way of calculating a *VaR measure* or a component of a *VaR measure* the *firm* must shorten this observation period until the observation period is consistent with a prudent *VaR number*.

Model standards: Data series

- 7.10.31 R A *firm* must ensure that the data series used by its *VaR model* is reliable. Where a reliable data series is not available, proxies or any other reasonable value-at-risk measurement technique must be used. A *firm* must be able to demonstrate that the technique is appropriate and does not materially understate the modelled risks.
- 7.10.32 G A data series is unreliable if it has, for example, missing data points, or data points which contain stale data. Reliable data series may be difficult to obtain for new products (for example an instrument of longer dated tenor that did not previously trade) and for less liquid risk factors or *positions*. With regard to less liquid risk factors or *positions*, a *firm* may use a combination of prudent valuation techniques and alternative *VaR* estimation techniques to ensure there is a sufficient cushion against risk over the close out period which takes account of the illiquidity of the risk factor or *position*.
- 7.10.33 R
- (1) If a weighting scheme or other similar method is used to calculate *VaR numbers*, then the effective observation period must be at least one year. Where a weighting scheme is used, the weighted average time lag of the individual observations must not be less than six *Months*.
 - (2) If a specific observation period or weighted average time lag is specified in a *firm's VaR model permission*, the *firm* must comply with that if it is longer than the period specified in (1).
 - (3) However, if a weighting scheme in (1) or (2) would result in imprudent *VaR numbers* then the weighting scheme must be adjusted so that it is consistent with a prudent *VaR number*.
- 7.10.34 R A *firm* must update data sets in accordance with the frequency set out in its *VaR model permission*. If volatility in market prices or rates necessitates more frequent updating in order to ensure a prudent calculation of the *VaR measure* the *firm* must do so.
- 7.10.35 G The minimum updating frequency that can be specified in a *VaR model permission* is quarterly.

Model standards: Aggregation across risk categories

- 7.10.36 R The process for determining and implementing correlations within and across risk categories must be sound, implemented with integrity and consistent with the terms of the *firm's VaR model permission*.
- 7.10.37 R In aggregating *VaR measures* across risk or product categories, a *firm* must not use the square root of the sum of the squares approach unless the assumption of zero correlation between these categories is empirically justified. If correlations between risk categories are not empirically justified, the *VaR measures* for each category must simply be added in order to determine its aggregate *VaR measure*. But to the extent that a *firm's VaR model permission* provides for a different way of aggregating *VaR measures*:
- (1) that method applies instead of this *rule*; and
 - (2) if the correlations between risk categories used for that purpose cease to be empirically justified then the *firm* must notify the *FSA* at once.

Model standards: Risk factors: Introduction

- 7.10.38 G Subject to *BIPRU 7.10.53R* (Model standards: Materiality), a *VaR model* should capture and accurately reflect all material risks arising on the underlying portfolio on a continuing basis insofar as those risks are within the scope of the *VaR model permission*. This should encompass *general market risk* and, to the extent that this comes within the scope of the *VaR model permission*, *specific risk*. A *firm* should ensure that the *VaR model* has sufficient risk factor granularity to be able to capture all such material risks and that these are properly documented and specified.

Model standards: Risk factors: General

- 7.10.39 R In the case of *general market risk* and risks with respect to which the *standard market risk PRR rules* do not distinguish between *general market risk* and *specific risk*, a *firm's VaR model* must capture a sufficient number of risk factors in relation to the level of activity of the *firm* and in particular the risks set out in *BIPRU 7.10.40R - BIPRU 7.10.44R*.
- 7.10.40 R For interest rate risk, a *VaR model* must incorporate a set of risk factors corresponding to the interest rate curves in each currency in which the *firm* has interest rate sensitive *positions*. A *firm* must ensure that it captures the variations of volatility of rates along the yield curve. In order to achieve this, a *firm* must divide the yield curves of, at a minimum, the major currencies and markets in which it has material interest rate exposures into a minimum of six maturity segments. The *VaR model* must also capture the risk of less than perfectly correlated movements between different yield curves.

- 7.10.41 R For *equity* risk, a *VaR model* must use a separate risk factor at least for each of the *equity* markets in which the *firm* has material *positions*.
- 7.10.42 R For *foreign currency* risk, a *VaR model* must incorporate risk factors corresponding to the individual *foreign currencies*, including gold, in which the *firm's positions* are denominated.
- 7.10.43 R For *commodity* risk, the *VaR model* must use a separate risk factor at least for each *commodity* in which the *firm* has material *positions*. The *VaR model* must also capture the risk of less than perfectly correlated movements between similar, but not identical, *commodities* and the exposure to changes in forward prices arising from maturity mismatches. It must also take account of market characteristics, notably delivery dates and the scope provided to traders to close out positions.
- 7.10.44 R
- (1) For *CIUs* the actual *foreign currency positions* of the *CIU* must be taken into account.
 - (2) A *firm* may rely on third party reporting of the *foreign currency position* of the *CIU*, where the correctness of this report is adequately ensured.
 - (3) If a *firm* is not aware of the *foreign currency positions* in a *CIU*, this *position* must be carved out and treated in *BIPRU 7.5.18R* (Derivation of notional *positions* in *CIUs* for the *foreign currency PRR*).
- 7.10.45 G
- (1) This paragraph contains *guidance* on the inclusion of *CIUs* in a *VaR model*.
 - (2) The *FSA* may allow all types of *CIU* to be included within the scope of a *firm's VaR model permission*.
 - (3) *BIPRU 7.10* does not distinguish between *specific risk* and *general market risk* for *positions* in *CIUs*. Therefore even if *specific risk* is not otherwise included within the scope of a *firm's VaR model permission*, a *firm* should be able to demonstrate that its *VaR model* captures *specific risk*.
 - (4) A *firm* should also be able to demonstrate that its *VaR model* adequately captures correlations, concentration risk and risks associated with the illiquidity of the *CIU* itself should this be deemed necessary (see *BIPRU 7.10.32G*).

- (5) A *firm* may use a look-through approach, under which the *VaR model* estimates are based on the underlying *positions*. If a *firm* uses a look through approach it should also ensure that all the relevant risk factors relating to the underlying *positions* are captured. *BIPRU 7.7* (Position risk requirements for collective investment undertakings) sets out *rules* relating to the look through approach when a *firm* is using the *VaR model approach*.

Model standards: Risk factors: Specific risk

- 7.10.46 R (1) If a *firm's VaR model* covers the calculation of *PRR* with respect to *specific risk* the *firm* must meet the *VaR specific risk minimum requirements* in addition to the other requirements of *BIPRU 7.10*.
- (2) The *VaR model* must explain the historical price variation in the portfolios concerned.
- (3) The *VaR model* must capture concentration in terms of magnitude and changes of composition of the portfolios concerned.
- (4) The *VaR model* must be robust to an adverse environment.
- (5) The *VaR model* must capture name-related basis risk. That is the *firm* must be able to demonstrate that the *VaR model* is sensitive to material idiosyncratic differences between similar but not identical *positions*.
- (6) The *VaR model* must capture event risk.
- (7) In addition to the other requirements in *BIPRU 7.10*, a *firm* must have an approach in place to capture, in the calculation of its capital requirements, the default risk of its *trading book positions* that is incremental to the default risk captured by the *VaR measures* as specified in this *rule*, *BIPRU 7.10.48R*, *BIPRU 7.10.49R* and *BIPRU 7.10.107R* (Backtesting: Specific risk backtesting).
- (8) A *firm* must be able to demonstrate that the approach referred to in (7) meets soundness standards comparable to the approach set out in *BIPRU 4* (The IRB approach), under the assumption of a constant level of risk, and adjusted where appropriate to reflect the impact of liquidity, concentrations, hedging and optionality.
- 7.10.47 G This paragraph provides *guidance* on *BIPRU 7.10.46R(3)*. Take as an example a *VaR model* based on a factor model or on a historical simulation model. The ability of the model to explain price variation could be demonstrated by a statistical comparison over the same period of time between actual price changes on the portfolio and the profit and loss impact of risk factors included within the model. A *firm* may wish to include an estimate of residual variation not explained by the model.

- 7.10.48 R (1) Where a *firm* is subject to event risk that is not reflected in its *VaR measure*, because it is beyond the 10-day holding period and 99 percent confidence interval (low probability and high severity events), the *firm* must ensure that the impact of such events is factored into its internal capital assessment.
- (2) A *firm's VaR model* must conservatively assess the risk arising from less liquid *positions* and *positions* with limited price transparency under realistic market scenarios. In addition, the *VaR model* must meet minimum data standards. Proxies must be appropriately conservative and may be used only where available data is insufficient or is not reflective of the true volatility of a *position* or portfolio.
- 7.10.49 R As techniques and best practices evolve, a *firm* must avail itself of these advances.
- 7.10.50 R To avoid double counting capital requirements under *BIPRU 7.10.46R(7)* a *firm* may, when calculating its incremental default charge, take into account the extent to which default risk has already been incorporated into the *VaR* calculation, especially for risk *positions* that could and would be closed within 10 *business days* in the event of adverse market conditions or other indications of deterioration in the credit environment. Where a *firm* captures its incremental default risk through a surcharge, it must have in place methodologies for validating the measure.
- 7.10.51 R A *firm* that does not capture the incremental default risk through an internally developed approach must calculate the surcharge through an approach consistent with either the *standardised approach* to credit risk or the *IRB approach*.
- 7.10.52 R With respect to *securitisation exposures* that would be subject to a deduction treatment in the calculation of its *capital resources* or *risk weighted* at 1250% as set out in *BIPRU 9*, these *positions* (cash or synthetic) are subject to a capital charge that is no less than set forth under that treatment. A *firm* that is a dealer in these *exposures* may apply a different treatment where it could demonstrate to the *FSA*, in addition to trading intent, that a liquid two-way market exists for the *securitisation exposures* or, in the case of *synthetic securitisations* that rely solely on credit derivatives, for the *securitisation exposures* themselves or all their constituent risk components. For the purposes of this *rule* a two-way market is deemed to exist where there are independent good faith offers to buy and sell so that a price reasonably related to the last sales price or current good faith competitive bid and offer quotations can be determined within one day and settled at such a price within a relatively short time conforming to trade custom. For a *firm* to apply a different treatment, it must have sufficient market data to ensure that it fully captures the concentrated default risk of these *exposures* in its internal approach for measuring the incremental default risk in accordance with the *VaR specific risk minimum requirements*.

Model standards: Materiality

- 7.10.53 R *A firm's VaR model must capture accurately all material price risks for positions within the scope of its VaR permission, including risks relating to options or option-like positions. The firm must ensure that, if its VaR model does not accurately capture any material risk, the firm has capital resources adequate to cover that risk. These capital resources must be additional to those required to meet its capital resources requirement.*
- 7.10.54 G *For example, BIPRU 7.10.53R might involve creating and documenting a prudent incremental PRR charge for the risk not captured in the VaR model and holding sufficient capital resources against this risk. In that case the firm should hold capital resources at least equal to its capital resources requirement as increased by adding this incremental charge to the model PRR. Alternatively the firm may make valuation adjustments through its profit and loss reserves to cover this material risk. These reserves should be transparent to senior management and auditable. The reserves should also be consistent with GENPRU 1.3 (Valuation) while not being excessive in relation to the principles of mark-to-market accounting. Therefore, a firm should be able to satisfy the FSA that all material risks are adequately addressed, whether this be through the VaR model, through taking an incremental PRR charge or through making an adjustment through profit and loss reserves.*
- 7.10.55 G *A firm is expected ultimately to move towards full revaluation of option positions. For portfolios containing path-dependent options, an instantaneous price shock applied to a static portfolio will be acceptable provided that the risks not captured by such an approach are not material. Where a risk is immaterial and does not justify further capital resources, that immaterial risk should still be documented.*

Risk management standards: Introduction

- 7.10.56 G *A firm with a complex portfolio is expected to demonstrate greater sophistication in its modelling and risk management than a firm with a simple portfolio. For example, a firm will be expected to consider, where necessary, varying degrees of liquidity for different risk factors, the complexity of risk modelling across time zones, product categories and risk factors. Some trade-off is permissible between the sophistication and accuracy of the model and the conservatism of underlying assumptions or simplifications.*
- 7.10.57 G *A firm should be able to demonstrate that it meets the risk management standards set out in the VaR model permission on a legal entity basis. This is particularly important for a subsidiary undertaking in a group subject to matrix management where the business lines cut across legal entity boundaries.*

Risk management standards: General requirement

- 7.10.58 R A *firm* must have a conceptually sound risk management system surrounding the use of its *VaR model* that is implemented with integrity and that in particular meet the qualitative standards set out in *BIPRU 7.10.59R - BIPRU 7.10.82R*.

Risk management standards: Use requirement

- 7.10.59 R A *firm* must base its *model PRR* calculation on the output of the *VaR model* which is used for its internal risk management rather than one developed specifically to calculate its *PRR*.
- 7.10.60 R The *VaR model* must be fully integrated into the daily risk management process of the *firm*, and serve as the basis for reporting risk exposures to *senior management* of the *firm*.
- 7.10.61 G A *firm's VaR model* output should be an integral part of the process of planning, monitoring and controlling a *firm's* market risk profile. The *VaR model* should be used in conjunction with internal trading and exposure limits. The links between these limits and the *VaR model* should be consistent over time and understood by *senior management*. The *firm* should regard risk control as an essential aspect of the business to which significant resources need to be devoted.

Risk management standards: Risk control unit

- 7.10.62 R A *firm* must have a risk control unit which is independent from business trading units and which reports directly to *senior management*. It:
- (1) must be responsible for designing and implementing the *firm's* risk management system;
 - (2) must produce and analyse daily reports on the output of the *VaR model* and on the appropriate measures to be taken in terms of the trading limits; and
 - (3) conduct the initial and on-going validation of the *VaR model*.

Risk management standards: Senior management

- 7.10.63 R A *firm's governing body* and *senior management* must be actively involved in the risk control process, and the daily reports produced by the risk control unit must be reviewed by a level of management with sufficient authority to enforce both reductions of *positions* taken by individual traders as well as in the *firm's* overall risk exposure.
- 7.10.64 G It is the responsibility of a *firm's* own management to ensure the accuracy and integrity of its *VaR model*. This responsibility includes obtaining appropriate independent validation of the *VaR model*.

Risk management standards: Skilled staff

- 7.10.65 R A *firm* must have sufficient numbers of staff skilled in the use of sophisticated models in the trading, risk control, audit and back office areas.

Risk management standards: Controls and compliance

- 7.10.66 R A *firm* must establish, document and maintain policies, controls and procedures to an auditable standard:
- (1) concerning the operation of its *VaR model approach*; and
 - (2) for monitoring and ensuring compliance with the policies, controls and procedures in (1).

Risk management standards: Documentation

- 7.10.67 R A *VaR model* must be adequately documented.
- 7.10.68 G (1) An example of documents required by *BIPRU 7.10.67R* may be a manual that describes the basic principles of the risk management framework, clearly setting out empirical techniques, principles and assumptions used within it.
- (2) This documentation should be of sufficient detail for the *FSA* to be able to develop a clear understanding of how the *VaR model* works from that documentation on its own.

Risk management standards: Track record

- 7.10.69 R A *firm's VaR model* must have a proven track record of acceptable accuracy in measuring risk.

Risk management standards: Development validation

- 7.10.70 R Adequate procedures must be in place to ensure that model changes are validated before being introduced.
- 7.10.71 G The procedures in *BIPRU 7.10.70R* need not necessarily rely on backtesting using a back-run of recreated data.

Risk management standards: Stress testing

- 7.10.72 R (1) A *firm* must frequently conduct a rigorous programme of stress testing. The results of these tests must be reviewed by *senior management* and reflected in the policies and limits the *firm* sets.
- (2) The programme must particularly address:
- (a) concentration risk;
 - (b) illiquidity of markets in stressed market conditions;

- (c) one way markets;
 - (d) event and jump to default risks;
 - (e) non linearity of products;
 - (f) deep out of the money *positions*;
 - (g) *positions* subject to the gapping of prices; and
 - (h) other risks that may not be captured appropriately in the *VaR model* (for example, recovery rate uncertainty, implied correlations and skew risk).
- (3) The shocks applied must reflect the nature of the portfolios and the time it could take to hedge out or manage risks under severe market conditions.

7.10.73 G The stress testing under *BIPRU 7.10.72R* should be taken into account under the *overall Pillar 2 rule*.

Risk management standards: Valuation

7.10.74 R A *firm* must have procedures to ensure that the valuation of assets and liabilities is appropriate, that valuation uncertainty is identified and appropriate reserving is undertaken where necessary.

Risk management standards: Risk review

7.10.75 R At least once a year, a *firm* must conduct, as part of its regular internal audit process, a review of its risk management process. This review must include both the activities of the business trading units and of the independent risk control unit, and must be undertaken by suitably qualified staff independent of the areas being reviewed. This review must consider, at a minimum:

- (1) the adequacy of the documentation of the risk management system and process;
- (2) the organisation of the risk control unit;
- (3) the integration of market risk measures into daily risk management;
- (4) the integrity of the management information system;
- (5) the process for approving risk pricing models and valuation systems used in front and back offices;
- (6) the validation of any significant changes in the risk management process;
- (7) the scope of risks and products captured by the *VaR model*;

- (8) the accuracy and completeness of *position* data;
- (9) the process used to ensure the consistency, timeliness, independence and reliability of data sources (including the independence of such data sources);
- (10) the accuracy and appropriateness of volatility and correlation assumptions;
- (11) reserving policies and the accuracy of the valuation procedures and risk sensitivity calculations;
- (12) the process employed to evaluate the *VaR model's* accuracy, including the programme of backtesting;
- (13) the controls surrounding the development of the *VaR model*; and
- (14) the process employed to produce the calculation of the *model PRR*.

Risk management standards: Validation and backtesting

- 7.10.76 G The *FSA* will require a period of initial monitoring or live testing before a *VaR model* can be recognised. This will be agreed on a *firm by firm* basis.
- 7.10.77 G In assessing the *firm's VaR model* and risk management, the *FSA* has regard to the results of internal model validation procedures used by the *firm* to assess the *VaR model*.
- 7.10.78 R A *firm* must have processes in place to ensure that its *VaR model* has been adequately validated by suitably qualified parties independent of the development process to ensure that it is conceptually sound and adequately captures all material risks. This validation must be conducted when the *VaR model* is initially developed and when any significant changes are made to the *VaR model*. The validation must also be conducted on a periodic basis but especially where there have been any significant structural changes in the market or changes to the composition of the portfolio which might lead to the *VaR model* no longer being adequate. As techniques and best practices evolve, a *firm* must avail itself of these advances. Model validation must not be limited to backtesting, but must, at a minimum, also include the following:
 - (1) tests to demonstrate that any assumptions made within the *VaR model* are appropriate and do not underestimate or overestimate the risk (including testing of the validity of the assumptions and approximations underlying the *VaR model*);
 - (2) in addition to the regulatory backtesting programmes, a *firm* must carry out its own model validation tests in relation to the risks and structures of its portfolios, such as statistical validation techniques and other methods of measuring performance and validity;

- (3) the use of hypothetical portfolios to ensure that the *VaR model* is able to account for particular structural features that may arise, for example material basis risks and concentration risk; and
 - (4) investigation of the limitations of the *VaR model* including testing of the accuracy of parts of the *VaR model* as well as of the whole.
- 7.10.79 G (1) In addition to regulatory backtesting programs, testing for model validation should be carried out using additional tests which may include for example:
- (a) testing carried out using hypothetical changes in portfolio value that would occur were end of day positions to remain unchanged;
 - (b) testing carried out for longer periods than required for the regular backtesting programme (for example, 3 years);
 - (c) testing carried out using confidence intervals other than the 99 percent interval required under the quantitative requirements in *BIPRU 7.10*; and
 - (d) testing of parts of portfolios.
- (2) A longer time period generally improves the power of backtesting. However a longer time period may not be desirable if the *VaR model* or market conditions have changed to the extent that historical data is no longer relevant.
- 7.10.80 G Further material on backtesting can be found in *BIPRU 7.10.91G - BIPRU 7.10.112G*.

Risk management standards: Information technology

- 7.10.81 G In assessing whether the *VaR model* is implemented with integrity as described in *BIPRU 7.10.58R* (Stress testing), the *FSA* will consider in particular the information technology systems used to run the model and associated calculations. The assessment may include:
- (1) feeder systems; risk aggregation systems; time series databases; the *VaR model* system; stress testing system; the backtesting system including profit and loss cleaning systems where appropriate; data quality; reconciliations and checks on completeness of capture;
 - (2) system development, change control and documentation; security and audit trails; system availability and contingency procedures; network adequacy; and
 - (3) operational statistics relating to the *VaR model* production process, including, for example, statistics relating to timeliness, number of re-runs required and the reliability of data feeds.

Risk management standards: Controls

- 7.10.82 R A *firm* must ensure that it has adequate controls relating to:
- (1) the derivation of the *model PRR*;
 - (2) the integrity of the backtesting programme, including the calculation of the profit and loss account;
 - (3) the integrity and appropriateness of the *VaR model*, including the *VaR model's* geographic coverage and the completeness of data sources;
 - (4) the *VaR model's* initial and ongoing development, including independent validation;
 - (5) the valuation models, including independent validation; and
 - (6) the adequacy, security and integrity of the information technology infrastructure.

Stress testing

- 7.10.83 R *BIPRU 7.10.84R-BIPRU 7.10.90G* relate to stress testing of a *VaR model* (see *BIPRU 7.10.72R* (Risk management standards: Stress testing)).
- 7.10.84 G Stress testing is a way of identifying the risk to a *firm* posed by a breakdown of model assumptions or by low-probability events. Where stress tests reveal unacceptable vulnerability to a given set of circumstances, a *firm* should take prompt steps to manage those risks appropriately, for example by hedging against the outcome or reducing the size of the *firm's exposures*.
- 7.10.85 R A *firm* must have the capacity to run daily stress tests.
- 7.10.86 R Stress testing must involve identifying market scenarios or other low probability events in all types of risks that generate the greatest losses on a *firm's* portfolio.
- 7.10.87 R A *firm* must periodically and actively identify all the worst case scenarios that are relevant to its portfolio. Scenarios used must be appropriate to test the effect of adverse movements in market volatilities and correlations and the effect of any change in the assumptions underlying the *VaR model*. Scenarios involving low probability market events must nevertheless be plausible.
- 7.10.88 R Stress testing must capture non-linear effects.
- 7.10.89 R A *firm* must have procedures to assess and respond to the results produced from stress testing. In particular, stress testing results must be:

- (1) used to evaluate its capacity to absorb such losses or identify steps to be taken to reduce risk; and
- (2) communicated routinely to *senior management* and periodically to the *governing body*.

7.10.90 G A *firm* may want to conduct the more complex stress tests at longer intervals or on an ad hoc basis.

Backtesting: Introduction

7.10.91 G Backtesting is the process of comparing value-at-risk risk measures to portfolio performance. It is intended to act as one of the mechanisms for the ongoing validation of a *firm's VaR model* and to provide incentives for *firms* to improve their *VaR measures*.

7.10.92 G It is a condition for granting a *VaR model permission* that a *firm* should have a backtesting programme in place and should provide three months of backtesting history.

7.10.93 G Backtesting conducted only at a whole portfolio level using a single measure of profit and loss has limited power to distinguish an accurate *VaR model* from an inaccurate one. Backtesting should therefore be regarded as an additional safeguard rather than a primary validation tool. Such testing does however form the basis of the *FSA's plus factor* system. The test has been chosen as the basis of the backtesting regime because of its simplicity. A *firm* will therefore be expected to complement this backtesting with more granular backtesting analysis and involving more than one measure of profit and loss (i.e. both a *clean profit and loss figure* and a *clean hypothetical profit and loss figure*).

7.10.94 R A *firm* must have the capacity to analyse and compare its *clean profit and loss figures* and *clean hypothetical profit and loss figures* to the *VaR measure*, both at the level of the whole portfolio covered by the *VaR model permission* and at the level of individual books that contain material amounts of risk.

7.10.95 G Clean profit and loss backtesting should be used for regulatory backtesting and used to calculate *plus factors*. Hypothetical profit and loss backtesting is used for model validation and for reporting to the *FSA*.

Backtesting: Basic testing requirements

7.10.96 R A *firm* must, on each *business day*, compare each of its 250 most recent *business days' clean profit and loss figures* (ending with the *business day* preceding the *business day* in question) with the corresponding *one-day VaR measures*.

7.10.97 G Generally the *positions* underlying the profit and loss account and *VaR measures* should not be materially different.

Backtesting: One day VaR measure

- 7.10.98 R The *one-day VaR measure* for a particular *business day* is the *VaR number* for that *business day* calibrated to a one *business day* holding period and a 99% one-tailed confidence level.

Backtesting: Calculating the clean profit and loss

- 7.10.99 G The ultimate purpose of backtesting is to assess whether capital is sufficient to absorb actual losses. Therefore backtesting should be performed using a measure of actual daily profit and loss. Actual daily profit and loss means the day's profit and loss arising from trading activities within the scope of the *VaR model permission*. This measure should, however, be 'cleaned' using *BIPRU 7.10.100R*. A clean profit and loss measure is used to backtest against in order to ensure that backtesting results are not biased by the inclusion in profit and loss of non-modelled factors.
- 7.10.100 R The *clean profit and loss figure* for a particular *business day* is the *firm's* actual profit or loss for that day in respect of the trading activities within the scope of the *firm's VaR model permission*, adjusted by stripping out:
- (1) fees and commissions;
 - (2) brokerage;
 - (3) additions to and releases from reserves which are not directly related to market risk (e.g. administration reserves); and
 - (4) any inception profit exceeding an amount specified for this purpose in the *firm's VaR model permission* (where inception profit is defined as any profit arising immediately on entering into a new transaction).
- 7.10.101 G The definition of *clean profit and loss figure* may be amended or replaced in an individual *VaR model permission* if the *firm* can demonstrate to the *FSA* that the alternative method meets the spirit and purpose of the provisions in *BIPRU 7.10* about the *clean profit and loss figure*.
- 7.10.102 G The *FSA* will review as part of a *firm's VaR model permission* application the processes and documentation relating to the derivation of profit and loss used for backtesting. A *firm's* documentation should clearly set out the basis for cleaning profit and loss. To the extent that certain profit and loss elements are not updated every day (for example certain reserve calculations) the documentation should clearly set out how such elements are included in the clean profit and loss series.

Backtesting: Definition of backtesting exception

- 7.10.103 R A *backtesting exception* is deemed to have occurred for any *business day* if the *clean profit and loss figure* for that *business day* shows a loss, which in absolute magnitude, exceeds the *one-day VaR measure* for that *business day*. The only exception is if that *business day* is identified in the *firm's VaR model permission* as giving rise to an excluded *backtesting exception*.

Backtesting: Obligation to notify the FSA

- 7.10.104 R If a *backtesting exception* occurs, the *firm* must notify its usual supervisory contact at the *FSA* orally by close of business two *business days* after the *business day* for which the *backtesting exception* occurred. Within five *business days* following the end of each *Month*, the *firm* must submit to the *FSA* a written account of the previous *Month's backtesting exceptions* (if any). This explanation must include the causes of the *backtesting exceptions*, an analysis of whether the *backtesting exceptions* indicate a deficiency in the *firm's VaR model* and the *firm's* planned response (if any).

Backtesting: Summary of the backtesting cycle

- 7.10.105 G (1) This paragraph gives *guidance* on the backtesting calculation and reporting process in *BIPRU 7.10.96R - BIPRU 7.10.104R*.
- (2) Let the day on which the loss referred to in *BIPRU 7.10.100R* is made be day *n*. The value-at-risk measure for that day will be calculated on day *n-1*, or overnight between day *n-1* and day *n*. Profit and loss figures are produced on day *n+1*, and backtesting also takes place on day *n+1*. The *firm's* supervisor should be notified of any *backtesting exceptions* by close of business on day *n+2*.
- (3) Any *backtesting exception* initially counts for the purpose of the calculation of the *plus factor* even if subsequently the *FSA* agrees to exclude it under the process described in *BIPRU 7.10.106G*. Thus, where the *firm* experiences a *backtesting exception* and already has four or more *backtesting exceptions* for the previous 250 *business days*, changes to the *multiplication factor* arising from changes to the *plus factor* become effective at *n+3* (using the time-line terminology in (2)).

Backtesting: Process for disregarding backtesting exceptions

- 7.10.106 G (1) This paragraph gives *guidance* on the process for excluding *backtesting exceptions* as referred to in *BIPRU 7.10.103R*.

- (2) The *FSA* will respond flexibly to *backtesting exceptions*. However, the *FSA*'s starting assumption will be that a *backtesting exception* should be taken into account for the purpose of the calculation of *plus factors*. If the *firm* believes that a *backtesting exception* should not count for that purpose, then it should seek a variation of its *VaR model permission* in order to exclude that particular *backtesting exception*. The *FSA* will then decide whether to agree to such a variation.
- (3) One example of when a *firm's backtesting exception* might properly be disregarded is when it has arisen as a result of a risk that is not captured in its *VaR model* but against which *capital resources* are already held.

Backtesting: Specific risk backtesting

- 7.10.107 R If a *firm's VaR model permission* covers *specific risk*, the *firm* must validate its *VaR model* through backtesting aimed at assessing whether *specific risk* is being accurately captured. This backtesting must be carried out in accordance with the provisions of its *VaR model permission*. If the *VaR model permission* provides for this backtesting to be performed on the basis of relevant sub-portfolios, these must be chosen in a consistent manner.
- 7.10.108 G *Specific risk* backtesting involves the backtesting of a standalone *specific risk VaR* measure against a profit and loss series determined by reference to exposure risk factors categorised as *specific risk*. Alternatively *specific risk* backtesting may take the form of regular backtesting of trading books and portfolios that are predominantly exposed to risk factors categorised as *specific risk*. The precise requirements for *specific risk* backtesting will be specified in the *firm's VaR model permission* as will the definition of a *specific risk backtesting exception*.

Backtesting: Multiple exceptions

- 7.10.109 R If ten or more *backtesting exceptions* or ten or more *specific risk backtesting exceptions* are recorded in a 250 *business day* period, a *firm* must take immediate corrective action.
- 7.10.110 G Where backtesting reveals severe problems with the basic integrity of the *VaR model*, the *FSA* may withdraw model recognition. In particular, if ten or more *backtesting exceptions* are recorded in a 250 *business day* period, the *FSA* may apply a *plus factor* greater than one or the *FSA* may consider revoking a *firm's VaR model permission*. The *FSA* may also consider revoking a *firm's VaR model permission* if ten or more *specific risk backtesting exceptions* occur in such a period.

Backtesting: Hypothetical profit and loss

- 7.10.111 R A *firm* must also perform backtesting against a *clean hypothetical profit and loss figure* with respect to each *business day*. A *clean hypothetical profit and loss figure* for a *business day* means the *clean profit and loss figure* that would have occurred for that *business day* if the portfolio on which the *VaR number* for that *business day* is based remained unchanged.
- 7.10.112 G (1) A *clean hypothetical profit and loss figure* is based on the day's change in the value of the same portfolio that was used to generate the value-at-risk forecast.
- (2) Backtesting under *BIPRU 7.10.111R*, although carried out with respect to each *business day*, need not be carried out each day. A *firm* need only carry it out sufficiently frequently to comply with its reporting requirements under *BIPRU 7.10.129R*. An exception arising out of such backtesting need not be reported to the *FSA* under *BIPRU 7.10.104R*.
- (3) The *firm* may also need to calculate a *clean hypothetical profit and loss figure* in order to produce profit attribution reports and to analyse the cause of *backtesting exceptions*.

Capital calculations: General

- 7.10.113 R The *model PRR* is, for any *business day* (the "relevant" *business day*), calculated in accordance with the following formula:
- (1) the higher of:
- (a) the *VaR number* for the relevant *business day*; and
- (b) the average of its daily *VaR numbers* for each of the 60 *business days* ending with the relevant *business day*, multiplied by the *multiplication factor* for the relevant *business day*; and
- (2) (in the case of a *VaR model permission* that covers *specific risk*) the *incremental default risk charge* for the relevant *business day*.
- 7.10.114 R For any day that is not a *business day*, the *model PRR* is the amount for the prior *business day*.
- 7.10.115 R The *VaR number* for any *business day* means the *VaR measure*, in respect of the previous *business day's* close-of-business *positions* in products coming within the scope of the *VaR model permission*, calculated by the *VaR model* and in accordance with *BIPRU 7.10* and any methodology set out in the *VaR model permission*. The *VaR number* must not be calculated taking into account matters on the *business day* for which it is the *VaR number*.

7.10.116 R The *incremental default risk charge* for any *business day* means the incremental default risk charge required under the provisions in *BIPRU 7.10* about *specific risk*, in respect of the previous *business day's* close-of-business *positions* with respect to which those provisions apply.

7.10.117 G The following equation expresses *BIPRU 7.10.113R* mathematically:

$$PRR_{VaR} = \text{Max} \left\{ VaR_t, fx \frac{1}{60} \sum_{i=0}^{59} VaR_{t-i} \right\} + IDRC$$

where:

- (1) PRR_{VaR} is a *firm's model PRR*;
- (2) VaR_t represents the previous day's value-at-risk figure;
- (3) VaR_{t-i} represents the value-at-risk calculated for *i business days* earlier;
- (4) *f* is the *multiplication factor*; and
- (5) *IDRC* is the *incremental default risk charge* (if applicable).

Capital calculations: Multiplication factors

7.10.118 R The *multiplication factor* for any *business day* is the sum of the *minimum multiplication factor* and the *plus factor* for that day.

7.10.119 R The *minimum multiplication factor* is three or any higher amount the *VaR model permission* defines it as.

7.10.120 G The *minimum multiplication factor* will never be less than three. If the *FSA* does set the *minimum multiplication factor* above three the *VaR model permission* will have a table that sets out the reasons for that add on and specify how much of the add on is attributable to each reason (see *BIPRU 7.10.121R*). If there are weaknesses in the *VaR model* that may otherwise be considered a breach of the minimum standards referred to in *BIPRU 7.10.24R* the *FSA* may apply such an add on to act as a mitigant for those weaknesses.

7.10.121 R Something that would otherwise be a breach of the minimum standards to in *BIPRU 7.10.26R - BIPRU 7.10.53R* is not a breach to the extent that that thing is identified in the *firm's VaR permission* as a reason for an increase in the *minimum multiplication factor* above 3.

- 7.10.122 G Typically, any add on will be due to a specific weakness in systems and controls identified during the *FSA's* review that the *FSA* does not consider material enough to justify withholding overall model recognition. The *firm* will be expected to take action to address the reasons for any add on. The *FSA* will then review these periodically and, where satisfactory action has been taken, the add on will be removed through a variation of the *VaR model permission*.
- 7.10.123 G The *plus factor* system is designed so that the more often a *VaR model* has under-predicted losses in the past, the higher should be the capital requirement based on the *VaR model*. It is intended to provide a capital incentive for the *firm* to continue to improve the accuracy of its *VaR model*.
- 7.10.124 R The table in *BIPRU 7.10.125R* sets out the *plus factors* to be added to the *minimum multiplication factor* for any *business day*. It is based on the number of *backtesting exceptions* that occurred during the backtesting period as referred to in *BIPRU 7.10.96R* (Backtesting: Basic testing requirements) ending three *business days* preceding the *business day* for which the *model PRR* is being calculated.
- 7.10.125 R Table: Backtesting plus factors
This table belongs to *BIPRU 7.10.124R*

Zone	Number of recorded exceptions	Plus factor
Green	4 or less	0.00
Yellow	5	0.40
	6	0.50
	7	0.65
	8	0.75
	9	0.85
Red	10 or more	1.00

- 7.10.126 G A *VaR model* that correctly predicts a one-tailed 99% confidence level is expected to produce, on average, 2.5 *backtesting exceptions* every 250 days. Random events may cause the number of *backtesting exceptions* actually observed to vary. The *plus factor* system is designed to take this into account. Hence *plus factors* are only imposed on the *firm* if it has five or more recorded *backtesting exceptions*. Therefore, where a *backtesting exception* appears to be caused simply by chance, it will not be appropriate for a *VaR model permission* to be varied to exclude that *backtesting exception* as described in BIPRU 7.10.106G (Backtesting: Process for disregarding backtesting exceptions).

Capital calculations: Specific risk surcharge: transitional requirements

- 7.10.127 G *Firms* who gained model recognition before 1 January 2007 will be permitted to calculate *PRR* for *specific risk* in accordance with the methodology they were permitted to use immediately before that date instead of capturing event and default risk in their models (see BIPRU TP 14 (Market risk: VaR models)). This treatment will not be available to a *firm* that gains model recognition after that date.

Reporting procedures and requirements

- 7.10.128 G A *VaR model permission* will contain requirements for what the *firm* should report to the *FSA* and the procedures for reporting. The precise requirements will vary from *VaR model permission* to *VaR model permission*. BIPRU 7.10.129R-BIPRU 7.10.130R set out what the *FSA* regards as the standard requirements.
- 7.10.129 R A *firm* must, no later than the number of *business days* after the end of each quarter specified in the *VaR model permission* for this purpose, submit, in respect of that quarter, a report to the *FSA* about the operation of the *VaR model*, the systems and controls relating to it and any changes to the *VaR model* and those systems and controls. Each report must outline as a minimum the following information in respect of that quarter:
- (1) methodological changes and developments to the *VaR model*;
 - (2) the introduction of all new pricing models used in connection with the *VaR model* and any changes to any pricing models used in connection with the *VaR model*, including details of any material associated valuation or risk management issues;
 - (3) a summary of backtesting performance against *clean profit and loss figures* and *clean hypothetical profit and loss figures*, which must be provided in electronic format as stipulated by the *VaR model permission*;
 - (4) (if the *VaR model permission* covers *specific risk*) the results of the *specific risk* backtesting including *specific risk backtesting exceptions*;

- (5) any change to any feeder or pre-processing systems in connection with the *VaR model*, including changes to any of the systems set out in the list described in *BIPRU 7.10.131G(1)* (as it exists at the date of the *VaR model permission*), and any introduction of a new such system;
- (6) any changes to the products coming within the scope of the *VaR model*;
- (7) any material changes or additions to any of the matters referred to in the *firm's* internal documentation in relation to the *VaR model* (as it exists at the date of the *VaR model permission*) or to any matters subsequently notified under (7);
- (8) any changes in *senior management*;
- (9) an up-to-date list of products covered by the *VaR model permission* showing all changes made since the *VaR model permission* was granted; and
- (10) where applicable (nil returns are not required), details of:
 - (a) any use of a changed historical observation period in accordance with *BIPRU 7.10.30R* or any change in the use of any weighting scheme as described in *BIPRU 7.10.33R*;
 - (b) any data series becoming unreliable as described in *BIPRU 7.10.31R* and any subsequent use of alternative value-at-risk measurement techniques;
 - (c) the frequency of updating data sets being increased in accordance with *BIPRU 7.10.34R*;
 - (d) any change in the method employed to derive 10-day *VaR measures* (see *BIPRU 7.10.28R*);
 - (e) to the extent that the use of correlations is permitted by a *firm's VaR model permission*, a summary of any notifications that are required under *BIPRU 7.10.37R*; and
 - (f) the *VaR model* not accurately capturing risks (as referred to in *BIPRU 7.10.53R*) and any steps taken under *BIPRU 7.10.53R*.

7.10.130 R A *firm* must provide to, and discuss with, the *FSA* details of any significant planned changes to the *VaR model* before those changes are implemented. These details must include information about the nature of the change and an estimate of the impact on *VaR numbers* and the *incremental default risk charge*.

Updating the VaR model permission

- 7.10.131 G The *VaR model permission* will generally contain a list of the following:
- (1) feeder systems and pre-processing systems;
 - (2) products covered by the *VaR model permission*; and
 - (3) the *firm's* internal documentation in relation to the *VaR model*.
- 7.10.132 G The information in *BIPRU 7.10.131G* will vary over time. It is therefore not included in a *VaR model permission* as a *rule* but for information only. The *FSA* will update that information regularly in accordance with information supplied under *BIPRU 7.10.129R*. That updating will not amount to a variation of the *VaR model permission*.

Link to standard *PRR* rules: Incorporation of the model output into the capital calculation

- 7.10.133 G A *VaR model permission* will modify *GENPRU 2.1.52R* (Calculation of the market risk capital requirement) to provide that a *firm* should calculate its *market risk capital requirement* in accordance with *BIPRU 7.10* to the extent set out in the *VaR model permission*.
- 7.10.134 G By modifying *GENPRU 2.1.52R* (Calculation of the market risk capital requirement) to allow the *firm* to use the *VaR model* to calculate all or part of its *PRR* for certain positions, the *FSA* is treating it like an application *rule*. The modification means that the *PRR* calculation set out in *BIPRU 7.10* supersedes the *standard market risk PRR rules* for products and risks coming within the scope of the *VaR model permission*.
- 7.10.135 R To the extent that a *position* does not fall within the scope of a *firm's VaR model permission* the *firm* must calculate the *PRR* under the *standard PRR rules* or, as applicable, those provisions as modified by the *firm's CAD 1 waiver*.
- 7.10.136 R
- (1) This *rule* applies to a *position* of a type that comes within the scope of a *firm's VaR model permission*.
 - (2) If, where the *standard market risk PRR rules* apply, a *position* is subject to a *PRR charge* and the *firm's VaR model permission* says that it covers the risks to which that *PRR charge* relates, the *firm* must, for those risks, calculate the *PRR* for that *position* under the *VaR model approach* rather than under the *standard market risk PRR rules*.
 - (3) If, where the *standard market risk PRR rules* apply, a *position* is subject to one or more *PRR charges* and the *firm's VaR model permission* does not cover all the risks to which those *PRR charges* relate, the *firm* must calculate the *PRR* for that *position* under the *VaR model approach* (for those risks that are covered) and under the *standard market risk PRR rules* (for those other risks).

- (4) Where the *standard market risk PRR rules* distinguish between *specific risk* and *general market risk* a *firm's VaR model permission* covers *specific risk* to the extent that it says it does. If the *firm's VaR model permission* does not cover *specific risk*, *BIPRU 7.10.143R* and *BIPRU 7.10.144R* apply.
- (5) If a *firm's VaR model permission* covers *positions* in *CIUs* it covers *specific risk* with respect to those *positions*.
- 7.10.137 R A *firm* may exclude from the *VaR model approach* immaterial risks within the scope of its *VaR model permission*. If a *firm* does so it must instead apply the *standard market risk PRR rules* to those risks.
- 7.10.138 R (1) If a *firm* calculates its *market risk capital requirement* using a combination of the *standard market risk PRR rules* and either the *VaR model approach* or the *VaR model approach* with the *CAD 1 model approach* the *PRR* from each method must be added together.
- (2) A *firm* must take appropriate steps to ensure that all of the approaches are applied in a consistent manner.
- 7.10.139 G An example of the effect of *BIPRU 7.10.138R* is that where a *firm* normally calculates the *PRR* for a particular portfolio using a *VaR model*, a *firm* should not switch to the *standard market risk PRR rules* purely to achieve a more attractive *PRR*.
- 7.10.140 R If:
- (1) the *standard market risk PRR rules* provide for a choice of which of the *PRR charges* to use or specify that one type must be used in some circumstances and that another type must be used in other circumstances;
- (2) one of those types is disapplied under *BIPRU 7.10.136R*; and
- (3) the other type is not disapplied;
- the *firm*:
- (4) must use the *VaR model approach* if under the *standard market risk PRR rules* the *firm* must use the *standard market risk PRR rules* in (2); and
- (5) may use the *VaR model approach* if under the *standard market risk PRR rules* the *firm* may use the *standard market risk PRR rules* in (2).

7.10.141 G The treatment of a *convertible* is an example of a situation in which *BIPRU 7.10.140R* applies. The table in *BIPRU 7.3.3G* (Table: Instruments which result in notional positions) shows that there are circumstances in which under the *standard market risk PRR rules* a *firm* should calculate an *equity PRR* and that there are circumstances in which a *firm* may choose between calculating an *equity PRR* and an *interest rate PRR*. *BIPRU 7.10.140R* would be relevant if a *firm's VaR model permission* only covers one of *equity risk* and *interest rate risk*.

7.10.142 R The *standard market risk PRR rules* for the *option PRR* are only disappplied to the extent that the derived positions arising under *BIPRU 7.6.13R* (Table: Derived positions) come within the scope of the *VaR model permission*.

Link to standard *PRR rules*: General market risk only

7.10.143 R If a *firm's VaR model permission* covers *interest rate general market risk* but not *interest rate specific risk*, the *firm* must calculate the *interest rate PRR* so far as it relates to *interest rate specific risk* in accordance with the *standard market risk PRR rules* except that the *firm* must not use the basic *interest rate PRR* calculation in *BIPRU 7.3.45R* (Basic interest rate calculation for equity instruments).

Link to standard *PRR rules*: General market risk only

7.10.144 R If a *firm's VaR model permission* covers *equity general market risk* but not *equity specific risk*, the *firm* must calculate the *equity PRR* so far as it relates to *equity specific risk* in accordance with the *standard market risk PRR rules* except that the *PRR* for *equity specific risk* must be calculated under the *standard equity method*.

Link to standard *PRR rules*: Miscellaneous

7.10.145 R (1) To the extent that a *firm's VaR model permission* does not allow it to use an approach set out in *BIPRU 7.10* the relevant provisions in *BIPRU 7.10* do not apply to that *firm*.

(2) If a provision of the *Handbook* refers to *BIPRU 7.10*, that reference must, in the case of a particular *firm* with a *VaR model permission*, be treated as excluding provisions of *BIPRU 7.10* that do not apply under the *VaR model permission* and as taking into account any modifications to *BIPRU 7.10* made by the *VaR model permission*. Such references also include requirements and conditions contained in the *VaR model permission* but not *BIPRU 7.10* and to the *rules* modified by the *VaR model permission*.

Requirement to use value at risk methodology

7.10.146 R A *VaR model* must be a value-at-risk model. It must provide an estimate of the worst expected loss on a portfolio resulting from market movements over a period of time with the specified confidence level.

Ceasing to meet the requirements of BIPRU 7.10

- 7.10.147 G If a *firm* ceases to meet any of the requirements set out in *BIPRU 7.10*, the *FSA*'s policy is that the *VaR model permission* should cease to have effect. In part this will be achieved by making it a condition of a *firm's VaR model permission* that it complies at all times with the minimum standards referred to in *BIPRU 7.10.26R - BIPRU 7.10.53R*. Even if they are not formally included as conditions, the *FSA* is likely to consider revoking the *VaR model permission* if the requirements are not met.
- 7.10.148 R If a *firm* ceases to meet the conditions or requirements in its *VaR model permission* or *BIPRU 7.10* it must notify the *FSA* at once.

Changes to a VaR model

- 7.10.149 R A *firm* may change its *VaR model* to such extent as it sees fit, except that it must not make a change that (either on its own or together with other changes since the date of *VaR model permission*) would:
- (1) be inconsistent with *VaR model permission* or *BIPRU 7.10*; or
 - (2) mean that backtesting in accordance with *BIPRU 7.10* and the *VaR model permission* would result in the use of data that is inappropriate for the purposes of measuring the performance of the *VaR model*.

7.11 Credit derivatives in the trading book

Scope

- 7.11.1 R This section applies to the treatment of credit derivatives in the *trading book*.
- Establishment of positions created by credit derivatives: Treatment of the protection seller
- 7.11.2 R *BIPRU 7.11.3R - BIPRU 7.11.11R* relate to the treatment of the *protection seller* for the purpose of calculating the *securities PRR*. *Positions* are determined in accordance with *BIPRU 7.11.4R - BIPRU 7.11.11R*.
- 7.11.3 R When calculating the *PRR* of the *protection seller*, unless specified differently by other *rules*, the notional amount of the credit derivative contract must be used. For the purpose of calculating the *specific risk PRR charge*, other than for total return swaps, the maturity of the credit derivative contract is applicable instead of the maturity of the obligation.
- 7.11.4 R A total return swap creates a long *position* in the *general market risk* of the reference obligation and a short *position* in the *general market risk* of a *zero-specific-risk security* with a maturity equivalent to the period until the next interest fixing and which is assigned a 0% *risk weight* under the *standardised approach* to credit risk. It also creates a long *position* in the *specific risk* of the reference obligation.
- 7.11.5 R A credit default swap does not create a *position* for *general market risk*. For the purposes of *specific risk*, a *firm* must record a synthetic long *position* in an obligation of the reference entity, unless the derivative is rated externally and meets the conditions for a *qualifying debt security*, in which case a long *position* in the derivative is recorded. If premium or interest payments are due under the product, these cash flows must be represented as notional *positions* in *zero-specific-risk securities*.
- 7.11.6 R A single name credit linked note creates a long *position* in the *general market risk* of the note itself, as an interest rate product. For the purpose of *specific risk*, a synthetic long *position* is created in an obligation of the reference entity. An additional long *position* is created in the issuer of the note. Where the credit linked note has an external rating and meets the conditions for a *qualifying debt security*, a single long *position* with the *specific risk* of the note need only be recorded.
- 7.11.7 R In addition to a long *position* in the *specific risk* of the issuer of the note, a multiple name credit linked note providing proportional protection creates a *position* in each reference entity, with the total notional amount of the contract assigned across the *positions* according to the proportion of the total notional amount that each exposure to a reference entity represents. Where more than one obligation of a reference entity can be selected, the obligation with the highest *risk weighting* determines the *specific risk*.

- 7.11.8 R Where a multiple name credit linked note has an external rating and meets the conditions for a *qualifying debt security*, a single long *position* with the *specific risk* of the note need only be recorded.
- 7.11.9 R A first-asset-to-default credit derivative creates a *position* for the notional amount in an obligation of each reference entity. If the size of the maximum credit event payment is lower than the *PRR* requirement under the method in the first sentence of this *rule*, the maximum payment amount may be taken as the *PRR* requirement for *specific risk*.
- 7.11.10 R A second-asset-to-default credit derivative creates a *position* for the notional amount in an obligation of each reference entity less one (that with the lowest *specific risk PRR* requirement). If the size of the maximum credit event payment is lower than the *PRR* requirement under the method in the first sentence of this *rule*, this amount may be taken as the *PRR* requirement for *specific risk*.
- 7.11.11 R If a first or second-asset to default derivative is externally rated and meets the conditions for a *qualifying debt security*, then the *protection seller* need only calculate one *specific risk* charge reflecting the rating of the derivative.

Establishment of positions created by credit derivatives: Treatment of the protection buyer

- 7.11.12 R For the *protection buyer*, the *positions* are determined as the mirror image of the *protection seller*, with the exception of a credit linked note (which entails no short *position* in the issuer). If at a given moment there is a call option in combination with a *step-up*, such moment is treated as the maturity of the protection. In the case of nth to default credit derivatives, a *firm* that is a *protection buyer* may off-set *specific risk* for n-1 of the underlyings (i.e., the n-1 assets with the lowest *specific risk PRR*).

Recognition of hedging provided by credit derivatives against cash positions

- 7.11.13 R (1) *BIPRU 7.11.14R - BIPRU 7.11.17R* relate to *specific risk PRR* for *trading book positions* hedged by credit derivatives for the purposes of the calculation of the *securities PRR*.
- (2) A *firm* may take an allowance for protection provided by credit derivatives for the purposes in (1) in accordance with the principles set out in the *rules* referred to in (1).
- (3) *BIPRU 7.11.13R - BIPRU 7.11.17R* are subject to the requirements of the *credit default swap PRR methods*.
- 7.11.14 R (1) A *firm* may take full allowance when the value of two legs always move in the opposite direction and broadly to the same extent.
- (2) This will be the case in the following situations:
- (a) the two legs consist of completely identical instruments; or

- (b) a long cash *position* is hedged by a total rate of return swap (or vice versa) and there is an exact match between the reference obligation and the underlying exposure (i.e., the cash *position*).
 - (3) The maturity of the swap itself may be different from that of the underlying exposure for the purposes of (2)(b).
 - (4) In these situations, a *firm* must not apply a *specific risk PRR* to either side of the *position*.
- 7.11.15 R An 80% offset may be applied when the value of two legs always move in the opposite direction and where there is an exact match in terms of the reference obligation, the maturity of both the reference obligation and the credit derivative, and the currency of the underlying exposure. In addition, key features of the credit derivative contract must not cause the price movement of the credit derivative materially to deviate from the price movements of the cash *position*. To the extent that the transaction transfers risk, an 80% *specific risk* offset may be applied to the side of the transaction with the higher *PRR*, while the *specific risk* requirements on the other side are zero.
- 7.11.16 R
- (1) A *firm* may take partial allowance when the value of two legs usually move in the opposite direction. This would be the case in the situations set out in (2) – (4).
 - (2) The first situation referred to in (1) is that the *position* falls under *BIPRU 7.11.14R(2)(b)* but there is an asset mismatch between the reference obligation and the underlying exposure. However, the *positions* meet the following requirements:
 - (a) the reference obligation ranks *pari passu* with or is junior to the underlying obligation; and
 - (b) the underlying obligation and reference obligation share the same obligor and have legally enforceable cross-default or cross-acceleration clauses.
 - (3) The second situation referred to in (1) is that the *position* falls under *BIPRU 7.11.14R(2)(a)* or *BIPRU 7.11.15* but there is a currency or maturity mismatch between the credit protection and the underlying asset (currency mismatches must be included in the normal reporting with respect to the *foreign exchange PRR*).
 - (4) The third situation referred to in (1) is that the *position* falls under *BIPRU 7.11.15* but there is an asset mismatch between the cash *position* and the credit derivative. However, the underlying asset is included in the (deliverable) obligations in the credit derivative documentation.

- (5) In each of those situations, rather than adding the *specific risk PRR* requirements for each side of the transaction, only the higher of the two *PRR* requirements applies.
- 7.11.17 R In all situations not falling under *BIPRU 7.11.14R - BIPRU 7.11.16R*, a *firm* must assess a *specific risk PRR charge* against both sides of the *positions*.
- Special treatment of credit default swaps: Provisions applicable to all methods
- 7.11.18 R *BIPRU 7.11.18R - BIPRU 7.11.58R* set out the calculation of the *specific risk* portion of the *interest rate PRR* for credit default swaps.
- 7.11.19 R The *specific risk* portion of the *interest rate PRR* is calculated separately for:
- (1) credit default swaps (other than those in (2));
 - (2) credit default swaps that are also *securitisation positions*; and
 - (3) other *positions*;
- that are subject to the *interest rate PRR*.
- 7.11.20 R The *specific risk* portion of the *interest rate PRR* for *positions* falling into *BIPRU 7.11.19R(1)* and (2) must be calculated in accordance with the *credit default swap PRR methods* rather than in accordance with *BIPRU 7.2* (Interest rate PRR) and the other provisions of *BIPRU 7.11*. However a *firm* may apply *BIPRU 7.11.13R- BIPRU 7.11.17R* before applying the *credit default swap PRR methods*. If it does so the *firm* must apply the *credit default swap PRR methods* to the remaining *positions* in credit default swaps.
- 7.11.21 R In accordance with the principle in *BIPRU 7.11.19R*, there is no netting for the purpose of calculating *specific risk PRR charges* (under *BIPRU 7.2.37R - BIPRU 7.2.40R* (Deriving the net position in each debt *security*: Netting positions in the same debt *security*) or otherwise) between:
- (1) a *position* falling into *BIPRU 7.11.19R(1)* or *BIPRU 7.11.19R(2)* and one falling into *BIPRU 7.11.19R(3)*; or
 - (2) a *position* falling into *BIPRU 7.11.19R(1)* and one falling into *BIPRU 7.11.19R(2)*.
- 7.11.22 R
- (1) A *firm* must calculate the *interest rate PRR* for *specific risk* for credit default swaps falling into *BIPRU 7.11.19R(1)* under the *ordinary credit default swap PRR method*.
 - (2) A *firm* must calculate the *interest rate PRR* for *specific risk* for credit default swaps falling into *BIPRU 7.11.19R(2)* under the *securitisation credit default swap PRR method*.

Ordinary credit default swap PRR method: Introduction

- 7.11.23 R *BIPRU 7.11.24R - BIPRU 7.11.37R* set out the *ordinary credit default swap PRR method*.

Ordinary credit default swap PRR method: Grouping of credit derivatives

- 7.11.24 R A *firm* must group together all credit default swaps being treated under the *ordinary credit default swap PRR method* that give rise to notional *positions* in the same *security* for *specific risk* purposes under the procedure in *BIPRU 7.11.2R - BIPRU 7.11.12R* and that may be netted under *BIPRU 7.11.56R*.

- 7.11.25 R The provisions in *BIPRU 7.11.2R - BIPRU 7.11.12R* about the creation of a *specific risk* charge for credit default swaps reflecting the rating of the derivative (see *BIPRU 7.11.11R* and part of *BIPRU 7.11.5R*) do not apply for the purposes of calculating the *ordinary credit default swap PRR method*.

Ordinary credit default swap PRR method: Main rule for calculating the specific risk PRR

- 7.11.26 R The *specific risk* portion of the *interest rate PRR* for credit default swaps treated under the *ordinary credit default swap PRR method* is the higher of:
- (1) an amount equal to what would have been the *specific risk* portion of the *interest rate PRR* for such credit default swaps if it had been calculated under of *BIPRU 7.2.43R* to *BIPRU 7.2.50R* (Specific risk calculation for interest rate risk), taking into account *BIPRU 7.11.19R* and *BIPRU 7.11.21R*; and
 - (2) the sum of the valuation change capital charge (see *BIPRU 7.11.28R*) and the default capital charge (see *BIPRU 7.11.36R*) for all such credit derivatives.

Ordinary credit default swap PRR method: The valuation change capital charge

- 7.11.27 R A *firm* must allocate each credit default swap grouped together under *BIPRU 7.11.24R* to the time bands set out in *BIPRU 7.11.33R* for the purposes of calculating the valuation change capital charge.
- 7.11.28 R The valuation change capital charge for a group of credit default swaps created under *BIPRU 7.11.24R* is equal to six multiplied by the larger of the potential loss produced under *BIPRU 7.11.29R* and the potential loss produced under *BIPRU 7.11.30R*. The total valuation change capital charge for credit default swaps treated under the *ordinary credit default swap PRR method* is equal to the sum of such amounts for all such groups.
- 7.11.29 (1) The amount of the potential loss calculated under this *rule* is calculated as follows.

- (2) Within each time band the *firm* must calculate the net valuation change in the credit default swaps that would occur if spreads (as defined in *BIPRU 7.11.55R*) were to increase by the amount shown in *BIPRU 7.11.34R*. The amount of the change in spread is the same for each time band.
- (3) The potential loss calculated under this *rule* is the sum of all bands that create a net loss. Bands which produce a profit must be ignored.
- (4) The time bands referred to in this *rule* are those established under *BIPRU 7.11.27R*

- 7.11.30 R The amount of the potential loss calculated under this *rule* is calculated in the same way as it is under *BIPRU 7.11.29R* except that the net valuation change is the one that would occur if spreads were to decrease by the amount shown in *BIPRU 7.11.34R*.
- 7.11.31 R The valuation change in *BIPRU 7.11.29R - BIPRU 7.11.30R* is applied to the current value of the credit default swap.
- 7.11.32 R The *credit quality step* applicable under the table in *BIPRU 7.11.34R* is that which would be attributable to the *security* in question under the *standardised approach* to credit risk. If a rating from an *eligible ECAI* is not available to the *firm* it must treat that *position* as having *credit quality step 6*. The *security* in question is the one by reference to which the grouping under *BIPRU 7.11.24R* is carried out (the reference entity).
- 7.11.33 R Time bands
This table belongs to *BIPRU 7.11.27R*

Time band	Residual contract maturity
1	Less than three months
2	Three months to one year
3	Over one year to two and half years
4	Over two and a half years to five years
5	Greater than five years

- 7.11.34 R Stress factors based on rating of reference entity
This table belongs to *BIPRU 7.11.29R* and *BIPRU 7.11.30R*

<i>Credit quality step 1</i>	<i>Credit quality step 2</i>	<i>Credit quality step 3</i>	<i>Credit quality step 4</i>	<i>Credit quality step 5</i>	<i>Credit quality step 6</i>
0.4 x spread	0.35 x spread	0.3 x spread	0.4 x spread	0.45 x spread	0.45 x spread
Spread is defined in <i>BIPRU 7.11.55R</i> .					

Valuation changes for credit default swaps resulting in positions in multiple *securities*

- 7.11.35 (1) This *rule* applies if *BIPRU 7.11.24R* results in a credit default swap being split into *positions* in more than one *security*.
- (2) The *firm* must, for each notional *security* produced as described in (1), apply to the whole of the credit default swap in question the stresses in the table in *BIPRU 7.11.34R* using the *credit quality step* in the table in *BIPRU 7.11.34R* for that *security*.
- (3) The *firm* must then allocate the different changes in the value of the credit default swap under (2) between the calculations for each *security* produced as described in (1) on a proportional basis in accordance with the principles in *BIPRU 7.11.2R - BIPRU 7.11.12R*. The *firm* must do this by multiplying the amount of the change in (2) calculated with respect to the *security* in question by a fraction based on the proportion of the credit default swap attributable to the *security* under those principles.

Ordinary credit default swap PRR method: The default capital charge

- 7.11.36 R The default capital charge for each group of credit default swaps created under *BIPRU 7.11.24R* is equal to four multiplied by the amount in *BIPRU 7.11.37R*. The total default capital charge for credit default swaps treated under the *ordinary credit default swap PRR method* is equal to the sum of such amounts for each such group.
- 7.11.37 R (1) The amount calculated under this *rule* is the amount resulting from the calculation in (5).

- (2) A *firm* must fully net all notional *positions* along a timeline by calculating, for all credit default swaps in the group in question created under *BIPRU 7.11.24R*, the net *position* in the *security* in question for all times in the future until those *positions* expire or otherwise cease to exist.
- (3) The *firm* must calculate the net *positions* under (2) in accordance with *BIPRU 7.2.37R - BIPRU 7.2.40R* (Deriving the net position in each debt *security*: Netting positions in the same debt *security*).
- (4) The *firm* must identify the largest long *position* to which it is exposed over the next year.
- (5) The *firm* must then multiply the amount established under (4) by the *appropriate PRA* that would have applied for the purpose of calculating the *specific risk* portion of the *interest rate PRR* under *BIPRU 7.2* (Interest rate PRR).
- (6) The *security* in question is the one by reference to which the grouping under *BIPRU 7.11.24R* is carried out (the reference entity).

Securitisation credit default swap PRR method: Introduction

7.11.38 R *BIPRU 7.11.39R - BIPRU 7.11.53R* set out the *securitisation credit default swap PRR method*.

Securitisation credit default swap PRR method: Main rule for calculating the specific risk PRR

7.11.39 R The *specific risk* portion of the *interest rate PRR* for credit default swaps treated under the *securitisation credit default swap PRR method* is the higher of:

- (1) an amount equal to what would have been the *specific risk* portion of the *interest rate PRR* for such credit default swaps if it had been calculated under of *BIPRU 7.2.43R to BIPRU 7.2.50R* (Specific risk calculation for interest rate risk), taking into account *BIPRU 7.11.19R* and *BIPRU 7.11.21R*; and
- (2) the sum of the valuation change capital charge (see *BIPRU 7.11.40R*) and the default capital charge (see *BIPRU 7.11.48R*) for all such credit derivatives.

Securitisation credit default swap PRR method: Valuation change capital charge: General

- 7.11.40 R In order to calculate the valuation change capital charge a *firm* must group together each credit default swap that relates to the same *securitisation*. The valuation change capital charge for each such group is equal to six multiplied by the potential loss amount in *BIPRU 7.11.41R*. The total valuation change capital charge for credit default swaps treated under the *securitisation credit default swap PRR method* is equal to the sum of such amounts for each such group.
- 7.11.41 R (1) The potential loss amount as referred to in *BIPRU 7.11.40R* for a group of credit default swaps relating to the same *securitisation* is equal to the greatest loss the *firm* would suffer in the scenarios set out in the matrix in *BIPRU 7.11.43R*. Each scenario consists of the combination of one of the nine scenarios on the vertical axis with one of the three scenarios on the horizontal axis.
- (2) T as referred to in that matrix is the amount set out in the table in *BIPRU 7.11.44R*.
- (3) Stresses (1) – (4) as referred to in that matrix are further defined in *BIPRU 7.11.45R - BIPRU 7.11.46R*.
- (4) The underlying reference entities referred to in that matrix refer to the obligor under the *securities* that are the subject of the *securitisation* in question. In the case of a *resecuritisation* the reference entities are the ultimate underlying obligors (the obligors under the *securitised securitisation*).
- (5) The valuation change under this *rule* is applied to the current value of the credit default swap.
- 7.11.42 R References in the table in *BIPRU 7.11.43R* to *credit quality steps* are to the *credit quality steps* that would apply under the *standardised approach* to credit risk to the *securities* referred to in *BIPRU 7.11.41R(4)*. If a rating from an *eligible ECAI* is not available to the *firm* it must treat that *security* as having the lowest *credit quality step*.
- 7.11.43 R Calculation of the valuation change capital charge: Scenarios
This table belongs to *BIPRU 7.11.41R*

	Change in credit spread of the underlying reference entities		
	$-T \sqrt{\text{spread}}$	No change	$+T \sqrt{\text{spread}}$

		Change in credit spread of the underlying reference entities		
		$-T \sqrt{\text{spread}}$	No change	$+T \sqrt{\text{spread}}$
(1)	Base correlation steepening (see row (1) of the table in <i>BIPRU</i> 7.11.46R)			
(2)	Base correlation flattening (see row (2) of the table in <i>BIPRU</i> 7.11.46R)			
(3)	Base correlation parallel up (see row (3) of the table in <i>BIPRU</i> 7.11.46R)			
(4)	Base correlation down (see row (4) of the table in <i>BIPRU</i> 7.11.46R)			
(5)	No correlation change			
(6)	Combination of (1) and (3)			
(7)	Combination of (1) and (4)			
(8)	Combination of (2) and (3)			
(9)	Combination of (2) and (4)			
Spread is defined in <i>BIPRU</i> 7.11.55R.				

- 7.11.44 R Calculation of the valuation change capital charge: Definition of T
This table belongs to *BIPRU 7.11.41R*

<i>Credit quality step under the standardised approach to credit risk</i>	T
1	0.4
2	0.35
3	0.3
4	0.4
5	0.45
6	0.45

Securitisation credit default swap PRR method: Valuation change capital charge: Base correlation

- 7.11.45 R
- (1) This *rule* explains how the correlation calculations in the vertical axis of the matrix in *BIPRU 7.11.43R* are to be carried out.
 - (2) The *firm* must calculate the base correlation relating to each of the deemed *tranches* set out in the table in *BIPRU 7.11.46R*. Base correlation refers, in relation to a *securitisation position*, to the correlation in credit risk between the *securities* that are the subject of that *securitisation*.
 - (3) The *firm* must then multiply the base correlation for each deemed *tranche* under (2) by the relevant figure in the table in *BIPRU 7.11.46R*. It must calculate each such base correlation in the way that a *person* would use to calculate the fair market value of a credit default swap on the following basis:
 - (a) the *tranche* is the most junior *tranche*; and
 - (b) the thickness of the *tranche* (as referred to in *BIPRU 9 (Securitisation)*) is equal to the percentage figure at the head of the relevant column in the table in *BIPRU 7.11.46R*.
 - (4) The *firm* must then produce a stressed base correlation curve through the use of interpolation based on the calculations under this *rule*.

- (5) Notwithstanding (3), the curve in (4) must not show a correlation above 100%.
- (6) The *firm* must then use the curve for the purpose of the revaluation of the credit default swap under *BIPRU 7.11.41R* using an appropriate and prudent technique.

7.11.46 R Correlation moves
This table belongs to *BIPRU 7.11.45R*

	Thickness of <i>tranche</i>					
		3%	7%	10%	15%	30%
Scenario from <i>BIPRU 7.11.43R</i>	(1) Base correlation steepening	0.7	0.9	1	1.1	1.3
	(2) Base correlation flattening	1.3	1.1	1	0.9	0.7
	(3) Base correlation parallel up	1.2	1.2	1.2	1.2	1.2
	(4) Base correlation parallel down	0.8	0.8	0.8	0.8	0.8

7.11.47 G The fact that the *FSA* has used the base correlation methodology in this section does not mean that it endorses the use of that technique to value credit default swaps for other purposes. The *FSA* has used it in this section as it is well-known and publicly available. If a *firm* uses another technique to value its credit default swaps it should discuss this with the *FSA*.

Securitisation credit default swap PRR method: Default charge

7.11.48 R The default charge for a *firm's position* in a *securitisation* treated under the *securitisation credit default swap PRR method* is equal to the default charge for that *position* calculated under *BIPRU 7.11.50R* and *BIPRU 7.11.51R*. The total default charge for *positions* treated under the *securitisation credit default swap PRR method* is equal to the sum of those figures.

- 7.11.49 R To the extent that a *firm* has a matching long and short *position* in the same *tranche* of the same *securitisation* with the same maturity it may net the short and long *positions*.
- 7.11.50 R If a *position* is short, the default charge for that *position* is zero.
- 7.11.51 R If a *position* is long, the default charge for that *position* must be calculated in accordance with the following formula:

$$V \times RW \times AP \times 2$$

where:

- (1) V means the notional amount of the *position*;
 - (2) RW means the *risk weight* that the *position* would attract under *BIPRU 9* (Securitisation); and
 - (3) AP means the appropriate percentage from the table *BIPRU 7.11.52R*.
- 7.11.52 R Calculation of the default requirement
This table belongs to *BIPRU 7.11.51R*

		Type of <i>position</i>		
		<i>Resecuritisation position</i>	Trades based on an index	Other
<i>Risk weight</i>	Less than 400%	4.8%	1.6%	3.2%
	400% to less than 800%	6.4%	3.2%	4.8%
	800% to less than 1250%	8%	4.8%	6.4%
	1250% and over	8%	8%	8%

- 7.11.53 R (1) The column of the table in *BIPRU 7.11.52R* headed "Trades based on an index" applies if:
- (a) the *position* is not a *resecuritisation position*;

- (b) the underlying reference entities (as defined in *BIPRU* 7.11.41R(4)) are identical to those that make up an index of entities widely used by those who deal in credit default swaps;
 - (c) that index contains the price for entering into a credit default swap whose reference entities constitute all the entities in the index; and
 - (d) the credit default swap is constructed in such a way that the *firm* is able to price the credit derivative using the index.
- (2) The column of the table in *BIPRU* 7.11.52R headed "Other" applies to any case not covered by the other two categories in the table.

Special treatment of credit default swaps: Supplementary material

- 7.11.54 R *BIPRU* 7.11.55R - *BIPRU* 7.11.58R apply to each of the *credit default swap PRR methods*.
- 7.11.55 R The spread referred to in the tables in *BIPRU* 7.11.34R and *BIPRU* 7.11.43R refers to the premia and other cash flows referred to in *BIPRU* 7.11.5R (expressed as a percentage). The spread must be calculated every *business day*. It is the spread that would apply if the credit default swap in question were entered into on that day on arm's length commercial terms.
- 7.11.56 R Where a *credit default swap PRR method* requires netting between *positions*, a *firm* may only net *positions* arising out of credit default swaps that have comparable deliverable obligations, identical credit events and documentation that will act identically on the occurrence of a credit event.
- 7.11.57 R A notional *position* in a *zero-specific-risk security* created under *BIPRU* 7.11.5R must not be treated under either *credit default swap PRR method*. The *firm* must instead treat it in accordance with the other *rules* for the calculation of the *interest rate PRR*.
- 7.11.58 R (1) If the size of the maximum credit event payment under a credit default swap is lower than the *PRR* requirement that would otherwise apply, that credit default swap must be excluded from the *credit default swap PRR methods*. However *BIPRU* 7.11.19R and *BIPRU* 7.11.21R still apply.
- (2) A *firm* must work out whether (1) applies to a credit default swap by calculating the *PRR* for that credit default swap in accordance with this section (including the applicable *credit default swap PRR method*) on the assumption that it is the only item for which an *interest rate PRR* is being calculated.

Valuation

- 7.11.59 G *GENPRU 1.3.29R – GENPRU 1.3.35G* (General requirements: Valuation adjustments or reserves) are particularly relevant for a *firm* trading credit derivatives, especially for credit default swaps that are also *securitisation positions*.
- Other risks relating to credit derivatives
- 7.11.60 R A *firm* must be able to describe, demonstrate and explain to the *FSA* its trading strategies in relation to credit derivatives both in theory and in practice.
- 7.11.61 G *BIPRU 7.11.62G - BIPRU 7.11.64G* cover risks relating to credit derivatives that may not be captured in this section. This *guidance* is of particular relevance to the *overall financial adequacy rule*, the *overall Pillar 2 rule* and the *general stress and scenario testing rule*.
- 7.11.62 G *BIPRU 7.11.5* requires a *firm* to recognise any premiums payable or receivable under the contract as notional *zero-specific-risk securities*. These *positions* are then entered into the *general market risk* framework. As premium payments paid under such contracts are contingent on no credit event occurring, a credit event could significantly change the *general market risk* capital requirement. A *firm* should consider, under the *overall Pillar 2 rule*, whether this risk means that the capital requirements under this section materially understate the *firm's general market risk* position.
- 7.11.63 G If a *firm* recognises profits on a non-accrual basis it should consider whether the capital requirements for its credit derivatives business adequately cover the risk that any recognised profit may not be achieved due to a credit event occurring. This includes *positions* for which the *firm* may have a perfect hedge in place.
- 7.11.64 G If a *firm* uses models in its valuation process, it should consider whether the default capital requirements under the *credit default swap PRR methods* adequately cover the default losses that the *firm's* model estimates it will be exposed to.

8 Group risk – consolidation

Application

8.1.1 R This chapter applies to:

- (1) a *BIPRU firm* that is a member of a *UK consolidation group*;
- (2) a *BIPRU firm* that is a member of a *non-EEA sub-group*;
- (3) an *ELMI* that is a member of a *UK consolidation group* or *non-EEA sub-group* if that group includes a *BIPRU firm*; and
- (4) a *firm* that is not a *BIPRU firm* and is a *parent financial holding company in a Member State* in a *UK consolidation group*.

8.1.2 R This chapter does not apply to a *firm* in *BIPRU* 8.1.1R(1) to (3) which is a member of the *UK consolidation group* or *non-EEA sub-group* if the interest of the relevant *UK consolidation group* or *non-EEA sub-group* in that *firm* is no more than a *participation*.

Purpose

8.1.3 G This chapter implements articles 71, 73(1) and (2), 125, 126, 127(1), 133 and 134 of the *Banking Consolidation Directive* and articles 2 (in part), 22-27 and 37(1) (in part) of the *Capital Adequacy Directive*.

How this chapter is organised

8.1.4 G *BIPRU* 8.2 sets out the definition of *UK consolidation group* and the basic requirement to apply financial resources and concentration risk requirements to that group on a consolidated basis.

8.1.5 G *BIPRU* 8.3 sets out the definition of a *non-EEA sub-group* and the basic requirement to apply financial resources and concentration risk requirements to that group on a consolidated basis.

8.1.6 G *BIPRU* 8.4 sets out how a group of *CAD investment firms* can apply for a *waiver* from consolidated capital requirements although remaining subject to consolidated supervision (including reporting requirements).

8.1.7 G *BIPRU* 8.5 sets out the basis for including and excluding *undertakings* within the group for the purposes of consolidation.

8.1.8 G *BIPRU* 8.6 sets out the calculation of the *consolidated capital resources* of a group and the limits that apply.

- 8.1.9 G *BIPRU 8.7* sets out the calculation of the *consolidated capital resources requirement* of a group.
- 8.1.10 G *BIPRU 8.8* deals with the application of *advanced prudential calculation approaches* on a consolidated basis.
- 8.1.11 G *BIPRU 8.9* sets out consolidated concentration risk requirements.

Consolidation requirements for BIPRU firms elsewhere in the Handbook

- 8.1.12 G *SYSC 12* (Group risk systems and controls requirement) deals with systems and controls requirements for groups.
- 8.1.13 G *GENPRU 1.2* (Adequacy of financial resources) deals with the detail about how *GENPRU 1.2* applies on a consolidated basis although the underlying requirement to apply it on a consolidated basis is in *BIPRU 8.2* and *BIPRU 8.3*.
- 8.1.14 G *BIPRU 11* (Disclosure) itself deals with how that chapter is applied on a consolidated basis.
- 8.1.15 G *GENPRU 3.1* (Cross sector groups) deals with *financial conglomerates*.
- 8.1.16 G *GENPRU 3.2* (Prudential rules for third country groups) deals, amongst other things, with banking and investment services groups headed by a *parent undertaking* outside the *EEA*.

8.2 Scope and basic consolidation requirements for UK consolidation groups

Main consolidation rule for UK consolidation groups

8.2.1 R A *firm* that is a member of a *UK consolidation group* must comply, to the extent and in the manner prescribed in *BIPRU* 8.5, with the obligations laid down in *GENPRU* 1.2 (Adequacy of financial resources), the *main BIPRU firm Pillar 1 rules* (but not the *base capital resources requirement*) and *BIPRU* 10 (Concentration risk requirements) on the basis of the consolidated financial position of:

- (1) where either Test 1A or Test 1B in *BIPRU* 8 Ann 1R (Decision tree identifying a UK consolidation group) apply, the *parent institution in a Member State* in the *UK consolidation group*; or
- (2) where either Test 1C or Test 1D in *BIPRU* 8 Ann 1R apply, the *parent financial holding company in a Member State*.

8.2.2 R Further to *BIPRU* 8.2.1R, a *firm* that is a member of a *UK consolidation group* must at all times ensure that the *consolidated capital resources* of the *UK consolidation group* are equal to or exceed its *consolidated capital resources requirement*.

8.2.3 G The *base capital resources requirement* does not apply on a consolidated basis.

Definition of UK consolidation group

8.2.4 R A *firm's UK consolidation group* means the group that is identified as a *UK consolidation group* in accordance with the decision tree in *BIPRU* 8 Annex 1R (Decision tree identifying a UK consolidation group).

8.2.5 R For the purposes of this chapter, what would otherwise be a *UK consolidation group* is not a *UK consolidation group* if all the members of that *UK consolidation group* wholly form part of another *UK consolidation group*.

8.2.6 G *BIPRU* 8 Annex 2G (Examples of how to identify a UK consolidation group) sets out examples of how to identify a *UK consolidation group*.

8.2.7 G *BIPRU* 8 Annex 1R (Decision tree identifying a UK consolidation group) shows that Articles 125 and 126 of the *Banking Consolidation Directive* are important in deciding whether the *FSA* is obliged to supervise a group or part of a group and hence whether that group or part of a group is a *UK consolidation group*. *BIPRU* 8 Annex 4G (Text of Articles 125 and 126 of the *Banking Consolidation Directive*) sets out these articles together with an explanation of how those articles should be read in the case of a group which also contains *CAD investment firms*.

8.3 Scope and basic consolidation requirements for non-EEA sub-groups

Main consolidation rule for non-EEA sub-groups

- 8.3.1 R (1) A *BIPRU firm* that is a *subsidiary undertaking* of a *BIPRU firm* or of a *financial holding company* must apply the requirements laid down in *GENPRU 1.2* (Adequacy of financial resources), the *main BIPRU firm Pillar 1 rules* (but not the *base capital resources requirement*) and *BIPRU 10* (Concentration risk requirements) on a sub-consolidated basis if the *BIPRU firm*, or the *parent undertaking* where it is a *financial holding company*, have a *third country banking or investment services undertaking* as a *subsidiary undertaking* or hold a *participation* in such an *undertaking*.
- (2) (1) only applies if the *FSA* is required by the *Banking Consolidation Directive* or the *Capital Adequacy Directive* to supervise the group established under (1) under Article 73(2) of the *Banking Consolidation Directive (Non-EEA sub-groups)*.

- 8.3.2 R Further to *BIPRU 8.3.1R*, a *firm* that is a member of a *non-EEA sub-group* must at all times ensure that the *consolidated capital resources* of that *non-EEA sub-group* are equal to or exceed its *consolidated capital resources requirement*.

- 8.3.3 G The *base capital resources requirement* does not apply on a consolidated basis.

- 8.3.4 G The sub-group identified in *BIPRU 8.3.1R* is called a *non-EEA sub-group*.

How to identify a non-EEA sub-group

- 8.3.5 G *BIPRU 8 Annex 3G* (Examples of how to identify a non-EEA sub-group) sets out examples of how to identify a *non-EEA sub-group*.

- 8.3.6 G The remainder of this section sets out a process for identifying a *non-EEA sub-group* in straightforward cases.

- 8.3.7 G A *firm* will not be a member of a *non-EEA sub-group* unless it also a member of a *UK consolidation group*. So the first step is to identify each *undertaking* in the *firm's UK consolidation group* that satisfies the following conditions:

- (1) it is an *institution, financial institution* or *asset management company* whose head office is outside the *EEA* (a *third country banking or investment services undertaking*);
- (2) one of the following applies:

- (a) it is a *subsidiary undertaking* of a *BIPRU firm* in that *UK consolidation group*; or
 - (b) a *BIPRU firm* in that *UK consolidation group* holds a *participation* in it; and
- (3) that *BIPRU firm* is not a *parent institution in a Member State*.
- 8.3.8 G The *sub-group* of the *BIPRU firm* identified in *BIPRU 8.3.7G(2)(a)* or *BIPRU 8.3.7G(2)(b)* is a potential *non-EEA sub-group*.
- 8.3.9 G If more than one *BIPRU firm* is a direct or indirect *parent undertaking* in accordance with *BIPRU 8.3.7G(2)(a)* then the *sub-groups* of each them are all potential *non-EEA sub-groups*. This is illustrated in example three in *BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group)*, where the *sub-group* of UK bank 1 and the *sub-group* of UK bank 2 are potential *non-EEA sub-groups*.
- 8.3.10 G Similarly if there is more than one *BIPRU firm* that holds a *participation* in the *third country banking or investment services undertaking* in accordance with *BIPRU 8.3.7G(2)(b)* then the *sub-group* of each such *BIPRU firm* is a potential *non-EEA sub-group*.
- 8.3.11 G The effect of *BIPRU 8.3.7G(3)* is that a *non-EEA sub-group* cannot be headed by a *parent institution in a Member State*. This is illustrated in example one of *BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group)*.
- 8.3.12 G The *firm* should then identify each *undertaking* in the *firm's UK consolidation group* that satisfies the following conditions:
- (1) it is an *institution, financial institution* or *asset management company* whose head office is outside the *EEA* (a *third country banking or investment services undertaking*);
 - (2) one of the following applies:
 - (a) it is a *subsidiary undertaking* of a *financial holding company* in that *UK consolidation group*; or
 - (b) a *financial holding company* in that *UK consolidation group* holds a *participation* in it;
 - (3) the head office of that *financial holding company* is in the *United Kingdom*; and
 - (4) that *financial holding company* has a *subsidiary undertaking* that is a *BIPRU firm*.
- 8.3.13 G The *sub-group* of the *financial holding company* identified in *BIPRU 8.3.12G(2)(a)* or *BIPRU 8.3.12G(2)(b)* is a potential *non-EEA sub-group*.

- 8.3.14 G The *financial holding company* identified in BIPRU 8.3.12G may be a *parent financial holding company in a Member State*. This is illustrated by example 2 of BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group).
- 8.3.15 G If more than one *financial holding company* is a direct or indirect *parent undertaking* in accordance with BIPRU 8.3.12G(2)(a) then the *sub-groups* of each them are all potential *non-EEA sub-groups*.
- 8.3.16 G Similarly if there is more than one *financial holding company* that holds a *participation* in the *third country banking or investment services undertaking* in accordance with BIPRU 8.3.12G(2)(b) then the *sub-group* of each such *financial holding company* is a potential *non-EEA sub-group*.
- 8.3.17 G The *firm* should apply the process in BIPRU 8.3.12G to a *third country banking or investment services undertaking* even though it may be also be part of a potential *non-EEA sub-group* under BIPRU 8.3.7G.
- 8.3.18 G Having identified potential *non-EEA sub-groups* for each *third country banking or investment services undertaking* in its *UK consolidation group* the *firm* should then eliminate overlapping potential *non-EEA sub-groups* in the following way. If:
- (1) one potential *non-EEA sub-group* is contained within a wider potential *non-EEA sub-group*; and
 - (2) the *third country banking or investment services undertakings* in the two potential *non-EEA sub-groups* are the same;
- then the smaller potential *non-EEA sub-group* is eliminated.
- 8.3.19 G If there is a chain of three or more potential *non-EEA sub-groups*, each with the same *third country banking or investment services undertakings*, the elimination process may remove all but the highest. This is illustrated in example three in BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group). In this example there are four potential *non-EEA sub-groups* and the elimination process results in just one remaining (the one headed by the *UK parent financial holding company in a Member State*).
- 8.3.20 G Each remaining potential *non-EEA sub-group* is a *non-EEA sub-group*, even though it may be part of a wider *non-EEA sub-group*.
- 8.3.21 G Examples four and five in BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group) show how the same group may contain two *non-EEA sub-groups* even though the smaller potential *non-EEA sub-group* is part of a bigger one. The reason for there being two *non-EEA sub-groups* in these examples is that one of the *third country banking or investment services undertakings* is not a member of both potential *non-EEA sub-groups*.

- 8.3.22 G If a *UK consolidation group* is headed by a *parent financial holding company in a Member State* the result of the elimination process may be that a *firm's UK consolidation group* contains only one *non-EEA sub-group* and that the *non-EEA sub-group* is the same as the *UK consolidation group*. In theory that means that there are two sets of consolidation requirements, one in relation to the *UK consolidation group* and one in relation to the *non-EEA sub-group*. However as the *UK consolidation group* and the *non-EEA sub-group* are the same, in practice this means that the additional *non-EEA sub-group* consolidation disappears. This is illustrated in example three in *BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group)*. The effect of *BIPRU 8.3.7G(3)* is that this is not the case if the *UK consolidation group* is headed by a *parent institution in a Member State*, as illustrated in example 1 in *BIPRU 8 Annex 3G*.
- 8.3.23 G Even where the requirements for a *non-EEA sub-group* are absorbed into those for the *UK consolidation group* a *firm* should still make clear in its regulatory reporting that the consolidation figures relate to a *UK consolidation group* and a *non-EEA sub-group* and that they both contain the same members.
- 8.3.24 G The examples in this section have so far assumed that the only *EEA State* involved is the *United Kingdom*. If a potential *non-EEA sub-group* that would otherwise be regulated by the *FSA* contains a potential *non-EEA sub-group* in another *EEA State* then the *United Kingdom* one is eliminated if the *third country banking or investment services undertakings* in the *UK* potential *non-EEA sub-group* and the potential *non-EEA sub-group* in the other *EEA State* are the same. The intention here is that the *EEA competent authority* closest to the *third country banking or investment services undertakings* should be responsible for the *non-EEA sub-group* subconsolidation. Example 6 in *BIPRU 8 Annex 3G (Examples of how to identify a non-EEA sub-group)* illustrates this situation.

8.4 CAD Article 22 groups and investment firm consolidation waiver

Application

- 8.4.1 R This section applies to a *BIPRU investment firm* with an *investment firm consolidation waiver*.

The effect of an investment firm consolidation waiver and the conditions for getting one

- 8.4.2 G A *BIPRU investment firm* may apply for a *waiver* of the requirement in this chapter to apply capital requirements on a consolidated basis. Such a *waiver* is called an *investment firm consolidation waiver*.

- 8.4.3 G An *investment firm consolidation waiver* will waive the application of *BIPRU 8.2.1R* and *BIPRU 8.2.2R* (if it applies with respect to a *UK consolidation group*) or *BIPRU 8.3.1R* and *BIPRU 8.3.2R* (if it applies with respect to a *non-EEA sub-group*). The effect will be to switch off this chapter with respect to the group in question apart from this section.

- 8.4.4 G The *FSA* will not grant an *investment firm consolidation waiver* unless:

- (1) the *UK consolidation group* or *non-EEA sub-group* meets the conditions for being a *CAD Article 22 group*;
- (2) the *FSA* is satisfied that each *BIPRU firm* in the *UK consolidation group* or *non-EEA sub-group* will be able to meet its capital requirements using the calculation of *capital resources* in *GENPRU 2 Annex 6R* (Capital resources table for a *BIPRU investment firm* with a waiver from consolidated supervision); and
- (3) the *firm* demonstrates that the requirements in *BIPRU 8.4.11R* to *BIPRU 8.4.18R* will be met.

- 8.4.5 G The standards in *BIPRU 8.4.4G* are minimum standards. Satisfaction of these conditions does not automatically mean the *FSA* will give an *investment firm consolidation waiver*. The *FSA* will in addition also apply the tests in section 148 of the *Act* (Modification or waiver of rules).

- 8.4.6 G *SUP 8* (Waiver and modification of rules) and *BIPRU 1.3* (Application for advanced approaches) are also relevant to applications for an *investment firm consolidation waiver*.

Meeting the terms of an investment firm consolidation waiver

- 8.4.7 R If a *firm* has an *investment firm consolidation waiver* with respect to its *UK consolidation group* or *non-EEA sub-group* but that *UK consolidation group* or *non-EEA sub-group* ceases to meet the definition of a *CAD Article 22 group* the *firm* must comply with the rest of this chapter rather than this section notwithstanding the *investment firm consolidation waiver*.
- 8.4.8 G Compliance with the capital requirements set out in *BIPRU 8.4.11R* is a condition under the *Capital Adequacy Directive* for the exemption from capital requirements. Thus if they are breached the *FSA* is likely to revoke the *investment firm consolidation waiver*.

Definition of a CAD Article 22 group

- 8.4.9 R
- (1) A *CAD Article 22 group* means a *UK consolidation group* or *non-EEA sub-group* that meets the conditions in this rule.
 - (2) There must be no *bank*, *building society* or *credit institution* in the *UK consolidation group* or *non-EEA sub-group*.
 - (3) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is an *EEA firm* must use the definition of own funds given in the *CRD implementation measure* of its *EEA State* for Article 16 of the *Capital Adequacy Directive*.
 - (4) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* must be a:
 - (a) *limited activity firm*; or
 - (b) *limited licence firm*.
 - (5) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is an *EEA firm* must:
 - (a) meet the requirements imposed by the *CRD implementation measures* of its *EEA State* for Articles 18 and Article 20 of the *Capital Adequacy Directive* on an individual basis; and
 - (b) deduct from its own funds any contingent liability in favour of other members of the *UK consolidation group* or *non-EEA sub-group*.
 - (6) Each *BIPRU investment firm* in the *UK consolidation group* or *non-EEA sub-group* must comply with the *main BIPRU firm Pillar 1 rules* on an individual basis.

- 8.4.10 G *GENPRU 2.2 (Capital resources)* says that a *BIPRU investment firm* with an *investment firm consolidation waiver* should calculate its *capital resources* on a solo basis using *GENPRU 2 Annex 6R (Capital resources table for a BIPRU investment firm with a waiver from consolidated supervision)*. *GENPRU 2 Annex 6R* requires a *BIPRU investment firm* to deduct contingent liabilities in favour of other members of the *UK consolidation group* or *non-EEA sub-group*. Therefore *BIPRU 8.4.9R(5)(b)* only imposes the requirement to deduct them on *EEA firms*.

Capital adequacy obligations relating to a CAD Article 22 group: General rule

- 8.4.11 R If a *firm* has an *investment firm consolidation waiver*, it must ensure that any *financial holding company* in the *UK consolidation group* or the *non-EEA sub-group* that is the *UK parent financial holding company in a Member State* of a *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* has capital resources, calculated under *BIPRU 8.4.12R*, in excess of the sum of the following (or any higher amount specified in the *investment firm consolidation waiver*):
- (1) the sum of the solo notional capital resources requirements for each *CAD investment firm, financial institution, asset management company* and *ancillary services undertaking* in the *UK consolidation group* or the *non-EEA sub-group*, as calculated in accordance with *BIPRU 8.4.13R*; and
 - (2) the total amount of any contingent liability in favour of *CAD investment firms, financial institutions, asset management companies* and *ancillary services undertakings* in the *UK consolidation group* or *non-EEA sub-group*.

Capital adequacy obligations relating to a CAD Article 22 group: Capital resources

- 8.4.12 R A *firm* must calculate the capital resources of the *parent financial holding company in a Member State* for the purpose of *BIPRU 8.4.11R* as follows:
- (1) the capital resources are the sum of *capital resources* calculated at stages D (Total tier one capital before deductions) and I (Total tier two capital) of the version of the *capital resources table* in *GENPRU 2 Annex 4R (Capital resources table for a BIPRU investment firm deducting material holdings)* as adjusted in accordance with this rule;
 - (2) *capital resources* at stage D must not include *innovative tier one capital resources*, but they may be included at stage I if (5) allows this;
 - (3) the amount of the items which may be included at stage I must not exceed the amount calculated at stage D of the *capital resources table*;

- (4) the amount of the items which may be included in *lower tier two capital* in stage I must not exceed 50% of the amount calculated at stage D of the *capital resources table*; and
- (5) *GENPRU 2.2.25R* (Limits on the use of different forms of capital: Use of higher tier capital in lower tiers) and *GENPRU 2.2.27R* (Use of *innovative tier one capital* in lower stages of capital) apply.

Capital adequacy obligations relating to a CAD Article 22 group: Capital resources requirement

- 8.4.13 R The solo notional capital resources requirement as referred to in *BIPRU 8.4.11R(1)* is calculated in the same way as:
- (1) (if each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* is a *limited licence firm*) the *capital resources requirement* for a *BIPRU limited licence firm*; or
 - (2) (in any other case) the *capital resources requirement* for a *BIPRU limited activity firm*.
- 8.4.14 R A *firm* must exclude *material holdings* in the notional calculation of the *credit risk capital requirement* for the purposes of *BIPRU 8.4.13R*. A *firm* must identify whether it has any *material holdings* and the amount of them in accordance with *GENPRU 2.2* (Capital resources) and *GENPRU 2 Annex 4R* (Capital resources table for a *BIPRU investment firm* deducting material holdings).
- 8.4.15 G The notional capital resources requirement calculated under *BIPRU 8.4.13R* need not include a credit charge for *material holdings*. However it should include one for *illiquid assets*.
- 8.4.16 R Intra-group *exposures* must not be netted for the purpose of *BIPRU 8.4.11R*.

Capital adequacy obligations relating to a CAD Article 22 group: Advanced prudential calculation approaches

- 8.4.17 R A *firm* may not use an *advanced prudential calculation approach* for the purpose of *BIPRU 8.4.11R*.

Additional rules that apply to a firm with an investment firm consolidation waiver

- 8.4.18 R If a *firm* has an *investment firm consolidation waiver*, it must:
- (1) ensure that each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is a *firm* or an *EEA firm* has in place systems to monitor and control the sources of capital and funding of all the members in the *UK consolidation group* or *non-EEA sub-group*;

- (2) notify the *FSA* of any serious risk that could undermine the financial stability of the *UK consolidation group* or *non-EEA sub-group*, as soon as the *firm* becomes aware of that risk, including those associated with the composition and sources of the capital and funding of members of the *UK consolidation group* or *non-EEA sub-group*;
- (3) report the amount of the *consolidated capital resources* and *consolidated capital resources requirement* of the *UK consolidation group* or *non-EEA sub-group* on a periodic basis as set out in the *investment firm consolidation waiver*;
- (4) report any *large exposures* risks of members of the *UK consolidation group* or *non-EEA sub-group* including any *undertakings* not located in an *EEA State* on a periodic basis set out in the *investment firm consolidation waiver*;
- (5) notify the *FSA* immediately it becomes aware that the *UK consolidation group* or *non-EEA sub-group* has ceased to meet the conditions for being a *CAD Article 22 group*; and
- (6) notify the *FSA* immediately it becomes aware of any breach of *BIPRU 8.4.11R*.

8.4.19 G Although an *investment firm consolidation waiver* switches off most of this chapter, a *firm* should still carry out the capital adequacy calculations in *BIPRU 8.3* to *BIPRU 8.8* as if those parts of this chapter still applied to the *UK consolidation group* or *non-EEA sub-group* and report these to the *FSA*. It should also still monitor *large exposure* risk on a consolidated basis.

8.5 Basis of consolidation

Undertakings to be included in consolidation

8.5.1 R A *firm* must include only the following types of *undertaking* in a *UK consolidation group* or *non-EEA sub-group* for the purposes of this chapter:

- (1) a *BIPRU firm*;
- (2) an *institution*;
- (3) a *financial institution*;
- (4) an *asset management company*;
- (5) a *financial holding company*; and
- (6) an *ancillary services undertaking*.

8.5.2 G Although an *undertaking* falling outside *BIPRU* 8.5.1R will not be included in a *UK consolidation group* or *non-EEA sub-group* it may be relevant in deciding whether one *undertaking* in the *banking sector* or the *investment services sector* is a *subsidiary undertaking* of another with the result that they should be included in the same *UK consolidation group* or *non-EEA sub-group*.

8.5.3 G An example of *BIPRU* 8.5.2G is as follows. Say that the *undertaking* at the head of a *bank's UK group* is a *parent financial holding company in a Member State*. One of its *subsidiary undertakings* is the *bank*. The *parent financial holding company in a Member State* also has an *insurer* as a *subsidiary undertaking*. That *insurer* has several *investment firms* as *subsidiary undertakings*. Say that the *UK group* is not a *financial conglomerate*. The *UK consolidation group* will include the *parent financial holding company in a Member State* and the *bank*. It will also include the *investment firms* that are *subsidiary undertakings* of the *insurer*. This is because the *investment firms* are *subsidiary undertakings* of the *parent financial holding company in a Member State* through the *parent financial holding company in a Member State's* holding in the *insurer*. However it will not include the *insurer* itself.

Basis of inclusion of undertakings in consolidation

8.5.4 R A *firm* must include any *subsidiary undertaking* in the *UK consolidation group* or *non-EEA sub-group* in full in the calculations in this chapter.

8.5.5 R In carrying out the calculations for the purposes of this chapter a *firm* must only include the relevant proportion of an *undertaking* that is a member of the *UK consolidation group* or *non-EEA sub-group*:

- (1) by virtue of a *consolidation Article 12(1) relationship*;

- (2) by virtue of an *Article 134 relationship*; or
- (3) because the group holds a *participation* in it.

8.5.6 R In *BIPRU* 8.5.5R, the relevant proportion is either:

- (1) (in the case of a *participation*) the proportion of *shares* issued by the *undertaking* held by the *UK consolidation group* or the *non-EEA sub-group*; or
- (2) (in the case of a *consolidation Article 12(1) relationship* or an *Article 134 relationship*), such proportion (if any) as stated in the *Part IV permission* of the *firm*.

Basis of inclusion of UCITS investment firms in consolidation

8.5.7 R *GENPRU* 2.1.46R (Adjustment of the variable capital requirement calculation for UCITS investment firms) and *BIPRU* 10.1.5R (Restricted application for UCITS investment firms) do not apply for the purpose of this chapter.

8.5.8 G In general a *UCITS investment firm* only calculates its capital and concentration risk requirements in relation to its *designated investment business* and does not calculate them with respect to *scheme management activity*. The effect of *BIPRU* 8.5.7R is that this does not apply on a consolidated basis. For the purpose of this chapter the calculations are carried with respect to the whole of the activities of a *UCITS investment firm*.

Exclusion of undertakings from consolidation: Balance sheet size

8.5.9 R A *firm* may, having first notified the *FSA* in writing in accordance with *SUP* 15.7 (Form and method of notification), exclude an *institution, asset management company, financial institution* or *ancillary services undertaking* that is a *subsidiary undertaking* in, or an *undertaking* in which a *participation* is held by, the *UK consolidation group* or *non-EEA sub-group* if the balance sheet total of that *undertaking* is less than the smaller of the following two amounts:

- (1) 10 million Euros;
- (2) 1% of the balance sheet total of the *parent undertaking* or the *undertaking* that holds the *participation*.

8.5.10 R A *firm* must include *undertakings*, to which *BIPRU* 8.5.9R would otherwise apply, if the balance sheet total of those *undertakings* taken together breaches the limit in *BIPRU* 8.5.9R.

Exclusion of undertakings from consolidation: Other reasons

8.5.11 G Article 73(1) of the *Banking Consolidation Directive* allows the *FSA* to decide to exclude an *institution*, *financial institution*, *asset management company* or *ancillary services undertaking* that is a *subsidiary undertaking* in, or an *undertaking* in which a *participation* is held by, the *UK consolidation group* or *non-EEA sub-group* for the purposes of this chapter in the following circumstances:

- (1) where the head office of the *undertaking* concerned is situated in a country outside the *EEA* where there are legal impediments to the transfer of the necessary information; or
- (2) where, in the opinion of the *FSA*, the *undertaking* concerned is of negligible interest only with respect to the objectives of monitoring *institutions*; or
- (3) where, in the opinion of the *FSA*, the consolidation of the financial situation of the *undertaking* concerned would be inappropriate or misleading as far as the objectives of the supervision of *institutions* are concerned.

8.5.12 G If a *firm* wishes to exclude an *undertaking* on the basis of any of the grounds set out in *BIPRU* 8.5.11G it should apply to the *FSA* for a *waiver*. The *FSA* will consider such applications in the light of the criteria in section 148 of the *Act*.

8.5.13 G If several *undertakings* meet the criteria in *BIPRU* 8.5.11G(2), the *FSA* will not agree to a *waiver* to exclude them all from consolidation where collectively they are of non-negligible interest with respect to the objectives of the supervision of *institutions*.

Information about excluded undertakings

8.5.14 G The *FSA* may require a *firm* to provide information about the *undertakings* excluded from consolidation of the *UK consolidation group* or *non-EEA sub-group* pursuant to this section.

8.6 Consolidated capital resources

General

- 8.6.1 R A *firm* must calculate the *consolidated capital resources* of its *UK consolidation group* or its *non-EEA sub-group* by applying *GENPRU 2.2 (Capital resources)* to its *UK consolidation group* or *non-EEA sub-group* on an accounting consolidation basis, treating the *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*. The *firm* must adjust *GENPRU 2.2* in accordance with this section for this purpose.

Limits on the use of different forms of capital

- 8.6.2 R The *capital resources gearing rules* apply for the purposes of calculating *consolidated capital resources*. They apply to the *UK consolidation group* or *non-EEA sub-group* on an accounting consolidation basis, treating the *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*.
- 8.6.3 G As the various components of capital differ in the degree of protection that they offer, the *capital resources gearing rules* as applied on a consolidated basis place restrictions on the extent to which certain types of capital are eligible for inclusion in a *UK consolidation group* or *non-EEA sub-group's consolidated capital resources*. *GENPRU 2.2.25R (Limits on the use of different forms of capital: Use of higher tier capital in lower tiers)* also applies.
- 8.6.4 G The prohibition in *GENPRU 2.2 (Capital resources)* on including *innovative tier one capital* in *tier one capital* for the purposes of meeting capital resources requirements applies under this section. However *GENPRU 2.2.27R (Innovative tier one capital may be included in lower stages of capital when excluded from tier one capital)* also applies. So, for example, a *firm* should not include *consolidated indirectly issued capital* in *tier one capital* but should generally include it as *upper tier two capital*.
- 8.6.5 G The *rules* in *GENPRU 2.2 (Capital resources)* on what *tier two capital* and *tier three capital* can be used for also apply under this section.

Calculation of consolidated capital resources if there is a building society in the group

- 8.6.6 R Where a *firm's UK consolidation group* or *non-EEA sub-group* includes a *building society*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* for *building societies*.

Calculation of consolidated capital resources if there is a bank or credit institution in the group

- 8.6.7 R Where a *firm's UK consolidation group* or *non-EEA sub-group* includes a *bank* or *credit institution* but not a *building society*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* for *banks*.

Calculation of consolidated capital resources for an investment firm group

- 8.6.8 R Where a *firm's UK consolidation group* or *non-EEA sub-group* does not include a *bank*, *building society* or *credit institution*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* in *GENPRU 2 Annex 4R* (Capital resources table for a BIPRU investment firm deducting material holdings) or *GENPRU 2 Annex 5R* (Capital resources table for a BIPRU investment firm deducting illiquid assets).
- 8.6.9 R A *firm* must give one *Month's* prior notice to the *FSA* before starting to use or stopping using the method in *GENPRU 2 Annex 5R* (Capital resources table for a BIPRU investment firm deducting illiquid assets).

Treatment of minority interests

- 8.6.10 R (1) This *rule* sets out how to determine whether minority interests in an *undertaking* in a *UK consolidated group* or *non-EEA sub-group* may be included in *tier one capital*, *tier two capital* or *tier three capital* for the purpose of calculating *consolidated capital resources* (each referred to as a "tier" of capital in this *rule*).
- (2) A *firm* must identify the item of capital of the *undertaking* in question that gives rise to that minority interest.
- (3) A *firm* must include the minority interest in the tier of capital in which that *undertaking* would have to include the capital referred to in (2) if it were a *firm* calculating its *capital resources* on a solo basis under whichever method applies to the group under *BIPRU 8.6.6R* to *BIPRU 8.6.9R*.
- (4) This *rule* does not apply to a minority interest created by *consolidated indirectly issued capital*.

Indirectly issued capital and group capital resources

- 8.6.11 R For the purposes of this chapter, *GENPRU 2.2.123R* to *GENPRU 2.2.137R* (Indirectly issued tier one capital (BIPRU firm only)) do not apply. A *firm* may only include *consolidated indirectly issued capital* in *consolidated capital resources* (whether as a minority interest or otherwise) in accordance with this section.
- 8.6.12 R *Consolidated indirectly issued capital* means any *capital instrument* issued by a member of the *UK consolidation group* or *non-EEA sub-group* where:
- (1) some or all of the following conditions are satisfied:

- (a) that capital is issued to an *SPV*; or
 - (b) that capital is issued by an *SPV*; or
 - (c) the subscription for the capital issued by the member of the group in question is funded directly or indirectly by an *SPV*; and
- (2) any of the *SPVs* referred to in (1) is a member of the *UK consolidation group* or *non-EEA sub-group* or a *subsidiary undertaking* of any member of the *UK consolidation group* or *non-EEA sub-group*.
- 8.6.13 R A *firm* may only include *consolidated indirectly issued capital* in the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group* if:
- (1) it is issued by an *SPV* that is a member of the *UK consolidation group* or *non-EEA sub-group* to *persons* who are not members of the *UK consolidation group* or *non-EEA sub-group*; and
 - (2) the conditions in *BIPRU* 8.6.16R to 8.6.18R are satisfied.
- 8.6.14 R *Consolidated indirectly issued capital* that is eligible for inclusion in the *consolidated capital resources* of a *UK consolidation group* or *non-EEA sub-group* may only be included as a minority interest created by the *capital instrument* issued by the *SPV* referred to in *BIPRU* 8.6.13R. If it is eligible, it is *innovative tier one capital*.
- 8.6.15 R For the purposes of this section, an *undertaking* is an *SPV* if the main activity of the *SPV* is to raise funds for *undertakings* in:
- (1) (in the case of a *UK consolidation group*) that *UK consolidation group*; or
 - (2) (in the case of a *non-EEA sub-group*) that *non-EEA sub-group* or any *UK consolidation group* of which it forms part.
- 8.6.16 R The *SPV* referred to in *BIPRU* 8.6.13R must satisfy the conditions in *GENPRU* 2.2.127R (Conditions that an *SPV* has to satisfy if indirectly issued capital is to be included in *capital resources* on a solo basis) as modified by the following:
- (1) references in *GENPRU* 2.2.127R(1) to being controlled by the *firm* are to being controlled by a member of the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be; and
 - (2) references to the *firm's group* are to the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be.

- 8.6.17 R The capital issued by the *SPV* referred to in *BIPRU* 8.6.13R must satisfy the conditions in *GENPRU* 2.2.129R (Conditions that capital issued by an *SPV* has to satisfy if indirectly issued capital is to be included in *capital resources* on a solo basis) as modified by the following:
- (1) references to the *firm's group* are to the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be;
 - (2) the substitution obligation in *GENPRU* 2.2.129R(2) need not be the *firm's* but may apply to any member of the *UK consolidation group* or *non-EEA sub-group* as the case may be; and
 - (3) that substitution obligation applies if the *consolidated capital resources* of the *UK consolidation group* or *non-EEA sub-group*, as the case may be, fall, or are likely to fall, below its *consolidated capital resources requirement*.
- 8.6.18 R The *SPV* referred to in *BIPRU* 8.6.13R must invest the funds raised from the issue of capital by the *SPV* by subscribing for capital resources issued by an *undertaking* that is a member of the *UK consolidation group* or *non-EEA sub-group*. Those capital resources must satisfy the following conditions:
- (1) those capital resources must at least comply with the requirements for *lower tier two capital*; and
 - (2) the first call date or fixed maturity date (if any) of those capital resources must not arise before the first call date on the instrument issued by the *SPV*.
- 8.6.19 R In relation to the obligation to substitute described in *BIPRU* 8.6.17R(2), a *firm* must take all reasonable steps to ensure that the *undertaking* in question has at all times sufficient authorised and unissued *tier one instruments* other than *innovative tier one instruments* (and authority to issue them) to enable it to discharge the obligation to substitute.
- 8.6.20 R A *firm* must comply with the requirements set out in *GENPRU* 2.2.135R (Notifying the *FSA* of unusual transactions in relation to indirectly issued capital) and *GENPRU* 2.2.137R (Contents of marketing documents in relation to indirectly issued capital) in relation to *consolidated indirectly issued capital* included in *consolidated capital resources*.

8.7 Consolidated capital resources requirements

General approach

- 8.7.1 G The calculation of the *consolidated capital resources requirement* of a firm's UK consolidation group or non-EEA sub-group involves taking the individual components that make up the *capital resources requirement* on a solo basis and applying them on a consolidated basis. Those components are the capital charge for credit risk (the *credit risk capital requirement*), the capital charge for market risk (the *market risk capital requirement*), the capital charge for *operational risk* (the *operational risk capital requirement*) and the *fixed overheads requirement*.
- 8.7.2 G Each of the capital charges in BIPRU 8.7.1G, as applied on a consolidated basis, is called a *consolidated requirement component*. The name of each *consolidated requirement component* reflects the solo capital charge on which it is based. Solo capital charges are called *risk capital requirements*. Thus for example the *consolidated requirement component* for market risk is called the *consolidated market risk requirement*. The calculation of the *consolidated market risk requirement* is based on the calculation of the capital charge for market risk that applies on a solo basis (the *market risk capital requirement*). So the *risk capital requirement* applicable to the *consolidated market risk requirement* is the *market risk capital requirement*.
- 8.7.3 G The first step is for a firm to identify what sort of group it belongs to as the calculation of the *consolidated capital resources requirement* differs between different types of groups. This is set out in BIPRU 8 Annex 5R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group). BIPRU 8 Annex 5R shows, for each type of group:
- (1) which of the *consolidated requirement components* apply and which do not; and
 - (2) how to add up the different *consolidated requirement components* to reach the overall *consolidated capital resources requirement*.
- 8.7.4 G BIPRU 8 Annex 5R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group) categorises groups by reference to what kind of *undertakings* they contain (*credit institutions, limited licence firms, limited activity firms* or *CAD full scope firms*).
- 8.7.5 G In general a firm should calculate each *consolidated requirement component* using the FSA's rules, even in the case of group members who are subject to the capital requirements of an overseas regulator. However this section sets out certain circumstances in which a firm may use the capital requirements of an overseas regulator.

- 8.7.6 G *BIPRU 8.8 (Advanced prudential calculation approaches) says that a firm should not apply an advanced prudential calculation approach on a consolidated basis unless the advanced prudential calculation approach permission allowing the firm to use the advanced prudential calculation approach specifically allows it to be used on consolidated basis.*
- 8.7.7 G *BIPRU 8.8 (Advanced prudential calculation approaches) has further details about how capital requirements are calculated on a consolidated basis if a firm uses an advanced prudential calculation approach.*
- 8.7.8 G *A firm has a choice about how it should apply a risk capital requirement to the group. It may do this by treating the whole of the group as a single entity and applying the risk capital requirement to the group (a line by line approach), calculating a separate risk capital requirement for each group member (an aggregation approach) or a mixture of the two.*
- 8.7.9 G *A firm may make the choice between an aggregation and a line by line approach differently for each consolidated requirement component. So for example a firm may decide to calculate the consolidated market risk requirement on an aggregation basis and the consolidated fixed overheads requirement on a line by line basis.*

Method of calculation to be used

- 8.7.10 R *A firm must calculate the consolidated capital resources requirement of its UK consolidation group or non-EEA sub-group in accordance with the method identified by the decision tree in BIPRU 8 Ann 5R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group).*

Calculation of the consolidated requirement components

- 8.7.11 R *A firm must calculate a consolidated requirement component by applying the risk capital requirement applicable to that consolidated requirement component to the UK consolidation group or non-EEA sub-group in accordance with BIPRU 8.7.13R. Except where BIPRU 8.7.34R to BIPRU 8.7.38R allow the requirements of another regulator to be used, the risk capital requirement must be calculated in accordance with the FSA's rules. The risk capital requirement applicable to a consolidated requirement component is the one specified in the second column of the table in BIPRU 8.7.12R.*

- 8.7.12 R Table: Capital charges relating to consolidated requirement components
This table belongs to *BIPRU 8.7.11R*

<i>Consolidated requirement component</i>	<i>Rules on which the consolidated requirement component are based (the applicable risk capital requirement)</i>
<i>Consolidated credit risk requirement</i>	<i>Credit risk capital requirement</i>
<i>Consolidated fixed overheads requirement</i>	<i>Fixed overheads requirement</i>
<i>Consolidated market risk requirement</i>	<i>Market risk capital requirement</i>
<i>Consolidated operational risk requirement</i>	<i>Operational risk capital requirement</i>

Choice of consolidation method

- 8.7.13 R (1) A *firm* must calculate a *consolidated requirement component* by using one of the methods in this *rule*.
- (2) Under the first method a *firm* must:
- (a) apply the *risk capital requirement* set out in *BIPRU 8.7.12R* to each *undertaking* in the *UK consolidation group* or *non-EEA sub-group*; and
 - (b) add the *risk capital requirements* together.
- (3) Under the second method a *firm* must:
- (a) treat the whole *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*; and
 - (b) apply the *risk capital requirement* set out in *BIPRU 8.7.12R* to the group on an accounting consolidation basis.
- (4) The third method is a mixture of methods one and two. Under the third method a *firm* must:
- (a) treat one or more parts of the *UK consolidation group* or *non-EEA sub-group* as separate single *undertakings*;

- (b) apply the *risk capital requirement* set out in *BIPRU 8.7.12R* to each such part of the group on an accounting consolidation basis;
 - (c) apply the *risk capital requirement* set out in *BIPRU 8.7.12R* to each of the remaining *undertakings* in the *UK consolidation group* or *non-EEA sub-group* (if any); and
 - (d) add the *risk capital requirements* together.
- (5) A *firm* may use different methods for different *consolidated requirement components*.

8.7.14 G An accounting consolidation basis means applying the *rules* in *BIPRU 8.7.12R* on a line by line consolidation basis rather than an aggregation basis.

8.7.15 G The provisions of this section on credit risk and market risk restrict the choice given by *BIPRU 8.7.13R* in certain circumstances.

Notifying the FSA of the choice of consolidation technique

8.7.16 R A *firm* must notify the *FSA* which method under *BIPRU 8.7.13R* it applies for which *consolidated requirement component* and to which parts of the *UK consolidation group* or *non-EEA sub-group* it is applying an aggregation approach and to which parts it is applying an accounting consolidation approach.

Special rules for the consolidated credit risk requirement

8.7.17 R *BIPRU 8.7.18G* to *BIPRU 8.7.23R* relate to the calculation of the *consolidated credit risk requirement*.

8.7.18 G The *credit risk capital requirement* (on which the *consolidated credit risk requirement* is based) is split into three capital charges. One relates to credit risk in the *non-trading book* (the *credit risk capital component*). One relates to credit risk in the *trading book* (the *counterparty risk capital component*). The third is a capital charge for *exposures* in the *trading book* that exceed the limits in *BIPRU 10.5* (Limits on exposures and large exposures). This is called the *concentration risk capital component*. *BIPRU 8.9* (Consolidated concentration risk requirements) explains how to calculate the part of the *consolidated credit risk requirement* that corresponds to the *concentration risk capital component*.

8.7.19 G In particular *BIPRU 8.9* (Consolidated concentration risk requirements) says that a *firm* should calculate the part of the *consolidated credit risk requirement* that corresponds to the *concentration risk capital component* on an accounting consolidation basis. This means using method two in *BIPRU 8.7.13R*.

- 8.7.20 R A *firm* may use a combination of the *CCR standardised method*, the *CCR mark to market method* and the *CCR internal model method* on a permanent basis with respect to the *firm's UK consolidation group* or *non-EEA sub-group* for the purposes of calculating the *consolidated credit risk requirement*. In particular, where the *firm* is permitted to apply the *CCR internal model method* on a consolidated basis with respect to its *UK consolidation group* or *non-EEA sub-group*, it may combine the use of *CCR standardised method* and *CCR mark to market method* on a permanent basis for *financial derivative instruments* and *long settlement transactions* not covered by its *CCR internal model method permission*.
- 8.7.21 R *BIPRU 9.4.1R* (Minimum requirements for recognition of significant credit risk transfer) as applied on a consolidated basis requires the transfer to be to a *person* outside the *UK consolidation group* or *non-EEA sub-group*.
- 8.7.22 R A *firm* must not use both the *financial collateral simple method* and the *financial collateral comprehensive method* with respect to its *UK consolidation group* or *non-EEA sub-group*.
- 8.7.23 R (1) A *firm* may only treat an *exposure* as exempt under *BIPRU 3.2.25R* (Zero risk-weighting for intra-group exposures) as applied on a consolidated basis if the member of the *UK consolidation group* or *non-EEA sub-group* that has the *exposure*:
- (a) is a *BIPRU firm* and that *exposure* is exempt under *BIPRU 3.2.25R* as it applies to that *BIPRU firm* on a solo basis; or
 - (b) meets the conditions in *BIPRU 3.2.25R(1)(d)* (Condition relating to establishment in the *UK*) and that *exposure* would be exempt under (a) if that member was a *BIPRU firm*.
- (2) The notification obligation in *BIPRU 3.2.35R* applies.

Special rules for the consolidated market risk requirement

- 8.7.24 R For the purposes of calculating the *consolidated market risk requirement* of a *UK consolidation group* or *non-EEA sub-group*, a *firm* must apply *BIPRU 1.2.3R* (Definition of the *trading book*) and *BIPRU 1.2.17R* (Size thresholds for the purposes of the definition of the *trading book*) to the whole *UK consolidation group* or *non-EEA sub-group* as if the group were a single *undertaking*.

- 8.7.25 R A *firm* may not apply the second method in *BIPRU* 8.7.13R(3) (accounting consolidation for the whole group) or apply accounting consolidation to parts of its *UK consolidation group* or *non-EEA sub-group* under method three as described in *BIPRU* 8.7.13R(4)(a) for the purposes of the calculation of the *consolidated market risk requirement* unless the group or sub-group and the *undertakings* in that group or sub-group satisfy the conditions in this *rule*. Instead the *firm* must use the aggregation approach described in *BIPRU* 8.7.13R(2) (method one) or *BIPRU* 8.7.13R(4)(c). Those conditions are as follows:
- (1) each of the *undertakings* in that group or sub-group is an *institution* that is:
 - (a) a *BIPRU firm*;
 - (b) an *EEA firm*;
 - (c) a *recognised third country credit institution*; or
 - (d) a *recognised third country investment firm*;
 - (2) each of the *undertakings* referred to in (1) that is a *BIPRU firm* has *capital resources* that are equal to or in excess of its *capital resources requirement* and complies with *BIPRU* 10 (Concentration risk requirements);
 - (3) each of the *undertakings* referred to in (1) that is an *EEA firm* complies with the *CRD implementation measures* in its *EEA State* that correspond to the requirements in (2);
 - (4) each of the *undertakings* referred to in (1) that is a *recognised third country credit institution* or *recognised third country investment firm* complies with laws in the state or territory in which it has its head office that are equivalent to the requirements of the *Banking Consolidation Directive* or *Capital Adequacy Directive* relating to capital adequacy and concentration risk;
 - (5) there is no material legal, regulatory or contractual impediment to the transfer of funds between those *undertakings* in that group or sub-group;
 - (6) there is no material legal, regulatory or contractual impediment to mutual financial support between those *undertakings* in that group or sub-group;
 - (7) the *market risk positions* of the *undertakings* are monitored and managed on a co-ordinated basis; and
 - (8) there is satisfactory allocation of capital within the group or sub-group.

Special rules for the consolidated operational risk requirement

- 8.7.26 R For the purposes of calculating the *consolidated operational risk requirement*, a *firm* must apply *BIPRU 6.2.9R* to *BIPRU 6.2.12R* (Combination of different methodologies) to the whole *UK consolidation group* or *non-EEA sub-group* as if the group were a single *undertaking*.
- 8.7.27 R (1) This *rule* sets out how *BIPRU 6.3.2R(3)* (Negative figure arising in calculation of the relevant indicator under the *basic indicator approach*) applies on a consolidated basis.
- (2) If the calculation for any individual *undertaking* under method one in *BIPRU 8.7.13R(2)* (application of aggregation approach to the whole group) or method three as described in *BIPRU 8.7.13R(4)(c)* (mixture of aggregation and accounting consolidation) or for any sub-group created under method three as described in *BIPRU 8.7.13R(4)(a)* results in a figure of zero or a negative figure, that figure must be excluded.
- (3) If a *firm* is using method two in *BIPRU 8.7.13R* (accounting consolidation approach for the whole group), *BIPRU 6.3.2R(3)* applies to the *UK consolidation group* or *non-EEA sub-group* as if it were a single *undertaking*.
- (4) (3) also applies to a sub-group created under method 3 as described in *BIPRU 8.7.13R(4)(a)*.

Special rules for calculating specific consolidated requirement components

- 8.7.28 G *BIPRU 8.7.21R* to *BIPRU 8.7.26R* are generally examples of the application of the general principles in *BIPRU 8.2.1R* (Main consolidation *rule* for *UK consolidation groups*) and *BIPRU 8.3.1R* (Main consolidation *rule* for *non-EEA sub-groups*). *BIPRU 8.7.20R* and *BIPRU 8.7.25R* are exceptions to those principles.

Elimination of intra-group transactions

- 8.7.29 R In accordance with *BIPRU 8.2.1R* and *BIPRU 8.3.1R* (The basic consolidation *rules* for a *UK consolidation group* or *non-EEA sub-group*), a *firm* may exclude that part of the *risk capital requirement* that arises as a result of:
- (1) (in respect of the *consolidated credit risk requirement*) intra-group balances; or
- (2) (in respect of the *consolidated operational risk requirement* and *consolidated fixed overheads requirement*) intra-group transactions;
- with other *undertakings* in the *UK consolidation group* or *non-EEA sub-group*.

Other provisions about calculating risk capital requirements

- 8.7.30 R (1) This *rule* applies when the *rules* applicable under *BIPRU* 8.7.12R apply differently for different types of *firms*.
- (2) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 1 in *BIPRU* 8 Annex 5R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group), the *rules* that apply are those that apply to a *bank* that is a *BIPRU firm*.
- (3) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 2 in *BIPRU* 8 Annex 5R, the *rules* that apply are those that apply to a *full scope BIPRU investment firm*.
- (4) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 3 in *BIPRU* 8 Annex 5R, the *rules* that apply are those that apply to a *BIPRU limited activity firm*.
- (5) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 4 in *BIPRU* 8 Annex 5R, the *rules* that apply are those that apply to a *BIPRU limited license firm*.
- 8.7.31 G If a *firm* is calculating a *risk capital requirement* for an *undertaking* that is not a *BIPRU firm* it should calculate it as if the *undertaking* were a *BIPRU firm*.
- 8.7.32 G Similarly *BIPRU* 8.7.30R may have the effect that the *risk capital requirement* for a *BIPRU firm* is calculated differently from the way it is on a solo basis. Thus for example if the *risk capital requirement* is being calculated for a *BIPRU limited licence firm* that is a *subsidiary undertaking* of a *bank* the *risk capital requirement* should be calculated using the *rules* for a *bank*.
- 8.7.33 G A *firm* should not use an *advanced prudential calculation approach* for calculating a *risk capital requirement* unless this is permitted as explained in *BIPRU* 8.8 (Advanced prudential calculation approaches).

Use of the solo requirements of another EEA competent authority

- 8.7.34 R A *firm* may calculate the *risk capital requirement* for an *institution* in the *firm's UK consolidation group* or *non-EEA sub-group* that is an *EEA firm* in accordance with the *CRD implementation measures* in the *EEA firm's EEA State* that correspond to the *FSA's rules* that would otherwise apply under this section if the *institution* is subject to those *CRD implementation measures*.

Use of the solo requirements of a regulator outside the EEA

- 8.7.35 R (1) This *rule* applies where:

- (a) an *institution* in a *firm's UK consolidation group* or *non-EEA sub-group* is subject to any of the *sectoral rules* applicable to its *financial sector* for a state or territory outside the *EEA* that correspond to the *FSA's rules* that would otherwise apply under this section;
 - (b) those *sectoral rules* are shown in *BIPRU 8 Annex 6R* (Non – EEA regulators' requirements deemed CRD-equivalent for individual risks) as having been assessed as being equivalent to the *FSA rules* in relation to the *consolidated requirement component* in question; and
 - (c) that *institution* is incorporated in and has its head office in that state or territory.
- (2) If the conditions in this *rule* are satisfied, a *firm* may apply the *sectoral rules* referred to in (1) in order to calculate the *risk capital requirement* for the *institution* referred to in (1) provided that:
- (a) the *firm* has no reason to believe that the use of the *sectoral rules* referred to in (1) would produce a lower figure for the *consolidated requirement component* than would be produced by calculating the *risk capital requirement* under the *FSA's rules* in accordance with this section; or
 - (b) the *firm* increases the amount produced under the *sectoral rules* referred to in (1) and the *firm* has no reason to believe that the use of such figures would produce a lower figure for the *consolidated requirement component* than would be produced by calculating the *risk capital requirement* under the *FSA's rules* in accordance with this section.

8.7.36 G If a *firm* wants to include in its *consolidated capital resource requirement* a solo capital resource requirement for an individual risk calculated under the rules of a non-*EEA* regulator not assessed as equivalent in *BIPRU 8 Annex 6R* (Non –EEA regulators' requirements deemed CRD-equivalent for individual risks) it will need to apply for a *waiver*. A *firm* applying for such a *waiver* should demonstrate that the local requirements result in a capital charge that is at least as much as required under the corresponding *FSA rules*.

Use of the consolidated requirements of another EEA competent authority

8.7.37 R (1) This *rule* applies if:

- (a) a *firm* is applying an accounting consolidation approach to part of its *UK consolidation group* or *non-EEA sub-group* under method three as described in *BIPRU 8.7.13R(4)(a)*; and

- (b) the part of the group in (a) constitutes the whole of a group subject to the consolidated capital requirements of a *competent authority* under the *CRD implementation measures* relating to consolidation under the *Banking Consolidation Directive* or the *Capital Adequacy Directive*.
- (2) If the conditions in this *rule* are satisfied, a *firm* may apply the consolidated capital requirement in (1)(b) as the *risk capital requirement* for the group identified in (1)(a) so far as that consolidated capital requirement corresponds to the *FSA's rules* that would otherwise apply under this section.

Use of the consolidated requirements of a regulator outside the EEA

- 8.7.38 R (1) This *rule* applies if:
- (a) a *firm* is applying an accounting consolidation approach to part of its *UK consolidation group* or *non-EEA sub-group* under method three as described in *BIPRU* 8.7.13R(4)(a);
 - (b) the part of the group in (a) constitutes the whole of a group subject to the consolidated capital requirements of a *third country competent authority* under the *sectoral rules* for the *banking sector* or the *investment services sector*; and
 - (c) those *sectoral rules* are shown in *BIPRU* 8 Annex 6R (Non – EEA regulators' requirements deemed CRD-equivalent for individual risks) as having been assessed as being equivalent to the *FSA's rules* in relation to the *consolidated requirement component* in question.
- (2) If the conditions in this *rule* are satisfied, a *firm* may apply the consolidated capital requirement in (1)(b) as the *risk capital requirement* for the group identified in (1)(a) so far as that consolidated capital requirement corresponds to the *FSA's rules* that would otherwise apply under this section. However a *firm* may only do this if it also complies with *BIPRU* 8.7.35R(2).

Use of an advanced prudential calculation approach under the rules of an overseas regulator

- 8.7.39 G A *firm* should not use the requirements of an overseas regulator if that would involve the use of an *advanced prudential calculation approach* unless this is permitted under *BIPRU* 8.8 (Advanced prudential calculation approaches).

8.8 Advanced prudential calculation approaches

General

- 8.8.1 R A *firm* must not apply any *advanced prudential calculation approach* for the purposes of this chapter unless it has an *advanced prudential calculation approach permission* and that *advanced prudential calculation approach permission* requires the *firm* to use that *advanced prudential calculation approach* for those purposes.
- 8.8.2 G *BIPRU* 1.3 (Applications for advanced approaches) deals with how to apply for an *advanced prudential calculation approach permission*.

Prohibition on using the rules of an overseas regulator

- 8.8.3 R Even if a *firm* has an *advanced prudential calculation approach permission* that allows it to use an *advanced prudential calculation approach* for the purposes of this chapter, the *firm* may not use the requirements of another state or territory to the extent they provide for that *advanced prudential calculation approach*. Therefore a *firm* may not use *BIPRU* 8.7.34R to *BIPRU* 8.7.38R (Use of the capital requirements of an overseas regulator) if that would involve using an *advanced prudential calculation approach*.

Special provisions relating to the internal ratings based approach

- 8.8.4 R The conditions in *BIPRU* 4.2.26R (Combined use of methodologies under the *IRB approach*) apply to a *firm's UK consolidation group* or *non-EEA sub-group* as if that group were a single *undertaking*.

Special provisions relating to the advanced measurement approach

- 8.8.5 R *BIPRU* 6.5.27R(6) (Insurance should be provided by a third party entity for the purposes of the *advanced measurement approach*) is amended to provide that the insurance must be provided by an *undertaking* that is not in the same *group* as the *firm* or other members of the *UK consolidation group* or *non-EEA sub-group*. In the case of insurance through captives and affiliates, the exposure must be laid off to an independent *undertaking* that is not in the same *group* as the *firm* or other members of the *UK consolidation group* or *non-EEA sub-group*, for example through reinsurance that meets the eligibility criteria.
- 8.8.6 G In the case of insurance through captives and affiliates, the *exposure* should be laid off outside the *firm's group* to an independent third party.
- 8.8.7 G *BIPRU* 8.7.22R deals with the combination of the *advanced measurement approach* with other approaches to *operational risk* on a group level.

Special provisions relating to the CCR internal model method

- 8.8.8 G *BIPRU 8.7.17R* deals with the combination of the *CCR internal model method* with other approaches to calculating exposure values on a group level.

Corporate governance arrangement for the IRB approach and the AMA

- 8.8.9 G The governance arrangements that apply to the *governing body*, the senior management and any *designated committee* of a *firm* in relation to the *IRB approach* or the *AMA* also apply to the body or *persons* with equivalent powers with respect to the *UK consolidation group* or *non-EEA sub-group*. Where the *parent undertaking* and its *subsidiary undertakings* use rating systems on a unified basis, the approval and reporting process described in *BIPRU 4.3.12G* (Approval and reporting arrangements for the *IRB approach* where rating systems are used on a unified group basis) and *BIPRU 6.5.32G* (Approval and reporting arrangements for the *AMA* where rating systems are used on a unified group basis) apply for the purpose of this paragraph too.

8.9 Consolidated concentration risk requirements

Main rule

- 8.9.1 R *BIPRU 10 (Concentration risk requirements) applies to a firm's UK consolidation group or non-EEA sub-group as if it were a single undertaking, subject to the rest of this section.*

Definition of consolidated capital resources for concentration risk purposes

- 8.9.2 R *BIPRU 8.6 (Consolidated capital resources) applies for the purpose of this section subject to the adjustments required by BIPRU 8.9.1R. In particular BIPRU 10.5.2R to BIPRU 10.5.5R (Definition of capital resources for concentration risk purposes) apply on a consolidated basis.*

Calculation of the concentration risk capital component

- 8.9.3 R *A firm must calculate the consolidated credit risk requirement so far as it relates to the concentration risk capital component under BIPRU 8.9.1R. In particular a firm must not use the capital requirements of a regulator other than the FSA so far as they correspond to the concentration risk capital component.*

Treasury Concession

- 8.9.4 R *A firm may only treat an exposure as exempt under BIPRU 10.7.1R (Treasury Concession) as applied on a consolidated basis if the exposure is of a member of the UK consolidation group or non-EEA sub-group that is a BIPRU firm or that has its head office in the UK and that exposure is or (if that rule applied to the undertaking in question) would be exempt under BIPRU 10.7.1R on a solo basis. The following adjustments apply:*
- (1) *the exposure must be to a consolidation concentration risk group counterparty; and*
 - (2) *the limit in BIPRU 10.7.2R (Exemption limited to 50% of a firm's capital resources) is calculated on a consolidated basis.*

Intra-group securities financing transactions

- 8.9.5 R *A firm may only treat an exposure as exempt under BIPRU 10.7.4R (Intra-group securities financing transactions) as applied on a consolidated basis if the exposure is or (if that rule applied to the undertaking in question) would be exempt under BIPRU 10.7.4R on a solo basis. BIPRU 10.7.6R (Abuse of the exemption) continues to apply. The exemption is not available if the firm uses the CCR internal models method for securities financing transactions for the purpose of this chapter.*

UK integrated groups and wider integrated groups

8.9.6 G In many cases there is no need for the UK integrated groups and wider integrated groups regime in *BIPRU* 10.8 and *BIPRU* 10.9 to apply on a consolidated basis under this chapter as intra-group *exposures* within a *UK consolidation group* will be eliminated on consolidation. However it may be applicable to some group structures. For example a *UK consolidation group* may be part of a wider *EEA* or third country group. If the group has two or more *UK consolidation groups* in the *United Kingdom* because there is no common *parent undertaking* in the *United Kingdom* the regime may enable *exposures* between the two *UK consolidation groups* to be exempted. Likewise the regime may allow a *firm* to exempt *exposures* between its *UK group* and the wider worldwide group of which it forms part.

8.9.7 R *BIPRU* 10.8 (Concentration risk requirements: UK integrated groups) and *BIPRU* 10.9 (Concentration risk requirements: Wider integrated groups) do not apply on a consolidated basis under this chapter. *BIPRU* 8.9.8R to *BIPRU* 8.9.27R apply instead.

UK integrated groups: Introduction

8.9.8 R (1) *BIPRU* 8.9.9R to *BIPRU* 8.9.15R apply with respect to a *firm's UK consolidation group* or *non-EEA sub-group* (a "group") if:

- (a) the group is part of a *consolidation UK integrated group*; and
- (b) the *firm* gives notice in accordance with *BIPRU* 8.9.27R that it will apply those *rules* with respect to that group.

(2) If (1) applies with respect to a *firm's UK consolidation group* or *non-EEA sub-group*, the *firm* must apply *BIPRU* 8.9.9R to *BIPRU* 8.9.15R to all *exposures* to all *consolidation concentration risk group counterparties* and not just some of them.

UK integrated groups: Definition of consolidation UK integrated group

8.9.9 R An *undertaking* which is not itself a member of a *firm's UK consolidation group* or *non-EEA sub-group* (a "group") is a member of that group's *consolidation UK integrated group* if it satisfies the following conditions:

- (1) it is a *consolidation concentration risk group counterparty*;
- (2) it is an *institution, financial holding company, financial institution, asset management company* or *ancillary services undertaking*;
- (3) it is established in the *United Kingdom* and either it is incorporated in the *United Kingdom* or (if that *undertaking* is of a type that falls within the scope of that Regulation) the centre of its main interests is situated within the *United Kingdom* within the meaning of the Council Regulation of 29 May 2000 on insolvency proceedings (Regulation 1346/2000/EC);

- (4) the group and that *undertaking* are subject to the same risk evaluation, measurement and control procedures; and
- (5) there is no current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities from the *undertaking* to any member of the group that has an *exposure* to that *undertaking*.

8.9.10 G *Firms* are referred to the *guidance* in BIPRU 3.2.30G and BIPRU 3.2.31G (*Guidance* relating to 0% risk weights for intra-group *exposures* under the *standardised approach*) on the prompt transfer of *capital resources* and repayment of liabilities.

UK integrated groups: Definition of consolidation concentration risk group counterparty

8.9.11 R A *consolidation concentration risk group counterparty* means, in relation to a *firm's UK consolidation group* or *non-EEA sub-group* (a "relevant group"), an *undertaking* that satisfies the following conditions:

- (1) it is not a member of the relevant group;
- (2) it is:
 - (a) a *parent undertaking* of a member of the relevant group;
 - (b) a *subsidiary undertaking* of a member of the relevant group; or
 - (c) a *subsidiary undertaking* of a *parent undertaking* falling into (a); and
- (3) the *undertaking* and each member of the relevant group are:
 - (a) (if the relevant group is a *non-EEA sub-group*) included within the scope of consolidation on a full basis with respect to the same *UK consolidation group*;
 - (b) included within the scope of consolidation on a full basis with respect to the same group by a *competent authority* of an *EEA State* other than the *UK* under the *CRD implementation measures* about consolidated supervision in that *EEA State*; or
 - (c) (provided that this consolidation is carried out to standards equivalent to those in (a) and (b)) included within the scope of consolidation on a full basis with respect to the same *group* by a *third country competent authority* under prudential rules for the *banking sector* or *investment services sector* of or administered by that *third country competent authority*.

- 8.9.12 R For the purposes of *BIPRU* 8.9.11R(3)(c), a group is subject to consolidation to equivalent standards only if a member of that group has been notified in writing by the *FSA* or a *competent authority* of another *EEA State* pursuant to Article 143 of the *Banking Consolidation Directive* that that group is subject to equivalent supervision.
- 8.9.13 G An *undertaking* is included within the scope of consolidation of a group on a full basis if it is at the head of the group or if its assets and liabilities are taken into account in full as referred to in *BIPRU* 8.5.4R (Basis of inclusion of undertakings in consolidation).

UK integrated groups: Revised concentration risk limits

- 8.9.14 R A *firm* must treat *exposures* of members of the *firm's UK consolidation group* or *non-EEA sub-group* (the "relevant group") to *consolidation concentration risk group counterparties* as follows:
- (1) *exposures* of a member of the relevant group that has its head office in the *UK* to a member of the relevant group's *consolidation UK integrated group* are exempt; and
 - (2) all *exposures* falling into this *rule* not in (1) must be treated in accordance with *BIPRU* 8.9.15R.
- 8.9.15 R A *firm* must treat *exposures* falling into *BIPRU* 8.9.14R(2) as follows:
- (1) the *firm* must apply the *rules* set out in *BIPRU* 10.8.7R (List of concentration risk *rules* that apply to *UK integrated groups*) on a consolidated basis under *BIPRU* 8.9.1R with respect to its *UK consolidation group* or *non-EEA sub-group*;
 - (2) the other limits in *BIPRU* 10.5 (Concentration risk requirements: Limits on exposures and large exposures) do not apply, subject to *BIPRU* 8.9.26R; and
 - (3) all those *exposures* must be treated as being to a single *undertaking*.

Wider integrated groups: Introduction

- 8.9.16 R *BIPRU* 8.9.17R to *BIPRU* 8.9.24R apply with respect to a *firm's UK consolidation group* or *non-EEA sub-group* (a "group") if:
- (1) the *firm* has a *wider integrated group permission* that applies on a consolidated basis with respect to that group; and
 - (2) the group is part of a *consolidation UK integrated group* and of a *consolidation wider integrated group*.

8.9.17 R If *BIPRU* 8.9.16R applies with respect to a *firm's UK consolidation group* or *non-EEA sub-group*, the *firm* must apply *BIPRU* 8.9.18R to *BIPRU* 8.9.24R to all to *exposures* to all *consolidation concentration risk group counterparties* and not just some of them.

8.9.18 R If *BIPRU* 8.9.16R applies, *BIPRU* 8.9.8R to *BIPRU* 8.9.12R do not apply.

Wider integrated groups: Definition of wider integrated group

8.9.19 R An *undertaking* that is not itself a member of a *firm's UK consolidation group* or *non-EEA sub-group* (a "relevant group") is a member of the relevant group's *consolidation wider integrated group* if it satisfies all the conditions for membership of the *consolidation UK integrated group* except *BIPRU* 8.9.9R(3).

Wider integrated groups: Revised concentration risk limits

8.9.20 R A *firm* must treat *exposures* of members of the *firm's UK consolidation group* or *non-EEA sub-group* (the "relevant group") to *consolidation concentration risk group counterparties* as follows:

- (1) *exposures* of a member of the relevant group with its head office in the *UK* to a member of the relevant group's *consolidation UK integrated group* are exempt; and
- (2) all *exposures* falling into this *rule* not in (1) must be treated in accordance with *BIPRU* 8.9.21R.

8.9.21 R A *firm* must treat *exposures* falling into *BIPRU* 8.9.20R(2) as follows:

- (1) the *firm* must apply the *rules* set out in *BIPRU* 10.9.9R (List of concentration risk *rules* that apply to *wider integrated groups*) on a consolidated basis under *BIPRU* 8.9.1R with respect to its *UK consolidation group* or *non-EEA sub-group*;
- (2) the other limits in *BIPRU* 10.5 (Concentration risk requirements: Limits on exposures and large exposures) do not apply, subject to *BIPRU* 8.9.26R;
- (3) the *firm* must treat all *exposures* in a single *diverse block* as *exposures* to a single *undertaking*; and
- (4) the *firm* must treat all *exposures* in the *residual block* as *exposures* to a single *undertaking*.

Wider integrated groups: Definition of diverse block

8.9.22 R *Exposures* are treated as being in a single *diverse block* if:

- (1) they are eligible to be included in a *diverse block*; and

(2) they are to *undertakings* that are designated by the *wider integrated group permission* as being associated with the same *diverse block*.

- 8.9.23 R An *exposure* is only eligible for inclusion in a *diverse block* if one of the following conditions is satisfied:
- (1) it is an *exposure* of a member of the *firm's UK consolidation group* or *non-EEA sub-group* (the "group") with its head office in the *UK* to a member of the group's *consolidation wider integrated group*; or
 - (2) it is an *exposure* of a member of the group with its head office outside the *UK* to:
 - (a) a member of the *consolidation UK integrated group*; or
 - (b) a member of the *consolidation wider integrated group*.

Wider integrated groups: Definition of residual block

- 8.9.24 R The *residual block* consists of all *exposures to group concentration risk group counterparties* falling into *BIPRU 8.9.20R(2)* not included in a *diverse block*.

Capital base for a UK integrated groups or wider integrated group

- 8.9.25 G The capital base against which *exposure* limits are tested under the *consolidation UK integrated group* or *consolidation wider integrated group* regimes under this section remains that of the *firm's UK consolidation group* or *non-EEA sub-group*. It is not extended to cover the *consolidation UK integrated group*. This is in contrast with the integrated groups regime on a solo basis, where the capital base is extended from the *firm* to cover the *firm's UK integrated group*.

Trading book excesses for UK integrated groups and wider integrated groups

- 8.9.26 R *BIPRU 10.10* (Concentration risk requirements: Trading book excess) (as applied by *BIPRU 8.9.1R*) applies to a *firm* applying the treatments set out *BIPRU 8.9.8R* to *BIPRU 8.9.24R*.

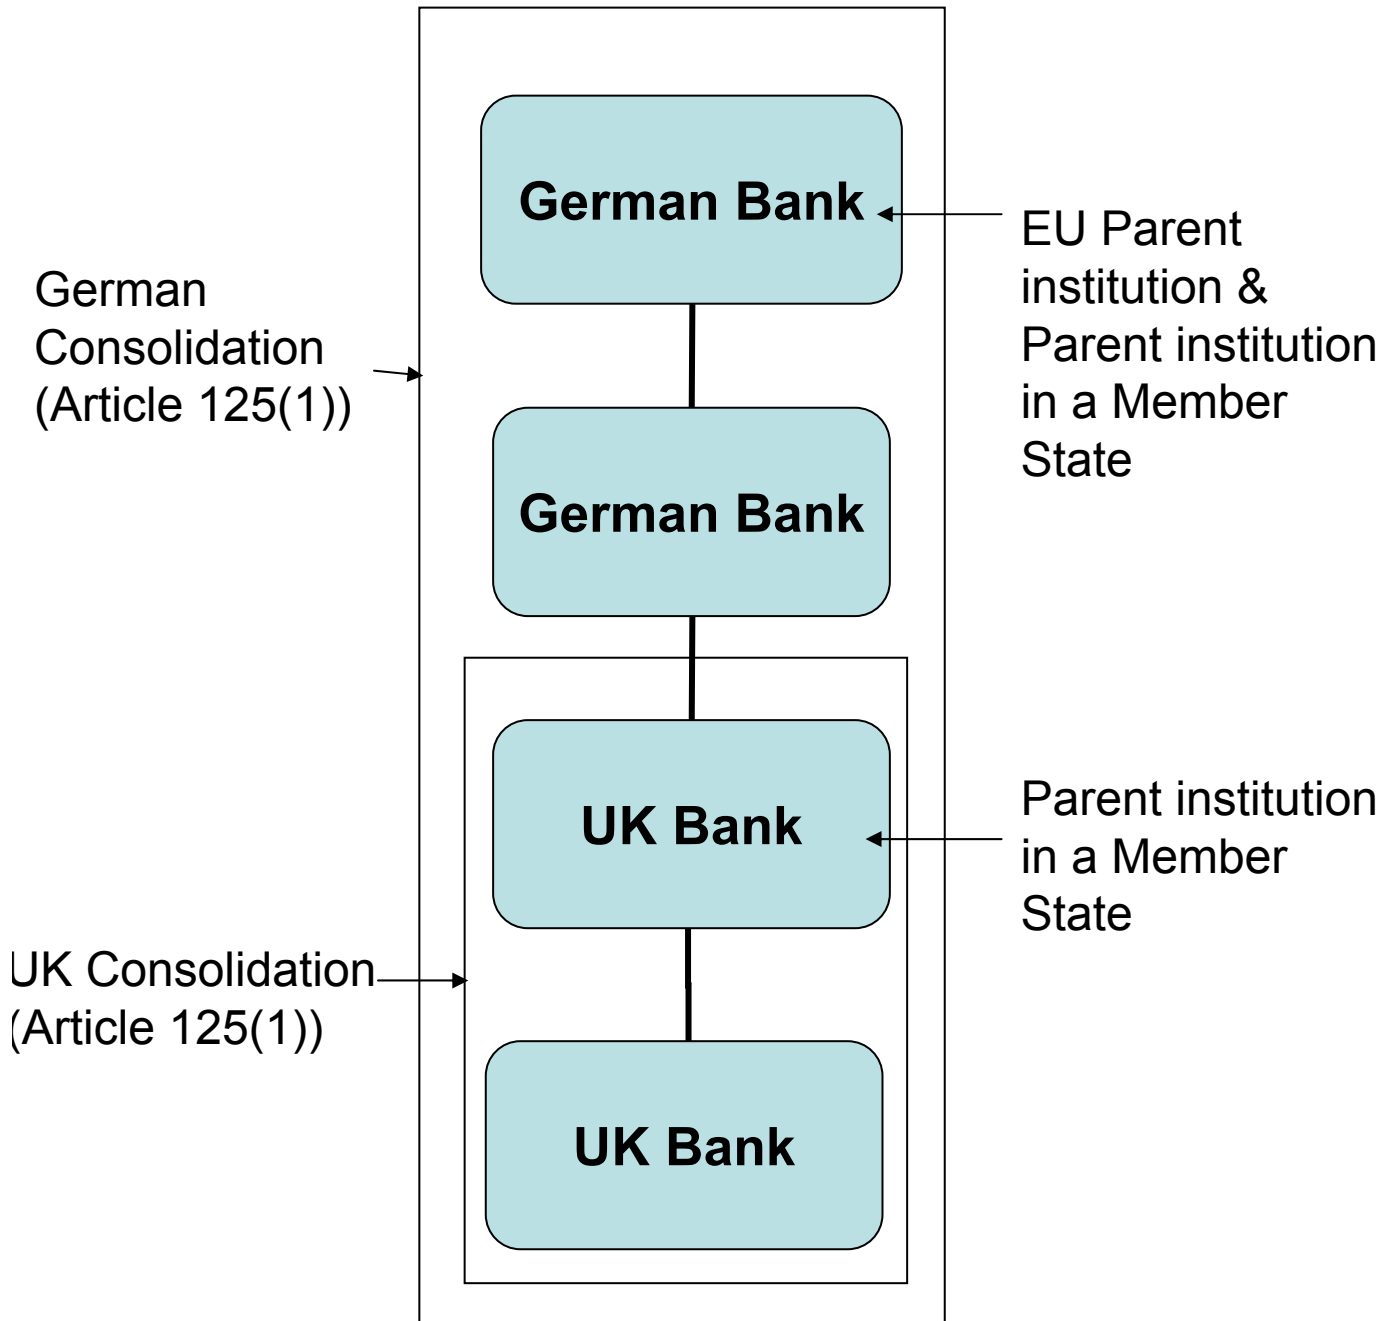

Notification procedures for UK integrated groups and wider integrated groups

- 8.9.27 R *BIPRU 10.11* (Concentration risk requirements: Notification procedures) (as applied by *BIPRU 8.9.1R*) applies to a *firm* applying the treatments set out in *BIPRU 8.9.8R* to *BIPRU 8.9.24R*.

BIPRU 8 Ann 1R – Decision tree identifying a UK consolidation group

Text of Articles 125 and 126 of the Banking Consolidation Directive

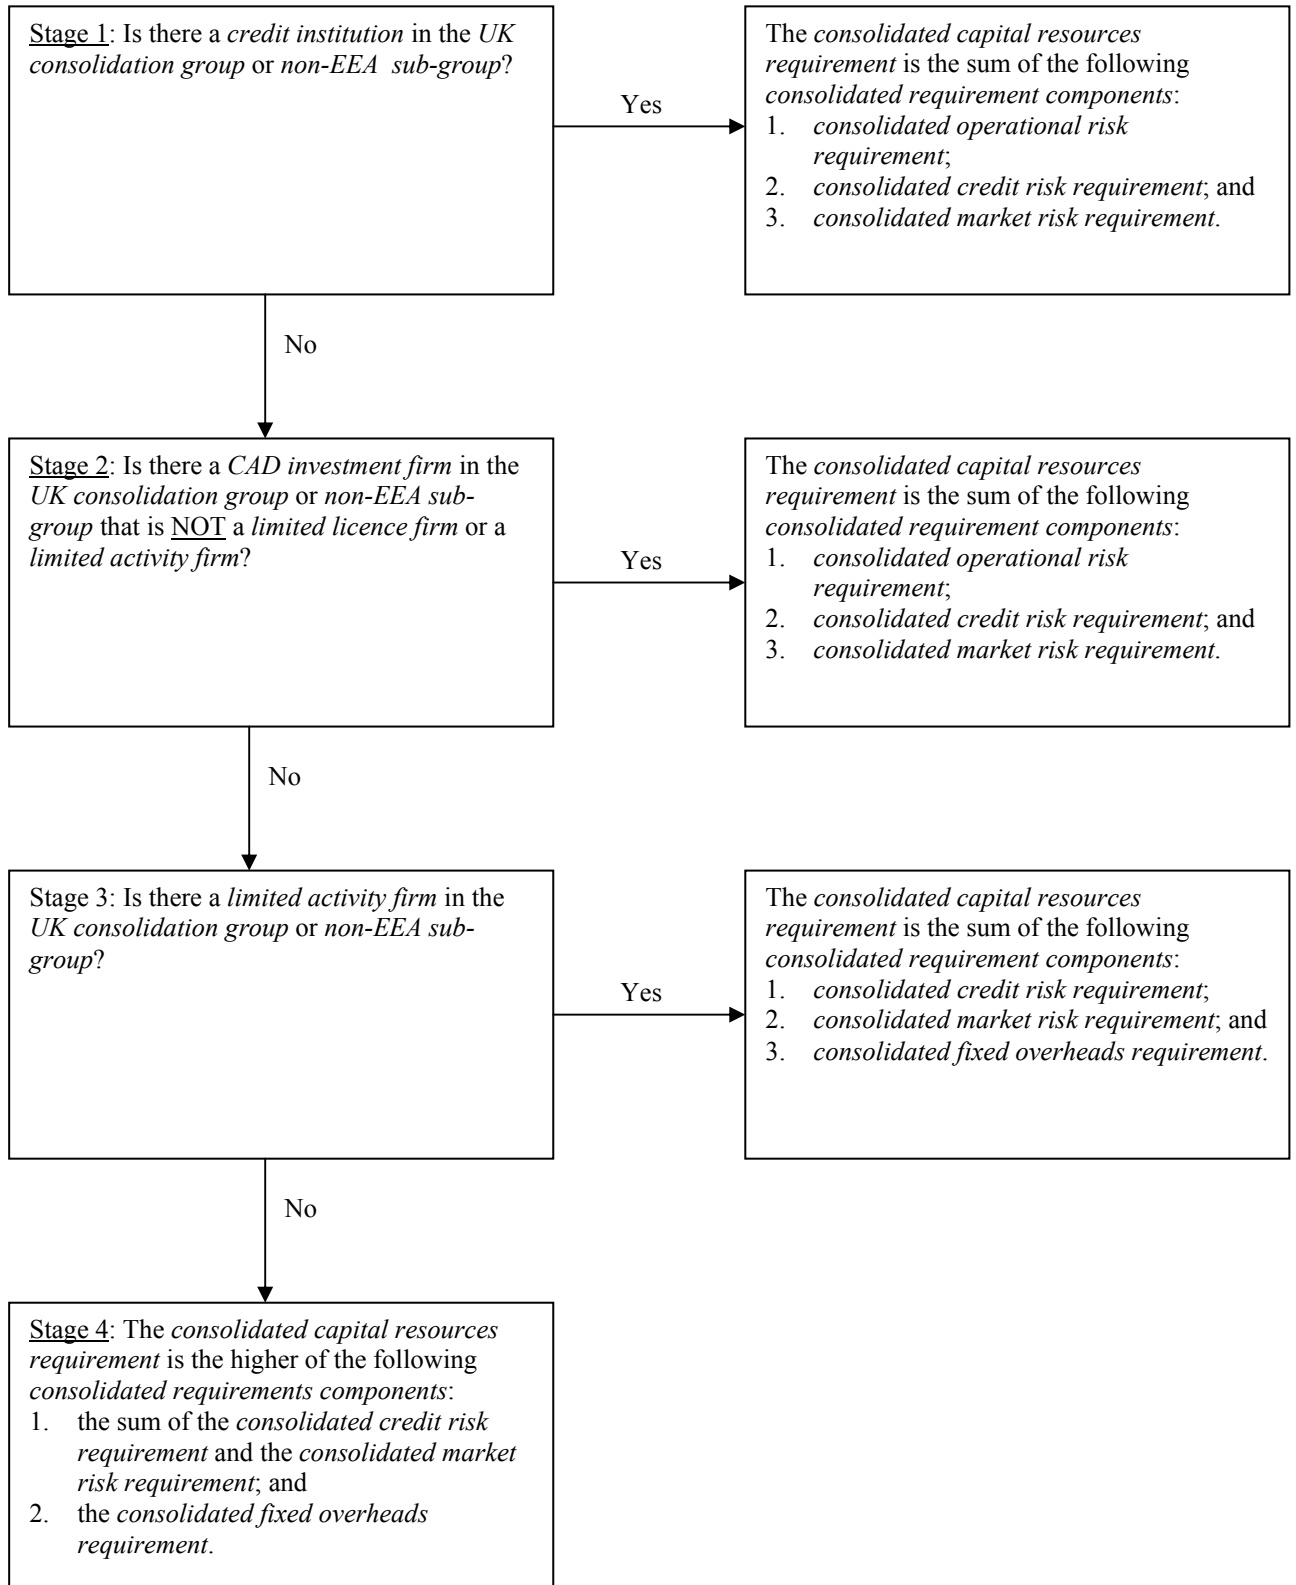

Article 125	
1.	Where a parent undertaking is a parent credit institution in a Member State or an EU parent credit institution, supervision on a consolidated basis shall be exercised by the competent authorities that authorised it under Article 6.
2.	Where the parent of a credit institution is a parent financial holding company in a Member State or an EU parent financial holding company, supervision on a consolidated basis shall be exercised by the competent authorities that authorised that credit institution under Article 6.
Article 126	
1.	Where credit institutions authorised in two or more Member States have as their parent the same parent financial holding company in a Member State or the same EU parent financial holding company, supervision on a consolidated basis shall be exercised by the competent authorities of the credit institution authorised in the Member State in which the financial holding company was set up.
	Where the parents of credit institutions authorised in two or more Member States comprise more than one financial holding company with head offices in different Member States and there is a credit institution in each of these States, supervision on a consolidated basis shall be exercised by the competent authority of the credit institution with the largest balance sheet total.
2.	Where more than one credit institution authorised in the Community has as its parent the same financial holding company and none of these credit institutions has been authorised in the Member State in which the financial holding company was set up, supervision on a consolidated basis shall be exercised by the competent authority that authorised the credit institution with the largest balance sheet total, which shall be considered, for the purposes of this Directive, as the credit institution controlled by an EU parent financial holding company.
3.	In particular cases, the competent authorities may by common agreement waive the criteria referred to in paragraphs 1 and 2 if their application would be inappropriate, taking into account the credit institutions and the relative importance of their activities in different countries, and appoint a different competent authority to exercise supervision on a consolidated basis. In these cases, before taking their decision, the competent authorities shall give the EU parent credit institution, or EU parent financial holding company, or credit institution with the largest balance sheet total, as appropriate, an opportunity to state its opinion on that decision.

4.	[Omitted]
Note	The <i>Capital Adequacy Directive</i> says that generally references in Articles 125 and 126 of the <i>Banking Consolidation Directive</i> to <i>credit institutions</i> should be read as including ones to <i>CAD investment firms</i> . Also, the <i>Banking Consolidation Directive</i> and the <i>Capital Adequacy Directive</i> apply to the <i>EEA</i> . Therefore for the purposes of <i>BIPRU 8</i> Articles 125 and 126 of the <i>Banking Consolidation Directive</i> should be read with the following adjustments:
	(1) a reference to a credit institution should be read as being one to a <i>credit institution</i> or <i>CAD investment firm</i> ;
	(2) a reference to a parent credit institution in a Member State should be read as being one to a <i>parent institution in a Member State</i> ;
	(3) a reference to a EU parent credit institution should be read as being one to an <i>EEA parent institution</i> ;
	(4) a reference to a EU parent financial holding company should be read as being one to an <i>EEA parent financial holding company</i> ;
	(5) a reference to a Member State should be read as being one to an <i>EEA State</i> ;
	(6) a reference to a credit institution authorised in the Community should be read as being to a <i>credit institution</i> or <i>CAD investment firm</i> authorised in an <i>EEA State</i> .
	Parent financial holding company in a Member State and financial holding company have the same meaning as they do in the <i>Glossary</i> .

- 9 Securitisation
- 9.1 Application and purpose
- Application
- 9.1.1 R *BIPRU 9* applies to a *BIPRU firm*.
- Purpose
- 9.1.2 G The purpose of *BIPRU 9* is to implement:
- (1) Articles 94 to 96, paragraphs (1) and (5) of Article 97 , Article 99, Article 100(1) and Article 101;
- (2) Points 8 and 9 of Annex V; and
- (3) Parts 2, 3 (in part) and 4 of Annex IX;
- of the *Banking Consolidation Directive*.
- General obligations: Risk-weighted exposures
- 9.1.3 R A *firm* must calculate the *risk weighted exposure amount* for *securitisation positions* in accordance with *BIPRU 9*.
- 9.1.4 G A *firm* should apply the *securitisation* framework set out in this chapter for determining regulatory capital requirements on *exposures* arising from *traditional securitisations* and from *synthetic securitisations* and from structures that contain features of both.
- 9.1.5 G Since transactions may be structured in many different ways, the capital treatment of a position should be determined on the basis of its economic substance rather than merely its legal form. A *firm* should look to the economic substance of a transaction to determine whether the *securitisation* framework is applicable for purposes of determining regulatory capital. A *firm* should consult the *FSA* when there is uncertainty about whether a given transaction should be considered a *securitisation*.
- General obligations: Systems
- 9.1.6 R The risks arising from *securitisation* transactions in relation to which a *firm* is *originator* or *sponsor* must be evaluated and addressed through appropriate policies and procedures, to ensure in particular that the economic substance of the transaction is fully reflected in the risk assessment and management decisions.

[**Note:** *BCD* Annex V point 8]

- 9.1.7 G A *firm* that is a party to a *securitisation* should fully understand the risks it has assumed or retained. In particular it should do so in order that it can correctly determine in accordance with *BIPRU 9* the capital effects of the *securitisation*.
- 9.1.8 G The *FSA* expects an *originator* to continue to monitor any risks that it may be subject to when it has excluded the *securitised exposures* from its calculation of *risk weighted exposure amounts*. The *originator* should consider capital planning implications where risks may return and the impact that *securitisation* has on the quality of the remaining *exposures* held by the *originator*.

Trading book and non-trading book

- 9.1.9 G *BIPRU 9* deals with:
- (1) requirements for *originators* and *sponsors* of *securitisations* of *non-trading book exposures*; and
 - (2) the calculation of *risk weighted exposure amounts* for *securitisation* positions for the purposes of calculating either the *credit risk capital component* or the *counterparty risk capital component*.
- 9.1.10 G *BIPRU 7* sets out the calculation of the *market risk capital requirement* for *securitisation* positions held in the *trading book*.

Approach to be used

- 9.2.1 R (1) Where a *firm* uses the *standardised approach* set out in *BIPRU 3* (Standardised approach to credit risk) for the calculation of *risk weighted exposure amounts* for the *standardised credit risk exposure class* to which the *securitised exposures* would otherwise be assigned under *BIPRU 3*, then it must calculate the *risk weighted exposure amount* for a *securitisation position* in accordance with the *standardised approach to securitisations* set out in *BIPRU 9.9, BIPRU 9.10, BIPRU 9.11 and BIPRU 9.13*.
- (2) In all other cases it must calculate a *risk weighted exposure amount* in accordance with the *IRB approach to securitisations* set out in *BIPRU 9.9, BIPRU 9.10, BIPRU 9.12, BIPRU 9.13 and BIPRU 9.14*.

[Note: *BCD Article 94*]

9.3 Requirements for originators

- 9.3.1 R (1) Where significant credit risk associated with *securitised exposures* has been transferred from the *originator* in accordance with the terms of *BIPRU 9.4* or *BIPRU 9.5*, that *originator* may:
- (a) in the case of a *traditional securitisation*, exclude from its calculation of *risk weighted exposure amounts* and, as relevant, *expected loss amounts*, the *exposures* which it has *securitised*; and
 - (b) in the case of a *synthetic securitisation*, calculate *risk weighted exposure amounts* and, as relevant, *expected loss amounts* in respect of such *exposures*, in accordance with the provisions of *BIPRU 9.5*.
- (2) Where (1) applies, the *originator* must calculate the *risk weighted exposure amounts* prescribed in this chapter for the positions it may hold in the *securitisation*.
- (3) Where the *originator* fails to transfer significant credit risk in accordance with (1), it need not calculate *risk weighted exposure amounts* for any positions it may hold in the *securitisation* in question.

[**Note:** *BCD Article 95*]

- 9.3.2 G Subject to *BIPRU 9.3.6G*, for the purposes of *BIPRU 9.4.1R* and *BIPRU 9.5.1R* the transfer of credit risk to third parties should only be considered significant if the proportion of risk transferred is broadly commensurate with, or exceeds, the proportion by which *risk weighted exposure amounts* are reduced.
- 9.3.3 G For measuring the reduction in risk and *risk weighted exposure amounts*, an *originator* should assess the *securitisation positions* it holds against the underlying *exposures* if they had never been *securitised*.
- 9.3.4 G An *originator* should use an appropriate method, consistent with its own internal processes, to assess whether the risk transferred is significant.
- 9.3.5 G If the result of,
- (1) applying a *risk weight* of 1250% to all positions that an *originator* holds in the *securitisation*; or
 - (2) deducting all those positions from *capital resources*;

is a reduction in the *originator's* capital requirement compared to the capital requirements that would apply had it not transferred the *securitised exposures*, then the *originator* may treat the risk transferred as significant for the purposes of *BIPRU 9.4.1R* and *BIPRU 9.5.1R*.

- 9.3.6 G An *originator* should not adjust its assessment of the transfer of risk in order to reflect uncertainties related to the effectiveness of a *securitisation* under *BIPRU* 9.4 or *BIPRU* 9.5. Instead the *originator* should treat the terms of *BIPRU* 9.4 or *BIPRU* 9.5 as not having been satisfied.

9.4 Traditional securitisation

Minimum requirements for recognition of significant credit risk transfer

- 9.4.1 R The *originator* of a *traditional securitisation* may exclude *securitised exposures* from the calculation of *risk weighted exposure amounts* and *expected loss amounts* if significant credit risk associated with the *securitised exposures* has been transferred to third parties and the transfer complies with the conditions in *BIPRU 9.4.2R-BIPRU 9.4.10R*.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.2 R The *securitisation* documentation must reflect the economic substance of the transaction.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.3 R The *securitised exposures* must be put beyond the reach of the *originator* and its creditors, including in bankruptcy and receivership. This must be supported by the opinion of qualified legal counsel.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.4 G Legal counsel's opinions should be reviewed as necessary. For example, an opinion should be reviewed if a relevant statutory provision is amended or where a new decision or judgment of a court might have a bearing on the conclusions reached.

- 9.4.5 R The securities issued must not represent payment obligations of the *originator*.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.6 R The transferee must be a *securitisation special-purpose entity*.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.7 R The *originator* must not maintain effective or indirect control over the transferred *exposures*.

[**Note:** *BCD Annex IX Part 2 point 1 (part)*]

- 9.4.8 R Where there is a *clean-up call option*, the following conditions must be satisfied:

- (1) the *clean-up call option* is exercisable at the discretion of the *originator*;
- (2) the *clean-up call option* may only be exercised when 10% or less of the original value of the *exposures securitised* remains unamortised; and
- (3) the *clean-up call option* is not structured to avoid allocating losses to *credit enhancement* positions or other positions held by investors and is not otherwise structured to provide *credit enhancement*.

[**Note:** BCD Annex IX Part 2 point 1 (part)]

- 9.4.9 R The *securitisation* documentation must not contain clauses that:
- (1) other than in the case of *early amortisation provisions*, require positions in the *securitisation* to be improved by the *originator* including but not limited to altering the underlying credit exposures or increasing the yield payable to investors in response to a deterioration in the credit quality of the *securitised exposures*; or
 - (2) increase the yield payable to holders of positions in the *securitisation* in response to a deterioration in the credit quality of the underlying pool.

[**Note:** BCD Annex IX Part 2 point 1 (part)]

- 9.4.10 R For the purposes of BIPRU 9.4.7R, an *originator* will be considered to have maintained effective control over the transferred *exposures* if it has the right to repurchase from the transferee the previously transferred *exposures* in order to realise their benefits or if it is obligated to re-assume transferred risk. The *originator's* retention of servicing rights or obligations in respect of the *exposures* does not of itself constitute indirect control of the *exposures*.

[**Note:** BCD Annex IX Part 2 point 1 (part)]

9.5 Synthetic securitisation

Minimum requirements for recognition of significant credit risk transfer

- 9.5.1 R (1) An *originator* of a *synthetic securitisation* may calculate *risk weighted exposure amounts*, and, as relevant, *expected loss amounts*, for the *securitised exposures* in accordance with *BIPRU 9.5.3R* and *BIPRU 9.5.4R*, if significant credit risk has been transferred to third parties, either through funded or unfunded credit protection, and the transfer complies with the conditions in (2)-(5).
- (2) The *securitisation* documentation must reflect the economic substance of the transaction.
- (3) The credit protection by which the credit risk is transferred must comply with the eligibility and other requirements under *BIPRU 5* (Credit risk mitigation) and, so far as applicable, *BIPRU 4.10* (Credit risk mitigation under the IRB approach) for the recognition of such credit protection. For the purposes of this *rule*, *securitisation special purpose entities* must not be recognised as eligible unfunded protection providers.
- (4) The instruments used to transfer credit risk must not contain terms or conditions that:
- (a) impose significant materiality thresholds below which credit protection is deemed not to be triggered if a credit event occurs;
 - (b) allow for the termination of the protection due to deterioration of the credit quality of the underlying *exposures*;
 - (c) other than in the case of *early amortisation provisions*, require positions in the *securitisation* to be improved by the *originator*; or
 - (d) increase the *originator's* cost of credit protection or the yield payable to holders of positions in the *securitisation* in response to a deterioration in the credit quality of the underlying pool.
- (5) An opinion must be obtained from qualified legal counsel confirming the enforceability of the credit protection in all relevant jurisdictions.

[**Note:** *BCD* Annex IX Part 2 point 2]

Originators' calculation of risk-weighted exposure amounts for exposures securitised in a synthetic securitisation

- 9.5.2 R *BIPRU 9.5.3R-BIPRU 9.5.8R* apply to the calculation by an *originator* of *risk weighted exposure amounts* for *exposures securitised* in a *synthetic securitisation*.

- 9.5.3 R (1) In calculating *risk weighted exposure amounts* for the *securitised exposures*, where the conditions in *BIPRU 9.5.1R* are met, the *originator* of a *synthetic securitisation* must, subject to the treatment of maturity mismatches set out in *BIPRU 9.5.6R-BIPRU 9.5.8R*, use the relevant calculation methodologies set out in *BIPRU 9.9-BIPRU 9.14* and not those set out in *BIPRU 3* (Standardised credit risk) or *BIPRU 4* (IRB approach).
- (2) For *firms* calculating *risk weighted exposure amounts* and *expected loss* amounts under the *IRB approach*, the *expected loss* amount in respect of such *exposures* must be zero.
- (3) For clarity, this paragraph refers to the entire pool of *exposures* included in the *securitisation*.

[**Note:** *BCD* Annex IX Part 2 point 3 and point 4 (part)]

- 9.5.4 R Subject to the treatment of maturity mismatches set out in *BIPRU 9.5.6R-BIPRU 9.5.8R*, the *originator* must calculate *risk weighted exposure amounts* in respect of all *tranches* in the *securitisation* in accordance with the provisions of *BIPRU 9.9-BIPRU 9.14*. For example, where a *tranche* is transferred by means of unfunded credit protection to a third party, the *risk weight* of that third party must be applied to the *tranche* in the calculation of the *originator's risk weighted exposure amounts*.

[**Note:** *BCD* Annex IX Part 2 point 4 (part)]

Treatment of maturity mismatches in synthetic securitisations

- 9.5.5 R *BIPRU 9.5.6R-BIPRU 9.5.8R* apply to the treatment of maturity mismatches in a *synthetic securitisation*.
- 9.5.6 R For the purposes of calculating *risk weighted exposure amounts* in accordance with *BIPRU 9.5.3R*, any maturity mismatch between the credit protection by which the *tranching* is achieved and the *securitised exposures* must be taken into consideration in accordance with *BIPRU 9.5.7R-BIPRU 9.5.8R*.

[**Note:** *BCD* Annex IX Part 2 point 5]

- 9.5.7 R The maturity of the *securitised exposures* must be taken to be the longest maturity of any of those *exposures* subject to a maximum of five years. The maturity of the credit protection must be determined in accordance with *BIPRU 5* (Credit risk mitigation) and, so far as relevant, *BIPRU 4.10* (Credit risk mitigation under the IRB approach).

[**Note:** *BCD* Annex IX Part 2 point 6]

- 9.5.8 R (1) An *originator* must ignore any maturity mismatch in calculating *risk weighted exposure amounts* for *tranches* appearing pursuant to *BIPRU 9.9 - BIPRU 9.14* with a *risk weight* of 1250%. For all other *tranches* the maturity mismatch treatment prescribed in *BIPRU 5.8* (Maturity mismatches) must be applied in accordance with the following formula:

RW^* is $[RW(SP) \times (t-t^*)/(T-t^*)] + [RW(Ass) \times (T-t)/(T-t^*)]$

- (2) The following apply for the purposes of the formula in (1):
- (a) RW^* is *risk weighted exposure amounts*;
 - (b) $RW(Ass)$ is *risk weighted exposure amounts* for *exposures* if they had not been *securitised* calculated on a pro-rata basis;
 - (c) $RW(SP)$ is *risk weighted exposure amounts* calculated under *BIPRU 9.6.3R* as if there was no maturity mismatch;
 - (d) T is maturity of the underlying *exposures* expressed in years;
 - (e) t is maturity of credit protection. expressed in years; and
 - (f) t^* is 0.25.

[**Note:** *BCD Annex IX Part 2 point 7*]

9.6 Implicit support

9.6.1 R An *originator* which, in respect of a securitisation, has made use of *BIPRU 9.3.1R* in the calculation of *risk weighted exposure amounts*, or a *sponsor*, must not, with a view to reducing potential or actual losses to investors, provide support to the *securitisation* beyond its contractual obligations.

[Note: *BCD Article 101(1)*]

9.6.2 R If an *originator* or *sponsor* fails to comply with *BIPRU 9.6.1R* in respect of a *securitisation*, it must :

- (1) hold capital against all of the *securitised exposures* associated with the *securitisation* transaction as if they had not been *securitised*; and
- (2) disclose publicly:
 - (a) that it has provided non-contractual support, and
 - (b) the regulatory capital impact of doing so.

[Note: *BCD Article 101(2)*]

9.6.3 G (1) *Securitisation* documentation should make clear, where applicable, that any repurchase of *securitised exposures* or *securitisation positions* by the *originator* or *sponsor* beyond its contractual obligations is not mandatory and may only be made at fair market value. In general, any such repurchase should be subject to a *firm's* credit review and approval process, which should be adequate to ensure that the repurchase complies with *BIPRU 9.6.1R*.

(2) If an *originator* or *sponsor* repurchases *securitised exposures* or *securitisation positions*, it should be able to satisfy the *FSA* that it has adequately considered the following:

- (a) the price of the repurchase;
- (b) the *firm's* capital and liquidity position before and after repurchase;
- (c) the performance of the *securitised exposures*; and
- (d) the performance of the issued securities;

and has concluded that, taking into account those factors and any other relevant factors, the repurchase is not structured to provide support.

(3) A *firm* should keep adequate records of the matters in (1) and (2).

- 9.6.4 G If a *firm* is found to have provided implicit support to a *securitisation*, that fact increases the expectation that the *firm* will provide future support to its *securitisations* thus failing to achieve a significant transfer of risk. The *FSA* will consider taking appropriate measures to reflect this increased expectation after an instance of implicit support is found.
- 9.6.5 G A *firm* may need to consider three main situations to determine whether there is a breach of the prohibition against implicit support in *BIPRU* 9.6.1R:
- (1) support given under a contractual obligation;
 - (2) support given under the contractual documentation for the *securitisation* which the *firm* is entitled, but not obliged, to give; and
 - (3) support which is not provided for under the contractual documentation for the *securitisation*.
- 9.6.6 G
- (1) The support described in *BIPRU* 9.6.5G(1) is permitted by *BIPRU* 9.6.1R.
 - (2) The support described in *BIPRU* 9.6.5G(3) is not permitted by *BIPRU* 9.6.1R.
 - (3) The support described in *BIPRU* 9.6.5G(2) may be permitted by *BIPRU* 9.6.1R under the following conditions:
 - (a) the fact that the *firm* may give it is expressly set out in the contractual and marketing documents for the *securitisation*;
 - (b) the nature of the support that the *firm* may give is precisely described in the documentation;
 - (c) the maximum degree of support that can be given can be ascertained at the time of the *securitisation* both by the *firm* and by a *person* whose only information comes from the marketing documents for the *securitisation*;
 - (d) the assessment of whether there has been significant risk transfer and the amount of that transfer is made on the basis that the *firm* will provide support to the maximum degree possible; and
 - (e) the *firm's capital resources* and *capital resources requirement* are adjusted at the time of the *securitisation* on the basis that the *firm* has provided support to the maximum degree possible, whether by an immediate deduction from capital or appropriate *risk weighting*.
- 9.6.7 G A waiver of the right to future margin income may not breach the prohibition against implicit support:
- (1) the degree of support that can be given can be defined precisely by reference to the *securitisation* contractual documentation, albeit the amount of support may not be ascertainable in absolute monetary terms; and

(2) no adjustment to the *firm's capital resources* or *capital resources requirement* is required, as a *firm* should not in any case reflect future margin income in its income or *capital resources*.

9.6.8 G For the purposes of *BIPRU* 9.6.2(2), *firms* will be expected to include disclosure of implicit support in accordance with the general and technical requirements on public disclosure, as outlined in *BIPRU* 11 (Disclosure).

9.7 Recognition of credit assessments of *ECAIs*

9.7.1 R An *ECAI's* credit assessment may be used to determine the *risk weight* of a *securitisation position* in accordance with *BIPRU 9.9* only if the *ECAI* is an *eligible ECAI*.

[**Note:** *BCD Article 97(1)*]

9.7.2 R (1) A *firm* may not use a credit assessment of an *eligible ECAI* to determine the *risk weight* of a *securitisation position* in accordance with *BIPRU 9.9* unless it complies with the principles of credibility and transparency as elaborated in (2) to (4).

(2) There must be no mismatch between the types of payments reflected in the credit assessment and the types of payment to which the *firm* is entitled under the contract giving rise to the *securitisation position* in question.

(3) The credit assessment must be available publicly to the market. Credit assessments may only be treated as publicly available if:

(a) they have been published in a publicly accessible forum, and

(b) they are included in the *ECAI's* transition matrix.

(4) Credit assessments that are made available only to a limited number of entities may not be treated as publicly available.

[**Note:** *BCD Article 97(5)* and Annex IX Part 3 point 1]

9.7.3 G The *guidance* in *BIPRU 3.3* (Recognition of ratings agencies) applies for the purposes of *BIPRU 9* as it does to *exposure risk weighting* in *BIPRU 3*, save that the reference in *BIPRU 3.3* to the Regulation 3 of the *ECAI SI* should be read as a reference to Regulation 4 of the *ECAI SI* for the purposes of *BIPRU 9*.

- 9.8 Use of ECAI credit assessments for the determination of applicable risk weights
- 9.8.1 R The use of *ECAIs*' credit assessments for the calculation of a *firm's risk weighted exposure amounts* under *BIPRU 9* must be consistent and in accordance with *BIPRU 9.8.2R-BIPRU 9.8.7R*. Credit assessments must not be used selectively.
- [**Note:** *BCD Article 99*]
- 9.8.2 R A *firm* may nominate one or more *eligible ECAIs* the credit assessments of which must be used in the calculation of its *risk weighted exposure amounts* under *BIPRU 9* (a *nominated ECAI*).
- [**Note:** *BCD Annex IX Part 3 point 2*]
- 9.8.3 R Subject to *BIPRU 9.8.5R-BIPRU 9.8.7R*, a *firm* must use credit assessments from *nominated ECAIs* consistently in respect of its *securitisation positions*.
- [**Note:** *BCD Annex IX Part 3 point 3*]
- 9.8.4 R Subject to *BIPRU 9.8.5R* and *BIPRU 9.8.6R*, a *firm* must not use an *ECAI's* credit assessments for its positions in some *tranches* and another *ECAI's* credit assessments for its positions in other *tranches* within the same structure that may or may not be *rated* by the first *ECAI*.
- [**Note:** *BCD Annex IX Part 3 point 4*]
- 9.8.5 R Where a position has two credit assessments by *nominated ECAIs*, the *firm* must use the less favourable credit assessment.
- [**Note:** *BCD Annex IX Part 3 point 5*]
- 9.8.6 R Where a position has more than two credit assessments by *nominated ECAIs*, the two most favourable credit assessments must be used. If the two most favourable assessments are different, the least favourable of the two must be used.
- [**Note:** *BCD Annex IX Part 3 point 6*]
- 9.8.7 R
- (1) Where credit protection eligible under *BIPRU 5* (Credit risk mitigation) and, if applicable, *BIPRU 4.10* (Credit risk mitigation under the IRB approach) is provided directly to the *SSPE*, and that protection is reflected in the credit assessment of a position by a *nominated ECAI*, the *risk weight* associated with that credit assessment may be used.
 - (2) If the protection is not eligible under *BIPRU 5* (Credit risk mitigation) and, if applicable, *BIPRU 4.10* (Credit risk mitigation under the IRB approach), the credit assessment must not be recognised.

- (3) In the situation where the credit protection is not provided to the *SSPE* but rather is provided directly to a *securitisation position*, the credit assessment must not be recognised.

[**Note:** *BCD* Annex IX Part 3 point 7]

9.9 Calculation of risk-weighted exposure amounts for securitisation positions

9.9.1 R To calculate the *risk weighted exposure amount* of a *securitisation position*, the relevant *risk weight* must be assigned to the *exposure* value of the position in accordance with *BIPRU 9.9-BIPRU 9.14* based on the credit quality of the position.

[**Note:** *BCD* Article 96(1) (part) and Annex XI, Part 4 point 1]

9.9.2 R For the purpose of *BIPRU 9.9.1R*, the credit quality of a position may be determined by reference to an *ECAI* credit assessment or otherwise, as set out in *BIPRU 9.9-BIPRU 9.14*.

[**Note:** *BCD* Article 96(1) (part)]

9.9.3 R (1) Where there is an *exposure* to different *tranches* in a *securitisation*, the *exposure* to each *tranche* must be considered a separate *securitisation position*.

(2) The providers of credit protection to *securitisation positions* must be treated as holding positions in the *securitisation*.

(3) *Securitisation positions* include *exposures* to a *securitisation* arising from interest rate or currency derivative contracts.

[**Note:** *BCD* Article 96(2)]

9.9.4 R Subject to *BIPRU 9.9.5R*,

(1) where a *firm* calculates *risk weighted exposure amounts* under the *standardised approach* to *securitisations* outlined in *BIPRU 9.11*, the *exposure* value of an on-balance sheet *securitisation position* must be its balance sheet value;

(2) where a *firm* calculates *risk weighted exposure amounts* under the *IRB approach* to *securitisations* outlined in *BIPRU 9.12*, the *exposure* value of an on-balance sheet *securitisation position* must be measured gross of value adjustments;

(3) the *exposure* value of an off-balance sheet *securitisation position* must be its nominal value multiplied by a conversion figure as prescribed in this chapter; and

(4) the conversion figure referred to in (3) must be 100% unless otherwise specified.

[**Note:** *BCD* Annex IX Part 4 point 2]

- 9.9.5 R The *exposure* value of a *securitisation position* arising from a *financial derivative instrument* must be determined in accordance with *BIPRU* 13 (Treatment of derivative instruments).
- [Note: *BCD* Annex IX Part 4 point 3]
- 9.9.6 R Where a *securitisation position* is subject to funded credit protection, the *exposure* value of that position may be modified in accordance with and subject to the requirements of *BIPRU* 5 (Credit risk mitigation) as further specified in *BIPRU* 9.11.13R and *BIPRU* 9.14.
- [Note: *BCD* Annex IX Part 4 point 4]
- 9.9.7 R Where a *securitisation position* is subject to funded or unfunded credit protection the *risk weight* to be applied to that position may be modified in accordance with *BIPRU* 5 (Credit risk mitigation) and, if applicable, *BIPRU* 4.10 (Credit risk mitigation under the IRB approach) read in conjunction with *BIPRU* 9.14.
- [Note: *BCD* Article 96(3)]
- 9.9.8 R (1) Where a *firm* has two or more overlapping positions in a *securitisation* the *firm* must, to the extent that the positions overlap, include in its calculation of *risk weighted exposure amounts* only the position, or portion of a position, producing the higher *risk weighted exposure amounts*.
- (2) For the purposes of (1), overlapping means that the positions, wholly or partially, represent an *exposure* to the same risk such that to the extent of the overlap there is a single *exposure*.
- [Note: *BCD* Annex IX Part 4 point 5]
- 9.9.9 R Subject to the provisions of *GENPRU* that deal with the deduction of *securitisation positions* at stage M in the relevant *capital resources table*, the *risk weighted exposure amount* must be included in the *firm's* total of *risk weighted exposure amounts* for the purposes of the calculation of its *credit risk capital requirement*.
- [Note: *BCD* Article 96(4)]

- 9.10 Reduction in risk-weighted exposure amounts
- 9.10.1 R *BIPRU* 9.10 applies as follows:
- (1) *BIPRU* 9.10.2R and *BIPRU* 9.10.3R apply to both the *standardised approach* and the *IRB approach*; and
 - (2) *BIPRU* 9.10.4R-*BIPRU* 9.10.7R apply to the *IRB approach*.
- 9.10.2 R In respect of a *securitisation position* in respect of which a 1250% *risk weight* is assigned, a *firm* may, as an alternative to including the position in its calculation of *risk weighted exposure amounts*, deduct from its *capital resources* the *exposure* value of the position. For these purposes, the calculation of the *exposure* value may reflect eligible funded protection in a manner consistent with *BIPRU* 9.14.
- [**Note:** *BCD* Annex IX Part 4 points 35, 74 and 75(b)]
- 9.10.3 R Where a *firm* applies *BIPRU* 9.10.2R, 12.5 times the amount deducted in accordance with that paragraph must, for the purposes of *BIPRU* 9.11.5R and *BIPRU* 9.12.8R, be subtracted from the amount specified in whichever of those *rules* applies as the maximum *risk weighted exposure amount* to be calculated by a *firm* to which one of those *rules* applies.
- [**Note:** *BCD* Annex IX Part 4 point 36 and point 76]
- 9.10.4 R The *risk weighted exposure amount* of a *securitisation position* to which a 1250% *risk weight* is assigned may be reduced by 12.5 times the amount of any value adjustments made by the *firm* in respect of the *securitised exposures*.
- [**Note:** *BCD* Annex IX Part 4 point 72 (part)]
- 9.10.5 R To the extent that value adjustments are taken account of for the purposes of *BIPRU* 9.10.4R they must not be taken account of for the purposes of the calculation indicated in *BIPRU* 4.3.8R (Treatment of expected loss amounts).
- [**Note:** *BCD* Annex IX Part 4 point 72 (part)]
- 9.10.6 R The *risk weighted exposure amount* of a *securitisation position* may be reduced by 12.5 times the amount of any value adjustments made by the *firm* in respect of the position.
- [**Note:** *BCD* Annex IX Part 4 point 73]
- 9.10.7 R For the purposes of *BIPRU* 9.10.2R (as it applies to the *IRB approach*):
- (1) the *exposure* value of the position may be derived from the *risk weighted exposure amounts* taking into account any reductions made in accordance with *BIPRU* 9.10.4R-*BIPRU* 9.10.6R;

- (2) where the *supervisory formula method* is used to calculate *risk weighted exposure amounts* and $L \leq K_{IRBR}$ and $[L+T] > K_{IRBR}$ the position may be treated as two positions with L equal to K_{IRBR} for the more senior of the positions.

[Note: BCD Annex IX Part 4 point 75(a) and (c)]

9.11 Calculation of risk weighted exposure amounts under the standardised approach to securitisations

9.11.1 R Subject to *BIPRU 9.11.5R*, the *risk weighted exposure amount* of a *rated securitisation position* must be calculated by applying to the *exposure* value the *risk weight* associated with the *credit quality step* with which the credit assessment has been determined to be associated, as prescribed in *BIPRU 9.11.2R* or *BIPRU 9.11.3R*.

[**Note:** *BCD Annex IX Part 4 point 6*]

9.11.2 R Table: Positions other than ones with short-term credit assessments
This table belongs to *BIPRU 9.11.1R*

<i>Credit Quality step</i>	1	2	3	4	5 and below
<i>Risk weight</i>	20%	50%	100%	350%	1250%

9.11.3 R Table: Positions with short-term credit assessments
This table belongs to *BIPRU 9.11.1R*

<i>Credit quality step</i>	1	2	3	All other credit assessments
<i>Risk weight</i>	20%	50%	100%	1250%

9.11.4 R Subject to *BIPRU 9.11.6R-BIPRU 9.11.12R*, the *risk weighted exposure amount* of an *unrated securitisation position* must be calculated by applying a *risk weight* of 1250%.

[**Note:** *BCD Annex IX Part 4 point 7*]

Originator and sponsor firms

- 9.11.5 R For an *originator* or *sponsor*, the *risk weighted exposure amounts* calculated in respect of its positions in a *securitisation* may be limited to the *risk weighted exposure amounts* which would be calculated for the *securitised exposures* had they not been *securitised* subject to the presumed application of a 150% *risk weight* to all past due items and items belonging to regulatory high risk categories (see *BIPRU 3.4.104R* and *BIPRU 3 Annex 3R*) amongst the *securitised exposures*.

[**Note:** *BCD Annex IX Part 4 point 8*]

Treatment of unrated securitisation positions

- 9.11.6 R (1) A *firm* having an *unrated securitisation position* may apply the treatment set out in this paragraph for calculating the *risk weighted exposure amount* for that position provided the composition of the pool of *exposures securitised* is known at all times.
- (2) A *firm* may apply the weighted-average *risk weight* that would be applied to the *securitised exposures* referred to in (1) under the *standardised approach* by a *firm* holding the *exposures* multiplied by a concentration ratio.
- (3) This concentration ratio is equal to the sum of the nominal amounts of all the *tranches* divided by the sum of the nominal amounts of the *tranches* junior to, or *pari passu* with, the *tranche* in which the position is held including that *tranche* itself.
- (4) The resulting *risk weight* must not be higher than 1250% or lower than any *risk weight* applicable to a *rated* more senior *tranche*.
- (5) Where the *firm* is unable to determine the *risk weights* that would be applied to the *securitised exposures* under the *standardised approach*, it must apply a *risk weight* of 1250% to the position.

[**Note:** *BCD Annex IX Part 4 points 9 and 10*]

- 9.11.7 G (1) This provision contains *guidance* on the requirement in *BIPRU 9.11.6R(1)* that the composition of the pool of *exposures securitised* must be known at all times.
- (2) The composition should be known sufficiently at the time of purchase for the *firm* to be able accurately to calculate the *risk weighted exposure amounts* of the pool under the *standardised approach*.
- (3) Thereafter, any change to the composition of the pool during the life of the transaction that would lead to an increase in the *risk weighted exposure amounts* of the pool of *exposures* under the *standardised approach* should be either:
- (a) prohibited by the documentation; or
- (b) included in the *firm's* capital calculations.

- (4) It would be sufficient for the purposes of (2) for the composition of the pool to be reported to the *firm* at least daily, via information service providers, secure web-sites or other appropriate sources.

Treatment of securitisation positions in a second loss tranche or better in an ABCP programme

- 9.11.8 R Subject to the availability of a more favourable treatment by virtue of the provisions concerning *liquidity facilities* in BIPRU 9.11.10R-BIPRU 9.11.12R, a *firm* may apply to *securitisation positions* meeting the conditions set out in BIPRU 9.11.9R a *risk weight* that is the greater of:

- (1) 100%, or
- (2) the highest of the risk weights that would be applied to any of the *securitised exposures* under the *standardised approach* by a *firm* holding the *exposures*.

[Note: BCD Annex IX Part 4 point 11]

- 9.11.9 R For the treatment in BIPRU 9.11.8R to be available,:

- (1) the *securitisation position* must be in an ABCP programme;
- (2) the *securitisation position* must be in a *tranche* which is economically in a second loss position or better in the *securitisation* and the first loss *tranche* must provide meaningful *credit enhancement* to the second loss *tranche*;
- (3) the *securitisation position* must be of a quality the equivalent of investment grade or better; and
- (4) the *firm* in question must not hold a position in the first loss *tranche*.

[Note: BCD Annex IX Part 4 point 12]

Treatment of unrated liquidity facilities

- 9.11.10 R When the conditions in this paragraph have been met, and in order to determine its *exposure* value, a conversion figure of 20% may be applied to the nominal amount of a *liquidity facility* with an original maturity of one year or less and a conversion figure of 50% may be applied to the nominal amount of a *liquidity facility* with an original maturity of more than one year. The *risk weight* to be applied is the highest *risk weight* that would be applied to any of the *securitised exposures* under the *standardised approach* by a *firm* holding the *exposures*. Those conditions are as follows:

- (1) the *liquidity facility* documentation must clearly identify and limit the circumstances under which the facility may be drawn;

- (2) it must not be possible for the facility to be drawn so as to provide credit support by covering losses already incurred at the time of draw – for example, by providing liquidity in respect of *exposures* in default at the time of draw or by acquiring assets at more than fair value;
- (3) the facility must not be used to provide permanent or regular funding for the *securitisation*;
- (4) repayment of draws on the facility must not be subordinated to the claims of investors other than to claims arising in respect of interest rate or currency derivative contracts, fees or other such payments, nor be subject to waiver or deferral;
- (5) it must not be possible for the facility to be drawn after all applicable *credit enhancements* from which the *liquidity facility* would benefit are exhausted; and
- (6) the facility must include a provision that results in an automatic reduction in the amount that can be drawn by the amount of *exposures* that are in *default*, where *default* has the meaning given to it for the purposes of the *IRB approach*, or where the pool of *securitised exposures* consists of *rated* instruments, that terminates the facility if the average quality of the pool falls below investment grade.

[Note: BCD Annex IX Part 4 point 13]

Liquidity facilities that may be drawn only in the event of a general market disruption

- 9.11.11 R To determine its *exposure* value a conversion figure of 0% may be applied to the nominal amount of a *liquidity facility* that may be drawn only in the event of a general market disruption (i.e. where more than one *SSPE* across different transactions are unable to roll over maturing commercial paper and that inability is not the result of an impairment of the *SSPE*'s credit quality or of the credit quality of the *securitised exposures*), provided that the conditions set out in *BIPRU* 9.11.10R are satisfied.

[Note: BCD Annex IX Part 4 point 14]

Cash advance facilities

- 9.11.12 R To determine its *exposure* value, a conversion figure of 0% may be applied to the nominal amount of a *liquidity facility* that is unconditionally cancellable provided that the conditions set out at *BIPRU* 9.11.10R are satisfied and that repayment of draws on the facility are senior to any other claims on the cash flows arising from the *securitised exposures*.

[Note: BCD Annex IX Part 4 point 15]

Standardised approach: recognition of credit risk mitigation on securitisation positions

- 9.11.13 R Where a *firm* calculates the *risk weighted exposure amount* of a *securitisation position* under the *standardised approach*, where credit protection is obtained on a *securitisation position*, the calculation of *risk weighted exposure amounts* may be modified in accordance with *BIPRU 5* (Credit risk mitigation).

[**Note:** *BCD* Annex IX Part 4 point 34]

- 9.12 Calculation of risk-weighted exposure amounts under the IRB approach
- 9.12.1 R *BIPRU 9.12 applies to the calculation of risk weighted exposure amounts of securitisation positions under the IRB approach.*
- [Note: BCD Annex IX Part 4 point 37 (part)]
- Hierarchy of methods
- 9.12.2 R For a *rated position* or a position in respect of which an inferred *rating* may be used, the *ratings based method* must be used to calculate the *risk weighted exposure amount*.
- [Note: BCD Annex IX Part 4 point 38]
- 9.12.3 R For an *unrated position* the *supervisory formula method* must be used except where a *firm* uses the *ABCP internal assessment approach*.
- [Note: BCD Annex IX Part 4 point 39]
- 9.12.4 G In cases where both the *ABCP internal assessment approach* and the *supervisory formula method* are available, a *firm* should determine the most appropriate approach and apply that approach consistently.
- 9.12.5 R A *firm* other than an *originator* or a *sponsor* may not use the *supervisory formula method* unless its *IRB permission* expressly permits it to do so.
- [Note: BCD Annex IX Part 4 point 40]
- 9.12.6 R Subject to any *IRB permission* of the type described in *BIPRU 9.12.28G*, in the case of an *originator* or *sponsor* unable to calculate K_{IRB} and which has not obtained approval to use the *ABCP internal assessment approach*, and in the case of other *firms* where they have not obtained approval to use the *supervisory formula method* or, for positions in *ABCP programmes*, the *ABCP internal assessment approach*, a *risk weight* of 1250% must be assigned to *securitisation positions* which are *unrated* and in respect of which an inferred *rating* may not be used.
- [Note: BCD Annex IX Part 4 point 41]
- Use of inferred ratings
- 9.12.7 R When the following minimum operational requirements are satisfied a *firm* must attribute to an *unrated position* an inferred credit assessment equivalent to the credit assessment of those *rated positions* (the ‘reference positions’) which are the most senior positions which are in all respects subordinate to the *unrated securitisation position* in question:

- (1) the reference positions must be subordinate in all respects to the *unrated securitisation position*;
- (2) the maturity of the reference positions must be equal to or longer than that of the *unrated position* in question; and
- (3) on an ongoing basis, any inferred *rating* must be updated to reflect any changes in the credit assessment of the reference positions.

[Note: BCD Annex IX Part 4 point 42]

Maximum risk-weighted exposure amounts

- 9.12.8 R For an *originator*, a *sponsor*, or for other *firms* which can calculate K_{IRB} , the *risk weighted exposure amounts* calculated in respect of its positions in a *securitisation* may be limited to that which would produce an amount in respect of its *credit risk capital requirement* equal to the sum of 8% of the *risk weighted exposure amounts* which would be produced if the *securitised* assets had not been *securitised* and were on the balance sheet of the *firm* plus the *expected loss* amounts of those *exposures*.

[Note: BCD Annex IX Part 4 point 45]

Ratings based method

- 9.12.9 R *BIPRU* 9.12.10R to *BIPRU* 9.12.19R apply to the calculation of *risk weighted exposure amounts* of *securitisation positions* under the *ratings based method*.
- 9.12.10 R Under the *ratings based method*, the *risk weighted exposure amount* of a *rated securitisation position* must be calculated by applying to the *exposure* value the *risk weight* associated with the *credit quality step* with which the credit assessment is associated as prescribed in *BIPRU* 9.12.11R and *BIPRU* 9.12.12R multiplied by 1.06.

[Note: BCD Annex IX Part 4 point 46]

- 9.12.11 R Table: Positions other than ones with short-term credit assessments
This table belongs to *BIPRU* 9.12.10R

Credit Quality Step (CQS)	Risk weight		
	A	B	C
CQS 1	7%	12%	20%

assessments			

9.12.13 R Subject to *BIPRU 9.12.16R* and *BIPRU 9.12.17R*, the *risk weights* in column A of each table in *BIPRU 9.12.11R* and *BIPRU 9.12.12R* must be applied where the position is in the most senior *tranche* of a *securitisation*.

[**Note:** *BCD Annex IX Part 4 point 47 (part)*]

9.12.14 R When determining under *BIPRU 9.12.13R* whether a *tranche* is the most senior for these purposes, a *firm* need not take into consideration amounts due under interest rate or currency derivative contracts, fees due, or other similar payments.

[**Note:** *BCD Annex IX Part 4 point 47 (part)*]

9.12.15 G A senior *liquidity facility* need not be taken into account for the purposes of determining the most senior *tranche* under *BIPRU 9.12.13R*.

9.12.16 R A firm may apply a *risk weight* of 6% to a position in the most senior *tranche* of a *securitisation* where that *tranche* is senior in all respects to another *tranche* of the *securitisation positions* which would receive a *risk weight* of 12% under *BIPRU 9.12.10R*, provided that:

- (1) it can be demonstrated that this is justified due to the loss absorption qualities of subordinate *tranches* in the *securitisation*; and
- (2) either the position has an external credit assessment which has been determined to be associated with credit quality step 1 in *BIPRU 9.12.11R* and *BIPRU 9.12.12R* or, if it is unrated, requirements (1) to (3) in *BIPRU 9.12.7R* are satisfied where ‘reference positions’ are taken to mean positions in the subordinate *tranche* which would receive a *risk weight* of 12% under *BIPRU 9.12.10R*.

[**Note:** *BCD Annex IX Part 4 point 48*]

9.12.17 R The *risk weights* in column C of each table in *BIPRU 9.12.11R* and *BIPRU 9.12.12R* must be applied where the position is in a *securitisation* where the effective number of *exposures securitised* is less than six. In calculating the effective number of *exposures securitised* multiple *exposures* to one obligor must be treated as one *exposure*. The effective number of *exposures* is calculated as:

$$N = ((\sum_i)(EAD_i))^2 / ((\sum_i)(EAD_i^2))$$

where EAD_i represents the sum of the *exposure* values of all *exposures* to the i^{th} obligor.

[**Note:** BCD Annex IX Part 4 point 49 (part)]

- 9.12.18 R In the case of *resecuritisation*, the *firm* must look at the number of *securitisation exposures* in the pool and not the number of underlying *exposures* in the original pools from which the underlying *securitisation exposures* stem. If the portfolio share associated with the largest *exposure*, C_1 , is available, the *firm* may compute N as $1/C_1$.

[**Note:** BCD Annex IX Part 4 point 49 (part)]

- 9.12.19 R The *risk weights* in Column B in the tables in BIPRU 9.12.11R and BIPRU 9.12.12R must be applied to all other positions.

[**Note:** BCD Annex IX Part 4 point 50]

The ABCP internal assessment approach

- 9.12.20 R (1) If:
- (a) a *firm's IRB permission* allows it to use this treatment; and
 - (b) the conditions in (2)-(16) are satisfied,
- a *firm* may attribute to an *unrated position* in an *asset backed commercial paper programme* a derived *rating* as laid down in (3).
- (2) Positions in the commercial paper issued from the programme must be *rated positions*.
 - (3) Under the *ABCP internal assessment approach*, the *unrated position* must be assigned by the *firm* to one of the rating grades described in (5). The position must be attributed a derived rating that is the same as the credit assessments corresponding to that *rating grade* as laid down in (5). Where this derived rating is, at the inception of the *securitisation*, at the level of investment grade or better, it must be treated in the same way as an eligible credit assessment by an *eligible ECAI* for the purposes of calculating *risk weighted exposure amounts*.
 - (4) The internal assessment methodology must be used in the *firm's* internal risk management processes, including its decision making, management information and capital allocation processes.
 - (5) The *firm's* internal assessment methodology must include rating grades. There must be a correspondence between such rating grades and the credit assessments of *eligible ECAIs*. This correspondence must be explicitly documented.
 - (6) The *firm* must be able to satisfy the *FSA* that its internal assessment of the credit quality of the position reflects the publicly available assessment methodology of one or more *eligible ECAIs*, for the *rating* of securities backed by the *exposures* of the type *securitised*.

- (7) If a *firm's IRB permission* permits this, a *firm* need not comply with the requirement for the assessment methodology of the *ECAI* to be publicly available where it can demonstrate that due to the specific features of the *securitisation* – for example its unique structure - there is as yet no publicly available *ECAI* assessment methodology.
- (8) The *ECAIs*, the methodology of which must be reflected as required by (6), must include those *ECAIs* which have provided an external rating for the commercial paper issued from the programme. Quantitative elements – such as stress factors – used in assessing the position to a particular credit quality must be at least as conservative as those used in the relevant assessment methodology of the *ECAIs* in question.
- (9) In developing its internal assessment methodology the *firm* must take into consideration relevant published ratings methodologies of the *eligible ECAIs* that rate the commercial paper of the ABCP programme. This consideration must be documented by the *firm* and updated regularly, as outlined in (15).
- (10) The *ABCP programme* must have collections policies and processes that take into account the operational capability and credit quality of the servicer. The programme must mitigate seller/servicer risk through various methods, such as triggers based on current credit quality that would preclude commingling of funds.
- (11) The *ABCP programme* must incorporate structural features – for example wind down triggers - into the purchase of *exposures* in order to mitigate potential credit deterioration of the underlying portfolio.
- (12) The *ABCP programme* must incorporate underwriting standards in the form of credit and investment guidelines. In deciding on an asset purchase, the programme administrator must consider the type of asset being purchased, the type and monetary value of the *exposures* arising from the provision of liquidity facilities and *credit enhancements*, the loss distribution, and the legal and economic isolation of the transferred assets from the entity selling the assets. A credit analysis of the asset seller's risk profile must be performed and must include analysis of past and expected future financial performance, current market position, expected future competitiveness, leverage, cash flow, and interest coverage, and debt rating. In addition, a review of the seller's underwriting standards, servicing capabilities, and collection processes must be performed.
- (13) The *ABCP programme's* underwriting standards must establish minimum asset eligibility criteria that, in particular,
 - (a) exclude the purchase of assets that are significantly past due or defaulted;
 - (b) limit excess concentration to individual obligor or geographic area; and
 - (c) limit the tenor of the assets to be purchased.

- (14) The aggregated estimate of loss on an asset pool that the *ABCP programme* is considering purchasing must take into account all sources of potential risk, such as credit risk and *dilution risk*. If the seller-provided *credit enhancement* is sized based on only credit-related losses, then a separate reserve must be established for *dilution risk*, if *dilution risk* is material for the particular *exposure* pool. In addition, in sizing the required enhancement level, the programme must review several years of historical information, including losses, delinquencies, dilutions, and the turnover rate of the receivables.
- (15) Internal or external auditors, an *ECAI*, or the *firm's* internal credit review or risk management function must perform regular reviews of the internal assessment process and the quality of the internal assessments of the credit quality of the *firm's exposures* to an *ABCP programme*. If the *firm's* internal audit, credit review, or risk management functions perform the review, then these functions must be independent of the *ABCP programme* business line, as well as the customer relationship.
- (16) The *firm* must track the performance of its internal ratings over time to evaluate the performance of its internal assessment methodology and must make adjustments, as necessary, to that methodology when the performance of the *exposures* routinely diverges from that indicated by the internal ratings.

[Note: BCD Annex IX Part 4 points 43 and 44]

Supervisory formula method

- 9.12.21 R Subject to any *permission* of the type described in *BIPRU* 9.12.28G, under the *supervisory formula method*, the *risk weight* for a *securitisation position* must be the greater of 7% or the *risk weight* to be applied in accordance with *BIPRU* 9.12.22R.

[Note: BCD Annex IX Part 4 point 52]

- 9.12.22 R (1) Subject to any *permission* of the type described in *BIPRU* 9.12.28G, the *risk weight* to be applied to the *exposure* amount must be:

$$12.5 (S[L+T] - S[L]) / T$$

- (2) The remaining provisions of this paragraph define the terms used in the formulae in (1) and (3).

$$(3) \quad S[x] = \begin{cases} x & \text{when } x \leq IRBR \\ K_{IRBR} + K[x] - K[K_{IRBR}] + (d \cdot K_{IRBR} \omega) (1 - e^{\omega(K_{IRBR} - x)/K_{IRBR}}) & \text{when } K_{IRBR} < x \end{cases}$$

$$(4) \quad h = (1 - K_{IRBR} / ELGD)^N$$

$$(5) \quad c = K_{IRBR} / (1 - h)$$

$$(6) \quad v = \frac{(ELGD - K_{IRBR}) K_{IRBR} + 0.25(1 - ELGD) K_{IRBR}}{N}$$

$$(7) \quad f = \left(\frac{v + K_{IRBR}^2}{1 - h} - c^2 \right) + \frac{(1 - K_{IRBR}) K_{IRBR} - v}{(1 - h) \tau}$$

$$(8) \quad g = \frac{(1 - c)c}{f} - 1$$

$$(9) \quad a = g \cdot c$$

$$(10) \quad b = g \cdot (1 - c)$$

$$(11) \quad d = 1 - (1 - h) \cdot (1 - \text{Beta}[K_{IRBR}; a, b])$$

$$(12) \quad K[x] = (1 - h) \cdot ((1 - \text{Beta}[x; a, b]) x + \text{Beta}[x; a + 1, b] c).$$

$$(13) \quad \tau = 1000,$$

$$(14) \quad \omega = 20.$$

(15) In these expressions, $\text{Beta}[x; a, b]$ refers to the cumulative beta distribution with parameters a and b evaluated at x.

(16) T (the thickness of the *tranche* in which the position is held) is measured as the ratio of (a) the nominal amount of the *tranche* to (b) the sum of the *exposure* values of the *exposures* that have been *securitised*. For these purposes the *exposure* value of a *financial derivative instrument* must, where the current replacement cost is not a positive value, be the potential future credit exposure calculated in accordance with BIPRU 13 (Treatment of derivative instruments).

(17) K_{IRBR} is the ratio of (a) K_{IRB} to (b) the sum of the *exposure* values of the *exposures* that have been *securitised*. K_{IRBR} is expressed in decimal form (for example, K_{IRB} equal to 15% of the pool would be expressed as K_{IRBR} of 0.15).

- (18) L (the *credit enhancement* level) is measured as the ratio of the nominal amount of all *tranches* subordinate to the *tranche* in which the position is held to the sum of the *exposure* values of the *exposures* that have been *securitised*. Capitalised future income must not be included in the measured L. Amounts due by counterparties to *financial derivative instruments* that represent *tranches* more junior than the *tranche* in question may be measured at their current replacement cost (without the potential future credit exposures) in calculating the enhancement level.
- (19) N is the effective number of exposures calculated in accordance with BIPRU 9.12.17R-BIPRU 9.12.18R.
- (20) ELGD, the *exposure-weighted average loss-given-default*, is calculated as follows:

$$ELGD = \frac{\sum_i LGD_i \cdot EAD_i}{\sum_i EAD_i}$$

- (21) In (20) LGD_i represents the average *LGD* associated with all *exposures* to the i^{th} obligor, where *LGD* is determined in accordance with BIPRU 4. In the case of *resecuritisation*, an *LGD* of 100% must be applied to the *securitised* positions. When default risk and *dilution risk* for purchased receivables are treated in an aggregate manner within a *securitisation* (e.g. a single reserve or over-collateralisation is available to cover losses from either source), the *LGD* input must be constructed as a weighted average of the *LGD* for credit risk and the 75% *LGD* for *dilution risk*. The weights are the stand-alone capital charges for credit risk and *dilution risk* respectively.

[Note: BCD Annex IX Part 4 point 53 (part)]

Simplified inputs

- 9.12.23 R (1) Under the *supervisory formula method*, if the *exposure* value of the largest *securitised exposure*, C_1 , is no more than 3% of the sum of the *exposure* values of the *securitised exposures*, then for the purposes of the *supervisory formula method* the *firm* may set *LGD* equal 50% and N equal to either:

(a)
$$N = \left(C_1 C_m + \left(\frac{C_m - C_1}{m - 1} \right) \max \{1 - m C_1, 0\} \right)^{-1}; \text{or}$$

(b) $N = 1 / C_1$.

- (2) C_m is the ratio of the sum of the *exposure* values of the largest 'm' *exposures* to the sum of the *exposure* values of the *exposures securitised*. The level of 'm' may be set by the *firm*.

- (3) For *securitisations* involving *retail exposures*, the *supervisory formula method* may be implemented using the simplifications: $h = 0$ and $v = 0$.

[Note: BCD Annex IX Part 4 point 53 (part)]

- 9.12.24 G Where a *securitisation* of *retail exposures* has a sufficiently low value of N for the simplification in *BIPRU* 9.12.23R(3) to result in a material change in the capital charge as compared to the position if the approach in *BIPRU* 9.12.23R were not taken, a *firm* should discuss with the *FSA* the suitability of its use.

Liquidity Facilities

- 9.12.25 R The provisions in *BIPRU* 9.12.26R to *BIPRU* 9.12.28G apply for the purposes of determining the *exposure* value of an *unrated securitisation position* in the form of certain types of *liquidity facility*.

[Note: BCD Annex IX Part 4 point 55]

Liquidity facilities only available in the event of general market disruption

- 9.12.26 R A conversion figure of 20% may be applied to the nominal amount of a *liquidity facility* that may only be drawn in the event of a general market disruption and that meets the conditions to be an eligible *liquidity facility* set out in *BIPRU* 9.11.10R.

[Note: BCD Annex IX Part 4 point 56]

Cash advance facilities

- 9.12.27 R A conversion figure of 0% may be applied to the nominal amount of a *liquidity facility* that meets the conditions set out in *BIPRU* 9.11.12R.

[Note: BCD Annex IX Part 4 point 57]

Exceptional treatment for liquidity facilities where K_{IRB} cannot be calculated

- 9.12.28 G (1) When it is not practical for the *firm* to calculate the *risk weighted exposure amounts* for the *securitised exposures* as if they had not been *securitised* and the position does not qualify for the *ABCP internal assessment approach*, a *firm* may apply to the *FSA* for a variation of its *IRB permission* under which, on an exceptional basis, it may temporarily apply the method in (2) for the calculation of *risk weighted exposure amounts* for an *unrated securitisation position* in the form of a *liquidity facility* that meets the conditions to be a *liquidity facility* set out in *BIPRU* 9.11.10R or that falls within the terms of *BIPRU* 9.12.26R.
- (2) Under the method in this paragraph, the highest *risk weight* that would be applied under the *standardised approach* to any of the *securitised exposures* had they not been *securitised* may be applied to the *securitisation position* represented by the *liquidity facility*. To determine the *exposure* value of the position a conversion figure of 50% may be applied to the nominal amount of the *liquidity facility* if the facility has an original maturity of one year or less. If the *liquidity facility* complies with the conditions in *BIPRU* 9.12.26R a conversion figure of 20% may be applied. In other cases a conversion factor of 100% must be applied.

[**Note:** *BCD* Annex IX Part 4 points 58 and 59]

9.13 Securitisations of revolving exposures with early amortisation provisions

- 9.13.1 R Where there is a *securitisation of revolving exposures* subject to an *early amortisation provision*, the *originator* must calculate an additional *risk weighted exposure amount* in accordance with this section in respect of the risk that the levels of credit risk to which it is exposed may increase following the operation of the *early amortisation provision*. Accordingly this section sets out how an *originator* must calculate a *risk weighted exposure amount* when it sells *revolving exposures* into a *securitisation* that contains an *early amortisation provision*.

[**Note:** BCD Article 100(1), Annex IX Part 4 points 16 and 68]

Additional capital requirements for securitisations of revolving exposures with early amortisation provisions

- 9.13.2 R A *firm* must calculate a *risk weighted exposure amount* in respect of the sum of the *originator's* interest and the investors' interest.

[**Note:** BCD Annex IX Part 4 point 17]

- 9.13.3 R For *securitisation* structures where the *securitised exposures* comprise *revolving exposures* and non-revolving *exposures*, an *originator* must apply the treatment set out in this section to that portion of the underlying pool containing *revolving exposures*.

[**Note:** BCD Annex IX Part 4 point 18]

- 9.13.4 R For the purposes of this section, subject to *BIPRU* 9.13.6R:

- (1) *originator's* interest means the exposure value of that notional part of a pool of drawn amounts sold into a *securitisation*, the proportion of which in relation to the amount of the total pool sold into the structure determines the proportion of the cash-flows generated by principal and interest collections and other associated amounts which are not available to make payments to those having *securitisation positions* in the *securitisation*;
- (2) to qualify as such the *originator's* interest may not be subordinate to the investors' interest; and
- (3) investors' interest means the exposure value of the remaining notional part of the pool of drawn amounts.

[**Note:** BCD Annex IX Part 4 point 19]

- 9.13.5 R Subject to *BIPRU* 9.13.7R, the *exposure* of the *originator* associated with its rights in respect of the *originator's* interest must not be treated as a *securitisation position* but as a pro rata *exposure* to the *securitised exposures* as if they had not been *securitised*.

[Note: BCD Annex IX Part 4 point 20]

- 9.13.6 R (1) For *firms* using the *IRB approach* set out in *BIPRU 4*, this paragraph applies in place of *BIPRU 9.13.4R*.
- (2) For the purposes of this section, *originator's* interest means the sum of:
- (a) the exposure value of that notional part of a pool of drawn amounts sold into a *securitisation*, the proportion of which in relation to the amount of the total pool sold into the structure determines the proportion of the cash-flows generated by principal and interest collections and other associated amounts which are not available to make payments to those having *securitisation positions* in the *securitisation*; and
 - (b) the exposure value of that part of the pool of undrawn amounts of the credit lines, the drawn amounts of which have been sold into the *securitisation*, the proportion of which to the total amount of such undrawn amounts is the same as the proportion of the exposure value described in (a) to the exposure value of the pool of drawn amounts sold into the *securitisation*.
- (3) To qualify as such the *originator's* interest may not be subordinate to the investors' interest.
- (4) Investors' interest means the exposure value of the notional part of the pool of drawn amounts not falling within (2)(a) plus the exposure value of that part of the pool of undrawn amounts of credit lines, the drawn amounts of which have been sold into the *securitisation*, not falling within (2)(b).

[Note: BCD Annex IX Part 4 points 69 and 70]

- 9.13.7 R For *firms* using the *IRB approach* set out in *BIPRU 4*, this paragraph applies in place of *BIPRU 9.13.5R*. The *exposure* of the *originator* associated with its rights in respect of that part of the *originator's* interest described in *BIPRU 9.13.6R(2)(a)* must not be treated as a *securitisation position* but as a *pro rata exposure* to the *securitised* drawn amounts as if they had not been *securitised* in an amount equal to that described in *BIPRU 9.13.6R(2)(a)*. The *originator* must also be considered to have a *pro rata exposure* to the undrawn amounts of the credit lines, the drawn amounts of which have been sold into the *securitisation*, in an amount equal to that described in *BIPRU 9.13.6R(2)(b)*.

[Note: BCD Annex IX Part 4 point 71]

Exemptions from early amortisation treatment

- 9.13.8 R *Originators* of the following types of *securitisation* are exempt from the capital requirement in *BIPRU 9.13.1R*:

- (1) *securitisations of revolving exposures* whereby investors remain fully exposed to all future draws by borrowers so that the risk on the underlying facilities does not return to the *originator* even after an early amortisation event has occurred; and
- (2) *securitisations* where any *early amortisation provision* is solely triggered by events not related to the performance of the *securitised* assets or the *originator*, such as material changes in tax laws or regulations.

[Note: BCD Annex IX Part 4 point 21]

Maximum capital requirement

9.13.9 R For an *originator* subject to the capital requirement in *BIPRU* 9.13.1R the total of the *risk weighted exposure amounts* in respect of its positions in the investors' interest (as defined in *BIPRU* 9.13.4R or *BIPRU* 9.13.6R) and the *risk weighted exposure amounts* calculated under *BIPRU* 9.13.1R must be no greater than the greater of:

- (1) the *risk weighted exposure amounts* calculated in respect of its positions in the investors' interest (as so defined); and
- (2) the *risk weighted exposure amounts* that would be calculated in respect of the *securitised exposures* by a *firm* holding the *exposures* as if they had not been *securitised* in an amount equal to the investors' interest (as so defined).

[Note: BCD Annex IX Part 4 point 22]

9.13.10 R Deduction of net gains, if any, arising from the capitalisation of future income required under *GENPRU* 2.2.90R (Core tier one capital: profit and loss account and other reserves: Securitisation) must be treated outside the maximum amount indicated in *BIPRU* 9.13.9R.

[Note: BCD Annex IX Part 4 point 23]

Calculation of risk-weighted exposure amounts

9.13.11 R The *risk weighted exposure amount* to be calculated in accordance with *BIPRU* 9.13.1R must be determined by multiplying the amount of the investors' interest (as defined in *BIPRU* 9.13.4R or *BIPRU* 9.13.6R) by the product of:

- (1) the appropriate conversion figure as indicated in *BIPRU* 9.13.16R, *BIPRU* 9.13.19R or *BIPRU* 9.13.20R; and
- (2) the weighted average *risk weight* that would apply to the *securitised exposures* if the *exposures* had not been *securitised*.

[Note: BCD Annex IX Part 4 point 24]

9.13.12 R An *early amortisation provision* must be treated as controlled for the purposes of this section where the following conditions are met:

- (1) the *originator* has an appropriate capital/liquidity plan in place to ensure that it has sufficient capital and liquidity available in the event of an early amortisation;
- (2) throughout the duration of the transaction there is a pro rata sharing between the *originator's* interest and the investors' interest (as defined in *BIPRU* 9.13.4R or *BIPRU* 9.13.6R) of payments of interest and principal, expenses, losses and recoveries based on the balance of receivables outstanding at one or more reference points during each month;
- (3) the amortisation period is considered sufficient for 90% of the total debt (*originator's* and investors' interest (as defined in *BIPRU* 9.13.4R or *BIPRU* 9.13.6R)) outstanding at the beginning of the early amortisation period to have been repaid or recognised as in default; and
- (4) the speed of repayment is no more rapid than would be achieved by straight-line amortisation over the period set out in (3).

[Note: *BCD* Annex IX Part 4 point 25]

9.13.13 R In the case of a *securitisation* meeting the following conditions:

- (1) it is subject to an *early amortisation provision*;
- (2) the *securitisation* is of *retail exposures* which are uncommitted and unconditionally cancellable without prior notice; and
- (3) the early amortisation is triggered by the *excess spread* level falling to a specified level

a *firm* must, to calculate the appropriate conversion figure referred to in *BIPRU* 9.13.11R, compare the three-month average *excess spread* level with the *excess spread* levels at which *excess spread* is required to be trapped.

[Note: *BCD* Annex IX Part 4 point 26]

9.13.14 R Where the *securitisation* does not require *excess spread* to be trapped, the trapping point is deemed to be 4.5 percentage points greater than the *excess spread* level at which an early amortisation is triggered.

[Note: *BCD* Annex IX Part 4 point 27]

9.13.15 R The conversion figure to be applied must be determined by the level of the actual three month average *excess spread* in accordance with *BIPRU* 9.13.16R.

[Note: *BCD* Annex IX Part 4 point 28]

9.13.16 R Table: Conversion figures
This table belongs to *BIPRU* 9.13.15R

	Securitisations subject to a controlled early amortisation provision	Securitisation subject to a non-controlled early amortisation provision
3 months average <i>excess spread</i>	Conversion figure	Conversion figure
Above level A	0%	0%
Level A	1%	5%
Level B	2%	15%
Level C	10%	50%
Level D	20%	100%
Level E	40%	100%

9.13.17 R In *BIPRU* 9.13.16R:

- (1) Level A means levels of *excess spread* less than 133.33% of the trapping level of *excess spread* but not less than 100% of that trapping level;
- (2) Level B means levels of *excess spread* less than 100% of the trapping level of *excess spread* but not less than 75% of that trapping level;
- (3) Level C means levels of *excess spread* less than 75% of the trapping level of *excess spread* but not less than 50% of that trapping level;
- (4) Level D means levels of *excess spread* less than 50% of the trapping level of *excess spread* but not less than 25% of that trapping level; and
- (5) Level E means levels of *excess spread* less than 25% of the trapping level of *excess spread*.

[**Note:** *BCD* Annex IX Part 4 point 29]

9.13.18 G In the case of a *securitisation* meeting the conditions in this paragraph, a *firm* may apply to the *FSA* for a *waiver* that would allow a treatment which approximates closely to that prescribed in *BIPRU* 9.13.13R to *BIPRU* 9.13.17R for determining the conversion figure indicated. If a *firm* wants such a *waiver*, it should satisfy the *FSA* that:

- (1) the *securitisation* is subject to an *early amortisation provision* of retail *exposures*;
- (2) those retail *exposures* are uncommitted and unconditionally cancellable without prior notice;
- (3) the *early amortisation* is triggered by a quantitative value in respect of something other than the three month average *excess spread*;
- (4) the *firm* can establish a quantitative measure equivalent, in relation to the value in (3), to the trapping level of *excess spread*; and
- (5) that treatment is a prudent measure of the risk that the levels of credit risk to which it is exposed may increase following the operation of the *early amortisation provision* (referred to in *BIPRU 9.13.1R*).

[Note: *BCD Annex IX Part 4 point 30*]

- 9.13.19 R All other *securitisations* subject to a controlled *early amortisation provision* of *revolving exposures* are subject to a credit conversion figure of 90%.

[Note: *BCD Annex IX Part 4 point 32*]

- 9.13.20 R All other *securitisations* subject to a non-controlled *early amortisation provision* of *revolving exposures* are subject to a credit conversion figure of 100%.

[Note: *BCD Annex IX Part 4 point 33*]

Liquidity plans

- 9.13.21 R A *firm* which is an *originator* of a revolving *securitisation* transaction involving *early amortisation provisions* should have liquidity plans to address the implications of both scheduled and early amortisation.

[Note: *BCD Annex V point 9*]

- 9.14 Recognition of credit risk mitigation on securitisation positions under the IRB approach
- 9.14.1 R This section applies to *credit risk mitigation* in relation to a *securitisation position* for a *firm* calculating *risk weighted exposure amounts* using the *IRB approach*.
[**Note:** *BCD* Annex IX Part 4 point 37 (part)]
- 9.14.2 R Where a *firm* uses the *ratings based method* to calculate the *risk weighted exposure amounts* of *securitisation positions*, the *firm* may recognise *credit risk mitigation* in accordance with *BIPRU* 9.14.4R to *BIPRU* 9.14.6R.
[**Note:** *BCD* Annex IX Part 4 point 51]
- 9.14.3 R Where a *firm* uses the *supervisory formula method* to calculate the *risk weighted exposure amounts* of *securitisation positions*, the *firm* may recognise *credit risk mitigation* in accordance with *BIPRU* 9.14.4R to *BIPRU* 9.14.5R and *BIPRU* 9.14.7R to *BIPRU* 9.14.13R.
[**Note:** *BCD* Annex IX Part 4 point 54]
- Funded protection
- 9.14.4 R Eligible funded protection is limited to that which is eligible for the calculation of *risk weighted exposure amounts* under the *standardised approach* as laid down under *BIPRU* 5 and recognition is subject to compliance with the relevant minimum requirements as laid down under *BIPRU* 5.
[**Note:** *BCD* Annex IX Part 4 point 60]
- Unfunded credit protection
- 9.14.5 R Eligible unfunded credit protection and unfunded protection providers are limited to those which are eligible under *BIPRU* 5 (Credit risk mitigation) and *BIPRU* 4.10 (Credit risk mitigation under the IRB approach) and recognition is subject to compliance with the relevant minimum requirements laid down under those provisions.
[**Note:** *BCD* Annex IX Part 4 point 61]
- Credit risk mitigation under the ratings based method
- 9.14.6 R Where *risk weighted exposure amounts* are calculated using the *ratings based method*, the *exposure* value and/or the *risk weighted exposure amount* for a *securitisation position* in respect of which credit protection has been obtained may be modified in accordance with the provisions of *BIPRU* 5 (Credit risk mitigation) as they apply for the calculation of *risk weighted exposure amounts* under the *standardised approach* set out in *BIPRU* 3.

[Note: BCD Annex IX Part 4 point 62]

Credit risk mitigation under the supervisory formula method – full credit protection

- 9.14.7 R *BIPRU 9.14.8R-BIPRU 9.14.10R* apply where *risk weighted exposure amounts* are calculated using the *supervisory formula method* where there is full credit protection.

[Note: BCD Annex IX Part 4 point 63 (part)]

- 9.14.8 R A *firm* must determine the effective *risk weight* of the position. It must do this by dividing the *risk weighted exposure amount* of the position by the *exposure* value of the position and multiplying the result by 100.

[Note: BCD Annex IX Part 4 point 63 (part)]

- 9.14.9 R In the case of funded credit protection, the *risk weighted exposure amount* of the *securitisation position* must be calculated by multiplying the funded protection-adjusted *exposure* amount of the position (E^* , as calculated under *BIPRU 5.4.28R(3)*, taking the amount of the *securitisation position* to be E) by the effective *risk weight*.

[Note: BCD Annex IX Part 4 point 64]

- 9.14.10 R In the case of unfunded credit protection, the *risk weighted exposure amount* of the *securitisation position* must be calculated by multiplying G_A (the amount of the protection adjusted for any currency mismatch and maturity mismatch in accordance *BIPRU 5.7.23R(2)*) by the *risk weight* of the protection provider; and adding this to the amount arrived at by multiplying the amount of the *securitisation position* minus G_A by the effective *risk weight*.

[Note: BCD Annex IX Part 4 point 65]

Credit risk mitigation under the supervisory formula method - partial protection

- 9.14.11 R *BIPRU 9.14.12R-BIPRU 9.14.13R* apply where *risk weighted exposure amounts* are calculated using the *supervisory formula method* where there is partial protection.

- 9.14.12 R If the *credit risk mitigation* covers the ‘first loss’ or losses on a proportional basis on the *securitisation position*, a *firm* may apply *BIPRU 9.14.7R* to *BIPRU 9.14.10R*.

[Note: BCD Annex IX Part 4 point 66]

- 9.14.13 R In other cases the *firm* must treat the *securitisation position* as two or more positions with the uncovered portion being the position with the lower credit quality. For the purposes of calculating the *risk weighted exposure amount* for this position, the provisions in *BIPRU 9.12.22R* to *BIPRU 9.12.24R* apply subject to the modifications that ‘T’ is adjusted to e^* in the case of funded credit protection; and to $T-g$ in the case of unfunded credit protection, where e^* denotes the ratio of E^* to the total notional amount of the underlying pool, where E^* is the adjusted *exposure amount* of the *securitisation position* calculated in accordance with *BIPRU 5.4.28R(3)* taking the amount of the *securitisation position* to be E ; and g is the ratio of the nominal amount of credit protection (adjusted for any currency or maturity mismatch in accordance with the provisions of *BIPRU 5 (Credit risk mitigation)*) to the sum of the *exposure amounts* of the *securitised exposures*. In the case of unfunded credit protection the *risk weight* of the protection provider must be applied to that portion of the position not falling within the adjusted value of ‘T’.

[Note: *BCD Annex IX Part 4 point 67*]

10 Concentration risk requirements

10.1 Application and Purpose

Application

- 10.1.1 R This chapter applies to a *BIPRU firm*. It applies irrespective of whether the *firm* adopts the *standardised approach* or the *IRB approach*. If it adopts the *IRB approach*, it applies irrespective of whether the *firm* adopts the *foundation IRB approach* or the *advanced IRB approach*.

Purpose

- 10.1.2 G This chapter sets out *rules and guidance* for *large exposures* and the *concentration risk capital component* (the *CNCOM*), implementing the *large exposures* requirements of articles 66(3) (in part) and 106 to 117 and paragraph 7 of Annex V of the *Banking Consolidation Directive* and articles 28 to 32 and Annex VI of the *Capital Adequacy Directive*.
- 10.1.3 G A *large exposure* may be in the form of a loan to a single borrower, or it may arise across many transactions involving different types of financial instruments with several *counterparties* within the same group of companies. Where a *firm's exposure* to its *counterparty* is large, it risks a large loss should the *counterparty* default. Such a loss may be sufficient on its own to threaten the solvency of the *firm*.
- 10.1.4 G The purpose of this chapter is to ensure that a *firm* manages its *exposure* to *counterparties* within appropriate limits set in relation to its *capital resources*.

Restricted application for UCITS investment firms

- 10.1.5 R This chapter only applies to a *UCITS investment firm* with respect to its *designated investment business*. For this purpose *scheme management activity* is excluded from *designated investment business*.

10.2 Identification of exposures

10.2.1 R Unless *BIPRU* 10.2.2R applies, an *exposure* is any of the items included in *BIPRU* 3.2.9R (Exposure classes for the purposes of the *standardised approach*) or the table in *BIPRU* 3.7.2R (Classification of off-balance-sheet items for the purposes of the *standardised approach*), whether held in the *trading book* or the *non-trading book*, without application of the *risk weight* or degrees of risk there provided for.

10.2.2 R An *exposure* does not include:

- (1) an *exposure* which is entirely deducted from a *firm's capital resources*;
- (2) in the case of *foreign currency* transactions, *exposures* incurred in the ordinary course of settlement during the 48 hours following payment; or
- (3) in the case of transactions for the purchase or sale of *securities*, *exposures* incurred in the ordinary course of settlement during the five working days following payment or delivery of the *securities*, whichever is earlier.

10.2.3 G An *exposure* does not include:

- (1) a transaction entered into by a *firm* as trustee or agent without personal liability on the part of the *firm*;
- (2) indemnities for lost share certificates; or
- (3) (where the *firm* acts as lessor, mortgagee or owner of goods under a hire-purchase arrangement) contingent liabilities for injuries, damage or loss on the part of the *counterparty* to that arrangement in respect of the goods that are the subject of that arrangement.

10.2.4 G If a *firm* takes a credit risk charge against an *exposure* equal to the value of that *exposure*, this can count as a capital deduction for the purposes of *BIPRU* 10.2.2R(1).

10.3 Identification of counterparties

10.3.1 R An individual *counterparty* may be a natural or legal *person*.

10.3.2 G Examples of a *counterparty* include:

- (1) the *customer* or borrower; this includes governments, local authorities, public sector entities, individual trusts, corporations, unincorporated businesses (whether as *sole traders* or *partnerships*) and non-profit making bodies;
- (2) where the *firm* is providing a guarantee, the *person* guaranteed;
- (3) for a *derivatives* contract, the *person* with whom the contract was made;
- (4) for exchange traded contracts novated through a central clearing mechanism, that central clearing mechanism;
- (5) where a bill held by a *firm* has been accepted by a *credit institution*, the acceptor; and
- (6) where a *firm* is funding the activities of a *company* that trades on an exchange (whether as principal or on behalf of clients), that *company*.

Identification of counterparties for guaranteed exposures

- 10.3.3 R
- (1) Where an *exposure* to a *counterparty* is guaranteed by a third party, a *firm* may treat the *exposure* as an *exposure* to the third party and not to the *counterparty*.
 - (2) In deciding whether or not to treat the *exposure* as an *exposure* to the third party a *firm* must ensure that the identification of *counterparties* for concentration risk purposes is applied in a consistent manner.
 - (3) Where the guarantee is denominated in a currency different from that in which the *exposure* is denominated, the amount of the *exposure* deemed to be covered must be calculated in accordance with the provisions on the treatment of currency mismatch for *unfunded credit protection* in *BIPRU 5* (Credit risk mitigation) and, if applicable, *BIPRU 4.10* (The IRB approach: Credit risk mitigation).
 - (4) A mismatch between the maturity of the *exposure* and the maturity of the protection must be treated in accordance with the provisions on the treatment for maturity mismatch in *BIPRU 5* and, if applicable, *BIPRU 4.10*.

- (5) Partial coverage must be treated in accordance with *BIPRU 5* and, if applicable, *BIPRU 4.10*.
- (6) A guarantee may only be treated in accordance with (1) if the *firm* complies with the eligibility requirements and other minimum requirements set out in *BIPRU 5* and, if applicable, *BIPRU 4.10* for the purposes of calculating *risk-weighted exposure amounts*.
- (7) For the purpose of this *rule*, guarantee includes a credit derivative recognised under *BIPRU 5* and, if applicable, *BIPRU 4.10*, other than a credit linked note.

10.3.4 G An example of the eligibility requirements and other minimum requirements set out in *BIPRU 5* as referred to in *BIPRU 10.3.3R(6)* is the requirement for a legal review in *BIPRU 5.2.3R*.

Groups of connected clients

10.3.5 G The *Glossary* defines a *group of connected clients*.

10.3.6 G Relationships between individual *counterparties* which might be considered to constitute a single risk for the purposes of the definition of *group of connected clients* include:

- (1) *undertakings* in the same *group*;
- (2) *companies* whose ultimate owner (whether wholly or significantly) is the same individual or individuals, and which do not have a formal group structure;
- (3) *companies* having common directors or management; and
- (4) *counterparties* linked by cross guarantees

10.3.7 G The *FSA* would not regard the normal business relationships between *companies* which are competitors, and to which none of the relationships listed in *BIPRU 10.3.6G* apply, as falling within the definition of *group of connected clients*.

Connected counterparties

10.3.8 R For the purposes of *BIPRU 10*, and in relation to a *firm*, a *connected counterparty* means another *person* ('P') to whom the *firm* has an *exposure* and who fulfils at least one of the following conditions:

- (1) P is *closely related* to the *firm*; or
- (2) P is an *associate* of the *firm*; or
- (3) the same *persons* significantly influence the *governing body* of P and of the *firm*; or

- (4) the *firm* has an *exposure* to P that was not incurred for the clear commercial advantage of the *firm* or the *firm's group* and which is not on an arm's length basis.

Exposures to counterparties, groups of connected clients and connected counterparties

- 10.3.9 R A *firm's total exposure* to a *counterparty* must be calculated by summing its *exposures* to that *counterparty*, including both *trading book exposures* and *non-trading book exposures*.
- 10.3.10 R A *firm's total exposure* to a *group of connected clients* must be calculated by summing its *exposures* to the individual *persons* within that *group of connected clients*, including both *trading book exposures* and *non-trading book exposures*.
- 10.3.11 R A *firm's total exposure* to *connected counterparties* must be calculated by summing its *exposures* to all the *firm's connected counterparties*, including both *trading book exposures* and *non-trading book exposures*.

Exposures to trustees

- 10.3.12 R If a *firm* has an *exposure* to a *person* ('A') when A is acting on his own behalf, and also an *exposure* to A when A acts in his capacity as trustee, custodian or general partner of an investment trust, unit trust, venture capital or other investment fund, pension fund or a similar fund (a "fund"), the *firm* may treat the latter *exposure* as if it was to the fund, unless such a treatment would be misleading.
- 10.3.13 G When considering whether the treatment described in *BIPRU* 10.3.12R is misleading, factors a *firm* should consider include:
- (1) the degree of independence of control of the fund, including the relation of the fund's board and senior management to the *firm* or to other funds or to both;
 - (2) the terms on which the *counterparty*, when acting as trustee, is able to satisfy its obligation to the *firm* out of the fund of which it is trustee;
 - (3) whether the beneficial owners of the fund are connected to the *firm*, or related to other funds managed within the *firm's group*, or both; and
 - (4) for a *connected counterparty*, whether the *exposure* arises from a transaction entered into on an arm's length basis.
- 10.3.14 G In deciding whether a transaction is at arm's length for the purposes of *BIPRU* 10.3.8R(4) and *BIPRU* 10.3.13G(4), the following factors should be taken into account:

- (1) the extent to which the *person* to whom the *firm* has an *exposure* ('A') can influence the *firm's* operations, through e.g. the exercise of voting rights;
- (2) the management role of A where A is also a director of the *firm*; and
- (3) whether the *exposure* would be subject to the *firm's* usual monitoring and recovery procedures if repayment difficulties emerged.

10.4 Measurement of exposures to counterparties and issuers

General

- 10.4.1 R Unless specifically mentioned, *BIPRU* 10.4 applies both to *non-trading book* and *trading book exposures*.
- 10.4.2 R For the purpose of calculating the value of an *exposure*, *exposures* are divided into *counterparty exposures* and *issuer exposures*.
- 10.4.3 R When calculating a *firm's total exposure* to a *counterparty* it must sum the *counterparty exposures* and the *issuer exposures* to that *counterparty*.
- 10.4.4 G The same asset may give rise to a *counterparty exposure* and an *issuer exposure*. For example a purchased *option* creates an *exposure* to the other party to the *option* and the issuer of the underlying *security*.

Definition of issuer exposures

- 10.4.5 R The *issuer exposure* to an individual *counterparty* must be calculated by summing the following items:
- (1) the excess — where positive — of the *firm's long positions* over its *short positions* in all the *CRD financial instruments* issued by the *counterparty* in question, in accordance with *BIPRU* 10.4.28R (Further details about the calculation of issuer exposures: Establishing the net position in the non-trading book) and *BIPRU* 10.4.30R (Further details about the calculation of issuer exposures: Establishing the net position in the trading book); and
 - (2) the *firm's net underwriting exposure* to that *counterparty*.

Definition of issuer exposures: Position risk

- 10.4.6 R An *issuer exposure* to a *person* in the *non-trading book* does not include an *exposure* that gives rise to a *counterparty exposure* to that *person*.
- 10.4.7 G In general an *issuer exposure* in the *non-trading book* means any *exposure* that, if it were in the *trading book* and subject to the *standard market risk PRR rules*:
- (1) (in the case of a *derivative* in relation to a *CRD financial instrument*) would give rise to a notional position in the *CRD financial instrument* underlying that *derivative*; or
 - (2) would give rise to a similar notional position in a *CRD financial instrument* other than the one that the *firm* actually holds.

- 10.4.8 G A credit linked note may be an example of an instrument falling within *BIPRU 10.4.7G(2)*.
- 10.4.9 G A *firm's* long physical *position* in a *security* held in the *non-trading book* is generally included as a *counterparty exposure* rather than an *issuer exposure*.
- 10.4.10 G *BIPRU 10.4.5R(1)* includes any *exposure* in the *trading book* or *non-trading book* that would give rise to a notional *position* under the *standard market risk PRR rules*.
- 10.4.11 G The netting of long and short *positions* under *BIPRU 10.4.5R(1)* includes the notional *positions* in the underlying which arise from *derivative transactions*.
- 10.4.12 R For the purposes of *BIPRU 10.4.5R(1)*, a *firm* may, when calculating its net *position* in *CRD financial instruments* in the *non-trading book*, include *counterparty exposures* excluded from the *issuer exposure* calculation under *BIPRU 10.4.6R*. However any *counterparty exposure* used in this way is still subject to the provisions of this chapter about *counterparty exposures*.
- 10.4.13 G This paragraph illustrates how *BIPRU 10.4.12R* works. Say that a *firm* has a holding of *shares* in its *non-trading book*. Say that the *firm* has bought a *put option* over those *shares*, which it also holds in its *non-trading book*. The holding of *shares* gives rise to a *counterparty exposure* to the issuer of those *shares* and the *option* gives rise to a *counterparty exposure* to the *person* who wrote the *option*. The *option* also gives rise to an *issuer exposure* to the issuer of the *shares*. The *firm* may use *BIPRU 10.4.12R* to eliminate that *issuer exposure* by netting its *position* to zero by taking into account its long *non-trading book position* in those *shares*. If it does so, the *firm* will still have *counterparty exposures* to the issuer of the *shares* and the counterparty under the *option*.
- 10.4.14 G Another example of how *BIPRU 10.4.12R* works is this. Say that a *firm* has a long *non-trading book position* in a *debt security* together with an offsetting credit derivative. If the conditions in *BIPRU 10.3.3R* (Identification of counterparties for guaranteed exposures) are met the *firm* may, for the purposes of the calculation of the *counterparty exposure*, treat itself as having an *exposure* to the provider of the credit derivative rather than to the issuer of the *debt security*. This means that the *counterparty exposure* to the issuer of the *debt security* is zero. In calculating the *issuer exposure* the *firm* may net the long *position* in the *debt security* against the short notional *position* arising out of the credit derivative. The effect is that the *issuer exposure* to the issuer of the *debt security* is also zero. Hence the *firm* has no *exposure* to the issuer of the *debt security*.

- 10.4.15 R To the extent that *BIPRU* 10.4 does not otherwise explain what *positions* are included in *BIPRU* 10.4.5R(1) or how to calculate a net *position* for the purpose of *BIPRU* 10.4.5R(1), a *firm* must apply the provisions of the applicable *standard market risk PRR rules* or the ones that would apply if the *position* were in the *trading book*.
- 10.4.16 R A *firm* must not offset *exposures* in the *non-trading book* and *trading book* against each other for the purpose of calculating an *issuer exposure* except to the extent allowed by the *standard market risk PRR rules*.
- 10.4.17 R For the purposes of this chapter, the *counterparties* with respect to an *exposure* falling into *BIPRU* 10.4.5R(1) are the *persons* who are or would be treated as an obligor under the *standard market risk PRR rules* in question.

Definition of issuer exposures: Underwriting

- 10.4.18 G In accordance with *BIPRU* 7.8 (Securities underwriting), a *firm* should include *net underwriting exposures* to an issuer in the calculation of its *total exposure* to that issuer.

Definition of counterparty exposures

- 10.4.19 R A *counterparty exposure* means, with respect to the *non-trading book*, any *exposure* as defined in *BIPRU* 10.2 (Identification of exposures) held in the *non-trading book*.
- 10.4.20 R A *counterparty exposure* means, with respect to the *trading book*, any *exposure* as defined in *BIPRU* 10.2 (Identification of exposures) due to the transactions, agreements and contracts referred to in *BIPRU* 14.2.2R (List of *trading book exposures* that give rise to a counterparty risk credit charge) and held in the *trading book*, including credit derivatives.
- 10.4.21 G For example *BIPRU* 10.4.19R to *BIPRU* 10.4.20R mean that a *share* only gives rise to a *counterparty exposure* when it is held in the *non-trading book*.

Calculation of counterparty exposures

- 10.4.22 R Subject to *BIPRU* 10.4.23R to *BIPRU* 10.4.24R, the value of a *firm's counterparty exposures*, whether in its *non-trading book* or its *trading book*, is the amount at risk calculated in line with *GENPRU* 1.3 (Valuation).
- 10.4.23 R A *firm* must calculate the value of its *counterparty exposures* in its *trading book* in the manner laid down in *BIPRU* 14 (Capital requirements for settlement and counterparty risk) for the calculation of *exposure* values. For these purposes the reference in *BIPRU* 14.2.11R (How to calculate *exposure* values and *risk-weighted exposure amounts* for the purpose of calculating the *counterparty risk capital component*) to the provisions of the *IRB approach* does not apply.

- 10.4.24 R *Counterparty exposures* arising from *financial derivative instruments* must be calculated in accordance with one of the methods set out in *BIPRU 13* (Financial derivatives, SFTs and long settlement transactions). For the purposes of this chapter, *BIPRU 13.6.6R* (Scope of *CCR internal model method*) also applies.
- 10.4.25 R A *firm* must not offset *exposures* in the *non-trading book* and *trading book* for the purpose of calculating *counterparty exposures* except to the extent permitted under the *standardised approach* or, if applicable, the *IRB approach*.
- 10.4.26 R For the purposes of this chapter, the *counterparty* with respect to a *counterparty exposure* is the *person* who would be treated as the *person* to which the *firm* has the *exposure* under the *standardised approach* or, if applicable, the *IRB approach*.

Further details about the calculation of issuer exposures: General

- 10.4.27 R *BIPRU 10.4.28R* to *BIPRU 10.4.42R* apply to *issuer exposures* arising under *BIPRU 10.4.5R(1)*.

Further details about the calculation of issuer exposures: Establishing the net position in the non-trading book

- 10.4.28 R A *firm* must calculate the value of an *exposure* to the issuer of a *CRD financial instrument* which is held in the *firm's non-trading book* as the sum of the excess, where positive, of the book value of all long *positions* over all short *positions* (the net long *position*), for each identical *CRD financial instrument* issued by that issuer.
- 10.4.29 R For the purposes of *BIPRU 10.4.28R*, short *positions* in one *CRD financial instrument* may be used to offset long *positions* in a non-identical *CRD financial instrument* issued by the same issuer if both the *CRD financial instrument* are denominated in the same currency, and:
- (1) where both the *CRD financial instrument* are fixed rate, they are within the same residual maturity time band, one year or less, or over one year; or
 - (2) where both the *CRD financial instrument* are index linked, they are within the same residual maturity time band referred to in (1); or
 - (3) both the *CRD financial instrument* are floating rate.

Further details about the calculation of issuer exposures: Establishing the net position in the trading book

- 10.4.30 R A *firm* must calculate the value of an *exposure* to the issuer of a *CRD financial instrument* which is held in the *firm's trading book* by calculating the excess of the current market value of all long *positions* over all short *positions* in all the *CRD financial instruments* issued by that issuer.

Further details about the calculation of issuer exposures: Netting

- 10.4.31 R For the purposes of *BIPRU* 10.4.28R and *BIPRU* 10.4.30R, the short *positions* must be netted against the long *positions* in *CRD financial instruments* with the highest *specific risk PRAs*.

Further details about the calculation of issuer exposures: Netting between different issuers

- 10.4.32 R A *firm* must not offset an *exposure* to one issuer against an *exposure* to another issuer (whether in the *trading book* or the *non-trading book*) even where:
- (1) the issuers are a *group of connected clients*; and
 - (2) the *exposures* are non-identical *exposures* which meet the conditions in *BIPRU* 10.4.29R.

Further details about the calculation of issuer exposures: Forward agreements

- 10.4.33 R A *firm* must include as a long *position* a commitment by it to buy:
- (1) a *debt security* or an equity at a future date; and
 - (2) under a note issuance facility, at the request of the issuer, a *security* which is unsold on the issue date.
- 10.4.34 R A *firm* must include as a short *position* a commitment by it to sell a *debt security* or an equity at a future date.

Further details about the calculation of issuer exposures: Interest rate, foreign currency and equity swaps

- 10.4.35 G An interest rate leg of an equity *swap*, or an interest rate or currency *swap*, does not generate an *issuer exposure*.
- 10.4.36 R Where the equity leg of an equity *swap* is based on the change in value of an individual equity, it must be treated as giving rise to an *exposure* to the issuer of the equity.

Further details about the calculation of issuer exposures: Option positions

- 10.4.37 R When determining its *exposure* to an issuer arising from an *option*, a *firm* must value an *option* as the amount of principal underlying the *option*.
- 10.4.38 R A *firm* must treat:
- (1) a written put *option* as a long *position* in the underlying *security* valued at the strike price or the market price of the underlying *security*, whichever is lower;

- (2) a purchased put *option* as a short position in the underlying *security* valued at the strike price or the market price of the underlying *security*, whichever is lower; and
- (3) a purchased call *option* as a long *position* in the underlying *security* equal to the book value of the *option* provided that the contract has been given a book value in the *firm's* accounts.

10.4.39 G A written call *option* does not generate an *issuer exposure*.

- 10.4.40 R
- (1) This *rule* applies in relation to an *option* if a *firm*:
 - (a) has a *CAD 1 permission*;
 - (b) the scope of the *CAD 1 waiver* covers that *option*; and
 - (c) the *CAD 1 permission* is for a *CAD 1 model* for option risk aggregation as described in *BIPRU 7.9.7G* (Types of *CAD 1 model*).
 - (2) This *rule* also applies in relation to an *option* if a *firm*:
 - (a) has a *VaR model permission*; and
 - (b) the scope of the *VaR model permission* covers that *option*.
 - (3) A *firm* may take as the exposure value of an *option* the delta weighted value of the notional underlying the *option* calculated using the models described in (1) and (2), to the extent that those values are relevant for the calculations in *BIPRU 10.4.37R*.

Further details about the calculation of issuer exposures: Indices and baskets of equities or securities

10.4.41 R Subject to *BIPRU 10.4.42R*, a *firm* must treat an index or basket of debt *securities* or equities as giving rise to a series of *exposures* to the issuers of the underlying *securities* or equities in accordance with the provisions of *BIPRU 7.2* (Interest rate PRR) or *BIPRU 7.3* (Equity PRR and basic interest rate PRR for equity derivatives).

10.4.42 R A *qualifying equity index* does not generate an *exposure* of the type described in *BIPRU 10.4.41R*.

Securities financing transactions

10.4.43 R A *firm* with *securities financing transactions* in its *trading book* or its *non-trading book* must calculate its exposure to:

- (1) the issuer of the *security* it has sold in a *repurchase agreement*; and

- (2) the counterparty to the *securities financing transaction* (subject to *BIPRU 10.3.3R* (Identification of counterparties for guaranteed exposures) and *BIPRU 10.6* (Exemptions)).

Treatment of accrued interest and dividends due

- 10.4.44 R Subject to *BIPRU 10.4.45R*, when calculating an *exposure*, a *firm* must include accrued interest and dividends due.
- 10.4.45 R A *firm* may use the following method of calculating the total amount of a *firm's exposures* in the *non-trading book* to a *counterparty*, *connected counterparties* or a *group of connected clients* as an alternative to that in *BIPRU 10.4.44R*:
- (1) if the total amount of the *exposures* is less than 20% of the *firm's capital resources* (ignoring accrued interest), the accrued interest element need not be included in the calculation of the amount of the *exposures* in the *non-trading book*; and
 - (2) if the total amount of the *exposures* (ignoring accrued interest) is more than 20% (but less than 25%) of the *firm's capital resources*, the *firm* must be able to demonstrate that the total amount of the *exposures*, including the accrued interest element, meet the limits in *BIPRU 10.5* (Limits on exposures and large exposures) and that it meets any related *CNCOM*.
- 10.4.46 G The reason for *BIPRU 10.4.45R* is the systems difficulties of including accrued interest in the total amount of *exposures* in the *non-trading book*.

Exposures to undisclosed counterparties

- 10.4.47 R A *firm* must not incur an *exposure* to an undisclosed *counterparty* unless:
- (1) it has satisfied itself that it will continue to meet the limits in *BIPRU 10.5* (Limits on exposures and large exposures) for *non-trading book exposures* and *trading book exposures* and will continue to meet any *CNCOM*; and
 - (2) it has made and retained a record of the steps it has taken to comply with (1).

10.5 Limits on exposures and large exposures

Definition of large exposure

- 10.5.1 R A *large exposure* of a *firm* means its *total exposure* to a *counterparty*, *connected counterparties* or a *group of connected clients*, whether in the *firm's non-trading book* or *trading book* or both, which in aggregate equals or exceeds 10% of the *firm's capital resources*.

Definition of capital resources

- 10.5.2 R A *firm* must calculate its *capital resources* for the purposes of this chapter in accordance with *GENPRU 2.2* (Capital resources) and *BIPRU 10.5.3R* to *BIPRU 10.5.5R*

- 10.5.3 R Subject to *BIPRU 10.5.4R*, for the purposes of this chapter, a *firm's capital resources* mean *capital resources* calculated at stage (N) of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions).

- 10.5.4 R For the purposes of monitoring against the *trading book* limits and charge regime, as set out in *BIPRU 10.5.11R* to *BIPRU 10.5.22R*, and calculating a *firm's CNCOM*, a *firm's capital resources* may include *tier three capital resources*, in which case a *firm's capital resources* mean *capital resources* calculated at stage (T) of the *capital resources table* (Total capital after deductions).

- 10.5.5 R A *firm* must not take into account the following items:
- (1) surplus provisions (see *GENPRU 2.2.190R* to *GENPRU 2.2.193R*);
or
 - (2) *expected loss* amounts and other negative amounts (see *GENPRU 2.2.236R*); or
 - (3) *securitisation positions* (see *GENPRU 2.2.237R*).

Non-trading book limits

- 10.5.6 R A *firm* must ensure that the total amount of its *exposures* to the following does not exceed 25% of its *capital resources* (as determined under *BIPRU 10.5.2R*, *BIPRU 10.5.3R* and *BIPRU 10.5.5R*):
- (1) a *counterparty*; or
 - (2) a *group of connected clients*; or
 - (3) its *connected counterparties*.

- 10.5.7 G If a *connected counterparty* is also a member of a *group of connected clients* the limit in *BIPRU 10.5.6R* covers the aggregate of the total amount of the *firm's exposures* to its *connected counterparties* and of the total amount of its *exposures* to that *group of connected clients*.
- 10.5.8 R A *firm* must not incur *large exposures* which in total exceed 800% of its *capital resources* (as determined under *BIPRU 10.5.2R*, *BIPRU 10.5.3R* and *BIPRU 10.5.5R*).
- 10.5.9 R If a *firm* exceeds (or is aware that it will exceed) the limits in *BIPRU 10.5.6R* or *BIPRU 10.5.8R* it must notify the *FSA* without delay.
- 10.5.10 G A report under *BIPRU 10.5.9R* should be made in exceptional circumstances only. A *firm* which makes such a report should also provide the *FSA* with an explanation as to how the limits came to be exceeded, and a plan of action for bringing its *exposures* within the limits. The *FSA* may, where the circumstances warrant it, allow a *firm* a limited period of time in which to comply with the limits.

Trading book limits

- 10.5.11 R *Exposures* in a *firm's trading book* are exempt from the 25% and 800% limits in *BIPRU 10.5.6R* and *BIPRU 10.5.8R* if:
- (1) the total amount of the *exposures* on the *firm's non-trading book* to the same *counterparty* or *group of connected clients* or to its *connected counterparties* does not exceed the limits laid down in those *rules*, calculated with reference to the definition of *capital resources* set out in *BIPRU 10.5.2R*, *BIPRU 10.5.3R* and *BIPRU 10.5.5R*, so that the excess arises entirely on the *trading book*; and
 - (2) the *firm* meets the additional capital requirements relating to the *concentration risk capital component (CNCOM)* in relation to the relevant *trading book exposures*.
- 10.5.12 R If a *trading book concentration risk excess* with respect to a *counterparty* or *group of connected clients* or to its *connected counterparties* has existed for 10 *business days* or less, the *firm* must ensure that the total amount of its *trading book exposures* to that *counterparty* or *group of connected clients* or to its *connected counterparties* does not exceed 500% of the *firm's capital resources*.
- 10.5.13 R A *firm* must ensure that the total amount of its *trading book concentration risk excesses* that have persisted for more than 10 *business days* does not exceed 600% of its *capital resources*.
- 10.5.14 R Within 30 *business days* of the end of each third *Month*, a *firm* must notify the *FSA* of all cases of *trading book concentration risk excesses* in that three *Month* period, giving the amount of the excess and the name of the *counterparty*.

- 10.5.15 G A *trading book concentration risk excess* is defined in BIPRU 10.5.20R.
How to calculate the concentration risk capital component
- 10.5.16 G A *firm's CNCOM* should be calculated as part of its *credit risk capital requirement (CRCR)* in accordance with GENPRU 2.1 (Calculation of capital resources requirements).
- 10.5.17 R A *firm's CNCOM* is the sum of its *individual counterparty CNCOMs*.
- 10.5.18 R An *individual counterparty CNCOM* is the amount a *firm* must calculate in accordance with BIPRU 10.5.20R with respect to its *exposures* to a particular *counterparty* or a *group of connected clients* or to its *connected counterparties*.
- 10.5.19 G A *CNCOM* calculation on a *trading book exposure* is in addition to, and not instead of, any capital requirement arising under the *market risk capital requirement* or *counterparty risk capital component*.
- 10.5.20 R A *firm* must calculate its *individual counterparty CNCOM* for its *exposures* to a *counterparty* or *group of connected clients* or to its *connected counterparties* as follows:
- (1) break down its *total exposure* into its *trading book* and *non trading book* components;
 - (2) calculate 25% of the *firm's capital resources* and deduct those parts of the *total exposure* which are in the *non-trading book*;
 - (3) if the *non-trading book exposures* deducted in (2) equal 25% of the *firm's capital resources*, steps (4), (5) and (6) do not apply and if so the *trading book concentration risk excess* means, with respect to a *counterparty*, a *group of connected clients* or its *connected counterparties*, all *trading book exposures* to that *counterparty* or *group of connected clients* or to its *connected counterparties*;
 - (4) if the total amount of the *non-trading book exposures* deducted in (2) is less than 25% of the *firm's capital resources*, a *firm* must allocate (in the order set out in (6)) *trading book exposures* to the unutilised portion of the 25% limit to that *counterparty* or *counterparties* or to its *connected counterparties*;
 - (5) no further *trading book exposures* can be allocated once the 25% limit has been reached; the remaining *trading book exposures* constitute the *trading book concentration risk excess* with respect to that *counterparty* or *group of connected clients* or to its *connected counterparties*;

- (6) for the purposes of (4), a *firm* must allocate first the individual *trading book exposures* with the lowest capital requirements for *specific risk* under the *market risk capital requirement* and/or the lowest capital requirements under the *counterparty risk capital component* and allocate those *trading book exposures* with the highest capital requirements last;
- (7) the *individual counterparty CNCOM* is the sum of the capital requirements for each individual *exposure* included in the *trading book concentration risk excess* in accordance with (8) and (9) (each such capital requirement being an *individual CNCOM*);
- (8) if the *trading book concentration risk excess* has persisted for 10 *business days* or less (irrespective of the age of each component part), the *individual CNCOMs* must be calculated in accordance with this formula:

each *individual CNCOM* = capital requirement referred to in (6) x 200%;

- (9) if the *trading book concentration risk excess* has persisted for more than 10 *business days* (irrespective of the age of each component part), the *individual CNCOMs* must be calculated in accordance with this formula:

each *individual CNCOM* = capital requirement referred to in (6) x appropriate percentage in *BIPRU 10.5.21R*.

10.5.21 R The appropriate percentage referred to in *BIPRU 10.5.20R(9)* must be established in accordance with the following:

- (1) the individual *exposures* included in the *trading book concentration risk excess* must be assigned to the bands in the first column of the table in *BIPRU 10.5.22R*;
- (2) the maximum amount that may be put in any band other than the last equals the percentage of the *firm's capital resources* in column 1 of that table;
- (3) no amount may be allocated to the second or any later band unless the one before has been filled;
- (4) *exposures* must be assigned to the bands in the order established by *BIPRU 10.5.20R(6)*; and
- (5) for the purposes of (4), those *exposures* with the lowest capital requirements (as referred to in *BIPRU 10.5.20R(6)*) must be assigned first and those with the highest last.

- 10.5.22 R Percentages applicable under BIPRU 10.5.21R
This table belongs to *BIPRU 10.5.21R*

Excess exposure (as a percentage of the <i>firm's capital resources</i>)	Percentage
0% up to 40%	200%
Portion from 40% - 60%	300%
Portion from 60% - 80%	400%
Portion from 80% - 100%	500%
Portion from 100% - 250%	600%
Portion over 250%	900%

- 10.5.23 G The table in *BIPRU 10.5.24G* sets out an example of a *CNCOM* calculation.

- 10.5.24 G Example of a *CNCOM* calculation (all numbers £000s)
This table belongs to *BIPRU 10.5.23G*

Capital resources position		
(1)	<i>An firm's capital resources</i> comprises:	
		£
	<i>Tier one and tier two capital resources</i>	1000
	<i>Eligible tier three capital resources</i>	100
	<i>Amended capital resources</i>	1100
(2)	The components of the <i>large exposure</i> comprise:	
		£
	(a) <i>Non-trading book exposure</i>	200
	(b) Mark to market value of <i>trading book securities</i> :	

		% <i>specific</i> <i>risk</i> weight	
	Short: qualifying bond	1.00	(20)
	Long: qualifying commercial paper	0.25	100
	Long: equity	4.00	150
	Long: qualifying convertible	1.60	30
	Total net long securities position:		260
	Total net large exposures position [(a) + (b)]		460
Calculating the exposure for which incremental capital is needed			
(3)	The short position in the qualifying bond is offset against the highest specific risk weight items – in this case equities:		
			£
	Net long equity position (£150- £20)		130
(4)	The remaining items are ranked according to specific risk weight.		
	% <i>specific</i> <i>risk</i> weight	Security	£
	0.25	Qualifying commercial paper	100
	1.60	Qualifying convertible	30
	4.00	Equity (net)	130
(5)	The 'headroom' between the non-securities exposure and 25% of the amended <i>capital resources</i> is calculated.		
			£
	25% of amended capital base (1100)		275
	Non securities exposure		200
	Headroom		75

(6)	<p>Applying the securities positions in ascending order of specific <i>risk weight</i>, £75 of the £100 qualifying commercial paper may be counted before 25% of the amended capital base is reached.</p> <p>The remaining £25 of qualifying commercial paper, along with £30 qualifying convertible and £130 equity (net) are traded securities <i>exposures</i> in excess of the limit and should therefore be covered by incremental capital. The amount of incremental capital should be included in the calculation for determining how much <i>trading book</i> capital a <i>firm</i> should have.</p>		
(7)	<p>If the excess <i>exposure</i> has been outstanding for 10 days or less, the specific <i>risk weights</i> for the elements over 25% of amended <i>capital resources</i> should be doubled.</p> <p>The 25% limit (£275) is taken up by £200 <i>counterparty exposure</i> and £75 securities <i>exposure</i> within the limit. These two items, when added to the items in bold below, total £460. £460 is the total net <i>large exposures</i> position as set out in (2) above.</p>		
			£
	Qualifying commercial paper	£25 x 0.25% x 200% =	0.125
	Qualifying convertible	£30 x 1.60% x 200% =	0.960
	Equity	£130 x 4% x 200% +	10.400
	Additional capital requirement		11.485
(8)	<p>If the excess <i>exposure</i> has been outstanding for more than 10 days, the 25% limit (£275) is taken up by £200 <i>counterparty exposure</i> and £75 securities <i>exposure</i> within the limit. These two items, when added to the items in bold below, total £460. £460 is the total net <i>large exposures</i> position as set out in (2) above.</p>		
			£
	(a)	<p>Over 25% and up to 40% of amended capital base at 200% (40% of £1100 = £440)</p> <hr/> <p>Amount of <i>trading book concentration risk excess</i> = £185</p> <p>Proportion of Capital Base= 16.8%</p> <p>Appropriate % Multiplier Band = 200%</p>	

		£25 x 0.25% x 200% =	0.125
		£30 x 1.60% x 200% =	0.960
		£130 x 4.00% x 200% =	10.400
(b)	Excess exposure 40% - 60% of amended capital base at 300%		
		£20 x 4.00% x 300% =	2.400
Additional capital requirement [(a)+(b)]			13.885

10.6 Exemptions

General exemptions

- 10.6.1 R The *exposures* listed in *BIPRU* 10.6.3R, whether *trading book exposures* or *non-trading book exposures*, are exempt from the limits described in *BIPRU* 10.5 (Limits on exposures and large exposures), provided that the *exposures* are to *counterparties* which are not *connected counterparties*.
- 10.6.2 R (1) In *BIPRU* 10.6.3R and *BIPRU* 10.6.4R, references to guarantees include credit derivatives recognised under *BIPRU* 5 (Credit risk mitigation) and, if applicable, *BIPRU* 4.10 (The IRB approach: Credit risk mitigation), other than credit linked notes.
- (2) *BIPRU* 10.3.3R(6) (Compliance with minimum *credit risk mitigation* requirements) applies for the purpose of *BIPRU* 10.6.3R and *BIPRU* 10.6.4R.
- 10.6.3 R The *exposures* referred to in *BIPRU* 10.6.1R are as follows:
- (1) asset items constituting claims on central governments or *central banks* which claims would unsecured receive a 0% *risk weight* under the *standardised approach*;
 - (2) asset items constituting claims on *international organisations* or *multilateral development banks* which claims would unsecured receive a 0% *risk weight* under the *standardised approach*;
 - (3) asset items constituting claims carrying the explicit guarantees of central governments, *central banks*, *international organisations* or *multilateral development banks*, where unsecured claims on the entity providing the guarantee would receive a 0% *risk weight* under the *standardised approach*;
 - (4) other *exposures* attributable to, or guaranteed by, central governments, *central banks*, *international organisations* or *multilateral development banks* where unsecured claims on the entity to which the *exposure* is attributable or by which it is guaranteed would receive a 0% *risk weight* under the *standardised approach*;
 - (5) asset items constituting claims on and other *exposures* to central governments or *central banks* not within (1), which are denominated and, where applicable, funded in the national currencies of the borrowers;
 - (6) asset items constituting claims on and other *exposures* to *institutions*, with a maturity of one year or less, but not constituting such *institutions' capital resources*;

- (7) asset items constituting claims on *EEA States'* regional governments and local authorities which claims would receive a 0% *risk weight* under the *standardised approach*;
- (8) other *exposures* to or guaranteed by *EEA States'* regional governments and local authorities claims on which would receive a 0% *risk weight* under the *standardised approach*;
- (9) asset items constituting claims and other *exposures* on *recognised third-country investment firms, recognised clearing houses, designated clearing houses, recognised investment exchanges and designated investment exchanges* in *CRD financial instruments*, with a maturity of one year or less, but not constituting such institutions' *capital resources*;
- (10) *covered bonds* within the meaning of the second paragraph of that definition;
- (11) loans secured by mortgages on residential property and leasing transactions under which the lessor retains full ownership of the residential property leased for as long as the lessee has not exercised his option to purchase, in all cases up to 50% of the value of the residential property concerned;
- (12) the following, where they would receive a 50% *risk weight* under the *standardised approach*, and only up to 50% of the value of the property concerned:
 - (a) *exposures* secured by mortgages on offices or other commercial premises; and
 - (b) *exposures* related to property leasing transactions concerning offices or other commercial premises; and
- (13) bill endorsements on bills with a maturity of 1 year or less already endorsed by another *firm*.

10.6.4 R For the purposes of *BIPRU* 10.6.3R(11), the value of the property must be calculated on the basis of strict valuation standards laid down by law, regulation or administrative provisions. Valuation must be carried out at least once a year. For these purposes, residential property means a residence to be occupied or let by the borrower.

Parental guarantees

10.6.5 R A *firm* may treat as exempt from the limits in *BIPRU* 10.5 (Limits on exposures and large exposures) an *exposure* to a *counterparty* or to a *group of connected clients* if the following conditions are met:

- (1) the *parent undertaking* of the *firm* guarantees that *exposure*;

- (2) the *total exposure* to that *counterparty* or *group of connected clients* does not exceed 100% of the *firm's capital resources*;
- (3) the total amount of the *firm's exposures* to *connected counterparties* does not exceed 200% of the *firm's capital resources* (any *exposure* treated as exempt under this *rule* or under *BIPRU 10.6.7R* must be treated as being to the *parent undertaking* for the purpose of this paragraph (3) and included in the calculation of the limit in this paragraph (3));
- (4) the *firm* complies with whichever of *SYSC 3.1.1R* (Systems and controls) and *SYSC 4.1.1R* (General organisational requirements) applies to it; and
- (5) both the *firm* and the *parent undertaking* of the *firm* satisfy *BIPRU 3.2.27R* (Consolidation condition relating to zero *risk weights* for intra-group *exposures*).

10.6.6 R For the purposes of *BIPRU 10.6.5R*, *BIPRU 10.3.3R* (3) to (6) (Provisions relating to the treatment of guaranteed *exposures*) apply.

Capital maintenance arrangements

10.6.7 R A *firm* may treat as exempt from the limits in *BIPRU 10.5* (Limits on exposures and large exposures) an *exposure* to a *counterparty* which is not a *connected counterparty* if the following conditions are met:

- (1) the *exposure* is subject to a legally binding agreement by the *parent undertaking* of the *firm* that it will promptly on demand by the *firm* increase the *firm's capital resources* by:
 - (a) an amount that is sufficient to reverse completely the effect of any *loss* the *firm* may sustain in connection with that *exposure*; or
 - (b) the amount required to ensure that the *firm* complies with *GENPRU 2.1* (Calculation of capital resources requirements), *BIPRU 10* and any other requirements relating to *capital resources* or concentration risk imposed on the *firm* by or under the *regulatory system*;
- (2) the *firm* notifies the *FSA* in writing of its intention to enter into the agreement and of its terms at least one *Month* before the *firm* enters into it; and
- (3) the conditions in *BIPRU 10.3.3R*(6) (Compliance with minimum *credit risk mitigation* requirements) and *BIPRU 10.6.5R*(2) to (5) are met.

Collateral exemptions: Top slicing

10.6.8 G (1) 'Top slicing' involves systematically collateralising only part of an *exposure* to bring it within the limits in *BIPRU* 10.5 (Limits on exposures and large exposures).

(2) The practice of top-slicing can give rise to concerns and will be subject to review by the *FSA* when carrying out the *SREP*.

Exemptions for firms using the financial collateral simple method under the standardised approach

10.6.9 R A *firm* which uses the *financial collateral simple method* under the *standardised approach* may treat the following *exposures* as exempt from the limits described in *BIPRU* 10.5 (Limits on exposures and large exposures), provided that the *exposures* are to *counterparties* which are not *connected counterparties*:

(1) asset items and other *exposures* secured by collateral in the form of debt *securities* issued by central governments, *central banks*, *international organisations*, *multilateral development banks* or *EEA States'* regional governments or local authorities, which *securities* constitute claims on their issuer which would receive a 0% *risk weight* under the *standardised approach*;

(2) asset items and other *exposures* secured by collateral in the form of cash deposits placed with the *lending firm* or with a *credit institution* which is the *parent undertaking* or a *subsidiary undertaking* of the *lending firm*;

(3) asset items and other *exposures* secured by collateral in the form of certificates of deposit issued by the *lending firm* or by a *credit institution* which is the *parent undertaking* or a *subsidiary undertaking* of the *lending firm* and lodged with either of them; and

(4) *exposures* secured by collateral in the form of *securities* other than those referred to in (1).

10.6.10 R Cash received under a credit linked note issued by the *firm* and loans and deposits of a *counterparty* to or with the *firm* which are subject to an on-balance sheet netting agreement recognised under *BIPRU* 5 (Credit risk mitigation) must be treated as falling under *BIPRU* 10.6.9R(2).

- 10.6.11 R For the purposes of *BIPRU* 10.6.9R(4), the *securities* used as collateral must be valued at market price, have a value that exceeds the *exposures* guaranteed, and be either traded or effectively negotiable and regularly quoted on a *recognised investment exchange* or a *designated investment exchange*. The excess value required must be 100%. It must, however, be 150% in the case of *shares* and 50% in the case of debt *securities* issued by *institutions*, *EEA States'* regional governments or local authorities other than those referred to in *BIPRU* 10.6.9R(1), and in the case of debt *securities* issued by *multilateral development banks* other than those receiving a 0% *risk weight* under the *standardised approach*. Where there is a mismatch between the maturity of the *exposure* and the maturity of the credit protection, the collateral must not be recognised. Where the issuer of *securities* used as collateral is an *institution*, such collateral may not constitute the *institution's capital resources*.
- 10.6.12 R A *firm* may only recognise collateral for the purpose of *BIPRU* 10.6.9R if the collateral complies with the eligibility requirements and other minimum requirements set out in *BIPRU* 5 (Credit risk mitigation) for the purposes of calculating *risk-weighted exposure amounts* under the *standardised approach* using the *financial collateral simple method* or, if applicable, the method in *BIPRU* 5.5 (Other funded credit risk mitigation). In particular a *firm* may not recognise collateral for that purpose if it is not eligible under the *financial collateral simple method* or other applicable method.
- 10.6.13 G As indicated in *BIPRU* 5 (Credit risk mitigation), the *financial collateral simple method* will be available only to *firms* using the *standardised approach* and only in relation to *exposures* for which they adopt the *standardised approach*.
- Exemptions for firms using the financial collateral comprehensive method
- 10.6.14 R A *firm* which uses the *financial collateral comprehensive method* under the *standardised approach* or the *IRB approach* (but not the *advanced IRB approach*) may calculate the value of its *exposures* to a *counterparty* or to a *group of connected clients* (but not *connected counterparties*) as being the fully-adjusted value of the *exposures* to the *counterparty* or *group of connected clients* calculated in accordance with the *financial collateral comprehensive method* under *BIPRU* 5 (Credit risk mitigation) and, if relevant, *BIPRU* 4.10 (The IRB approach: Credit risk mitigation), taking into account the *credit risk mitigation*, volatility adjustments and any maturity mismatch (E*) in accordance with those *rules*.
- 10.6.15 R Where *BIPRU* 10.6.14R applies, *BIPRU* 10.6.9R does not apply.

10.6.16 R A *firm* may only recognise collateral for the purpose of *BIPRU* 10.6.14R if the collateral complies with the eligibility requirements and other minimum requirements set out in *BIPRU* 5 (Credit risk mitigation) and, if relevant, *BIPRU* 4.10 (The IRB approach: Credit risk mitigation) for the purposes of calculating *risk-weighted exposure amounts* under the *standardised approach* or, if applicable, the *IRB approach* using the *financial collateral comprehensive method*. In particular a *firm* may not recognise collateral for that purpose if it is not eligible under the *financial collateral comprehensive method*.

Exemptions for firms using own estimates of LGDs and conversion factors under the IRB approach

10.6.17 R A *firm* that uses own estimates of *LGDs* and *conversion factors* under the *IRB approach* for an *IRB exposure class* may recognise the effects described in (1) in calculating the value of its *exposures* to a *counterparty* or to a *group of connected clients* (but, subject to the *firm's IRB permission*, not *connected counterparties*) for the purposes of *BIPRU* 10.5 (Limits on exposures and large exposures) if:

- (1) the *firm* is able to satisfy the *FSA* that it can estimate the effects of financial collateral on its *exposures* separately from other *LGD*-relevant aspects;
- (2) the *firm* is able to demonstrate the suitability of the estimates produced; and
- (3) the *firm's IRB permission* specifically allows it.

10.6.18 G *BIPRU* 10.6.17R(3) means that a *firm* with an *IRB permission* may not use the approach in *BIPRU* 10.6.17R unless its *IRB permission* expressly says that it may do so.

10.6.19 R If a *firm* that uses own estimates of *LGDs* and *conversion factors* under the *IRB approach* uses its own estimates of the effects of financial collateral on its *exposures* for *large exposures* purposes, it must do so on a consistent basis and on a basis consistent with the approach adopted in the calculation of capital requirements. In particular, this approach must be adopted for all *exposures* the nominal value of which would be a *large exposure*. A *firm* may only use one of *BIPRU* 10.6.14R and *BIPRU* 10.6.17R. A *firm* must be able to satisfy the *FSA* that it is complying with this *rule*.

10.6.20 R A *firm* to which *BIPRU* 10.6.17R applies must still report to the *FSA* the gross value of its *exposures*.

10.6.21 R If a *firm* relies on *BIPRU* 10.6.17 the recognition of credit protection is subject to the relevant requirements of the *IRB approach*.

Stress testing of credit risk concentrations

- 10.6.22 R A *firm* which calculates the value of its *exposures* in accordance with *BIPRU* 10.6.17R must conduct periodic stress tests of its credit risk concentrations including in relation to the realisable value of any collateral taken.
- 10.6.23 R The stress tests required by *BIPRU* 10.6.22R must address:
- (1) risks arising from potential changes in market conditions that could adversely impact the *firm's* adequacy of *capital resources*; and
 - (2) risks arising from the realisation of collateral in stressed situations.
- 10.6.24 R A *firm* must be able to satisfy the *FSA* that the stress tests that the *firm* carries out in accordance with *BIPRU* 10.6.22R are adequate and appropriate for the assessment of such risks.
- 10.6.25 R In the event that a stress test carried out in accordance with *BIPRU* 10.6.22R indicates a lower realisable value of collateral taken than would be permitted to be taken into account under *BIPRU* 10.6.17R to *BIPRU* 10.6.21R as appropriate, the value of collateral permitted to be recognised in calculating the value of *exposures* for the purposes of *BIPRU* 10.5 (Limits on exposures and large exposures) is the lower value.
- 10.6.26 R A *firm* to which *BIPRU* 10.6.22R applies must include in its strategy to address concentration risk:
- (1) policies and procedures to address risks arising from maturity mismatches between *exposures* and any credit protection on those *exposures*;
 - (2) policies and procedures in the event that a stress test indicates a lower realisable value of collateral than taken into account under *BIPRU* 10.6.17R to *BIPRU* 10.6.21R; and
 - (3) policies and procedures relating to concentration risk arising from the application of *credit risk mitigation* techniques, and in particular large indirect credit *exposures* (for example to a single issuer of *securities* taken as collateral).
- 10.6.27 G A *firm* should determine the frequency needed for the stress testing of its credit risk concentrations with emphasis on having sufficient frequency to maintain the currency of its capital calculations. In any case such testing should be carried out at least once a year.

10.7 Treasury concession and intra-group securities financing transactions

Treasury concession

10.7.1 R Subject to *BIPRU* 10.11.1R (Notification procedures for *BIPRU* 10.7 to *BIPRU* 10.10), a *firm* may treat as exempt from the limits in *BIPRU* 10.5 (Limits on exposures and large exposures) an *exposure* to a *concentration risk group counterparty* provided that one or more of the following conditions is satisfied:

- (1) the *exposure* has an original maturity of one year or less and it is incurred in the course of the *firm* carrying on a treasury role for other members of its *group*;
- (2) the following conditions are satisfied:
 - (a) the *exposure* is a cash loan to a *parent undertaking* of the *firm* or to another member of the *firm's immediate group*;
 - (b) (if the loan is to a member of the *firm's immediate group* other than a *parent undertaking* of the *firm*) that member carries on a treasury role for the *firm's group*;
 - (c) the cash lent is surplus to the needs of the *firm*; and
 - (d) the amount of the surplus fluctuates regularly; or
- (3) the *exposure* arises from the *firm* or the *counterparty* operating a central risk management function for members of the *firm's group* for *exposures* arising from *derivatives*.

10.7.2 R The total amount of the *exposures* that a *firm* may treat as exempt under *BIPRU* 10.7.1R must not exceed 50% of the *firm's capital resources* as set out in stage (N) of the *capital resources table* (Total tier one capital plus tier two capital after deductions).

10.7.3 G Any *exposures* that would, but for *BIPRU* 10.7.2R, fall to be treated in accordance with *BIPRU* 10.7.1R remain subject to the limits in *BIPRU* 10.5 (Limits on exposures and large exposures).

Intra-group securities financing transactions

10.7.4 R Subject to *BIPRU* 10.11.1R (Notification procedures for *BIPRU* 10.7 to *BIPRU* 10.10), a *firm* may treat as exempt from the limits in *BIPRU* 10.5 (Limits on exposures and large exposures) an *exposure* in the form of a *securities financing transaction* provided that:

- (1) the *counterparty* is a *concentration risk group counterparty*;

- (2) the *firm* does not apply the *CCR internal model method* with respect to any *securities financing transactions* under this chapter;
- (3) the *exposure* in question is collateralised by collateral whose value equals or exceeds 90% of the amount of the *exposure*; and
- (4) (whether or not the *firm* uses the *financial collateral comprehensive approach*) the collateral is eligible under the *financial collateral comprehensive approach* and the *firm* meets the other minimum requirements under *BIPRU 5* (Credit risk mitigation) in relation to that collateral.

10.7.5 R The level of collateralisation referred to in *BIPRU 10.7.4R(3)* must be measured by reference to the gross amount of the *exposure* without taking into account the effects of netting and without applying volatility adjustments or adjustments for maturity mismatches under the *financial collateral comprehensive approach*.

10.7.6 R A *firm* using the exemption in *BIPRU 10.7.4R* must be able to demonstrate to the *FSA*:

- (1) (if the *firm* has an *CCR internal model method permission*) any roll-out programme as referred to in *BIPRU 13.6.13R* (Sequential implementation of the *CCR internal model method*) or any combination of the *CCR internal model method* with either or both of the *CCR mark to market method* or the *CCR standardised method*;
- (2) the selection of *counterparties* for *securities financing transactions*; and
- (3) the booking of its *securities financing transactions* and the way that it carries on its business with respect to them;

are not designed or chosen wholly or mainly with a view to coming within the limits in *BIPRU 10.5* (Limits on exposures and large exposures) or reducing capital requirements applicable to the *firm* under the *regulatory system* through the use of that exemption.

10.8 UK integrated groups

Application

10.8.1 R This section applies to a *firm* if:

- (1) it is a member of a *UK integrated group*; and
- (2) it gives notice in accordance with *BIPRU* 10.11.1R (Notification procedures for *BIPRU* 10.7 to *BIPRU* 10.10) that it will apply *BIPRU* 10.8.

10.8.2 R If this section applies to a *firm*, it must apply this section to all *exposures* to all its *concentration risk group counterparties* and not just some of them.

Guidance about UK integrated groups

10.8.3 G *Guidance* on the treatment of intra-group *exposures* under this chapter if this section applies can be found in *BIPRU* 10 Annex 1G (Treatment of exposures under the integrated groups regime for concentration risk).

Definition of UK integrated group

10.8.4 R An *undertaking* is a member of a *firm's UK integrated group* if, in relation to the *firm*, that *undertaking* satisfies the following conditions:

- (1) it is a *concentration risk group counterparty*;
- (2) it is an *institution, financial holding company, financial institution, asset management company* or *ancillary services undertaking*;
- (3) it is subject to the same risk evaluation, measurement and control procedures as the *firm*;
- (4) it is established in the *United Kingdom* and either it is incorporated in the *United Kingdom* or (if that *counterparty* is of a type that falls within the scope of that Regulation) the centre of its main interests is situated within the *United Kingdom* within the meaning of the Council Regulation of 29 May 2000 on insolvency proceedings (Regulation 1346/2000/EC); and
- (5) there is no current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities from the *counterparty* to the *firm*.

10.8.5 G *Firms* are referred to the *guidance* in *BIPRU* 3.2.30G and *BIPRU* 3.2.31G (*Guidance* relating to 0% risk weights for intra-group *exposures* under the *standardised approach*) on the prompt transfer of *capital resources* and repayment of liabilities.

Revised concentration risk limits for a UK integrated group

- 10.8.6 R A *firm* must ensure that the *rules* listed in *BIPRU* 10.8.7R are complied with on a consolidated basis in accordance with the following:
- (1) the *rules* apply in relation to the *firm's UK integrated group* rather than in relation to the *firm*;
 - (2) the *rules* apply in relation to *exposures* of members of the *UK integrated group* to members of the *residual block*; and
 - (3) the *UK integrated group* and the *residual block* must each be treated as a single *undertaking*.
- 10.8.7 R The *rules* referred to in *BIPRU* 10.8.6R are:
- (1) *BIPRU* 10.5.6R (25% *non-trading book* limit);
 - (2) *BIPRU* 10.5.11R (*trading book* limits) other than *BIPRU* 10.5.11R(2) (*CNCOM*);
 - (3) *BIPRU* 10.5.12R (500% limit for *trading book* excess *exposures*) with the deletion of the time limit set out in *BIPRU* 10.5.12R; and
 - (4) *BIPRU* 10.7 (Treasury concession and intra-group securities financing transactions).
- 10.8.8 G *Exposures* between members of the *UK integrated group* are exempt if this section applies.
- 10.8.9 G The 800% limit in *BIPRU* 10.5.8R and the 600% limit in *BIPRU* 10.5.13R do not apply to *exposures* to *concentration risk group counterparties* if this section applies.

Adjustments to the Treasury concession exemption

- 10.8.10 R A *firm* may only treat an *exposure* as exempt under *BIPRU* 10.7.1R (Treasury Concession) as applied under this section if the *exposure* is or (if that *rule* applied to the member of the *UK integrated group* in question) would be exempt under *BIPRU* 10.7.1R on a solo basis. The following adjustments apply:
- (1) the *exposure* must be to a *concentration risk group counterparty*; and
 - (2) the limit in *BIPRU* 10.7.2R (Exemption limited to 50% of a *firm's capital resources*) is calculated on a consolidated basis with respect to the *UK integrated group*.

Adjustments to the exemption for securities financing transactions

- 10.8.11 R A *firm* may only treat an *exposure* as exempt under *BIPRU* 10.7.4R (Intra-group securities financing transactions) as applied under this section if the *exposure* is or (if that *rule* applied to the *undertaking* in question) would be exempt under *BIPRU* 10.7.4R on a solo basis. *BIPRU* 10.7.6R (Abuse of the exemption) continues to apply. The exemption is not available if the *firm* uses the *CCR internal models method* for *securities financing transactions* for the purpose of this chapter.

Definition of residual block

- 10.8.12 R For the purposes of this section, a member of the *residual block* means, in relation to a *firm* and its *UK integrated group*, a *concentration risk group counterparty* of the *firm* which is not a member of the *firm's UK integrated group*.

Calculation of capital resources for a UK integrated group

- 10.8.13 R For the purposes of this section, a *firm* must calculate the capital resources of the *UK integrated group* in accordance with *GENPRU* 3 Annex 1R Part 2 (Method 2 of Annex I of the Financial Groups Directive (Deduction and aggregation Method)) and apply the limits set out in this section to those capital resources rather than the *capital resources* of the *firm*. For these purposes the definition of *solo capital resources* is adjusted so that the *rules* on which the calculation for each member of the *UK integrated group* is based are the ones that would apply under the procedure in *BIPRU* 8.6.6R to *BIPRU* 8.6.9R (Consolidated capital resources).
- 10.8.14 G The calculation of capital resources under *GENPRU* 3 Annex 1R Part 2 (Method 2 of Annex I of the Financial Groups Directive (Deduction and aggregation Method)) is based on the *solo capital resources* of members of a *financial conglomerate*. The definition of *solo capital resources* depends on what type of *undertakings* the *financial conglomerate* contains. For instance, if a *financial conglomerate* contains a *bank* the *solo capital resources* calculation for every group member in the *banking sector* and the *investment services sector* is based on the *capital resources* calculation for *banks*. The purpose of *BIPRU* 10.8.13R is to apply the corresponding procedure that applies under *BIPRU* 8.6 (Calculation of capital resources on a consolidated basis for *BIPRU firms*).

Exemption for intra-group exposures on a solo basis

- 10.8.15 R If this section applies to a *firm*, then subject to *BIPRU* 10.10 (Treatment of the trading book concentration risk excess under the integrated groups regime), it may, on a solo basis, treat an *exposure* to a *concentration risk group counterparty* as exempt from the limits in *BIPRU* 10.5 (Limits on exposures and large exposures).

10.8.16 G The purpose of *BIPRU* 10.8.15R is to reflect the fact that the limits in *BIPRU* 10.5 (Limits on exposures and large exposures) so far as they apply to *concentration risk group counterparties* are calculated on a consolidated basis with respect to a *firm's UK integrated group*. It is therefore necessary to switch them off on a purely solo basis.

10.9 Wider Integrated Group

Application

- 10.9.1 R This section applies to a *BIPRU firm* if:
- (1) it has a *wider integrated group waiver*; and
 - (2) it is a member of a *UK integrated group* and of a *wider integrated group*.

- 10.9.2 R If this section applies, *BIPRU 10.8* (UK Integrated Groups) does not apply.

- 10.9.3 R If this section applies to a *firm*, it must apply it to all *exposures* to all its *concentration risk group counterparties* and not just some of them.

Guidance about wider integrated groups

- 10.9.4 G *Guidance* on the treatment of intra-group *exposures* under *BIPRU 10* if this section applies can be found in *BIPRU 10 Annex 1G* (Treatment of exposures under the integrated groups regime for concentration risk).

Definition of wider integrated group

- 10.9.5 R The *wider integrated group* of a *firm* consists of each *concentration risk group counterparty* of the *firm* that is not a member of the *firm's UK integrated group* but satisfies all the conditions for membership of the *firm's UK integrated group* except for *BIPRU 10.8.4R(4)* (Establishment in the United Kingdom).

Definition of diverse block

- 10.9.6 R For the purposes of this section, and in relation to a *firm* and its *wider integrated group*, a *diverse block* means all *undertakings* in the *wider integrated group* designated as a single *diverse block* by the applicable *wider integrated group permission*.

Definition of residual block

- 10.9.7 R For the purposes of this section, and in relation to a *firm* and its *wider integrated group*, a member of the *residual block* means a *concentration risk group counterparty* of the *firm* which is not a member of the *firm's UK integrated group* or *wider integrated group*.

Revised concentration risk limits for a wider integrated group

- 10.9.8 R A *firm* to which this section applies must ensure that the *rules* listed in *BIPRU 10.9.9R* are complied with on a consolidated basis on the following basis:

- (1) the *rules* apply in relation to the *firm's UK integrated group* rather than in relation to the *firm*;
- (2) the *rules* apply in relation to *exposures* of the members of the *UK integrated group* to members of each of the following:
 - (a) each *diverse block*; and
 - (b) the *residual block*; and
- (3) the *UK integrated group*, each *diverse block* and the *residual block* must each be treated as separate single *undertakings*.

10.9.9 R The *rules* referred to in *BIPRU 10.9.8R* are:

- (1) *BIPRU 10.5.6R* (25% *non-trading book* limit);
- (2) *BIPRU 10.5.11R* (*trading book* limits) other than *BIPRU 10.5.11R(2)* (*CNCOM*);
- (3) *BIPRU 10.5.12R* (500% limit for *trading book* excess *exposures*) with the deletion of the time limit set out in *BIPRU 10.5.12R*; and
- (4) *BIPRU 10.7* (Treasury concession and intra-group securities financing transactions).

10.9.10 G *Exposures* between members of the *UK integrated group* are exempt if this section applies.

10.9.11 G The 800% limit in *BIPRU 10.5.8R* and the 600% limit in *BIPRU 10.5.13R* do not apply to *exposures* to *concentration risk group counterparties* if this section applies.

Adjustments to the Treasury concession and securities financing exemptions

10.9.12 R *BIPRU 10.8.10R* (Adjustments to the Treasury concession exemption) and *BIPRU 10.8.11R* (Adjustments to the exemption for securities financing transactions) apply for the purposes of this section in the same way that they apply for the purposes of *BIPRU 10.8* (UK Integrated Groups).

Calculation of capital resources for a UK integrated group

10.9.13 R *BIPRU 10.8.13R* (Calculation of capital resources for a UK integrated group) applies for the purposes of this section in the same way that it applies for the purposes of *BIPRU 10.8* (UK Integrated Groups).

How diverse blocks are chosen

- 10.9.14 G As part of the process of applying for a *wider integrated group waiver*, a *firm* should agree with the *FSA* the number, nature and size of the *diverse blocks*. The basis of the *diverse blocks* will depend on the nature, scale and diversity of the business of the *firm*, its *UK integrated group* and its *wider integrated group*. The different *diverse blocks* are taken to reflect different groupings of risk, reflecting appropriately low levels of correlation. In general, the *FSA* will expect to permit a *firm* to establish no more than four *diverse blocks*. However, there may be circumstances in which the nature and scale of a *firm*, its *UK integrated group* and its *wider integrated group* would warrant the creation of additional *diverse blocks*. Each member of a *firm's wider integrated group* will be allocated to a *diverse block*. Blocks may be diverse according to geography, business or a combination of both.

Exemption for intra-group exposures on a solo basis

- 10.9.15 R If this section applies to a *firm*, then subject to *BIPRU* 10.10 (Treatment of the trading book concentration risk excess under the integrated groups regime), it may, on a solo basis, treat an *exposure* to a *concentration risk group counterparty* as exempt from the limits in *BIPRU* 10.5 (Limits on exposures and large exposures).
- 10.9.16 G The purpose of *BIPRU* 10.9.15R is to reflect the fact that the limits in *BIPRU* 10.5 (Limits on exposures and large exposures) so far as they apply to *concentration risk group counterparties* are calculated on a consolidated basis with respect to a *firm's UK integrated group*. It is therefore necessary to switch them off on a purely solo basis.

- 10.10 Treatment of the trading book concentration risk excess under the integrated groups regime
- 10.10.1 R *BIPRU* 10.10 applies to a *firm* applying the treatments set out in *BIPRU* 10.8 (UK Integrated Groups) or *BIPRU* 10.9 (Wider Integrated Group).
- 10.10.2 R A *firm* must calculate the *CNCOM* that would have applied if *BIPRU* 10.5.11R(2) (Additional capital requirements relating to the *concentration risk capital component*) applied in relation to the *UK integrated group* in question.
- 10.10.3 R A *firm* must then calculate the percentage of the amount calculated under *BIPRU* 10.10.2R which is attributable to *exposures* of the *firm*.
- 10.10.4 R A *firm* must add the result of the calculation in *BIPRU* 10.10.3R to the *CNCOM* applied to the *firm* on a solo basis in accordance with *BIPRU* 10.5.16R to *BIPRU* 10.5.22R (How to calculate the concentration risk capital component).

10.11 Notification procedures for BIPRU 10.7 to BIPRU 10.10

- 10.11.1 R (1) A *firm* may not apply *BIPRU* 10.7 (Treasury concession and intra-group securities financing transactions) or *BIPRU* 10.8 (UK integrated groups) unless it has given one *Month's* prior notice to the *FSA* that it intends do so.
- (2) The written notice referred to in (1) must explain how the *firm* meets the conditions for the application of the treatment in question and how it will ensure that it will still meet the requirements of *BIPRU* 10 on a continuing basis when using the relevant treatment.
- (3) A *firm* may stop applying *BIPRU* 10.7 or *BIPRU* 10.8 if it has given one *Month's* prior notice to the *FSA* that it intends do so.
- (4) If a *firm* stops applying *BIPRU* 10.7 or *BIPRU* 10.8 it may start to apply it again if it notifies the *FSA* under (1) that it intends do so.
- (5) A *firm* need only give the *FSA* the notice required in (1) once rather than with respect to each *exposure*.
- 10.11.2 R A *firm* must notify the *FSA* if it becomes aware that any *exposure* that it has treated as exempt under *BIPRU* 10.7 (Treasury concession and intra-group securities financing transactions) or any *counterparty* that it has been treating as a member of its *UK integrated group* or, if *BIPRU* 10.9 (Wider Integrated Group) applies, its *wider integrated group* has ceased to meet the conditions for application of the relevant treatment.

10.12 Systems and controls and general

Systems and controls

- 10.12.1 R A *firm* must have sound administrative and accounting procedures and adequate internal control mechanisms for the purposes of identifying and recording all *large exposures* and subsequent changes to them, and for that of monitoring those *large exposures* in the light of the *firm's* own *exposure* policies.
- 10.12.2 R A *firm* must take reasonable care to establish and maintain adequate systems and controls to identify, monitor, and control *exposures* to a *parent undertaking* of the *firm*, a *subsidiary undertaking* of the *firm*, or a *subsidiary undertaking* of the *firm's* *parent undertaking*.

Concentration risk policies

- 10.12.3 R A *firm* must be able to demonstrate to the *FSA* that:
- (1) it has written policies and procedures to address and control the concentration risk arising from:
 - (a) *exposures* to *counterparties* and *groups of connected clients*;
 - (b) *counterparties* in the same economic sector or geographic region;
 - (c) the same activity or *commodity*; and
 - (d) the application of *credit risk mitigation* techniques, including in particular risks associated with large indirect credit exposures (for example to a single collateral issuer); and
 - (2) those policies and procedures are implemented.

Reporting

- 10.12.4 R Other than in relation to *repurchase transactions* or *securities or commodities lending or borrowing transactions*, *exposures* must be reported on a gross basis, not including the recognition of *credit risk mitigation*.

Artificial transactions

- 10.12.5 R In line with the general principle in *GEN 2.2.1R* (Purposive interpretation) a *firm* must not, with a view to avoiding the additional capital requirements that it would otherwise incur on *exposures* exceeding the limits laid down in *BIPRU 10.5* (Limits on exposures and large exposures) once those *exposures* have been maintained for more than ten *business days*:

- (1) temporarily transfer the *exposures* in question to another *person* (whether in the same *group* or not); or
- (2) undertake artificial transactions to close out the *exposure* during the ten *business day* period and create a new *exposure*.

10.12.6 R A *firm* must notify the *FSA* if it enters into a transfer, transaction or arrangement of the type mentioned in *BIPRU* 10.12.5R.

Annex 1 G Treatment of exposures under the integrated groups regime for concentration risk

No UK Integrated Group and no Wider Integrated Group		
Situation	Exposure from / to	Summary of the available modifications
1	Intra group <i>exposures</i> but no UKIG or WIG in place	<p>The <i>firm</i> is not subject to an integrated groups treatment of <i>large exposures</i>. The normal <i>large exposure</i> limits (BIPRU 10.5) apply to connected <i>exposures</i> of the <i>firm</i> at the solo level. (This assumes that no other <i>large exposure</i> exemptions are utilised.)</p> <p>Although a <i>firm's exposures</i> to connected counterparties may not qualify for an integrated groups treatment, they may still qualify for a treasury and intra-group securities financing transaction concession (BIPRU 10.7).</p>
UK Integrated Group established but no Wider Integrated Group in place		
Situation	Exposure from / to	Summary of the available modifications
2	UKIG <i>firm</i> to another UKIG firm (they are members of the same UKIG) (No WIG in place)	<p><i>Exposures</i> between members of a <i>firm's</i> UKIG are exempt from the <i>large exposure</i> limits. This means that the 25%, 800%, 500% and 600% limits are disapplied and that the <i>exposures</i> are not included in the notional <i>CNCOM</i>. (BIPRU 10.8.8 G)</p>
3	UKIG <i>firm</i> to an <i>undertaking</i> within its <i>residual block</i> (no WIG in place]	<p>In situation 3, there is a UKIG and a <i>residual block</i>. But no WIG has been established.</p> <p>The UKIG's <i>exposures</i> to <i>undertakings</i> within its <i>residual block</i> are exempt from the normal <i>large exposures</i> limits at the solo level. Instead, the total of the UKIG's <i>exposures</i> to its <i>residual block</i> is subject to the following limits (BIPRU 10.8.6 -7 R):</p> <ul style="list-style-type: none"> ○ BIPRU 10.5.6R (25% <i>non-trading book</i> limit); ○ BIPRU 10.5.11 R(<i>trading book</i> limits) other than BIPRU 10.5.11 R(2) (<i>CNCOM</i>); ○ BIPRU 10.5.12 R (500% limit for <i>trading book excess exposures</i>) with the deletion of the time limit set out in BIPRU 10.5.12R; and ○ BIPRU 10.7 (Treasury concession and intra – group securities financing transactions). <p>The capital resources to which the limits apply are those</p>

		<p>of the UKIG, rather than those of the solo <i>firm</i> (<i>BIPRU</i> 10.8.6 (3) R and <i>BIPRU</i> 10.8.13R).</p> <p><i>BIPRU</i> 10.7 (Treasury concession and intra-group securities financing transactions) may be applied to exposures of the UKIG to its <i>residual block</i> if the requisite conditions are satisfied.</p> <p>In respect of the treasury concession (<i>BIPRU</i> 10.7.1 – 3), the UKIG's <i>exposures</i> to <i>undertakings</i> within its <i>residual block</i> may be exempt from the 25 % limit, subject to a maximum of 50% of the capital resources of the UKIG. These exempt <i>exposures</i> would also be exempt for the purposes of calculating the notional <i>CNCOM</i>. Any <i>exposure</i> that meets the treasury concession conditions but is above the 50% limit would not be exempt from the <i>large exposure</i> limits. They would not be exempt from the notional <i>CNCOM</i>. The UKIG <i>exposures</i> that were eligible for a treasury concession, but which, together with other such <i>exposures</i>, exceeded the 50% limit are not exempt and are treated as other <i>exposures</i> of the UKIG and remain subject to the 25% limit.</p>
4	A <i>firm</i> in the <i>residual block</i> to another <i>undertaking</i> in the <i>residual block</i>	Not within the scope of the preferential <i>large exposure</i> treatments.
5	A <i>firm</i> in the <i>residual block</i> to an <i>undertaking</i> which is a member of the UKIG	
UK Integrated Group in place, Wider Integrated Group waiver granted		
Situation	Exposure from / to	Summary of the available modifications
6	UKIG <i>firm</i> to another UKIG member (within the same UKIG) (WIG in place)	<i>Exposures</i> between members of a <i>firm's</i> UKIG are exempt from the <i>large exposure</i> limits (<i>BIPRU</i> 10.9.8R). (The modifications available are the same as those noted for Situation 2.)
7	UKIG <i>firm</i> to an <i>undertaking</i> in its WIG (WIG in place)	<p>In situation 7 there is a UKIG, WIG (comprising <i>diverse blocks</i> agreed under the WIG waiver) and a <i>residual block</i>.</p> <p>The aggregate <i>exposure</i> of the UKIG to each individual <i>diverse block</i> within the WIG is subject to the following limits (<i>BIPRU</i> 10.9.8 – 9R):</p>

		<ul style="list-style-type: none"> ○ <i>BIPRU 10.5.6 R (25% non- trading book limit);</i> ○ <i>BIPRU 10.5.11 R (trading book limits) other than BIPRU 10.5.11 R(2) (CNCOM);</i> ○ <i>BIPRU 10.5.12 R (500% limit for trading book excess exposures) with the deletion of the time limit set out in BIPRU 10.5.12R; and</i> ○ <i>BIPRU 10.7 (Treasury concession and intra-group securities financing transactions).</i> <p>The capital resources to which these limits apply are those of the UKIG, rather than those of the solo <i>firm</i> (<i>BIRPU 10.9.8(3) and BIPRU 10.9.13 R</i>).</p> <p><i>BIPRU 10.7 (Treasury concession and intra-group securities financing transactions) may also be applied to the exposures of the UKIG to each of its diverse blocks within the WIG if the requisite conditions are satisfied.</i></p> <p>In respect of the treasury concession (<i>BIPRU 10.7.1 – 6</i>), where there is a WIG, the UKIG's <i>exposures</i> to each individual <i>diverse block</i> may be exempt from the 25% limit up to a maximum amount of 50% of the capital resources of the UKIG. Exempt exposures are also exempt for the purpose of calculating the notional <i>CNCOM</i> for each <i>diverse block</i>. The UKIG <i>exposures</i> to the individual <i>diverse blocks</i> that were eligible for the treasury concession, but which together with other such <i>exposures</i> exceed the 50% limit, are not exempt and are treated as otheor exposures of the UKIG and remain subject to the 25% limit.</p>
8	<p>UKIG <i>firm</i> to a <i>undertaking</i> within its <i>residual block</i></p> <p>(WIG in place)</p>	<p>In situation 8, there is a UKIG, WIG (comprising <i>diverse blocks</i> agreed under the WIG waiver) and <i>residual block</i>.</p> <p>The UKIG's <i>exposures</i> to members of its <i>residual block</i> are exempt from the normal <i>large exposures</i> limits at the solo level. Instead, the total of the UKIG's <i>exposures</i> to the <i>residual block</i> is subject to the following limits (<i>BIPRU 10.9.8 – 10.9.11 G</i>)</p> <ul style="list-style-type: none"> ○ <i>BIPRU 10.5.6R (25 % non-trading book limit);</i> ○ <i>BIPRU 10.5.11 R(trading book limits) other than BIPRU 10.5.11 R(2) (CNCOM);</i> ○ <i>BIPRU 10.5.12 R (500% limit for trading book excess exposures) with the deletion of the time</i>

		<p>limit set out in <i>BIPRU</i> 10.5.12R; and</p> <ul style="list-style-type: none"> ○ <i>BIPRU</i> 10.7 (Treasury concession and intra – group securities financing transactions). <p>The capital resources to which these limits apply are those of the UKIG, rather than those of the solo <i>firm</i> (<i>BIPRU</i> 10.9.8R and <i>BIPRU</i> 10.9.13R).</p> <p><i>BIPRU</i> 10.7 (Treasury concession and intra-group securities financing transactions) may also be applied to exposures of the UKIG to its <i>residual block</i> if the requisite conditions are satisfied.</p> <p>In respect of the treasury concession (<i>BIPRU</i> 10.7.1 – 6), where, subject to meeting the treasury concession conditions, the UKIG's <i>exposures</i> to undertakings within its <i>residual block</i> may be exempt from the 25 % limit, subject to a maximum of 50% of the capital resources of the UKIG. These exempt <i>exposures</i> would also be exempt for the purposes of calculating the notional <i>CNCOM</i>. Any <i>exposure</i> that meets the treasury concession conditions but is above the 50% limit would not be exempt from the <i>large exposure</i> limits. They would not be exempt from the notional <i>CNCOM</i>. UKIG <i>exposures</i> that were eligible for a treasury concession, but which, together with other such <i>exposures</i>, exceeded the 50% limit are not exempt and are treated as other <i>exposures</i> of the UKIG and remain subject to the 25% limit.</p>
9	WIG <i>firm</i> to an undertaking in the UKIG	Not within the scope of the preferential <i>large exposure</i> treatments.
10	WIG <i>firm</i> to another undertaking in the same WIG (either within the same <i>diverse block</i> or between <i>diverse blocks</i>)	
11	WIG <i>firm</i> to an undertaking within the <i>residual block</i>	
12	A <i>firm</i> within the <i>residual block</i> to an undertaking within the	

	UKIG	
13	A <i>firm</i> within the <i>residual block</i> to an <i>undertaking</i> within the WIG	
14	A <i>firm</i> within the <i>residual block</i> to an <i>undertaking</i> in the <i>residual block</i>	
This table assumes that <i>BIPRU</i> Transitional TP17 and <i>BIPRU</i> Transitional TP18 have not been applied.		

BIPRU 11 Disclosure (Pillar 3)

11.1 Application and purpose

Application

11.1.1 R *BIPRU 11 applies to a BIPRU firm.*

Purpose

11.1.2 G The purpose of *BIPRU 11* is to implement:

- (1)
 - (a) Article 68(3);
 - (b) Article 72;
 - (c) Articles 145 to 149; and
 - (d) Annex XII;of the *Banking Consolidation Directive*; and
- (2)
 - (a) Article 2, in part;
 - (b) Point 3 of Article 23, in part; and
 - (c) Article 39;of the *Capital Adequacy Directive*.

11.2 Basis of disclosures

Disclosure on an individual basis

11.2.1 R The following must comply with the obligations laid down in *BIPRU* 11.3 on an individual basis:

(1) a *firm* which is neither a *parent undertaking* nor a *subsidiary undertaking*;

(2) a *firm* which is excluded from a *UK consolidation group* or *non-EEA sub-group* pursuant to *BIPRU* 8.5; and

[Note: *BCD* Article 68(3)]

(3) a *firm* which is part of a *group* which has been granted an *investment firm consolidation waiver* under *BIPRU* 8.4;

[Note: *CAD* Article 23]

EEA parent institutions

11.2.2 R A *firm* which is an *EEA parent institution* must comply with the obligations laid down in *BIPRU* 11.3 on the basis of its consolidated financial situation.

[Note: *BCD* Article 72(1)]

11.2.3 R A *firm* which is a significant subsidiary of an *EEA parent institution* must disclose the information specified in *BIPRU* 11.4.5R on an individual or sub-consolidated basis.

Firms controlled by an EEA parent financial holding company

11.2.4 R A *firm controlled* by an *EEA parent financial holding company* must comply with the obligations laid down in *BIPRU* 11.3 on the basis of the consolidated financial situation of that *EEA parent financial holding company*.

[Note: *BCD* Article 72(2)]

11.2.5 R A *firm* which is a significant subsidiary of an *EEA parent financial holding company* must disclose the information specified in *BIPRU* 11.4.5R on an individual or sub-consolidated basis.

Waiver: Comparable disclosures provided on a consolidated basis by a parent undertaking established in a third country

11.2.6 G A *firm* which is included within comparable disclosures provided on a consolidated basis by a *parent undertaking* whose head office is not in an *EEA State* may apply for a *waiver* from the relevant disclosure requirements in *BIPRU* 11.2.2R - *BIPRU* 11.2.5R. The *FSA's* approach to granting

waivers is set out in the Supervision manual (see *SUP* 8).

[**Note:** *BCD* Article 72(3)]

- 11.2.7 G A *firm* applying for a *waiver* from one or more of the disclosure requirements in *BIPRU* 11.2.2R - *BIPRU* 11.2.5R will need to:
- (1) satisfy the *FSA* that it is included within comparable disclosures provided on a consolidated basis by a *parent undertaking* whose head office is not in an *EEA State*; and
 - (2) notify the *FSA* of the location where the comparable disclosures are provided.

11.3 Disclosures: Information to be disclosed; Frequency, media and location of disclosures; Verification

Information to be disclosed

11.3.1 R A *firm* must publicly disclose the information laid down in *BIPRU* 11.5 subject to the provisions laid down in *BIPRU* 11.3.5R to *BIPRU* 11.3.7R.

[**Note:** *BCD* Article 145(1), *CAD* Article 39]

- 11.3.2 R
- (1) A *firm* which has an *IRB permission* must publicly disclose the information laid down in *BIPRU* 11.6.1R to *BIPRU* 11.6.4R.
 - (2) A *firm* which recognises *credit risk mitigation* in accordance with *BIPRU* 5 must publicly disclose the information laid down in *BIPRU* 11.6.5R.
 - (3) A *firm* using the *advanced measurement approach* for the calculation of its *operational risk requirement* must publicly disclose the information laid down in *BIPRU* 11.6.6R.

[**Note:** *BCD* Article 145(2), *CAD* Article 39]

Disclosure policy

11.3.3 R A *firm* must adopt a formal policy to comply with the disclosure requirements laid down in *BIPRU* 11.3.1R and *BIPRU* 11.3.2R and have policies for assessing the appropriateness of its disclosures, including their verification and frequency.

[**Note:** *BCD* Article 145(3)]

Rating decisions

11.3.4 R A *firm* must, if requested, explain its rating decisions to SMEs and other corporate applicants for loans, providing an explanation in writing when asked. The administrative costs of the explanation have to be at an appropriate rate to the size of the loan.

[**Note:** *BCD* Article 145(4)]

Exemption from disclosure: Materiality

11.3.5 R A *firm* may omit one or more of the disclosures listed in *BIPRU* 11.5 if the information provided by such disclosures is not, in the light of the criterion specified in *BIPRU* 11.4.1R, regarded as material.

[**Note:** *BCD* Article 146(1)]

Exemption from disclosure: Proprietary or confidential information

11.3.6 R A *firm* may omit one or more items of information included in the

disclosures listed in *BIPRU* 11.5 and *BIPRU* 11.6 if those items include information which, in the light of the criteria specified in *BIPRU* 11.4.2R and *BIPRU* 11.4.3R, is regarded as proprietary or confidential.

[**Note:** *BCD* Article 146(2)]

- 11.3.7 R In the exceptional cases referred to in *BIPRU* 11.3.6R, a *firm* must:
- (1) state in its disclosures:
 - (a) the fact that the specific items of information are not disclosed; and
 - (b) the reason for non-disclosure; and
 - (2) publish more general information about the subject matter of the disclosure requirement, except where these are to be classified as secret or confidential under the criteria set out in *BIPRU* 11.4.2R and *BIPRU* 11.4.3R.

[**Note:** *BCD* Article 146(3)]

Frequency of publication

- 11.3.8 R A *firm* must:
- (1) publish the disclosures required under *BIPRU* 11.3.1R to *BIPRU* 11.3.5R on an annual basis at a minimum;
 - (2) publish disclosures as soon as practicable.

[**Note:** *BCD* Article 147(1)]

- 11.3.9 R A *firm* must also determine whether more frequent publication than is provided for in *BIPRU* 11.3.8R is necessary in the light of the criteria set out in *BIPRU* 11.4.4R.

[**Note:** *BCD* Article 147(2)]

Media and location of publication

- 11.3.10 R
- (1) A *firm* may determine the appropriate medium, location and means of verification to comply effectively with the disclosure requirements laid down in *BIPRU* 11.3.1R to *BIPRU* 11.3.4R.
 - (2) To the degree feasible, a *firm* must provide all disclosures in one medium or location.
 - (3) Equivalent disclosures made by a *firm* under accounting, *listing* or other requirements may be deemed to constitute compliance with *BIPRU* 11.3.1R to *BIPRU* 11.3.4R.
 - (4) If disclosures are not included in the financial statements, a *firm*

must indicate where they can be found.

[**Note:** *BCD* Article 148]

- 11.4 Technical criteria on disclosure: General criteria
- Criterion for materiality
- 11.4.1 R A *firm* must regard information as material in disclosures if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions.
- [**Note:** *BCD* Annex XII Part 1 point 1]
- Criteria: Proprietary or confidential information
- 11.4.2 R (1) A *firm* must regard information as proprietary information if sharing that information with the public would undermine its competitive position.
- (2) Proprietary information may include information on products or systems which, if shared with competitors, would render a *firm's* investments therein less valuable.
- [**Note:** *BCD* Annex XII Part 1 point 2]
- 11.4.3 R A *firm* must regard information as confidential if there are obligations to customers or other counterparty relationships binding the *firm* to confidentiality.
- [**Note:** *BCD* Annex XII Part 1 point 3]
- Criteria: Frequency of publication
- 11.4.4 R (1) A *firm* must assess the need to publish some or all disclosures more frequently than annually in the light of the relevant characteristics of its business such as:
- (a) scale of operations;
 - (b) range of activities;
 - (c) presence in different countries;
 - (d) involvement in different financial sectors;
 - (e) participation in international financial markets; and
 - (f) participation in payment, settlement and clearing systems.
- (2) In making its assessment under (1) a *firm* must pay particular attention to the possible need for more frequent disclosure of:
- (a) items of information laid down in *BIPRU* 11.5.3R(2) and *BIPRU* 11.5.3R(5), and *BIPRU* 11.5.4R(2) – *BIPRU*

11.5.4R(5);

- (b) information on risk exposure and other items prone to rapid change.

[**Note:** *BCD Annex XII Part 1 point 4*]

Disclosures: Significant subsidiaries

11.4.5 R A *firm* which is a significant subsidiary of:

- (1) an *EEA parent institution*; or
- (2) an *EEA parent holding company*;

must disclose the information specified in *BIPRU 11.5.3R* to *BIPRU 11.5.4R* on an individual or sub-consolidated basis.

[**Note:** *BCD Annex XII Part 1 point 5*]

11.5 Technical criteria on disclosure: General requirements

Disclosure: Risk management objectives and policies

11.5.1 R A *firm* must disclose its risk management objectives and policies for each separate category of risk, including the risks referred to under *BIPRU* 11.5.1R to *BIPRU* 11.5.17R. These disclosures must include:

- (1) the strategies and processes to manage those risks;
- (2) the structure and organisation of the relevant risk management function or other appropriate arrangements;
- (3) the scope and nature of risk reporting and measurement systems; and
- (4) the policies for hedging and mitigating risk, and the strategies and processes for monitoring the continuing effectiveness of hedges and mitigants.

[**Note:** *BCD* Annex XII Part 2 point 1]

Disclosure: Scope of application of directive requirements

11.5.2 R A *firm* must disclose the following information regarding the scope of application of the requirements of the *Banking Consolidation Directive*:

- (1) the name of the *firm* which is the subject of the disclosures;
- (2) an outline of the differences in the basis of consolidation for accounting and prudential purposes, with a brief description of the entities that are:
 - (a) fully consolidated;
 - (b) proportionally consolidated;
 - (c) deducted from *capital resources*;
 - (d) neither consolidated nor deducted;
- (3) any current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities among the *parent undertaking* and its *subsidiary undertakings*;
- (4) the aggregate amount by which the actual *capital resources* are less than the required minimum in all *subsidiary undertakings* not included in the consolidation, and the name or names of such *subsidiary undertakings*; and
- (5) if applicable, the circumstance of making use of the provisions laid down in *BIPRU* 2.1 (Solo consolidation waiver).

[Note: BCD Annex XII Part 2 point 2]

Disclosure: Capital resources

- 11.5.3 R A *firm* must disclose the following information regarding its *capital resources*:
- (1) summary information on the terms and conditions of the main features of all *capital resources* items and components thereof;
 - (2) *tier one capital resources* less any *innovative tier one capital resources*, with separate disclosure of all positive items and deductions;
 - (3) the total amount (for the purposes of (3), the total amount must be stated gross of deductions) of:
 - (a) *tier two capital resources* plus any *innovative tier one capital resources*; and
 - (b) *tier three capital resources*;
 - (4) deductions from *tier one capital resources* and *tier two capital resources*, with separate disclosure of items referred to in *GENPRU 2.2.236R*; and
 - (5) total *capital resources*, net of deductions in *GENPRU 2.2* and limits laid down in *GENPRU 2.2.25R* to *GENPRU 2.2.30R* and *GENPRU 2.2.42R* to *GENPRU 2.2.50R*.

[Note: BCD Annex XII Part 2 point 3]

Disclosure: Compliance with BIPRU 3, BIPRU 4, BIPRU 6, BIPRU 7, BIPRU 10 and the overall Pillar 2 rule

- 11.5.4 R A *firm* must disclose the following information regarding compliance with *BIPRU 3*, *BIPRU 4*, *BIPRU 6*, *BIPRU 7*, *BIPRU 10* and the *overall Pillar 2 rule*:
- (1) a summary of the *firm's* approach to assessing the adequacy of its internal capital to support current and future activities;
 - (2) for a *firm* calculating *risk weighted exposure amounts* in accordance with the *standardised approach* to credit risk, 8% of the *risk weighted exposure amounts* for each of the *standardised credit risk exposure classes*;
 - (3) for a *firm* calculating *risk weighted exposure amounts* in accordance with the *IRB approach*, 8% of the *risk weighted exposure amounts* for each of the *IRB exposure classes*;

[Note: BCD Annex XII Part 2 point 4 (part)]

- (4) the *firm's* minimum capital requirements for the following:
- (a) in respect of its *trading-book* business, its:
 - (i) *interest rate PRR*;
 - (ii) *equity rate PRR*;
 - (iii) *option PRR*;
 - (iv) *collective investment schemes PRR*;
 - (v) *counterparty risk capital component*;
 - (vi) *concentration risk capital component*; and
 - (b) in respect of all of its business activities, its:
 - (i) *commodity PRR*; and
 - (ii) *foreign exchange PRR*;
- (5) its *operational risk capital requirement* calculated in accordance with the *basic indicator approach*, the *standardised approach* and the *advanced measurement approach* and disclosed separately.

[Note: BCD Annex XII Part 2 point 4(part)]

11.5.5 R For *retail exposures*, the requirement under *BIPRU 11.5.4R(3)* applies to each of the following categories:

- (1) *exposures to retail SMEs*;
- (2) *retail exposures* secured by real estate collateral;
- (3) *qualifying revolving retail exposures*; and
- (4) other *retail exposures*.

[Note: BCD Annex XII Part 2 point 4(part)]

11.5.6 R For *equity exposures*, the requirement under *BIPRU 11.5.4R(3)* applies to:

- (1) each of the approaches (the simple risk weight approach, the PD/LGD approach and the internal models approach) provided for in *BIPRU 4.7.5R to BIPRU 4.7.6R*, *BIPRU 4.7.9R to BIPRU 4.7.11R*, *BIPRU 4.7.14R to BIPRU 4.7.16R*, *BIPRU 4.7.24R to BIPRU 4.7.25R*;
- (2) exchange traded *exposures*, private *equity exposures* in sufficiently

diversified portfolios, and other *exposures*;

- (3) *exposures* subject to supervisory transition regarding capital requirements; and
- (4) *exposures* subject to grandfathering provisions regarding capital requirements.

[**Note:** BCD Annex XII Part 2 point 4(part)]

11.5.7 R A *firm* must disclose the following information regarding its *exposure* to *counterparty credit risk*:

- (1) a discussion of the methodology used to assign internal capital and credit limits for counterparty credit *exposures*;
- (2) a discussion of policies for securing collateral and establishing credit reserves;
- (3) a discussion of policies with respect to *wrong-way risk exposures*;
- (4) a discussion of the impact of the amount of collateral the *firm* would have to provide given a downgrade in its credit rating;
- (5) gross positive fair value of contracts, netting benefits, netted current credit *exposure*, collateral held and 'net derivatives credit *exposure*', where 'net derivatives credit *exposure*' is the credit *exposure* on derivatives transactions after considering both the benefits from legally enforceable netting agreements and collateral arrangements;
- (6) measures for exposure value under the *CCR mark to market method*, the *CCR standardised method* or the *CCR internal model method*, whichever is applicable;
- (7) the notional value of credit derivative hedges, and the distribution of current credit *exposure* by types of credit *exposure*;
- (8) credit derivative transactions (notional), segregated between use for the *firm's* own credit portfolio, as well as in its intermediation activities, including the distribution of the credit derivatives products used, broken down further by protection bought and sold within each product group; and
- (9) the estimate of alpha (α) if the *firm's CCR internal model method permission* permits it to estimate α .

[**Note:** BCD Annex XII Part 2 point 5]

Disclosure: Credit risk and dilution risk

11.5.8 R A *firm* must disclose the following information regarding its *exposure* to

credit risk and *dilution risk*:

- (1) the definitions for accounting purposes of past due and impaired;
- (2) a description of the approaches and methods adopted for determining value adjustments and provisions;
- (3) the total amount of *exposures* after accounting offsets and without taking into account the effects of *credit risk mitigation*, and the average amount of the *exposures* over the period broken down by different types of *exposure* classes;
- (4) the geographic distribution of the *exposures*, broken down in significant areas by material *exposure* classes, and further detailed if appropriate;
- (5) the distribution of the *exposures* by industry or counterparty type, broken down by *exposure* classes, and further detailed if appropriate;
- (6) the residual maturity breakdown of all the *exposures*, broken down by *exposure* classes, and further detailed if appropriate;
- (7) by significant industry or counterparty type, the amount of:
 - (a) impaired *exposures* and past due *exposures*, provided separately;
 - (b) value adjustments and provisions; and
 - (c) charges for value adjustments during the period;
- (8) the amount of the impaired *exposures* and past due *exposures*, provided separately, broken down by the significant geographical areas including, if practical, the amounts of value adjustments and provisions related to each geographical area;
- (9) the reconciliation of changes in the value adjustments and provisions for impaired *exposures*, shown separately; and
- (10) value adjustments and recoveries recorded directly to the income statement must be disclosed separately.

[**Note:** *BCD* Annex XII Part 2 point 6 (part)]

11.5.9 R The information to be disclosed under *BIPRU* 11.5.8R(9) must comprise:

- (1) a description of the type of value adjustments and provisions;
- (2) the opening balances;
- (3) the amounts taken against the provisions during the period;
- (4) the amounts set aside or reversed for estimated probable losses on

exposures during the period, any other adjustments including those determined by exchange rate differences, business combinations, acquisitions and disposals of *subsidiary undertakings*, and transfers between provisions; and

- (5) the closing balances.

[Note: BCD Annex XII Part 2 point 6 (part)]

Disclosure: Firms calculating risk weighted exposure amounts in accordance with the standardised approach

11.5.10 R For a *firm* calculating *risk weighted exposure amounts* in accordance with the *standardised approach* to credit risk, the following information must be disclosed for each of the *standardised credit risk exposure classes*;

- (1) the names of the *nominated ECAIs* and export credit agencies and the reasons for any changes;
- (2) the *standardised credit risk exposure classes* for which each *ECAI* or export credit agency is used;
- (3) a description of the process used to transfer the issuer and issue credit assessments onto items not included in the *trading book*;
- (4) the association of the external rating of each *nominated ECAI* or export credit agency with the *credit quality steps* prescribed in *BIPRU 3*, taking into account that this information need not be disclosed if the *firm* complies with the *credit quality assessment scale*; and
- (5) the *exposure* values and the *exposure* values after *credit risk mitigation* associated with each *credit quality step* prescribed in *BIPRU 3*, as well as those deducted from *capital resources*.

[Note: BCD Annex XII Part 2 point 7]

Disclosure: Firms calculating risk weighted exposure amounts using the IRB approach

11.5.11 R A *firm* calculating *risk weighted exposure amounts* for *specialised lending exposures* in accordance with *BIPRU 4.5.8R* to *BIPRU 4.5.10R* or *equity exposures* in accordance with *BIPRU 4.7.9R* to *BIPRU 4.7.10R* (the simple risk weight approach) must disclose the *exposures* assigned:

- (1) to each category of the table in *BIPRU 4.5.9R*; or
- (2) to each *risk weight* mentioned in *BIPRU 4.7.9R* to *BIPRU 4.7.10R*.

[Note: BCD Annex XII Part 2 point 8]

Disclosure: Market risk

11.5.12 R A *firm* must disclose its *capital resources requirements* separately for each risk referred to in (1) and (2).

(1) in respect of its *trading-book* business, its:

- (a) *interest rate PRR*;
- (b) *equity rate PRR*;
- (c) *option PRR*;
- (d) *collective investment schemes PRR*;
- (e) *counterparty risk capital component*; and
- (f) *concentration risk capital component*; and

(2) in respect of all of its business activities, its:

- (a) *commodity PRR*; and
- (b) *foreign exchange PRR*.

[**Note:** BCD Annex XII Part 2 point 9]

Disclosure: Use of VaR model for calculation of market risk capital requirement

11.5.13 R The following information must be disclosed by a *firm* which calculates its *market risk capital requirement* using a *VaR model*:

(1) for each sub-portfolio covered:

- (a) the characteristics of the models used;
- (b) a description of stress testing applied to the sub-portfolio;
- (c) a description of the approaches used for backtesting and validating the accuracy and consistency of the internal models and modelling processes;

(2) the scope of the *firm's VaR model permission*; and

(3) a description of the extent and methodologies for compliance with the requirements set out in *GENPRU 1.3.13R(2)* and (3) and *GENPRU 1.3.14R* to *GENPRU 1.3.34R*.

[**Note:** BCD Annex XII Part 2 point 10]

Disclosure: Operational risk

11.5.14 R The following information must be disclosed by a *firm* on *operational risk*:

- (1) the approaches for the assessment of the *operational risk requirement* that the *firm* qualifies for; and
- (2) if the *firm* uses the *advanced measurement approach*:
 - (a) a description of the methodology used in the *advanced measurement approach*, including a discussion of relevant internal and external factors considered in the *firm's* measurement approach; and
 - (b) in the case of partial use, the scope and coverage of the different methodologies used.

[**Note:** BCD Annex XII Part 2 point 11]

Disclosure: Non-trading book exposures in equities

11.5.15 R A *firm* must disclose the following information regarding the *exposures* in *equities* not included in the *trading book*:

- (1) the differentiation between *exposures* based on their objectives, including for capital gains relationship and strategic reasons, and an overview of the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation and any significant changes in these practices;
- (2) the balance sheet value, the fair value and, for those exchange-traded, a comparison to the market price where it is materially different from the fair value;
- (3) the types, nature and amounts of exchange-traded *exposures*, private *equity exposures* in sufficiently diversified portfolios, and other *exposures*;
- (4) the cumulative realised gains or losses arising from sales and liquidations in the period; and
- (5) the total unrealised gains or losses, the total latent revaluation gains or losses, and any of these amounts included in *tier one, tier two or tier three capital resources*.

[**Note:** BCD Annex XII Part 2 point 12]

Disclosures: Exposures to interest rate risk in the non-trading book

11.5.16 R A *firm* must disclose the following information on its *exposure* to interest rate risk on positions not included in the *trading-book*:

- (1) the nature of the interest rate risk and the key assumptions (including assumptions regarding loan prepayments and behaviour of non-maturity deposits), and frequency of measurement of the interest rate risk; and
- (2) the variation in earnings, economic value or other relevant measure used by the management for upward and downward rate shocks according to management's method for measuring the interest rate risk, broken down by currency.

[Note: BCD Annex XII Part 2 point 13]

Disclosures: Securitisation

11.5.17 R A *firm* calculating *risk weighted exposure amounts* in accordance with BIPRU 9 must disclose the following information:

- (1) a description of the *firm's* objectives in relation to *securitisation* activity;
- (2) the roles played by the *firm* in the *securitisation* process;
- (3) an indication of the extent of the *firm's* involvement in each of them;
- (4) the approaches to calculating *risk weighted exposure amounts* that the *firm* follows for its *securitisation* activities;
- (5) a summary of the *firm's* accounting policies for *securitisation* activities, including:
 - (a) whether the transactions are treated as sales or financings;
 - (b) the recognition of gains on sales;
 - (c) the key assumptions for valuing retained interests; and
 - (d) the treatment of *synthetic securitisations* if this is not covered by other accounting policies;
- (6) the names of the *ECAIs* used for *securitisations* and the types of *exposure* for which each agency is used;
- (7) the total outstanding amount of *exposures securitised* by the *firm* and subject to the *securitisation* framework (broken down into *traditional* and *synthetic*), by *exposure* type;
- (8) for *exposures securitised* by the *firm* and subject to the *securitisation* framework, a breakdown by *exposure* type of the amount of impaired and past due *exposures securitised*, and the losses recognised by the *firm* during the period;

- (9) the aggregate amount of *securitisation positions* retained or purchased, broken down by *exposure* type;
- (10) the aggregate amount of *securitisation positions* retained or purchased:
 - (a) broken down into a meaningful number of *risk weight* bands; and
 - (b) with separate disclosure of *positions* that have been *risk weighted* at 1250% or deducted;
- (11) the aggregate outstanding amount of *securitised revolving exposures* segregated by the *originator's* interest and the investors' interest; and
- (12) a summary of the *securitisation* activity in the period, including the amount of *exposures securitised* (by *exposure* type), and recognised gain or loss on sale by *exposure* type.

[Note: BCD Annex XII Part 2 point 14]

11.6 Qualifying requirements for the use of particular instruments or methodologies

Disclosures: Firms using the IRB approach

- 11.6.1 R A *firm* calculating *risk weighted exposure amounts* in accordance with the *IRB approach* must disclose the following information:
- (1) the scope of the *firm's IRB permission*;
 - (2) an explanation and review of:
 - (a) the structure of internal *rating systems* and relation between internal and external ratings;
 - (b) the use of internal estimates other than for calculating *risk weighted exposure amounts* in accordance with the *IRB approach*;
 - (c) the process for managing and recognising *credit risk mitigation*; and
 - (d) the control mechanisms for *rating systems* including a description of independence, accountability, and *rating systems* review;
 - (3) a description of the internal ratings process, provided separately for the following *IRB exposure classes*:
 - (a) central governments and *central banks*;
 - (b) *institutions*;
 - (c) corporate, including SMEs, *specialised lending* and purchased corporate receivables;
 - (d) retail, for *exposures to retail SMEs exposures, retail exposures* secured by real estate collateral, *qualifying revolving retail exposures*, and other *retail exposures*; and
 - (e) *equities*;
 - (4) the *exposure* values for each of the *IRB exposure classes*;
 - (5) for each of the *IRB exposure classes* central governments and *central banks, institutions, corporate* and *equity*, and across a sufficient number of *obligor grades* (including *default*) to allow for a meaningful differentiation of credit risk, a *firm* must disclose:
 - (a) the total *exposures* (for the *IRB exposure classes* central governments and *central banks, institutions* and *corporate*

exposures, the sum of outstanding loans and *exposure* values for undrawn commitments; for *equity exposures*, the outstanding amount);

- (b) for a *firm* using own *LGD* estimates for the calculation of *risk weighted exposure amounts*, the *exposure*-weighted average *LGD* in percentage;
 - (c) the *exposure*-weighted average *risk weight*; and
 - (d) for a *firm* using own estimates of *conversion factors* for the calculation of *risk weighted exposure amounts*, the amount of undrawn commitments and *exposure*-weighted average *exposure* values for each *IRB exposure class*;
- (6) for the *retail exposure* class and for each of the categories of:
- (a) *exposures* to *retail SMEs*;
 - (b) *retail exposures* secured by real estate collateral;
 - (c) *qualifying revolving retail exposures*; and
 - (d) other *retail exposures*;

either the disclosures outlined under (5) (if applicable, on a pooled basis), or an analysis of *exposures* (outstanding loans and *exposure* values for undrawn commitments) against a sufficient number of *EL* grades to allow for a meaningful differentiation of credit risk (if applicable, on a pooled basis);

- (7) the actual value adjustments in the preceding period for each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)) and how they differ from past experience;
- (8) a description of the factors that impacted on the loss experience in the preceding period (for example, whether the *firm* experienced higher than average *default* rates, or higher than average *LGDs* and *conversion factors*); and
- (9) the *firm's* estimates against actual outcomes over a longer period including, at a minimum, information on estimates of losses against actual losses in each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)) over a period sufficient to allow for a meaningful assessment of the performance of the internal rating processes for each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)).

[**Note:** *BCD* Annex XII Part 3 point 1 (part)]

11.6.2 R For the purposes of *BIPRU* 11.6.1R(3), the description must include the

types of *exposure* included in the *IRB exposure class*, the definitions, methods and data for estimation and validation of *PD* and, if applicable, *LGD* and *conversion factors*, including assumptions employed in the derivation of these variables, and the descriptions of material deviations from the definition of *default*, including the broad segments affected by such deviations.

[Note: BCD Annex XII Part 3 point 1 (part)]

- 11.6.3 R For the purposes of *BIPRU* 11.6.1R(4), where a *firm* uses its own estimates of *LGDs* or *conversion factors* for the calculation of *risk weighted exposure amounts* for *exposures* falling into the *sovereign, institutional and corporate IRB exposure class*, the *firm* must disclose those *exposures* separately from *exposures* for which it does not use such estimates.

[Note: BCD Annex XII Part 3 point 1 (part)]

- 11.6.4 R For the purposes of *BIPRU* 11.6.1R(9), where appropriate, a *firm* must further decompose the information to provide analysis of *PD* and, for a *firm* using own estimates of *LGDs* and/or *conversion factors*, *LGD* and *conversion factor* outcomes against estimates provided in the quantitative risk assessment disclosures under *BIPRU* 11.6.1R to *BIPRU* 11.6.4R.

[Note: BCD Annex XII Part 3 point 1 (part)]

Disclosures: Credit risk mitigation

- 11.6.5 R A *firm* applying *credit risk mitigation* techniques must disclose the following information:
- (1) the policies and processes for, and an indication of the extent to which the *firm* makes use of, on- and off-balance sheet netting;
 - (2) the policies and processes for collateral valuation and management;
 - (3) a description of the main types of collateral taken by the *firm*;
 - (4) the main types of guarantor and credit derivative counterparty and their creditworthiness;
 - (5) information about *market risk* or credit risk concentrations within the credit mitigation taken;
 - (6) for *firms* calculating *risk weighted exposure amounts* using the *standardised approach* to credit risk or the *IRB approach*, but not providing own estimates of *LGDs* or *conversion factors* in respect of the *exposure class*, separately for each *exposure class*, the total *exposure* value (after, where applicable, on- or off-balance sheet netting) that is covered – after the application of volatility adjustments – by eligible financial collateral, and other eligible

collateral; and

- (7) for *firms* calculating *risk weighted exposure amounts* using the *standardised approach* or the *IRB approach*, separately for each *exposure* class, the total *exposure* (after, where applicable, on- or off-balance sheet netting) that is covered by guarantees or credit derivatives; for *equity exposures*, this requirement applies to each of the approaches (the simple risk weight approach, the PD/LGD approach and the internal models approach) provided for in *BIPRU 4.7.5R* to *BIPRU 4.7.6R*, *BIPRU 4.7.9R* to *BIPRU 4.7.11R*, *BIPRU 4.7.14R* to *BIPRU 4.7.16R*, *BIPRU 4.7.24R* to *BIPRU 4.7.25R*.

[**Note:** *BCD Annex XII Part 3 point 2*]

Disclosure: Insurance for the purpose of mitigating operational risk

- 11.6.6 R A *firm* using the *advanced measurement approach* for the calculation of its *operational risk requirement* must disclose a description of the use of insurance for the purpose of mitigating the risk.

[**Note:** *BCD Annex XII Part 3 point 3*]

- 13 The calculation of counterparty risk exposure values for financial derivatives, securities financing transactions and long settlement transactions
- 13.1 Application and Purpose
- Application
- 13.1.1 R *BIPRU 13 applies to a BIPRU firm.*
- 13.1.2 R (1) *BIPRU 13 applies to items in the non-trading book.*
(2) *BIPRU 13 applies to trading book items for the purposes of BIPRU 14.*
- 13.1.3 G The requirement to calculate the *counterparty credit risk* capital charge for *trading book* items is set out in *BIPRU 14*.
- Purpose
- 13.1.4 G *BIPRU 13 implements:*
- (1) Article 78(2) and (4);
- (2) point 3 of Part 1, and Parts 2, 3, 5, 6 and 7 of Annex III; and
- (3) Annex IV;
- of the *Banking Consolidation Directive*.
- 13.1.5 G *BIPRU 13.3 sets out the calculations of exposure values for financial derivative instruments, long settlement transactions and certain other transactions under the standardised approach and, subject to BIPRU 4, under the IRB approach. BIPRU 13.4, 13.5 and 13.6 set out the provisions relating to the CCR mark to market method, the CCR standardised method and the CCR internal model method in turn.*
- 13.1.6 G *BIPRU 13.8 sets out a summary of the treatment of securities financing transactions.*

13.2 Unusual Transactions

- 13.2.1 R If the calculation of the amount of an *exposure* or of a combination of *exposures* under *BIPRU 13* would materially understate the amount of the *counterparty credit risk* the *firm* must increase the amount of the *credit risk capital requirement* by an amount sufficient to compensate for that understatement.
- 13.2.2 R If a *firm* in relation to an *exposure* covered by *BIPRU 13*:
- (1) has an *exposure* of a non-standard type; or
 - (2) an *exposure* that is part of a non-standard arrangement; or
 - (3) has an *exposure* that, taken together with other *exposures* (whether or not they are subject to *BIPRU 13*), gives rise to a non-standard *counterparty credit risk*; or
 - (4) is subject to the *rule* in *BIPRU 13.2.1R*;
- it must notify the *FSA* as soon as practicable of that fact, the counterparty involved, the nature of the *exposure* or arrangement and the treatment of those *exposures* it has adopted for the purpose of the calculation of the *credit risk capital requirement*.
- 13.2.3 R *BIPRU 13.2.2R* does not apply to *exposures* which are within the scope of a *firm's CCR internal model method permission*.
- 13.2.4 R A *firm* must judge the question of what is non-standard for the purposes of *BIPRU 13.2.2R* by reference to the standards:
- (1) prevailing at the time the *rule* is being applied; and
 - (2) of *firms* generally who carry on business which might give rise to *exposures* covered by *BIPRU 13* rather than merely by reference to the *firm's* own business.
- 13.2.5 G The methodologies which have been developed assume instruments with standard characteristics. There are many examples, however, of instruments which, although based on a standard contract, contain structural features which make the *rules*, as stated, inappropriate. In such circumstances a *firm* should consult the *FSA*.

- 13.3 Calculation of exposure values for financial derivatives and long settlement transactions: General provisions
- Financial derivative instruments
- 13.3.1 R *A firm must determine the exposure value of a financial derivative instrument in accordance with BIPRU 13, with the effects of contracts of novation and other netting agreements taken into account for the purposes of those methods in accordance with BIPRU 13.*
- [Note: BCD Article 78(2) first sentence]
- 13.3.2 R Subject to BIPRU 13.3, a firm must determine the exposure value for financial derivative instruments with the CCR mark to market method, the CCR standardised method or the CCR internal model method.
- [Note: BCD Annex III, Part 2 point 1]
- Definition of financial derivative instrument
- 13.3.3 R Each of the following is a financial derivative instrument:
- (1) an interest-rate contract, being:
 - (a) a single-currency interest rate swap;
 - (b) a basis-swap;
 - (c) a forward rate agreement;
 - (d) an interest-rate future;
 - (e) a purchased interest-rate option; and
 - (f) other contracts of similar nature;
 - (2) a foreign currency contract or contract concerning gold, being:
 - (a) a cross-currency interest-rate swap;
 - (b) a forward foreign currency contract;
 - (c) a currency future;
 - (d) a currency option purchased;
 - (e) other contracts of a similar nature; and
 - (f) a contract concerning gold of a nature similar to (2)(a) to (e).
 - (3) a contract of a nature similar to those in 1(a) to (e) and 2(a) to (d) concerning other reference items or indices, including as a minimum

all instruments specified in points 4 to 7, 9 and 10 of Section C of Annex I to the *MIFID* not otherwise included in (1) or (2).

[**Note:** *BCD* Annex IV]

Long settlement transactions

- 13.3.4 R *Long settlement transaction* means a transaction where a counterparty undertakes to deliver a *security*, a *commodity*, or a *foreign currency* amount against cash, other *financial instruments*, or *commodities*, or vice versa, at a settlement or delivery date that is contractually specified as more than the lower of the market standard for this particular transaction and five business days after the date on which the *firm* enters into the transaction.

[**Note:** *BCD* Annex III Part 1 point 3]

- 13.3.5 R A *firm* must calculate the *exposure* value of a *long settlement transaction* in accordance with either:
- (1) *BIPRU* 13; or
 - (2) the *master netting agreement internal models approach*, if it has a *master netting agreement internal models approach waiver* which permits it to apply that approach.

[**Note:** *BCD* Article 78(2) second sentence, in respect of *long settlement transactions*]

- 13.3.6 R A *firm* may determine *exposures* arising from *long settlement transactions* using any of the *CCR mark to market method*, the *CCR standardised method* and the *CCR internal model method*, regardless of the methods chosen for treating *financial derivatives instruments* and *repurchase transactions*, *securities* or *commodities lending or borrowing transactions*, and *margin lending transactions*. In calculating capital requirements for *long settlement transactions*, a *firm* that uses the *IRB approach* may apply the *risk weights* under the *standardised approach* on a permanent basis and irrespective of the materiality of such positions.

[**Note:** *BCD* Annex III Part 2 point 7]

- 13.3.7 G A *firm* is not required to calculate the *exposure* value of a transaction as a *long settlement transaction* for the purposes of *BIPRU* 13 if the transaction is a *financial derivative instrument* or a *securities financing transaction* and the *firm* chooses to calculate the capital requirement for the transaction according to the methods applicable to those *exposures*.

General netting

- 13.3.8 R Under the *CCR mark to market method*, the *CCR standardised method* and the *CCR internal model method*, a *firm* must determine the *exposure* value for a given counterparty as equal to the sum of the *exposure* values calculated for each *netting set* with that counterparty.

[**Note:** BCD Annex III Part 2 point 5]

- 13.3.9 R A *firm* may only recognise netting for the purposes of BIPRU 13.4, BIPRU 13.5 and BIPRU 13.6 if the requirements in BIPRU 13.7 are met.

Combined use

- 13.3.10 R The combined use of the *CCR mark to market method*, the *CCR standardised method* and the *CCR internal model method* is not permitted. The combined use of the *CCR mark to market method* and the *CCR standardised method* is permitted where one of the methods is used for the cases set out in BIPRU 13.5.9 to BIPRU 13.5.10R.

[**Note:** BCD Annex III Part 2 point 1(part)]

- 13.3.11 G The combined use of different approaches may be used across a group as described in BIPRU 8.7.8R and BIPRU 8.7.9R.

Exposure to a central counterparty

- 13.3.12 R Notwithstanding BIPRU 13.3.1R and BIPRU 13.3.5R, a *firm* may determine the *exposure* value of a credit risk *exposure* outstanding with a *central counterparty* in accordance with BIPRU 13.3.13R, provided that the *central counterparty's counterparty credit risk exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[**Note:** BCD Article 78(4) in respect of *financial derivatives* and *long settlement transactions*]

- 13.3.13 R A *firm* may attribute an *exposure* value of zero for CCR to derivative contracts and *long settlement transactions*, or to other *exposures* arising in respect of those contracts or transactions (but excluding an *exposure* arising from collateral held to mitigate losses in the event of the default of other participants in the *central counterparty's* arrangements) where they are outstanding with a *central counterparty* and have not been rejected by the *central counterparty*.

[**Note:** BCD Annex III Part 2 point 6 in respect of *financial derivatives* and *long settlement transactions*]

Exceptions

- 13.3.14 R When a *firm* purchases credit derivative protection against a *non-trading book exposure*, or against a *CCR exposure*, it must compute its capital requirement for the hedged asset in accordance with:

- (1) BIPRU 5.7.16R to BIPRU 5.7.25R and BIPRU 4.10.49(4) to (6) (Unfunded credit protection: Valuation and calculation of risk-weighted exposure amounts and expected loss amounts);
- (2) BIPRU 4.4.79R (Double default); or

- (3) *BIPRU 4.10.40R to BIPRU 4.10.48R* (Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives).

[**Note:** *BCD Annex III Part 2 point 3 (part)*]

- 13.3.15 R In the cases in *BIPRU 13.3.14R*, a *firm* must set the *exposure* value for *CCR* for these credit derivatives to zero.

[**Note:** *BCD Annex III Part 2 point 3 (part)*]

- 13.3.16 R A *firm* must set the *exposure* value for *CCR* from sold credit default swaps in the *non-trading book*, where they are treated as credit protection provided by the *firm* and subject to a capital requirement for credit risk for the full notional amount, to zero.

[**Note:** *BCD Annex III Part 2 point 4*]

13.4 CCR mark to market method

General

13.4.1 R The *rules* in *BIPRU* 13.4 set out the *CCR mark to market method*.

13.4.2 R A *firm* must obtain the current replacement cost of all contracts with positive values by attaching *current market values* to contracts (marking to market).

[**Note:** *BCD* Annex III Part 3, Step (a)]

13.4.3 R A *firm* must obtain a figure for potential future credit *exposure* by multiplying the notional principal amounts or underlying values by the percentages in the table in *BIPRU* 13.4.5R.

[**Note:** *BCD* Annex III Part 3, Step (b) (part)]

13.4.4 R *BIPRU* 13.4.3R does not apply in the case of single-currency "floating/floating" interest rate swaps.

[**Note:** *BCD* Annex III Part 3, Step (b) (part)]

Table: multiples to be applied to notional principal amounts or underlying values

13.4.5 R This table belongs to *BIPRU* 13.4.5R

Residual maturity	Interest-rate contracts	Contracts concerning <i>foreign currency</i> rates and gold	Contracts concerning equities	Contracts concerning precious metals except gold	Contracts concerning <i>commodities</i> other than precious metals
One year or less	0%	1%	6%	7%	10%
Over one year, not exceeding five years	0,5%	5%	8%	7%	12%
Over five years	1.5%	7.5%	10%	8%	15%

[**Note:** *BCD* Annex III Part 3, Table 1]

13.4.6 R A *firm* must treat a contract which does not fall within one of the five categories indicated in the table in *BIPRU* 13.4.5R as a contract concerning

commodities other than precious metals.

[**Note:** *BCD* Annex III Part 3, Table 1 footnote 25]

- 13.4.7 R For contracts with multiple exchanges of principal, a *firm* must multiply the percentages in the table in *BIPRU* 13.4.5R by the number of remaining payments still to be made according to the contract.

[**Note:** *BCD* Annex III Part 3, Table 1 footnote 26]

- 13.4.8 R For contracts that are structured to settle outstanding *exposure* following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, a *firm* must treat the residual maturity as equal to the time until the next reset date.

[**Note:** *BCD* Annex III Part 3, Table 1 footnote 27 (part)]

- 13.4.9 R In the case of interest-rate contracts that meet the criteria in *BIPRU* 13.4.8R and have a remaining maturity of over one year, a *firm* must apply a percentage no lower than 0.5%.

[**Note:** *BCD* Annex III Part 3, Table 1 footnote 27 (part)]

- 13.4.10 R For the purpose of calculating the potential future credit *exposure* in accordance with *BIPRU* 13.4.3R a *firm* may apply the percentages in the table in *BIPRU* 13.4.11R instead of those prescribed in the table in *BIPRU* 13.4.5R provided that it makes use of the *commodity extended maturity ladder approach* for contracts relating to commodities other than gold.

Table: alternative multiples to be applied to notional principal amounts or underlying values

- 13.4.11 R This table belongs to *BIPRU* 13.4.10R

Residual maturity	Precious metals (except gold)	Base metals	Agricultural products (softs)	Other, including energy products
One year or less	2%	2,5%	3%	4%
Over one year, not exceeding five years	5%	4%	5%	6%
Over five years	7.5%	8%	9%	10%

[Note: BCD Annex III Part 3, Table 2]

- 13.4.12 R A *firm* must calculate the *exposure* value as the sum of:
- (1) the current replacement cost calculated under BIPRU 13.4.2R; and
 - (2) the potential future credit *exposure* calculated under BIPRU 13.4.3R.

[Note: BCD Annex III Part 3, Step (c)]

- 13.4.13 G Contracts with a negative replacement cost should still be subject to an add-on if there is a possibility of the replacement costs becoming positive before maturity. Written options should therefore be exempt from add-ons.
- 13.4.14 G For the purposes of calculating the replacement cost, where an *exposure* relates to collateral posted to cover a negative mark to market position on a derivative contract, the negative mark to market *exposure* may be offset against the collateral *exposure* if the requirements in BIPRU 5 are met.

Alternative approach

- 13.4.15 R A *firm* must ensure that the notional amount to be taken into account is an appropriate yardstick for the risk inherent in the contract. Where, for instance, the contract provides for a multiplication of cash flows, a *firm* must adjust the notional amount in order to take into account the effects of the multiplication on the risk structure of that contract.

[Note: BCD Annex III Part 2 point 8]

Netting: Contracts for novation

- 13.4.16 R The single net amounts fixed by contracts for novation, rather than the gross amounts involved, may be weighted. For the purposes of the *CCR mark to market method*, a *firm* may obtain:
- (1) in BIPRU 13.4.2R, the current replacement cost; and
 - (2) in BIPRU 13.4.3R, the notional principal amounts or underlying values;

by taking account of the contract for novation.

[Note: BCD Annex III Part 7 point c(i)]

Netting: Other netting agreements

- 13.4.17 R In application of the *CCR mark to market method*:
- (1) in BIPRU 13.4.2R a *firm* may obtain the current replacement cost for the contracts included in a netting agreement by taking account of the actual hypothetical net replacement cost which results from the agreement; in the case where netting leads to a net obligation for the *firm* calculating the net replacement cost, the current replacement

cost is calculated as "0"; and

- (2) in *BIPRU* 13.4.3R a *firm* may reduce the figure for potential future credit *exposure* for all contracts included in a netting agreement according to the following formula:

$$PCE_{\text{red}} = 0.4 * PCE_{\text{gross}} + 0.6 * NGR * PCE_{\text{gross}},$$

where:

- (a) PCE_{red} = the reduced figure for potential future credit *exposure* for all contracts with a given counterparty included in a legally valid bilateral netting agreement;
- (b) PCE_{gross} = the sum of the figures for potential future credit *exposure* for all contracts with a given counterparty which are included in a legally valid bilateral netting agreement and are calculated by multiplying their notional principal amounts by the percentages set out in the table in *BIPRU* 13.4.5R; and
- (c) NGR = "net-to-gross ratio": the quotient of the net replacement cost for all contracts included in a legally valid bilateral netting agreement with a given counterparty (numerator) and the gross replacement cost for all contracts included in a legally valid bilateral netting agreement with that counterparty (denominator).

[**Note:** *BCD* Annex III Part 7 point c(ii) (part)]

- 13.4.18 R For the calculation of the potential future credit exposure according to the formula in *BIPRU* 13.4.17R perfectly matching contracts included in the netting agreement may be taken into account as a single contract with a notional principal equivalent to the net receipts.

[**Note:** *BCD* Annex III Part 7 point c(ii) (part)]

- 13.4.19 R For the purposes of *BIPRU* 13.4.18R a perfectly matching contract is a forward *foreign currency* contract or similar contract in which a notional principal is equivalent to cash flows if the cash flows fall due on the same value date and fully or partly in the same currency.

[**Note:** *BCD* Annex III Part 7 point c(ii) (part)]

13.5 CCR standardised method

Scope

13.5.1 R A *firm* may use the *CCR standardised method* only for *financial derivative instruments* and *long settlement transactions*.

[**Note:** *BCD Annex III Part 5 point 1 (part)*]

Derivation of risk position: payment legs

- 13.5.2 R
- (1) When a *financial derivative instrument* transaction with a linear risk profile stipulates the exchange of a *financial instrument* for a payment, the payment Part is referred to as the *payment leg*.
 - (2) Transactions that stipulate the exchange of payment against payment consist of two *payment legs*.
 - (3) The *payment legs* consist of the contractually agreed gross payments, including the notional amount of the transaction.
 - (4) A *firm* may disregard the *interest rate risk* from *payment legs* with a remaining maturity of less than one year for the purposes of the calculations in *BIPRU 13.5*.
 - (5) A *firm* may treat transactions that consist of two *payment legs* that are denominated in the same currency, such as interest rate swaps, as a single aggregate transaction. The treatment for *payment legs* applies to the aggregate transaction.

[**Note:** *BCD Annex III Part 5 point 2*]

Derivation of risk position: mapping

- 13.5.3 R
- (1) Transactions with a linear risk profile with equities (including equity indices), gold, other precious metals or other *commodities* as the underlying financial instruments must be mapped to a *risk position* in the respective equity (or equity index) or *commodity* (including gold and other precious metals) and an interest rate *risk position* for the *payment leg*.
 - (2) If the *payment leg* is denominated in a *foreign currency*, it must be additionally mapped to a *risk position* in the respective currency.

[**Note:** *BCD Annex III Part 5 point 3*]

- 13.5.4 R
- (1) Transactions with a linear risk profile with a debt instrument as the underlying instrument must be mapped to an interest rate *risk position* for the debt instrument and another interest rate *risk position* for the *payment leg*.

- (2) Transactions with a linear risk profile that stipulate the exchange of payment against payment, including *foreign exchange* forwards, must be mapped to an interest rate *risk position* for each of the *payment legs*.
- (3) If the underlying debt instrument is denominated in a *foreign currency*, the debt instrument must be mapped to a *risk position* in that *foreign currency*.
- (4) If a *payment leg* is denominated in *foreign currency*, the *payment leg* must be again mapped to a *risk position* in that *foreign currency*.
- (5) The *exposure* value to be assigned to a *foreign exchange* basis swap transaction is zero.

[Note: BCD Annex III Part 5 point 4]

Derivation of risk position: calculating the size of the risk position

- 13.5.5 R A *firm* must calculate the *risk position* of the transaction or instrument in column 1 of the table in BIPRU 13.5.6R in accordance with column 2 of that table.
- 13.5.6 R This table belongs to BIPRU 13.5.5R.

Transaction or instrument	Calculation of size of <i>risk position</i>
Transaction with linear risk profile except for debt instruments.	The effective notional value (market price multiplied by quantity) of the underlying <i>financial instruments</i> (including <i>commodities</i>) converted to the <i>firm's</i> domestic currency.
Debt instruments and <i>payment legs</i> .	The effective notional value of the outstanding gross payments (including the notional amount) converted to the <i>firm's base currency</i> , multiplied by the modified duration of the debt instrument, or <i>payment leg</i> , respectively.
Credit default swap	The notional value of the reference debt instrument multiplied by the remaining maturity of the credit default swap.
Subject to BIPRU 13.5.9R to BIPRU 13.5.10R, <i>financial derivative instrument</i> with a non-linear risk	Equal to the delta equivalent effective notional value of the <i>financial instrument</i> that underlies

profile, including <i>options</i> and <i>swaptions</i> except in the case of an underlying debt instrument.	the transaction.
Subject to <i>BIPRU</i> 13.5.9R to <i>BIPRU</i> 13.5.10R, <i>financial derivative instrument</i> with a non-linear risk profile, including <i>options</i> and <i>swaptions</i> , of which the underlying is a debt instrument or a <i>payment leg</i> .	Equal to the delta equivalent effective notional value of the <i>financial instrument</i> or <i>payment leg</i> multiplied by the modified duration of the debt instrument, or <i>payment leg</i> , respectively.

[Note: *BCD* Annex III Part 5 points 5 to 9]

Derivation of risk position: effective notional value

13.5.7 R A firm may use the following formulae to determine the size and sign of a risk position:

(1) for all instruments other than debt instruments:

effective notional value, or delta equivalent

$$\text{notional value} = p_{\text{ref}}((\delta V)/(\delta p))$$

where:

- (a) P_{ref} = price of the underlying instrument, expressed in the reference currency;
- (b) V = value of the financial instrument (in the case of an option this is the option price; in the case of a transaction with a linear risk profile this is the value of the underlying instrument itself);
- (c) p = price of the underlying instrument, expressed in the same currency as V ;

(2) for debt instruments and the *payment legs* of all transactions:

effective notional value multiplied by the modified duration, or delta equivalent in notional value multiplied by the modified duration

$$(\delta V)/(\delta r)$$

where:

- (a) V = value of the financial instrument (in the case of an option this is the option price; in the case of a transaction with a linear risk profile this is the value of the underlying instrument itself or of the *payment leg*, respectively);

(b) r = interest rate level.

- (3) If V is denominated in a currency other than the reference currency, the derivative must be converted into the reference currency by multiplication with the relevant exchange rate.

[**Note:** *BCD Annex III Part 5 point 11*]

Derivation of risk position: treatment of collateral

- 13.5.8 R For the determination of *risk positions*, a *firm* must treat collateral received from a counterparty like a claim on the counterparty under a derivative contract (long position) that is due today, while collateral posted must be treated as an obligation to the counterparty (short position) that is due today.

[**Note:** *BCD Annex III Part 5 point 10*]

Derivation of risk position: non-linear risks

- 13.5.9 R A *firm* must apply the *CCR mark to market method* to transactions with a non-linear risk profile or for *payment legs* and transactions with debt instruments as underlying if:
- (1) the *firm* does not have a *CAD 1 model permission* or a *VaR model permission*; or
 - (2) where the *firm* does have a *CAD 1 model permission* or a *VaR model permission* but cannot determine the delta or the modified duration, respectively, with its *CAD 1 model permission* or *VaR model permission*.

[**Note:** *BCD Annex III Part 5 point 19 (part)*]

- 13.5.10 R A *firm* must not recognise netting for the purpose of applying the *CCR mark to market method* to an *exposure* treated under *BIPRU 13.5.9R* (that is, the *exposure* value must be determined as if there were a *netting set* that comprises just the individual transaction).

[**Note:** *BCD Annex III Part 5 point 19 (part)*]

Hedging sets: assignment

- 13.5.11 R A *firm* must group the *risk positions* into *hedging sets* and, for each *hedging set*, compute the absolute value amount of the sum of the resulting *risk positions*. This sum is termed the “net *risk position*” and is represented by:

$$((\Sigma_i)(RPT_{ij}) - (\Sigma_i)(RPC_{lj}))$$

in the formulae set out in *BIPRU 13.5.24R*.

[Note: BCD Annex III Part 5 point 12]

Hedging sets: description

- 13.5.12 R For interest rate *risk positions* from money deposits received from the counterparty as collateral, from *payment legs* and from underlying debt instruments, to which according to the table in *BIPRU 7.2.XR* a capital charge of 1.60% or less applies, there are six *hedging sets* for each currency, as set out in the table in *BIPRU 13.5.13R*. *Hedging sets* are defined by a combination of the criteria “maturity” and “referenced interest rates”.

[Note: BCD Annex III Part 5 point 13]

Table: Hedging sets

- 13.5.13 R This table belongs to BIPU 13.5.12R:

	Government referenced interest rates	Non-government referenced interest rates
Maturity	≤ 1 year	≤ 1 year
Maturity	$>1 - \leq 5$ years	$>1 - \leq 5$ years
Maturity	> 5 years	> 5 years

[Note: BCD Annex III Part 5 Table 4]

- 13.5.14 R For interest rate *risk positions* from underlying debt instruments or *payment legs* for which the interest rate is linked to a reference interest rate that represents a general market interest level, the remaining maturity is the length of the time interval up to the next re-adjustment of the interest rate. In all other cases, it is the remaining life of the underlying debt instrument, or in the case of a *payment leg* the remaining life of the transaction.

[Note: BCD Annex III Part 5 point 14]

- 13.5.15 R There is one *hedging set* for each issuer of a reference debt instrument that underlies a credit default swap.

[Note: BCD Annex III Part 5 point 15]

- 13.5.16 R Underlying financial instruments other than debt instruments must be assigned by a *firm* to the same respective *hedging sets* only if they are identical or similar instruments. In all other cases a *firm* must assign them to separate *hedging sets*.

[**Note:** *BCD* Annex III Part 5 point 17 (part)]

- 13.5.17 R (1) The similarity of instruments for the purposes of *BIPRU* 13.5.16R is established in accordance with (2) to (5).
- (2) For equities, similar instruments are those of the same issuer. An equity index is treated as a separate issuer.
- (3) For precious metals, similar instruments are those of the same metal. A precious metal index is treated as a separate precious metal.
- (4) For electric power, similar instruments are those delivery rights and obligations that refer to the same peak or off-peak load time interval within any 24 hour interval.
- (5) For *commodities*, similar instruments are those of the same *commodity*. A *commodity* index is treated as a separate *commodity*.

[**Note:** *BCD* Annex III Part 5 point 17 (part)]

Hedging sets: collateral

- 13.5.18 R (1) For interest rate *risk positions* from money deposits that are posted with a counterparty as collateral when that counterparty does not have debt obligations of low *specific risk* outstanding and from underlying debt instruments, to which according to the table in *BIPRU* 7.2.XR a capital charge of more than 1.60% applies, there is one *hedging set* for each issuer.
- (2) When a *payment leg* emulates such a debt instrument, there is also one *hedging set* for each issuer of the reference debt instrument.
- (3) A *firm* may assign *risk positions* that arise from debt instruments of a certain issuer, or from reference debt instruments of the same issuer that are emulated by *payment legs*, or that underlie a credit default swap, to the same *hedging set*.

[**Note:** *BCD* Annex III Part 5 point 16]

- 13.5.19 R A *firm* that makes use of collateral to mitigate its *CCR* must have internal procedures to verify that, prior to recognising the effect of collateral in its calculations, the collateral meets the legal certainty standards set out in *BIPRU* 5 modified, where relevant, by *BIPRU* 4.10.

[**Note:** *BCD* Annex III Part 5 point 21]

Hedging sets: netting

- 13.5.20 R A *firm* must have internal procedures to verify that, prior to including a transaction in a *hedging set*, the transaction is covered by a legally enforceable netting contract that meets the requirements set out in *BIPRU* 13.7.

[Note: BCD Annex III Part 5 point 20]

Credit conversion factors : Table

- 13.5.21 R A firm must apply the CCR multipliers for the different *hedging set* categories according to the Table in BIPRU 13.5.22R.

[Note: BCD Annex III Part 5 point 18]

- 13.5.22 R This table belongs to BIPRU 13.5.21R.

<i>Hedging set</i> categories	CCR Multiplier (CCRM)
(1) Interest Rates	0.2%
(2) Interest Rates for <i>risk positions</i> from a reference debt instrument that underlies a credit default swap and to which a capital charge of 1.60%, or less, applies under BIPRU 7.2.XR.	0.3%
(3) Interest Rates for <i>risk positions</i> from a debt instrument or reference debt instrument to which a capital charge of more than 1.60% applies under BIPRU 7.2.XR.	0.6%
(4) Exchange Rates	2.5%
(5) Electric power	4.0%
(6) Gold	5.0%
(7) Equity	7.0%
(8) Precious Metals (except gold)	8.5%
(9) Other <i>commodities</i> (excluding precious metals and electricity power)	10.0%
(10) Underlying instruments of <i>financial derivative instruments</i> that are not in any of the above categories.	10.0%

[Note: BCD Annex III Part 5 Table 5]

- 13.5.23 R A firm must assign underlying instruments of *financial derivatives instruments* (in line 10 of the Table in BIPRU 13.5.22R) to separate

individual *hedging sets* for each category of underlying instrument.

Exposure value

- 13.5.24 R A *firm* must calculate the *exposure* value separately for each *netting set*.

[**Note:** BCD Annex III Part 5 point 1, second sentence]

- 13.5.25 R A *firm* must determine the *exposure* value net of collateral, as follows:

$$\text{exposure value} = \beta^* \max(CMV - CMC; (\sum_i)((\sum_i)(RPT_{ij}) - (\sum_l)(RPC_{lj})) * CCRM_j)$$

where:

CMV = *current market value* of the portfolio of transactions within the *netting set* with a counterparty gross of collateral.

That is, where:

$$CMV = (\sum_i)(CMV_i)$$

where:

CMV_i = the *current market value* of transaction i;

CMC = the *current market value* of the collateral assigned to the *netting set*.

That is, where:

$$CMC = (\sum_l)(CMC_l)$$

where

CMC_l = the *current market value* of collateral l;

i = index designating transaction;

l = index designating collateral;

j = index designating *hedging set* category. These *hedging sets* correspond to risk factors for which *risk positions* of opposite sign can be offset to yield a net *risk position* on which the *exposure* measure is then based;

RPT_{ij} = *risk position* from transaction i with respect to *hedging set* j;

RPC_{lj} = *risk position* from collateral l with respect to *hedging set* j;

CCRM_j = CCR Multiplier set out in the Table in BIPRU 13.5.22R with respect to the *hedging set* j;

β = 1.4.

[**Note:** BCD Annex III Part 5 point 1 (part)]

- 13.5.26 R Collateral received from a counterparty has a positive sign; collateral posted to a counterparty has a negative sign.

[**Note:** BCD Annex III Part 5 point 1 (part)]

13.5.27 R A *firm* may only recognise collateral for this method if it is collateral that is eligible under *BIPRU* 5.X.XR [Annex VIII, Part 1, point 11] and *BIPRU* 14.2.12R to *BIPRU* 14.2.13R.

[**Note:** *BCD* Annex III Part 5 point 1 (part)]

13.5.28 G A worked example showing a US Dollar (USD)-based *firm*, single counterparty, single netting set, Risk-positions RP_{ij} by hedging sets j is set out in *BIPRU* 13 Ann 1G

13.6 CCR internal model method

Introduction

- 13.6.1 R *BIPRU 13.6 sets out the rules relating to the CCR internal model method.*
- 13.6.2 R *A firm may only use the CCR internal model method if it has a CCR internal model method permission.*
- 13.6.3 G *BIPRU 1.3 sets out the process for applying for a CCR internal model method permission.*
- 13.6.4 G *A firm's CCR internal model method permission will modify BIPRU 13.6.2R and will require the firm to use only the CCR internal model method, except to the extent that BIPRU 13 permits the firm to combine the use of the CCR internal model method with one or more other methods.*
- 13.6.5 R (1) *A reference in the Handbook to a provision of the CCR internal model method, in relation to a firm:*
- (a) *excludes any provision of the CCR internal model method set out in the Handbook which is not applied to that firm by its CCR internal model method permission;*
 - (b) *includes any additional provision contained in the CCR internal model method permission; and*
 - (c) *takes into account any other amendments made to the provisions in the Handbook relating to the CCR internal model method made by the CCR internal model method permission.*
- (2) *To the extent that a firm's CCR internal model method permission does not allow it to use a particular approach in the Handbook relating to the CCR internal model method, the Handbook provision does not apply to the firm.*

Scope

- 13.6.6 R *A firm may determine the exposure value for:*
- (1) *financial derivative instruments;*
 - (2) *repurchase transactions;*
 - (3) *securities or commodities lending or borrowing transactions;*
 - (4) *margin lending transactions; and*
 - (5) *long settlement transactions*
- using the CCR internal model method.*

[Note: BCD Annex III Part 2 point 2]

13.6.7 R A firm may use the *CCR internal model method* to calculate the *exposure* value for:

- (1) the transactions in *BIPRU* 13.6.6R(1); or
- (2) the transactions in *BIPRU* 13.6.6R(2), (3) and (4); or
- (3) the transactions in *BIPRU* 13.6.6R(1) to (4).

[Note: BCD Annex III Part 6 point 1 (part)]

13.6.8 R In each of *BIPRU* 13.6.7R(1), (2) and (3), a firm may include *long settlement transactions* as well.

[Note: BCD Annex III Part 6 point 1 (part)]

Use of other models

13.6.9 G Point 2 of Part 6 of Annex III of the *Banking Consolidation Directive* provides that a firm using the *CCR internal model method* may use a type of model other than the type set out in *BIPRU* 13.6. If the *FSA* agrees to this the details of the model and the necessary calculations will be set out in the *CCR internal model method permission*, which will modify *BIPRU* 13.6 to the extent necessary. The *FSA* would not expect to agree to such a request unless the firm was able to satisfy the *FSA* that the method was at least as conservative as the method set out in *BIPRU* 13.6 and in particular that, for every *counterparty*, any method was more conservative than alpha multiplied by *effective EPE* calculated according to the equation in *BIPRU* 13.6.27R.

[Note: BCD Annex III Part 6 point 2 (second sentence) and point 11]

Partial use

13.6.10 R For all *financial derivative instruments* and for *long settlement transactions* which are outside the scope of a firm's *CCR internal model method permission*, a firm must use the *CCR mark to market method* or the *CCR standardised method*.

[Note: BCD Annex III Part 6 point 3 first sentence]

13.6.11 R Under *BIPRU* 13.6.10R, combined use of the *CCR mark to market method* and the *CCR standardised method* is only permitted where one of the methods is used for the cases set out in *BIPRU* 13.5.9R to *BIPRU* 13.5.10R.

[Note: BCD Annex III Part 6 point 3 second sentence]

13.6.12 R Notwithstanding *BIPRU* 13.3.9R (Combined use), a firm may choose not to apply the *CCR internal model method* to *exposures* that are immaterial in

size and risk.

[Note: BCD Annex III Part 6 point 1 third sentence]

- 13.6.13 R If permitted by its *CCR internal model method permission*, and subject to its terms, a *firm* may carry out the implementation of the *CCR internal model method* sequentially across different transaction types; and during this period the *firm* may use the *CCR mark to market method* or the *CCR standardised method*.

[Note: BCD Annex III Part 6 point 2]

- 13.6.14 G After the initial period following the granting of its *CCR internal model method permission*, as referred to in BIPRU 13.6.13R, a *firm* should extend the use of the *CCR internal model method* to cover any new business within a product category covered by its *CCR internal model method permission*. Subject to BIPRU 13.6.10R to BIPRU 13.6.13R, the *firm* should do so within a reasonable period of time. If the *firm* decides to exclude any business on, for example, the basis of materiality, it should document its reasons clearly.
- 13.6.15 G In principle, the use of different measures of *exposure* within the *CCR internal model method* is possible within the same product category, including on a permanent basis. The *FSA* may allow a *firm*, through the *CCR internal model method permission*, to use a more conservative measure of *exposure* that is less risk sensitive (for instance a measure based on conservative haircuts) for certain parts of the business if justified on a cost-benefit basis. However, a *firm* would still need to meet the use test for these more conservative measures and would need to demonstrate that the aggregation of *CCR exposures* that come from different approaches and have different degrees of conservatism makes sense and is used for its *CCR* management purposes.
- 13.6.16 G The *FSA* may, through the *CCR internal model method permission*, require a *firm* to apply a multiplier to the measures of *exposures* coming out of a less risk-sensitive approach to calculating *exposures* as referred to in BIPRU 13.6.15G where the *FSA* considers this to be appropriate due to the complexity of the business or the nature of the risks involved.

Use of CCR internal model method

- 13.6.17 R Subject to BIPRU 13.6.10R to BIPRU 13.6.16G, a *firm* that has a *CCR internal model method permission* must not use the *CCR mark to market method* or the *CCR standardised method* for transactions within the scope of the *firm's CCR internal model method permission*.

[Note: BCD Annex III Part 6 point 4 (part)]

- 13.6.18 G A *firm* which wishes to revert to the *CCR mark to market method* or the *CCR standardised method* will need to request the *FSA* to revoke or vary its *CCR internal model method permission*.

[Note: BCD Annex III Part 6 point 4 (part)]

- 13.6.19 G The *FSA* will not agree to a *firm's* request to revoke or vary its *CCR internal model method permission* except for demonstrated good cause.

[Note: BCD Annex III Part 6 point 4 (part)]

- 13.6.20 R If a *firm* ceases to comply with the requirements set out in *BIPRU* 13.6, it must either present to the *FSA* a plan for a timely return to compliance or demonstrate that the effect of non-compliance is immaterial.

[Note: BCD Annex III Part 6 point 4 (part)]

- 13.6.21 G If a *firm* ceases to comply with the requirements set out in *BIPRU* 13.6, the *FSA* may revoke the *CCR internal model method permission* or take other appropriate supervisory action.

[Note: BCD Annex III Part 6 point 4 (part)]

Exposure value

- 13.6.22 R (1) A *firm* must measure the *exposure* value at the level of the *netting set*.
- (2) The model must specify the forecasting distribution for changes in the market value of the *netting set* attributable to changes in market variables, such as interest rates, *foreign exchange* rates.
- (3) The model must then compute the *exposure* value for the *netting set* at each future date given the changes in the market variables.
- (4) For margined counterparties, the model may also capture future collateral movements.

[Note: BCD Annex III Part 6 point 5]

- 13.6.23 R A *firm* may include eligible financial collateral as defined in *BIPRU* 5.4.8R (Eligible collateral under financial collateral comprehensive method) and *BIPRU* 14.2.15R to *BIPRU* 14.2.17R in its forecasting distributions for changes in the market value of the *netting set*, if the quantitative, qualitative and data requirements for the *CCR internal model method* are met for the collateral.

[Note: BCD Annex III Part 6 point 6]

- 13.6.24 R A *firm* must calculate the *exposure* value as the product of alpha (α), as set out in *BIPRU* 13.6.31R, times *effective EPE*:

Exposure value = $\alpha \times$ *effective EPE*

[Note: BCD Annex III Part 6 point 7 first part]

Effective EPE

- 13.6.25 R A firm must compute *effective EPE* by estimating *expected exposure (EEt)* as the average *exposure* at future date *t*, where the average is taken across possible future values of relevant *market risk* factors. The model estimates *EE* at a series of future dates *t1, t2, t3, etc.*

[Note: BCD Annex III Part 6 point 7 third part]

- 13.6.26 R A firm must compute *effective EE* recursively as:

$$\text{Effective } EE_{tk} = \max(\text{effective } EE_{tk-1}; EE_{tk})$$

where:

the current date is denoted as *t0* and *Effective EEt0* equals *current exposure*.

[Note: BCD Annex III Part 6 point 8]

- 13.6.27 R For the purposes of BIPRU 13.6.26R [above rule]:

- (1) *effective EPE* is the average *effective EE* during the first year of future *exposure*;
- (2) if all contracts in the *netting set* mature within less than one year, *EPE* is the average of *EE* until all contracts in the *netting set* mature.

[Note: BCD Annex III Part 6 point 9, first part]

- 13.6.28 R A firm must compute *effective EPE* as a weighted average of *effective EE*:

$$\text{Effective } EPE = (\sum_{k=1}^{\min(1 \text{ year}; \text{maturity})}) ((\text{Effective } EE_{tk})^* (\Delta t_k))$$

where:

the weights $\Delta t_k = t_k - t_{k-1}$ allow for the case when future *exposure* is calculated at dates that are not equally spaced over time.

[Note: BCD Annex III Part 6 point 9, second part]

- 13.6.29 R A firm must calculate *EE* or *peak exposure* measures based on a distribution of *exposures* that accounts for the possible non-normality of the distribution of *exposures*.

[Note: BCD Annex III Part 6 point 10]

- 13.6.30 R Where appropriate, volatilities and correlations of *market risk* factors used in the joint simulation of *market risk* and credit risk must be conditioned on the credit risk factor to reflect potential increases in volatility or correlation in an economic downturn.

[Note: BCD Annex III Part 6 point 14]

Alpha

- 13.6.31 R For the purposes of *BIPRU* 13.6.24R, alpha (α) is 1.4 or any higher amount specified in the *firm's CCR internal model method permission*.

[Note: BCD Annex III Part 6 point 7 second part]

- 13.6.32 G If the FSA does specify an alpha greater than 1.4, the reasons will be set out in the *firm's CCR internal model method permission*.

- 13.6.33 R If a *firm's CCR internal model method permission* permits it, the *firm* may use its own estimates of α , subject to a floor of 1.2, where α must equal the ratio of internal capital from a full simulation of *CCR exposure* across counterparties (numerator) and internal capital based on *EPE* (denominator).

[Note: BCD Annex III Part 6 point 12 (part)]

- 13.6.34 R For the purposes of *BIPRU* 13.6.33R:

- (1) in the denominator, *EPE* must be used as if it were a fixed outstanding amount;
- (2) a *firm* must be able to demonstrate that its internal estimates of α capture in the numerator material sources of stochastic dependency of *distribution of market values* of transactions or of portfolios of transactions across counterparties;
- (3) internal estimates of α must take account of the granularity of portfolios.

[Note: BCD Annex III Part 6 point 12 (part)]

- 13.6.35 R A *firm* must ensure that the numerator and denominator of α are computed in a consistent fashion with respect to the modelling methodology, parameter specifications and portfolio composition. The approach used must be based on the *firm's* internal capital approach, be well-documented and be subject to independent validation. In addition, a *firm* must review their estimates on at least a quarterly basis, and more frequently when the composition of the portfolio varies over time. A *firm* must also assess the model risk.

[Note: BCD Annex III Part 6 point 13]

- 13.6.36 G In reviewing its estimate of α , a *firm* may not need to perform a full recalculation each quarter if it can demonstrate by other means that the estimate would not be materially different. A full recalculation should however be performed at least annually. If there is a structural change in the *firm's* portfolio that is likely to have the effect that the existing estimate of α will be inappropriate, the *firm* should also recalculate it. A *firm* should have

procedures in place to identify any such structural changes.

Maturity adjustment

- 13.6.37 G A firm using the IRB approach for risk weighting of exposures arising from a CCR internal model method should also apply a different maturity adjustment as set out in BIPRU 4.4.67R-BIPRU 4.4.70R.

Margin agreement

- 13.6.38 R If the *netting set* is subject to a *margin agreement*, a firm must use one of the following *EPE* measures:

- (1) *effective EPE* without taking into account the *margin agreement*;
- (2) the *margin threshold*, if positive, under the *margin agreement* plus an add-on that reflects the potential increase in *exposure* over the *margin period of risk*:
 - (a) the add-on is computed as the expected increase in the *netting set's exposure* beginning from a *current exposure* of zero over the *margin period of risk*;
 - (b) a floor of five business days for *netting sets* consisting only of repo-style transactions subject to daily remargining and daily mark-to-market, and ten business days for all other *netting sets* is imposed on the *margin period of risk* used for this purpose.
- (4) if the model captures the effects of margining when estimating *EE*, the model's *EE* measure may be used directly in the equation in BIPRU 13.6.28R (Computation of effective *EE*), unless the *firm's CCR internal model method permission* does not apply this provision or does not permit that use.

[Note: BCD Annex III Part 6 point 15]

- 13.6.39 G Where the effects of margining are captured by the model itself, the FSA does not prescribe any floors for the *margin period of risk* but will challenge a firm that looks to use periods shorter than 5 days for *repurchase agreements* or *reverse repurchase agreements* or 10 days for *financial derivative instruments*.

Operational requirements: General

- 13.6.40 R A firm's *EPE* model must meet the operational requirements set out in BIPRU 13.6.41R to 13.6.66R.

[Note: BCD Annex III Part 6 point 16]

Operational requirements: CCR control

- 13.6.41 R (1) The *firm* must have a control unit that is responsible for the design and implementation of its *CCR* management system, including the initial and on-going validation of the model.
- (2) This unit must control input data integrity and produce and analyse reports on the output of the *firm's* risk measurement model, including an evaluation of the relationship between measures of risk *exposure* and credit and trading limits.
- (3) This unit must be:
- (a) independent from units responsible for originating, renewing or trading *exposures* and free from undue influence;
 - (b) it must be adequately staffed; and
 - (c) it must report directly to the senior management of the *firm*.
- (4) The work of this unit must be closely integrated into the day-to-day credit risk management process of the *firm*; its output must, accordingly, be an integral part of the process of planning, monitoring and controlling the *firm's* credit and overall risk profile.

[Note: *BCD* Annex III Part 6 point 17]

- 13.6.42 R (1) A *firm* must have *CCR* management policies, processes and systems that are conceptually sound and implemented with integrity.
- (2) A sound *CCR* management framework must include the identification, measurement, management, approval and internal reporting of *CCR*.

[Note: *BCD* Annex III Part 6 point 18]

- 13.6.43 R (1) A *firm's* risk management policies must take account of *market risk*, *liquidity risk*, and legal and *operational risk* that can be associated with *CCR*.
- (2) The *firm* must not undertake business with a counterparty without assessing its creditworthiness and must take due account of settlement and pre-settlement credit risk.
- (3) These risks must be managed as comprehensively as practicable at the counterparty level (aggregating *CCR exposures* with other credit *exposures*) and at the *firm-wide* level.

[Note: *BCD* Annex III Part 6 point 19]

- 13.6.44 R A *firm's governing body* and senior management must be actively involved in the *CCR* control process and must regard this as an essential aspect of the business to which significant resources need to be devoted. Senior management must be aware of the limitations and assumptions of the model

used and the impact these can have on the reliability of the output. Senior management must also consider the uncertainties of the market environment and operational issues and be aware of how these are reflected in the model.

[**Note:** *BCD Annex III Part 6 point 20*]

- 13.6.45 R A *firm* must ensure that the daily reports prepared on its *exposures* to *CCR* are reviewed by a level of management with sufficient seniority and authority to enforce both reductions of positions taken by individual credit managers or traders and reductions in the *firm's* overall *CCR exposure*.

[**Note:** *BCD Annex III Part 6 point 21*]

- 13.6.46 R (1) A *firm's* *CCR* management system must be used in conjunction with internal credit and trading limits.
- (2) A *firm* must ensure that its credit and trading limits are related to its risk measurement model in a manner that is:
- (a) consistent over time; and
 - (b) well understood by credit managers, traders and senior management.

[**Note:** *BCD Annex III Part 6 point 22*]

- 13.6.47 R (1) A *firm's* measurement of *CCR* must include measuring daily and intra-day usage of credit lines.
- (2) The *firm* must measure *current exposure* gross and net of collateral.
- (3) At portfolio and counterparty level, the *firm* must calculate and monitor *peak exposure* or potential future *exposure* (PFE) at the confidence interval chosen by the *firm*.
- (4) The *firm* must take account of large or concentrated positions, including by groups of related counterparties, by industry, by market, etc.

[**Note:** *BCD Annex III Part 6 point 23*]

- 13.6.48 R (1) A *firm* must have a routine and rigorous program of stress testing in place as a supplement to the *CCR* analysis based on the day-to-day output of the *firm's* risk measurement model.
- (2) The results of this stress testing must be reviewed periodically by senior management and must be reflected in the *CCR* policies and limits set by management and the *governing body*.
- (3) Where stress tests reveal particular vulnerability to a given set of circumstances, prompt steps must be taken to manage those risks appropriately.

[Note: BCD Annex III Part 6 point 24]

- 13.6.49 R (1) A *firm* must have a routine in place for ensuring compliance with a documented set of internal policies, controls and procedures concerning the operation of the *CCR* management system.
- (2) The *firm's CCR* management system must be well documented and must provide an explanation of the empirical techniques used to measure *CCR*.

[Note: BCD Annex III Part 6 point 25]

13.6.50 R A *firm* must conduct an independent review of the *CCR* management system regularly through its own internal auditing process. This review must include both the activities of the business units referred to in *BIPRU* 13.6.41R and of the independent *CCR* control unit. A review of the overall *CCR* management process must take place at regular intervals and must specifically address, at a minimum:

- (1) the adequacy of the documentation of the *CCR* management system and process;
- (2) the organisation of the *CCR* control unit;
- (3) the integration of *CCR* measures into daily risk management;
- (4) the approval process for risk pricing models and valuation systems used by front and back-office personnel;
- (5) the validation of any significant change in the *CCR* measurement process;
- (6) the scope of *CCR* captured by the risk measurement model;
- (7) the integrity of the management information system;
- (8) the accuracy and completeness of *CCR* data;
- (9) the verification of the consistency, timeliness and reliability of data sources used to run models, including the independence of such data sources;
- (10) the accuracy and appropriateness of volatility and correlation assumptions;
- (11) the accuracy of valuation and risk transformation calculations; and
- (12) the verification of the model's accuracy through frequent back-testing.

[Note: BCD Annex III Part 6 point 26]

Operational requirements: Use test

- 13.6.51 R The distribution of *exposures* generated by the model used to calculate *effective EPE* must be closely integrated into the day-to-day *CCR* management process of the *firm*. The model's output must accordingly play an essential role in the credit approval, *CCR* management, internal capital allocation, and corporate governance of the *firm*.

[**Note:** *BCD* Annex III Part 6 point 27]

- 13.6.52 R A *firm* must have a track record in the use of models that generate a distribution of *exposures* to *CCR*. Thus, the *firm* must be able to demonstrate that it has been using a model to calculate the distributions of *exposures* upon which the *EPE* calculation is based that meets, broadly, the minimum requirements set out in *BIPRU* 13.6 for at least one year prior to the date of its *CCR internal model method permission*.

[**Note:** *BCD* Annex III Part 6 point 28]

- 13.6.53 R (1) A *firm* must ensure that the model used to generate a distribution of *exposures* to *CCR* is part of a *CCR* management framework that includes the identification, measurement, management, approval and internal reporting of *CCR*. This framework must include the measurement of usage of credit lines (aggregating *CCR exposures* with other credit *exposures*) and internal capital allocation.
- (2) In addition to *EPE*, a *firm* must measure and manage *current exposures*.
- (3) Where appropriate, the *firm* must measure *current exposure* gross and net of collateral.
- (4) The use test is satisfied if a *firm* uses other *CCR* measures, such as *peak exposure* or *PFE* (see *BIPRU* 13.6.47R), based on the distribution of *exposures* generated by the same model to compute *EPE*.

[**Note:** *BCD* Annex III Part 6 point 29]

- 13.6.54 R A *firm* must have the systems capability to estimate *EE* daily if necessary, unless it is able to demonstrate to the *FSA* that its *exposures* to *CCR* warrant less frequent calculation. The *firm* must compute *EE* along a time profile of forecasting horizons that adequately reflects the time structure of future cash flows and maturity of the contracts and in a manner that is consistent with the materiality and composition of the *exposures*.

[**Note:** *BCD* Annex III Part 6 point 30]

- 13.6.55 R (1) *Exposure* must be measured, monitored and controlled over the life of all contracts in the *netting set* (not just to the one year horizon).

- (2) A *firm* must have procedures in place to identify and control the risks for counterparties where the *exposure* rises beyond the one-year horizon.
- (3) A *firm* must input the forecast increase in *exposure* into the *firm*'s internal capital model.

[**Note:** BCD Annex III Part 6 point 31]

Operational requirements: Stress testing

- 13.6.56 R
- (1) A *firm* must have in place sound stress testing processes for use in the assessment of capital adequacy for *CCR*.
 - (2) These stress measures must be compared with the measure of *EPE* and considered by the *firm* as part of the process set out in *GENPRU* 1.2.42R.
 - (3) Stress testing must also involve identifying possible events or future changes in economic conditions that could have unfavourable effects on a *firm*'s credit *exposures* and an assessment of the *firm*'s ability to withstand such changes.

[**Note:** BCD Annex III Part 6 point 32]

- 13.6.57 R
- (1) A *firm* must stress test its *CCR exposures*, including jointly stressing *market risk* and credit risk factors.
 - (2) In its stress tests of *CCR*, a *firm* must consider concentration risk (to a single counterparty or groups of counterparties), correlation risk across *market risk* and credit risk, and the risk that liquidating the counterparty's positions could move the market.
 - (3) In its stress tests a *firm* must also consider the impact on its own positions of such market moves and integrate that impact in its assessment of *CCR*.

[**Note:** BCD Annex III Part 6 point 33]

Operational requirements: Wrong-way risk

- 13.6.58 R
- A *firm* must give due consideration to *exposures* that give rise to a significant degree of *general wrong-way risk*.

[**Note:** BCD Annex III Part 6 point 34]

- 13.6.59 R
- A *firm* must have procedures in place to identify, monitor and control cases of *specific wrong way risk*, beginning at the inception of a transaction and continuing through the life of the transaction.

[**Note:** BCD Annex III Part 6 point 35]

Operational requirements: Integrity of modelling process

- 13.6.60 R *A firm* must ensure that:
- (1) the model reflects transaction terms and specifications in a timely, complete, and conservative fashion;
 - (2) such terms include at least:
 - (a) contract notional amounts;
 - (b) maturity;
 - (c) reference assets;
 - (d) margining arrangements; and
 - (e) netting arrangements;
 - (3) the terms and specifications are maintained in a database that is subject to formal and periodic audit;
 - (4) the process for recognising netting arrangements requires:
 - (a) signoff by legal staff to verify the legal enforceability of netting and
 - (b) input into the database by an independent unit;
 - (5) the transmission of transaction terms and specifications data to the model is also subject to internal audit; and
 - (6) formal reconciliation processes are in place between the model and source data systems to verify on an ongoing basis that transaction terms and specifications are being reflected in *EPE* correctly or at least conservatively.

[**Note:** *BCD* Annex III Part 6 point 36]

- 13.6.61 R *A firm* must ensure that:
- (1) the model employs current market data to compute *current exposures*;
 - (2) when using historical data to estimate volatility and correlations, at least three years of historical data are used and updated quarterly or more frequently if market conditions warrant;
 - (3) the data covers a full range of economic conditions, such as a full business cycle;

- (4) a unit independent from the business unit validates the price supplied by the business unit;
- (5) the data is acquired independently of the lines of business, fed into the model in a timely and complete fashion, and maintained in a database subject to formal and periodic audit;
- (6) it has a well-developed data integrity process to clean the data of erroneous and/or anomalous observations; and
- (7) to the extent that the model relies on proxy market data, including for new products where three years of historical data may not be available, internal policies identify suitable proxies and the *firm* demonstrates empirically that the proxy provides a conservative representation of the underlying risk under adverse market conditions.

[**Note:** BCD Annex III Part 6 point 37]

13.6.62 R If the model includes the effect of collateral on changes in the market value of the *netting set*, a *firm* must have adequate historical data to model the volatility of the collateral.

13.6.63 R A *firm* must ensure that the model is subject to a validation process which:

- (1) is clearly articulated in *firms'* policies and procedures;
- (2) specifies the kind of testing needed to ensure model integrity
- (3) identifies conditions under which assumptions are violated and may result in an understatement of *EPE*; and
- (4) includes a review of the comprehensiveness of the model.

[**Note:** BCD Annex III Part 6 point 38]

13.6.64 R A *firm* must monitor the appropriate risks and have processes in place to adjust its estimation of *EPE* when those risks become significant. This includes the following:

- (1) the *firm* must identify and manage its *exposures* to *specific wrong-way risk*;
- (2) for *exposures* with a rising risk profile after one year, the *firm* must compare on a regular basis the estimate of *EPE* over one year with *EPE* over the life of the *exposure*; and
- (3) for *exposures* with a residual maturity below one year, the *firm* must compare on a regular basis the replacement cost (*current exposure*) and the realised *exposure* profile, and/or store data that would allow such a comparison.

[Note: BCD Annex III Part 6 point 39]

- 13.6.65 R A *firm* must have internal procedures to verify that, prior to including a transaction in a *netting set*, the transaction is covered by a legally enforceable netting contract that meets the requirements set out in *BIPRU* 13.7.

[Note: BCD Annex III Part 6 point 40]

- 13.6.66 R A *firm* that makes use of collateral to mitigate its *CCR* must have internal procedures to verify that, prior to recognising the effect of collateral in its calculations, the collateral meets the legal certainty standards set out in *BIPRU* 5 as modified, where relevant, by *BIPRU* 4.10.

[Note: BCD Annex III Part 6 point 41]

Validation requirements

- 13.6.67 R (1) A *firm's CCR internal model method* model must meet the validation requirements in (2) to (8).
- (2) The qualitative validation requirements set out in *BIPRU* 7.10 must be met.
- (3) Interest rates, *foreign currency* rates, equity prices, *commodities*, and other *market risk* factors must be forecast over long time horizons for measuring *CCR exposure*. The performance of the forecasting model for *market risk* factors must be validated over a long time horizon.
- (4) The pricing models used to calculate *CCR exposure* for a given scenario of future shocks to *market risk* factors must be tested as part of the *CCR internal model method* model validation process. Pricing models for *options* must account for the nonlinearity of option value with respect to *market risk* factors.
- (5) The *CCR internal model method* model must capture transaction-specific information in order to aggregate *exposures* at the level of the *netting set*. A *firm* must verify that transactions are assigned to the appropriate *netting set* within the model.
- (6) The *CCR internal model method* model must also include transaction-specific information to capture the effects of margining. It must take into account both the current amount of margin and margin that would be passed between counterparties in the future. Such a model must account for the nature of *margin agreements* (unilateral or bilateral), the frequency of margin calls, the *margin period of risk*, the minimum threshold of unmarginated *exposure* the *firm* is willing to accept, and the minimum transfer amount. Such a model must either model the mark-to-market change in the value of collateral posted or apply the *rules* set out in *BIPRU* 5 as modified,

where relevant, by *BIPRU* 4.10.

- (7) Static, historical backtesting on representative counterparty portfolios must be part of the *CCR internal model method* model validation process. At regular intervals, a *firm* must conduct such backtesting on a number of representative counterparty portfolios (actual or hypothetical). These representative portfolios must be chosen based on their sensitivity to the material risk factors and correlations to which the *firm* is exposed.
- (8) If backtesting indicates that the *CCR internal model method* model is not sufficiently accurate, a *firm* must increase the *credit risk capital component* and, where *BIPRU* 13 is applied for the purposes of *BIPRU* 14, the *counterparty risk capital component* by an amount which is conservatively estimated to compensate for the inaccuracy of the model.

[**Note:** *BCD* Annex III Part 6 point 42 (part)]

- 13.6.68 G If backtesting indicates that the *CCR internal model method* model is not sufficiently accurate, the *FSA* may revoke a *firm's CCR internal model method permission* or take appropriate measures to ensure that the model is improved promptly. Measures taken by the *FSA* may include the use of its *own-initiative power* to require the *firm* to hold more *capital resources*.

[**Note:** *BCD* Annex III Part 6 point 42 (part)]

13.7 Contractual netting

Scope

13.7.1 R *BIPRU* 13.7 applies for the purpose of:

- (1) the *CCR mark to market method*;
- (2) the *CCR standardised method*;
- (3) if the *firm* has a *CCR internal model method permission*, the *CCR internal model method*.

Types of netting recognised

13.7.2 R For the purpose of *BIPRU* 13.7:

- (1) “counterparty” means any entity (including natural *persons*) that has the power to conclude a contractual netting agreement; and
- (2) “*contractual cross product netting agreement*” means a written bilateral agreement between a *firm* and a counterparty which creates a single legal obligation covering all included bilateral master agreements and transactions belonging to different product categories.

[**Note:** *BCD Annex III Part 7 point (a) (part)*]

13.7.3 R *Contractual cross product netting agreements* do not cover netting other than on a bilateral basis.

[**Note:** *BCD Annex III Part 7 point (a) (part)*]

13.7.4 R For the purposes of *cross product netting*, the following are considered different product categories:

- (1) *repurchase transactions, reverse repurchase transactions, securities or commodities lending or borrowing transactions*;
- (2) *margin lending transactions*; and
- (3) *financial derivative instruments*.

[**Note:** *BCD Annex III Part 7 point (a) (part)*]

13.7.5 R A *firm* may recognise as risk-reducing the following types of contractual netting:

- (1) bilateral contracts for novation between a *firm* and its counterparty under which mutual claims and obligations are automatically

amalgamated in such a way that this novation fixes one single net amount each time novation applies and thus creates a legally binding, single new contract extinguishing former contracts;

- (2) other bilateral agreements between a *firm* and its counterparty; and
- (3) a *firm* that has a *CCR internal model method permission* may recognise *contractual cross product netting agreements* for transactions falling within the scope of its *CCR internal model method permission*; netting across transactions entered by members of a *group* is not recognised for the purposes of calculating capital requirements.

[**Note:** *BCD Annex III Part 7 point (a) (part)*]

Conditions for recognition

13.7.6 R A *firm* may treat contractual netting as risk-reducing only under the following conditions:

- (1) the *firm* must have a contractual netting agreement with its counterparty which creates a single legal obligation, covering all included transactions, such that, in the event of a counterparty's failure to perform owing to default, bankruptcy, liquidation or any other similar circumstance, the *firm* would have a claim to receive or an obligation to pay only the net sum of the positive and negative mark-to-market values of included individual transactions;
- (2) the *firm* must be in a position to provide to the *FSA*, if requested, written and reasoned legal opinions to the effect that, in the event of a legal challenge, the relevant courts and administrative authorities would, in the cases described under (1), find that the *firm's* claims and obligations would be limited to the net sum, as described in (1), under:
 - (a) the law of the jurisdiction in which the counterparty is incorporated and, if a foreign *branch* of an *undertaking* is involved, also under the law of the jurisdiction in which the *branch* is located; or
 - (b) the law that governs the individual transactions included; or
 - (c) the law that governs any contract or agreement necessary to effect the contractual netting;
- (3) the *firm* must have procedures in place to ensure that the legal validity of its contractual netting is kept under review in the light of possible changes in the relevant laws;
- (4) the *firm* must maintain all required documentation in its files;

- (5) the effects of netting must be factored into the *firm's* measurement of each counterparty's aggregate credit risk *exposure* and the *firm* must manage its *CCR* on such a basis; and
- (7) the *firm* must aggregate credit risk to each counterparty to arrive at a single legal *exposure* across transactions; this aggregation must be factored into credit limit purposes and internal capital purposes.

[Note: BCD Annex III Part 7 point (b) (part)]

- 13.7.7 R If any of the *competent authorities* concerned is not satisfied that the contractual netting is legally valid under the law of each of the relevant jurisdictions, the *firm* must not treat the contractual netting agreement as risk-reducing.

[Note: BCD Annex III Part 7 point (b) (part)]

- 13.7.8 R A legal opinion required under *BIPRU* 13.7.6R(2) may be in the form of a reasoned legal opinion drawn up by type of contractual netting.

[Note: BCD Annex III Part 7 point (b) (part)]

- 13.7.9 R A *firm* must not recognise as risk-reducing any contract containing a provision which permits a non-defaulting counterparty to make limited payments only, or no payments at all, to the estate of the defaulter, even if the defaulter is a net creditor (a "walkaway" clause).

[Note: BCD Annex III Part 7 point (b) (part)]

- 13.7.10 R In addition to the requirements in *BIPRU* 13.7.2R to *BIPRU* 13.7.9R, for *contractual cross-product netting agreements* the following criteria must be met:

- (1) the net sum referred to in *BIPRU* 13.7.6R(1) must be the net sum of the positive and negative close out values of any included individual bilateral master agreement and of the positive and negative mark-to-market value of the individual transactions (the 'Cross-Product Net Amount');
- (3) the written and reasoned legal opinions referred to in *BIPRU* 13.7.6R(2) must address the validity and enforceability of the entire *contractual cross-product netting agreement* under its terms and the impact of the netting arrangement on the material provisions of any included individual bilateral master agreement; a legal opinion must be generally recognised as such by the legal community in the *United Kingdom* or a memorandum of law that addresses all relevant issues in a reasoned manner;
- (4) the *firm* must have procedures in place under *BIPRU* 13.7.6R(3) to verify that any transaction which is to be included in a *netting set* is covered by a legal opinion; and

- (5) taking into account the *contractual cross product netting agreement*, the *firm* must continue to comply with the requirements for the recognition of bilateral netting and the requirements of *BIPRU 4.10* and *BIPRU 5* for the recognition of *credit risk mitigation*, as applicable, with respect to each included individual bilateral master agreement and transaction.

[**Note:** *BCD Annex III Part 7 point (b) (part)*]

Effects of recognition

- 13.7.11 R For the purposes of the *CCR mark to market method*, the *CCR standardised method* and the *CCR internal model method* a *firm* must recognise netting as set out in *BIPRU 13.3* and *BIPRU 13.6*.

[**Note:** *BCD Annex III Part 7 point (b) (part)*]

13.8 Securities financing transactions

Purpose

13.8.1 G *BIPRU 13.8 summarises the treatment for securities financing transactions.*

Calculation of exposure value for SFTs

13.8.2 R Subject to *BIPRU 13.8.3R*, in respect of a *securities financing transaction*, if a *firm*:

(1) has a *CCR internal model method permission* which covers the transaction; or

(2) has a *master netting agreement internal models approach permission* which covers the transaction;

then the *firm* must use the *CCR internal model method approach* or the *master netting agreement internal models approach*, as applicable, to calculate the *exposure* value for that transaction unless an exception in *BIPRU 13* or *BIPRU 5* allows the *firm* to use another method.

[**Note:** *BCD Article 78(2)*, second sentence, in respect of *SFTs*]

13.8.3 R If a *firm* has a *CCR internal model method permission* and a *master netting agreement internal models approach permission*, and both cover a *securities financing transaction*, then the *firm* may choose which of those approaches it wishes to use to calculate the *exposure* value for that transaction.

13.8.4 R Where *BIPRU 13.8.2R* does not apply, a *firm* must use one of the following approaches to determine the *exposure* value of a *securities financing transaction*, as appropriate:

(1) if the transaction is covered by a master netting agreement which satisfies the requirements for recognition set out in *BIPRU 5.6.1R* to *BIPRU 5.6.3R*, a *firm* may calculate the *exposure* value under the master netting agreement method set out in *BIPRU 5.6.5R* to *BIPRU 5.6.11R* (Calculation of the fully adjusted exposure value: the supervisory volatility adjustments approach and the own estimates of volatility adjustments approach);

(2) otherwise, a *firm* must calculate the *exposure* value of the transaction as its on-balance sheet value.

13.8.5 G A *firm* calculating *risk weighted exposure amounts* under the *standardised approach* to credit risk will not be eligible to use the approach in *BIPRU 13.8.4R(1)* if it is using the *financial collateral simple method* to determine the effects of *credit risk mitigation*, as set out in *BIPRU 5.4.16R*.

- 13.8.6 G If a *firm* calculates the *exposure* value of a *securities financing transaction* as its on-balance sheet value, in accordance with *BIPRU* 13.8.4R(2), it may recognise the effects of financial collateral in the same way as for its other exposures, for example by using either the *financial collateral simple method* or the *financial collateral comprehensive method*. However *firms* should note that the *financial collateral simple method* is not available:
- (1) to a *firm* using the *IRB approach* (*BIPRU* 5.4.16R); or
 - (2) for *securities financing transactions* in the *trading book* (*BIPRU* 14.2.11R).

Exposure to a central counterparty

- 13.8.7 R Notwithstanding *BIPRU* 13.8.2R, a *firm* must determine the *exposure* value of a credit risk *exposure* outstanding with a *central counterparty* in accordance with *BIPRU* 13.8.10R, provided that the *central counterparty's counterparty credit risk exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[**Note:** *BCD* Article 78(4) in respect of *SFTs*]

- 13.8.8 R A *firm* may attribute an *exposure* value of zero for *CCR* to a *securities financing transaction* or to any other *exposures* in respect of that transaction (but excluding an *exposure* arising from collateral held to mitigate losses in the event of the default of other participants in the *central counterparty's* arrangements) which is outstanding with a *central counterparty* and has not been rejected by the *central counterparty*.

[**Note:** *BCD* Annex III Part 2 point 6 in respect of *SFTs*]

- 14 Capital requirements for settlement and counterparty risk
- 14.1 Application and purpose
- Application
- 14.1.1 R *BIPRU 14 applies to a BIPRU firm.*
- 14.1.2 G (1) *BIPRU 14.2 deals with the calculation of the capital requirement for CCR for trading book positions arising from financial derivative instruments, securities financing transactions and long settlement transactions. The approaches used to calculate exposure values and risk weighted exposure amounts for these positions are largely based on the approaches applicable to non-trading book positions (BIPRU 3, BIPRU 4, BIPRU 5 and BIPRU 13). However, there are some treatments that are specific to the trading book. These are set out in BIPRU 14.2.*
- (2) *The calculation of the capital requirement for CCR for trading book positions is the first element of the counterparty risk capital component in BIPRU 14.2.1R. The second element of the counterparty risk capital component is for unsettled transactions in both the trading book and the non-trading book. It is calculated under BIPRU 14.3.*
- (4) *BIPRU 14.4 sets out the treatment for free deliveries.*
- Purpose
- 14.1.2 G *BIPRU 14 implements:*
- (1) *Article 3(1)(h), Article 17(1), and Article 40; and*
- (2) *Annex II;*
- of the Capital Adequacy Directive.*

- 14.2 Calculation of the capital requirement for CCR
- Calculation of the counterparty risk capital component
- 14.2.1 R A *firm* must calculate the *counterparty risk capital component* as the sum of:
- (1) the capital requirement calculated under *BIPRU* 14.2.13R; and
 - (2) the amount calculated under *BIPRU* 14.3.
- 14.2.2 R A *firm* must hold capital calculated in accordance with *BIPRU* 14.2.13R against the *CCR* arising from *exposures* arising in the *trading book* due to the following:
- (1) *free deliveries* (where *BIPRU* 14.4 requires it to be treated as an *exposure*);
 - (2) *financial derivative instruments* and credit derivatives;
 - (3) *repurchase agreements, reverse repurchase agreements, securities or commodities lending or borrowing transactions* based on *securities* or *commodities* included in the *trading book*;
 - (4) *margin lending transactions* based on *securities* or *commodities*; and
 - (5) *long settlement transactions*.
- [Note: *CAD* Annex II point 5]
- Credit derivatives
- 14.2.3 R For the purposes of the calculation of the *counterparty risk capital component*, a *financial derivative instrument* means:
- (1) an item falling within *BIPRU* 13.3.3R other than an item to which an *exposure* value of zero is attributed under *BIPRU* 13.3.13R or *BIPRU* 13.8.10R (*Exposure to a central counterparty*); and
 - (2) a credit derivative.
- [Note: *CAD* Article 3(1)(h) and Annex II point 7 first sentence]
- 14.2.4 R *BIPRU* 14.2.5R to *BIPRU* 14.2.8R apply for the purposes of *BIPRU* 13.4 (*CCR mark to market method*).
- 14.2.5 R In the case of total return swap credit derivatives and credit default swap credit derivatives, a *firm* must obtain a figure for potential future credit *exposure* by multiplying the nominal amount of the instrument by the following percentages:

- (1) 5% where the reference obligation is one that if it gave rise to a direct *exposure* of the *firm* would be a *qualifying debt security* for the purposes of *BIPRU 7.2*;
- (2) 10 % where the reference obligation is one that if it gave rise to a direct *exposure* of the *firm* would not be a *qualifying debt security* for the purposes of *BIPRU 7.2*.

[**Note:** *CAD Annex II point 7 (part)*]

- 14.2.6 R In the case of a credit default swap, a *firm* the *exposure* of which arising from the swap represents a long position in the underlying may use a figure of 0% for potential future credit *exposure*, unless the credit default swap is subject to closeout upon the insolvency of the entity the *exposure* of which arising from the swap represents a short position in the underlying, even though the underlying has not defaulted.
- 14.2.7 G *BIPRU 14.2.6R* permits the seller of credit protection to determine potential future credit *exposure* as 0%, unless the protection is subject to close-out on the insolvency of the buyer.
- 14.2.8 R Where the credit derivative provides protection in relation to ‘nth to default’ amongst a number of underlying obligations, a *firm* must apply the percentage figure in *BIPRU 14.2.5R* applicable to the obligation with the nth lowest credit quality determined by whether it is one that if incurred by the *firm* would be a *qualifying debt security* for the purposes of *BIPRU 7.2*.
- 14.2.9 G The operation of *BIPRU 14.2.8R* can be illustrated by an example as follows: where the credit derivative is a first to default transaction, the appropriate percentage for the potential future credit *exposure* will be determined by the lowest credit quality of the underlying obligations in the basket. If there are non-qualifying items in the basket, the percentage applicable to the non-qualifying reference obligation should be used. For second and subsequent to default transactions, underlying assets should continue to be allocated according to credit quality: i.e. for a second to default transaction, the applicable percentage figure is the percentage applicable to the second lowest credit quality.
- 14.2.10 R Where a credit derivative included in the *trading book* forms part of an internal hedge and the credit protection is recognised for the purposes of the calculation of the *credit risk capital component*, there is deemed to be no counterparty risk arising from the position in the credit derivative.

[**Note:** *CAD Annex II point 11*]

Calculation

- 14.2.11 R Subject to *BIPRU 14.2.3R* to *BIPRU 14.2.5R* and *BIPRU 14.2.14R* to *BIPRU 14.2.17R*, a *firm* must calculate *exposure* values and *risk weighted exposure amounts* for the *exposures* falling under *BIPRU 14.2.2R(1)* to (5) in accordance with:

- (1) the *standardised approach* to credit risk; or
- (2) if the *firm* has an *IRB permission*, the *IRB approach* in accordance with the terms of the *firm's IRB permission*.

[Note: CAD Annex II point 6]

14.2.12 G For the purpose of calculating counterparty *exposure* values for *financial derivative instruments*, *securities financing transactions* and *long settlement transactions*, or for *credit risk mitigation*, the effect of BIPRU 14.2.11R is to direct a *firm* to BIPRU 13 or BIPRU 5 as appropriate.

14.2.13 R A *firm* must calculate the capital requirement for the purposes of BIPRU 14.2.2R as 8% of the total *risk weighted exposure amounts*.

[Note: CAD Annex II point 12]

Collateral

14.2.14 R For the purposes of BIPRU 14.2.11R, in calculating *risk weighted exposure amounts* a *firm* must not use the *financial collateral simple method* for the recognition of the effects of financial collateral.

[Note: CAD Annex II point 8]

14.2.15 R For the purposes of BIPRU 14.2.11R:

- (1) in the case of *repurchase transactions* and *securities or commodities lending or borrowing transactions* booked in the *trading book*, all *CRD financial instruments* and *commodities* that are eligible to be included in the *trading book* may be recognised as eligible collateral;
- (2) for *exposures* due to *financial derivative instruments* and *long settlement transactions* booked in the *trading book*, *commodities* that are eligible to be included in the *trading book* may also be recognised as eligible collateral;
- (3) for the purposes of calculating volatility adjustments where such *CAD financial instruments* or *commodities* which are not eligible under BIPRU 5 and BIPRU 4.10 are lent, sold or provided, or borrowed, purchased or received by way of collateral or otherwise under such a transaction, and the *firm* is using the *supervisory volatility adjustments approach*, such instruments and *commodities* must be treated in the same way as non-main index equities listed on a *recognised investment exchange* or a *designated investment exchange*.

[Note: CAD Annex II point 9 (part)]

14.2.16 R (1) Where a *firm* is using the *own estimates of volatility adjustments approach* in respect of *CAD financial instruments* or *commodities*

which are not eligible under *BIPRU 5* and *BIPRU 4.10* it must calculate volatility adjustments for each individual item.

- (2) Where a *firm* is using the *master netting agreement internal models approach* set out in *BIPRU 5*, it may also apply this approach in the *trading book*.

[**Note:** *CAD Annex II point 9 (part)*]

14.2.17 R For the purposes of *BIPRU 14.2.11R*, in relation to the recognition of master netting agreements covering *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* netting across positions in the *trading book* and the *non-trading book* may only be recognised when the netted transactions fulfil the following conditions:

- (1) all transactions are marked to market daily;
- (2) any items borrowed, purchased or received under the transactions may be recognised as eligible financial collateral under *BIPRU 5* and *BIPRU 4.10* without the application of *BIPRU 14.2.14R* to *BIPRU 14.2.15R*.

[**Note:** *CAD Annex II point 9 (part)*]

Treatment of expected loss amounts under the IRB approach

14.2.18 R Where a *firm* calculates *risk weighted exposure amounts* for the purposes of *BIPRU 14* in accordance with the *IRB approach*, then for the purposes of the calculation provided for in *BIPRU 4.4.79R* (Double default), the following apply:

- (1) value adjustments made to take account of the credit quality of the counterparty may be included in the sum of value adjustments and provisions made for the *exposures* indicated in *BIPRU 14*; and
- (2) unless the *firm's IRB permission* does not permit it, if the credit risk of the counterparty is adequately taken into account in the valuation of a position included in the *trading book* the *expected loss* amount for the counterparty *risk exposure* must be zero.

[**Note:** *CAD Article 17(1)*]

14.2.19 R For the purposes of *BIPRU 14.2.18R(1)*, for such a *firm*, the value adjustments referred to in *BIPRU 14.2.18R(1)* must not be included in *capital resources* other than in accordance with *BIPRU 14.2.18R(1)*.

Exposures to recognised third-country investment firms, recognised clearing houses and designated investment exchanges

14.2.20 R For the purposes of the calculation of the *counterparty risk capital component*, without prejudice to *BIPRU 13.3.13R* and *BIPRU 13.8.10R*

(Exposure to a central counterparty) *exposures to recognised third-country investment firms* and *exposures to recognised clearing houses and designated investment exchanges* must be treated as exposures to *institutions*.

[Note: CAD Article 40]

Netting of trading book exposures against non-trading book exposures

- 14.2.21 R For the purposes of *counterparty credit risk*, a *firm* may net *exposures* arising from items in the *trading book* against *exposures* arising from items in the *non-trading book*.
- 14.2.22 R Where a *firm* carries out netting under BIPRU 14.2.21R, it must allocate the net *exposure* to:
- (1) the *trading book* for the purposes of the calculation under BIPRU 14.2.11R, if the gross *trading book exposures* exceed gross *non-trading book exposures*; and
 - (2) the *non-trading book* for the purposes of BIPRU 13, if the gross *non-trading book exposures* exceed gross *trading book exposures*.
- 14.2.23 R A *firm* may only net *exposures* under BIPRU 14.2.21R if it continues to meet other *GENPRU* and *BIPRU* requirements applicable to the *trading book* or *non-trading book* in respect of those *exposures*.
- 14.2.24 G For example, in relation to BIPRU 14.2.23R, collateral which is eligible only against *trading book exposures* will not be applicable against *non-trading book exposures*; and the large *exposures* limits on *non-trading book* positions will also remain applicable.

14.3 Unsettled transactions

Scope

14.3.1 R *BIPRU 14.3 applies in respect of items in the trading book and the non-trading book.*

14.3.2 G The capital requirement for unsettled transactions is an element of the counterparty risk capital component set out in *BIPRU 14.2.1R*.

Calculation

14.3.3 R In the case of transactions in which debt instruments, equities, *foreign currencies* and *commodities* (excluding *repurchase agreements* and *reverse repurchase agreements* and *securities or commodities lending* and *securities or commodities borrowing*) are unsettled after their due delivery dates, a *firm* must calculate the price difference to which it is exposed, being the difference between the agreed settlement price for the debt instrument, equity, *foreign currency* or *commodity* in question and its *current market value*, where the difference could involve a loss for the *firm*.

[**Note:** *CAD Annex II point 1 (part)*]

14.3.4 R A *firm* must multiply the price difference calculated under *BIPRU 14.3.2R* by the appropriate factor in column A of the Table in *BIPRU 14.3.4R* in order to calculate its capital requirement for the purposes of *BIPRU 14.3*.

[**Note:** *CAD Annex II point 1 (part)*]

Table: Factors for the multiplication of price differences

14.3.5 R This table belongs to *BIPRU 14.3.4R*

Number of working days after due settlement date	Column A (%)
5 — 15	8
16 — 30	50
31 — 45	75
46 or more	100

[Note: CAD Annex II Table 1]

- 14.3.5 G In cases of a system wide failure of a settlement or clearing system, a *firm* should refer to the emergency provisions in *GEN* 1.3. Where the requirements of *GEN* 1.3.2R are met, until the situation is rectified failure of a counterparty to settle a trade will not be deemed a default for purposes of credit risk.

[Note: CAD Annex II point 4]

14.4 Free deliveries

Scope

14.4.1 R *BIPRU* 14.4 applies in respect of items in the *trading book* and the *non-trading book*.

14.4.2 R A *firm* must hold *capital resources* with respect to a *free delivery*, as set out in the Table in *BIPRU* 14.4.3R, if:

- (1) it has paid for *securities, foreign currencies* or *commodities* before receiving them or it has delivered *securities foreign currencies* or *commodities* before receiving payment for them; and
- (2) in the case of cross-border transactions, one day or more has elapsed since it made that payment or delivery.

[**Note:** *CAD* Annex II point 2]

Exposure

Table: Capital treatment for free deliveries

14.4.3 R This table belongs to *BIPRU* 14.4.2R.

Transaction Type	Up to first contractual <i>payment leg</i> or delivery leg	From first contractual <i>payment leg</i> or delivery leg up to four days after second contractual <i>payment leg</i> or delivery leg	From 5 business days post second contractual <i>payment leg</i> or delivery leg until extinction of the transaction
<i>Free delivery</i>	No capital charge in the <i>trading book</i>	Treat as an <i>exposure</i>	Deduct value transferred plus current positive <i>exposure</i> from <i>capital resources</i>

[**Note:** *CAD* Annex II Table 2]

- 14.4.4 R (1) In the case of the *non-trading book*, a *firm* must treat an *exposure* falling into columns 2 and 3 of the table in *BIPRU* 14.4.3R in accordance with the relevant provisions of the *standardised approach* to credit risk or the *IRB approach*, as the case may be.
- (2) In the case of the *trading book*, a *firm* must apply the treatment set out in *BIPRU* 14.4.5R.

[**Note:** *CAD* Annex II point 3 (part)]

- 14.4.5 R (1) In applying a *risk weight* to *free delivery exposures* treated according to column 3 of the table in *BIPRU* 14.4.3R, a *firm* using the *IRB approach* may assign *PDs* to *counterparties*, for which they have no other *non-trading book exposure*, on the basis of the counterparty's external rating.
- (2) A *firm* using own estimates of *LGDs* may apply the *LGD* set out in *BIPRU* 4.4.34R to *BIPRU* 4.4.35R (*IRB* foundation approach: *LGDs*) to *free delivery exposures* treated according to column 3 of the table in *BIPRU* 14.4.3R, provided that it applies it to all such *exposures*.
- (3) Alternatively, a *firm* using the *IRB approach* may apply the *risk weights*, as set out in the *standardised approach* to credit risk provided that it applies them to all such *exposures* or may apply a 100% *risk weight* to all such *exposures*.

[**Note:** *CAD* Annex II point 3 (part)]

- 14.4.6 R If the amount of positive *exposure* resulting from *free delivery* transactions is not material, a *firm* may apply a *risk weight* of 100% to these *exposures*.

- 14.4.7 G In cases of a system wide failure of a settlement or clearing system, a *firm* should refer to the emergency provisions in *GEN* 1.3. Where the requirements of *GEN* 1.3.2R are met, until the situation is rectified failure of a counterparty to settle a trade will not be deemed a default for purposes of credit risk.

[**Note:** *CAD* Annex II point 4]

THE PRUDENTIAL SOURCEBOOK FOR INSURERS INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 141 (Insurance business rules);
 - (3) section 149 (Evidential provisions);
 - (4) section 150(2) (Actions for damages);
 - (5) section 156 (General supplementary powers);
 - (6) section 157(1) (Guidance);
 - (7) section 318(1) (Exercise of powers through Council).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 31 December 2006.

Amendments to the Handbook

- D. The Financial Services Authority creates the Prudential Sourcebook for Insurers (INSPRU) to form a new module within the Prudential Standards block of its Handbook of Rules and Guidance in accordance with the following provisions:
- (1) the provisions of the Integrated Prudential sourcebook (PRU) and the Lloyd's sourcebook (LLD) listed in column (2) of the Table in Annex A to this instrument are redesignated in accordance with the corresponding entry in column (1) of the Table in Annex A;
 - (2) the provisions in (1) are restated and amended so that they read as set out in Annex B to this instrument;
 - (3) the Financial Services Authority makes the rules and gives the guidance designated as "New text" in column (2) of the Table in Annex A; and
 - (4) all the above provisions are combined so that they appear in the appropriate numerical order.

Citation

- E. This instrument may be cited as the Prudential Sourcebook for Insurers Instrument 2006.

By order of the Board
25 October 2006

Annex A
Creation of INSPRU

- (1) The table referred to in paragraph D of this instrument is as follows.
- (2) Where a reference in the Table in this Annex A is to a chapter and section only, the whole of the section listed in column (2) is redesignated as set out in column (1). The module, chapter and section of each provision is redesignated as set out in column (1); otherwise the numbering of the paragraphs in the redesignated section remains the same, subject to the addition of those paragraphs identified in column (2) as "New text".

Table – Creation of INSPRU

INSPRU	Current designation in PRU or LLD
1.1	PRU 7.2

Annex B

Text of INSPRU

In this Annex, new text is not underlined and text that is deleted is not shown.

1.1 Capital resources requirements and technical provisions for insurance business

Application

- 1.1.1 R *INSPRU* 1.1 applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 1.1.2 R
- (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
 - (2) Where a *firm* carries on both *long-term insurance business* and *general insurance business*, this section applies separately to each type of business.
- 1.1.3 R For a *non-EEA insurer* with a *branch* in the *United Kingdom* whose *insurance business* in the *United Kingdom* is not restricted to *reinsurance* (other than an *EEA-deposit insurer*, a *Swiss general insurer* or a *UK-deposit insurer*):
- (1) the part of this section headed "Capital requirements for insurers" (*INSPRU* 1.1.43G to *INSPRU* 1.1.92BG) applies to its world-wide activities;
 - (2) the parts of this section headed:
 - (a) "Establishing technical provisions" (*INSPRU* 1.1.12R to *INSPRU* 1.1.19G);
 - (b) "Reinsurance and analogous non-reinsurance financing agreements: risk transfer principle" (*INSPRU* 1.1.19AR to *INSPRU* 1.1.19FG);
 - (c) "Assets of a value sufficient to cover technical provisions and other liabilities" (*INSPRU* 1.1.20R to *INSPRU* 1.1.29G);
 - (d) "Matching of assets and liabilities" (*INSPRU* 1.1.34R to *INSPRU* 1.1.40G); and
 - (e) "Premiums for new business" (*INSPRU* 1.1.41R to *INSPRU* 1.1.42G);apply separately in respect of its world-wide activities and its activities carried on from a *branch* in the *United Kingdom*; and
 - (3) the part of this section headed "Localisation" (*INSPRU* 1.1.30R to *INSPRU* 1.1.33R) does not apply (see *INSPRU* 1.5 (Internal contagion risk)).

- 1.1.4 R For an *EEA-deposit insurer* or a *Swiss general insurer*:
- (1) the parts of this section headed:
 - (a) "Establishing technical provisions" (*INSPRU 1.1.12R to INSPRU 1.1.19G*);
 - (b) "Reinsurance and analogous non-reinsurance financing agreements: risk transfer principle" (*INSPRU 1.1.19AR to INSPRU 1.1.19FG*);
 - (c) "Assets of a value sufficient to cover technical provisions and other liabilities" (*INSPRU 1.1.20R to INSPRU 1.1.29G*);
 - (d) "Matching of assets and liabilities" (*INSPRU 1.1.34R to INSPRU 1.1.40G*); and
 - (e) "Premiums for new business" (*INSPRU 1.1.41R to INSPRU 1.1.42G*);

apply in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*; and
 - (2) the parts of this section headed "Capital requirements for insurers" (*INSPRU 1.1.43G to INSPRU 1.1.92BG*) and "Localisation" (*INSPRU 1.1.30R to INSPRU 1.1.33R*) do not apply.

- 1.1.5 R For a *UK-deposit insurer*:
- (1) the part of this section headed "Capital requirements for insurers" (*INSPRU 1.1.43G to INSPRU 1.1.92BG*) applies to its world-wide activities;
 - (2) the parts of this section headed:
 - (a) "Establishing technical provisions" (*INSPRU 1.1.12R to INSPRU 1.1.19G*);
 - (b) "Reinsurance and analogous non-reinsurance financing agreements: risk transfer principle" (*INSPRU 1.1.19AR to INSPRU 1.1.19FG*);
 - (c) "Assets of a value sufficient to cover technical provisions and other liabilities" (*INSPRU 1.1.20R to INSPRU 1.1.29G*);
 - (d) "Matching of assets and liabilities" (*INSPRU 1.1.34R to INSPRU 1.1.40G*); and
 - (e) "Premiums for new business" (*INSPRU 1.1.41R to INSPRU 1.1.42G*);

apply separately in respect of its world-wide activities and its

activities carried on from *branches* in *EEA States*; and

(3) the part of this section headed "Localisation" (*INSPRU* 1.1.30R to *INSPRU* 1.1.33R) does not apply (see *INSPRU* 1.5 (Internal contagion risk)).

1.1.6 G This section may apply in cases where a *firm* has its head office in another *EEA State* but is neither an *incoming EEA firm* nor an *incoming Treaty firm*; this could arise in the case of a *non-directive mutual*.

Purpose

1.1.7 G *INSPRU* 1.1 has the aim of reducing the risk that a *firm* may fail to meet its liabilities to its *policyholders* as a result of insurance risk, that is, the risk that arises from the inherent uncertainties as to the occurrence, amount and timing of insurance liabilities.

1.1.8 G This section requires that the *technical provisions* that *firms* establish are adequate to meet their liabilities to *policyholders* under *contracts of insurance*. It also requires that *firms* hold assets of a value sufficient to cover their liabilities, including *technical provisions*, and that there is suitable matching of assets and liabilities. *Technical provisions* are the on-balance sheet provisions made by a *firm* in respect of liabilities arising under or in connection with *contracts of insurance*. There are different *rules* and *guidance* applicable to the calculation of *technical provisions* for *general insurance business* and for *long-term insurance business*.

1.1.9 G This section implements requirements of the *Insurance Directives* for both *general insurance business* and *long-term insurance business* with regard to the *technical provisions*. The relevant articles of the Directives include:
(1) article 15 of the *First Non-Life Directive*, as substituted by article 17 of the *Third Non-Life Directive*; and
(2) article 20 of the *Consolidated Life Directive* (this Directive consolidates the provisions of the previous *First, Second* and *Third Life Directives*).

1.1.10 G This section also sets out detailed *rules* and *guidance* on the calculation of the following elements of a *firm's capital resources requirement (CRR)* (see *GENPRU* 2.1):

- (1) the *general insurance capital requirement*; and
- (2) the *long-term insurance capital requirement*.

1.1.11 G These requirements are dealt with in the part of this section headed "Capital requirements for insurers" (see *INSPRU* 1.1.43G to *INSPRU* 1.1.91R). That part of this section also contains *rules* about the calculation of the *insurance-related capital requirement*, which forms part of the *enhanced capital requirement* for *firms* carrying on *general insurance business*. The *asset-related capital requirement* for *firms* carrying on *general insurance business* is set out in *INSPRU* 2.2.

Establishing technical provisions

- 1.1.12 R For *general insurance business*, a *firm* must establish adequate technical provisions:
- (1) in accordance with the *rules* in *INSPRU* 1.4 for *equalisation provisions*; and
 - (2) otherwise, in accordance with *GENPRU* 1.3.4R.
- 1.1.13 G For *general insurance business*, the *technical provisions* include outstanding *claims provisions*, *unearned premiums provisions*, unexpired risk provisions and *equalisation provisions*. These provisions take into account the expected ultimate cost of *claims*, including those not yet incurred, related expenses and include an allowance for smoothing *claims* (the *equalisation provision*).
- 1.1.14 G *Discounting* (that is discounting for the time value of money) *general insurance business technical provisions* may be carried out only in limited circumstances and on a prudent basis (see *GENPRU* 2.2.107R and paragraph 48 of the *insurance accounts rules*). The fact that the expected liabilities are generally not *discounted* helps to protect against risk from inherent uncertainty in the timing, but not necessarily the amount, of *claims*.
- 1.1.15 G For some categories of *general insurance business*, *equalisation provisions* are required. These ensure that a *firm* retains additional assets to provide some extra protection against uncertainty as to the amount of *claims*. *Equalisation provisions* are particularly suitable for volatile business, where *claims* in any future year may be subject to significant adverse deviation from recent or average expected *claims* experience, or where trends in *claims* experience may be subject to change. Such volatile *claims* experience arises in a number of types of business, for example, property, marine and aviation, nuclear, certain *non-proportional reinsurance treaty* business, and credit insurance. The *equalisation provisions* help to equalise fluctuations in loss ratios in future years (see *INSPRU* 1.4 (*Equalisation provisions*)).
- 1.1.16 R For *long-term insurance business*, a *firm* must establish adequate technical provisions in respect of its *long-term insurance contracts* as follows:
- (1) *mathematical reserves* in accordance with the *rules* and *guidance* in *INSPRU* 1.2 relating to such reserves, and with due regard to generally accepted actuarial practice; and
 - (2) for liabilities in respect of such contracts that have fallen due, in accordance with *GENPRU* 1.3.4R.
- 1.1.17 G *Rules* and *guidance* for calculating *mathematical reserves* are set out in *INSPRU* 1.2. *Firms* are advised by the *actuarial function* (see SUP 4) on the methods and assumptions to be used in calculating the *mathematical reserves*. The standards and guidance issued by the Board for Actuarial Standards to assist actuaries appointed to the *actuarial function* are important sources of evidence as to generally accepted actuarial practice, as

referred to in *INSPRU* 1.1.16R(1).

- 1.1.18 G For *long-term insurance business*, the *technical provisions* include the *mathematical reserves*. These are actuarial estimates of a *firm's* liabilities in respect of future benefits due to *policyholders*, including bonuses already declared. The *mathematical reserves* may be reduced by the actuarial value of that component of future *premiums* attributable to meeting future liabilities (see *INSPRU* 1.2 (*Mathematical reserves*)).
- 1.1.19 G For *long-term insurance business*, the *mathematical reserves* are typically valued on a discounted basis but include valuation margins intended to provide protection against adverse deviations in experience (see *INSPRU* 1.2).

Reinsurance and analogous non-reinsurance financing agreements: risk transfer principle

- 1.1.19A R (1) A *firm* may only take credit for *reinsurance* if and to the extent that there has been an effective transfer of risk from the *firm* to a third party.
- (2) In *INSPRU* 1.1.19AR to *INSPRU* 1.1.19FG, references to *reinsurance* and contracts of *reinsurance* include:
- (a) all contracts of *reinsurance* with an *ISPV*; and
- (b) analogous non-*reinsurance* financing agreements.
- 1.1.19B R For the purposes of *INSPRU* 1.1.19AR(2)(b), analogous non-*reinsurance* financing agreements include contingent loans, securitisations and any other arrangements in respect of *contracts of insurance* that are analogous to contracts of *reinsurance* in terms of the risks transferred and the finance provided.
- 1.1.19C G There are a number of ways in which a *firm* may be able to take credit for *reinsurance* under the *rules* in *GENPRU* and *INSPRU*. Examples include:
- (1) treating the *reinsurer's* share of *technical provisions* as an *admissible asset* in accordance with *GENPRU* 2 Ann 7R;
- (2) reducing its solvency requirements in accordance with the deduction for *reinsurance* allowed in the calculation of the *general insurance capital requirement* or the *long-term insurance capital requirement* under *INSPRU* 1.1; and

- (3) bringing into account amounts receivable under the contract when valuing cash flows for the purpose of a prospective valuation of *mathematical reserves* under *INSPRU* 1.2. In particular, a contingent loan or other analogous non-*reinsurance* financing agreement may then give rise to an addition to *capital resources* as a positive valuation difference in accordance with *GENPRU* 2.2.105R.

1.1.19D G The amount of credit taken by a *firm* for a risk transferred should be measured by applying the standard methods for determining the regulatory balance sheet set out in *INSPRU*. For example, where credit is being taken so as to reduce *technical provisions*, the amount of that credit should reflect the difference in *technical provisions* that arises from changing the assumptions used to reflect the risk transferred.

1.1.19E G For the purposes of *INSPRU* 1.1.19AR(1), the transfer of risk from the *firm* to the third party should be effective in all circumstances in which the *firm* may wish to rely upon the transfer. Examples of factors which the *firm* should take into account in assessing whether the transaction effectively transfers risk and the extent of that transfer include:

- (1) whether the documentation associated with the *reinsurance* reflects the economic substance of the transaction;
- (2) whether the extent of the risk transfer is clearly defined and incontrovertible;
- (3) whether the transaction contains any terms or conditions the fulfilment of which is outside the direct control of the *firm*. Such terms or conditions may include those which:
 - (a) would allow the third party unilaterally to cancel the transaction, except for the non-payment of monies due from the *firm* to the third party under the contract; or
 - (b) would increase the effective cost of the transaction to the *firm* in response to an increased likelihood of the third party experiencing losses under the transaction; or
 - (c) would oblige the *firm* to alter the risk that had been transferred with the purpose of reducing the likelihood of the third party experiencing losses under the transaction; or
 - (d) would allow for the termination of the transaction due to an increased likelihood of the third party experiencing losses under the transaction; or
 - (e) could prevent the third party from being obliged to pay out in a timely manner any monies due under the transaction; or

- (f) could allow the maturity of the transaction to be reduced;
- (4) whether the transaction is legally effective and enforceable in all relevant jurisdictions.
- 1.1.19F G A *firm* should also take into account circumstances in which the benefit to the *firm* of the transfer of risk could be undermined. For instance, where the *firm*, with a view to reducing potential or actual losses to third parties, provides support to the transaction, including support beyond its contractual obligations (implicit support). Another example of a situation where the *firm* should consider whether it should take reduced credit for a transaction is where it has invested in the bonds issued by an *ISPV* with which it has reinsured risks.
- Assets of a value sufficient to cover technical provisions and other liabilities
- 1.1.20 R A *firm* which is not a *composite firm* must hold *admissible assets* of a value at least equal to the amount of:
- (1) the *technical provisions* that it is required to establish under *INSPRU* 1.1.12R or *INSPRU* 1.1.16R; and
- (2) its other *general insurance liabilities* or *long-term insurance liabilities*; but excluding *property-linked liabilities* and *index-linked liabilities* and the assets held to cover them under *INSPRU* 3.1.57R and *INSPRU* 3.1.58R.
- 1.1.21 R A *composite firm* must ensure that:
- (1) it holds *admissible assets* separately identified in accordance with *INSPRU* 1.5.18R of a value at least equal to the amount of:
- (a) the *technical provisions* that it is required to establish under *INSPRU* 1.1.16R; and
- (b) its other *long-term insurance liabilities*;
- but excluding *property-linked liabilities* and *index-linked liabilities* and the assets held to cover them under *INSPRU* 3.1.57R and *INSPRU* 3.1.58R; and
- (2) it holds other *admissible assets* (other than those excluded under (1)) of a value at least equal to the amount of:
- (a) the *technical provisions* that it is required to establish under *INSPRU* 1.1.12R; and
- (b) its other *general insurance liabilities*.
- 1.1.22 G *INSPRU* 1.5 (Internal-contagion risk) sets out the *rules* and *guidance* on identifying and holding in a separate fund *long-term insurance assets*.
- 1.1.23 G When valuing assets for the purposes of *INSPRU* 1.1.20R and *INSPRU* 1.1.21R, a *firm* should bear in mind:
- (1) that the *technical provisions* and other *long-term insurance liabilities* or *general insurance liabilities* should be covered by *admissible assets* (see

GENPRU 2 Annex 7R); and

(2) the market and *counterparty* limits set out in *INSPRU 2.1* (Credit risk in insurance). *INSPRU 2.1* requires that a *firm* restrict to prudent levels its exposure to *reinsurer* and other *counterparties*, and, in particular, that for the purpose of its balance sheet, a *firm* must not take into account any exposure which exceeds the large exposure limits.

- 1.1.24 G *Rules and guidance* on the valuation of assets are set out in *GENPRU 1.3* (Valuation), including the treatment of *shares* in, and debts due from, *related undertakings* in *GENPRU 1.3.43R* to *GENPRU 1.3.54G*. *INSPRU 3.1* (Market risk in insurance) addresses *market risk* and sets out the matching requirements for linked assets and liabilities. *INSPRU 3.1* also sets out *rules and guidance* on the matching by currency of assets and liabilities, to reduce a *firm's* exposure to currency *market risk*.
- 1.1.25 R For the purpose of determining the value of assets available to meet *technical provisions* and other *long-term insurance liabilities* in accordance with *INSPRU 1.1.20R*, *INSPRU 1.1.21R*, *INSPRU 1.1.27R* and *INSPRU 1.1.28R*, no value is to be attributed to:
- (1) debts owed by *reinsurers*; or
 - (2) *claims*; or
 - (3) tax recoveries; or
 - (4) claims against *compensation funds*;
- to the extent already offset in the calculation of *technical provisions*.
- 1.1.26 G Certain debts and claims are excluded from *INSPRU 1.1.20R*, *INSPRU 1.1.21R*, *INSPRU 1.1.27R* and *INSPRU 1.1.28R* to avoid double-counting. The *rules and guidance* in *INSPRU 1.2* (*Mathematical reserves*) set out how a *firm* may offset debts and *claims* against liabilities in calculating the *mathematical reserves* required for *long-term insurance business*.
- 1.1.27 R A *firm* carrying on *long-term insurance business* must ensure that it has *admissible assets* in each of its *with-profits funds* of a value sufficient to cover:
- (1) the *technical provisions* in respect of all the business written in that *with-profits fund*; and
 - (2) its other *long-term insurance liabilities* in respect of that *with-profits fund*.
- 1.1.28 R In addition to complying with *INSPRU 1.1.27R*, a *realistic basis life firm* must also ensure that the *realistic value of assets* for each of its *with-profits funds* is at least equal to the *realistic value of liabilities* of that fund.
- 1.1.29 G *INSPRU 1.1.27R* and *INSPRU 1.1.28R* support the funding of *policyholder* benefits by requiring *firms* to maintain *admissible assets* in *with-profits funds* to cover the *technical provisions* and other *long-term insurance liabilities* relating to all the business in that fund and, in the case of a

realistic basis life firm, realistic assets to cover the realistic liabilities of the *with-profits insurance contracts* written in the fund.

Localisation (UK firms only)

- 1.1.30 R (1) Subject to (2), a *UK firm* must hold *admissible assets* held pursuant to *INSPRU 3.1.53R*:
- (a) (where the *admissible assets* cover *technical provisions* in pounds sterling), in any *EEA State*; and
- (b) (where the *admissible assets* cover *technical provisions* in any currency other than pounds sterling), in any *EEA State* or in the country of that currency.
- (2) In the case of a *community co-insurance operation* and a *relevant insurer*, the *admissible assets* covering *technical provisions* must be held in any *EEA State*.
- 1.1.31 G *INSPRU 1.5* (Internal contagion risk) sets out the *rules* and *guidance* on localisation for *firms* other than *UK firms*.
- 1.1.32 R *INSPRU 1.1.30R* does not apply to:
- (1) a *pure reinsurer*; or
- (2) debts owed by *reinsurers*; or
- (3) *insurance business* carried on by a *UK firm* outside the *EEA States*; or
- (4) *general insurance business class groups 3 and 4* in *IPRU(INS)*, Annex 11.2, Part II.
- 1.1.33 R For the purposes of *INSPRU 1.1.30R*:
- (1) a tangible asset is to be treated as held in the country or territory where it is situated;
- (2) an *admissible asset* consisting of a claim against a debtor is to be treated as held in any country or territory where it can be enforced by legal action;
- (3) a *listed security* is to be treated as held in any country or territory where there is a *regulated market* on which the *security* is dealt; and
- (4) a *security* which is not a *listed security* is to be treated as held in the country or territory in which the *issuer* has its head office.

Matching of assets and liabilities

- 1.1.34 R (1) Subject to (4), the assets held by a *firm* to cover its *technical provisions* and other *long-term insurance liabilities* or *general insurance liabilities* (see *INSPRU 1.1.20R* and *INSPRU 1.1.21R*) must:
- (a) have characteristics of safety, yield and marketability which are appropriate to the type of business carried on by the *firm*;
- (b) be diversified and adequately spread; and

(c) comply with (2).

(2) The assets referred to in (1) must, in addition to meeting the criteria set out in (1)(a) and (b), be of a sufficient amount, and of an appropriate currency and term, to ensure that the cash inflows from those assets will meet the expected cash outflows from the *firm's* insurance liabilities as they become due.

(3) For the purpose of (2), a *firm* must take into consideration in determining expected cash outflows any options which exist in the *firm's contracts of insurance*.

(4) (1) does not apply to:

(a) a *pure reinsurer*; or

(b) assets held to cover *index-linked liabilities* or *property-linked liabilities*, except that where the *linked long-term contract of insurance* in question includes a guarantee of investment performance or some other guaranteed benefit, (1) will nevertheless apply to assets held to cover that guaranteed element.

- 1.1.34A G *INSPRU* 1.1.34R is not applied to *pure reinsurers* because they are subject under *INSPRU* 3.1.61AR to the "prudent person" investment principles from the *Reinsurance Directive*.
- 1.1.35 G A *firm* should take account of the amount, currency and timing of its expected cash outflows in determining whether the assets it holds to cover its *technical provisions* and other *long-term insurance liabilities* or *general insurance liabilities* meet the requirements of *INSPRU* 1.1.34R(2).
- 1.1.36 G For the purpose of *INSPRU* 1.1.34R(2), the relevant cash inflows are those which the *firm* reasonably expects to receive from the *admissible assets* which it holds to cover its *technical provisions* and other *long-term insurance liabilities* or *general insurance liabilities*. A *firm* may receive cash inflows as a result of:
- (1) selling assets or closing out transactions;
 - (2) holding assets that generate dividends, interest or other income; and
 - (3) receiving future *premiums* for existing business.
- 1.1.37 G Anticipated cash inflows from future new business should not be included, for example where the *customer* has not yet contracted to pay the *premium*, and where the associated liabilities and potential cash outflows should also not be included.
- 1.1.38 G A *firm* should compare cash inflows and outflows based on current expectations of amounts and timings. Current market expectations of future asset values, interest rates and currency exchange rates should be used. Where inflows are received in a currency different from that in which outflows are to be paid, account should be taken of the cost of converting the currency received.

- 1.1.39 G In considering the value and suitability of assets required to ensure that the *firm's* liabilities are met as they become due, a *firm* should take account of the risk of default on inflows from those assets, and other risks that may mean that future inflows are reduced relative to outflows.
- 1.1.40 G *INSPRU* 1.1.20R lays down a general requirement for a *firm* that carries on *long-term insurance business* to hold *admissible assets* that are of a value sufficient to cover its *technical provisions* and other *long-term insurance liabilities*. The *INSPRU* 1.1.34R(2) requirement to match liabilities with assets that allow cash outflows to be met with suitable inflows as the outflows become due may mean that a *firm* has to hold assets of a value greater than would otherwise be required by the general *rule* in *INSPRU* 1.1.20R.

Premiums for new business

- 1.1.41 R A *firm* must not enter into a *long-term insurance contract* unless it is satisfied on reasonable actuarial assumptions that:
- (1) the *premiums* receivable and the investment income expected to be earned from those *premiums*; and
 - (2) the *reinsurance* arrangements made in respect of the risk or risks covered by that new contract are sufficient to enable it, when taken together with the *firm's* other resources, to:
 - (a) establish adequate *technical provisions* as required by *INSPRU* 1.1.16R;
 - (b) hold *admissible assets* of a value at least equal to the amount of the *technical provisions* and other *long-term insurance liabilities* as required by *INSPRU* 1.1.20R to *INSPRU* 1.1.28R; and
 - (c) maintain adequate overall financial resources as required by the *overall financial adequacy rule* .
- 1.1.42 G For the purposes of *INSPRU* 1.1.41R, the adequacy of *premiums* may be assessed in the context of a *firm's* total portfolio of business and its other resources. It thus does not prevent a *firm* writing loss leaders nor writing contracts which might incur large losses, but only if the *firm* can meet the losses that might reasonably arise, including those that would arise from an event specifically insured against.

Capital requirements for insurers

- 1.1.43 G (1) *GENPRU* 2.1.13R requires a *firm* to maintain *capital resources* equal to or in excess of its *capital resources requirement (CRR)*. *GENPRU* 2.1 sets out the overall framework of the *CRR*; in particular, *GENPRU* 2.1.17R requires that for a *firm* carrying on *general insurance business* the *CRR* is equal to the *minimum capital requirement (MCR)*. *GENPRU* 2.1.18R requires that for *realistic basis life firms* the *CRR* is the higher of the *MCR* and the *ECR*. *GENPRU* 2.1.23R requires that for *regulatory basis only life firms* the *CRR* is equal to the *MCR*.
- (2) For non-life *firms* the *MCR* represents the *minimum capital requirement*

(or margin of solvency) prescribed by the *Insurance Directives*. GENPRU 2.1.24R provides that, for a *firm* carrying on *general insurance business*, the *MCR* in respect of that business is the higher of the *base capital resources requirement* for *general insurance business* applicable to that *firm* and the *general insurance capital requirement*. GENPRU 2.1.25R provides that, for a *firm* carrying on *long-term insurance business*, the *MCR* in respect of that business is the higher of the *base capital resources requirement* for *long-term insurance business* applicable to that *firm* and the sum of the *long-term insurance capital requirement* and the *resilience capital requirement*. As specified in GENPRU 2.1.14R, a *firm* carrying on both *general insurance business* and *long-term insurance business* must apply GENPRU 2.1.13R (referred to in paragraph (1) above) separately to its *general insurance business* and its *long-term insurance business*.

(3) The calculation of the *general insurance capital requirement* is set out in INSPRU 1.1.44G to INSPRU 1.1.72R below. INSPRU 1.1.73G to INSPRU 1.1.79R set out the calculation of the *insurance-related capital requirement* for non-life *firms*. The calculation of the *long-term insurance capital requirement* is set out in INSPRU 1.1.80G to INSPRU 1.1.91R below.

General insurance capital requirement

- 1.1.44 G In relation to the *MCR* (see INSPRU 1.1.43G), GENPRU 2.1.34R requires a *firm* to calculate its *general insurance capital requirement (GICR)* as the highest of the *premiums amount*, the *claims amount*, and the *brought forward amount*. The elements for this computation are set out in INSPRU 1.1 as follows:
- (1) the *premiums amount* in INSPRU 1.1.45R;
 - (2) the *claims amount* in INSPRU 1.1.47R; and
 - (3) the *brought forward amount* in INSPRU 1.1.51R.

The premiums amount

- 1.1.45 R The *premiums amount* is:
- (1) 18% of the *gross adjusted premiums amount*; less 2% of the amount, if any, by which the *gross adjusted premiums amount* exceeds €53.1 million; multiplied by
 - (2) the reinsurance ratio set out in INSPRU 1.1.54R.

- 1.1.46 G *Rules and guidance* as to how the *gross adjusted premiums amount* is to be calculated are set out in INSPRU 1.1.56R to INSPRU 1.1.59G.

The claims amount

- 1.1.47 R The *claims amount* is:
- (1) 26% of the *gross adjusted claims amount*; less 3% of the amount, if any, by which the *gross adjusted claims amount* exceeds €37.2 million; multiplied by

(2) the reinsurance ratio set out in *INSPRU* 1.1.54R.

- 1.1.48 G *Rules and guidance* as to how the *gross adjusted claims amount* is to be calculated are set out in *INSPRU* 1.1.60R to *INSPRU* 1.1.65G.
- 1.1.49 G (1) Under the *Insurance Directives* the Euro amounts specified in *INSPRU* 1.1.45R(1) and *INSPRU* 1.1.47R(1) are subject to annual review. The relevant amounts will be increased by the percentage change in the European index of consumer prices (comprising all EU member states, as published by Eurostat) from 20 March 2002, to the relevant review date, rounded up to a multiple of €100,000, provided that where the percentage change since the last increase is less than 5%, no increase will take place.
- (2) No provision for the index-linking of these amounts is made by the *Reinsurance Directive*. However, to ensure consistency as between *pure reinsurers*, *mixed insurers* and other *insurers*, the *FSA* intends to amend the Euro amounts specified in *INSPRU* 1.1.45R(1) and *INSPRU* 1.1.47R(1) for all such *firms* when an index-linked increase is required by the *Insurance Directives*.
- 1.1.50 R For the purposes of *INSPRU* 1.1.45R(1) and *INSPRU* 1.1.47R(1), the exchange rate from the Euro to the pound sterling for each year beginning on 31 December is the rate applicable on the last day of the preceding October for which the exchange rates for the currencies of all the European Union member states were published in the Official Journal of the European Union.
- The brought forward amount
- 1.1.51 R The *brought forward amount* is the *general insurance capital requirement (GICR)* for the prior *financial year*, multiplied, if the ratio is less than one, by the ratio (expressed as a percentage) of:
- (1) the *technical provisions* (calculated net of *reinsurance*) for *claims* outstanding at the end of the prior *financial year*, determined in accordance with *INSPRU* 1.1.12R; to
- (2) the *technical provisions* (calculated net of *reinsurance*) for *claims* outstanding at the beginning of the prior *financial year*, determined in accordance with *INSPRU* 1.1.12R.
- 1.1.52 G The *brought forward amount* is the same as the *GICR* for the prior *financial year*, except where *claims* outstanding have fallen during that *financial year*. If they have fallen, the *brought forward amount* is itself reduced by the same percentage fall.
- 1.1.53 G If the *GICR* for the prior *financial year* is less than the *premiums amount* or the *claims amount*, then a *brought forward amount* is not required to be calculated.

Reinsurance ratio used in calculating the premiums amount and the claims

- amount
- 1.1.54 R The reinsurance ratio referred to in *INSPRU* 1.1.45R(2) and *INSPRU* 1.1.47R(2) is:
- (1) if the ratio lies between 50% and 100%, the ratio (expressed as a percentage) of:
- (a) the *claims* incurred (net of *reinsurance*) in the *financial year in question* and the two previous *financial years*; to
- (b) the gross *claims* incurred in that three-year period;
- (2) 50%, if the ratio calculated in (a) and (b) of (1) is 50% or less; and
- (3) 100%, if the ratio calculated in (a) and (b) of (1) is 100% or more.
- 1.1.54A G For the treatment of amounts recoverable from *ISPVs* when calculating the reinsurance ratio, see *INSPRU* 1.1.92AR and *INSPRU* 1.1.92BG.
- 1.1.55 G *Rules and guidance* as to how the net and gross *claims* are to be calculated are set out in *INSPRU* 1.1.66R to *INSPRU* 1.1.71R.
- Gross adjusted premiums amount used in calculating the premiums amount
- 1.1.56 R For the purpose of *INSPRU* 1.1.45R, the *gross adjusted premiums amount* is the higher of the *gross written premiums* and *gross earned premiums* (as adjusted in accordance with *INSPRU* 1.1.66R) for the *financial year in question*, adjusted by:
- (1) except for a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part IV permission* has not subsequently been varied to add back the *regulated activity* of *effecting contracts of insurance*, increasing by 50% the amount included in respect of the *premiums* for *general insurance business classes* 11, 12 and 13;
- (2) deducting 66.7% of the *premiums* for *actuarial health insurance* that meets the conditions set out in *INSPRU* 1.1.72R; and
- (3) multiplying the resulting figure by 12 and dividing by the number of months in the *financial year*. For the purposes of this calculation, the number of months in the *financial year* is the number of complete calendar months in the *financial year* plus any fractions of a month at the beginning and the end of the *financial year*.
- 1.1.57 G A *firm* may use statistical methods in order to allocate *premiums* in respect of the *classes* 11, 12 and 13 for the purposes of *INSPRU* 1.1.56R.
- 1.1.58 G *General insurance business classes* 11, 12 and 13 are, respectively, the marine liability, aviation liability and general liability insurance classes.
- 1.1.59 G Where the *firm* did not carry on *insurance business* in the *financial year in question*, the *gross adjusted premiums amount*, and therefore the *premiums amount*, is nil.

- Gross adjusted claims amount used in calculating the claims amount
- 1.1.60 R For the purpose of *INSPRU* 1.1.47R and subject to *INSPRU* 1.1.62R, the *gross adjusted claims amount* is the amount of gross *claims* incurred (as determined in accordance with *INSPRU* 1.1.66R) over the reference period (as specified in *INSPRU* 1.1.63R) and adjusted by:
- (1) except for a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part IV permission* has not subsequently been varied to add back the *regulated activity of effecting contracts of insurance*, increasing by 50% the amount included in respect of the *claims* incurred for *general insurance business classes* 11, 12 and 13;
- (2) deducting 66.7% of the *claims* for *actuarial health insurance* that meets the conditions set out in *INSPRU* 1.1.72R; and
- (3) multiplying the resulting figure by 12 and dividing by the number of months in the reference period. For the purposes of this calculation, the number of months in the reference period is the number of complete calendar months in the reference period plus any fractions of a month at the beginning and the end of the reference period.
- 1.1.61 G A *firm* may use statistical methods in order to allocate *claims* in respect of *classes* 11, 12 and 13 for the purposes of *INSPRU* 1.1.60R.
- 1.1.62 R For the purposes of *INSPRU* 1.1.47R, in relation to *general insurance business class* 18, the amount of *claims* incurred used to calculate the *gross adjusted claims amount* must be the amount of costs recorded in the *firm's* books in the reference period as borne by the *firm* (whether or not borne in the reference period) in respect of the assistance given.
- 1.1.63 R (1) Except in those cases where paragraph (2) applies, the reference period to be used in *INSPRU* 1.1.60R and *INSPRU* 1.1.62R must be:
- (a) the *financial year in question* and the two previous *financial years*; or
- (b) the period the *firm* had been in existence at the end of the *financial year in question*, if shorter.
- (2) In the case of a *firm* which underwrites only one or more of the *general insurance business* risks of credit, storm, hail or frost (including other business written in connection with such risks), the reference period to be used must be:
- (a) the *financial year in question* and the six previous *financial years*; or
- (b) the period the *firm* had been in existence at the end of the *financial year in question*, if shorter.
- 1.1.64 G The classification of the risks referred to in *INSPRU* 1.1.63R(2) is as follows: credit - as included in *general insurance business class* 14; storm - as included in *general insurance business class* 8; hail - as included in *general insurance business class* 9; and frost - as included in *general insurance business class* 9.

- 1.1.65 G Where the *firm* did not carry on *insurance business* in the reference period, the *gross adjusted claims amount*, and therefore the *claims amount*, is nil.
- Accounting for premiums and claims
- 1.1.66 R For the purposes of *INSPRU* 1.1.54R, *INSPRU* 1.1.56R, *INSPRU* 1.1.60R and *INSPRU* 1.1.62R, amounts of *premiums* and *claims* must be:
- (1) determined in accordance with the *insurance accounts rules* or the Friendly Societies (Accounts and Related Provisions) Regulations 1994, as appropriate; and
- (2) adjusted for transfers that were approved by the relevant authority (or became effective where approval by an authority was not required) before the end of the *financial year in question*:
- (a) to exclude any amount included in, or adjustment made to, *premiums* and *claims* to reflect the consideration for a transfer of *contracts of insurance* to or from the *firm*;
- (b) to exclude *premiums* and *claims* which arose from *contracts of insurance* that have been transferred by the *firm* to another body; and
- (c) to account for *premiums* and *claims* which arose from *contracts of insurance* that have been transferred to the *firm* from another body as if they were receivable by or payable to the *firm*.
- 1.1.67 G To ensure that all rights and obligations under a *contract of insurance* are transferred, a number of alternative mechanisms could be used. These are: an *insurance business transfer* under Part VII of the *Act*; under earlier *United Kingdom* insurance legislation; under equivalent foreign legislation; or by novation of contracts. The term "relevant authority" in paragraph (2) of *INSPRU* 1.1.66R may refer to whatever body has responsibility in a country, whether within or outside the *EEA*, for the approval of transfers of portfolios of *contracts of insurance*; the body may be a supervisory authority for financial services as such or it may be a judicial authority which has the necessary responsibility.
- 1.1.68 G *INSPRU* 1.1.66R(2)(b) requires a *firm*, for the purpose of calculating its *GICR*, to account for *contracts of insurance* transferred by it to another body as if it had never written those contracts. All amounts of *premiums* and *claims* arising in respect of those contracts are excluded, including amounts that arose in the *financial year in question* or previous *financial years*.
- 1.1.69 G Conversely, *INSPRU* 1.1.66R(2)(c) requires a *firm*, for the purpose of calculating its *GICR*, to account for *contracts of insurance* transferred to it by another body as if it had been responsible for those contracts from inception and not merely from the date of transfer. All amounts of *premiums* and *claims* that arose from those contracts are included even where they arose prior to the date of transfer and were, in fact, receivable by or payable to the other body.
- 1.1.70 G For both transfers to and from the *firm*, the consideration receivable or payable in respect of the transfer is excluded from *premiums* and *claims* in

order to avoid double counting.

- 1.1.71 R Where there has been a significant change in the business portfolio of the *firm* since the end of the *financial year in question*, for example, a line of business has been transferred to another *firm*, or the *firm* no longer carries on a particular *class of insurance business*, the *gross adjusted premiums amount* and the *gross adjusted claims amount* must both be recalculated to take into account the impact of this change. The recalculation must take into account the requirements of the *insurance accounts rules* or the Friendly Societies (Accounts and Related Provisions) Regulations 1994, as appropriate.

Actuarial health insurance

- 1.1.72 R The conditions referred to in *INSPRU 1.1.56R(2)* and *INSPRU 1.1.60R(2)* are that:
- (1) the health insurance is underwritten on a similar technical basis to that of life insurance;
 - (2) the *premiums* paid are calculated on the basis of sickness tables according to the mathematical method applied in insurance;
 - (3) a provision is set up for increasing age;
 - (4) an additional *premium* is collected in order to set up a safety margin of an appropriate amount;
 - (5) it is not possible for the *firm* to cancel the contract after the end of the third year of insurance; and
 - (6) the contract provides for the possibility of increasing *premiums* or reducing payments even for current contracts.

Insurance-related capital requirement (general insurance business only)

- 1.1.73 G *INSPRU 7.1.11R* requires *firms* carrying on *general insurance business*, other than a *non-directive insurer*, to calculate their *ECR* as the sum of the *asset-related capital requirement* and the *insurance-related capital requirement* less the *firm's equalisation provisions*. The *ECR* for *firms* carrying on *general insurance business* is an indicative measure of the *capital resources* that a *firm* may need to hold based on risk sensitive calculations applied to its business profile. For *firms* carrying on *general insurance business*, the *FSA* will use the *ECR* as a benchmark for *individual capital guidance* for a *firm* carrying on *general insurance business*. Details of the calculation of the *asset-related capital requirement* are set out in *INSPRU 2.2*. Details of the calculation of the *insurance-related capital requirement* are set out in *INSPRU 1.1.76R* to *INSPRU 1.1.79R*.

- 1.1.74 G The *insurance-related capital requirement* is a measure of the capital that a *firm* should hold against the risk of:
- (1) an adverse movement in the value of a *firm's* liabilities, to recognise that there may be substantial volatility in *claims* and other *technical provisions* made by the *firm*. Such variations may be due to inflationary increases,

interest rate changes, movements in the underlying provisions themselves, changes in expense costs, inadequate rate pricing or *premium* collections (or both) from intermediaries differing from projected assumptions; and

(2) the *premiums* a *firm* charges in respect of particular business not being adequate to fund future liabilities arising from that business.

- 1.1.75 G The *insurance-related capital requirement* is calculated by applying capital charge factors, expressed as a percentage, to the value of the *net written premiums* and the *technical provisions* in respect of different classes of business. *Firms* should refer to *GENPRU* 1.3.4R which sets out how a *firm* must recognise and value assets and liabilities.

Calculation of the insurance-related capital requirement

- 1.1.76 R A *firm* must calculate its *insurance-related capital requirement* in accordance with *INSPRU* 1.1.77R.

- 1.1.77 R (1) The value of:
- (a) the *net written premiums*; and
 - (b) the *technical provisions*;
- in respect of each class of business listed in the table in *INSPRU* 1.1.79R must be multiplied by the corresponding capital charge factor.
- (2) If any amount which is to be multiplied by a capital charge factor is a negative amount, that amount shall be treated as zero.
- (3) The amounts resulting from multiplying the *net written premiums* in respect of each such class of business by the corresponding capital charge factor must be aggregated.
- (4) The amounts resulting from multiplying the *technical provisions* in respect of each such class of business by the corresponding capital charge factor must be aggregated.
- (5) The *insurance-related capital requirement* is the sum of the amounts calculated in accordance with (3) and (4).

- 1.1.78 R In *INSPRU* 1.1.77R references to *technical provisions* comprise:
- (1) outstanding *claims*;
 - (2) provisions for incurred but not reported (*IBNR*) *claims*;
 - (3) provisions for incurred but not enough reported (*IBNER*) *claims*;
 - (4) *unearned premium* reserves less *deferred acquisition costs*; and
 - (5) unexpired risk reserves;
- in each case net of *reinsurance* receivables.

- 1.1.79 R Table: Insurance-related Capital Charge Factors

Long-term insurance capital requirement

- 1.1.80 G *GENPRU 2.1.13R* requires an insurer to maintain *capital resources* equal to or in excess of its *capital resources requirement*. *GENPRU 2.1.18R* defines the *capital resources requirement* for a firm to which that rule applies (a realistic basis life firm) as the higher of the *MCR* and the *ECR*. For other firms carrying on long-term insurance business (regulatory basis only life firms), the *capital resources requirement* is equal to the *MCR*. Except where the *base capital resources requirement* is the higher requirement, the *MCR* in respect of long-term insurance business is the sum of the long-term insurance capital requirement (*LTICR*) and the *resilience capital requirement* (see *GENPRU 2.1.25R* and *GENPRU 2.1.26R*). *GENPRU 2.1.36R* defines the *LTICR* as the sum of the *insurance death risk, health risk and life protection reinsurance, expense risk, and market risk capital components* (see *INSPRU 1.1.81R* to *INSPRU 1.1.91R*). Rules and guidance about the *resilience capital requirement* are set out in *INSPRU 3.1.9G* to *INSPRU 3.1.26R*.

Insurance death risk capital component

- 1.1.81 R The *insurance death risk capital component* is the aggregate of the amounts which represent the fractions specified by *INSPRU* 1.1.82R of the capital at risk, defined in *INSPRU* 1.1.83R, for each category of *contracts of insurance* (as specified in *INSPRU* 1.1.81AR), in respect of those contracts where the capital at risk is not a negative figure, multiplied by the higher of:
- (1) 50%; and
 - (2) the ratio as at the end of the *financial year in question* of:
 - (a) the aggregate capital at risk in respect of that category of contracts net of *reinsurance* cessions; to
 - (b) the aggregate capital at risk in respect of that category of contracts gross of *reinsurance* cessions.
- 1.1.81A R For the purpose of *INSPRU* 1.1.81R, the categories of *contracts of insurance* are as follows:
- (1) contracts which fall in *long-term insurance business classes* I, II or IX; and
 - (2) contracts which fall in *long-term insurance business classes* III, VII or VIII.
- 1.1.82 R For the purpose of *INSPRU* 1.1.81R, the fraction is:
- (1) for *long-term insurance business classes* I, II and IX, except for a *pure reinsurer*:
 - (a) 0.1% for temporary insurance on death where the original term of the contract is three years or less;
 - (b) 0.15% for temporary insurance on death where the original term of the contract is five years or less but more than three years; and
 - (c) 0.3% in any other case;
 - (2) 0.3% for *long-term insurance business classes* III, VII and VIII, except for a *pure reinsurer*; and
 - (3) 0.1% for a *pure reinsurer*.
- 1.1.83 R For the purpose of *INSPRU* 1.1.81R, the capital at risk is:
- (1) where the benefit under a *contract of insurance* payable as a result of death includes periodic or deferred payments, the present value of the benefits payable; and
 - (2) in any other case, the amount payable as a result of death; less, in either case, the *mathematical reserves* for the contract.
- 1.1.83A R *INSPRU* 1.1.81R does not apply to:
- (1) a *pure reinsurer*; or
 - (2) a *mixed insurer*;

in respect of *life protection reinsurance business*.

1.1.84 G The *insurance death risk capital component* only relates to the risk of death. There is a separate risk component for insured health risks (*class IV*) which also applies to the risk of death covered in the *life protection reinsurance business* of *pure reinsurers* and *mixed insurers*. *Tontines (class V)* and *capital redemption operations (class VI)* also have separate risk components. There is no specified risk margin for other insured risks.

1.1.84A G For the treatment of amounts recoverable from *ISPVs* when calculating the *insurance death risk capital component* in accordance with *INSPRU 1.1.81R*, see *INSPRU 1.1.92AR* and *INSPRU 1.1.92BG*.

Insurance health risk and life protection reinsurance capital component

1.1.85 R The *insurance health risk and life protection reinsurance capital component* is the highest of:

(1) the *premiums amount* (determined in accordance with *INSPRU 1.1.45R*);

(2) the *claims amount* (determined in accordance with *INSPRU 1.1.47R*);
and

(3) the *brought forward amount* (determined in accordance with *INSPRU 1.1.51R*);
in respect of:

(a) *contracts of insurance* falling in *long-term insurance business class IV* (see *INSPRU 1.1.86R*);

(b) risks falling in *general insurance business classes 1 or 2* that are written as part of a *long-term insurance contract*; and

(c) in the case of a *pure reinsurer* or a *mixed insurer*, *life protection reinsurance business*.

1.1.86 R For the purposes of *INSPRU 1.1.85R*, in the case of *contracts of insurance* falling in *long-term insurance business class IV*, condition (3) as set out in *INSPRU 1.1.72R (Actuarial health insurance)* is modified to: "either the reserves include a provision for increasing age, or the business is conducted on a group basis."

1.1.87 G The *insurance health risk and life protection reinsurance capital component* only applies to *permanent health insurance (long-term insurance business class IV)*, *accident and sickness insurance (general insurance business classes 1 and 2)* and the *life protection reinsurance business* of *pure reinsurers* and *mixed insurers*.

Insurance expense risk capital component

1.1.88 R The *insurance expense risk capital component* is:

(1) in respect of *long-term insurance business classes III, VII and VIII*, an amount equivalent to 25% of the net *administrative expenses* in the *financial*

year in question relevant to the business of each of those *classes*, in so far as the *firm* bears no investment risk and the allocation to cover *management expenses* in the *contract of insurance* does not have a fixed upper limit which is effective as a limit for a period exceeding 5 years from the commencement of the contract;

(2) in respect of any *tontine* (*long-term insurance business class V*), 1% of the assets of the *tontine*;

(3) in the case of any other *long-term insurance business*, 1% of the "adjusted *mathematical reserves*" (as defined in *INSPRU 1.1.89AR*).

1.1.88A R *INSPRU 1.1.88R* does not apply to:

(1) a *pure reinsurer*; or

(2) a *mixed insurer*;

in respect of:

(a) *life protection reinsurance business*; or

(b) *permanent health reinsurance business*.

Insurance market risk capital component

1.1.89 R The *insurance market risk capital component* is 3% of the "adjusted *mathematical reserves*" (as defined in *INSPRU 1.1.89AR*) for all insurance liabilities except those of a kind which:

(1) arise from *contracts of insurance* falling in *long-term insurance business classes III, VII or VIII* to the extent that the *firm* does not bear any investment risk; or

(2) arise from *contracts of insurance* falling in *long-term insurance business class V*; or

(3) for a *pure reinsurer* or a *mixed insurer*, arise from *contracts of insurance* falling within:

(a) its *life protection reinsurance business*; or

(b) its *permanent health reinsurance business*.

Adjusted mathematical reserves

1.1.89A R (1) For the purpose of *INSPRU 1.1.88R* and *INSPRU 1.1.89R*, the "adjusted *mathematical reserves*" is the aggregate of the amounts which result from the performance of the calculation in *INSPRU 1.1.90R* for each category of insurance liability specified in (2).

(2) The categories of insurance liability referred to in (1) are:

(a) for the purpose of *INSPRU 1.1.88R*, those categories described in

INSPRU 1.1.91R (1), (2), (3), (4) and (5); and

(b) for the purpose of *INSPRU* 1.1.89R, those categories described in *INSPRU* 1.1.91R (1), (2), (4) and (5).

- 1.1.90 R The calculation referred to in *INSPRU* 1.1.89AR (1) is the multiplication of the amount of the *mathematical reserves* (gross of *reinsurance* cessions) in respect of a category of insurance liability by the higher of:
- (1) 85% or, in the case of a *pure reinsurer*, 50%; and
 - (2) the ratio as at the end of the *financial year in question* of:
 - (a) the *mathematical reserves* in respect of that category of insurance liability net of *reinsurance* cessions; to
 - (b) the *mathematical reserves* in respect of that category of insurance liability gross of *reinsurance* cessions.
- 1.1.91 R For the purpose of *INSPRU* 1.1.89AR and *INSPRU* 1.1.90R, the categories of insurance liability are as follows:
- (1) liabilities of a kind which arise from *contracts of insurance* falling in *long-term insurance business classes* I, II or IX;
 - (2) liabilities of a kind which arise from *contracts of insurance* falling in *long-term insurance business classes* III, VII or VIII to the extent that the *firm* bears an investment risk;
 - (3) liabilities of a kind which arise from *contracts of insurance* falling in *long-term insurance business classes* III, VII or VIII to the extent that the *firm* bears no investment risk and where the allocation to cover *management expenses* in the *contract of insurance* has a fixed upper limit which is effective as a limit for a period exceeding 5 years from the commencement of the contract;
 - (4) liabilities of a kind which arise from *contracts of insurance* falling in *long-term insurance business class* IV; and
 - (5) liabilities of a kind which arise from *contracts of insurance* falling in *long-term insurance business class* VI.
- 1.1.92 G Where a *firm* has written a unit-linked contract, the *firm's* liability under the contract may consist of a unit liability, where the *firm* bears no investment risk, and other liabilities for which the *firm* bears an investment risk, and for which a separate reserve is held. *INSPRU* 1.1.91R(2) and (3) require a *firm* to analyse its liabilities under unit-linked contracts between those for which it bears an investment risk and those for which it does not. *INSPRU* 1.1.88R and *INSPRU* 1.1.89R taken together result in a capital requirement for any liabilities for which the *firm* bears an investment risk of 4% of "adjusted *mathematical reserves*" (1% for expense risk and 3% for market risk).
- Insurance special purpose vehicles
- 1.1.92A R A *firm* must not treat any amounts recoverable from an *ISPV* as *reinsurance* for the purposes of the calculation of:

- (1) the reinsurance ratio in accordance with *INSPRU* 1.1.54R; or
- (2) the *insurance death risk capital component* in accordance with *INSPRU* 1.1.81R; or
- (3) the "adjusted *mathematical reserves*" in accordance with *INSPRU* 1.1.90R.

1.1.92B G A *firm* may treat amounts recoverable from an *ISPV* as *reinsurance* for these purposes if it obtains a *waiver* of *INSPRU* 1.1.92AR under section 148 of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 148(4) of the *Act*, before the *FSA* will consider granting such a *waiver* are set out in *INSPRU* 1.6.13G to *INSPRU* 1.6.18G.

Application of *INSPRU* 1.1 to Lloyd's

1.1.93 R *INSPRU* 1.1 applies to the *Society* in accordance with *INSPRU* 8.1.2R.

1.1.94 R The following *rules* and *guidance* apply to *managing agents* in accordance with *INSPRU* 8.1.4R:

- (1) *INSPRU* 1.1.13G to *INSPRU* 1.1.20R (except *INSPRU* 1.1.13R(1));
- (2) *INSPRU* 1.1.42G to *INSPRU* 1.1.43G; and
- (3) *INSPRU* 1.1.74G to *INSPRU* 1.1.80G.

1.1.95 R The *Society* must calculate the *brought forward amount* for the *members* in aggregate in accordance with *INSPRU* 1.1.51R, using the result of *GENPRU* 2.3.6R for the prior *financial year* and the aggregate of all *members' technical provisions* for the relevant periods.

1.1.96 R For the purposes of *INSPRU* 1.1.66R and further to that *rule*, in the case of Lloyd's *members*, amounts of *premiums* and *claims* must be adjusted for *approved reinsurance to close* to exclude any amount included in, or adjustment made to, *premiums* and *claims* to reflect the consideration for an *approved reinsurance to close*.

1.2 Mathematical reserves

Application

- 1.2.1 R *INSPRU* 1.2 applies to a *long-term insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.

Purpose

- 1.2.2 G This section follows on from the overall requirement on *firms* to establish adequate *technical provisions* (see *INSPRU* 1.1.16R). The *mathematical reserves* form the main component of *technical provisions* for *long-term insurance business*. *INSPRU* 1.2 sets out *rules* and *guidance* as to the methods and assumptions to be used in calculating the *mathematical reserves*. The *rules* and *guidance* set out the minimum basis for *mathematical reserves*. Methods and assumptions that produce reserves that are demonstrably equal to or greater than the minimum basis may also be used, though they must meet the basic requirements for methods and assumptions set out in *INSPRU* 1.2.7R to *INSPRU* 1.2.27G.
- 1.2.3 G This section applies to all *firms* carrying on *long-term insurance business* and implements some of the requirements contained in article 20 of the *Consolidated Life Directive*. The implementation is designed to ensure that a *firm's mathematical reserves* in respect of *long-term insurance contracts* meet the minimum requirements set by the *Consolidated Life Directive*. A *firm* may use a prospective or a retrospective method to value its *mathematical reserves* (see *INSPRU* 1.2.7R).
- 1.2.4 G The required procedures are summarised in the flowchart in *INSPRU* 1 Annex 1G.
- 1.2.5 G *Firms* to which *GENPRU* 2.1.18R applies are required to calculate a *with-profits insurance capital component* (see *GENPRU* 2.1.38R). In order to calculate its *with-profits insurance capital component*, such a *firm* is required to carry out additional calculations of its liabilities on a realistic basis (see *INSPRU* 1.3), which it is required to report to the *FSA* (see Forms 18,19). A *firm* that reports its liabilities on a realistic basis is referred to in *PRU* as a *realistic basis life firm*. Such *firms* are subject to different *rules* relating to the calculation of *mathematical reserves* (see *INSPRU* 1.2.46R and *INSPRU* 1.2.76R) compared with those that apply to *firms* that report on a regulatory basis only (*regulatory basis only life firms*).
- 1.2.6 G A number of the *rules* in this section require a *firm* to take into account its regulatory duty to treat *customers* fairly. In this section, references to such a duty are to a *firm's* duty to pay due regard to the interests of its *customers* and to treat them fairly (see *Principle 6* in *PRIN*). This duty is owed to both

policyholders and potential *policyholders*.

Basic valuation method

- 1.2.7 R (1) Subject to (2), a *firm* must establish its *mathematical reserves* using a prospective actuarial valuation on prudent assumptions of all future cash flows expected to arise under, or in respect of, each of its *long-term insurance contracts*.
(2) But a *firm* may use a retrospective actuarial valuation where:
(a) a prospective method cannot be applied to a particular type of contract;
or
(b) the *firm* can demonstrate that the resulting amount of the *mathematical reserves* would be no lower than would be required by a prudent prospective actuarial valuation.
- 1.2.8 G A prospective valuation sets the *mathematical reserves* at the present value of future net cash flows. A retrospective method typically sets the *mathematical reserves* at the level of *premiums* received (and accumulated with investment return), less *claims* and expenses paid. A prospective valuation is preferred because it takes account of circumstances that might have arisen since the *premium* rate was set and of changes in the perception of future experience. Circumstances in which a retrospective valuation might be appropriate include:
(1) where the assumptions initially made in determining the *premium* rate were sufficiently prudent at inception and have not been overtaken by subsequent events; and
(2) where the liability depends on the emerging experience.
- 1.2.9 R Except in *INSPRU* 1.2.71R(1), *INSPRU* 1.2 does not apply to *final bonuses*. In addition, for *realistic basis life firms* only, *INSPRU* 1.2 does not apply to other discretionary benefits, including future *annual bonuses*.

Methods and assumptions

- 1.2.10 R In the actuarial valuation under *INSPRU* 1.2.7R, a *firm* must use methods and prudent assumptions which:
(1) are appropriate to the business of the *firm*;
(2) are consistent from year to year without arbitrary changes (see *INSPRU* 1.2.11G);
(3) are consistent with the method of valuing assets (see *GENPRU* 1.3);
(4) include appropriate margins for adverse deviation of relevant factors (see *INSPRU* 1.2.12G);
(5) recognise the distribution of profits (that is, emerging surplus) in an appropriate way over the duration of each *contract of insurance*;
(6) take into account its regulatory duty to treat its *customers* fairly (see *Principle* 6); and
(7) are in accordance with generally accepted actuarial practice.
- 1.2.11 G *INSPRU* 1.2.10R(2) prohibits only arbitrary changes in methods and

assumptions, that is, changes made without adequate reasons. Any such changes would hinder comparisons over time as to the amount of the *mathematical reserves* and so obscure trends in solvency and the emergence of surplus.

- 1.2.12 G The relevant factors referred to in *INSPRU* 1.2.10R(4) may include, but are not limited to, factors such as future investment returns, expenses, mortality, morbidity, options, persistency and *reinsurance* (see also *INSPRU* 1.2.13R to *INSPRU* 1.2.19G).
- Margins for adverse deviation
- 1.2.13 R The appropriate margins for adverse deviation required by *INSPRU* 1.2.10R (4) must be sufficiently prudent to ensure that there is no significant foreseeable risk that liabilities to *policyholders* in respect of *long-term insurance contracts* will not be met as they fall due.
- 1.2.14 G The margins for adverse deviation are a prudential margin in respect of the risks that arise under a *long-term insurance contract*.
- 1.2.15 G *INSPRU* 1.2.13R sets the normal standard of prudence required for margins. *INSPRU* 1.2.16G suggests benchmarks against which a *firm* should compare the margins it has set in accordance with *INSPRU* 1.2.10R(4) and *INSPRU* 1.2.13R. *INSPRU* 1.2.17G gives *guidance* where a market risk premium is not readily obtainable.
- 1.2.16 G When setting the margins for adverse deviation required by *INSPRU* 1.2.10R(4) in relation to a particular contract, a *firm* should consider, where appropriate:
(1) the margin for adverse deviation included in the *premium* for similar *long-term insurance contracts*, if any, newly issued by the *firm*; and
(2) where a sufficiently developed and diversified market for transferring a risk exists, the risk premium that would be required by an unconnected party to assume the risk in respect of the contract.
The margin for adverse deviation of a risk should generally be greater than or equal to the relevant market price for that risk.
- 1.2.17 G Where a risk premium is not readily available, or cannot be determined, an external proxy for the risk should be used, such as adjusted industry mortality tables. Where there is a considerable range of possible outcomes, the *FSA* expects *firms* to use stochastic techniques to evaluate these risks. In time, for example, longevity risk, where this constitutes a significant risk for the *firm*, may fall into this category.
- 1.2.18 G The margins for adverse deviation should be recognised as profit only as the *firm* itself is released from risk over the duration of the contract.
- 1.2.19 G Further detailed *rules* and *guidance* on margins for adverse deviation are included in *INSPRU* 1.2.32G to *INSPRU* 1.2.89G. In particular, the cross-references for the different assumptions used in calculating the

mathematical reserves are as follows:

- (1) expenses (*INSPRU* 1.2.50R to *INSPRU* 1.2.58G);
- (2) mortality and morbidity (*INSPRU* 1.2.59R to *INSPRU* 1.2.61G);
- (3) options (*INSPRU* 1.2.62R to *INSPRU* 1.2.72G);
- (4) persistency (*INSPRU* 1.2.73G to *INSPRU* 1.2.77G); and
- (5) *reinsurance* (*INSPRU* 1.2.77AR to *INSPRU* 1.2.89G).

The *rules* and *guidance* on margins for adverse deviation in respect of future investment returns, which are also required in the calculation of *mathematical reserves*, are set out in *INSPRU* 3.1.28R to *INSPRU* 3.1.48G.

Record keeping

- 1.2.20 R A *firm* must make, and retain for an appropriate period, a record of:
- (1) the methods and assumptions used in establishing its *mathematical reserves*, including the margins for adverse deviation, and the reasons for their use; and
 - (2) the nature of, reasons for, and effect of, any change in approach, including the amount by which the change in approach increases or decreases its *mathematical reserves*.
- 1.2.21 G *SYSC* 14.1.53 R requires *firms* to maintain accounting and other records for a minimum of three years, or longer as appropriate. For the purposes of *INSPRU* 1.2.20R, a period of longer than three years will be appropriate for a *firm's long-term insurance business*. In determining an appropriate period, a *firm* should have regard to:
- (1) the detailed *rules* and *guidance* on record keeping in *SYSC* 14.1.51G - *SYSC* 14.1.64G;
 - (2) the nature and term of the *firm's long-term insurance business*; and
 - (3) any additional provisions or statutory requirements applicable to the *firm* or its records.

Valuation of individual contracts

- 1.2.22 R (1) Subject to (2) and (3), a *firm* must determine the amount of the *mathematical reserves* separately for each *long-term insurance contract*.
- (2) Approximations or generalisations may be made where they are likely to provide the same, or a higher, result.
- (3) A *firm* must set up additional *mathematical reserves* on an aggregated basis for general risks that are not specific to individual contracts.
- 1.2.23 G *INSPRU* 1.2.22R to *INSPRU* 1.2.89G set out *rules* and *guidance* for the separate prospective valuation of each contract. These may be applied instead to groups of contracts where the conditions set out in *INSPRU* 1.2.22R(2) are satisfied.

Contracts not to be treated as assets

- 1.2.24 R (1) A *firm* must not treat a *long-term insurance contract* as an asset.

- (2) (1) does not apply to a *pure reinsurer* in respect of a *contract of insurance* which does not have a guaranteed *surrender value* and falls within:
- (a) its *life protection reinsurance business*; or
 - (b) its *permanent health reinsurance business*.
- (3) Notwithstanding (2), the total *mathematical reserves* established by a *pure reinsurer* must have a minimum value of at least zero.

1.2.25 G A separate prospective valuation for each contract may identify contracts for which the value of future cash inflows exceeds that of outflows, that is, the contracts have an asset value, rather than liability value. However, the *Consolidated Life Directive* requires that no contract should be valued at less than its guaranteed *surrender value*. As a result, no contract with a guaranteed *surrender value* to which the *Consolidated Life Directive* applies should be treated as an asset. Although the *Reinsurance Directive* does not require this treatment of contracts with guaranteed *surrender values* to be applied to *pure reinsurers*, the *FSA's* policy is that there should be equal treatment in this respect. *Pure reinsurers* may therefore treat as an asset a contract written as part of carrying on *life protection reinsurance business* or *permanent health reinsurance business* provided that this is based on assumptions which meet the general requirements for prudent assumptions as set out in *INSPRU* 1.2.10R and *INSPRU* 1.2.13R and it is not written on terms that provide for a guaranteed *surrender value*. This does not, however, allow a *pure reinsurer* to establish total *mathematical reserves* which are negative.

Avoidance of future valuation strain

1.2.26 R (1) A *firm* must establish *mathematical reserves* for a *contract of insurance* which are sufficient to ensure that, at any subsequent date, the *mathematical reserves* then required are covered solely by:

- (a) the assets covering the current *mathematical reserves*; and
- (b) the resources arising from those assets and from the contract itself.

(2) For the purposes of (1), the *firm* must assume that:

- (a) the assumptions adopted for the current valuation of liabilities remain unaltered and are met; and
- (b) discretionary benefits and charges will be set so as to fulfil its regulatory duty to treat its *customers* fairly.

(3) (1) may be applied to a group of similar contracts instead of to the individual contracts within that group.

1.2.27 G The valuation of each contract, or group of similar contracts, should allow for the possibility, where it exists, that contracts may be surrendered (wholly or in part), lapsed or made paid-up at any time. The valuation assumptions include margins for adverse deviation (see *INSPRU* 1.2.13R). *INSPRU* 1.2.26R requires *mathematical reserves* to be established such that, if future experience is in line with the valuation assumptions, there would be no

future valuation strain.

Cash flows to be valued

- 1.2.28 R In a prospective valuation, a *firm* must:
- (1) include in the cash flows to be valued the following:
 - (a) future *premiums* (see *INSPRU* 1.2.35G to *INSPRU* 1.2.47G);
 - (b) expenses, including *commissions* (see *INSPRU* 1.2.50 R to *INSPRU* 1.2.58G);
 - (c) benefits payable (see *INSPRU* 1.2.29R); and
 - (d) subject to (2), amounts to be received or paid in respect of the *long-term insurance contracts* under contracts of *reinsurance* or analogous non-*reinsurance* financing agreements (see *INSPRU* 1.2.77AR to *INSPRU* 1.2.89G); but
 - (2) exclude from those cash flows amounts recoverable from an *ISPV*.
- 1.2.28A G A *firm* may include amounts recoverable from an *ISPV* in the cash flows to be valued in a prospective valuation if it obtains a *waiver* of *INSPRU* 1.2.28R under section 148 of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 148(4) of the *Act*, before the *FSA* will consider granting such a *waiver* are set out in *INSPRU* 1.6.13G to *INSPRU* 1.6.18G.
- 1.2.29 R For the purpose of *INSPRU* 1.2.28R(3), benefits payable include:
- (1) all guaranteed benefits including guaranteed *surrender values* and paid-up values;
 - (2) vested, declared and allotted bonuses to which the *policyholder* is entitled;
 - (3) all options available to the *policyholder* under the terms of the contract; and
 - (4) discretionary benefits payable in accordance with the *firm's* regulatory duty to treat its *customers* fairly.
- 1.2.30 G All cash flows are to be valued using prudent assumptions in accordance with generally accepted actuarial practice. Cash flows may be omitted from the valuation calculations provided the reserves obtained as a result of leaving those cash flows out of the calculation are not less than would have resulted had all cash flows been included (see *INSPRU* 1.2.22R(2)). Provision for future expenses in respect of *with-profits insurance contracts* (excluding *accumulating with-profits policies*) may be made implicitly, using the *net premium* method of valuation (see *INSPRU* 1.2.43R below). For the purposes of *INSPRU* 1.2.28R(2), any charges included in expenses should be determined in accordance with the *firm's* regulatory duty to treat its *customers* fairly.
- 1.2.31 G *INSPRU* 1.2.29R(4) requires *regulatory basis only life firms* to make allowance for any future *annual bonus* that a *firm* would expect to grant, assuming future experience is in line with the assumptions used in the calculation of the *mathematical reserves*. *Final bonuses* do not have to be

taken into consideration in these calculations except in relation to *accumulating with-profits policies* (see *INSPRU 1.2.9R*). The calculations required for *accumulating with-profits policies* are set out in *INSPRU 1.2.71R(1)*. For *realistic basis life firms*, except for *accumulating with-profits policies*, the *mathematical reserves* may be calculated without taking into account discretionary benefits, including both *annual bonuses* and *final bonuses*. For such *firms* full allowance for discretionary benefits is made in the calculation of the *realistic value of liabilities* (see *INSPRU 1.3.105R(5)*).

Valuation assumptions: detailed rules and guidance

- 1.2.32 G More detailed *rules* and *guidance* about the valuation of cash flows are set out in *INSPRU 1.2.33R* to *INSPRU 1.2.89G*.

Valuation rates of interest

- 1.2.33 R In calculating the present value of future net cash flows, a *firm* must determine the rates of interest to be used in accordance with *INSPRU 3.1.28R* to *INSPRU 3.1.47R*.
- 1.2.34 G The *rules* in *INSPRU 3.1.28R* to *INSPRU 3.1.47R* set out the approach *firms* must take in setting margins for adverse deviation in the interest rates assumed in calculating the *mathematical reserves*. This includes a margin to allow for adverse deviation in *market risk* and, where relevant, credit risk. The requirements set out in *INSPRU 3.1.28R* to *INSPRU 3.1.47R* protect against the *market risk* that the return actually achieved on assets may fall below the market yields on assets at the *actuarial valuation date*.

Future premiums

- 1.2.35 G *INSPRU 1.2.46R* and *INSPRU 1.2.47G* apply to the valuation of *with-profits insurance liabilities* for a *realistic basis life firm*. *INSPRU 1.2.38R* to *INSPRU 1.2.45G* apply to a *regulatory basis only life firm*.
- 1.2.36 G For *non-profit insurance contracts* no specific method of valuation for future *premiums* is required by *INSPRU*. However, the method of valuation used should be sufficiently prudent taking into account, in particular, the risk of voluntary discontinuance by the *policyholder*.

Future premiums: firms reporting only on a regulatory basis

- 1.2.37 R *INSPRU 1.2.38R* to *INSPRU 1.2.43R* apply to a *regulatory basis only life firm*.
- 1.2.38 R (1) This *rule* applies to with-profits insurance contracts except accumulating with-profits policies written on a recurring single premium basis.
(2) The value attributed to a *premium* due in any future *financial year* (a future *premium*) must not exceed the lower of the value of:
(a) the actual *premium* payable under the contract; and
(b) the *net premium*.

(3) The *net premium* may be increased for *deferred acquisition costs* in accordance with *INSPRU 1.2.43R*.

- 1.2.39 G The valuation method for future *premiums* in *INSPRU 1.2.38R* retains the difference, if any, between the gross *premium* and the *net premium* as an implicit margin available to finance future bonuses, expenses and other costs. It thus helps to protect against the risk that adequate resources may not be available in the future to meet those costs.
- 1.2.40 R Where the terms of a *contract of insurance* have changed since it was first entered into, a *firm* must apply one of the methods in *INSPRU 1.2.41R* in determining the *net premium* for the purpose of *INSPRU 1.2.38R(2)(b)*.
- 1.2.41 R A *firm* must treat the change referred to in *INSPRU 1.2.40R* as if either:
- (1) it had been included in the original contract but came into effect from the time the change became effective; or
 - (2) the original contract were cancelled and replaced by a new contract (with an initial *premium* paid on the new contract equal to the liability under the original contract immediately prior to the change); or
 - (3) it gave rise to two separate contracts where:
 - (a) all *premiums* are payable under the first contract and that contract provides only for such benefits as those *premiums* could have purchased from the *firm* at the date the change became effective; and
 - (b) no *premiums* are payable under the second contract and that contract provides for all the other benefits.
- 1.2.42 G *INSPRU 1.2.41R* permits three alternative methods. However, the third method is only possible where a meaningful comparison can be made between the terms of the contract (as changed) and the terms upon which the *firm* was *effecting* its new *contracts of insurance* at the time the contract was changed.

Future net premiums: adjustment for deferred acquisition costs

1.2.43 R (1) The amount of any increase to the *net premium* for *deferred acquisition costs* must not exceed the equivalent of the recoverable acquisition expenses spread over the period of *premium* payments and calculated in accordance with the rates of interest, mortality and morbidity assumed in calculating the *mathematical reserves*.
(2) For the purpose of (1), recoverable acquisition expenses means the amount of expenses, after allowing for the effects of taxation, which it is reasonable to expect will be recovered from future *premiums* payable under the contract.
(3) The recoverable acquisition expenses in (1) must not exceed the lower of:
(a) the value of the excess of actual *premiums* over *net premiums*; and
(b) 3.5% of the *relevant capital sum*.
(4) Recoverable acquisition expenses may be calculated as the average for a group of similar contracts weighted by the *relevant capital sum* for each contract.

1.2.44 G *INSPRU* 1.2.43R allows a *firm* to spread acquisition costs over the lifetime of a *contract of insurance*, but only if it is reasonable to expect those costs to be recoverable from future *premium* income from that contract. Further prudence is provided by the limitation of recoverable acquisition expenses to 3.5% of the *relevant capital sum*. This adjustment for acquisition costs is sometimes termed a Zillmer adjustment.

1.2.45 G In determining the extent, if any, to which it is reasonable to expect acquisition costs to be recoverable from future *premium* income, the *firm* should make prudent assumptions as to levels of voluntary discontinuance by *policyholders*.

Future premiums: firms also reporting with-profits insurance liabilities on a realistic basis

1.2.46 R (1) Subject to (2), for a *realistic basis life firm*, the future *premiums* to be valued in the calculation of the *mathematical reserves* for its *with-profits insurance contracts* must not be greater than the gross *premiums* payable by the *policyholder*.
(2) This *rule* does not apply to *accumulating with-profits policies* written on a recurring single *premium* basis (see *INSPRU* 1.2.48R).

1.2.47 G The gross *premium* is the full amount of *premium* payable by the *policyholder* to the *firm*. The gross *premium* method contrasts with the *net premium* method which is required from *regulatory basis only life firms* (see *INSPRU* 1.2.37R to *INSPRU* 1.2.45G).

Future premiums: accumulating with-profits policies

- 1.2.48 R (1) This *rule* applies to *accumulating with-profits policies* written on a recurring single *premium* basis.
(2) A *firm* must not attribute any value to a future *premium* under the contract.
(3) Any liability arising only upon the payment of that *premium* may be ignored except to the extent that the value of that liability upon payment would exceed the amount of that *premium*.

- 1.2.49 G *INSPRU* 1.2.48R prohibits a *firm* from taking credit for recurring single *premiums* under *accumulating with-profits policies*. As there is no contractual commitment to pay any future *premiums* the amount and timing of which are uncertain, the recognition of any potential margins would not be prudent. Where the payment of a future *premium* would give rise to a liability in excess of the *premium* a provision should be established.

Expenses

- 1.2.50 R (1) A *firm* must make provision for expenses, either implicitly or explicitly, in its *mathematical reserves* of an amount which is not less than the amount expected, on prudent assumptions, to be incurred in fulfilling its *long-term insurance contracts*.
(2) For the purpose of (1), expenses must be valued:
(a) after taking account of the effect of taxation;
(b) having regard to the *firm's* actual expenses in the last 12 months before the *actuarial valuation date* and any increases in expenses expected to occur in the future;
(c) after making prudent assumptions as to the effects of inflation on future increases in prices and earnings; and
(d) at no less than the level that would be incurred if the *firm* were to cease to transact new business 12 months after the *actuarial valuation date*.
(3) A *firm* must not rely upon an implicit provision arising from the method of valuing future *premiums* except to the extent that:
(a) it is reasonable to assume that expenses will be recoverable from future *premiums*; and
(b) the expenses would only arise if the future *premiums* were received.
- 1.2.51 G For *with-profits insurance contracts* where the *net premium* valuation method applies, an implicit provision arises because the future *premiums* valued are limited to the *net premium* adjusted as permitted by *INSPRU* 1.2.43R. This excludes the allowance within the gross *premium* for expenses (other than recoverable acquisition expenses). It also excludes other margins within the actual *premium* that are a prudential margin in respect of the risks that arise under the contract or that are needed to provide for future discretionary benefits. To the extent that these other margins are not needed for the purpose for which they were originally established, they may also constitute an implicit provision for expenses.
- 1.2.52 G An implicit provision may also arise for other types of *long-term insurance contract* where, for example, no value is attributed to future *premiums*, but

the *firm* is entitled to make deductions from future regular *premiums* before allocating them to secure *policyholder* benefits.

- 1.2.53 G A *firm* should only reduce the provision for future expenses to take account of expected taxation recoveries related to those expenses where recovery is reasonably certain, and after taking into account the assumption that the *firm* ceases to transact new business 12 months after the *actuarial valuation date*. An appropriate adjustment for discounting should be made where receipt of the taxation recoveries is not expected until significantly after the expenses are incurred.
- 1.2.54 G The *firm's* actual expenses in the 12 months prior to the *actuarial valuation date* may serve as a guide to the assumptions for future expenses, taking into consideration the mix of acquisition and renewal expenses. The expense assumptions should not be reduced to account for expected future improvements in efficiency until such efficiency improvements result in a reduced level of actual expenditure. However, the assumptions should take account of all factors which might increase costs including earnings and price inflation.
- 1.2.55 R The provisions for expenses (whether implicit or explicit) required by *INSPRU* 1.2.50R must be sufficient to cover all the expenses of running off the *firm's* existing *long-term insurance business* including:
- (1) all discontinuance costs (for example, redundancy costs and closure costs) that would arise if the *firm* were to cease transacting new business 12 months after the *actuarial valuation date* in circumstances where (and to the extent that) the discontinuance costs exceed the projected surplus available to meet such costs;
 - (2) all costs of continuing to service the existing business taking into account the loss of economies of scale from, and any other likely consequences of, ceasing to transact new business at that time; and
 - (3) the lower of:
 - (a) any projected valuation strain from writing new business for the 12 months following the *actuarial valuation date* to the extent the actual amount of that strain exceeds the projected surplus on prudent assumptions from existing business in the 12 months following the *actuarial valuation date*; and
 - (b) any projected new business expense overrun from writing new business for the 12 months following the *actuarial valuation date* to the extent the projected expenses exceed the expenses that the new business can support on a prudent basis.
- 1.2.56 G The provision for future expenses, whether implicit or explicit, should include a prudent margin for adverse deviation in the level and timing of expenses (see *INSPRU* 1.2.13R to *INSPRU* 1.2.19G). The margin should cover the risk of underestimating expenses whether due to, for example, initial under-calculation or subsequent increases in the amount of expenses. In setting the amount of the margin, the *firm* should take into account the

extent to which:

- (1) an appropriately validated method based on reliable data is used to allocate expenses by product type, by distribution channel and as between acquisition and non-acquisition expenses;
- (2) the volume of existing and new business and its distribution by product type or distribution channel is stable or predictable;
- (3) costs vary in the short, medium or long term dependent upon the volume of existing or new business and its distribution by product type or distribution channel; and
- (4) cost control is well-managed.

1.2.57 G In setting the margin, the *firm* should also take into account:

- (1) the length of the period over which it is necessary to project costs;
- (2) the extent to which it is reasonable to expect inflation to be stable or predictable over that period; and
- (3) whether, if inflation is higher than expected, it is reasonable to expect that the excess would be offset by increases in investment returns.

1.2.58 G Where a *firm* has entered into an agreement with any other person for the sharing or reimbursement of costs, in setting the margin it should take into account the potential impact of that agreement and of its discontinuance.

Mortality and Morbidity

1.2.59 R A *firm* must set the assumptions for mortality and morbidity using prudent rates of mortality and morbidity that are appropriate to the country or territory of residence of the person whose life or health is insured.

1.2.60 G The rates of mortality or morbidity should contain prudent margins for adverse deviation (see *INSPRU* 1.2.13R to *INSPRU* 1.2.19G). In setting those rates, a *firm* should take account of:

(1) the systems and controls applied in underwriting *long-term insurance contracts* and whether they provide adequate protection against anti-selection (that is, selection against the *firm*) including:

- (a) adequately defining and identifying non-standard risks; and
- (b) where such risks are underwritten, allocating to them an appropriate weighting;

(2) the nature of the contractual exposure to mortality or morbidity risk including:

- (a) whether lower mortality increases or decreases the *firm's* liability;
- (b) the period of cover and whether risk charges can be varied during that period and, if so, how quickly; and
- (c) whether the options in the contract give rise to a significant risk of anti-selection (for example, opportunities for voluntary discontinuance, guaranteed renewal at the option of the *policyholder* and rights for conversion of benefits);

(3) the credibility of the *firm's* actual experience as a basis for projecting future experience including:

- (a) whether there is sufficient data (especially for medical or financial risks and for new types of benefit or new methods of distribution); and
- (b) whether the data is reliable and has been appropriately validated;

(4) the availability and reliability of:

- (a) any published tables of mortality or morbidity for the country or territory of residence of the person whose life or health is insured; and
- (b) any other information as to the industry-wide insurance experience for that country or territory;

(5) anticipated or possible future trends in experience including, but only where they increase the liability:

- (a) anticipated improvements in mortality;
- (b) changes arising from improved detection of morbidity (including critical illnesses);
- (c) diseases the impact of which may not yet be reflected fully in current experience; and
- (d) changes in market segmentation (such as impaired life annuities) which, in the light of developing experience, may require different assumptions for different parts of the policy class.

- 1.2.61 G An additional provision for diseases covered by *INSPRU* 1.2.60G(5)(c) may be needed, in particular for unit-linked policies. In determining whether such a provision is needed a *firm* may take into consideration any ability to increase product charges commensurately (provided that such increase does not infringe on its regulatory duty to treat its *customers* fairly), but a provision would still be required for the period until such an increase could be brought into effect.

Options

- 1.2.62 R When a *firm* establishes its *mathematical reserves* in respect of a *long-term insurance contract*, the *firm* must include an amount to cover any increase in

liabilities which might be the direct result of its *policyholder* exercising an option under, or by virtue of, that *contract of insurance*. Where the *surrender value* of a contract is guaranteed, the amount of the *mathematical reserves* for that contract at any time must be at least as great as the value guaranteed at that time.

- 1.2.63 G An option exists where a *policyholder* is given a choice between alternative forms of benefit, for example, a choice between receiving a cash benefit upon maturity or an annuity at a guaranteed rate. In some cases, the contract may designate one or other of these alternatives as the principal benefit and any other as an option. This designation, in itself, is not one of substance in the context of reserving since it does not affect the *policyholder's* choices. Other forms of option include:
- (1) the right to convert to a different contract on guaranteed terms;
 - (2) the right to increase cover on guaranteed terms;
 - (3) the right to a specified amount on surrender; and
 - (4) the right to a paid up value.
- 1.2.64 G The *firm* should provide for the benefit which the *firm* anticipates the *policyholder* is most likely to choose. Except for the "option" of voluntary discontinuance in the case of *regulatory basis only life firms* (see *INSPRU* 1.2.74R), past experience may be used as a guide, but only if this is likely to give a reasonable estimate of future experience. For example, past experience of the take-up of a cash payment option instead of an annuity would not be a reliable guide, if, in the past, market rates exceeded those guaranteed in the annuity but no longer do so. Similarly, past experience on the take-up of options may not be relevant in the light of the assumptions made in respect of future interest rates and mortality rates in the valuation of the benefits.
- 1.2.65 G Many options are long-term and need careful consideration. Improving longevity, for example, can increase the value of guaranteed annuity options vesting further in the future. *Firms* also need to have regard to the fact that *policyholder* behaviour can change in the future as *policyholders* become more aware of the value of their options. The impact on *policyholder* behaviour of possible changes in taxation should also be considered.
- 1.2.66 G In accordance with *INSPRU* 1.2.7R and *INSPRU* 1.2.13R, take-up rates for guaranteed annuity options should be assessed on a prudent basis with assumptions that include margins for adverse deviation (see *INSPRU* 1.2.13R to *INSPRU* 1.2.19G) that take account of current experience and the potential for future change. The *firm* should reserve for option take-up at least at a prudent margin over current experience for options shortly to vest. For longer term options where the option becomes increasingly valuable in the future due to projected mortality improvements, increased take-up rates should be assumed. In view of the growing uncertainty over take-up rates for projections further in the future, for guaranteed annuity option dates 20 years or more ahead at least a 95% take-up rate assumption should be made.

- 1.2.67 G Where there is considerable variation in the cost of the option depending on conditions at the time the option is exercised, and where that variation constitutes a material risk for the *firm*, it will generally be appropriate to use stochastic modelling. In this case prices from the asset model used in the stochastic approach should be benchmarked to relevant market asset prices before determining the value of the option. Where stochastic modelling is not undertaken, market option prices should be used to determine suitable assumptions for the valuation of the option. If no market exists for a particular option, a *firm* should take the value of the nearest equivalent benefit or right for which a market exists and document the way in which it has adjusted that valuation to reflect the original option.
- 1.2.68 G Where the option offers a choice between two non-discretionary financial benefits (such as between a guaranteed cash sum or a guaranteed annuity value, or between a unit value and a maturity guarantee) and where there is a wide range of possible outcomes, the *firm* should normally model such liabilities stochastically. In carrying out such modelling *firms* should take into account the likely choices to be made by *policyholders* in each scenario. *Firms* should make and retain a record of the development and application of the model.
- 1.2.69 G The value of a contract with an option is greater than the value of a similar contract without the option, that is, the option has value whether it is expected to be exercised or not. Although in theory a *firm* can rebalance its investments to match the expected cost of the option to the *firm* (including the time value of the option), this takes time to achieve and the market may move more quickly than the *firm* is able to respond. Also, there are likely to be transaction costs. *Firms* should take these aspects into consideration in setting up *mathematical reserves*.
- 1.2.70 R (1) Where a *policyholder* may opt to be paid a cash amount, or a series of cash payments, the *mathematical reserves* for the *contract of insurance* established under *INSPRU* 1.2.7R must be sufficient to ensure that the payment or payments could be made solely from:
- (a) the assets covering those *mathematical reserves*; and
 - (b) the resources arising from those assets and from the contract itself.
- (2) In (1) references to a cash amount or a series of cash payments include the amount or amounts likely to be paid on a voluntary discontinuance.
- (3) For the purposes of (1), the *firm* must assume that:
- (a) the assumptions adopted for the current valuation remain unaltered and are met; and
 - (b) discretionary benefits and charges will be set so as to fulfil the *firm's* regulatory duty to treat its *customers* fairly.
- (4) (1) may be applied to a group of similar contracts instead of to the individual contracts within that group except where the cash amount or series of cash payments is the amount or amounts likely to be paid on a voluntary discontinuance.

- 1.2.71 R For the purposes of *INSPRU* 1.2.70R, a *firm* must assume that the amount of a cash payment secured by the exercise of an option is:
- (1) in the case of an *accumulating with-profits policy*, the lower of:
- (a) the amount which the *policyholder* would reasonably expect to be paid if the option were exercised, having regard to the representations made by the *firm* and including any expectations of a *final bonus*; and
- (b) that amount, disregarding all discretionary adjustments;
- (2) in the case of any other *policy*, the amount which the *policyholder* would reasonably expect to be paid if the option were exercised, having regard to the representations made by the *firm*, without taking into account any expectations regarding future distributions of profits or the granting of discretionary additions in respect of an *established surplus*.
- 1.2.72 G *INSPRU* 1.2.71R(1) applies only to *accumulating with-profits policies*; *INSPRU* 1.2.71R(2) applies to any other type of *policy*, including *non-profit insurance contracts*. In *INSPRU* 1.2.71R(1)(a) a *firm* must take into consideration, for example, a market value adjustment where such an adjustment has been described in representations made to *policyholders* by the *firm*. However, any discretionary adjustment, such as a market value adjustment, must not be included in the amount calculated in *INSPRU* 1.2.71R(1)(b).
- Persistency assumptions
- 1.2.73 G *INSPRU* 1.2.76R and *INSPRU* 1.2.77G apply to the valuation of the *with-profits insurance liabilities* of *realistic basis life firms*. *INSPRU* 1.2.76AR and *INSPRU* 1.2.77G apply to the valuation of liabilities arising from the *life protection reinsurance business* and *permanent health reinsurance business* of *pure reinsurers*. *INSPRU* 1.2.74R and *INSPRU* 1.2.75G apply to the valuation of all other liabilities.
- 1.2.74 R Except as permitted by *INSPRU* 1.2.76R and *INSPRU* 1.2.76AR, a *firm* must not make any allowance in the calculation of the *mathematical reserves* for the voluntary discontinuance of any *contract of insurance* if the amount of the *mathematical reserves* so determined would, as a result, be reduced.
- 1.2.75 G The rate of voluntary discontinuance (that is, lapse, surrender or paying up) is often difficult to predict and may be volatile especially in the short term during stressful economic conditions. Depending upon the circumstances and contract terms, voluntary discontinuance may increase or decrease the *firm's* liability. In effect, *INSPRU* 1.2.74R requires a *firm* to assume that there will be no voluntary discontinuance if assuming voluntary discontinuance would reduce the liability. This protects against the risk that arises from volatility in the rate of voluntary discontinuance. In addition, there is the risk of assets not being realisable when needed due to the rates of discontinuance exceeding expected levels.
- 1.2.76 R A *realistic basis life firm* may make assumptions about voluntary

discontinuance rates in the calculation of the *mathematical reserves* for its *with-profits insurance business* provided that those assumptions meet the general requirements for prudent assumptions as set out in *INSPRU 1.2.10R* and *INSPRU 1.2.13R*.

1.2.76A R A *pure reinsurer* may make assumptions about voluntary discontinuance rates in the calculation of the *mathematical reserves* in respect of *contracts of insurance* falling within:

- (1) its *life protection reinsurance business*; or
- (2) its *permanent health reinsurance business*;

provided that those assumptions meet the general requirements for prudent assumptions as set out in *INSPRU 1.2.10R* and *INSPRU 1.2.13R*.

1.2.77 G The prudential margin in respect of assumptions of voluntary discontinuance should be validated both in relation to recent experience and to variations in future experience that might arise as a result of reasonably foreseeable changes in conditions. In particular, where estimates of experience are being made well into the future, the assumptions should contain margins that take into account the increased risk of adverse experience arising from changed circumstances. *Firms* should also consider the possibility of anti-selection by *policyholders* and of variations in persistency experience for different classes and cohorts of business.

Reinsurance

1.2.77A R In *INSPRU 1.2.78G* to *INSPRU 1.2.89G* references to:

- (1) *reinsurance* and contracts of *reinsurance* include analogous non-*reinsurance* financing agreements, including contingent loans, securitisations and any other arrangements in respect of *contracts of insurance* that are analogous to contracts of *reinsurance* in terms of the risks transferred and the finance provided;
- (2) reinsured risks, in relation to a contract of *reinsurance* entered into by a *firm*, means that part of:
 - (a) the risks insured by the *firm* under *long-term insurance contracts* entered into by it; and
 - (b) the other risks arising directly from the *firm's long-term insurance business*; that have been transferred to the *reinsurer* under that contract of *reinsurance*; and
- (3) *reinsurance* cash outflows include any reduction in *policy* liabilities recognised as covered under a contract of *reinsurance* or any reduction of any debt to the *firm* under or in respect of a contract of *reinsurance*.

1.2.78 G The prospective valuation of future cash flows to determine the amount of the *mathematical reserves* includes amounts to be received or paid under contracts of *reinsurance* in respect of *long-term insurance business* (see *INSPRU 1.2.28R(4)*). This applies even where those cash flows cannot be

identified as related to particular *long-term insurance contracts* (see *INSPRU 1.2.22R(3)*).

- 1.2.79 R A *firm* must value *reinsurance* cash flows using methods and assumptions which are at least as prudent as the methods and assumptions used to value the underlying *contracts of insurance* which have been reinsured. In particular:
- (1) *reinsurance* recoveries must not be recognised unless the underlying liabilities to which they relate have also been recognised;
 - (2) *reinsurance* cash outflows that are unambiguously linked to the emergence as surplus of margins included in the valuation of existing *contracts of insurance* or to the exercise by a *reinsurer* of its rights under a termination clause need not be valued (see *INSPRU 1.2.85R*); and
 - (3) *reinsurance* cash inflows that are contingent on factors or conditions other than the reinsured risks must not be valued.
- 1.2.80 G In valuing *reinsurance* cash flows, a *firm* should establish prudent margins for adverse deviation (see *INSPRU 1.2.13R* to *INSPRU 1.2.19G*) including margins in respect of:
- (1) any uncertainty as to the amount or timing of amounts to be paid or received; and
 - (2) the risk of credit default by the *reinsurer*.
- 1.2.81 G In assessing the risk of credit default, the *firm* should take into account the *rules* and *guidance* in *INSPRU 2.1* (Credit risk in insurance).
- 1.2.82 G It will not necessarily be appropriate to use the same assumptions in *INSPRU 1.2.79R* as for the underlying contracts. For example, if only a subgroup of the original contracts is reinsured, it may be appropriate to use different mortality rates.
- 1.2.83 G Only *reinsurance* cash inflows that are triggered unambiguously by the reinsured risks may be valued. *Reinsurance* cash inflows that depend on other contingencies where the outcome does not form part of the valuation basis should not be given credit.
- 1.2.84 G *Firms* should assess the extent of margins in the valuation of the existing *contracts of insurance* where these provide implicit provision for the *reinsurance* cash outflows in *INSPRU 1.2.79R*. Where the *reinsurance* asset exceeds the estimated value of the future surplus under reinsured contracts *firms* should assess their credit risk exposure to the *reinsurer*.
- 1.2.85 R For the purposes of *INSPRU 1.2.79R(2)*, the "link" must be such that a contingent liability to pay or repay the amount to the *reinsurer* could not arise except when, and to the extent that, the margins in the valuation of the existing *contracts of insurance* emerge as surplus, or the *reinsurer* exercises its rights under a termination clause in the contract of *reinsurance* as a result of:

- (1) fraudulent conduct by the *firm* under or in relation to the contract of *reinsurance*; or
- (2) a representation as to the existence, at or before the time the contract of *reinsurance* is entered into, of a state of affairs which is within the knowledge or control of the *firm* and which is material to the *reinsurer's* decision to enter into the contract being discovered to be false; or
- (3) the non-payment of *reinsurance premiums* by the *firm*; or
- (4) a transfer by the *firm* of the whole or a specified part of its business without the agreement of the *reinsurer*, except where that agreement has been unreasonably withheld.

- 1.2.86 R For the purposes of *INSPRU* 1.2.79R(2) and *INSPRU* 1.2.85R, future surplus may only be offset against future *reinsurance* cash outflow in respect of surplus on *non-profit insurance contracts* and the charges or shareholder transfers arising as surplus from *with-profits insurance contracts*. Such charges and transfers may only be allowed for to the extent consistent with the regulatory duty of the *firm* to treat its *customers* fairly.
- 1.2.87 G For the purposes of *INSPRU* 1.2.85R, a contingent liability means a liability that would only arise upon the happening of a particular contingency, even where that contingency is not expected to occur. For example, if the *firm* has a *reinsurance* arrangement in force that in the event the *firm* were wound up would give rise to repayments other than out of surplus emerging, the *reinsurance* cash outflows should be valued as a liability.
- 1.2.88 G *INSPRU* 1.2.85R allows a *firm* not to value *reinsurance* cash outflows provided the contingencies in which the *reinsurance* would require repayment other than out of future surpluses are limited to termination clauses concerning fraud, material misrepresentation, non-payment of *reinsurance premiums* by the *firm* or a transfer of business by the *firm* without the agreement of the *reinsurer*, except if unreasonably withheld.
- 1.2.89 G Where the *reinsurance* cash outflow is payable by a fund or sub-fund that generates such profits, charges or transfers, the *firm* need make no provision for such payments provided that repayment to the *reinsurer* is linked unambiguously (as defined in *INSPRU* 1.2.85R) to the emergence of future surplus. Where the profits, charges or transfers arising under a block of business are payable by a fund or sub-fund to another part of the *firm* then only where the *firm* has committed to remit such profits, charges or transfers directly to the *reinsurer* would it be acceptable for no provision for payments to the *reinsurer* to be made.
- 1.2.90 R [deleted]
- 1.2.91 G [deleted]
- Application of *INSPRU* 1.2 to Lloyd's
- 1.2.92 R *INSPRU* 1.2 applies to *managing agents* in accordance with *INSPRU* 8.1.4R.

Approved reinsurance to close

- 1.2.93 R In respect of business that has been subject to an *approved reinsurance to close*, *managing agents* must calculate *mathematical reserves* (before and after deduction of reinsurance cessions) for the reinsuring and not for the reinsured *member*.

1.3 With-profits insurance capital component

Application

- 1.3.1 R *INSPRU 1.3 applies to a realistic basis life firm.*
- 1.3.2 G *A realistic basis life firm means a firm to which GENPRU 2.1.18R applies. The application of GENPRU 2.1.18R is set out in GENPRU 2.1.19R and GENPRU 2.1.20R. GENPRU 2.1.13R requires that a firm must maintain at all times capital resources equal to or in excess of its capital resources requirement. The enhanced capital requirement forms part of the capital resources requirement for a realistic basis life firm. The with-profits insurance capital component forms part of the enhanced capital requirement which a realistic basis life firm is required to calculate in accordance with GENPRU 2.1.38R.*

Purpose

- 1.3.3 G *This section sets out rules and guidance as to the methods and assumptions to be used in calculating the with-profits insurance capital component.*
- 1.3.4 G *The purpose of the with-profits insurance capital component is to supplement the mathematical reserves so as to ensure that a firm holds adequate financial resources for the conduct of its with-profits insurance business. In particular, capital in excess of the mathematical reserves may be needed to ensure that adequate final bonuses can be awarded to policyholders. That is, adequate in the sense that in setting bonuses payable to policyholders the firm pays due regard to the interests of its policyholders and treats them fairly. The mathematical reserves for a realistic basis life firm are not required to include provision for future annual bonuses or final bonuses (INSPRU 1.2.9R).*
- 1.3.5 G *The required procedures are summarised in the flowchart in INSPRU 1 Annex 1G.*

Main requirements

- 1.3.6 R *A firm must calculate the with-profits insurance capital component in accordance with INSPRU 1.3.7R.*
- 1.3.7 R *(1) The with-profits insurance capital component for a firm is the aggregate of any amounts that:*

- (a) result from the calculations specified in (2) and (3); and
 - (b) are greater than zero.
- (2) Subject to (3), in relation to each *with-profits fund* within the *firm*, the *firm* must deduct B from A, where:
- (a) A is the amount of the *regulatory excess capital* for that fund (see *INSPRU* 1.3.23R); and
 - (b) B is the amount of the *realistic excess capital* for that fund (see *INSPRU* 1.3.32R).
- (3) Where a capital instrument that can be included in the *firm's capital resources* in accordance with *GENPRU* 2.2 has been attributed wholly or partly to a *with-profits fund* and that instrument meets the requirements of *GENPRU* 2.2.271R, the *firm* must add to the amount calculated under (2) for that fund the result, subject to a minimum of zero, of deducting D from C where:
- (a) C is the outstanding face amount of the instrument to the extent attributed to the fund; and
 - (b) D is the realistic value of the instrument to the extent attributed to the fund in the single event that determines the *risk capital margin* under *INSPRU* 1.3.43R.

- 1.3.8 G Subordinated debt which is subordinated to *policyholder* interests (see *GENPRU* 2.2.271R) is an example of the sort of capital instrument that may give rise to a component of the *WPICC* under *INSPRU* 1.3.7R(3). Such instruments are treated as capital under *GENPRU* 2.2, subject to the requirements of *GENPRU* 2.2.271R. Under realistic reserving the capital instrument is valued as a realistic liability (*INSPRU* 1.3.40R) and in calculating the *risk capital margin* such an instrument would be valued at its realistic value in the single event outlined in *INSPRU* 1.3.43R (see also *INSPRU* 1.3.162R). Overall, the effect of *GENPRU* 2.2, *INSPRU* 1.3.7R(3) and *INSPRU* 1.3.43R is to enable a *firm* that obtains subordinated debt to benefit from additional *capital resources* equal to the face amount of that debt.
- 1.3.9 G *SUP* 4 (Actuaries) sets out the role and responsibilities of the *actuarial function* and of the *with-profits actuary*.

(1) As part of his duties under SUP 4.3.13R, the *actuary* appointed by the *firm* to perform the *actuarial function* must calculate the *firm's mathematical reserves* and, in the context of the calculation of the *with-profits insurance capital component*, must also:

(a) advise the *firm's governing body* on the methods and assumptions to be used in the calculation of the *firm's with-profits insurance capital component*;

(b) perform that calculation in accordance with the methods and assumptions determined by the *firm's governing body*; and

(c) report to the *firm's governing body* on the results of that calculation.

(2) As part of his duties under SUP 4.3.16G, the *with-profits actuary* must advise the *firm's governing body* on the discretion exercised by the *firm*. In the context of the calculation of the *with-profits insurance capital component*, the *with-profits actuary* must also advise the *firm's governing body* as to whether the methods and assumptions (including the allowance for management actions) used for that calculation are consistent with the *firm's Principles and Practices of Financial Management (PPFM - see COB 6.10)* and with its regulatory duty to treat its *customers* fairly.

General

Definitions

- 1.3.10 R In this section, real estate means an interest in land, buildings or other immovable property.
- 1.3.11 R In this section, the long-term gilt yield is the annualised equivalent of the yield on the 15-year index for United Kingdom Government fixed-interest securities jointly compiled by the Financial Times, the Institute of Actuaries and the Faculty of Actuaries.
- 1.3.12 R For the purposes of this section, a *firm* has an exposure to an asset or liability where the *firm's* valuation of its assets or liabilities changes when the value of the asset or liability changes.
- 1.3.13 R Unless the context otherwise requires, all references (however expressed) in this section to realistic liabilities, or to liabilities which are included in the calculation of realistic liabilities, include discretionary benefits payable by the *firm* in accordance with the *firm's* regulatory duty to treat its *customers* fairly.
- 1.3.14 G In this section, any reference to a *firm's* regulatory duty to treat its *customers* fairly is a reference to the *firm's* duty under *Principle 6 (Customers' interests)*. This states that a *firm* must pay due regard to the interests of its *customers* and treat them fairly.
- 1.3.15 G In this section, any reference to the *Principles and Practices of Financial Management (PPFM)* is a reference to the requirements in *COB 6.10 (Principles and Practices of Financial Management)* for *firms* to establish,

maintain and record the principles and practices of financial management according to which the business of its *with-profits funds* is conducted.

- 1.3.16 G The extent to which a *firm* requires a separate *PPFM* for each of its *with-profits funds* will depend on the *firm's* circumstances and any relevant representations made by the *firm* to its *with-profits policyholders*. In this section, any reference to a *firm's PPFM* refers to the *PPFM* which relate to the *with-profits fund* or the *with-profits insurance contracts* in question.

Record keeping

- 1.3.17 R A *firm* must make, and retain for an appropriate period of time, a record of:
(1) the methods and assumptions used in making any calculation required for the purposes of this section (and any subsequent changes) and the reasons for their use; and
(2) any change in practice and the nature of, reasons for, and effect of, any change in approach with respect to those methods and assumptions.

- 1.3.18 G *SYSC 14.1.53R* requires *firms* to maintain accounting and other records for a minimum of three years, or longer as appropriate. For the purposes of *INSPRU 1.3.17R*, a period of longer than three years will be appropriate for a *firm's long-term insurance business*. In determining an appropriate time period, a *firm* should have regard to:

- (1) the detailed *guidance* on record keeping in *SYSC 14.1.51G* to *SYSC 14.1.64G*;
(2) the nature and term of the *firm's long-term insurance contracts*; and
(3) any additional provisions or statutory requirements applicable to the *firm* or its records.

- 1.3.19 R A *firm* must also identify in the record required to be kept by *INSPRU 1.3.17R* changes in practice, in particular changes in those items which will or may be significant in relation to the eventual *claim* values.

- 1.3.20 G Some of the changes identified in accordance with *INSPRU 1.3.19R* may have to be notified to the *firm's policyholders* in accordance with the *firm's PPFM*.

General principles for allocating aggregate amounts

- 1.3.21 R Where any calculation is required under this section which:
(1) is to be made in respect of any *with-profits fund* of a *firm*; and
(2) covers an amount that is otherwise calculated in relation to the *firm* as a whole;
the *firm* must make an allocation of that amount as between all of its funds (including funds which are not *with-profits funds*).

- 1.3.22 R In any case where:

- (1) *non-profit insurance contracts* are written in any *with-profits fund* of a *firm*; and
- (2) any calculation is required under this section which:
- (a) is to be made in respect of the *regulatory excess capital* or *realistic excess capital* for the fund; and
- (b) covers an amount that is otherwise calculated or allocated in relation to the fund as a whole;
- the *firm* must make an allocation of the amount in (2)(b) as between the *with-profits insurance contracts* and *non-profit insurance contracts* written in the fund.

Calculation of regulatory excess capital

- 1.3.23 R A *firm* must calculate the *regulatory excess capital* for each of its *with-profits funds* by deducting B from A, where:
- (1) A is the *regulatory value of assets* of the fund (*INSPRU* 1.3.24R); and
- (2) B is the sum of:
- (a) the *regulatory value of liabilities* of the fund (*INSPRU* 1.3.29R);
- (b) the *long-term insurance capital requirement* in respect of the fund's *with-profits insurance contracts*; and
- (c) the *resilience capital requirement* in respect of the fund's *with-profits insurance contracts*.

Regulatory value of assets

- 1.3.24 R (1) For the purposes of *INSPRU* 1.3.23R(1), the *regulatory value of assets* of a *with-profits fund* is equal to the sum of:
- (a) the amount of the fund's *long-term admissible assets*; and
- (b) the amount of any *implicit items* allocated to that fund;
- less an amount, representing any *non-profit insurance contracts* written in that fund, determined in accordance with (2).
- (2) Where *non-profit insurance contracts* are written in a *with-profits fund*, the amount representing those contracts is the sum of:
- (a) the *mathematical reserves* in respect of the *non-profit insurance contract* written in the fund; and
- (b) the following amounts, to the extent that each of them is covered by the fund's *long-term admissible assets*:
- (i) an amount in respect of the *non-profit insurance contracts* written in the fund which represents an appropriate allocation of the *firm's long-term insurance capital requirement*; and
- (ii) an amount in respect of the *non-profit insurance contracts* written in the fund which represents an appropriate allocation of the *firm's resilience capital requirement*.
- 1.3.25 R For the purpose of determining the value of a fund's *long-term admissible assets* in accordance with *INSPRU* 1.3.24R(1)(a), no value is to be attributed to:

(1) debts owed by *reinsurers*; or
(2) *claims*; or
(3) tax recoveries; or
(4) claims against *compensation funds*;
to the extent already offset in the calculation of *technical provisions*.

1.3.26 R In making a determination in accordance with *INSPRU* 1.3.24R(2), a *firm* must allocate *long-term admissible assets* of an appropriate nature and term to any *non-profit insurance contracts* written in the *with-profits fund*.

1.3.27 G In calculating the amount of a *firm's resilience capital requirement* allocated to the *non-profit insurance contracts* in the *with-profits fund*, the *firm* should calculate the amount of resilience capital that would be required if that business were in a stand-alone company owning the assets allocated. The *resilience capital requirement* for the *with-profits insurance business* should also be calculated as if it were a stand-alone company. An allocation of the *firm's total resilience capital requirement* should then be made in a manner that would produce a result materially consistent with an allocation in proportion to the amounts calculated for each part of the business as stand-alone entities.

1.3.28 G A *firm* needs to obtain an *implicit item waiver* from the *FSA* in order to bring in an amount under *INSPRU* 1.3.24R(1)(b). For *guidance* on applying for an *implicit item waiver* in respect of future surpluses relating to *with-profits funds* see *GENPRU* 2 Annex 8G. The amount of any *implicit item* allocated to a *with-profits fund* may be defined in the terms of any *waiver* granted.

Regulatory value of liabilities

1.3.29 R For the purposes of *INSPRU* 1.3.23R(2)(a), the *regulatory value of liabilities* of a *with-profits fund* is equal to the sum of:
(1) the *mathematical reserves*, in respect of the fund's *with-profits insurance contracts*, including the value of any provisions reflecting bonuses allocated at the *actuarial valuation date*; and
(2) the *regulatory current liabilities* of the fund (see *INSPRU* 1.3.30R).

1.3.30 R For the purposes of *INSPRU* 1.3.29R(2), the *regulatory current liabilities* of a *with-profits fund* are equal to the sum of the following amounts to the extent that they relate to that fund:

(1) accounting liabilities (including *long-term insurance liabilities* which have fallen due before the end of the *financial year*);
(2) liabilities from *deposit back arrangements*; and
(3) any provision for adverse variations (determined in accordance with *INPSRU* 3.2.17R).

1.3.31 G The amount of *regulatory current liabilities* for a *with-profits fund* refers to the sum of the amounts in (1) and (2) in respect of the fund:

(1) the amount of 'Total other insurance and non-insurance liabilities'; and
(2) the amount of 'Cash bonuses which had not been paid to *policyholders* prior to the end of the financial year';
as disclosed at lines 49 and 12 respectively of the appropriate Form 14 ('Long-term business liabilities and margins') for that fund as part of the Annual Returns required to be deposited with the *FSA* under *IPRU(INS)* rule 9.6R(1).

Calculation of realistic excess capital

- 1.3.32 R *A firm* must calculate the *realistic excess capital* for each of its *with-profits funds* by deducting B from A, where:
- (1) A is the *realistic value of assets* of the fund (see *INSPRU* 1.3.33R); and
 - (2) B is the sum of:
 - (a) the *realistic value of liabilities* of the fund (see *INSPRU* 1.3.40R); and
 - (b) the *risk capital margin* for the fund (see *INSPRU* 1.3.43R).

Realistic value of assets

- 1.3.33 R (1) For the purposes of *INSPRU* 1.3.32R(1), the *realistic value of assets* of a *with-profits fund* is the sum of:
- (a) the amount of the fund's *regulatory value of assets* determined in accordance with *INSPRU* 1.3.24R, but with no value given to any *implicit items* and excluding the regulatory value of any *shares* in a *related undertaking* which carries on *long-term insurance business*;
 - (b) the amount of the fund's excess *admissible assets* (see *INSPRU* 1.3.36R);
 - (c) the present value of future profits (or losses) on any *non-profit insurance contracts* written in the *with-profits fund* (see *INSPRU* 1.3.37R);
 - (d) the value of any *derivative* or *quasi-derivative* held in the fund (see *GENPRU* 1.3.41R) to the extent its value is not reflected in (a), (b) or (c);
 - (e) any amount determined under (2); and
 - (f) the amount of any prepayments made from the fund.
- (2) Where any equity *shares* held (directly or indirectly) by a *firm* (A):
- (a) are *shares* in a *related undertaking* (B) which carries on *long-term insurance business*; and
 - (b) have been identified by A under *INSPRU* 1.3.21R as *long-term insurance assets* which are held in the *with-profits fund* for which the realistic value is to be determined under (1);
- the amount required under (1)(e) is the relevant proportion of the value of all B's equity *shares* as determined in (3).
- (3) For the purposes of (2):
- (a) the relevant proportion is the proportion of the total number of equity *shares* issued by B which are held (directly or indirectly) by A;
 - (b) the value of all B's equity *shares* must be taken as D deducted from C, where C is equal to the sum of:
 - (i) the shareholder net assets of B;
 - (ii) any surplus assets in the *non-profit funds* of B;
 - (iii) any additional amount arising from the present value of future profits (or losses) on any *non-profit insurance contracts* written by B (calculated on a basis consistent with *INSPRU* 1.3.37R), excluding any amount arising from business that is written in a *with-profits fund*; and
 - (iv) where B has any *with-profits funds*, the present value of projected future transfers out of those funds to shareholder funds of B;and D is equal to the sum of:
 - (v) the *long-term insurance capital requirement* in respect of any *non-profit insurance contracts* written in a *non-profit fund* of B;
 - (vi) the amount of the *resilience capital requirement* in respect of any *non-profit insurance contracts* written in a *non-profit fund* of B;
 - (vii) any part of the *with-profits insurance capital component* of B, or of B's *long-term insurance capital requirement* or *resilience capital requirement* in respect of B's *with-profits insurance contracts*, that is not covered from the assets of the *with-profits fund* from which it arises after deducting from those assets the amount calculated under (iv); and
 - (viii) any assets of B that back its regulatory capital requirements and that are valued in (iii) in the calculation of the present value of future profits of *non-profit insurance business* written by B.
- (4) The methods and assumptions used in the calculations under (3)(b)(iii) and (iv) must follow a consistent approach to that set out in *INSPRU* 1.3.37R.

- 1.3.34 G In *INSPRU* 1.3.33R(1)(d), where a *derivative* or *quasi-derivative* has a positive asset value, credit should be given within the *realistic value of assets*. If the *derivative* or *quasi-derivative* has a negative asset value it should be valued within realistic liabilities as an element of *realistic current liabilities* (see *INSPRU* 1.3.40R(3)).
- 1.3.35 G Where a *firm* identifies *shares* in a *related undertaking* which carries on *long-term insurance business* as *shares* held in one of its *with-profits funds*, *INSPRU* 1.3.33R(1)(e), *INSPRU* 1.3.33R(2) and *INSPRU* 1.3.33R(3) bring in a realistic valuation of the *related undertaking* equal to its net assets plus the present value of future profits, less its regulatory capital requirements (see *INSPRU* 1.3.33R(3)(v), (vi) and (vii)). Where the *related undertaking* has taken the present value of future profits arising from its contracts into consideration in covering its regulatory capital requirements (for example, its *risk capital margin*, under *INSPRU* 1.3.45R(2)(c)), *INSPRU* 1.3.33R(3)(b)(iii) requires a *firm* to exclude those future profits in valuing the *related undertaking*. The subtraction of the capital requirements in the calculation provides a straightforward method of allowing for the change in the *related undertaking's* value in stress conditions, as the value of the *related undertaking* is not subject to the realistic stress tests of the *risk capital margin*. In calculating the present value of future profits on *non-profit insurance business* written in the *related undertaking* under *INSPRU* 1.3.33R(3)(b)(iii), a *firm* may value the release of capital requirements as the business runs off (see *INSPRU* 1.3.38G). *INSPRU* 1.3.33R(3)(b)(viii) ensures that any such capital is not double-counted.
- 1.3.36 R Excess *admissible assets* of a *with-profits fund* means *admissible assets* which exceed any of the percentage limits referred to in *INSPRU* 2.1.22R.
- 1.3.37 R A *firm* must calculate the present value of future profits (or losses) on *non-profit insurance contracts* written in the *with-profits fund* using methodology and assumptions which:

- (1) are based on current estimates of future experience;
- (2) involve reasonable (but not excessively prudent) adjustments to reflect risk and uncertainty;
- (3) allow for a market-consistent valuation of any guarantees or options within the contracts valued;
- (4) are derived from current market yields, having regard to International Financial Reporting Standard 4: Insurance Contracts, as if it were being applied to determine the value under that standard for the first time;
- (5) have regard to generally accepted actuarial practice and generally accepted industry standards appropriate for *firms* carrying on *long-term insurance business*;
- (6) are consistent with the allocation, made in accordance with *INSPRU* 1.3.22 R, of any aggregate amounts as between the *with-profits insurance contracts* and the *non-profit insurance contracts* written in the fund;
- (7) allow for any tax that would be payable out of the *with-profits fund* in respect of the contracts valued; and
- (8) are consistent with the allocation, made in accordance with *INSPRU* 1.3.26R, of *long-term admissible assets* as between the *with-profits insurance contracts* and any *non-profit insurance contracts* written in the fund.

- 1.3.38 G In calculating the present value of future profits (or losses) for *non-profit insurance business* required by *INSPRU* 1.3.33R(1)(c), to the extent that the *long-term insurance capital requirement* and the *resilience capital requirement* are covered by the *with-profits fund's long-term admissible assets*, a *firm* may take into consideration any release of these items as the relevant *policies* go off the books.
- 1.3.39 G Annuities do not typically fall to be valued on a market-consistent basis under *INSPRU* 1.3.37R(3) as they are not "options and guarantees" as defined for accounting purposes. This is because they do not have "time value" in the option-pricing meaning of that term. However where, atypically, annuities do fall to be valued on a market-consistent basis under *INSPRU* 1.3.37(3), the discount rate used should be appropriate to the characteristics of the liability, including its illiquidity. The appropriate interest rate, therefore, would not typically be the risk-free rate. Where illiquid assets are used to closely match similar illiquid liabilities, as could be the case in annuities business, it would be appropriate to look at the liquidity premium that is implicit in the market value of the assets as a proxy for the liquidity premium that should be included in a market consistent valuation of the liabilities. However, care should be exercised in doing this. Assets and liabilities are rarely perfectly matched and an appropriate margin needs to be included in the valuation to cover the risk of unexpected mismatch.
- 1.3.39A G In view of *INSPRU* 1.3.39G, it is likely that the discount rate to be applied to the market-consistent valuation of those annuities that fall within the scope of *INSPRU* 1.3.37 R(3) would not be significantly different from that which applies to other annuities (to which a discount rate based on the return on the matching assets less an allowance for risk which is reasonable but not

excessively prudent, in accordance with *INSPRU* 1.3.37 R(2), might be applied).

- 1.3.39B G In determining current market yields for the purpose of *INSPRU* 1.3.3 R (4), a *firm* is required to have regard to IFRS 4 as if it were being applied to determine the value under that standard for the first time, that is, without reference to existing practices. Paragraph 27 of the standard is likely to be of particular relevance. A *firm* should not include an allowance for future investment margins until they are earned. In particular, a *firm* should not include an allowance for capital growth in determining current market yields for equities and real estate investments.

Realistic value of liabilities: general

- 1.3.40 R For the purposes of *INSPRU* 1.3.32R(2)(a), the *realistic value of liabilities* of a *with-profits fund* is the sum of:
(1) the *with-profits benefits reserve* of the fund;
(2) the *future policy related liabilities* of the fund; and
(3) the *realistic current liabilities* of the fund.

- 1.3.41 G All liabilities arising under, or in connection with, *with-profits insurance contracts* written in the fund should be included in the *realistic value of liabilities* referred to in *INSPRU* 1.3.40R, including those in respect of guarantees and the value of options.

- 1.3.42 G Detailed *rules* and *guidance* for the calculation of the three elements referred to in *INSPRU* 1.3.40R are contained below in this section:
(1) *INSPRU* 1.3.116R to *INSPRU* 1.3.135G refer to the *with-profits benefits reserve*;
(2) *INSPRU* 1.3.136G to *INSPRU* 1.3.189G refer to the *future policy related liabilities*; and
(3) *INSPRU* 1.3.190R and *INSPRU* 1.3.191R refer to the *realistic current liabilities*.

Risk capital margin

- 1.3.43 R (1) A *firm* must calculate a *risk capital margin* for each of its *with-profits funds* in accordance with (2) to (6).
(2) The *firm* must identify relevant assets (*INSPRU* 1.3.45R) which, in the most adverse scenario, will have a value (*INSPRU* 1.3.46R) which is equal to the *realistic value of liabilities* of the fund under that scenario.
(3) The most adverse scenario means the single event comprising that combination of the scenarios in *INSPRU* 1.3.44R which gives rise to the largest positive value that results from deducting B from A, where:
(a) A is the value of relevant assets which will produce the result described in (2); and
(b) B is the *realistic value of liabilities* of the fund.
(4) The *risk capital margin* for the fund is the result of deducting C from A, where C is the sum of:
(a) B; and
(b) any amount included within relevant assets under *INSPRU* 1.3.45R(2)(c).
(5) In calculating the value of relevant assets for the purpose of determining the most adverse scenario in (3), a *firm* must not adjust the valuation of any asset taken into consideration under *INSPRU* 1.3.33R(1)(e) (*related undertakings* carrying on *long-term insurance business*) or *INSPRU* 1.3.45R(2)(c) (present value of future profits arising from *insurance contracts* written outside the *with-profits fund*).
(6) In calculating the *realistic value of liabilities* of a fund under any scenario, a *firm* is not required to adjust the best estimate provision made under *INSPRU* 1.3.190R(1) in respect of a *defined benefits pension scheme* in accordance with *INSPRU* 1.3.191R .
- 1.3.44 R For the purposes of *INSPRU* 1.3.43R(3), the scenarios are one scenario selected from each of the following:

- (1) in respect of *UK* and other assets within *INSPRU* 1.3.62R(1)(a):
 - (a) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.68R(1) (equities);
 - (b) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.68R(2) (real estate); and
 - (c) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.68R(3) (fixed interest securities);
- (2) in respect of non-*UK* assets within *INSPRU* 1.3.62R(1)(b):
 - (a) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.73R(1) (equities);
 - (b) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.73R(2) (real estate); and
 - (c) the range of *market risk* scenarios identified in accordance with *INSPRU* 1.3.73R(3) (fixed interest securities);
- (3) the range of credit risk scenarios identified in accordance with *INSPRU* 1.3.78R(1) (bond or debt items);
- (4) the range of credit risk scenarios identified in accordance with *INSPRU* 1.3.78R(2) (*reinsurance* items or analogous non-*reinsurance* financing agreements);
- (5) the range of credit risk scenarios identified in accordance with *INSPRU* 1.3.78R(3) (other items including *derivatives* and *quasi-derivatives*); and
- (6) the persistency risk scenario identified in accordance with *INSPRU* 1.3.100R.

1.3.45 R (1) In *INSPRU* 1.3.43R, in relation to a *with-profits fund*, the relevant assets means a range of assets which meets the following conditions:

- (a) the range is selected on a basis which is consistent with the *firm's* regulatory duty to treat its *customers* fairly;
 - (b) the range must include assets from within the *with-profits fund* the value of which is greater than or equal to the *realistic value of liabilities* of the fund;
 - (c) the range is selected in accordance with (2); and
 - (d) no asset of the *firm* may be allocated to the range of assets identified in respect of more than one *with-profits fund*.
- (2) The range of assets must be selected from the assets specified in (a) to (c), in the order specified:
- (a) assets that have a realistic value under *INSPRU* 1.3.33R;
 - (b) where a *firm* has selected all the assets within (a), any *admissible assets* that are not identified as held within the *with-profits fund*; and
 - (c) where a *firm* has selected all the assets within (a) and (b), any additional assets.
- (3) But a *firm* must not bring any amounts into account under (2)(b) or (2)(c) in respect of any *with-profits fund* if that would result in the *firm* exceeding its overall maximum limit (determined according to whether the *firm* has only one *with-profits fund* or more than one such fund).
- (4) A *firm* exceeds its overall maximum limit for amounts brought into account under (2)(b) where:
- (a) in the case of a *firm* with a single *with-profits fund*, the amount the *firm* brings into account in respect of that fund;
 - (b) in the case of a *firm* with two or more *with-profits funds*, the aggregate of the amounts the *firm* brings into account in respect of each of those funds; exceeds the sum of the *firm's* shareholder net assets and the surplus assets in the *firm's non-profits funds*, less any regulatory capital requirements in respect of business written outside its *with-profits funds*.
- (5) A *firm* exceeds its overall maximum limit for amounts brought into account under (2)(c) where:
- (a) in the case of a *firm* with a single *with-profits fund*, the amount the *firm* brings into account in respect of that fund;
 - (b) in the case of a *firm* with two or more *with-profits funds*, the aggregate of the amounts the *firm* brings into account in respect of each of those funds; exceeds 50% of the present value of future profits arising from *insurance contracts* written by the *firm* outside its *with-profits funds*.

- 1.3.46 R In valuing the relevant assets identified under *INSPRU* 1.3.43R(2), a *firm* must use the same methods of valuation as in *INSPRU* 1.3.33R, except that:
- (1) the value of any *admissible assets* not identified as held within the *with-profits fund* (*INSPRU* 1.3.45R(2)(b)) must be as determined under *GENPRU* 1.3; and
 - (2) the value of any asset which forms part of the range of assets as a result of *INSPRU* 1.3.45R(2)(c) must be determined on a basis consistent with that described in *INSPRU* 1.3.37R.
- 1.3.47 G The purpose of the *risk capital margin* for a *with-profits fund* is to cover

adverse deviation from:

(1) the fund's *realistic value of liabilities*;
(2) the value of assets identified, in accordance with *INSPRU* 1.3.43R(2), to cover the amount in (1) and the fund's *risk capital margin*; arising from the effects of *market risk*, credit risk and persistency risk. Other risks are not explicitly addressed by the *risk capital margin*.

- 1.3.48 G The amount of the *risk capital margin* calculated by the *firm* for a *with-profits fund* will depend on the *firm's* choice of assets held to cover the fund's *realistic value of liabilities* and the margin. *INSPRU* 1.3.43R requires the relevant assets to be sufficient, in the most adverse scenario, to cover the *realistic value of liabilities* in the event that scenario was to arise.
- 1.3.49 G *INSPRU* 1.3.45R(2)(c) allows *firms* to bring the economic value of *non-profit insurance business* written outside a *with-profits fund* into the assets available to cover the *risk capital margin*. To place a prudent limit on the amount of future profits taken into consideration a maximum of 50% of the present value of *non-profit insurance business* can be taken into the calculation (*INSPRU* 1.3.45R(5)). Where a contract is written in a *non-profit fund* but the assets arising from that contract are invested in a *with-profits fund* which is subject to charges for investment management or other services which benefit the *non-profit fund*, such charges can be taken into consideration in calculating the present value of future profits of the *non-profit insurance business*. Where a proportion of the present value of future profits on *non-profit insurance business* written outside a *with-profits fund* is brought in as an asset, no stress tests apply to this asset (see *INSPRU* 1.3.43R(5)) as the amount taken into consideration is limited to 50% of the total present value.
- 1.3.50 G A *firm* using a stochastic approach in *INSPRU* 1.3.169R(1) should keep recalibration in the post-stress scenarios to the minimum required to reflect any change in the underlying risk-free yields. A *firm* using the market costs of hedging approach, as in *INSPRU* 1.3.169R(2), may assume in estimating the market cost of hedging in the post-stress scenarios that market volatilities are unchanged.
- 1.3.51 G In the scenario tests set out in *INSPRU* 1.3.62R to *INSPRU* 1.3.103G, *firms* are required to test for worst case scenarios across a range of assumptions. The tests are, with the exception of the credit risk test, two-sided, requiring both increases and decreases in the assumptions. The *FSA* does not expect a *firm* to investigate every possible stress, but a *firm* should be able to demonstrate that it is reasonable to assume that it has successfully identified the single event that determines the *risk capital margin* for the *firm's* business, as required by *INSPRU* 1.3.43R(3).
- 1.3.51A G In the scenario tests set out in *INSPRU* 1.3.62R to *INSPRU* 1.3.103G, a *firm* is required to assess the changed value of its assets and liabilities in the economic conditions of the most adverse scenario. A *firm* is required to assess the changed value of each relevant asset (as defined in *INSPRU*

1.3.45R), notwithstanding any uncertainty about the appropriate valuation basis for that asset. In valuing an asset in the most adverse scenario, a *firm* should have regard to the economic substance of the asset, rather than its legal form, and assess its value accordingly. Consider, for example, a convertible bond that is close to its conversion date and where the conversion option has value. The value of the convertible bond in the most adverse scenario is likely to be sensitive primarily to equity market scenarios and to a lesser extent to interest rate scenarios. The *firm* should value the asset according to its expected market value in the economic conditions underlying the most adverse scenario.

Management actions

- 1.3.52 R In calculating the *risk capital margin* for a *with-profits fund*, a *firm* may reflect, in its projections of the value of assets and liabilities under the scenarios in *INSPRU* 1.3.44R, the *firm's* prospective management actions (*INSPRU* 1.3.53R).
- 1.3.53 R Prospective management actions refer to the foreseeable actions that would be taken by the *firm's* management, taking into account:
- (1) an appropriately realistic period of time for the management actions to take effect; and
- (2) the *firm's* *PPFM* and its regulatory duty to treat its *customers* fairly.
- 1.3.54 G The management actions in *INSPRU* 1.3.53R may include, but are not limited to, changes in future bonus rates, reductions in *surrender values*, changes in asset dispositions (taking into account the associated selling costs) and changes in the amount of charges deducted from asset shares for *with-profits insurance contracts*.
- 1.3.55 G A *firm* should use reasonable assumptions in incorporating management actions into its projections of *claims* such that the mitigating effects of the management actions are not overstated. In modelling management actions, a *firm* should ensure consistency with its *PPFM* and take into account its regulatory duty to treat its *customers* fairly.
- 1.3.56 G In accordance with *INSPRU* 1.3.17R, a *firm* should make and retain a record of the approach used, in particular the nature and effect of anticipated management actions (including, where practicable, the amount by which the actions would serve to reduce the projected values of assets and liabilities).
- 1.3.57 G A *firm* which deducts charges in respect of any adverse experience or cost of capital to *with-profits insurance contracts* should keep a record under *INSPRU* 1.3.17R of the amount of any such charges to its *customers* and of how it has ensured their fair treatment.

Policyholder actions

- 1.3.58 R In calculating the *risk capital margin* for a *with-profits fund*, a *firm* must

reflect, in its projections of the value of assets and liabilities under the scenarios in *INSPRU* 1.3.44R, a realistic assessment of the actions of its *policyholders* (see *INSPRU* 1.3.59R).

- 1.3.59 R *Policyholder* actions refer to the foreseeable actions that would be taken by the *firm's policyholders*, taking into account:
- (1) the experience of the *firm* in the past; and
 - (2) the changes that may occur in the future if options and guarantees become more valuable to *policyholders* than in the past.
- 1.3.60 G A *firm* should use realistic assumptions in incorporating *policyholder* actions into its projections of *claims* such that any mitigating effects of *policyholder* actions are not overstated and any exacerbating effects of *policyholder* actions are not understated. In modelling *policyholder* actions, a *firm* should ensure consistency with its *PPFM* and take into account its regulatory duty to treat its *customers* fairly in determining the options and information that would be available to *policyholders*.
- 1.3.61 G In calculating the persistency scenario in *INSPRU* 1.3.100R, a *firm* needs to make assumptions regarding the future termination rates exhibited by *policies*, at points described in particular in *INSPRU* 1.3.101R. Such assumptions should be realistic. However, the *firm* must have regard to the economic scenarios being projected. For example, if the value of an option became significantly greater in a future scenario than in the recent past, then the behaviour of *policyholders* in taking up the option is likely to differ in this future scenario compared with the recent past.
- Market risk scenario
- 1.3.62 R (1) For the purposes of *INSPRU* 1.3.44R, the ranges of *market risk* scenarios that a *firm* must assume are:
- (a) for exposures to *UK* assets and for exposures to non-*UK* assets within (2), the ranges of scenarios set out in *INSPRU* 1.3.68R; and
 - (b) for exposures to other non-*UK* assets, the ranges of scenarios set out in *INSPRU* 1.3.73R.
- (2) The exposures to non-*UK* assets within this paragraph are:
- (a) exposures which do not arise from a significant territory outside the *United Kingdom* (*INSPRU* 1.3.63R); or
 - (b) exposures which do arise from a significant territory outside the *United Kingdom* but which represent less than 0.5% of the *realistic value of assets* of the *with-profits fund*, measured by *market value*.
- 1.3.63 R For the purposes of this section in relation to a *with-profits fund*, a significant territory is any country or territory in which more than 2.5% of the fund's *realistic value of assets* (by *market value*) are invested.
- 1.3.63A G *Guidance* on how a *firm* should determine where particular assets are invested is provided in *INSPRU* 3.1.13BG.

- 1.3.64 G In determining its most adverse scenario, a *firm* applying *INSPRU* 1.3.68R and *INSPRU* 1.3.73R should consider separately possible movements in *UK* and non-*UK* markets. It should not assume that market prices in different markets move in a similar way at the same time. A *firm* should also allow for the effect of the other components of the single event comprising the combination of scenarios applicable under *INSPRU* 1.3.43R.
- 1.3.65 G In relation to the *market risk* scenarios in *INSPRU* 1.3.68R and *INSPRU* 1.3.73R, the effect of *INSPRU* 1.3.52R and *INSPRU* 1.3.58R is that a *firm* may reflect management actions and must make a realistic assessment of *policyholder* actions in projecting the assets and liabilities in its calculation of the *risk capital margin* for a *with-profits fund* within the *firm*. This contrasts with the position for calculating the *resilience capital requirement* for the *firm* (*INSPRU* 3.1.9 G to *INSPRU* 3.1.26R).

1.3.66 G [deleted]

- 1.3.67 G The relevant assets identified under *INSPRU* 1.3.43R(2) to calculate the *risk capital margin* may, in certain circumstances, include up to 50% of the present value of future profits arising from *insurance contracts* written by the *firm* outside its *with-profits funds*. *INSPRU* 1.3.43R(5) exempts such an asset from the *market risk* stress tests.

Market risk scenario for exposures to UK assets and certain non-UK assets

- 1.3.68 R The range of *market risk* scenarios referred to in *INSPRU* 1.3.62R(1)(a) is:
(1) a rise or fall in the *market value* of equities of up to the greater of:
(a) 10%; and
(b) 20%, less the *equity market adjustment ratio* (see *INSPRU* 1.3.71R);
(2) a rise or fall in real estate values of up to 12.5%; and
(3) a rise or fall in yields on all fixed interest securities of up to 17.5% of the long-term gilt yield.
- 1.3.69 R For the purposes of *INSPRU* 1.3.68R, a *firm* must:
(1) assume that yields on equities and real estate remain unchanged from those applicable at market levels before applying each scenario; and
(2) model a rise or fall in equity, real estate and fixed interest markets as if the movement occurred instantaneously.
- 1.3.70 G For example, where the long-term gilt yield is 6%, a change of 17.5% in that yield would amount to a change of 1.05 percentage points. For the purpose of the scenarios in *INSPRU* 1.3.68R(3), the *firm* would assume a fall or rise of up to 1.05 percentage points in yields on all fixed interest securities.

Equity market adjustment ratio

1.3.71 R The equity market adjustment ratio referred to in *INSPRU* 1.3.68R(1)(b) is:
(1) if the ratio calculated in (a) and (b) lies between 80% and 100%, the result of 100% less the ratio (expressed as a percentage) of:
(a) the current value of the FTSE Actuaries All Share Index; to
(b) the average value of the FTSE Actuaries All Share Index over the preceding 90 calendar days;
(2) 0%, if the ratio calculated in (1)(a) and (b) is more than 100%; and
(3) 20%, if the ratio calculated in (1)(a) and (b) is less than 80%.

1.3.72 R In *INSPRU* 1.3.71(1)(b), the average value of the FTSE Actuaries All Share Index over any period of 90 calendar days means the arithmetic mean based on levels at the close of business on each of the days in that period on which the London Stock Exchange was open for trading.

Market risk scenario for exposures to other non-UK assets

1.3.73 R The range of *market risk* scenarios referred to in *INSPRU* 1.3.62R(1)(b) is:
(1) an appropriate rise or fall in the *market value* of equities listed in that territory (*INSPRU* 1.3.75G), which must be at least equal to the percentage determined in *INSPRU* 1.3.68R(1);
(2) a rise or fall in real estate values in that territory of up to 12.5%; and
(3) a rise or fall in yields on all fixed interest securities of up to 17.5% of the nearest equivalent (in respect of the method of calculation) of the long-term gilt yield.

1.3.74 R For the purposes of *INSPRU* 1.3.73R, a *firm* must:

(1) assume that yields on equities and real estate remain unchanged from those applicable at market levels before applying each scenario; and
(2) model a rise or fall in equity, real estate and fixed interest markets as if the movement occurred instantaneously.

1.3.75 G For the purposes of *INSPRU* 1.3.73R(1), an appropriate rise or fall in the *market value* of equities to which a *firm* has exposure in a significant territory must be determined having regard to:

(1) an appropriate equity market index (or indices) for that territory; and
(2) the historical volatility of the equity market index (or indices) selected in (1).

1.3.76 G For the purpose of *INSPRU* 1.3.75G(1), an appropriate equity market index (or indices) for a territory should be such that:

- (1) the constituents of the index (or indices) are reasonably representative of the nature of the equities to which the *firm* is exposed in that territory which are included in the relevant assets identified in accordance with *INSPRU* 1.3.43R(2); and
- (2) the frequency of, and historical data relating to, published values of the index (or indices) are sufficient to enable an average value(s) and historical volatility of the index (or indices) to be calculated over at least the three preceding *financial years*.

Credit risk scenarios

General

- 1.3.77 G (1) The purpose of the credit risk scenarios in *INSPRU* 1.3.78R to *INSPRU* 1.3.99G is to show the financial effect of specified changes in the general credit risk environment on a *firm's* direct (*counterparty*) and indirect credit risk exposures. The scenarios apply in relation to corporate bonds, debt, *reinsurance* and other exposures, including *derivatives* and *quasi-derivatives*. This is thus quite separate from any reference to allowance for credit risk in *INSPRU* 3.1.
- (2) In the case of bonds and debts, the scenarios are described in terms of an assumed credit rating dependent on the widening of credit spreads - changes in bond and debt credit spreads will have a direct impact on the value of bond and debt assets. Credit ratings are intended to give an indication of the security of the income and capital payments for a bond - the higher the credit rating, the more secure the payments. The reaction of credit spreads to developments in markets for credit risk varies by credit rating and so the scenarios to be assumed for bonds and debts depend on their ratings. The credit spreads on bonds and debt represent compensation to the investor for the risk of default and downgrade, but also for illiquidity, price volatility and the uncertainty of recovery rates relative to government bonds. Credit spreads on bonds tend to widen during an economic recession to reflect the increased expectations that corporate borrowers may default on their obligations or be subject to rating downgrades.
- (3) Changes in bond and debt credit spreads will also be indicative of a change in direct *counterparty* exposure in relation to *reinsurance* and other exposures including *derivatives* and *quasi-derivatives*.
- (4) In addition, changes in bond and debt credit spreads may indirectly impact on credit exposures, for example by affecting the payments anticipated under credit *derivative* instruments.
- (5) A *firm* will also need to allow for the effect of other components of the single event comprising the combination of scenarios applicable under *INSPRU* 1.3.43R in assessing exposure to credit risk. For example, in the case of an equity put *option* and a fall in equity market values, the resulting increase in the level of exposure to the *firm's counterparty* for the *option* combined with a change in the quality of the *counterparty* should be allowed for.
- 1.3.78 R For the purposes of *INSPRU* 1.3.44R, the range of credit risk scenarios that

a *firm* must assume is:

- (1) changes in value resulting from an increase in credit spreads by an amount of up to the spread stress determined according to *INSPRU* 1.3.84R in respect of any bond or debt item;
- (2) changes in value determined according to *INSPRU* 1.3.94R in respect of any *reinsurance* item or any analogous non-*reinsurance* financing agreement item; and
- (3) changes in value determined according to *INSPRU* 1.3.98R for any other item (including any *derivative* or *quasi-derivative*).

- 1.3.79 R For the purposes of *INSPRU* 1.3.78R, a *firm* must make appropriate allowance for any loss mitigation techniques to the extent that they are loss mitigation techniques relied on for the purpose of *INSPRU* 2.1.8R in accordance with *INSPRU* 2.1.16R and *INSPRU* 2.1.18R.
- 1.3.80 G The change in asset or liability values to be determined in relation to a credit risk scenario for the purposes of *INSPRU* 1.3.43R and *INSPRU* 1.3.44R is the change in value which would arise on the occurrence of the relevant credit risk scenario as a result of bond, debt, *reinsurance* or other exposures whether or not there is a direct *counterparty* exposure.
- 1.3.81 R Where a bond or a debt item or *reinsurance* asset is currently in default, it may be ignored by a *firm* for the purpose of applying *INSPRU* 1.3.78R.
- 1.3.82 G Where a bond or a debt item or a *reinsurance* asset is currently in default and has been specifically provisioned, in accordance with relevant accounting standards, a *firm* is not required to increase the existing default provisions to reflect a worsening of recovery rates.
- 1.3.83 R Where the credit risk scenarios in *INSPRU* 1.3.78R to *INSPRU* 1.3.99G require a *firm* to assume a change in current credit spread, or a direct change in market value, the *firm* must not change the risk-free yields used to discount future cash flows in calculating the revised *realistic value of liabilities* and *realistic value of assets* (*INSPRU* 1.3.43R(2)) resulting from those credit risk scenarios.

Spread stresses to be assumed for bonds and debt

- 1.3.84 R (1) In *INSPRU* 1.3.78R(1) the spread stress which a *firm* must assume for any bond or debt item is:
- (a) for any bond or debt item issued or guaranteed by an organisation which is in accordance with *INSPRU* 1.3.87R a credit risk scenario exempt organisation in respect of that item, zero basis points; and
 - (b) for any other bond or debt item:
 - (i) Y if the credit rating description of that other bond or debt item determined by reference to *INSPRU* 1.3.89R is not "Highly speculative or very vulnerable"; and
 - (ii) otherwise the larger of Y and Z.
- (2) For the purpose of (1)(b):
- (a) Y is the product of the spread factor for that bond or debt item and the square root of S, where:
 - (i) the spread factor for a bond or debt item is the spread factor shown in the final column of Table *INSPRU* 1.3.90R, in the row of that Table corresponding to the credit rating description of the bond or debt item determined for the purpose of this *rule* by reference to *INSPRU* 1.3.89R; and
 - (ii) subject to (3), S is the current credit spread for a bond or debt item, expressed as a number of basis points, which the *firm* must determine as the current yield on that bond or debt item in excess of the current gross redemption yield on the government bond most similar to that bond or debt item in terms of currency of denomination and equivalent term; and
 - (b) Z is the change in credit spread expressed as a number of basis points that would result in the current market value of the bond or debt falling by 5%.
- (3) Where, for the purposes of (2)(a)(ii), there is no suitable government bond, the *firm* must use its best estimate of the gross redemption yield that would apply for a notional government bond similar to the bond or debt item in terms of currency of denomination and equivalent term.
- 1.3.85 R For the purpose of *INSPRU* 1.3.84R(1)(a), a guarantee must be direct, explicit, unconditional and irrevocable.
- 1.3.86 G (1) As an example, a bond item has the credit rating description "exceptional or extremely strong" and currently yields 49 basis points in excess of the most similar government bond. The spread factor for that bond item is 3.00 by reference to Table *INSPRU* 1.3.90R. Since S is 49, the square root of S is 7 and the spread stress for that item is 3 times 7, that is, 21 basis points. The *firm* must consider the impact of an increase in spreads by up to 21 basis points for that item.

(2) As a further example, a bond item has the credit rating description "highly speculative or very vulnerable". For this bond, S is 400, being the current spread for that bond expressed as a number of basis points. The spread factor for the bond is 24.00. So the *firm* must consider the impact of an increase in spreads by up to 24.00 times 20 i.e. 480 basis points for that item. The bond is however of short duration and the reduction in market value resulting from an additional spread of 480 basis points is less than 5 per cent of its current market value. A 5 per cent reduction in its market value would result from a spread widening of 525 basis points. The *firm* must consider the impact of an increase in spreads by up to 525 basis points for that item by virtue of its credit rating description.

(3) The calculation of the credit spread on commercial floating rate notes warrants particular consideration. Suppose, for example, that a notional floating rate note guaranteed by the *UK* government would have a market consistent price of X. This price can be estimated based on an assumed distribution of future payments under the floating rate note, and the current forward gilt curve. Suppose further that the market price of the commercial floating rate note is Y, where Y is less than X. A *firm* could calculate what parallel upward shift in the forward gilt curve would result in the notional government-backed floating rate note having a market price of Y for an unchanged assumed distribution of future payments. The size of the resulting shift could then be taken as the credit spread on the commercial floating rate note.

(4) In arriving at the estimated gross redemption yield in *INSPRU* 1.3.84R(3), the *firm* may have regard to any appropriate swap rates for the currency of denomination of the bond or debt item, adjusted to take appropriate account of observed differences between swap rates and the yields on government bonds.

1.3.87 R For the purposes of this section:

(1) an organisation is a credit risk scenario exempt organisation in respect of an item if the organisation is:

(a) the European Central Bank; or
(b) any central government or central bank which, in relation to that item, satisfies the conditions in (2); or

(c) a multilateral development bank which is listed in (3); or

(d) an international organisation which is listed in (4);

(2) the conditions in (1)(b) are that, for any claim against the central government or central bank denominated in the currency in which the item is denominated:

(a) a credit rating is available from at least one listed rating agency nominated in accordance with *INSPRU* 1.3.92R; and

(b) the credit rating description in the first column of Table *INSPRU* 1.3.90R corresponding to the lowest such credit rating is either "exceptionally or extremely strong" or "very strong";

(3) for the purposes of (1)(c) the listed multilateral development banks are:

(a) the International Bank for Reconstruction and Development;

(b) the International Finance Corporation;

(c) the Inter-American Development Bank;

(d) the Asian Development Bank;

(e) the African Development Bank;

(f) the Council of Europe Development Bank;

(g) the Nordic Investment Bank;

(h) the Caribbean Development Bank;

(i) the European Bank for Reconstruction and Development;

(j) the European Investment Bank;

(k) the European Investment Fund; and

(l) the Multilateral Investment Guarantee Agency;

(4) for the purposes of (1)(d) the listed international organisations are:

(a) the European Community;

(b) the International Monetary Fund; and

(c) the Bank for International Settlements.

- 1.3.88 G Under *INSPRU* 1.3.87R(2), a *firm* needs to take account of the currency in which the claim is denominated when it is considering claims on or guaranteed by a central government or central bank. It is possible, for example, that a given central bank would be a credit risk scenario exempt organisation in respect of claims on it denominated in its domestic currency, while not being a credit risk scenario exempt organisation in respect of claims on it denominated in a currency other than its domestic currency - the central government or central bank may have been assigned different credit assessments depending on the currency in which the claim on it is denominated.
- 1.3.89 R (1) For the purposes of this section, the credit rating description of a bond or debt item is to be determined in accordance with (2) and (3).

- (2) If the item has at least one credit rating nominated in accordance with *INSPRU* 1.3.92R ("a rated item"), its credit rating description is:
- (a) where it has only one nominated credit rating, the general description given in the first column of Table *INSPRU* 1.3.90R corresponding to that rating; or
 - (b) where it has two or more nominated credit ratings and the two highest nominated ratings fall within the same general description given in the first column of that Table, that description; or
 - (c) where it has two or more nominated credit ratings and the two highest nominated ratings do not fall within the same general description given in the first column of that Table, the second highest of those two descriptions.
- (3) If the item is not a rated item, its credit rating description is the general description given in the first column of Table *INSPRU* 1.3.90R that most closely corresponds to the *firm's* own assessment of the item's credit quality.
- (4) An assessment under (3) must be made by the *firm* for the purposes of the credit risk scenario having due regard to the seniority of the bond or debt and the credit quality of the bond or debt issuer.

1.3.90 R Table : Listed rating agencies, credit rating descriptions, spread factors

Credit Rating Description	Listed rating agencies				Spread Factor
	A.M. Best Company	Fitch Ratings	Moody's Investors Service	Standard & Poor's Corporation	
Exceptional or extremely strong	aaa	AAA	Aaa	AAA	3.00
Very strong	aa	AA	Aa	AA	5.25
Strong	a	A	A	A	6.75
Adequate	bbb	BBB	Baa	BBB	9.25
Speculative or less vulnerable	bb	BB	Ba	BB	15.00
Very speculative or more vulnerable	B	B	B	B	24.00
Highly speculative or very vulnerable	Below B	Below B	Below B	Below B	24.00

- 1.3.91 G Where listed rating agencies provide ratings by sub-category then all ratings should be allocated to the main ratings category (e.g. ratings sub-category A+ or A- would be allocated to the assigned ratings category "Strong").
- 1.3.92 R For the purposes of *INSPRU* 1.3.87R and *INSPRU* 1.3.89R, a *firm* may, subject to (1) to (5), nominate for use credit ratings produced by one or more of the rating agencies listed in *INSPRU* 1.3.93R:

- (1) if the *firm* decides to nominate for use for an item the credit rating produced by one or more rating agencies, it must do so consistently for all similar items;
- (2) the *firm* must use credit ratings in a continuous and consistent way over time;
- (3) the *firm* must nominate for use only credit ratings that take into account both principal and interest;
- (4) if the *firm* nominates for use credit ratings produced by one of the listed rating agencies then the *firm* must use solicited credit ratings produced by that listed rating agency; and
- (5) the *firm* may nominate for use unsolicited credit ratings produced by one or more of the listed rating agencies except where there are reasonable grounds for believing that any unsolicited credit ratings produced by the agency are used so as to obtain inappropriate advantages in the relationship with rated parties.

1.3.93 R In this section, a listed rating agency is:

- (1) A.M. Best Company; or
- (2) Fitch Ratings; or
- (3) Moody's Investors Service; or
- (4) Standard & Poor's Corporation.

Credit risk scenario for reinsurance

- 1.3.94 R (1) The contracts of *reinsurance* or analogous non-*reinsurance* financing agreements to which *INSPRU* 1.3.78R(2) applies are those:
- (a) into which the *firm* has entered;
 - (b) which represent an economic asset under the single event applicable under *INSPRU* 1.3.43R(3); and
 - (c) which are material (individually or in aggregate).
- (2) For the purposes of (1), no account is to be taken of *reinsurance* or analogous non-*reinsurance* financing arrangements between *undertakings* in the same *group* where:
- (a) the ceding and accepting *undertakings* are regulated by the *FSA* or a regulatory body in a *designated State or territory* for insurance (including *reinsurance*);
 - (b) no subsequent cessions of the ceded risk which are material (individually or in aggregate) are made to subsequent accepting *undertakings* by accepting *undertakings* (including subsequent accepting *undertakings*) other than to subsequent accepting *undertakings* which are in the same *group*; and
 - (c) for any subsequent cession or cessions of the ceded risk which are material (individually or in aggregate) each of the ceding and accepting *undertakings* (including subsequent accepting *undertakings*) is regulated by the *FSA* or a regulatory body in a *designated State or territory* for insurance (including *reinsurance*).
- (3) The change in value which a *firm* must determine for a contract of *reinsurance* or an analogous non-*reinsurance* financing agreement is the *firm's* best estimate of the change in realistic value which would result from changes in credit risk market conditions consistent, subject to (4), with the changes in credit spreads determined in accordance with *INSPRU* 1.3.78R(1).
- (4) For the purpose of (3), 5% should be replaced by 10% in *INSPRU* 1.3.84R(2)(b).
- 1.3.95 G (1) *Reinsurance* and analogous non-*reinsurance* financing agreements entered into by the *firm*, either with or acting as a *reinsurer*, must be included within the scope of the scenario. The combined rights and obligations under a contract of *reinsurance* or an analogous non-*reinsurance* financing agreement may represent an economic asset or liability. The value placed by the *firm* on the *reinsurance* item or non-*reinsurance* financing item should allow for a realistic assessment of the risks transferred and the risks of *counterparty* default associated with the item. In the case of analogous non-*reinsurance* financing agreements, references to terms such as "*reinsurer*", "*ceding undertakings*" and "*accepting undertakings*" include *undertakings* which by analogy are *reinsurers*, ceding or accepting *undertakings*. Analogous non-*reinsurance* financing agreements include contingent loans, securitisations and any other arrangements in respect of *contracts of insurance* that are analogous to contracts of *reinsurance* in terms of the risks transferred and the finance provided.

(2) In assessing values in accordance with *INSPRU* 1.3.94R, a *firm* may consider it appropriate to determine values by drawing an analogy with the approach in respect of bond and debt items set out in *INSPRU* 1.3.84R. (This might be the case if, in economic terms, the item being valued sufficiently resembles a bond or debt item - an alternative approach might otherwise be preferred). If the *firm* does consider it appropriate to draw an analogy, the "credit spread" assumed should be consistent with the assumed default probabilities and the values placed on the *reinsurance* asset for the purposes of determining the *realistic values of assets and liabilities*. A *firm* may regard it as appropriate to have regard to any financial strength ratings applicable to the *reinsurer*, but if so should apply the same principles set out in *INSPRU* 1.3.92R for the nomination of financial strength ratings. Table *INSPRU* 1.3.97G provides *guidance* as to the allocation of spread factors which a *firm* may, by analogy, deem appropriate to apply. Appropriate allowance should be made for any change in the extent of the *counterparty* exposure under the assumed scenario.

(3) The changes in credit risk spreads determined for bond and debt items in accordance with *INSPRU* 1.3.78R(1) are required to result in a reduction in market value for some items of 5% of their current value through the operation of *INSPRU* 1.3.84R(2)(b). For *reinsurance* contracts and analogous non-*reinsurance* financing agreements, determining the change in value by reference to *INSPRU* 1.3.94R(3) requires a *firm* to consider the possibility of *counterparty* default in changed credit risk market conditions. Where in the changed credit risk market conditions assumed to apply the *firm's* assessment of the *counterparty* risk would result in the asset being considered equivalent to "Highly speculative or very vulnerable", the reduction in value required is at least 10% of its current value. *INSPRU* 1.3.94R(4) relates to this requirement.

- 1.3.96 G A financial strength rating of a *reinsurer* refers to a current assessment of the financial security characteristics of the *reinsurer* with respect to its ability to pay *claims* under its *reinsurance* contracts and treaties in accordance with their terms.
- 1.3.97 G Table: Listed rating agencies, financial strength descriptions and spread factors

Financial Strength Description	A.M. Best Company	Fitch Ratings	Moody's Investors Service	Standard & Poor's Corporation	Spread Factor
Superior, extremely strong	A++	AAA	Aaa	AAA	3.00
Superior, very strong	A+	AA	Aa	AA	5.25
Excellent or strong	A, A-	A	A	A	6.75
Good	B++,B+	BBB	Baa	BBB	9.25
Fair, marginal	B, B-	BB	Ba	BB	15.00
Marginal, weak	C++,C+	B	B	B	24.00
Unrated or very weak	Unrated or below C++,C+	Unrated or below B	Unrated or below B	Unrated or below B	24.00

Credit risk scenario for other exposures (including any derivative or quasi-derivative)

- 1.3.98 R For the purposes of *INSPRU* 1.3.78R(3), the change in value which must be determined for any other item (including any *derivative* or *quasi-derivative*) which represents an economic asset under the single event applicable under *INSPRU* 1.3.43R(3) is the *firm's* best estimate of the change in the realistic value of that item which would result from changes in credit risk market conditions consistent with the changes in credit spreads determined in accordance with *INSPRU* 1.3.78R(1) and the changes in value determined in accordance with *INSPRU* 1.3.78R(2).
- 1.3.99 G In applying *INSPRU* 1.3.98R, a *firm* should assess the total impact on the value of the item resulting from the assumed changed credit risk market conditions. The total change in value may result from the interaction of a number of separate influences. For example, a widening of credit spreads may imply an impact on the amount exposed to *counterparty* default as well as on the likelihood of that default. Each factor influencing the change in value needs separate consideration. It should be assumed, both for determining amounts exposed to *counterparty* default and the likelihood of such default that there will be no change in the likelihood of default in relation to an item issued by or guaranteed by an organisation which is in respect of that item a credit risk scenario exempt organisation (*INSPRU* 1.3.87R). *INSPRU* 1.3.77(5) is also relevant in this context.

Persistency risk scenario

- 1.3.100 R For the purposes of the persistency risk scenario in *INSPRU* 1.3.44R(6), a *firm* must allow for the effects of an increase or a decrease in persistency experience of its *with-profits insurance contract* by adjusting the termination rates in each year of projection by 32.5% of the termination rates assumed in the calculation of the *realistic value of liabilities* in

INSPRU 1.3.40R.

- 1.3.101 R The termination rates referred to in *INSPRU 1.3.100R* are the rates of termination (including the paying-up of *policies*, but excluding deaths, maturities and retirements) other than on dates specified by the *firm* where:
- (1) a guaranteed amount applies as the minimum amount which will be paid on *claim*; or
 - (2) any payments to the *policyholder* cannot be reduced at the discretion of the *firm* by its applying a market value adjustment.
- 1.3.102 R For the purposes of *INSPRU 1.3.100R*, the increase or decrease in termination rates must be applied to the projection of terminations up to *policy* guarantee dates and between *policy* guarantee dates, but not to the assumptions as to the proportion of *policyholders* taking up the guarantees at *policy* guarantee dates.
- 1.3.103 G *INSPRU 1.3.100R* to *INSPRU 1.3.102R* require *firms* to apply a persistency stress test to the *realistic value of liabilities*. Where a *firm* brings the present value of *non-profit insurance business* in a *with-profits fund* into the calculation of the *realistic value of assets* (see *INSPRU 1.3.33R*) there is no requirement to stress this asset for changes in persistency assumptions.

Realistic value of liabilities: detailed provisions

- 1.3.104 G *INSPRU 1.3.40R* sets out the three elements comprising the *realistic value of liabilities* for a *with-profits fund*. The remainder of this section contains general *rules* and *guidance* on determining the *realistic value of liabilities* plus further detail relating to each of those elements separately, as follows:
- (1) general *rules* and *guidance* in *INSPRU 1.3.105R* to *INSPRU 1.3.115G*;
 - (2) *with-profits benefits reserve* in *INSPRU 1.3.116R* to *INSPRU 1.3.135G*;
 - (3) *future policy related liabilities* in *INSPRU 1.3.136G* to *INSPRU 1.3.189G*; and
 - (4) *realistic current liabilities* in *INSPRU 1.3.190R* and *INSPRU 1.3.191R*.

Methods and assumptions: general

- 1.3.105 R In calculating the *realistic value of liabilities* for a *with-profits fund*, a *firm* must use methods and assumptions which:
- (1) are appropriate to the business of the *firm*;
 - (2) are consistent from year to year without arbitrary changes (that is, changes without adequate reasons);
 - (3) are consistent with the method of valuing assets (*GENPRU 1.3*);
 - (4) make full provision for tax payable out of the *with-profits fund*, based on current legislation and practice, together with any known future changes, and on a consistent basis with the other methods and assumptions used;
 - (5) take into account discretionary benefits which are at least equal to, and charges which are no more than, the levels required for the *firm* to fulfil its regulatory duty to treat its *customers* fairly;
 - (6) take into account prospective management actions (*INSPRU 1.3.53R*) and *policyholder* actions (*INSPRU 1.3.59R*);
 - (7) provide for shareholder transfers out of the *with-profits fund* as a liability of the fund;
 - (8) have regard to generally accepted actuarial practice; and
 - (9) are consistent with the *firm's PPFM*.
- 1.3.106 G More specific *rules* and *guidance* are set out below on some aspects of the methods and assumptions to be used in calculating the *realistic value of liabilities* for a *with-profits fund*. In contrast to the *mathematical reserves* requirements in *INSPRU 1.2.10R(4)* and *INSPRU 1.2.13R*, there is no requirement to include margins for adverse deviation of relevant factors in calculating the *realistic value of liabilities*. Assumptions need be no more prudent than is necessary to achieve a best estimate, taking into account the *firm's PPFM* and its regulatory duty to treat its *customers* fairly. Where there is no requirement for a *PPFM*, for example non-UK business, a *firm* should use assumptions that are consistent with the *firm's* documented approach to treating its *customers* fairly. A *firm* may judge that a margin should be included in its calculations to avoid an understatement of the *realistic value of liabilities* as a result of uncertainty, for example, either in its method or in its data.
- 1.3.107 G The amount and timing of tax charges affect the amount of assets available to meet *policyholder* liabilities. *INSPRU 1.3.105R(4)* requires *firms* to provide fully for all tax payable out of the *with-profits fund* on a basis consistent with the other assumptions and methods used in deriving the realistic balance sheet. So, for example, all projections which underlie the realistic valuation of assets or liabilities must allow for taxation. The approach adopted should not give any credit for any reduction in tax deriving from future expenses or deficits which is attributable to future new business. For assets backing capital requirements it is not necessary to take into consideration future tax charges on investment income generated by those assets. However, *firms* should consider this aspect in their capital planning.
- 1.3.108 G *INSPRU 1.3.105R(7)* requires *firms* to provide fully for shareholder transfers. Such transfers do not therefore count as capital in the *with-profits*

fund. However, a *firm* may apply under section 148 of the *Act* for a *waiver* from this requirement. In exercising its discretion under section 148 of the *Act*, the *FSA* will have regard (among other factors) to whether a *firm* has put in place undertakings satisfactory to the *FSA*, including that future transfers will not be paid out of the *firm* by way of dividend.

Valuation of contracts: General

- 1.3.109 R (1) A *firm* must determine the amount of the *with-profits benefits reserve* or the *future policy related liabilities* for a *with-profits fund* by carrying out a separate calculation in relation to each *with-profits insurance contract* or for each group of similar contracts.
(2) Appropriate approximations or generalisations may be made where they are likely to provide the same, or a higher, result than a separate calculation for each contract.
(3) A *firm* must set up additional reserves on an aggregated basis for general risks which are not specific to individual contracts or a group of similar contacts where the *firm* considers the *realistic value of liabilities* may otherwise be understated.
- 1.3.110 R For the purpose of *INSPRU* 1.3.109R(1), a group of similar contracts is such that the conditions in *INSPRU* 1.3.109R(2) are satisfied.
- 1.3.111 G Where a *firm* has grouped individual contracts for the purpose of calculating the *mathematical reserves* for a *with-profits fund* (in accordance with *INSPRU* 1.2.22R), the *firm* is not required to use the same grouping of contracts in calculating the *with-profits benefits reserve* or *future policy related liabilities* for that fund.
- 1.3.112 G In contrast to *INSPRU* 1.2.24R for the *mathematical reserves*, treating individual contracts as an asset is not prohibited if, and to the extent that, this treatment does not conflict with a *firm's* regulatory duty to treat its *customers* fairly.
- 1.3.113 G In calculating the *with-profits benefits reserve*, an overall (grouped or pooled) approach may be appropriate under either of the two methods set out in *INSPRU* 1.3.116R. In particular, the calculation of aggregate retrospective reserves (see *INSPRU* 1.3.118R) and the projection of future cash flows (see *INSPRU* 1.3.128R) based on suitable specimen *policies* is permitted.
- 1.3.114 G In calculating the *future policy related liabilities*, the grouping of *policies* for valuing the costs of guarantees, options or smoothing, and their representation by representative *policies*, is acceptable provided the *firm* can demonstrate that the grouping of *policies* does not materially misrepresent the underlying exposure and does not significantly misstate the costs. A *firm* should exercise care in grouping *policies* in order to ensure that the risk exposure is not inappropriately distorted by, for example, forming groups containing *policies* with guarantees that are "in the money" and *policies* with guarantees well "out of the money". A *firm* should also have regard to the

effects of *policyholder* behaviour over time on the spread of the outstanding guarantees or options.

- 1.3.115 G Where a *firm* groups similar *policies* for the purpose of calculating the *with-profits benefits reserve* or the *future policy related liabilities*, the *firm* should carry out sufficient validation to be reasonably sure that the grouping of *policies* has not resulted in the loss of any significant attributes of the portfolio being valued.

With-profits benefits reserve

- 1.3.116 R A *firm* must calculate a with-profits benefits reserve for a with-profits fund using either:
(1) a retrospective calculation under *INSPRU* 1.3.118R (the retrospective method); or
(2) a prospective calculation under *INSPRU* 1.3.128R of all future cash flows expected to arise under, or in respect of, each of the *with-profits insurance contracts* written in that fund (the prospective method).

- 1.3.117 R Subject to *INSPRU* 1.3.105R(2), a *firm* may use different methods under *INSPRU* 1.3.116R for different types or generations of *with-profits insurance contracts*.

Retrospective method

- 1.3.118 R In the retrospective method of calculating a *with-profits benefits reserve*, a *firm* must calculate either the aggregate of the retrospective reserves in respect of each *with-profits insurance contract* or, to the extent permitted by *INSPRU* 1.3.109R and *INSPRU* 1.3.110R, the total retrospective reserve in respect of each group of *with-profits insurance contracts*.

- 1.3.119 R In calculating the retrospective reserve for a *with-profits insurance contract*, or the total retrospective reserve in respect of a group of *with-profits insurance contracts*, a *firm* must take account of at least the following:

- (1) *premiums* received from the *policyholder*;
- (2) any expenses incurred or charges made (including *commissions*);
- (3) any partial benefits paid or due;
- (4) any investment income on, and any increases (or decreases) in, asset values;
- (5) any tax paid or payable;
- (6) any amounts received (or paid) under contracts of *reinsurance* or analogous non-*reinsurance* financing agreements, where relevant to retrospective reserves;
- (7) any shareholder transfers and any associated tax paid or payable; and
- (8) any permanent enhancements to (or deductions from) the retrospective reserves made by the *firm*.

- 1.3.120 G In taking account of amounts in *INSPRU* 1.3.119R(6), due regard should be had to the specific details of each relevant contract of *reinsurance* or

analogous non-*reinsurance* financing agreement and the relationship between the amounts received (or paid) and the value of the benefit granted (or received) under the arrangement. This should take into consideration, for example, the risk of default and differences in the *firm's* realistic assessment of the risks transferred and the contractual terms for such transfer of risk. Analogous non-*reinsurance* financing agreements include contingent loans, securitisations and any other arrangements in respect of *contracts of insurance* that are analogous to contracts of *reinsurance* in terms of the risks transferred and the finance provided.

- 1.3.121 G Where allowance is made for shareholder transfers, this should be in respect of the accrued bonus entitlement reflected in the retrospective reserve. This would include both *annual bonuses* already declared and accrued *final bonus*. However, shareholder transfers in respect of surplus yet to be credited to retrospective reserves should not be charged to those reserves until the corresponding surplus is credited.
- 1.3.122 R In calculating retrospective reserves, a *firm* must have regard to its regulatory duty to treat its *customers* fairly and must ensure that its approach is consistent with its *Principles and Practices of Financial Management*.
- 1.3.123 R In calculating retrospective reserves, a *firm* must ensure its treatment of past cash flows, and of any future cash flows, is consistent with those cash flows valued in its prospective calculation of the *future policy related liabilities* for that fund in accordance with the *rules* in *INSPRU* 1.3.136G to *INSPRU* 1.3.189G.
- 1.3.124 G An example of *INSPRU* 1.3.123R concerns future shareholder transfers. A *firm* must make adequate provision for future shareholder transfers within the *future policy related liabilities* (see *INSPRU* 1.3.165R). The basis of provisioning needs to be consistent with the amounts accrued within retrospective reserves and the amounts already transferred out of the *with-profits fund*.
- 1.3.125 G Another example of the application of *INSPRU* 1.3.123R relates to the reference in *INSPRU* 1.3.119R(8) to past permanent enhancements to (or deductions from) retrospective reserves made by *firms*. This item may include past miscellaneous surplus (or losses) which have been credited to (or debited from) retrospective reserves. Any other enhancements (or deductions) made on a temporary basis and any future surplus (or losses) that *firms* intend to credit to (or debit from) retrospective reserves should be included under the *future policy related liabilities* (see *INSPRU* 1.3.137R).
- 1.3.126 G *Firms* characteristically use a range of calculation methods to determine retrospective reserves. A *firm's* definition and calculation of retrospective reserves will depend on a number of factors. These include: the *firm's* practice; its administration and accounting systems; the extent of its historical records; and the composition of its with-profits portfolio. The *rules* and *guidance* for the retrospective method are drawn up to be sufficiently flexible to accommodate the diversity of calculation methods

used by *firms*, rather than to enforce any particular method of calculation of retrospective reserves. *INSPRU* 1.3.119R simply sets minimum standards that all retrospective methods must meet.

- 1.3.127 G For the purposes of *INSPRU* 1.3.119R(2) and *INSPRU* 1.3.128R(2), the phrases 'charges made' or 'charges to be made' refer to circumstances where types of risk (such as mortality risk, longevity risk and investment risk) are met by the *firm* or *with-profits fund* in return for a charge deducted by the *firm* from the *with-profits benefits reserve*.
- Prospective method
- 1.3.128 R In the prospective method of calculating a *with-profits benefits reserve*, a *firm* must take account of at least the following cash flows:
- (1) future *premiums*;
 - (2) expenses to be incurred or charges to be made, including *commissions*;
 - (3) benefits payable (*INSPRU* 1.3.129R);
 - (4) tax payable;
 - (5) any amounts to be received (or paid) under contracts of *reinsurance* or analogous non-*reinsurance* financing agreements, where relevant to *with-profits insurance contracts* being valued; and
 - (6) shareholder transfers.
- 1.3.129 R For the purposes of *INSPRU* 1.3.128R(3), benefits payable include:
- (1) all guaranteed benefits, including guaranteed amounts payable on death and maturity, guaranteed *surrender values* and paid-up values;
 - (2) vested, declared and allotted bonuses to which *policyholders* are entitled; and
 - (3) future *annual* and *final bonuses* at least equal to the levels required for the *firm* to fulfil its regulatory duty to treat its *customers* fairly.
- 1.3.130 R A *firm* must value the cash flows listed in *INSPRU* 1.3.128R using best estimate assumptions of future experience, having regard to generally accepted actuarial practice and taking into account the *firm's PPFM* and its regulatory duty to treat its *customers* fairly.
- 1.3.131 G The prospective method sets the *with-profits benefits reserve* at the net present value of future cash flows listed in *INSPRU* 1.3.128R.
- 1.3.132 G In contrast to *INSPRU* 1.2.10R(4) and *INSPRU* 1.2.13R relating to the methods and assumptions used to value the *mathematical reserves*, there is no requirement to value future cash flows using assumptions that include margins for adverse deviation. Also there are no detailed *rules* as to the future yields on assets, discount rates, *premium* levels, expenses, tax, mortality, morbidity, persistency and *reinsurance*. A *firm* should make its own assessment as to the amount of these future cash flows including bonuses and discretionary surrender or transfer values. A *firm* should make a realistic assessment of longevity risk and asset default risk (including default risk arising under contracts of *reinsurance* or analogous non-

reinsurance financing agreements) within the best estimate assumptions of future experience required by *INSPRU* 1.3.130R.

- 1.3.133 G In valuing the future cash flows listed in *INSPRU* 1.3.128R, the *firm* should use a projection term which is long enough to capture all material cash flows arising from the contract or groups of contracts being valued. If the projection term does not extend to the term of the last *policy*, the *firm* should check that the shorter projection term does not significantly affect the results.
- 1.3.134 R Where a *firm* expects to pay additional benefits that are not included in the cash flows listed in *INSPRU* 1.3.128R, it must make adequate provision for these benefits in calculating the *future policy related liabilities* in accordance with the *rules* in *INSPRU* 1.3.136G to *INSPRU* 1.3.189G.
- 1.3.135 G The prospective assessment of the *with-profits benefits reserve* will usually be on a deterministic basis. A *firm* will have to make further provision in the *future policy-related liabilities* for, for example, the costs of potential asset fluctuations or *policy* options.

Future policy related liabilities

Overview of liabilities

- 1.3.136 G *INSPRU* 1.3.137R lists the *future policy related liabilities* for a *with-profits fund* that form part of a *firm's realistic value of liabilities* in *INSPRU* 1.3.40R. Detailed *rules* and *guidance* relating to particular types of liability and asset are set out in *INSPRU* 1.3.139R to *INSPRU* 1.3.168G. These are followed by *rules* and *guidance* that deal with certain aspects of several liabilities (that is, liabilities relating to guarantees, options and smoothing): (1) *INSPRU* 1.3.169R to *INSPRU* 1.3.186G refer to valuing the costs of guarantees, options and smoothing; and (2) *INSPRU* 1.3.187R to *INSPRU* 1.3.189G refer to the treatment of surplus on guarantees, options and smoothing.
- 1.3.137 R The *future policy related liabilities* for a *with-profits fund* are equal to the sum of amounts, as they relate to that fund, in respect of (1) to (11) to the extent each is valued as a liability less the sum of amounts, as they relate to that fund, in respect of (1) to (11) to the extent each is valued as an asset:

- (1) past miscellaneous surplus (or deficit) planned to be attributed to the *with-profits benefits reserve* (see *INSPRU* 1.3.139R);
- (2) planned enhancements to the *with-profits benefits reserve* (see *INSPRU* 1.3.141R);
- (3) planned deductions for the costs of guarantees, options and smoothing from the *with-profits benefits reserve* (see *INSPRU* 1.3.144R);
- (4) planned deductions for other costs deemed chargeable to the *with-profits benefits reserve* (see *INSPRU* 1.3.146R);
- (5) future costs of contractual guarantees (other than financial options) (see *INSPRU* 1.3.148R);
- (6) future costs of non-contractual commitments (see *INSPRU* 1.3.154R);
- (7) future costs of financial options (see *INSPRU* 1.3.156G);
- (8) future costs of smoothing (see *INSPRU* 1.3.158R);
- (9) financing costs (see *INSPRU* 1.3.162R);
- (10) any other further liabilities required for the *firm* to fulfil its regulatory duty to treat its *customers* fairly; and
- (11) other *long-term insurance liabilities* (see *INSPRU* 1.3.165R).

- 1.3.138 G Some of the elements of the calculation set out in *INSPRU* 1.3.137R may have already been taken into consideration in the calculation of the *with-profits benefits reserve*, either under the retrospective method (see *INSPRU* 1.3.118R onwards) or the prospective method (see *INSPRU* 1.3.128R onwards). Where this is the case, the adjustments made under *INSPRU* 1.3.137R should be such that no double-counting arises.

Past miscellaneous surplus (or deficit) planned to be attributed to the with-profits benefits reserve

- 1.3.139 R In calculating the *future policy related liabilities* for a *with-profits fund*, a *firm* must allow for past miscellaneous surplus (or deficit) which it intends to attribute to the *with-profits benefits reserve* for that fund but which has not yet been permanently credited to (or debited from) the *with-profits benefits reserve* for that fund.

- 1.3.140 G Past miscellaneous surplus (or deficit) already permanently credited to (or debited from) the *with-profits benefits reserve* will have been included in the calculation of the *with-profits benefits reserve* in accordance with *INSPRU* 1.3.119R(8).

Planned enhancements to the with-profits benefits reserve

- 1.3.141 R In calculating the *future policy related liabilities* for a *with-profits fund*, a *firm* must make provision for any future planned enhancements to the *with-profits benefits reserve* for that fund that cannot be financed out of the resources of the *with-profits benefits reserve* and future *premiums*.

- 1.3.142 G For the purposes of *INSPRU* 1.3.141R, planned enhancements to the *with-profits benefits reserve* will arise when a *firm* has a contractual obligation, or a non-contractual commitment (arising from its regulatory duty to treat *customers* fairly), to enhance *claims* on some classes of *policy* (perhaps in

the form of specially enhanced future bonus rates). In such circumstances, the present value of the costs of paying out a target asset share that is more than the projected *with-profits benefits reserve* for those classes of *policy* for which this practice is applicable should be included in the amount of the *future policy related liabilities*. For example, a *firm* may have a non-contractual commitment (arising from its regulatory duty to treat *customers* fairly) to pay enhanced benefits but have discretion not to make such payments in adverse circumstances. Such planned enhancements should be provided for in the realistic balance sheet, but allowance should be made for management action in the calculation of the *risk capital margin*.

- 1.3.143 G The valuation of *claims* in excess of targeted asset shares in respect of guarantees, options and smoothing, including those arising under guaranteed annuity rates, should be carried out in accordance with *INSPRU* 1.3.169R to *INSPRU* 1.3.186G.

Planned deductions for the costs of guarantees, options and smoothing from the with-profits benefits reserve

- 1.3.144 R Where a *firm* expects to deduct future charges from the *with-profits benefits reserve* for a *with-profits fund* to cover the costs of guarantees, options or smoothing for that fund, the *firm* must take credit for these future charges in calculating the *future policy related liabilities* for that fund.

- 1.3.145 G In calculating *future policy related liabilities* for a *with-profits fund*, a *firm* should take credit under *INSPRU* 1.3.137R(3) for the present value of the future "margins" available in respect of charges deducted to cover the costs of guarantees, options and smoothing. *INSPRU* 1.3.188R requires *firms* that accumulate the charges made less costs incurred to provide for any surplus on the experience account as a realistic liability. Any such provision should be made under *INSPRU* 1.3.137R(5), *INSPRU* 1.3.137R(7) or *INSPRU* 1.3.137R(8) depending on the nature of the charges made, and has no effect on the amount calculated under *INSPRU* 1.3.144R.

Planned deductions for other costs deemed chargeable to the with-profits benefits reserve

- 1.3.146 R Where a *firm* expects to deduct future charges (other than those valued in *INSPRU* 1.3.144R) from the *with-profits benefits reserve* for a *with-profits fund*, the *firm* must take credit for these future charges in calculating the *future policy-related liabilities* for that fund.

- 1.3.147 G A *firm* should take credit for the present value of the other future "margins" available. The circumstances where such margins may arise include:

- (1) where a *firm* is targeting *claims* at less than 100% of the *with-profits benefits reserve*, the amount of such shortfall; and
- (2) where a *firm* expects to deduct any future charges (other than those for guarantees, options and smoothing) from the *with-profits benefits reserve*.

- 1.3.148 R Future costs of contractual guarantees (other than financial options)
- A *firm* must make provision for the costs of paying excess *claim* amounts for a *with-profits fund* where the *firm* expects that the amount in (1) may be greater than the amount in (2), calculated as at the date of *claim*:
- (1) the value of guarantees arising under a *policy* or group of *policies* in the fund; and
- (2) the fund's *with-profits benefits reserve* allocated in respect of that *policy* or group of *policies*.
- 1.3.149 R For the purposes of *INSPRU* 1.3.148R, the future costs of guarantees cannot be negative.
- 1.3.150 G In carrying out projections to calculate the cost of guarantees under *INSPRU* 1.3.137R the opening liability should be set equal to the *with-profits benefit reserve* (see *INSPRU* 1.3.118R), adjusted for miscellaneous surplus or deficits (see *INSPRU* 1.3.137R(1)) and planned enhancements (see *INSPRU* 1.3.141R).
- 1.3.151 G In projecting forward the *with-profits benefits reserve*, adjusted as in *INSPRU* 1.3.150G, to the date of *claim* for the purposes of *INSPRU* 1.3.148R, the *firm* should use market consistent assumptions for the expected future *premium* and investment income (including realised and unrealised gains or losses), expenses and *claims*, any charges to be deducted, tax and any other item of income or outgo. This projection should be carried out on the same basis as is described in *INSPRU* 1.3.130R.
- 1.3.152 G *INSPRU* 1.3.169R to *INSPRU* 1.3.186G contain further *rules* and *guidance* on the valuation of guarantees, options and smoothing.
- 1.3.153 G Some examples of contractual guarantees are:
- (1) for conventional *with-profits insurance contracts*, guaranteed sums assured and bonuses on death, maturity or retirement; and
- (2) for *accumulating with-profits policies*, guarantees at a point in time or guaranteed minimum bonus rates.

Future costs of non-contractual commitments

- 1.3.154 R A *firm* must make provision for future costs in addition to those in *INSPRU* 1.3.148R where the *firm* expects to pay further amounts to meet non-contractual commitments to *customers* or pay other benefits that need to be provided to fulfil a *firm's* regulatory duty to treat its *customers* fairly.
- 1.3.155 G Some examples of these non-contractual commitments are:

- (1) statements by the *firm* regarding the ability of *policies* to cover defined amounts, such as the repayment of a mortgage;
- (2) statements by the *firm* regarding regular withdrawals from a *policy* being without penalty;
- (3) guaranteed annuity and cash option rates being provided beyond the strict interpretation of the *policy*; and
- (4) the costs of any promises to *customers* or other benefits that need to be provided to fulfil a *firm's* regulatory duty to treat its *customers* fairly.

Future costs of financial options

- 1.3.156 G Financial options include guaranteed annuity and cash option rates.
- 1.3.157 G *INSPRU* 1.3.169R to *INSPRU* 1.3.186G contain further *rules* and *guidance* on the valuation of options.

Future costs of smoothing

- 1.3.158 R A *firm* must make provision for future smoothing costs of a *with-profits fund* where the *firm* expects that the *claims* paid on a *policy* or group of *policies* in the fund will vary from the greater of:
 - (1) the value of guarantees determined in *INSPRU* 1.3.148R in respect of that *policy* or group of *policies*; and
 - (2) the fund's *with-profits benefits reserve* allocated in respect of that *policy* or group of *policies* which must be enhanced as described in *INSPRU* 1.3.141R; calculated as at the date of *claim*.
- 1.3.159 R For the purposes of *INSPRU* 1.3.158R, smoothing costs are defined as the present value of the difference between projected *claims* and the projected *with-profits benefit reserve* after enhancements (*INSPRU* 1.3.141R), other than payouts on guarantees (*INSPRU* 1.3.148R).
- 1.3.160 R Subject to *INSPRU* 1.3.188R, the future costs of smoothing can be negative.
- 1.3.161 G *INSPRU* 1.3.169R to *INSPRU* 1.3.186G contain further *rules* and *guidance* on the valuation of the future costs of smoothing.

Financing costs

- 1.3.162 R A *firm* must provide for future liabilities to repay financing costs of a *with-profits fund* where the *firm* expects to have to meet such liabilities and to the extent that these liabilities are not already provided for by amounts included in the fund's *realistic current liabilities* (*INSPRU* 1.3.190R and *INSPRU* 1.3.191R). The amount of the liabilities to repay financing costs must be assessed on a market-consistent basis.
- 1.3.163 G In *INSPRU* 1.3.162R, financing costs refer to the future costs incurred by way of capital, interest and fees payable to the provider. A *firm* should make a realistic assessment of the requirement to repay such financing in its

expected future circumstances (which may be worse than currently). Having taken account of its particular circumstances:

(1) where a *firm* has no liability to repay such financing, it should not include such repayment as a liability;

(2) where a *firm* has a reduced liability to repay such financing, it should include a reduced repayment as a liability.

- 1.3.164 G In *INSPRU* 1.3.162R, financing includes *reinsurance* financing arrangements and analogous non-*reinsurance* financing arrangements, such as contingent loans, securitisations and any other arrangements in respect of *contracts of insurance* that are analogous to contracts of *reinsurance* in terms of the risks transferred and the finance provided.

Other long-term insurance liabilities

- 1.3.165 R A *firm* must provide for any other *long-term insurance liabilities* arising from or in connection with *with-profits insurance contracts* in a *with-profits fund*, to the extent that adequate provision has not been made in the *with-profits benefits reserve* or in any other part of the *future policy related liabilities* for that fund.

Some examples of these other *long-term insurance liabilities* are:

- 1.3.166 G (1) pension and other mis-selling reserves;
(2) provisions for tax; and
(3) provisions for future shareholder transfers.

- 1.3.167 G In determining the realistic liability for taxation *firms* should apply the general principles set out in *INSPRU* 1.3.105R and the *guidance* given in *INSPRU* 1.3.107G.

- 1.3.168 G *INSPRU* 1.3.105R requires *firms* to provide for shareholder transfers out of the *with-profits fund* as a liability of the fund. The provision should be consistent with the methods and assumptions used in valuing the other realistic liabilities. So, for example, where the *with-profits benefits reserve* includes amounts that would be paid to *policyholders* through future bonuses, provision should also be made for future shareholder transfers associated with those bonuses.

Valuing the costs of guarantees, options and smoothing

- 1.3.169 R For the purposes of *INSPRU* 1.3.137R(5), *INSPRU* 1.3.137R(7) and *INSPRU* 1.3.137R(8), a *firm* must calculate the costs of any guarantees, options and smoothing using one or more of the following three methods:
(1) a stochastic approach using a market-consistent asset model (*INSPRU* 1.3.170R);
(2) using the market costs of hedging the guarantee or option;
(3) a series of deterministic projections with attributed probabilities.

The market-consistent asset model in *INSPRU* 1.3.169(1):

- 1.3.170 R (1) means a model that delivers prices for assets and liabilities that can be directly verified from the market; and
(2) must be calibrated to deliver market-consistent prices for those assets that reflect the nature and term of the *with-profits insurance liabilities* of the *with-profits fund*.
- 1.3.171 G Deterministic approaches will not usually capture the time value of the option generated by a guarantee. In order to calculate this value properly, *firms* are expected either to use market option values where these are readily available or to undertake a stochastic approach using a market-consistent asset model.
- 1.3.172 G The *FSA* considers stochastic modelling to be preferable for material groups or classes of *with-profits insurance contracts* unless it can be shown that more simplistic or alternative methods are both appropriate and sufficiently robust.
- 1.3.173 G Where the guarantee or option is relatively simple in nature, is capable of being hedged, and has a value unlikely to be affected by management actions (*INSPRU* 1.3.185R) (for example, a guaranteed annuity rate option) then the cost of the guarantee or option would be the market cost of hedging the guarantee. Where that is generally the case but, in respect of a minor part of a portfolio, no market exists for hedging the option generated by the guarantee, a *firm* should take the value of the nearest equivalent benefit or right for which a market exists and record how it has adjusted the valuation to reflect the original option. Where the market value of the hedge is used *firms* should also make provisions for the credit risk arising from the hedge, both that arising from exposure to a *counterparty* and that arising from credit risk in the underlying instrument. The extent to which the guarantee or option is capable of being hedged depends on a *firm's* assumptions regarding future investment mix, persistency, annuitant mortality and take-up rates. While the *FSA* recognises that the hedge may not be perfectly matched to the underlying guarantee or option, a *firm* should ensure that hedge is reasonably well matched having regard to the sensitivity of the guarantee or option to the *firm's* choice of key assumptions.
- 1.3.174 G Where a *firm* has large cohorts of guarantees and uses stochastic or deterministic approaches, a *firm* should have regard to whether the cost of the guarantees determined under those approaches bears a reasonable relationship to the market cost of hedging those guarantees (where it exists).
- 1.3.175 G In determining the costs of smoothing, a *firm* should consider:

- (1) the consistency of its assumptions (including the exercise of management discretion over bonus rates); and
- (2) where targeted payouts currently exceed retrospective reserves in respect of those *claims*, the assumptions used in reducing the excess, if applicable, having regard to the *firm's PPFM* and its regulatory duty to treat its *customers* fairly.

Stochastic approach

- 1.3.176 G For the purposes of *INSPRU* 1.3.169R(1), a stochastic approach would consist of an appropriate market-consistent asset model for projections of asset prices and yields (such as equity prices, fixed interest yields and property yields), together with a dynamic model incorporating the corresponding value of liabilities and the impact of any foreseeable actions to be taken by management. Under the stochastic approach, the cost of the guarantee, option or smoothing would be equal to the average of these stochastic projections.
- 1.3.177 G In performing the projections of assets and liabilities under the stochastic approach in *INSPRU* 1.3.169R(1), a *firm* should have regard to the aspects in (1) and (2).
- (1) The projection term should be long enough to capture all material cash flows arising from the contract or groups of contracts being valued. If the projection term does not extend to the term of the last *policy*, the *firm* should check that the shorter projection term does not significantly affect the results.
 - (2) The number of projections should be sufficient to ensure a reasonable degree of convergence in the results, including the determination of the result of the *risk capital margin*. The *firm* should test the sensitivity of the results to the number of projections.
- 1.3.178 G The *FSA* considers a holistic approach to stochastic modelling to be preferable so as to value all items of costs together rather than using separate methods for different items of the *realistic value of liabilities*. This approach requires the projection of all material cash flows arising under the contract or group of contracts for each stochastic projection, rather than only those arising from the guarantee or option within the contract. The advantages of this approach are that it ensures greater consistency in the valuation of different components of the contract and explicitly takes into account the underlying hedges or risk mitigation between components of the contract or group of contracts being valued. Where a *firm* can use a stochastic approach to value simultaneously all components of the contract or group of contracts, the *firm* should adopt this approach where practical and feasible.
- 1.3.179 G Where a stochastic approach is used, a *firm* should make and retain a record under *INSPRU* 1.3.17R of the nature of the asset model and of the assumptions used (including the volatility of asset values and any assumed correlations between asset classes or between asset classes and economic

indicators, such as inflation).

- 1.3.180 G In calibrating asset models for the purposes of *INSPRU* 1.3.170R, a *firm* should have regard to the aspects in (1), (2) and (3).

(1) Few (if any) asset models can replicate all the observable *market values* for a wide range of asset classes. A *firm* should calibrate its asset models to reflect the nature and term of the fund's liabilities giving rise to significant guarantee and option costs.

(2) A *firm* will need to apply judgement to determine suitable estimates of those parameters which cannot be implied from observable market prices (for example, long-term volatility). A *firm* should make and retain a record under *INSPRU* 1.3.17R of the choice of parameters and the reasons for their use.

(3) A *firm* should calibrate the model to the current risk-free yield curve. Risk-free yields should be determined after allowing for credit and all other risks arising. *Firms* may have regard to any guidance from the actuarial profession on the calculation of the risk-free yield but should not assume a higher yield than suggested by any such guidance.

Deterministic approach

- 1.3.181 R For the purposes of the deterministic approach in *INSPRU* 1.3.169R(3), a *firm* must calculate a series of deterministic projections of the values of assets and corresponding liabilities, where each deterministic projection corresponds to a possible economic scenario or outcome.

- 1.3.182 G A *firm* should determine a range of scenarios or outcomes appropriate to both valuing the costs of the guarantee, option or smoothing and the underlying asset mix, together with the associated probability of occurrence. These probabilities of occurrence should be weighted towards adverse scenarios to reflect market pricing for risk. The costs of the guarantee, option or smoothing should be equal to the expected cost based on a series of deterministic projections of the values of assets and corresponding liabilities. In using a series of deterministic projections, a *firm* should consider whether its approach provides a suitably robust estimate of the costs of the guarantee, option or smoothing.

- 1.3.183 G In performing the projections of assets and liabilities under the deterministic approach in *INSPRU* 1.3.169R(3), a *firm* should have regard to the aspects in (1) and (2).

(1) The projection term should be long enough to capture all material cash flows arising from the contract or group of contracts being valued. If the projection term does not extend to the term of the last contract, the *firm* should check that the shorter projection term does not significantly affect the results.

(2) The series of deterministic projections should be numerous enough to capture a wide range of possible outcomes and take into account the probability of each outcome's likelihood. The costs will be understated if only relatively benign or limited economic scenarios are considered.

- 1.3.184 G Where a series of deterministic projections is used, a *firm* should make and retain a record under *INSPRU* 1.3.17R of the range of projections and how the probabilities attributed to each projection or outcome were determined (including the period of reference for any relevant data on past experience).

Management and policyholder actions

- 1.3.185 R In calculating the costs of any guarantees, options or smoothing, a *firm*:
(1) may reflect its prospective management actions (within the meaning of *INSPRU* 1.3.53R); and
(2) must reflect a realistic assessment of the *policyholder* actions (within the meaning of *INSPRU* 1.3.59R);
in its projections of the value of assets and liabilities.

- 1.3.186 G For the purposes of *INSPRU* 1.3.185 R, the related *guidance* in *INSPRU* 1.3.54 G to *INSPRU* 1.3.57 G (management actions) and in *INSPRU* 1.3.60 G (policyholder actions) applies.

Treatment of surplus on guarantees, options and smoothing

- 1.3.187 R *INSPRU* 1.3.188R applies to *firms* calculating the costs of guarantees, options and smoothing to be included in the *future policy-related liabilities* in accordance with *INSPRU* 1.3.137R(5), *INSPRU* 1.3.137R(7) and *INSPRU* 1.3.137R(8).

- 1.3.188 R Where a *firm* accumulates past experience and deducts or is otherwise able to take credit for charges for guarantees or options or smoothing, the future costs of guarantees or options or smoothing (as appropriate) must not be less than the greater of:

(1) the prospective calculation of the future cost of guarantees (see *INSPRU* 1.3.148R) or options (see *INSPRU* 1.3.156G) or smoothing (see *INSPRU* 1.3.158R) (as appropriate); and

(2) the sum of:

(a) the accumulated charges (after deduction of past costs) for guarantees or options or smoothing (as appropriate); and

(b) the prospective calculation of the future charges deducted for guarantees or options or smoothing (see *INSPRU* 1.3.144R) (as appropriate).

- 1.3.189 G The extent to which the amount in *INSPRU* 1.3.188R(2) exceeds the amount

in *INSPRU* 1.3.188R(1) will determine the surplus available to support actions that would be taken by the *firm's* management. The purpose of *INSPRU* 1.3.188R is to ensure that any resulting surplus at the valuation date arising from the accumulation of charges less costs remains available to support foreseeable actions that would be taken by the *firm's* management. Any additional liability arising from *INSPRU* 1.3.188R is added to the liabilities under *INSPRU* 1.3.137R(5), *INSPRU* 1.3.137R(7) and *INSPRU* 1.3.137R(8), but has no impact on the adjustment for planned deductions for the costs of guarantees, options and smoothing (*INSPRU* 1.3.137R(3) and *INSPRU* 1.3.144R).

Realistic current liabilities

- 1.3.190 R For the purposes of *INSPRU* 1.3.40R(3), the *realistic current liabilities* of a *with-profits fund* are equal to the sum of the following amounts:
- (1) the *firm's* best estimate provision for those liabilities for which prudent provision is made in *regulatory current liabilities* (see *INSPRU* 1.3.30R); and
 - (2) to the extent that amounts have not been provided in (1), any tax and any other costs arising either in respect of excess *admissible assets* (within the meaning of *INSPRU* 1.3.36R) or on the recognition of future shareholder transfers.
- 1.3.191 R For the purpose of assessing the best estimate provision to be made under *INSPRU* 1.3.190R(1) in respect of a *defined benefit occupational pension scheme*, a *firm* must use either its *defined benefit liability* or its *deficit reduction amount*, consistent with the *firm's* election under *INSPRU* 1.3.5BR(2).

1.4 Equalisation provisions

Application

- 1.4.1 R *INSPRU* 1.4 applies to an *insurer* carrying on *general insurance business* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.

- 1.4.2 G The scope of *INSPRU* 1.4.11R to *INSPRU* 1.4.37G (non-credit equalisation provisions) is not restricted to *firms* subject to the relevant EC directives.

- 1.4.3 G The requirements of this section apply to a *firm* on a solo basis.

Purpose

- 1.4.4 G This section sets out *rules* and *guidance* on the calculation of the amount of the *equalisation provisions* that are required to be maintained by *firms* that carry on non-credit *insurance business* or credit *insurance business*.

- 1.4.5 G *Credit* or *non-credit equalisation provisions* form part of the *technical provisions* that a *firm* is required to establish under *INSPRU* 1.1.12R(1). They help to smooth fluctuations in loss ratios in future years for business where *claims* in any future year may be subject to significant deviation from recent or average *claims* experience, or where trends in experience may be subject to change. Such volatile *claims* experience might arise in the case, for example, of insurance against losses caused by major catastrophes such as hurricanes or earthquakes.

- 1.4.6 G In general terms, *INSPRU* 1.4 sets out *rules* and *guidance* as to:
- (1) the circumstances in which a *firm* is required to maintain *equalisation provisions*;
 - (2) the methods to be used in calculating the amount of each provision;
 - (3) the geographical location of the business relevant to certain calculations for different types of *firm* - this is summarised in the Table in *INSPRU* 1.4.7G.

1.4.7 G

Table : Scope of <i>insurance business</i> to be included in calculations				
Type Of Firm		Credit Equalisation Provision		Non Credit Equalisation Provision
		Threshold in <i>INSPRU</i> 1.4.44R	Provision in <i>INSPRU</i> 1.4.43R	Threshold in <i>INSPRU</i> 1.4.18R(2) and provision in <i>INSPRU</i> 1.4.17R
<i>UK insurer</i>		World-wide	World-wide	World-wide
<i>Pure reinsurer with head office outside United Kingdom</i>		<i>UK</i>	World-wide	<i>UK</i>
<i>Pure reinsurer with head office in United Kingdom</i>		World-wide	World-wide	World-wide
<i>Non-EEA direct insurers</i>	<i>EEA-deposit insurer</i>	<i>UK</i>	<i>UK</i>	<i>UK</i>
	<i>Swiss general insurer</i>	<i>UK</i>	<i>UK</i>	<i>UK</i>
	<i>UK-deposit insurer</i>	All <i>EEA</i>	World-wide	<i>UK</i>
	All other non- <i>EEA direct insurers</i>	<i>UK</i>	World-wide	<i>UK</i>

- 1.4.8 G The *First Non-Life Directive* (as amended) and the *Reinsurance Directive* require the calculation of *credit equalisation provisions*. *Non-credit equalisation provisions* are a domestic *United Kingdom* requirement. For insurance regulatory purposes under EC Directives, *credit equalisation provisions* are classified as liabilities.
- 1.4.9 G However, *firms* are permitted to include *equalisation provisions* within their financial resources when demonstrating compliance with non-Directive capital requirements. Hence *equalisation provisions* are deducted from the available *capital resources* of a *firm* for the purpose of meeting its *minimum capital requirement* for *general insurance business*; but, in the calculation of a *firm's enhanced capital requirement* for *general insurance business* under *INSPRU* 7.1.11R, its *equalisation provisions* (if any) are added back to its *capital resources*.
- 1.4.10 G Under International Accounting Standards (IAS), which will apply to the financial statements of some *insurers* from 2005, there will be no requirement to treat *equalisation provisions* as liabilities in *insurers'* published financial statements. However, they will continue to be treated as liabilities for the purposes of demonstrating compliance with Directive capital requirements.

Non-credit equalisation provision

Firms carrying on non-credit insurance business

- 1.4.11 R (1) *INSPRU* 1.4.11R to *INSPRU* 1.4.37G apply to any *firm*, other than an *assessable mutual*, which carries on the business of *effecting* or *carrying out general insurance contracts* falling within any description in column 2 in Table *INSPRU* 1.4.12R ("non-credit *insurance business*").
 (2) A *firm* falling within (1) must classify all of its non-credit *insurance business* into separate *insurance business groupings*, as specified in Table *INSPRU* 1.4.12R.

- 1.4.12 R Table : Groupings of non-credit *insurance business*

<i>Insurance Business Grouping</i>		General Insurance Contracts
A	<i>Contracts of insurance</i> which fall within <i>general insurance business classes</i> 4, 8 or 9, other than:	
	(a)	<i>contracts of insurance</i> under non-proportional reinsurance treaties; and
	(b)	<i>contracts of insurance</i> against <i>nuclear risks</i> .
B	<i>Contracts of insurance</i> which fall within <i>general insurance business class</i> 16(a) , other than:	
	(a)	<i>contracts of insurance</i> under non-proportional reinsurance treaties; and
	(b)	<i>contracts of insurance</i> against <i>nuclear risks</i> .
C	<i>Contracts of insurance</i> which fall within <i>general insurance business classes</i> 5, 6, 11 or 12, other than:	
	(a)	<i>contracts of insurance</i> against <i>nuclear risks</i> ; and
	(b)	<i>reinsurance</i> contracts corresponding to contract in (a).
D	<i>Contracts of insurance</i> against <i>nuclear risks</i> .	
E	<i>Contracts of insurance</i> under non-proportional reinsurance treaties and which fall within <i>general insurance business classes</i> 4, 8, 9 or 16(a) other than <i>contracts of insurance</i> against <i>nuclear risks</i> .	

- 1.4.13 R For the purposes of *INSPRU* 1.4.11R to *INSPRU* 1.4.37G, a *firm* with its head office in the *United Kingdom* must take account of non-credit *insurance business* carried on by it world-wide.

- 1.4.14 R For the purposes of *INSPRU* 1.4.11R to *INSPRU* 1.4.37G, a *firm* with its head office outside the *United Kingdom* need only take account of non-

credit insurance business carried on by it from a *branch* in the *United Kingdom*.

- 1.4.15 G The *insurers* affected by *INSPRU* 1.4.11R include pure reinsurers, UK-deposit insurers, EEA-deposit insurer, and Swiss general insurers.
- 1.4.16 G For *insurers* (including *pure reinsurers*) with a head office in the *United Kingdom*, the calculations must be made in respect of world-wide business.

Requirement to maintain non-credit equalisation provision

- 1.4.17 R In respect of each *financial year*, a *firm* must, unless *INSPRU* 1.4.18R applies:
(1) calculate the amount of its *non-credit equalisation provision* as at the end of that year in accordance with *INSPRU* 1.4.20R; and
(2) maintain a *non-credit equalisation provision* calculated in accordance with *INSPRU* 1.4.20R for the following *financial year*.
- 1.4.18 R (1) *INSPRU* 1.4.17R does not apply to any *firm* in respect of any *financial year* if, as at the end of that year:
(a) no *non-credit equalisation provision* has been brought forward from the preceding *financial year*; and
(b) the amount of the *annualised net written premiums* for all the non-credit insurance business carried on by it in the *financial year* is less than the threshold amount.
(2) The threshold amount in respect of any *financial year* is the higher of:
(a) 1,500,000 Euro; and
(b) 4% of *net written premiums* in that *financial year* in respect of all its *general insurance business*, if this amount is less than 2,500,000 Euro.
- 1.4.19 G For *non-EEA insurers*, the calculation of the threshold amount in *INSPRU* 1.4.18R(2) is limited by *INSPRU* 1.4.14R to the business of the *firm* carried on in the *United Kingdom*. Such a *firm* may do little *UK non-credit insurance business*, and so would not be required to set up a *non-credit equalisation provision* under *INSPRU* 1.4, but may do significant business outside the *United Kingdom* characterised by high-impact, low-frequency *claims*. Such a *firm* is required by *INSPRU* 1.5.41R to hold adequate world-wide financial resources to avoid internal-contagion strain on the *branch* in the *United Kingdom*. In determining the adequacy of its financial resources, the *firm* should undertake stress and scenario testing of its underwriting and other risks as set out in *GENPRU* 1.2.

Calculating the amount of the provision

- 1.4.20 R (1) Unless *INSPRU* 1.4.22R applies, the amount of a *firm's non-credit equalisation provision* as at the end of a *financial year* is the higher of:
- (a) zero; and
 - (b) whichever is the lower of:
 - (i) the aggregate of the amounts of the maximum provision for each *insurance business grouping* as at the end of that *financial year*; and
 - (ii) the sum of A and B.
- (2) For the purposes of (1)(b)(ii):
- (a) A is the amount of the *non-credit equalisation provision*, if any, brought forward from the *financial year* immediately preceding that in respect of which the calculation is being performed; and
 - (b) B is:
 - (i) the aggregate of the amounts of the provisional transfers-in for each *insurance business grouping*; minus
 - (ii) the aggregate of the amounts of the provisional transfers-out for each *insurance business grouping*.
- (3) For any *insurance business grouping*:
- (a) the amount of the maximum provision in (1)(b)(i) is to be determined in accordance with *INSPRU* 1.4.24R;
 - (b) the amount of the provisional transfers-in in (2)(b)(i) is to be determined in accordance with *INSPRU* 1.4.26R; and
 - (c) the amount of the provisional transfers-out in (2)(b)(ii) is to be determined in accordance with *INSPRU* 1.4.29R.
- 1.4.21 G If provisional transfers-out are in excess of provisional transfers-in, the *non-credit equalisation provision* as calculated in accordance with *INSPRU* 1.4.20R in respect of a particular *financial year* may be less than that calculated for the preceding *financial year* although, by virtue of *INSPRU* 1.4.20R(1)(a), it cannot be negative.
- 1.4.22 R (1) The amount of a *firm's non-credit equalisation provision* as at the end of a *financial year* is zero if:

(a) as at the end of that year, the *firm* meets either of the conditions specified in (2) and (3); and

(b) the *annualised net written premiums* for all the non-credit *insurance business* carried on by the *firm* in that year are less than the threshold amount.

(2) The first condition is that the *firm* carried on non-credit *insurance business* in the first *financial year* of the relevant period and, for each of any two or more *financial years* of that period, the *annualised net written premiums* for business of that description were less than the threshold amount.

(3) The second condition is that the *firm* did not carry on non-credit *insurance business* in the first *financial year* of the relevant period and the average of the *annualised net written premiums* for business of that description carried on by the *firm* in each *financial year* of the relevant period was less than the threshold amount.

(4) For the purposes of this *rule*:

(a) the threshold amount is the amount determined in accordance with *INSPRU* 1.4.18R(2); and

(b) the relevant period is the period of four *financial years* ending immediately before the beginning of the *financial year* in (1).

- 1.4.23 G If *INSPRU* 1.4.22R applies, a *firm* may need to make sufficient transfers from its *non-credit equalisation provision* to bring the *non-credit equalisation provision* for that *financial year* to zero.

The calculation: the maximum provision

- 1.4.24 R (1) For the purposes of the calculation required by *INSPRU* 1.4.20R, the amount of the maximum provision for any *insurance business grouping* is to be determined in accordance with (2) to (5).
- (2) Unless (4) applies, the amount of the maximum provision for the grouping, as at the end of a *financial year*, is the amount determined by multiplying X and Y.
- (3) For the purposes of (2):
- (a) X is the percentage specified in Table *INSPRU* 1.4.25R in relation to the grouping; and
- (b) Y is the average of the amount of the *annualised net written premiums* for non-credit *insurance business* in the grouping carried on by the *firm* in each *financial year* of the relevant period.
- (4) Where Y is a negative amount, the maximum provision for that *insurance business grouping* is zero.
- (5) For the purposes of (3)(b), the relevant period is the five-year period comprising:
- (a) the *financial year* in (2); and
- (b) the previous four *financial years*.

- 1.4.25 R Table : Calculation of maximum provision for any *insurance business grouping*

Insurance Business Grouping	Percentage of average annualised net written premiums
A	20
B	20
C	40
D	600
E	75

The calculation: provisional transfers-in

- 1.4.26 R (1) For the purposes of the calculation required by *INSPRU* 1.4.20R, the amount of the provisional transfers-in for any *insurance business grouping* is to be determined in accordance with (2).
(2) The amount of the provisional transfers-in for the grouping, as at the end of a *financial year*, is the amount determined by multiplying X and Y.
(3) For the purposes of (2):
(a) X is the percentage specified in Table *INSPRU* 1.4.27R in relation to the grouping; and
(b) Y is the amount of the *net written premiums* for non-credit *insurance business* in the grouping that was carried on by the *firm* in the *financial year* in (2), including adjustments in respect of previous *financial years*.

- 1.4.27 R Table : Provisional transfers-in for any *insurance business grouping*

Insurance Business Grouping	Percentage of net written premiums
A	3
B	3
C	6
D	75
E	11

- 1.4.28 G Since each *insurance business grouping* should be assessed individually, negative *net written premiums* in relation to any *insurance business grouping* should be transferred in to the *non-credit equalisation provision*.

The calculation: provisional transfers-out

1.4.29 R (1) For the purposes of the calculation required by *INSPRU* 1.4.20R, the amount of the provisional transfers-out for any *insurance business grouping* is to be determined in accordance with (2).
 (2) The amount of the provisional transfers-out for the grouping, as at the end of a *financial year*, is the lower of:
 (a) the amount of the maximum provision for the grouping under *INSPRU* 1.4.24R for that *financial year*; and
 (b) the abnormal loss for the grouping under *INSPRU* 1.4.30R for that *financial year*.

1.4.30 R R For each *insurance business grouping*, the abnormal loss as at the end of a *financial year* in relation to which an *equalisation provision* is calculated is:
 (1) (for business within the *insurance business grouping* accounted for on an accident year basis) the amount, if any, by which the amount of net *claims* incurred exceeds the greater of:
 (a) zero; and
 (b) the percentage of *net earned premiums* in that *financial year* specified in the Table in *INSPRU* 1.4.31R; or
 (2) (for business within the *insurance business grouping* accounted for on an underwriting year basis) the amount, if any, by which the amount of net *claims* paid (plus adjustment for change in net *technical provisions*, other than any change in provisions for *claims* handling expenses or equalisation) exceeds the greater of:
 (a) zero; and
 (b) the percentage of *net written premiums* in that *financial year* specified in the Table in *INSPRU* 1.4.31R.

1.4.31 R Table : Abnormal loss for any *insurance business grouping*

Insurance business grouping	Percentage of net written premiums
A	72.5
B	72.5
C	95
D	25
E	100

Adjustments to calculations

Transfers of business from the firm

- 1.4.32 R (1) This *rule* applies to modify the application of *INSPRU* 1.4.24R and *INSPRU* 1.4.26R in any case where a *firm* has transferred to another *undertaking* any rights and obligations under *general insurance contracts* falling within any *insurance business grouping*.
(2) As at the end of the *financial year* in which the transfer takes place, *net written premiums* in respect of the transferred contracts in any grouping must be deducted from total *net written premiums* for that grouping before calculating the maximum provision under *INSPRU* 1.4.24R or provisional transfers-in under *INSPRU* 1.4.26R.
- 1.4.33 R If all the rights and obligations of a *firm* in relation to non-credit *insurance business* in any *insurance business grouping* have been transferred, the maximum provision for the grouping under *INSPRU* 1.4.24R is zero.
- Transfers of business to the firm
- 1.4.34 R (1) This *rule* applies to modify the application of *INSPRU* 1.4.24R, *INSPRU* 1.4.26R and *INSPRU* 1.4.29R in any case where another *undertaking* has transferred to a *firm* any rights and obligations under *general insurance contracts* falling within any *insurance business grouping*.
(2) As at the end of the *financial year* in which the transfer takes place a sum equal to that part of the consideration for the transfer that relates to business in an *insurance business grouping* must be:
(a) excluded from net *premiums* (written or earned) before performing the calculations required by *INSPRU* 1.4.24R (maximum provision) and *INSPRU* 1.4.26 R (provisional transfers in);
(b) included in net *premiums* (written or earned) before performing the calculation required by *INSPRU* 1.4.30R (abnormal loss); and
(c) excluded from net *claims* (paid or incurred) before performing the calculation required by *INSPRU* 1.4.30R (abnormal loss).
- 1.4.35 G For the purposes of *INSPRU* 1.4.34R, the consideration payable should be apportioned between *insurance business groupings* according to the groupings within which the *general insurance contracts* which are the subject of the acquisition fall. In appropriate cases, apportionment may reflect the split of liabilities acquired, including *unearned premium*.
- 1.4.36 G Where business is accounted for on an accounting year basis, in any year following the transfer, *net earned premiums* must include an appropriate amount in respect of the transfer.
- 1.4.37 G *INSPRU* 1.4.32R to *INSPRU* 1.4.34R apply to transfers by way of transfer under Part VII of the *Act* and by novation.
- Credit equalisation provisions
- Firms carrying on credit insurance business
- 1.4.38 R *INSPRU* 1.4.39R to *INSPRU* 1.4.47G apply to any *firm* which carries on the business of *effecting or carrying out general insurance contracts* falling

within *general insurance business class 14* (which business is referred to in *INSPRU 1.4* as "*credit insurance business*"), unless it is:

- (1) a *non-directive insurer*; or
 - (2) a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part IV permission* has not subsequently been varied to add back the *regulated activity of effecting contracts of insurance*.
- 1.4.39 R For the purposes of *INSPRU 1.4.43R* and *INSPRU 1.4.44R*, a *firm* whose head office is in the *United Kingdom* must take account of the *credit insurance business* carried on by it world-wide.
- 1.4.40 R (1) For the purposes of *INSPRU 1.4.43R*:
- (a) a *Swiss general insurer* or an *EEA-deposit insurer* must take account of the *credit insurance business* carried on by it in the *United Kingdom*; and
 - (b) any other *firm* whose head office is outside the *United Kingdom* (including a *UK-deposit insurer*) must take account of the *credit insurance business* carried on by it world-wide.
- (2) For the purposes of *INSPRU 1.4.44R*:
- (a) a *UK-deposit insurer* need only take account of the *credit insurance business* carried on by it in all *EEA States*, taken together; and
 - (b) any other *firm* whose head office is outside the *United Kingdom* (including an *EEA-deposit insurer* and a *Swiss general insurer*) need only take account of the *credit insurance business* carried on by it in the *United Kingdom*.
- 1.4.41 G For *firms* whose head office is in the *United Kingdom* both calculations must be made in respect of world-wide business.
- 1.4.42 G The requirements of *INSPRU 1.4.39R* and *INSPRU 1.4.40R* are summarised in the table in *INSPRU 1.4.7G*.
- Requirement to maintain credit equalisation provision
- 1.4.43 R In respect of each *financial year*, a *firm* must, unless *INSPRU 1.4.44R* applies:
- (1) calculate the amount of its *credit equalisation provision* as at the end of that year in accordance with *INSPRU 1.4.45R*; and
 - (2) maintain a *credit equalisation provision* calculated in accordance with *INSPRU 1.4.45R* for the following *financial year*.
- 1.4.44 R *INSPRU 1.4.43R* does not apply to a *firm* in respect of any *financial year* if,

as at the end of that year, the *annualised net written premiums* for its credit *insurance business* are less than 4% of annualised *net written premiums* in that *financial year* in respect of all its *general insurance business*, if this amount is less than 2,500,000 Euro.

Calculating the amount of the provision

- 1.4.45 R (1) The amount of a *firm's credit equalisation provision* as at the end of a *financial year* ("*financial year A*") is the higher of:
- (a) zero; and
 - (b) whichever is the lower of:
 - (i) 150% of the highest amount of *net written premiums* for credit *insurance business* carried on by the *firm* in *financial year A* or in any of the previous four *financial years*; and
 - (ii) the amount of the *credit equalisation provision* brought forward from the preceding *financial year*, after making either of the adjustments in (2).
- (2) The adjustments are:
- (a) the deduction of the amount of any technical deficit arising in *financial year A*; or
 - (b) the addition of the lower of:
 - (i) 75% of the amount of any technical surplus arising in *financial year A*; and
 - (ii) 12% of the amount of the *net written premiums* for credit *insurance business* carried on by the *firm* in *financial year A*.
- (3) For the purposes of (2) the amount of technical deficit or technical surplus is to be determined in accordance with *INSPRU 1.4.46R*.
- 1.4.46 R For the purposes of the adjustments in *INSPRU 1.4.45R(2)*, technical surplus (or technical deficit) in respect of credit *insurance business* is the amount by which the aggregate of *net earned premiums* and other technical income exceeds (or falls short of) the sum of net *claims* incurred, *claims management costs* and any technical charges.
- 1.4.47 G The calculation of technical surplus or technical deficit should be made before tax and before any transfer to or from the *credit equalisation provision*. Investment income should not be included in these calculations.

Euro conversion

- 1.4.48 R For the purposes of *INSPRU 1.4*, the exchange rate from the Euro to the pound sterling for each year beginning on 31 December is the rate applicable on the last day of the preceding October for which the exchange rates for the currencies of all the European Union member states were published in the Official Journal of the European Union.

Application of *INSPRU 1.4* to Lloyd's

- 1.4.49 R *INSPRU* 1.4 applies to the *Society* in accordance with *INSPRU* 8.1.2R:
(1) with the modification set out in *INSPRU* 1.4.50R; and
(2) except *INSPRU* 1.4.11R to *INSPRU* 1.4.37G.
- 1.4.50 R The *Society* must calculate a *credit equalisation provision* for the aggregate *insurance business* of all *members*; it is not required to calculate a *credit equalisation provision* separately for the business of each *member*.
- 1.4.51 R The *Society* must allocate the result of *INSPRU* 1.4.50R between itself and each of the *members* on a fair and reasonable basis.

1.5 Internal-contagion risk

Application

- 1.5.1 R *INSPRU* 1.5 applies to an *insurer*.
- 1.5.2 R *INSPRU* 1.5 does not apply, to the extent stated, to any *insurer* in (1) to (4):
- (1) none of the provisions apply to *non-directive friendly societies*;
 - (2) none of the provisions, apart from *INSPRU* 1.5.33R (payment of financial penalties) apply to *firms* which qualify for authorisation under Schedule 3 or 4 of the *Act*;
 - (3) *INSPRU* 1.5.33R (payment of financial penalties) does not apply to *mutuals*;
 - (4) *INSPRU* 1.5.41R to *INSPRU* 1.5.57R (*UK branches* of certain *non-EEA insurers*) do not apply to:
 - (a) *UK insurers*; or
 - (b) *non-EEA insurers* whose *insurance business* in the *United Kingdom* is restricted to *reinsurance*; or
 - (c) *EEA-deposit insurers*; or
 - (d) *Swiss general insurers*.
- 1.5.3 G The scope of application of *INSPRU* 1.5 is not restricted to *firms* that are subject to the relevant EC directives.
- 1.5.4 R In its application to a *firm* with its head office in the *United Kingdom*, this section applies to the whole of the *firm's* business carried on world-wide.
- 1.5.5 R In the application of this section to activities carried on by a *non-EEA insurer*:
- (1) *INSPRU* 1.5.13R to *INSPRU* 1.5.15G and *INSPRU* 1.5.41R apply in relation to the whole of its business carried on world-wide;
 - (2) all other provisions of this section apply only in relation to:
 - (a) in the case of any *UK-deposit insurer*, activities carried on from *branches* in any *EEA State*; and
 - (b) in any other case, activities carried on from a *branch* in the *United Kingdom*.
- 1.5.6 G The adequacy of a *firm's* financial resources needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise.
- 1.5.7 G The requirements of this section apply to a *firm* on a solo basis.
- Purpose
- 1.5.8 G This section sets out requirements for a *firm* relating to 'internal-contagion risk'. This is the risk that losses or liabilities from one activity might deplete or divert financial resources held to meet liabilities from another activity. It

arises where the two activities are carried on within the same *firm*. It may also arise from the combination of activities within the same *group*, but this aspect of internal-contagion risk falls outside the scope of this section. Requirements relevant to *group* contagion risk are set out in *INSPRU 6*.

- 1.5.9 G Internal-contagion risk includes in particular the risk that arises where a *firm* carries on:
- (1) both insurance and non-insurance activities; or
 - (2) two or more different types of insurance activity; or
 - (3) insurance activities from offices or *branches* located in both the *United Kingdom* and overseas.
- 1.5.10 G This section requires *firms* other than *pure reinsurers* to limit non-insurance activities to those that directly arise from their *insurance business*, e.g. investing assets, employing insurance staff etc. It also requires that an adequate provision be established for non-insurance liabilities. *Pure reinsurers* must limit their activities to the business of *reinsurance* and related operations.
- 1.5.11 G This section also sets out requirements for the separation of different types of insurance activity. However, in most circumstances the combination of different types of insurance activity within the same *firm* is a source of strength. Adequate pooling and diversification of insurance risk is fundamental to sound business practice. The requirements, therefore, only apply in two specific cases where without adequate protection the combination might operate to the detriment of *policyholders*. They apply where a *firm* carries on both:
- (1) *general insurance business* and *long-term insurance business*;
 - (2) linked and non-linked *insurance business*.
- 1.5.12 G Finally, the section sets out requirements to protect *policyholders* of *branches* of non-*EEA firms* where these are supervised by the *FSA*. These apply only to a non-*EEA firm* that has established a *branch* in the *United Kingdom*.
- Requirements: Non-insurance activities
- Restriction of business
- 1.5.13 R (1) A *firm* other than a *pure reinsurer* must not carry on any commercial business other than *insurance business* and activities directly arising from that business.
- (2) (1) does not prevent a *friendly society* which was on 15 March 1979 carrying on *long-term insurance business* from continuing to carry on savings business.
- 1.5.13A R A *pure reinsurer* must not carry on any business other than the business of *reinsurance* and related operations.

- 1.5.13B G In *INSPRU* 1.5.13AR related operations include, for example, activities such as provision of statistical or actuarial advice, risk analysis or research for its clients. It may also include a *holding company* function and activities with respect to financial sector activities within the meaning of Article 2, point 8, of the *Financial Groups Directive*. But it does not allow the carrying on of, for example, unrelated banking and financial activities.

Financial limitation of non-insurance activities

- 1.5.14 R A *firm* must limit, manage and control its non-insurance activities so that there is no significant risk arising from those activities that it may be unable to meet its liabilities as they fall due.

- 1.5.15 G For the purpose of *INSPRU* 1.5.14R a *firm* should consider how the financial impact of non-insurance activities might diverge from expectations. However, it need only take into account unexpected variations in amount and timing in so far as they are reasonably possible and may take into account effective mitigating factors.

Requirements: long-term insurance business

- 1.5.16 G *INSPRU* 1.5.18R, *INSPRU* 1.5.21R, *INSPRU* 1.5.30R and *INSPRU* 1.5.31R require a *firm* to identify the assets attributable to the receipts of the *long-term insurance business*, called *long-term insurance assets*, and only to apply those assets for the purpose of that business. This has the effect of prohibiting a *composite firm* from using *long-term insurance assets* to meet *general insurance liabilities*. It also keeps *long-term insurance assets* separate from shareholder funds.

Permissions not to include both types of insurance

- 1.5.17 G Under section 31 of the *Act*, a *firm* may not carry on a *regulated activity* unless it has *permission* to do so (or is exempt in relation to the particular activity). Both *general insurance business* and *long-term insurance business* are *regulated activities* and *permission* will extend to the *effecting or carrying out* of one or more particular *classes of contracts of insurance*. A *firm's permission* can be varied so as to add other *classes*. It is *FSA* policy, in compliance with EC directives on insurance, not to grant or vary *permission* if that would allow a *firm* to engage in both *general insurance business* and *long-term insurance business*. This does not apply where a *firm's permission* is restricted to *reinsurance*. It also does not apply where a *firm's permission* extends to *effecting or carrying out life and annuity contracts of insurance*. This will automatically include *permission* to *effect or carry out accident contracts of insurance* or *sickness contracts of insurance* on an ancillary or supplementary basis (see article 2(1) of the Consolidated Life Directive).

Separately identify and maintain long term insurance assets

- 1.5.18 R A *firm* carrying on *long-term insurance business* must identify the assets

relating to its *long-term insurance business* which it is required to hold by virtue of *INSPRU* 1.1.20R or *INSPRU* 1.1.21R .

- 1.5.19 G *INSPRU* 1.1.16R requires a *firm* to establish adequate *technical provisions* for its *long-term insurance contracts*. *INSPRU* 1.1.20R requires a *firm* to hold *admissible assets* of a value at least equal to the amount of the *technical provisions* and its other *long-term insurance liabilities*. *INSPRU* 1.1.21R ensures that a *composite firm* identifies separate *admissible assets* with a value at least equal to the *technical provisions* for *long-term insurance business* and its other *long-term insurance liabilities* as well as holding other *admissible assets* of a value at least equal to the amount of its *technical provisions* for *general insurance business* and its other *general insurance liabilities*. The overall impact of these provisions in *INSPRU* 1.1, and of *INSPRU* 1.5.18R, is that any *firm* writing *long-term insurance business* must identify separately *admissible assets* of a value at least equal to the amount of its *long-term insurance business technical provisions* and its other *long-term insurance liabilities*.
- 1.5.20 G *INSPRU* 1.5.18R does not prohibit a *firm* from identifying other assets as being available to meet the liabilities of its *long-term insurance business*. It may transfer such other assets to a *long-term insurance fund* (see *INSPRU* 1.5.21R and *INSPRU* 1.5.22R) and the transfer will take effect when it is recorded in the *firm's* accounting records (see *INSPRU* 1.5.23R). After the transfer takes effect, a *firm* may not transfer the assets out of a *long-term insurance fund* except where they represent an *established surplus* (see *INSPRU* 1.5.27R).
- 1.5.21 R (1) A *firm's* long-term insurance assets are the items in (2), adjusted to take account of:
- (a) outgo in respect of the *firm's long-term insurance business*; and
 - (b) any transfers made in accordance with *INSPRU* 1.5.27R.
- (2) The items are:
- (a) the assets identified under *INSPRU* 1.5.18R (including assets into which those assets have been converted);
 - (b) any other assets identified by the *firm* as being available to cover its *long-term insurance liabilities*;
 - (c) *premiums* and other receivables in respect of *long-term insurance contracts*;
 - (d) other receipts of the *long-term insurance business*; and
 - (e) all income and capital receipts in respect of the items in (2).
- 1.5.22 R (1) Unless (2) applies, all the *long-term insurance assets* of the *firm* constitute its long-term insurance fund.
- (2) Where a *firm* identifies particular *long-term insurance assets* in connection with different parts of its *long-term insurance business*, the assets identified in relation to each such part constitute separate long-term insurance funds of the *firm*.

- 1.5.23 R A *firm* must maintain a separate accounting record in respect of each of its *long-term insurance funds* (including any *with-profits fund*).
- 1.5.24 G *Firms* must ensure that *long-term insurance assets* are separately identified and allocated to a *long-term insurance fund* at all times. Assets in external accounts, for example at banks, custodians, or brokers should be segregated in the *firm's* books and records into separate accounts for *long-term insurance business* and *general insurance business*. Where a *firm* has more than one *long-term insurance fund*, a separate accounting record must be maintained for each fund. Accounting records should clearly document the allocation.
- 1.5.25 G Where the surplus arising from business is shared between *policyholders* and shareholders in different ways for different blocks of business, it may be necessary to maintain a separate fund to ensure that *policyholders* are, and will be, treated fairly. For example, if a proprietary company writes some business on a with-profits basis, this should be written in a *with-profits fund* separate from any business where the surplus arising from that business is wholly owned by shareholders.
- 1.5.26 G Where a *firm* merges separate funds for different types of business, it will need to ensure that the merger will not result in *policyholders* being treated unfairly. When considering merging the funds, the *firm* should consider the impact on its *PPFM* (see *COB* 6.10) and on its obligations to notify the *FSA* (see *SUP* 15.3). In particular, a *firm* would need to consider how any *inherited estate* would be managed and how the fund would be run in future, such that *policyholders* are treated fairly.
- 1.5.27 R A *firm* may not transfer assets out of a *long-term insurance fund* unless:
- (1) the assets represent an *established surplus*; and
 - (2) no more than three months have passed since the determination of that surplus.
- 1.5.28 G As a result of *INSPRU* 1.5.27R(2), an *actuarial investigation* undertaken to determine an *established surplus* remains in-date for three months from the date as at which the determination of the surplus was made. However, even where the investigation is still in-date, the *firm* should not make the transfer unless there is sufficient surplus at the time of the transfer to allow it to be made without breach of *INSPRU* 1.1.20R or *INSPRU* 1.1.21R.
- 1.5.29 G *INSPRU* 1.1.27R and *INSPRU* 1.1.28R provide further constraints on the transfer of assets out of a *with-profits fund*. *INSPRU* 1.1.27R requires a *firm* to have *admissible assets* in each of its *with-profits funds* to cover the *technical provisions* and other *long-term insurance liabilities* relating to all the business in that fund. *INSPRU* 1.1.28R requires a *realistic basis life firm* to ensure that the *realistic value of assets* for each of its *with-profits funds* is at least equal to the *realistic value of liabilities* of that fund.

Exclusive use of long-term insurance assets

- 1.5.30 R (1) A *firm* must apply a *long-term insurance asset* only for the purposes of its *long-term insurance business*.
(2) For the purpose of (1), applying an asset includes coming under any obligation (even if only contingently) to apply that asset.
- 1.5.31 R A *firm* must not agree to, or allow, any mortgage or charge on its *long-term insurance assets* other than in respect of a *long-term insurance liability*.
- 1.5.32 G The purposes of the *long-term insurance business* include the payment of *claims*, expenses and liabilities arising from that business, the acquisition of lawful access to fixed assets to be used in that business and the investment of assets. The payment of liabilities may include repaying a loan but only where that loan was incurred for the purpose of the *long-term insurance business*. The purchase or investment of assets may include an exchange at fair *market value* of assets (including *money*) between the *long-term insurance fund* and other assets of the *firm*. A *firm* may also lend *securities* held in a *long-term insurance fund* under a *stock lending* transaction or transfer assets as *collateral* for a *stock lending* transaction where the *firm* is the borrower, where such lending or transfer is for the benefit of the *long-term insurance business*.

Payment of financial penalties

- 1.5.33 R If the *FSA* imposes a financial penalty on a *long-term insurer*, the *firm* must not pay that financial penalty from a *long-term insurance fund*.
- 1.5.34 G *INSPRU* 1.5.2R states that this provision applies to all *firms*, except *mutuals*, and includes *firms* qualifying for authorisation under Schedule 3 or 4 to the *Act*.

Requirements: property-linked funds

- 1.5.35 G *INSPRU* 3.1.57R requires a *firm* to cover, as closely as possible, its *property-linked liabilities* by the property to which those liabilities are linked. In order to comply with this *rule*, a *firm* should identify the assets it holds to cover *property-linked liabilities* and should not apply those assets (as long as they are needed to cover the *property-linked liabilities*) for any purpose other than to meet those liabilities.
- 1.5.36 R A *firm* must select, allocate and manage the assets to which its *property-linked liabilities* are linked taking into account:
- (1) the *firm's* contractual obligations to holders of *property-linked policies*; and
- (2) its regulatory duty to treat *customers* fairly, including in the way it makes discretionary decisions as to how it selects, allocates and manages assets.
- 1.5.37 G *Property-linked liabilities* may be linked either to specified assets (with no contractual discretion given to the *firm* as to the choice of assets) or to assets

of a specified kind where the selection of the actual assets is left to the *firm*.

Requirements: UK branches of certain non-EEA firms

- 1.5.38 G The purpose of the *rules* and *guidance* set out in *INSPRU* 1.5.38G to *INSPRU* 1.5.57R is to protect against the risk that the financial resources required in respect of the activities of the *United Kingdom* (or *EEA*) *branch(es)* might be depleted by the other activities of the *non-EEA direct insurer*.
- 1.5.39 G By virtue of *INSPRU* 1.5.2R(4), the *rules* in *INSPRU* 1.5.41R to *INSPRU* 1.5.57R apply to *non-EEA direct insurers* except for *Swiss general insurers* and *EEA-deposit insurers*. Responsibility for determining the adequacy of the world-wide financial resources of *Swiss general insurers* or *EEA-deposit insurers* rests exclusively with the Swiss authorities or the authorities in the *EEA state* (other than the *United Kingdom*) in which the deposit was made.
- 1.5.40 G (1) *INSPRU* 1.5.41R requires a *non-EEA direct insurer* to hold adequate world-wide resources to meet the needs of the world-wide business without the need to rely on *UK* or *EEA branch* assets other than to meet *branch* liabilities.
(2) *INSPRU* 1.5.42R to *INSPRU* 1.5.47R require *non-EEA direct insurers* to calculate a local *MCR* and to hold assets representing that requirement in the *EEA* or the *United Kingdom*.
(3) *INSPRU* 1.5.48R to *INSPRU* 1.5.52R require *non-EEA direct insurers* to hold a minimum level of assets in the *United Kingdom* or *EEA*.
(4) *INSPRU* 1.5.54R requires the deposit of a minimum level of assets in the *United Kingdom*.
(5) *INSPRU* 1.5.56R and *INSPRU* 1.5.57R require *non-EEA direct insurers* to keep adequate accounting records in the *United Kingdom*.

Worldwide financial resources

- 1.5.41 R (1) A *non-EEA direct insurer* must maintain adequate worldwide financial resources, to ensure that there is no significant risk that its liabilities cannot be met as they fall due.
(2) For the purpose of (1):
(a) a *UK-deposit insurer* must not rely upon the assets held under *INSPRU* 1.1.20R as available to meet liabilities other than those arising from the activities of its *branches* in *EEA States*;
(b) other *non-EEA direct insurers* to whom (1) applies must not rely upon the assets held under *INSPRU* 1.1.20R as available to meet liabilities other than those arising from the activities of any *UK branch*.

UK or EEA MCR to be covered by admissible assets

- 1.5.42 R A *non-EEA direct insurer* must:
(1) calculate a *UK* or *EEA MCR* in accordance with *INSPRU* 1.5.44R to *INSPRU* 1.5.47R; and
(2) hold *admissible assets* (in addition to those required under *INSPRU* 1.1.20R) to represent its *UK* or *EEA MCR* calculated under (1).
- 1.5.43 R The assets held under *INSPRU* 1.5.42R(2) must be identified and valued as if the *non-EEA direct insurer* was a *firm* with its head office in the *United Kingdom*.
- 1.5.44 R For the purposes of *INSPRU* 1.5.42R, a *non-EEA direct insurer* (except a *UK-deposit insurer*) must calculate a *UK MCR*:

(1) for *long-term insurance business*, in accordance with *INSPRU* 1.1.81R to *INSPRU* 1.1.91R but only in relation to business carried on by the *firm* in the *United Kingdom*;
(2) for *general insurance business*, in accordance with *INSPRU* 1.1.45R to *INSPRU* 1.1.72R but only in relation to business carried on by the *firm* in the *United Kingdom*.
- 1.5.45 R For a *composite firm*, the *UK MCR* is the sum of the amounts arrived at under *INSPRU* 1.5.44R(1) and *INSPRU* 1.5.44R(2).
- 1.5.46 R For the purposes of *INSPRU* 1.5.42R, a *UK-deposit insurer* must calculate an *EEA MCR*:

(1) for *long-term insurance business*, in accordance with *INSPRU* 1.1.81R to *INSPRU* 1.1.91R but only in relation to business carried on by the *firm* in all *EEA States*, taken together;
(2) for *general insurance business*, in accordance with *INSPRU* 1.1.45R to *INSPRU* 1.1.72R but only in relation to business carried on by the *firm* in all *EEA States*, taken together.
- 1.5.47 R For a *composite firm*, the *EEA MCR* is the sum of the amounts arrived at under *INSPRU* 1.5.46R(1) and *INSPRU* 1.5.46R(2).

Localisation of assets

- 1.5.48 R A *non-EEA direct insurer* (except a *UK-deposit insurer*) must hold:
(1) *admissible assets* which are required to cover its *technical provisions* in accordance with *INSPRU 1.1.20R(1)* or *INSPRU 1.1.21R(1)(a)* and (2)(a); and
(2) other *admissible assets* not required to cover *property-linked liabilities* or *index-linked liabilities* in accordance with *INSPRU 3.1.57R* or *INSPRU 3.1.58R* which represent its *UK MCR* as calculated in accordance with *INSPRU 1.5.44R*;
as follows:
(a) (where the assets cover the *technical provisions* and the *guarantee fund*) in the *United Kingdom*;
(b) (where the assets represent the amount of the *UK MCR* in excess of the *guarantee fund*) in any *EEA State*.
- 1.5.49 R A *UK-deposit insurer* must hold:
(1) *admissible assets* which are required to cover its technical provisions in accordance with *INSPRU 1.1.20R(1)* or *INSPRU 1.1.21R(1)(a)* and (2)(a); and
(2) other *admissible assets* not required to cover *property-linked liabilities* or *index-linked liabilities* in accordance with *INSPRU 3.1.57R* or *INSPRU 3.1.58R* which represent its *EEA MCR* as calculated in accordance with *INSPRU 1.5.46R*;
as follows:
(a) (where the assets cover the *technical provisions* and the *guarantee fund*) within the *EEA* states where the *firm* carries on *insurance business*;
(b) (where the assets represent the amount of the *EEA MCR* in excess of the *guarantee fund*) in any *EEA State*.
- 1.5.50 R *INSPRU 1.5.48R* and *INSPRU 1.5.49R* do not apply to assets covering *technical provisions* which are debts owed by *reinsurers*.
- 1.5.51 G The *admissible assets* in excess of the *technical provisions* and *UK* or *EEA MCR* may be held outside the *EEA*.
- 1.5.52 R For the purpose of *INSPRU 1.5.48R* and *INSPRU 1.5.49R* :
(1) a tangible asset is to be treated as held in the country or territory where it is situated;
(2) an *admissible asset* consisting of a *claim* against a debtor is to be regarded as held in any country or territory where it can be enforced by legal action;
(3) a *listed security* is to be treated as held in any country or territory where there is a *regulated market* in which the security is dealt; and
(4) a *security* which is not a *listed security* is to be treated as held in the country or territory in which the *issuer* has its head office.
- 1.5.53 G *INSPRU 3.1.53R* to *INSPRU 3.1.55R* (currency matching of assets and liabilities) apply to the assets held to match insurance liabilities calculated under *INSPRU 1.1.12R* or *INSPRU 1.1.16R*.

Deposit of assets as security

- 1.5.54 R A *non-EEA direct insurer* must keep assets of a value at least equal to one quarter of the *base capital resources requirement* on deposit in the *United Kingdom* with a *BCD credit institution*.
- 1.5.55 G The assets deposited as security may count towards the assets required under *INSPRU 1.5.48R* and *INSPRU 1.5.49R*. If, after the deposit is made, the value of the deposited assets falls below one quarter of the *base capital resources requirement*, the *firm* should deposit further *admissible assets* in order to comply with *INSPRU 1.5.48R* and *INSPRU 1.5.49R*. Deposited assets may be exchanged for other *admissible assets* and excess assets may be withdrawn, provided that the exchange or deposit does not cause a breach of *INSPRU 1.5.48R* or *INSPRU 1.5.49R*.

Branch accounting records in the United Kingdom

- 1.5.56 R A *non-EEA direct insurer* must maintain at a place of business in the *United Kingdom* adequate records relating to:
(1) the activities carried on from its *United Kingdom branch*; and
(2) if it is an *EEA-deposit insurer*, the activities carried on from the *branches* in other *EEA States*.
- 1.5.57 R The records maintained as required by *INSPRU 1.5.56R* must include a record of:
(1) the income, expenditure and liabilities arising from activities of the *branch* or *branches*; and
(2) the assets identified under *INSPRU 1.1.20R* as available to meet those liabilities.

Application of *INSPRU 1.5* to Lloyd's

- 1.5.58 R *INSPRU 1.5* applies to *managing agents* and to the *Society* in accordance with:
(1) for *managing agents*, *INSPRU 8.1.4R*; and
(2) for the *Society*, *INSPRU 8.1.2R*.
- 1.5.59 R The *Society* and *managing agents* must take all reasonable steps to ensure that:
(1) a *corporate member* does not carry on any commercial business other than *insurance business* and activities arising directly from that business; and
(2) *individual members* do not, in their capacity as *underwriting members*, carry on any commercial business other than *insurance business* and activities arising directly from that business.
- 1.5.60 R A *managing agent* must not permit both *general insurance business* and *long-term insurance business* to be carried on together through any *syndicate* managed by it.

1.6 Insurance Special Purpose Vehicles

Application and Purpose

- 1.6.1 R (1) *INSPRU 1.6.5R to INSPRU 1.6.12R* apply to a *UK ISPV*.
- (2) *INSPRU 1.6.13G to INSPRU 1.6.18G* apply to an *insurer* which has a contract of *reinsurance* with an *ISPV*.
- 1.6.2 G An *ISPV* is a special purpose vehicle which assumes risks from *insurance undertakings* or *reinsurance undertakings* and which fully funds its exposure to such risks through the proceeds of a debt issuance or some other financing mechanism where the repayment rights of the providers of such debt or other financing mechanism are subordinated to the *reinsurance* obligations of that vehicle. The special feature of an *ISPV*, when compared to other *reinsurers*, is that it is fully funded to meet its *reinsurance* liabilities. It is, therefore, not subject to insurance risk to the same extent as other *reinsurers*. The *Reinsurance Directive* permits *ISPVs* to be subject to different rules to those applying to other *reinsurers*.
- 1.6.3 G To satisfy the definition of an *ISPV* under the *Reinsurance Directive* the *ISPV* must be fully funded. The *FSA* considers that to be fully funded an *ISPV* must have actually received the proceeds of the debt issuance or other mechanism by which it is financed. The *FSA* would not, therefore, grant a *Part IV permission* to an *ISPV* where part of the financing for its *reinsurance* liabilities was on a contingent basis, for example, a standby facility or letter of credit.
- 1.6.4 G The purpose of *INSPRU 1.6* is:
- (1) to set out the *rules* applying to *UK ISPVs* in respect of:
- (a) their assets and liabilities; and
- (b) their contractual arrangements; and
- (2) to set out the conditions that must be met in order for an *insurer* to claim credit for *reinsurance* with an *ISPV*.

Assets and liabilities

- 1.6.5 R A *UK ISPV* must ensure that at all times its assets are equal to or greater than its liabilities.
- 1.6.6 G In addition to liability under its contracts of *reinsurance*, an *ISPV* will incur liability for other expenses, for example, staff and accommodation costs, *claims* handling arrangements and professional advisers' fees. *INSPRU 1.6.5R* requires a *UK ISPV* to ensure that it always has sufficient assets to meet its liabilities.
- 1.6.7 R A *UK ISPV* must invest its assets in accordance with the requirements set

out in *INSPRU* 3.1.61AR.

- 1.6.8 R A *UK ISPV's* assets must be held by, or on behalf of:
- (1) the *UK ISPV*; or
 - (2) the *insurance undertaking* or *reinsurance undertaking* which cedes to the *UK ISPV* the risks in respect of which the relevant assets are held.

Contractual arrangements

- 1.6.9 R A *UK ISPV* must include in each of its contracts of *reinsurance* terms which secure that its aggregate maximum liability at any time under those contracts of *reinsurance* does not exceed the amount of its assets at that time.
- 1.6.10 G *INSPRU* 1.6.9R requires that a *UK ISPV's* contracts of *reinsurance* should include terms that secure that its maximum *reinsurance* liability is capped at a level that is no greater than the *ISPV's* assets. In the *FSA's* view, this is a necessary condition of the *ISPV* being fully funded, as it means that the *ISPV* should not find that its assets are insufficient to meet its *reinsurance* liabilities.
- 1.6.11 R A *UK ISPV* must ensure that under the terms of any debt issuance or other financing arrangement used to fund its *reinsurance* liabilities the rights of the providers of that debt or other financing are fully subordinated to the claims of creditors under its contracts of *reinsurance*.
- 1.6.12 R A *UK ISPV* must only enter into contracts or otherwise assume obligations which are necessary for it to give effect to the *reinsurance* arrangements which represent the special purpose for which it has been established.

Reinsurance with an *ISPV*

- 1.6.13 G As a result of *GENPRU* 1.3.55R, *GENPRU* 2 Ann 7R, *INSPRU* 1.1.92AR and *INSPRU* 1.2.28R an *insurer* may not:
- (1) treat amounts recoverable from an *ISPV* as:
 - (a) an *admissible asset*, or
 - (b) *reinsurance* for the purposes of calculating its *mathematical reserves*, or
 - (c) *reinsurance* reducing its *MCR*, or
 - (2) otherwise ascribe a value to such amounts,

unless it first obtains a *waiver* from the *FSA*. *INSPRU* 1.6.14G to *INSPRU* 1.6.18G set out the information which the *FSA* will expect to receive as part of the application for the *waiver*. Those paragraphs also set out the factors, in addition to the statutory tests under section 148 of the *Act*, to which the

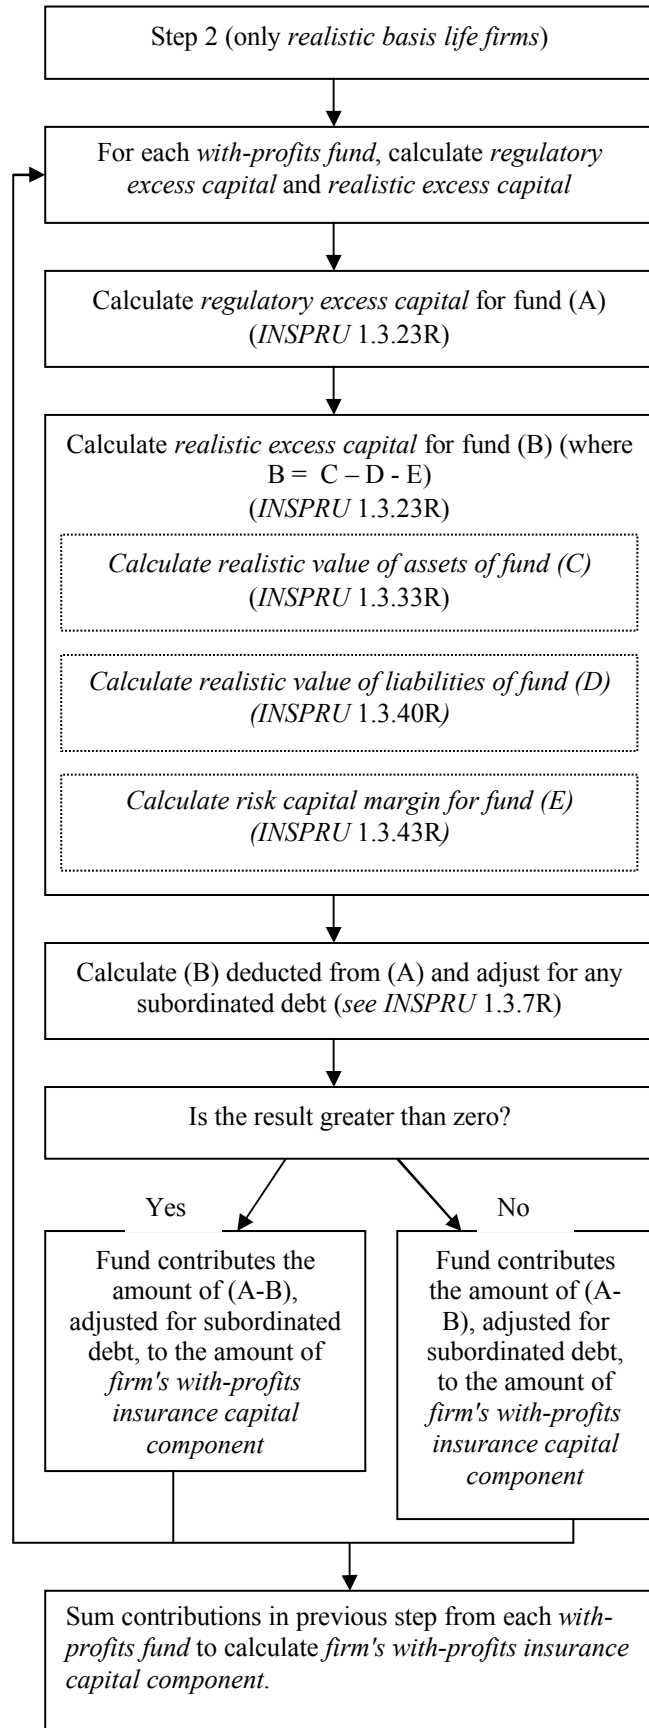

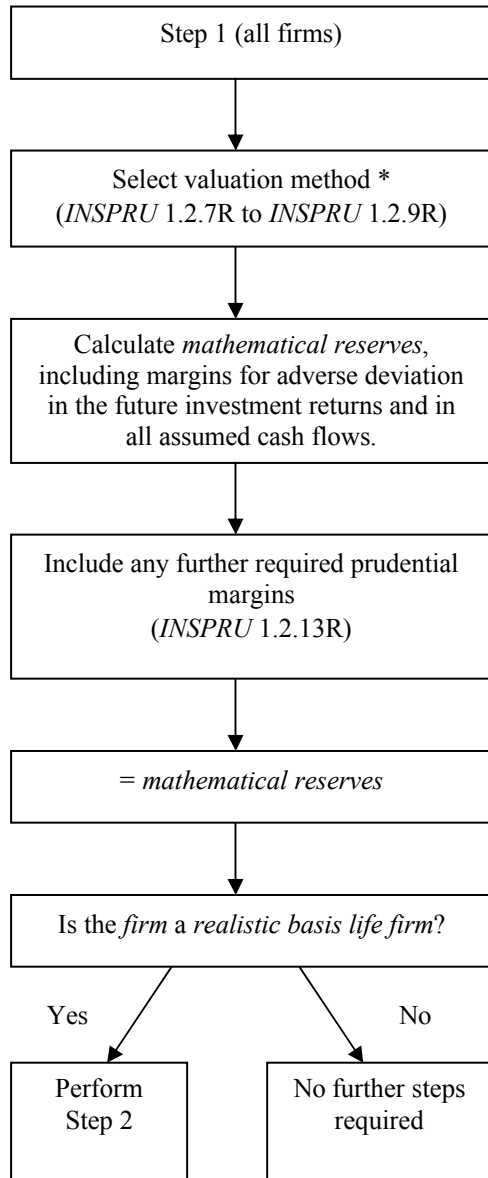

FSA will have regard in deciding:

- (i) whether to grant such a *waiver* (assuming the section 148 conditions are met); and
- (ii) the amount recoverable from the *ISPV* which it will allow the *insurer* to bring into account for these purposes.

- 1.6.14 G Where the *ISPV* is a *UK ISPV*, the *FSA* will wish to be satisfied that the *UK ISPV* complies with *INSPRU* 1.6.5R to *INSPRU* 1.6.12R. The *FSA* may rely on information supplied in connection with its application for *authorisation*. However, if the application for a *waiver* is made some time after *authorisation* was granted, the *FSA* may request confirmation that there has been no material change to the information originally supplied.
- 1.6.15 G Where the *ISPV* is not a *UK ISPV*, the *FSA* will expect to receive confirmation that the *ISPV* has received an official authorisation in accordance with article 46 of the *Reinsurance Directive* in the *EEA State* in which it has been established. In addition, it will need details of the debt issuance or other financing mechanism by which the *ISPV's reinsurance* liabilities are funded. The *FSA* will also expect to receive information about the *ISPV's* key management and control functions, including details of the *ISPV's* auditors and arrangements for *claims* handling, and any material *outsourcing* agreements. The *FSA* will also need information about the structure of any *group* of which the *ISPV* is a member.
- 1.6.16 G No credit may be taken for a contract of *reinsurance* with an *ISPV* unless the contract meets the risk transfer principle set out in *INSPRU* 1.1.19AR. The *FSA* will require evidence that the contract of *reinsurance* and the extent of the credit that the *firm* proposes to take for it satisfy the risk transfer principle.
- 1.6.17 G The *FSA* will require information about the impact of the *ISPV* arrangement on the ceding *firm's* individual capital assessment carried out in accordance with *INSPRU* 7.1. This should include evidence that all residual risks associated with the arrangement (including credit, market, liquidity and operational risks) are reflected in that assessment.
- 1.6.18 G The *FSA* will also expect to receive an analysis of the potential for risk to revert to the *firm* or any of its *associates* under realistic adverse scenarios or for liabilities to arise in respect of the risks transferred for which no provision has been made.

Annex 1G

INSPRU 1.2 (Mathematical reserves) and INSPRU 1.3 (With-profits insurance capital component)

* For conventional *with-profits insurance business*, where a firm is a *regulatory basis only firm* (see INSPRU 1.2.5G), the *net premium* method of valuation has to be used (INSPRU 1.2.37R to INSPRU 1.2.45G)

2.1 Credit risk in insurance

Application

- 2.1.1 R *INSPRU* 2.1 applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 2.1.2 R All of *INSPRU* 2.1, except *INSPRU* 2.1.20R and *INSPRU* 2.1.23R to *INSPRU* 2.1.32G, applies to:
- (1) an *EEA-deposit insurer*; and
 - (2) a *Swiss general insurer*;
- but only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.
- 2.1.3 G The scope of application of *INSPRU* 2.1 is not restricted to *firms* that are subject to relevant EC directives.
- 2.1.4 R
- (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
 - (2) Where a *firm* carries on both *long-term insurance business* and *general insurance business*, this section applies separately to each type of business.
- Purpose
- 2.1.5 G The purpose of this section is to protect *policyholders* and potential *policyholders* by setting out the requirements applicable to a *firm* in respect of credit risk. Credit risk is incurred whenever a *firm* is exposed to loss if a *counterparty* fails to perform its contractual obligations including failure to perform them in a timely manner. Credit risk may therefore have an impact upon a firm's ability to meet its valid *claims* as they fall due. Credit risk can also arise from underlying causes that have an impact upon the creditworthiness of all *counterparties* of a particular description or geographical location. A detailed explanation of credit risk is given at *SYSC* 15.1.4G.
- 2.1.6 G The requirements in this section address both current and contingent exposure to credit risk. *PRIN* and *SYSC* require a *firm* to establish adequate internal systems and controls for exposure to credit risk. This section requires a *firm* to restrict its exposure to different *counterparties* and assets to prudent levels and to ensure that those exposures are adequately diversified. It also requires a *firm* to make deductions from the value of assets in respect of exposures to one asset, *counterparty* or group of closely related *counterparties* in excess of prescribed limits.
- 2.1.7 G This section also sets limits on the *market risk* arising from holding assets

including securities issued or guaranteed by *counterparties*. This *market risk* is incurred whenever a *firm* is exposed to loss if an asset were to reduce in value or even become worthless. These *market risk* limits are set out in this section rather than the *market risk* sections in *INSPRU* because they are closely linked to the *counterparty* limits set out in this section.

Overall limitation of credit risk

- 2.1.8 R Taking into account relevant risks, a *firm* must restrict its *counterparty* exposures and asset exposures to prudent levels and ensure that those exposures are adequately diversified.
- 2.1.9 R
- (1) For the purposes of *INSPRU* 2.1, *counterparty* exposure is the amount a *firm* would lose if a *counterparty* were to fail to meet its obligations (either to the *firm* or to any other *person*) and if simultaneously securities issued or guaranteed by the *counterparty* were to become worthless.
 - (2) For the purposes of *INSPRU* 2.1, asset exposure is the amount a *firm* would lose if an asset or class of identical assets (whether or not held directly by the *firm*) were to become worthless.
 - (3) For the purposes of (1) and (2), the amount of loss is the amount, if any, by which the *firm's* capital resources (as calculated in accordance with the *capital resources table* but without making any deduction for assets in excess of *market risk* and *counterparty* limits) would decrease as a result of the *counterparty* failing to meet its obligations and the *securities* or assets becoming worthless.
 - (4) In determining the amount of loss in accordance with (3), the *firm* must take into account decreases in its capital resources that would result not only from its own direct exposures but also from:
 - (a) exposures held by any of its *subsidiary undertakings*; and
 - (b) synthetic exposures arising from *derivatives* or quasi-derivatives held or entered into by the *firm* or any of its *subsidiary undertakings*.
 - (5) If a *firm* elects under *INSPRU* 2.1.35R to make a deduction in respect of *collateral*, the *firm* must deduct from the amount of loss determined in accordance with (3) so much of the value of that *collateral* as:
 - (a) would be realised by the *firm* were it to exercise its rights in relation to the *collateral*; and
 - (b) does not exceed any of the relevant limits in *INSPRU* 2.1.22R(3).
- 2.1.10 G Exposure is defined in terms of loss (which is decrease in capital). It does not include exposures arising from assets that are not represented in capital or exposures which if crystallised in a loss would be offset by a consequent gain, reduction in liabilities or release of provisions, but only in so far as that gain, reduction or release would itself lead to an offsetting increase in *capital resources*. Examples include:
- (1) exposure from the holding of assets to which the *firm* has attributed no value;

(2) exposure from the holding of assets that the *firm* has deducted from *capital resources*; and

(3) exposure in respect of which (and to the extent that) the *firm* has established a provision.

- 2.1.11 G In assessing the adequacy of diversification required by *INSPRU 2.1.8R*, a *firm* should take into account concentrations of exposure including those arising from:
- (1) different types of exposure to the same *counterparty*, such as *deposits*, loans, securities, *reinsurance* and *derivatives*;
 - (2) links between *counterparties* such that default by one might have an impact upon the creditworthiness of another; and
 - (3) possible changes in circumstance that would have an impact upon the creditworthiness of all *counterparties* of particular description or geographical location.
- 2.1.12 G A *firm* should consider how the spreading of credit risk will impact on overall *counterparty* quality.
- 2.1.13 G In assessing its exposure to a *counterparty* for the purpose of *INSPRU 2.1.8R*, a *firm* should take into account:
- (1) the period for which the exposure to that *counterparty* might continue;
 - (2) the likelihood of default during that period by the *counterparty*; and
 - (3) the loss that might result in the event of default.
- 2.1.14 G In assessing the loss that might result from the default of a *counterparty* for the purposes of *INSPRU 2.1.8R*, a *firm* should take into account the circumstances that might lead to default and, in particular, how these might have an impact upon:
- (1) the amount of exposure to the *counterparty*; and
 - (2) the effectiveness of any loss mitigation techniques employed by the *firm*.
- 2.1.15 G Often the same circumstances which lead to the crystallisation of contingent credit exposure, e.g. a significant *claims* event or a significant movement in interest, currency or asset values, also lead to an increase in the risk of default by the *counterparty*. In particular, if a *reinsurer* or *derivative counterparty* is being relied upon to provide protection against the consequences of an event or circumstance, a *firm* should take into account how that event or circumstance might have an impact upon the creditworthiness of the *reinsurer* or *derivative counterparty*.
- 2.1.16 R For the purposes of *INSPRU 2.1.8R* and of determining *counterparty* exposure and asset exposure in accordance with *INSPRU 2.1.9R* and *reinsurance* exposure in accordance with *INSPRU 2.1.25R*, a *firm* must only rely upon a loss mitigation technique where it has good reason to believe that, taking into account the possible circumstances of default, it is likely to

be effective.

- 2.1.17 G Loss mitigation techniques include:
- (1) the right, upon default, to preferential access to some or all of the *counterparty's* assets, for example by exercising rights of set off, holding *collateral* or assets deposited back, or exercising rights under fixed or floating charges;
 - (2) rights against third parties upon default by the *counterparty*, such as guarantees, credit insurance and credit *derivatives*; and
 - (3) where the *counterparty* is a *reinsurer*, having back-up or flexible *reinsurance* which covers the gap in coverage left by the *reinsurer's* default, for example 'top and drop' *reinsurance*.
- 2.1.18 R For the purposes of *INSPRU* 2.1.8R and of determining *counterparty* exposure and asset exposure in accordance with *INSPRU* 2.1.9R and *reinsurance* exposure in accordance with *INSPRU* 2.1.25R, a *firm* must not rely upon preferential access to assets unless it has taken into account appropriate professional advice as to its effectiveness.
- 2.1.19 G In particular, a *firm* should consider whether any preferential access to a *counterparty's* assets would be effective even if the *counterparty* were wound up by a court or other legal process or it were to be subject to any other insolvency process. A *firm* should also consider, where it is relying upon a right against a third party, whether, in the circumstances of the *counterparty's* default, the creditworthiness of that third party might be impaired.

Large exposure limits

- 2.1.20 R
- (1) A *firm* must take reasonable steps to limit its *counterparty* exposure or asset exposure to:
 - (a) a single *counterparty*;
 - (b) each of the *counterparties* within a group of closely related counterparties; and
 - (c) an asset or class of identical assets;to a level where, if a total default were to occur, the *firm* would not become unable to meet its liabilities as they fall due.
 - (2) In (1), a total default occurs where:
 - (a) the single *counterparty* or all of the *counterparties* within the group of closely related *counterparties* fail to meet its or their obligations and simultaneously any securities issued or guaranteed by it or any of them become worthless; or
 - (b) the asset becomes worthless or all of the assets within the identical class become worthless at the same time.
 - (3) (1) does not apply to:

- (a) a *reinsurance* exposure; or
- (b) a *counterparty* exposure or asset exposure to an *approved credit institution*.

2.1.21 G In assessing its exposure to a *counterparty* or group of closely related *counterparties*, a *firm* should consider exposures from different sources including *deposits*, loans, *securities* and *derivatives*.

Market risk and *counterparty* limits

- 2.1.22 R
- (1) A *firm* must calculate the amount of the deduction from total capital required by stage L in the *capital resources table* in respect of assets in excess of *market risk* and *counterparty* limits as the aggregate amount by which its *counterparty* exposures and asset exposures exceed the relevant limits set out in (3).
 - (2) Except where the contrary is expressly stated in *INSPRU*, whenever:
 - (a) a *rule* in *INSPRU* refers to assets of a *firm*, or of any part of a firm, or of any fund or part of a fund within a *firm*, which are assets of a kind referred to in any of the limits in (3); and
 - (b) the *firm's counterparty* exposure (or aggregate exposure arising from the *counterparty* exposures to each member of a group of closely related persons) or asset exposure in respect of those assets exceeds any of the limits in (3);the *firm* must deduct from the measure of the value of those assets (as determined in accordance with *GENPRU* 1.3) the amount by which that exposure exceeds the relevant limit in (3), or that portion of the deduction that relates to the part of the *firm* or fund or part of a fund in question.
 - (3) The limits referred to in (1) and (2) are the following, expressed as a percentage of the *firm's* business amount:
 - (a) for a *counterparty* exposure to an individual, unincorporated body of individuals or the aggregate exposure arising from the *counterparty* exposures to each member of a group of closely related individuals or unincorporated bodies of individuals:
 - (i) ¼% for that part of the exposure that arises from *unsecured debt*;
 - (ii) 1% for the whole exposure (after deduction of the excess arising from the limit in (a)(i));
 - (b) for a *counterparty* exposure to an *approved counterparty* or the aggregate exposure arising from the *counterparty* exposures to each member of a group of closely related approved counterparties:
 - (i) 5% for that part of the exposure not arising from short term *deposits* made with an *approved credit institution*; this limit is increased to 10% if the total of exposures which are greater than 5% arising from applying a 10% limit does not exceed 40%;
 - (ii) 20% or £2 million if larger for the whole exposure (after deduction of the excess arising from the limit in (b)(i));
 - (c) for a *counterparty* exposure to a *person*, or the aggregate exposure

arising from the *counterparty* exposures to each member of a group of closely related *persons*, who do not fall into the categories of *counterparty* to whom (a) and (b) apply:

(i) 1% for that part of the exposure arising from *unsecured debt*; this limit is increased to 2.5% in the case of an exposure to a *regulated institution*;

(ii) 1% for that part of the exposure arising from *shares* and other variable yield participations, bonds, *debt securities* and other *money market instruments* and capital market instruments from the same *counterparty* that are not dealt in on a *regulated market*, or any beneficial interest in a *collective investment scheme* which is not a *UCITS scheme*, a *non-UCITS retail scheme* or a recognised scheme; the limit for that part of the exposure arising from *debt securities* (other than hybrid securities) issued by the same *regulated institution* is increased to 5%;

(iii) 5% for the whole exposure (after deduction of the excesses arising from the limits in (c)(i) and (ii));

(d) 5% for the aggregate of all *counterparty* exposures that fall within (c)(i) whether or not they arise from *persons* who are closely related, but excluding amounts that are in excess of the limit in (c)(i);

(e) 10% for the aggregate of all *counterparty* exposures that fall within (c)(ii) whether or not they arise from *persons* who are closely related, but excluding amounts that are in excess of the limit in (c)(ii);

(f) 5% for the aggregate of all *counterparty* exposures arising from unsecured loans, other than those falling within (3)(b);

(g) 3% for the asset exposure arising from all cash in hand;

(h) 10% for the asset exposure (including an exposure arising from a reversionary interest) arising from any one piece of land or building, or a number of pieces of land or buildings close enough to each other to be considered effectively as one investment.

(4) In (3) a *firm's* business amount means the sum of:

(a) the *firm's* total gross *technical provisions*;

(b) the amount of its other liabilities (except those included in the calculation of capital resources in accordance with the *capital resources table*); and

(c) such amount as the *firm* may select not exceeding, in the case of a *firm* which is not a *participating insurance undertaking*, the amount of the *firm's* total capital after deductions as calculated at stage M of the *capital resources table* or, in the case of a *firm* which is a *participating insurance undertaking*, the amount calculated in accordance with (5A) or, in either case, if higher:

(i) in the case of a *firm* carrying on *general insurance business*, the amount of its *general insurance capital requirement*; and

(ii) in the case of a *firm* carrying on *long-term insurance business*, the amount of its *long-term insurance capital requirement* and the amount of its *resilience capital requirement*.

(5) For the purpose of (4)(a), a *firm's* total gross *technical provisions*

exclude *technical provisions* in respect of *index-linked liabilities* or *property-linked liabilities*, except that where the *linked long-term contract of insurance* in question includes a guarantee of investment performance or some other guaranteed benefit, the total gross *technical provisions* include the *technical provisions* in respect of that guaranteed element.

(5A) For the purpose of (4)(c), a *firm* which is a *participating insurance undertaking* must calculate the amount of the *firm's group capital resources* less the difference between:

- (a) the *firm's group capital resources requirement*; and
- (b) the *firm's capital resources requirement*.

(5B) In (3)(b)(i) short term *deposit* means a *deposit* which may be withdrawn at the discretion of the lender without penalty or loss of accrued interest by giving notice of withdrawal of one month or less.

(6) In (3)(c)(ii) hybrid security means a *debt security*, other than an *approved security*, the terms of which provide, or have the effect that, the holder does not, or would not, have an unconditional entitlement to payment of interest and repayment of capital in full within 75 years of the date on which the *security* is being valued.

2.1.22A R *INSPRU* 2.1.22R does not apply to a *pure reinsurer*.

Large exposure calculation for reinsurance exposures

2.1.23 R A *firm* must notify the *FSA* in accordance with *SUP* 15.7 as soon as it first becomes aware that:

- (1) a *reinsurance* exposure to a *reinsurer* or group of closely related *reinsurers* is reasonably likely to exceed 100% of its *capital resources*; or
- (2) if (1) does not apply, that it has exceeded this limit.

2.1.24 R Upon notification under *INSPRU* 2.1.23R, a *firm* must:

- (1) demonstrate that prudent provision has been made for the *reinsurance* exposure in excess of the 100% limit, or explain why in the opinion of the *firm* no provision is required; and
- (2) explain how the *reinsurance* exposure is being safely managed.

2.1.25 R (1) For the purposes of *INSPRU* 2.1, a *reinsurance* exposure is the amount of loss which a *firm* would suffer if a *reinsurer* or group of closely related *reinsurers* were to fail to meet its or their obligations under contracts of *reinsurance* reinsuring any of the *firm's* contracts of insurance.

(2) For the purposes of (1), the amount of loss is the amount, if any, by which the *firm's* capital resources (as calculated in accordance with the *capital resources table* but without making any deduction for assets in excess of *market risk* and *counterparty* limits) would decrease as a result of the *reinsurer* or group of closely related *reinsurers* failing to meet its or their obligations under the contracts of *reinsurance*.

(3) If a *firm* elects under *INSPRU* 2.1.35R to make a deduction in respect of

collateral, the *firm* must deduct from the amount of loss determined in accordance with (2) so much of the value of that *collateral* as:

(a) would be realised by the *firm* were it to exercise its rights in relation to the *collateral*; and

(b) does not exceed any of the relevant limits in *INSPRU* 2.1.22R(3).

- 2.1.26 R A *firm* must, in determining its *reinsurance* exposures for the purposes of *INSPRU* 2.1, aggregate any *reinsurance* exposure where the identity of the *reinsurer* is not known by the *firm* with the highest *reinsurance* exposure where it does know the identity of the *reinsurer*.
- 2.1.27 G *INSPRU* 2.1.8R provides that, taking into account relevant risks, a *firm* must restrict to prudent levels, and adequately diversify, its exposure to *counterparties*.
- 2.1.28 E (1) In each *financial year*, a *firm* should restrict the *gross earned premiums* which it pays to a *reinsurer* or group of closely related *reinsurers* to the higher of:
- (a) 20% of the *firm's* projected *gross earned premiums* for that *financial year*; or
- (b) £4 million.
- (2) Compliance with this provision may be relied upon as tending to establish compliance with *INSPRU* 2.1.8R.
- 2.1.29 R A *firm* must notify the *FSA* immediately in accordance with *SUP* 15.7 if it has exceeded, or anticipates exceeding, the limit expressed in *INSPRU* 2.1.28E.
- 2.1.30 R Upon notification under *INSPRU* 2.1.29 R, a *firm* must explain to the *FSA* how, despite the excess *reinsurance* concentration, the credit risk is being safely managed.
- 2.1.31 G For the purposes of *INSPRU* 2.1.24R and *INSPRU* 2.1.30R, a *firm's* explanation of how a *reinsurance* exposure is being safely managed should also describe the *reinsurance* market in which the exposure has occurred, and the nature of the *reinsurance* contract. If appropriate, the *firm* should also provide a detailed plan and timetable explaining how the excess exposure will be reduced to an acceptable level. The explanation should be approved by a person at the *firm* of appropriate seniority.
- 2.1.32 G Where a *firm* can demonstrate that the arrangement does not give rise to unacceptable levels of credit risk it is unlikely that further action will be required.
- Exposures excluded from limits
- 2.1.33 R In *INSPRU* 2.1.20R and *INSPRU* 2.1.22R, references to a *counterparty* exposure or an asset exposure do not include such an exposure arising from:

- (1) [deleted]
- (2) *premium* debts;
- (3) advances secured on, and not exceeding the *surrender value* of, *long-term insurance contracts* of the *firm*;
- (4) rights of salvage or subrogation;
- (5) *deferred acquisition costs*;
- (6) assets held to cover *index-linked liabilities* or *property-linked liabilities*, except that where the *linked long-term contract of insurance* in question includes a guarantee of investment performance or some other guaranteed benefit, *INSPRU 2.1.20R* and *INSPRU 2.1.22R* will nevertheless apply to assets held to cover that guaranteed element;
- (7) *moneys* due from, or guaranteed by, a *Zone A country*;
- (8) an *approved security*;
- (9) a holding in a *collective investment scheme* falling within the *UCITS Directive*.

- 2.1.34 R In *INSPRU 2.1.22 R* references to a *counterparty* exposure or an asset exposure do not include such an exposure arising from *reinsurance* debts and the *reinsurer's* share of *technical provisions*.
- 2.1.35 R If:
- (1) a *firm* has a *counterparty* exposure, an asset exposure or a *reinsurance* exposure in respect of which it has rights over *collateral* (except where that *collateral* is a letter of credit - see *INSPRU 2.1.36R* and *INSPRU 2.1.37R*); and
 - (2) the assets constituting that *collateral* would, if owned by the *firm*, be admissible assets;
- the *firm* may, in determining the amount of that exposure, deduct the value of that *collateral* in accordance with *INSPRU 2.1.9R(5)* or, in the case of a *reinsurance* exposure, *INSPRU 2.1.25R(3)*.
- 2.1.36 R If a *firm* has a *counterparty* exposure, asset exposure or reinsurance exposure the whole or any part of which is:
- (1) guaranteed by a *credit institution* or an *investment firm* subject in either case to the *Capital Adequacy Directive* or supervision by a third country (non-EEA) supervisory authority with a Capital Adequacy Directive-equivalent regime; or
 - (2) adequately mitigated by a *credit derivative*;
- the *firm* may, for the purposes of *INSPRU 2.1.20R*, *INSPRU 2.1.22R* and *INSPRU 2.1.23R*, treat that exposure, or that part of the exposure which is so guaranteed or mitigated, as an exposure to the guarantor or derivative *counterparty*, rather than to the original *counterparty*, asset or *reinsurer*.
- 2.1.37 R For the purposes of *INSPRU 2.1.36R*, references to an exposure being guaranteed include an exposure secured by a letter of credit, but to fall

within *INSPRU* 2.1.36 R the guarantee or letter of credit must be direct, explicit, unconditional and irrevocable.

2.1.38 G The portion of exposure which is guaranteed or mitigated by a credit *derivative* is itself, as an exposure to the guarantor or derivative *counterparty*, subject to the limits in *INSPRU* 2.1.20R and *INSPRU* 2.1.22R.

2.1.39 R For the purposes of *INSPRU* 2.1.20R and *INSPRU* 2.1.22R, a *UCITS scheme*, a *non-UCITS retail scheme*, a *recognised scheme* or any other *collective investment scheme* that invests only in *admissible assets* (including any *derivatives* or quasi-derivatives held by the scheme) is to be treated as closely related to the *issuer* of the *units* in that scheme.

Meaning of closely related

2.1.40 R For the purposes of *INSPRU* 2.1, a group of *persons* is closely related if it consists solely of two or more natural or legal persons who, unless it is shown otherwise, constitute a single risk because as between any two of them one or other of the following relationships apply:

(1) one of them, directly or indirectly, has control, as defined in *INSPRU* 2.1.41R, over the other or they are both controlled by the same third party; or

(2) there is no relationship of control as defined in *INSPRU* 2.1.41R but they are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other would be likely to encounter repayment difficulties.

2.1.41 R For the purposes of *INSPRU* 2.1.40R, control means the relationship between a *parent undertaking* and a *subsidiary undertaking*, as defined in Article 1 of the Consolidated Accounts Directive (83/349/EEC), or a similar relationship between any natural or legal person and an *undertaking*.

Application of *INSPRU* 2.1 to Lloyd's

2.1.42 R Subject to *INSPRU* 2.1.43R, *INSPRU* 2.1 applies to *managing agents* and to the *Society* in accordance with:

(1) for *managing agents*, *INSPRU* 8.1.4R; and

(2) for the *Society*, *INSPRU* 8.1.2R.

2.1.43 R *INSPRU* 2.1.23R to *INSPRU* 2.1.32G (Large exposure calculation for reinsurance exposures) do not apply to the *Society*.

Overall limitation of credit risk

2.1.44 G For Lloyd's, *counterparty* exposure is:

(1) for *managing agents*, the amount by which the net assets managed by or under the direction of a *managing agent* in respect of a *syndicate* together with any relevant *balancing amount* would decrease if the *counterparty* were to default;

(2) for the *Society*, the amount by which its net assets (which include those

of its subsidiary undertakings) would decrease if the *counterparty* were to default; and

(3) for the *Society's* management of each *member's funds at Lloyd's*, the amount by which the *member's* net assets would decrease if the *counterparty* were to default.

Large exposures

- 2.1.45 R For the purposes of *INSPRU* 2.1.20R (Large exposure limits: counterparty exposure and asset exposure), the *Society* may determine the exposure to any letters of credit, guarantees or *members' life assurance policies* as an exposure of the *members* in aggregate.
- 2.1.46 R For the purposes of *INSPRU* 2.1.22R (Large exposure limits: market risk and counterparty limits), the *Society* must calculate the amount of and deduct from *capital resources*:
- (1) an exposure (expressed as a percentage of the relevant *member's capital resources* held as *funds at Lloyd's*), other than to the assets identified in *INSPRU* 2.1.46R(2)(a) to *INSPRU* 2.1.46R(2)(c), of a *member's capital resources* held as *funds at Lloyd's* to a *counterparty*, in excess of the limits in *INSPRU* 2.1.22R;
 - (2) an exposure in excess of 20% (expressed as a percentage of the aggregate of *capital resources* held as *funds at Lloyd's*) of the aggregate of *capital resources* held as *funds at Lloyd's* to a single issuer of:
 - (a) letters of credit;
 - (b) guarantees; or
 - (c) *members' life assurance policies*;
 - (3) an exposure of its own to a *counterparty*, in excess of the limits in *INSPRU* 2.1.22R, expressed as a percentage of the *Society's* own assets.
- 2.1.47 R For the purposes of *INSPRU* 2.1.22R (Large exposure limits: market risk and counterparty limits), *managing agents* must calculate the amount of and deduct from *capital resources* an exposure (expressed as a percentage of the *admissible assets* held in respect of the relevant *syndicate*) of *admissible assets* held in respect of a *syndicate* to a *counterparty* in excess of the limits in *INSPRU* 2.1.22R.
- 2.1.48 R If the exposures of *capital resources* held as *funds at Lloyd's* for *members* in the aggregate do not exceed the limits in *INSPRU* 2.1.22R(3)(c), then, for each *individual member*, that limit may be replaced by 10%.

Exposures excluded from the large exposure limits

- 2.1.49 R For *managing agents*, in *INSPRU* 2.1.33R and *INSPRU* 2.1.35R, references to an exposure do not include exposure arising from *balancing amounts*.

2.2 Asset-related Capital Requirement

Application

- 2.2.1 R *INSPRU 2.2* applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) a *Swiss general insurer*; or
 - (3) an *EEA-deposit insurer*; or
 - (4) an *incoming EEA firm*; or
 - (5) an *incoming Treaty firm*.
- 2.2.2 G The scope of application of *INSPRU 2.2* is not restricted to *firms* that are subject to the relevant EC directives.
- 2.2.3 R *INSPRU 2.2* applies to a *firm* only in relation to its *general insurance business*.
- 2.2.4 G The adequacy of a *firm's* financial resources needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise.
- 2.2.5 G The requirements in *INSPRU 2.2* apply to a *firm* on a solo basis.

Purpose

- 2.2.6 G *GENPRU 2.1.13R* requires that a *firm* must maintain at all times *capital resources* equal to or in excess of its *capital resources requirement*. *GENPRU 2.1.17R* provides that for a *firm* carrying on *general insurance business* the *firm's capital resources requirement* is the *minimum capital requirement*.
- 2.2.7 G The *FSA* will use the *enhanced capital requirement* as the benchmark for *individual capital guidance* for a *firm* carrying on *general insurance business*, other than a *non-directive insurer*. The *enhanced capital requirement* is the sum of the *asset-related capital requirement* and the *insurance-related capital requirement* less the *firm's* equalisation provisions. This section sets out *rules and guidance* relating to the *asset-related capital requirement*. *Rules and guidance* relating to the *insurance-related capital requirement* are set out in *INSPRU 1.1*.
- 2.2.8 G The *asset-related capital requirement* is a measure of the capital that a *firm* should hold against the risk of loss if another party fails to perform its financial obligations to the *firm* or from adverse movements in the value of

assets.

- 2.2.9 G The *asset-related capital requirement* is calculated by applying capital charge factors, expressed as a percentage, to different categories of a *firm's* assets. A *firm* should refer to *GENPRU* 1.3 which sets out how a *firm* must recognise and value assets and liabilities.

Calculation of asset-related capital requirement

- 2.2.10 R A *firm* must calculate its *asset-related capital requirement* in accordance with *INSPRU* 2.2.11R.

- 2.2.11 R (1) The value of each of the *firm's* assets of a kind listed in the table in *INSPRU* 2.2.16R must be multiplied by the corresponding capital charge factor.
- (2) If any amount which is to be multiplied by a capital charge factor is a negative amount, that amount shall be treated as zero.
- (3) No account shall be taken of:
- (a) the value of any asset which is not an *admissible asset*;
 - (b) the amount (if any) by which the value of any assets exceeds the limits on exposures to a type of asset or *counterparty* as set out in *INSPRU* 2.1.22R.
- (4) Where a *firm* has entered into a *derivative*, then for the purposes of applying the appropriate capital charge factor as set out in *INSPRU* 2.2.16R, it must treat the value of the *derivative* and the value of the asset associated with the *derivative* as a single asset of a type and value which most closely reflects the economic risk to the *firm* of the combined rights and obligations associated with the *derivative* and the asset associated with the *derivative*.
- (5) The amounts resulting from multiplying each of the asset items referred to in (1) by the corresponding capital charge factor must be aggregated.
- (6) The *asset-related capital requirement* is the amount resulting from the aggregation in (5).

- 2.2.12 G *Options*: some *derivatives* may allow a *firm* an *option* whether to buy or sell a particular asset. If an *option* has a positive market value (that is, in-the-money) it is likely that the *firm* will exercise the *option* in the future and the current value of the *derivative* and associated asset will generally acquire new characteristics and volatility (a 'synthetic asset'). For instance, an *option* to acquire *shares* at a price below their current market value is likely to be exercised and the appropriate *asset-related capital requirement* calculation would be to combine the cash cost of acquiring the number of *shares* covered by the *option* with the value of the *derivative* and apply a factor of 16% to that combined value. If an *option* has no market value (that is, out-of-the-money) then it is unlikely that a *firm* would exercise the *option* in which case the appropriate *asset-related capital requirement* charge would be zero in respect of the *derivative*, and the corresponding capital charge

contained in Table *INSPRU* 2.2.16R in relation to the asset associated with the *derivative*.

2.2.13 G *Futures* and swaps: *futures* or swaps may not allow the *firm* such an option in which case the appropriate asset-related capital charge factor to apply is the one corresponding to the asset that would be held on fulfilment of the contract and the value to which this should be applied would be the value of the asset held after the contract is fulfilled.

2.2.14 R (1) The asset-related capital charge factor for money market funds set out in the Table *INSPRU* 2.2.16R must be applied to exposures to funds that meet the definition in (2).

(2) In *INSPRU* 2.2 an investment in a money market fund means a participation in a *collective investment scheme* which satisfies the following conditions:

(a) the primary investment objective of the *collective investment scheme* is:

(i) to maintain the net asset value of the *collective investment scheme* constant at par (net of earnings); or

(ii) to maintain the net asset value of the *collective investment scheme* at the value of investors' initial capital plus earnings;

(b) in order to pursue its primary investment objective the *collective investment scheme* invests exclusively in cash or in short term instruments with characteristics similar to cash or both; and

(c) the *collective investment scheme* undertakes to abide by the following conditions:

(i) not to allow the assets held in the *collective investment scheme* to exceed a weighted average maturity of 60 days;

(ii) not to invest in equity or securities with characteristics similar to equity; and

(iii) on a basis of marking-to-market at least weekly, not to permit the value of each *collective investment scheme* unit at any point in time to move by more than 50 basis points (0.5% of total *collective investment scheme* value).

2.2.15 R In *INSPRU* 2.2.16R an insurance dependant means a *regulated related undertaking* which is an *insurance undertaking* or an *insurance holding company*.

2.2.16 R Table: Asset-related capital charge factors

Asset item	ECR asset-related capital charge factor
------------	-----------------------------------------

Investments	Land and Buildings		7.5%	
	<i>Investments in group undertakings and participating interests</i>	<i>Shares in group undertakings excluding participating interests</i>	Insurance dependants	0%
			Other	7.5%
		<i>Debt securities issued by, and loans to, group undertakings</i>		3.5%
		Participating interests		7.5%
		<i>Debt securities issued by, and loans to, undertakings in which the insurer has a participating interest</i>		3.5%
	Other financial investments	<i>Shares and other variable-yield securities and units in unit trusts</i>		16.0%
		Money market funds		0%
		<i>Debt securities and other fixed income securities</i>	<i>Approved securities</i>	3.5%
			Other	3.5%
		Participation in investment pools		16.0%
		Loans secured by mortgages		2.5%
		Other loans		2.5%
<i>Deposits with approved credit institutions and approved financial institutions</i>		0%		
Other		7.5%		
	Deposits with ceding undertakings		3.5%	
<i>Reinsurers' share of technical provisions</i>	Provision for <i>unearned premium</i>		2.5%	
	<i>Claims outstanding</i>		2.5%	
	Other		2.5%	
Debtors	Debtors arising out of direct insurance operations	<i>Policyholders</i>	4.5%	
		Intermediaries	3.5%	
	Debtors arising out of <i>reinsurance</i> operations		2.5%	

	Other debtors	1.5%
	Called up <i>share</i> capital not paid	0%
Other Assets	Tangible assets	7.5%
	Cash at bank and in hand	0%
	Other	0%
Prepayments and accrued income	Accrued interest and rent	0%
	<i>Deferred acquisition costs</i>	0%
	Other prepayments and accrued income	0%

Application of INSPRU 2.2 to Lloyd's

- 2.2.17 R *INSPRU 2.2* applies to *managing agents* and to the *Society* in accordance with:
- (1) for *managing agents*, *INSPRU 8.1.4R*; and
 - (2) for the *Society*, *INSPRU 8.1.2R*
- 2.2.18 R This chapter applies to the *Society* for each *member*, including the capital charge relating to *central assets*, to the extent that those assets are held to support a particular *member*.

3.1 Market risk in insurance

- 3.1.1 R *INSPRU* 3.1 applies to an *insurer*, unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 3.1.2 G *INSPRU* 3.1 applies to *pure reinsurers*, with the exception of *INSPRU* 3.1.53R, *INSPRU* 3.1.57R and *INSPRU* 3.1.58R.
- 3.1.3 R (1) *INSPRU* 3.1 applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
- (2) Where a *firm* carries on both *long-term insurance business* and *general insurance business*, *INSPRU* 3.1 applies separately to each type of business.

Purpose

- 3.1.4 G This section sets out *rules* and *guidance* relating to *market risk*. Under *INSPRU* 1.1.20R and *INSPRU* 1.1.21R, a *firm* is required to hold *admissible assets* of a value sufficient to cover its *technical provisions* and its other *long-term insurance* or *general insurance liabilities*. In addition, *INSPRU* 1.1.34R sets the requirement that a *firm* must hold assets of appropriate amount, currency, term, safety and yield, to ensure that the cash inflows from those assets will be sufficient to meet expected cash outflows from its insurance liabilities as they are due.
- 3.1.5 G *Market risk* is the risk that as a result of market movements a *firm* may be exposed to fluctuations in the value of its assets, the amount of its liabilities, or the income from its assets. Sources of general *market risk* include movements in interest rates, equities, exchange rates and real estate prices. It is important to note that none of these sources of risk is independent of the others. For example, fluctuations in interest rates often have an impact upon equity and currency values and vice versa. Giving due consideration to these correlations is an important aspect of the prudent management of *market risk*.
- 3.1.6 G A *firm* may also be exposed to specific *market risk*, which is the risk that the *market value* of a specific asset, or income from that asset, may fluctuate for reasons that are not dependent on general market movements. The limits in *INSPRU* 2.1.22R cover *market risk* as well as *counterparty* risk.
- 3.1.7 G *INSPRU* 3.1 addresses the impact of *market risk* on *insurance business* in the ways set out below:
- (1) Any *firm* that carries on *long-term insurance business* must comply with

the *resilience capital requirement*. This requires the *firm* to hold capital to cover *market risk*. The *resilience capital requirement* is dealt with in *INSPRU 3.1.9G* to *INSPRU 3.1.26R*.

(2) For a *firm* that carries on *long-term insurance business*, the assets that it must hold must be of a value sufficient to cover the *firm's technical provisions* and other *long-term insurance liabilities*. *INSPRU 1.2* contains *rules and guidance* as to the methods and assumptions to be used in calculating the *mathematical reserves*. One of these assumptions is the assumed rate of interest to be used in calculating the present value of future payments by or to a *firm*. *INSPRU 3.1.28R* to *INSPRU 3.1.48G* set out the methodology to be used in relation to *long-term insurance liabilities*.

(3) *Firms* carrying on either *long-term insurance business* or *general insurance business* are also subject to currency risk. That is, the risk that fluctuations in exchange rates may impact adversely on a *firm*. *INSPRU 3.1.49G* to *INSPRU 3.1.56G* set out the requirements a *firm* must meet so as to cover this risk.

(4) For a *firm* carrying on *general insurance business*, the *Enhanced Capital Requirement* already captures some elements of *market risk*. In addition, the requirements as to the assumed rate of interest used in calculating the present value of *general insurance liabilities* are contained in the *insurance accounts rules*, and these requirements are outlined in *INSPRU 3.1.27G*.

(5) *Firms* carrying on *long-term insurance business* that have *property-linked liabilities* or *index-linked liabilities* must cover these liabilities by holding appropriate assets. *INSPRU 3.1.57R* and *INSPRU 3.1.58R* set out these cover requirements.

(6) The *Reinsurance Directive* applies to *pure reinsurers* "prudent person" investment principles in relation to the investment of their assets. *INSPRU 3.1.61AR* sets out these principles.

Definitions

3.1.8 R For the purposes of *INSPRU 3.1*:

(1) real estate means an interest in land, buildings or other immovable property;

(2) a significant territory is any country or territory in which more than 2.5% of a *firm's long-term insurance assets* (by *market value*), excluding assets held to cover *index-linked liabilities* or *property-linked liabilities* (see *INSPRU 3.1.57R* and *INSPRU 3.1.58R*), are invested;

(3) the long term gilt yield means the annualised equivalent of the fifteen year gilt yield for the *United Kingdom* Government fixed-interest *securities* index jointly compiled by the Financial Times, the Institute of Actuaries and the Faculty of Actuaries; and

(4) the member states of the European Union which have adopted the Euro as the official currency may be treated as a single territory.

Resilience capital requirement (applicable to long-term insurance business only)

- 3.1.9 G The *resilience capital requirement* forms part of the calculation of the *capital resources requirement* for all *firms* carrying on *long-term insurance business*. *GENPRU 2.1.18R* to *GENPRU 2.1.23R* set out the different elements of this calculation. These include the *Minimum Capital Requirement* and the *Enhanced Capital Requirement*. The *resilience capital requirement* forms part of both of these requirements (see *GENPRU 2.1.25R(2)* and *GENPRU 2.1.38R(2)*).
- 3.1.10 R (1) A *firm* that carries on *long-term insurance business* must calculate a *resilience capital requirement* in accordance with (2) to (5).
- (2) The *firm* must identify relevant assets (see *INSPRU 3.1.10AR*) which, after applying the scenarios in (3), have a value that is equal to the *firm's long-term insurance liabilities* under those scenarios.
- (3) For the purpose of (2), the scenarios are:
- (a) for those relevant assets invested in the *United Kingdom*, the *market risk* scenario set out in *INSPRU 3.1.16R*;
- (b) subject to (c) and to *INSPRU 3.1.26R*, for those relevant assets invested outside of the *United Kingdom*, the *market risk* scenario set out in *INSPRU 3.1.23R*; and
- (c) where the relevant assets in (b) are:
- (i) held to cover *index-linked liabilities* or *property-linked liabilities*; or
- (ii) not invested in a significant territory outside the *United Kingdom*; the *market risk* scenario set out in *INSPRU 3.1.16R*.
- (4) The *resilience capital requirement* is the result of deducting B from A, where:
- (a) A is the value of the relevant assets which will produce the result described in (2); and
- (b) B is the *firm's long-term insurance liabilities*.
- (5) In calculating the value of the *firm's long-term insurance liabilities* under any scenario, a *firm* is not required to adjust the provision made under *GENPRU 1.3.4R* in respect of a *defined benefits pension scheme*.
- 3.1.10A R In *INSPRU 3.1.10R* relevant assets means a range of assets which must be selected by the *firm* from the assets specified in (1) and (2) in the order specified:
- (1) its *long-term insurance assets*; and
- (2) only where the *firm* has selected all the assets within (1), its shareholder assets, other than assets of an amount and kind required:
- (a) to cover its liabilities arising outside its *long-term insurance funds*; or
- (b) to meet any regulatory capital requirements in respect of business

written outside its *long-term insurance funds*.

- 3.1.11 G The purpose of the *resilience capital requirement* is to cover adverse deviation from:
- (1) the value of *long-term insurance liabilities*;
 - (2) the value of assets held to cover *long-term insurance liabilities*; and
 - (3) the value of assets held to cover the resilience capital requirement;
- arising from the effects of *market risk* for equities, real estate and fixed interest securities. Other risks are not explicitly addressed by the *resilience capital requirement*.
- 3.1.12 G The amount of the *resilience capital requirement* calculated by the *firm* will depend on the *firm's* choice of assets held to cover the *resilience capital requirement*. The *resilience capital requirement* is held to cover not only the shortfall between the change in the value of *long-term insurance liabilities* and the change in the value of the assets identified to cover those liabilities, but also the change in the value of the assets identified to cover the *resilience capital requirement* itself.
- 3.1.13 G As part of the assessment of the financial resources a *firm* needs to hold to comply with the *overall financial adequacy rule*, the *general stress and scenario testing rule* requires a *firm* to carry out stress tests and scenario analyses appropriate to the major sources of risk to its ability to meet its liabilities as they fall due identified in accordance with the *overall Pillar 2 rule*. In considering the stress tests and scenario analyses relevant to the major sources of risk in the category of *market risk*, a *firm* should consider the extent to which the *market risk* scenarios set out in *INSPRU 3.1.16R* to *INSPRU 3.1.26R* are appropriate to the nature of its asset portfolio. A *firm* may judge that given the nature of its portfolio, a more severe stress should be adopted. The *firm* may also wish to bring in other asset classes, such as index-linked bonds, which should be stressed on appropriate bases, and to consider the impact of currency mismatching and any *derivative* positions held.
- 3.1.13A G In the *market risk* scenarios set out in *INSPRU 3.1.16R* to *INSPRU 3.1.26R*, a *firm* is required to assess the changed value of its assets and liabilities in the economic conditions of the scenarios set out in *INSPRU 3.1.16R* and *INSPRU 3.1.23R*. A *firm* is required to assess the changed value of each relevant asset (as defined in *INSPRU 3.1.10AR*), notwithstanding any uncertainty about the appropriate valuation basis for that asset. In valuing an asset in the specified scenarios, a *firm* should have regard to the economic substance of the asset, rather than its legal form, and assess its value accordingly. Consider, for example, a convertible bond that is close to its conversion date and where the conversion option has value. The value of the convertible bond in the specified scenarios is likely to be sensitive primarily to equity market scenarios and to a lesser extent to interest rate scenarios. The *firm* should value the asset according to its expected market value in the

economic conditions underlying the specified scenarios.

- 3.1.13B G In determining where particular assets are invested for the purpose of determining which *market risk* scenario should be applied to those assets, or whether a country or territory in which a *firm* has invested part of its *long-term insurance assets* is a significant territory, a *firm* should generally treat:
- (1) a *security* dealt in on a *regulated market* as invested in any country or territory in which a *regulated market* on which the *security* is dealt is situated;
 - (2) a *security* which is not dealt in on a *regulated market* as invested in the country or territory in which the *issuer* has its head office;
 - (3) an asset consisting of a claim against a debtor as invested in any country or territory where it can be enforced by legal action;
 - (4) real estate as invested in the country or territory in which the land, buildings or other immovable property is situated;
 - (5) a tangible asset as invested in the country or territory where it is situated; and
 - (6) a *derivative* or *quasi-derivative* as invested in the country or territory in which the assets to which the *firm* is exposed by reason of having entered into the *derivative* or *quasi-derivative* are situated.

Where, however, the nature of a *firm's* investment is such that the economic risks to which it is principally exposed are risks relating to assets invested in, or the currency of, a different country or territory to that in which are invested the assets directly invested in by the *firm*, then the *firm* should consider whether it would be more reasonable to treat the assets as invested in that other country or territory. For example, if a *firm* has invested in the *securities* of a *collective investment scheme* which are dealt in on a *regulated market* in country A, but the scheme principally invests in real estate situated in country B, the *firm* should consider whether its principal exposure is in fact to the country in which the underlying assets are situated (that is, country B). Another example might be where a *firm* has invested in a bond or other fixed interest *security* that is denominated in the currency of a country or territory other than that in which the *security* would be treated as invested under (1) or (2) above. The *firm* may wish to consider whether that bond or fixed interest *security* should be treated as invested in the country or territory of the currency of denomination.

- 3.1.14 G The *resilience capital requirement* requires *firms* to assume different adverse *market risk* scenarios for equities, real estate and fixed interest securities (see *INSPRU* 3.1.16R and *INSPRU* 3.1.23R) to those required by *INSPRU* 1.3.68R (UK and certain other assets) and *INSPRU* 1.3.73R (non-UK assets) in relation to the calculation of the *risk capital margin* for a *with-profits fund* by a *realistic basis life firm* calculating its *with-profits insurance capital component*.

- 3.1.15 G Where the *resilience capital requirement* is affected by the presence of *derivative* or *quasi-derivative* instruments, the *firm* will need to consider

whether the protection afforded is of suitable length or security. The *firm* should include the exposure to *counterparties* in the credit considerations of *INSPRU* 3.1.41R both before and after calculating the resilience capital requirement. If the *derivative* protection is very short term the *firm* should consider whether issues arise under *INSPRU* 1.2.26R (Avoidance of future valuation strain); when a *derivative* expires the financial position of the *firm* may deteriorate as a result of, for example, falls in asset values. Unless the *firm* holds a further reserve, the *firm* is likely to need to have either undertaken a fresh protection strategy or carried through the alternative to the *derivative* protection (such as selling equities in place of a put *option*) if the existing protection expires before the financial year end. If the existing *derivative* protection continues beyond the time of financial year end the *firm* must have sufficient confidence that it can renew its *derivative* protection or an alternative to achieve the same effect.

Market risk scenario for assets invested in the United Kingdom

- 3.1.16 R In *INSPRU* 3.1.10R(3)(a), the *market risk* scenario for assets invested in the *United Kingdom* and for assets (including assets invested outside the *United Kingdom*) held to cover *index-linked liabilities* or *property-linked liabilities* which a *firm* must assume is:
- (1) a fall in the *market value* of equities of at least 10% or, if greater, the lower of:
 - (a) a percentage fall in the *market value* of equities which would produce an earnings yield on the FTSE Actuaries All Share Index equal to 4/3 rds of the long-term gilt yield; and
 - (b) a fall in the *market value* of equities of 25% less the *equity market adjustment ratio* (see *INSPRU* 3.1.19R);
 - (2) a fall in real estate values of 20% less the *real estate market adjustment ratio* for an appropriate real estate index (see *INSPRU* 3.1.21R);
 - (3)
 - (a) the more onerous of either a fall or rise in yields on all fixed interest securities by the percentage point amount determined in (b);
 - (b) for the purpose of (a), the percentage point amount is equal to 20% of the long-term gilt yield.
- 3.1.17 R For the purposes of *INSPRU* 3.1.16R(1) and *INSPRU* 3.1.16R(2), a *firm* must:
- (1) assume that earnings for equities and rack rents for real estate fall by 10%, but dividends for equities remain unaltered (see *INSPRU* 3.1.36R to *INSPRU* 3.1.38R); and
 - (2) model a fall in equity and real estate markets as if the fall occurred instantaneously.
- 3.1.18 G An example of *INSPRU* 3.1.16R(3) is that, where the long-term gilt yield is currently 6%, a *firm* would assume an increase of 20% in that yield, that is,

a change of 1.2 percentage points. For the purpose of the scenario in *INSPRU* 3.1.16R(3)(a), the *firm* would assume a fall or rise of 1.2 percentage points in yields on all fixed interest securities.

Equity market adjustment ratio

- 3.1.19 R The equity market adjustment ratio referred to in *INSPRU* 3.1.16R(1)(b) is:
- (1) if the ratio calculated in (a) and (b) lies between 75% and 100%, the result of 100% less the ratio (expressed as a percentage) of:
 - (a) the current value of the FTSE Actuaries All Share Index; to
 - (b) the average value of the FTSE Actuaries All Share Index over the preceding 90 calendar days;
 - (2) 0%, if the ratio calculated in (1)(a) and (b) is more than 100%; and
 - (3) 25%, if the ratio calculated in (1)(a) and (b) is less than 75%.
- 3.1.20 R In *INSPRU* 3.1.19R, the average value of the FTSE Actuaries All Share Index over any period of 90 calendar days means the arithmetic mean based on levels at the close of business on each of the days in that period on which the London Stock Exchange was open for trading.

Real estate market adjustment ratio

- 3.1.21 R The real estate market adjustment ratio for a real estate index referred to in *INSPRU* 3.1.16R(2) and *INSPRU* 3.1.23R(2) is:
- (1) if the ratio calculated in (a) and (b) lies between 90% and 100%, the result of 100% less the ratio (expressed as a percentage) of:
 - (a) the current value of the real estate index; to
 - (b) the average value of that real estate index over the three preceding *financial years*;
 - (2) 0%, if the ratio calculated in (1)(a) and (b) is more than 100%; and
 - (3) 10%, if the ratio calculated in (1)(a) and (b) is less than 90%.
- 3.1.22 G For the purpose of calculating the *real estate market adjustment ratio* in *INSPRU* 3.1.21R, a *firm* should select an appropriate index of real estate values such that:
- (1) the constituents of the index are reasonably representative of the nature and territory of the real estate included in the range of assets identified in accordance with *INSPRU* 3.1.10R; and
 - (2) the frequency of, and historical data relating to, published values of the index are sufficient to enable an average value(s) of the index to be calculated over the three preceding *financial years*.

Market risk scenario for assets invested outside the United Kingdom

- 3.1.23 R In *INSPRU* 3.1.10R(3)(b), subject to *INSPRU* 3.1.26R, the *market risk* scenario for assets invested outside the *United Kingdom* (other than assets held to cover *index-linked liabilities* or *property-linked liabilities*) which a *firm* must assume is, for each significant territory in which assets are invested outside the *United Kingdom*:
- (1) an appropriate fall in the *market value* of equities invested in that territory, which is at least equal to the percentage fall determined in *INSPRU* 3.1.16R;
 - (2) a fall in real estate values in that territory of 20% less the real estate market adjustment ratio for an appropriate real estate index for that territory (see *INSPRU* 3.1.21R); and
 - (3)
 - (a) the more onerous of either a fall or a rise in yields on all fixed interest securities by the percentage point amount determined in (b);
 - (b) for the purpose of (a), the percentage point amount is equal to 20% of the nearest equivalent (in respect of the method of calculation) to the long term gilt yield.
- 3.1.24 R For the purposes of *INSPRU* 3.1.23R(1), an appropriate fall in the *market value* of equities invested in a significant territory must be determined having regard to:
- (1) an appropriate equity market index for that territory; and
 - (2) the historical volatility of the equity market index selected in (1).
- 3.1.25 G For the purpose of *INSPRU* 3.1.24R(1), an appropriate equity market index for a territory is such that:
- (1) the constituents of the index are reasonably representative of the nature of the equities held in that territory which are included in the range of assets identified in accordance with *INSPRU* 3.1.10R; and
 - (2) the frequency of, and historical data relating to, published values of the index are sufficient to enable an average value(s) and historical volatility of the index to be calculated over at least the three preceding *financial years*.
- 3.1.26 R Where the assets of a *firm* invested in a significant territory of a kind referred to in *INSPRU* 3.1.23R(1), *INSPRU* 3.1.23R(2) or *INSPRU* 3.1.23R(3)(a) represent less than 0.5% of the *firm's long-term insurance assets* (excluding assets held to cover *index-linked liabilities* or *property-linked liabilities*), measured by *market value*, the *firm* may assume for those assets the *market risk* scenario for assets of that kind invested in the *United Kingdom* set out in *INSPRU* 3.1.16R instead of the *market risk* scenario set out in *INSPRU* 3.1.23R.

Interest rates: general insurance liabilities

- 3.1.27 G The rates of interest to be used for the calculation of the present values of *general insurance liabilities* are specified in the *insurance accounts rules*, except where benefits resulting from a *claim* must be paid in the form of an annuity, in which case the rules require calculation by recognised actuarial methods. In the case of *claims* not payable in the form of an annuity, the *insurance accounts rules* state that the rate of interest to be used must not exceed the lowest of:
- (1) a rate prudently estimated by the *firm* to be earned by assets of the *firm* that are appropriate in magnitude and nature to cover the provisions for *claims* being discounted, during the period necessary for the payment of such *claims*;
 - (2) a rate justified by the performance of such assets over the preceding five years; and
 - (3) a rate justified by the performance of such assets during the year preceding the balance sheet date.

Interest rates: long-term insurance liabilities

- 3.1.28 R The rates of interest required by *INSPRU* 1.2.33R to be used by a *firm* for the calculation of the present value of a *long-term insurance liability* must not exceed 97.5% of the risk-adjusted yield (see *INSPRU* 3.1.30R to *INSPRU* 3.1.48G) that is expected to be achieved on:
- (1) the assets allocated to cover that liability;
 - (2) the reinvestment of sums expected to be received from those assets (see *INSPRU* 3.1.45R to *INSPRU* 3.1.48G); and
 - (3) the investment of future *premium* receipts (see *INSPRU* 3.1.45R to *INSPRU* 3.1.48G).
- 3.1.29 R For the purposes of *INSPRU* 3.1.28R, the rates of interest assumed must allow appropriately for the rates of tax that apply to the investment return on policyholder assets. The rates of tax assumed must be such that the *firm's* total implied liability for tax arising from the allocation of assets to liabilities is not less than the *firm's* actual expected liability for tax for the period in respect of which tax is to be assessed.
- 3.1.29A G *INSPRU* 3.1.28R applies only to *long-term insurance contracts* that are treated as liabilities. Where a *firm* treats a *long-term insurance contract* as an asset (see *INSPRU* 1.2.24R), in calculating the present value of future net cash flows under that contract, it must include margins for adverse variation in accordance with *INSPRU* 1.2.13R. These margins should include margins for *market risk* and, where relevant, credit risk. For those margins to be sufficiently prudent as required by *INSPRU* 1.2.13R, the rate of interest used may need to be higher than that which would apply under *INSPRU* 3.1.28R.

Risk-adjusted yield

- 3.1.30 R A risk-adjusted yield on an asset must be calculated by:
- (1) taking the asset together with any covering *derivatives*, forward transactions and quasi-derivatives;
 - (2) assuming that the factors which affect the yield will remain unchanged after the valuation date (see *INSPRU* 3.1.33R);
 - (3) valuing the asset (together with any offsetting transaction) in accordance with *GENPRU* 1.3 (Valuation);
 - (4) making reasonable assumptions as to whether, and if so when, any options or other rights embedded in the asset (or in any offsetting transaction) will be exercised.
- 3.1.31 G Examples of calculating a combined yield for the purposes of *INSPRU* 3.1.30R(1):
- (1) 1000 £1 *shares* (fully paid) of ABC plc covered by a sold *future* on the *shares*. Calculating the combined yield effectively results in a position that behaves like cash (with dividend income but no capital gain or loss on the value of the assets); and
 - (2) where a covering *derivative* contains an *option* exercisable by the *firm* (e.g. a bought put *option* or receiver swaption), the calculation of the risk adjusted yield should take into account the fact that on the valuation assumptions any time value will reduce over time (known as the 'wasting' nature of the time value of the *option*), for example, an at-the money *option* will expire worthless and hence the covering *derivative* will effectively be a negative yielding asset. There are various ways of allowing for this, for example a *firm* could treat the covering *derivative* and the asset as a single asset and calculate an internal rate of return on this combined asset. Alternatively, an explicit reserve could be set up equal and opposite to the time value of the covering *derivative* which would be written off in the same way as the time value on the covering *derivative*.
- 3.1.32 G The requirements in relation to offsetting transactions are set out in *INSPRU* 3.2. The options and other rights referred to in *INSPRU* 3.1.30R(4) include those exercisable by the *firm* as well as those exercisable by other parties.
- 3.1.33 R For the purpose of *INSPRU* 3.1.30R(2), the factors that affect yield should be ascertained as at the valuation date (that is, the date to which present values of cash flows are being calculated). All changes known to have occurred by that date must be taken into account including:
- (1) changes in the rental income from real estate;
 - (2) changes in dividends or audited profit on equities;
 - (3) known or forecast changes in dividends which have been publicly announced by the issuer by the valuation date;
 - (4) known or forecast changes in earnings which have been publicly announced by the issuer by the valuation date;

- (5) alterations in capital structure; and
- (6) the value (at the most recent date at or before the valuation date for which it is known) of any determinant of the amount of any future interest or capital payment.

3.1.34 R The risk-adjusted yield is either:
(1) (for equities and real estate) a running yield (see *INSPRU* 3.1.36R to *INSPRU* 3.1.38R, *INSPRU* 3.1.41R and *INSPRU* 3.1.44R); or
(2) (for all other assets) the internal rate of return (see *INSPRU* 3.1.39R, *INSPRU* 3.1.41R and *INSPRU* 3.1.44R).

3.1.35 R The risk-adjusted yield on a basket of assets is the arithmetic mean of the risk-adjusted yield on each asset weighted by that asset's *market value*.

The running yield for real estate

3.1.36 R For real estate the running yield is the ratio of:
(1) the rental income arising from the real estate over the previous 12 months; to
(2) the *market value* of the real estate.

The running yield for equities

3.1.37 R For equities the running yield is:
(1) the dividend yield, if the dividend yield is more than the earnings yield;
(2) otherwise, the sum of the dividend yield and the earnings yield, divided by two.

3.1.38 R For the purposes of *INSPRU* 3.1.37R:
(1) the dividend yield is the ratio (expressed as a percentage) of dividend income over the previous 12 months from the equities for which the running yield is being calculated ("the relevant equities") to the *market value* of those equities;
(2) the earnings yield is the ratio (expressed as a percentage) of the audited profit (including exceptional items and extraordinary items) for the preceding *financial year* of the issuer of the relevant equities to the *market value* of those equities;
(3) the earnings yield must be calculated in accordance with whichever is most appropriate (to the issuer of the relevant equities) of *United Kingdom*, US or international generally accepted accounting practice.

The internal rate of return

- 3.1.39 R The internal rate of return on an asset is the annual rate of interest which, if used to calculate the present value of future income (before deduction of tax) and of repayments of capital (before deduction of tax) would result in the sum of those amounts being equal to the *market value* of the asset.
- 3.1.40 G The risk adjusted yield for a *collective investment scheme* may be determined as the weighted average of the yields on each of the investments held by the *collective investment scheme*.

Credit risk

- 3.1.41 R In both the running yield and internal rate of return the yield must be reduced to exclude that part of the yield that represents compensation for credit risk arising from the asset.
- 3.1.42 G An allowance for credit risk should be made for all securities except risk-free securities.
- 3.1.43 G Provision for credit risk for credit-rated securities may be made by reference to historic default rates of securities with a similar credit rating. However, allowance should be made both for any recent or expected changes in market conditions that may invalidate historic default rates and for the likelihood that the credit ratings on securities may deteriorate or (following such deterioration) that the issuer may default.
- 3.1.44 R Provision for credit risk for securities that are not credit-rated must be made on principles at least as prudent as those adopted for credit-rated securities.

Investment and reinvestment

- 3.1.45 R Except as provided in *INSPRU* 3.1.46R:
- (1) the risk-adjusted yield assumed for the investment or reinvestment of sterling sums (other than sums expected to be received within the next three years) must not exceed the lowest of:
- (a) the long-term gilt yield;
 - (b) 3% per annum, increased by two thirds of the excess, if any, of the long-term gilt yield over 3% per annum; and
 - (c) 6.5% per annum; and
- (2) the risk-adjusted yield assumed for the investment or reinvestment of those sterling sums expected to be received within the next three years must not exceed the risk-adjusted yield on the assets actually held adjusted linearly over the three-year period to the risk-adjusted yield determined under (1).
- 3.1.46 R For the with-profits insurance contracts of a *realistic basis life firm*, the risk-

adjusted yield assumed for the investment or reinvestment of sums denominated in sterling must be no more than rates derived from the forward gilts yield.

- 3.1.47 R The risk-adjusted yield assumed for the investment or reinvestment of non-sterling sums must be at least as prudent as in *INSPRU* 3.1.45R and *INSPRU* 3.1.46R.
- 3.1.48 G The purpose of *INSPRU* 3.1.45R to *INSPRU* 3.1.47R is to help protect against 'reinvestment risk'. Reinvestment risk is the risk that, when the sums are actually received, interest rates (and so yields available on assets) might have fallen below current expectations.

Currency risk

- 3.1.49 G Fluctuations in foreign exchange rates may impact adversely upon a *firm*, including where it holds an open position in a foreign currency. This is where future cash outflows (that is liabilities) in one currency are matched by future cash inflows (that is assets) in a different currency. The circumstances in which this could arise include where the *firm*:
- (1) has entered into contracts for the purchase or sale of foreign currency; or
 - (2) has entered into *contracts of insurance* under which *claims* are payable in, or determined by reference to a value or price expressed in, a foreign currency; or
 - (3) holds assets denominated in a foreign currency.

Cover for spot and forward currency transactions

- 3.1.50 R A *firm* must cover a contract providing for the purchase or sale of foreign currency by:
- (1) holding the currency that must be paid by the *firm* under the contract; or
 - (2) being subject to an offsetting transaction.

- 3.1.51 G The requirements in relation to cover and offsetting transactions are set out in *INSPRU* 3.2.

Currency matching of assets and liabilities

- 3.1.52 G *INSPRU* 1.1.34R requires a *firm* to cover its liabilities with assets that enable it to match, in timing, amount and currency, the cash inflows and outflows from those assets and liabilities. This permits some currency mismatching of assets and liabilities, but only if sufficient excess assets are held to cover the exposure arising from such mismatching. The level of permitted currency mismatching is also limited by *INSPRU* 3.1.53R.

- 3.1.53 R (1) Subject to *INSPRU* 3.1.54R, a *firm* must hold *admissible assets* in each currency of an amount equal to at least 80% of the amount of its liabilities in that currency arising under or in connection with *contracts of insurance* (but excluding, for a *firm* that carries on *general insurance business*, any *equalisation provision*), except where the amount of those assets does not exceed 7% of the assets in other currencies.
- (2) In (1) references to an asset in a currency are to an asset which is expressed in or capable of being realised (without exchange risk) in that currency, and an asset is capable of being so realised if it is reasonably capable of being realised in that currency without risk that changes in exchange rates would reduce the cover for liabilities in that currency.
- 3.1.54 R *INSPRU* 3.1.53R does not apply to:
- (1) a *pure reinsurer*; or
- (2) assets held to cover *index-linked liabilities* or *property-linked liabilities*.
- 3.1.55 R For the purpose of *INSPRU* 3.1.53R, the currency of the liability under a *contract of insurance* is the currency in which the cover under the *contract of insurance* is expressed or, if the contract does not specify a currency:
- (1) the currency of the country or territory in which the risk is situated; or
- (2) if the *firm* on reasonable grounds so decides, the currency in which the *premium* payable under the contract is expressed; or
- (3) if, taking into account the nature of the risks insured, the *firm* considers it more appropriate:
- (a) the currency (based on past experience) in which it expects the *claims* to be paid; or
- (b) if there is no past experience, the currency of the country or territory in which the *firm* or relevant branch is established:
- (i) for contracts covering risks falling within general insurance business classes 4, 5, 6, 7, 11, 12 and 13 (producer's liability only); and
- (ii) for contracts covering risks falling within any other general insurance business class where, in accordance with the nature of the risks, the *firm's* liabilities are liabilities to be provided in a currency other than that which would result from the application of (1) or (2); or
- (4) (where a *claim* has been notified to the *firm* and the *firm's* liability in respect of that *claim* is payable in a currency other than that which would result from the application of (1), (2) or (3)) the currency in which the *claim* is to be paid; or
- (5) (where a *claim* is assessed in a currency known to the *firm* in advance and is a currency other than that which would result from the application of (1), (2), (3) or (4)) the currency in which the *claim* is to be assessed.
- 3.1.56 G The reasonable grounds in *INSPRU* 3.1.55R(2) include if, from the time the contract is entered into, it appears likely that a *claim* will be paid in the

currency of the *premium* and not in the currency of the country in which the risk is situated.

Covering linked liabilities

- 3.1.57 R A *firm* must cover its *property-linked liabilities* with:
- (1) (as closely as possible) the assets to which those liabilities are linked; or
 - (2) a property-linked *reinsurance* contract; or
 - (3) a combination of (1) and (2).
- 3.1.58 R A *firm* must cover its *index-linked liabilities* with:
- (1) either:
 - (a) the assets which represent that index; or
 - (b) assets of appropriate security and marketability which correspond, as closely as possible, to the assets which are comprised in, or which form, the index or other reference of value to which those liabilities are linked; or
 - (2) a portfolio of assets whose value or yield is reasonably expected to correspond closely with the *index-linked liability*; or
 - (3) an index-linked *reinsurance* contract; or
 - (4) an index-linked *approved derivative*; or
 - (5) an index-linked *approved quasi-derivative*; or
 - (6) a combination of any of (1) to (5).
- 3.1.58A R *INSPRU* 3.1.57R and *INSPRU* 3.1.58R do not apply to a *pure reinsurer*.
- 3.1.59 G For the purposes of *INSPRU* 3.1.57R and *INSPRU* 3.1.58R, a *firm* is not permitted to hold different assets and to cover the mismatch by holding excess assets.
- 3.1.60 G If a *firm* has incurred a *policy* liability which cannot be exactly matched by appropriate assets (for example the Limited Price Index (LPI)), the *firm* should seek to match assets that at least cover the liabilities. For example, an LPI limited to 5% per annum may be matched by an RPI bond or a fixed interest investment matching cash flows increasing at 5% per annum compound.
- 3.1.61 G In selecting the appropriate cover, the *firm* should ensure that both credit risk, and the risk that the value or yield in the assets will not, in all circumstances, match fluctuations in the relevant index, are within acceptable limits. *Rules* and *guidance* relating to credit risk are set out in *INSPRU* 2.1.

Pure reinsurers

3.1.61A R A *pure reinsurer* must invest its assets in accordance with the following requirements:

- (1) the assets must take account of the type of business carried out by the *firm*, in particular the nature, amount and duration of expected *claims* payments, in such a way as to secure the sufficiency, liquidity, security, quality, profitability and matching of its investments;
- (2) the *firm* must ensure that the assets are diversified and adequately spread and allow the *firm* to respond adequately to changing economic circumstances, in particular developments in the financial markets and real estate markets or major catastrophic events; the *firm* must assess the impact of irregular market circumstances on its assets and must diversify the assets in such a way as to reduce such impact;
- (3) investment in assets which are not admitted to trading on a *regulated market* must be kept to prudent levels;
- (4) investment in *derivatives* and *quasi-derivatives* must contribute to a reduction of investment risks or facilitate efficient portfolio management and such investments must be valued on a prudent basis, taking into account the underlying assets, and included in the valuation of the *firm's* assets. The *firm* must avoid excessive risk exposure to a single *counterparty* and to other *derivative* or *quasi-derivative* operations;
- (5) the assets must be properly diversified in such a way as to avoid:
 - (a) excessive reliance on any one particular asset, *issuer* or *group* of *undertakings*; and
 - (b) accumulations of risk in the portfolio as a whole.

Investments in assets issued by the same *issuer* or by *issuers* belonging to the same *group* must not expose the *firm* to excessive risk concentration; and
- (6) (5) does not apply to investment in government bonds.

Application of INSPRU 3.1 to Lloyd's

3.1.62 R *INSPRU* 3.1 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents* *INSPRU* 8.1.4R, subject to *INSPRU* 3.1.65R below; and

(2) for the *Society*, *INSPRU* 8.1.2R.

Resilience capital requirement (applicable to long-term business only)

3.1.63 R *Managing agents* must calculate the amount of the *resilience capital requirement* for the *long-term insurance business* carried on through the *syndicates* they manage.

3.1.64 R The *Society* must determine the *resilience capital requirement* for the *insurance business* of each *member* under *INSPRU* 3.1.10R as the *member's* proportionate share of the *resilience capital requirement* calculated by the *managing agent* for the *long-term insurance business* carried on through the *syndicate*.

Currency risk: matching of assets and liabilities

3.1.65 R For the purposes of *INSPRU* 3.1.53R, a *managing agent* must ensure that:
(1) *syndicate liabilities* are covered by matching *syndicate assets* as required by *INSPRU* 3.2.53R; or that
(2) it immediately notifies to the *Society* the nature and extent of any *syndicate liabilities* not covered by matching assets under (1).

3.1.66 R On receipt of a notification by a *managing agent* under *INSPRU* 3.1.65(2), the *Society* must ensure that the liabilities in respect of the *insurance business* of the members in aggregate are covered with matching assets complying with *INSPRU* 3.1.53R.

3.2 Derivatives in insurance

Application

- 3.2.1 R This section applies to an *insurer*, unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*; or
 - (4) a *pure reinsurer*.
- 3.2.2 G The scope of application of *INSPRU* 3.2 is not restricted to *firms* that are subject to the relevant EC directives.
- 3.2.3 R (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
- (2) Where a *firm* carries on both *long-term insurance business* and *general insurance business*, this section applies separately to each type of business.

Purpose

- 3.2.4 G *GENPRU* 2.2.17R requires a *firm* to calculate its *capital resources* for the purpose of *GENPRU* in accordance with the *capital resources table*, subject to the limits in *GENPRU* 2.2.32R to *GENPRU* 2.2.41R. The *capital resources table* and *GENPRU* 2.2.251R require a *firm* to deduct from total *capital resources* the value of any asset included in an insurance fund which is not an *admissible asset* as listed in *GENPRU* 2 Annex 7R. *GENPRU* 2 Annex 7R provides that a *derivative*, *quasi-derivative* or *stock lending transaction* will only be an *admissible asset* if it is approved. This section sets out the criteria for determining when a *derivative*, *quasi-derivative* or *stock lending transaction* is approved for this purpose. *INSPRU* 3.2.5R to *INSPRU* 3.2.35R set out the criteria for *derivatives* and *quasi-derivatives*. *INSPRU* 3.2.36R to *INSPRU* 3.2.41R set out the criteria for *stock lending transactions*.

Derivatives and quasi-derivatives

- 3.2.5 R For the purpose of *GENPRU* 2 Annex 7R (Admissible assets in insurance), a *derivative* or *quasi-derivative* is approved if:
- (1) it is held for the purpose of efficient portfolio management (*INSPRU* 3.2.6R to *INSPRU* 3.2.7R) or reduction of investment risk (*INSPRU* 3.2.8R to *INSPRU* 3.2.13G);
 - (2) it is covered (*INSPRU* 3.2.14R to *INSPRU* 3.2.33G); and
 - (3) it is effected or issued:

- (a) on or under the rules of a *regulated market*; or
- (b) off-market with an *approved counterparty* and, except for a forward transaction, on approved terms and is capable of valuation (*INSPRU* 3.2.34R to *INSPRU* 3.2.35R).

Efficient portfolio management

- 3.2.6 R A *derivative* or *quasi-derivative* is held for the purpose of efficient portfolio management if the *firm* reasonably believes the *derivative* or *quasi-derivative* (either alone or together with any other covered transactions) enables the *firm* to achieve its investment objectives by one of the following:
- (1) generating additional capital or income in one of the ways described in *INSPRU* 3.2.7R; or
 - (2) reducing tax or investment cost in relation to *admissible assets*; or
 - (3) acquiring or disposing of rights in relation to *admissible assets*, or their equivalent, more efficiently or effectively.

Generation of additional capital or income

- 3.2.7 R The generation of additional capital or income falls within *INSPRU* 3.2.6R(1) where it arises from:
- (1) taking advantage of pricing imperfections in relation to the acquisition and disposal (or disposal and acquisition) of rights in relation to assets the same as, or equivalent to, *admissible assets*; or
 - (2) receiving a premium for selling a covered call *option* or its equivalent, the underlying of which is an *admissible asset*, even if that additional capital or income is obtained at the expense of surrendering the chance of greater capital or income.

Reduction of investment risk

- 3.2.8 R A *derivative* or *quasi-derivative* is held for the purpose of reducing investment risk if the *derivative* or *quasi-derivative* (either alone or together with other fully covered transactions) reduces any aspect of investment risk without significantly increasing any other aspect of that risk.

Significant increase in risk

- 3.2.9 R For the purposes of *INSPRU* 3.2.8R, an increase in risk from a *derivative* or *quasi-derivative* is significant unless:
- (1) relative to any reduction in investment risk it is both small and reasonable; or
 - (2) the risk is remote.

3.2.10 G *INSPRU* 3.2.8R does not require that a *derivative* or *quasi-derivative* has no possible adverse consequences. Often a *derivative* or *quasi-derivative* is effected to protect against a severe adverse consequence that only arises in one circumstance. In all other circumstances it may itself lead to adverse consequences, even if only because it expires worthless resulting in the loss of the purchase price. Conversely a *derivative* or *quasi-derivative* may reduce risk in a wide range of circumstances but lead to adverse consequences when a particular circumstance arises, e.g. the default of the *counterparty*. Only rarely does a *derivative* or *quasi-derivative* give rise to no adverse consequences in any circumstances. The test is merely that the increase in risk should not be significant, that is it should be both small and reasonable, or the risk should be remote.

3.2.11 G *Firms* are reminded that *INSPRU* 2.1 (Credit risk in insurance) sets out the different types of loss mitigation techniques.

Investment risk

3.2.12 R For the purposes of *INSPRU* 3.2.8R, investment risk is the risk that the assets held by a *firm*:

(1) (where they are *admissible assets* held by the *firm* to cover its *technical provisions*) might not be:

(a) of a value at least equal to the amount of those *technical provisions* as required by *INSPRU* 1.1.20R; or

(b) of appropriate safety, yield and marketability as required by *INSPRU* 1.1.34R(1)(a); or

(c) of an appropriate currency match as required by *INSPRU* 3.1.53R;

(2) (where they are held to cover *index-linked liabilities*) might not be appropriate cover for those liabilities as required by *INSPRU* 3.1.58R; and

(3) (where they are held to cover *property-linked liabilities*) might not be appropriately selected in accordance with contractual and constructive liabilities as required by *INSPRU* 1.5.36R and appropriate cover for those liabilities as required by *INSPRU* 3.1.57R.

3.2.13 G In assessing whether investment risk is reduced, the impact of a transaction on both the assets and liabilities should be considered. In particular, where the amount of liabilities depends upon the fluctuations in an index or other factor, investment risk is reduced where assets whose value fluctuates in the same way match those liabilities. In appropriate circumstances this may include:

(1) a *derivative* or *quasi-derivative* that is linked to the same index as the liabilities from the index-linked contracts; and

(2) a *derivative* or *quasi-derivative* whose value depends upon the factors which give rise to general insurance claims, e.g. a weather *quasi-derivative*.

Cover

- 3.2.14 R A *firm* must cover an obligation to transfer assets or pay monetary amounts that arises from:
- (1) a *derivative* or *quasi-derivative*; or
 - (2) a contract (other than a *contract of insurance*) for the purchase, sale or exchange of assets.
- 3.2.15 R An obligation to transfer assets or pay monetary amounts (see *INSPRU* 3.2.14R) must be covered:
- (1) by assets, a liability or a provision (see *INSPRU* 3.2.16R to *INSPRU* 3.2.24R); or
 - (2) by an offsetting transaction (see *INSPRU* 3.2.25R to *INSPRU* 3.2.27R).
- 3.2.16 R An obligation to transfer assets (other than *money*) or to pay monetary amounts based on the value of, or income from, assets is covered if the *firm* holds:
- (1) those assets; or
 - (2) in the case of an index or basket of assets, a reasonable approximation to those assets.
- 3.2.17 R An obligation to pay a monetary amount (whether or not falling in *INSPRU* 3.2.16R) is covered if:
- (1) the *firm* holds *admissible assets* that are sufficient in value so that the *firm* reasonably believes that following reasonably foreseeable adverse variations (relying solely on cashflows from, or from realising, those assets) it could pay the monetary amount in the right currency when it falls due; or
 - (2) the obligation to pay the monetary amount is offset by a liability. An obligation is offset by a liability where an increase in the amount of that obligation would be offset by a decrease in the amount of that liability; or
 - (3) a provision at least equal to the value of the assets in (1) is implicitly or explicitly set up. A provision is implicitly set up to the extent that the obligation to pay the monetary amount is recognised under *GENPRU* 1.3 (Valuation) either by offset against an asset or as a separate liability. A provision is explicitly set up if it is in addition to an implicit provision.
- 3.2.18 R A *firm* must implicitly or explicitly set up a provision equal to the value of the assets or offsetting transactions held to cover a non-approved *derivative* or *quasi-derivative* transaction.
- 3.2.19 G Where a *firm* partially covers a *derivative* (or other contract falling within *INSPRU* 3.2.14R(1) and *INSPRU* 3.2.14R(2)), the *firm* may split the *derivative* into a covered portion and an uncovered portion. The portion of the *derivative* that is covered (after taking into account the requirement to cover reasonably foreseeable adverse variations in *INSPRU* 3.2.17R(1)) is an *approved*

derivative, provided it also meets the requirements in *INSPRU* 3.2.5R(1) and *INSPRU* 3.2.5R(3); the uncovered portion is not an *approved derivative*.

- 3.2.20 G Exposure to a transaction includes exposure that arises from a right at the *firm's* (or its *subsidiary undertaking's*) option to dispose of assets.
- 3.2.21 G Cover serves three purposes. First, it protects against exposure to loss from the transaction which is being covered. The value of the cover increases (or if the cover is a liability the amount of that liability decreases) to match any increase in obligations under the transaction.
- 3.2.22 G The second purpose of cover is that it prevents excessive gearing in the investment portfolio by the use of *options* and their equivalent. A *firm* is required to cover all obligations under an admissible transaction including obligations that would arise only at the option of the *firm*, e.g. the liability to pay the exercise price under a bought *option*.
- 3.2.23 G The third purpose of cover is that it protects against the risk that the *firm* may not be able to deliver assets (including *money* in any currency) of the right type when the obligation falls due under the transaction. An obligation to deliver assets is covered only if the *firm* holds those assets or has entered into an offsetting transaction that would deliver those assets when needed. An obligation to pay *money* is offset only if the *firm* holds cash in the right currency, its equivalent or assets that could reliably be converted into cash in the right currency.
- 3.2.24 R Cover used for one transaction must not be used for cover in respect of another transaction or any other agreement to acquire, or dispose of, assets or to pay or repay *money*.

Offsetting transactions

- 3.2.25 R An offsetting transaction means:
(1) an *approved derivative*, *approved stock lending transaction* or an *approved quasi-derivative*; or
(2) a covered transaction with an *approved counterparty* for the purchase of assets.
- 3.2.26 R A transaction offsets an obligation to transfer assets away from the *firm* only if it provides for the transfer to the *firm* of those assets, or their value, at the time, or before, the obligation falls due.
- 3.2.27 R A transaction offsets an obligation to pay a monetary amount only if it provides for that monetary amount to be paid to the *firm* at or before the earliest date on which the obligation might fall due.

Lending and borrowing assets

- 3.2.28 R Assets that have been lent by the *firm* are not available for cover, unless:
- (1) they are non-monetary assets that have been lent under a transaction that fulfils the conditions in *INSPRU* 3.2.36R; and
 - (2) the *firm* reasonably believes the assets to be obtainable (by return or re-acquisition) in time to meet the obligation for which cover is required.
- 3.2.29 R Assets that have been borrowed by the *firm* are not available for cover except as allowed by *INSPRU* 3.2.30R.
- 3.2.30 R Borrowed *money* may be used as cover only where:
- (1) the *money* has been advanced or an *approved credit institution* has committed itself to advance the *money*; and
 - (2) the borrowing is or would be covered.
- 3.2.31 G *INSPRU* 3.2.30R in effect allows borrowings to be used to bridge the gap between an obligation under a transaction that might fall due at one date and cash or its equivalent that would only become due at a later date. Borrowings may not be used to gear the investment portfolio.

Examples of cover requirements

- 3.2.32 G Examples of cover by assets for the purposes of *INSPRU* 3.2.16R:
- (1) a bought put *option* (or a sold call *option*) on 1000 £1 *shares* (fully paid) of ABC plc is covered by an existing holding in the fund of 1000 £1 *shares* (fully paid) of ABC plc;
 - (2) a bought call *option* (or sold put *option*) on 1000 ordinary £1 *shares* (fully paid) of ABC plc is covered by cash (or its equivalent) which is sufficient in amount to meet the purchase price of the *shares* on exercise of the *option*;
 - (3) a bought or sold *contract for differences* on short-dated sterling is covered by cash (or its equivalent), the value of which together at least match the notional principal of the contract. For example, a LIFFE short sterling contract, or a successive series of such contracts, is covered by £500,000; and
 - (4) a sold *future* on the FT-SE 100 index is covered by holdings of equities, which satisfy the reasonable approximation test for cover in *INSPRU* 3.2.16R(2) in relation to that *future*, and the values of which together at least match the current mark to market valuation of the *future*. For example, if the multiplier per full point is £10, and if the eventual obligation under the *future* is currently 2800, the valuation of the *futures* position is $2800 \times £10 = £28,000$.
- 3.2.33 G Examples of cover by offsetting transactions for the purpose of *INSPRU* 3.2.25R would include a bought *future* which is guaranteed to deliver to the *firm* at the relevant time sufficient assets to cover liabilities under a sold call

option.

Off-market transactions

- 3.2.34 R For the purpose of *INSPRU 3.2.5R(3)(b)*, a *derivative* or *quasi-derivative* is on approved terms only if the *firm* reasonably believes that it could, in all reasonably foreseeable circumstances and under normal market conditions, readily enter into a further transaction with the *counterparty* or a third party to close out the *derivative* or *quasi-derivative* at a price not less than the value attributed to it by the *firm*, taking into account any valuation adjustments or reserves established by the *firm* under *GENPRU 1.3.29R* to *GENPRU 1.3.34R*.
- 3.2.34 G In considering whether the first transaction could be readily closed out in all
A reasonably foreseeable circumstances under normal market conditions, the *firm* should satisfy itself that it cannot reasonably foresee any circumstances in which it would need to close out all or part of the contract at a few days' notice, and would not be able to do so.
- 3.2.35 R For the purpose of *INSPRU 3.2.5R(3)(b)*, a *derivative* or *quasi-derivative* is capable of valuation only if the *firm*:
- (1) is able to value it with reasonable accuracy on a reliable basis in compliance with *GENPRU 1.3.41R*; and
 - (2) reasonably believes that it will be able to do so throughout the life of the transaction.
- 3.2.35 G The purpose of *INSPRU 3.2.34R* and *INSPRU 3.2.35R* is to ensure the
A appropriate application of *GENPRU 1.3* to *derivatives* and *quasi-derivatives* effected or issued off-market with an *approved counterparty*.

Stock lending

- 3.2.36 R (1) For the purposes of *GENPRU 2 Annex 7R* (Admissible assets in insurance), a *stock lending* transaction is approved if:
- (a) the assets lent are *admissible assets*;
 - (b) the *counterparty* is an *authorised person*, an *approved counterparty*, a *person* registered as a broker-dealer with the Securities and Exchange Commission of the United States of America or a bank, or a branch of a bank, supervised, and authorised to deal in investments as principal, with respect to *OTC derivatives* by at least one of the following federal banking supervisory authorities of the United States of America:
 - (i) the Office of the Comptroller of the Currency;
 - (ii) the Federal Deposit Insurance Corporation;
 - (iii) the Board of Governors of the Federal Reserve System; and

(iv) the Office of Thrift Supervision; and
(c) adequate and sufficiently immediate *collateral* (*INSPRU* 3.2.38R to *INSPRU* 3.2.41R) is obtained to secure the obligation of the *counterparty*.

(2) *INSPRU* 3.2.36R(1)(c) does not apply to a *stock lending* transaction made through Euroclear Bank SA/NV's Securities Lending and Borrowing Programme.

3.2.37 G *INSPRU* 3.2.36R refers only to *stock lending* transactions where the *firm* is the lender. There are no special *rules* for a transaction under which the *firm* borrows securities.

Collateral

3.2.38 R For the purposes of *INSPRU* 3.2.36R(1)(c), *collateral* is adequate only if it:

(1) is transferred to the *firm* or its agent or, in the case of a letter of credit, meets the conditions described in *INSPRU* 3.2.38AR;

(2) is, at the time of the transfer or, in the case of a letter of credit, at the time of issue, at least equal in value to the value of the securities transferred, or consideration provided, by the *firm*; and

(3) is of adequate quality.

3.2.38 R The conditions referred to in *INSPRU* 3.2.38R(1) are that the letter of credit is:

A

(1) direct, explicit, unconditional and irrevocable; and

(2) issued by an *undertaking* which is:

(a) not a *related undertaking* of the *counterparty*; and

(b) either an *approved credit institution* or a bank, or a branch of a bank, whether chartered by the federal government of the United States of America or a US state, that is supervised and examined by at least one of the following US federal banking supervisory authorities:

(i) the Office of the Comptroller of the Currency;

(ii) the Federal Deposit Insurance Corporation;

(iii) the Board of Governors of the Federal Reserve System; and

(iv) the Office of Thrift Supervision.

3.2.39 G For the purposes of assessing adequate quality in *INSPRU* 3.2.38R(3), reference should be made to the criteria for credit risk loss mitigation set out in *INSPRU* 2.1.16R. The valuation rules in *GENPRU* 1.3 apply for the purpose of determining the value of both *collateral* received, and the *securities* transferred, by the *firm*. In addition, where *collateral* takes the form of assets transferred, under the *rules* in *GENPRU* any such asset that is not an *admissible asset* (see *GENPRU* 2 Ann 7R) does not have a value.

3.2.40 R For the purposes of *INSPRU* 3.2.36R(1)(c), *collateral* is sufficiently

immediate only if:

(1) it is transferred or, in the case of a letter of credit, issued before, or at the same time as, the transfer of the *securities* by the *firm*; or

(2) it will be transferred or, in the case of a letter of credit, issued, at latest, by the close of business on the day of the transfer.

3.2.41 R *Collateral* continues to be adequate only if its value is at all times at least equal to the value of the *securities* transferred by the *firm*. This will be satisfied in respect of *collateral* where the validity of the *collateral* or the *firm's* interest in the *collateral* is about to expire or has expired if sufficient *collateral* will again be transferred or issued at the latest by the close of business on the day of expiry.

3.2.42 G References in *INSPRU* 3.2.40R(2) and *INSPRU* 3.2.41R to the close of business on the day of the transfer or the day of expiry are to close of business on that day in all time regions.

Application of *INSPRU* 3.2 to Lloyd's

3.2.43 R *INSPRU* 3.2 applies to *managing agents* and to the *Society* in accordance with:
(1) for *managing agents*, *INSPRU* 8.1.4R; and
(2) for the *Society*, *INSPRU* 8.1.2R.

4.1 Liquidity risk management

Application

- 4.1.1 R *INSPRU* 4.1 applies to an *insurer* unless *INSPRU* 4.1.4R applies.
- 4.1.2 R All of *INSPRU* 4.1, except *INSPRU* 4.1.16G, applies to:
(1) an *EEA-deposit insurer*; and
(2) a *Swiss general insurer*;
but only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.
- 4.1.3 R If a *firm* carries on:
(1) *long-term insurance business*; and
(2) *general insurance business*;
this section applies separately to each type of business.
- 4.1.4 R This section does not apply to:
(1) a *non-directive friendly society*; or
(2) an *incoming EEA firm*; or
(3) an *incoming Treaty firm*.

Purpose

- 4.1.5 G The purpose of this section is to amplify parts of *INSPRU* in their application to *liquidity risk* and, in so doing, to suggest minimum standards for management of that risk. The main relevant part, *SYSC* 14 (Prudential risk management and associated systems and controls), itself amplifies *Principle 3* (Management and control) and *SYSC* (Senior management arrangements, Systems and Controls).
- 4.1.6 G Appropriate management of *liquidity risk* will vary with the scale, nature and complexity of the *firm's* activities. Most of the material in this section is, therefore, *guidance*. The section lays out some of the main issues that the *FSA* expects a *firm* to consider in relation to *liquidity risk*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3* to organise and control its affairs responsibly and effectively.
- 4.1.7 G For *insurers*, references to *liquidity risk* in this section are intended to cover only those aspects of *liquidity risk* that do not fall under the heading of

insurance risk. For such *firms*, the *FSA* sees the coverage of this section, broadly, as the management of risk arising from short-term cash-flows, rather than the risk arising from longer-term matching of assets and liabilities, which is part of insurance risk. *Guidance* on systems and controls for managing insurance risk is set out in *SYSC 17* (Insurance risk systems and controls).

- 4.1.8 G This section addresses the need to deal both with liquidity management issues under normal market conditions, and with stressed or extreme situations resulting from either general market turbulence or firm-specific difficulties.

Requirements

- 4.1.9 G High level requirements for prudential systems and controls including for *liquidity risk* are set out in *SYSC 14* (Prudential risk management and associated systems and controls). In particular:
- (1) *SYSC 14.1.18R* requires a *firm*, among other things, to take reasonable steps to ensure the establishment of a business plan and appropriate systems for the management of prudential risk; and
 - (2) *SYSC 14.1.19R(2)* requires a *firm*, among other things, to document its policy for managing *liquidity risk*, including its appetite or tolerance for this risk and how it identifies, measures, monitors and controls this risk.

- 4.1.10 G This section sets out *guidance* on each of these areas, and notes a number of matters which the *FSA* would expect a *firm* to deal with in its *liquidity risk* policy statement as follows:
- (1) its *liquidity risk* strategy (see *INSPRU 4.1.12G* to *INSPRU 4.1.14G*), including:
 - (a) the role of marketable, or otherwise realisable, assets (see *INSPRU 4.1.21G*); and
 - (b) its strategy for mitigating *liquidity risk* on the liability side (see *INSPRU 4.1.26G*);
 - (2) its method for measuring *liquidity risk* (see *INSPRU 4.1.44G*)

Managing liquidity risk

- 4.1.11 G This section amplifies the general requirements in *SYSC 14* by describing the key high level arrangements that the *FSA* would normally expect to be in place to ensure that a *firm's liquidity risk* management system is adequate.

Governing body and senior management oversight

- 4.1.12 G *SYSC 14.1.11G* amplifies *SYSC 2.1.1R* and *SYSC 2.1.3R* which require the apportionment, and allocation, of significant responsibilities to be such that the business and affairs of the *firm* can be adequately monitored and

controlled by the *directors*, relevant senior executives and *governing body* of the *firm*. Effective *liquidity risk* management entails an informed board, capable management and appropriate staffing. The *governing body* and senior management are responsible for understanding the nature and level of *liquidity risk* assumed by the *firm* and the tools used to manage that risk.

- 4.1.13 G In relation to *liquidity risk*, the *governing body's* responsibilities should normally include:
- (1) approving the *firm's liquidity risk* policy, which includes taking reasonable steps to ensure that it is consistent with the *firm's* expressed risk tolerance (see *INSPRU* 4.1.15G to *INSPRU* 4.1.17G);
 - (2) establishing a structure for the management of *liquidity risk* including the allocation of appropriate senior managers who have the authority and responsibility to manage *liquidity risk* effectively, including the establishment and maintenance of the *firm's liquidity risk* policy;
 - (3) monitoring the *firm's* overall *liquidity risk* profile on a regular basis and being made aware of any material changes in the *firm's* current or prospective *liquidity risk* profile; and
 - (4) taking reasonable steps to ensure that *liquidity risk* is adequately identified, measured, monitored and controlled.
- 4.1.14 G A *firm* should have an appropriate senior management structure in place to oversee the daily and long-term management of *liquidity risk* in line with the *governing body-* approved *liquidity risk* policy (see *INSPRU* 4.1.15G to *INSPRU* 4.1.17G). The *FSA* would normally expect the senior management to:
- (1) oversee the development, establishment and maintenance of procedures and practices that translate the goals, objectives and risk tolerances approved by the *governing body* into operating standards that are consistent with the *governing body's* intent and understood by the relevant members of a *firm's* personnel;
 - (2) adhere to the lines of authority and responsibility that the *governing body* has established for managing *liquidity risk*;
 - (3) oversee the establishment and maintenance of management information (see *INSPRU* 4.1.53G to *INSPRU* 4.1.55G) and other systems that identify, measure, monitor and control the *firm's liquidity risk*; and
 - (4) oversee the establishment of effective *internal controls* over the *liquidity risk* management process (see *INSPRU* 4.1.56G to *INSPRU* 4.1.68G (Controlling liquidity risk)).

Liquidity risk policy

- 4.1.15 G *SYSC* 3.2.17G gives *guidance*, which amplifies *SYSC* 3.2.6R, on the need for a *firm* to plan its business appropriately so that it is able to identify, measure, monitor and control risks of regulatory concern. A *firm* should, therefore, have an agreed policy for the day-to-day and longer term

management of *liquidity risk* which is appropriate to the nature, scale and complexity of the activities carried on.

- 4.1.16 G The *liquidity risk* policy should cover the general approach that the *firm* will take to *liquidity risk* management, including, as appropriate, various quantitative and qualitative targets. This general approach should be communicated to all relevant functions within the organisation and be included in the *firm's liquidity risk* policy statement.
- 4.1.17 G The policy for managing *liquidity risk* should cover specific aspects of *liquidity risk* management. So far as appropriate to the nature, scale and complexity of the activities carried on, such aspects might include:
- (1) the basis for managing liquidity (for example, regional or central);
 - (2) the degree of concentrations, potentially affecting *liquidity risk*, that are acceptable to the *firm*;
 - (3) a policy for managing the liability side of *liquidity risk* (see *INSPRU* 4.1.26G);
 - (4) the role of marketable, or otherwise realisable, assets (see *INSPRU* 4.1.21G);
 - (5) ways of managing both the *firm's* aggregate foreign currency liquidity needs and its needs in each individual currency;
 - (6) ways of managing market access;
 - (7) the use of *derivatives* to minimise *liquidity risk*; and
 - (8) the management of intra-day liquidity, where this is appropriate, for instance where the *firm* is a member of or participates (directly or indirectly) in a system for the intra-day settlement of payments or transactions in investments.

Identifying liquidity risk

- 4.1.18 G In order to manage *liquidity risk* successfully, a *firm* should be aware of the ways in which its activities can affect its *liquidity risk* profile, and how outside influences may affect its liquidity position. A *firm* should consider not only its current *liquidity risk*, but how existing activities may affect its *liquidity risk* profile in the future; it should also consider the implications of new products or business lines. This section identifies the main sources of *liquidity risk* and the key factors that a *firm* might consider when analysing its *liquidity risk* profile.
- 4.1.19 G The *overall financial adequacy rule* states that a *firm* must maintain overall financial resources adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due. The *firm* should, therefore, ensure that, overall, its financial resources are of appropriate maturity, and in a form which is sufficiently marketable or otherwise realisable, having regard to the expected timing of liabilities and the risk that liabilities may fall due earlier than expected (for which prudent

allowance must be made when assessing whether assets are of appropriate maturity or sufficiently realisable).

Asset liquidity

- 4.1.20 G A *firm's* asset portfolio can provide liquidity in three major ways:
- (a) through the maturity of an asset;
 - (b) the sale of an asset for cash; or
 - (c) the use of an asset as *collateral* to back other transactions, such as for secured borrowing (including repos), or for deposits with insureds or cedants to back insurance or *reinsurance* transactions.
- 4.1.21 G A *firm* may incur *liquidity risk* where inflows from the realisation of assets (at either maturity or time of sale) are less than anticipated because of the crystallisation of credit risk or *market risk*. Inflows arising from the renewal of secured funding, including repos, are similarly affected, if the haircut (the difference between the value of an asset and the amount lent to the *firm* by the counterparty using that security as *collateral*) required by a *firm's* counterparty is larger than anticipated (see *INSPRU* 4.1.28G).
- 4.1.22 G Asset concentrations often increase these sources of *liquidity risk*. A *firm* should, therefore, identify significant concentrations within its asset portfolio, including in relation to:
- (1) individual counterparties or related groups of counterparties;
 - (2) credit ratings of the assets in its portfolio;
 - (3) the proportion of an issue held;
 - (4) instrument types;
 - (5) geographical regions; and
 - (6) economic sectors.

Marketable assets

- 4.1.23 G Criteria for the marketability of its assets should be decided by the *firm* and may reflect the *firm's* access to, and expertise in, individual markets. In determining the appropriateness of the marketability or realisability of assets, a *firm* may take into account:
- (1) the depth and liquidity of the market, including:
 - (a) the speed with which assets may be realised;
 - (b) the likelihood and extent of forced-sale loss; and
 - (c) the potential for using the asset as *collateral* in secured funding and the size of the haircut (see *INSPRU* 4.1.18G) likely to be required by the counterparty;
 - (2) the expected date of maturity, redemption, repayment or disposal;

- (3) the proportion of an issue held;
- (4) the credit ratings of the assets;
- (5) the impact of exchange rate risk on the realised value of the asset, where assets are denominated in different currencies from its liabilities; and
- (6) where applicable, the impact on certain assets' liquidity of their use as eligible *collateral* either in open-market operations conducted by, or in real-time or other payment systems operated by, a central bank.

- 4.1.24 G The role of marketable, or otherwise realisable, assets in a *firm's liquidity risk* policy, in both normal and stressed conditions, should be set out in its *liquidity risk* policy statement.
- 4.1.25 G In considering the marketability of an asset, a *firm* should assess how its value and liquidity would be affected in a variety of scenarios (see SYSC 11 (Liquidity risk management systems and controls) at SYSC 11.1.18G, SYSC 11.1.20G, SYSC 11.1.21E and SYSC 11.1.22G).

Adjusting for the behavioural characteristics of assets

- 4.1.26 G In order to manage its *liquidity risk* effectively, a *firm* should be able to adjust for the behavioural characteristics of the repayment profiles of assets, that is how their actual behaviour may vary from that suggested by their contractual terms. Such an adjustment may be necessary in order to reduce the risk of wrongly estimating the inflows in relation to, in particular:
- (1) standby facilities or other commitments that have already been drawn down;
 - (2) retail and wholesale overdrafts;
 - (3) mortgages; and
 - (4) credit cards.
- 4.1.27 G The repayment profiles should be considered under both normal market conditions and stressed conditions resulting from either general market turbulence or *firm*-specific difficulties (see SYSC 11 (Liquidity risk management systems and controls) at SYSC 11.1.18G, SYSC 11.1.20G, SYSC 11.1.21E, SYSC 11.1.22G, SYSC 11.1.23G and SYSC 11.1.24E).

Inflows from off balance sheet items

- 4.1.28 G Where a *firm* has in place a committed facility for the provision of a portion of its funding, it should take care to monitor any covenants included in the agreement. It should also make efforts to retain a good relationship with the provider of the facility and, where possible without jeopardising that relationship, regularly test access to the funds. A *firm* should also assess the extent to which committed facilities can be relied upon under stressed

conditions (see SYSC 11.1.22G and SYSC 11.1.24E).

Liability liquidity

- 4.1.29 G Holding marketable, or otherwise realisable, assets is not the only way for a *firm* to mitigate the *liquidity risk* it faces. There are a number of liability-side strategies that can be used to reduce a *firm's liquidity risk*, such as ensuring a spread of maturities and lengthening the term structure of its liabilities. In order to manage its *liquidity risk* effectively a *firm* should have a liability-side policy that is appropriate to the nature and scale of its activities; this policy should be described in its *liquidity risk* policy statement.
- 4.1.30 G When determining the appropriate mix of liabilities, a *firm's* management should consider potential concentrations. A concentration exists when a single decision or factor could cause a significant and sudden claim on liabilities. What constitutes a liability concentration depends on the nature and scale of a *firm's* activities. A *firm* should, however, normally consider:
- (1) the term structure of its liabilities;
 - (2) the credit-sensitivity of its liabilities;
 - (3) the mix of secured and unsecured funding;
 - (4) concentrations among its liability providers, or related groups of liability providers;
 - (5) reliance on particular instruments or products;
 - (6) the geographical location of liability providers; and
 - (7) reliance on intra-group funding.
- 4.1.31 G A *firm* with credit-sensitive liabilities should be aware that, in times of market turbulence, a proportion of that funding may be withdrawn, particularly funding which is unsecured. Secured funding may also be affected, with counterparties seeking better quality *collateral* or larger haircuts (see INSPRU 4.1.18G) on *collateral*. A *firm* should recognise these characteristics of its credit-sensitive liabilities and take account of them in its stress testing and scenario analysis and *contingency funding plan* (see SYSC 11 (Liquidity risk management systems and controls) at SYSC 11.1.18G, SYSC 11.1.20G, SYSC 11.1.21E, SYSC 11.1.22G, SYSC 11.1.23G and SYSC 11.1.24E).
- 4.1.32 G A *firm* should consider the dynamics of its *liquidity risk* including, for example, the normal level of roll-overs, and growth, of liabilities.

Adjusting for the behavioural characteristics of liabilities

- 4.1.33 G In order to meet the requirement to maintain sufficient liquid financial resources (see INSPRU 4.1.16G), a *firm* should consider the behavioural

characteristics of its liabilities, that is how their actual behaviour may vary from that suggested by their contractual terms.

- 4.1.34 G In assessing how to adjust for the behavioural characteristics of its liabilities in the context of *liquidity risk*, an *insurer* may take into account:
- (1) the type of *insurance business*;
 - (2) the past history of volatility in the pattern of *claims* payment;
 - (3) options available to *policyholders* and the circumstances in which they are likely to be exercised;
 - (4) options available to the *insurer* and any incentive for the *insurer* to exercise them;
 - (5) any relevant requirements to deposit *collateral* either with the insured (or cedants) under the terms of the insurance Treaty or by requirements of overseas regulators as a condition for covering risks in a particular territory; and
 - (6) the other cash flow needs of the business.

Outflows from off balance sheet items

- 4.1.35 G The contingent or optional nature of many off balance sheet instruments adds to the complexity of managing off balance sheet cash flows. In particular, in stressed conditions off balance sheet commitments may be a significant drain on liquidity.
- 4.1.36 G A *firm* should consider how its wholesale off balance sheet activities affect its cash flows and *liquidity risk* profile under both normal and stressed conditions. In particular, as appropriate, it should consider the amount of funding required by:
- (1) commitments given;
 - (2) standby facilities given;
 - (3) wholesale overdraft facilities given;
 - (4) proprietary *derivatives* positions; and
 - (5) liquidity facilities given for securitisation transactions.
- 4.1.37 G Similarly, a *firm* with retail *customers* should be able to assess the likely draw-down on retail products under a variety of circumstances and taking into account seasonal factors. In particular, as appropriate, it should consider the amount of funding required in relation to:
- (1) mortgages that have been agreed but not yet drawn down;
 - (2) overdrafts; and
 - (3) credit cards.

Asset securitisations

- 4.1.38 G If controlled properly, asset securitisation can be a useful tool in enhancing a *firm's* liquidity. However, features of certain securitisations, such as early amortisation triggers, as well as excessive reliance on a single funding vehicle, can increase *liquidity risk*.
- 4.1.39 G The implications of securitisations on a *firm's* liquidity position should be considered for both day-to-day liquidity management and its contingency planning for *liquidity risk*. A contemplated securitisation should be analysed for its impact on *liquidity risk*. A *firm* using securitisation should consider:
- (1) the volume of securities issued in connection with the securitisation that are scheduled to amortise during any particular period;
 - (2) the existence of early amortisation triggers (see also SYSC 11.1.22G);
 - (3) its plans for meeting its funding requirements (including their timing);
 - (4) strategies for obtaining substantial amounts of liquidity at short notice (see also SYSC 11.1.24E); and
 - (5) operational issues associated with the rollover of short-dated securities, particularly commercial paper.
- 4.1.40 G If a *firm* is a provider of liquidity facilities for securitisation transactions it should be able to assess the probability and scale of draw-down and make provision for it.
- 4.1.41 G A *firm* using securitisation should also be aware that its ability to securitise assets may diminish in stressed market conditions and take account of this in its stress testing and *contingency funding plan*. In addition, the time taken to organise a securitisation transaction may mean that it cannot be relied upon to provide liquidity at short notice.

Foreign currency liquidity

- 4.1.42 G Foreign currency *liquidity risk* arises where a *firm* faces actual or potential future outflows in a particular currency which it may not be able to meet from likely available inflows in that currency. A *firm's* exposure to foreign currency *liquidity risk* depends on the nature, scale and complexity of its business. Where a *firm* has significant, unhedged liquidity mismatches in particular currencies, it should consider:
- (1) the volatilities of the exchange rates of the mismatched currencies;
 - (2) likely access to the foreign exchange markets in normal and stressed conditions; and
 - (3) the stickiness of deposits in those currencies with the *firm* in stressed conditions.

- 4.1.43 G A possible strategy for mitigating foreign currency *liquidity risk*, which is effective and simple, is for a *firm* to hold assets in a particular currency in an amount equal to, and realisable at maturities no later than, its liabilities in that currency. This strategy may be worth considering particularly where, as a result of the nature, scale and complexity of its business, a *firm's liquidity risk* is relatively small.

Intra-day liquidity

- 4.1.44 G *SYSC 3.1.1R* requires a *firm* to take reasonable care to establish and maintain systems and controls appropriate to its business. This includes appropriate systems and controls over activities that give rise to significant *market, credit, liquidity, insurance, operational or group risk*, including over the processes of settling and paying debts and other commitments that arise from those activities.
- 4.1.45 G Structural and operational changes in payment systems have increased the importance of intra-day liquidity for many *firms*. Within real time gross settlement systems, for example, a *firm* needs to take appropriate steps to ensure that it has sufficient *collateral* to cover cash positions and has systems capable of monitoring intra-day liquidity positions and cash needs.
- 4.1.46 G A *firm* should be aware that in stressed conditions it is likely to require more intra-day liquidity than in normal market conditions, for a variety of reasons including payments due to the *firm* being delayed and wholesale depositors withdrawing from the market. A *firm* should take account of this in its stress testing and scenario analysis.

Measuring liquidity risk

- 4.1.47 G A *firm* should establish and maintain a process for the measurement of *liquidity risk*, using a robust and consistent method which should be described in its *liquidity risk* policy statement.
- 4.1.48 G A number of techniques can be used for measuring *liquidity risk*, ranging from simple calculations to highly sophisticated modelling; a *firm* should use a measurement method which is appropriate to the nature, scale and complexity of its activities.
- 4.1.49 G The method that a *firm* uses for measuring *liquidity risk* should be capable of:
- (1) measuring the extent of the *liquidity risk* it is incurring;
 - (2) dealing with the dynamic aspects of a *firm's* liquidity profile (for example, rollovers of funding and assets or new business);
 - (3) assessing the behavioural characteristics of its on and off balance sheet instruments; and

(4) where appropriate, measuring the *firm's* exposure to foreign currency *liquidity risk*.

Monitoring liquidity risk

- 4.1.50 G A *firm* should establish and maintain an appropriate system for monitoring its *liquidity risk*, which should be described in its *liquidity risk* policy statement.
- 4.1.51 G A *firm* should establish and maintain a system of management reporting which provides clear, concise, timely and accurate *liquidity risk* reports to relevant functions within the *firm*. These reports should alert management when the *firm* approaches, or breaches, predefined thresholds or limits, including quantitative limits imposed by the *FSA* or another regulator.
- 4.1.52 G Where a *firm* is a member of a *group*, it should be able to assess the potential impact on it of *liquidity risk* arising in other parts of the *group*.

Management information systems

- 4.1.53 G A *firm* should have adequate information systems for controlling and reporting *liquidity risk*. The management information system should be used to check for compliance with the *firm's* established policies, procedures and limits.
- 4.1.54 G Reports on *liquidity risk* should be provided on a timely basis to the *firm's* governing body, senior management and other appropriate personnel. The appropriate content and format of reports depends on a *firm's* liquidity management practices and the nature, scale and complexity of the *firm's* business. Reports to the *firm's* governing body may be less detailed and less frequent than reports to senior management with responsibility for managing *liquidity risk*.
- 4.1.55 G When considering what else might be included in *liquidity risk* management information, a *firm* should consider other types of information that may be important for understanding its *liquidity risk* profile.

Controlling liquidity risk

- 4.1.56 G A *firm* should establish and maintain an appropriate system for controlling its *liquidity risk*, which should be described in its *liquidity risk* policy statement. Such a system should allow the *firm's* governing body and senior management to review compliance with established limits and operating procedures.
- 4.1.57 G A *firm* should have in place appropriate approval processes, limits and other mechanisms designed to provide reasonable assurance that the *firm's*

liquidity risk management processes are adhered to.

- 4.1.58 G When revisions or enhancements to *internal controls* are warranted, a *firm* should implement them in a timely manner.
- 4.1.59 G The effectiveness of a *firm's liquidity risk* management system should be regularly reviewed and evaluated by individuals unconnected with day-to-day *liquidity risk* management in order to check that personnel are following established policies and procedures, and that procedures accomplish the intended objectives.
- 4.1.60 G In addition to the regular review and evaluation described in *INSPRU* 4.1.59G, a *firm's* internal audit function should periodically review the *liquidity risk* management process in order to identify any weaknesses or problems. Any weaknesses should be addressed by management in a timely and effective manner.

Limit Setting

- 4.1.61 G A *firm's* senior management should decide what limits need to be set, in accordance with the nature, scale and complexity of its activities. The structure of limits should reflect the need for a *firm* to have systems and controls in place to guard against a spectrum of possible risks, from those arising in day-to-day *liquidity risk* management to those arising in stressed conditions.
- 4.1.62 G *SYSC* 14.1.18R states that a *firm* must take reasonable steps to ensure the establishment and maintenance of a business plan and appropriate systems for the management of prudential risk.
- 4.1.63 E (1) If a *firm* has *liquidity risk* that arises because it has substantial exposures in foreign currencies, the risk management systems of the *firm* referred to in *SYSC* 14.1.18R should include systems and procedures that are designed to ensure that the *firm* does not, except in accordance with those procedures, exceed limits that are designed to limit:
- (a) the aggregate amount of its *liquidity risk* for all exposures in foreign currencies; and
- (b) the amount of its *liquidity risk* for each individual currency in which it has a significant exposure.
- (2) Contravention of (1) may be relied upon as tending to establish contravention of *SYSC* 14.1.18R.
- 4.1.64 G A *firm* should periodically review and, where appropriate, adjust its limits when conditions or risk tolerances change.

- 4.1.65 G Policy or limit exceptions should receive the prompt attention of the appropriate management and should be resolved according to processes described in approved policies.

Managing market access

- 4.1.66 G A *firm* should periodically review its efforts to establish and maintain relationships with liability providers, to maintain adequate diversification of liabilities, and to ensure adequate capacity to sell assets, or use them as *collateral* in secured funding. Where possible the *firm* should aim regularly to test its access to the individual markets in assets that it holds for liquidity purposes.

- 4.1.67 G Market access should be assessed under a variety of normal and stressed conditions.

- 4.1.68 G In some circumstances, the disclosure of information about a *firm* may be useful in managing the public perception of its organisation and soundness. A *firm* should consider the role of disclosure in managing the *liquidity risk* to which it is exposed.

Application of INSPRU 4.1 to Lloyd's

- 4.1.69 G *INSPRU* 4.1 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, *INSPRU* 8.1.4R; and
- (2) for the *Society*, *INSPRU* 8.1.2R

- 4.1.70 G In accordance with *INSPRU* 8.6.2R, the *rules* and *guidance* in *INSPRU* 4.1 relating to the establishment and maintenance of a business plan do not apply to the *Society*.

5.1 Operational Risk Management

Application

5.1.1 G *INSPRU* 5.1 applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) an *incoming EEA firm*; or
- (3) an *incoming Treaty firm*.

5.1.2 G *INSPRU* 5.1 applies to:

- (1) an *EEA-deposit insurer*; and
- (2) a *Swiss general insurer*;

only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.

Purpose

5.1.3 G This section provides *guidance* on how to interpret *SYSC* 14.1.18R and *SYSC* 14.1.19R(2) (which relate to the design and documentation of risk management systems) in so far as they relate to the management of operational risk in a *prudential context*. Operational risk has been described by the Basel Committee on Banking Supervision as "the risk of loss, resulting from inadequate or failed internal processes, people and systems, or from external events". Thus this section covers management of risks concerning any of the *firm's* operations, whether caused by internal or external matters. However, it does not cover management of credit, market, liquidity and insurance risk. Examples of operational risk exposures that this section is meant to address include internal and external fraud; failure to comply with employment law or meet workplace safety standards; damage to physical assets; business disruptions and system failures; and transaction processing failures.

5.1.4 G Operational risk concerns the *FSA* in a *prudential context* because inappropriate management of operational risk can adversely affect the solvency or business continuity of a *firm*, threatening the *regulatory objectives* of market confidence and consumer protection.

5.1.5 G This section contains *guidance* on how a *firm* should determine, in a *prudential context*, its policy for operational risk management and its processes for the identification, assessment, monitoring and control of operational risk. In addition, *guidance* is provided on record keeping in relation to operational risk.

5.1.6 G The *guidance* contained within this section is not designed to be exhaustive. When establishing and maintaining its systems and controls for operational risk, a *firm* should have regard to other parts of the *Handbook* as well as the material that is issued by other industry or regulatory bodies. In particular, a *firm* should read this section in conjunction with SYSC 3A (Operational Risk Systems and Controls) which contains high level *guidance* on the management of people, processes and systems, and external events in relation to operational risk. SYSC 3A also outlines some *guidance* on the areas that are covered by operational risk systems and controls (including the *FSA's* interpretation of some frequently used risk management terms in relation to operational risk), business continuity management, outsourcing, and the role of insurance in financing operational risk. In addition, a *firm* should read SYSC 14, which contains the *FSA's* general policy on prudential systems and controls. SYSC 14 contains some *rules* and *guidance* on which this section offers additional *guidance*.

5.1.7 G *Guidance* on the application of this section to a *firm* that is a member of a *group* is provided in SYSC 12 (Group Risk Systems and Controls).

5.1.8 G Appropriate management of operational risk will vary with the scale, nature and complexity of a *firm's* activities. Therefore the material in this section is *guidance*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3* to organise and control its affairs responsibly and effectively.

Operational risk policy

5.1.9 G Much of the management of operational risk is about identifying, assessing, monitoring and controlling failures or inadequacies in a *firm's* systems and controls. As such, a *firm* may often find that there is no clear boundary between its risk management systems for operational risk and all its other systems and controls. When drafting its operational risk policy, a *firm* should try to distinguish between its systems and controls for credit, market, liquidity and insurance risk, and its systems and controls for operational risk. Where such a distinction is not possible a *firm* should still try to identify those systems and controls that are used in the management of operational risk, even when they have other purposes as well.

5.1.10 G A *firm* should document its policy for managing operational risk. This policy should outline a *firm's* strategy and objectives for operational risk management and the processes that it intends to adopt to achieve these objectives. In complying with SYSC 14.1.19R(2), the documented operational risk policy of a *firm* should include:

(1) an analysis of the *firm's* operational risk profile (see the *FSA's* interpretation of this term in SYSC 3A.5.1G(3)), including where relevant some consideration of the effects that operational risk may have on the firm, including consideration of those operational risks within a *firm* that may

have an adverse impact upon the quality of service afforded to its *clients*;

(2) the operational risks that the *firm* is prepared to accept and those that it is not prepared to accept, including where relevant some consideration of its appetite or tolerance (see *INSPRU* 5.1.12G) for specific operational risks;

(3) how the *firm* intends to identify, assess, monitor, and control its operational risks, including an overview of the people, processes and systems that are used; and

(4) where assessments of the *firm's* risk exposures are used for internal capital allocation purposes, a description of how operational risk is incorporated into this methodology.

5.1.11 G A *firm* may also wish to set threshold levels in its operational risk policy for particular types of operational risk (based on its risk appetite or tolerance for risk), which when exceeded trigger a response (such as the allocation of more resources to control the risk or a reappraisal of business plans).

5.1.12 G Given its association with a willingness to take risk, a *firm* may wish to replace the term appetite for tolerance when drafting its operational risk policy. Tolerance describes the types and degree of operational risk that a *firm* is prepared to incur (based on factors such as the adequacy of its resources and the nature of its operating environment). Tolerance may be described in terms of the maximum budgeted (that is, expected) costs of an operational risk that a *firm* is prepared to bear, or by reference to risk indicators such as the cost or number of system failures, available spare capacity and the number of failed trades.

5.1.13 G The term risk assessment can be used to represent both the qualitative and quantitative evaluation or measurement of operational exposures.

Risk identification

5.1.14 G In order to understand its operational risk profile, a *firm* should identify the types of operational risk that it is exposed to as far as reasonably possible. This might include, but is not limited to, consideration of:

(1) the nature of a *firm's customers*, products and activities, including sources of business, distribution mechanisms, and the complexity and volumes of transactions;

(2) the design, implementation, and operation of the processes and systems used in the end-to-end operating cycle for a *firm's* products and activities;

(3) the risk culture and human resource management practices at a *firm*; and

(4) the business operating environment, including political, legal, socio-demographic, technological, and economic factors as well as the competitive environment and market structure.

5.1.15 G A *firm* should recognise that it may face significant operational exposures from a product or activity that may not be material to its business strategy.

A *firm* should consider the appropriate level of detail at which risk identification is to take place, and may wish to manage the operational risks that it faces in risk categories that are appropriate to its organisational and legal structures.

- 5.1.16 G The *FSA's* interpretation of the term operational exposure is provided in *SYSC 3A.5.1G(2)*.
- Risk assessment
- 5.1.17 G The *FSA* recognises that risk management systems for operational risk are still developing, and that it may be neither feasible nor appropriate to measure certain types of operational risk in a quantitative way. A *firm* may wish to take a qualitative approach to the assessment of its operational risks using, for example, relative estimates (such as high, medium, low) to understand its exposure to them.
- 5.1.18 G In order to understand the effects of its operational exposures a *firm* should continually assess its operational risks. This might include, but is not limited to, consideration of:
- (1) actual operational losses that have occurred within a *firm*, or events that could have resulted in significant operational losses, but were avoided (for example, the waiving of financial penalties by a third party as a gesture of goodwill or where by chance the *firm* realised profits);
 - (2) internal assessment of risks inherent in its operations and the effectiveness of controls implemented to reduce these risks (through activities such as self-assessment or stress testing and scenario analysis);
 - (3) other risk indicators, such as *customer* complaints, processing volumes, *employee* turnover, large numbers of reconciling items, process or system failures, fragmented systems, systems subject to a high degree of manual intervention and transactions processed outside a *firm's* mainstream systems;
 - (4) reported external (peer) operational losses and exposures; and
 - (5) changes in its business operating environment.
- 5.1.19 G When assessing its operational risks, a *firm* may be able to differentiate between expected and unexpected operational losses. A *firm* should consider whether it is appropriate to adopt a more quantitative approach to the assessment of its expected operational losses, for example by defining tolerance, setting thresholds, and measuring and monitoring operational losses and exposures. In contrast, a *firm* may wish to take a more qualitative approach to assessing its unexpected losses.
- 5.1.20 G Although a *firm* may currently be unable to assess certain operational risks with a high degree of accuracy or consistency, it should, according to the nature, scale and complexity of its business, consider the use of more sophisticated qualitative and quantitative techniques as they become

available.

Risk monitoring

- 5.1.21 G In monitoring its operational risks, a *firm* should:
- (1) as appropriate, regularly report to the relevant level of management its operational exposures, loss experience (including if possible cumulative losses), and authorised deviations from the *firm's* operational risk policy;
 - (2) engage in exception-based escalation to management of:
 - (a) unauthorised deviations from the *firm's* operational risk policy;
 - (b) likely or actual breaches in predefined thresholds for operational exposures and losses, where set; and
 - (c) significant increases in the *firm's* exposure to operational risk or alterations to its operational risk profile.

Risk control

- 5.1.22 G A *firm* should control its operational risks, as appropriate, through activities for the avoidance, transfer, prevention or reduction of the likelihood of occurrence or potential impact of an operational exposure. This might include, but is not limited to, consideration of:
- (1) adjusting a *firm's* risk culture and creating appropriate incentives to facilitate the implementation of its risk control strategy (see SYSC 3A.6 People);
 - (2) adapting internal processes and systems (see SYSC 3A.7 Processes and systems);
 - (3) transferring or changing the operational exposure through mechanisms such as *outsourcing* (see SYSC 3A.9 Outsourcing) and insurance (see SYSC 3A.10 Insurance);
 - (4) the active acceptance of a given operational risk within the *firm's* stated risk appetite or tolerance; and
 - (5) providing for expected losses, and maintaining adequate financial resources against unexpected losses that may be encountered in the normal course of a *firm's* business activities.

Record keeping

- 5.1.23 G The *FSA's* high level *rules* and *guidance* for record keeping are outlined in SYSC 3.2.20R (Records). Additional *rules* and *guidance* in relation to the *prudential context* are set out in SYSC 14.1.51G to SYSC 14.1.64G (Record keeping). In complying with these *rules* and all associated *guidance*, a *firm* should retain an appropriate record of its operational risk management activities. This may, for example, include records of:
- (1) the results of risk identification, measurement, and monitoring activities;

- (2) actions taken to control identified risks;
- (3) where relevant, any exposure thresholds that have been set for identified operational risks;
- (4) an assessment of the effectiveness of the risk control tools that are used; and
- (5) actual exposures against stated risk appetite or tolerance.

Application of INSPRU 5.1 to Lloyd's

- 5.1.24 G *INSPRU* 5.1 applies to *managing agents* and to the *Society* in accordance with:
 - (1) for *managing agents*, *INSPRU* 8.1.4R; and
 - (2) for the *Society*, *INSPRU* 8.1.2R
- 5.1.25 G In accordance with *INSPRU* 8.5.2R, the *rules* and *guidance* in *INSPRU* 5.1 relating to the establishment and maintenance of a business plan do not apply to the *Society*.

6.1 Group Risk: Insurance Groups

Application

- 6.1.1 R *INSPRU* 6.1 applies to an *insurer* that is either:
- (1) a *participating insurance undertaking*; or
 - (2) a member of an *insurance group* which is not a *participating insurance undertaking* and which is not:
 - (a) a *non-EEA insurer*; or
 - (b) a *friendly society*.
- 6.1.2 R *INSPRU* 6.1 does not apply to:
- (1) a *non-directive friendly society*; or
 - (2) a *Swiss general insurer*; or
 - (3) an *EEA-deposit insurer*; or
 - (4) an *incoming EEA firm*; or
 - (5) an *incoming Treaty firm*.
- 6.1.3 G *INSPRU* 6.1 applies to a *firm*:
- (1) on a solo basis, as an adjusted solo calculation, where that *firm* is a *participating insurance undertaking*; and
 - (2) on a group basis where that *firm* is a member of an *insurance group*.
- 6.1.4 G For the purposes of *INSPRU* 6.1, an *insurer* includes a *friendly society* (other than a *non-directive friendly society*) and a *non-EEA insurer*.
- ### Purpose
- 6.1.5 G The purpose of this section is to implement the *Insurance Groups Directive* on supplementary supervision of *firms* in an *insurance group*, as amended by the *Financial Groups Directive* and the *Reinsurance Directive*. The *Financial Groups Directive* (by amending the *Insurance Directives* and the *Insurance Groups Directive*) introduces specific requirements for the treatment of *related undertakings* of an *insurance parent undertaking* or a *participating insurance undertaking* that are *credit institutions*, *investment firms* or *financial institutions*. The *Reinsurance Directive* (by amending the *Insurance Directives* and the *Insurance Groups Directive*) introduces supplementary supervision for *firms* that are *reinsurance undertakings* in an *insurance group*.
- 6.1.6 G *INSPRU* 6.1 sets out the *sectoral rules* for *insurers* for:
- (1) *firms* that are *participating insurance undertakings* carrying out an adjusted solo calculation as contemplated by *GENPRU* 2.1.13R(2);
 - (2) *insurance groups*; and
 - (3) *insurance conglomerates*.

- 6.1.6A G In accordance with the definition, an *insurance holding company* ceases to be an *insurance holding company* if:
- (1) it is a *mixed financial holding company*; and
 - (2) notice has been given in accordance with Article 4(2) of the *Financial Groups Directive* that the *financial conglomerate* of which it is a *mixed financial holding company* is a *financial conglomerate*;
- otherwise it remains an *insurance holding company* for the purposes of this chapter.
- 6.1.7 G For a *firm* that is a *participating insurance undertaking*, the rules in *INSPRU* 6.1 out the minimum capital adequacy requirements for the *firm* itself. A *firm* that satisfies the test in *INSPRU* 6.1.9R in relation to its *group capital resources* is deemed by *GENPRU* 2.1.13R(2) to be in compliance with the capital adequacy requirement set out in *GENPRU* 2.1.13R(1).
- Requirement to calculate GCR and GCRR
- 6.1.8 R A *firm* must on a regular basis calculate the *group capital resources (GCR)* and *group capital resources requirement (GCRR)* of each *undertaking* referred to in *INSPRU* 6.1.17R.
- Requirement to maintain group capital
- 6.1.9 R Where a *firm* is the *undertaking* referred to in *INSPRU* 6.1.17R(1)(c) or *INSPRU* 6.1.17R(2), it must maintain at all times *tier one capital resources* and *tier two capital resources* of such an amount that its *group capital resources* are equal to or exceed its *group capital resources requirement*.
- 6.1.10 R A *firm* that is both:
- (1) a *composite firm*; and
 - (2) an *undertaking* referred to in *INSPRU* 6.1.17R(1)(c) or *INSPRU* 6.1.17R(2);
- must comply with *INSPRU* 6.1.9R separately in respect of its *long-term insurance business* and its *general insurance business*.
- 6.1.11 R For the purposes of *INSPRU* 6.1.10R, a *firm* must include in the calculation of the *group capital resources* and *group capital resources requirement* of its *long-term insurance business* the *regulated related undertakings* and *ancillary services undertakings* that are *long-term insurance assets*.
- 6.1.12 G *INSPRU* 1.5 sets out the detailed requirements for the separation of *long-term* and *general insurance business*.
- 6.1.13 G In order to comply with *INSPRU* 6.1.10R, a *composite firm* will need to:
- (1) establish the *group capital resources requirement* of its *general insurance business* and its *long-term insurance business* separately; and
 - (2) allocate its *group capital resources* between its *general insurance business* and its *long-term insurance business* so that:

(a) the *group capital resources* allocated to its *general insurance business* are equal to or in excess of the *group capital resources requirement* of its *general insurance business*; and

(b) the *group capital resources* allocated to its *long-term insurance business* are equal to or in excess of the *group capital resources requirement* of its *long-term insurance business*.

6.1.14 G Surplus *group capital resources* in the *long-term insurance business* cannot be used towards meeting the requirements of the *general insurance business* (see *INSPRU* 6.1.41R) but surplus *group capital resources* in the *general insurance business* may be used towards meeting the amount of the *group capital resources requirement* that relates to the *long-term insurance business*.

6.1.15 R (1) Subject to *INSPRU* 6.1.27R, a *firm* must ensure that at all times its *capital resources* are of such an amount that the *group capital resources* of each *undertaking* referred to in *INSPRU* 6.1.17R (excluding those referred to in *INSPRU* 6.1.9R) are equal to or exceed that *undertaking's group capital resources requirement*.

(2) (1) does not apply to a *pure reinsurer* which became a *firm in run-off* before 10 December 2007 and whose *Part IV permission* has not subsequently been varied to add back the *regulated activity* of *effecting contracts of insurance*.

6.1.16 G *Principle 4* requires a *firm* to maintain adequate financial resources, taking into account any activity of other members of the *group* of which the *firm* is a member. *INSPRU* 6.1 sets out provisions that deal specifically with the way the activities of other members of the *group* should be taken into account. This results in the *firm* being required to hold sufficient capital resources so that the *group capital resources* are at least equal to the *group capital resources requirement*. However, the adequacy of the *group capital resources* needs to be assessed both by the *firm* and the *FSA*. *Firms* are required to carry out an assessment of the adequacy of their financial resources under the *overall financial adequacy rule*, the *overall Pillar 2 rule* and *GENPRU* 1.2.39R, and the *FSA* will review this and may provide individual guidance on the amount and quality of *capital resources* the *FSA* considers adequate. As part of such reviews, the *FSA* may also form a view on the appropriateness of the *group capital resources requirement* and *group capital resources*. Where necessary, the *FSA* may also give individual guidance on the *capital resources* a *firm* should hold in order to comply with *Principle 4* expressed by reference to *INSPRU* 6.1.9R and *INSPRU* 6.1.15R.

Scope - undertakings whose group capital is to be calculated and maintained

6.1.17 R The *undertakings* referred to in *INSPRU* 6.1.8R, *INSPRU* 6.1.9R, *INSPRU* 6.1.10R and *INSPRU* 6.1.15R are:

(1) for any *firm* that is not within (2), each of the following:

(a) its *ultimate insurance parent undertaking*;

- (b) its *ultimate EEA insurance parent undertaking* (if different); and
- (c) the *firm* itself, if it is a *participating insurance undertaking*; and
- (2) the *firm* itself, where the *firm* is a *participating insurance undertaking* and is:
 - (a) a *non-EEA insurer*; or
 - (b) a *friendly society*.

- 6.1.18 G Article 3(3) of the *Insurance Groups Directive* allows an *undertaking* to be excluded from supplementary supervision if:
- (1) its head office is in a *non-EEA State* where there are legal impediments to the transfer of the necessary information; or
 - (2) in the opinion of the *competent authority* responsible for exercising supplementary supervision, having regard to the objectives of supplementary supervision:
 - (a) its inclusion would be inappropriate or misleading; or
 - (b) it is of negligible interest.
- 6.1.19 G If an application is made for a *waiver*, it is the policy of the *FSA* to consider the effect, in the circumstances described in *INSPRU* 6.1.18G, of granting a *waiver* allowing the exclusion of a *related undertaking* from the calculation of *group capital resources* and the *group capital resources requirement* required by *INSPRU* 6.1.8R.
- 6.1.20 G Examples of *related undertakings* which may be excluded from supplementary supervision by Article 3(3) of the *Insurance Groups Directive* include *insurance holding companies* in the *insurance group* that are not the *ultimate insurance parent undertaking* or, if different, the *ultimate EEA insurance parent undertaking* of a *firm*.
- 6.1.21 G If more than one member of the *insurance group* is to be excluded in the circumstances described in *INSPRU* 6.1.18G (2)(b), they may only be excluded if, considered together, they are of negligible interest in the context of the *insurance group*.
- 6.1.22 G When giving a *waiver* in the circumstances described in *INSPRU* 6.1.18G, the *FSA* may impose a condition requiring the *firm* to provide information about any member of the *insurance group* excluded pursuant to a *waiver* granted in the circumstances described in *INSPRU* 6.1.18G.
- Optional alternative method of calculation for firms subject to supplementary supervision by another EEA competent authority
- 6.1.23 R If the *competent authority* in an *EEA State* other than the *United Kingdom* has agreed to be the *competent authority* responsible for exercising supplementary supervision of an *insurance group* of which a *firm* is a member under Article 4(2) of the *Insurance Groups Directive*, the *firm* may prepare the calculations required under *INSPRU* 6.1.8R in relation to the *ultimate EEA insurance parent undertaking* in accordance with the requirements of supplementary supervision in that *EEA State*.

6.1.24 G The *FSA* will notify the *firm* if it has reached agreement with the *competent authority* in an *EEA State* other than the *United Kingdom* in accordance with Article 4(2) of the *Insurance Groups Directive*.

Non-EEA ultimate insurance parent undertakings

6.1.25 R Where the *ultimate insurance parent undertaking* of a *firm* has its head office in a non-*EEA State*, the *firm* may:

(1) calculate the *group capital resources* and the *group capital resources requirement* of its *ultimate insurance parent undertaking* in accordance with accounting practice applicable for the purposes of the regulation of *insurance undertakings* in the state or territory of the head office of the *ultimate insurance parent undertaking* adapted as necessary to apply the general principles set out in Annex I (1) paragraphs B, C and D of the *Insurance Groups Directive*; and

(2) elect (see *INSPRU* 6.1.26R) to carry out the calculation referred to in (1) in accordance with the accounting consolidation method set out in Annex I (3) of the *Insurance Groups Directive*.

6.1.26 R A *firm* may elect to use the calculation method referred to in *INSPRU* 6.1.25R(2) if it has made the election by written notice to the *FSA* in a way that complies with the requirements for written notice in SUP 15.7.

6.1.27 R *INSPRU* 6.1.15R does not apply in respect of the *group capital resources* of a *firm's ultimate insurance parent undertaking* if that *ultimate insurance parent undertaking* has its head office in a non-*EEA State*.

Proportional holdings

6.1.28 R Subject to *INSPRU* 6.1.30R and *INSPRU* 6.1.31R, when calculating *group capital resources* and the *group capital resources requirement* of an *undertaking* in *INSPRU* 6.1.17R, a *firm* must take only the relevant proportion of the following items ("calculation items") into account:

(1) the *solo capital resources* of a *regulated related undertaking*;

(2) the assets of a *regulated related undertaking* which are required to be deducted as part of the calculation of *group capital resources*; and

(3) the *individual capital resources requirement* of a *regulated related undertaking*.

6.1.29 R In *INSPRU* 6.1.28R, the relevant proportion is either:

(1) the proportion of the total number of issued *shares* in the *regulated related undertaking* held, directly or indirectly, by the *undertaking* in PRU 8.3.17 R; or

(2) where a *consolidation Article 12(1) relationship* exists between *related undertakings* within the *insurance group*, such proportion as the *FSA* determines in accordance with Article 28(5) of the *Financial Groups Directive* and Regulation 15 of the *Financial Groups Directive Regulations*.

6.1.30 R Where the *undertaking* in *INSPRU* 6.1.17R is a *firm*, if the *individual*

capital resources requirement of a *regulated related undertaking* that is a *subsidiary undertaking* and not an *insurer* exceeds the *solo capital resources* of that *undertaking* less the amount calculated in *INSPRU 6.1.74R (3)* (if any), the full amount of the calculation items of that *regulated related undertaking* less the amount in *INSPRU 6.1.74R (3)* must be taken into account in the calculation of *group capital resources* and the *group capital resources requirement*.

- 6.1.31 R Except where *INSPRU 6.1.30R* applies, if the *individual capital resources requirement* of a *regulated related undertaking* that is a *subsidiary undertaking* of the undertaking in *INSPRU 6.1.17R* exceeds its *solo capital resources*, the full amount of the calculation items of that *regulated related undertaking* must be taken into account in the calculation of *group capital resources* and the *group capital resources requirement*.
- 6.1.32 R For the purposes of *INSPRU 6.1.10R*, where a *composite firm* that is an *undertaking* in *INSPRU 6.1.17R (1)(c)* or (2):
- (1) holds directly or indirectly *shares* in a *regulated related undertaking*; and
 - (2) the *shares* in (1) are held partly by its *long-term insurance business* and partly by its *general insurance business*;
 - (3) the relevant proportion of the calculation items calculated in accordance with *INSPRU 6.1.29R*, subject to *INSPRU 6.1.30R* and *INSPRU 6.1.31R*, must be allocated between the *long-term* and *general insurance business* in proportion to their respective holdings, directly or indirectly, in the *shares* in that *regulated related undertaking*.

Calculation of the GCRR

- 6.1.33 R Subject to *INSPRU 6.1.23R* and *INSPRU 6.1.25R*, a *firm* must calculate the *group capital resources requirement* of an *undertaking* in *INSPRU 6.1.17R* as the sum of the *individual capital resources requirement* of that *undertaking* and the *individual capital resources requirement* of each of its *regulated related undertakings*.
- 6.1.34 R For the purposes of *INSPRU 6.1*, an *individual capital resources requirement* is:
- (1) in respect of any *insurer*:
 - (a) its *capital resources requirement* calculated in accordance with *GENPRU 2.1*; less
 - (b) where the *capital resources requirements* of both the *insurer* and its *insurance parent undertaking* that is an *insurer* include *with-profits insurance capital components*, any element of double-counting that may arise from the aggregation of the *individual capital resources requirements* for the purposes of *INSPRU 6.1.33R*;
 - (2) in respect of an *EEA insurer* (other than an *EEA pure reinsurer*), the equivalent of the *capital resources requirement* as calculated in accordance with the applicable requirements in its *Home State*;
 - (3) in respect of an *EEA pure reinsurer*, the equivalent of the *capital*

resources requirement as calculated in accordance with the applicable requirements in its *Home State*;

(4) in respect of an *insurance undertaking* that is not within (1), (2) or (3) and whose head office is in a *designated State or territory*, either:

(a) its *proxy capital resources requirement*; or

(b) the solo capital resources requirement that applies to it under the *sectoral rules* for the *insurance sector* of the *designated State or territory*;

(5) in respect of an *insurance undertaking* within (4) which is not subject to a solo capital resources requirement under the *sectoral rules* for the *insurance sector* of that *designated State or territory*, its *proxy capital resources requirement*;

(6) in respect of an *insurance undertaking* that is not within (1) to (5), its *proxy capital resources requirement*;

(7) in respect of an *insurance holding company*, zero;

(8) [intentionally blank]

(9) in respect of a *regulated entity* (excluding an *insurance undertaking*), its *solo capital resources requirement*;

(10) in respect of an *asset management company*, the *solo capital resources requirement* that would apply to it if, in connection with its activities, it were treated as being in the *investment services sector*;

(11) in respect of a *financial institution* that is not a *regulated entity* (including a *financial holding company*), the *solo capital resources requirement* that would apply to it if, in connection with its activities, it were treated as being within the *banking sector*; and

(12) in respect of an *EEA ISPV*, the solo capital resources requirement that applies to the *ISPV* under the *sectoral rules* for the *insurance sector* of the *Member State* of the *competent authority* that authorised the *ISPV*.

6.1.34A G For the purposes of *INSPRU* 6.1.34R(4)(b), where the solo capital resources requirement under the *sectoral rules* for the *insurance sector* in a *designated State or territory* is ascertained by reference to the trigger for regulatory intervention, the *FSA* considers that the solo capital resources requirement of the *insurance undertaking* in such a *designated State or territory* will generally correspond to the highest point at which any regulatory or corrective action is triggered or which is at least comparable to the *capital resources requirement* which would apply if the *insurance undertaking* were an *insurer*.

6.1.35 G [intentionally blank]

Calculation of GCR

6.1.36 R For the purposes of *INSPRU* 6.1.8R and subject to *INSPRU* 6.1.23R and *INSPRU* 6.1.25R, a *firm* must calculate the group capital resources of an *undertaking* in *INSPRU* 6.1.17R in accordance with the table in *INSPRU* 6.1.43R, subject to the limits in *INSPRU* 6.1.45R.

- 6.1.37 R For the purposes of *INSPRU* 6.1, the following expressions when used in relation to either an *undertaking* in *INSPRU* 6.1.17R or a *regulated related undertaking* which is not subject to the *capital resources table*, are to be construed as if that *undertaking* were required to calculate its capital resources in accordance with the *capital resources table*, but with such adjustments being made to secure that the *undertaking's* calculation of its *solo capital resources* complies with the relevant *sectoral rules* applicable to it:
- (1) *tier one capital resources*;
 - (2) *tier two capital resources*;
 - (3) *upper tier two capital resources*;
 - (4) *lower tier two capital resources*;
 - (5) *innovative tier one capital resources*; and
 - (6) *core tier one capital*.
- 6.1.38 R For the purposes of *INSPRU* 6.1.37R, the *sectoral rules* applicable to:
- (1) an *insurance holding company* whose main business is to acquire and hold participations in *subsidiary undertakings* which are either exclusively or mainly *reinsurance undertakings* are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as a *pure reinsurer*;
 - (2) an *insurance holding company* not within (1) are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as an *insurer*;
 - (3) an *asset management company* are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as an *investment firm*; and
 - (4) subject to *INSPRU* 6.1.39R, a *financial institution*, that is not a *regulated entity*, are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as being within the *banking sector*.
- 6.1.39 R Where a *financial institution*, that is not a *regulated entity*, has invested in *tier one capital* or *tier two capital* issued by a *parent undertaking* that is:
- (1) an *insurance holding company*; or
 - (2) an *insurer*;
- the *sectoral rules* that apply to that *financial institution* are the *sectoral rules* for the *insurance sector*.
- 6.1.40 R For the purposes of *INSPRU* 6.1.36R, the capital resources of a *financial institution* within *INSPRU* 6.1.39R that can be included in the calculations in *INSPRU* 6.1.48R(2), *INSPRU* 6.1.50R(2), *INSPRU* 6.1.53R(2), *INSPRU* 6.1.55R(2) and *INSPRU* 6.1.57R(2) are:
- (1) the issued *tier one capital* or *tier two capital* of that *financial institution* held, directly or indirectly, by its *parent undertaking* referred to in *INSPRU* 6.1.39R; and
 - (2) the lower of:

(a) the *tier one capital* or *tier two capital* issued by the *parent undertaking* referred to in *INSPRU 6.1.39R* pursuant to the investment by the *financial institution*; and

(b) the *tier one capital* or *tier two capital* issued by the *financial institution* to raise funds for its investment in the capital resources of the *parent undertaking* referred to in (a).

6.1.41 R (1) In calculating *group capital resources*, a *firm* must exclude the restricted assets of a *regulated related undertaking* except insofar as those assets are available to meet the *individual capital resources requirement* of that *regulated related undertaking*.

(2) In (1), "restricted assets" means assets of a *regulated related undertaking* which are subject to a legal restriction or other requirement having the effect that those assets cannot be transferred or otherwise made available to another *regulated related undertaking* for the purposes of meeting its *individual capital resources requirement* without causing a breach of that legal restriction or requirement.

6.1.42 G For the purposes of *INSPRU 6.1.41R*, in respect of an *insurance undertaking* that is a member of an *insurance group*, the assets of a *long-term insurance fund* are restricted assets within the meaning of *INSPRU 6.1.41R*. Any excess of assets over liabilities in the *long-term insurance business* may only be included in the calculation of the *group capital resources* up to the amount of the *capital resources requirement* related to that *long-term insurance business*.

6.1.42A R For the purposes of calculating *group capital resources*, a *firm* must exclude the book value of any investment by a *related undertaking* of the *undertaking* in *INSPRU 6.1.17R* in shares of, or loans to, an *undertaking* that is not a *related undertaking*, where that *undertaking* has invested in the *capital resources* of a *regulated related undertaking* of the *undertaking* in *INSPRU 6.1.17R*.

6.1.43 R Table: Group capital resources

	Stage	Related text
Total group tier one capital	A	<i>INSPRU 6.1.48R</i>
Total group tier two capital	B	<i>INSPRU 6.1.50R</i>
Group capital resources before deductions	$C=(A+B)$	
Total deductions of inadmissible assets	D	<i>INSPRU 6.1.59R</i>
Total deductions under the requirement deduction method from group capital resources	E	<i>INSPRU 6.1.62R</i>

Total deductions of ineligible surplus capital*	F	<i>INSPRU 6.1.65R</i>
Deduction of assets in excess of market risk and counterparty exposure limits*	G	<i>INSPRU 6.1.70R</i>
Group capital resources	H=(C-(D+E+F*+G*))	
* = section (F) of the table (the deductions for ineligible surplus capital) and section (G) of the table (assets in excess of market risk and counterparty exposure limits) only apply and are required to be calculated for the purposes of the adjusted solo calculation of an <i>undertaking</i> in <i>INSPRU 6.1.17R</i> that is a <i>participating insurance undertaking</i> .		

Calculation of GCR - Limits on the use of different forms of capital

- 6.1.44 G As the various components of capital differ in the degree of protection that they offer the *insurance group*, restrictions are placed on the extent to which certain types of capital are eligible for inclusion in the *group capital resources* of the *undertaking* in *INSPRU 6.1.17R*. These restrictions are set out in *INSPRU 6.1.45R*.
- 6.1.45 R (1) For the purposes of *INSPRU 6.1.9R*, *INSPRU 6.1.10R* and *INSPRU 6.1.15R*, a *firm* must ensure that at all times its *tier one capital resources* and *tier two capital resources* are of such an amount that the *group capital resources* of the *undertaking* in *INSPRU 6.1.17R* comply with the following limits:
- (a) $(P - Q) \geq \frac{1}{2} (R - S)$;
 - (b) $(P - Q + T - W) \geq \frac{3}{4} (R - S)$;
 - (c) $V \geq \frac{1}{2} P$;
 - (d) $Q \leq 15\%$ of P;
 - (e) $T \leq P$; and
 - (f) $W \leq \frac{1}{2} P$
- (2) For the purposes of *INSPRU 6.1.9R* and *INSPRU 6.1.10R*, a *firm* must ensure that at all times its *tier one capital resources* and *tier two capital resources* are of such an amount that its *group capital resources* comply with the following limit, subject to (4)
- $$(P - Q + T) \geq \frac{1}{3} X + (R - S - U - X).$$
- (3) For the purposes of (1) and (2):
- (a) P is the *total group tier one capital* of the *undertaking* in *INSPRU 6.1.17R*;
 - (b) Q is the sum of the *innovative tier one capital resources* calculated in accordance with *INSPRU 6.1.53R*;

(c) R is the *group capital resources requirement* of the *undertaking* in *INSPRU 6.1.17R*;

(d) S is the sum of all the *with-profits insurance capital components* of an *undertaking* in *INSPRU 6.1.17R* that is an *insurer* and each of its *regulated related undertakings* that is an *insurer*;

(e) T is the *total group tier two capital* of the *undertaking* in *INSPRU 6.1.17R*;

(f) U is the sum of all the *resilience capital requirements* of an *undertaking* in *INSPRU 6.1.17R* that is an *insurer* and each of its *regulated related undertakings* that is an *insurer*;

(g) V is the sum of all the *core tier one capital* calculated in accordance with *INSPRU 6.1.55R*;

(h) W is the sum of the *lower tier two capital resources* calculated in accordance with *INSPRU 6.1.57R*; and

(i) X is the *MCR* of the *firm* less its *resilience capital requirement*, if any.

(4) For the purposes of (2):

(a) *INSPRU 6.1.45R (1)(a)* does not apply;

(b) the *innovative tier one capital* of the *firm* or its *regulated related undertakings* that meets the conditions for it to be *upper tier two capital* may be included as *upper tier two capital* for the purpose of the calculation in *INSPRU 6.1.50R*; and

(c) the *firm* must exclude from the calculation of (P - Q + T) in (2) the higher of:

(i) any amount by which the *total group tier two capital* exceeds the *group capital resources* of the *firm* less any *innovative tier one capital* excluded by (b); and

(ii) any amount by which the sum of *lower tier two capital resources* calculated in accordance with *INSPRU 6.1.57R* exceeds one third of the *group capital resources* of the *firm* less any *innovative tier one capital* excluded by (b).²

6.1.46 G The amount of any capital item excluded from *group capital resources* under *INSPRU 6.1.45R (1)(d)* may form part of *total group tier two capital* calculated in accordance with *INSPRU 6.1.50R* subject to the limits in *INSPRU 6.1.45R (1)(e)* and (f).

6.1.47 R For the purposes of *INSPRU 6.1.10R*, a *firm* must ensure that the *tier one capital resources* and *tier two capital resources* of each of its *long-term insurance business* and its *general insurance business* are of such an amount that the *group capital resources* of each its *long-term insurance business* and its *general insurance business* comply with the limits in *INSPRU 6.1.45R* separately for each type of business.

Calculation of GCR - Total group tier one capital

6.1.48 R For the purposes of *INSPRU 6.1.43R*, the *total group tier one capital* of an

undertaking in *INSPRU* 6.1.17R is the sum of:

(1) the *tier one capital resources* of the *undertaking* in *INSPRU* 6.1.17R;
and

(2) subject to *INSPRU* 6.1.40R, the *tier one capital resources* of each of the *related undertakings* of that *undertaking* that is a *regulated related undertaking* after the deduction in *INSPRU* 6.1.49R.

- 6.1.49 R The deduction referred to in *INSPRU* 6.1.48R is the sum of:
- (1) the book value of the investment by the *undertaking* in *INSPRU* 6.1.17R in the *tier one capital resources* of each of its *related undertakings* that is a *regulated related undertaking*; and
- (2) the book value of the investments by *related undertakings* of the *undertaking* in *INSPRU* 6.1.17R in the *tier one capital resources* of the *undertaking* in *INSPRU* 6.1.17R and each of its *related undertakings* that is a *regulated related undertaking*.

Calculation of GCR - Total group tier two capital

- 6.1.50 R For the purposes of *INSPRU* 6.1.43R, the *total group tier two capital* of an *undertaking* in *INSPRU* 6.1.17R is the sum of:
- (1) the *upper tier two capital resources* and the *lower tier two capital resources* of that *undertaking*; and
- (2) subject to *INSPRU* 6.1.40R, the *upper tier two capital resources* and the *lower tier two capital resources* of each of the *related undertakings* of that *undertaking* that is a *regulated related undertaking* after the deduction in *INSPRU* 6.1.51R.

- 6.1.51 R The deduction referred to in *INSPRU* 6.1.50R is the sum of:
- (1) the book value of the investments by the *undertaking* in *INSPRU* 6.1.17R in the *upper tier two capital resources* and the *lower tier two capital resources* of each of its *related undertakings* that is a *regulated related undertaking*; and
- (2) the book value of the investments by *related undertakings* of the *undertaking* in *INSPRU* 6.1.17R in the *upper tier two capital resources* and the *lower tier two capital resources* of the *undertaking* in *INSPRU* 6.1.17R and each of its *related undertakings* that is a *regulated related undertaking*.

- 6.1.52 G For the purposes of *INSPRU* 6.1.50R(2), the limits in *GENPRU* 2.2.37R apply to the *upper tier two capital resources* and the *lower tier two capital resources* of any *regulated related undertaking* that is an *insurer*. Similar limits may apply to other *regulated related undertakings* under the relevant *sectoral rules*.

Calculation of GCR - Innovative tier one capital resources, lower tier two capital resources and core tier one capital

- 6.1.53 R For the purposes of *INSPRU* 6.1.45R(3)(b), the *innovative tier one capital resources* is the sum of:
- (1) the *innovative tier one capital resources* of the *undertaking* in *INSPRU*

6.1.17R; and

(2) subject to *INSPRU* 6.1.40R, the *innovative tier one capital resources* of each of the *related undertakings* of that *undertaking* that is a *regulated related undertaking* after the deduction in *INSPRU* 6.1.54R.

- 6.1.54 R The deduction referred to in *INSPRU* 6.1.53R is the sum of:
- (1) the book value of the investments by the *undertaking* in *INSPRU* 6.1.17R in the *innovative tier one capital resources* of each of its *related undertakings* that is a *regulated related undertaking*; and
 - (2) the book value of the investments by *related undertakings* of the *undertaking* in *INSPRU* 6.1.17R in the *innovative tier one capital resources* of the *undertaking* in *INSPRU* 6.1.17R and each of its *related undertakings* that is a *regulated related undertaking*.
- 6.1.55 R For the purposes of *INSPRU* 6.1.45R(3)(g), the *core tier one capital* is the sum of:
- (1) the *core tier one capital* of the *undertaking* of *INSPRU* 6.1.17R; and
 - (2) subject to *INSPRU* 6.1.40R, the *core tier one capital* of each of the *related undertakings* of that *undertaking* that is a *regulated related undertaking* after the deduction in *INSPRU* 6.1.56R.
- 6.1.56 R The deduction referred to in *INSPRU* 6.1.55R is the sum of:
- (1) the book value of the investments by the *undertaking* in *INSPRU* 6.1.17R in the *core tier one capital* of each of its *related undertakings* that is a *regulated related undertaking*; and
 - (2) the book value of the investments by *related undertakings* of the *undertaking* in *INSPRU* 6.1.17R in the *core tier one capital* of the *undertaking* in *INSPRU* 6.1.17R and each of its *related undertakings* that is a *regulated related undertaking*.
- 6.1.57 R For the purposes of *INSPRU* 6.1.45R(3)(h), the *lower tier two capital resources* is the sum of:
- (1) the *lower tier two capital resources* of the *undertaking* in *INSPRU* 6.1.17R; and
 - (2) subject to *INSPRU* 6.1.40R, the *lower tier two capital resources* of each of the *related undertakings* of that *undertaking* that is a *regulated related undertaking* after the deduction in *INSPRU* 6.1.58R.
- 6.1.58 R The deduction referred to in *INSPRU* 6.1.57R is the sum of:
- (1) the book value of the investments by the *undertaking* in *INSPRU* 6.1.17R in the *lower tier two capital resources* of each of its *related undertakings* that is a *regulated related undertaking*; and
 - (2) the book value of the investments by *related undertakings* of the *undertaking* in *INSPRU* 6.1.17R in the *lower tier two capital resources* of the *undertaking* in *INSPRU* 6.1.17R and each of its *related undertakings* that is a *regulated related undertaking*.

Calculation of GCR - Inadmissible assets

- 6.1.59 R For the purpose of *INSPRU* 6.1.43R, a *firm* must deduct from the group capital resources before deduction (calculated at stage C in the table in *INSPRU* 6.1.43R) of the *undertaking* in *INSPRU* 6.1.17R, the value of all assets of the *undertaking* in *INSPRU* 6.1.17R and each of its *regulated related undertakings* that are not admissible assets as set out in *INSPRU* 6.1.60R.
- 6.1.60 R For the purposes of *INSPRU* 6.1.59R, an asset is not an admissible asset if:
- (1) in respect of a *regulated related undertaking* or *undertaking* in *INSPRU* 6.1.17R that is an *insurer* (other than a *pure reinsurer*), it is not an *admissible asset* as listed in *GENPRU* 2 Annex 7R;
 - (2) in respect of a *regulated related undertaking* or *undertaking* in *INSPRU* 6.1.17R that is a *pure reinsurer*, the holding of the asset is inconsistent with compliance by that *undertaking* with *INSPRU* 3.1.61AR; or
 - (3) in respect of a *regulated related undertaking* or *undertaking* in *INSPRU* 6.1.17R that is not an *insurer*, it is an asset of the *undertaking* that is not admissible for the purpose of calculating that *undertaking's solo capital resources* in accordance with the *sectoral rules* applicable to it.
- 6.1.61 R For the purposes of *INSPRU* 6.1.60R(3), the *sectoral rules* applicable to:
- (1) an *asset management company* are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as an *investment firm*; and
 - (2) a *financial institution* that is not a *regulated entity* are the *sectoral rules* that would apply to it if, in connection with its activities, it were treated as being within the *banking sector*.

Calculation of GCR - Deductions under requirement deduction method from group capital resources

- 6.1.62 R For the purposes of *INSPRU* 6.1.43R, a *firm* must deduct from the group capital resources before deduction (calculated at stage C in the table in *INSPRU* 6.1.43R) of an *undertaking* in *INSPRU* 6.1.17R, the sum of the value of the direct or indirect investments by the *undertaking* in *INSPRU* 6.1.17R in each of its *related undertakings* which is an *ancillary services undertaking*, calculated in accordance with *INSPRU* 6.1.63R.
- 6.1.63 R The value of an investment in an *undertaking* referred to in *INSPRU* 6.1.62R is the higher of the book value of the direct or indirect investment by the *undertaking* in *INSPRU* 6.1.17R and the notional capital resources requirement of that *undertaking*.
- 6.1.64 R For the purposes of *INSPRU* 6.1.63R, the notional capital resources requirement is:
- (1) for an *ancillary insurance services undertaking*, zero;
 - (2) for any other *ancillary services undertaking*, the *capital resources requirement* that would apply to that *undertaking*, if it were a *regulated*

related undertaking, in accordance with the *sectoral rules* applicable to a *regulated related undertaking* whose activities are closest in nature and scope to the activities of that *undertaking*.

Calculation of GCR - Deductions of ineligible surplus capital

- 6.1.65 R Where the *undertaking* in *INSPRU 6.1.17R* is a *participating insurance undertaking*, the *firm* must, for the purposes of *INSPRU 6.1.43R*, deduct from its group capital resources before deduction (calculated at stage C in the table in *INSPRU 6.1.43R*) the sum of the ineligible surplus capital of each of its *regulated related undertakings* that is an *insurance undertaking*, calculated in accordance with *INSPRU 6.1.67R*.
- 6.1.66 G The purpose of *INSPRU 6.1.65R* is to ensure that, where the *undertaking* in *INSPRU 6.1.17R* is a *firm*, *group capital resources* are not overstated by the inclusion of capital that, although surplus to the requirements of the relevant *regulated related undertaking* that is an *insurance undertaking*, cannot practically be transferred to support requirements arising elsewhere in the group. Therefore, ineligible surplus capital in a *regulated related undertaking* that is an *insurance undertaking* is deducted in arriving at *group capital resources*. Surplus capital in such a *regulated related undertaking* is regarded as transferable only to the extent that:
- (1) it can be transferred without the *regulated related undertaking* breaching its own limits on the use of different forms of capital;
 - (2) it does not contain assets that are restricted within the meaning of *INSPRU 6.1.41R*; and
 - (3) in the case of a *regulated related undertaking* that has a *long-term insurance business*, it does not contain any assets allocated to the *capital resources* of that *undertaking* for the purposes of the *capital resources* of its *long-term insurance business* meeting the *capital resources requirement* of its *long-term insurance business*.
- 6.1.67 R (1) For the purposes of *INSPRU 6.1.65R*, the ineligible surplus capital of a *regulated related undertaking* that is an *insurance undertaking* is calculated by deducting B from A where:
- (a) A is the *regulatory surplus value* of that *insurance undertaking* less any restricted assets of the *insurance undertaking* that have been excluded under *INSPRU 6.1.41R*; and
 - (b) B is the transferable capital of that *undertaking*.
- (2) If A minus B is negative, the ineligible surplus capital is zero.
- 6.1.68 R For the purposes of *INSPRU 6.1.67R(1)(b)*, the transferable capital is calculated by deducting the sum of the following from the *tier one capital resources* of the *regulated related undertaking* that is an *insurance undertaking*:
- (1) any restricted assets of that *insurance undertaking* that have been excluded under *INSPRU 6.1.41R*;
 - (2) any *tier one capital resources* of that *insurance undertaking* that have been allocated towards meeting the *individual capital resources requirement*

of its *long-term insurance business*; and

(3) the higher of:

(a) 50% of the *individual capital resources requirement* of the *general insurance business* of that *insurance undertaking*; and

(b) the *individual capital resources requirement* of the *general insurance business* of that *insurance undertaking* less the difference between E and F where:

(i) E is its *tier two capital resources*; and

(ii) F is the amount of its *tier two capital resources* that have been allocated towards meeting the *individual capital resources requirement* of its *long-term insurance business*.

Examples of transferable and ineligible surplus capital:

6.1.69 G Example 1

Share capital	Audited reserves	FFA	Tier two	Requirement
30	20	0	40	50

(i) Under *INSPRU* 6.1.68R, transferable capital = *tier one capital resources* of 50, less the sum of:

(1) restricted assets excluded under *INSPRU* 6.1.41R = (none);

(2) *tier one capital resources* allocated to the *long-term insurance business* = (none); and

(3) higher of (50% of 50 = 25 and 50 - 40 = 10) = (25) = (50 - 25) = 25

(2) Under *INSPRU* 6.1.67R, ineligible surplus capital = *regulatory surplus value* (40) less restricted assets excluded under *INSPRU* 6.1.41R (0) less transferable capital (25) = 15.

Example 2

Share capital	Audited reserves	FFA (of which 5 is restricted)	Tier two	Requirement (of which 4 relates to the <i>long-term insurance business</i>)
30	20	10	40	50

(i) Under *INSPRU* 6.1.68R, transferable capital = *tier one capital resources* of 60, less the sum of:

- (1) restricted assets excluded under *INSPRU* 6.1.41R = (5);
- (2) *tier one capital resources* allocated to the *long-term insurance business* = (5); and
- (3) the higher of (50% of 45 = 22.5; and 45 - 40 = 5) = (22.5) = 60 - 32.5 = 27.5
- (ii) Under *INSPRU* 6.1.67R, ineligible surplus capital = *regulatory surplus value* (50) - restricted assets excluded under *INSPRU* 6.1.41R of (5) - transferable capital (27.5) = 17.5.

Example 3

Share capital	Audited reserves	FFA (of which 0 is restricted)	Tier two (40, of which 5 is excluded at the solo level - see below)	Requirement (of which 25 relates to the <i>long-term insurance business</i>)
20	10	20	35	50

The requirement relating to the *long-term insurance business* is met by the FFA of 20 and *tier two capital resources* of 5. Of the remaining *tier two capital resources* of 35, 5 is excluded at the solo level because the *tier one capital resources* allocated to the *general insurance business* are 30.

(i) Under *INSPRU* 6.1.68R, transferable capital = *tier one capital resources* of 50, less the sum of:

- (1) restricted assets excluded under *INSPRU* 6.1.41R = (none);
- (2) *tier one capital resources* allocated to the *long-term insurance business* = (20); and
- (3) the higher of (50% of 25 = 12.5; and 25 - (35 - 5) = -5) = (12.5) = 50 - 32.5 = 17.5.
- (ii) Under *INSPRU* 6.1.67R, ineligible surplus capital = *regulatory surplus value* (35) - restricted assets excluded under *INSPRU* 6.1.41R of (0) - transferable capital (17.5) = 17.5.

Calculation of GCR - Assets in excess of market risk and counterparty exposure limits

- 6.1.70 R Subject to *INSPRU* 6.1.70AR, where the *undertaking* in *INSPRU* 6.1.17R is a *participating insurance undertaking*, the *firm* must deduct from its group capital resources before deduction (calculated at stage C in the table in *INSPRU* 6.1.43R) the assets in excess of *market risk* and *counterparty* exposure limits calculated in accordance with *INSPRU* 6.1.74R.
- 6.1.70A R Where the *undertaking* in *INSPRU* 6.1.17R is a *pure reinsurer* that is a *participating insurance undertaking*, the *firm* must calculate assets in

accordance with *INSPRU* 6.1.74AR and deduct from its group capital resources before deduction (calculated at stage C in the table in *INSPRU* 6.1.43R) those assets the holding of which is inconsistent with compliance by that *undertaking* with *INSPRU* 3.1.61AR.

- 6.1.71 G For the purposes of *INSPRU* 6.1.43R, where the *undertaking* in *INSPRU* 6.1.17R is a *participating insurance undertaking*, the investments referred to in *INSPRU* 6.1.48R and *INSPRU* 6.1.50R are not subject to the *market risk* and *counterparty* exposure limits.
- 6.1.72 R The *firm* (A) must, subject to *INSPRU* 6.1.73R, include in the calculation in *INSPRU* 6.1.74R or, where A is a *pure reinsurer*, *INSPRU* 6.1.74AR each *related undertaking* (B) that is:
- (1) a *regulated related undertaking* that is a *subsidiary undertaking*; or
 - (2) a *related undertaking* where the *firm* has elected to value the *shares* held in that *undertaking* by the *firm* in accordance with *GENPRU* 1.3.47R for the purposes of calculating the *tier one capital resources* of the *firm*.
- 6.1.73 R The *related undertakings* in *INSPRU* 6.1.72R need only be included in the calculation in *INSPRU* 6.1.74R or *INSPRU* 6.1.74AR if:
- (1) where B is a *regulated related undertaking*, the *solo capital resources* of that *undertaking* exceed its *individual capital resources requirement*; or
 - (2) where B is an *undertaking* in *INSPRU* 6.1.72R (2), its assets that fall within one or more of the categories in *GENPRU* 2 Annex 7R exceed its accounting liabilities.
- 6.1.74 R A's assets in excess of the *market risk* and *counterparty* exposure limits are calculated as follows:
- (1) Subject to (2), a *firm* must apply the *market risk* and *counterparty* exposure limits in *INSPRU* 2.1.22R(3) to:
 - (a) where B is an *insurer*, the *admissible assets* of B;
 - (b) where B is a *pure reinsurer*, the assets of that *undertaking* less those assets identified in *INSPRU* 6.1.60R(2) as not being admissible; and
 - (c) where B is a *regulated related undertaking* that is not an *insurer*, the assets of that *undertaking* less those assets identified in *INSPRU* 6.1.60R(3) as not being admissible assets.
 - (2) The *market risk* and *counterparty* exposure limits do not need to be applied to an *undertaking* in *INSPRU* 6.1.72R(2).
 - (3) Where the assets of B in *INSPRU* 6.1.74R(1) exceed the limits in *INSPRU* 2.1.22R(3), the assets of B in excess of the limits must be deducted by the *firm* from B's *solo capital resources* for the purposes of *INSPRU* 6.1.30R.
 - (4) After the application of (1) and (2), the surplus assets of B are aggregated with the *admissible assets* of A, where the surplus assets of B are:
 - (a) where B is a *firm* (other than a *pure reinsurer*), the *admissible assets* of B that represent the amount by which the *capital resources* of B exceed its

capital resources requirement, subject to *INSPRU* 6.1.77R, and limited to the amount of transferable capital calculated in accordance with *INSPRU* 6.1.68R;

(b) where B is a *regulated related undertaking* that is not in (a), the assets of the *undertaking* in *INSPRU* 6.1.74R(1)(b) or (c) that represent the amount by which the *solo capital resources* of B exceed its *individual capital resources requirement* and, where B is an *insurance undertaking* that is not in (a), limited to the amount of transferable capital calculated in accordance with *INSPRU* 6.1.68R; and

(c) where B is an *undertaking* in *INSPRU* 6.1.72R(2), the assets of the *undertaking* which represent those assets that fall within one or more of the categories in *GENPRU* 2 Annex 7R which exceed its accounting liabilities.

(5) The *market risk* and *counterparty* exposure limits are then applied to the aggregate of A's *admissible assets* and the surplus assets in *INSPRU* 6.1.74R(4).

- 6.1.74A R A must apply *INSPRU* 3.1.61AR to the aggregate of:
- (1) the assets of A, less any assets already identified in *INSPRU* 6.1.60R(2) as not being admissible; and
 - (2) the surplus assets of B calculated in accordance with *INSPRU* 6.1.74R(1) to (4) as if that *rule* applied to B.
- 6.1.75 R (1) Subject to (2), A must then deduct the amount by which the *admissible assets* aggregated in accordance with *INSPRU* 6.1.74R(5) exceed the *market risk* and *counterparty* exposure limits from A's group capital resources before deduction (calculated at stage C in the table in *INSPRU* 6.1.43R) in accordance with *INSPRU* 6.1.70R.
- (2) Where A is a *pure reinsurer*, A must then deduct the amount of any assets identified by *INSPRU* 6.1.74AR as not complying with *INSPRU* 3.1.61AR in accordance with *INSPRU* 6.1.70AR.
- 6.1.76 R In relation to any of its *regulated related undertakings* that is not an *insurer*, A may modify the calculation in *INSPRU* 6.1.74R by:
- (1) omitting the calculation in *INSPRU* 6.1.74R (1) and (3); and
 - (2) aggregating all of the assets of B identified in *INSPRU* 6.1.74R(1)(b) as admissible assets with the *admissible assets* of A in *INSPRU* 6.1.74R (4).
- 6.1.77 R The *admissible assets* of either A or B that are part of a *long-term insurance fund* of A or B are excluded for the purposes of the calculation in *INSPRU* 6.1.74R and *INSPRU* 6.1.74AR except insofar as those assets are available to meet the liabilities and *capital resources requirement* of that *long-term insurance fund*.
- 6.1.78 R If B is itself either a *participating insurance undertaking* or an *insurance parent undertaking*, the *admissible assets* of B for the purposes of *INSPRU*

6.1.74R (1) must be calculated as in *INSPRU* 6.1.75R but as if B were A.

7.1 Individual Capital Assessment

Application

7.1.1 R *INSPRU* 7.1 applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) a *Swiss general insurer*; or
- (3) an *EEA-deposit insurer*; or
- (4) an *incoming EEA firm*; or
- (5) an *incoming Treaty firm*.

Purpose

7.1.2 G Principle 4 requires a *firm* to maintain adequate financial resources. *GENPRU* 2 sets out provisions that deal specifically with the adequacy of that part of a *firm's* financial resources that consists of *capital resources*. The adequacy of a *firm's capital resources* needs to be assessed both by the *firm* and the *FSA*. In *INSPRU* 7.1, the *FSA* sets minimum *capital resources requirements* for *firms*. It also reviews a *firm's* own assessment of its capital needs, and the processes and systems by which that assessment is made, in order to see if the minimum *capital resources requirements* are appropriate. *GENPRU* 1.2 contains *rules* requiring a *firm* to identify and assess risks to its being able to meet its liabilities as they fall due, to assess how it intends to deal with those risks and to quantify the financial resources it considers necessary to mitigate those risks. To meet these requirements, a *firm* should consider the extent to which capital is an appropriate mitigant for the risks identified and assess the amount and quality of capital required. In accordance with *GENPRU* 1.2.60R, these assessments must be documented so that they can be easily reviewed by the *FSA* as part of the *FSA's* assessment of the adequacy of the *firm's capital resources*.

7.1.3 G This section (*INSPRU* 7.1) sets out *guidance* on how *firms* should assess the adequacy of their *capital resources*, both to comply with the *rules* in *GENPRU* 1.2 and to enable the *FSA* better to assess whether the minimum *capital resources requirements* in *GENPRU* 2.1 are appropriate. This section also requires *firms* carrying on *general insurance business* to calculate their *ECR*. The *ECR* for *firms* carrying on *general insurance business* is an indicative measure of the *capital resources* that a *firm* may need to hold based on risk sensitive calculations applied to its business profile. For *realistic basis life firms*, the *ECR* forms part of the calculation of the *firm's capital resources requirement* (see *GENPRU* 2.1.18R). The *ECR* for such *firms* requires the calculation of a *with-profits insurance capital component* (see *INSPRU* 1.3) that supplements the *mathematical reserves* so as to ensure that a *firm* holds adequate financial resources for the

conduct of its *with-profits insurance business*. In the case of *firms* carrying on *general insurance business* and *realistic basis life firms*, the *FSA* will use the *ECR* as a benchmark for its consideration of the appropriateness of the *firm's* own capital assessment. For *firms* where an *ECR* is not calculated the *MCR* will provide a benchmark for the *firm's* own capital assessment. For *firms* generally, the more thorough, objective and prudent a *firm's* capital assessment is and can be demonstrated as being, the more reliance the *FSA* will be able to place on the results of that assessment. The *FSA* will consider the appropriateness of the *firm's* capital assessment to establish the level of *capital resources* the *firm* needs. This may result in the *FSA's* assessment of a *firm's capital resources* needs being lower or higher than would otherwise be the case.

- 7.1.4 G There are two main purposes of this section:
- (1) to enable *firms* to understand the issues which the *FSA* would expect to see assessed and the systems and processes which the *FSA* would expect to see in operation for capital adequacy assessments by the *firm* to be regarded as thorough, objective and prudent; and
 - (2) to enable *firms* to understand the *FSA's* approach to assessing whether the minimum *capital resources requirements* of *GENPRU 2.1* are appropriate and what action may be taken if the *FSA* concludes that those requirements are not appropriate to a *firm's* circumstances.

Main requirements and guidance

- 7.1.5 G In making an assessment of capital adequacy, the *FSA* requires *firms* to identify the major risks they face and, where capital is appropriate to mitigate those risks, to quantify how much (and what type) of capital is appropriate. To do this, the *FSA* expects *firms* to conduct stress tests and scenario analyses in respect of each risk. For each risk the *firm* will then be able to estimate a range of probable outcomes and hence capital required to absorb losses which might arise. A *firm* must document the results of each of the stress tests and scenario analyses undertaken and should also document, as part of the details of those tests and analyses, the key assumptions including the aggregation of the results.
- 7.1.6 G The assessment which a *firm* makes should be based upon its future business plans and projections. This is the main area where the *firm's* assessment may diverge from its prescribed *capital resources requirement* which, necessarily, is based upon historic data.
- 7.1.7 G In assessing the quality and the amount of *capital resources* projected to be available to meet its projected *capital resources requirement*, a *firm* should consider the timing of its liabilities to repay existing capital together with the prospects for raising new capital in the scenarios considered.
- 7.1.8 G The *FSA* may ask for the results of a *firm's* assessment to be provided to it together with a description of the processes by which the assessment has

been made, the range of results from each stress test or scenario analysis performed and the main assumptions made. The *FSA* may also carry out a more detailed examination of the details of the *firm's* processes and calculations.

- 7.1.9 G Based upon this information and other information available to the *FSA*, the *FSA* will consider whether the *capital resources requirement* applicable to the *firm* is appropriate. Where relevant, the *firm's ECR* will be a key input to the *FSA's* assessment of the adequacy of the *firm's capital resources*.
- 7.1.10 R A *firm* carrying on *general insurance business*, other than a *non-directive insurer*, must calculate the amount of its *ECR*.
- 7.1.11 R A *firm* to which *INSPRU 7.1.10R* applies must calculate its *ECR* in respect of its *general insurance business* as the sum of:
(1) the *asset-related capital requirement*; and
(2) the *insurance-related capital requirement*; less
(3) the *firm's equalisation provisions*.
- 7.1.12 G Details of the calculation of the *asset-related capital requirement* are set out in *INSPRU 2.2.10R* to *INSPRU 2.2.16R*. Details of the calculation of the *insurance-related capital requirement* are set out in *INSPRU 1.1.76R* to *INSPRU 1.1.79R*.
- 7.1.13 G Where the *FSA* considers that a *firm* will not comply with the *overall financial adequacy rule* by holding the *capital resources* required by *GENPRU 2.1*, the *FSA* may give the *firm* individual *guidance* advising it of the amount and quality of *capital resources* which the *FSA* considers it needs to hold in order to meet that *rule*.
- 7.1.14 G The individual *guidance* will be given taking into consideration *capital resources* consistent with a 99.5% confidence level over a one year timeframe or, if appropriate to the *firm's* business, an equivalent lower confidence level over a longer timeframe. *Firms* should therefore prepare an individual capital assessment on the same basis. Throughout whatever timeframe is adopted by *firms*, *firms* should ensure that their projected assets are, and will continue to be, sufficient, to enable their projected liabilities to be paid, and it would be reasonable for *firms* to test that this is the case at the end of each year of the timeframe. *Firms* may also wish to make estimates of capital adequacy using other assumptions for their own internal purposes and are free to do so if they so choose.
- 7.1.15 G If a *firm* considers that the individual *guidance* is inappropriate to its circumstances, then the *firm* should inform the *FSA* that it does not intend to follow that *guidance*. Informing the *FSA* of such an intention would be expected if a *firm* is to comply with *Principle 11* (relations with regulators).

7.1.16 G The *FSA* expects most disagreements about the adequacy of capital will be resolved through further analysis and discussion. The *FSA* may consider the use of its powers under section 166 of the *Act* (Reports by skilled persons) to assist in such circumstances. If the *FSA* and the *firm* still do not agree on an adequate level of capital, then the *FSA* may consider using its powers under section 45 of the *Act* to, on its own initiative, vary a *firm's Part IV permission* so as to require it to hold capital in accordance with the *FSA's* view of the capital necessary to comply with the *overall financial adequacy rule*. SUP 7 provides further information about the *FSA's* powers under section 45.

7.1.17 G Where a *firm* or the *FSA* considers that the *capital resources requirements* of *GENPRU 2.1* require the holding of more capital than is needed for the *firm* to comply with the *overall financial adequacy rule* then the *firm* may apply to the *FSA* for a *waiver* of the requirements in *GENPRU 2.1* under section 148 of the *Act*. This section sets out the factors which the *FSA* will consider in deciding whether to grant such a *waiver* request, and if so, the terms and extent of any modification to the *rules* in *GENPRU 2.1*. In addition to the statutory tests under section 148, these will include the thoroughness, objectivity, and prudence of a *firm's* own capital assessment and the extent to which the *guidance* in this section has been followed. The *FSA* will not grant a *waiver* that would cause a breach of the minimum capital requirements under the *Insurance Directives*.

Stress and scenario requirement

7.1.18 G The *overall stress and scenario testing rule* requires a *firm* to carry out stress tests and scenario analyses for each of the sources of risk identified in accordance with the *overall pillar 2 rule*. Using each of the risk categories set out in the *overall pillar 2 rule*, *INSPRU 7.1.19G* to *INSPRU 7.1.34G* set out the factors that a *firm* should consider. *INSPRU 7 Annex 1G G* provides a practical illustration of how a small *firm* carrying on *general insurance business* might undertake this analysis.

Factors to consider when assessing credit risk

7.1.19 G Credit risk refers to the risk of loss if another party fails to perform its obligations or fails to perform them in a timely fashion.

7.1.20 G In assessing potential credit risk events that may affect the *firm's* solvency, a *firm* should allow for:

(1) the financial effect of non-payment of *reinsurance*, considering the likelihood both of non-payment of outstanding *claims* and for the fact that *reinsurance* cover purchased for underwritten risks may not be effective (that is, offsetting potential liabilities); and

(2) the financial effect of non-payment of *premium* debtors such as

intermediaries and *policyholders*.

- 7.1.21 G Some further areas to consider in developing the credit risk stress tests and scenario analyses might include:
- (1) the adequacy of the *reinsurance* programme and whether it is appropriate for the risks selected by the *firm* and adequately takes account of the underwriting and business plans of the *firm* generally;
 - (2) the collapse of a *reinsurer* or several *reinsurers* on the *firm's reinsurance* programme and the subsequent impact this may have on the *firm's* outstanding *reinsurance* recoveries and *IBNR* recoveries;
 - (3) a deterioration in the creditworthiness of the *firm's reinsurers*, intermediaries or other *counterparties*;
 - (4) the degree of credit concentration. For example, the degree to which a *firm* is exposed to a single *counterparty* or *group*;
 - (5) the degree of concentration of exposure to *reinsurers* of particular rating grades;
 - (6) the prospect of *reinsurance* rates increasing substantially or *reinsurance* being unavailable;
 - (7) any existing or possible future disputes relating to *reinsurance* contracts on a pessimistic basis and the extent that they are not already reflected in the value attributed to the reinsurances;
 - (8) greater losses from bad debts than anticipated;
 - (9) deterioration in the extent and quality of *collateral*; and
 - (10) guarantees given by the *insurer* of the performance of others, whether under *contracts of insurance* or otherwise.

Factors to consider when assessing market risk

- 7.1.22 G *Market risk* includes the risks that arise from fluctuations in values of, or income from, assets or in interest or exchange rates.
- 7.1.23 G In assessing potential *market risk* events that may affect the *firm's* solvency, a *firm* should allow for:
- (1) reduced market values of *investments*;
 - (2) variation in interest rates and the effect on the market value of *investments*;
 - (3) a lower level of investment income than planned; and
 - (4) the possibility of *counterparty* defaults.
- 7.1.24 G Some further areas to consider in developing the *market risk* scenario might include:
- (1) the possibility of a severe economic or market downturn or upturn leading to adverse interest rate movements affecting the *firm's* investment

position;

- (2) unanticipated losses and defaults of issuers;
- (3) price shifts in asset classes, and their impact on the entire portfolio;
- (4) inadequate valuation of assets;
- (5) the direct impact on the portfolio of currency devaluation, as well as the effect on related markets and currencies;
- (6) extent of any mismatch of assets and liabilities, including reinvestment risk;
- (7) the impact on the portfolio value of a dramatic change in the spread between a market index of interest rates and the risk-free interest rates; and
- (8) the extent to which market moves could have non-linear effects on values, such as *derivatives*.

Factors to consider when assessing liquidity risk

- 7.1.25 G In accordance with the *overall pillar 2 rule* a *firm* should consider the major sources of risk, including *liquidity risks*, and assess its response should each risk materialise.
- 7.1.26 G *INSPRU* 4.1 (liquidity risk management) contains evidential provisions and *guidance* on how *firms* should meet the *overall financial adequacy rule* for liquidity purposes.
- (1) *INSPRU* 5.1.58E states that a scenario analysis in relation to *liquidity risk* required under the *general stress and scenario testing rule* should include a cash-flow projection for each scenario tested, based on reasonable estimates of the impact of that scenario on the *firm's* funding needs and sources.
- (2) *INSPRU* 4.1.70E states that a *firm* should have a *contingency funding plan* for taking action to ensure, so far as it can, that in each of the scenarios tested under the *general stress and scenario testing rule*, it would still have sufficient liquid financial resources to meet liabilities as they fall due.
- 7.1.27 G When assessing *liquidity risk*, the *firm* should consider the extent of mismatch between assets and liabilities and the amount of assets held in highly liquid, marketable forms should unexpected cashflows lead to a liquidity problem. The price concession of liquidating assets is a prime concern when assessing such *liquidity risk* and should be built into any assessment of capital adequacy.
- 7.1.28 G Some further areas to consider in developing the *liquidity risk* scenario might include:
- (1) any mismatching between expected asset and liability cash flows;
 - (2) the inability to sell assets quickly;
 - (3) the extent to which the *firm's* assets have been pledged;

(4) the cash-flow positions generally of the *firm* and its ability to withstand sharp, unexpected outflows of funds via *claims*, or an unexpected drop in the inflow of *premiums*; and

(5) the possible need to reduce large asset positions at different levels of market liquidity, and the related potential costs and timing constraints.

Factors to consider when assessing operational risk

- 7.1.29 G Operational risk refers to the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.
- 7.1.30 G A *firm* may wish to refer to SYSC 3A and INSPRU 5.1 when carrying out its operational risk assessment.
- 7.1.31 G Examples of some issues that a *firm* might want to consider include:
- (1) the likelihood of fraudulent activity occurring that may impact upon the financial or operational aspects of the *firm*;
 - (2) the obligation a *firm* may have to fund a pension scheme for its employees;
 - (3) the technological risks that the *firm* may be exposed to regarding its operations. For example, risks relating to both the hardware systems and the software utilised to run those systems;
 - (4) the reputational risks to which the *firm* is exposed. For example, the impact on the *firm* if the *firm's* brand is damaged resulting in a loss of *policyholders* from the underwriting portfolio;
 - (5) the marketing and distribution risks that the *firm* may be exposed to. For example, the dependency on intermediary business or a *firm's* own sales force;
 - (6) the impact of legal risks. For example a non-insurance related legal action being pursued against the *firm*;
 - (7) the management of employees - for instance staff strikes, where dissatisfied staff may withdraw goodwill and may indulge in fraud or acts giving rise to reputational loss;
 - (8) the resourcing of key functions such as the risk management function by staff in appropriate numbers and with an appropriate mix of skills such as underwriting, claims handling, accounting, actuarial and legal expertise.
- 7.1.32 G A *firm* may consider that investigation of operational weaknesses and corrective action is a better response than holding capital and may consider that a certain degree of operational risk is within its pre-defined risk tolerance. However, until the *firm* corrects any identified deficiencies a *firm* should consider capital as a (interim) response to the risk.

Factors to consider when assessing insurance risk

- 7.1.33 G As a result of the differences between the nature of *general* and *long-term insurance business*, some aspects of the risk assessment vary depending on the type of business written. In assessing potential insurance risk events that may affect the *firm's* solvency, *general* and *long-term insurance business firms* should:
- (1) analyse the potential for catastrophic losses, including both risk and event losses, the cost of reinstatement *premiums* and any possible *reinsurance* exhaustion; and
 - (2) determine the likelihood of any other feature of insurance risk that may lead to a variation in projected outcomes.
 - (3) *Firms* carrying on *general insurance business* should in addition:
 - (a) analyse the potential for *claims* reserves to deteriorate beyond the current reserving level; and
 - (b) determine the effect of loss ratios being higher than planned by analysing historic loss ratio experience and volatility.
 - (4) *Firms* carrying on *long-term insurance business* should in addition:
 - (a) analyse the potential for *mathematical reserves* subsequently to prove inadequate compared with the current reserving level; and
 - (b) determine the effect of *claims* experience being more costly than planned by analysing historic *claims* experience, volatility and trends in experience.
- 7.1.34 G Some further areas to consider in developing the insurance risk scenario might include:
- (1) For underwriting risks, *general insurance business* and long-term *insurance business* firms:
 - (a) the adequacy of the *firm's* pricing. For example, the *firm* should be able to satisfy itself that it can charge adequate rates, taking into account the business and the risk profile of different products, the business environment (e.g. *premium* cycle-non-life) and its own internal profit targets;
 - (b) the uncertainty of *claims* experience;
 - (c) the dependence on intermediaries for a disproportionate share of the *insurer's* *premium* income; the effects of a high level of uncertainty in pricing in new or emerging underwriting markets due to a lack of information needed to enable the *insurer* to make a proper assessment of the price of the risk; the geographical mix of the portfolio or whether any geographical or jurisdictional concentrations exist;
 - (d) the appropriateness of *policy* wordings;
 - (e) the risk of mis-selling, for example, the number of complaints or disputed *claims*; and
 - (f) the tolerance for expense reserve variations or variations in expenses (including indirect costs).
 - (2) For *firms* carrying on *general insurance business*, in addition:

- (a) the length of tail of the *claims* development and latent *claims*; and
 - (b) the effects of rapid growth or decline in the volume of the underwriting portfolio.
- (3) For *firms* carrying on *long-term insurance business*, in addition:
- (a) the uncertainty of future investment returns;
 - (b) the effects of rapid growth or decline in the volume and nature of new business written; and
 - (c) the ability of *firms* to adjust *premium* rates or charges for some products.
- (4) For reserving and *claims* risks, both *general insurance business* and *long term insurance business firms*:
- (a) the frequency and size of large *claims*;
 - (b) possible outcomes relating to any disputed *claims*, particularly where the outcome is subject to legal proceedings;
 - (c) the ability of the *firm* to withstand catastrophic events, increases in unexpected exposures, latent *claims* or aggregation of *claims*;
 - (d) the possible exhaustion of *reinsurance* arrangements, both on a per risk and per event basis;
 - (e) social changes regarding an increase in the propensity to claim and to sue; and
 - (f) other social, economic and technological changes.
- (5) For *firms* carrying on *general insurance business*:
- (a) the adequacy and uncertainty of the technical *claims* provisions, such as outstanding *claims*, *IBNR* and *claims* handling expense reserves;
 - (b) the adequacy of other underwriting provisions, such as the provisions for *unearned premium* and unexpired risk reserves;
 - (c) the appropriateness of catastrophe models and underlying assumptions used, such as possible maximum loss (PML) factors used;
 - (d) unanticipated legal judgements and legal change with retrospective effect specifically with regard to the *claims* reserves; and
 - (e) the effects of inflation.
- (6) For *firms* carrying on *long-term insurance business*:
- (a) the adequacy and sensitivity of the *mathematical reserves* to variations in future experience, including:
 - (i) the risk that investment returns differ from those assumed in the reserving assumptions;
 - (ii) the risk of variations in mortality, morbidity and persistency experience and in the exercise of options under contracts;
 - (iii) the rates of taxation applied, in particular where there is uncertainty over the tax treatment; and
 - (b) unanticipated legal judgements and legal change with retrospective

effect specifically with regard to the impact on *mathematical reserves*.

Other assessments of the adequacy of capital resources

- 7.1.35 G *Firms* must assess the adequacy of their financial resources and this will entail an assessment of both *capital resources* and liquidity resources. The stress tests and scenario analyses which a *firm* must carry out will assist with both assessments. However, *firms* may also find it helpful to approach their assessment of capital in another way.
- 7.1.36 G *Firms* may also wish to carry out an additional assessment to inform their view as to whether their *capital resources* are adequate. The additional assessment is to consider the extent to which the *capital resources requirement (CRR)* produces adequate capital for a *firm's* particular circumstances. In considering this, *firms* that are required to calculate an *Enhanced Capital Requirement (ECR)* may wish to note that the *ECR* as calculated is based upon the assumptions that a *firm's* business is well diversified, well managed with assets matching its liabilities and good controls, and stable with no large, unusual, or high risk transactions. *Firms* may find it helpful to assess the extent to which their actual business differs from these assumptions and therefore what adjustments it might be reasonable to make to the *CRR* or *ECR* to arrive at an adequate level of *capital resources*.
- 7.1.37 G *Firms* may find it helpful for their own assessment process if they also consider divergences from the assumptions described in *INSPRU 7.1.36G* under the headings set out below. These are the areas which the *FSA* considers when forming its view of the adequacy of a *firm's capital resources*.
- Business risk factors:
- (1) *market risk*;
 - (2) securitisation risk;
 - (3) residual risk;
 - (4) concentration risk;
 - (5) high impact, low probability events; and
 - (6) cyclical and capital planning.
- Control risk factors:
- (1) systems and controls.
- 7.1.38 G *Market risk*: a *firm* should assess its exposure to those elements of *market risk* that are not captured by the *CRR*. In doing so, *firms* may wish to use stress tests to determine the impact on their balance sheets of an appropriate move in market conditions. The results of this test should then be used by the *firm* to determine its *market risk*.
- 7.1.39 G Securitisation risk: a *firm* should assess its exposure to risks transferred through the securitisation of assets should those transfers fail for whatever reason. For instance, *firms* may contemplate two broad types of

securitisation: 'embedded value securitisation' - the transfer of the value emerging from an existing block of business to bondholders; and 'risk transfer securitisation' - the purchase of protection against catastrophic risks to the *insurer* through the issuance of bonds whose repayment is contingent upon the non-occurrence of such risks. In either case, *firms* should consider the effect on their financial position of a failure of such complex arrangements to operate as anticipated or the values and risks transferred not emerging as expected.

- 7.1.40 G Residual risk: a *firm* should assess its exposure to the residual risks that may result from the partial performance or failure of risk mitigation techniques for reasons that are unconnected with their intrinsic value. This could result from (for example): ineffective documentation, a delay in payment or the inability to realise payment from a guarantor in a timely manner. Given that residual risks can always be present, *firms* should assess the appropriateness of their *capital resources requirement* against their assumptions for the risk mitigation measures that they may have in place.
- 7.1.41 G Concentration risk: a *firm* should assess and monitor its exposure to: sector, geographic, liability and asset concentrations, as well as granularity. The *FSA* considers that concentrations in these areas increase the *firm's* credit risk and where the *firm* identifies concentrations then they should consider the adequacy of the *capital resources requirement*. For instance, *firms* should monitor concentrations of exposure to particular *reinsurers* and ensure that they are aware of the implications of several of their *reinsurers* failing at the same time.
- 7.1.42 G High impact, low probability events: *firms* should consider stress tests and scenario analyses which are realistic - that is not too remote a possibility. However, should a *firm* decide to enter into a high impact, low probability transaction, the *firm* should satisfy itself that it has sufficient financial resources to meet its resulting financial obligation in the event the single risk materialises. For instance, a *firm* should not accept individual risks in circumstances where, if that single risk materialised, the *claim* arising would exceed the financial resources available to the *firm*.
- 7.1.43 G A *firm* should also consider the value of the financial obligation arising where the risks from a combination of high impact, low probability transactions that the *firm* has entered into materialise at the same time. A *firm* should ensure that in no circumstances would a combination of any consequent *claims* materially exceed the financial resources available to it.
- 7.1.44 G Cyclical and capital planning: a *firm's capital resources requirement* may vary as business cycles and economic conditions fluctuate over time. *Firms* should be aware that a deterioration in business or economic conditions could require them to raise capital or alternatively to contract their businesses at a time when market conditions are most unfavourable to raising capital. Such an effect is known as procyclicality.

- 7.1.45 G To reduce the impact of cyclical effects, *firms* should look to build-up capital levels through the course of an upturn in business and economic cycles to ensure that they have sufficient capital available to protect themselves against adverse conditions.
- 7.1.46 G To assess its expected capital requirements over the economic and business cycles, a *firm* may wish to project forward its financial position taking account of its business strategy and expected growth under a range of environmental assumptions. Projections over a three to five year period would be appropriate in most circumstances. *Firms* may then calculate their projected *capital resources requirement* and assess whether that requirement could be met from expected financial resources.
- 7.1.47 G Systems and controls: a *firm* may decide to hold additional *capital resources* to mitigate weaknesses in its overall control environment. Weaknesses might be indicated by the following:
- (1) a failure by the *firm* to complete an assessment of its systems and controls in line with SYSC 3.1 (Systems and Controls) and SYSC 14 (Prudential risk management and associated systems and controls);
 - (2) a failure by the *firm's* senior management to approve its financial results; and
 - (3) a failure by the *firm* to consider an analysis of relevant internal and external information on its business and control environment.
- 7.1.48 G In considering any systems and control weaknesses and their effect on the adequacy of the *capital resources requirement*, a *firm* may wish to be able to demonstrate to the *FSA* that all the issues identified in SYSC 3.2 (Areas covered by systems and controls) have been considered; and that appropriate plans and procedures exist to deal adequately with adverse scenarios.

Capital models

- 7.1.49 G A *firm* may approach its assessment of adequate *capital resources* by developing a model for some or all of its business risks. Where such a model captures some of the risks identified in accordance with the *overall pillar 2 rule* then this will usually satisfy the requirement to perform stress tests in respect of those risks. However, the assumptions required to aggregate risks modelled and the confidence levels adopted should be considered by the *firm's* senior management. A *firm* should also consider whether any risks are not captured by the model and also the extent to which systems and control risks are not incorporated in the model.
- 7.1.50 G A *firm* should not expect the *FSA* to accept as adequate any particular model that it develops or that the results from the model are automatically reflected in any individual *guidance* given to the *firm* for the purpose of determining adequate *capital resources*. However, the *FSA* will take into account the results of any sound and prudent model when giving individual *guidance* or

considering applications for a *waiver* under section 148 of the *Act* of the *capital resources requirement* in *GENPRU 2.1*. This section sets out the types of issues the *FSA* would consider before giving individual *guidance* or granting a *waiver* based on the results of a model.

- 7.1.51 G There is no prescribed modelling approach for how a *firm* develops its internal model. However, *firms* should be able to demonstrate:
- (1) the extent of use of the internal capital model within the *firm's* capital management policy;
 - (2) that sound and appropriate risk-management techniques are employed and are embedded in the daily operations and financial resources requirements of the firm;
 - (3) that all material risks to which the *firm* is exposed have been adequately addressed by quantitative and qualitative means as appropriate;
 - (4) the confidence levels set and whether these are linked to the *firm's* corporate strategy;
 - (5) the time horizons set for the different types of business that the *firm* undertakes;
 - (6) the extent of historic data used and back testing carried out; and
 - (7) whether sufficient accuracy and validation in the internal capital model has been undertaken.

Quantitative factors

- 7.1.52 G The *firm's* model should be based on an appropriate probability of insolvency over an appropriate time period. A *firm* should be able to demonstrate the selected probability of insolvency and time horizon it has derived and explain why these are appropriate for its business.
- 7.1.53 G Good models will have as inputs (in addition to the specific examples given under the stress and scenario guidance):
- For both *firms* carrying on *general insurance business* and *long-term insurance business*:
- (1) assumed future investment returns. In particular, assumptions for future interest rates (to the extent that they impact on interest income on funds on deposit, price of and yield on fixed stock that may be purchased in future and interest income on variable interest rate assets), equity prices, dividend income, property prices, property rental income and inflation. The assumptions should take account of likely volatility and historic volatility in interest rates and asset prices;
 - (2) five-year predictions as to *premium* rates in each homogeneous category of business taking account of the effect of underwriting cycles;
 - (3) predictions of exposures written in each homogeneous category of business in the next five years;
 - (4) predictions of *premium* volume and expected growth under a five year

business plan;

(5) expenses and commission;

(6) catastrophic events, aggregations of *claims* and *claims* affecting more than one *class* of business;

(7) inflation in terms of how it might affect future *claims*, non-settled *claims* that have occurred to date, future expenses, future *reinsurance* costs and future investment returns;

(8) *reinsurance* programmes in place, allowing for changing term conditions, reinstatements and loss experience features;

(9) estimates of non-recovery of *reinsurance* and other debtors taking account of the financial strength of each *reinsurance* or other *counterparty*; and

(10) foreign exchange movements.

For *firms* carrying on *general insurance business* in particular:

(11) frequency and severity of *claims* (including costs associated with *claims* such as professional fees) for each homogeneous category of business, allowing for any impact of future social, legal and inflationary effects (especially concerning price, earnings, medical and *claims*) on future *claims* costs;

(12) settlement patterns of *claims* and *reinsurance* recoveries for each homogeneous category of business (including occurred and future *claims*);

(13) unintended coverage of risks; and

(14) correlation between these risks.

For *firms* carrying on *long-term insurance business* in particular:

(15) projected *claims* experience for each homogeneous category of business allowing for trends in mortality/ morbidity experience;

(16) assumptions for future *policyholder* actions such as lapsing or surrendering a *policy*, ceasing to pay *premiums* or choosing to exercise an option under the contract; and

(17) for business where management has discretion over the level of benefits or charges, assumptions about management reactions to changes in economic conditions and consequent changes to the benefits or charges.

- 7.1.54 G The *FSA* places credence in approaches to financial models to aid the assessment of capital adequacy which involve the production of a Dynamic Financial Analysis ("DFA") model. These models transform each element in the financial projection into a statistical distribution with a range of possible outcomes, and are therefore stochastic. They would generally incorporate a suitable economic model integrated into the DFA model and linked into the generation of insurance related assumptions. The model would, as far as possible, cover all risks and all areas of business. The future time period over which projections are made should be determined with reference to the type of *insurance business* written, the asset profile and the insurance cycle.

It may be appropriate to consider several different time periods.

- 7.1.55 G Due regard should also be given to the historical experience of both the firm and the wider relevant industry and market when assigning values to the above inputs.
- 7.1.56 G The values assigned to each of the above inputs should be derived either stochastically, by assuming the value of an item can follow an appropriate probability distribution and by selecting appropriate values at the tail of the distribution, or deterministically, using appropriate prudent assumptions. For *long-term insurance business* which includes options or guarantees that change in value significantly in certain economic or demographic circumstances, a stochastic approach would normally be appropriate.

Application of INSPRU 7.1 to Lloyd's

- 7.1.57 R Subject to *INSPRU 7.1.58R*, *INSPRU 7.1* applies to *managing agents* and to the *Society* in accordance with:
- (1) for *managing agents*, *INSPRU 8.1.4R*; and
 - (2) for the *Society*, *INSPRU 8.1.2R*
- 7.1.58 R *Managing agents* must carry out assessments of capital adequacy for each *syndicate* they manage by reference to all *open syndicate years* taken together.

Assessment of adequacy of capital resources for *syndicates* and *members*

- 7.1.59 G Responsibility for:
- (1) managing the risks associated with the *insurance business*; and
 - (2) holding the *capital resources* that support those risks;
- is divided between *managing agents* and the *Society*. To clarify the respective responsibilities of *managing agents* and the *Society* for ensuring the adequacy of financial resources, the FSA distinguishes between the *managing agents'* responsibility to carry out capital adequacy assessments of the *capital resources* held at *syndicate* level for each *syndicate* that they manage, and the *Society's* responsibility to carry out an assessment for each *member*.
- 7.1.60 R In carrying out capital adequacy assessments in respect of the *insurance business* carried on through each *syndicate* (the *syndicate ICA*), *managing agents* must consider the risks, controls and the financial resources relevant to each *syndicate*.
- 7.1.61 R When carrying out the *syndicate ICA*, *managing agents* must not take into account risks to which a *member* may be exposed or controls from which a *member* may benefit:

(1) because that *member* carries on *insurance business* through another *syndicate* or more than one *syndicate year* (whether or not managed by the same *managing agent*); or

(2) because that *member's* financial resources include *funds at Lloyd's* or *central assets*.

7.1.62 R The *Society* must have regard to *syndicate ICAs* in arriving at its own capital assessment for each *member*.

7.1.63 G In assessing the adequacy of the *capital resources* supporting the *insurance business* of each *member*, the *Society* should consider the risks, controls and financial resources relevant to the totality of the *member's insurance business*, including:

(1) the adequacy of *syndicate ICAs*;

(2) the *member's* share of *syndicate ICAs*;

(3) adjustments in respect of risks and controls relating to *funds at Lloyd's*, *central assets* and the interaction of risks underwritten by the *member* through different *syndicates* and in respect of different *syndicate years*; and

(4) the ongoing validity of any relevant assumptions it makes.

7.1.64 G In taking account of a *syndicate ICA* under *INSPRU 7.1.62R*:

(1) if the *Society* considers a *syndicate ICA* to be adequate, it should use the *managing agent's* risk and capital assessments in carrying out its individual capital assessment in relation to any *member* of that *syndicate*, or it should be able to justify why it will not; and

(2) if the *Society* considers a *syndicate ICA* to be less than adequate, the *Society* should increase the *syndicate ICA* so that it is adequate for the purpose of carrying out its individual capital assessment in relation to the *members* of that *syndicate*.

7.1.65 G The assessment of capital adequacy for a *member* will rarely equal the proportionate share of a *syndicate ICA* (or sum of those shares, where the *member* participates on more than one *syndicate*) as attributed to that *member*, because, in determining the capital assessments for each *member*, the *Society* may make adjustments to take account of:

(1) risks and controls associated with *funds at Lloyd's* and *central assets*, which can increase the *member's* individual capital assessment;

(2) diversification effects, including as a result of *members'* participations on more than one *syndicate year*, which can reduce the *member's* individual capital assessment; and

(3) its own assessment of *syndicate* risks, which can be higher than the *managing agent's* and so increase the *member's* individual capital assessment.

The balancing amount

- 7.1.66 G *Capital resources* to meet each *syndicate ICA* could be:
- (1) held within a *syndicate* and managed by the *managing agent*; or
 - (2) held and managed by the *Society*; or
 - (3) not needed in full, because of effects such as diversification that the *Society* takes into account.
- 7.1.67 G The *balancing amount* is a function of the relationship between the *syndicate ICA* and the amount of assets held within the *syndicate*. As illustrations:
- (1) if the *syndicate* holds no *capital resources* (but its liabilities are fully covered by relevant assets), the *balancing amount* equals the *syndicate ICA* (as there are no *capital resources* at *syndicate* level, all the *capital resources* must be held as *funds at Lloyd's* or *central assets*);
 - (2) if *capital resources* held at *syndicate* level are negative (i.e. if relevant assets do not fully cover liabilities for the *syndicate*), the *balancing amount* should be higher than the *syndicate ICA* by an amount corresponding to the negative *capital resources* held by *managing agents* on behalf of the *syndicate*; and
 - (3) conversely, if a *syndicate* holds positive *capital resources* for the *syndicate*, the *balancing amount* should be lower than the *syndicate ICA* by a corresponding amount.
- 7.1.68 R *Managing agents* must periodically notify the *Society* of the *syndicate ICA* and the *balancing amount* in respect of each *syndicate*.
- 7.1.69 R For the purpose of assessing the adequacy of *capital resources* held as *funds at Lloyd's* and *central assets*, the *Society* must have regard to *balancing amounts* notified to it by *managing agents*.
- 7.1.70 R After notification of a *balancing amount* by a *managing agent*, the *Society* must:
- (1) confirm to the *managing agent* that *capital resources* held as *funds at Lloyd's* and *central assets* are adequate to support the *balancing amount*; or
 - (2) notify the *managing agent* that it cannot give that confirmation.
- 7.1.71 G *Managing agents* should submit *syndicate ICAs* and notify *balancing amounts* to the *Society* as part of the annual capital-setting process at *Lloyd's*. The submission of the *syndicate ICA* and notification of the *balancing amount* should be made in good time for the *Society* to review them and place appropriate reliance on them when it determines the capital assessments for each *member*.
- 7.1.72 G When communicating the *syndicate ICA* and *balancing amount* for each *syndicate* to the *Society*, *managing agents* should agree with the *Society* an allocation of the *syndicate ICA* between *syndicate years*. The purpose of the allocation is to ensure that there is an appropriate matching of assets to risk and liabilities and an equitable treatment between the *members* reflecting the

provision of capital in each *syndicate year*.

Monitoring of capital resources

- 7.1.73 G For the purposes of complying with their obligations under *INSPRU*, *managing agents* may assume that any *balancing amount* confirmed by the *Society* under *INSPRU* 7.1.70R is supported by *capital resources* held as *funds at Lloyd's* and *central assets*.
- 7.1.74 R If a *managing agent* has, at any time, a significant doubt about the adequacy of a *syndicate ICA* or *balancing amount* with respect to *syndicate* risks and controls, it must notify the *Society* immediately.
- 7.1.75 R If the *Society* has, at any time, a significant doubt about the adequacy of any *member's* capital resources held by it in support of any *balancing amount*, it must notify the relevant *managing agent* immediately.

	Annex 1G
A1	This annex provides an illustrative qualitative example of how a small <i>firm</i> could undertake its stress and scenario analysis without this being disproportionate to the size and complexity of its business so as to comply with the <i>general stress and scenario testing rule</i> . For these reasons, the example does not provide any quantitative guidance as we believe this would be impractical given the diverse nature of each <i>firm's</i> individual circumstances.
A2	This example is based on <i>guidance</i> contained in <i>INSPRU 7.1</i> . The areas discussed are not exhaustive and it is likely that in practice a <i>firm</i> will need to consider a range of other issues.
A3	The scenarios that the <i>firm</i> generates as part of its analysis should aim to reflect the degree of risk in a variety of areas. How extreme these scenarios are will influence the ultimate level of capital required by the <i>firm</i> . The <i>firm</i> should not necessarily develop scenarios based on the current trading or economic conditions, but on possible trading or economic conditions that could occur during the next three to five years.
A4	In addition to examining its event scenarios, a <i>firm</i> should also be able to meet any individual risk (however unlikely) that it has accepted (or proposes to accept through its business plan) from <i>policyholders</i> . It therefore should analyse its exposures and ensure that it has sufficient capital or available <i>reinsurance</i> to cover its largest individual risks and accumulations.
	Worked example
	Background
A5	The <i>firm</i> used for this example is an <i>insurer</i> carrying on <i>general insurance business</i> within a large <i>group</i> , writing predominantly personal lines, household and motor policies of approximately £25m <i>gross written premium</i> . This business has a reasonable geographical spread, sourced significantly from within the <i>United Kingdom</i> . The <i>firm</i> has purchased appropriate <i>reinsurance</i> cover from a variety of <i>reinsurers</i> and has a demonstrated record of utilising this cover. Its settlement pattern for <i>claims</i> averages three years, however, there is a small element of the account with longer tail liability <i>claims</i> . The <i>firm's</i> investments and IT support are outsourced.

	Insurance risk	
A6	The risk of incorrect or inaccurate pricing of business over the scenario period can be addressed by examining typical uncertainties within the pricing basis and the volatility of <i>claims</i> experience.	
A7	In examining the adequacy of its pricing, the <i>firm</i> establishes its underwriting and <i>claims</i> trend over a ten-year base period by reviewing profit and loss accounts (particularly underwriting profit). In particular it examines the following:	
	(i)	the volatility of losses in a particular line of business;
	(ii)	whether the loss ratio exceeded 100% in any line of business; and
	(iii)	whether the <i>deferred acquisition cost</i> (DAC) amount had been written down; e.g. whether an unexpired risk provision (URP) was necessary.
A8	The <i>firm</i> also examines whether its <i>premiums</i> over the last ten years have been:	
	(i)	reasonably stable;
	(ii)	responsive enough to changes in <i>claim</i> exposures (so that profitability is maintained);
	(iii)	providing adequately for contingencies (such as major losses e.g. hail, earthquake etc);
	(iv)	encouraged loss control (through the use of deductibles, no claim bonuses etc);
A9	The <i>firm</i> also reviews its method of pricing. The <i>firm</i> considers and performs the following:	
	(i)	a review of acceptable rates, e.g. <i>premiums</i> being charged by competitors for similar products;
	(ii)	an examination of whether there have been any difficulties in the past with delegated authorities in relation to pricing including the ability and experience of staff members setting or recommending <i>premium</i> prices;

	(iii)	an examination of whether the <i>firm</i> has the appropriate mechanisms in place regarding <i>premium</i> rate changes (that is, who makes these decisions, frequency, and on what basis?); and
	(iv)	a benchmark price assessment (e.g. the ability to provide adequate competitive <i>premium</i> rates). For example, indicative rates being determined through the use of industry statistics, competitor statistics and the <i>firm's</i> own analysis for all classes.
A10	Other factors the <i>firm</i> considers are:	
	(i)	changes in environment (e.g. legislation, social, economic etc);
	(ii)	changes in <i>policy</i> conditions and deductibles; and
	(iii)	impact of market segments (e.g. the effects of different <i>claim</i> frequencies and costs impacting the price charged).
A11	Having completed its analysis, the <i>firm</i> makes the following assumptions to define its underwriting risk:	
	(i)	<i>claims</i> costs. The <i>firm</i> assumes these are X% higher than in the <i>premium</i> basis;
	(ii)	<i>claims</i> inflation. The <i>firm</i> assumes a X% <i>claims</i> inflation over the scenario period, compared to Y% in the pricing basis;
	(iii)	<i>policy</i> expenses (fixed and variable) are X% higher than anticipated in the pricing basis;
	(iv)	<i>reinsurance</i> charges are X% higher than anticipated in the pricing basis; and
	(v)	investment income is X% lower than anticipated in the pricing basis.
As a result of the above analysis on a per risk basis, the <i>firm</i> considers that capital of between £X and £Y would cover the possibility of material deviations to projected results.		
	Allowing for catastrophes	

A12	The allowance for catastrophic events within the insurance risk scenario should reflect both the severity and the frequency of these events.
A13	After considering the catastrophe <i>reinsurance</i> programme it may be clear that the upper limit is set at a level unlikely to be breached e.g. a 1 in 200 year event. Thus, for the purposes of the capital assessment, it would not be necessary to assume losses in excess of this retention.
A14	However, it may be determined that there is possible exhaustion of free reinstatements or of horizontal cover in total. For example, if there were a significant chance of three catastrophic losses in any one period but the <i>reinsurance</i> allowed only one free reinstatement, then the assessment may be to hold two retentions and the entire gross loss for the third event.
As a result of the above analysis, the <i>firm</i> considers it appropriate to hold capital sufficient to absorb three catastrophic losses: one European windstorm of £X, one UK flood of £Y, and one large man made explosion of £Z.	
The <i>reinsurance</i> structure in place allows for X number of reinstatements at full <i>premium</i> .	
	Deterioration of reserves
A15	The <i>firm</i> considers the adequacy of its <i>claims</i> reserves by focussing on the liability valuation.
A16	The liability valuation may contain a range of answers that might indicate possible reserve variability. Also, the valuation will contain areas where judgement has been applied and assumptions formulated which are subjective. These areas are considered and stressed as appropriate.
A17	The <i>firm</i> also reviews the historic level of <i>claims</i> reserves and subsequent level of settlements to help determine the size of any historic levels of under and over reserving.
A18	<i>Reinsurance</i> arrangements are considered and the extent to which these arrangements protect against reserve deterioration is assessed.
A19	For <i>unearned premium</i> , where losses have yet to occur, the <i>firm</i> considers that the level of uncertainty is greater and considers similar factors to those relating to underwriting risk in addition to those discussed above.
As a result of the above analysis, the <i>firm</i> considers it appropriate to apply a X% loading to the outstanding <i>claims</i> provision, a Y% loading to the <i>unearned premium</i> provision and Z% to all other liability values. The <i>firm</i> considers that capital of between £X and £Y would adequately cover reserve deterioration.	

	Credit risk
A20	Credit risk relates to the risk of default by <i>counterparties</i> . The <i>firm</i> believes its exposure to credit risk results from financial transactions with <i>counterparties</i> including issuers, debtors, borrowers, brokers, <i>policyholders</i> , <i>reinsurers</i> and guarantors.
A21	When assessing credit risk the <i>firm</i> makes an assessment of the creditworthiness of <i>counterparties</i> to the assets of the <i>firm</i> .
A22	The assessment includes an evaluation of the credit risk associated with loans and investment portfolios; the quality of on and off balance sheet assets; the ongoing management of the loans and investment portfolios; as well as loss provisions and reserves.
A23	The <i>firm</i> believes its exposure to credit risk also arises due to its exposure to its <i>reinsurers</i> . In this regard, the <i>firm</i> uses the credit ratings assigned to particular <i>counterparties</i> as a measure of credit risk, most notably Standard & Poor's, Moody's Investors Service and AM Best's (particularly for <i>reinsurers</i>).
A24	When forming an opinion on credit risk the <i>firm</i> considers:
	Reinsurance
A25	The <i>firm's</i> strategy is to lessen exposure to a single lead <i>reinsurer</i> to less than 30%, with other participants holding no more than 15%. In all cases, the panel of <i>reinsurers</i> all have a specified rating. The <i>firm</i> has no prior experience of disputes, and their working relationship with the panel may be excellent, and thus the <i>firm</i> does not envisage any future difficulties arising in this regard.
A26	Bond default rates could then be used to assess a likely credit risk figure for <i>reinsurance</i> recoveries (including <i>IBNR</i> recoveries).
The <i>firm</i> considers that capital of between £X and £Y would cover <i>reinsurance</i> defaults, with no additional allowance for disputes.	
	Overseas financial institutions and banks
A27	The <i>firm</i> investigates its business relationships with overseas financial institution <i>counterparties</i> including <i>banks</i> , and decides no additional allowance is required.
	Quality of counterparties and trends in counterparty risk
A28	The <i>firm</i> assesses the level and age of debtors, focussing particularly upon unpaid <i>premiums</i> , especially those greater than three months old, and reviews the level and trend of contingent liabilities. For example, the <i>firm</i> estimates that the credit risk scenario equates to taking a 10% reduction in the asset value of debtors, based on bond default rates and

	age of debt.
The <i>firm</i> considers that capital of between £X and £Y would cover credit risk to counterparties.	
	Off-balance sheet transactions
A29	The <i>firm</i> investigates any unfunded commitments, credit <i>derivatives</i> , commercial or standby letters of credit. Where these exist the possibility of a loss on these instruments is considered in relation to the requirement of the credit risk scenario.
The <i>firm</i> considers that no additional capital is necessary.	
	Market risk
A30	<i>Market risk</i> encompasses an adverse movement in the value of the assets as a consequence of market movements such as interest rates, foreign exchange rates, equity prices, etc. which is not matched by a corresponding movement in the value of the liabilities.
A31	In examining possible market risks, the <i>firm</i> considers its sensitivity to <i>market risk</i> by evaluating the degree to which changes in interest rates, foreign exchange rates, equity prices, or other areas can adversely affect the <i>firm's</i> earnings or capital.
A32	The <i>firm</i> believes its assets and liabilities are approximately matched e.g. there is no existence of large unmatched or unhedged currency positions; short tail business is backed by cash/fixed interest assets of suitable term and long tail business with real assets e.g. shares/property. If mismatching does exist this should be allowed for within the estimate.
A33	In developing the scenario the <i>firm</i> estimates the effect of a X% increase in interest rates on bond values.
A34	Similarly, the <i>firm</i> estimates the effect on equity values of a major recession to estimate the possible reduction in the value of equity capital. Also, it uses a suitable equity index to determine the size of historical falls in equity values and indicate possible future falls.
A35	<i>Counterparty</i> risk might be allowed for by assuming one or several major corporate bond holding defaults.
A36	For all investments, the stability of trading revenues should be examined to determine the volatility of investment.
From the above analysis, the <i>firm</i> considers that capital of between £X and £Y would be appropriate to protect it against adverse movement in <i>market risk</i> .	
	Liquidity risk

A37	<i>Liquidity risk</i> is the potential that the <i>firm</i> may be unable to meet its obligations as they fall due as a consequence of having a timing mismatch. The <i>firm</i> considers <i>liquidity risk</i> relates to the risk associated with the processes of managing timing relationship between asset and liability cash flow patterns.
A38	When assessing <i>liquidity risk</i> , the <i>firm</i> considers the extent of mismatch between assets and liabilities and the amount of assets held in a highly liquid, marketable form should unexpected cashflows lead to a liquidity crunch.
A39	The price concession of liquidating assets is a prime concern when assessing <i>liquidity risk</i> and is built into the scenario.
A40	In examining the <i>liquidity risk</i> , the <i>firm</i> examines the following:
	Marketability, quality and liquidity of assets
A41	The <i>firm</i> considers the assets held and makes an assessment regarding the quality and liquidity of these assets. Even though the assets matched the liabilities, residual risk remains given that timings are uncertain and there is a possibility that assets will be realised at unfavourable times. This is allowed for by assuming a 2.5% reduction in the market value of assets at realisation compared to the current market value.
The <i>firm</i> considers that capital of between £X and £Y would cover timing risk to <i>counterparties</i> .	
	Reliance on new business income
A42	The <i>firm</i> relies partially upon new business cash flows to meet current liabilities as they fall due. The <i>firm</i> analyses the sensitivity of future cash flow projections and new business assumptions and considers the effect of a reduced level of new business.
A43	The <i>firm</i> finds that it did not have immediate alternatives in place in case these expected new business cash flows were reduced. In this regard, it considers that these sources should be stressed by X%.
The <i>firm</i> considers that capital of between £X and £Y would cover possible effects of adjusting the asset portfolio to switch to more liquid assets.	
A44	The <i>firm</i> also examines the volatility and cost of on- and off-balance sheet funding sources. The <i>firm</i> is satisfied that no concerns need to be raised and that there should not be any impact on its liquidity position.
A45	The <i>firm</i> believes it is well placed to manage unplanned changes in funding sources as well as react to changes in market conditions that affect its ability to quickly liquidate assets with minimal loss. The <i>firm</i> assesses that it has reasonable access to money markets and other

	sources of funding such as lines of credit.
A46	The <i>firm</i> has no previous problems or delays in meeting obligations (or accessing external funding).
Overall, from the above analysis, the <i>firm</i> considers that capital of between £X and £Y would be necessary to withstand the effects of deterioration in liquidity.	
	Governance Risk
A47	Governance risk relates to the risk associated with the board and/or senior management of the <i>firm</i> not effectively performing their respective roles.
A48	The existence and level of directors and officers insurance in place is investigated compared to known incidence of <i>claims</i> of this type.
A49	The <i>firm</i> assesses whether the current level of governance is appropriate for the <i>firm</i> , and the likelihood that the <i>firm's</i> practices may result in the board and/or senior management not adequately undertaking their roles. The cost of altering and strengthening the current board structure is considered.
A50	In this regard, the <i>firm</i> makes an assessment that it may be reliant on only a few senior executives, and may be exposed if they experience any misadventure.
The <i>firm</i> considers that capital of between £X and £Y would cover governance risk.	
	Strategic Risk
A51	Strategic risk arises from an inability to implement appropriate business plans and strategies, make decisions, allocate resources or adapt to changes in the business environment.
A52	The <i>firm</i> therefore assesses the prudence and appropriateness of its business strategy in the context of the <i>firm's</i> competitive and economic environment. In particular the assumptions, forecasting and projections are assessed considering the possibility of a fundamental market change due, for example, to higher numbers of competitors, changes in sales channels, new forms of insurance or changes in legislation. This review includes whether the <i>reinsurance</i> programme is appropriate for the risks selected by the <i>firm</i> and whether it adequately takes account of the underwriting and business plans of the <i>firm</i> generally.
A53	The <i>firm</i> considers the likelihood of a fundamental strategic shift too remote to include within the scenario given the maturity of the market in which they operate.
	Operational risks

A54	In reviewing the operational risk exposures, the <i>firm</i> has examined its administration, compliance, event, fraud, governance, strategic and technological risks.
	Administration
A55	The <i>firm</i> considers the risk of error or failure associated with the administrative aspects of the operation of its business. In this regard, the <i>firm</i> considers likelihood of financial loss and reputation harm due to failure or errors occurring and the likely size of these losses.
A56	None of the <i>firm's</i> administration is out-sourced to service providers.
A57	In undertaking the assessment, the <i>firm</i> considers the history of failure or error from transaction processing or control within the <i>firm</i> . Exception reports are produced on a quarterly basis. Past reports highlighted past administrative deficiencies. The biggest event in the past 10 years related to a situation where <i>claim</i> -handling staff shared access codes to the <i>claims</i> administration system. This resulted in an overpayment to some clients.
A58	The <i>firm</i> also examines the nature and extent of centralised and decentralised functions within the <i>firm</i> . Three branches report regularly to the central office and an appropriate system is in place to record financial information, handle complaints etc.
A59	The <i>firm</i> also reviews the segregation of duties between staff. It is satisfied that an adequate segregation of duties between underwriting <i>claims</i> and payments divisions exist in terms of acceptance, authorisation and payments. It is also satisfied that sufficient interaction between the front, middle and back offices exist in terms of financial control and risk management. For example, it is confident that its guidelines for accepting risks are adequate and that any breach would be picked up by exception reporting.
A60	The <i>firm</i> also investigates the level of staff expertise and training to administer its product range/services.
The <i>firm</i> considers that capital of between £X and £Y would cover the risk of future administration issues.	
	Compliance Risk
A61	The <i>firm</i> believes its main compliance risk relates to the risk of non-adherence to legislative and internal <i>firm</i> requirements.
A62	An investigation into compliance over the last 10 years finds no history of non-compliance with <i>firm</i> policy and control systems nor have there been any reported areas of non-compliance with legislation or other requirements.

A63	Regulatory reforms including corporate and consumer law are considered and it is assumed that expenses costs will rise as a result of developments in the next 5 years. As a result an additional X% of <i>premium</i> income was assumed for the expense ratio.
The <i>firm</i> considers that capital of between £X and £Y would cover the risk of future compliance issues.	
	Event risk
A64	Event risk relates to risks associated with the potential impact of significant events (e.g., financial system crisis, major change in fiscal system, natural disaster) on the operations of the <i>firm</i> .
A65	The definition of event risk is not intended to cover events that are directly associated with products and services offered, for example, events which may directly impact on the <i>general insurance business</i> .
A66	The <i>firm</i> concludes that no additional specific allocation is required.
	Fraud Risk
A67	Fraud risk relates to the risk associated with intentional misappropriation of funds, undertaken with the objective of personal benefit at the expense of the <i>firm</i> .
A68	In assessing fraud risk, the <i>firm</i> considers the possibility of fraudulent acts occurring within the <i>firm</i> and the extent of controls which management has established to mitigate such acts.
A69	The <i>firm</i> examines fraud issues over a period of 10 years and finds one major incident where it was subject to a fraudulent activity. This involved fraudulent payments being made by a member of staff which resulted in a loss for the <i>firm</i> of £Xm. Based on this previous incident and allowing for improvements in controls, the company assessed a financial figure that it believes is consistent with the probability for this scenario.
The <i>firm</i> considers that capital of between £X and £Y would cover the risk of future fraud.	
	Technology Risk
A70	The <i>firm</i> considers the risk of error or failure associated with the technological aspects (IT systems) of its operations. Specifically, technology risk refers to both the hardware systems and the software utilised to run those systems.
A71	In relation to the <i>firm's</i> information systems, the <i>firm</i> assesses the past reliability and future functionality and believes them to be adequate. It does not have any future plans to either replace its systems or make

	major systems modifications.
A72	Concerning business continuity management and disaster recovery planning (and testing of plans), the <i>firm</i> reviews these plans regularly and tests them quarterly. A full back-up site exists with full recovery capabilities. Costs associated with utilising the site and associated business interruption insurance was estimated.
The <i>firm</i> considers that capital of between £X and £Y would cover technology risk.	
	Group risk
A73	The size of the group risk element within operational risk will depend on the ownership structure of the <i>firm</i> and how it is funded by the parent.
A74	The <i>firm</i> considers the likelihood and financial consequences of both insolvency and credit downgrading of its parent. Given the <i>firm</i> shares the parent's name there is a large risk of association.
A75	The <i>firm</i> considers it within the scope of the scenario to allow for a single downgrade of the parent's credit rating from AA to A. It does not believe the chance of insolvency great enough to allow for directly.
A76	The <i>firm</i> estimates the effect on its business plan and profit margins of the downgrade. It estimates the amount of business lost and the increase in marketing costs required to maintain the client base. It also allows for a change in the pricing basis to incorporate a reduced profit margin (with knock on impacts on the business volume and loss ratios).
From the above analysis, the <i>firm</i> considers that capital of between £X and £Y would be required to cover group risks.	
	Overall assessment
A77	After individually assessing each risk area, the <i>firm</i> considers the capital that it has estimated might be absorbed under each scenario. In aggregate the range of capital absorbed is between £X and £Y. It considers how many of these scenarios might reasonably occur within a period and the extent to which it could replace capital within that period. It takes into account scenarios which might reasonably be linked, the difficulty with which capital might be replaced if the scenarios occurred, and the changes in strategy which might need to be adopted if the scenarios occurred.
A78	The <i>firm</i> decides that the worst realistic combination of circumstances that might arise would absorb capital of between £A and £B.

- 8.1 General provisions applying INSPRU and GENPRU to Lloyd's
- Application
- 8.1.1 R *INSPRU* 8.1 applies to:
- (1) the *Society*;
 - (2) *managing agents*.
- 8.1.2 R If a provision in *INSPRU* or *GENPRU* applies to the *Society* "in accordance with" this *rule*, the *Society* must:
- (1) manage each *member's funds at Lloyd's*;
 - (2) manage its *central assets*; and
 - (3) supervise the *insurance business* carried on by each *member* at Lloyd's; so as to achieve in relation to those assets and that *insurance business* the same effect as the relevant *INSPRU* or *GENPRU* provision would have (that is, conforming with the requirements of any *rule* and taking appropriate account of any applicable *guidance*,) when applied to a *firm* or to the *insurance business* of a *firm*.
- 8.1.3 G The *Society* is subject to *INSPRU* and *GENPRU rules* in respect of the *insurance business* of each Lloyd's *member*. These include *rules* in respect of:
- (1) the calculation of the *capital resources requirements* for each *member*;
 - (2) the financial resources it manages on behalf of *members*; and
 - (3) the *Society's* own financial resources.
- 8.1.4 R If a provision in *INSPRU* or *GENPRU* applies to a *managing agents* "in accordance with" this *rule*, the *managing agent* must, in relation to each *syndicate* managed by it and for each *syndicate* year, manage:
- (1) the *syndicate assets*; and
 - (2) the *insurance business* carried on by the *members* of the *syndicate* through that *syndicate*;
- so as to achieve in relation to those assets and that *insurance business* the same effect as the relevant *INSPRU* or *GENPRU* provision would have (that is, conforming with the requirements of any *rule* and taking appropriate account of any applicable *guidance*,) when applied to a *firm* or to the *insurance business* of a *firm*.
- 8.1.5 G *Syndicate membership* may change from year to year or it may remain constant. *Managing agents* are required to apply *INSPRU* and *GENPRU* to the *insurance business* carried on through each *syndicate* for each *syndicate*

year. This should ensure that *INSPRU* and *GENPRU* are applied to Lloyd's in a way that is consistent with the provision of capital to support the *insurance business* underwritten.

- 8.1.6 G Where common systems and controls or processes are appropriate for all the *insurance business* carried on through more than one *syndicate* year, a single response may be adequate for all *syndicate* years. However, in some cases it will be important to consider the business of each open *syndicate* year separately, particularly for quantitative *rules*. For example, it is important that *managing agents* separately assess the financial resources (including capital) that are required and are available to support the *insurance business* carried on through each *syndicate* year, where the *syndicate membership* changes from year to year. This is because each *member's* assets are only available to support its own business, so the assets supporting one year of account may not be available to support another. For example, if a *managing agent* were to assess the financial requirements of two or more *syndicate* years together where the capital structure had changed, there would be a risk that the *managing agent* might take account of diversification effects that were not reflected in the capital supporting the *insurance business*.

- 8.1.7 G There is no requirement on *managing agents* to carry out separate individual capital assessments for *syndicates* for each *syndicate* year. *Managing agents* are required to carry out individual capital assessments for each *syndicate* as if that *syndicate* were a *firm*; this would normally be on the basis of a going concern but, just as in a *firm*, account needs to be taken of any restrictions on the availability of assets (e.g. deposits with cedants), and some account needs to be taken of changes in the capital participation in the *syndicate*. The *Society* is responsible for the individual capital assessment for each *member*, which must take into account the assessments made by *managing agents* of any *syndicates* on which the *member* participates. *INSPRU* 7.1 contains *rules* and guidance on the assessment of capital adequacy for *firms* and *INSPRU* 7.1.57R to *INSPRU* 7.1.70R provide for the application of *INSPRU* 7.1 to the *Society* and *managing agents*.

- 8.1.8 G The assessment which a *firm* makes should be based upon its future business plans and projections. This is the main area where the *firm's* assessment may diverge from its prescribed *capital resources requirement* which, necessarily, is based upon historic data.

- 8.1.9 G Key *INSPRU* and *GENPRU* requirements for Lloyd's

Key <i>INSPRU</i> and <i>GENPRU</i> requirements	<i>INSPRU</i>	<i>GENPRU</i>
Risk management, systems and controls		

The <i>Society</i> to establish and maintain systems and controls to address risks affecting the Lloyd's market	<i>INSPRU</i> 8.2	
The <i>Society</i> to manage prudential, credit, market, liquidity and operational risks affecting <i>funds at Lloyd's</i> and <i>central assets</i>	<i>INSPRU</i> 4.1, <i>INSPRU</i> 5.1, <i>INSPRU</i> 8.2 & <i>INSPRU</i> 8.5	
<i>Managing agents</i> to establish and maintain systems and controls for the management of prudential, credit, market, liquidity, operational, and insurance risks affecting each <i>syndicate</i>	<i>INSPRU</i> 4.1, <i>INSPRU</i> 5.1, <i>INSPRU</i> 8.2 & <i>INSPRU</i> 8.5	
Adequacy of financial resources		
The <i>Society</i> to ensure that <i>members'</i> financial resources are adequate		<i>GENPRU</i> 1.2 & <i>GENPRU</i> 1.5
<i>Members</i> taken together to maintain adequate financial resources in respect of the <i>insurance business</i> conducted at Lloyd's		<i>GENPRU</i> 1.5
<i>Managing agents</i> to ensure that financial resources are adequate for each <i>syndicate</i>		<i>GENPRU</i> 1.2 & <i>GENPRU</i> 1.5
Valuation		
The <i>Society</i> and <i>managing agents</i> to apply generally accepted accounting principles to valuing assets, liabilities, equity and income statement items for the purposes of the <i>rules</i> and <i>guidance</i> in <i>GENPRU</i> , <i>INSPRU</i> and <i>IPRU (INS)</i> unless the contrary is expressly stated	<i>INSPRU</i> 3.1 & <i>INSPRU</i> 3.2	<i>GENPRU</i> 1.3 & <i>GENPRU</i> 1.5

Capital resources requirements		
The <i>Society</i> to calculate the <i>MCR</i> in respect of the <i>general insurance business</i> of each <i>member</i>		GENPRU 2.1 & GENPRU 2.3
The <i>Society</i> to calculate the <i>CRR</i> (higher of <i>MCR</i> and <i>ECR</i>) in respect of the <i>long-term insurance business</i> of each <i>member</i>		GENPRU 2.1 & GENPRU 2.3
Capital resources		
The <i>Society</i> and <i>managing agents</i> to calculate <i>capital resources</i> in accordance with the <i>rules</i> and <i>guidance</i> in <i>GENPRU</i>		GENPRU 2.2 & GENPRU 2.3
Adequacy of capital resources		
<i>Managing agents</i> to assess the adequacy of <i>capital resources</i> held at <i>syndicate</i> level in respect of <i>insurance business</i> carried on through each <i>syndicate</i> (annual <i>ICA</i> for each <i>syndicate</i>)	<i>INSPRU</i> 7.1	
The <i>Society</i> to assess the adequacy of <i>capital resources</i> available to support each <i>member's insurance business</i> (<i>ICA</i> for each <i>member</i>), both at <i>syndicate</i> level (taking account of <i>syndicate ICAs</i>), and as <i>funds at Lloyd's</i>	<i>INSPRU</i> 7.1	

8.2 Special provisions for Lloyd's

Management of insurance business

- 8.2.1 R Neither the *Society* nor *managing agents* may permit a *member* to carry on any *insurance business* except as a participant on one or more *syndicates*.

Obligations under INSPRU and GENPRU

- 8.2.2 R The *Society* must ensure that all participants in the Lloyd's market are made aware of their obligations under *INSPRU* and *GENPRU*.

Management of risk

- 8.2.3 R The *Society* must establish and maintain systems and controls to enable it appropriately to address the risks to which the Lloyd's market is exposed.

- 8.2.4 R The systems and controls in *INSPRU* 8.2.3 must include systems and controls to enable the *Society* to ensure that any assumptions made in calculating a *member's capital resources* or in determining the individual capital assessment for each *member* are regularly reviewed and that appropriate action is taken if any assumption is no longer valid.

- 8.2.5 R The *Society* must take all reasonable steps, including establishing and maintaining adequate systems and controls to enable it:
- (1) to manage the risks to which *funds at Lloyd's* and *central assets* are exposed; and
 - (2) to ensure that *funds at Lloyd's* and *central assets* are adequate to support all *balancing amounts*.

- 8.2.6 R A *managing agent* must establish and maintain adequate systems and controls to manage the risks to which the *insurance business* carried on through each *syndicate* it manages is exposed.

- 8.2.7 G In complying with *INSPRU* 8.2.6R, *managing agents* should have particular regard to:

(1) transactions which may give rise to a conflict of interest, such as those to which the *counterparties* are:

- (a) other members of the *managing agent's own group*;
- (b) any *members* of any *syndicates* managed by the *managing agent*; or
- (c) any entity that is part of a *group* to which one or more *members* of any *syndicates* managed by the *managing agent* belong; and

(2) transactions involving:

- (a) the provision of capital;

- (b) the provision of *reinsurance*; or
 - (c) the provision of other services.
- 8.2.8 R In complying with *INSPRU* 8.2.6R a *managing agent* need not take account of risks associated with assets that are not *syndicate assets*.
- 8.2.9 R The *Society* must take reasonable steps to ensure that systems and controls established and maintained by *managing agents* are adequate to ensure that risks to which the *insurance business* carried on through each *syndicate* is exposed do not have a detrimental effect on *funds at Lloyd's* or *central assets*.
- 8.2.10 G *Managing agents* and the *Society* each hold and manage some of the financial resources held to support the *insurance business* carried on through *syndicates*. In particular:
- (1) the *Society* holds and manages *funds at Lloyd's* and *central assets* which must be held to support *balancing amounts*. The *Society* is required to manage the risks that affect *funds at Lloyd's* and *central assets* directly, once the effects of any aggregation and diversification have been taken into account;
 - (2) *managing agents* hold and manage some of the financial resources in respect of the *insurance business* carried on through each *syndicate* that they manage. *Managing agents* are required to manage all risks affecting a *syndicate* except for the risk that *funds at Lloyd's* and *central assets* are not available to support the *balancing amount*.
- 8.2.11 R The *Society* must establish and maintain effective arrangements to monitor and manage risk arising from:
- (1) conflicts of interest (including in relation to (2) to (4));
 - (2) inter-*syndicate* transactions, including *reinsurance to close* and *approved reinsurance to close*;
 - (3) related party transactions; and
 - (4) transactions between *members* and itself.
- 8.2.12 R The arrangements in *INSPRU* 8.2.11R must enable the *Society* to identify any significant overstatement of financial resources resulting from any transaction falling within *INSPRU* 8.2.11R(2) to *INSPRU* 8.2.11R(4), including as a result of:
- (1) any differences in the amounts recorded as due or payable by each party to any such transaction; or
 - (2) any actual or likely disputes between the parties to any such transaction.
- 8.2.13 R If the *Society* identifies a significant overstatement of the kind referred to in *INSPRU* 8.2.12R, it must ensure that an appropriate adjustment is made, including if appropriate by a deduction from or reduction in the value attributed to:

- (1) the *capital resources* of any *member* concerned; or
- (2) the *Society's capital resources*.

Approved reinsurance to close

- 8.2.14 G As defined in the *Glossary*, "approved reinsurance to close" excludes:
- (1) *reinsurance* between parties other than *members*; and
 - (2) balance transfers between *syndicate years* of *syndicates* having only one *member*, which have no effect on the overall liabilities of that *member*.
- 8.2.15 G The "approved" status of an *approved reinsurance to close* does not alter the legal status or effect of the original *contract of insurance*, or the liability of a reinsured *member* to the *policyholder* under or in respect of the original *contract of insurance*.
- 8.2.16 R Notwithstanding that the liability of a reinsured *member* to a *policyholder* is unaffected by an *approved reinsurance to close* as described in *INSPRU* 8.2.15G, for the purposes of *INSPRU* and *GENPRU* only:
- (1) a *contract of insurance* reinsured under an *approved reinsurance to close* must be treated as if the reinsuring *member* and not the reinsured *member* had effected the original *contract of insurance*; and
 - (2) any payment received by a *member* as consideration for or in connection with an *approved reinsurance to close* must be treated as a *Lloyd's member's contribution* and not as *premium* or as a reinsurance recovery.

Provision of information by managing agents

- 8.2.17 R A *managing agent* must, as soon as possible, give the *Society* any information the *managing agent* has concerning material risks to *funds at Lloyd's* or *central assets*.
- 8.2.18 R A *managing agent* need not comply with *INSPRU* 8.2.17R if the *managing agent* knows that the *Society* already has the relevant information.

Insurance receivables to be carried to trust funds

- 8.2.19 R The *Society* must take all reasonable steps to ensure that each *member*:
- (1) executes the appropriate *Lloyd's trust deeds*; and
 - (2) carries to the appropriate *Lloyd's trust fund* all amounts received or receivable by the *member*, or on its behalf, in respect of any *insurance business* carried on by it.
- 8.2.20 R The *Society* must carry all amounts it receives on behalf of any *member* in respect of that *member's insurance business* to the appropriate *Lloyd's trust fund*.
- 8.2.21 R A *managing agent* must carry all amounts it receives on behalf of any

member in respect of that *member's insurance business* to the appropriate *Lloyd's trust fund*.

- 8.2.22 R In complying with *INSPRU* 8.2.19R to *INSPRU* 8.2.21R, the *Society* and *managing agents* must take all reasonable steps to ensure that amounts received or receivable by a *member* in respect of *general insurance business* and *long-term insurance business* are carried to separate *Lloyd's trust funds*.
- Amendments to byelaws, trust deeds and standard form letters of credit and guarantees
- 8.2.23 R The *Society* must, as soon as it is practical to do so, notify the *FSA* of its intention to approve the form of any new *Lloyd's trust deed*.
- 8.2.24 R The *Society* must, as soon as it is practical to do so, notify the *FSA* of its intention to make any amendment which may alter the meaning or effect of any *byelaw*, including:
- (1) any *Lloyd's trust deed*;
 - (2) any standard form letter of credit prescribed by the *Society* from time to time; or
 - (3) any standard form guarantee agreement prescribed by the *Society* from time to time.
- 8.2.25 R The *Society* must provide the *FSA* with full details of:
- (1) the form of any new *Lloyd's trust deed* it intends to approve, as described in *INSPRU* 8.2.23R and
 - (2) any amendments falling within *INSPRU* 8.2.24R.
- 8.2.26 R The *Society* must consult interested parties in relation to any new *Lloyd's trust deed* and in relation to any amendment falling within *INSPRU* 8.2.24R.
- 8.2.27 G Except in urgent cases, the *Society* should consult in relation to any new *Lloyd's trust deed* or amendments before the new deed or amendments take effect.
- 8.2.28 R The information provided to the *FSA* by the *Society* under *INSPRU* 8.2.25R must include:
- (1) a statement of the purpose of any proposed amendment or new *Lloyd's trust deed* and the expected impact, if any, on *policyholders*, *managing agents*, *members*, and potential *members*; and
 - (2) a description of the consultation undertaken under *INSPRU* 8.2.26R including a summary of any significant responses to that consultation.
- 8.2.29 G The *FSA* would normally expect to receive the information required under *INSPRU* 8.2.25R and *INSPRU* 8.2.28R not less than three months in advance of the proposed change.

8.3 The Central Fund

Application

8.3.1 R This chapter applies to the *Society*.

Purpose

8.3.2 G The *rules* and *guidance* in this chapter are intended to promote confidence in the market at Lloyd's, and to protect certain *consumers* of services provided by the *Society* in carrying on, or in connection with or for the purposes of, its *regulated activities*. They do this by:

(1) giving guidance to the *Society* about the protection that the *Central Fund* should provide for policyholders; and

(2) enabling the *FSA* to keep under review the protection the *Central Fund* provides for policyholders.

Enabling Provision

8.3.3 D The directions in this chapter are given under section 318 of the *Act* (Exercise of powers through Council) for the purpose of achieving the objective specified, as required by section 318(2) of the *Act*.

8.3.4 D The directions given in this chapter are given in relation to the exercise of the powers by the *Society* in respect of the *Central Fund* and are given with a view to achieving the objective of ensuring that the *Society* in making payments or in providing any other financial assistance from the *Central Fund* does so on a basis which takes no account of amounts of compensation which policyholders may receive under the provisions of the *compensation scheme* in respect of *protected claims* against *members*.

8.3.5 G The *Society* should seek to ensure that the *Central Fund* provides protection for policyholders so as to minimise the need for Lloyd's policyholders to have recourse to the *compensation scheme*.

8.3.6 G The *Society* should seek, and take appropriate account of, the *FSA's* views on all proposed changes in its arrangements relating to the *Central Fund*.

8.3.7 D The *Society* must, in the exercise of its powers to make payments from the *Central Fund* or to provide other forms of financial assistance from the *Central Fund*, ensure that in calculating and determining the amount of any such payment or the amount of any other financial assistance, it takes no account of the amounts of compensation which policyholders may receive under the provisions of the *compensation scheme* in respect of *protected claims* against *members*.

8.4 Capacity Transfer Market

Application

8.4.1 R This chapter applies to the *Society*.

Purpose

8.4.2 G The *rules* and *guidance* in this chapter are intended to promote confidence in the market at Lloyd's, and to protect certain *consumers* of services provided by the *Society* in carrying on, or in connection with or for the purposes of, its *regulated activities*. They do this by ensuring that the *Society* appropriately and effectively regulates the *capacity transfer market* so that it operates in a fair and transparent manner.

Requirement to make byelaws governing conduct in the capacity transfer market

8.4.3 R The *Society* must make appropriate *byelaws* governing conduct in the *capacity transfer market*.

8.4.4 G The *byelaws* referred to in *INSPRU* 8.4.3R should:

(1) ensure that adequate and effective arrangements are in place to enable *members* and *persons* applying to be admitted as *members* to enter into transactions to transfer *syndicate* capacity and settle these transactions in a timely manner;

(2) give clear and comprehensive guidance about the dissemination of information that is, or may be, relevant to the price of *syndicate* capacity and the transparency of the *capacity transfer market*; and

(3) prohibit unfair and abusive practices (including market manipulation), the misuse of information not generally available, and the dissemination of false or misleading information.

8.4.5 G The *Society* should have adequate and effective arrangements to:

(1) record and monitor transactions in the *capacity transfer market*, and maintain adequate audit trails; and

(2) suspend or annul transactions where appropriate.

8.4.6 G The *Society* should regularly review the *byelaws* referred to in *INSPRU* 8.4.3R, taking account of the standards of conduct required in other *UK* financial markets.

8.4.7 G The *Society* should consult *members* and *underwriting agents* before it finalises material changes in the *byelaws* referred to in *INSPRU* 8.4.3R, and should have timely and effective arrangements for notifying them of changes in these *byelaws*.

8.5 Former underwriting members

Application

8.5.1 R This chapter applies to the *Society*.

8.5.2 G The *rules* and *guidance* in this chapter are intended to promote confidence in the market at Lloyd's and to protect certain *consumers* of services provided by the *Society* in carrying on or in connection with or for the purposes of its *regulated activities* by:

(1) protecting policyholders against the risk that *former underwriting members* may not be able to meet any liabilities to carry out *contracts of insurance* that they underwrote at Lloyd's; and

(2) enabling the *FSA* to impose requirements under section 320(3) of the *Act* (Former underwriting members) if it considers this appropriate to protect policyholders.

Requirements relating to former underwriting members

8.5.3 R The *Society* must draw sections 320 to 322 of the *Act* (Former underwriting members, Requirements imposed under section 320, Rules applicable to former underwriting members) to the attention of any *person* ceasing to be an *underwriting member* on or after *commencement*.

8.5.4 R The *Society* must require any *person*, other than a *body corporate*, ceasing to be an *underwriting member* on or after *commencement* to:

(1) notify the *Society* of any change in his address within one month of the change;

(2) in the case of a natural person, to make arrangements for the *Society* to be notified in the event of his death.

8.6 Prudential risk management and associated systems and controls

Application of SYSC 14

8.6.1 R Subject to *INSPRU* 8.6.2R, *SYSC* 14 (Prudential risk management and associated systems and controls) applies to *managing agents* and to the *Society* in accordance with:

(1) for *managing agents*, *INSPRU* 8.1.4R; and

(2) for the *Society*, *INSPRU* 8.1.2R.

8.6.2 R The requirement in *SYSC* 14.1.18R to take reasonable steps to ensure the establishment and maintenance of a business plan does not apply to the *Society*.

Application of SYSC 11, 15 and 16

8.6.3 R Subject to *INSPRU* 8.6.5R, *SYSC* 11 (Liquidity risk management systems and controls), *SYSC* 15 (Credit risk management systems and controls) and *SYSC* 16 (Market risk management systems and controls) apply to *managing agents* and to the *Society* in accordance with:

(1) for *managing agents*, *INSPRU* 8.1.4R; and

(2) for the *Society*, *INSPRU* 8.1.2R.

Application of SYSC 17

8.6.4 R Subject to *INSPRU* 8.6.5R, *SYSC* 17 (Insurance risk systems and controls) applies to *managing agents* in accordance with *INSPRU* 8.1.4R.

8.6.5 R In accordance with *INSPRU* 8.6.2 R, the *rules* and *guidance* in *SYSC* 11, *SYSC* 15, *SYSC* 16 and *SYSC* 17 relating to the establishment and maintenance of a business plan do not apply to the *Society*.

9.1 Actions for damages

- 9.1.1 R A contravention of the *rules* in *INSPRU* does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

INSPRU TP

Transitional provisions

1 IPRU waivers

Application

1.1 R *INSPRU* TP 1 applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) an *incoming EEA firm*; or
- (3) an *incoming Treaty firm*.

Version of IPRU to be used

1.2 R Any reference in *INSPRU* TP to *IPRU (INS)* is to the version in force on 30 December 2004.

Duration of transitional

1.3 R *INSPRU* TP 1 applies until the relevant *rule* is revoked.

Continuing effect of waivers

1.4 R A *rule* in *INSPRU* listed in the Table at *INSPRU* TP Table 2 is disapplied, or is modified in its application, to a *firm*:

- (1) in order to produce the same effect, including any conditions, as a *waiver* had on the corresponding *rule* in *IPRU (INS)*;
- (2) for the same period as the *waiver* would have lasted, if shorter than the period in *INSPRU* TP 1.3;

provided the conditions set out in *INSPRU* TP 1.5 are satisfied.

1.5 R The conditions referred to in *INSPRU* TP 1.4 are:

- (1) the *rule* is shown in the Table at *INSPRU* TP Table 2 as corresponding with the *rule* in *IPRU (INS)* in relation to which the *waiver* was granted to the *firm*;
- (2) the *waiver* was current as respects the *firm* immediately before 31 December 2004; and
- (3) there is no specific transitional *rule* relating to the *waiver*.

- 1.6 R *INSPRU* TP 1.4 does not have effect if, and to the extent that, it would be inconsistent with any community obligation of the *United Kingdom*.
- 1.7 R A *firm* which has the benefit of a *waiver* to which *INSPRU* TP 1.4 applies must:
- (1) notify the *FSA* immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the *waiver*;
 - (2) maintain a written record of the *rule* in *INSPRU* to which it considers the *waiver* applies; and
 - (3) make the record available to the *FSA* on request.

INSPRU TP Table 2

Rules in INSPRU	Corresponding rules in IPRU (INS)
2.1.22	4.14(1)
3.1.34	5.11

6.1.23	10.2 10.2(1) 10.2(2) 10.2(3)

3 PRU waivers

Application

3.1 R *INSPRU* TP 3 applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) an *incoming EEA firm*; or
- (3) an *incoming Treaty firm*.

Version of PRU to be used

3.2 R A reference in *INSPRU* TP 3 to *PRU* is to the version in force on 30 December 2006.

Duration of transitional

3.3 R *INSPRU* TP 3 applies until the relevant *INSPRU rule* is revoked.

Continuing effect of waivers

3.4 R A *rule* in *INSPRU* is disapplied, or is modified in its application, to a *firm*:

- (1) in order to produce the same effect, including any conditions, as a *waiver* had on the *rule* in *PRU*;
- (2) for the same period as the *waiver* would have lasted, if shorter than the period in *INSPRU* TP 3.3;

provided the conditions set out in *INSPRU* TP 3.5 are satisfied.

3.5 R The conditions referred to in *INSPRU* TP 3.4 are:

- (1) the *rule* in *PRU* in relation to which the *waiver* was granted to the *firm* was redesignated as the relevant *rule* in *INSPRU* by the Prudential Sourcebook for Insurers Instrument 2006;
- (2) the *waiver* was current as respects the *firm* immediately before 31 December 2006; and
- (3) there is no specific transitional *rule* relating to the *waiver*.

3.6 R *INSPRU* TP 3.4 does not have effect if, and to the extent that, it would be inconsistent with any community obligation of the *United Kingdom*.

- 3.7 R A *firm* which has the benefit of a *waiver* to which *INSPRU* TP 3.4 applies must:
- (1) notify the *FSA* immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the *waiver*;
 - (2) maintain a written record of the *rule* in *INSPRU* to which it considers the *waiver* applies; and
 - (3) make the record available to the *FSA* on request.

4 EEA pure reinsurers

Application

4.1 R *INSPRU* TP 4 applies to a *pure reinsurer*:

- (1) whose head office is in an *EEA State* other than the *United Kingdom*; and
- (2) which is not an *incoming Treaty firm*.

Duration of transitional

4.2 R *INSPRU* TP 4 has effect in relation to a *firm* until 10 December 2008 or, if earlier, the date on which it becomes:

- (1) an *incoming EEA firm* by reason of having exercised its right to carry on the *regulated activity* of *effecting or carrying out contracts of insurance* in the *United Kingdom* in accordance with Schedule 3 to the *Act* (EEA Passport Rights); or
- (2) an *incoming Treaty firm* by reason of having exercised its right to carry on the *regulated activity* of *effecting or carrying out contracts of insurance* in the *United Kingdom* in accordance with Schedule 4 to the *Act* (Treaty Rights).

50% premiums and claims uplift for classes 11, 12 and 13; credit equalisation provision

4.3 R The following *rules* or paragraphs of a *rule* do not apply to a *firm*:

- (1) *INSPRU* 1.1.56R(1);
- (2) *INSPRU* 1.1.60R(1); and
- (3) *INSPRU* 1.4.39R to *INSPRU* 1.4.46R.

5 Pure reinsurance groups

Application

- 5.1 R *INSPRU* TP 5 applies to a *pure reinsurer* whose *ultimate EEA insurance parent undertaking* is the *parent undertaking* of a *group* comprised solely of *reinsurance undertakings*.

Duration of transitional

- 5.2 R *INSPRU* TP 5 applies until 10 December 2007.

Group capital resources requirement

- 5.3 R A *firm* need not comply with *INSPRU* 6.1.15R.

Insurance Prudential sourcebook (*INSPRU*)

Schedule 1

Record keeping requirements

G

1 The aim of the *guidance* in the following table is to give the reader a quick overall view of the relevant record keeping requirements.

2 It is not a complete statement of those requirements and should not be relied on as if it were.

3 Table

Handbook reference	Subject of Record	Contents of Record	When record must be made	Retention Period
<i>INSPRU</i> 1.2.20R	<i>Mathematical reserves</i>	(1) The methods and assumptions used in establishing the <i>firm's mathematical reserves</i> , including the margins for adverse deviation, and the reasons for their use (2) The nature of, reasons for, and effect of, any change in approach, including the amount by which the change in approach increases or decreases its <i>mathematical reserves</i>	Not specified	An appropriate period
<i>INSPRU</i> 1.3.17R, <i>INSPRU</i> 1.3.19R	Calculation of <i>with-profits insurance capital component</i>	(1) The methods and assumptions used in making any calculation required for the purposes of <i>INSPRU</i> 1.3 (and any subsequent changes) and the reasons for their use (2) Any change in practice (in particular	Not specified	An appropriate period

Handbook reference	Subject of Record	Contents of Record	When record must be made	Retention Period
		changes in those items which will or may be significant in relation to the eventual <i>claim</i> values) and the nature of, reasons for, and effect of, any change in approach with respect to those methods and assumptions		
<i>INSPRU</i> 1.5.23R	<i>Long-term insurance funds</i>	A separate accounting record in respect of each of a <i>firm's long-term insurance funds</i>	Not specified	Not specified
<i>INSPRU</i> 1.5.56R, <i>INSPRU</i> 1.5.57R	<i>Branch accounting records in the United Kingdom</i>	A record of the activities carried on from a <i>non-EEA direct insurer's United Kingdom branch</i> and, if it is an <i>EEA-deposit insurer</i> , from its <i>branches</i> in other <i>EEA states</i> including a record of: (1) the income, expenditure and liabilities arising from activities of the <i>branch</i> or <i>branches</i> (2) the assets identified under <i>INSPRU</i> 1.1.20R as available to meet those liabilities	Not specified	Not specified

Insurance Prudential sourcebook (*INSPRU*)

Schedule 2

Notification and reporting requirements

G

1 The aim of the *guidance* in the following table is to give the reader a quick overall view of the relevant notification requirements.

2 It is not a complete statement of those requirements and should not be relied on as if it were.

3 Table

Handbook reference	Matter to be notified	Contents of notification	Trigger event	Time allowed
<i>INSPRU</i> 2.1.23R	That a <i>reinsurance</i> exposure to a <i>reinsurer</i> or group of closely related <i>reinsurers</i> is reasonably likely to exceed, or has exceeded, 100% of the <i>firm's capital resources</i> excluding <i>capital resources</i> held to cover <i>property-linked liabilities</i>	Fact that the limit is reasonably likely to be, or has been, exceeded Note: upon notification under <i>INSPRU</i> 2.1.23R the <i>firm</i> must: (1) demonstrate that prudent provision has been made for the <i>reinsurance</i> exposure in excess of the 100% limit, or explain why in the opinion if the <i>firm</i> no provision is required, and (2) explain how the <i>reinsurance</i> exposure is being safely managed (see <i>INSPRU</i> 2.1.24R)	(1) A reasonable likelihood that the limit will be exceeded, or (2) if (1) does not apply, the limit being exceeded	As soon as the <i>firm</i> first becomes aware of the matter required to be notified
<i>INSPRU</i> 2.1.29R	That the <i>firm</i> has exceeded, or anticipates exceeding, the	Fact that the limit has been	The limit being	Immediately

Handbook reference	Matter to be notified	Contents of notification	Trigger event	Time allowed
	limit expressed in <i>INSPRU</i> 2.1.28E (in each <i>financial year</i> a <i>firm</i> should restrict the <i>gross earned premiums</i> which it pays to a <i>reinsurer</i> or group of closely related <i>reinsurers</i> to the higher of (a) 20% of the <i>firm's</i> projected <i>gross earned premiums</i> for that <i>financial year</i> and (b) £4 million)	exceeded, or that the <i>firm</i> anticipates exceeding the limit Note: upon notification under <i>INSPRU</i> 2.1.29R the <i>firm</i> must explain to the <i>FSA</i> how, despite the excess <i>reinsurance</i> concentration, the credit risk is being safely managed (see <i>INSPRU</i> 2.1.30R)	exceeded, or an anticipation that the limit will be exceeded	
<i>INSPRU</i> 3.1.65R	<i>Syndicate</i> liabilities not covered by matching <i>syndicate assets</i> as required by <i>INSPRU</i> 3.1.53R	Nature and extent of <i>syndicate</i> liabilities not covered by matching <i>syndicate assets</i> as required by <i>INSPRU</i> 3.1.53R	<i>Syndicate</i> liabilities are no longer covered by matching <i>syndicate assets</i> as required by <i>INSPRU</i> 3.1.53R	Immediately
<i>INSPRU</i> 7.1.68R	<i>Syndicate ICA</i> and <i>balancing amount</i> in respect of each <i>syndicate</i>	<i>Syndicate ICA</i> and <i>balancing amount</i> in respect of each <i>syndicate</i>	Notification should be made periodically	As part of the annual capital-setting process, in good time for the <i>Society</i> to review and place appropriate reliance on them when determining capital assessments for each

Handbook reference	Matter to be notified	Contents of notification	Trigger event	Time allowed
				<i>member</i>
<i>INSPRU</i> 7.1.74R	Significant doubt about the adequacy of a <i>syndicate ICA</i> or <i>balancing amount</i> with respect to <i>syndicate</i> risks and controls	Revised <i>syndicate ICA</i> and <i>balancing amount</i>	The <i>managing agent</i> considers that <i>syndicate ICA</i> and <i>balancing amount</i> communicated in the capital setting process are no longer adequate in the light of the risks to which the <i>syndicate</i> business is exposed	Immediately
<i>INSPRU</i> 8.2.17R	Information the <i>managing agent</i> has concerning material risks to <i>funds at Lloyd's</i> or <i>central assets</i>	All information concerning relevant risk	Receipt of information	As soon as possible
<i>INSPRU</i> 8.2.23R	Intention to approve the form of any new <i>Lloyd's trust deed</i>	Fact of intention	Intention to approve	As soon as practical
<i>INSPRU</i> 8.2.24R	Intention to make any amendment which may alter the meaning or effect of any <i>byelaw</i> (including <i>Lloyd's trust deeds</i> , standard form letters of credit and guarantees)	Fact of intention	Intention to amend	As soon as practical
<i>INSPRU</i> 8.2.25R	Full details of form of new <i>Lloyd's trust deed</i> or amendments to <i>byelaw</i> (including <i>Lloyd's trust deeds</i> , standard form letters of credit and guarantees)	(1) Statement of purpose of amendment or new form and expected impact, if any, on <i>policyholders</i> , <i>managing agents</i> , <i>members</i> and potential <i>members</i> , and	Not specified	Normally not less than three months in advance of proposed change

Handbook reference	Matter to be notified	Contents of notification	Trigger event	Time allowed
		(2) Description of the consultation undertaken and summary of significant responses to consultation		

Insurance Prudential sourcebook (*INSPRU*)

Schedule 3

Fees and other requirement payments

G

There are no requirements for fees or other payments in *INSPRU*.

Insurance Prudential sourcebook (*INSPRU*)

Schedule 4

Powers exercised

G

1 The following powers and related provisions in the *Act* have been exercised by the *FSA* to make the rules in *INSPRU*:

- (1) section 138 (General rule-making power);
- (2) section 141 (Insurance business rules);
- (3) section 149 (Evidential provisions);
- (4) section 150(2) (Actions for damages);
- (5) section 156 (General supplementary powers; and
- (6) section 318(1) (Exercise of powers through Council)

2 The following power in the *Act* has been exercised by the *FSA* to give *guidance* in *INSPRU*:

- (1) section 157(1) (Guidance).

Insurance Prudential sourcebook (*INSPRU*)

Schedule 5

Rights of action for damages

G

1. The table below sets out the *rules* in *INSPRU* contravention of which by an *authorised person* may be actionable under section 150 of the *Act* (Actions for damages) by a *person* who suffers loss as a result of the contravention.

2. If a "Yes" appears in the column headed "For *private person*", the *rule* may be actionable by a *private person* under section 150 (or, in certain circumstances, his fiduciary or representative; see article 6(2) and (3)(c) of the Financial Services and Markets Act 2000 (Rights of Action) Regulations 2001 (SI 2001/2256)). A "Yes" in the column headed "Removed" indicates that the *FSA* has removed the right of action under section 150(2) of the *Act*. If so, a reference to the *rule* in which it is removed is also given.

3. The column headed "For other *person*" indicates whether the *rule* may be actionable by a *person* other than a *private person* (or his fiduciary or representative) under article 6(2) and (3) of those Regulations. If so, an indication of the type of *person* by whom the *rule* may be actionable is given.

Chapter/ Appendix	Section/ Annex	Right of action under section 150		
		For <i>private person</i>	Removed	For other <i>person</i>
All <i>rules</i> in <i>INSPRU</i>		No	Yes (<i>INSPRU</i> 9.1.1R)	No

Prudential sourcebook for insurers, the Society of Lloyd's and managing agents (*INSPRU*)

Schedule 6

Rules that can be waived

G

The rules in *INSPRU* can be waived by the *FSA* under section 148 of the *Act* (Modification or waiver of rules), except for *INSPRU* 9.1.1R (Actions for damages). However, if the *rules* incorporate requirements laid down in European directives, it will not be possible for the *FSA* to grant a *waiver* that would be incompatible with the *United Kingdom's* responsibilities under those directives. It therefore follows that if a *rule* in *INSPRU* contains provisions which derive partly from a directive, and partly not, the *FSA* will be able to consider a *waiver* of the latter requirements only, unless the directive provisions are optional rather than mandatory.

**PRUDENTIAL SOURCEBOOK FOR MORTGAGE AND HOME FINANCE
FIRMS, AND INSURANCE INTERMEDIARIES INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 ("the Act"):
- (1) section 138 (General rule-making powers);
 - (2) section 149 (Evidential provisions);
 - (3) section 156 (General supplementary powers); and
 - (4) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 1 January 2007.

Amendments to the Handbook

- D. The FSA makes the rules and gives the guidance set out in Annexes A to C to this instrument.
- D. The Glossary of Definitions is amended in accordance with Annex D to this instrument.
- E. Other provisions in the FSA's Handbook of rules and guidance are amended in accordance with Annex E to this instrument.

Citation

- G. This instrument may be cited as the Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries Instrument 2006.
- H. The sourcebook in Annexes A to C to this instrument may be cited as the Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries (or MIPRU).

By order of the Board
25 October 2006

Annex A

Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries

In this annex, all text is new and is not underlined.

Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries

- 1** **Application and general provisions**
- 1.1 Application
- 1.2 Actions for damages

- 2** **Insurance mediation activity: responsibility, knowledge, ability and good repute**
- 2.1 Application and purpose
- 2.2 Allocation of the responsibility for insurance mediation activity
- 2.3 Knowledge, ability and good repute

- 3** **Professional indemnity insurance**
- 3.1 Application and purpose
- 3.2 Professional indemnity insurance requirements

- 4** **Capital resources**
- 4.1 Application and purpose
- 4.2 Capital resources requirements
- 4.3 Calculation of annual income
- 4.4 Calculation of capital resources

- 5** **Insurance undertakings and mortgage lenders using insurance or mortgage mediation services**
- 5.1 Application and purpose
- 5.2 Use of intermediaries

Transitional Provisions and Schedules

1 Application and general provisions

1.1 Application

1.1.1 G This sourcebook applies to a *firm* with *Part IV permission* to carry on:

- (1) *insurance mediation activity*;
- (2) *mortgage mediation activity*;
- (3) *mortgage lending*;
- (4) *mortgage administration*; and
- (5) *insurance business*;

as specified in the beginning of each of the remaining chapters.

1.2 Actions for damages

1.2.1 R A contravention of the *rules* in this sourcebook does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

- 2 Insurance mediation activity: responsibility, knowledge, ability and good repute
- 2.1 Application and purpose
- Application
- 2.1.1 R This chapter applies to a *firm* with *Part IV permission* to carry on *insurance mediation activity*.
- Purpose
- 2.1.2 G The main purpose of this chapter is to implement, in part, the provisions of the *Insurance Mediation Directive* as these apply to *firms* regulated by the *FSA*.
- 2.2 Allocation of the responsibility for insurance mediation activity
- Responsibility for insurance mediation activity
- 2.2.1 R An insurance intermediary, other than a sole trader, must allocate the responsibility for the *firm's insurance mediation activity* to a director or senior manager.
- [**Note:** Article 3(1), fourth paragraph, of the *IMD*]
- 2.2.2 R The *firm* may allocate the responsibility for its *insurance mediation activity* to an *approved person* (or *persons*) performing:
- (1) a *governing function* (other than the *non-executive director function*);
or
 - (2) the *apportionment and oversight function*; or
 - (3) the *significant management (other business operations) function*.
- 2.2.3 G (1) Typically an *insurance intermediary* will appoint a *person* performing a *governing function* (other than the *non-executive director function*) to direct its *insurance mediation activity*. Where this responsibility is allocated to a *person* performing another function, the *person* performing the *apportionment and oversight function* with responsibility for the apportionment of responsibilities must ensure that responsibility for the *firm's insurance mediation activity* is appropriately allocated.
- (2) The descriptions of *significant influence functions*, other than the *required functions*, do not extend to activities carried on by an *insurance intermediary* with *permission* only to carry on *insurance mediation activity* and whose principal purpose is to carry on activities other than *regulated activities* (see *SUP 10.1.21R*). In this case, the *firm* may allocate the responsibility for the *firm's insurance*

mediation activity to one or more of the *persons* performing the *apportionment and oversight function* who will be required to be an *approved person*.

- (3) In the case of a *sole trader*, the *sole trader* will be responsible for the *firm's insurance mediation activity*, whether or not he is himself a *person* approved to perform the *sole trader function*.

2.2.4 G Where a *firm* has appointed an *appointed representative* to carry on *insurance mediation activity* on its behalf, the *person* responsible for the *firm's insurance mediation activity* will also be responsible for the *insurance mediation activity* carried on by an *appointed representative*.

2.2.5 G The *FSA* will specify in the *FSA Register* the name of the *persons* to whom the responsibility for the *firm's insurance mediation activity* has been allocated by inserting after the relevant *controlled function* the words "(insurance mediation)". In the case of a *sole trader*, the *FSA* will specify in the *FSA Register* the name of the *sole trader* as the 'contact person' in the *firm*.

2.3 Knowledge, ability and good repute

2.3.1 R An *insurance intermediary* must establish on reasonable grounds that:

- (1) a reasonable proportion of the *persons* within its management structure who are responsible for *insurance mediation activity*; and

- (2) all other *persons* directly involved in its *insurance mediation activity*;

demonstrate the knowledge and ability necessary for the performance of their duties; and

- (3) all the *persons* in its management structure and any staff directly involved in *insurance mediation activity* are of good repute.

[**Note:** Article 4(1) and (2) of the *IMD*]

2.3.2 G In determining a *person's* knowledge and ability, the *firm* should have regard to matters including, but not limited to, whether the *person*:

- (1) has demonstrated by experience and training to be able, or that he will be able, to perform his duties related to the *firm's insurance mediation activity*; and

- (2) satisfies the relevant requirements of the *FSA's* Training and Competence sourcebook.

2.3.3 R In considering a *person's* repute, the *firm* must ensure that the *person*:

- (1) has not been convicted of any serious criminal offences linked to crimes against property or other crimes related to financial activities

(other than spent convictions under the Rehabilitation of Offenders Act 1974 or any other national equivalent); and

- (2) has not been adjudged bankrupt (unless the bankruptcy has been discharged);

under the law of any part of the *United Kingdom* or under the law of a country or territory outside the *United Kingdom*.

[**Note:** Article 4(2) of the *IMD*]

- 2.3.4 G The *firm* should give particular consideration to offences of dishonesty, fraud, financial crime or other offences under legislation relating to banking and financial services, companies, insurance and consumer protection.
- 2.3.5 G *Firms* are reminded that *Principle 3* requires *firms* to take reasonable care to organise and control their affairs responsibly and effectively. *Principle 3* is amplified by the *rule* which requires *firms* to take reasonable care to establish and maintain such systems and controls as are appropriate to its business (*SYSC 3.1.1R*). A *firm's* systems and controls should enable it to satisfy itself of the suitability of anyone who acts for it (*SYSC 3.2.13G*). This includes the assessment of an individual's honesty and competence. In addition, the Training and Competence sourcebook lists some general, high level commitments to training and competence which every *firm* should make and fulfil.

3 Professional indemnity insurance

3.1 Application and purpose

Application

3.1.1 R This chapter applies to a *firm* with *Part IV permission* to carry on any of the following activities:

(1) *insurance mediation activity*;

(2) *mortgage mediation activity*;

unless any of the following exemptions apply:

(3) in relation to *insurance mediation activity*, this chapter does not apply to a *firm* if another *authorised person* which has net tangible assets of more than £10 million provides a comparable guarantee; for this purpose:

(a) if the *firm* is a member of a *group* in which there is an *authorised person* with net tangible assets of more than £10 million, the comparable guarantee must be from that *person*;

(b) a 'comparable guarantee' means a written agreement on terms at least equal to those in a contract of professional indemnity insurance (see *MIPRU* 3.2.4R) to finance the claims that might arise as a result of a breach by the *firm* of its duties under the *regulatory system* or civil law;

(4) in relation to *mortgage mediation activity*, this chapter does not apply to a *firm* if:

(a) it has net tangible assets of more than £1 million; or

(b) the comparable guarantee provisions of (3) apply (as if the *firm* was carrying on *insurance mediation activity*) but substituting £1 million for £10 million in (3)(a) and (b);

(5) this chapter does not apply to:

(a) an *insurer*; or

(b) a *managing agent*; or

(c) a *personal investment firm* that is required by another *rule* to hold professional indemnity insurance (see *IPRU(INV)* 13.1.4(1)R);

(6) in relation to *mortgage mediation activity*, this chapter does not

apply to an *authorised professional firm*:

- (a) that is required by another *rule* to hold professional indemnity insurance (see *IPRU(INV)* 2.3.1R); and
- (b) whose *mortgage mediation activity* is incidental to its main business.

3.1.2 G The definition of *insurance mediation activity* is any of several activities 'in relation to a *contract of insurance*' which includes a contract of reinsurance. This chapter, therefore, applies to a reinsurance intermediary in the same way as it applies to any other *insurance intermediary*.

Purpose

3.1.3 G The purposes of this chapter are to:

- (1) implement article 4.3 of the *Insurance Mediation Directive* in so far as it requires *insurance intermediaries* to hold professional indemnity insurance, or some other comparable guarantee, against any liability that might arise from professional negligence; and
- (2) meet the *regulatory objectives* of consumer protection and maintaining market confidence by ensuring that *firms* have adequate resources to protect themselves, and their *customers*, against losses arising from breaches in its duties under the *regulatory system* or civil law.

3.1.4 G Any breach in the duty of a *firm* or of its agents under the *regulatory system* or civil law can give rise to claims being made against the *firm*. Professional indemnity insurance has an important role to play in helping to finance such claims. In so doing, this chapter amplifies *threshold condition 4* (Adequate resources). This *threshold condition* provides that a *firm* must have, on a continuing basis, resources that are, in the opinion of the *FSA*, adequate in relation to the *regulated activities* that the *firm* carries on.

3.1.5 G Under *Principles 3* and *4* a *firm* is required to take reasonable care to organise and control its affairs responsibly and effectively with adequate risk management systems and to maintain adequate financial resources. Under *Principle 9* a *firm* is obliged to take reasonable care to ensure the suitability of its *advice on investments* and discretionary decisions for any *customer* who is entitled to rely upon its judgement.

3.1.6 G Although financial resources and appropriate systems and controls can generally mitigate operational risk, professional indemnity insurance has a role in mitigating the risks a *firm* faces in its day to day operations, including those arising from not meeting the legally required standard of care when *advising on investments*. The purpose of this chapter is to ensure that a *firm* has in place the type, and level, of professional indemnity insurance necessary to mitigate these risks.

3.2 Professional indemnity insurance requirements

- 3.2.1 R A *firm* must take out and maintain professional indemnity insurance that is at least equal to the requirements of this section from:
- (1) an *insurance undertaking* authorised to transact professional indemnity insurance in the *EEA*; or
 - (2) a *person* of equivalent status in:
 - (i) a *Zone A country*; or
 - (ii) the Channel Islands, Gibraltar, Bermuda or the Isle of Man.

[**Note:** Article 4(3) of the *IMD*]

- 3.2.2 G The minimum *limits of indemnity* for a *firm* whose *Part IV permission* covers both *insurance mediation activity* and *mortgage mediation activity* is the higher of the *limits of indemnity* for these activities. If the *firm* opts for a single comparable guarantee to finance the claims which might arise as a result of both activities, the requirements for *insurance mediation activity* apply.

- 3.2.3 G A non-*EEA firm* (such as a captive insurance company outside the *EEA*) will be able to provide professional indemnity insurance only if it is authorised to do so in one of the specified countries or territories. The purpose of this provision is to balance the level of protection required for the *policyholder* against a reasonable level of flexibility for the *firm*.

Terms to be incorporated in the insurance

- 3.2.4 R The contract of professional indemnity insurance must incorporate terms which make provision for:
- (1) cover in respect of claims for which a *firm* may be liable as a result of the conduct of itself, its *employees* and its *appointed representatives* (acting within the scope of their appointment);
 - (2) the minimum *limits of indemnity* per year set out in this section;
 - (3) an excess as set out in this section;
 - (4) appropriate cover in respect of legal defence costs;
 - (5) continuous cover in respect of claims arising from work carried out from the date on which the *firm* was given *Part IV permission* for the *insurance mediation activity* or *mortgage mediation activity* concerned; and
 - (6) cover in respect of *Ombudsman* awards made against the *firm*.

- 3.2.5 G A *firm* is responsible for the conduct of all of its *employees*. The *firm's employees* include, but are not limited to, its *partners, directors*, individuals that are self-employed or operating under a contract hire agreement and any other individual that is employed in connection with its business.
- 3.2.6 G A *firm* is responsible for the conduct of all of its *appointed representatives*.
Minimum limits of indemnity: insurance intermediary
- 3.2.7 R If the *firm* is an *insurance intermediary*, then the minimum *limits of indemnity* are:
- (1) for a single claim, €1 million; and
 - (2) in aggregate, €1.5 million or, if higher, 10% of *annual income* up to £30 million.
- [Note: Article 4(3) of the *IMD*]
- 3.2.8 R If a *policy* is denominated in any currency other than euros, a *firm* must take reasonable steps to ensure that the *limits of indemnity* are, when the *policy* is effected and at *renewal*, at least equivalent to those required.
Minimum limits of indemnity: mortgage intermediary
- 3.2.9 R If the *firm* is a *mortgage intermediary*, then the minimum *limit of indemnity* is the higher of 10% of *annual income* up to £1 million, and:
- (1) for a single claim, £100,000; or
 - (2) in aggregate, £500,000.
- Excess
- 3.2.10 R In this chapter, "*client assets*" includes a *document* only if it has value, or is capable of having value, in itself (such as a bearer instrument).
- 3.2.11 R For a *firm* which does not hold *client money* or other *client assets*, the excess must not be more than the higher of:
- (1) £2,500; and
 - (2) 1.5% of *annual income*.
- 3.2.12 R For a *firm* which holds *client money* or other *client assets*, the excess must not be more than the higher of:
- (1) £5,000; and
 - (2) 3% of *annual income*.

Policies covering more than one firm

- 3.2.13 R If a *policy* provides cover to more than one *firm*, then:
- (1) the *limits of indemnity* must be calculated on the combined *annual income* of all the *firms* named in the *policy*; and
 - (2) each *firm* named in the *policy* must have the benefit of the relevant minimum *limits of indemnity*.

Additional capital

- 3.2.14 R If a *firm* seeks to have an excess which is higher than the relevant limit, it must hold additional capital calculated in accordance with the appropriate table below:

Table: Calculation of additional capital for firm not holding client money or other client assets (£000's)

Income		Excess obtained up to and including:

3.2.15 G The *rule* on the items which are eligible to contribute to the capital resources of a *firm* applies (see *MIPRU* 4.4.2R).

- 4 Capital resources
- 4.1 Application and purpose
- Application
- 4.1.1 R This chapter applies to a *firm* with *Part IV permission* to carry on any of the following activities, unless an exemption in this section applies:
- (1) *insurance mediation activity*;
 - (2) *mortgage mediation activity*;
 - (3) *entering into a regulated mortgage contract* (that is, *mortgage lending*);
 - (4) *administering a regulated mortgage contract* (that is, *mortgage administration*).
- 4.1.2 G As this chapter applies only to a *firm* with *Part IV permission*, it does not apply to an *incoming EEA firm* (unless it has a *top-up permission*). An *incoming EEA firm* includes a *firm* which is passporting into the *United Kingdom* under the *IMD*.
- 4.1.3 G The definition of *insurance mediation activity* refers to several activities 'in relation to a *contract of insurance*' which includes a contract of reinsurance. This chapter, therefore, applies to a reinsurance intermediary in the same way as it applies to any other *insurance intermediary*.
- Application: banks, building societies, insurers and friendly societies
- 4.1.4 R This chapter does not apply to:
- (1) a *bank*; or
 - (2) a *building society*; or
 - (3) a solo consolidated *subsidiary* of a *bank* or a *building society* ; or
 - (4) an *insurer*; or
 - (5) a *friendly society*.
- 4.1.5 G The capital resources of the *firms* above are calculated in accordance with the appropriate prudential sourcebook.
- Application: firms carrying on designated investment business only
- 4.1.6 R This chapter does not apply to a *firm* whose *Part IV permission* is limited to *regulated activities* which are *designated investment business*.

- 4.1.7 G A *firm* which carries on *designated investment business*, and no other *regulated activity*, may disregard this chapter. For example, a *firm* with *permission* limited to *dealing in investments as agent* in relation to *securities* is only carrying on *designated investment business* and the Interim Prudential sourcebook for investment businesses or the Prudential sourcebook for Banks, Building Societies and Investment Firms, as appropriate, will apply. However, if its *permission* is varied to enable it to arrange motor insurance as well, this activity is not *designated investment business* so the *firm* will be subject to the higher of the requirements in this chapter and those sourcebooks (see *MIPRU 4.2.5R*).

Application: credit unions

- 4.1.8 R This chapter does not apply to:
- (1) a 'small *credit union*', that is one with:
 - (a) assets of £5 million or less; and
 - (b) a total number of members of 5,000 or less (see *CRED 8.3.14R*); or
 - (2) a *credit union* whose *Part IV permission* includes *mortgage lending* or *mortgage administration* (or both) but not *insurance mediation activity* or *mortgage mediation activity*.

- 4.1.9 G
- (1) For *credit unions* to which this chapter applies and which are not *CTF providers*, the capital requirements will be the higher of the requirements in this chapter and in the Credit Unions sourcebook (see *MIPRU 4.2.6R*).
 - (2) For *credit unions* to which this chapter applies and which are *CTF providers* with permission to carry on *designated investment business*, the capital requirements will be the highest of the requirements in this chapter, those in the Credit Unions sourcebook and in the Interim Prudential sourcebook for investment businesses (see *MIPRU 4.2.6R*).

Application: professional firms

- 4.1.10 R
- (1) This chapter does not apply to an *authorised professional firm*:
 - (a) whose main business is the practice of its profession; and
 - (b) whose *regulated activities* covered by this chapter are incidental to its main business.
 - (2) A *firm's* main business is the practice of its profession if the proportion of income it derives from professional fees is, during its annual accounting period, at least 50% of the *firm's* total income (a temporary variation of not more than 5% may be disregarded for this

purpose).

- (3) Professional fees are fees, commissions and other receipts receivable in respect of legal, accountancy, actuarial, conveyancing and surveying services provided to clients but excluding any items receivable in respect of *regulated activities*.

Application: Lloyd's managing agents

- 4.1.11 R This chapter does not apply to a *managing agent*.
- 4.1.12 G The reason for excluding *managing agents* from the provisions of this chapter is twofold: first, a *member* will have accepted full responsibility for those activities under the *Society's managing agent* agreement. Secondly, the *member* is itself subject to capital requirements which are equivalent to those applying to an *insurer* (to which this chapter is also disappplied).

Application: social housing firms

- 4.1.13 G There are special provisions for a *social housing firm* when it is carrying on *mortgage lending* or *mortgage administration* (see *MIPRU 4.2.7R*).

Purpose

- 4.1.14 G This chapter amplifies *threshold condition 4* (Adequate resources) by providing that a *firm* must meet, on a continuing basis, a basic solvency requirement and a minimum capital resources requirement. This chapter also amplifies *Principle 4* which requires a *firm* to maintain adequate financial resources by setting out capital requirements for a *firm* according to the *regulated activity* or activities it carries on.
- 4.1.15 G Capital has an important role to play in protecting consumers and complements the roles played by professional indemnity insurance and *client money* protection (see the *client money rules*). Capital provides a form of protection for situations not covered by a *firm's* professional indemnity insurance and it provides the funds for the *firm's* PII excess, which it has to pay out of its own finances (see *MIPRU 3.2.11R* and *MIPRU 3.2.12R* for the relationship between the *firm's* capital and its excess).
- 4.1.16 G More generally, having adequate capital gives the *firm* a degree of resilience and some indication to consumers of creditworthiness, substance and the commitment of its owners. It reduces the possibility of a shortfall of funds and provides a cushion against disruption if the *firm* ceases to trade.
- 4.1.17 G There is a greater risk to consumers, and a greater adverse impact on market confidence, if a *firm* holding *client money* or other *client* assets fails. For this reason, the capital resources *rules* in this chapter clearly distinguish between *firms* holding *client* assets and those that do not.

Purpose: social housing firms

- 4.1.18 G *Social housing firms* undertake small amounts of mortgage business even though their main business consists of activities other than *regulated activities*. Their *mortgage lending* is only done as an adjunct to their primary purpose (usually the provision of housing) and is substantially different in character to that done by commercial lenders. Furthermore, they are *subsidiaries* of local authorities or registered social landlords which are already subject to separate regulation. The *FSA* does not consider that it would be proportionate to the risks involved with such business to impose significant capital requirements for these *firms*. The capital resources requirement for *social housing firms* therefore simply provides that, where their *Part IV permission* is limited to *mortgage lending* and *mortgage administration*, their net tangible assets must be greater than zero.
- 4.1.19 G A registered social landlord is a non-profit organisation which provides and manages homes for rent and sale for people who might not otherwise be able to rent or buy on the open market. It can be a housing association, a housing society or a non-profit making housing company. The Housing Corporation, which was set up by Parliament in 1964, funds homes built by registered social landlords from money received from central government.
- 4.2 Capital resources requirements
- General solvency requirement
- 4.2.1 R A *firm* must at all times ensure that it is able to meet its liabilities as they fall due.
- General capital resource requirement
- 4.2.2 R A *firm* must at all times maintain capital resources equal to or in excess of its relevant capital resources requirement.
- Capital resources: relevant accounting principles
- 4.2.3 R A *firm* must recognise an asset or liability, and measure its amount, in accordance with the relevant accounting principles applicable to it for the purpose of preparing its annual financial statements unless a *rule* requires otherwise.
- Capital resources: client assets
- 4.2.4 R In this chapter, "*client assets*" includes a *document* only if it has value, or is capable of having value, in itself (such as a bearer instrument).
- Capital resources requirement: firms carrying on regulated activities including designated investment business
- 4.2.5 R The capital resources requirement for a *firm* (other than a *credit union*) carrying on *regulated activities*, including *designated investment business*, is the higher of:

- (1) the requirement which is applied by this chapter according to the activity or activities of the *firm* (treating the relevant *rules* as applying to the *firm* by disregarding its *designated investment business*); and
- (2) the financial resource requirement which is applied by the Interim Prudential sourcebook for investment businesses or the Prudential sourcebook for Banks, Building Societies and Investment Firms.

Capital resources requirement: credit unions

4.2.6 R The capital resources requirement for a *credit union* to which this chapter applies is the highest of:

- (1) the requirement which is applied to *firms* carrying on mediation activities only (see *MIPRU* 4.2.11R) treating that *rule* as applying to the *credit union* by disregarding activities which are not *insurance mediation activity* or *mortgage mediation activity*;
- (2) the amount which is applied by the Credit Unions sourcebook; and
- (3) if the *credit union* is a *CTF provider* that has a *permission* to carry on *designated investment business*, the amount which is applied by Chapter 8 of the Interim Prudential sourcebook for investment businesses.

Capital resources requirement: social housing firms

4.2.7 R The capital resources requirement for a *social housing firm* whose *Part IV permission* is limited to carrying on the *regulated activities* of:

- (1) *mortgage lender*; or
- (2) *mortgage administration* (or both);

is that the *firm's* net tangible assets must be greater than zero.

4.2.8 G If a *social housing firm* is carrying on *mortgage lending* or *mortgage administration* (and no other *regulated activity*), its net tangible assets must be greater than zero. However, if it carries on *insurance mediation activity* or *mortgage mediation activity*, there is no special provision and the capital resources requirement for *firms* carrying on *designated investment business* or mediation activities only applies to it as appropriate.

Capital resources requirement: application according to regulated activities

4.2.9 R Unless any of the *rules* on capital resources for *firms* carrying on *designated investment business*, for *credit unions* or for *social housing firms* apply, the capital resources requirement for a *firm* varies according to the *regulated activity* or activities it carries on.

4.2.10 R Table: Application of capital resources requirements

	Regulated activities	Provisions
1.	(a) <i>insurance mediation activity</i> ; or (b) <i>mortgage mediation activity</i> (or both); and no other <i>regulated activity</i> .	MIPRU 4.2.11R
2.	(a) <i>mortgage lending</i> ; or (b) <i>mortgage lending and mortgage administration</i> ; and no other <i>regulated activity</i> .	MIPRU 4.2.12R to MIPRU 4.2.17E
3.	<i>mortgage administration</i> ; and no other <i>regulated activity</i> .	MIPRU 4.2.18R to MIPRU 4.2.19R
4.	<i>insurance mediation activity</i> ; and (a) <i>mortgage lending</i> ; or (b) <i>mortgage administration</i> (or both).	MIPRU 4.2.20R
5.	<i>mortgage mediation activity</i> ; and (a) <i>mortgage lending</i> , or (b) <i>mortgage administration</i> (or both).	MIPRU 4.2.21R
6.	Any combination of <i>regulated activities</i> not within rows 1 to 5.	MIPRU 4.2.22R

Capital resources requirement: mediation activity only

- 4.2.11 R
- (1) If a *firm* carrying on *insurance mediation activity* or *mortgage mediation activity* (and no other *regulated activity*) does not hold *client money* or other *client* assets in relation to these activities, its capital resources requirement is the higher of:
- (a) £5,000; and
 - (b) 2.5% of the *annual income* from its *insurance mediation activity* or *mortgage mediation activity* (or both).
- (2) If a *firm* carrying on *insurance mediation activity* or *mortgage mediation activity* (and no other *regulated activity*) holds *client money* or other *client* assets in relation to these activities, its capital resources requirement is the higher of:
- (a) £10,000; and

- (b) 5% of the *annual income* from its *insurance mediation activity* or *mortgage mediation activity* (or both).

Capital resources requirement: mortgage lending and administration (but not mortgage administration only)

- 4.2.12 R (1) The capital resources requirement for a *firm* carrying on *mortgage lending* or *mortgage lending and mortgage administration* (and no other *regulated activity*) is the higher of:
- (a) £100,000; and
 - (b) 1% of:
 - (i) its total assets plus total undrawn commitments; less:
 - (ii) excluded loans plus intangible assets (see Note 1 in the table in *MIPRU* 4.4.4R).
- (2) Undrawn commitments means the total of those amounts which a borrower has the right to draw down from the *firm* but which have not yet been drawn down, excluding those under an agreement:
- (a) which has an original maturity of up to one year; or
 - (b) which can be unconditionally cancelled at any time by the lender.
- 4.2.13 G When considering what is an undrawn commitment, the *FSA* takes into account an amount which a borrower has the right to draw down, but which has not yet been drawn down, whether the commitment is revocable or irrevocable, conditional or unconditional.
- 4.2.14 R When calculating total assets, the *firm* may exclude a loan which has been transferred to a third party only if it meets the following conditions:
- (1) the first condition is that the loan has been transferred in a legally effective manner by:
 - (a) novation; or
 - (b) legal or equitable assignment; or
 - (c) sub-participation; or
 - (d) declaration of trust; and
 - (2) the second condition is that the lender:
 - (a) retains no material economic interest in the loan; and

(b) has no material exposure to losses arising from it.

4.2.15 E (1) When seeking to rely on the second condition, a *firm* should ensure that the loan qualifies for the 'linked presentation' accounting treatment under Financial Reporting Standard 5 (Reporting the substance of transactions) issued in April 1994, and amended in December 1994 and September 1998 (if applicable to the *firm*).

(2) Compliance with (1) may be relied upon as tending to establish compliance with the second condition.

4.2.16 G The requirement that the loan qualifies for the 'linked presentation' accounting treatment under FRS 5 is aimed at those *firms* which report according to FRS 5. Other *firms* which report under other standards, including International Accounting Standards, need not adopt FRS 5 in order to meet the second condition.

4.2.17 E (1) When seeking to rely on the second condition, a *firm* should not provide material credit enhancement in respect of the loan unless it deducts the amount of the credit enhancement from its capital resources before meeting its capital resources requirement.

(2) Credit enhancement includes:

(a) any holding of subordinated loans or notes in a transferee that is a special purpose vehicle; or

(b) over collateralisation by transferring loans to a larger aggregate value than the *securities* to be issued; or

(c) any other arrangement with the transferee to cover a part of any subsequent losses arising from the transferred loan.

(3) Contravention of (1) may be relied upon as tending to establish contravention the second condition.

Capital resources requirement: mortgage administration only

4.2.18 R The capital resources requirement for a *firm* carrying on *mortgage administration* only, which has all or part of the *regulated mortgage contracts* that it administers on its balance sheet, is the amount which is applied to a *firm* carrying on *mortgage lending* or *mortgage lending and mortgage administration* (and no other *regulated activity*) (see MIPRU 4.2.12R).

4.2.19 R The capital resources requirement for a *firm* carrying on *mortgage administration* only, which has all the *regulated mortgage contracts* that it administers off its balance sheet, is the higher of:

(1) £100,000; and

- (2) 10% of its *annual income*.

Capital resources requirement: insurance mediation activity and mortgage lending or mortgage administration

4.2.20 R The capital resources requirement for a *firm* carrying on *insurance mediation activity* and *mortgage lending* or *mortgage administration* is the sum of the requirements which are applied to the *firm* by:

- (1) the capital resources *rule* for a *firm* carrying on *insurance mediation activity* or *mortgage mediation activity* (and no other *regulated activity*) (see MIPRU 4.2.11R); and
- (2) (a) the capital resources *rule* for a *firm* carrying on *mortgage lending* or *mortgage lending* and *mortgage administration* (and no other *regulated activity*) (see MIPRU 4.2.12R); or
- (b) if, in addition to its *insurance mediation activity*, the *firm* carries on *mortgage administration* with all the assets that it administers off balance sheet, the capital resources *rule* for such a *firm* (see MIPRU 4.2.19R).

Capital resources requirement: mortgage mediation activity and mortgage lending or mortgage administration

4.2.21 R (1) If a *firm* carrying on *mortgage mediation activity* and *mortgage lending* or *mortgage administration* does not hold *client money* or other *client assets* in relation to its *mortgage mediation activity*, the capital requirement is the amount applied to a *firm*, according to the activities carried on by the *firm*, by:

- (a) the capital resources *rule* for a *firm* carrying on *mortgage lending* or *mortgage lending* and *mortgage administration* (and no other *regulated activity*) (see MIPRU 4.2.12R); or
- (b) if, in addition to its *mortgage mediation activity*, the *firm* carries on *mortgage administration* with all the assets that it administers off balance sheet, the capital resources *rule* for such a *firm* (see MIPRU 4.2.19R).
- (2) If the *firm* holds *client money* or other *client assets* in relation to its *mortgage mediation activity*, the capital resources requirement is:
- (a) the amount calculated under (1); plus
- (b) the amount which is applied to a *firm* carrying on *insurance mediation activity* or *mortgage mediation activity* (and no other *regulated activity*) that holds *client money* or other *client assets* in relation to these activities (see MIPRU 4.2.11R(2)).

Capital resources requirement: other combinations of activities

4.2.22 R The capital resources requirement for a *firm* carrying any other combination of *regulated activities* is the amount which is applied to a *firm* carrying on *insurance mediation activity* and *mortgage lending* or *mortgage administration* (see MIPRU 4.2.20R).

4.3 Calculation of annual income

Annual income

4.3.1 R This section contains provisions relating to the calculation of *annual income* for the purposes of:

- (1) the *limits of indemnity* for professional indemnity insurance; and
- (2) the capital resources requirements.

4.3.2 R 'Annual income' is the annual income given in the *firm's* most recent annual financial statement from the relevant *regulated activity* or activities.

4.3.3 R For a *firm* which carries on *insurance mediation activity* or *mortgage mediation activity*, *annual income* is the amount of all brokerage, fees, *commissions* and other related income (for example, administration charges, overrides, profit shares) due to the *firm* in respect of or in relation to those activities.

4.3.4 G (1) The purpose of the *rule* on *annual income* that applies to *insurance intermediaries* and *mortgage intermediaries* is to ensure that the capital resources requirement is calculated on the basis only of brokerage and other amounts earned by a *firm* which are its own income.

(2) *Annual income* includes *commissions* and other amounts the *firm* may have agreed to pay to other *persons* involved in a transaction, such as sub-agents or other intermediaries.

(3) A *firm's annual income* does not, however, include any amounts due to another *person* (for example, the product provider) which the *firm* has collected on behalf of that other *person*.

4.3.5 R If a *firm* is a *principal*, its *annual income* includes amounts due to its *appointed representative* in respect of activities for which the *firm* has accepted responsibility.

4.3.6 G If a *firm* is a *network*, it should include the relevant income due to all of its *appointed representatives* in its *annual income*.

Annual income for mortgage administration

- 4.3.7 R For the purposes of the calculation of the capital resources of a *firm* carrying on *mortgage administration* only with all the assets it administers off balance sheet, *annual income* is the sum of:
- (1) revenue (that is, *commissions*, fees, net interest income, dividends, royalties and rent); and
 - (2) gains;
 - (3) arising in the course of the ordinary activities of the *firm*, less profit:
 - (a) on the sale or termination of an operation;
 - (b) arising from a fundamental reorganisation or restructuring having a material effect on the nature and focus of the *firm's* operation; and
 - (c) on the disposal of fixed assets, including *investments* held in a long-term portfolio.

Annual income: periods of less than 12 months

- 4.3.8 R If the *firm's* most recent annual financial statement does not cover a 12 *month* period, the *annual income* is taken to be the amount in the statement converted, proportionally, to a 12 *month* period.

Annual income: no financial statements

- 4.3.9 R If the *firm* does not have annual financial statements, the *annual income* is to be taken from the forecast or other appropriate accounts which the *firm* has submitted to the *FSA*.

4.4 Calculation of capital resources

The calculation of a firm's capital resources

- 4.4.1 R (1) A *firm* must calculate its capital resources only from the items which are eligible to contribute to a *firm's* capital resources from which it must deduct certain items (see *MIPRU* 4.4.4R).
- (2) If the *firm* is subject to the Interim Prudential sourcebook for investment businesses, the Prudential sourcebook for Banks, Building Societies and Investment Firms or the Credit Unions sourcebook, the capital resources are the higher of:
- (a) the amount calculated under (1); and
 - (b) the financial resources calculated under those sourcebooks.

- 4.4.2 R Table: Items which are eligible to contribute to the capital resources of a firm

	Item	Additional explanation																		
1.	<i>Share capital</i>	<p>This must be fully paid and may include:</p> <table border="1" data-bbox="743 344 1417 568"> <tr> <td data-bbox="743 344 927 418">(1)</td> <td data-bbox="927 344 1417 418">ordinary <i>share capital</i>; or</td> </tr> <tr> <td data-bbox="743 418 927 568">(2)</td> <td data-bbox="927 418 1417 568">preference <i>share capital</i> (excluding preference <i>shares</i> redeemable by shareholders within two years).</td> </tr> </table>	(1)	ordinary <i>share capital</i> ; or	(2)	preference <i>share capital</i> (excluding preference <i>shares</i> redeemable by shareholders within two years).														
(1)	ordinary <i>share capital</i> ; or																			
(2)	preference <i>share capital</i> (excluding preference <i>shares</i> redeemable by shareholders within two years).																			
2.	Capital other than <i>share capital</i> (for example, the capital of a <i>sole trader</i> , <i>partnership</i> or <i>limited liability partnership</i>)	<p>The capital of a <i>sole trader</i> is the net balance on the <i>firm's</i> capital account and current account. The capital of a <i>partnership</i> is the capital made up of the <i>partners'</i>:</p> <table border="1" data-bbox="743 754 1417 2004"> <tr> <td data-bbox="743 754 810 1420">(1)</td> <td data-bbox="810 754 1417 1420"> <p>capital account, that is the account:</p> <table border="1" data-bbox="810 826 1417 1420"> <tr> <td data-bbox="810 826 868 938">(a)</td> <td data-bbox="868 826 1417 938">into which capital contributed by the <i>partners</i> is paid; and</td> </tr> <tr> <td data-bbox="810 938 868 1420">(b)</td> <td data-bbox="868 938 1417 1420"> <p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table> </td> </tr> </table> </td> </tr> <tr> <td data-bbox="743 1420 810 1532">(2)</td> <td data-bbox="810 1420 1417 1532">current accounts according to the most recent financial statement.</td> </tr> <tr> <td colspan="2" data-bbox="743 1532 1417 1677">For the purpose of the calculation of capital resources, in respect of a <i>defined benefit occupational pension scheme</i>:</td> </tr> <tr> <td data-bbox="743 1677 810 1789">(1)</td> <td data-bbox="810 1677 1417 1789">a <i>firm</i> must derecognise any <i>defined benefit asset</i>;</td> </tr> <tr> <td data-bbox="743 1789 810 2004">(2)</td> <td data-bbox="810 1789 1417 2004">a <i>firm</i> may substitute for a <i>defined benefit liability</i> the <i>firm's deficit reduction amount</i>, provided that the election is applied consistently in respect of any one financial year.</td> </tr> </table>	(1)	<p>capital account, that is the account:</p> <table border="1" data-bbox="810 826 1417 1420"> <tr> <td data-bbox="810 826 868 938">(a)</td> <td data-bbox="868 826 1417 938">into which capital contributed by the <i>partners</i> is paid; and</td> </tr> <tr> <td data-bbox="810 938 868 1420">(b)</td> <td data-bbox="868 938 1417 1420"> <p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table> </td> </tr> </table>	(a)	into which capital contributed by the <i>partners</i> is paid; and	(b)	<p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table>	(i)	he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i> ; or	(ii)	the <i>partnership</i> is otherwise dissolved or wound up; and	(2)	current accounts according to the most recent financial statement.	For the purpose of the calculation of capital resources, in respect of a <i>defined benefit occupational pension scheme</i> :		(1)	a <i>firm</i> must derecognise any <i>defined benefit asset</i> ;	(2)	a <i>firm</i> may substitute for a <i>defined benefit liability</i> the <i>firm's deficit reduction amount</i> , provided that the election is applied consistently in respect of any one financial year.
(1)	<p>capital account, that is the account:</p> <table border="1" data-bbox="810 826 1417 1420"> <tr> <td data-bbox="810 826 868 938">(a)</td> <td data-bbox="868 826 1417 938">into which capital contributed by the <i>partners</i> is paid; and</td> </tr> <tr> <td data-bbox="810 938 868 1420">(b)</td> <td data-bbox="868 938 1417 1420"> <p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table> </td> </tr> </table>	(a)	into which capital contributed by the <i>partners</i> is paid; and	(b)	<p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table>	(i)	he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i> ; or	(ii)	the <i>partnership</i> is otherwise dissolved or wound up; and											
(a)	into which capital contributed by the <i>partners</i> is paid; and																			
(b)	<p>from which, under the terms of the <i>partnership</i> agreement, an amount representing capital may be withdrawn by a <i>partner</i> only if:</p> <table border="1" data-bbox="868 1126 1417 1420"> <tr> <td data-bbox="868 1126 1417 1308">(i)</td> <td data-bbox="868 1126 1417 1308">he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i>; or</td> </tr> <tr> <td data-bbox="868 1308 1417 1420">(ii)</td> <td data-bbox="868 1308 1417 1420">the <i>partnership</i> is otherwise dissolved or wound up; and</td> </tr> </table>	(i)	he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i> ; or	(ii)	the <i>partnership</i> is otherwise dissolved or wound up; and															
(i)	he ceases to be a <i>partner</i> and an equal amount is transferred to another such account by his former <i>partners</i> or any <i>person</i> replacing him as their <i>partner</i> ; or																			
(ii)	the <i>partnership</i> is otherwise dissolved or wound up; and																			
(2)	current accounts according to the most recent financial statement.																			
For the purpose of the calculation of capital resources, in respect of a <i>defined benefit occupational pension scheme</i> :																				
(1)	a <i>firm</i> must derecognise any <i>defined benefit asset</i> ;																			
(2)	a <i>firm</i> may substitute for a <i>defined benefit liability</i> the <i>firm's deficit reduction amount</i> , provided that the election is applied consistently in respect of any one financial year.																			

3.	Reserves (Note 1)	<p>These are, subject to Note 1, the audited accumulated profits retained by the <i>firm</i> (after deduction of tax, dividends and proprietors' or <i>partners'</i> drawings) and other reserves created by appropriations of share premiums and similar realised appropriations. Reserves also include gifts of capital, for example, from a <i>parent undertaking</i>.</p>
<p>For the purposes of calculating capital resources, a <i>firm</i> must make the following adjustments to its reserves, where appropriate:</p>		<p>(1) a <i>firm</i> must deduct any unrealised gains or, where applicable, add back in any unrealised losses on debt instruments held in the available-for-sale financial assets category;</p>
<p>(2) a <i>firm</i> must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;</p>		<p>(3) in respect of a <i>defined benefit occupational pension scheme</i>:</p>
<p>(a) a <i>firm</i> must derecognise any <i>defined benefit asset</i>;</p>		<p>(b) a <i>firm</i> may substitute for a <i>defined benefit liability</i> the <i>firm's deficit reduction amount</i>, provided that the election is applied consistently in respect of any one financial year.</p>
4.	Interim net profits (Note 1)	<p>If a <i>firm</i> seeks to include interim net profits in the calculation of its capital resources, the profits have, subject to Note 1, to be verified by the <i>firm's</i> external auditor, net of tax, anticipated dividends or proprietors' drawings and other appropriations.</p>
5.	Revaluation reserves	
6.	General/collective provisions (Note 1)	<p>These are provisions that a <i>firm</i> carrying on <i>mortgage lending</i> or <i>mortgage administration</i> holds against potential losses that have not yet been identified but which experience indicates are</p>

		present in the <i>firm's</i> portfolio of assets. Such provisions must be freely available to meet these unidentified losses wherever they arise. Subject to Note 1, general/collective provisions must be verified by external auditors and disclosed in the <i>firm's</i> annual report and accounts.
7.	Subordinated loans	Subordinated loans must be included in capital on the basis of the provisions in this chapter that apply to subordinated loans.
Note:		
1	Reserves must be audited and interim net profits, general and collective provisions must be verified by the <i>firm's</i> external auditor unless the <i>firm</i> is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).	

- 4.4.3 G A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

- 4.4.4 R Table: Items which must be deducted from capital resources

1	<i>Investments</i> in own <i>shares</i>
2	Intangible assets (Note 1)
3	Interim net losses (Note 2)
4	Excess of drawings over profits for a <i>sole trader</i> or a <i>partnership</i> (Note 2)
<p>Notes</p> <p>1. Intangible assets are the full balance sheet value of goodwill (but not until 14 January 2008 - see transitional provision 1), capitalised development costs, brand names, trademarks and similar rights and licences.</p> <p>2. The interim net losses in row 3, and the excess of drawings in row 4, are in relation to the period following the date as at which the capital resources are being computed.</p>	

Personal assets

- 4.4.5 R In relation to a *sole trader's firm* or a *firm* which is a *partnership*, the *sole trader* or a *partner* in the *firm* may use personal assets to meet the general

solvency requirement and the general capital resource requirement, to the extent necessary to make up any shortfall in meeting those requirements, unless:

- (1) those assets are needed to meet other liabilities arising from:
 - (a) personal activities; or
 - (b) another business activity not regulated by the *FSA*; or
- (2) the *firm* holds *client money* or other *client* assets.

4.4.6 G A *sole trader* or a *partner* may use any personal assets, including property, to meet the capital requirements of this chapter, but only to the extent necessary to make up a shortfall.

Subordinated loans

4.4.7 R A subordinated debt must not form part of the capital resources of the *firm* unless it meets the following conditions:

- (1) (for a *firm* which carries on *insurance mediation activity* or *mortgage mediation activity* (or both) but not *mortgage lending* or *mortgage administration*) it has an original maturity of:
 - (a) at least two years; or
 - (b) it is subject to two years' notice of repayment;
- (2) (for all other *firms*) it has an original maturity of:
 - (a) at least five years; or
 - (b) it is subject to five years' notice of repayment;
- (3) the claims of the subordinated creditors must rank behind those of all unsubordinated creditors;
- (4) the only events of default must be non-payment of any interest or principal under the debt agreement or the winding up of the *firm*;
- (5) the remedies available to the subordinated creditor in the event of non-payment or other default in respect of the subordinated debt must be limited to petitioning for the winding up of the *firm* or proving the debt and claiming in the liquidation of the *firm*;
- (6) the subordinated debt must not become due and payable before its stated final maturity date except on an event of default complying with (4);
- (7) the agreement and the debt are governed by the law of England and

Wales, or of Scotland or of Northern Ireland;

- (8) to the fullest extent permitted under the rules of the relevant jurisdiction, creditors must waive their right to set off amounts they owe the *firm* against subordinated amounts owed to them by the *firm*;
- (9) the terms of the subordinated debt must be set out in a written agreement or instrument that contains terms that provide for the conditions set out in this *rule*; and
- (10) the debt must be unsecured and fully paid up.

4.4.8 R (1) This *rule* applies to a *firm* which:

- (a) carries on:
 - (i) *insurance mediation activity*; or
 - (ii) *mortgage mediation activity* (or both); and
- (b) in relation to those activities, holds *client money* or other *client assets*;

but is not carrying on *mortgage lending* or *mortgage administration*.

- (2) In calculating its capital resources, the *firm* must exclude any amount by which the aggregate amount of its subordinated loans and its redeemable preference *shares* exceeds the amount calculated as follows:

four times (a - b - c);		
where:		
a	=	items 1 to 5 in the Table of items which are eligible to contribute to a <i>firm's</i> capital resources (see <i>MIPRU</i> 4.4.2R)
b	=	the <i>firm's</i> redeemable preference <i>shares</i> ; and
c	=	the amount of its intangible assets (but not goodwill until 14 January 2008 - see transitional provision 1).

4.4.9 G If a *firm* wishes to see an example of a subordinated loan agreement which would meet the required conditions, it should refer to the FSA website.

5 Insurance undertakings and mortgage lenders using insurance or mortgage mediation services

5.1 Application and purpose

Application

5.1.1 R This chapter applies to a *firm* with a *Part IV permission* to carry on:

(1) *insurance business*; or

(2) *mortgage lending*;

(3) and which uses, or proposes to use, the services of another person consisting of:

(a) *insurance mediation*; or

(b) *insurance mediation activity*; or

(c) *mortgage mediation activity*.

Purpose

5.1.2 G The purpose of this chapter is to implement article 3.6 of the *Insurance Mediation Directive* in relation to *insurance undertakings*. The provisions of this chapter have been extended to *mortgage lenders* in relation to *insurance mediation activity*, and to *insurance undertakings* and *mortgage lenders* in relation to *mortgage mediation activity*, to ensure that *firms* using these services are treated in the same way and to ensure that *clients* have the same protection. To avoid the loss of protection where an intermediary itself uses the services of an *unauthorised person*, this chapter also ensures that each person in the chain of those providing services is authorised.

5.1.3 G This chapter supports the more general duties in *Principles 2* and *3*, and the relevant *rule* in the Senior Management Arrangements, Systems and Controls sourcebook (see *SYSC 3.1.1R*).

5.2 Use of intermediaries

5.2.1 R A *firm* must not use, or propose to use, the services of another person consisting of:

(1) *insurance mediation*; or

(2) *insurance mediation activity*; or

(3) *mortgage mediation activity*;

unless two conditions are satisfied.

[Note: Article 3(6) of the *IMD*]

- 5.2.2 R The first condition is that the person, in relation to the activity:
- (1) has *permission*; or
 - (2) is an *exempt person*; or
 - (3) is an *exempt professional firm*; or
 - (4) is registered in another *EEA State* for the purposes of the *IMD*; or
 - (5) in relation to *insurance mediation activity*, is not carrying this activity on in the *EEA*; or
 - (6) in relation to *mortgage mediation activity*, is not carrying this activity on in the *United Kingdom*.

[Note: Article 3(6) of the *IMD*]

- 5.2.3 E (1) A *firm* should:
- (a) before using the services of the intermediary, check:
 - (i) the *FSA Register*; or
 - (ii) in relation to *insurance mediation* carried on by an *EEA firm*, the register of its *Home State regulator*;for the status of the person; and
 - (b) use the services of that person only if the relevant register indicates that the person is registered for that purpose.
- (2) (a) Checking the *FSA Register* before using the services of the intermediary and using the services of that person only if the *FSA Register* indicates that the person is registered for that purpose may be relied on as tending to establish that:
- (i) the person, in relation to the activity, has *permission*; or
 - (ii) the person, in relation to *insurance mediation activity*, also is an *exempt person* or an *authorised professional firm*.
- (b) In relation to *insurance mediation* carried on by an *EEA firm*, checking the register of the *firm's Home State regulator* and using the services of the *EEA firm* only if the register indicates that the *firm* is registered for that purpose may be relied on as tending to establish that the *firm* is registered for

the purposes of the *IMD*.

- 5.2.4 R The second condition is that the *firm* takes all reasonable steps to ensure that the person that it uses in relation to the activity, is not, directly or indirectly, carrying out the activity as a consequence of the activities of another person which:
- (1) contravene section 19 of the *Act* (The general prohibition); or
 - (2) in the case of activities provided from an establishment in an *EEA State*, contravene the *IMD* registration requirements.
- [**Note:** Article 3(6) of the *IMD*]
- 5.2.5 R In order to comply with the second condition, a *firm* may rely on a confirmation provided by the other person in writing if:
- (1) the confirmation is provided by a person that satisfies the first condition;
 - (2) the *firm* checked that this is the case; and
 - (3) the *firm* is not aware that the confirmation is inaccurate and has no grounds for reasonably being aware that the confirmation is inaccurate.
- 5.2.6 G The *FSA Register* can be accessed through the *FSA* website under the link www.fsa.gov.uk/register.

Annex B

MIPRU Transitional Provisions

MIPRU TP Transitional Provisions

MIPRU TP 1.1 Transitional Provisions

(1)	(2) Material to which the transitional provision applies	(3)	(4) Transitional provision	(5) Transitional provision: dates in force	(6) Handbook provision: coming into force
1	<i>MIPRU</i> 4.4.4R and <i>MIPRU</i> 4.4.8R(3)	R	A <i>firm</i> is not required to include goodwill in its intangible assets until 14 January 2008.	From 31 October 2004 until 14 January 2008	31 October 2004
2	<i>MIPRU</i> 5.2.2R and <i>MIPRU</i> 5.2.4R	R	<i>MIPRU</i> 5.2.2R and <i>MIPRU</i> 5.2.4R have effect in respect of the use by a <i>firm</i> of the services of another <i>person</i> consisting of <i>insurance mediation</i> and provided from an establishment in an <i>EEA State</i> that has not implemented Article 3 (Registration) of the <i>IMD</i> , as if the condition in paragraph (4) of <i>MIPRU</i> 5.2.2R and the condition in paragraph (2) of <i>MIPRU</i> 5.2.4R were a condition that the <i>firm</i> has no reason to doubt the good repute, competence and financial standing of that <i>person</i> .	from 14 January 2005 until the implementation of Article 3 of the <i>IMD</i> by the relevant <i>EEA State</i>	14 January 2005

Annex C

Schedules to MIPRU

Insert, after MIPRU Chapter 5, the following schedules. In this annex, all text is new and is not underlined.

MIPRU

Schedule 1

Record keeping requirements

G

- 1.1 There are no record keeping requirements in *MIPRU*.

MIPRU
Schedule 2
Notification requirements

G

2.1 There are no notification requirements in *MIPRU*.

MIPRU
Schedule 3
Fees and other required payments

G

3.1 There are no requirements for fees or other payments in *MIPRU*.

MIPRU
Schedule 4
Powers exercised

G

4.1

The following powers and related provisions in or under the <i>Act</i> have been exercised by the <i>FSA</i> to make the <i>rules</i> in <i>MIPRU</i> :	
(1)	Section 138 (General rule-making power);
(2)	Section 149 (Evidential provisions); and
(3)	Section 156 (General supplementary powers).

4.2

The following powers in the <i>Act</i> have been exercised by the <i>FSA</i> to give the <i>guidance</i> in <i>MIPRU</i> :	
(1)	Section 157(1) (Guidance).

MIPRU
Schedule 5
Rights of actions for damages

G

1. The table below sets out the *rules* in *MIPRU* contravention of which by an *authorised person* may be actionable under section 150 of the *Act* (Actions for damages) by a person who suffers loss as a result of the contravention.
2. If a ‘Yes’ appears in the column headed ‘For private person’, the *rule* may be actionable by a ‘private person’ under section 150 of the *Act* (or, in certain circumstances, his fiduciary or representative; see article 6(2) and (3)(c) of the Financial Services and Markets Act 2000 (Rights of Action) Regulations 2001 (SI 2001 No 2256)). A ‘Yes’ in the column headed ‘Removed’ indicates that the *FSA* has removed the right of action under section 150(2) of the *Act*. If so, a reference to the *rule* in which it is removed is also given.
3. The column headed ‘For other person’ indicates whether the *rule* may be actionable by a person other than a private person (or his fiduciary or representative) under article 6(2) and (3) of those Regulations. If so, an indication of the type of person by whom the *rule* may be actionable is given.

Table

Chapter/ Appendix	Section / Annex	Right of action under section 150		
		For private person	Removed	For other person
All <i>rules</i> in <i>MIPRU</i> with the status letter “E”		No	No	No
All other <i>rules</i> in <i>MIPRU</i>		No	Yes, <i>MIPRU</i> 1.2.1R	No

MIPRU
Schedule 6
Rules that can be waived

G

1. The *rules* in *MIPRU* may be waived by the *FSA* under section 148 of the *Act* (Modification or waiver of rules). However, if the *rules* incorporate requirements laid down in European directives, it will not be possible for the *FSA* to grant a *waiver* that would be incompatible with the *United Kingdom's* responsibilities under those directives. It therefore follows that if a *rule* in *MIPRU* contains provisions which derive partly from a directive, and partly not, the *FSA* will be able to consider a *waiver* of the latter requirements only, unless the directive provisions are optional rather than mandatory.

Annex D

Amendments to the Glossary of Definitions

Insert the following new definitions in the appropriate alphabetical position:

annual income

(in *MIPRU*)

the income referred to in *MIPRU* 4.3.

Annex E

General amendments to the Handbook consequential on the creation of *MIPRU*

References in the *Handbook* (other than those specifically mentioned in the CRD (Consequential Amendments) Instrument 2006) to provisions in column (1) of the tables 1 and 2 are replaced with references to the corresponding provisions in column (2) of those tables.

PRUDENTIAL SOURCEBOOK FOR UCITS FIRMS (AND CONSEQUENTIAL AMENDMENTS) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
- (a) section 138 (General rule-making power);
 - (b) section 140 (Restrictions on managers of authorised unit trust schemes);
 - (c) section 156 (General supplementary powers);
 - (d) section 157(1) (Guidance);
 - (e) section 242 (Applications for authorisation of unit trust schemes);
 - (f) section 247 (Trust scheme rules);
 - (g) section 248 (Scheme particulars rules); and
- (2) regulations 6 and 12 of the Open-Ended Investment Company Regulations 2001 (SI 2001/1228).
- B. The rule-making powers and related provisions listed above are specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 1 January 2007.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended or made in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions is amended	Annex A
Prudential sourcebook for UCITS Firms (UPRU) is made	Annex B
Supervision manual (SUP) is amended	Annex C
Collective investment schemes sourcebook (CIS) is amended	Annex D

Citation

- E. This instrument may be cited as the Prudential sourcebook for UCITS Firms (and Consequential Amendments) Instrument 2006.
- F. Annex B to this instrument (including its schedules) may be cited as the Prudential sourcebook for UCITS Firms (or UPRU).

By order of the Board
25 October 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend the following definitions as shown:

...

annual accounts (in *UPRU*) accounts prepared to comply with the Companies Acts 1985 to 1989 and their equivalent in Northern Ireland, or other statutory obligations.

...

annual audited fixed expenditure (in *UPRU*) has the meaning given in *UPRU* 2.1.3R (Annual audited fixed expenditure).

...

annual financial return (in *UPRU*) means the return referred to in *SUP*.

...

client money (in *UPRU*) client money for the purposes of the *client money rules*.

...

client money rules (a) (in *CASS*, *UPRU* and *COB*) *CASS* 4.1 to *CASS* 4.3.

...

...

counterparty (in *UPRU*) any person with or for whom a firm carries on *designated investment business* or an *ancillary activity*.

...

financial resources (in *UPRU*) the financial resources calculated in accordance with *UPRU* 2.2.1R (Financial resources) that a *UCITS firm* needs to meet its *financial resources requirement*.

...

financial resources requirement (in *UPRU*) has the meaning given in *UPRU* 2.1.2R.

...

financial (in *UPRU*) means *annual financial return*, *quarterly financial return* or

return monthly financial return as the case may be.

...

funds under management (in UPRU)

(1) collective investment schemes other than OEICs managed by the firm including schemes where it has delegated the management function but excluding schemes that it is managing as delegate; and

(2) OEICs for which the firm is the designated management company.

...

initial capital (in UPRU) capital calculated in accordance with UPRU Table 2.2.1R (Method of calculation of financial resources) composed of the specified items set out in that Table.

...

monthly financial return (in UPRU) means the return referred to in SUP.

...

own funds (in UPRU) funds calculated in accordance with UPRU Table 2.2.1R (Method of calculation of financial resources) composed of the specified items set out in that Table.

...

participation (for the purposes of ELM, UPRU and PRU 8 (Group risk)):

...

...

permitted business (in UPRU) means permitted activity.

...

qualifying capital instrument (in UPRU) means that part of a firm's capital which is a security of indeterminate duration, or other instrument, that fulfils the following conditions:

(a) it may not be reimbursed on the bearer's initiative or without the prior agreement of FSA;

(b) the debt agreement must provide for the firm to have the option of deferring the payment of interest on the debt;

(c) the lender's claims on the firm must be wholly subordinated to those of

all non-subordinated creditors:

(d) the documents governing the issue of the securities must provide for debt and unpaid interest to be such as to absorb losses, whilst leaving the *firm* in a position to continue trading; and

(e) only fully paid-up amounts shall be taken into account.

...

qualifying
capital item

(in *UPRU*) means that part of a *firm*'s capital which has the following characteristics:

(a) it is freely available to the *firm* to cover normal banking or other risks where revenue or capital losses have not yet been identified;

(b) its existence is disclosed in internal accounting records; and

(c) its amount is determined by the management of the *firm* and verified by independent auditors, and is made known to, and is monitored by, *FSA*.

Note: verification by internal auditors will suffice until such time as EU provisions making external auditing mandatory have been implemented.

...

qualifying
subordinated
loan

(in *UPRU*) has the meaning given in *IPRU(INV)* 5.2.5(1) to (7) R (Qualifying subordinated loans).

...

qualifying
undertaking

(in *UPRU*) has the meaning given in *IPRU(INV)* 5.2.6(3) R (Qualifying undertakings).

...

quarterly
financial
return

(in *UPRU*) means the return referred to in *SUP*.

...

readily
realisable
investment

(except in *UPRU*)

(a) a ~~packaged product~~ *packaged product*;

...

(in *UPRU*) means a *unit* in a *regulated collective investment scheme*, a *life policy* or any *marketable investment* other than one which is traded on or under the rules of a *recognised or designated investment exchange* so irregularly or infrequently:

(a) that it cannot be certain that a price for that *investment* will be quoted at all times; or

(b) that it may be difficult to effect transactions at any price which may be quoted.

...

trading book (in *UPRU*) in relation to a *firm's* business or *exposures*, means:

(a) its proprietary positions in financial instruments:

(i) which are held for resale and/or are taken on by the *firm* with the intention of benefiting in the short term from actual and/or expected differences between their buying and selling prices or from other price or interest-rate variations;

(ii) arising from matched principal broking;

(iii) taken in order to hedge other elements of the trading book;

(b) *exposures* due to unsettled securities transactions, free deliveries, *OTC derivative* instruments, repurchase agreements and securities lending transactions based on securities included in (a)(i) to (iii) above, reverse repurchase agreements and securities borrowing transactions based on securities included in (a)(i) to (iii) above; and

(c) fees, commission, interest and dividends, and margin on exchange-traded derivatives which are directly related to the items included in (a) and (b) above.

Transitional provision for UPRU

(1)	(2) Material to which the transitional provision applies	(3)	(4) Transitional provision	(5) Transitional provision: dates in force	(6) Handbook provision: coming into force
1.	This sourcebook	R	An <i>operator</i> of a <i>UCITS scheme</i> authorised on or before 12 February 2004 need not comply with the provisions in this sourcebook until 12 February 2007 provided it continues to comply instead with the provisions in <i>IPRU(INV) 5</i> and it continues to restrict its activities to those specified under <i>CIS 16.5.1R (1)</i> or <i>COLL 6.9.9R (1) to (3)</i> , as appropriate.	From 01/01/07 to 12/02/07	01/01/07

UCITS firms

1.1 Introduction

Application

1.1.1 R This sourcebook and any provisions of the Interim Prudential sourcebook for investment businesses incorporated into this sourcebook by reference, apply to every *UCITS firm*.

1.1.2 G *Firms* are reminded that a *UCITS management company* can be either:

(1) a *UCITS firm*; or

(2) a *UCITS investment firm*.

1.1.3 G This sourcebook only applies to *UCITS firms*. *UCITS investment firms* are *BIPRU limited licence firms* and the prudential requirements for those *firms* are set out in the Prudential sourcebook for banks, building societies and investment firms and the General prudential sourcebook. The difference between the two types of *UCITS management companies* is that a *UCITS investment firm* in addition to carrying on the activities permitted by Article 5.2 of the *UCITS Directive* (scheme management), may also carry on the activities permitted by Article 5.3 such as portfolio management.

1.2 Purpose

1.2.1 G (1) The purpose of this sourcebook is to amplify *Principle 4* (Financial prudence) which requires a *firm* to maintain adequate financial resources to meet its *designated investment business* commitments and to withstand the risks to which its business is subject. This assists in the achievement of the *regulatory objectives* of consumer protection and market confidence.

(2) This sourcebook also implements certain requirements of the *UCITS Directive* as amended by the amending Council Directive 2001/107/EC which among other matters imposes capital requirements on a *UCITS management company*.

2 Prudential requirements

2.1 Financial resources and financial resources requirements

Financial resources

2.1.1 R A *firm* must ensure that it has at all times *financial resources* which equal or exceed the applicable *financial resources requirement*.

Financial resources requirement

2.1.2 R The *financial resources requirement* for a *firm* is the higher of:

(1) subject to a maximum requirement of €10,000,000:

(a) *initial capital* requirement of €125,000; plus

(b) if the *funds under management* exceed €250,000,000, an additional amount of 0.02% of the excess; or

- (2) 13/52 of its annual audited fixed expenditure.

Annual audited fixed expenditure

- 2.1.3 R For the purposes of this sourcebook, a *firm's* annual audited fixed expenditure is:
- (1) the amount described as total expenditure in the most recent *annual financial return*, less the following items (if they are included within that expenditure):
 - (a) staff bonuses, except to the extent that they are guaranteed;
 - (b) *employees' and directors' shares* in profits, except to the extent that they are guaranteed;
 - (c) other appropriations of profits;
 - (d) shared *commission* and fees payable which are directly related to *commission* and fees receivable which are included within total revenue;
 - (e) interest charges in respect of borrowings made to finance the acquisition of the *firm's readily realisable investments*;
 - (f) interest paid to *customers* on *client money*;
 - (g) interest paid to *counterparties*;
 - (h) fees, brokerage and other charges paid to *clearing houses*, exchanges and *intermediate brokers* for the purposes of *executing*, registering or clearing transactions;
 - (i) foreign exchange losses;
 - (j) other variable expenditure; or
 - (2) where the previous accounting period does not include twelve months' trading, an amount calculated in accordance with (1) pro-rated to an equivalent annual amount; or
 - (3) where a *firm* has not prepared an *annual financial return* or *annual accounts* since the commencement of its *permitted business*, an amount based on forecast expenditure included in the budget for the first twelve months' trading, as submitted with its application for authorisation.

- 2.1.4 G *A firm's financial resources requirement will be recalculated and audited annually when its annual financial return is prepared. The firm should maintain financial resources sufficient to meet its new financial resources requirement from the date on which the annual financial return is approved by the auditor. The annual audited fixed expenditure applicable at the accounting reference date to which the annual financial return is prepared will be that based on the previous year's figures. This will usually be the same as that used in the fourth quarter's quarterly financial return prepared to the same accounting reference date.*

2.2 Method of calculation of financial resources

2.2.1 R

PART I		
A firm must calculate its financial resources as shown below, subject to the detailed requirements set out in Part II.		
Financial resources	Category	Part II
Para		
TIER 1		
(1) Paid-up share capital (excluding preference shares)	} A	2
(2) Share premium account		3

TIER 3			
(15) Illiquid assets		F	11
Financial resources = (E – F) =		G	

PART II

DETAILED REQUIREMENTS

1 Ratios

(Items 11 and 12)

- (a) the total of fixed term cumulative preference shares (item 11) and long-term *qualifying subordinated loans* (item 12) that may be included in Tier 2 capital is limited to 50 per cent of Tier 1 capital ;
- (b) Tier 1 capital must equal or exceed €125,000 at all times; and
- (c) Tier 2 capital must not exceed 100 per cent of Tier 1 capital.

2 Non corporate entities

- (a) In the case of partnerships or sole traders, the following terms should be substituted, as appropriate, for items 1 to 4 in Tier 1 capital:
 - (i) partners' capital accounts (excluding loan capital);
 - (ii) partners' current accounts (excluding unaudited profits and loan capital);
 - (iii) proprietor's account (or other term used to signify the sole trader's capital but excluding unaudited profits).
- (b) Loans other than *qualifying subordinated loans* shown within partners' or proprietors' accounts must be classified as Tier 2 capital under item 13.
- (c) For the calculation of *financial resources*, partners' current accounts figures are subject to the

following adjustments in respect of a *defined benefit occupational pension scheme*:

- (i) a *firm* must derecognise any *defined benefit asset*:
- (ii) a *firm* may substitute for *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year.

Note

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

3 Audited Reserves

For the calculation of *financial resources*, the following adjustments apply to the audited reserves figure:

- (a) a *firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost:
- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year.

Note

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

- (d) a *firm* must not include any unrealised gains from investment property.

Note

Unrealised gains from investment property should be reported as part of revaluation reserves.

- (e) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but excluding from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

4 Eligible LLP members' capital (Item 5)

Members' capital of a *limited liability partnership* may only be included in Tier 1 of the calculation (see item 5) if the conditions in *IPRU(INV)* Annex A 2.2R (Specific conditions for eligibility) and *IPRU(INV)* Annex A 2.3R (General conditions for eligibility) are satisfied.

5 Intangible assets (Item 7)

Intangible assets comprise:

- (a) formation expenses to the extent that these are treated as an asset in the *firm's* accounts;
- (b) goodwill, to the extent that it is treated as an asset in the *firm's* accounts; and
- (c) other assets treated as intangibles in the *firm's* accounts.

6 Material current year losses (Item 8)

Losses in current year operating figures must be deducted when calculating Tier 1 capital if such losses are material. For this purpose profits and losses must be calculated quarterly, as appropriate. If this calculation reveals a net loss it shall only be deemed to be material for the purposes of this Table if it exceeds 10 per cent of the *firm's* Tier 1 capital.

7 Material holdings in credit and financial institutions (Item 9)

Material holdings comprise:

- (a) where the *firm* holds more than 10 per cent of the equity share capital of the institution, the value of that holding and the amount of any subordinated loans to the institution and the value of holdings in *qualifying capital items* or *qualifying capital instruments* issued by the institution;
- (b) in the case of holdings other than those mentioned in (a) above, the value of holdings of equity share capital in, and the amount of subordinated loans made to, such institutions and the value of holdings in *qualifying capital items* or *qualifying capital instruments* issued by such institutions to the extent that the total of such holdings and subordinated loans exceeds 10 per cent of the *firm's own funds* calculated before the deduction of item 9.

8 Long term qualifying subordinated loans (Item 12)

Loans having the characteristics prescribed by *IPRU(INV) 5.2.5(1) R* may be included in item 12, subject to the limits set out in paragraph (1) above.

9 Qualifying arrangements (Item 14)

A *firm* may only include a *qualifying undertaking* or other arrangement in item 14 if it is a *qualifying capital instrument* or a *qualifying capital item*.

10 Interim profits

Non-trading book interim profits may only be included in Tier 1 of the calculation if they have been independently verified by the *firm's* external auditors.

For this purpose, the auditor should normally undertake at least the following:

- (a) satisfy himself that the figures forming the basis of the interim profits have been properly extracted from the underlying accounting records;
- (b) review the accounting policies used in calculating the interim profits so as to obtain comfort that they are consistent with those normally adopted by the *firm* in drawing up its annual financial statements;
- (c) perform analytical review procedures on the results to date, including comparisons of actual performance to date with budget and with the results of prior periods;
- (d) discuss with management the overall performance and financial position of the *firm*;
- (e) obtain adequate comfort that the implications of current and prospective litigation, all known claims and commitments, changes in business activities and provisions for bad and doubtful debts have been properly taken into account in arriving at the interim profits; and
- (f) follow up problem areas of which the auditors are already aware in the course of auditing the *firm's* financial statements.

A *firm* wishing to include interim profits in Tier 1 capital in a *financial return* should submit to the *FSA* with the *financial return* a verification report signed by its auditor which states whether the interim results are fairly stated.

Profits on the sale of capital items or arising from other activities which are not directly related to the *designated investment business* of the *firm* may also be included within the calculation of *financial resources* if they can be separately verified by the *firm's* auditors. In such a case, such profits can form part of the *firm's* Tier 1 capital as audited profits.

11 Illiquid assets (Item 15)

Illiquid assets comprise:

- (a) tangible fixed assets;

Note

In respect of tangible fixed assets purchased under finance leases the amount to be deducted as an illiquid asset shall be limited to the excess of the asset over the amount of the related liability shown on the balance sheet.

- (b) holdings in, including subordinated loans to, *credit* or *financial institutions* which may be included in the *own funds* of such *institutions* unless they have been deducted under item 9;
- (c) any *investment* in undertakings other than *credit institutions* and other *financial institutions* where such *investments* are not readily realisable;
- (d) any deficiency in net assets of a *subsidiary*;
- (e) deposits not available for repayment within 90 days or less (except for payments in connection with margined futures or options contracts);

Note

Where cash is placed on deposit with a maturity of more than 90 days but is repayable on demand subject to the payment of a penalty, then this is not required to be deducted as an illiquid asset but a deduction is required for the amount of the penalty.

- (f) loans, other debtors and accruals not falling due to be repaid within 90 days or which are more than one month overdue by reference to the contractual payment date;
- (g) physical stocks ;
- (h) prepayments to the extent that the period of prepayment exceeds thirteen weeks ; and
- (i) if not otherwise covered, any holding in eligible capital instruments of an insurance undertaking, insurance holding company, or reinsurance undertaking that is a *subsidiary* or *participation*. Eligible capital instruments include ordinary share capital, cumulative preference shares, perpetual securities and long-term subordinated loans, that are eligible for insurance undertakings under *GENPRU 2* or, as the case may be, *INSPRU 7*.

2.3 Application of certain rules in the interim prudential sourcebook for investment businesses

2.3.1 R (1) The following *rules* in the Interim Prudential sourcebook for investment businesses apply to a *firm* in respect of *qualifying subordinated loans, qualifying undertakings* and records:

(a) *IPRU(INV)* 5.2.5(1), (2) and (4) to (7) R;

(b) *IPRU(INV)* 5.2.6(3) R; and

(c) *IPRU(INV)* 5.3.1(1) R and *IPRU(INV)* 5.3.1(4) to 5.3.1(6) R.

(2) References in those *rules* to:

(a) *IPRU(INV)* Table 5.2.2(1) R are to be construed as references to *UPRU* Table 2.2.1R;

(b) *IPRU(INV)* 5.2.3(1) R are to be construed as references to *UPRU* 2.1.1R;

(c) *IPRU(INV)* 5.3.1(3) R are to be construed as references to *UPRU* 2.4.2R; and

(d) *IPRU(INV)* 5.2.1(2) are to be construed as references to *UPRU* 2.1.1R.

2.4 Records

2.4.1 R A *firm* must ensure that proper accounting records are kept in English to show and explain the *firm's own account transactions*.

1 UPRU Schedule 1 – Record keeping requirements
G

UPRU Sch.1.1 Record keeping requirements

Handbook reference	Subject of record	Contents of record	When record must be made	Retention period
UPRU 2.4.1R	accounting records	proper accounting records to show and explain the <i>firm's own account transactions</i>	not specified	not specified

2 UPRU Schedule 2 – Notification requirements
G

UPRU Sch.2.1

There are no reporting requirements in this sourcebook.

3 UPRU Schedule 3 - Fees and other required payments
G

UPRU Sch. 3.1

There are no requirements for fees or other payments in this sourcebook.

4 UPRU Schedule 4 – Powers exercised
G

UPRU Sch.4.1

The following powers and related provision in or under <i>Act</i> have been exercised by the <i>FSA</i> to make the <i>rules</i> in this sourcebook:	
1.	section 138 (General rule-making power);
2.	section 140 (Restrictions on managers of authorised unit trust schemes);
3.	section 156 (General supplementary powers);
4.	section 242 (Applications for authorisation of unit trust schemes);
5.	section 247 (Trust scheme rules);
6.	section 248 (Scheme particulars rules); and
7.	regulation 6 and 12 of the Open-Ended Investment Company regulations 2001 (SI 2001/1228).
The following powers in the <i>Act</i> have been exercised by the <i>FSA</i> to give the guidance in this sourcebook:	
8.	section 157(1) (Guidance).

5 UPRU Schedule 5 – Rights of action for damages
G

UPRU Sch.5.1

The table below sets out the rules in this sourcebook contravention of which by an authorised person may be actionable under section 150 of the Act (Actions for damages) by a person who suffers loss as a result of the contravention.

1. If a Yes appears in the column headed For private person, the rule may be actionable by a private person under section 150 unless a Yes appears in the column headed Removed. A Yes in the column headed Removed indicates that the *FSA* has removed the right of action under section 150(2) of the Act. If so, a reference to the rule in which it is removed is also given.
2. In accordance with The Financial Services and Markets Act 2000 (Rights of Action) Regulations 2001 (SI 2001\2256), a private person is:
 - (1) any individual, except when acting in the course of carrying on a regulated activity; and
 - (2) any person who is not an individual, except when acting in the course of carrying on business of any kind; but does not include a government, a local authority or an international organisation.
3. The column headed "For other person?" indicates whether the rule is actionable by a person other than a private person, in accordance with those Regulations. If so, an indication of the type of person by whom the rule is actionable is given.

UPRU Sch.5.2

Actions for damages: the Prudential sourcebook for UCITS Firms

Chapter/ Appendix	Section/ Annex	Paragraph	Right of action under section 150			
			For private person	Removed	For other person?	
All rules in this sourcebook			No	No	No	

6 UPRU Schedule 6 – Rules that can be waived
G

UPRU Sch.6.1

1. The rules in this sourcebook can be *waived* by the *FSA* under section 148 or 250 of the *Act* (Modification or waiver of rules) or regulation 7 of the *OEIC Regulations* (Modification or waiver of FSA rules).
2. Although the *FSA* has the formal power of *waiver* under the *Act* in relation to these *rules*, much of this sourcebook implements the requirements of the *UCITS Directive* by ensuring that *UCITS firms* as *UCITS management companies* comply with such requirements. Accordingly, while formal power may exist to waive such *UCITS Directive* derived rules, the *FSA's* ability to do so is severely constrained.

MORTGAGES: CONDUCT OF BUSINESS SOURCEBOOK (HOME REVERSION AND HOME PURCHASE ACTIVITIES) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions listed in Schedule 4 to the Mortgages: Conduct of Business sourcebook (Powers exercised) of the Handbook.
- B. The rule-making powers referred to above are specified for the purpose of section 153(2) (Rule-making instruments) of the Financial Services and Markets Act 2000.

Commencement

- C. Subject to The Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No.2) Order 2006 (SI No 2006/2383) being in force on 6 November 2006, this instrument comes into force on 6 April 2007.

Amendments to the Handbook

- D. The Mortgages: Conduct of Business sourcebook (MCOB) shall be cited as the Mortgages and Home Finance: Conduct of Business sourcebook (MCOB) and all references in the Handbook are changed accordingly.
- E. MCOB is amended in accordance with Annexes A and B to this instrument.

Citation

- F. This instrument may be cited as the Mortgages: Conduct of Business Sourcebook (Home Reversion and Home Purchase Activities) Instrument 2006.

By order of the Board
25 October 2006

Annex A

Amendments to the Mortgages and Home Finance: Conduct of Business sourcebook (MCOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

Application and purpose

...

Purpose

1.1.2 G ... This chapter also provides *guidance* on the application of other parts of the ~~Handbook to a firm that carries on regulated mortgage activities.~~

1.2 General application: who? what?

1.2.1 R (1) ~~MCOB~~This sourcebook applies to every *firm* that:

- (a) carries on ~~regulated mortgage activities~~a home finance activity (subject to ~~MCOB 1.2.3R(1)~~the business loan application provisions); or
- (b) *communicates or approves a* ~~qualifying credit~~financial promotion of qualifying credit, of a home purchase plan or of a home reversion plan.

(2) ...

...

Firm types and the ~~regulated mortgage~~home finance activities

1.2.2 G (1) This sourcebook applies to activities carried out in respect of three types of product: regulated mortgage contracts (which includes lifetime mortgages), home purchase plans, and home reversion plans. Together, these products are referred to as home finance transactions.

(2) Lifetime mortgages and home reversion plans are together referred to as equity release transactions.

(3) The application of most of ~~MCOB~~this sourcebook is expressed by reference to four types of *firm*: ~~mortgage lenders, mortgage administrators, mortgage arrangers and mortgage advisers~~lenders/providers, administrators, arrangers, and advisers. Arrangers

and advisers are together referred to as intermediaries. ... *Guidance on these firm types, the regulated mortgage activities which they carry on, a description of what those activities cover and what is excluded is set out in MCOB 1 Annex 1. PERG 4 contains detailed guidance on these activities regulated mortgage activities and PERG 14 contains detailed guidance on home purchase activities and home reversion activities.*

...

1.2.4 G *MCOB 1 Annex 2 contains a table summarising the provisions of MCOB that apply to regulated mortgage contracts that are for a business purpose. ...*

...

Business loans: additional requirements if tailored route is used

1.2.7 R In relation to a *regulated mortgage contract* for a business purpose, if a *firm* has opted for the tailored route in *MCOB 1.2.3 R(2)*, it must adopt the following modifications to the provisions in *MCOB* the sourcebook:

- (1) (except in relation to sections 6 and 8 of any ~~initial disclosure document provided in accordance with MCOB 4.4.1 R(1)(c)(i)~~ *initial disclosure document* or sections 5 and 8 of any ~~initial disclosure document provided in accordance with MCOB 4.4.1 R(1)(c)(ii)~~ *combined initial disclosure document*) substitute an alternative description of the facility provided under the *regulated mortgage contract* for 'mortgage' where that term is used in any disclosure;

...

...

Home purchase plans

1.2.9A G For detail of the tailored provisions applying to *home purchase plans*, see the section on 'home purchase plans' set out in each relevant chapter.

Authorised professional firms

1.2.10 R *MCOB* does not apply to an *authorised professional firm* with respect to its *non-mainstream regulated activities* except for:

...

- (3) ~~MCOB 4.4 (Initial disclosure requirements)~~ initial disclosure requirements but only as regards providing the information contained in section 7 (What to do if you have a complaint) and section 8 (Are we covered by the Financial Services Compensation Scheme?) of ~~MCOB 4 Annex 1 or MCOB 4 Annex 2, and MCOB 8 Annex 1 or MCOB 8 Annex 2~~ an initial disclosure document or combined initial

disclosure document (see MCOB 4.4 and MCOB 4.10).

...

Pre-contractual arrangements by a ~~mortgage lender~~ home finance provider

1.2.12 R In *MCOB* the activities of a ~~mortgage lender~~ home finance provider which would be *arranging* but for article 28A of the *Regulated Activities Order* (Arranging contracts or plans to which the arranger is a party), are to be treated as *arranging* and therefore also as *regulated mortgage home finance activities*.

1.2.13 G The effect of article 28A of the *Regulated Activities Order* would normally mean that arrangements made by a party to a ~~regulated mortgage contract~~ home finance transaction would not fall within the ~~regulated mortgage home finance activity~~ of *arranging*. So in a direct sale, a ~~mortgage lender~~ home finance provider would not be carrying on the *regulated activity* of *arranging* but, where the transaction proceeds to completion, would instead be involved in ~~the regulated activity of~~ comprising entering into a regulated mortgage home finance transaction. However, the provisions in *MCOB* on arranging ~~regulated mortgage contracts~~ home finance transactions are applied to pre-contractual arrangements by a ~~mortgage lender~~ home finance provider.

~~Summary of the application of the chapters of MCOB~~ [deleted]

1.2.14 G ~~A table summarising the application of the various chapters of MCOB to firms that carry on regulated mortgage activities is set out in MCOB 1 Annex 3. For the detailed application of each chapter, see the application rule at the start of that chapter.~~ [deleted]

1.3 General application: where?

Location of the customer

1.3.1 R Except as set out in this section, *MCOB* applies if the *customer* of a *firm* carrying on ~~regulated mortgage~~ home finance activities is resident in:

- (1) the *United Kingdom*; or
- (2) another *EEA State*, but in this case only if the activity is carried on from an establishment maintained by the *firm* (or its *appointed representative*) in the *United Kingdom*;

at the time that the ~~regulated mortgage~~ home finance activity is carried on.

...

Distance contracts entered into from an establishment in another EEA State

- 1.3.4 R (1) The *rules* in (2) do not apply to a *firm* with respect to ~~an activity~~ regulated mortgage activity or a home purchase activity exclusively concerning a *distance contract* if the following conditions are satisfied:
- ...
- (2) The *rules* which do not apply are:
- (a) ~~MCOB 4.4 (Initial disclosure requirements)~~ initial disclosure requirements in MCOB 4.4 (in respect of regulated mortgage contracts) and MCOB 4.10 (in respect of home purchase plans);
- (b) *MCOB 4.5* (Additional disclosure for distance mortgage mediation contracts and distance home purchase mediation contracts with retail customers);
- (c) *MCOB 4.6* (Cancellation of distance mortgage mediation contracts and distance home purchase mediation contracts);
- ...
- (h) ~~MCOB 8.4 (Initial disclosure requirements: home reversion schemes)~~; ~~[deleted]~~
- ...
- (k) *MCOB 9.5* (Disclosure at offer stage for ~~lifetime mortgages~~ equity release transactions).

Distance contracts with retail customers

- 1.3.5 G Parts of *MCOB* relate to *distance contracts* (or *distance mortgage mediation contracts* and distance home purchase mediation contracts) with *retail customers*. ...

...

- 1.4 ~~Application of the Handbook in relation to mortgages~~ ~~[deleted]~~

- 1.4.1 G A table summarising the application of the *Handbook* to *firms* carrying on *regulated mortgage activities* is set out in *MCOB 1 Annex 4*. For the detailed application of each module, see the application provision at the start of the module, and each chapter or section. ~~[deleted]~~

Conduct of business standards: general

2.1 Application

Who?

2.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 2.1.2R* in accordance with column (2) of that table.

This table belongs to *MCOB 2.1.1R*

2.1.2 R	(1) Category of firm	(2) Applicable section
	<i>mortgage lender</i> <i>mortgage administrator</i> <i>mortgage adviser</i> <i>mortgage arranger</i>	whole chapter except <i>MCOB 2.2.6AR</i> , <i>MCOB 2.2.8AR</i> , <i>MCOB 2.2.8BG</i> , <i>MCOB 2.6A</i> and <i>MCOB 2.8.6G</i>
	<i>home purchase provider</i>	<i>MCOB 2.1</i> , <i>MCOB 2.2.1G</i> , <i>MCOB 2.2.6R</i> to <i>MCOB 2.2.9G</i> , <i>MCOB 2.5</i> , <i>MCOB 2.6</i> , <i>MCOB 2.6A.1R</i> to <i>MCOB 2.6A.4G</i> , <i>MCOB 2.6A.7G</i> to <i>MCOB 2.6A.10G</i> , <i>MCOB 2.7.4R</i> to <i>MCOB 2.7.6R</i> and <i>MCOB 2.8.6G</i>

<u>home purchase administrator</u>	As for a <u>home purchase provider</u> but <u>MCOB 2.6A1R to MCOB 2.6A.4G and MCOB 2.6A.7G</u> do not apply
<u>home purchase adviser</u> <u>home purchase arranger</u>	As for a <u>home purchase provider</u> but <u>MCOB 2.6A</u> does not apply
<u>reversion provider</u>	whole chapter except <u>MCOB 2.2.6AR, MCOB 2.2.8AR and MCOB 2.2.8BG, MCOB 2.6A.7G, MCOB 2.7.4R to MCOB 2.7.6R and MCOB 2.8.6G</u>
<u>reversion administrator</u> <u>reversion arranger</u>	As for a <u>reversion provider</u> but the relevant provisions of <u>MCOB 2.6A</u> apply only when <u>arranging for a home reversion plan to be entered into by a reversion occupier with, or administering a home reversion plan provided by, an unauthorised reversion provider.</u>
<u>reversion adviser</u>	As for a <u>reversion provider</u> but <u>MCOB 2.6A</u> does not apply
<u>a firm that communicates or approves a qualifying credit financial promotion of qualifying credit or of a home reversion plan</u>	<u>MCOB 2.5, MCOB 2.6, MCOB 2.7</u> (except, when the <u>financial promotion</u> relates to a <u>home reversion plan, MCOB 2.7.4R to MCOB 2.7.6R</u>) and <u>MCOB 2.8</u> (except <u>MCOB 2.8.6G</u>)
<u>a firm that communicates or approves a financial promotion of a home purchase plan</u>	<u>MCOB 2.2.6R to MCOB 2.2.9G, MCOB 2.5, MCOB 2.6, MCOB 2.7 and MCOB 2.8.6G</u>

What?

2.1.3 R This chapter applies in relation to:

(1) regulated mortgage home finance activities;

- (2) those activities in *MCOB 12* and *MCOB 13* that are carried on after a regulated mortgage contract or home purchase plan has come to an end following the sale of a *repossessed* property, and those activities in *MCOB 12* that are carried on after a home reversion plan has ended for any reason; and
- (3) the *communication* or *approval* of a ~~qualifying credit~~financial promotion of qualifying credit, of a *home purchase plan* or of a home reversion plan.

2.2 Communications

...

General

2.2.2 G In many circumstances there will be two or more *customers* under any ~~regulated mortgage contract~~home finance transaction, or two or more prospective *customers* looking to enter into the same ~~regulated mortgage contract~~home finance transaction. In such circumstances, ...

Prescribed terms for regulated mortgage contracts and home reversion plans

2.2.3 R In any communication to a *customer*, a *firm* must:

- (1) describe any *early repayment charge* as an 'early repayment charge' ~~and not use any other expression to describe such charges~~;
- (2) describe any *higher lending charge* as a 'higher lending charge' ~~and not use any other expression to describe such charges~~; and
- (3) describe any ~~regulated lifetime mortgage contract~~ as a 'lifetime mortgage' ~~and not use any other expression to describe such a mortgage~~; ~~and~~;

(4) describe any home reversion plan as a 'home reversion plan';

and not use any other expression to describe them.

...

Related investment advice

2.2.5 G *Firms* are reminded that they should follow the relevant *rules* in *COB 5* and *COB 6* relating to advice and disclosure on *investments* if they are *advising* the *customer* on an *investment* such as an annuity ~~linked to a regulated lifetime mortgage contract~~associated with an equity release transaction or an *ISA* used as a *repayment vehicle*.

Clear, fair and not misleading communications and financial promotions

- 2.2.6 R (1) When a *firm* communicates information to a *customer*, it must take reasonable steps to communicate in a way that is clear, fair and not misleading.
- (2) ~~Paragraph (1) does not apply to a *firm* when it communicates a *qualifying credit promotion* in circumstances in which *MCOB 3* (Financial promotion) applies to the *firm*. [deleted]~~
- 2.2.6A R A *firm* which approves a financial promotion of a home purchase plan must take reasonable steps to ensure that the financial promotion is clear, fair and not misleading.
- 2.2.7 G When considering how to comply with the requirements of *MCOB 2.2.6R* ~~these rules~~ on clear, fair and not misleading communications and *financial promotions*, a *firm* should have regard to the *customer's* knowledge of the ~~regulated mortgage contract~~ home finance transaction to which the information relates.
- 2.2.8 G ~~*MCOB 2.2.6R*~~ The rule on clear, fair and not misleading communications covers all communications with *customers*, for example any oral or written statements, telephone calls and any correspondence which is not a ~~*qualifying credit*~~ financial promotion to which *MCOB 3* (Financial promotion) applies. In respect of ~~*qualifying credit*~~ financial promotions of qualifying credit or of home reversion plans, *firms* should note the separate requirements of *MCOB 3*.
- 2.2.8A R If a *firm* uses a figure equivalent to an *APR* in a communication of a financial promotion of a home purchase plan, when calculating that figure it must use an approach equivalent to the *APR rules*.
- 2.2.8B G The following guidance may be relevant to a *firm* that communicates or approves a financial promotion of a home purchase plan:
- (1) guidance on what 'communicate', 'approve' and 'financial promotion' mean, and on the media of communication to which financial promotion rules apply (see *MCOB 3.2.1G* and *MCOB 3.2.2G*);
 - (2) guidance on other Handbook provisions relevant to financial promotions (see *MCOB 3.2.8G* to *MCOB 3.2.9G*);
 - (3) guidance on other regulations and guidelines relevant to financial promotions (see *MCOB 3.5.3G*);
 - (4) guidance on referring to the *FSA* (see *MCOB 3.6.2G(3)*);
 - (5) guidance on the clear, fair and not misleading standard (see *MCOB*

3.6.5G, MCOB 3.6.10G and MCOB 3.6.14G); and

- (6) guidance on the use of the Internet for *communicating financial promotions* (see MCOB 3.12 and PERG 8.22).

Note: A comparative *financial promotion* will need to comply with regulation 4A of the Control of Misleading Advertisements Regulations 1988.

...

2.3 Inducements: regulated mortgage contracts and home reversion plans

Purpose

- 2.3.1 G ~~*Principles 1 and 6* require a *firm* to conduct its business with integrity, to pay due regard to the interests of its *customers* and to treat them fairly. The purpose of MCOB 2.3 is to ensure, in accordance with *Principles 1, 6 and 8*, that a *firm* does not conduct business under arrangements that might give rise to a conflict with its duty to *customers* or to unfair treatment of them.~~

Prohibition of inducements

- 2.3.2 R A *firm* must take reasonable steps to ensure that it, and any *person* acting on its behalf, does not:

- (1) offer, give, solicit or accept an inducement; or
(2) direct or refer any actual or potential business in relation to a *regulated mortgage contract* or *home reversion plan* to another *person* on its own initiative or on the instructions of an *associate*;

if it is likely to conflict to a material extent with any duty that the *firm* owes to its *customers* in connection with such a *regulated mortgage contract* or *home finance transaction* or any duty which such a recipient *firm* owes to its *customers* in connection with such a *regulated mortgage contract* or *home finance transaction*.

...

- 2.3.5 G MCOB 2.3.2R does not prevent a *firm*:

- (1) assisting a ~~*mortgage*~~ *home finance intermediary* so that the quality of the ~~*mortgage*~~ *home finance intermediary's* service to *customers* is enhanced; or

...

- 2.3.6 R (1) A *firm* must not operate a system of giving or offering inducements to a *mortgage intermediary*, *reversion intermediary* or any other

third party whereby the value of the inducement increases if the ~~mortgage intermediary~~intermediary or third party, such as a packager, exceeds a target set for the amount of business referred (for example, a volume override).

(2)

Quantification of inducements

- 2.3.7 R (1) A mortgage lender or reversion provider must quantify, in cash terms, any material inducement it offers to a mortgage intermediary, reversion intermediary or a third party.
- (2) In quantifying the value of the material inducement, the firm must include any subsequent payments (such as a trail fee) made where the customer continues with the same regulated mortgage contract home finance transaction.
- 2.3.8 G (1) Quantification of any material inducement offered by the mortgage lender or reversion provider supports the disclosure requirements elsewhere in MCOB. Further guidance on the disclosure of any inducement in cash terms is provided in MCOB 5.6.118G for regulated mortgage contracts other than lifetime mortgages, MCOB 9.4.124G for lifetime mortgages and MCOB 9.4.173G for home reversion plans.
- (2) A payment made to a third party unconnected with the mortgage home finance intermediary, where that payment only reflects the cost of outsourcing work relating to the processing of mortgage applications, would not be considered an inducement for these purposes in the context of MCOB 2.3.7R.

2.4 High pressure sales: regulated mortgage contracts and home reversion plans

Purpose

- 2.4.1 G The purpose of ~~MCOB 2.4~~this section is to remind firms of the relevance of the high level standards in PRIN, especially with regard to the use of sales methods that may lead a customer to feel pressurised to enter into, or vary, a regulated mortgage contract or home reversion plan.

Fair treatment

- 2.4.2 G ... a firm should avoid selling practices that commit customers (or lead customers to believe that they are committed) to any regulated mortgage contract or home reversion plan before they have been able to consider the illustration and offer document. ...

Information

- 2.4.3 G ... a firm should avoid giving any customer a false impression about the

availability of a *regulated mortgage contract* or *home reversion plan*, such as ...

2.5 Reliance on others

Purpose

2.5.1 G ... MCOB 2.5 indicates the extent to which *firms* that carry on ~~*regulated mortgage contract*~~ *home finance* activities and that *communicate* or *approve* a ~~*qualifying credit*~~ *financial* promotion can meet this requirement by relying on others.

...

After MCOB 2.6 insert the following new section. The inserted text is not underlined.

2.6A Protecting customers' interests: home purchase plans and home reversion plans

Protecting customers' interests: home purchase plans and home reversion plans

2.6A.1 R A *firm* must ensure that the interests of its *customer* under a *home purchase plan* or *home reversion plan* are protected to a reasonable standard.

2.6A.2 G Circumstances that a *firm* should consider include how the *customer* will be protected in the event of:

- (1) the *failure* of a *reversion provider* or *home purchase provider*;
- (2) the transfer of a *reversion provider's* or *home purchase provider's* interest (or the interest the provider would have had, had it not nominated a third party to hold it) in the property to a third party;
- (3) other dealings by a *reversion provider* or *home purchase provider* (or its nominee) with a third party; and
- (4) a *reversion provider's* or *home purchase provider's* (or its nominee's) failure to perform obligations owed to third parties, or imposed by statute.

2.6A.3 G The steps that a *firm* might take in order to protect its *customer's* interests will depend on a number of factors, including the nature and structure of the *home purchase plan* or *home reversion plan* and the jurisdiction in which the property is situated. If it is not possible to achieve reasonable protection (for example, due to impediments under a particular legal system) then a *firm* should not enter into, arrange or administer the plan.

2.6A.4 G (1) In the *FSA's* view, a *customer's* interests will include:

- (a) protection of the *customer's* rights under the plan, in

particular the right to occupy the property throughout its term;

- (b) protection of any interest (legal or beneficial) that the *customer* retains, acquires or is intended to acquire in the property, including the expectation that such interests will be unencumbered by third party interests; and
- (c) that, where a *customer* pays sums under a *home purchase plan* towards the purchase price of the property, those sums will be applied towards the purchase price. Or, in circumstances where that is not practicable (for example, on *repossession*), that an appropriate amount will be returned to the *customer*.

(2) The protections that a *firm* should consider include:

- (a) the extent to which different forms of tenure protect the tenant's right to occupy the property and afford protection against removal. In particular, granting the *customer* a licence to occupy the property is unlikely to provide an adequate level of security;
- (b) (except in Scotland) the need for any agreement under which a *customer* has a right to acquire an interest in the property to be specifically enforceable;
- (c) the extent to which appropriate registrations, restrictions, notices or other entries should be made in the relevant land register;
- (d) the timing of entries in the relevant land register and who should be responsible for making them; and
- (e) the *customer's* need for a full and clear understanding of all the steps that the *firm* expects him or his advisers to take to protect his interests both at the time the plan is entered into, and throughout its duration.

Protecting customers' interests: additional material for home reversion plans

2.6A.5 R Unless it is satisfied on reasonable grounds based on the *customer's* knowledge, expertise and experience that it is unnecessary, a *firm* must obtain from its *customer's* legal adviser, before its *customer* enters into a *home reversion plan*, confirmation that:

- (1) he has been instructed to ensure that the *customer's* legal rights under the plan are protected to a reasonable standard; and
- (2) he has explained to the *customer* those aspects of the *customer's* legal rights and obligations under the *home reversion plan* that he needs to understand.

- 2.6A.6 G *Firms* remain responsible for ensuring that their *customers'* interests are protected to a reasonable standard.

Protecting customers' interests: additional material for home purchase plans

- 2.6A.7 G A *home purchase provider* should consider obtaining confirmation from the *customer's* legal adviser that he has carried out, or will carry out, the steps that the *firm* expects the *customer* or his legal advisers to take to protect his interests at the time the plan is taken out.

Treating customers fairly: home purchase plans and home reversion plans

- 2.6A.8 R A *firm* must pay due regard to the interests of its *customer* and treat him fairly when drafting, amending the terms of, or imposing obligations or exercising rights or discretions under, a *home purchase plan* or *home reversion plan*.

- 2.6A.9 G A *firm* is unlikely, for example, to be treating its *customer* fairly in relation to termination of a *home purchase plan* or *home reversion plan* if:

- (1) the grounds on which it may terminate all or part of a plan are unduly wide, or on which a *customer* may terminate are unduly narrow; or
- (2) the *customer* is not given appropriate notice of termination.

- 2.6A.10 G A *firm* is also unlikely to be treating its *customer* fairly if, upon termination of an agreement under a *home purchase plan* or *home reversion plan*, the *customer* does not receive (net of any reasonable sums payable by the *customer*):

- (1) in the case of a *home reversion plan* where the *customer* retains a beneficial interest in the property, the value of that beneficial interest; or
- (2) in the case of a *home purchase plan*, the value of purchase payments made.

Note: The terms of a *home purchase plan* or *home reversion plan* should take into account relevant legal obligations such as those under the *Unfair Terms Regulations* and, where applicable, the Housing Act 1988 (or, in Scotland, the Housing (Scotland) Act 1988). A *firm* may find material on the FSA website concerning the FSA's consumer protection powers useful. The Office of Fair Trading has also published guidance on the impact of the *Unfair Terms Regulations* on tenancy agreements.

Treating customers fairly: home reversion plans

- 2.6A.11 G A *firm* is unlikely, for example, to be treating a *reversion occupier* fairly if:

- (1) the *reversion occupier* is obliged to maintain the property to a standard which exceeds the standard that the property is in when the

home reversion plan commences;

- (2) the *reversion occupier* is not entitled to, or is not given, reasonable notice of an inspection, or the inspection is conducted in a way that is biased against him;
- (3) unreasonable restrictions are imposed on who may occupy the property, taking into account the potential needs of the *reversion occupier* throughout the duration of the *home reversion plan*;
- (4) unreasonable restrictions are imposed on the uses to which the property may be put;
- (5) the *reversion occupier* is unreasonably treated as having abandoned the property. For example, it is likely to be unreasonable to treat a property as abandoned based only on a period of non-occupation;
- (6) where the *reversion occupier* has a reasonable expectation that the *home reversion plan* can be transferred to another property, agreement to such a transfer is, or can be, refused unreasonably.

Independent valuation: home reversion plans

- 2.6A.12 R A *firm* must ensure that any valuation is carried out by a competent valuer who is independent of the *reversion provider*.
- 2.6A.13 E
- (1) A valuer may be considered competent if he is a suitably qualified member of a professional body.
 - (2) A valuer may be considered independent if:
 - (a) the *customer* can choose the valuer subject to the *firm* objecting on reasonable grounds and to the valuer being competent;
 - (b) he owes a duty of care to the *customer* in valuing the property; and
 - (c) the *customer* has an appropriate remedy against him under a complaints procedure which allows the complaint to be referred to an independent person whose decision is binding on the valuer.
 - (3) Compliance with (1) and (2) may be relied on as tending to establish compliance with *MCOB 2.6A.12R*.
- 2.6A.14 G Members of the Royal Institution of Chartered Surveyors, for example, are required to operate a complaints procedure that allows the complaint to be referred to an independent person whose decision binds the valuer and which, in the *FSA's* view, provides a *customer* with an appropriate remedy.

Obtaining best price: partial home reversion plans

- 2.6A.15 R A *firm* must take reasonable steps to ensure that, when a *home reversion plan* ends and the *customer* retains a beneficial interest in the property:
- (1) the property is sold within a reasonable period of time; and
 - (2) the best price that might reasonably be obtained is paid.
- 2.6A.16 G It is recognised that a balance has to be struck between the need to sell the property as soon as possible, and other factors, such as market conditions, which may prompt the delay of the sale. Legitimate reasons for deferring action might include the expiry of a period when a grant is repayable on re-sale, or the discovery of a title defect that needs to be remedied if the optimal selling price is to be achieved.
- Arranging or administering for unauthorised providers: home reversion plans
- 2.6A.17 R For the purpose of this section (except this *rule*), a *reversion arranger* or *reversion administrator's customer*:
- (1) includes a *reversion occupier* or potential *reversion occupier* who enters, or proposes to enter, into a *home reversion plan* with an *unauthorised reversion provider* who is the *firm's customer*; and
 - (2) excludes an *unauthorised reversion provider*.
- 2.6A.18 G A *person* may enter into a *home reversion plan* as provider without being regulated by the *FSA* (or an *exempt person*) if the *person* does not do so by way of business (see *PERG* 14.5). If a *firm* arranges for such a *person* to enter into a *home reversion plan* as provider, the *firm* will be responsible for ensuring that the *reversion occupier's* interests are protected to a reasonable standard, even if the *reversion arranger* is not acting for the *reversion occupier*. A *reversion administrator* is under the same obligation in relation to a *reversion occupier* under a *home reversion plan* which it *administers* on behalf of an *unauthorised reversion provider*.

In this section underlining indicates new text and striking through indicates deleted text.

2.7 Application to electronic media and distance communications

...

- 2.7.2 G For any electronic communication with a *customer* in relation to a ~~*regulated mortgage contract*~~ *home finance transaction*, a *firm* should:

...

...

General provisions related to distance contracts

- 2.7.4 R During the course of a *distance contract* with a *retail customer*, the making or performance of which constitutes or is part of a *regulated mortgage contract* or *home purchase plan*:
- (1) the *firm* must, at the *retail customer's* request, provide a paper copy of the contractual terms and conditions of the *regulated mortgage contract*, *home purchase plan* or ~~of the~~ services being provided by the *firm*; and
 - (2) the *firm* must comply with the *customer's* request to change the *means of distance communication* used, unless this is incompatible with the *regulated mortgage contract*, *home purchase plan* or service being provided by the *firm*.

...

Unsolicited services

- 2.7.6 R (1) ...
- (2) Paragraph (1) applies in relation to ~~advising on, arranging or entering into a regulated mortgage contract~~ *mortgage mediation activities, entering into a regulated mortgage contract, home purchase mediation activities or entering into a home purchase plan* under an organised distance sales or service-provision scheme ...

...

2.8 Record keeping

...

Home purchase plans

- 2.8.6 G This sourcebook does not specify detailed record keeping requirements for a firm that carries on a home purchase activity or that communicates or approves a financial promotion of a home purchase plan (but note the high-level record-keeping provisions in the Senior Management Arrangements, Systems and Controls sourcebook).

Financial promotion of qualifying credit and of home reversion plans

3.1 Application: who?

- 3.1.1 R This chapter applies to every *firm* which *communicates* or *approves* a ~~qualifying credit~~ *financial promotion of qualifying credit* or of a *home*

reversion plan.

3.1.2 G This chapter applies generally to *firms* in relation to all ~~*qualifying credit financial promotions of qualifying credit*~~ or of a *home reversion plan*. This wide application is however cut back by *MCOB 3.2* (Application: what?) and *MCOB 3.3* (Application: where?) which limit the application of this chapter for:

- (1) ~~*qualifying credit financial promotions*~~ which would fall within the scope of the exemptions in the *Financial Promotion Order* or the additional exemptions set out in *MCOB 3.2.5R* (Applications: what? Exemptions); and
- (2) ~~*qualifying credit financial promotions*~~ to persons outside the *United Kingdom*.

...

3.1.6 R This chapter does not apply to a *firm* in relation to the *communication* or *approval* of a *financial promotion of a home reversion plan to an unauthorised reversion provider* that is not a ~~*qualifying credit promotion*~~ (but see ~~*COB 3*~~ (*Financial promotion*)).

3.1.7 G A ~~*communication*~~ may contain both a *financial promotion* and a *qualifying credit promotion* and *home reversion plans*, for example a building society leaflet which describes the range of mortgage, and savings and insurance products it provides. In such cases, both ~~*MCOB 3*~~ and ~~*COB 3*~~ the *financial promotion rules* in this and other sourcebooks will each apply as be relevant.

...

Nationals of other EEA States

3.1.11 G A national of an *EEA State* (other than the *United Kingdom*) wishing to take advantage of the exemption in article 36 of the *Financial Promotion Order* in respect of a ~~*qualifying credit financial promotion of qualifying credit*~~ or of a *home reversion plan* should act in conformity with the *rules* in this chapter.

...

3.2 Application: what?

Application for a financial promotion of qualifying credit

3.2.-3 R This chapter applies to the *communication* or *approval* of a *financial promotion of qualifying credit* as follows:

<u>Application, purpose and general</u>	<u>MCOB 3.1 to MCOB 3.5</u>
<u>Form and content of non-real time qualifying credit promotions</u>	<u>MCOB 3.6</u>
<u>Unsolicited real time promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.7</u>
<u>Form and content of real time qualifying credit promotions</u>	<u>MCOB 3.8</u>
<u>Confirmation of compliance: financial promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.9</u>
<u>Records: non-real time financial promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.10</u>
<u>Communication and approval of qualifying credit promotions for an overseas person or an unauthorised person</u>	<u>MCOB 3.11</u>
<u>The Internet and other electronic media</u>	<u>MCOB 3.12</u>

Application for a financial promotion of a home reversion plan

3.2.-2 R This chapter applies to the communication or approval of a financial promotion of a home reversion plan as follows:

<u>Application, purpose and general</u>	<u>MCOB 3.1 to MCOB 3.5</u>
<u>Form and content of non-real time qualifying credit promotions</u>	<u>MCOB 3.6 in accordance with MCOB 3.8A</u>
<u>Unsolicited real time financial promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.7</u>
<u>Form and content of financial promotions of home reversion plans</u>	<u>MCOB 3.8A</u>
<u>Confirmation of compliance: financial promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.9</u>
<u>Records: non-real time financial promotions of qualifying credit or home reversion plans</u>	<u>MCOB 3.10</u>
<u>The Internet and other electronic media</u>	<u>MCOB 3.12</u>

Application for a financial promotion of a home purchase plan

3.2.-1 G The rules in this chapter do not apply to the communication or approval of a financial promotion of a home purchase plan. However, the clear, fair and not misleading standard still applies as does certain relevant guidance from this chapter (see MCOB 2.2).

...

Media of communication

3.2.2 G ...

(2) ~~Qualifying credit~~Financial promotions may be communicated for example, by means of:

...

(h) other publications, which may contain non-personal recommendations as to obtaining qualifying credit or entering into a home reversion plan.

3.2.3 G Guidance on the use of the Internet for ~~communicating qualifying credit~~financial promotions is in MCOB 3.12 (The Internet and other electronic media) and PERG 8.22 (The Internet).

Exemptions

3.2.4 R This chapter does not apply to a firm in relation to a ~~qualifying credit~~financial promotion of qualifying credit of a kind listed in MCOB 3.2.5R, except that if the firm approves the ~~qualifying credit~~financial promotion, the following apply:

(1) ...

(2) ~~MCOB 3.6.3R (Non-real time qualifying credit promotions: e~~Clear, fair and not misleading);

...

(4) if the firm approves a ~~non-real time qualifying credit~~financial promotion of qualifying credit by an overseas person MCOB 3.11.5R (Non-real time qualifying credit promotions for overseas persons) applies.

3.2.4A R This chapter does not apply to a firm in relation to a financial promotion of a home reversion plan of a kind listed in MCOB 3.2.5R, unless the firm approves the financial promotion.

3.2.5 R This table belongs to MCOB 3.2.4R and MCOB 3.2.4AR.

...

- 3.2.6 G *MCOB 3.2.5R(2) exempts a ~~qualifying credit~~financial promotion made by a firm or an appointed representative which refers to its activities only in general terms in image or brand advertising. The items identified in MCOB 3.2.5R(2) do not enable detailed information to be given about the ~~qualifying credit or home reversion plan~~ available from the firm. Thus firms should avoid the use of names, logos or addresses, for example, which attempt to convey additional ~~mortgage~~product or cost-related information.*

...

Other relevant handbook rules ~~relevant to qualifying credit promotions~~

...

- 3.2.9 G *Firms are reminded that if in the course of making a ~~qualifying credit~~financial promotion of any kind an adviser gives specific advice on ~~regulated mortgage contracts~~a home finance transaction to a customer about the suitability of a product for that individual, the adviser in giving the advice is subject to the rules, as appropriate, on advising and selling in MCOB 4 (Advising and selling standards) and MCOB 8 (~~Lifetime mortgages~~Equity release: advising and selling standards).*

3.3 Application: where?

Territorial Scope

- 3.3.1 R This chapter applies to a firm only in relation to:
- (1) the communication of a ~~qualifying credit~~financial promotion to a person inside the United Kingdom;
 - (2) the communication of an unsolicited real time ~~qualifying credit~~financial promotion of qualifying credit or of a home reversion plan, unless:

...
 - (3) the approval of a non-real time ~~qualifying credit~~financial promotion of qualifying credit or a home reversion plan for communication to a person inside the United Kingdom;
-
- 3.3.2 G (1) The application under MCOB 3.3.1R is relevant both when a firm communicates a ~~qualifying credit~~financial promotion itself and when a firm approves a non-real time ~~qualifying credit~~financial

promotion for communication by others. But see also *MCOB 3.3.3R* (Exceptions to territorial scope: rules without territorial limitation for approval of financial promotions) ~~regarding approvals.~~

...

Exceptions to territorial scope: rules without territorial limitation for approval of financial promotions

- 3.3.3 R Subject to *MCOB 3.3.5R* the following parts of this chapter apply without any territorial limitation if a *firm approves a qualifying credit/financial promotion of qualifying credit* or of a *home reversion plan*:

...

- (2) rules requiring a financial promotion to be clear, fair and not misleading (see *MCOB 3.6.3R(1)* (Non-real time qualifying credit promotions: clear, fair and not misleading) in relation to qualifying credit and *MCOB 3.8A.1R* in relation to a home reversion plan); and
- (3) the provisions regarding approval of financial promotions (except those relating to approval of financial promotions of qualifying credit provided by an overseas person) (see *MCOB 3.11.1G* to *MCOB 3.11.4G* (Approval of qualifying credit promotions; No approval of real time qualifying credit promotions; Approval of real time qualifying credit promotions when not all the rules apply) and *MCOB 3.8A.6R*).

- 3.3.4 G There is no need for a *qualifying credit/financial promotion* which is indicated in *MCOB 3.3.1R* to be outside the territorial scope of the application of *MCOB 3* to be approved ... If a *firm* nevertheless approves such a *qualifying credit/financial promotion*, it must comply with the *rules* indicated in ~~*MCOB 3.3.3R*~~. However, a *firm* must not approve a *real time qualifying credit/financial promotion* (see *MCOB 3.11.2R* (No approval of real time qualifying credit promotions) or *MCOB 3.8A.6R* (No approval of real time financial promotions of a home reversion plan)).

Exceptions to territorial scope: financial promotions of qualifying credit relating to distance contracts

- 3.3.5 R ...

- (3) The *rules* which do not apply are:
- (a) *MCOB 3.6.1R* (Non-real time qualifying credit promotions: Name and contact point);

...

- (f) *MCOB 3.8.2R(3) and (4) (Form and content of real time qualifying credit promotions).*

... Meaning of 'directed only at persons outside the United Kingdom'

3.3.7 R ...

- (4) The conditions are that:

...

- (d) there are in place proper systems and procedures to prevent recipients in the *United Kingdom* (other than those to whom the ~~*qualifying credit financial promotion*~~ might otherwise lawfully have been made) obtaining the ~~*qualifying credit product*~~ to which the ~~*qualifying credit financial promotion*~~ relates, from the *person* directing the ~~*qualifying credit financial promotion*~~, a *close relative* of his or a member of the same *group*;

...

3.4 Purpose

3.4.1 G (1) Section 21(1) of the *Act* (Restriction on financial promotion) imposes a restriction on the *communication of financial promotions* (~~*qualifying credit promotions in MCOB*~~) by *unauthorised persons*. A *person* must not, in the course of business, *communicate a qualifying credit financial promotion* unless:

- (a) he is an *authorised person*; or
- (b) the content of the ~~*qualifying credit financial promotion*~~ is *approved by an authorised person*.

(2) However, the *Financial Promotion Order* exempts from the restriction created by section 21(1) of the *Act* certain types of *financial promotions* (~~*qualifying credit promotions in MCOB*~~).

3.4.2 G (1) The purpose of this chapter is to provide *rules and guidance* for a *firm* which wishes to *communicate or approve a qualifying credit financial promotion of qualifying credit or of a home reversion plan*. ~~*MCOB 3.5.2G (Application: what? Exemptions) provides a guide to the topics covered in this chapter.*~~

(2) This chapter amplifies, for activities within its scope:

- (a) *Principle 6* (Customers' interests) ~~which requires a *firm* to pay due regard to the interests of its *customers* and treat them fairly;~~ and

- (b) *Principle 7* (Communications with clients) ~~which requires a~~

firm to pay due regard to the information needs of its clients, and communicate information to them in a way which is clear, fair and not misleading.

3.5 General

~~Topics covered in this chapter~~

3.5.1 G ~~[deleted – see application tables in MCOB 3.2]MCOB 3 includes some provisions which are applicable to all types of *qualifying credit promotion* and others which apply only to specific types. MCOB 3.5.2G has been provided to help locate the areas of particular relevance to types of *qualifying credit promotion*.~~

3.5.2 G ~~[deleted]This table belongs to MCOB 3.5.1G~~

Areas of particular relevance to types of qualifying credit promotion

~~Non-real time qualifying credit promotions:~~ nName and contact point

3.6.1 R ...

3.6.2 G ...

(3) A *firm* is not required in a ~~qualifying credit~~financial promotion which it *communicates* or *approves* to name the *FSA* as its regulator. However, to ~~comply with MCOB 3.6.3R (Non-real time qualifying credit promotions:~~ ensure the financial promotion is clear, fair and not misleading), if the *firm* chooses to name the *FSA* as its regulator and the ~~qualifying credit~~financial promotion refers to matters not regulated by the *FSA*, it should also make clear that those matters are not regulated by the *FSA*. This might arise, for example, where the communication included both a ~~qualifying credit~~financial promotion of qualifying credit and a promotion for *unsecured lending*...

~~Non-real time qualifying credit promotions:~~ eClear, fair and not misleading

...

3.6.8 R In ~~complying with its obligations under MCOB 3.6.3R (Non-real time qualifying credit promotions:~~ ensuring a financial promotion is clear, fair and not misleading), a *firm* must...

...

Required risk statements

3.6.13 R A *non-real time* ~~qualifying credit~~financial promotion must, unless ~~MCOB 3.6.15R (the t~~Transient advertising)rule applies, prominently contain one or more of the following statements in the circumstances described:

(1) where ~~the qualifying credit promotion~~it relates to a *regulated lifetime mortgage contract*: 'This is a lifetime mortgage. To understand the features and risks, ask for a personalised illustration.'. If the promotion also relates to a home reversion plan the statement may be adapted to the extent necessary to comply with the equivalent requirement for a home reversion plan (see MCOB 3.8A.3R(2)(a));

(2) where ~~the qualifying credit promotion~~it refers to paying off unsecured debts...

...

(5) where more than one of the statements in (1) to (4) applies, each relevant statement should be included ~~in the qualifying credit promotion~~....

...

...

3.7 Unsolicited real time ~~qualifying credit~~ financial promotions of qualifying credit or a home reversion plan

Meaning of 'solicited' and 'unsolicited' real time ~~qualifying credit~~ financial promotion

(4) If a ~~qualifying credit~~ financial promotion is solicited by a person ('R') it is treated as also having been solicited by any other person to whom it is made at the same time as R if that other person is a close relative of R or is expected to enter into a home reversion plan or any contract for *qualifying credit* jointly with R.

...

Prohibition on unsolicited real time ~~qualifying credit~~ financial promotions to customers

3.7.3 R A firm must not make an *unsolicited real time ~~qualifying credit~~ financial promotion of qualifying credit or of a home reversion plan unless ... the customer envisages receiving such ~~unsolicited real time qualifying credit~~ financial promotions.*

...

3.8 Form and content of real time qualifying credit promotions

...

3.8.6 G Firms should note the additional disclosure requirements in ... *MCOB 4.5 (Additional disclosure for distance mortgage mediation contracts and distance home purchase mediation contracts with retail customers) ...*

After MCOB 3.8 insert the following new section. Inserted text is not underlined.

3.8A Form and content of financial promotions of home reversion plans

Clear, fair and not misleading

3.8A.1 R A firm which *communicates* or *approves* a financial promotion of a home reversion plan must take reasonable steps to ensure that the financial

promotion is clear, fair and not misleading.

- 3.8A.2 G The guidance on the clear, fair and not misleading standard at *MCOB* 3.6.5G, *MCOB* 3.6.10G and *MCOB* 3.6.14G may be relevant.

Note: A comparative *financial promotion* will need to comply with regulation 4A of the Control of Misleading Advertisements Regulations 1988.

Non-real time financial promotions to customers

- 3.8A.3 R A *non-real time financial promotion* of a *home reversion plan* must:

- (1) describe any *home reversion plan* as a 'home reversion plan' and not use any other expression to describe it; and
- (2) unless it is *communicated* by way of sound broadcasting or television where the primary purpose of the programming in which the promotion is contained is not to promote home finance or by an exhibition of pictures or photographic or cinematographic films:
 - (a) (if made to or directed at a *customer* other than an *unauthorised reversion provider*) prominently state that it relates to a *home reversion plan* and that the *customer* should ask for a personalised illustration to understand its features and risks; or
 - (b) (if made to or directed at an *unauthorised reversion provider*) prominently state that a *home reversion plan* is a long-term investment and a complex legal arrangement, and that expert independent legal advice should always be obtained before entering into any agreement.

- 3.8A.4 E (1) A *firm* should take reasonable steps to ensure that, for a *non-real time financial promotion*:
- (a) it includes any matters the omission of which causes the *financial promotion* not to be clear, fair and not misleading;
 - (b) if it describes a feature of any *home reversion plan*, it gives no less prominence to the possible disadvantages than to the benefits associated with that feature;
 - (c) it uses plain and intelligible language, and is easily legible (or, in the case of oral promotions, clearly audible);
 - (d) the accuracy of all statements of fact in it can be substantiated;
 - (e) its promotional purpose is not in any way disguised or misrepresented;

- (f) any statement of fact, promise or prediction is clear, fair and not misleading and any relevant assumptions are clearly and prominently disclosed;
 - (g) any statement of opinion is honestly held and, unless consent is impracticable, given with the written consent of the *person* concerned;
 - (h) the facts on which any comparison or contrast is made are verified, or, alternatively, that relevant assumptions are prominently disclosed and that the comparison or contrast is presented in a fair and balanced way, which is not misleading and includes all factors which are relevant to the comparison or contrast;
 - (i) it does not contain any false indications, in particular as to:
 - (i) the *firm's* independence; or
 - (ii) the *firm's* resources and scale of activities;
 - (j) the design, content or format does not in any way disguise, obscure or diminish the significance of any statement, warning or other matter which the *home reversion plan* is required by this chapter to contain;
 - (k) it does not include any reference to approval by the *FSA* or any government body, unless such approval has been obtained in writing from the *FSA* or that body (see also *GEN* 1.2 (Referring to approval by the *FSA*));
- (2)
- (a) Contravention of (1) may be relied on as tending to show contravention of *MCOB* 3.8A.1R.
 - (b) Compliance with (1) may be relied on as tending to show compliance with *MCOB* 3.8A.1R.

3.8A.5 G The effect of giving no less prominence to the possible disadvantages than to the benefits associated with a feature will depend upon the content of the promotion. The following non-exhaustive examples would satisfy the requirement:

- (1) a promotion which, when describing any possible monetary saving, also clearly states how this could be achieved; and
- (2) a promotion which, when including references to non-standard services or facilities, also clearly states that an additional fee may be payable for these.

No approval of real time financial promotions of a home reversion plan

3.8A.6 R A *firm* must not approve a real time financial promotion of a home

reversion plan.

Referring to the FSA

- 3.8A.7 G The guidance on referring to the *FSA* in a *financial promotion* may be relevant (see *MCOB 3.6.2G(3)*).

In this section, underlining indicates new text and striking through indicates deleted text.

3.9 Confirmation of compliance: financial promotions of qualifying credit or home reversion plans

...

- 3.9.2 G (1) ~~In *MCOB 3.9.1R(2)*'a'~~ Appropriate expertise' will vary depending on the complexity of the ~~*qualifying credit financial promotion*~~ and the *qualifying credit or home reversion plan* to which it relates. The individuals engaged by a *firm* to confirm the compliance of its ~~*qualifying credit financial promotions*~~ with this chapter may themselves have different levels of expertise and therefore a different level of authority for confirmation depending on the type of promotion and the *qualifying credit or home reversion plan* involved.
- (2) A *firm* may arrange for a third party with appropriate expertise to carry out the confirmation exercise on the *firm's* behalf, but the responsibility for the ~~*qualifying credit financial promotion*~~ remains with the *firm*.

...

Communicating a ~~*qualifying credit financial promotion*~~ where another firm has confirmed compliance

- 3.9.5 R ...

...

3.10 Records: non-real time financial promotions of qualifying credit or of a home reversion plan

...

Content of records

- 3.10.2 G In deciding what is an adequate record ~~under *MCOB 3.10.1R*~~, a *firm* should consider including, or providing reference to, where appropriate,

such matters as:

...

- (4) the evidence supporting any material factual statement about *qualifying credit* or a *home reversion plan* in the ~~*qualifying credit/financial*~~ promotion. ...

...

...

Approval of qualifying credit promotions

- 3.11.1 G (1) Section 21(1) of the *Act* (Restrictions on financial promotion) prohibits an *unauthorised person* from *communicating a financial promotion* (~~*qualifying credit promotion*~~ in the case of *MCOB*), in the course of business, unless an exemption applies or the ~~*qualifying credit/financial*~~ promotion is approved by a firm.
- (2) Most of the *rules* in this chapter apply when a firm approves a ~~*qualifying credit/financial*~~ promotion of *qualifying credit* in the same way as when a firm communicates a ~~*qualifying credit/financial*~~ promotion of *qualifying credit* itself. A firm therefore has a similar responsibility for a ~~*qualifying credit/financial*~~ promotion of *qualifying credit* that it approves as for one that it communicates. For example, a firm which approves a non-real time ~~*qualifying credit/financial*~~ promotion must:
- (a) ~~if *MCOB 3.9.1R* applies,~~ confirm that the ~~*qualifying credit/financial*~~ promotion complies with the *rules* in this chapter; and
- (b) ~~if *MCOB 3.6.3R(1)* applies,~~ be able to show that it has taken reasonable steps to ensure that the ~~*qualifying credit/financial*~~ promotion is clear, fair and not misleading.
- (3) A firm may also wish to approve a ~~*qualifying credit/financial*~~ promotion of *qualifying credit* that it communicates itself. This would ensure that an *unauthorised person* who then also communicates ~~the *qualifying credit promotion*~~ it to another person will not contravene the restriction in section 21(1) of the *Act* (Restrictions on financial promotion).

...

...

3.12 The Internet and other electronic media

...

- 3.12.2 G Any material, which meets the definition of a ~~qualifying credit~~financial promotion of qualifying credit or of a home reversion plan, including any video or moving image material incorporated in any website containing such a ~~qualifying credit~~ financial promotion, should comply with the rules in this chapter. ...
- 3.12.3 G ...
- (2) ... a description of the qualifying credit or home reversion plan ...
- 3.12.4 G (1) ...
- (2) In relation to ~~qualifying credit~~financial promotions communicated by way of television...
- (3) ... Any ~~qualifying credit~~financial promotion of qualifying credit or of a home reversion plan communicated by the Internet, digital or other forms of interactive television is subject to the requirements in ~~MCOB 3.6 (Form and content of non-real time qualifying credit promotions)~~ and ~~MCOB 3.8 (Form and content of real time qualifying credit promotions)~~ as applicable on form and content in this chapter.

...

Advising and selling standards

4.1 Application

Who?

- 4.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 4.1.2R* in accordance with column (2) of that table.
- 4.1.2 R This table belongs to *MCOB 4.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i>	whole chapter except MCOB 4.5—MCOB 4.7 <u>MCOB 4.1 to MCOB 4.4, and MCOB 4.8 to MCOB 4.9</u>
<i>mortgage adviser</i>	whole chapter <u>except MCOB 4.10</u>
<i>mortgage arranger</i>	whole chapter except MCOB 4.7 <u>and MCOB 4.10</u>

<u>home purchase provider</u>	<u>MCOB 4.1, MCOB 4.2 and MCOB 4.10 (except MCOB 4.10.5G to MCOB 4.10.7G).</u> <u>MCOB 4.3, MCOB 4.4 and MCOB 4.8 in accordance with MCOB 4.10</u>
<u>home purchase adviser</u>	<u>MCOB 4.1, MCOB 4.2, MCOB 4.5, MCOB 4.6 and MCOB 4.10.</u> <u>MCOB 4.3, MCOB 4.4, MCOB 4.7 and MCOB 4.8 in accordance with MCOB 4.10</u>
<u>home purchase arranger</u>	<u>As for a home purchase adviser except MCOB 4.10.5G to MCOB 4.10.7G and MCOB 4.7 do not apply</u>
<u>reversion provider</u> <u>reversion adviser</u> <u>reversion arranger</u>	<u>see MCOB 8 for the application of this chapter</u>

What?

- 4.1.3 R This chapter applies if a *firm* in the course of carrying on a *regulated mortgage home finance activity*:
- (1) makes, or anticipates making, a *personal recommendation* about; or
 - (2) gives, or anticipates giving, personalised information relating to; the *customer*:
 - (3) entering into a *regulated mortgage contract home finance transaction*; or
 - (4) varying the terms of a *regulated mortgage contract home finance transaction* entered into by the *customer*.
- ...
- 4.1.5 R In relation to an *regulated lifetime mortgage contract* or a *home reversion scheme equity release transaction*, this chapter ~~MCOB 4~~ is modified by *MCOB 8 (Lifetime mortgages Equity release: advising and selling standards)*.
- 4.1.6 G *MCOB 4.1.5R* means that this chapter, *MCOB 4*, deals with standard *regulated mortgage contracts* and *home purchase plans* only and therefore *firms* should note that the scope of service rules in ~~MCOB 4.3.1R~~ this chapter do not apply in respect of ~~standard regulated mortgage contracts only~~ *equity*

release transactions.

- 4.1.7 G If a firm is an *authorised professional firm*, ~~MCOB 1.2.10R(3) has the effect that when the firm conducts non-mainstream regulated activities with a customer, the only initial disclosure requirements that apply are those relating to the *Financial Ombudsman Service* and the *FSCS* (see *MCOB 1.2.10R(3)*). *MCOB 4.4* (Initial disclosure requirements) applies. The firm is only required to provide the initial disclosure information in *MCOB 4 Annex 1* or *MCOB 4 Annex 2* section 7 (What to do if you have a complaint) and section 8 (Are we covered by the Financial Services Compensation Scheme (FSCS)?).~~

...

4.2 Purpose

- 4.2.1 G (1) This chapter amplifies *Principle 6* (Customers' interests), *Principle 7* (Communications with clients) and *Principle 9* (Customers: relationships of trust). ~~*Principle 6* requires a firm to pay due regard to the interests of its customers and treat them fairly. *Principle 7* requires a firm to pay due regard to the information needs of its clients and communicate information to them in a way which is clear, fair and not misleading. *Principle 9* requires a firm to take reasonable care to ensure the suitability of its advice.~~

(2) The purpose of this chapter is to ensure that:

- (a) *customers* are adequately informed about the nature of the service which they may receive from a *firm* in relation to ~~*regulated mortgage contracts*~~ *home finance transactions*. In particular *firms* need to make clear to *customers* the scope of ~~*regulated mortgage contracts*~~ *home finance transactions* available from them; and
- (b) ... will vary depending on the demands and needs of the *customer* and the type of ~~*regulated mortgage contract*~~ *home finance transaction*.

...

- (3) This chapter also implements certain requirements of the *Distance Marketing Directive* in relation to *distance mortgage mediation contracts* (see ~~*MCOB 4.5* (Additional disclosure for distance mortgage mediation contracts with retail customers) and *MCOB 4.6* (Cancellation of distance mortgage mediation contracts)~~) and *distance home purchase mediation contracts*.

4.3 Scope of service provided

Providing services within and beyond scope

- 4.3.1 R (1) Subject to (2), a *firm* must take reasonable steps to ensure that the scope of the service given to a *customer*, and the ~~regulated mortgage contracts~~home finance transactions offered, is based on a selection from one of the following:
- (a) the whole market; or
 - (b) a limited number of ~~mortgage lenders~~home finance providers; or
 - (c) a single ~~mortgage lender~~home finance provider.
- (2) ...

...

- 4.3.4A R In applying this chapter, there is:
- (1) one market for regulated mortgage contracts that are not lifetime mortgages; and
 - (2) another market for home purchase plans.

...

Independence

- 4.3.7 R (1) When providing information or giving advice to a *customer* on ~~regulated mortgage contracts~~home finance transactions, a *firm* must not hold itself out as acting independently unless it intends to:
- (a) provide that service wholly or predominantly based on the whole market in the relevant type of home finance transaction; and
 - (b) ...
- (2) A *firm* which in accordance with (1) holds itself out as independent must ensure that the information or advice subsequently given to the *customer* concerned is information or advice on ~~regulated mortgage contracts~~home finance transactions from the whole market in the relevant type of home finance transaction.
- 4.3.8 G (1) ... A *firm* which wishes to hold itself out generally as acting independently should ensure that doing so (for example through a trading name or advertising) is consistent with the kind of service which *customers* receive in relation to ~~regulated mortgage contracts~~the relevant home finance transactions.

- (2) A *firm* that sells both *investments* and ~~*regulated mortgage contracts*~~ home finance products can offer from the whole market (or the whole market for a type of home finance transaction) and therefore be 'independent' for one but offer only a limited range for the other. ...

...

Appointed representatives

- 4.3.10 R A *firm* may restrict the ~~*regulated mortgage contracts*~~ home finance transactions it authorises a particular *appointed representative* to sell. If it does so, the *appointed representative* must reflect this restricted scope in ~~the initial disclosure document~~ any initial disclosure document or combined initial disclosure document provided to the *customer* ~~in accordance with MCOB 4.4.1R(1)(e)~~.

4.4 Initial disclosure requirements

Disclosure where initial contact is not made by telephone

- 4.4.1 R (1) A *firm* must ensure that, on first making contact with a *customer* when it anticipates giving personalised information or advice on a *regulated mortgage contract*, it:
- ...
- (c) ~~(unless (2) applies)~~ provides the *customer* with either:
- (i) ~~the initial disclosure document in MCOB 4 Annex 1~~ initial disclosure document; or
 - (ii) if the *firm* has reasonable grounds to be satisfied that the services which it is likely to provide to the *customer* will, ~~in addition to relating to regulated mortgage contracts or regulated lifetime mortgage contracts~~ relate to a combination of different types of home finance transaction, or will relate to home finance transactions and one or more of non-investment insurance contracts or packaged products, ~~the combined initial disclosure document in MCOB 4 Annex 2~~ a combined initial disclosure document;
- subject to (3) and in a *durable medium*.

...

- (3) A *firm* may choose not to include the initial disclosure information required by sections 6, 7 and 8 of ~~MCOB 4 Annex 1~~ the initial disclosure document, and sections 5, 7 and 8 of ~~MCOB 4 Annex 2~~ the

combined initial disclosure document, if ...

(4) A firm must not use a combined initial disclosure document in relation to a combination of:

(a) regulated mortgage contracts or home purchase plans; and

(b) equity release transactions.

...

4.4.7 R ...

(2) ... the firm must send the customer a copy of ~~the initial disclosure document required by MCOB 4.4.1R in the form set out in MCOB 4 Annex 1 or MCOB 4 Annex 2~~ an initial disclosure document or combined initial disclosure document...

...

...

4.5 Additional disclosure for distance mortgage mediation contracts and distance home purchase mediation contracts with retail customers

4.5.1 G (1) There are certain additional disclosure requirements laid down by the *Distance Marketing Directive* that will have to be provided by a mortgage intermediary and a home purchase intermediary to a retail customer prior to the conclusion of a distance mortgage mediation contract or a distance home purchase mediation contract. The purpose of this section, MCOB 4.5, is to set out those additional requirements. MCOB 4.6 sets out the cancellation rights that apply in relation to ~~a distance mortgage mediation contracts~~ such contracts.

(2) The FSA expects the requirements in MCOB 4.5 and MCOB 4.6 to be relevant only in a small minority of cases. Mediation at a distance (see MCOB 1.3.5G and MCOB 1.3.6G) is unlikely in the ~~mortgage home finance~~ market. MCOB 4.5 and MCOB 4.6 will only be relevant if a mortgage intermediary or a home purchase intermediary enters into a distance contract in respect of its mortgage mediation activities or home purchase mediation activities quite independent of any contractual arrangement with a retail customer relating to a particular regulated mortgage contract or home purchase plan. ...

4.5.2 R If the initial contact of a kind in MCOB 4.4.1R(1) is with a retail customer with a view to concluding a distance mortgage mediation contract or a distance home purchase mediation contract-, a firm must:

(1) in addition to ~~the~~ initial disclosure information ~~required by MCOB~~

4.4.1R(1)(e) and any other required information, provide the *retail customer* with the information in MCOB 4 Annex 3 in a *durable medium* in good time before the conclusion of the *distance mortgage mediation contract* or *distance home purchase mediation contract* with that *customer* unless an exemption in (2), (3), (4) or (5) applies.

...

(3) Exemption: certain other means of distance communication. ... In that case, the *firm* must provide the *retail customer* with the information in a *durable medium* immediately after its conclusion of the *distance mortgage mediation contract*.

...

4.5.3 G (1) ...

(2) ... However, if a service of a different nature is proposed, the *firm* is expected to provide a fresh initial disclosure document and, in respect of *distance mortgage mediation contracts* and *distance home purchase mediation contracts* with *retail customers*, this will need to be accompanied by the information in MCOB 4 Annex 3.

...

4.6 Cancellation of distance mortgage mediation contracts and distance home purchase mediation contracts

4.6.1 G A *retail customer* has no right to cancel a ~~*regulated mortgage contract*~~ *home finance transaction* concluded with a *firm* but may have a right to cancel a *distance contract* concluded with a *mortgage intermediary* or a *home purchase intermediary* for the provision of his services. Whether a *mortgage intermediary* or a *home purchase intermediary* concludes a *distance mortgage mediation contract* or a *distance home purchase mediation contract* with a *retail customer* will depend on the circumstances. For example, an intermediary may not, in *advising on* or *arranging a regulated mortgage contract* or *home purchase plan*, act contractually on behalf of, or for, the *customer*. In such circumstances, no *distance mediation contract* will arise for the *firm's* services, and therefore no right to cancel. If there is a contract between the *customer* and the ~~*mortgage intermediary*~~ *firm*, however, and therefore there is a right to cancel, the *firm* is required by MCOB 4.5.2R(1) to provide the information in MCOB 4 Annex 3(5).

...

Cancellation period

4.6.4 R (1) A *retail customer* has a right to cancel a *distance mortgage mediation contract* or a *distance home purchase mediation contract* in accordance with this section.

...

Exercising the right to cancel

4.6.5 R A *retail customer* who has a right to cancel a *distance mortgage mediation contract* or a *distance home purchase mediation contract* may, without giving any reason, cancel the contract by ...

...

4.7.12 G ...

(2) Where the scope of the *advice* provided is ~~restricted (within the meaning of MCOB 4.3.1R(1)(b) or (c)), MCOB 4.7.4R(2) means that~~ based on a selection of *regulated mortgage contracts* from a single or limited number of lenders, the assessment of suitability should not be limited to the types of *regulated mortgage contracts* which the *firm* offers. ~~MCOB 4.7.4R(2) prevents a firm recommending~~ A *firm* cannot recommend the 'least worst' *regulated mortgage contract* where the *firm* does not have access to products appropriate to the *customer's* needs and circumstances. ~~¶~~ This means, for example, that a *firm* dealing solely in the sub-prime market should not recommend one of these *regulated mortgage contracts* if approached for advice by a *customer* with an unblemished credit record.

...

4.7.14 G ...

(2) ... the *customer's* wish for a *regulated mortgage contract* that is compliant with ~~Sharia~~ Islamic law. ...

...

...

4.9.4 G (1) *Firms* are reminded that MCOB 1.2.7R enables them to substitute an alternative for 'mortgage' in the initial disclosure document (except in relation to sections 6 and 8 of any ~~initial disclosure document provided in accordance with MCOB 4.4.1R(1)(e)(i)~~ initial disclosure document or sections 5 and 8 of any ~~initial disclosure document provided in accordance with MCOB 4.4.1 R(1)(e)(ii)~~ combined initial disclosure document).

(2) MCOB 1.2.7R also means that a *firm* must amend ~~the initial disclosure document in MCOB 4 Annex 1~~ any initial disclosure document so that the final sentence of prescribed text in section 4 states: 'You will receive an illustration which will tell you about any fees relating to a particular [term used by the firm to describe the

borrowing, for example "mortgage"]].

...

After MCOB 4.9 insert the following new section. The inserted text is not underlined.

4.10 Home purchase plans

Scope of service provided

- 4.10.1 R A *firm* must comply with the scope of service requirements at *MCOB* 4.3.1R and *MCOB* 4.3.2R (Providing services within and beyond scope), *MCOB* 4.3.4AR (Whole of market) and *MCOB* 4.3.10R (Appointed representatives).

Initial disclosure requirements

- 4.10.2 R (1) A *firm* must, on first making contact with a *customer* when it anticipates giving personalised information or *advice* on *entering into a new home purchase plan*, ensure that the *customer* is, or has been, provided with an appropriate *initial disclosure document* or *combined initial disclosure document* in a *durable medium*.
- (2) If the initial contact in (1) is by telephone, a *firm* must:
- (a) (if the call is with a view to concluding a *distance home purchase mediation contract*) give the following information before proceeding further:
- (i) the name of the *firm* and (if initiated by the *firm*) the commercial purpose of the call;
- (ii) the scope of the service provided by the *firm*; and
- (iii) whether or not the *firm* will provide the *customer* with *advice* on those *home purchase plans* within its scope; and
- (b) ensure that the *customer* is, or has been, provided with such a document in a *durable medium* as soon as is practicable.
- 4.10.3 G In accordance with *Principle 7*, where a *firm* is likely to provide services in relation to both *regulated mortgage contracts* and *home purchase plans*, it should provide a *combined initial disclosure document* rather than two separate *initial disclosure documents*.

- 4.10.4 G The guidance on initial disclosure requirements at *MCOB 4.4.2G* to *MCOB 4.4.4G* may be relevant.

Additional requirements for distance home purchase mediation contracts with retail customers

Note: The rules regarding additional disclosure requirements for, and cancellation of, *distance home purchase mediation contracts* are set out in *MCOB 4.5* and *MCOB 4.6* respectively.

Advised sales: suitability

- 4.10.5 G In accordance with *Principle 9*, a *firm* should take reasonable steps to obtain from a *customer* all information likely to be relevant to ensuring the suitability of its advice.
- 4.10.6 R A *firm*, before making a *personal recommendation* on a *home purchase plan*, must take reasonable steps to ensure that it is:
- (1) affordable;
 - (2) appropriate to the *customer's* needs and circumstances; and
 - (3) the most suitable of those *home purchase plans* that the *firm* has available to it within the scope of the service provided to the *customer*.
- 4.10.7 G The guidance on suitability at *MCOB 4.7.8G* to *MCOB 4.7.10G* and *MCOB 4.7.16G* may be relevant.

Non-advised sales

- 4.10.8 R If a *firm* arranges a *home purchase plan* or a variation to an existing *home purchase plan* without giving a *personal recommendation*, it must ensure that the questions it asks about the *customer's* needs and circumstances are scripted in advance.
- 4.10.9 G The guidance on non-advised sales at *MCOB 4.8.2G* and on scripted questions at *MCOB 4.8.5G* and *MCOB 4.8.6G* may be relevant.

Risks and features statement and tariff of charges

- 4.10.10 R A *firm* must, before making a *personal recommendation* to a *customer* of, or when a *customer* requests or selects, a *home purchase plan*, ensure that the *customer* is, or has been, provided with an appropriate risks and features statement about that plan.

- 4.10.11 R A risks and features statement need not be personalised to the *customer's* circumstances but must:
- (1) include the keyfacts logo in a prominent position at the top of the statement;
 - (2) state that the *FSA* requires a *firm* to provide the statement;
 - (3) state that mortgages are available and that the *customer* should think carefully about the product appropriate to his needs;
 - (4) describe the significant features of the plan, including:
 - (a) how the *home purchase plan* works;
 - (b) the nature of the *customer's* commitment;
 - (c) when and how a *customer's* commitment is reviewed;
 - (d) any significant restrictions of the plan; and
 - (e) the charges that a *customer* may incur under the plan, including the reason for, and amount of, each charge, when they are payable, whether they will be reimbursed and, if so, when;
 - (5) describe the risks associated with the plan, including:
 - (a) the risks to the *customer* if he fails to keep up repayments and the circumstances in which this might occur; and
 - (b) risks to the *customer* of the *home purchase provider failing* or disposing of any of its obligations or rights (including its interest in the property) to a third party (taking into account steps that will be taken by the *home purchase provider* to mitigate such risks); and
 - (6) state the importance of obtaining independent legal advice.
- 4.10.12 R A *firm* may omit details of the charges that a *customer* may incur under a *home purchase plan* from the risks and features statement if they are included in a separate *tariff of charges* provided to the *customer* at the same time.

...

Amendments to MCOB 4 Annex 1R, MCOB 4 Annex 2R and MCOB 4 Annex 3R.
Underlining indicates new text and striking through indicates deleted text.

Annex 1R: Initial disclosure document ("IDD")

Table 1R

This Annex belongs to *MCOB 4.4.1R(1)* and *MCOB 4.10.2R*

Firms must omit the notes and square brackets that appear in the following IDD. The IDD must contain the keyfacts logo, headings and text in the order shown and in accordance with the Notes.

[Note 1]

 **about our [mortgage/Islamic home purchase plan] services [Note 1A][Note 2]**

...

[1A.] Compliance with Islamic law [Note 5A]

Our services are regularly checked by [name(s) of scholar(s)] to ensure compliance with Islamic law. Ask us if you want further information about the role of our scholar(s).]

2. Whose [mortgages/Islamic home purchase plans] do we offer? [Note 6][Note 7]

We offer [mortgages/Islamic home purchase plans] from the whole market.

We [can] **[Note 8]** only offer [mortgages/Islamic home purchase plans] from a limited number of [lenders/providers].

Ask us for a list of the [lenders/providers] we offer [mortgages/Islamic home purchase plans] from. **[Note 9]**

We [can] **[Note 8]** only offer [a limited range of the] [a] [mortgage[s] / Islamic home purchase plan[s]] from [a single lender/provider] [name of single lender/provider]. **[Note 10]**

[or]

We only offer our own [mortgages/Islamic home purchase plans]. **[Note 11]**

....

4. What will you have to pay us for this service? [Note 6]

No fee [we will be paid by commission from the lender/provider]. **[Note 12]**

A fee [of £ [] payable at the outset and £ [] payable when you apply for a mortgage/Islamic home purchase plan]. [We will also be paid commission from the lender/provider.] **[Note 12] [Note 13]**

You will receive a key facts illustration when considering a particular mortgage which will tell you about any fees relating to it. **[Note 13A]**

5. Refund of fees **[Note 14] [Note 15]**

If we charge you a fee, and your [mortgage/Islamic home purchase plan] does not go ahead, you will receive:

A full refund [if the lender/provider rejects your application]. **[Note 16]**

A refund of £ [] [if the purchase falls through]. **[Note 16] [Note 17]**

No refund [if you decide not to take out a [mortgage/Islamic home purchase plan]. **[Note 16]**

6. Who regulates us? **[Note 18]**

[XYZ Financial Services][123 Any Street, Some Town ST21 7QB] **[Note 19] [Note 19A]** is authorised **[Note 20]** and regulated by the Financial Services Authority. Our FSA Register number is [].

Our permitted business is []. **[Note 21]**

[or] [Note 19B]

[Name of *appointed representative*] **[Notes 3 and 4]** is an appointed representative of [name of *firm*] [address of *firm*] **[Note 19] [Note 19A]** which is authorised and regulated by the Financial Services Authority. [Name of *firm*]'s FSA Register number is [].

[Name of *firm*]'s permitted business is []. **[Note 21]**

You can check this on the FSA's Register by visiting the FSA's website www.fsa.gov.uk/register/ or by contacting the FSA on 0845 606 1234.

7. What to do if you have a complaint **[Note 18]**

If you wish to register a complaint, please contact us:

... in writing Write to [XYZ Financial Services], [Complaints Department, 123 Any Street,

Some Town, ST21 7QB] [Note 22]

... by phone Telephone [0121 100 1234] [Note 22]

If you cannot settle your complaint with us, you may be entitled to refer it to the Financial Ombudsman Service. [Note 22A]

8. Are we covered by the Financial Services Compensation Scheme (FSCS)?
[Note 18] [Note 23] [Note 24]

We are covered by the FSCS. You may be entitled to compensation from the scheme if we cannot meet our obligations. This depends on the type of business and the circumstances of the claim.

[Mortgage/Home purchase plan] advising and arranging is covered for 100% of the first £30,000 and 90% of the next £20,000 so the maximum compensation is £48,000.

Further information about the compensation scheme arrangements is available from the FSCS.

<p><u>Think carefully about the product and services you need. [We can only offer services in relation to Islamic home purchase plans and cannot provide advice on standard mortgages.] [If you want [information] [or] [advice] on standard mortgages, please ask.]</u> [Note 25]</p>

...

Note 1 - ...

Note 1A – insert the appropriate description using the words in square brackets based on the *firm's* scope of service. A firm's scope of service cannot combine regulated mortgage activities and home purchase activities in the same IDD. A firm that carries on home purchase activities may omit the word "Islamic" from "Islamic home purchase plan(s)" provided that it does so consistently throughout the document. However, a firm may omit the word "Islamic" in sections 6 and 8 without having to omit it throughout the document. A firm that wishes to hold itself, its products or services out as compliant with religious or philosophical beliefs other than Islamic law in the IDD may make appropriate amendments to references to 'Islamic' and 'Islamic law'.

Note 2 - ... The keyfacts logo and the text "about our [mortgage/Islamic home purchase plan] services" must be used ...

...

Section 1A: Compliance with Islamic law

Note 5A – Section 1A is optional unless the *firm* holds itself, its products or services out as compliant with Islamic law in the IDD. If a *firm* includes Section 1A then it must describe the

section on the IDD as section 2 and renumber subsequent sections accordingly.

A firm that wishes to hold itself, its products or services out as compliant with religious or philosophical beliefs other than Islamic law in the IDD may also use Section 1A in accordance with this note and modify the wording in the section to the extent appropriate.

...

Section 2: Whose [mortgages/Islamic home purchase plans] do we offer?

...

Note 8 – insert "can" if the *firm's* range of *regulated mortgage contracts* or home purchase plans is determined by any contractual obligation.

Note 9 – this sentence is required only where a firm selects this service option. It may also be omitted if a *firm* chooses to list all of the lenders or providers it offers *home finance transactions*~~mortgages~~ from instead of the text "a limited number of [lenders/providers]", in the previous line, so long as the *firm* offers all of the mortgages or home purchase plans generally available from each lender or provider.

Note 10 – if the *firm* selects this box, it must insert the name of the lender or provider. If the *firm* does not select this box, it must insert the words "a single lender/provider" instead. If the *firm* does not offer all of the mortgages or home purchase plans generally available from that lender or provider, it must insert the words "a limited range of", as shown. If the lender or provider only has one ~~mortgage~~ relevant product, the *firm* should amend the text to "We can only offer a [mortgage/home purchase plan] from [name of single lender/provider]."

Note 11 – if the *firm* is a provider or lender~~mortgage lender~~ offering only its own *home finance transactions*~~mortgages~~, or is part of a provider or lender~~mortgage lender~~ offering only the *home finance transactions*~~mortgages~~ sold under that part's trading name, it may use this alternative text.

...

Note 13 – insert a plain language description of when any fees are payable. ...

Note 13A – A firm must not include this paragraph if the services to which the IDD relates are home purchase activities.

...

Note 14 – if, in section 4, it has been indicated that there will be 'No fee' or that any *fee* will be payable only if the ~~mortgage~~ transaction completes...

...

Note 18 – ~~these sections may be omitted in accordance with MCOB 4.4.1R(3).~~ A firm may choose not to include these sections if it provides the customer with the information required by them in some other durable medium before the customer makes an application for a home finance transaction. ...

...

Note 21 – insert a plain language description of the business for which the firm has permission in relation to either regulated mortgage contracts or home purchase plans, as relevant to the scope of service described.

...

Note 25 – a firm must only include this paragraph if the services to which the IDD relates are home purchase activities. If the firm does not carry on regulated mortgage activities, it must include the second sentence and delete the third. If the firm carries on regulated mortgage activities as well as home purchase activities it must omit the second sentence and include the third.

Delete MCOB 4 Annex 2R in its entirety. The deleted text is not shown

MCOB 4 Annex 2R: Combined initial disclosure document (“CIDD”)

Pre-application disclosure

5.1 Application

Who?

5.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 5.1.2R* in accordance with column (2) of that table.

5.1.2 R This table belongs to *MCOB 5.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i> <i>mortgage adviser</i> <i>mortgage arranger</i>	whole chapter <u>except MCOB 5.8</u>
<i>home purchase provider</i> <i>home purchase adviser</i> <i>home purchase arranger</i>	<i>MCOB 5.1.1R</i> to <i>MCOB 5.1.3R</i> , <i>MCOB 5.1.6R</i> to <i>MCOB 5.1.8G</i> , <i>MCOB 5.2</i> , <i>MCOB 5.3</i> and <i>MCOB 5.8</i> . <i>MCOB 5.5</i> and <i>MCOB 5.6</i> in accordance with <i>MCOB 5.8</i>
<i>reversion provider</i> <i>reversion adviser</i> <i>reversion arranger</i>	see <i>MCOB 9.3</i> for the application of <u>this chapter</u>

What?

5.1.3 R (1) This chapter applies if a *firm*:

- (a) makes a *personal recommendation* to a *customer* to enter into a ~~*regulated mortgage contract*~~ *home finance transaction*; or
- (b) provides information to a *customer* that is specific to the amount ~~that the *customer* wants to borrow~~ to be provided on

a particular ~~regulated mortgage contract~~ home finance transaction, including information provided in response to a request from a customer; or

- (c) provides the means for a customer to make an application to it;

in connection with entering into, or agreeing to enter into, a ~~regulated mortgage contract~~ home finance transaction provided by a mortgage lender home finance provider, other than an ~~regulated lifetime mortgage contract~~ equity release transaction or a variation to an existing ~~regulated mortgage contract~~ home finance transaction.

- (2) In relation to further advances and other variations, MCOB 5 is modified by MCOB 7 (Disclosure at start of contract and after sale), regardless of whether they are variations to an existing ~~regulated mortgage contract~~ home finance transaction, or are such that they involve the customer entering into a new ~~regulated mortgage contract~~ home finance transaction.
- (3) In relation to an ~~regulated lifetime mortgage contract~~ equity release transaction, MCOB 5 is modified by MCOB 9 (~~Lifetime mortgages~~ Equity release: product disclosure).

...

5.1.6 R In this chapter, references to a ~~regulated mortgage contract~~ home finance transaction include, where the context requires, references to arrangements which are capable of becoming a ~~regulated mortgage contract~~ home finance transaction.

5.1.7 G (1) MCOB 5.1.3R means that this chapter applies where the customer can apply to enter into a ~~regulated mortgage contract~~ home finance transaction. This includes circumstances where, for example, the means to apply is provided in person, by telephone, through a website or through an application pack sent through the post.

(2) The effect of this chapter is to require a customer to be provided with an illustration key information about a home finance transaction before he submits an application to a mortgage lender home finance provider.

5.1.8 G Although an illustration is a financial promotion in respect of the ~~controlled activity of providing qualifying credit~~, the effect of MCOB 3.2.5R(1), section 145(3) of the Act (Financial promotion rules) and article 28 of the Financial Promotion Order (One-off non-real time communications and solicited real time communications) is that an illustration is exempt from the provisions of MCOB 3 (Financial promotion). However, the general requirement to communicate information in a way which is clear, fair and

not misleading applies to both an illustration and (in relation to a home purchase plan) a financial information statement (see MCOB 5.8.1R).

- 5.1.9 G In relation to a regulated mortgage contract, ~~W~~where part of the loan is not a regulated mortgage contract, for example it is a linked unsecured loan, the details of this loan can be shown in Section 12 of the illustration as an additional feature. It should not be added to the regulated mortgage contract loan amount in MCOB 5.6.6R(2).

...

5.2 Purpose

- 5.2.1 G (1) MCOB 5 amplifies Principle 6 and Principle 7, ~~which require a firm to pay due regard to the information needs of its customers and to treat them fairly.~~
- (2) The purpose of MCOB 5 is to ensure that, before a customer submits an application for a particular ~~regulated mortgage contract~~home finance transaction, he is supplied with information that makes clear:
- (a) (in relation to a regulated mortgage contract) its ~~the~~ features, any linked deposits, any linked borrowing and any tied products of that regulated mortgage contract, and
- (b) the price that the customer will be required to pay under that ~~regulated mortgage contract~~home finance transaction, to enable the customer to assess whether it is affordable to him;
and
- (c) any linked deposits, and linked borrowing and any tied products. ~~[deleted]~~
- (3) MCOB 5 requires information to be disclosed in a consistent way to facilitate comparison between regulated mortgage contracts provided by different mortgage lenders products of different providers.

5.3 Applying for a ~~regulated mortgage contract~~home finance transaction

- 5.3.1 R A mortgage lender~~home finance provider~~ must not enter into a regulated mortgage contract~~home finance transaction~~, or agree to do so, with a customer unless the customer has submitted an application for that particular regulated mortgage contract~~home finance transaction~~.

- 5.3.2 G (1) The purpose of MCOB 5.3.1R, taken in conjunction with other rules in this chapter, is to ensure that the customer has received details of the particular ~~regulated mortgage contract~~home finance transaction for which he has applied, ~~in the form of an illustration~~, and has had

the opportunity to satisfy himself that it is appropriate for him.

- (2) In relation to a regulated mortgage contract, ~~The~~ application should

After MCOB 5.7 insert the following new section. The inserted text is not underlined.

5.8 Home purchase plans

Applying for a home purchase plan

Note: The rules regarding applying for a *home purchase plan* are set out in *MCOB 5.3*.

Financial information statement: timing

- 5.8.1 R A *firm* dealing directly with a *customer* must ensure that the *customer* is, or has been, provided with an appropriate financial information statement for a *home purchase plan* in a *durable medium*:
- (1) before the *customer* submits an application for that particular plan to a *home purchase provider*; and
 - (2) without undue delay when any of the following occurs:
 - (a) the *firm* makes a *personal recommendation* to the *customer* to enter into a *home purchase plan* (unless the *personal recommendation* is made by telephone, in which case a *firm* must ensure the financial statement is or has been provided as soon as practicable after the telephone call);
 - (b) the *firm* provides written information that is specific to the amount of finance to be provided on a particular plan; or
 - (c) the *customer* requests written information from the *firm* that is specific to the amount of finance to be provided on a particular plan, unless the *firm* does not wish to do business with the *customer*.

(3) A *firm* may comply with (1) and (2) by providing an *offer document* if this can be done as quickly as providing a financial information statement.

5.8.2 G In ensuring that the *customer* is provided with an appropriate financial information statement, a *firm* need not provide another when one that remains appropriate has already been provided for that particular *home purchase plan*. If a financial information statement ceases to be appropriate, for example because the terms of the proposed plan are subsequently materially altered, a new appropriate statement must be provided.

5.8.3 G The guidance on the timing of mortgage *illustrations* may be relevant (see *MCOB 5.5*).

Financial information statement: format

5.8.4 R A financial information statement must:

- (1) be personalised to reflect the *customer's* requirements;
- (2) contain only the material prescribed or permitted in this section;
- (3) contain that material in the order set out in this section; and
- (4) present the material concisely, clearly and consistently.

5.8.5 R A financial information statement, if not set out in a separate document, must be:

- (1) in a prominent place within the other document and clearly identifiable as key information that the *customer* should read; and
- (2) separate from the other content of the document in which it is included.

5.8.6 G The guidance on the content, order and format of *illustrations* may be relevant (see *MCOB 5.6.4G*).

Financial information statement: content

5.8.7 R A financial information statement must contain:

- (1) a prominent keyfacts logo at the top of the statement;
- (2) the term of the *home purchase plan*;
- (3) the overall cost of the plan, comprising:
 - (a) the purchase price of the property;
 - (b) the deposit payable;

- (c) the amount of the plan required;
 - (d) the amount of any *fees* added to the plan;
 - (e) the total amount payable; and
 - (f) the amount the *customer* must pay per £1 provided under the plan;
- (4) details of the payments the *customer* must make, including:
- (a) the assumed start date;
 - (b) all rental rates that will apply;
 - (c) when the rental rates will apply and for how long;
 - (d) for each rental rate, the number, frequency and amount of the periodic payments that will apply;
 - (e) in relation to the first periodic payment, the amount of the purchase payment and of the rental payment;
 - (f) the amount of any insurance rent payments;
 - (g) a summary total; and
 - (h) details of when the summary total will change.

5.8.8 R A financial information statement may contain a figure equivalent to an *APR* after the amount the *customer* must pay per £1 provided under the *home purchase plan*. A *firm* must use an approach equivalent to the *APR rules* when calculating an *APR* equivalent.

5.8.9 G See the *keyfacts logo provisions* for further requirements regarding the use of the *keyfacts logo* and the location of specimens.

5.8.10 G The details of the rental rate charged should be based on information available to a *firm* at the time of producing the financial information statement. For example, if a rental rate cannot be ascertained at that time because it is based on a fluctuating rate of interest, a *firm* should base the information on the current fluctuating rate.

Opportunity to consider pre-application disclosure

5.8.11 R A *firm* must ensure that the *customer* has had a reasonable opportunity to consider the financial information statement and risks and features statement before committing the *customer* to an application.

Disclosure at the offer stage

6.1 Application

Who?

6.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB* 6.1.2R in accordance with column (2) of that table.

6.1.2 R This table belongs to *MCOB* 6.1.1R

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i>	whole chapter <u>except</u> <i>MCOB</i> 6.8
<i>home purchase provider</i>	<i>MCOB</i> 6.1 (except <i>MCOB</i> 6.1.6G), <i>MCOB</i> 6.2 and <i>MCOB</i> 6.8
<i>reversion provider</i>	see <i>MCOB</i> 9.5 for the application of <u>this chapter</u>

What?

6.1.3 R This chapter applies with respect to an offer made by a *firm* to a *customer* with a view to the *firm*:

- (1) *entering into a ~~regulated mortgage contract~~ home finance transaction; or*
- (2) *varying the terms of a ~~regulated mortgage contract~~ home finance transaction entered into by the *customer* in any of the following ways:*

...

(whether or not the *customer* agrees to enter into the ~~regulated mortgage contract~~ home finance transaction or variation).

6.1.4 R In relation to a ~~regulated lifetime mortgage contract~~, this chapter, *MCOB* 6, is modified by *MCOB* 9 (~~Lifetime mortgages~~ Equity release: product disclosure).

6.1.5 R In *MCOB* 6, a reference to an offer to enter into a ~~regulated mortgage contract~~ home finance transaction is to be read as including a reference to an offer to vary an existing ~~regulated mortgage contract~~ home finance transaction in a manner specified in ~~*MCOB* 6.1.3R~~ this section if the context so requires.

...

6.2 Purpose

- 6.2.1 G (1) ~~MCOB 6 amplifies Principle 6 and Principle 7, which require a firm to pay due regard to the information needs of its clients, and communicate information to them in a way which is clear, fair and not misleading.~~ The purpose of MCOB 6 is to ensure that a *customer* receives a clear *offer document* to enable him to check the features and price of the ~~regulated mortgage contract~~home finance transaction before he enters into it. The *offer document* should include an updated and suitably adapted *illustration* (for a regulated mortgage contract) or financial information statement (for a home purchase plan) so that the *customer* can compare it with the illustration he received before he applied for the ~~regulated mortgage contract~~home finance transaction.
- (2) ~~To ensure that the customer has a record of the information required by MCOB 6, MCOB 6.3.2R requires the information to be provided to the customer in a durable medium.~~[deleted]

...

6.4 €Mortgages: content of the offer document

...

6.5 £Mortgages: information to be provided in the offer document or separately

...

6.6 ⊖Mortgages: offer documents in place of illustrations

...

After MCOB 6.7 insert the following new section. The inserted text is not underlined.

6.8 Home purchase plans

Offer document

- 6.8.1 R (1) If a *firm* offers to *enter into a home purchase plan* with a *customer*, it must ensure that the *customer* is, or has been provided with an appropriate *offer document* in a *durable medium* which includes:
- (a) the period for which the offer is valid;
 - (b) an explanation of the consequences that might arise from the *customer* not entering into the *home purchase plan* including details of any *fees* that the *customer* has paid which will not be refunded;
 - (c) an explanation of when the *customer* will become bound by

the offer and the implications of this;

- (d) the charges that a *customer* may incur under the plan, including the reason for, and amount of, each charge, when they are payable, whether they will be refunded and, if so, when;
- (e) a financial information statement;
- (f) the *firm's* contact details, including its name and address; and
- (g) how to complain to the *firm* and whether or not complaints may subsequently be referred to the *Financial Ombudsman Service*.

- (2) A *firm* may omit details of the charges that a customer may incur under a *home purchase plan* from the risks and features statement if they are included in a separate *tariff of charges* provided to the customer at the same time.

6.8.2 G Although an *offer document* may not match information given in a financial information statement before an offer is made, an *offer document* should be an accurate reflection of the actual costs of the *home purchase plan*.

6.8.3 G A *firm* should bear in mind its obligations under *Principle 6*. For example, if a *firm* knows that its interest in a *home purchase plan* will be assigned and the *firm* will no longer be responsible for setting rental payments and charges, the *offer document* should state this fact and who will become responsible after the assignment (if this is not known at the offer stage the *customer* should be notified as soon as it becomes known).

6.8.4 R A *firm* must ensure that the financial information statement forms the main, and an integral, part of the *offer document*.

Distance contracts with retail customers

6.8.5 R (1) A *firm* must communicate to a *retail customer* the *distance marketing information* in a *durable medium* available and accessible to the *retail customer* in good time before the *retail customer* is bound by any *distance contract* or offer to *enter into a home purchase plan*.

- (2) If the *distance contract* or offer has been concluded at the *retail customer's* request using a *means of distance communication* which does not enable providing the information in accordance with (1) then it must be communicated no later than immediately after the conclusion of the *home purchase plan*.

[**Note:** article 5 *DMD*]

6.8.6 G *Distance contract* information may be included in an *offer document* provided that it does not significantly increase its length.

After MCOB 6.8 insert the following new annex. The inserted text is not underlined.

MCOB 6 Annex 1

Distance home purchase plans: information to be provided to retail customers.

1R This table belongs to *MCOB 6.8.5R*.

Distance home purchase plans: information to be provided to retail customers	
(1)	the identity and the main business of the <i>home purchase provider</i> , the geographical address at which the <i>home purchase provider</i> is established and any other geographical address relevant for the <i>retail customer's</i> relations with the <i>home purchase provider</i> ;
(2)	the identity of the representative of the <i>home purchase provider</i> established in the <i>retail customer's</i> Member State of residence and the geographical address relevant for the customer's relations with the representative, if such a representative exists;
(3)	when the <i>retail customer's</i> dealings are with any professional other than the <i>home purchase provider</i> , the identity of this professional, the capacity in which he is acting vis-à-vis the <i>retail customer</i> , and the geographical address relevant for the <i>customer's</i> relations with this professional;
(4)	Details of the <i>FSA Register</i> and any other trade register in which the <i>home purchase provider</i> is entered and his registration number or an equivalent means of identification in that register;
(5)	confirmation that the <i>home purchase provider</i> is authorised and regulated by the <i>FSA</i> ;
(6)	the total price to be paid by the <i>retail customer</i> to the <i>home purchase provider</i> for the financial service, including all related fees, charges and expenses, and all taxes paid via the <i>home purchase provider</i> or, when an exact price cannot be indicated, the basis for the calculation of the price enabling the <i>retail customer</i> to verify it;
(7)	notice of the possibility that other taxes and/or costs may exist that are not paid via the <i>home purchase provider</i> or imposed by him;
(8)	any specific additional cost for the <i>retail customer</i> of using the <i>means of distance communication</i> , if such additional cost is charged;
(9)	the absence of a right of withdrawal;
(10)	information on any rights the parties may have to terminate the contract early or unilaterally by virtue of the terms of the <i>distance contract</i> , including any penalties imposed by the contract in such cases;

(11)	the <i>EEA State</i> or <i>States</i> whose laws are taken by the <i>home purchase provider</i> as a basis for the establishment of relations with the <i>retail customer</i> prior to the conclusion of the <i>distance contract</i> ;
(12)	any contractual clause on law applicable to the <i>distance contract</i> and/or on competent court;
(13)	in which language, or languages, the contractual terms and conditions, and the prior information referred to in this table are supplied, and furthermore in which language, or languages, the <i>home purchase provider</i> , with the agreement of the <i>retail customer</i> , undertakes to communicate during the duration of this <i>distance contract</i> ; and
(14)	whether or not there is an out-of-court complaint and redress mechanism for the <i>retail customer</i> that is party to the <i>distance contract</i> and, if so, the methods for having access to it;
(15)	whether or not compensation may be available from the <i>compensation scheme</i> should the <i>firm</i> be unable to meet its liabilities, and information about any other applicable named compensation scheme; and, for each applicable scheme, the extent and level of cover and how further information can be obtained; and
(16)	all the contractual terms and conditions of the <i>home purchase plan</i> to which the <i>offer document</i> relates.

[**Note:** articles 3 and 5 *DMD*]

2G A *firm* is not required to provide this information if it has already done so, for example in an initial disclosure document, and that information remains accurate.

Disclosure at start of contract and after sale

7.1 Application

Who?

7.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 7.1.2R* in accordance with column (2) of that table.

7.1.2 R This table belongs to *MCOB 7.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i>	whole chapter <u>except</u> <i>MCOB 7.8</i>
<i>mortgage administrator</i>	<i>MCOB 7.1 - MCOB 7.3-3R</i> and <i>MCOB 7.5 - MCOB 7.7</i>

<i>mortgage adviser and mortgage arranger</i>	<i>MCOB 7.1 - MCOB 7.3-3R and MCOB 7.6.7R - MCOB 7.7</i>
<i>home purchase provider</i>	<i>MCOB 7.1.1R to MCOB 7.1.4R, MCOB 7.2, MCOB 7.3 and MCOB 7.8</i>
<i>home purchase administrator</i>	<i>As for a home purchase provider except MCOB 7.8.1R and MCOB 7.8.2G do not apply</i>
<i>home purchase adviser and home purchase arranger</i>	<i>MCOB 7.1.1R to MCOB 7.1.4R, MCOB 7.2 and MCOB 7.8.7G</i>
<i>reversion provider</i> <i>reversion administrator</i> <i>reversion adviser</i> <i>reversion arranger</i>	<i>see MCOB 9.6 for the application of this chapter</i>

What?

- 7.1.3 R This chapter applies if a *firm*:
- (1) enters into a ~~regulated mortgage contract~~ home finance transaction with a *customer*; or
 - (2) ~~administers a regulated mortgage contract~~ administers a home finance transaction which was entered into with a *customer*; or
 - (3) *arranges or advises on* or makes a further advance or other variation to the terms of a ~~regulated mortgage contract~~ home finance transaction entered into with a *customer*.
- 7.1.4 R This chapter applies in relation to further advances and other variations (as specified in ~~MCOB 7.6.7R - MCOB 7.7.4R~~ in relation to a regulated mortgage contract) regardless of whether they are variations to an existing ~~regulated mortgage contract~~ home finance transaction or are such that they involve the customer entering into a new ~~regulated mortgage contract~~ home finance transaction.
- ...
- 7.1.7 G ~~Firms are reminded that in MCOB, references to "arranging" include the activities of a mortgage lender which would be arranging but for article 28A of the Regulated Activities Order (Arranging contracts to which the arranger is a party). [deleted]~~
- 7.1.8 R In relation to a ~~regulated lifetime mortgage contract~~, this chapter ~~MCOB 7~~ is modified by ~~MCOB 9 (Lifetime mortgages)~~ Equity release: product disclosure.

7.2 Purpose

- 7.2.1 G (1) This chapter amplifies *Principle 6* and *Principle 7*, ~~which require a firm to pay due regard to the information needs of its customers and to treat them fairly.~~
- (1A) This chapter requires information to be supplied to *customers* at the start of ~~the~~ *a regulated mortgage contract* to enable them to check that the *regulated mortgage contract* has been set up in accordance with their requirements and to notify them of the first and subsequent payments.
- (2) ...
- (3) This chapter also ensures that *customers* are supplied with information which enables them to check the payments and charges on a ~~regulated mortgage contract~~ *home finance transaction*, to keep track of the transactions on, and the features of, a ~~regulated mortgage contract~~ *home finance transaction* and to be kept informed of material changes.
- (4) ...

...

7.4 ~~D~~Mortgages: disclosure at the start of the contract

...

7.5 ~~S~~Mortgages: statements

...

7.6 ~~E~~Mortgages: event-driven information

...

After MCOB 7.7 insert the following new section. The inserted text is not underlined.

7.8 Home purchase plans

General

Note: The rules in this chapter regarding how a *firm* must provide information required by this section apply (see *MCOB 7.3*).

Post-sale disclosure

- 7.8.1 R A *firm* that enters into a home purchase plan with a *customer* must ensure that before making the first payment the *customer* is provided with a prominent reminder that the *customer* should check that his right to occupy the property has been properly safeguarded.

- 7.8.2 G A *firm* is reminded of its obligation to ensure that its *customer's* interests are protected to a reasonable standard (see *MCOB 2.6A*).

Annual statement

- 7.8.3 R A *firm* must provide the *customer* with a statement at least once a year (or, in relation to the first statement, within the first 13 months of the plan term) covering the *home purchase plan* and including information about:

- (1) payments due and made during the period since the last statement (or, where the statement is the first statement, since the *customer* entered into the *home purchase plan*), including:
 - (a) whether the payment is a rental payment or a purchase payment;
 - (b) the applicable rental rate(s);
 - (c) where relevant, the *customer's* beneficial interest in the property;
- (2) the remaining acquisition amount;
- (3) the actual remaining term;
- (4) the ability of the *customer* to terminate it early and sell the property, together with any charges that would apply.

Annual statement - additional content for customers in arrears

- 7.8.4 G If a *firm* uses the annual statement to provide a *customer* with a written statement relating to *arrears*, it will need to include the actual payment shortfall in the annual statement (see *MCOB 13.5.2G(4)*).

- 7.8.5 G In some circumstances, a *firm* may agree a temporary payment plan with a *customer* that does not involve the *customer* paying the full amount he owes in each payment period. Where an account in *arrears* is subject to such a payment plan, and the amount that falls due each payment period is greater than the agreed payment, the *firm* will still need to show the payments that were due during the period since the last statement. However, in these circumstances, the *firm* may wish to add information to acknowledge that a temporary payment plan is in place.

Tariff of charges

- 7.8.6 R A *firm* must include a *tariff of charges* with the annual statement if it has changed since the previous version provided.

Event-driven information

- 7.8.7 G When a post-sale variation of the *home purchase plan* is proposed or takes place, a *firm* should have regard to the *Principles* (in particular, *Principles 6* and *7*) in determining the action it should take and what information to

provide to the *customer*.

~~Lifetime mortgages~~ Equity release: advising and selling standards

...

8.1.2 R This table belongs to *MCOB 8.1.1R*

(1) Category of firm	(2) Applicable section
mortgage lender <u>equity release provider</u>	whole chapter except <i>MCOB 8.5</i> and <i>MCOB 8.7</i>
mortgage adviser <u>equity release adviser</u>	whole chapter <u>except <i>MCOB 8.6</i>. <i>MCOB 8.7</i> does not apply in relation to a <i>lifetime mortgage</i></u>
mortgage arranger <u>equity release arranger</u>	whole chapter except <i>MCOB 8.5</i> . <i>MCOB 8.7</i> does not apply in relation to a <i>lifetime mortgage</i>

8.1.3 R What?

(1) This chapter applies if a *firm*:

(1) in the course of carrying on a ~~regulated mortgage activity~~ an equity release activity:

- (a) makes, or anticipates making, a *personal recommendation* about; or
- (b) gives, or anticipates giving, personalised information relating to;

the *customer*:

(c) entering into a ~~regulated lifetime mortgage contract~~ an equity release transaction; or

(d) varying the terms of a ~~regulated lifetime mortgage contract~~ an equity release transaction entered into by the *customer*; ~~or~~

(2) ~~in addition to (1), gives advice or personalised information to the customer on home reversion schemes.~~

(2) In respect of arranging or advising on a home reversion plan for a customer who is acting in his capacity as an unauthorised reversion provider, only *MCOB 8.1*, *MCOB 8.2* and *MCOB 8.7* apply.

- 8.1.4 R (1) ~~MCOB 4.4 (Initial disclosure requirements) (as modified by MCOB 8)~~ applies Initial disclosure requirements apply only in relation to varying the terms of an *regulated lifetime mortgage contract equity release transaction* entered into by the customer in any of the following ways:
- (a) ...
- (2) Otherwise, this chapter, ~~MCOB 8~~, applies in relation to any form of variation of an *regulated lifetime mortgage contract equity release transaction*.
- 8.1.5 G ... The *firm* is only required to provide the initial disclosure information in ~~MCOB 8 Annex 1R or MCOB 4 Annex 2R~~ section 7 (What to do if you have a complaint) and section 8 (Are we covered by the Financial Services Compensation Scheme (FSCS)?) of the *initial disclosure document* or *combined initial disclosure document*.
- 8.2 Purpose
- 8.2.1 G The purpose of this chapter for ~~*regulated lifetime mortgage contracts equity release transactions*~~ is the same as that for *regulated mortgage contracts and home purchase plans* in MCOB 4.
- 8.3 Application of rules in MCOB 4
- 8.3.1 R (1) (a) MCOB 4.1 to MCOB 4.6 and MCOB 4.8 (with the modifications stated in MCOB 8.3.3R and MCOB 8.3.4R) apply to a *firm* where the *regulated mortgage contract home finance transaction* is a *regulated lifetime mortgage contract*.
- (b) MCOB 4.1 to MCOB 4.4 and MCOB 4.8 (with the modifications stated in MCOB 8.3.3R and MCOB 8.3.4R) apply to a *firm* where the *home finance transaction* is a *home reversion plan*, except for those provisions that by their nature are only relevant to *regulated mortgage contracts*.
- (2) ...
- (4) The terms that by their nature are relevant only to *regulated mortgage contracts* must be replaced with the appropriate equivalent terms and expressions for *home reversion plans*.
- 8.3.1A G The *rules and guidance* that are not relevant to *home reversion plans* are those related, for example, to interest rates, *APR*, *higher lending charge*, *mortgage credit cards*, multi-part mortgages and foreign currency mortgages.
- 8.3.1B G *Firms* should substitute equivalent home reversion terminology for *lifetime mortgage* terminology, where appropriate. Examples of terms and expressions that should be replaced in relation to *home reversion plans* are 'loan' or 'amount borrowed', which should be replaced with 'amount released'

or 'amount to be released', as appropriate, and '*mortgage lender*' and '*mortgage intermediary*' which should be replaced with '*reversion provider*' and '*reversion intermediary*'.

...

8.3.2 R In applying ~~MCOB 4.3~~ initial disclosure requirements to ~~regulated lifetime mortgage contracts~~ equity release transactions, the market for equity release transactions should be treated as one single market with two separate sectors. ~~References to the 'whole market' must be read as references to the whole market for regulated lifetime mortgage contracts equity release transactions.~~ This is unless the *firm* only gives personalised information or *advice to customers* on products in one market sector, in which case references to the 'whole market' must be read as references to the whole market for *lifetime mortgages* or *home reversion plans* as the case may be.

8.3.2A G The effect of the *rules* on independence is that a *firm* that sells *lifetime mortgages* and *home reversion plans* from the whole market and enables the *customer* to pay a fee for the provision of the service, can hold itself out as being 'independent' for the equity release market (see *MCOB 4.3.7R*). If the *firm* offers a service on this basis for only one of these market sectors, then it can only describe itself as 'independent' for that sector.

8.3.3 R Table of modified cross-references to other *rules*: This table belongs to *MCOB 8.3.1R*.

Subject	Rule or guidance	Reference in rule or guidance	To be read as a reference to:
...			
Initial disclosure requirement (for regulated lifetime mortgage contracts <u>equity release transactions</u> only)	<i>MCOB 4.4.1R(1)(c)</i> and (3)	<i>MCOB 4 Ann 1R</i>	<i>MCOB 8 Ann 1R</i>
...			
Initial disclosure requirements where initial contact is by telephone (for regulated lifetime mortgage contracts <u>equity release transactions</u> only)	<i>MCOB 4.4.7R(2)</i>	<i>MCOB 4 Ann 1R</i>	<i>MCOB 8 Ann 1R</i>
...			

...

8.4 Initial disclosure requirements: Home reversion schemes ~~[deleted]~~

8.4.1 R ~~If a firm gives, or anticipates giving, advice or personalised information on home reversion schemes in addition to *regulated lifetime mortgage contracts*, the initial disclosure information in *MCOB 4.4.1R* and *MCOB 4.4.7R* must be provided in respect of the home reversion schemes, as well as the *regulated lifetime mortgage contracts*, using the text set out in *MCOB 8 Annex 1R* and *MCOB 4 Annex 2R*. [deleted]~~

8.5 Advised sales

Suitability: general

8.5.1 G ...

8.5.2 R A firm must take reasonable steps to ensure that it does not make a *personal recommendation* to a customer to enter into an *regulated lifetime mortgage contract equity release transaction*, or to vary an existing *regulated lifetime mortgage contract equity release transaction*, unless ~~the *regulated lifetime mortgage contract* it is, or after the variation will be,~~ suitable for that customer (see *MCOB 4.3.4R(2)*, *MCOB 4.3.5G* and *MCOB 4.3.6G*).

8.5.3 R In ~~*MCOB 8.5*~~ this section, a reference to a recommendation to enter into an *regulated lifetime mortgage contract equity release transaction* is to be read as including a reference to a recommendation to vary an existing *regulated lifetime mortgage contract equity release transaction* if the context so requires.

8.5.4 R ~~For the purposes of *MCOB 8.5.2R*:~~

(1) ~~a *regulated lifetime mortgage contract*~~ An equity release transaction will be suitable if, having regard to the facts disclosed by the customer and other relevant facts about the customer of which the firm is or should reasonably be aware, the firm has reasonable grounds to conclude that:

(a) ...

(b) alternative methods of raising the required funds such as, in particular:

(i) an equity release transaction from the other market sector ~~a home reversion scheme~~; or

(ii) (where relevant) a local authority (or other) grant;

are less suitable;

(c) where the ~~*regulated lifetime mortgage contract equity release transaction*~~ requires that payments are made to the ~~*mortgage lender equity release provider*~~ (for example an *interest-only mortgage*), the customer can afford to enter into the *regulated lifetime mortgage contract transaction*;

- (d) the ~~regulated lifetime mortgage contract equity release transaction~~ is appropriate to the needs, objectives and circumstances of the *customer*; and
 - (e) the ~~regulated lifetime mortgage contract equity release transaction~~ is the most suitable of those that the *firm* has available to it within the scope of the service provided to the *customer*;
- (2) ~~no~~ No recommendation must be made if there is no ~~regulated lifetime mortgage contract equity release transaction~~ from within the scope of the service provided to the *customer* which is appropriate to his needs and circumstances; and
- (3) ~~if~~ If a *firm*...

...

Suitability: means-tested benefits, customer's tax position and alternative methods of finance

8.5.5 R ...

...

8.5.7 R If for any reason a *customer*:

- (1) declines to seek further information ~~in accordance with MCOB 8.5.5R or MCOB 8.5.6E(1)~~ on means-tested benefits, tax allowances or the scope for local authority (or other) grants; or
- (2) rejects the conclusion of a *firm* ~~under MCOB 8.5.4R(1)(b)~~ that alternative methods of raising the required funds are more suitable;

a *firm* can make a *personal recommendation* (in accordance with the remaining requirements of ~~MCOB 8.5~~ this chapter) where there is a ~~regulated lifetime mortgage contract an equity release transaction~~ (or more than one ~~regulated lifetime mortgage contract equity release transaction~~) that is appropriate to the needs and circumstances of the *customer*, but must confirm to the *customer*, in a *durable medium*, the basis on which the *personal recommendation* has been made.

8.5.8 R In determining whether ~~MCOB 8.5.4R(1)(b)(i)~~ applies an equity release transaction from the other market sector is less suitable, and in relation to MCOB 8.5.4R(1)(d) the appropriateness of the transaction to the customer's needs, objectives and circumstances, a *firm* must consider:

- (1) whether the *customer's* requirements meet the eligibility criteria for the ~~regulated lifetime mortgage contract equity release transaction~~ (for example, the amount that the *customer* wishes to borrow or to release, ~~or~~ the loan-to-value ratio, the age of the customer, the value of the property, as appropriate) ~~or a home reversion scheme~~;

(2) ...

...

(6) whether the *customer* has a preference or need for any other features of a ~~regulated lifetime mortgage contract~~ an equity release transaction or a ~~home reversion scheme~~.

8.5.9 G Where a *firm* sells only ~~regulated lifetime mortgages contracts~~, ~~MCOB 8.5.8R~~ does not require the *firm* it is not required to assess the suitability of individual ~~home reversion scheme~~ home reversion plans, and vice-versa. However, where a *firm* sells products from both market sectors, it should assess the suitability of all equity release transactions within its range.

Suitability: affordability

8.5.10 R ...

8.5.11 R In relation to ~~MCOB 8.5.4R(1)(e) and (d)~~ whether the equity release transaction is affordable and appropriate to the *customer's* needs, objectives and circumstances, where a *firm* makes a *personal recommendation* to a *customer* to enter into an ~~regulated lifetime mortgage contract~~ equity release transaction where a main purpose is to consolidate existing debts, it must also take account of the following, where relevant, in assessing whether the ~~regulated lifetime mortgage contract~~ equity release transaction is suitable for the *customer*:

(1) ...

...

(3) where the *customer* is known to have payment difficulties, whether it would be more appropriate for the *customer* to negotiate an arrangement with his creditors than to ~~take out a regulated lifetime mortgage contract~~ enter into an equity release transaction.

8.5.12 E (1) In assessing whether a *customer* can afford to enter into a particular ~~regulated lifetime mortgage contract~~ equity release transaction, a *firm* should give due regard to the following:

...

...

8.5.14 G ~~MCOB 8.5.4R(3) explains that d~~ Different considerations apply when making a *personal recommendation* to a *customer* in arrears. For example, the circumstances of the *customer* may mean that, viewed as a new transaction, a *customer* could not be recommended to enter into an ~~regulated lifetime mortgage contract~~ equity release transaction. In such cases, a *firm* will still be able to make a *personal recommendation* to that *customer* where this recommendation is, in the circumstances, a more suitable one than the *customer's* existing ~~regulated lifetime mortgage contract~~ equity release

transaction.

- 8.5.15 G In complying with *MCOB 8.5.4R* a *firm* is not required to consider whether it would be preferable for the *customer* to:
- (1) trade down (that is release funds by selling his existing property and purchasing a less expensive property) rather than enter into an ~~regulated lifetime mortgage contract~~ equity release transaction;
 - (2) rent a property, rather than purchase one or enter into an ~~regulated lifetime mortgage contract~~ equity release transaction on his existing property; or
 - (3) delay entering into an ~~regulated lifetime mortgage contract~~ equity release transaction until a later date on the grounds that property prices would have changed in the intervening period, or that the interest rate in relation to a ~~the regulated lifetime mortgage contract~~ would be lower, or both.

Suitability: appropriate to the customer's needs, objectives and circumstances

- 8.5.16 G (1) ...
- (2) Where the scope of the *advice* provided is ~~restricted (within the meaning of *MCOB 4.3.1R(1)(b)* or (c)), *MCOB 8.5.4R(2)* means that~~ based on a selection of equity release transactions from a single or limited number of providers, the assessment of suitability should not be limited to the ~~types of *regulated lifetime mortgage contract* equity release transactions~~ which the *firm* offers. ~~*MCOB 8.5.4R(2)* prevents a *firm* recommending~~ A *firm* cannot recommend the 'least worst' ~~regulated lifetime mortgage contract~~ equity release transaction where the *firm* does not have access to products appropriate to the *customer's* needs and circumstances. ~~¶~~ This means, for example, that a *firm* dealing solely in the sub-prime market should not recommend one of these ~~regulated lifetime mortgage contracts~~ equity release transactions if approached for advice by a *customer* with an unblemished credit record.

8.5.16A G In assessing whether a *home reversion plan* is appropriate to the needs, objectives and circumstances of its *customer*, matters that a *firm* should take into account include:

- (1) the duration of the right to occupy the property; and
- (2) where an *unauthorised reversion provider* will provide the plan, the loss of those protections of the *regulatory system* that apply when a *customer* enters into a *home reversion plan* with an authorised *reversion provider*.

Suitability: most suitable

- 8.5.17 E (1) A *firm* should, out of all the ~~*regulated lifetime mortgage contracts*~~

equity release transactions identified as being appropriate for that *customer*, recommend the one that is the least expensive for that *customer* taking into account those pricing elements identified by the *customer* as being most important to him.

(2) ...

8.5.18 G (1) ...

(2) ~~MCOB 8.5.17E(1) does not prevent a firm~~ A firm is not prevented from making a recommendation on grounds other than price. For example, it would be open to a firm to have regard to the speed or quality of service of different ~~mortgage lenders~~ equity release providers, the policies of ~~mortgage lenders~~ equity release providers on further lending or capital repayments, the underwriting stance of ~~mortgage lenders~~ equity release providers or the *customer's* wish for an regulated lifetime mortgage contract equity release transaction that is compliant with Sharia Islamic law. The obligation to satisfy ~~MCOB 8.5.4R(1)(e)~~ have reasonable grounds to conclude that the transaction is the most suitable remains the same in such cases.

8.5.19 G (1) If circumstances arise in which a firm has reasonable grounds to conclude that there are several ~~regulated lifetime mortgage contracts~~ equity release transactions that would satisfy the suitability requirement in ~~MCOB 8.5.4R~~ be suitable, the firm will act in conformity with that rule if it may recommend only one of those ~~regulated lifetime mortgage contracts~~ equity release transactions.

(2) If for any reason a *customer* rejects a recommendation made by a firm (for example, on the grounds that the ~~mortgage lender~~ equity release provider selected is unknown to him), the firm can make a further suitable recommendation (in accordance with the requirements of ~~MCOB 8.5~~) where there remains an regulated lifetime mortgage contract equity release transaction that is appropriate to the needs and circumstances of the *customer*.

Rejected recommendations

8.5.20 R (1) If a *customer* has:

(a) rejected all of the *personal recommendations* made by a firm and requested information instead on an regulated lifetime mortgage contract equity release transaction that the firm does not consider suitable (and therefore could not recommend to the *customer* in accordance with ~~MCOB 8.5.2R~~); and

(b) been issued with a new ~~initial disclosure document~~ in accordance with ~~MCOB 4.4.1R~~ or ~~MCOB 4.4.7R~~ (as modified by ~~MCOB 8~~) initial disclosure document or combined initial disclosure document;

the firm may be able to provide information on that regulated lifetime mortgage contract equity release transaction in the light of the

information on which the *personal recommendations* in (1) were made.

- (2) If the *firm* needs to ask further questions regarding the needs and circumstances of the *customer* to be able to provide information on that ~~regulated lifetime mortgage contract~~ equity release transaction, the *firm* must obtain that information by asking scripted questions (in accordance with ~~MCOB 4.8.1R~~ and ~~MCOB 8.6~~ the rules on non-advised sales).

8.5.21 G A *firm* may consider it prudent to record any cases where, after all *personal recommendations* it has made to a *customer* have been rejected, it changes the nature of the service it provides (as in ~~MCOB 8.5.20R~~) and provides the *customer* with information about an ~~regulated lifetime mortgage contract~~ equity release transaction.

...

8.6 Non-advised sales

8.6.1 R ~~In relation to MCOB 4.8.1R~~ The questions used to help a *customer* select a ~~regulated lifetime mortgage contract~~ an equity release transaction must cover the following:

- (1) the matters regarding eligibility criteria, customer's preferences for his estate, customer's health and life expectancy, customer's future plans and needs, customer's preference or need for stability in the amount of payments, and whether the customer has a preference or need for any other features, set out in MCOB 8.5.8R;
- (2) whether the *customer* has considered alternative methods of raising the required funds, and in particular:
 - (a) an equity release transaction from the other market sector home reversion scheme; and
 - (b) ...

...

8.6.2 G ~~In complying with MCOB 8.6.1R(2) and (3)~~ a *firm* should encourage a *customer* to seek advice on an ~~regulated lifetime mortgage contract~~ equity release transaction if the *customer* is unsure about making their own choice. ~~In the case of MCOB 8.6.1R(2)(b) and (3)~~ In relation to grant assistance, means-tested benefits and the customer's tax position, a *firm* should, where relevant, encourage the *customer* to seek further information from an appropriate source such as their local authority or Citizens Advice Bureau (or other similar agency).

8.6.3 G Firms are reminded that ~~FC 2~~ the Training and Competence sourcebook sets out requirements for:

- (1) *employees* designing scripted questions for use in sales to *customers* of ~~regulated lifetime mortgage contracts~~ equity release transactions

which do not involve *personal recommendations*; and

- (2) *employees* overseeing on a day-to-day basis the sales to *customers* of ~~*regulated lifetime mortgage contracts*~~ *equity release transactions* which do not involve *personal recommendations*.

8.7 Initial disclosure information: unauthorised reversion provider

8.7.1 R A firm must ensure that, on first making contact with a customer who is an individual and an unauthorised reversion provider, when it anticipates giving personalised information or advice on a home reversion plan, it must provide the customer with the following warnings in a durable medium:

- (1) that a home reversion plan is a long-term investment; and
- (2) that a home reversion plan is a complex legal arrangement, and that expert independent legal advice should be obtained before entering into any agreement.

8 Annex 1 Initial disclosure document ("IDD")

R This annex belongs to *MCOB 4.4.1R* (as modified by *MCOB 8*) ~~and~~
MCOB 8.4.1R.

Firms must omit the notes and square brackets that appear in the following IDD. The IDD must contain the key facts logo, headings and text in the order shown and in accordance with the Notes [**Note 1**].

About our ~~lifetime mortgage [and home reversion scheme]~~ equity release services [Note 2**] [~~Note 3~~]**

[**Note 4**] [**Note 5**]

[**Note 6**]
123 Any Street
Some Town
ST21 7QR

1. The Financial Services Authority (FSA)

The FSA is the independent watchdog that regulates financial services. It requires us to give you this document. Use this information to decide if our services are right for you.

2. Whose products do we offer? [Note 3**] [**Note 7**] [**Note 8**]**

- We offer [lifetime mortgages] [home reversion plans] [equity release products] from the whole market.
- We [can] [**Note 9**] only offer [lifetime mortgages] [home reversion plans] [equity release products] from a limited number of companies.

Ask us for a list of the companies we offer products from. [**Note 10**]

- We [can] **[Note 9]** only offer [a limited range of ~~the~~] [lifetime mortgages] [home reversion plans] [equity release products] [~~a~~] product[s] from [a single company] [name of single company]. **[Note 11]** **[Note 11A]**

[or]

We only offer our own [lifetime mortgages] [home reversion plans] [equity release products]. **[Note 12]**

- We do not offer [lifetime mortgages] [home reversion plans]. **[Note 8A]**
-

3. Which service will we provide you with? **[Note 3] **[Note 7]****

- We will advise and make a recommendation on [lifetime mortgages] [home reversions] [equity release products] for you after we have assessed your needs.
- You will not receive advice or a recommendation from us. We may ask some questions to narrow down the selection of ~~products~~ [lifetime mortgages] [home reversions] [equity release products] on which we will provide details. You will then need to make your own choice about how to proceed.
-

4. What will you have to pay us for this service? **[Note 3] **[Note 7]****

- No fee [we will be paid by commission from the company that [lends you money] [buys your home]]. **[Note 13]**
- A fee [of £ [] payable at the outset and £[] payable when you apply for [a lifetime mortgage] [a home reversion plan scheme] [an equity release product]]. [We will also be paid commission from the company that [lends you money] [buys your home].] **[Note 13]** **[Note 14]**

You will receive a key facts illustration when considering a particular ~~lifetime mortgage~~ [equity release product] ~~for further information about a particular home reversion scheme~~, which will tell you about any fees relating to it. **[Note 3]**

5. Refund of fees **[Note 15] **[Note 16]****

If we charge you a fee, and your ~~lifetime mortgage~~ [equity release sale] ~~[home reversion scheme]~~ does not go ahead, you will receive: **[Note 3]**

- A full refund [if the company rejects your application]. **[Note 17]**
- A refund of £ [] [if the application falls through]. **[Note 17]** **[Note 18]**
- No refund [if you decide not to proceed]. **[Note 17]**
-

6. Who regulates us? **[Note 19]**

[XYZ Financial Services][123 Any Street, Some Town, ST21 7QB] [Note 20] [Note 20A] is authorised [Note 21] and regulated by the Financial Services Authority. Our FSA Register number is [].

Our permitted business is []. [Note 22]

[or] [Note 20B]

[Name of *appointed representative*] [Notes 4 and 5] is an appointed representative of [name of *firm*] [address of *firm*] [Note 20] [Note 20A] which is authorised and regulated by the Financial Services Authority. [Name of *firm*]'s FSA Register number is [].

[Name of *firm*]'s permitted business is []. [Note 22]

You can check this on the FSA's Register by visiting the FSA's website www.fsa.gov.uk/register/ or by contacting the FSA on 0845 606 1234.

~~[Home reversion schemes are not regulated by the FSA.] [Note 3]~~

7. What to do if you have a complaint

If you wish to register a complaint, please contact us:

...in writing Write to [XYZ Financial Services], [Complaints Department, 123 Any Street, Some Town, ST21 7QB] [Note 23]

...by phone Telephone [0121 100 1234] [Note 23]

If you cannot settle your complaint with us, you may be entitled to refer it to the Financial Ombudsman Service. ~~[The Financial Ombudsman Service does not consider complaints about home reversion schemes.] [Note 3] [Note 23A]~~

8. Are we covered by the Financial Services Compensation Scheme (FSCS)? [Note 19] [Note 24] [Note 25]

We are covered by the FSCS. You may be entitled to compensation from the scheme if we cannot meet our obligations. This depends on the type of business and the circumstances of the claim.

~~Mortgage~~Equity release advising and arranging is covered for 100% of the first £30,000 and 90% of the next £20,000 so the maximum compensation is £48,000. ~~[Home reversion schemes are not covered by the FSCS.] [Note 3]~~

Further information about the compensation scheme arrangements is available from the FSCS.

Message from the Financial Services Authority
Think carefully about this information before deciding whether you want to go ahead.
If you are at all unsure about which ~~lifetime mortgage home reversion scheme~~ equity release transaction is right for you, you should ask your adviser to make a recommendation.
Please remember that home reversion schemes are not regulated by the FSA.

The following notes do not form part of the IDD.

...

Note 2 – the *Financial Services Authority* has developed a common ‘key facts’ logo to be used on significant pieces of information directed to *customers*. The ‘key facts’ logo and the text “about our ~~lifetime mortgage~~ equity release services” must be used and positioned as shown on the IDD. The logo may be re-sized, but it must be reasonably prominent and its proportions must not be distorted. When reproducing the logo, *firms* may use colour providing this does not diminish the prominence of the logo.

Note 3 – *firms* must insert the text in square brackets relating to lifetime mortgages home reversion schemes if they advise or give personalised information on their scope of service includes lifetime mortgages; the text in square brackets relating to home reversion plans schemes if their scope of service includes home reversion plans; and the text in square brackets relating to equity release products if their scope of service includes products from both market sectors. The texts in square brackets are mutually exclusive. This means that *firms* should use only one of the square bracketed texts and must omit those not used. ~~in addition to advising or giving personalised information on regulated lifetime mortgage contracts.~~

...

Note 7 - *firms* must describe their scope of service by selecting and by ticking, for example, one the box or boxes that describe the products and services that the firm which is (are) appropriate for the service that they expects to provide to the customer. This means a *firm* will select either one or both boxes within this section. *Firms* must not delete the boxes not selected (but see Note 8A). In the text associated with boxes that are not ticked, a *firm* must delete references to ‘home reversions’ and ‘lifetime mortgages’ but leave references to ‘equity release products’, omitting the square brackets. This is so that a *customer* can see other possible options, even if not available from the *firm* issuing the IDD.

...

Note 8A – if the *firm's* scope of service does not include both types of equity release transactions, it must use this box to indicate to the *customer* the sector that it does not cover.

Note 9 - insert "can" if the *firm's* range of equity release transactions ~~regulated lifetime mortgage contracts~~ is determined by any contractual obligation.

...

Note 11A - If the *firm* offers home reversion plans from only one *reversion provider*, and lifetime mortgages from only one *lender*, which is different from the *reversion provider*, then the *firm* should identify the *lender* and the *reversion provider* and specify the equity release transaction to which they relate. For example, "We can only offer lifetime mortgages from ABC Mortgages Ltd and home reversion plans from XYZ Reversions Ltd."

...

Note 14 – insert a plain language description of when any *fees* are payable. This description could include, for example, a cash amount, a percentage of the loan or reversion amount or the amount per hour, as appropriate. However, where a cash amount is not disclosed, one or more examples of the cash amount must be included. If the *firm* offers more than one pricing option, ~~it may illustrate each with a separate box.~~ it should specify the pricing policy for each product. For example, "A fee of £100 payable at the outset and £120 when you apply for a lifetime mortgage and £80 when you apply for a home reversion plan". If a *firm* does not charge a *fee*, the text for the second box should be abbreviated to 'A fee'.

...

Note 17 – insert a plain language description of the circumstances in which the *fee* is refundable or not refundable as described. If the refund policy is different depending on the equity release transaction in question, the firm should specify the refund policy for each of them. For example, "A refund of £100 if your lifetime mortgage application falls through and a refund of £120 if your home reversion plan application falls through."

...

Note 20B – where the information is provided by an *appointed representative*, the *appointed representative* must use this text instead. The *appointed representative* must give details of the *authorised firm(s)* that is its *principal(s)* for each type of service that it is providing to a particular *customer*.

...

Note 22 - insert a short, plain language description of the business for which the *firm* has *permission* in relation to ~~regulated lifetime mortgage contracts~~ equity release transactions.

...

~~Lifetime mortgages~~ Equity release: product disclosure

9.1 Application

9.1.1 R Who?

This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 9.1.2R* in accordance with column (2) of that table, except that those provisions that by their nature are only relevant to *regulated mortgage contracts* do not apply to *home reversion plans*.

9.1.2 R This table belongs to *MCOB 9.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i>	whole chapter <u><i>MCOB 9.1 - 9.4.132R, MCOB 9.5 - 9.8</i></u>
<i>mortgage administrator</i>	<u><i>MCOB 9.1—9.4, MCOB 9.2, MCOB 9.6 and MCOB 9.8</i></u>
<i>mortgage adviser; mortgage arranger</i>	<u><i>MCOB 9.1 - 9.4.132R and MCOB 9.8.5R-MCOB 9.8.10R</i></u>
<i>mortgage arranger</i>	<i>MCOB 9.1—9.4 and MCOB 9.8.5R—MCOB 9.8.10R</i>
<u><i>reversion provider</i></u>	<u><i>MCOB 9.1 – 9.4.17AR, MCOB 9.4.133R -9.6; MCOB 9.9</i></u>

<u>reversion administrator</u>	<u>MCOB 9.1, MCOB 9.6 and MCOB 9.9</u>
<u>reversion adviser; reversion arranger</u>	<u>MCOB 9.1 - 9.4.17AR, MCOB 9.4.133R - 9.4.176G; MCOB 9.9.8R</u>

9.1.2A G The rules and guidance that are not relevant to home reversion plans are those related, for example, to interest rates, APR, higher lending charge, mortgage credit cards, multi-part mortgages and foreign currency mortgages.

9.1.3 R What?

This chapter applies in the circumstances set out in other ~~rules~~ in MCOB this sourcebook, but in relation to a ~~regulated lifetime mortgage contract~~ an equity release transaction, in accordance with the table in MCOB 9.1.4R.

9.1.4 R This table belongs to MCOB 9.1.3R

Section of MCOB 9	Applies in relation to a regulated lifetime mortgage contract <u>an equity release transaction</u> as set out in the following MCOB rules:
<u>MCOB 9.1, MCOB 9.2</u>	all of the <i>rules</i> listed below <u>in this column</u>
<u>MCOB 9.3, MCOB 9.4</u>	<u>MCOB 5.1.3R</u>
<u>MCOB 9.5</u>	<u>MCOB 6.1.3R</u>
<u>MCOB 9.5 6</u>	<u>MCOB 7.1.3R</u>

9.1.5 R In this chapter, references to a ~~regulated lifetime mortgage contract~~ an equity release transaction include, where the context requires, references to arrangements which are capable of becoming a ~~regulated lifetime mortgage contract~~ an equity release transaction.

9.1.6 R This chapter does not apply in relation to arranging, advising on or administering a home reversion plan for a customer acting in his capacity as an unauthorised reversion provider.

9.2 Purpose

9.2.1 G The purpose of the requirements in this chapter is the same as that in MCOB 5.2, MCOB 6.2 and MCOB 7.2 in respect of ~~regulated lifetime mortgage contracts~~ equity release transactions.

9.3 Pre-application disclosure

9.3.1 R (1) MCOB 5.1 to MCOB 5.5 (with the modifications stated in MCOB 9.3.2R to MCOB 9.3.12R) apply to a firm where the ~~regulated mortgage contract~~ home finance transaction is an ~~regulated lifetime mortgage contract~~ equity release transaction, except that those

provisions that by their nature are only relevant to regulated mortgage contracts do not apply to home reversion plans (see MCOB 9.1.2AG).

(2) ...

...

(5) The terms that by their nature are relevant only to regulated mortgage contracts must be replaced with the appropriate equivalent terms and expressions for home reversion plans.

9.3.1A G The provisions in this sourcebook that apply to home reversion plans should be read in a purposive way. This means that firms should substitute equivalent home reversion terminology for lifetime mortgage terminology, where appropriate. Examples of terms and expressions that must be replaced are 'loan' or 'amount borrowed', which should be replaced with 'amount released' or 'amount to be released', as appropriate, and 'mortgage lender' and 'mortgage intermediary' which should be replaced with 'reversion provider' and 'reversion intermediary'.

Table of modified cross-references to other rules

9.3.2 R This table belongs to MCOB 9.3.1R.

Subject	Rule or guidance	Reference in rule or guidance	To be read as a reference to:
...			
Part of loan not a regulated lifetime mortgage contract <u>an equity release transaction</u>	MCOB 5.1.9G	MCOB 5.6.6R(2)	MCOB 9.4.6R(2)
...			
Tied products	MCOB 5.4.24G	MCOB 5.6.74R	MCOB 9.4.73R or MCOB 9.4.160R
...			

...

9.3.5 R An illustration on a particular ~~regulated lifetime mortgage contract~~ equity release transaction issued by, or on behalf of an ~~mortgage lender~~ equity release provider, must be an accurate reflection of the costs of the ~~regulated lifetime mortgage contract~~ equity release transaction.

9.3.6A R A reversion intermediary must take reasonable steps to ensure that an

illustration which it issues, or which is issued on its behalf, other than that provided by an *reversion provider*, is accurate, except in the case of conveyancing fees and insurance premiums (where estimates may be used).

...

- 9.3.8 G There are no restrictions on figures which are quoted as higher than those actually charged by the ~~*mortgage lender*~~ *equity release provider* although this should not be purposely done in order to make one ~~*regulated lifetime mortgage contract*~~ *equity release transaction* look more expensive than another.
- 9.3.9 G It is the responsibility of a ~~*mortgage*~~ *an equity release intermediary* to ensure ~~compliance with *MCOB 9.3.6R*~~ *an illustration is accurate*. However, where a *firm* can show that it was reasonable for it to rely on information provided to it by another *person*, other than the ~~*mortgage lender*~~ *equity release provider*, ~~that an *illustration* was within the tolerances described in *MCOB 9.3.6R*~~, he may be able to rely on that *person* (see *MCOB 2.5.2R*), if ~~this turns out not to be the case~~.
- 9.3.10 G An *offer document* may not always exactly match the *illustration* provided before application even when the ~~loan~~ *equity release* requirements have not changed. For example, where a fixed rate has a defined end date, the *total amount payable* may be different because the number of payments at the fixed rate has reduced, or the estimated amount of interest to be charged has changed, assuming a later date at which the ~~*regulated lifetime mortgage contract*~~ will start.
- 9.3.11 R Where ~~*MCOB 5.4.13R(2)*~~ applies a *firm* provides a *customer* with information specific to an *equity release transaction* on a screen:
- (1) if the *customer* initiates the accessing of quotation information on screen (for example, by using the internet or interactive television), the following warning must be displayed equally prominently on each page on screen: This information does not contain all of the details you need to choose a ~~lifetime mortgage~~ *an equity release product*. Make sure that you read the separate key facts illustration before you make a decision;
 - (2) ...
- 9.3.12 R In meeting a request ~~under *MCOB 5.5.1R(2)(e)*~~ for written information specific to the *customer's* requirements on a particular *equity release transaction* (see *MCOB 5.5.1R(2)(c)*), the *firm* must not delay the provision of the *illustration* by requesting information other than:
- (1) the information necessary to personalise the *illustration* ~~in accordance with *MCOB 9.4.6R*~~, if the *firm* does not already know it;

(2) where the *firm* acts in accordance with ~~MCOB 5.5.11R(2)~~ is uncertain whether the transaction will be an equity release transaction, such information as is necessary to ascertain ~~this whether or not the contract will be a regulated lifetime mortgage contract~~;

(3) ...

...

9.4 Content of illustrations

Purpose

9.4.1 G ~~MCOB 9.4~~ This section sets out the required content of an *illustration* for a ~~regulated lifetime mortgage contract~~ an equity release transaction provided to a *customer* by a *firm*. The template of an illustration for a lifetime mortgage is set out in MCOB 9 Annex 1 and for a home reversion plan, in MCOB 9 Annex 2.

Content, order, format etc

9.4.2 R An *illustration* provided to a *customer* must:

(1) contain the material set out in ~~MCOB 9 Annex 1~~ the relevant annex to this chapter in the order and using the numbered section headings, sub-headings and ~~prescribed text prescribed in MCOB 9 Annex 1~~, except where ~~provided for in MCOB 9.4~~ this section provides otherwise;

(2) follow the format of the template in ~~MCOB 9 Annex 1~~ the relevant annex to this chapter, with:

(a) prominent use of the keyfacts logo followed by the text 'about this lifetime mortgage' or 'about this home reversion plan';

...

...

(6) replace "[name of mortgage lender]" or "[name of reversion provider]" with the name of the ~~mortgage lender~~ equity release provider providing the ~~regulated lifetime mortgage contract~~; a trading name used by the ~~mortgage lender~~ equity release provider may be stated, as long as the name of the ~~mortgage lender~~ is also disclosed in Section 5 of the *illustration* in accordance with ~~MCOB 9.4.24R(1)~~;

(7) ...

...

- (9) describe any ~~regulated lifetime mortgage contract~~ as a "lifetime mortgage" and any home reversion plan as a "home reversion plan" and not use any other expression to describe such a mortgage or plan or omit that description from the name given to any product that meets the definition.

9.4.3 G (1) ...

...

- (3) The *illustration* can contain the ~~mortgage lender's equity release provider's~~ or ~~mortgage equity release intermediary's~~ logo and other "brand" information, ~~so long as the requirements of MCOB 9.4 are satisfied.~~

(4) ...

...

9.4.4 R A *firm* must include in the *illustration* all prescribed section headings ~~in MCOB 9 Annex 1~~, except that:

- (1) in Section 8 of the lifetime mortgage illustration (What you owe and when):

...

- (2) Section 16 of the lifetime mortgage illustration (Using a mortgage intermediary) or section 12 of the home reversion plan illustration (Using a home reversion intermediary) is required only where the *illustration* is provided to the *customer* by, or on behalf of, an mortgage equity release intermediary; and

- (3) where the *illustration* is issued in connection with a further advance ~~in accordance with MCOB 9.8.5R~~, an additional section "Total borrowing" must be inserted after Section 8 of a lifetime mortgage illustration, and must be numbered "9", with all subsequent sections renumbered accordingly.

...

9.4.6 R As a minimum the *illustration* must be personalised to reflect the following:

- (1) the specific ~~regulated lifetime mortgage contract~~ equity release transaction in which the *customer* is interested;
- (2) the amount of the loan or equity required by the *customer*, or for drawdown mortgages and instalment reversion plans, the amount the *customer* wishes to draw down or to receive on a monthly (or such frequency that amounts are available) basis. Where the amount the *customer* can draw down is variable, the *firm* must agree with the *customer* an expected amount to be drawn down per year (see MCOB 9.4.13R);

- (3) the price or value of the property on which the equity release amount is based~~regulated lifetime mortgage contract~~ would be secured (estimated where necessary);
- (4) such information relating to the *customer*, or the property, or both as is necessary to determine that the *customer* would qualify for the ~~regulated lifetime mortgage contract~~ equity release transaction in question; and
- (5) the term of the instalment reversion plan or, in the case of a lifetime mortgage and an open-ended instalment reversion plan, the estimated term of the ~~regulated lifetime mortgage contract~~, calculated in accordance with ~~MCOB 9.4.10R~~.

- 9.4.7 G A *firm* should not illustrate more than one ~~regulated lifetime mortgage contract~~ equity release transaction in the same *illustration*, for example by using one *illustration* to compare alternative products.
- 9.4.8 G ~~MCOB 9.4.6R sets out~~These are minimum requirements. The *illustration* may be personalised to a greater degree if the ~~mortgage lender~~ equity release provider or ~~mortgage~~ equity release intermediary wishes, subject to the restrictions on the information that can be obtained from the *customer* ~~in MCOB 9.3.12R~~ when the *illustration* is provided in accordance with ~~MCOB 5.5.1R(2)(e)~~when he requests written information on a particular transaction (see ~~MCOB 5.5.1R(2)(c)~~).
- 9.4.9 G In relation to ~~MCOB 9.4.6R(3)~~the price or value of the property, in order for the *firm* to comply with the principle of "that an illustration should be clear, fair and not misleading" in ~~MCOB 2.2.6R~~, an estimated valuation, where the estimated valuation is not that provided by the *customer*, must be a reasonable assessment based on all the facts available at the time. For example, an overstated valuation could enable a more attractive ~~regulated lifetime mortgage contract~~ to be illustrated on the basis of a lower ratio of the loan amount to the property value - for example, one with a lower rate of interest.
- 9.4.10 R (1) In estimating ~~at~~ the term ~~under MCOB 9.4.6R(5)~~of a lifetime mortgage or an open-ended instalment reversion plan, a *firm* must:
- ...
- ...
- 9.4.11 R Where the *illustration* is issued to two or more *customers* who intend to borrow jointly, or who own the property jointly, the term estimated ~~in accordance with MCOB 9.4.10R~~ should be based on the longest life expectancy.
- 9.4.12 R If the *customer* requests an *illustration* showing a term of the *customer's* choice, that *illustration* must be issued in addition to the *illustration* showing the term calculated in accordance with ~~MCOB 9.4.10R~~these rules. The term chosen should be stated in Section 4 of the *illustration* "What you

have told us" ~~(see MCOB 9.4.21R(2)).~~

- 9.4.13 R The amount to be specified in the illustration and referred to in MCOB 9.4.6R(2) is:
- (1) the amount that the *customer* has asked to borrow, release or draw down; or
 - (2) ...
 - (3) in cases where, on the basis of the information obtained from the *customer* before providing the *illustration*, it is clear that the *customer* would not be eligible to borrow, release or draw down the amount he requested, an estimate of the amount that the *customer* could borrow, release or draw down, based on the information obtained from the *customer*.

- 9.4.14 G *MCOB 9.4.13R(3)* does not require information to be obtained from the *customer* before providing an *illustration* in order to ascertain the amount the *customer* is eligible to borrow or to release from the property. ...

...

Information to be included at the head of the illustration

- 9.4.17 R The following information must be included at the head of the *illustration*:
- (1) the *customer's* name;
 - (2) the date of issue of the *illustration*;
 - (3) details of how long the *illustration* is valid for, and whether there is any date by which the ~~regulated lifetime mortgage contract~~ equity release transaction covered by the *illustration* needs to commence (for example, where a fixed interest rate is only available if the ~~regulated lifetime mortgage contract~~ commences before a certain date); and
 - (4) the prescribed text at the head of the *illustration* ~~in MCOB 9 Annex 1.~~

- 9.4.17A R (1) The requirements for a lifetime mortgage illustration are set out in MCOB 9.4.18R to MCOB 9.4.132R.
- (2) The requirements for a home reversion plan illustration are set out in MCOB 9.4.133R to MCOB 9.4.176G.

Section 16 of a lifetime mortgage illustration: “Using a mortgage intermediary”

...

After *MCOB* 9.4.132R insert the following provisions. This text is new and it is not underlined.

Section 1 of a home reversion plan illustration: “About this information”

9.4.133 R Under the section heading "About this information", the prescribed text under this heading in the *home reversion plan illustration* must be included.

Section 2 of a home reversion plan illustration: “Which service are we providing you with?”

9.4.134 R (1) Unless (2) applies, under the section heading "Which service are we providing you with?" the prescribed text in the *home reversion plan illustration* under this heading must be included with a "check box" for each statement, one of which must be marked prominently to indicate the level of service provided to the *customer*;

(2) If the level of service described in the *illustration* is provided by another *firm*, (1) may be replaced by the following: under the section heading "Which service are we providing you with?" the following text should be presented as two options with a "check box" for each option, one of which must be marked prominently to indicate the level of service provided to the *customer*: "[name of the *firm*] recommends, having assessed your needs, that you take out this home reversion plan." "[name of the *firm*] is not recommending a particular home reversion plan for you. However, based on your answers to some questions, it is giving you information about this home reversion plan so that you can make your own choice, or find out about other ways in which you may be able to release equity from your home."

Section 3 of a home reversion plan illustration: “What is a home reversion plan?”

9.4.135 R Under the section heading “What is a home reversion plan?”, the prescribed text in the *home reversion plan illustration* under this heading must be included.

Section 4 of a home reversion plan illustration: “What you have told us”

9.4.136 R (1) Under the section heading "What you have told us", the *illustration* must state the minimum information a *firm* must obtain from the *customer*

(apart from details of the plan that the *customer* is interested in, which is in Section 5 of the *illustration*), and can include brief details of any other information that has been obtained from the *customer* and used to produce the *illustration*.

- (2) For an *instalment reversion plan*, where the *customer* requests an additional *illustration* showing a term of their choice, the term chosen by the *customer* must be stated in this section, together with a statement to the effect that the term is the *customer's* choice.
- (3) If the amount on which the *illustration* is based includes the amount that the *customer* wants to release less charges and other payments that have been deducted from the amount to be released:
 - (a) except where there are some fees or charges that have not been deducted, this section must include the following text after the amount to be released: " less £ [insert total amount of fees and other charges deducted from the amount to be released] for fees that have been deducted from the amount to be released - see Section 9 for details."; or
 - (b) where there are other fees or charges that the *customer* must pay that have not been deducted this section must include the following text after the amount to be released: "less £ [insert total amount of fees and other charges deducted from the amount to be released] for fees that have been deducted from the amount to be released. These and the additional fees that you need to pay are shown in Section 9."
- (4) If the amount on which the *illustration* is based includes the amount that the *customer* wants to release less insurance premiums or insurance-related charges that have been deducted from the amount to be released:
 - (a) except where there are other insurance premiums or insurance-related charges that have not been deducted, this section must include the following text after the amount to be released (which may be combined with the prescribed text in (3) if applicable): "less £ [insert amount of premium or charges, or both, to be deducted from the amount to be released] for insurance [premiums] [and] [charges] that have been deducted from the amount to be released - see Section 10 for details."; or
 - (b) where there are other insurance premiums or insurance-related charges, or both, this section must include the following text after the amount to be released (which may be combined with the prescribed text in (3) if applicable): "less £ [insert amount of premium or charges, or both, to be deducted from the amount to be released] for insurance [premiums] [and] [charges] that have been deducted from the amount to be released. These and any additional insurance [premiums] [and] [charges] that you need to pay are shown in Section 10."

- (5) If the amount on which the *illustration* is based does not involve any charges or payments being deducted from the amount to be released, but there are charges that must be paid by the *customer*, Section 4 of the *illustration* must include the following text after the amount to be released: "No fees have been deducted from this amount but the fees you need to pay are shown in Section 9. For details of any insurance charges, see Section 10."
- (6) If the *home reversion plan* on which the *illustration* is based has no charges that must be paid by the *customer*, and no insurance premiums are being deducted from the amount to be released, Section 4 of the *illustration* must include the following text after the amount to be released: "We do not charge any fees for this home reversion plan."

9.4.137 R At the end of Section 4 of the *illustration* a statement must be included making clear that changes to any of the information obtained from the *customer*, and where appropriate to the valuation of the property, could alter the details elsewhere in the *illustration* and encouraging the *customer* to ask for a revised *illustration* in this event.

9.4.138 G An example is: "An independent valuation will be carried out and this, or changes to any of the information that you have given us, could alter the information in this illustration. If this is the case please ask for a revised illustration."

Section 5 of a home reversion plan illustration: "Description of this home reversion plan"

9.4.139 R Under the section heading "Description of this home reversion plan" the *illustration* must:

- (1) state the name of the *reversion provider* providing the *home reversion plan* to which the *illustration* relates (a trading name used by the *reversion provider* may also be stated), and the name, if any, used to market the *home reversion plan*;
- (2) include a statement describing the *home reversion plan*;
- (3) if the *home reversion plan* is linked to an *investment*, and payments required from the *customer* on the *home reversion plan* will be deducted from the income from the *investment*, include a statement that this is the case;
- (4) if the *customer* is obliged to buy any *tied products* under the *home reversion plan*, include the following information:
 - (a) details of the *tied products* required;

- (b) the following text: "You are obliged to take out [insert details of the *tied product(s)*] through [insert name of *reversion provider* or *reversion intermediary*] as a condition of this home reversion plan", and if the *tied product* is an insurance policy, "Please refer to Section 10 of this illustration for further details [of the insurance policies].";
 - (5) state the term or estimated term of the *home reversion plan*;
 - (6) state very briefly any restrictions that apply to the availability of the *home reversion plan* (for example, it is only available to certain types of *customer* or cannot be transferred to another property).
- 9.4.140 R Further information about the *home reversion plan* may be included as long as it does not significantly:
- (1) duplicate information contained elsewhere in the *illustration*; and
 - (2) extend the length of this section.
- 9.4.141 G An example of further information that may be included might be that an "approval in principle" has been granted subject to valuation.
- Section 6 of a home reversion plan illustration: "Benefits"
- 9.4.142 R Under the section heading "Benefits", the *illustration* must include:
- (1) a description of the monetary amount(s), and in a box aligned to the right of the document, the monetary amount(s), that the *customer* will receive as a lump sum and/or as a regular payment;
 - (2) if the *home reversion plan* is linked to an *investment* and the payments required from the *customer* on the *home reversion plan* will be deducted from the income from the *investment*, the monetary amount of the net income the *customer* will receive;
 - (3) if applicable, statements of any other benefits, incentives and guarantees that apply to the *home reversion plan*;
 - (4) an explanation of how the monetary amount that the *customer* will receive was calculated; and
 - (5) if the *home reversion plan* is an *instalment reversion plan*:
 - (a) whether the monetary amount that the *customer* will receive is guaranteed or variable (for example, because it is linked to the performance of another *investment*);
 - (b) an explanation of what happens to the monetary amount(s) not yet paid by the *reversion provider* if the *customer* (and, in the case of a joint plan, the surviving spouse or civil partner) dies; and

- (c) if the monetary amount that the *customer* will receive is subject to the *customer* selling further parts of a qualifying interest in land to the *reversion provider*, whether these further sales are optional or compulsory.

9.4.143 G Examples that may be appropriate to describe what the *customer* will receive are:

- (1) "Subject to the independent valuation, this home reversion plan will provide you with a lump sum of £[x] [or [state number of instalments] lump sums of £[x]].";
- (2) "The amount you are releasing will automatically be used to purchase a [name of linked *investment* product] from [name of provider]. The amount is £[x]."; and
- (3) "Subject to the independent valuation, this home reversion plan will provide you with a monthly payment from the start of your plan for [state period]. This will be £[x].".

9.4.144 G An example that may be appropriate to explain how the amount the *customer* will receive was calculated is: "How we calculate this sum: Your property is worth about £[x]. Taking the information in Section 4 above into consideration, this plan will pay you [x] % [the amount, as a percentage, that the *reversion provider* will pay for the property] of the full market value of any portion of the property you decide to sell. For a lump sum of about £ [x] [insert the amount that the *customer* wants to release from the property], you will need to sell [x]% [state the proportion of the property, as a percentage, that the *customer* needs to sell to release the amount required] of your home. This will leave you with [x]% [state the proportion of the property, as a percentage, that will still be owned by the *customer*] of your property. At current values, this would be worth £[x] though the value of property may rise or fall in the future."

Section 7 of a home reversion plan illustration: "Risks - important things you must consider"

9.4.145 R The *illustration* must include under the heading "Risks - important things you must consider" brief statements and warnings on all material risks involving a *home reversion plan*, including:

- (1) prominently at the beginning of the section: "A home reversion is a complex property transaction. You should seek legal advice to ensure that you fully understand all of the implications for you and your home and for anyone who might otherwise inherit the property.";
- (2) the effect of the *customer* wanting or needing to move home (whether into another property, sheltered accommodation, long-term care or residential care), covering the circumstances in which the *home reversion plan* is portable;

- (3) the effect on the *home reversion plan* of another party moving into the property (for example on marriage or the formation of a civil partnership or where a family member acts as a carer);
- (4) the *reversion provider's* requirements for repair and maintenance of the property, including the *reversion provider's* right (if any) to enter the property to effect essential repairs, and the circumstances in which this may occur;
- (5) a warning that taking out the *home reversion plan* may affect the *customer's* tax and welfare benefits position, that tax and welfare benefits can change and that the *customer* should consider seeking further information from HM Revenue and Customs, Benefits Agency or another source of advice such as a Citizens' Advice Bureau;
- (6) a warning that under a *home reversion plan* the *customer* will cease to own any part of the property sold to the *reversion provider*, and so will neither benefit from any increase in the value of that part nor be able to leave his home to his beneficiaries on his death;
- (7) a warning (where appropriate) that the right to occupy the property will depend on the *customer* fulfilling the terms of the *home reversion plan*;
- (8) that the *illustration* contains a statement about the duration of the *home reversion plan*, and that the *customer* should ensure that the duration will be adequate given the *customer's* circumstances;
- (9) whether the *customer* can, in the future, secure borrowing from any other source on the property (and if applicable a warning that an increasing debt may mean that it may not be possible to borrow more in the future); and
- (10) if the provider is an *unauthorised reversion provider*, a warning that:
 - (a) the provider is not authorised or regulated by the *FSA*, and that key protections under the *regulatory system* will not apply; and
 - (b) the provider is not subject to the jurisdiction of the *Financial Ombudsman Service*, and that the *customer* will not be entitled to refer complaints against the provider to the *Financial Ombudsman Service*.

9.4.146 G For guidance on prominence see *MCOB 2.2.9G*.

9.4.147 R Under the heading "Risks - important things you must consider" the *illustration* must also include the following if they apply:

- (1) for an *instalment reversion plan*, a statement that if the customer dies in the early years of the plan, income payments will cease and therefore the full expected benefits of the plan will not be obtained;
- (2) (a) for an *instalment reversion plan* where there is a regular cash sum payable; and

(b) where:

- (i) the *home reversion plan* is linked to an *investment*; and
- (ii) the payments required from the *customer* on the *home reversion plan* will be deducted from the income from the *investment*; and
- (iii) the *customer* will receive a fixed net income;

a statement that inflation can erode the value of the cash sum over time; and

- (3) for all *home reversion plans*, a statement or warning with regard to any material issue not covered elsewhere in this section of the *illustration*.

Section 8 of a home reversion plan illustration: “What you will have to pay and when”

9.4.148 R The heading of the right-hand column of Section 8 of the *illustration* must state the frequency with which payments must be made by the *customer*. (For example, if payments are to be made on a monthly basis, the heading for this section must be "What you will have to pay and when" and the column must be headed "Monthly payments").

9.4.149 R All the payments in Section 8 must be calculated based on the frequency used for the purposes of the heading in the right-hand column of the section and must be shown in that column.

9.4.150 R Section 8 of the *illustration* must contain the following information:

- (1) a statement at the beginning of the section regarding rent and charges using the following text: "A home reversion plan is not a loan. Once you have paid the fees shown in section 9, you will only have to pay the charges shown below.";
- (2) the amount and frequency of annual rent, if any, to be paid by the *customer*; and
- (3) a description and the amount of other periodic charges to be paid by the *customer*.

9.4.151 R Where the payment due to the *reversion provider* is to be deducted from the income provided by a linked *investment* product (such as an annuity) such that the *customer* receives the net income, the *firm* must make a clear statement to this effect.

Section 9 of a home reversion plan illustration: “What fees must you pay?”

9.4.152 R Under the section heading "What fees must you pay?" the *illustration* must:

- (1) itemise all the fees that the *customer* must pay, excluding any charges for insurance set out in Section 10 of the *illustration*; and

- (2) include a statement regarding taxes and costs using the following text:
"You may have to pay other taxes or costs in addition to any fees shown here."
- 9.4.153 G An example of a fee that would not be included would be a fee payable by the *customer* to insure their property elsewhere (however this would need to be stated in the separate "Insurance" section).
- 9.4.154 R The fees included in this section must be itemised under the relevant sub-headings as follows:
- (1) the fees that are payable by the *customer* to the *reversion provider* must be itemised under the sub-heading "Fees payable to [name of *reversion provider*]";
- (2) the remaining fees must be itemised under the sub-heading: "Other fees"; and
- (3)
- (a) if there are no fees to be itemised in accordance with (1), the sub-heading must be retained and a statement must be included that no fees apply;
- (b) if there are no fees to be itemised in accordance with (2), the sub-heading must be retained and only the text in *MCOB* 9.4.152R(2) applies.
- 9.4.155 R The following information must be provided for each fee included in this section of the *illustration*:
- (1) a description of the fee;
- (2) the amount payable by the *customer* specified in the column on the right-hand side of the section;
- (3) for fees included under the sub-heading "Other fees", to whom the fee is payable;
- (4) when the fee is payable;
- (5) whether or not the fee is refundable, and if so, the extent to which it is refundable;
- (6) which fees (if any) are estimated and based on representative information; and
- (7) if any fee is payable after the start of the *home reversion plan* and subject to change in the future, the amount of that fee, along with a statement that this is the 'current fee'.
- 9.4.156 R (1) If any fees are to be deducted from the amount to be released, this must be stated alongside each fee.

- (2) If the *customer* has the option of deducting from the amount to be released any of the fees included in this section, the following text must be included: "If you wish you can deduct [this/these/the {type of fee}] fee(s) from the amount to be released under this home reversion plan. This will reduce the amount you get to £ [insert amount of the amount to be released minus the fee(s)]. If you want to do this, you should ask for another illustration that shows the effect of this on the amount you will get."

9.4.157 G "Other fees" will include any fee charged by a *reversion intermediary*, or another third party, for advising on or *arranging a home reversion plan*, but not commission or *procurator fees* (which are dealt with in Section 12 of the *illustration*).

9.4.158 R A *reversion provider* must provide a *tariff of charges* to the *customer*, if the *customer* so requests.

Section 10 of a home reversion plan illustration: "Insurance"

9.4.159 R (1) Under the section heading "Insurance" the *illustration* must include details of:

- (a) insurance which is a *tied product*; and
- (b) insurance which is required as a condition of the *home reversion plan* which is not a *tied product*.

(2) Under this section heading a *firm* may also provide details of insurance which is optional for the *customer* to take out.

(3) It must be clear to the *customer* which products he is required to purchase under which circumstances (for example, where both a *tied product* and a *reversion intermediary* are involved, whether the policy must be purchased from the *reversion provider* or the *reversion intermediary*).

9.4.160 R The following information must be included if the *home reversion plan* requires the *customer* to take out insurance that is a *tied product* either through the *reversion provider* or the *reversion intermediary*:

- (1) details of which insurance is a *tied product*;
- (2) the name of the *firm* imposing the requirement for the insurance;
- (3) for how long the *customer* is obliged to purchase the insurance;
- (4) an accurate quotation or a reasonable estimate of any payments the *customer* needs to make for the insurance;
- (5) where a quotation is provided for insurance on the basis of an estimated sum insured, because the actual required sum insured is unknown, the fact that it is estimated should be stated along with the level of cover that has been assumed;

- (6) details of when the *customer's* payments for such insurance change, for example, if premiums are reviewed annually; and
 - (7) where a quotation is not provided, a statement of when and how a quotation will be provided (for example, separately and as soon as possible).
- 9.4.161 G A *firm* must provide a *customer* with an accurate quotation for any *tied products* (see MCOB 5.4.23R). Where the level of cover the *firm* requires the *customer* to take up is known at the outset, then the quotation should reflect that level of cover.
- 9.4.162 R If the *home reversion plan* does not require the *customer* to take out insurance as a *tied product*, a statement must be provided under this section that the *customer* is not obliged to take out insurance through the *reversion provider* or the *reversion intermediary*.
- 9.4.163 R The following information must be included if the insurance required, as a condition of the *home reversion plan*, is not a *tied product*:
- (1) a brief statement of the type of insurance the *firm* requires; a quotation for such insurance may be included in the *illustration*, estimated where necessary; and
 - (2) if a charge is made if the *customer* does not arrange insurance through the *reversion provider* or the *reversion intermediary*, this must be stated, together with the amount of the charge and the frequency with which this charge is payable.
- 9.4.164 R A *firm* may include in the *illustration*, quotations (estimated where necessary) for any insurance products (other than the insurance products covered elsewhere in the *illustration*) that the *firm* issuing the *illustration* wishes to sell to the *customer*.
- 9.4.165 R
- (1) If any quotations for insurance are included in the *illustration* it:
 - (a) must include a brief description of the type of insurance;
 - (b) must include the total price to be paid by the *customer* in a column on the right hand side of the *illustration* under the heading "[insert frequency of payments quoted] payments"; and
 - (c) may refer the *customer* to the relevant insurance product disclosure documentation.
 - (2) If the *customer* has asked to deduct any insurance premiums or insurance-related charges from the amount released, the *illustration* must state that this is the case.
- 9.4.166 G The terms on which an insurance premium has been calculated should be presented to the *customer* in the format determined by the relevant regulatory requirements.

Section 11 of a home reversion plan illustration: “What happens if you do not want this home reversion plan any more?”

- 9.4.167 R Under the heading "What happens if you do not want this home reversion plan any more?", the *illustration* must set out whether the *customer* can cancel the *home reversion plan* and if so, explain any relevant conditions attached and costs.

Section 12 of a home reversion plan illustration: “Using a home reversion intermediary”

- 9.4.168 R Where the *illustration* is issued to a *customer* by, or on behalf of, a *reversion intermediary* Section 12 "Using a home reversion intermediary" must be included in the *illustration* and must include the following:

- (1) a clear statement of the amount payable (either directly or indirectly) by the *reversion provider* to the *reversion intermediary*, or to any third parties; and
- (2) the name of the *reversion provider* who will make the payment, the name of the *reversion intermediary* and the names of any third parties who will be paid.

- 9.4.169 R If the amount payable by the *reversion provider* to the *reversion intermediary* and to third parties is £250 or less, the *reversion intermediary* need only state that the amount of the payment is "no more than £250", unless the *customer* requests the actual amount.

- 9.4.170 R If the *reversion intermediary* will pass to the *customer* all or part of the amount payable to the *reversion intermediary* by the *reversion provider*, that fact may be stated in this section, along with the amount payable to the *customer*.

- 9.4.171 R If the *reversion provider* will make no payment to the *reversion intermediary* or any third party, this section may state that the *reversion intermediary* will receive no payment.

- 9.4.172 R The amount disclosed as payable to the *reversion intermediary* or third parties must include, but is not limited to:

- (1) any *procurator fee*; and
- (2) a cash value for any material non-cash inducements that the *reversion provider* provides, whether payable directly or indirectly.

- 9.4.173 G Any material inducements provided by a *reversion provider*, whether directly or indirectly, to a *reversion intermediary* or third party (unless the payment only reflects the cost of outsourcing work relating to the processing of home reversion applications by a *firm* unconnected to the *reversion intermediary*) must be quantified in cash terms (see *MCOB 2.3.7R*). This enables the cash values to be included in the *illustration*.

- 9.4.174 G An example of a statement which would comply with *MCOB 9.4.168R* would

be: "[name of *reversion provider*] will pay [name of *reversion intermediary*] £[x] in cash and benefits, if you proceed with this home reversion plan."

Contact details

- 9.4.175 R This section must:
- (1) follow Section 11 "What happens if you do not want this home reversion plan any more?", unless the *illustration* is issued by a *reversion intermediary*, in which case it must follow Section 12 "Using a home reversion intermediary"; and
 - (2) include the name, address and contact point of the *firm* providing the *illustration*.
- 9.4.176 G An example would be: "If you wish to discuss this home reversion plan illustration, please contact [name of individual] at [address] or call [him/her] on [telephone number]."

The following text is amended as indicated.

9.5 Disclosure at the offer stage for ~~lifetime mortgages~~ equity release transactions

- 9.5.1 R (1) *MCOB* 6.1 to *MCOB* 6.6 (with the modifications stated in *MCOB* 9.5.2R to *MCOB* 9.5.4R) apply to an *mortgage lender equity release provider* where the ~~*regulated mortgage contract home finance transaction*~~ is an *regulated lifetime mortgage contract equity release transaction*, except that those provisions that by their nature are only relevant to regulated mortgage contracts do not apply to home reversion plans (see *MCOB* 9.1.2AG).
- (2) The table in *MCOB* 9.5.2R shows how the relevant *rules* and *guidance* in *MCOB* 6 must be modified by replacing the cross-references with the relevant cross-references to *rules* and *guidance* in *MCOB* 9.4, and *MCOB* 9.5.
- (3) The table in *MCOB* 9.5.3R replaces certain *rules* and *guidance* in *MCOB* 6 with *rules* and *guidance* from this section.
- (4) The terms and expressions in the *rules* and *guidance* in *MCOB* 6 that by their nature are only connected to *regulated mortgage contracts* must be replaced with the appropriate equivalent terms and expressions for *home reversion plans* (see *MCOB* 9.3.1AG).

...

- 9.5.4 R The *illustration* provided as part of the *offer document* must meet the requirements of *MCOB* 9.4, with the following modifications:
- (1) the *illustration* must be suitably adapted and revised to reflect the fact

that the *firm* is making an offer to a *customer* and updated to reflect changes to, for example, for a lifetime mortgage the interest rate, charges, the exchange rate or the APR at the date the *illustration* is issued;

...

- (5) ~~MCOB 9.4.18R~~ (Section 1: 'About this information') is replaced by the following: "Section 1: 'About this offer document'. Under the section heading 'About this offer document', the following text must be included:
- (a) "You are not bound by the terms of this offer document until [insert relevant circumstances, including the names of any documents that must be signed. For example "you have signed the legal charge and the funds are released for your lifetime mortgage" or "you have signed the agreement to sell your property to the reversion provider".]. We are required by the Financial Services Authority (FSA) - the independent watchdog that regulates financial services - to provide you with this offer document.";
 - (b) (unless ~~MCOB 6.6.1R~~ applies the offer document is being provided in place of an illustration) "You should compare this offer document with the key facts illustration given to you before you applied for this [lifetime mortgage] [home reversion plan], to see how the details may have changed.";
- (6) Unless (b) applies, ~~MCOB 9.4.19R~~ (Section 2: 'Which service are we providing you with') is replaced with the following: "Section 2: 'Which service did we provide you with?' either:
- (a) ~~under the section heading 'Which service did we provide you with?'~~ The heading for Section 2 is replaced with 'Which service did we provide you with?' and the following text should be presented as two options each with a 'check box', one of which must be marked prominently to indicate the level of service provided to the *customer*: "We have recommended, having assessed your needs, that you take out this [lifetime mortgage] [home reversion plan]." "We have not recommended a particular [lifetime mortgage] [home reversion plan] for you. You must make your own choice whether to accept this [lifetime-mortgage] [home reversion] offer."; or
 - (b) if the service described in ~~MCOB 9.4.19R~~ (Section 2: '~~Which service are we providing you with?~~') of the earlier illustration was provided by another firm, MCOB 9.4.19R the heading for Section 2 is replaced by ~~the following:~~ "Section 2: 'Which service were you provided with?' Under the section heading '~~Which service were you provided with?~~' and the following text should be presented as two options each with a 'check box' one of which must be marked prominently to indicate the level of

service provided to the *customer*: "[name of firm] recommended that you take out this [lifetime mortgage] [home reversion plan]." "[name of firm] did not recommend a particular [lifetime mortgage] [home reversion plan], for you. You must make your own choice whether to accept this [mortgage] [home reversion] offer.";

(7) the fees recorded in the *illustration* that is part of the *offer document* ~~in accordance with MCOB 9.4.65R(1)~~ must include any fees paid or payable by the *customer*;

(8) ~~MCOB 9.4.68R(5) is replaced by the following:~~ "(where the fee is payable or has been paid to the *mortgage lender*), whether or not the fee is refundable, and if so, the extent to which it is refundable" any requirements to disclose whether a fee is refundable must be read as including fees that have already been paid;

...

(10) for a lifetime mortgage:

(a) ...

~~(11)~~ (b) ...

~~(12)~~ (c) ...

9.5.5 R For home reversion plans, the firm must provide the customer with copies of the valuation report for the property and the terms of the home reversion plan including the terms on which he will occupy the property, together with the offer document.

9.6 Disclosure at the start of the contract and after sale for ~~lifetime mortgages~~ equity release transactions

9.6.1 R (1) (a) ~~MCOB 7.1 to MCOB 7.3, MCOB 7.5 and MCOB 7.6 (with the modifications stated in MCOB 9.6.2R to MCOB 9.6.4R as modified by this section)~~ apply to a *firm* where the ~~regulated mortgage contract~~ home finance transaction is a regulated lifetime mortgage. contract.

(b) MCOB 7.1 to MCOB 7.3 (as modified by this section) apply to a firm where the home finance transaction is a home reversion plan, except that those provisions that by their nature are only relevant to regulated mortgage contracts do not apply to home reversion plans (see MCOB 9.1.2AG).

(3) ...

...

(5) The terms and expressions in MCOB 7 that by their nature are only connected to regulated mortgage contracts must be replaced with the

appropriate equivalent terms and expressions for *home reversion plans* (see MCOB 9.3.1AG).

...

Table of rules in *MCOB 7* which do not apply in relation to ~~*regulated lifetime mortgage contracts*~~:

...

9.7 Disclosure at the start of the contract: lifetime mortgages

...

9.8 Disclosure after sale: lifetime mortgages

...

After *MCOB 9.8* insert the following provisions. This text is new and it is not underlined.

9.9 Disclosure after sale: instalment reversion plans

Provision of statements

- 9.9.1 R (1) In relation to an *instalment reversion plan*, a *firm* must provide the *customer* with a statement at least once a year (or, in relation to the first statement, within the first 13 months of the plan term):
- (a) covering the *instalment reversion plan* and any *tied product* purchased through the *firm*; and
 - (b) giving information of any other product purchased through the *firm* where the payments for those products are combined with amounts released under the *instalment reversion plan*.
- (2) A *firm* need not provide a statement if it has provided an *offer document* to the *customer* in respect of the *instalment reversion plan* within the previous year.
- 9.9.2 R Where a *tied product* is operated separately from the *instalment reversion plan*, for example where the premiums on a tied insurance product are not combined with amounts released under the *instalment reversion plan*, the statement relating to the *tied product* may be provided in a separate communication.
- Annual statement: content
- 9.9.3 R The statement must contain:
- (1) details of the following transactions during the period since the last statement (or, where it is the first statement, since the *customer*

entered into the *instalment reversion plan*):

- (a) the date and amount of each payment made by the *reversion provider*; and
 - (b) any amounts charged under the *instalment reversion plan* during the statement period, including fees and any amounts due in relation to *tied products*;
- (2) information at the date the statement is issued on:
- (a) the amount owed by the *reversion provider* to the *customer* under the *instalment reversion plan*;
 - (b) if the amount to be received by the *customer* under the *instalment reversion plan* is linked to the performance of another investment, the amount to be received (or estimated amount likely to be received) by the *customer*;
 - (c) the actual remaining term of the *instalment reversion plan* (but if the term of the *instalment reversion plan* is open-ended this should be clearly stated);
 - (d) where applicable, the date on which the requirement for the *customer* to purchase any *tied products* from the *firm* ends; and
 - (e) the proportion of the property that is owned by the *reversion provider* and *reversion occupier* respectively.

Annual statement: additional content if tariff of charges has changed

- 9.9.4 R If the *tariff of charges* has changed since the last annual statement was sent to the *customer* (or, where it is the first statement, since the *customer* entered into the *instalment reversion plan*) and a *firm* has not already sent a revised *tariff of charges*, it must include one with the annual statement.

Event-driven information: material changes

- 9.9.5 R A *firm* must give the customer reasonable notice of any material change by the *firm* to the terms of the *instalment reversion plan*, where the change is permitted without the *customer's* prior consent.

Responsibilities of reversion providers and administrators

- 9.9.6 R The *reversion administrator* and *reversion provider* may agree who will be responsible for producing and providing to the *customer* the statement and information required by this section.
- 9.9.7 R The *reversion administrator* is solely responsible for producing and providing to the *customer* the information required by this section if the provider is an *unauthorised reversion provider*.

Further releases

- 9.9.8 R If the *customer* wants to release further equity from the property through a *home reversion plan*, the *firm* must treat this transaction as a new *home reversion plan*, even if the parties to the arrangement are the same.

After *MCOB* Annex 1R insert the following provisions. This text is new and it is not underlined.

MCOB 9 Annex 2R

The illustration: table of contents, prescribed text and prescribed section headings and sub-headings.

1. This annex forms part of *MCOB* 9.4.2R.
2. Text in square brackets indicates instructions that must not be included in the *illustrations* provided to *customers*.

	<p style="font-size: 1.2em;">about this home reversion plan</p>
<p>Personalised information on a home reversion plan for [insert <i>customer's</i> name (see <i>MCOB</i> 9.4.17R(1))]</p> <p>Date produced: [insert date (see <i>MCOB</i> 9.4.17R(2))]</p> <p>[Insert details of how long the <i>illustration</i> is valid for, and, if appropriate, when the plan needs to commence by (see <i>MCOB</i> 9.4.17R(3))]</p>	 Alpha Beta Properties

This is not a legally binding offer of a home reversion plan and it does not oblige [insert name of the *reversion provider*] to provide you with the home reversion plan described in this illustration.

1. About this information
<p>We are required by the Financial Services Authority (FSA) - the independent watchdog that regulates financial services - to provide you with this illustration.</p> <p>All firms selling home reversion plans are required to give you illustrations like this one, containing similar information presented in the same way.</p> <p>Ask for other illustrations if you want to compare this home reversion plan with other products designed to release equity from your home.</p> <p>The FSA provides useful information on ways of releasing equity from your home in a</p>

booklet called 'Raising money from your home'. You can get this free through the FSA website www.fsa.gov.uk/consumer or by calling 0845 456 1555.

2. Which service are we providing you with?

We recommend, having assessed your needs, that you take out this home reversion plan.

We are not recommending a particular home reversion plan for you. However, based on your answers to some questions, we are giving you information about this home reversion plan so that you can make your own choice or find out about other ways in which you may be able to release equity from your home.

3. What is a home reversion plan?

How home reversions work

- A home reversion is an arrangement designed to run for the rest of your life or until the occurrence of certain events. You sell all or part of your home to give you a lump sum and/or an income. **You no longer own your home** (or the part of it that you have sold) but you have the right to live there, for the rest of your life or until the occurrence of certain events, [insert capacity in which the *customer* will occupy the premises, e.g. “as the tenant of the firm or person who bought it”]. We call this person or firm “the reversion provider”. At the end of the plan (this is explained below), the property is put up for sale by the provider. If you sold only part of your home, the value of the part you did not sell is paid to you or your estate.
- The amount you receive for your property, or the portion of it that you sell, will normally be less than its market value. This will reflect factors such as your age, the value of your property and how much property prices are expected to change in the future.
- You may be required to pay rent. This is usually a token sum but it may be more.

Income Plans

- Some home reversions give you an income instead of, or as well as, a lump sum. If an income option is available, your adviser will tell you how it would work and how much you would receive and for how long.

When does a home reversion plan end?

- This depends on the terms of the plan but will usually include death or where you (or, in the case of a joint plan, the surviving spouse) move out permanently, for example into

long-term residential care. The property will be put up for sale by the provider and the value of any part you do not sell to the provider will be paid to you or your estate. See also "Cancelling a home reversion", below.

Moving home

- Not all home reversion plans can be transferred to a new property, if you should want to move home in the future. Section 5 will tell you if this plan can be transferred. You may incur costs with such a transfer, such as fees for a solicitor or surveyor. If you think you may want to move home in the future, check to see if the plan can be transferred before taking out the plan.

Cancelling a home reversion plan

- A home reversion plan is designed to run for the rest of your life or until the occurrence of certain events. However, if you decide that you no longer want the plan, it may be possible to buy back the property but this is likely to be at the full market rate at the time and may cost you more than you received for it under the reversion plan. Section 11 will tell you if you can buy back your property.

4. What you have told us

See MCOB 9.4.136R – MCOB 9.4.138G

5. Description of this home reversion plan

See MCOB 9.4.139R – MCOB 9.4.141G

6. Benefits

See MCOB 9.4.142R – MCOB 9.4.144G

£X

7. Risks -important things that you must consider

See MCOB 9.4.145R – MCOB 9.4.147R

8. What you will have to pay and when	[insert frequency of payments – see <i>MCOB 9.4.148R</i>]
See <i>MCOB 9.4.148R – MCOB 9.4.151R</i>	£X

9. What fees must you pay?	Fee amount
See <i>MCOB 9.4.152R – MCOB 9.4.158R</i>	[insert amount of each fee]

10. Insurance	[insert frequency of payments for premium quoted payments]
See <i>MCOB 9.4.159R– MCOB 9.4.166G</i>	£X

11. What happens if you do not want this home reversion plan any more?
See <i>MCOB 9.4.167R</i>

12. Using a home reversion intermediary
<u>This section is required only when the <i>illustration</i> is provided to a <i>customer</i> by a <i>reversion intermediary</i>. If the <i>illustration</i> is provided by a <i>reversion provider</i>, this section must be removed.</u>
See <i>MCOB 9.4.168R – MCOB 9.4.174G</i>

Annual percentage rate

10.1 Application

10.1.1 R This chapter applies to a *firm* which, under *rules* elsewhere in *MCOB*, is required to calculate an *annual percentage rate of charge (APR)* or is required to use an approach equivalent to that set out in this chapter in calculating a comparative cost measure equivalent to an APR.

...

Responsible lending, and responsible financing of home purchase plans

11.1 Application

Who?

11.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB* 11.1.2 in accordance with column (2) of that table.

11.1.2 R Table

This table belongs to *MCOB* 11.1.1R

(1) Category of firm	(2) Applicable section
...	...
<u>home purchase provider</u>	<u>MCOB 11.1, MCOB 11.2, MCOB 11.3.1R(1) and MCOB 11.3.2R</u>

What?

11.1.3 R This chapter applies if a *firm*:

(1) *enters into a regulated mortgage contract or home purchase plan* with a *customer*; or

(2) makes a further advance or varies an existing *regulated mortgage contract or home purchase plan* to make a further advance to a *customer*.

11.2 Purpose

11.2.1 G ~~Principle 6 requires a firm to pay due regard to the interests of its customers and treat them fairly.~~ This chapter reinforces *Principle 6* by requiring a firm in the circumstances described in *MCOB 11.1.3R* to take account of a customer's ability to repay before deciding to enter into a ~~regulated mortgage contract~~, or make a further advance on, a *regulated mortgage contract* or *home purchase plan*. ...

11.3 Responsible lending, and responsible financing of home purchase plans

Customer's ability to pay

11.3.1 R (1) A firm must be able to show that before deciding to enter into a ~~regulated mortgage contract with a customer~~, or making a further advance on, a *regulated mortgage contract* or *home purchase plan*, account was taken of the customer's ability to repay.

(2) A ~~firm~~ *mortgage lender* must make an adequate record to demonstrate that it has taken account of the customer's ability to repay ...

Self-certification of income

11.3.2 R In taking account of a customer's ability to repay a loan for the purposes of ~~MCOB 11.3.1R(1)~~, a firm may rely upon self-certification of income ...

...

Responsible lending policy

11.3.4 R (1) A ~~firm~~ *mortgage lender* must put in place, and operate in accordance with, a written policy setting out the factors it will take into account in assessing a customer's ability to repay.

(2) A ~~firm~~ *mortgage lender* must make and keep up-to-date an adequate record of the policy in (1). When the policy is changed, a record of the previous policy must be retained for a year from the date of change.

...

Charges

12.1 Application

12.1.1 R Who?

This chapter applies to a firm in a category listed in column (1) of the table in *MCOB 12.1.2R* in accordance with column (2) of that table.

12.1.2 R This table belongs to *MCOB 12.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i>	whole chapter except <i>MCOB 12.1.6R</i> and <i>MCOB 12.7</i>
<i>mortgage adviser</i> <i>mortgage arranger</i>	<i>MCOB 12.1</i> (except <i>MCOB 12.1.6R</i>), <i>MCOB 12.2</i> and <i>MCOB 12.5.2R</i>
<i>mortgage administrator</i> a firm that was a <i>mortgage lender</i> or <i>mortgage administrator</i> before the sale of the <i>repossessed</i> property	<i>MCOB 12.1</i> (except <i>MCOB 12.1.6R</i>), <i>MCOB 12.2</i> , <i>MCOB 12.4</i> and <i>MCOB 12.5.2R</i>
<i>home purchase provider</i> <i>home purchase adviser</i> <i>home purchase arranger</i> <i>home purchase administrator</i> a firm that was a <i>home purchase provider</i> or <i>home purchase administrator</i> before the sale of a <i>repossessed</i> property	<i>MCOB 12.1.1R</i> to <i>MCOB 12.1.3R</i> and <i>MCOB 12.7</i>
<i>reversion provider</i>	<i>MCOB 12.1</i> , <i>MCOB 12.2</i> and <i>MCOB 12.5.1R</i> to <i>MCOB 12.5.3G</i>
<i>reversion adviser</i> <i>reversion arranger</i> <i>reversion administrator</i> a firm that was a <i>reversion provider</i> or <i>reversion administrator</i> before the termination of a <i>home reversion plan</i>	<i>MCOB 12.1</i> , <i>MCOB 12.2</i> , <i>MCOB 12.5.2R</i> and <i>MCOB 12.5.3G</i>

What?

12.1.3 R This chapter applies where a *firm*:

- (1) *enters into*, or makes a further advance on, a ~~*regulated mortgage contraethome finance transaction*~~; or
- (2) *administers a regulated mortgage contraethome finance transaction*; or
- (3) *arranges or advises on a regulated mortgage contraethome finance*

transaction or a variation to the terms of a *regulated mortgage contract* or *home finance transaction*.

12.1.4 R The arrears charges and excessive charges requirements in ~~MCOB 12.4 (Arrears charges)~~ and ~~MCOB 12.5 (Excessive charges)~~ this chapter will continue to apply to a *firm* after a *regulated mortgage contract* has come to an end following the sale of a *repossessed* property. The excessive charges requirements will continue to apply to a *firm* after a *home reversion plan* has ended. ...

12.1.5 G The *FSA* will expect a *firm* to ensure that charges made to a *customer* arising from the sale of a *repossessed* property and charges arising in relation to a *mortgage sale shortfall debt* are not excessive and are subject to the same considerations as apply with respect to *arrears* charges under this chapter.

12.1.6 R This chapter does not apply to a *firm* carrying on *reversion activities* in respect of a *customer* acting in his capacity as an *unauthorised reversion provider*.

12.2 Purpose

12.2.1 G (1) ... A *firm* is also under an obligation, as a consequence of ~~MCOB 5 (Pre application disclosure)~~, ~~MCOB 6 (Disclosure at the offer stage)~~, ~~MCOB 7 (Disclosure at start of contract and after sale)~~ and ~~MCOB 9 (Lifetime mortgages: product disclosure)~~ this sourcebook's disclosure requirements, to make charges transparent to *customers*.
...

(2) The level of charges under a *regulated mortgage contract* or *home reversion plan* is not typically a matter for regulation. However, ... This chapter considers four specific circumstances, where:

...

(c) the charges (including rates of interest) imposed on a *customer* under a *regulated mortgage contract* or *home reversion plan* are excessive and contrary to the *customer's* interests; and

(d) the charges made to a *customer* in connection with a *firm* ~~entering into or making a further advance on a regulated mortgage contract~~ or ~~administering a regulated mortgage contract~~, or ~~arranging or advising on a regulated mortgage contract~~ or a variation to the terms of a *regulated mortgage contract*, making a further advance on, administering, arranging or advising on a regulated mortgage contract or home reversion plan, or arranging or advising on a variation to the terms of a regulated mortgage contract or home reversion plan are excessive.

...

12.3 Early repayment charges: regulated mortgage contracts

...

12.4 Arrears charges: regulated mortgage contracts

...

12.5 Excessive charges: regulated mortgage contracts and home reversion plans

12.5.1 R A *firm* must ensure that any *regulated mortgage contract* or *home reversion plan* that it *enters into* does not impose, and cannot be used to impose, excessive charges upon a *customer*.

12.5.2 R A *firm* must ensure that its charges to a *customer* in connection with the *firm entering into* ~~or making a further advance on a regulated mortgage contract or administering a regulated mortgage contract or arranging or advising on a regulated mortgage contract~~ or a variation to the terms of a *regulated mortgage contract*, making a further advance or further release on, *administering, arranging or advising on a regulated mortgage contract or home reversion plan, or arranging or advising on a variation to the terms of a regulated mortgage contract or home reversion plan* are not excessive.

...

12.5.4 G ~~*Firms*~~ *Mortgage lenders* are also subject to requirements relating to responsible lending (see *MCOB 11*).

...

After MCOB 12.6 insert the following new section. The inserted text is not underlined.

12.7 Home purchase plans

Charges

12.7.1 G The *FSA* believes that *Principle 7* requires charges imposed by a *firm* on *customers* to be transparent and that imposing unfair or excessive charges is inconsistent with *Principle 6*.

Note: A *firm* should also have regard to its obligations under the *Unfair Terms Regulations* and may find material on the *FSA* website concerning the *FSA's* consumer protection powers useful.

...

Arrears and repossessions: regulated mortgage contracts and home purchase plans

13.1 Application

Who?

13.1.1 R This chapter applies to a *firm* in a category listed in column (1) of the table in *MCOB 13.1.2R* in accordance with column (2) of that table.

13.1.2 R Table: This table belongs to *MCOB 13.1.1R*

(1) Category of firm	(2) Applicable section
<i>mortgage lender</i> , and a <i>firm</i> that was a <i>mortgage lender</i> before the sale of a <i>repossessed</i> property	<i>MCOB 13.1 – MCOB 13.3</i> , except for <i>MCOB 13.3.9R</i> and <i>MCOB 13.3.114G</i>
<i>mortgage administrator</i> , and a <i>firm</i> that was a <i>mortgage administrator</i> before the sale of a <i>repossessed</i> property	whole chapter <u>except for</u> <i>MCOB 13.8</i>
<u><i>home purchase provider</i>, and a <i>firm</i> that was a <i>home purchase provider</i> before the sale of a <i>repossessed</i> property</u>	As for a <i>mortgage lender</i>
<u><i>home purchase administrator</i>, and a <i>firm</i> that was a <i>home purchase administrator</i> before the sale of a <i>repossessed</i> property</u>	As for a <i>mortgage lender</i> , plus: <i>MCOB 13.6</i> and <i>MCOB 13.8</i> ; and <i>MCOB 13.4</i> and <i>MCOB 13.5</i> in accordance with <i>MCOB 13.8</i>

What?

13.1.3 R This chapter applies with respect to *administering a regulated mortgage contract*, *administering a home purchase plan* and administering a *mortgagesale shortfall-debt*.

13.1.4 R The requirements in ~~*MCOB 13*~~ this chapter will continue to apply to a *firm* after a *regulated mortgage contract* or *home purchase plan* has come to an end following the sale of a *repossessed* property. References in this chapter to "*customer*" will include references to a former *customer* as appropriate.

13.1.5 G The *FSA* expects a *firm* to treat a ~~*mortgagesale shortfall-debt*~~ in the same way that it treats a payment shortfall.

...

13.1.7 G If a *firm* has entered into more than one *regulated mortgage contract* or *home purchase plan* with the same *customer* ~~secured on~~ relating to the same property, the *firm* may treat them all of the ~~*regulated mortgage contracts*~~ as

one for the purposes of ~~MCOB 13~~this chapter.

13.2 Purpose

13.2.1 G ~~Principle 6 requires a firm to pay due regard to the interests of customers and treat them fairly.~~ This chapter amplifies ~~this principle~~Principle 6 in respect of the information and service provided to *customers* who have payment difficulties or face a ~~mortgage sale shortfall debt~~.

13.2.2 G There may be occasions where a *customer* enters into a *regulated mortgage contract* or home purchase plan with no intention of meeting his payment obligations. Where the intention is to defraud, this chapter does not prevent early action to recover ~~the debt~~sums due.

13.3 Dealing fairly with customers in arrears: policy and procedures

13.3.1 R (1) A *firm* must deal fairly with any *customer* who:

(a) is in *arrears* on a *regulated mortgage contract* or home purchase plan; ~~or~~

(b) has a ~~mortgage sale shortfall debt~~; or

(c) is otherwise in breach of a home purchase plan.

(2) ...

Policy and procedures: content

13.3.2 E (1) A *firm* should ensure that its written policy and procedures include:

(a) using reasonable efforts to reach an agreement with a *customer* over the method of repaying any payment shortfall or ~~mortgage sale shortfall debt~~, in the case of the former having regard to the desirability of agreeing with the *customer* an alternative to taking possession of the property;

(b) liaising, if the *customer* makes arrangements for this, with a third party source of advice regarding the payment shortfall or ~~mortgage sale shortfall debt~~;

(c) adopting a reasonable approach to the time over which the payment shortfall or ~~mortgage sale shortfall debt~~ should be repaid, having particular regard to the need to establish, where feasible, a payment plan which is practical in terms of the circumstances of the *customer*;

...

- (2) Contravention of ~~MCOB 13.3.2E(1)~~ may be relied on as tending to show contravention of *MCOB 13.3.1R(2)*.

...

- 13.3.4 G In relation to using reasonable efforts to reach an agreement with a customer over the method of repaying any payment shortfall or sale shortfall~~MCOB 13.3.2E(1)(a)~~, *customers*:
- (1) should be given a reasonable period of time to consider any proposals for payment that are put to them; in addition, and depending on the individual circumstances, a *firm* may wish to do one or more of the following in relation to the regulated mortgage contract or home purchase plan with the agreement of the *customer*:
- (a) extend ~~the~~its term of the ~~regulated mortgage contract~~; or
- (b) change ~~the~~its type of the ~~regulated mortgage contract~~; or
- (c) defer payment of interest due on the *regulated mortgage contract* or ~~mortgage shortfall debt~~ of sums due under the home purchase plan (including, in either case, on any sale shortfall); or
- (d) treat the payment shortfall as if it was part of the original amount provided~~borrowed~~;
- (2) should be given adequate information to understand the implications of any proposed arrangement; one approach may be to provide information on the new terms in line with the ~~requirements for annual statements (see MCOB 7.5.3R)~~annual statement provisions.
- 13.3.5 G ~~MCOB 13.3.2E(1)(a) means that a firm~~In relation to using reasonable efforts to reach an agreement with a customer over the method of repaying any payment shortfall or sale shortfall, a mortgage lender should not automatically capitalise *arrears*.
- 13.3.6 G In relation to ~~MCOB 13.3.2E(1)(e)~~adopting a reasonable approach to the time over which the payment shortfall or sale shortfall should be repaid, the *FSA* takes the view that the determination of a reasonable repayment period will depend upon the individual circumstances. In appropriate cases this will mean that repayments are arranged over the remaining term ~~of the regulated mortgage contract~~.
- 13.3.7 G In relation to ~~MCOB 13.3.2E(1)(d)~~granting a customer's request for a change to the payment date, a term ~~in a regulated mortgage contract~~ that purported to allow a *firm* to change the payment date unilaterally might in any event contravene the *Unfair Terms Regulations*.

13.3.8 G *Firms* that propose to outsource aspects of *customer* relationships (including ~~debt collection of debts or any other sums due~~) should note that, ~~as set out in SYSC 3.2.4G(1), a firm cannot contract out its regulatory obligations and the FSA will continue to hold them responsible for the way in which this work is carried on.~~

Record keeping: arrears and repossessions

13.3.9 R (1) A ~~firm~~ *mortgage lender or administrator* must make and retain an adequate record of its dealings with a *customer* whose account is in *arrears* or who has a ~~mortgage sale shortfall debt~~, which will enable the *firm* to show its compliance with ~~MCOB 13.4 (Arrears: provision of information to the customer), MCOB 13.5 (Dealing with a customer in arrears or with a mortgage shortfall) and MCOB 13.6 (Repossessions)~~ this chapter.

(2) A ~~firm~~ *mortgage lender or administrator* must retain the record required by (1) for a year from the date on which the relevant payment shortfall or ~~mortgage sale shortfall debt~~ was cleared.

...

13.4 Arrears: provision of information to the customer of a regulated mortgage contract

...

13.5 Dealing with a customer in arrears or with a ~~mortgage sale shortfall debt~~ on a regulated mortgage contract

Statements of charges

13.5.1 R Where an account is in *arrears*, and the payment shortfall or ~~mortgage sale shortfall debt~~ is attracting charges, a *firm* must ...

13.5.2 G ...

(3) ... the *firm* will still need to send the *customer* a written statement ~~in accordance with MCOB 13.5.1R~~ if the payment shortfall or ~~mortgage sale shortfall debt~~ is attracting charges.

(4) ...

...

13.6 Repossessions

13.6.1 R A *firm* must ensure that, whenever a property is *repossessed* (whether voluntarily or through legal action) and it administers the *regulated mortgage contract* or home purchase plan in respect of that property, steps are taken to:

- (1) ...
- (2) obtain the best price that might reasonably be paid, taking account of factors such as market conditions as well as the continuing increase in the amount owed by the *customer* ~~under the regulated mortgage contract~~.

...

If the proceeds of sale are less than the ~~debt~~amount due

13.6.3 R A *firm* must ensure that, as soon as possible after the sale of a *repossessed* property, if the proceeds of sale are less than the amount ~~of the customer's debt~~due under the regulated mortgage contract or home purchase plan, the *customer* is informed in a *durable medium* of:

- (1) the mortgagesale shortfall-debt; and
- (2) where relevant, the fact that the mortgagesale shortfall-debt may be pursued by another company (for example, a mortgage indemnity insurer).

13.6.4 R (1) If the decision is made to recover the mortgagesale shortfall-debt, the *firm* must ensure that the *customer* is notified of this intention.

(2) The notification referred to in (1) must take place within five years of the date of the sale (if the regulated mortgage contract or home purchase plan is subject to Scottish law) or within six years (in all other cases).

13.6.5 G ~~MCOB 13.6.4R does not require a firm~~A firm is not required to recover a mortgagesale shortfall-debt. A *firm* may not wish to recover the mortgagesale shortfall-debt in some situations, for example where the sums involved make action for recovery unviable.

If the proceeds of sale are more than the ~~debt~~amount due

13.6.6 R A *firm* must ensure that, on the sale of a *repossessed* property, if the proceeds of sale are more than the amount ~~of the customer's debt~~due under the regulated mortgage contract or home purchase plan, reasonable steps are taken, as soon as possible after the sale, to inform the *customer* in a *durable medium* of the surplus and, subject to the rights of any subsequent mortgage or charge holders, to pay it to him.

...

After MCOB 13.7 insert the following new section. The inserted text is not underlined.

13.8 Home purchase plans

Dealing fairly with customers in arrears: policy and procedures

Note: The rules on establishing and applying a policy and procedures for dealing fairly with *customers in arrears* apply (see *MCOB 13.3*).

Arrears: provision of information to the customer

13.8.1 R If a *customer* falls into *arrears*, a *firm* must provide the *customer* with adequate information about the *arrears* in a *durable medium*:

- (1) as soon as practicable after becoming aware of that fact;
- (2) at quarterly intervals; and
- (3) before commencing action for *repossession*.

13.8.2 G A *firm* may want to refer to the provisions on the information to be provided to a mortgage customer in relation to *arrears* for guidance (see *MCOB 13.4* and *MCOB 13.5*).

Repossessions

Note: The rules regarding repossessions apply (see *MCOB 13.6*).

MCOB Transitional Provisions

MCOB TP 2

Transitional Provisions for home purchase plans and home reversion plans

<u>(1)</u>	<u>(2) Material to which the transitional provision applies</u>	<u>(3)</u>	<u>(4) Transitional provision</u>	<u>(5) Transitional provision: dates in force</u>	<u>(6) Handbook provision: coming into force</u>
<u>1</u>	<u>Every rule in MCOB unless the context otherwise requires and subject to any more specific transitional provision relating to the matter.</u>	<u>R</u>	<u>(1) If, in relation to home purchase activities, reversion activities, or the communication of a financial promotion of a home purchase plan or home reversion plan, the application of any provision in MCOB is dependent on the occurrence of a series of events, the provision applies with respect to the events that occur on or after 6 April 2007.</u>	<u>From 6 April 2007 for six months.</u>	<u>6 April 2007</u>
<u>2</u>		<u>G</u>	<u>(1) For example, if a customer submits an application for a home</u>		

			<p><u>purchase plan or a home reversion plan before 6 April 2007, a firm responding to that application on or after 6 April 2007 will not be required to comply with the relevant disclosure requirements in MCOB 5. However, the firm will have to comply with the requirements in MCOB when taking any further action (such as issuing an offer) regarding the application on or after 6 April 2007.</u></p> <p><u>(2) In relation to a home reversion plan, an offer document may have to be issued under transitional provision 1R even though no illustration has been given out (because that part of the transaction occurred before 6 April 2007). In such cases, the suitably adapted illustration required as part of an offer document would need to omit:</u></p> <p><u>(a) the required text regarding comparing the offer document with the illustration previously given to the customer (see MCOB 6.4.4R(4)(b)); and</u></p> <p><u>(b) Section 2 of the illustration entirely.</u></p>		
<u>3</u>		<u>G</u>	<p><u>MCOB applies to home purchase plans and home reversion plans entered into on or after 6 April 2007. PERG 14 contains guidance on the variation of plans entered into before 6 April 2007.</u></p>		

4	<u>MCOB 3.8A.3R(1)</u>	R	(1) <u>A non-real time financial promotion of a home reversion plan communicated:</u> (a) <u>in a directory (or similar publication) that is updated annually;</u> (b) <u>otherwise than in (a); on or after 6 April 2007 where the deadline for submission for communication was before that date does not need to describe a home reversion plan as a 'home reversion plan'.</u>	(1)(a) <u>from the later of 6 April 2007 or the date of first communication, for one year;</u> (1)(b) <u>from 6 April 2007 for three months.</u>	<u>6 April 2007</u>

**INTEGRATED REGULATORY REPORTING (CREDIT INSTITUTIONS AND
INVESTMENT FIRMS) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. (1) Annex A, Annex B and Annex C (Part 1 – 5) of this instrument come into force on 1 January 2007.
- (2) Annex C (Part 6) of this instrument comes into force on 21 January 2008.

Amendments to the Handbook

- D. The modules of the FSA’s Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions	Annex A
Interim Prudential sourcebook for Banks (IPRU(BANK))	Annex B
Supervision manual (SUP)	Annex C

Citation

- E. This instrument may be cited as the Integrated Regulatory Reporting (Credit Institutions and Investment Firms) Instrument 2006.

By order of the Board
25 October 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text.

...

data element A discrete fact or individual piece of information relating to a particular field within a *data item* required to be submitted to the FSA by a *firm* or other regulated entity.

data item One or more related *data elements* that are grouped together into a prescribed format and required to be submitted by a *firm* or other regulated entity under SUP 16 or provisions referred to in SUP 16.

data set One or more *data items* relating to the same *regulated activity*.

LM: Section 1

MISMATCH LIQUIDITY

1 INTRODUCTION

1.1 Legal sources

3 ...
The Banking Consolidation Directive (formerly the Second Banking Co-ordination Directive) requires the FSA as host supervisor to monitor, in co-operation with the relevant home supervisor, the liquidity of UK branches of credit institutions incorporated in other EEA countries. This covers all such branches, regardless of whether or not they have a deposit-taking permission in the UK.

1.2 Application

4 This chapter applies to ~~all banks authorised for the purposes of the Act except EEA banks that do not have a branch in the UK~~ in the manner set out in 1.1. In respect of EEA banks that have a branch in the UK but do not have a UK deposit-taking permission, only Sections 1, 2, 3, 4.2, 9.1 and 10 of the chapter apply. In respect of all ~~to~~-EEA banks and overseas banks with a branch in the UK, the chapter (or applicable sections of it) only applies in relation to the liquidity of those branches and not the bank as a whole.

1. (a) ~~For UK-incorporated banks, the present reporting form (LR), is completed on a solo basis, including any overseas branches. Where a bank ...~~
 - (i) ...
 - (b) Branches of EEA banks that do not have a deposit-taking permission in the UK are subject to some of the provisions of this chapter but are not subject to the liquidity mismatch guidelines set out in sections 4 to 8. The FSA monitors the liquidity of such branches by requiring

them to submit Form LR. Such branches may apply for a ‘global concession’ in accordance with section 4.2.

...

LM: Section 2

2 RATIONALE

...

2.2 How the FSA monitors liquidity

...

8 In the majority of cases the FSA monitors a bank’s liquidity position through the maturity mismatch approach.

(a) ...

(b) The FSA does not apply the full maturity mismatch approach to branches of EEA banks that do not have a deposit-taking permission in the UK, but instead monitors their liquidity via the Form LR.

LM: Section 3

3 MAIN FEATURES OF THE LIQUIDITY POLICY

...

3.1 Main prudential policies applying to banks

...

See s9.3 4 A bank that is subject to liquidity mismatch guidelines should notify the FSA of any breaches of ~~its liquidity mismatch~~ those guidelines as soon as they occur.

3.2 A bank’s reporting obligations

See s9.2 5 A bank that has a deposit-taking permission in the UK must report its liquidity position quarterly on the Form LR or more frequently as required by the FSA.

See Supervision Manual, Chapter 16

See 6 An EEA bank with a branch in the UK that does not have a UK deposit-taking permission must report its liquidity position quarterly on the Form LR, or more frequently as required by the FSA.

Supervision Manual, Chapter 16

...

LM: Section 10

10 POLICY STATEMENTS

- ...
- 5 Except in the case of an EEA bank with a branch in the UK that does not have a UK deposit-taking permission, a A-liquidity policy statement should also cover a bank's agreed guidelines, its retail/ wholesale split and any behavioural or materiality adjustments.
- ...

LS: Section 3

5 MONITORING LIQUIDITY

5.2 Monitoring and reporting performance of sterling stock liquidity

- 2 A sterling stock liquidity bank should monitor its liquidity position on an inter-day basis. Any breaches of the wholesale sterling net outflow limit, the sterling stock 'floor' or the sterling stock liquidity ratio should be immediately reported to the FSA and a completed, contemporaneous form SLR1 sent to the firm's usual supervisory contact at the FSA detailing the liquidity breach.
- ...

Annex C

Amendments to the Supervision manual (SUP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

Part 1

Amendments to SUP Transitional provisions TP1

...

12 J	(1)	<u>SUP 16.7.24, 16.7.25 and 16.7.25A, SUP 16.7.27 and 16.7.27A</u>	R	<u>A securities and futures firm that is a BIPRU investment firm is not required to submit the Annual Reporting Statement, the Annual Reconciliation and the Consolidated Supervision Return under SUP 16.7.25R and SUP 16.7.27R (as appropriate).</u>	<u>1 January 2007 to 31 December 2007</u>	<u>Commencement and 1 January 2007</u>
	(2)	<u>SUP 16.7.35, SUP 16.7.36 and 16.7.36 A</u>	R	<u>An investment management firm that is a BIPRU investment firm is not required to submit the Annual Financial Return, the Consolidated Supervision Return and the Consolidated Financial Resources Return under SUP 16.7.36R.</u>	<u>1 January 2007 to 31 December 2007</u>	<u>Commencement and 1 January 2007</u>
	(3)	<u>SUP 16.7.67, SUP 16.7.68 and SUP 16.7.68A</u>	R	<u>A UCITS investment firm is not required to submit the Consolidated Supervision Return under SUP 16.7.68R.</u>	<u>1 January 2007 to 31 December 2007</u>	<u>13 February 2004 and 1 January 2007</u>
	(4)	<u>SUP 16.7.76, 16.7.77 and 16.7.77 A</u>	R	<u>A personal investment firm that is a BIPRU investment firm is not required to submit the Consolidated Supervision Return under SUP 16.7.77R.</u>	<u>1 January 2007 to 31 December 2007</u>	<u>1 April 2005 and 1 January 2007</u>
	(5)	<u>SUP 16.7.16 and SUP 16.7.17</u>	R	<u>A building society will not be required to submit reports MFS1, MFS1 Supp, MFS2 and QFS2 for reporting dates after 1 January 2008</u>	<u>From 1 January 2008</u>	<u>Commencement</u>

Part 2

Amendments to SUP 16.1-16.7

...

- 16.3.7 R A ~~written~~ report or data item must:
- (1) give the *firm's* FSA firm reference number (or all the *firms'* FSA firm reference numbers in those cases where a report is submitted on behalf of a number of firms, as set out in SUP 16.3.25 G); and
 - (2) if submitted in paper form, be submitted with the cover sheet contained in SUP16 Ann 13R fully completed.

...

- 16.3.9 R Method of submission of reports (see SUP 16.3.8 R)

Method of delivery	
6.	Online submission via the FSA's website at www.fsa.gov.uk
7.	<u>Electronic submission via the Early Reporting System available from</u>

...

- 16.3.25 G If this chapter requires the submission of a report or data item covering a *group*, a single report or data item may be submitted, and so satisfy the requirements of all *firms* in the *group*. Such a report or data item should contain the information required from all of them, meet all the relevant due dates and indicate all the *firms* on whose behalf it is submitted; if necessary a separate covering sheet should list the *firms* on whose behalf a report or data item is submitted.

Nevertheless, the requirement to provide a report or data item, and the responsibility for the report or data item, remains with each *firm* in the *group*. However, reporting requirements that apply to a *firm*, by reason of the *firm* being a member of a *financial conglomerate*, are imposed only on one member of the *financial conglomerate* (see, for example, SUP 16.7.82R).

...

16.7.7 R A *UK bank* must submit reports in accordance with *SUP 16.7.8 R* and *SUP 16.7.8A R*

...

16.7.8A R Table financial reports from a *UK bank*

<u>Content of report</u>	<u>Form</u>	<u>Frequency</u>	<u>Due date</u>
<u>Key data (see note 1)</u>	<u>FSA009</u> <u>(Note</u> <u>2)</u>	<u>As for BSD3 under</u> <u><i>SUP 16.7.8 R.</i></u>	<u>As for BSD3 under</u> <u><i>SUP 16.7.8 R.</i></u>
<u>Non- EEA sub-</u> <u>group (Note 3)</u>	<u>FSA028</u> <u>(Note</u> <u>2)</u>	<u>Half yearly</u>	<u>30 business days</u> <u>after period end</u>

Note 1 A *UK bank* that calculates its capital requirements on a consolidated basis (see *IPRU(BANK) GN 3.3.13R(2)* and *IPRU(BANK) CS 4*) must also complete this return on a consolidated basis.

Note 2 Reports beginning FSA*** are contained within *SUP 16 Annex 24 R*

Note 3 This will be applicable to firms that report 'yes' in *data element 16A* in FSA009 on the reporting date. *Firms'* attention is drawn to *SUP 16.3.25 G* regarding a single submission for all *firms* in the *group*.

16.7.13 R Method of submission

A bank, other than an EEA bank with permission for cross-border services only, must submit the reports described in *SUP 16.7.8 R*, *SUP 16.7.8A R*, *SUP 16.7.10 R* and *SUP 16.7.12 R* to the following:

(1) BSD3, LE3, LR, SLR1, B7 and M1 to: The Financial Statistics Division Domestic Banking Group (HO-4) Bank of England Threadneedle Street London EC2R 8AH;

(2) FSA009 and FSA028 by electronic submission via the Early Reporting System available from or through the FSA's website;

(3) all other reports to the bank's usual supervisory contact at the address in *SUP 16.3.10 G*.

The Bank of England acts only as the agent of the FSA with regard to reports in (1).

...

16.7.16 R A *building society* must submit reports in accordance with *SUP 16.7.17 R* and *SUP 16.7.17A R*

...

16.7.17 R Table financial reports from a *building society*

A

<u>Content of report</u>	<u>Form</u>	<u>Frequency</u>	<u>Due date</u>
--------------------------	-------------	------------------	-----------------

Key data (see note 1) FSA009 As for QFS1 under As for QFS1 under
 (Note 2) SUP 16.7.16R SUP 16.7.16R
 Note 1 A building society with subsidiary undertakings at the reporting date that are included within the Group figures on the QFS1 will have to submit one report on a society only basis and one on a Group basis.

Note 2 Reports beginning FSA*** are contained within SUP 16 Annex 24 R

16.7.19 R Method of submission

A building society must submit:

(1) the reports in SUP 16.7.17 R (other than the "Analysis of interest rate risk gap") either:

(a) by means of the Remote Data Entry system supplied by the FSA (and previously by the Building Societies Commission); or, should this be inoperable,

(b) by post or fax to the address in SUP 16.3.10 G using:

- (ai) the corresponding forms available from the FSA's website; or
- (bii) its own version of the FSA's specified forms, provided that version is equivalent in terms of content and layout; and

(2) FSA009 in SUP 16.7.17A R by electronic submission via the Early Reporting System available from or through the FSA's website.

Notwithstanding a paper submission in accordance with (2)(b), once the Remote Data Entry system is operable again, the reports must be submitted by its means.

...

16.7.24 R A securities and futures firm which is a category A or B firm or a broad scope firm must submit reports to the FSA in accordance with SUP 16.7.25 R and SUP 16.7.25A R.

16.7.25 R Table financial reports from a securities and futures firm which is a category A or B firm or a broad scope firm

<u>Non- EEA sub-</u> <u>group (Note 3)</u>	<u>FSA028</u> <u>(Note 1)</u>	<u>Half yearly</u>	<u>30 business days</u> <u>after period end</u>

Note 1 Reports beginning FSA*** are contained within SUP 16 Annex 24 R
Note 2 Only for category C firms which are subject to the consolidation rules set out in IPRU (INV) Chapter 14. These firms must complete an FSA009 setting out the consolidated position in addition to a non-consolidated version.
Note 3 This will be applicable to firms that report 'yes' in data element 16A in FSA009 on the reporting date. Firms' attention is drawn to SUP 16.3.25 G regarding a single submission for all firms in the group.

...

16.7.31 R A securities and futures firm must submit:
 (1) the reports in SUP 16.7.25 R and SUP 16.7.27 R in accordance with, and in the same format as:
 (1a) the forms contained in SUP 16 Ann 10 R, and as required by section 6 of that annex; and
 (2b) the form contained in SUP 16 Ann 20 R, and having regard to SUP 16 Ann 21 G; and
 (2) the reports in SUP 16.7.25A R and SUP 16.7.27A R in accordance with

and in the same format as the *data items* contained in SUP 16 Annex 24 R, and having regard to SUP 16 Annex 25 G.

- 16.7.32 G *Guidance* notes for the completion of the reports and *data items* are contained in SUP 16 Annex 11 and SUP 16 Annex 25 G respectively.
- 16.7.33 R (1) Any report in SUP 16.7.23 R to SUP 16.7.30 R submitted to the FSA by a *securities and futures firm* must be signed by two authorised signatories satisfying the requirements of SUP 16.7.33 R(2), except for:
- (a) the audited accounts of a subsidiary of the *firm* and the *firm's* audited annual financial statements;
 - (b) other reports where the *firm* is a *sole trader*, when only one authorised signatory is required; and
 - (c) reports submitted in accordance with (3) and (5).
- (2) An authorised signatory must be:
- (a) for a *body corporate*, a *director*;
 - (b) for a *partnership*, a *partner* who is an *approved person* of the *firm*;
 - (c) for a *sole trader*, the proprietor.
- (3) A *firm* must use the FiRSt 5.0 software package made available to *firms* by the FSA (and previously by the SFA) to submit the following reports:
- (a) annual reporting statement;
 - (b) monthly reporting statement;
 - (c) quarterly reporting statement; and
 - (d) consolidated reporting statement.
- (4) Reports in (3) must be submitted to the FSA in accordance with the methods permitted by FiRSt 5 software. All other reports in SUP 16.7.24 R to SUP 16.7.30 R (apart from those in (5)) must be sent to the address given in SUP 16.3.10 G.
- (5) Reports in SUP 16.7.25A R and SUP 16.7.27A R must be submitted electronically via the Early Reporting System available from or through the FSA's website in the same format as set out in SUP 16 Annex 24 R, having regard to SUP 16 Annex 25 G.
- 16.7.35 R Investment management firms
- An *investment management firm* which is not one of the types of *firm* specified in SUP 16.7.37 R must submit reports to the FSA in accordance with SUP 16.7.36 R and, in the case of an *investment management firm* that

is an *ISD firm* as defined in IPRU(INV) 5, SUP 16.7.36A R.

16.7.36 A	R	<u>Table financial reports from an investment management firm that is an ISD firm, as defined in IPRU(INV) 5</u>

Amendments to SUP 16 Annexes

SUP 16 Ann 2G

...

Large Exposures (Form LE3)

Introduction

For all reporting dates after 31 December 2006, the Large Exposures Capital Base (LECB) or its equivalent will be calculated on a different basis. Please see the section below headed Large Exposures Capital Base (LECB).

...

Large Exposures Capital Base (LECB)

For reporting dates up to and including 31 December 2006, you ~~You~~ should calculate the capital base used as the basis for monitoring and controlling large exposures in the same way as that used for capital adequacy monitoring ie the sum of allowable Tier 1 and Tier 2 capital less any deductions. ... to identify exposures that should have been pre-notified to us.

For the first reporting date after 31 December 2006 for firms that are reporting on an unconsolidated or solo-consolidated basis (or the first two reporting dates in the case of consolidated reporting), firms should use the LECB that had been agreed with the FSA and was in force at 31 December 2006. Thereafter, instead of the LECB, firms should report, in its place, the figure of capital resources, calculated in accordance with BIPRU 10.5.2, and reported to the FSA as data element 22A of FSA009, for the reporting date preceding the current reporting date. In that way, the capital resources figure will be continually updated. In the case of reports on a consolidated basis, the capital resources figure will only change half yearly. References to LECB should be regarded as referring to this capital resources figure once firms are reporting on this basis.

For reporting dates up to and including 31 December 2006, where ~~Where~~ you have agreed holdings of tradeable securities subject to 'soft' limits with us, you may use an adjusted capital base incorporating Tier 3 capital to measure these exposures against. However, you should report this adjusted capital base in Part 8.

For the first reporting date after 31 December 2006 on a solo or unconsolidated basis (or first two reports in the case of a consolidated report), firms should use the adjusted capital base incorporating Tier 3 capital that was in force at 31 December 2006. Thereafter, instead of that adjusted capital base, firms should report, in its place, the figure of capital resources, calculated in accordance with BIPRU 10.5.3, and reported to the FSA as data element 22A of FSA009, for the reporting date preceding the current reporting date.

...

1 Basis for reporting Large Exposures on Table L

...

(ii) For reports up to and including 31 December 2006, the measure of own funds to be used in the large exposure calculation is the Group (consolidated) amount of Capital Available at the quarter end as reported in table D, line item D4, column 4 (taking account of any exclusions from consolidation that may be required, as referred to in the Solvency P/G).

For the first reporting date after 31 December 2006, firms should use the Group (consolidated) amount of Capital Available at the quarter end as reported in table D, line item D4, column 4 (taking account of any exclusions from consolidation that may be required, as referred to in the Solvency P/G) of the QFS1 reported at the previous reporting date. Thereafter, firms should instead use the figure of capital resources for the group, calculated in accordance with BIPRU 10.5.2, and reported to the FSA as data element 24A of FSA009 for the reporting date preceding the current reporting date. References to own funds should be regarded as referring to this capital resources figure once firms are reporting on this basis.

*** For the first reporting date after 31 December 2006, BIPRU investment firms should use the own funds figure that was used on their 31 December 2006 report, or the last report prior to that date if their reporting date is different. Thereafter, instead of the own funds figure, firms should use the figure of capital resources, calculated in accordance with BIPRU 10.5.2R and reported to the FSA as data element 22A in FSA009 for the reporting date preceding the current reporting date.

SUP 16 Ann 11G

...

SUP 16 Ann 11G section 4

Guidance on the completion of LEM Forms for securities and futures firms which are ISD firms

I Summary of reporting requirements

(1) An exposure

...

A large exposure forms the basis for the completion of Form LEM, as required under CAD. With regard to the compliance of quarterly reporting of large exposures up to and including 31 December 2006 only, FSA, with prior authorisation, will allow firms to measure whether a large exposure has occurred based upon the firm's own funds rather than financial resources and own funds, on condition that the financial resources are higher than own funds.

For the first reporting date after 31 December 2006 for firms reporting on a solo basis (or the first two reporting dates in the case of a report on a consolidated basis), firms should use the own funds figure that was used on their 31 December 2006 report, or the last report prior to that date if their reporting cycle is different. Thereafter, instead of the own funds figure (or financial resources and own funds figures), firms should use the figure of capital resources, calculated in accordance with BIPRU 10.5.2, and reported to the FSA as data element 22A of FSA009 for the reporting date preceding the current reporting date. In that way, the capital resources figure will be continually updated. In the case of reports on a consolidated basis, the capital resources figure will only change half yearly. References to own funds, for large exposures purposes, should be regarded as referring to this capital resources figure once firms are reporting on this basis.

...

II The reporting form (LEM) – General, coverage and layout

General

...

Coverage and Layout of Forms LEM 1 and 2

Large exposures to individual counterparties and counterparty groups should be reported, in each category of counterparty, ranked in descending order using the “highest exposure during the reporting period”.

Details of own fund/financial resources as at the reporting date should be reported on the front cover of forms LEM 1 and LEM 2 up to and including 31 December 2006. For the first reporting date after 31 December 2006 in the case of a solo report, and the first two reporting dates after 31 December 2006 in the case of a consolidated report, the figures reported should be the figures calculated at the 31 December 2006 reporting date, or latest reporting date prior to that if the reporting cycle is different. Thereafter, the figure of own funds should be the figure of capital resources, calculated in accordance with BIPRU 10.5.2, and reported to the FSA as data element 22A of FSA009 for the reporting date preceding the current reporting date. The figure of financial resources should then be blank.

Counterparty	Value of Exposure	Percentage of Own Funds***	Nature of Item (e.g. Accrued fees, billed fees, settlement balance etc)
--------------	-------------------	----------------------------	----------------------------------------------------------------------------

...

**Delete whichever is not applicable*

***Consider by reference to Part IV Permission Statement*

***For the first reporting date after 31 December 2006, BIPRU investment firms should use the own funds figure that was used on their 31 December 2006 report, or the last report prior to that date if their reporting date is different. Thereafter, instead of the own funds figure, firms should use the figure of capital resources calculated in accordance with BIPRU 10.5.2R and reported to the FSA as data element 22A in FSA009 for the reporting date preceding the current reporting date.

SUP16 Ann 18BG

Notes for completion of the RMAR

...

Section D5: reportable *Large Exposures (ISD personal investment firms)*

...

A *large exposure* exists where a *firm* is owed a debt by, or is otherwise exposed to another person, or to two or more affiliated *persons*, and that exposure equals or exceeds 10% of its own funds. Under *IPRU(INV)*, a *firm* is required to ensure that its *large exposures* do not exceed 25% of its own funds (or the aggregated of exposure to its holding company, or a subsidiary company or a group of subsidiaries of its holding company does not exceed 20% of own funds).

Up to and including 31 December 2006, firms may use the own funds figure reported under item 19 in Section D3 in the same period. At a firm's first reporting date after 31 December 2006, it should use the figure reported on the previous reporting date in item 19 in Section D3. Thereafter, it should use the figure of capital resources, calculated in accordance with *BIPRU* 10.5.2, and reported to the FSA as data element 22A of FSA009 for the reporting date preceding the current reporting date. References to own funds, for large exposures purposes, should be regarded as referring to this capital resources figure once firms are reporting on this basis.

Part 5

Draft new guidance in SUP 16 Annex 25 G

All of the text in this section is new and is not underlined. Insert the following new Annex after SUP 16 Annex 24R

FSA009 – Key data

This data item should be completed by all *BIPRU firms*. It will only be used for reporting dates from 1 January 2007.

During 2007, we are making no change to existing reporting forms and, because some of the underlying rules on capital resources and capital requirements change, we will need to collect more accurate information on this data item to monitor the position. Those parts of the existing reports relating to balance sheet and profit and loss items should be largely unaffected by these changes, hence the reason we will continue to use them. The reporting dates for this data item will be the same as your existing report for capital adequacy.

Valuation

For the general policy on valuation, please see the rules and guidance set out in *GENPRU* 1.3.

Currency

You should report in the same currency as in your existing supervisory reports to the FSA, in thousands.

Data elements

These are referred to by row first, then by column, so data element 2B will be the element numbered 2 in column B.

General

To assist firms and ourselves, please identify your firm's characteristics so that the correct capital monitoring can be undertaken.

1A Is the firm a UK bank or a building society?

This box should be ticked if the report is being completed by a *UK bank* or a *building society*, or a *UK consolidation group* that is subject to the capital rules at Stage A of *BIPRU* 8 Annex 2R.

2A Is the firm a full scope BIPRU investment firm?

This box should be ticked if the report is being completed by either a *full scope BIPRU investment firm*, or a *UK consolidation group* that is subject to the capital rules at Stage 2 of *BIPRU* 8 Annex 2R.

3A Is the firm a BIPRU limited activity firm?

This box should be ticked if the report is being completed by either a *BIPRU limited activity firm*, or a *UK consolidation group* that is subject to the capital rules at Stage 3 of *BIPRU* 8 Annex 2R.

4A Is the firm a BIPRU limited licence firm?

This box should be ticked if the report is being completed by either a *BIPRU limited licence firm*, or a *UK consolidation group* that is subject to the capital rules at Stage 4 of *BIPRU* 8 Annex 2R.

5A If you are a full scope BIPRU investment firm, do you meet the conditions of BIPRU TP 12.1R?

This is only relevant for a *full scope BIPRU investment firm* and it allows a reduction in the operational risk capital requirement.

6A If you are a BIPRU limited activity firm or a BIPRU limited licence firm, do you have a waiver as set out in BIPRU 6.1.2R?

This is only relevant for a *BIPRU limited activity firm* or a *BIPRU limited licence firm*. Only tick this box if you have a waiver as set out in *BIPRU* 6.1.2G that allows you to calculate an *operational risk capital requirement* rather than a *fixed overheads requirement*.

7A Are you a BIPRU 730K firm?

This is only relevant if you are a *BIPRU investment firm*. Tick only if you meet the conditions in *BIPRU* 1.1.22R.

8A Are you a BIPRU 125K firm (excluding UCITS investment firms)?

This is only relevant if you are a *BIPRU investment firm*. Tick only if you meet the conditions in *BIPRU* 1.1.19R, and *BIPRU* 1.1.21R.

9A Are you a UCITS investment firm?

This is only relevant if you are a *UCITS investment firm*.

10A Are you a BIPRU 50K firm?

This is only relevant if you are a *BIPRU investment firm*. Tick here if you meet the conditions set out in *BIPRU 1.1.20R*.

11A Do you have a waiver from consolidated supervision?

This is only relevant if you are a *BIPRU investment firm*. Tick only if your firm has a waiver from consolidated supervision.

12A Have you notified the FSA, at least one month in advance of the date of this report, that you intend to deduct illiquid assets?

This is only relevant if you are a *BIPRU investment firm*. See *GENPRU 2.2.41R*.

13A The basis of reporting

Firms should identify whether the report being submitted is on an unconsolidated, solo-consolidated or consolidated basis.

14A/B For consolidated reporting, provide details of the group.

This is only completed by firms that checked the 'consolidated' box in data element 13A.

This will be provided in the form of a drop-down showing both the Group Reference and associated Group Name.

15A/B For consolidated reporting provide details of all other FSA authorised firms included in the consolidated report

This is only completed by firms that checked the 'consolidated' box in data element 13A.

Firms should list here all the FSA reference numbers and names of those firms, authorised by the FSA, that are included within the consolidated report.

16A If no, are you a member of a non-EEA sub-group at the reporting date?

This is a new reporting obligation from 1 January 2007. It should be completed on each reporting date, unless you are a monthly reporter in which case it should be completed on a quarterly cycle.

Members of a *non-EEA sub-group* (see *BIPRU 8.2.4R* to *BIPRU 8.2.8R*) are required to provide an additional data item (FSA028) on each date that they confirm they are members of such a group.

17A What is the currency of the report.

Firms should identify the currency of the data item from the selection provided. The currency must be the same as that used on your existing regulatory reports to the FSA. Acceptable currencies are Sterling, Euro, US Dollar, Canadian Dollar, Swedish Kroner, Swiss Franc and Japanese Yen. Figures should be reported in 000s.

18A Have you adopted of any of the new credit risk approaches at the reporting date?

If the answer is no, firms should not put any entries in data elements 29A to 34A. If the answer is yes, firms should not put any entries in data elements 26A to 28A.

19A Total tier one capital after deductions

This figure is equivalent to Stage F in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

20A Total tier two capital after deductions

This figure is equivalent to stage K in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

21A Deductions from the totals of tier one and two

This figure is equivalent to stage M in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

22A Capital resources for large exposures

This is the total tier one plus tier two capital after deductions. It is equivalent to Stage N in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

23A Total tier three capital

This figure is equivalent to Stage Q in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

24A Deductions from total capital

This is equivalent to Stage S in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

25A Total capital after deductions

This figure is equivalent to Stage T in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 2R*, for a *building society*;

- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

26A Credit risk requirement under existing rules

This should only be completed by firms to the extent that they have not yet adopted the approaches to credit risk set out in *BIPRU 3* and *BIPRU 4*.

27A Market risk capital requirement under existing rules

This should only be completed by firms to the extent that they have not yet adopted the approaches to credit risk set out in *BIPRU 3* and *BIPRU 4*.

28A Other capital requirements under existing rules

This should only be completed by firms that have not yet adopted one of the approaches to credit risk set out in *BIPRU 3* and *BIPRU 4*.

Enter here any other capital requirements, other than credit or market risk, under existing rules, including any secondary requirements arising under *BIPRU TP 8.11 R*.

29A Total credit risk capital component

This will be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

30A Total operational risk capital requirement

This will be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

31A Reduction in operational risk capital requirement under BIPRU TP 12.8R

This is only relevant for a *full scope BIPRU investment firm* that satisfies the conditions set out in *BIPRU TP 12.1R*.

Firms should report here the amount by which the *ORCR* reported in 29A is reduced as a result of the calculation in *BIPRU TP 12.8R* (thus 30A less this data element will give the reduced *ORCR*).

32A Counterparty risk capital component

This will be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

33A Total market risk capital requirement

This will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

34A Concentration risk capital component

This will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

35A Fixed overheads requirement

See *GENPRU 2.1.40R* to *GENPRU 2.1.46G*.

36A Capital requirement

Report here your calculation of your capital requirement.

For firms that have not adopted the new approaches to credit risk yet, the figure may well differ from that reported in your other (existing) regulatory returns. Although this may be expected, firms should be able to explain how the differences from that have arisen.

37A Base capital resources requirement

See *GENPRU 2.1.29R*.

38A Capital resources requirement arising from the operation of capital floors

This will only be completed by firms that have adopted the *IRB approach* to credit risk or *AMA* for operational

risk. See *BIPRU* TP 2.

When reporting, the scaling factors set out in *BIPRU* TP 2.8R should have been applied.

39A Surplus/Deficit of own funds

This is data element 25A less data element 36A.

Although not reported here, firms that have adopted the *IRB approach* should also be monitoring data element 38A in relation to 25A.

40A Individual capital guidance – total capital resources

Enter the amount of total capital resources that the FSA considers the firm should hold in order to meet *GENPRU* 1.2.26R (adequate financial resources). This amount can be calculated from information provided in the most recent letter the firm has received from the FSA setting out Individual Capital Guidance (as described in *BIPRU* 2.2.12G). The amount should be calculated as at the same reporting date as all other information included in this data item. Where this data item is being used to report for a *UK consolidation group*, you should enter the total group capital resources indicated in the ICG letter which will typically be based on the group capital resources requirement (data element 35A) – see *BIPRU* 2.2.19G.

For the purposes of giving individual capital guidance, the FSA distinguishes between capital resources which can be used to meet all risks (general purpose capital, ie stage N in *GENPRU* 2 Annexes 2R to 6R, as appropriate) and capital resources which can only be used to meet certain risks, for instance trading book risks, (limited purpose capital). Total capital resources after deductions are as defined in *GENPRU* 2.2.12R and is stage T in *GENPRU* 2 Annexes 2R to 6R as appropriate. The amount of total capital resources should be shown in data element 24A. See *BIPRU* 2.2.16G.

This data element should be used where an ICG letter provides guidance on the amount of total capital or is silent on the nature of the capital which can be used to meet the obligation in *GENPRU* 1.2.26R.

If no ICG has been set, firms should enter 0 here.

41A Individual capital guidance – general purpose capital

Enter the amount of general purpose capital that the FSA considers the firm should hold in order to meet *GENPRU* 1.2.26R (adequate financial resources). The amount should be calculated on the same basis set out for data element 25A, but refers only to general purpose capital rather than to total capital. If the firm's ICG letter does not provide guidance on the amount of general capital (or limited purpose capital) that the firm should hold or no ICG has been set for the firm, it should enter 0 here.

42A Surplus/(deficit) total capital over ICG

This is the amount in data element 25A (total capital after deductions) less data element 40A. However, if no ICG has been set and data element 40A is 0, this should also be 0.

43A Surplus/(deficit) general purpose capital over ICG

This is the amounts in data element 22A less data element 41A. However, if no ICG has been set and data element 41A is 0, this should also be 0.

Memorandum item

44A Value of portfolio under management

This is only relevant for a *UCITS investment firm*.

Enter the value of the portfolio under management at the reporting date.

FSA009 – Key data validations

Internal validations

Data elements are referenced by row then column.

Validation number	Data element		
1	1A		If (2A+3A+4A)=yes, then no, else yes
2	2A		If (1A+3A+4A)=yes, then no, else yes
3	3A		If (1A+2A+4A)=yes, then no, else yes
4	4A		If (1A+2A+3A)=yes, then no, else yes
5	5A		If 2A = no, then no
6	6A		If (3A+4A) = no, then no
7	7A		If (1A+8A+9A+10A) = yes, then no
8	8A		If (1A+7A+9A+10A) = yes, then no
9	9A		If (1A+7A+8A+10A) = yes, then no
10	10A		If (1A+7A+8A+9A) = yes, then no
11	11A		If 1A = yes, then no
12	22A	=	19A + 20A - 21A
13	25A	=	22A + 23A - 24A
14	29A		If 18A = yes, then ≥ 0 , else 0
15	30A		If 18A = yes, then ≥ 0 , else 0
16	31A	\leq	30A
17	32A		If 18A = yes, then ≥ 0 , else 0
18	33A		If 18A = yes, then ≥ 0 , else 0
19	34A		If 18A = yes, then ≥ 0 , else 0
20	35A		If 1A = yes, then 0, else ≥ 0
21	38A	=	25A – 36A
22	42A		If 40A = 0, then 0, else 25A - 40A
23	43A		If 41A = 0, then 0, else 22A – 41A
24	44A		If 9A = Yes, then ≥ 0 , else 0

FSA028 – Non-EEA sub-groups

This data item should be completed if a *BIPRU* firm is a member of a *non-EEA sub-group*, as set out in *BIPRU* 8.

Firms should use the diagrams in *BIPRU* 8 Annex 3G, in conjunction with *BIPRU* 8.3, to help them understand in the first instance whether a *non-EEA sub-group* exists. If a *non-EEA sub-group* exists, and has been identified as existing on FSA001 (or FSA009), then this data item should be completed. However, where a firm concludes that the reporting requirement is fully met by another regulatory submission of FSA003/FSA009 (which will either be a solo-consolidated submission, or a *UK consolidation group* submission), it should be noted on this data item, which can then be submitted with no further information required.

Valuation

For the general policy on valuation, please see the rules and guidance set out in *GENPRU* 1.3.

Data elements

These are referred to by row first, then by column, so data element 2B will be the element numbered 2 in column B.

1A Is your non-EEA sub-group reporting requirement satisfied by your solo-consolidated FSA003/FSA009?

The diagrams in *BIPRU* 8 Annex 3G, in conjunction with *BIPRU* 8.3, should assist firms in identifying those circumstances when a *non-EEA sub-group* exists and when a solo-consolidated FSA003 or FSA009 will satisfy the reporting requirement. Firms should answer Yes or No. Firms answering Yes do not need complete the rest of the data elements.

2A Is your non-EEA sub-group reporting requirement satisfied by your UK consolidation group FSA003/FSA009?

The diagrams in *BIPRU* 8 Annex 3G, in conjunction with *BIPRU* 8.3, should assist firms in identifying those circumstances when a *UK consolidation group* exists and when a *UK consolidation group* FSA003 or FSA009 will satisfy the reporting requirement. Firms should answer Yes or No. Firms answering Yes should complete 3A, and then do not need to complete the rest of the data elements.

3A If the answer to 2A is Yes, what is the reference number of the UK consolidation group?

Firms should enter the reference number used for the submission of the UK consolidation group FSA003/FSA009.

4A What is the currency of the report?

Firms should identify the currency of the data item from the selection provided. Acceptable currencies are Sterling, Euro, US Dollar, Canadian Dollar, Swedish Kroner, Swiss Franc and Japanese Yen. Figures should be reported in 000s.

5A Total tier one capital after deductions

This figure is equivalent to Stage F in:

- *GENPRU* 2 Annex 2R, for a *UK bank*;
- *GENPRU* 2 Annex 3R, for a *building society*;
- *GENPRU* 2 Annex 4R, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU* 2 Annex 5R, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU* 2 Annex 6R, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU* 8.6 and *BIPRU* 8.7.1R.

6A Total tier two capital after deductions

This figure is equivalent to stage K in:

- *GENPRU* 2 Annex 2R, for a *UK bank*;
- *GENPRU* 2 Annex 3R, for a *building society*;

- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

7A Deductions from the totals of tier one and two

This figure is equivalent to stage M in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

8A Capital resources for large exposures

This is equivalent to Stage N in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

9A Total tier three capital

This figure is equivalent to Stage Q in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

10A Deductions from total capital

This is equivalent to Stage S in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

11A Total capital after deductions

This figure is equivalent to Stage T in:

- *GENPRU 2 Annex 2R*, for a *UK bank*;
- *GENPRU 2 Annex 3R*, for a *building society*;
- *GENPRU 2 Annex 4R*, for a *BIPRU investment firm* deducting *material holdings*;
- *GENPRU 2 Annex 5R*, for a *BIPRU investment firm* deducting *illiquid assets*; and
- *GENPRU 2 Annex 6R*, for a *BIPRU investment firm* with a waiver from consolidated supervision.

Firms should also see *BIPRU 8.6* and *BIPRU 8.7.1R*.

12A Credit risk requirement under existing rules

This data element is only relevant up to and including 31 December 2007. Thereafter, it must be zero.

This should only be completed by firms that have not yet adopted one of the approaches to credit risk set out in *BIPRU 3* and *BIPRU 4*.

13A Market risk capital requirement under existing rules

This data element is only relevant up to and including 31 December 2007. Thereafter, it must be zero.

This should only be completed by firms that have not yet adopted one of the approaches to credit risk set out in *BIPRU 3* and *BIPRU 4*.

14A Other capital requirements under existing rules

This data element is only relevant up to and including 31 December 2007. Thereafter, it must be zero.

Enter here any other capital requirements, other than credit or market risk, under existing rules including any secondary requirements arising under *BIPRU TP 8.11 R*.

15A Total credit risk capital component

During 2007, this will be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *GENPRU 2.1.39R* as modified if a firm has an IRB permission, as well as *BIPRU 8.7.6R* to *BIPRU 8.7.11R*.

16A Total operational risk capital requirement

During 2007, this will be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *BIPRU 6*, *BIPRU 8.7.14R* and *BIPRU 8.7.15R*.

17A Reduction in operational risk capital requirement under *BIPRU TP 12.8R*

This is only relevant for a *full scope BIPRU investment firm* that satisfies the conditions set out in *BIPRU TP 12.1R*.

Firms should report here the amount by which the *ORCR* reported in data element 16A is reduced as a result of the calculation in *BIPRU TP 12.8R* (thus data element 16A less this data element will give the reduced *ORCR*). So 17A will be less than 16A.

18A Counterparty risk capital component

During 2007, this will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *BIPRU 14.1.3R*, as well as *BIPRU 8.7.6R* to *BIPRU 8.7.11R*.

19A Total market risk capital requirement

During 2007, this will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *BIPRU 7*, *GENPRU 2.2.46R*, *BIPRU 8.7.12R* and *BIPRU 8.7.13R*.

20A Concentration risk capital component

During 2007, this will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *BIPRU* 10.5.14R to *BIPRU* 10.5.21G, as well as *BIPRU* 8.7.6R and *BIPRU* 8.9, for details of how this is calculated.

21A Fixed overheads requirement

During 2007, this will only be completed by firms that have adopted one of the new approaches to credit risk at the reporting date.

See *GENPRU* 2.1.40R to *GENPRU* 2.1.46G.

22A Capital requirements

Report here your calculation of your capital requirement.

For firms that have not adopted the new approaches to credit risk yet, the figure may well differ from that reported in your existing regulatory returns under *SUP* 16.7. Although this may be expected, firms should be able to explain how the differences from that have arisen.

23A Capital resources requirement arising from the operation of capital floors

This will only be completed by firms that have adopted the *IRB approach* to credit risk or *AMA* for operational risk. See *BIPRU* TP2.

When reporting, the scaling factors set out in *BIPRU* TP2.8R should have been applied.

24A Surplus/Deficit of own funds

This is data element 11A less data element 22A.

Although not reported here, firms that have adopted the *IRB approach* should also be monitoring data element 23A in relation to item 11A.

Large exposures

25A Capital resources

Enter here the figure previously reported for this *non-EEA sub-group* in data element 8A on the last submission. If it is the first occasion on which this sub-group has reported, use the figure in 8A above.

26 Counterparty details

Enter each counterparty name or group name for each large exposure at the reporting date, together with the appropriate details of the exposure.

26A Exposure number

Please number each *large exposure* consecutively.

26B Counterparty name

List here the names of the *counterparties*, *groups of connected clients*, and *connected counterparties* (as set out in *BIPRU* 10.3) that represent *large exposures*.

26C Amount of the exposure that is exempt

The amount of the exposure, after credit risk mitigation techniques, that is exempt under *BIPRU* 10.6

26D Amount of the exposure that is not exempt and is in the non-trading book

The amount of the exposure, after credit risk mitigation techniques, that is not exempt and is in the non-trading book.

26E Amount of the exposure that is not exempt and is in the trading book

The amount of the exposure, after credit risk mitigation techniques, that is not exempt and is in the trading book.

26F Non-exempt % of capital resources under *BIPRU* 10.5.2R

This is columns D plus E as a percentage of the capital resources under *BIPRU* 10.5.2R reported in data element 25A. It should be entered to two decimal places, omitting the % sign.

26G CNCOM

The amount of CNCOM calculated as set out in *BIPRU* 10.5.14R to 10.5.21G.

FSA028 – Non-EEA sub-groups validations

Internal validations

Data elements are referenced by row then column.

Validation number	Data element		
1	8A	=	5A + 6A – 7A
2	11A	=	8A + 9A – 10A
3	17A	≤	16A
4	24A	=	11A-22A

Part 6

Further amendments to SUP 16.7

16.7.17	R	Table Financial reports from a <i>building society</i> (see SUP 16.7.16R)			
		Content of report	Form (Note 1)	Frequency	Due date
		Adequate information on group balance sheet, analysed between society and subsidiary undertakings	MFS1— (Table A)	Monthly	9 <i>business days</i> after month end (largest societies) (Note 2)
		Adequate information on society's balance sheet and primary business transactions	MFS1— (Tables B to G)	Monthly	12 <i>business days</i> after month end (other societies) 7 <i>business days</i> after month end (largest societies) (Note 2)
		Sectoral information of the society's balance sheet	MFS1 Supp (Note 3)	Monthly	10 <i>business days</i> after month end (other societies) 7 <i>business days</i> after month end
		Adequate information on balance sheets and primary business transactions of society's subsidiary undertakings accepting deposits and/or lending	MFS2	Monthly	7 <i>business days</i> after month end (largest societies) (Note 2)
		...			10 <i>business days</i> after month end (other societies)
		Sectoral and other breakdown of assets and liabilities, gilt maturities, and derivative contracts	QFS2 (note 3)	Quarterly	11 <i>business days</i> after calendar quarter end

**NEW COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK
(OTC DERIVATIVE REQUIREMENTS AND OTHER MISCELLANEOUS
AMENDMENTS) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 140 (Restriction on managers of authorised unit trust schemes);
 - (c) section 156 (General supplementary powers);
 - (d) section 157 (Guidance);
 - (e) section 238(5) (Restrictions on promotion);
 - (f) section 242 (Applications for authorisation of unit trust schemes);
 - (g) section 247 (Trust scheme rules); and
 - (h) section 248 (Scheme particulars rules); and
 - (2) Regulation 6 (FSA rules) of the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228).
- B. The rule-making powers and related provisions listed above are specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 6 November 2006, except that text in Annex A which is placed in bold square brackets is deleted with effect from 12 February 2007.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions	Annex A
New Collective Investment Schemes sourcebook (COLL)	Annex B

Citation

- E. This instrument may be cited as the New Collective Investment Schemes Sourcebook (OTC Derivative Requirements and other Miscellaneous Amendments) Instrument 2006.

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text. Handbook text in this Annex placed in bold square brackets is deleted with effect from 12 February 2007 but is not shown struck through.

Amend the following definition as shown:

...

marketing (in *COLL* [and *CIS*]) (in relation to marketing *units* in a *regulated collective investment scheme* in a particular country or territory):

- (a) *communicating* to a *person* in that country or territory an invitation or inducement to become, or offer to become, a *holder* in that ~~*authorised fund*~~ *regulated collective investment scheme*;
- (b) giving *advice on investments* to, or arranging (bringing about) a deal in an investment for a *person* in that country or territory to become a *holder* in that ~~*authorised fund*~~ *regulated collective investment scheme*.

...

Annex B

Amendments to the New Collective Investment Schemes sourcebook (COLL)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

Table: contents of the prospectus

4.2.5 R This table belongs to *COLL* 4.2.2R (Publishing the prospectus).

...
Contracts and other relationships with parties
11 The following relevant details:
...
(h) in what capacity (if any), the <i>authorised fund manager</i> acts in relation to any other <u>regulated collective investment schemes</u> and ...
...

...

Investment in collective investment schemes

5.2.13 R ...

(4) where the second *scheme* is an *umbrella*, the provisions in (2) and (3) and *COLL* 5.2.11R (Spread: general) apply to each *sub-fund* as if it were a separate *scheme*.

...

OTC transactions in derivatives

5.2.23 R A transaction in an *OTC derivative* under *COLL* 5.2.20R (1)(b) must be:

...

(2) on approved terms: the terms of the transaction in *derivatives* are approved only if, before the transaction is entered into, the *depository* is satisfied that the counterparty has agreed with the *ICVC* or the *authorised fund manager*:

...

(b) that it or an alternative counterparty will, at the request of the *ICVC* or *authorised fund manager*, enter into a further transaction to sell, liquidate or close out that transaction at

any time, at a fair value ...

...

Risk management process

5.2.25 G ...

- (2) The *depository* should take reasonable care to review the appropriateness of the risk management process in line with its duties under COLL 6.6.4R (General duties of the depository) and COLL 6.6.14R (Duties of the depository and authorised fund manager: investment and borrowing powers), as appropriate.

5.6.7 R ...

- (7) For the purpose of calculating the limit in (5), the exposure in respect of an *OTC derivative* may be reduced to the extent that collateral is held in respect of it if the collateral meets each of the conditions specified in (8).
- (8) The conditions referred to in (7) are that the collateral:
- (a) is marked-to-market on a daily basis and exceeds the value of the amount at risk;
 - (b) is exposed only to negligible risks (e.g. government bonds of first credit rating or cash) and is liquid;
 - (c) is held by a third party custodian not related to the provider or is legally secured from the consequences of a failure of a related party; and
 - (d) can be fully enforced by the *non-UCITS retail scheme* at any time.
- (9) For the purpose of calculating the limit in (5), *OTC derivative* positions with the same counterparty may be netted provided that the netting procedures:
- (a) comply with the conditions set out in Section 3 (Contractual netting (Contracts for novation and other netting agreements))

of Annex III to the *Banking Consolidation Directive*; and

(b) are based on legally binding agreements.

(10) In applying this rule, all *derivatives* transactions are deemed to be free of counterparty risk if they are performed on an exchange where the *clearing house* meets each of the following conditions:

(a) it is backed by an appropriate performance guarantee; and

(b) it is characterised by a daily mark-to-market valuation of the *derivative* positions and an at least daily margining.

5.6.7A G Guidance on spread: general

(1) COLL 5.6.7R (7) to (10) replicate the provisions of Article 5 of the Commission Recommendation 2004/383/EC of 27 April 2004 on the use of financial derivative instruments for undertakings for collective investment in transferable securities, so as to enable *non-UCITS retail schemes* to benefit from the same flexibility. This Recommendation may be accessed via http://europa.eu.int/eur-lex/pri/en/oj/dat/2004/l_199/l_19920040607en00240029.pdf

(2) The attention of *authorised fund managers* is specifically drawn to condition (d) in COLL 5.6.7R (8) under which the collateral has to be legally enforceable at any time. It is the FSA's view that it is advisable for an *authorised fund manager* to undertake a legal due diligence exercise before entering into any financial collateral arrangement. This is particularly important where the collateral arrangements in question have a cross-border dimension. The *depository* will also need to exercise reasonable care to review the collateral arrangements in accordance with its duties under COLL 6.6.4 (General duties of the depository).

**PERIMETER GUIDANCE (HOME REVERSION AND HOME PURCHASE
ACTIVITIES) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of its powers under section 157(1) (Guidance) of the Financial Services and Markets Act 2000 (“the Act”).

Commencement

- B. Annex A of this instrument comes into force on 6 November 2006.
- C. Annex B of this instrument comes into force on 6 April 2007.

Amendments to the Perimeter Guidance manual (PERG)

- D. PERG is amended in accordance with Annex A and Annex B. The general guidance in PERG does not form part of the Handbook.

Citation

- E. This instrument may be cited as the Perimeter Guidance (Home Reversion and Home Purchase Activities) Instrument 2006.

By order of the Board
25 October 2006

Annex A

Amendments to the Perimeter Guidance manual (PERG)

In this Annex, underlining indicates new text and striking through indicates deleted text. With the exception of Chapter 14 which represents new text.

1.4.2 G Table: list of general guidance to be found in *PERG*.

New text to be added as Chapter 14

14 Guidance on home reversion and home purchase activities

14.1 Background

Q1. What is the purpose of these questions and answers (“Q&As”) and who should be reading them?

These Q&As are aimed at *persons* involved in the provision or promotion of financial arrangements involving the acquisition or disposal of land for the purpose of enabling an individual:

- to purchase a property; or
- to raise funds from the equity in a property that he already owns,

other than by means of a traditional mortgage.

They are intended to help such persons understand whether they will, as a result of the Regulation of Financial Services (Land Transactions) Act 2005 and secondary legislation made following that Act:

- be carrying on a *regulated activity* and need *authorisation* or exemption under section 19 of the Financial Services and Markets Act 2000; or
- be subject to the restriction on *financial promotions* in section 21 of the Financial Services and Markets Act 2000.

The Q&As complement the general *guidance* on regulated activities, which is in Chapter 2 of our Perimeter Guidance Manual (PERG 2), the general guidance on regulated mortgage activities in Chapter 4 (PERG 4), the general guidance on financial promotions in Chapter 8 (PERG 8) and the relevant legislation.

The Q&As that follow are set out in sections:

- general issues (PERG 14.2);
- activities relating to home reversion plans (PERG 14.3);
- activities relating to home purchase plans (PERG 14.4);
- the ‘by way of business’ test (PERG 14.5);
- carrying on a regulated activity in the United Kingdom (PERG 14.6);
- exemptions (PERG 14.7);
- financial promotions (PERG 14.8); and
- transitional provisions (PERG 14.9).

14.2 General issues

Q2. What is the purpose of the Regulation of Financial Services (Land Transactions) Act 2005?

This Act makes clear that the potential regulatory scope of the Financial Services and Markets Act 2000 enables the FSA to regulate activities that are similar to those that are already regulated when carried on in relation to traditional mortgages but which

involve the provider acquiring land rather than simply providing finance for its purchase by the homeowner. This typically includes:

- schemes (often termed 'equity release schemes') where a provider buys an interest in a homeowner's property and allows the homeowner to continue to reside in the property ('home reversion plans'); and
- certain types of Islamic financing arrangements designed to enable the purchase of a home in a way that is acceptable under Islamic law, such as Ijara or diminishing Musharaka ('home purchase plans').

Q3. I propose to carry on activities in relation to home finance arrangements of the kind mentioned in Q2. In what circumstances will I need to be authorised by the FSA or be an exempt person?

You will need to be an authorised or exempt person if you will:

- be carrying on *regulated activities*;
- be doing so by way of business;
- be doing so on or after 6 April 2007; and
- be doing so in the *United Kingdom*.

Q4. How will I know if my proposed home finance activities are regulated?

Regulated activities are specified in the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 ('the *Regulated Activities Order*'). This will be amended, following the enactment of the Regulation of Financial Services (Land Transactions) Act 2005, to extend its scope to cover certain home finance activities. These amendments are made in the Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No2) Order 2006 (SI 2006/2383) which comes into effect on 6 April 2007. The new regulated home finance activities are:

- *entering into a home reversion plan or entering into a home purchase plan as the provider of the plan or, in the case of home reversion plans only, as a person to whom rights or obligations acquired by the provider are transferred or who, during the currency of the plan, acquires all or part of the interest in land bought by the provider;*
- *administering a home reversion plan or administering a home purchase plan;*
- *arranging (bringing about) a home reversion plan or arranging (bringing about) a home purchase plan;*
- *making arrangements with a view to home reversion plans or making arrangements with a view to home purchase plans;*
- *advising on a home reversion plan or advising on a home purchase plan; and*
- agreeing to do any of the above.

But some activities are specifically excluded from regulatory scope.

14.3 Activities relating to home reversion plans

Q5. What is a home reversion plan?

Broadly speaking, this is an arrangement under which, at the time it is entered into, a *person* (the ‘reversion purchaser’) buys all or part of an interest in land (other than timeshare accommodation) in the UK from a homeowner (being an individual or a trustee whose beneficiary is an individual) (the ‘reversion occupier’) on the basis that the individual or a related person is entitled under the arrangement, and intends, to use at least 40% of the land as a dwelling until:

- the end of a fixed period of at least twenty years; or
- the individual dies; or
- the individual enters a care home.

It should be noted that an arrangement will be a *home reversion plan* if the intention is for the land to be used as a dwelling until any one of the above eventualities arises. It is not necessary for the arrangement to provide for all three eventualities, merely one or more of them.

This means that an arrangement is not a home reversion plan if:

- the occupier is not an individual; or
- the land is to be used for the purpose of letting as a dwelling to someone other than a related person of the individual (or beneficiary under the trust) who owns it; or
- the land is used primarily for business purposes; or
- the land is overseas.

A related person, in relation to an individual, means:

- that person’s spouse or civil partner; or
- a person (whether or not of the same sex) whose relationship with that person has the characteristics of a husband and wife relationship; or
- that person’s:
 - parent or grandparent;
 - child or grandchild; or
 - sibling.

Q6. Will a mortgage-to-rent scheme be a home reversion plan?

No. This is most unlikely as mortgage-to-rent schemes do not usually provide for the homeowner (having sold his property to the scheme provider), or a related person as the case may be, to occupy the property until he dies or enters a care home or for a fixed period of at least twenty years.

Q7. Can an arrangement that was established before 6 April 2007 be a home reversion plan?

Yes. An arrangement may still be a *home reversion plan* even though it was established before 6 April 2007. However, regulated activities carried on in relation to a home reversion plan established before 6 April 2007 will only be subject to regulation:

- when carried on on or after 6 April 2007; and
- in certain circumstances (see Q21 for a summary).

Q8. When will I be carrying on the activity of entering into a home reversion plan?

This will occur when you enter into the plan at the outset as the reversion purchaser. It can also occur at a later stage if all or part of the rights or obligations of the reversion purchaser are transferred to you or if you acquire all or part of the interest in land bought by the reversion purchaser (where you become a ‘reversion transferee’). This is so, whether you are acquiring the rights or obligations from the reversion purchaser or from an existing reversion transferee. This includes acquiring the rights or obligations or the interest in land purely as an investment. However, investors will only be regulated if they satisfy the ‘by way of business test’ (see Q38). We refer to reversion purchasers and reversion transferees collectively in this guidance as ‘reversion providers’.

So, if you are a reversion transferee under a plan that was established before 6 April 2007, you will only be subject to regulation for carrying on the regulated activity of entering into the plan if you do so on or after 6 April 2007.

Q9. What exclusions may be available to me if I am entering into home reversion plans?

The main exclusions are those:

- for trustees who enter into a plan where the reversion occupier is an individual who is a beneficiary under the trust, or a related person (article 66(6B) of the *Regulated Activities Order*); and
- for *overseas persons* who satisfy certain conditions (see Q39).

Q10. When will I be carrying on the activity of administering a home reversion plan?

This will arise if you carry out any one or more of the following functions for a reversion provider or a reversion occupier in relation to a plan that was originally established on or after 6 April 2007:

- taking necessary steps to make payments to the reversion occupier; or

- taking necessary steps to collect or recover payments due from the reversion occupier; or
- notifying the reversion occupier of changes in payments due under the plan, or of other matters of which the plan requires him to be notified.

One effect of this is that you will not become subject to regulation if you are administering a plan that was originally established before 6 April 2007 and a reversion transferee enters into the plan after that date. See Q21 for more detail about when activities are regulated if a plan was originally established before 6 April 2007.

It is irrelevant, for the purposes of determining if you are administering a home reversion plan, whether or not the plan was entered into by way of business. In this respect, the activity is different to the regulated activities of *administering a regulated mortgage contract* or *administering a home purchase plan*.

Q11. What exclusions may be available to me if I am administering home reversion plans?

Specific exclusions may apply if you are not an *authorised person* and:

- you arrange for an authorised person with the appropriate *Part IV permission* to administer the plan – this includes where you administer the plan for a period of up to one month following the termination of such an arrangement; or
- you administer the plan under an agreement with an authorised person who has Part IV permission to administer such a plan.

The other main exclusions are those:

- for trustees who administer a plan where the reversion occupier is an individual who is a beneficiary under the trust or a related person (article 66(6B) of the *Regulated Activities Order*); and
- for *overseas persons* who satisfy certain conditions (see Q39).

Q12. When will I be carrying on the activity of arranging home reversion plans?

There are three types of arranging activity that are regulated. These are making arrangements:

(1) for another *person* to enter into a plan as a reversion occupier or as a reversion provider;

(2) for another person, being a reversion occupier or a reversion provider, to vary the terms of a plan that was originally established on or after 6 April 2007, in such a way as to vary his obligations under that plan; and

(3) with a view to a person who participates in the arrangements entering into a plan as a reversion occupier or as a reversion provider.

But none of these arranging activities will apply to you if they relate to a plan to which, as a result of your arranging activities, you are or will become a party (article 28A of the *Regulated Activities Order*).

You will only be making arrangements under (1) or (2) if your actions are such as to bring about the entry into the plan or the variation as the case may be (article 26 of the *Regulated Activities Order*). This means that your involvement must be material to whether the transaction occurs. For example, assisting a person by completing the necessary application forms on their behalf or acting as their agent or attorney in negotiating entry will amount to bringing about the transaction.

Arranging activities under (3) will typically include making regular introductions of homeowners to reversion providers or of reversion transferees to reversion purchasers or vice versa or of any of these to a *reversion intermediary*.

Q13. I understand that any transaction that I have arranged before 6 April 2007 is not subject to regulation. But am I regulated if I arrange for a reversion transferee to enter into or vary a home reversion plan on or after 6 April 2007?

This depends on the type of arranging you are carrying on. If you are arranging variations, this will only be regulated if the plan was originally established on or after 6 April 2007. But, if you are arranging for a reversion transferee to enter into a plan and the arrangements are being made on or after 6 April 2007, you will be regulated for that arranging activity. See Q21 for more detail about when activities are regulated if a plan was originally established before 6 April 2007.

Q14. Will I be regulated for arranging for a reversion provider to dispose of his rights and obligations or his interest in land under a home reversion plan to a reversion transferee?

It is only arranging for a person to enter into or vary the terms of a plan that is subject to regulation. So, you will not be regulated for providing arranging services to the existing provider who wishes to dispose of his rights, obligations or interests but you are likely to be regulated if you are arranging for the transferee to enter into the plan by acquiring the rights, obligations or interests.

Q15. What exclusions may be available to me if I am arranging home reversion plans?

If you are an *unauthorised person* the following exclusions may be available to you:

- where you are arranging for a transaction to be entered into with or through an *authorised person* (article 29 of the *Regulated Activities Order*) (see Q16); and

- where you have arranged for an authorised person to administer the plan or are administering it yourself during the period of one month following the termination of your arrangement with the authorised person (article 29A(2) of the Regulated Activities Order).

Whether or not you are an unauthorised person, the other main exclusions that may apply include:

- introductions made with a view to the provision of regulated independent advice (article 33 of the Regulated Activities Order) (see Q17);
- introductions made to a regulated person who carries on home reversion plan activities (article 33A of the Regulated Activities Order) (see Q18);
- arrangements that are a necessary part of other services provided by a person in the course of carrying on a profession or business other than a *regulated activity* (article 67 of the Regulated Activities Order); and
- *overseas persons* (article 72 of the Regulated Activities Order) (see Q39).

Q16. When will the exclusion in article 29 of the Regulated Activities Order be available to me if I am arranging home reversion plans?

The exclusion will apply to you when, as an *unauthorised person*, you are arranging any of the following:

- for a homeowner (your client) to enter into a plan with an authorised reversion provider or through an authorised intermediary;
- for a reversion provider (your client) to enter into a plan with a homeowner or to transfer rights or obligations or an interest in land to a reversion transferee if either the reversion transferee is an authorised person or the transaction is to be effected through an authorised intermediary; or
- for a reversion transferee (your client) to acquire rights or obligations from an authorised reversion provider or through an authorised intermediary;
- for your client to vary the terms of a plan where the reversion provider is an authorised person or the variation is arranged through an authorised intermediary.

This is subject to your meeting certain conditions which are, broadly speaking, that:

- you must not advise your client on the merits of his entering into the transaction; and
- you must not be paid by anyone other than your client.

The requirement that you do not receive any payment other than from your client does not prevent you receiving payment from the *authorised person* but you must then treat the sums paid to you as belonging to your client. There is nothing to prevent you then using the sums to offset payments due to you from your client for services rendered to him. This is provided that you have your client's agreement to do so.

Q17. When will the exclusion in article 33 of the Regulated Activities Order be available to me if I am arranging home reversion plans?

Broadly speaking, the exclusion will apply where:

- your arranging activity is limited to *making arrangements with a view to home reversion plans*;
- you make introductions of homeowners, reversion purchasers or reversion transferees to an *authorised person*, an *exempt person* or an *overseas person*; and
- the introduction is made with a view to the provision of independent advice or the provision of independent discretionary services relating to home reversion plans.

Q18. When will the exclusion in article 33A of the Regulated Activities Order be available to me if I am arranging home reversion plans?

Broadly speaking, the exclusion will apply where:

- your arranging activity is limited to *making arrangements with a view to home reversion plans*;
- you make introductions of homeowners or of prospective reversion providers (your client) to an *authorised person*, an *appointed representative* or an *overseas person*;
- you do not receive any money paid by your client in relation to the transaction other than a sum that is due to you for your own account (for example, your fee for providing the introductory service); and
- you disclose to your client certain information about your relationship with the person to whom you are effecting introductions and about any reward you may receive for doing so.

Q19. When will I be carrying on the activity of advising on a home reversion plan?

This will arise if:

- you are giving advice to a *person* who is or who is contemplating becoming a reversion occupier, a reversion purchaser or a reversion transferee; and
- the advice relates to the merits of his entering into a home reversion plan in that capacity or varying the terms of a plan that he has already entered into.

Advice on the merits of varying the terms of a plan will only be regulated where the plan was originally established on or after 6 April 2007. However, advice given to a reversion transferee on the merits of his entering into a plan that was originally established before 6 April 2007 will be subject to regulation. See Q21 for more detail about when activities are regulated if a plan was originally established before 6 April 2007.

Advice given to a person on the merits of his transferring rights or obligations or interests in land under a plan to another person is not regulated.

Much of the detailed guidance on *advising on regulated mortgage contracts* in PERG 4.6 may be applied to the activity of *advising on a home reversion plan*.

Q20. What exclusions may be available to me if I am advising on home reversion plans?

The main exclusions that are available include:

- advice given in a periodical publication, broadcast or other form of regularly updated news or information service (article 54 of the *Regulated Activities Order*);
- advice that is a necessary part of other services provided by a person in the course of carrying on a profession or business other than a *regulated activity* (article 67 of the *Regulated Activities Order*); and
- *overseas persons* (article 72 of the *Regulated Activities Order*) (see Q39).

Detailed guidance on the exclusion in article 54 is in PERG 7.

Q21. I can see that the fact that the home reversion plan was originally established before 6 April 2007 can affect whether the services that I provide to parties to the plan after that date are regulated. Can you summarise the position in this respect please?

Yes. This all depends on the combination of the date of entry or variation and the capacity in which your customer enters or entered into the plan. The following table clarifies when your services will be regulated activities and when they will not.

Potential home reversion plan activity	Whether the activity is regulated if undertaken on or after 6 April 2007 when the plan was originally established before 6 April 2007
Entering into a plan as reversion purchaser (see Q8)	N/A – this activity will only take place when the plan is first established
Entering into a plan as reversion transferee (see Q8)	Yes
Administering a plan (see Q10)	No
Arranging (see Q12) for a person to enter into a plan as:	
(a) a reversion purchaser or a reversion occupier	N/A – this activity will only take place when the plan is first established
(b) a reversion transferee	Yes

Arranging variations (see Q12) of a plan	No
Advising (see Q19) a person on entering into a plan in his capacity as:	
(a) a reversion purchaser or a reversion occupier	N/A – this activity will only take place when the plan is first established
(b) a reversion transferee	Yes
Advising (see Q19) a person on varying the terms of a plan	No

Q22. Will changes involving the circumstances of the reversion occupier that may take place after the plan has been entered into (such as moving house, marriage or change of occupants) have any implications in terms of regulated activity?

This depends on the facts and is a question of degree that requires an assessment against the criteria that make up the definition of a home reversion plan. There are two main issues that would need to be considered. These are:

- is the change likely to cause a new plan to be entered into on or after 6 April 2007; and
- does the change involve a variation of the terms of the plan (if it was originally entered into on or after 6 April 2007) such as to vary the obligations of the provider or the occupier?

Broadly speaking, it would seem likely that, if the occupier were to move house, there would be a need for the existing plan to be terminated and a new plan to be entered into. Where this happens on or after 6 April 2007, the person who enters into the new plan as provider and anyone arranging or advising on the new plan will potentially need to be authorised or exempt. Changes such as may occur due to marriage or change of occupants, change of other relevant details or drawdown of funds under a staggered payment arrangement may necessitate a new plan or may involve a variation in the existing plan depending on the extent to which they alter the obligations of the provider or the occupier. Where such changes do involve a variation, anyone arranging or advising on the variation would potentially need to be authorised or exempt. But this applies only where the plan was originally entered into on or after 6 April 2007.

14.4 Activities relating to home purchase plans

Q23. What is a home purchase plan?

Broadly speaking, a *home purchase plan* is an arrangement under which, at the time it is entered into:

- a *person* (the ‘home purchase provider’) buys a qualifying interest, or an undivided share of a qualifying interest, in land (other than timeshare accommodation) in the *United Kingdom*;
- an individual or a trustee whose beneficiary is an individual (the ‘home purchaser’) is obliged to buy that interest over the course of or at the end of a specified period; and
- the individual or a related person is entitled to use at least 40% of the land as a dwelling during that fixed period and intends to do so.

Where an undivided share of a qualifying interest is bought, the interest must be held on trust for the home purchase provider and the individual or trustee as beneficial tenants in common.

This means that an arrangement is not a home purchase plan if:

- the home purchaser is not an individual or trustees;
- the land is used for the purpose of letting as a dwelling to someone other than a related person of the individual who is obliged to buy it;
- the land is used primarily for business purposes; or
- the land is overseas.

A related person, in relation to an individual, means:

- that person’s spouse or civil partner; or
- a person (whether or not of the same sex) whose relationship with that person has the characteristics of a husband and wife relationship; or
- that person’s:
 - parent or grandparent;
 - child or grandchild; or
 - sibling.

Q24. Are home purchase plans limited to arrangements designed to comply with Islamic principles?

There is nothing in the definition of a *home purchase plan* to suggest that this is the case. However, it is clear from the comments made by HM Treasury in relation to the introduction of the Regulation of Financial Services (Land Transactions) Act 2005 that the definition is primarily directed at arrangements of this kind.

Q25. Will all Islamic home financing arrangements be home purchase plans?

No. Murabaha arrangements involve the homeowner buying the property from the provider on deferred payment terms. These types of arrangement will be *regulated*

mortgage contracts assuming that they meet the necessary conditions including that there is a first legal charge over the property (see PERG 4).

Ijara arrangements (where the provider buys the land and allows the customer to occupy it whilst also making regular payments towards eventually buying the land) and diminishing Musharaka arrangements (where the provider and the customer share an interest in the land and the customer gradually acquires a greater interest in the land over a period of time) will be *home purchase plans* provided they meet the necessary conditions (see Q23).

A home purchase plan may also satisfy the requirements for a *regulated mortgage contract*. Where this arises, the plan is treated as a home purchase plan and not a regulated mortgage contract.

Q26. When will I be carrying on the activity of entering into a home purchase plan?

You will carry on this activity by entering into a *home purchase plan* as the home purchase provider. Unlike a reversion transferee under a *home reversion plan*, you will not be carrying on a regulated activity purely as a result of acquiring rights, obligations or interests in land from the provider.

Q27. What exclusions may be available to me if I am entering into home purchase plans as a provider?

The main exclusions are:

- for trustees who enter into a plan where the home purchaser is an individual who is a beneficiary under the trust or a related person (article 66(6C) of the *Regulated Activities Order*); and
- for *overseas persons* who satisfy certain conditions (see Q39).

Q28. When will I be carrying on the activity of administering a home purchase plan?

This will arise if you carry out either or both of the following functions in relation to a plan that was entered into by the home purchase provider by way of business on or after 6 April 2007:

- notifying the home purchaser of changes in payments due under the plan, or of other matters of which the plan requires him to be notified; and
- taking any necessary steps for the purposes of collecting or recovering payments due under the plan from the home purchaser.

But you will not be treated as *administering a home purchase plan* merely because you have, or you exercise, a right to take action for the purposes of enforcing the plan (or to require that such action is or is not taken).

Q29. I propose to administer home purchase plans. How will I know if the plan I propose to administer has been entered into by way of business?

In most cases, this will be obvious because the provider will be a body corporate whose business involves being a provider under such plans and, in the majority of cases, should be an *authorised person*. We understand that this is the usual situation with Islamic home financing arrangements. However, if the plan were to have been entered into by an investor, the factors set out in Q38 will need to be considered to determine whether it was entered into by way of business. A typical example of a plan not entered into by way of business would be where the provider is a friend or relative who does not seek to profit from acting as the provider. Another example might be a plan entered into by a charitable organisation that occasionally purchases interests in land with sums derived from charitable donations and that does so on non-commercial terms.

Q30. What exclusions may be available to me if I am administering home purchase plans?

Specific exclusions may apply if you are not an *authorised person* and:

- you arrange for an authorised person with the appropriate *Part IV permission* to administer the plan – this includes where you administer the plan for a period of up to one month following the termination of such an arrangement; or
- you administer the plan under an agreement with an authorised person who has Part IV permission to administer such a plan.

The other main exclusions are those:

- for trustees who administer a plan where the home purchaser is an individual who is a beneficiary under the trust or a related person (article 66(6C) of the *Regulated Activities Order*); and
- for *overseas persons* who satisfy certain conditions (see Q39).

Q31. When will I be carrying on the activity of arranging home purchase plans?

There are three types of arranging activity that are regulated. These are making arrangements:

- (1) for another person to enter into a plan as a home purchaser;
- (2) for another person being a home purchaser to vary the terms of a plan entered into by him on or after 6 April 2007, in such a way as to vary his obligations under that plan; and
- (3) with a view to a person who participates in the arrangements entering into a plan as a home purchaser.

But none of these arranging activities will apply to you if they relate to a plan to which you are or will, as a result of your arranging activities, become a party (article 28A of the *Regulated Activities Order*).

You will only be making arrangements under (1) or (2) if your actions are such as to bring about the entry into the plan or the variation as the case may be (article 26 of the *Regulated Activities Order*). This means that your involvement must be material to whether the transaction occurs. For example, assisting a home purchaser by completing the necessary application forms on their behalf or acting as their agent or attorney in negotiating entry will amount to bringing about the transaction.

Arranging activities under (3) will typically include making regular introductions of prospective home purchasers to a provider or intermediary.

Unlike home reversion plans, arranging for a person to enter into, or vary, a plan as a provider is not, itself, a regulated activity.

Q32. What exclusions may be available to me if I am arranging home purchase plans?

If you are an *unauthorised person* the following exclusions may be available to you:

- where you are arranging for a transaction to be entered into with or through an *authorised person* (article 29 of the *Regulated Activities Order*) (see Q33);
- where you have arranged for an authorised person to administer the plan or are administering it yourself during the period of one month following the termination of your arrangement with the authorised person (article 29A(3) of the *Regulated Activities Order*).

Whether or not you are an unauthorised person, the other main exclusions that may apply include:

- introductions made with a view to the provision of regulated independent advice (article 33 of the *Regulated Activities Order*) (see Q17 which applies equally to *home purchase plans*);
- introductions made to a regulated person who carries on home reversion plan activities (article 33A of the *Regulated Activities Order*) (see Q34);
- arrangements that are a necessary part of other services provided by a person in the course of carrying on a profession or business other than a *regulated activity* (article 67 of the *Regulated Activities Order*); and
- *overseas persons* (article 72 of the *Regulated Activities Order*) (see Q39).

33. When will the exclusion in article 29 of the Regulated Activities Order be available to me if I am arranging home purchase plans?

The exclusion will apply to you when, as an *unauthorised person*, you are arranging for a prospective home purchaser (your client) to enter into a plan with an authorised home purchase provider or through an authorised intermediary;

This is subject to your meeting certain conditions which are, broadly speaking, that:

- you must not advise your client on the merits of his entering into the transaction; and
- you must not be paid by anyone other than your client.

The requirement that you do not receive any payment other than from your client does not prevent you receiving payment from the *authorised person* but you must then treat the sums paid to you as belonging to your client. There is nothing to prevent you then using the sums to offset payments due to you from your client for services rendered to him. This is provided that you have your client's agreement to do so.

Q34. When will the exclusion in article 33A of the Regulated Activities Order be available to me if I am arranging home purchase plans?

Broadly speaking, the exclusion will apply where:

- the arranging activity you carry on is limited to *making arrangements with a view to home purchase plans*;
- you make introductions of prospective home purchasers (your client) to an *authorised person*, an *appointed representative* or an *overseas person*;
- you do not receive any money paid by your client in relation to the transaction other than a sum that is due to you for your own account (for example, your fee for providing the introductory service); and
- you disclose to your client certain information about your relationship with the person to whom you are effecting introductions and about any reward you may receive for doing so.

Q35. When will I be carrying on the activity of advising on home purchase plans?

This will arise if you are:

- giving advice to a person who is or who is contemplating becoming a home purchaser; and
- the advice relates to the merits of his entering into a *home purchase plan* in that capacity or varying the terms of a plan that he has already entered into.

Advice on the merits of varying the terms of a plan is only regulated when the plan was entered into on or after 6 April 2007.

This differs from the position in relation to *home reversion plans* where advice given to the provider is also regulated.

Much of the detailed guidance on *advising on regulated mortgage contracts* in PERG 4.6 may be applied to the activity of *advising on a home purchase plan*.

Q36. What exclusions may be available to me if I am advising on home purchase plans?

The main exclusions that are available include:

- advice given in a periodical publication, broadcast or other form of regularly updated news or information service (article 54 of the *Regulated Activities Order*);
- advice that is a necessary part of other services provided by a person in the course of carrying on a profession or business other than a *regulated activity* (article 67 of the Regulated Activities Order); and
- *overseas persons* (article 72 of the Regulated Activities Order) (see Q39).

Detailed guidance on the exclusion in article 54 is in PERG 7.

Q37. Will changes involving the circumstances of the home purchaser that may take place after the plan has been entered into (such as moving house, marriage or change of occupants) have any implications in terms of regulated activity?

This depends on the facts and is a question of degree that requires an assessment against the criteria that make up the definition of a home purchase plan. There are two main issues that would need to be considered. These are:

- is the change likely to cause a new plan to be entered into on or after 6 April 2007? and
- does the change involve a variation of the terms of the plan (if it was originally entered into on or after 6 April 2007) such as to vary the obligations of the home purchaser?

Broadly speaking, it would seem likely that, if the home purchaser were to move house, there would be a need for the existing plan to be terminated and a new plan to be entered into. Where this happens on or after 6 April 2007, the person who enters into the new plan as provider and anyone arranging, or advising the home purchaser on, the new plan will potentially need to be authorised or exempt. Changes such as may occur due to marriage or change of occupants or of other relevant details may necessitate a new plan. Alternatively, they may involve a variation in the existing plan, depending on the extent to which they alter the obligations of the home purchaser. Where such changes do involve a variation, anyone advising the home purchaser on, or arranging, the variation would potentially need to be authorised or exempt. But this applies only where the plan was originally entered into on or after 6 April 2007.

14.5 The ‘by-way-of-business’ test

Q38. How do I know if I am carrying on regulated activities by way of business?

Whether or not any particular *person* will meet the requirement that he carries on a *regulated activity* by way of business and so needs *authorisation* or exemption will invariably depend on that person’s individual circumstances. A number of factors need to be taken into account in determining whether the test is met. These include:

- the degree of continuity;
- the existence of a commercial element;
- the scale of the activity;
- the proportion which the activity bears to other activities carried on by the same person but which are not regulated; and
- the nature of the particular regulated activity that is carried on.

Corporate plan providers and those who provide professional services to them or to home occupiers are likely to be carrying on their activities by way of business. Unpaid individuals who act as trustees for home occupiers are not likely to be.

With *home reversion plans*, it is quite possible that the reversion provider may be an individual who is acting purely in the capacity of investor. Such a person may not be acting by way of business when the criteria listed above are applied to his particular circumstances.

14.6 Carrying on a regulated activity in the United Kingdom

Q39. Does a person who acts as provider, administrator, arranger or adviser in relation to home reversion plans or home purchase plans from overseas and without maintaining an office in the UK need to be an authorised or exempt person?

The position on territorial application is complex. Detailed guidance on this aspect is provided in relation to regulated mortgage activities in PERG 4.11 and that guidance may generally be applied to home finance activities.

But, briefly, there are two issues to be considered by such a person:

- am I carrying on a home finance activity in the *United Kingdom*? and
- if so, does the exclusion for *overseas persons* in article 72 of the *Regulated Activities Order* apply to me?

Whether you are carrying on the activity in the UK depends on a combination of factors. In very broad terms, however, as an overseas person, you are more likely than not to be carrying on a home finance activity in the UK if the home occupier or reversion provider is normally resident in the UK at the time that he enters into the plan. The table that follows applies this broad principle to the various permutations taking account of the conditions applying to the exclusions for home finance activities under article 72.

Table indicating whether authorisation or exemption is likely to be needed by a person who is carrying on home finance activities from overseas.

Activity carried on by overseas	Where the reversion occupier or home purchaser is or was normally resident in the UK at	Where the reversion occupier or home purchaser is or was not normally resident in the
---------------------------------	-----------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------

person	the time he enters or entered into the plan		UK at the time he enters or entered into the plan	
	Home reversion plan	Home purchase plan	Home reversion plan	Home purchase plan
Entering into or administering.	Yes	Yes	No	No
Arranging for persons to enter into plans.	Yes	Yes	No, provided the reversion purchaser or the reversion transferee, as the case may be, is or was also not normally resident in the UK.	No
Arranging variations.	Yes	Yes	No	No
Advising.	Yes	Yes	No, unless the reversion occupier, reversion provider or reversion transferee is located in the UK at the time the advice is given to him.	No, unless the home purchaser is located in the UK at the time the advice is given.

14.7 Exemptions

Q40. Am I an exempt person in relation to home finance activities?

Yes, if you are:

- a *person* who is specifically exempt under the Financial Services and Markets Act 2000 (Exemption) Order 2001, such as a local authority or a registered social landlord; or
- an *appointed representative* whose agreement with his principal permits him to carry on the activities in question; or
- an *exempt professional firm*.

Q41. What home finance activities can I carry on as an appointed representative?

You will be able to carry on any of the following *regulated activities*:

- *arranging (bringing about) a home reversion plan* or *arranging (bringing about) a home purchase plan*; or
- *making arrangements with a view to home reversion plans* or *making arrangements with a view to home purchase plans*; or
- *advising on a home reversion plan* or *advising on a home purchase plan*; or
- agreeing to do any of the above.

You will not be able to carry on any of the following *regulated activities*:

- *entering into a home reversion plan* or *entering into a home purchase plan*; or
- *administering a home reversion plan* or *administering a home purchase plan*; or
- agreeing to do either of the above.

Q42. I am an exempt professional firm. Will I be able to carry on any of the regulated activities relating to home reversion plans and home purchase plans without needing FSA authorisation?

This depends on the activity in question. Subject to your being able to satisfy the general requirements of Part XX of the Financial Services and Markets Act 2000 you will be able:

- to carry on the regulated activities of:
 - *entering into a home reversion plan*; or
 - *entering into a home purchase plan*; or
 - *administering a home reversion plan*; or
 - *administering a home purchase plan*; or
 - agreeing to do any of these things,

but only where you are acting as a trustee or personal representative and the *reversion occupier* or *home purchaser* is a beneficiary under the trust, will or intestacy;

- to carry on the regulated activities of:

- *arranging (bringing about) a home reversion plan; or*
- *arranging (bringing about) a home purchase plan; or*
- *making arrangements with a view to home reversion plans; or*
- *making arrangements with a view to home purchase plans; or*
- agreeing to do any of these things,

without any further restriction; and

- to carry on the regulated activities of:
 - *advising on a home reversion plan; or*
 - *advising on a home purchase plan; or*
 - agreeing to do either of these things,

but only provided that:

- the advice is given to a trustee or a reversion provider who, in either case, is not an individual; or
- the advice is given to an individual but does not amount to a recommendation to enter into a plan as reversion provider, *reversion occupier* or *home purchaser*; or
- the advice is given to an individual and does amount to a recommendation to enter into a plan as reversion provider, *reversion occupier* or *home purchaser* with a reversion provider or a *home purchase provider* but only if the advice endorses a corresponding recommendation that has been given to the individual by a suitably authorised or exempt person.

14.8 Financial promotions

Q43. Are there any restrictions if I wish to promote my home finance activities?

Yes. The restriction in section 21 of the Financial Services and Markets Act 2000 will apply, broadly speaking, to any communication which:

- is made in the course of business; and
- invites or induces persons to:
 - become a *reversion occupier* or *home purchaser*; or
 - become a reversion provider; or
 - vary the terms of a *home reversion plan* or a *home purchase plan* that was originally established on or after 6 April 2007; or
 - be provided, as a reversion occupier or home purchaser or as a reversion provider, with arranging or advisory services.

Communications of this kind are termed *financial promotions*.

Promotions of home finance administration services or promotions intended to dissuade persons from entering into or varying the terms of regulated plans will not be financial promotions and so no restriction will apply to them.

The following table summarises when the restriction will apply.

Table indicating when the financial promotion restriction will apply to communications about home finance plans.

A communication inviting or inducing ...	To...	Will be a financial promotion?
...potential reversion occupiers or home purchasers	...enter into a home reversion plan or a home purchase plan	Yes
...potential home reversion purchasers or transferees	...enter into a home reversion plan	Yes (in the case of transferees, regardless of whether the plan was originally established before 6 April 2007)
...potential home purchase providers	...enter into a home purchase plan	No
...potential or existing: <ul style="list-style-type: none"> • reversion occupiers or home purchasers; or • reversion or home purchase providers 	...be provided with administration services	No
...potential or existing: <ul style="list-style-type: none"> • reversion occupiers or home purchasers; or • reversion purchasers or transferees 	...be provided with arranging or advisory services	Yes (but where the promotion relates to such a person varying the terms of a plan, this is only where the plan was originally established on or after 6 April 2007)
...potential or existing home purchase providers	...be provided with arranging or advisory services	No
...potential or existing: <ul style="list-style-type: none"> • reversion occupiers or home purchasers; or • reversion or home purchase providers 	...decline from entering into or varying the terms of a plan	No
...potential or existing: <ul style="list-style-type: none"> • reversion occupiers or home purchasers; or 	...dispose of rights, obligations or interests in land that they have under a	No

<ul style="list-style-type: none"> • reversion or home purchase providers 	plan	
------------------------------------------------------------------------------------------	------	--

Q44. What are the restrictions that apply if I am making a financial promotion about home finance plans or activities?

The *financial promotion* will need either to be communicated or approved by an *authorised person* or to be exempt under the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the *Financial Promotion Order*).

If you are an authorised person who is communicating or approving the financial promotion and it is not exempt you will need to comply with the provisions of the Mortgages and Home Finance: Conduct of Business Sourcebook (MCOB 3 for financial promotions of home reversion plans and MCOB 2.2.6R for financial promotions of home purchase plans).

Q45. What exemptions may be likely to be available to me when I communicate financial promotions about home finance plans or activities?

A number of exemptions may be available. Those most likely to apply are summarised below.

(1) Introductions (article 15 of the *Financial Promotion Order*). This applies, broadly speaking, where you introduce clients to an *authorised person* or an *exempt person* in the circumstances covered by the exclusion in article 29 of the *Regulated Activities Order* (see Q17). But this is provided the person to whom you make the introduction is not your close relative or a member of your *group*. In addition, there is an exemption for promotions concerning introductions relating specifically to home finance plans – see (5).

(2) Exempt persons (article 16 of the *Financial Promotion Order*). This applies, subject to certain conditions, if you are an exempt person such as a local authority, a registered social landlord or an *appointed representative*.

(3) Generic promotions (article 17 of the *Financial Promotion Order*). This applies to a general promotion that does not identify any particular persons as being either providers of, or as offering arranging or advisory services relating to, home finance plans.

(4) One-off promotions (articles 28 and 28A of the *Financial Promotion Order*). These apply to promotions that are intended for a particular recipient (or group of connected recipients).

(5) Introductions relating to home finance plans (article 28B of the *Financial Promotion Order*). This applies to real time financial promotions relating to home finance plans for the purpose of making introductions. This exemption is subject to the same conditions as apply to the exclusion in article 33A of the *Regulated Activities Order* (see Q18 and Q34); and

(6) Advice centres (article 73 of the Financial Promotion Order). This applies to bodies such as citizens' advice bureaux when they make promotions about home finance plans in the course of their business of providing free advice about debt matters.

Further guidance on these and other exemptions from the financial promotion restriction is in Chapter 8 of PERG (PERG 8).

14.9 Transitional provisions

Q46. I will need to obtain authorisation to carry on home finance activities. What will happen to me if I do not obtain authorisation by 6 April 2007?

Transitional arrangements have been put in place. The broad effect of these arrangements is that you will be able to benefit from interim authorisation as respects any of the new regulated activities that relate to home reversion plans or home purchase plans pending the final determination of your application. This is provided:

- you were carrying on the regulated activities, for which you are seeking authorisation, before 6 November 2006; and
- your application for authorisation was received by the FSA on or before 23 March 2007.

An interim authorisation granted under these transitional arrangements will lapse:

- in the case of the regulated activities involving providing or administering home reversion or home purchase plans, when the application has been finally determined; and
- in the case of the regulated activities involving arranging or advising on home reversion or home purchase plans, on the earlier of the date on which the application is finally determined or 6 April 2008.

Q47. I am already an authorised person. Will I need to extend the scope of my existing permission?

Yes, you will need to apply for a variation of permission in the normal way if you wish to carry on any of the new regulated activities. As with applications for authorisation (see Q46), you will benefit from interim permission if your application is not finally determined by 6 April 2007 provided:

- you were carrying on the regulated activities, for which you are seeking to vary your permission, on or before 6 November 2006; and
- your application to vary your permission was received by the FSA on or before 23 March 2007.

Your interim permission will lapse in the same circumstances as an application for authorisation (see Q46).

Q48. Can I avoid the need to be authorised by becoming an appointed representative of an authorised person?

You cannot be an *appointed representative* for the purpose of providing or administering home reversion or home purchase plans. But you can be an appointed representative for advising on or arranging such plans.

If you are an appointed representative prior to 6 April 2007 and you intend to carry on any of the new regulated activities, you will need to consider whether your existing agreement with your principal will cover those activities that an appointed representative is permitted to undertake or whether it will need to be amended to do so.

You may currently be an appointed representative of a life office for the purpose of advising on or arranging deals in its investment products and also undertake unregulated activities in relation to home reversion or home purchase plans offered by third parties. If those unregulated activities include activities that will become regulated from 6 April 2007, you will need either to become the appointed representative of another appropriately authorised firm or to seek authorisation yourself. This is because an appointed representative of a life office can only undertake regulated activities that arise directly from the life office's insurance business.

Remember also that a person cannot generally be authorised and exempt as an appointed representative at the same time. However, this rule is waived if you obtain interim authorisation to carry on the new regulated activities and wish, pending determination of your application for authorisation, to continue to conduct existing regulated activities as an appointed representative.

Annex B

Amendments to the Perimeter Guidance manual (PERG)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

2.3.2 G There is power in the *Act* for the Treasury.....

- (2) Except as stated in *PERG* 2.3.2G (2A) and *PERG* 2.3.2G (3), the business element is not to be regarded as satisfied for any of the *regulated activities* carried on in relation to *securities* or *contractually based investments* (or for those *regulated activities* carried on in relation to 'any property') unless a *person* carries on the business of engaging in one or more of the activities. This also applies to the *regulated activities* of ~~arranging in relation to a regulated mortgage contract and advising on a home finance transaction~~ regulated mortgage contracts and arranging a home finance transaction. This is a narrower test than that of carrying on *regulated activities* by way of business (as required by section 22 of the *Act*), as it requires the *regulated activities* to represent the carrying on of a business in their own right.

...

- (4) The business element for all other *regulated activities* is that the activities are carried on by way of business. This applies to the activities of *effecting* or *carrying out contracts of insurance*, certain activities relating to the Lloyd's market, *entering as provider into a funeral plan contract* and *entering into a home finance transaction* or *administering a home finance plan* ~~regulated mortgage contracts~~ (see *PERG* 2.7.20 G).

...

Rights under a home reversion plan

2.6.27A G In accordance with article 63B(3)(a) of the *Regulated Activities Order*, a home reversion plan is an arrangement under which, at the time it is entered into:

- (1) a person (the "reversion purchaser") buys all or part of a qualifying interest in land (other than timeshare accommodation) in the *United Kingdom* from an individual or trustees (the "*reversion occupier*");
- (2) the reversion occupier (or, where trustees are concerned, an individual who is a beneficiary of the trust), or a related *person* of either, is entitled, and intends, to use at least 40% of that land as or in

connection with a dwelling; and

- (3) the entitlement to occupy ends on the occurrence of any one or more of the following events:
 - (a) the end of a specified period of at least twenty years; or
 - (b) the death of the individual; or
 - (c) the individual enters a care home.

Detailed guidance on this is set out in PERG 14.3(Guidance on home reversion and home purchase activities).

Rights under a home purchase plan

2.6.27B G In accordance with article 63F(3)(a) of the *Regulated Activities Order*, a *home purchase plan* is an arrangement under which, at the time it is entered into:

- (1) a person (the “*home purchase provider*”) buys a qualifying interest in land or an undivided share of a qualifying interest in land (other than timeshare accommodation) in the *United Kingdom*;
- (2) where an undivided share of a qualifying interest is bought, the interest is held on trust for the home purchase provider and the individual or trustee as beneficial tenants in common;
- (3) an individual or trustees (the “*home purchaser*”) is obliged to buy the interest bought by the *home purchase provider* over the course of or at the end of a specified period; and
- (4) the *home purchaser* (or, where trustees are concerned, by an individual who is a beneficiary of the trust), or a related person of either, is entitled, and intends, to use at least 40% of that land as or in connection with a dwelling.

Detailed guidance on this is set out in PERG 14.4 (Guidance on home reversion and home purchase activities).

2.6.28 G Rights to, or interests in, all the *specified investments* in PERG 2.6 (except rights to, or interests in, rights under a ~~*regulated mortgage contract*~~ *home finance transaction*) are themselves treated as *specified investments*.....

...

Arranging deals in investments and arranging a ~~regulated mortgage activities~~ home finance transaction

2.7.7 G ...

2.7.7A G There are eight ~~four~~ arranging activities that are *regulated activities* under

the *Regulated Activities Order*. These are:

...

- (3) *arranging (bringing about) regulated mortgage contracts*, which includes arranging for another *person* to vary the terms of a *regulated mortgage contract* entered into by him as borrower after 31 October 2004 (article 25A(1)); ~~and~~
- (4) *making arrangements with a view to regulated mortgage contracts* (article 25A(2));
- (5) *arranging (bringing about) a home reversion plan*, which includes arranging for another person to vary the terms of a home reversion plan entered into by him as the original reversion provider (and not merely as a person to whom the rights or obligations or the interest in land may be transferred) or as reversion occupier on or after 6 April 2007 (article 25B(1));
- (6) *making arrangements with a view to a home reversion plan* (article 25B(2));
- (7) *arranging (bringing about) a home purchase plan*, which includes arranging for another person to vary the terms of a home purchase plan entered into by him as home purchaser on or after 6 April 2007 (article 25C(1)); and
- (8) *making arrangements with a view to a home purchase plan* (article 25C(2)).

...

- 2.7.7C G Further *guidance* on the arranging activities as they relate to *regulated mortgage contracts* home finance transactions and *contracts of insurance* is in *PERG 4.5* (Arranging regulated mortgage contracts), *PERG 14.3* and *PERG 14.4* (Guidance on home reversion and home purchase activities) and *PERG 5.6* (The *regulated activities*: arranging deals in, and making arrangements with a view to transactions in, contracts of insurance) respectively.

...

Advising on home reversion plans

- 2.7.16C G Under article 53B of the *Regulated Activities Order*, giving advice to a person in his capacity as reversion occupier or reversion provider is a regulated activity if it is advice on the merits of the person:

- (1) entering into a particular home reversion plan; or

(2) varying the terms of a *home reversion plan*.

Advice on varying terms as referred to in (2) only comes within article 53B where the plan was entered into by the *person* on or after 6 April 2007 and the variation varies his obligations under the plan. Where a *person* is entering into the plan as reversion provider purely as a result of rights or obligations, or the interest in land, being transferred to him, advice given to him on the merits of the transaction is only regulated where the plan was originally entered into on or after 6 April 2007. Further *guidance* on the scope of the *regulated activity* under article 53B is in PERG 14.3 (Guidance on home reversion and home purchase activities).

Advising on a home purchase plan

2.7.16D G Under article 53C of the *Regulated Activities Order*, giving advice to a *person* in his capacity as *home purchaser* is a *regulated activity* if it is advice on the merits of the *person*:

(1) entering into a particular *home purchase plan*; or

(2) varying the terms of a *home purchase plan*.

Advice on varying terms as referred to in (2) only comes within article 53C where the plan is entered into by the *person* on or after 6 April 2007 and the variation varies the *person's* obligations under the plan. Further *guidance* on the scope of the *regulated activity* under article 53C is in PERG 14.4 (Guidance on home reversion and home purchase activities).

...

Entering into and administering a home reversion plan

2.7.20A G *Entering into a home reversion plan* and *administering a home reversion plan* are *regulated activities* under article 63B of the *Regulated Activities Order* (Regulated home reversion plans). *Guidance* on these *regulated activities* is in PERG 14.3 (Guidance on home reversion and home purchase activities).

Entering into and administering a home purchase plan

2.7.20B G *Entering into a home purchase plan* and *administering a home purchase plan* are *regulated activities* under article 63F of the *Regulated Activities Order* (Regulated home purchase plans). *Guidance* on these *regulated activities* is in PERG 14.4 (Guidance on home reversion and home purchase activities).

...

Arranging deals in investments and arranging a regulated mortgage

contracts home finance transaction

2.8.6 G The various activities that involve *arranging* fall into two general types. These are:

- (1) those relating to arranging a particular transaction or a contract or plan variation (articles 25(1), 25A(1), 25B(1) and 25C(1) of the *Regulated Activities Order*); and
- (2) those relating to making arrangements with a view to persons entering into certain transactions (articles 25(2), 25A(2), 25B(2) and 25C(2) of the *Regulated Activities Order*).

The exclusions in relation to the *regulated activities* of *arranging* under articles 25(1) and (2) are of particular relevance in the context of raising corporate finance. ~~Many~~ Some of the exclusions outlined ~~below in PERG 2.8.6A~~ relate to all of the arranging activities but most relate only to certain of those activities as indicated. ~~both the elements of the activity referred to in (1) and (2); that is, *arranging (bringing about) deals in investments* (under article 25(1) of the *Regulated Activities Order*) and *making arrangements with a view to transactions in investments* (under article 25(2) of the *Regulated Activities Order*).~~ But several exclusions relate only to one of those activities.

2.8.6A G The exclusions in the *Regulated Activities Order* that relate to the various *arranging* activities are as follows.

- (1) Under article 26, arrangements that do not or would not bring about the transaction to which they relate are excluded from the *arranging* activities that relate to a particular transaction (see *PERG 2.8.6G(1)*) only. A *person* will bring about a transaction or a contract or plan variation only if his involvement in the chain of events leading to a transaction or contract or plan variation is of sufficient importance that, without that involvement, it would not take place. This will require something more than the mere giving of advice (although giving such advice may be the *regulated activity* of *advising on investments* or *advising on home finance transactions*).
- (2) Under article 27, simply providing the means by which parties to a transaction (or possible transaction) are able to communicate with each other is excluded from arrangements made with a view to persons entering into certain transactions (see *PERG 2.8.6G(2)*) only. This will ensure that *persons* such as Internet service providers or telecommunications networks are excluded if all they do is provide communication facilities (and these would otherwise be considered to be arrangements made with a view to the participants entering into transactions). If a *person* makes arrangements that go beyond providing the means of communication, and add value to what is provided, he will lose the benefit of this exclusion.

(3) Under article 28, arranging investment transactions to which the arranger is to be a party is excluded from both article 25(1) and (2). The main purpose is to ensure that a person is not regarded as arranging deals for another when the transaction in question is one to which he intends to be a party. As a result, a person cannot both be engaging in a dealing activity (as principal or agent) and arranging deals for another as regards any particular transaction. But where the transaction involves a contract of insurance, article 28 will not apply if the person making the arrangements:

(a) is the only policyholder; or

(b) as a result of the transaction, would become the only policyholder.

Under article 28A, a person is excluded from any of the arranging activities that relate to home finance transactions (2) if he is to enter into the contract or plan to which the arrangements relate or if he is or is to become a party to a contract or plan that is varied or to be varied.

(4) Under article 29, an unauthorised person who, on behalf of a client, arranges transactions or contract or plan variations, with or through an authorised person, is excluded from each of the arranging activities if specified conditions as to advice and remuneration are satisfied. For example, the exclusion is dependent on the client not receiving any advice on the transactions or variations from the unauthorised person making the arrangements. The exclusion does not apply where the investment is a contract of insurance.

(5) Under article 29A, an unauthorised person is excluded from the regulated activity of arranging for another person to vary the terms of a regulated mortgage contract entered into on or after 31 October 2004 (article 25A(1)(b)) or a home reversion plan or home purchase plan entered into on or after 6 April 2007 (articles 25B(1)(b) and 25C(1)(b)). This is if the arranging is the result of:

(a) anything done in the course of the administration, by an authorised person:

(i) of a regulated mortgage contract in the way set out in article 62(a);

(ii) of a home reversion plan in the way set out in article 63C(a);

(iii) of a home purchase plan in the way set out in article 63G(a); or

(b) anything done by the unauthorised person in connection with the administration:

- (i) of a regulated mortgage contract in the way set out in article 62(b);
 - (ii) of a home reversion plan in the way set out in article 63C(b);
 - (iii) of a home purchase plan in the way set out in article 63G(b).
- (6) Under article 30, arranging investment transactions in connection with lending on the security of contracts of insurance is excluded, from article 25(1) and (2) but only where a person is not carrying on insurance mediation or reinsurance mediation.
- (7) Under article 31, making arrangements for finance (in whatever form) to be supplied to a person by a third party is excluded from article 25(1) and (2) if the finance is given in exchange for an instrument acknowledging the debt. This mirrors the exclusion from dealing in investments as principal in similar circumstances (see PERG 2.8.4G (3)).
- (8) Under article 32, arrangements the only purpose of which is to provide finance to enable persons to enter into investment transactions are excluded from article 25(2) only. There is no equivalent exemption from article 25(1). But arrangements for the provision of finance will only be caught by that provision if the arrangements actually bring about the transaction.
- (9) Under article 33, making arrangements under which persons will be introduced to third parties who will provide independent services (consisting of advice or the exercise of discretion in relation to certain investments) is excluded from articles 25(2), 25A(2), 25B(2) and 25C(2) only. The party to whom the introduction is made must be of a specified standing (including that of an authorised person). The exclusion does not apply where the arrangements relate to a contract of insurance.
- (10) Under article 33A, making arrangements for introducing persons to:
 - (a) an authorised person who has permission to carry on certain regulated activities concerned with home finance transactions;
or
 - (b) an appointed representative who is able to carry on any of those activities without breaching the general prohibition; or
 - (c) an overseas person who carries on any of those activities;is excluded from articles 25A(2), 25B(2) and 25C(2) subject to certain conditions related to the receipt of client money and the

disclosure of certain information.

- (11) Under article 34, a company is not carrying on a regulated activity under article 25(1) or (2) of the Regulated Activities Order (Arranging deals in investments) by arranging for the issue of its own shares or share warrants and a person is not doing so by arranging for the issue of his own debentures or debenture warrants.
- (12) Under article 35, a body carrying out international securities business of a specified type can apply to the Treasury for approval as an international securities self-regulating organisation (ISSRO). Arrangements made in order to carry out the functions of an ISSRO are excluded from article 25(1) and (2). The exclusion applies whether the arrangements are made by the ISSRO or by a person acting on its behalf.
- (13) The following exclusions from both article 25(1) and (2) (outlined in PERG 2.9) apply in specified circumstances where a *person* makes arrangements:
- (a) while acting as trustee or personal representative (see PERG 2.9.3 G);
 - (b) in connection with the carrying on of a profession or of a business not otherwise consisting of regulated activities (see PERG 2.9.5 G);
 - (c) in connection with the sale of goods or supply of services (see PERG 2.9.7 G);
 - (d) in connection with certain transactions by a group member or by a participator in a joint enterprise (see PERG 2.9.9 G);
 - (e) in connection with the sale of a body corporate (see PERG 2.9.11 G);
 - (f) in connection with an employee share scheme (see PERG 2.9.13 G);
 - (g) as an overseas person (see PERG 2.9.15 G);
 - (h) as an incoming ECA provider (see PERG 2.9.18 G);
 - (i) as a provider of non-motor goods or services related to travel (see PERG 2.9.19 G);
 - (j) involving the provision, on an incidental basis, of information to policyholders or potential policyholders about contracts of insurance (see PERG 2.9.19 G);
 - (k) that involve a contract of insurance covering large risks situated

outside the EEA (see PERG 2.9.19 G) ;1

- (l) for or with a view to transactions to be entered into by or on behalf of the participants of a business angel-led enterprise capital fund and that person is a body corporate as specified in article 72E(7) of the Regulated Activities Order.

More detailed guidance on the exclusions that relate to contracts of insurance is in PERG 5 (Insurance mediation activities).

The exclusions referred to in (a), (b), (g) and (h) also apply to arranging activities related to home finance transactions. More detailed guidance on the exclusions that relate to contracts of insurance is in PERG 5 (Insurance mediation activities).

- 2.8.6AB G The exclusions referred to in PERG 2.8.6G (4) and PERG 2.8.6G (13)(c), (d), (e) and (l) will not be available to *persons* who, in carrying on an *arranging* activity, are *investment firms* (see PERG 2.5.4 G (Investment services and activities)).

...

- 2.8.12 G In certain circumstances, advice that takes the form of a regularly updated news or information service and advice which is given in one of a range of different media (for example, newspaper or television) is excluded from the *regulated activities* of:

- (1) advising on investments; and
- (2) advising on regulated mortgage contracts;
- (3) advising on a home reversion plan; and
- (4) advising on a home purchase plan.

See (see PERG 7 (Periodical publications: news services and broadcasts: applications for certification)) for further guidance on this exclusion.

- 2.8.12A G Advice given by an *unauthorised person* in ~~the course of the administration of relation to a regulated mortgage contract~~ home finance transaction in the circumstances referred to in PERG 2.8.6AG(5)(a) or (b) (Arranging deals in investments and arranging a home finance transaction) by an ~~authorised person~~ is also excluded ~~subject to certain conditions~~. In addition:

- (1) the following exclusions apply in specified circumstances where a *person* is *advising on investments* or advising on regulated mortgage contracts a home finance transaction:

- (a)

(2) the following exclusions apply in specified circumstances where a *person* is ~~advising on~~ advising on investments:

(a)

More detailed *guidance* on certain of these exclusions is in *PERG* 4 (~~*Regulated activities*~~ Regulated activities connected with mortgages), and *PERG* 5 (Insurance mediation activities) and *PERG* 14.3 and *PERG* 14.4 (Guidance on home reversion and home purchase activities).

...

2.8.14A G Exclusions from the ~~*regulated activities*~~ activity of that involve administering a regulated mortgage contract home finance transaction are provided where an unauthorised persons; arrange for administration by an authorised person and where ~~unauthorised persons administer under an agreement with an authorised person.~~

(1) arranges for administration by an authorised person who has permission for carrying on that regulated activity;

(2) carries out the administration for up to one month after an arrangement of the kind mentioned in (1) comes to an end; or

(3) carries out the administration under an agreement with an authorised person who has permission for carrying on that regulated activity.

These exclusions are subject to certain conditions and are explained in greater detail in ~~*PERG* 4.8~~ Auth 4.8 (Administering a regulated mortgage contract); and *PERG* 14.3 and *PERG* 14.4 (Guidance on home reversion and home purchase activities).

2.8.14B G The following exclusions apply in specified circumstances where a *person* is administering a home finance plan:

(1) while acting as trustee or personal representative (see *PERG* 2.9.3 G);

(2) in connection with the carrying on of a profession or of a business not otherwise consisting of *regulated activities* (see *PERG* 2.9.5 G); and

(3) as an *incoming ECA provider* (see *PERG* 2.9.18 G).

...

2.9.1 G The various exclusions outlined below deal with a range of different circumstances.

(1) Each set of circumstances described in *PERG* 2.9.3 G to *PERG* 2.9.17 G has some application to several *regulated activities* relating to *securities, relevant investments* or ~~*regulated mortgage contracts*~~ *home finance transactions*. They have no effect.....

...

2.9.3 G This group of exclusions applies, in specified circumstances, to the *regulated activities* of:

- (1) *dealing in investments as principal;*
- (2) *arranging (bringing about) deals in investments; ~~arranging (bringing about) regulated mortgage contracts; and making arrangements with a view to transactions in investments and making arrangements with a view to regulated mortgage contracts;~~*

(2A) arranging a home finance transaction;

...

- (7) *advising on investments or advising on a home finance transaction; ~~regulated mortgage contracts~~*
- (8) *entering into ~~regulated mortgage contracts~~ a home finance transaction; and*
- (9) *administering ~~a regulated mortgage contracts~~ home finance transaction.*

...

2.9.4 G A person carrying on certain *regulated activities* does not require *authorisation* in specified circumstances if he by reference to time spent). The exclusions for *entering into a home finance transaction* and for *administering a home finance transaction* ~~*regulated mortgage contracts*~~, however, work on a different basis. They apply where the activity relates to a *home finance transaction* ~~*regulated mortgage contract*~~ under which the borrower, reversion occupier or home purchaser as the case may be is a beneficiary.

2.9.5 G This group of exclusions applies, in specified circumstances, to the *regulated activities* of:

- (1) *dealing in investments as agent;*
- (2) *arranging (bringing about) deals in investments; ~~arranging (bringing about) regulated mortgage contracts; and making arrangements with a view to transactions in investments and making arrangements with a view to regulated mortgage contracts;~~*

(2A) arranging a home finance transaction;

...

- (5) *advising on investments or advising on a home finance transaction; ~~regulated mortgage~~*

~~contracts~~ a home finance transaction.

...

- 2.9.15 G This group of exclusions applies, in specified circumstances, to the *regulated activities* of:
- (1) *dealing in investments as principal;*
 - (2) *dealing in investments as agent;*
 - (3) *arranging (bringing about) deals in investments; ~~arranging (bringing about) regulated mortgage contracts; and making arrangements with a view to transactions in investments and making arrangements with a view to regulated mortgage contracts;~~*
 - (3A) *arranging a home finance transaction;*
 - (4) *advising on investments;*
 - (5) *entering into ~~regulated mortgage contracts~~ a home finance transaction;*
 - (6) *administering ~~a regulated mortgage contracts~~ home finance transaction; and*
 - (7) ...

...

- 2.9.17 G The exclusions are available, for *regulated activities* other than those that relate to ~~regulated mortgage contracts~~ home finance transactions in the two broad cases set out below. For some of these *regulated activities*, the exclusions apply in each case. In others, they apply in only one.

- (1) ...

...

- 2.9.17A G The exclusions for *overseas persons* who carry on certain *regulated activities* related to ~~regulated mortgage contracts~~ home finance transactions work in a different way. They depend on the residency of the borrower or borrowers, the reversion occupier or reversion occupiers or the home purchaser or home purchasers as the case may be. In addition, some of the exclusions also depend on the residency of the reversion provider. Guidance on these exclusions is in PERG 4.11 (Link between activities and the United Kingdom) and PERG 14.6 (Guidance on home reversion and home purchase activities).

...

- 2.10.15 G In addition, there are restrictions on carrying on (or agreeing to carry on)

certain other *regulated activities*. These relate to *managing investments, advising on investments, ~~or advising on regulated~~ a home finance transaction mortgage contracts, advising on syndicate participation at Lloyd's, and entering into a regulated mortgage contract home finance transaction or administering a home finance transaction regulated mortgage contract.*

...

- 4.1.6 G A person may be intending to carry on activities related to other forms of investment in connection with mortgages, such as advising on and arranging an endowment policy or ISA to repay an interest-only mortgage. Such a person should also consult the *guidance* in *PERG 2* (Authorisation and ~~regulated activities~~ regulated activities) and ~~PERG 8~~ (Financial promotion and related activities), and *PERG 5* (~~Mediation of general and pure protection~~ Guidance on insurance mediation activities) and *PERG 8* (Financial promotion and related activities). In addition, *PERG 14* (Guidance on home reversion and home purchase activities) has *guidance on regulated activities relating to home reversion plans and home purchase plans*.

...

- 4.4.1 G Article 61(3)(a) of the ...
- (1) ...

...

PERG 4.4.2 G to PERG 4.4.9 G set out the FSA's understanding of some key concepts contained in article 61(3)(a). It should be noted that, where a contract meets the necessary requirements for both a regulated mortgage contract and a home purchase plan, it will be treated as a home purchase plan only and will not be a regulated mortgage contract. Guidance on the meaning of a home purchase plan is in PERG 14.4 (Guidance on home reversion and home purchase activities).

...

7.1.1 G This chapter applies to anyone involved in publishing periodicals, or in providing news services or broadcasts, who gives (or proposes to give) advice about *securities, relevant investments* or ~~*regulated mortgage contracts*~~ *home finance transactions* and who wishes to determine whether he will be carrying on the *regulated activities* of *advising on investments* or *advising on* ~~*regulated mortgage contracts*~~ *a home finance transaction*.

7.1.2 G The purpose of this chapter is to provide *guidance* as to:

(1) when a *person* involved in publishing periodicals, or in providing news services or broadcasts, requires *authorisation* to carry on the *regulated activities* of *advising on investments* or *advising on* ~~*regulated mortgage contracts*~~ *a home finance transaction* (see *PERG 7.3* (Does the activity require authorisation));

(2) ...

...

7.2.1 G Advice is excluded by article 54 of the *Regulated Activities Order* from the *regulated activities* of *advising on investments* and *advising on* ~~*regulated mortgage contracts*~~ *a home finance transaction* if:

...

7.2.2 G If a *person* would, but for the exclusion, be carrying on the *regulated activities* of *advising on investments* or *advising on* ~~*regulated mortgage contracts*~~ *a home finance transaction*, or any or each of them both, and will be doing so.....

...

Advising on investments and advising on ~~regulated mortgage contracts~~ home finance transactions

7.3.1 G ...

7.3.1B G Under article 53B of the *Regulated Activities Order* (Advising on regulated home reversion plans), advising a *person* is a specified kind of activity if:

- (1) the advice is given to the *person* in his capacity as a *reversion occupier* or reversion provider or as a potential *reversion occupier* or reversion provider; and
 - (2) it is advice on the merits of his doing any of the following:
 - (a) entering into a particular *home reversion plan*; or
 - (b) varying the terms of a *home reversion plan* entered into by him as *reversion occupier* or as reversion provider (but only where the plan was originally entered into on or after 6 April 2007) in such a way as to vary his obligations under that plan.
- 7.3.1C G Under article 53C of the *Regulated Activities Order* (Advising on regulated home purchase plans), advising a *person* is a specified kind of activity if:
- (1) the advice is given to the *person* in his capacity as a *home purchaser* or potential *home purchaser*; and
 - (2) it is advice on the merits of his doing any of the following:
 - (a) entering into a particular *home purchase plan*; or
 - (b) varying the terms of a *home purchase plan* entered into by him on or after 6 April 2007 in such a way as to vary his obligations under that plan.
- 7.3.2 G Articles 53, ~~and 53A, 53B and 53C~~ of the *Regulated Activities Order* contain a number of elements, all of which must be present before a *person* will require *authorisation*. For *guidance* on whether a *person* is carrying on these *regulated activities*, see *PERG* 8 (Financial promotion and related activities), ~~and~~ *PERG* 4 (Guidance on ~~*regulated activities*~~ regulated activities connected with mortgages) and *PERG* 14.3 and *PERG* 14.4 (Guidance on home reversion and home purchase activities).
- 7.3.3 G Under section 22 of the *Act* (~~*Regulated activities*~~ Regulated activities), for an activity has been amended by article 18 of the Financial Services and Markets Act 2000 (Regulated A activities) (Amendment) (No 2) Order 2003 (SI 2003/1476) and by article 28 of the Financial Services and Markets Act 2000 (Regulated activities) (Amendment) (No 2) Order 2006 (SI 2006/2383) as explained in *PERG* 7.3.3A G.
- 7.3.3A G The result of the amendments made to the meaning of the business test in section 22 of the *Act* is that the test differs depending on the activity in question. Where the *regulated activities* of *advising on investments* and *advising on* ~~*regulated mortgage contracts*~~ a home finance transaction are concerned, the business test is not to be regarded as satisfied unless
- 7.3.4 G In the *FSA's* view, for a *person* to be carrying on the business of *advising on investments* or *advising on* ~~*regulated mortgage contracts*~~ a home finance transaction he will usually need to be doing so if advice on *securities*,

relevant investments or ~~regulated home finance transactions mortgage contracts~~ is given, then, in the FSA's view, the business of advising on investments or advising on ~~regulated mortgage contracts a home finance transaction~~ is being carried on. In addition the journal or journalist would not be regarded as carrying on the business of advising on investments or advising on ~~regulated mortgage contracts a home finance transaction~~ as he would be acting to prevent crime rather than in the carrying on of a business.

...

7.3.7 G But even if advice is given in the *United Kingdom*, the *general prohibition* will not be contravened if the giving of advice does not amount to the carrying on, in the *United Kingdom*, of the business of *advising on investments or advising on ~~regulated mortgage contracts a home finance transaction~~*. Also, the *general prohibition* will not be contravened if the exclusions in article 72 ~~only do not~~ apply to the *regulated activities of that involve advising on a home finance transaction mortgage contracts where both the lender and the borrower are outside the United Kingdom*. The effect of this is that, where the ~~principal~~ *principal* purpose of an overseas periodical publication is to offer advice on *securities or relevant investments and home finance transactions mortgage contracts*, the exclusion for an *overseas person* who provides advice to *persons* in the *United Kingdom* as a result of a legitimate approach will not apply to the advice concerning *home finance transactions mortgage contracts*.

7.3.8 G If a *person* is carrying on the business of *advising on investments or advising on a home finance transaction* in the *United Kingdom*, he will not require *authorisation* if:

(1) ...

(2) he is an *exempt person* (see *PERG 2.11 (What to do n Now?)*); since *persons* are exempt only in relation to specified *regulated activities*, his exemption must apply to the *regulated activity of advising on investments or advising on a home finance transaction as the case may be*.

7.3.9 G Many people may be involved in the production of a periodical publication, news service or broadcast. But if the *regulated activity of advising on investments or advising on a home finance transaction* is being carried on

.....

...

7.4.2 G But the exclusion applies only if the principal purpose of the publication or service is not:

(1) to advise on *securities or relevant investments or home finance transactions mortgage contracts*: or

- (2) to lead or enable *persons*:
 - (a) to *buy, sell*, subscribe for or underwrite *securities* or *relevant investments*; or ~~(as the case may be)~~;
 - (b) to enter as borrower into *regulated mortgage contracts*, or vary the terms of *regulated mortgage contracts* entered into by ~~the persons to whom the advice is given~~ them as borrower on or after 31 October 2004 ; or
 - (c) to enter as *reversion occupier* or reversion provider into *home reversion plans* or to vary the terms of *home reversion plans* entered into by them as *reversion occupier* or as *reversion provider* where the plan was originally established on or after 6 April 2007; or
 - (d) to enter as *home purchaser* into *home purchase plans* or to vary the terms of *home purchase plans* entered into by them as *home purchaser* on or after 6 April 2007.

7.4.3 G (1) ...

- (3) since this would not generally constitute the *regulated activity* of *advising on investments* (see *PERG* 8.28 (Advice or information)), ~~or *advising on regulated mortgage contracts* (see *PERG* 4.6.13 G to *PERG* 4.6.16 G (Advice or information))~~, *advising on a home reversion plan* or *advising on a home purchase plan*. So the exclusion applies to services providing material in addition to news or information, such as comment or advice.

...

7.4.5 G The exclusion applies only if the principal purpose of the publication or service is not:

- (1) to give advice on *securities, relevant investments* or ~~*regulated home finance transactions*~~ ~~*mortgage contracts*~~ (see *PERG* 7.3.1 G); or
- (2) to lead or enable *persons* to:
 - (a) *buy, sell*, subscribe for or underwrite *securities* or *relevant investments*; or
 - (b) to enter as borrower into *regulated mortgage contracts*, or vary the terms of *regulated mortgage contracts* entered into by ~~persons to whom the advice is given~~ them as borrower on or after 31 October 2004 ; or
 - (c) to enter as *reversion occupier* or reversion provider into *home reversion plans* or to vary the terms of *home reversion plans* entered into by them as *reversion occupier* or as *reversion provider* where the plan was originally established

on or after 6 April 2007; or

- (d) to enter as home purchaser into home purchase plans or to vary the terms of home purchase plans entered into by them as home purchaser on or after 6 April 2007.

...

7.4.8 G Looking at the first disqualifying purpose set out in the exclusion, all the matters relevant to whether the *regulated activities* of *advising on investments* or *advising on a home finance transaction* ~~*mortgage contracts*~~ are being carried on must be taken into account (see *PERG* 8.24 (Advising on investments)). If the principal purpose of a publication or service is to give to *persons*, in their capacity as investors (or potential investors), ~~or as borrowers, as reversion occupiers or reversion providers or as home purchasers~~ (as the case may be), advice as referred to in *PERG* 7.4.5G (1), then the publication or service will not be able to benefit from this exclusion.

7.4.9 G ...

- (1) material in a publication or service that invites or seeks to procure *persons* to engage in a relevant transaction can be said to "lead" to those transactions even if it would not constitute the *regulated activities* of *advising on investments* or *advising on regulated a home finance transaction* ~~*mortgage contracts*~~; this includes, for example, material

- (2) ...

In the *FSA's* view, material will not lead or enable a *person* to engage in a relevant transaction where the material is intended merely to raise people's awareness of matters relating to *securities*, *relevant investments* or ~~*regulated home finance transactions mortgage contracts*~~.

...

8.4.22 G (7) Article 15 (Introductions) may apply provided certain conditions are met (see *PERG* 8.12.11 G). In addition, article 28B (Real time communications: introductions ~~in connection with qualifying credit~~) may apply where an introduction is a *real time financial qualifying credit promotion about home finance transactions and home finance activities* (see *PERG* 8.17.12 G).

...

8.14.40B G Article 73 exempts any *financial promotion* made by a *person* in the course of carrying out his duties as an adviser for, or employee of, an advice centre. This is provided the *financial promotion* relates to:

- (1) ~~*qualifying credit*~~ *a home finance transaction*; or

(2) ...

...

8.17.1 G ~~[not used]~~ Section 21 applies to financial promotions concerning agreements for qualifying credit. PERG 8.17.1AG to PERG 8.17.18G has guidance about the treatment of such financial promotions. Section 21 applies not only to financial promotions about regulated mortgage contracts but also to financial promotions about certain other types of credit agreement. This is explained in more detail in PERG 8.17.2 G. to PERG 8.17.3 G.

8.17.1A G ~~Section 21 applies to financial promotions concerning agreements for qualifying credit (qualifying credit promotions). In this respect, it not only covers financial promotions about regulated mortgage contracts but also financial promotions about certain other types of credit agreement. This is explained in more detail in PERG 8.17.2 G. to PERG 8.17.3 G. Section 21 also applies to financial promotions concerning home reversion plans and home purchase plans. Guidance on these activities and related financial promotions is given in PERG 14 (Guidance on home reversion and home purchase activities).~~

...

8.17.9 G The exemptions in Part IV of the *Financial Promotion Order* (Exempt communications: all controlled activities) will apply to *financial promotions* about *qualifying credit* (~~*qualifying credit promotions*~~). Some of the exemptions ...

...

8.17.12 G Article 28B (Real time communications: introductions ~~in connection with qualifying credit~~) exempts a *real time financial promotion* that relates to one or more of the *controlled activities* about *regulated mortgage contracts*, as well as *home reversion plans* and *home purchase plans*. The exemption is subject to the following conditions being satisfied:

(1) ...

(a) ...

(c) an overseas person who carries on the *controlled activity* to which the communication relates; for this purpose, an 'overseas person' is a *person* who carries on any of the *controlled activities* about ~~*qualifying credit*~~ *home finance transactions* but does not do so, or offer to do so, from a permanent place of business maintained by him in the *United Kingdom*; and

...

8.23.3 G The *regulated activities* which are likely to be conducted in the

circumstances referred to in *PERG* 8.23.2 G are:

- (1) giving advice on certain investments (articles 53 (Advising on investments), 53A (Advising on regulated mortgage contracts), 53B (Advising on regulated home reversion plans), 53C (Advising on regulated home purchase plans) and 56 (Advice on syndicate participation at Lloyd's) of the *Regulated Activities Order*) - for example, where the *financial promotion* is the advice;
- (2) *making arrangements with a view to transactions in investments* (article 25(1 2) of the *Regulated Activities Order* (Arranging deals in investments)); ~~or~~
- (2A) *making arrangements with a view to regulated mortgage contracts* (article 25A(2) of the *Regulated Activities Order* (Arranging regulated mortgage contracts));
- (2B) *making arrangements with a view to a home reversion plan* (article 25B(2) of the *Regulated Activities Order* (Arranging regulated home reversion plans));
- (2C) *making arrangements with a view to a home purchase plan* (article 25C(2) of the *Regulated Activities Order* (Arranging regulated home purchase plans) for example, where the *person* concerned makes arrangements that are intended to lead to a transaction by a third party; and
- (3) ...

8.23.4 G The *guidance* that follows is concerned with the *regulated activities* of *making arrangements with a view to transactions in investments* ~~and~~ and *advising on investments*. *Guidance* on the *regulated activities* of *making arrangements with a view to regulated mortgage contracts* ~~and~~ and *advising on regulated mortgage contracts* is in *PERG* 4 (Guidance on regulated activities ~~regulated activities~~ connected with mortgages). Guidance on the regulated activities of making arrangements with a view to a home reversion plan and advising on a home reversion plan and making arrangements with a view to a home purchase plan and advising on a home purchase plan is in *PERG* 14 (Guidance on home reversion and home purchase activities).

14 Guidance on home reversion and home purchase activities

14.1 Background

Q1. What is the purpose of these questions and answers (“Q&As”) and who should be reading them?

These Q&As are aimed at *persons* involved in the provision or promotion of financial arrangements involving the acquisition or disposal of land for the purpose of enabling an individual ...

- exemptions (PERG 14.7); and
- financial promotions (PERG 14.8); ~~and~~
- ~~transitional provisions (PERG 14.9).~~

...

Q4. How will I know if my proposed home finance activities are regulated?

Regulated activities are specified in the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 ('the *Regulated Activities Order*'). This ~~will be~~ was amended, following the enactment of the Regulation of Financial Services (Land Transactions) Act 2005, to extend its scope to cover certain home finance activities. These amendments ~~were~~ are made in the Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No2) Order 2006 (SI 2006/2383) which came ~~comes~~ into effect on 6 April 2007. ~~The new~~ Regulated home finance activities are:

...

Q22. Will changes involving the circumstances of the reversion occupier that may take place after the plan has been entered into (such as moving house, marriage or change of occupants) have any implications in terms of regulated activity?

This depends on the facts and is a question of degree that requires an assessment against the criteria that make up the definition of a home reversion plan. There are two main issues that would need to be considered. These are:

- is the change likely to cause a new plan to be entered into ~~on or after 6 April 2007~~; and
- does the change involve a variation of the terms of the plan (if it was originally entered into on or after 6 April 2007) such as to vary the obligations of the provider or the occupier?

Broadly speaking, it would seem likely that, if the occupier were to move house, there would be a need for the existing plan to be terminated and a new plan to be entered into. Where this happens ~~on or after 6 April 2007~~, the person who enters into the plan

...

...

Q37. Will changes involving the circumstances of the home purchaser that may take place after the plan has been entered into (such as moving house, marriage or change of occupants) have any implications in terms of regulated activity?

This depends on the facts and is a question of degree that requires an assessment against the criteria that make up the definition of a home purchase plan. There are two main issues that would need to be considered. These are:

- is the change likely to cause a new plan to be entered into ~~on or after 6 April 2007?~~ and
- does the change involve a variation of the terms of the plan (if it was originally entered into on or after 6 April 2007) such as to vary the obligations of the provider or the purchaser?

Broadly speaking, it would seem likely that, if the home purchaser were to move house, there would be a need for the existing plan to be terminated and a new plan to be entered. Where this happens ~~on or after 6 April 2007~~, the person who enters the plan as provider...

...

14.9 Transitional provisions

~~Q46. I will need to obtain authorisation to carry on home finance activities. What will happen to me if I do not obtain authorisation by 6 April 2007?~~

~~Transitional arrangements have been put in place. The broad effect of these arrangements is that you will be able to benefit from interim authorisation as respects any of the new regulated activities that relate to home reversion plans or home purchase plans pending the final determination of your application. This is provided:~~

- ~~you were carrying on the regulated activities, for which you are seeking permission, before 6 November 2006; and~~
- ~~your application for authorisation was received by the FSA on or before 23 March 2007.~~

~~An interim authorisation granted under these transitional arrangements will lapse:~~

- ~~in the case of the regulated activities involving providing or administering home reversion or home purchase plans, when the application has been finally determined; and~~
- ~~in the case of the regulated activities involving arranging or advising on home reversion or home purchase plans, on the earlier of the date on which the application is finally determined or 6 April 2008.~~

~~Q47. I am already an authorised person. Will I need to extend the scope of my existing permission?~~

~~Yes, you will need to apply for a variation of permission in the normal way if you wish to carry on any of the new regulated activities. As with applications for authorisation (see Q46), you will benefit from interim permission if your application is not finally determined by 6 April 2007 provided:~~

- ~~• you were carrying on the regulated activities, for which you are seeking to vary your permission, on or before 6 November 2006; and~~
- ~~• your application to vary your permission was received by the FSA on or before 23 March 2007.~~

~~Your interim permission will lapse in the same circumstances as an application for authorisation (see Q46).~~

Q48. ~~Can I avoid the need to be authorised by becoming an appointed representative of an authorised person?~~

~~You cannot be an *appointed representative* for the purpose of providing or administering home reversion or home purchase plans. But you can be an appointed representative for advising on or arranging such plans.~~

~~If you are an appointed representative prior to 6 April 2007 and you intend to carry on any of the new regulated activities, you will need to consider whether your existing agreement with your principal will cover those activities that an appointed representative is permitted to undertake or whether it will need to be amended to do so.~~

~~You may currently be an appointed representative of a life office for the purpose of advising on or arranging deals in its investment products and also undertake unregulated activities in relation to home reversion or home purchase plans offered by third parties. If those unregulated activities include activities that will become regulated from 6 April 2007, you will need either to become the appointed representative of another appropriately authorised firm or to seek authorisation yourself. This is because an appointed representative of a life office can only undertake regulated activities that arise directly from the life office's insurance business.~~

~~Remember also that a person cannot generally be authorised and exempt as an appointed representative at the same time. However, this rule is waived if you obtain interim authorisation to carry on the new regulated activities and wish, pending determination of your application for authorisation, to continue to conduct existing regulated activities as an appointed representative.~~

**INTERIM PERMITTED PERSONS
(HOME REVERSION AND HOME PURCHASE ACTIVITIES)
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 156 (General supplementary powers);
 - (c) section 213 (The compensation scheme); and
 - (d) section 214 (General); and
 - (2) article 39 of The Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No.2) Order 2006 (SI No 2006/2383) (“the Order”).
- B. The powers listed above are specified for the purposes of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. Subject to the Order being in force on 6 November 2006, this instrument comes into force on 6 April 2007.

Citation

- D. This instrument may be cited as the Interim Permitted Persons (Home Reversion and Home Purchase Activities) Instrument 2006.

By order of the Board
25 October 2006

Annex

Directions and rules for Interim Permitted Persons in respect of Home Finance Business

In this Annex, new provisions are being introduced and they are not underlined.

1. Application
 - 1.1 R These *rules* and directions apply to:
 - (1) an *authorised person* with an *interim permission*; and
 - (2) an *authorised person* with an *interim variation of permission*.
 2. The application of the Handbook and the disapplication of COMP
 - 2.1 D The *FSA* directs that the *Handbook* applies to an *authorised person* with an *interim permission* or an *interim variation of permission* as if that *person's application* had been granted in the terms applied for.
 - 2.2 D The *FSA* directs that the *Glossary* definition of '*relevant person*' does not include an *authorised person* with an *interim permission*.
3. Disclosure of status
 - 3.1 R Whenever an *authorised person* with an *interim permission* or an *interim variation of permission* is required, and whenever that *person* is permitted and chooses, to disclose that:
 - (1) it is an *authorised person* or it is regulated by the *FSA*, and that disclosure is made in respect of; or
 - (2) it has *permission* to carry on,
one or more of the *regulated activities* described in article 37 (Interim permission) of the *Order*, that *person* must instead disclose that:
 - (3) (if the *authorised person* has an *interim permission*):
 - (a) it is an authorised person with an interim permission, pending the determination of its application for a permission; and
 - (b) compensation will not be available from the Financial Services Compensation Scheme if the authorised person cannot meet its obligations.
 - (4) (if the *authorised person* has an *interim variation of permission*) it is an authorised person with an interim permission that allows it to carry on home reversion business or home purchase business (as applicable) pending the determination of its application for a variation of permission.
 - 3.2 R Whenever:
 - (1) an *authorised person* with an *interim permission* or an *interim variation of permission* is required, and whenever that *person* is

permitted and chooses, to disclose that the *FSA* has approved one or more of its *approved persons* for the purposes of section 59 of the *Act* (Approval for particular arrangements); and

- (2) the disclosure in (1) is related to one or more of the *regulated activities* described in article 37 (Interim permission) of the *Order*,

the *authorised person* must instead disclose (if it is the case) that one or more of its approved persons has been approved on an interim basis pending the determination of an application for approved person status.

4. Defined terms

- 4.1 R In these *rules* and directions, the terms in (1) have the meanings ascribed to them by (2). Further, terms in italics that do not appear below have the meaning given to them in the *Glossary of definitions* in the *FSA's Handbook*.

(1)	(2)
<i>application</i>	an application for: (1) a <i>Part IV permission</i> which includes; or (2) a variation of a <i>Part IV permission</i> so that it will include, one or more of the <i>regulated activities</i> described in article 37 (Interim permission) of the <i>Order</i> .
<i>interim permission</i>	a <i>Part IV permission</i> deemed to have been granted by article 37 (Interim permission) of the <i>Order</i> to a <i>person</i> because he has submitted an application for a <i>Part IV permission</i> .
<i>interim variation of permission</i>	a variation of a <i>Part IV permission</i> deemed to have been granted by article 37 (Interim permission) of the <i>Order</i> .
<i>Order</i>	the Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No.2) Order 2006 (SI No 2006/2383).

**SENIOR MANAGEMENT ARRANGEMENTS, SYSTEMS AND CONTROLS
(MARKETS IN FINANCIAL INSTRUMENTS AND CAPITAL REQUIREMENTS
DIRECTIVES) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 141 (Insurance business rules);
 - (3) section 145 (Financial promotion rules);
 - (4) section 146 (Money laundering rules);
 - (5) section 147 (Control of information rules);
 - (6) section 149 (Evidential provisions);
 - (7) section 150(2) (Actions for damages);
 - (8) section 156 (General supplementary powers); and
 - (9) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force as follows:
- (1) Annex C and E on 31 December 2006;
 - (2) Annex F, L and M on 1 November 2007;
 - (3) The remainder of this instrument comes into force on 1 January 2007.

Amendments to the Integrated Prudential Sourcebook and the Senior Management Arrangement, Systems and Controls Sourcebook

- D.
- (1) In relation to the “Amended text” in column (3) of the table in D(5), SYSC is amended in accordance with Annex A of this instrument.
 - (2) In relation to the “New text” indicated in column (3), SYSC is amended by inserting the provisions in Annex B to this instrument.
 - (3) In relation to the “Transferred, Amended and New text” in column (3), SYSC is amended by inserting the provisions in Annex C in this instrument (which has the effect of transferring the provisions in PRU identified in column (2), with amendments, to the location indicated in column (1) and inserting new text in Annex C).

- (4) In relation to the “Transferred and Amended text” in column (3), SYSC is amended by inserting the provisions in Annex D in this instrument (which has the effect of transferring the provisions in PRU identified in column (2), with amendments, to the location indicated in column (1)).
- (4) In relation to the “Transferred text” in column (3), SYSC is amended by inserting the provisions of Annex E in this instrument (which has the effect of transferring the provisions in SYSC and PRU identified in column (2), with necessary consequential changes, to the location indicated in column (1)).
- (5) The table referred to is:

(1) SYSC	(2) Current designation in PRU or SYSC (where applicable)	(3) Type of text	(4) Annex in this Instrument
SYSC TP		New text	Annex B
SYSC 1	SYSC 1	Amended text	Annex A
SYSC 3	SYSC 3	Amended text	Annex A
SYSC 4		New text	Annex B
SYSC 5		New text	Annex B

SYSC 18	SYSC 4	Transferred text	Annex E
SYSC Schedule 1	SYSC Schedule 1	Amended text	Annex A
SYSC Schedule 5	SYSC Schedule 5	Amended text	Annex A
SYSC Schedule 6	SYSC Schedule 6	Amended text	Annex A

Further amendments to SYSC

- E. SYSC is further amended by the provisions in Annex F to this instrument.

Amendments to the Glossary

- F. The Glossary is amended by the provisions in Annex T to this instrument.

Amendments to the Handbook

- G. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Principles for Businesses sourcebook (PRIN)	Annex G

Annex A

Senior Management Arrangements, Systems and Controls Handbook (SYSC)

In this Annex, underlining indicates new text and striking through indicates deleted text. Where an entire section of text is being inserted, the place where the change will be made is indicated and the text is not underlined.

1 Application and purpose

1.1 Application of SYSC 2 and SYSC 3

Purpose of this section

1.1.-2 G ~~[deleted]~~

1.1.-1 G ~~[deleted]~~

1.1.1 R Who?

SYSC 2 and SYSC 3 apply to every firm except that:

...

(c) *SYSC 3 applies, but only with respect to the activities in SYSC 1.1.4 R; ~~and~~*

(5) *for an authorised professional firm when carrying on non-mainstream regulated activities, SYSC 3.2.6A R to SYSC 3.2.6J G do not apply; ~~and~~*

(6) *SYSC 3.2.23R to SYSC 3.2.36R apply only to a BIPRU firm.*

...

1.2 Purpose of SYSC

1.2.1 G The purposes of SYSC are:

(1) to encourage *firms' directors and senior managers* to take appropriate practical responsibility for their *firms'* arrangements on matters likely to be of interest to the *FSA* because they impinge on the *FSA's* functions under the *Act*;

(2) to increase certainty by amplifying *Principle 3*, under which a *firm* must take reasonable care to organise and control its affairs responsibly and effectively, with adequate risk management systems; ~~and~~

(3) to encourage *firms* to vest responsibility for effective and responsible organisation in specific *directors and senior managers*; ~~;~~

- (4) to create a common platform of organisational and systems and controls requirements for firms subject to the CRD and/or MiFID; and
- (5) to set out high-level organisational and systems and controls requirements for insurers.

1.2.2 G ~~The main matters, referred to in SYSC1.2.1G (1), which are likely to be of interest to the FSA are those which relate to confidence in the financial system; to the fair treatment of firms' customers; to the protection of consumers; and to the use of the financial system in connection with financial crime. The FSA is not primarily concerned with risks which threaten only the owners of a financial business except in so far as these risks may have an impact on those matters.~~

To be inserted after SYSC 1.2

1.3 Application of the common platform requirements

Who?

1.3.1 R The *common platform requirements* apply to a *common platform firm* unless provided otherwise in a specific *rule*.

1.3.1A G From 1 January 2007 until 1 November 2007, the application of the *common platform requirements* is limited by SYSC TP 1.

What?

1.3.2 R The *common platform organisational requirements* apply with respect to the carrying on of the following (unless provided otherwise within a specific *rule*):

- (1) *regulated activities*;
- (2) activities that constitute *dealing in investments as principal*, disregarding the exclusion in article 15 of the *Regulated Activities Order* (Absence of holding out etc); and
- (3) *ancillary activities*.

1.3.3 G The application of the provisions on the conflicts of interest in SYSC 10 is set out in SYSC 10.1.1R and SYSC 10.2.1R.

1.3.4 R [To follow.]

1.3.5 R The *common platform requirements on financial crime* apply as set out in SYSC 1.3.2R, except that they do not apply:

- (1) with respect to:
 - (a) activities that constitute *dealing in investments as principal*, disregarding the exclusion in article 15 of the *Regulated Activities Order* (Absence of holding out etc); and
 - (b) *ancillary activities*; or
- (2) in relation to the following *regulated activities*:
 - (a) *general insurance business*;
 - (b) *insurance mediation activity* in relation to a *general insurance contract* or *pure protection contract*;
 - (c) *long-term insurance business* which is outside the *Consolidated Life Directive* (unless it is otherwise one of the *regulated activities* specified in this *rule*);
 - (d) business relating to contracts which are within the *Regulated Activities Order* only because they fall within paragraph (e) of the definition of "contract of insurance" in article 3 of that Order;
 - (e)
 - (i) arranging by the *Society of Lloyd's* of deals in *general insurance contracts* written at Lloyd's; and
 - (ii) *managing the underwriting capacity of a Lloyd's syndicate as a managing agent at Lloyd's*; and
 - (f) *home finance mediation activity* and *administering a home finance transaction*.

- 1.3.6 R The *common platform organisational requirements*, except the *common platform requirements on financial crime*, also apply with respect to the *communication* and *approval* of *financial promotions* which:
- (1) if *communicated* by an *unauthorised person* without *approval* would contravene section 21(1) of the *Act* (Restrictions on financial promotion); and
 - (2) may be *communicated* by a *firm* without contravening section 238(1) of the *Act* (Restrictions on promotion of collective investment schemes).

- 1.3.7 R The *common platform organisational requirements*, except the *common platform requirements on financial crime*, also:
- (1) apply with respect to the carrying on of *unregulated activities* in a *prudential context*; and

(2) take into account any activity of other members of a *group* of which the *firm* is a member.

1.3.8 G *SYSC 1.3.7R(2)* does not mean that inadequacy of a *group* member's systems and controls will automatically lead to a *firm* contravening any of the *common platform organisational requirements*. Rather, the potential impact of a *group* member's activities, including its systems and controls, and any systems and controls that operate on a *group* basis, will be relevant in determining the appropriateness of the *firm's* own systems and controls.

Where?

1.3.9 R The *common platform requirements* apply to a *common platform firm* in relation to activities carried on by it from an establishment in the *United Kingdom*.

1.3.10 R The *common platform requirements*, except the *common platform requirements on financial crime*, apply to a *common platform firm* in relation to *passported activities* carried on by it from a *branch* in another *EEA State*.

1.3.11 R The *common platform organisational requirements*, except the *common platform requirements on financial crime*, also apply in a *prudential context* to a *UK domestic firm* with respect to activities wherever they are carried on.

Actions for damages

1.3.12 R A contravention of a *rule* in the *common platform requirements* does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

1.4 Application of SYSC 11 to SYSC 18

What?

1.4.1 G The application of each of chapters *SYSC 11* to *SYSC 18* is set out in those chapters.

Actions for damages

1.4.2 R A contravention of a *rule* in *SYSC 11* to *SYSC 18* does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

To be inserted after SYSC 3.1.1R

- 3.1.1A R SYSC 3.1 and SYSC 3.2.1G to SYSC 3.2.22G apply to a *BIPRU firm* only to the extent that they do not conflict with SYSC 3.2.23R to SYSC 3.2.36R.

...

To be inserted after SYSC 3.2.5G

Organisation

...

- 3.2.5A R An *overseas bank* must ensure that at least two individuals effectively direct its business.
- 3.2.5B G In the case of an *overseas bank*, the *FSA* assesses whether at least two individuals effectively direct the business of the *bank* (and not just the business of its branch in the *United Kingdom*). The *FSA* also takes into account the manner in which management decisions are taken in the *United Kingdom* branch in assessing the adequacy of the *overseas bank's* systems and controls.

...

To be inserted after SYSC 3.2.22G

CRD requirements

(1) General organisation requirements

- 3.2.23 R A *BIPRU firm* must have robust governance arrangements, which include a clear organisational structure with well defined, transparent and consistent lines of responsibility, effective processes to identify, manage, monitor and report the risks it is or might be exposed to, and adequate internal control mechanisms, including sound administrative and accounting procedures.

[Note: article 22(1) of the *Banking Consolidation Directive*]

- 3.2.24 R The arrangements, processes and mechanisms referred to in SYSC 3.2.23R must be comprehensive and proportionate to the nature, scale and complexity of the *BIPRU firm's* activities. The technical criteria laid down in *BIPRU* 2.3.7R(1), *BIPRU* 9.1.6R, *BIPRU* 9.13.21R (Liquidity plans), *BIPRU* 10.12.3R (Concentration risk policies), SYSC 3.2.26R and SYSC 3.2.28R to SYSC 3.2.36R must be taken into account.

[Note: article 22(2) of the *Banking Consolidation Directive*]

- 3.2.25 R A *BIPRU firm* must ensure that its internal control mechanisms and administrative and accounting procedures permit the verification of its compliance with *rules* adopted in accordance with the Capital Adequacy Directive at all times.
- [Note: article 35(1) second sentence of the *Capital Adequacy Directive*]
- 3.2.26 R A *BIPRU firm* must have contingency and business continuity plans in place aimed at ensuring its ability to operate on an ongoing basis and limit losses in the event of severe business disruption.
- [Note: annex V paragraph 13 of the *Banking Consolidation Directive*]
- 3.2.27 R A *credit institution* must have at least two persons who effectively direct the business of the *firm*. These persons must be of sufficiently good repute and have sufficient experience to perform their duties.
- [Note: article 11(1) of the *Banking Consolidation Directive*]
- (2) Employees, agents and other relevant persons
- 3.2.28 R The *governing body* of a *BIPRU firm* must define arrangements concerning the segregation of duties in the organisation and the prevention of conflicts of interest.
- [Note: annex V paragraph 1 of the *Banking Consolidation Directive*]
- (3) Risk control
- 3.2.29 R The *governing body* of a *BIPRU firm* must approve and periodically review the strategies and policies for taking up, managing, monitoring and mitigating the risks the *firm* is or might be exposed to, including those posed by the macroeconomic environment in which it operates in relation to the status of the business cycle.
- [Note: annex V paragraph 2 of the *Banking Consolidation Directive*]
- 3.2.30 R A *BIPRU firm* must base credit-granting on sound and well-defined criteria and clearly establish the process for approving, amending, renewing, and re-financing credits.
- [Note: annex V paragraph 3 of the *Banking Consolidation Directive*]
- 3.2.31 R A *BIPRU firm* must operate through effective systems the ongoing administration and monitoring of its various credit risk-bearing portfolios and exposures, including for identifying and managing problem credits and for making adequate value adjustments and provisions.
- [Note: annex V paragraph 4 of the *Banking Consolidation Directive*]

- 3.2.32 R A *BIPRU firm* must adequately diversify credit portfolios given its target markets and overall credit strategy.
[Note: annex V paragraph 5 of the *Banking Consolidation Directive*]
- 3.2.33 R A *BIPRU firm* must address and control by means of written policies and procedures the risk that recognised credit risk mitigation techniques used by it prove less effective than expected.
[Note: annex V paragraph 6 of the *Banking Consolidation Directive*]
- 3.2.34 R A *BIPRU firm* must implement policies and processes for the measurement and management of all material sources and effects of market risks.
[Note: annex V paragraph 10 of the *Banking Consolidation Directive*]
- 3.2.35 R A *BIPRU firm* must implement systems to evaluate and manage the risk arising from potential changes in interest rates as they affect a *BIPRU firm's* non-trading activities.
[Note: annex V paragraph 11 of the *Banking Consolidation Directive*]
- 3.2.36 R A *BIPRU firm* must implement policies and processes to evaluate and manage the exposure to operational risk, including to low-frequency high severity events. Without prejudice to the definition of *operational risk*, *BIPRU firms* must articulate what constitutes operational risk for the purposes of those policies and procedures.
[Note: annex V paragraph 12 of the *Banking Consolidation Directive*]

Schedule 1 to be amended as follows:

...

Handbook reference	Subject of record	Contents of record	When record must be made	Retention period
.....				
SYSC 10.1.6R	Conflict of interest	Kinds of service or activity carried out by or on behalf of the <i>firm</i> in which a conflict of interest entailing a material risk of damage to the interests of one or more <i>clients</i> has arisen or, in the case of an ongoing service or activity, may arise.	Not specified	5 years
SYSC 14.1.53R	Prudential risk management and systems and controls	Accounting and other records that are sufficient to enable the <i>firm</i> to demonstrate to the <i>FSA</i> : (1) that the <i>firm</i> is financially sound and has appropriate systems and controls; (2) the <i>firm's</i> financial position and exposure to risk (to a reasonable degree of accuracy); (3) the <i>firm's</i> compliance with the <i>rules</i> in <i>GENPRU</i> , <i>INSPRU</i> and	Not specified	3 years, or longer as appropriate

		SYSC.

		<u><i>SYSC</i> 11 to <i>SYSC</i> 18</u>	<u>No</u>	<u>Yes <i>SYSC</i> 1.4.2R</u>	<u>No</u>

Schedule 6 to be amended as follows

Schedule 6 Rules that can be waived

- G The *rules* in SYSC can be *waived* by the FSA under section 148 of the Act (Modification or waiver of rules) in so far as this is compatible with the United Kingdom's responsibilities to implement the requirements of any European Directive .

Annex B

Senior Management Arrangements, Systems and Controls Handbook (SYSC)

In this Annex, all text in new and is not underlined.

To be inserted in SYSC Transchedule

TP Transitional provisions

TP 1 Common platform firms

Application

1.1 R SYSC TP 1 applies to a *common platform firm*.

Commencement and expiry of SYSC TP 1

1.2 R SYSC TP 1 comes into force on 1 January 2007 and applies until 1 November 2007.

Purpose

1.3 G From 1 November 2007, a *firm* must comply with the *common platform requirements* and SYSC 3 will cease to apply to it. However, until 1 November 2007, a *firm* may choose to comply with the specific parts of the *common platform requirements* instead of SYSC 3. The purpose of SYSC TP 1 is to give a *firm* the option of complying with the *common platform requirements* sooner than 1 November 2007.

1.4 G The ability to comply with the *common platform requirements* before 1 November 2007 does not apply to SYSC 9 (Record-keeping), SYSC 8.2 (Outsourcing of portfolio management for retail clients to a non-EEA State) or SYSC 8.3 (Guidance on outsourcing portfolio management for retail clients to a non-EEA State). All *firms* must continue to comply with the record-keeping requirements in SYSC 3.2.20R until 1 November 2007, when SYSC 9 will enter into force.

The decision to comply with the common platform requirements

1.5 R SYSC 4 to 7, SYSC 8.1 and SYSC 10 do not apply to a *firm* unless it decides to comply with them sooner than 1 November 2007.

1.6 R If a *firm* decides to comply with the *common platform requirements* in accordance with SYSC TP 1.5R:

(1) it must make a record of the date of the decision and the date from which it is to be effective; and

- (2) subject to SYSC TP 1.7R below, from the effective date, it must comply with SYSC 4 to 7, SYSC 8.1 and SYSC 10, and SYSC 3 will not apply to it.
- 1.7 R The following provisions in SYSC 3 will continue to apply to a *firm* that decides to comply with the *common platform requirements* before the 1 November 2007:
- (1) SYSC 3.2.23R, SYSC 3.2.24R, SYSC 3.2.26R and SYSC 3.2.28R to SYSC 3.2.35R in so far as SYSC 12.1.13R applies to it; and
- (2) SYSC 3.2.20R to SYSC 3.2.22G.
- 1.8 G The purpose of SYSC TP 1.7R is to ensure the effective operation of the provisions on consolidated risk management processes and internal control mechanisms in relation to a *firm* that decides to comply with the *common platform requirements* before 1 November 2007.
- 1.9 G A decision by a *firm* to comply with the *common platform requirements* must be made in relation to all of the *common platform requirements*. The firm may not 'cherry-pick'.
- Definitions in SYSC TP1 and the common platform requirements
- 1.10 R The terms *common platform firm* and *MiFID investment firm* have effect in SYSC TP1 and the *common platform requirements* as if *MiFID* applied generally from 1 January 2007.

To be inserted after SYSC 3

4 General organisational requirements

4.1 General requirements

- 4.1.1 R A *common platform firm* must have robust governance arrangements, which include a clear organisational structure with well defined, transparent and consistent lines of responsibility, effective processes to identify, manage, monitor and report the risks it is or might be exposed to, and internal control mechanisms, including sound administrative and accounting procedures and effective control and safeguard arrangements for information processing systems.

[Note: article 22(1) of the *Banking Consolidation Directive*, article 13(5) second paragraph of *MiFID*]

- 4.1.2 R The arrangements, processes and mechanisms referred to in SYSC 4.1.1R must be comprehensive and proportionate to the nature, scale and complexity of the *common platform firm's* activities and must take into account the specific technical criteria described in SYSC 4.1.7R, SYSC 5.1.7R and SYSC 7.

[Note: article 22(2) of the *Banking Consolidation Directive*]

- 4.1.3 R A *BIPRU firm* must ensure that its internal control mechanisms and administrative and accounting procedures permit the verification of its compliance with *rules* adopted in accordance with the *Capital Adequacy Directive* at all times.

[Note: article 35(1) final sentence of the *Capital Adequacy Directive*]

- 4.1.4 R A *common platform firm* must, taking into account the nature, scale and complexity of the business of the *firm*, and the nature and range of the *investment services and activities* undertaken in the course of that business:

- (1) establish, implement and maintain decision-making procedures and an organisational structure which clearly and in a documented manner specifies reporting lines and allocates functions and responsibilities;
- (2) establish, implement and maintain adequate internal control mechanisms designed to secure compliance with decisions and procedures at all levels of the *firm*; and
- (3) establish, implement and maintain effective internal reporting and communication of information at all relevant levels of the *firm*.

[Note: articles 5(1) final paragraph, 5(1)(a), 5(1)(c) and 5(1)(e) of the *MiFID implementing Directive*]

- 4.1.5 R A *MiFID investment firm* must establish, implement and maintain systems

and procedures that are adequate to safeguard the security, integrity and confidentiality of information, taking into account the nature of the information in question.

[Note: article 5(2) of the *MiFID implementing Directive*]

Business continuity

- 4.1.6 R A *common platform firm* must take reasonable steps to ensure continuity and regularity in the performance of its *regulated activities*. To this end the *firm* must employ appropriate and proportionate systems, resources and procedures.

[Note: article 13(4) of *MiFID*]

- 4.1.7 R A *common platform firm* must establish, implement and maintain an adequate business continuity policy aimed at ensuring, in the case of an interruption to its systems and procedures, that any losses are limited, the preservation of essential data and functions, and the maintenance of its *regulated activities*, or, where that is not possible, the timely recovery of such data and functions and the timely resumption of its *regulated activities*.

[Note: article 5(3) of the *MiFID implementing Directive* and annex V paragraph 13 of the *Banking Consolidation Directive*]

- 4.1.8 G The matters dealt with in a business continuity policy should include:
- (1) resource requirements such as people, systems and other assets, and arrangements for obtaining these resources;
 - (2) the recovery priorities for the *firm's* operations;
 - (3) communication arrangements for internal and external concerned parties (including the *FSA*, *clients* and the press);
 - (4) escalation and invocation plans that outline the processes for implementing the business continuity plans, together with relevant contact information;
 - (5) processes to validate the integrity of information affected by the disruption; and
 - (6) regular testing of the business continuity policy in an appropriate and proportionate manner in accordance with SYSC 4.1.10R.

Accounting policies

- 4.1.9 R A *common platform firm* must establish, implement and maintain accounting policies and procedures that enable it, at the request of the *FSA*, to deliver in a timely manner to the *FSA* financial reports which reflect a true and fair view of its financial position and which comply with all applicable accounting standards and rules.

[Note: article 5(4) of the *MiFID implementing Directive*]

Regular monitoring

- 4.1.10 R A *common platform firm* must monitor and, on a regular basis, evaluate the adequacy and effectiveness of its systems, internal control mechanisms and arrangements established in accordance with SYSC 4.1.4R to SYSC 4.1.9R and take appropriate measures to address any deficiencies.

[Note: article 5(5) of the *MiFID implementing Directive*]

Audit committee

- 4.1.11 G Depending on the nature, scale and complexity of its business, it may be appropriate for a *firm* to form an audit committee. An audit committee could typically examine management's process for ensuring the appropriateness and effectiveness of systems and controls, examine the arrangements made by management to ensure compliance with requirements and standards under the *regulatory system*, oversee the functioning of the internal audit function (if applicable) and provide an interface between management and external auditors. It should have an appropriate number of *non-executive directors* and it should have formal terms of reference.

4.2 Persons who effectively direct the business

- 4.2.1 R The *senior personnel* of a *common platform firm* must be of sufficiently good repute and sufficiently experienced as to ensure the sound and prudent management of the *firm*.

[Note: article 9(1) of *MiFID* and article 11(1) second paragraph of the *Banking Consolidation Directive*]

- 4.2.2 R A *common platform firm* must ensure that its management is undertaken by at least two persons meeting the requirements laid down in SYSC 4.2.1R.

[Note: article 9(4) first paragraph of *MiFID* and article 11(1) first paragraph of the *Banking Consolidation Directive*]

- 4.2.3 G In the case of a *body corporate*, the persons referred to in SYSC 4.2.2R should either be executive *directors* or persons granted executive powers by, and reporting immediately to, the *governing body*. In the case of a *partnership*, they should be active *partners*.

- 4.2.4 G At least two independent minds should be applied to both the formulation

and implementation of the policies of a *common platform firm*. Where a *common platform firm* nominates just two individuals to direct its business, the *FSA* will not regard them as both effectively directing the business where one of them makes some, albeit significant, decisions relating to only a few aspects of the business. Each should play a part in the decision-making process on all significant decisions. Both should demonstrate the qualities and application to influence strategy, day-to-day policy and its implementation. This does not require their day-to-day involvement in the execution and implementation of policy. It does, however, require involvement in strategy and general direction, as well as knowledge of, and influence on, the way in which strategy is being implemented through day-to-day policy.

4.2.5 G Where there are more than two individuals directing the business, the *FSA* does not regard it as necessary for all of these individuals to be involved in all decisions relating to the determination of strategy and general direction. However, at least two individuals should be involved in all such decisions. Both individuals' judgement should be engaged so that major errors leading to difficulties for the *firm* are less likely to occur. Similarly, each individual should have sufficient experience and knowledge of the business and the necessary personal qualities and skills to detect and resist any imprudence, dishonesty or other irregularities by the other individual. Where a single individual, whether a chief executive, managing *director* or otherwise, is particularly dominant in a *firm* this will raise doubts about whether SYSC 4.2.2R is met.

4.2.6 R If a *common platform firm*, other than a *credit institution*, is:

- (1) a natural person; or
- (2) a legal person managed by a single natural person;

it must have alternative arrangements in place which ensure sound and prudent management of the *firm*.

[Note: article 9(4) second paragraph of *MiFID*]

4.3 Responsibility of senior personnel

4.3.1 R A *MiFID investment firm*, when allocating functions internally, must ensure that *senior personnel* and, where appropriate, the *supervisory function*, are responsible for ensuring that the *firm* complies with its obligations under *MiFID*. In particular, *senior personnel* and, where appropriate, the *supervisory function* must assess and periodically review the effectiveness of the policies, arrangements and procedures put in place to comply with the *firm's* obligations under *MiFID* and take appropriate measures to address any deficiencies.

[Note: article 9(1) of the *MiFID implementing Directive*]

4.3.2 R A *MiFID investment firm*, must ensure:

- (1) that its *senior personnel* receive on a frequent basis, and at least annually, written reports on the matters covered by SYSC 6.1.2R to 6.1.5R, SYSC 6.2.1R and SYSC 7.1.2R, SYSC 7.1.3R and SYSC 7.1.5R to SYSC 7.1.7R, indicating in particular whether the appropriate remedial measures have been taken in the event of any deficiencies; and
- (2) the *supervisory function*, if any, must receive on a regular basis written reports on the same matters.

[Note: article 9(2) and article 9(3) of the *MiFID implementing Directive*]

- 4.3.3 G The *supervisory function* does not include a general meeting of the shareholders of a *common platform firm*, or equivalent bodies, but could involve, for example, a separate supervisory board within a two-tier board structure or the establishment of a non-executive committee of a single-tier board structure.
- 4.3.4 G SYSC 2, which sets out how certain functions in a firm should be allocated, does not affect the collective responsibility of the *senior personnel* of a *MiFID investment firm* under this section.

- 5 Employees, agents and other relevant persons
- 5.1 Skills, knowledge and expertise
- 5.1.1 R A *common platform firm* must employ personnel with the skills, knowledge and expertise necessary for the discharge of the responsibilities allocated to them.
- [Note: article 5(1)(d) of the *MiFID implementing Directive*]
- 5.1.2 G A *firm's* systems and controls should enable it to satisfy itself of the suitability of anyone who acts for it. This includes assessing an individual's honesty and competence. This assessment should normally be made at the point of recruitment. An individual's honesty need not normally be revisited unless something happens to make a fresh look appropriate.
- 5.1.3 G Any assessment of an individual's suitability should take into account the level of responsibility that the individual will assume within the *firm*. The nature of this assessment will generally differ depending upon whether it takes place at the start of the individual's recruitment, at the end of the probationary period (if there is one) or subsequently.
- 5.1.4 G The *FSA's* requirements on *firms* with respect to the competence of individuals are in the Training and Competence sourcebook (*TC*).
- 5.1.5 G The requirements on *firms* with respect to *approved persons* are in Part V of the *Act* (Performance of regulated activities) and *SUP 10*.
- Segregation of functions
- 5.1.6 R A *common platform firm* must ensure that the performance of multiple functions by its *relevant persons* does not and is not likely to prevent those persons from discharging any particular functions soundly, honestly and professionally.
- [Note: article 5(1)(g) of the *MiFID implementing Directive*]
- 5.1.7 R The *senior personnel* of a *common platform firm* must define arrangements concerning the segregation of duties within the *firm* and the prevention of conflicts of interest.
- [Note: annex V paragraph 1 of the *Banking Consolidation Directive*]
- 5.1.8 G The effective segregation of duties is an important element in the *internal controls* of a *firm* in the *prudential context*. In particular, it helps to ensure that no one individual is completely free to commit a *firm's* assets or incur liabilities on its behalf. Segregation can also help to ensure that a *firm's governing body* receives objective and accurate information on financial performance, the risks faced by the *firm* and the adequacy of its systems.

- 5.1.9 G A *common platform firm* should normally ensure that no single individual has unrestricted authority to do all of the following:
- (1) initiate a transaction;
 - (2) bind the *firm*;
 - (3) make payments; and
 - (4) account for it.
- 5.1.10 G Where a *common platform firm* is unable to ensure the complete segregation of duties (for example, because it has a limited number of staff), it should ensure that there are adequate compensating controls in place (for example, frequent review of an area by relevant *senior managers*).
- 5.1.11 G Where a *common platform firm* outsources its internal audit function, it should take reasonable steps to ensure that every individual involved in the performance of this service is independent from the individuals who perform its external audit. This should not prevent services from being undertaken by a *firm's* external auditors provided that:
- (1) the work is carried out under the supervision and management of the *firm's* own internal staff; and
 - (2) potential conflicts of interest between the provision of external audit services and the provision of internal audit are properly managed.

Awareness of procedures

- 5.1.12 R A *common platform firm* must ensure that its *relevant persons* are aware of the procedures which must be followed for the proper discharge of their responsibilities.

[Note: article 5(1)(b) of the *MiFID implementing Directive*]

General

- 5.1.13 R The systems, internal control mechanisms and arrangements established by a *firm* in accordance with this chapter must take into account the nature, scale and complexity of its business and the nature and range of *investment services and activities* undertaken in the course of that business.

[Note: article 5(1) final paragraph of the *MiFID implementing Directive*]

- 5.1.14 R A *common platform firm* must monitor and, on a regular basis, evaluate the adequacy and effectiveness of its systems, internal control mechanisms and arrangements established in accordance with this chapter, and take appropriate measures to address any deficiencies.

[Note: article 5(5) of the *MiFID implementing Directive*]

- 6 Compliance, internal audit and financial crime
- 6.1 Compliance
- 6.1.1 R A *common platform firm* must establish, implement and maintain adequate policies and procedures sufficient to ensure compliance of the *firm* including its managers, employees and *appointed representatives* with its obligations under the *regulatory system*.
- [Note: article 13(2) of *MiFID*]
- 6.1.2 R A *common platform firm* must, taking in to account the nature, scale and complexity of its business, and the nature and range of *investment services and activities* undertaken in the course of that business, establish, implement and maintain adequate policies and procedures designed to detect any risk of failure by the *firm* to comply with its obligations under the *regulatory system*, as well as associated risks, and put in place adequate measures and procedures designed to minimise such risks and to enable the *FSA* to exercise its powers effectively under the *regulatory system* and to enable any other *competent authority* to exercise its powers effectively under *MiFID*.
- [Note: article 6(1) of the *MiFID implementing Directive*]
- 6.1.3 R A *common platform firm* must maintain a permanent and effective compliance function which operates independently and which has the following responsibilities:
- (1) to monitor and, on a regular basis, to assess the adequacy and effectiveness of the measures and procedures put in place in accordance with *SYSC 6.1.2R*, and the actions taken to address any deficiencies in the *firm's* compliance with its obligations;
 - (2) to advise and assist the *relevant persons* responsible for carrying out *regulated activities* to comply with the *firm's* obligations under the *regulatory system*.
- [Note: article 6(2) of the *MiFID implementing Directive*]
- 6.1.4 R In order to enable the compliance function to discharge its responsibilities properly and independently, a *common platform firm* must ensure that the following conditions are satisfied:
- (1) the compliance function must have the necessary authority, resources, expertise and access to all relevant information;
 - (2) a compliance officer must be appointed and must be responsible for the compliance function and for any reporting as to compliance required by *SYSC 4.3.2R*;
 - (3) the *relevant persons* involved in the compliance functions must not be

involved in the performance of services or activities they monitor;

- (4) the method of determining the remuneration of the *relevant persons* involved in the compliance function must not compromise their objectivity and must not be likely to do so.

[Note: article 6(3) first paragraph of the *MiFID implementing Directive*]

- 6.1.5 R A *common platform firm* need not comply with SYSC 6.1.4R(3) or SYSC 6.1.4R(4) if it is able to demonstrate that in view of the nature, scale and complexity of its business, and the nature and range of *investment services and activities*, the requirements under those *rules* are not proportionate and that its compliance function continues to be effective.

[Note: article 6(3) second paragraph of the *MiFID implementing Directive*]

6.2 Internal audit

- 6.2.1 R A *common platform firm* must, where appropriate and proportionate in view of the nature, scale and complexity of its business and the nature and range of *investment services and activities* undertaken in the course of that business, establish and maintain an internal audit function which is separate and independent from the other functions and activities of the *firm* and which has the following responsibilities:

- (1) to establish, implement and maintain an audit plan to examine and evaluate the adequacy and effectiveness of the *firm's* systems, internal control mechanisms and arrangements;
- (2) to issue recommendations based on the result of work carried out in accordance with (1);
- (3) to verify compliance with those recommendations;
- (4) to report in relation to internal audit matters in accordance with SYSC 4.3.2R.

[Note: article 8 of the *MiFID implementing Directive*]

6.3 Financial crime

- 6.3.1 R A *common platform firm* must ensure the policies and procedures established under SYSC 6.1.1R include systems and controls that:
- (1) enable it to identify, assess, monitor and manage *money laundering* risk; and
 - (2) are comprehensive and proportionate to the nature, scale and complexity of its activities.
- 6.3.2 G "*Money laundering* risk" is the risk that a *firm* may be used to further *money laundering*. Failure by a *firm* to manage this risk effectively will increase the

risk to society of crime and terrorism.

- 6.3.3 R A *common platform firm* must carry out regular assessment of the adequacy of these systems and controls to ensure that it continues to comply with SYSC 6.3.1R.
- 6.3.4 G A *common platform firm* may also have separate obligations to comply with relevant legal requirements, including the Terrorism Act 2000, the Proceeds of Crime Act 2002 and the *Money Laundering Regulations*. SYSC 6.1.1R and SYSC 6.3.1R to SYSC 6.3.10G are not relevant for the purposes of regulation 3(3) of the *Money Laundering Regulations*, section 330(8) of the Proceeds of Crime Act 2002 or section 21A(6) of the Terrorism Act 2000.
- 6.3.5 G The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *common platform firm* has followed relevant provisions in the guidance for the *United Kingdom* financial sector issued by the Joint Money Laundering Steering Group.
- 6.3.6 G In identifying its *money laundering* risk and in establishing the nature of these systems and controls, a *common platform firm* should consider a range of factors, including:
- (1) its customer, product and activity profiles;
 - (2) its distribution channels;
 - (3) the complexity and volume of its transactions;
 - (4) its processes and systems; and
 - (5) its operating environment.
- 6.3.7 G A *common platform firm* should ensure that the systems and controls include:
- (1) appropriate training for its employees in relation to *money laundering*;
 - (2) appropriate provision of information to its *governing body* and senior management, including a report at least annually by that *firm's money laundering reporting officer (MLRO)* on the operation and effectiveness of those systems and controls;
 - (3) appropriate documentation of its risk management policies and risk profile in relation to *money laundering*, including documentation of its application of those policies (see SYSC 9);
 - (4) appropriate measures to ensure that *money laundering* risk is taken into account in its day-to-day operation, including in relation to:

- (a) the development of new products;
 - (b) the taking-on of new customers; and
 - (c) changes in its business profile; and
- (5) appropriate measures to ensure that procedures for identification of new customers do not unreasonably deny access to its services to potential customers who cannot reasonably be expected to produce detailed evidence of identity.

6.3.8 R A *common platform firm* must allocate to a *director* or *senior manager* (who may also be the *money laundering reporting officer*) overall responsibility within the *firm* for the establishment and maintenance of effective anti-*money laundering* systems and controls.

The money laundering reporting officer

- 6.3.9 R A *common platform firm* must:
- (1) appoint an individual as *MLRO*, with responsibility for oversight of its compliance with the *FSA's rules* on systems and controls against *money laundering*; and
 - (2) ensure that its *MLRO* has a level of authority and independence within the *firm* and access to resources and information sufficient to enable him to carry out that responsibility.
- 6.3.10 G The job of the *MLRO* within a *firm* is to act as the focal point for all activity within the *firm* relating to anti-*money laundering*. The *FSA* expects that a *firm's MLRO* will be based in the *United Kingdom*.

- 7 Risk control
- 7.1 Risk control
- 7.1.1 G SYSC 4.1.1R requires a *common platform firm* to have effective processes to identify, manage, monitor and report the risks it is or might be exposed to.
- 7.1.2 R A *common platform firm* must establish, implement and maintain adequate risk management policies and procedures, including effective procedures for risk assessment, which identify the risks relating to the *firm's* activities, processes and systems, and where appropriate, set the level of risk tolerated by the *firm*.
- [Note: article 7(1)(a) of the *MiFID implementing Directive*, article 13(5) second paragraph of *MiFID*]
- 7.1.3 R A *common platform firm* must adopt effective arrangements, processes and mechanisms to manage the risk relating to the *firm's* activities, processes and systems, in light of that level of risk tolerance.
- [Note: article 7(1)(b) of the *MiFID implementing Directive*]
- 7.1.4 R The *senior personnel* of a *common platform firm* must approve and periodically review the strategies and policies for taking up, managing, monitoring and mitigating the risks the *firm* is or might be exposed to, including those posed by the macroeconomic environment in which it operates in relation to the status of the business cycle.
- [Note: annex V paragraph 2 of the *Banking Consolidation Directive*]
- 7.1.5 R A *common platform firm* must monitor the following:
- (1) the adequacy and effectiveness of the *firm's* risk management policies and procedures;
 - (2) the level of compliance by the *firm* and its *relevant persons* with the arrangements, processes and mechanisms adopted in accordance with SYSC 7.1.3R;
 - (3) the adequacy and effectiveness of measures taken to address any deficiencies in those policies, procedures, arrangements, processes and mechanisms, including failures by the *relevant persons* to comply with such arrangements or processes and mechanisms or follow such policies and procedures.
- [Note: article 7(1)(c) of the *MiFID implementing Directive*]
- 7.1.6 R A *common platform firm* must, where appropriate and proportionate in view of the nature, scale and complexity of its business and the nature and range of the *investment services and activities* undertaken in the course of that business, establish and maintain a risk management function that operates

independently and carries out the following tasks:

- (1) implementation of the policies and procedures referred to in *SYSC 7.1.2R* to *SYSC 7.1.5R*; and
- (2) provision of reports and advice to *senior personnel* in accordance with *SYSC 4.3.2R*.

[Note: *MiFID implementing Directive* article 7(2) first paragraph]

- 7.1.7 R Where a *common platform firm* is not required under *SYSC 7.1.6R* to maintain a risk management function that functions independently, it must nevertheless be able to demonstrate that the policies and procedures which it has adopted in accordance with *SYSC 7.1.2R* to *SYSC 7.1.5R* satisfy the requirements of those *rules* and are consistently effective.

[Note: article 7(2) second paragraph of the *MiFID implementing Directive*]

- 7.1.8 G *SYSC 4.1.3R* requires a *BIPRU firm* to ensure that its internal control mechanisms and administrative and accounting procedures permit the verification of its compliance with *rules* adopted in accordance with the *Capital Adequacy Directive* at all times. In complying with this obligation, a *BIPRU firm* should document the organisation and responsibilities of its risk management function and it should document its risk management framework setting out how the risks in the business are identified, measured, monitored and controlled.

Credit and counterparty risk

- 7.1.9 R A *BIPRU firm* must base credit-granting on sound and well-defined criteria and clearly establish the process for approving, amending, renewing, and re-financing credits.

[Note: annex V paragraph 3 of the *Banking Consolidation Directive*]

- 7.1.10 R A *BIPRU firm* must operate through effective systems the ongoing administration and monitoring of its various credit risk-bearing portfolios and exposures, including for identifying and managing problem credits and for making adequate value adjustments and provisions.

[Note: annex V paragraph 4 of the *Banking Consolidation Directive*]

- 7.1.11 R A *BIPRU firm* must adequately diversify credit portfolios given its target market and overall credit strategy.

[Note: annex V paragraph 5 of the *Banking Consolidation Directive*]

- 7.1.12 G The documentation maintained by a *BIPRU firm* under *SYSC 4.1.3R* should include its policy for credit risk, including its risk appetite and provisioning policy and should describe how it measures, monitors and controls that risk. This should include descriptions of the systems used to ensure that the

policy is correctly implemented.

Residual risk

- 7.1.13 R A *BIPRU firm* must address and control by means of written policies and procedures the risk that recognised credit risk mitigation techniques used by it prove less effective than expected.

[Note: annex V paragraph 6 of the *Banking Consolidation Directive*]

Market risk

- 7.1.14 R A *BIPRU firm* must implement policies and processes for the measurement and management of all material sources and effects of market risks.

[Note: annex V paragraph 10 of the *Banking Consolidation Directive*]

Interest rate risk

- 7.1.15 R A *BIPRU firm* must implement systems to evaluate and manage the risk arising from potential changes in interest rates as they affect a *BIPRU firm's* non-trading activities.

[Note: annex V paragraph 11 of the *Banking Consolidation Directive*]

Operational risk

- 7.1.16 R A *BIPRU firm* must implement policies and processes to evaluate and manage the exposure to operational risk, including to low-frequency high severity events. Without prejudice to the definition of *operational risk*, *BIPRU firms* must articulate what constitutes operational risk for the purposes of those policies and procedures.

[Note: annex V paragraph 12 of the *Banking Consolidation Directive*]

- 8 Outsourcing
- 8.1 General outsourcing requirements
- 8.1.1 R A *common platform firm* must:
- (1) when relying on a third party for the performance of operational functions which are critical for the performance of *regulated activities, listed activities* or *ancillary services* (in this chapter "relevant services and activities") on a continuous and satisfactory basis, ensure that it takes reasonable steps to avoid undue additional operational risk;
 - (2) not undertake the *outsourcing* of important operational functions in such a way as to impair materially:
 - (a) the quality of its internal control; and
 - (b) the ability of the *FSA* to monitor the *firm's* compliance with all obligations under the *regulatory system* and, if different, of a *competent authority* to monitor the *firm's* compliance with all obligations under *MiFID*.
- [Note: article 13(5) first paragraph of *MiFID*]
- 8.1.2 G The application of *SYSC* 8.1 to relevant services and activities (see *SYSC* 8.1.1R(1)) is limited by *SYSC* 1.3 (Application of the common platform requirements).
- 8.1.3 G *SYSC* 4.1.1R requires a *common platform firm* to have effective processes to identify, manage, monitor and report risks and internal control mechanisms. Except in relation to those functions described in *SYSC* 8.1.5R, where a *firm* relies on a third party for the performance of operational functions which are not critical or important for the performance of relevant services and activities (see *SYSC* 8.1.1R(1)) on a continuous and satisfactory basis, it should take into account, in a manner that is proportionate given the nature, scale and complexity of the *outsourcing*, the *rules* in this section in complying with that requirement.
- 8.1.4 R For the purposes of this chapter an operational function is regarded as critical or important if a defect or failure in its performance would materially impair the continuing compliance of a *common platform firm* with the conditions and obligations of its *authorisation* or its other obligations under the *regulatory system*, or its financial performance, or the soundness or the continuity of its relevant services and activities.
- [Note: article 13(1) of the *MiFID implementing Directive*]
- 8.1.5 R Without prejudice to the status of any other function, the following functions will not be considered as critical or important for the purposes of

this chapter:

- (1) the provision to the *firm* of advisory services, and other services which do not form part of the relevant services and activities of the *firm*, including the provision of legal advice to the *firm*, the training of personnel of the *firm*, billing services and the security of the *firm's* premises and personnel;
- (2) the purchase of standardised services, including market information services and the provision of price feeds.

[Note: article 13(2) of the *MiFID implementing Directive*]

8.1.6 R If a *common platform firm outsources* critical or important operational functions or any relevant services and activities, it remains fully responsible for discharging all of its obligations under the *regulatory system* and must comply, in particular, with the following conditions:

- (1) the *outsourcing* must not result in the delegation by *senior personnel* of their responsibility;
- (2) the relationship and obligations of the *firm* towards its *clients* under the *regulatory system* must not be altered;
- (3) the conditions with which the *firm* must comply in order to be *authorised*, and to remain so, must not be undermined;
- (4) none of the other conditions subject to which the *firm's authorisation* was granted must be removed or modified.

[Note: article 14(1) of the *MiFID implementing Directive*]

8.1.7 R A *common platform firm* must exercise due skill and care and diligence when entering into, managing or terminating any arrangement for the *outsourcing* to a service provider of critical or important operational functions or of any relevant services and activities.

[Note: article 14(2) first paragraph of the *MiFID implementing Directive*]

8.1.8 R A *common platform firm* must in particular take the necessary steps to ensure that the following conditions are satisfied:

- (1) the service provider must have the ability, capacity, and any *authorisation* required by law to perform the *outsourced* functions, services or activities reliably and professionally;
- (2) the service provider must carry out the *outsourced* services effectively, and to this end the *firm* must establish methods for assessing the standard of performance of the service provider;
- (3) the service provider must properly supervise the carrying out of the *outsourced* functions, and adequately manage the risks associated

with the *outsourcing*;

- (4) appropriate action must be taken if it appears that the service provider may not be carrying out the functions effectively and in compliance with applicable laws and regulatory requirements;
- (5) the *firm* must retain the necessary expertise to supervise the *outsourced* functions effectively and manage the risks associated with the *outsourcing* and must manage those risks and must supervise those functions and manage those risks;
- (6) the service provider must disclose to the *firm* any development that may have a material impact on its ability to carry out the *outsourced* functions effectively and in compliance with applicable laws and regulatory requirements;
- (7) the *firm* must be able to terminate the arrangement for the *outsourcing* where necessary without detriment to the continuity and quality of its provision of services to *clients*;
- (8) the service provider must co-operate with the *FSA* and any other relevant *competent authority* in connection with the *outsourced* activities;
- (9) the *firm*, its auditors, the *FSA* and any other relevant *competent authority* must have effective access to data related to the *outsourced* activities, as well as to the business premises of the service provider; and the *FSA* and any other relevant *competent authority* must be able to exercise those rights of access;
- (10) the service provider must protect any confidential information relating to the *firm* and its *clients*;
- (11) the *firm* and the service provider must establish, implement and maintain a contingency plan for disaster recovery and periodic testing of backup facilities where that is necessary having regard to the function, service or activity that has been *outsourced*.

[Note: article 14(2) second paragraph of the *MiFID implementing Directive*]

- 8.1.9 R A *common platform firm* must ensure that the respective rights and obligations of the *firm* and of the service provider are clearly allocated and set out in a written agreement.

[Note: article 14(3) of the *MiFID implementing Directive*]

- 8.1.10 R If a *common platform firm* and the service provider are members of the same *group*, the *firm* may, for the purpose of complying with SYSC 8.1.7R to SYSC 8.1.11R and SYSC 8.2 and SYSC 8.3, take into account the extent to which the *common platform firm controls* the service provider or has the

ability to influence its actions.

[Note: article 14(4) of the *MiFID implementing Directive*]

- 8.1.11 R A *common platform firm* must make available on request to the *FSA* and any other relevant *competent authority* all information necessary to enable the *FSA* and any other relevant *competent authority* to supervise the compliance of the performance of the *outsourced* activities with the requirements of the *regulatory system*.

[Note: article 14(5) of the *MiFID implementing Directive*]

- 8.1.12 G As *SUP 15.3.8G* explains, a *common platform firm* should notify the *FSA* when it intends to rely on a third party for the performance of operational functions which are critical or important for the performance of relevant services and activities on a continuous and satisfactory basis.

[Note: recital 20 of the *MiFID implementing Directive*]

To be inserted after SYSC 9

10.1 Conflicts of interest

Application

- 10.1.1 R This section applies to a *common platform firm* which provides services to its *clients* in the course of carrying on *regulated activities* or *ancillary activities*.

Requirements only apply if a service is provided

- 10.1.2 G The requirements in this section only apply where a service is provided by a *common platform firm*. The status of the *client* to whom the service is provided (as a *retail client*, *professional client* or *eligible counterparty*) is irrelevant for this purpose.

[Note: recital 25 of *MiFID implementing Directive*]

Identifying conflicts

- 10.1.3 R A *common platform firm* must take all reasonable steps to identify conflicts of interest between:

- (1) the *firm*, including its managers, employees, *appointed representatives* or *tied agents*, or any *person* directly or indirectly linked to them by *control*, and a *client* of the *firm*; or
- (2) one *client* of the *firm* and another *client*;

that arise, or may arise, in the course of the *firm* providing any service referred to in SYSC 10.1.1R.

[Note: article 18(1) of *MiFID*]

Types of conflicts

- 10.1.4 R For the purposes of identifying the types of conflict of interest that arise, or may arise, in the course of providing a service and whose existence may entail a material risk of damage to the interests of a *client*, a *common platform firm* must take into account, as a minimum, whether the *firm* or a *relevant person*, or a *person* directly or indirectly linked by *control* to the *firm*:

- (1) is likely to make a financial gain, or avoid a financial loss, at the expense of the *client*;
- (2) has an interest in the outcome of a service provided to the *client* or of a transaction carried out on behalf of the *client*, which is distinct from the *client's* interest in that outcome;

- (3) has a financial or other incentive to favour the interest of another *client* or group of *clients* over the interests of the *client*;
- (4) carries on the same business as the *client*; or
- (5) receives or will receive from a *person* other than the *client* an inducement in relation to a service provided to the *client*, in the form of monies, goods or services, other than the standard commission or fee for that service.

The conflict of interest may result from the *firm* or *person* providing a service referred to in SYSC 10.1.1R or engaging in any other activity.

[Note: article 21 of *MiFID implementing Directive*]

- 10.1.5 G The circumstances which should be treated as giving rise to a conflict of interest should cover cases where there is a conflict between the interests of the *firm* or certain *persons* connected to the *firm* or the *firm's group* and the duty the *firm* owes to a *client*; or between the differing interests of two or more of its *clients*, to whom the *firm* owes in each case a duty. It is not enough that the *firm* may gain a benefit if there is not also a possible disadvantage to a *client*, or that one *client* to whom the *firm* owes a duty may make a gain or avoid a loss without there being a concomitant possible loss to another such *client*.

[Note: Recital 24 of *MiFID implementing Directive*]

Record of conflicts

- 10.1.6 R A *common platform firm* must keep and regularly update a record of the kinds of service or activity carried out by or on behalf of the *firm* in which a conflict of interest entailing a material risk of damage to the interests of one or more *clients* has arisen or, in the case of an ongoing service or activity, may arise.

[Note: article 23 of *MiFID implementing Directive*]

Managing conflicts

- 10.1.7 R A *common platform firm* must maintain and operate effective organisational and administrative arrangements with a view to taking all reasonable steps to prevent conflicts of interest as defined in SYSC 10.1.3R from constituting or giving rise to a material risk of damage to the interests of its *clients*.

[Note: article 13(3) of *MiFID*]

Disclosure of conflicts

- 10.1.8 R (1) If arrangements made by a *common platform firm* under SYSC 10.1.7R to manage conflicts of interest are not sufficient to ensure, with reasonable confidence, that risks of damage to the interests of a *client* will be prevented, the *firm* must clearly disclose the general

nature and/or sources of conflicts of interest to the *client* before undertaking business for the *client*.

- (2) The disclosure must:
- (a) be made in a *durable medium*; and
 - (b) include sufficient detail, taking into account the nature of the *client*, to enable that *client* to take an informed decision with respect to the service in the context of which the conflict of interest arises.

[Note: article 18(2) of *MiFID* and article 22(4) of *MiFID implementing Directive*]

- 10.1.9 G *Common platform firms* should aim to identify and manage the conflicts of interest arising in relation to their various business lines and their *group's* activities under a comprehensive *conflicts of interest policy*. In particular, the disclosure of conflicts of interest by a *firm* should not exempt it from the obligation to maintain and operate the effective organisational and administrative arrangements under SYSC 10.1.7R. While disclosure of specific conflicts of interest is required by SYSC 10.1.8R, an over-reliance on disclosure without adequate consideration as to how conflicts may appropriately be managed is not permitted.

[Note: Recital 27 of *MiFID implementing Directive*]

Conflicts policy

- 10.1.10 R (1) A *common platform firm* must establish, implement and maintain an effective conflicts of interest policy that is set out in writing and is appropriate to the size and organisation of the *firm* and the nature, scale and complexity of its business.
- (2) Where the *common platform firm* is a member of a *group*, the policy must also take into account any circumstances, of which the *firm* is or should be aware, which may give rise to a conflict of interest arising as a result of the structure and business activities of other members of the *group*.

[Note: article 22(1) of *MiFID implementing Directive*]

Contents of policy

- 10.1.11 R (1) The *conflicts of interest policy* must include the following content:
- (a) it must identify in accordance with SYSC 10.1.3R and SYSC 10.1.4R, by reference to the specific services and activities carried out by or on behalf of the *common platform firm*, the circumstances which constitute or may give rise to a conflict of interest entailing a material risk of damage to the interests

of one or more *clients*; and

- (b) it must specify procedures to be followed and measures to be adopted in order to manage such conflicts.

(2) The procedures and measures provided for in paragraph (1)(b) must:

- (a) be designed to ensure that *relevant persons* engaged in different business activities involving a conflict of interest of the kind specified in paragraph (1)(a) carry on those activities at a level of independence appropriate to the size and activities of the *common platform firm* and of the *group* to which it belongs, and to the materiality of the risk of damage to the interests of *clients*; and

- (b) include such of the following as are necessary and appropriate for the *common platform firm* to ensure the requisite degree of independence:

- (i) effective procedures to prevent or control the exchange of information between *relevant persons* engaged in activities involving a risk of a conflict of interest where the exchange of that information may harm the interests of one or more *clients*;
- (ii) the separate supervision of *relevant persons* whose principal functions involve carrying out activities on behalf of, or providing services to, *clients* whose interests may conflict, or who otherwise represent different interests that may conflict, including those of the *firm*;
- (iii) the removal of any direct link between the remuneration of *relevant persons* principally engaged in one activity and the remuneration of, or revenues generated by, different *relevant persons* principally engaged in another activity, where a conflict of interest may arise in relation to those activities;
- (iv) measures to prevent or limit any *person* from exercising inappropriate influence over the way in which a *relevant person* carries out services or activities; and
- (v) measures to prevent or control the simultaneous or sequential involvement of a *relevant person* in separate services or activities where such involvement may impair the proper management of conflicts of interest.

(3) If the adoption or the practice of one or more of those measures and

procedures does not ensure the requisite level of independence, a *common platform firm* must adopt such alternative or additional measures and procedures as are necessary and appropriate for those purposes.

[Note: article 22(2) and (3) of *MiFID implementing Directive*]

- 10.1.12 G In drawing up a *conflicts of interest policy* which identifies circumstances which constitute or may give rise to a conflict of interest, a *common platform firm* should pay special attention to the activities of investment research and advice, proprietary trading, portfolio management and corporate finance business, including underwriting or selling in an offering of securities and advising on mergers and acquisitions. In particular, such special attention is appropriate where the *firm* or a *person* directly or indirectly linked by *control* to the *firm* performs a combination of two or more of those activities.

[Note: Recital 26 of *MiFID implementing Directive*]

Corporate finance

- 10.1.13 G This section is relevant to the management of a *securities* offering by a *common platform firm*.
- 10.1.14 G A *common platform firm* will wish to note that when carrying on a mandate to manage an offering of *securities*, the *firm's* duty for that business is to its corporate finance *client* (in many cases, the corporate issuer or seller of the relevant *securities*), but that its responsibilities to provide services to its investment *clients* are unchanged.
- 10.1.15 G Measures that a *common platform firm* might wish to consider in drawing up its *conflicts of interest policy* in relation to the management of an offering of *securities* include:
- (1) at an early stage agreeing with its corporate finance *client* relevant aspects of the offering process such as the process the *firm* proposes to follow in order to determine what recommendations it will make about allocations for the offering; how the target investor group will be identified; how recommendations on allocation and pricing will be prepared; and whether the *firm* might place *securities* with its investment *clients* or with its own proprietary book, or with an associate, and how conflicts arising might be managed; and
 - (2) agreeing allocation and pricing objectives with the corporate finance *client*; inviting the corporate finance *client* to participate actively in the allocation process; making the initial recommendation for allocation to *retail clients* of the *firm* as a single block and not on a named basis; having internal arrangements under which senior personnel responsible for providing services to *retail clients* make the initial allocation recommendations for allocation to *retail clients* of the *firm*; and disclosing to the *issuer* details of the allocations

actually made.

[Note: The provisions in *SYSC* 10.1 also implement *BCD* article 22 and *BCD* Annex V paragraph 1]

10.2 Chinese walls

Application

10.2.1 R This section applies to a *common platform firm*.

Control of information

10.2.2 R (1) When a *common platform firm* establishes and maintains a *Chinese wall* (that is, an arrangement that requires information held by a *person* in the course of carrying on one part of the business to be withheld from, or not to be used for, *persons* with or for whom it acts in the course of carrying on another part of its business) it may:

- (a) withhold or not use the information held; and
- (b) for that purpose, permit *persons* employed in the first part of its business to withhold the information held from those employed in that other part of the business;

but only to the extent that the business of one of those parts involves the carrying on of *regulated activities* or *ancillary activities*.

- (2) Information may also be withheld or not used by a *common platform firm* when this is required by an established arrangement maintained between different parts of the business (of any kind) in the same *group*. This provision does not affect any requirement to transmit or use information that may arise apart from the *rules* in *COB* or *COBS*.
- (3) For the purpose of this *rule*, "maintains" includes taking reasonable steps to ensure that the arrangements remain effective and are adequately monitored, and must be interpreted accordingly.
- (4) For the purposes of section 118A(5)(a) of the *Act*, behaviour conforming with paragraph (1) does not amount to market abuse.

Effect of rules

10.2.3 G *SYSC* 10.2.2R is made under section 147 of the *Act* (Control of information rules). It has the following effect:

- (1) acting in conformity with *SYSC* 10.2.2R(1) provides a defence against proceedings brought under section 397(2) or (3) of the *Act* (Misleading statements and practices) – see sections 397(4) and (5)(c);
- (2) behaviour in conformity with *SYSC* 10.2.2R(1) does not amount to *market abuse* (see *SYSC* 10.2.2R(4)); and
- (3) acting in conformity with *SYSC* 10.2.2R(1) provides a defence for a firm against *FSA* enforcement action, or an action for damages under

section 150 of the *Act*, based on a breach of a relevant requirement to disclose or use this information.

Attribution of knowledge

- 10.2.4 R When any of the *rules* of *COB*, *COBS* or *CASS* apply to a *common platform firm* that acts with knowledge, the *firm* will not be taken to act with knowledge for the purposes of that *rule* if none of the relevant individuals involved on behalf of the *firm* acts with that knowledge as a result of arrangements established under *SYSC 10.2.2R*.
- 10.2.5 G When a *common platform firm* manages a conflict of interest using the arrangements in *SYSC 10.2.2R* which take the form of a *Chinese wall*, individuals on the other side of the wall will not be regarded as being in possession of knowledge denied to them as a result of the *Chinese wall*.

Annex C
Senior Management Arrangements, Systems and Controls Handbook (SYSC)

In this Annex, the place where the text is being inserted is indicated and the text is not underlined.

- 11 Liquidity risk systems and controls
- 11.1 Application
- 11.1.1 R SYSC 11 applies to:
- (1) an *insurer*, unless it is an *EEA deposit insurer* or a *Swiss general insurer*;
 - (2) a *BIPRU firm*;
 - (3) an *incoming EEA firm* which:
 - (a) is a *full BCD credit institution*; and
 - (b) has a *branch* in the *United Kingdom*;
 - (4) a *third country BIPRU firm* which:
 - (a) is a *bank*; and
 - (b) has a *branch* in the *United Kingdom*.
- [Note: first paragraph of article 41 of the *Banking Consolidation Directive*]
- 11.1.2 R If this chapter applies because the *firm* has a *branch* in the *United Kingdom* (see SYSC 11.1.1R(3) or SYSC 11.1.1R(4)), SYSC 11 applies only with respect to the *branch*.
- 11.1.3 R SYSC 11 applies to an *incoming EEA firm* only to the extent that the relevant matter is not reserved by the relevant *Single Market Directive* to the *firm's Home State regulator*.
- 11.1.4 R SYSC 11 does not apply to:
- (1) a *non-directive friendly society*; or
 - (2) a *UCITS qualifier*; or
 - (3) an *ICVC*; or
 - (4) an *incoming EEA firm* (unless it has a *branch* in the *United Kingdom* - see SYSC 11.1.1R(3)); or
 - (5) an *incoming Treaty firm*.

- 11.1.5 R (1) SYSC 11.1.11R and SYSC 11.1.12R apply only to a *BIPRU firm*
(2) SYSC 11.1.26G to SYSC 11.1.32G do not apply to *insurers*.

- 11.1.6 R If a *firm* carries on:
(1) *long-term insurance business*; and
(2) *general insurance business*;
SYSC 11 applies separately to each type of business.

Purpose

- 11.1.7 G The purpose of SYSC 11 is to amplify *GENPRU* and SYSC in their specific application to *liquidity risk* and, in so doing, to indicate minimum standards for systems and controls in respect of that risk.
- 11.1.8 G Appropriate systems and controls for the management of *liquidity risk* will vary with the scale, nature and complexity of the *firm's* activities. Most of the material in SYSC 11 is, therefore, *guidance*. SYSC 11 lays out some of the main issues that the *FSA* expects a *firm* to consider in relation to *liquidity risk*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3* to organise and control its affairs responsibly and effectively.
- 11.1.9 G SYSC 11 addresses the need to have appropriate systems and controls to deal both with liquidity management issues under normal market conditions, and with stressed or extreme situations resulting from either general market turbulence or *firm-specific* difficulties.
- 11.1.10 G SYSC 11.1.11R and SYSC 11.1.12R implement the specific *liquidity risk* requirements of the *BCD*.

Requirements

- 11.1.11 R A *BIPRU firm* must have policies and processes for the measurement and management of its net funding position and requirements on an ongoing and forward looking basis. Alternative scenarios must be considered and the assumptions underpinning decisions concerning the net funding position must be reviewed regularly.
[Note: annex V paragraph 14 of the *Banking Consolidation Directive*]
- 11.1.12 R A *BIPRU firm* must have contingency plans in place to deal with liquidity crises.
[Note: annex V paragraph 15 of the *Banking Consolidation Directive*]
- 11.1.13 G An *insurer* is also required to comply with the requirements in relation to

liquidity risk set out in *INSPRU* 4.1.

- 11.1.14 G *SYSC* 4.1.1R requires a *BIPRU firm* to have effective processes to identify, manage, monitor and report the risks it is or might be exposed to. A *BIPRU firm* is required by *SYSC* 7.1.2R to establish, implement and maintain adequate risk management policies and procedures, including effective procedures for risk assessment. *Liquidity risk* is one of the risks covered by both of those requirements.
- 11.1.15 G A *UK bank*, a *branch* of an *EEA bank* and a *branch* of an *overseas bank* is required in *IPRU(BANK)* GN 3.4.3R to set out its policy on the management of its liquidity. *Guidance* on a bank's liquidity policy statement is given in *IPRU(BANK)* LM Section 10. *Guidance* on a bank's management of *liquidity risk* is given in *IPRU(BANK)* LM Sections 2 and 9.
- 11.1.16 G A *building society* is required by *IPRU(BSOC)* 5.2.7R to maintain a board-approved policy statement on liquidity. *Guidance* on a *building society's* liquidity policy statement is given in *IPRU(BSOC)* 5.2.8G and *IPRU(BSOC)* Annex 5B. *Guidance* on a *building society's* management of *liquidity risk* is given in *IPRU(BSOC)* Sections 5.3 to 5.8.
- 11.1.17 G High level requirements in relation to carrying out stress testing and scenario analysis are set out in *GENPRU* 1.2. In particular, *GENPRU* 1.2.42R requires a *firm* to carry out appropriate stress testing and scenario analysis. *SYSC* 11 gives *guidance* in relation to these tests in the case of *liquidity risk*.

Stress testing and scenario analysis

- 11.1.18 G The effect of *GENPRU* 1.2.30R, *GENPRU* 1.2.34R, *GENPRU* 1.2.37R(1) and *GENPRU* 1.2.42R is that, for the purposes of determining the adequacy of its overall financial resources, a *firm* must carry out appropriate stress testing and scenario analysis, including taking reasonable steps to identify an appropriate range of realistic adverse circumstances and events in which *liquidity risk* might occur or crystallise.
- 11.1.19 G *GENPRU* 1.2.40G and *GENPRU* 1.2.62G to *GENPRU* 1.2.78G give *guidance* on stress testing and scenario analysis, including on how to choose appropriate scenarios, but the precise scenarios that a *firm* chooses to use will depend on the nature of its activities. For the purposes of testing *liquidity risk*, however, a *firm* should normally consider scenarios based on varying degrees of stress and both *firm-specific* and market-wide difficulties. In developing any scenario of extreme market-wide stress that may pose systemic risk, it may be appropriate for a *firm* to make assumptions about the likelihood and nature of central bank intervention.
- 11.1.20 G A *firm* should review frequently the assumptions used in stress testing scenarios to gain assurance that they continue to be appropriate.
- 11.1.21 E (1) A scenario analysis in relation to *liquidity risk* required under *GENPRU* 1.2.42R should include a cash-flow projection for each

scenario tested, based on reasonable estimates of the impact (both on and off balance sheet) of that scenario on the *firm's* funding needs and sources.

- (2) Contravention of (1) may be relied on as tending to establish contravention of *GENPRU* 1.2.42R.

11.1.22 G In identifying the possible on and off balance sheet impact referred to in *SYSC* 11.1.21E(1), a *firm* may take into account:

- (1) possible changes in the market's perception of the *firm* and the effects that this might have on the *firm's* access to the markets, including:
 - (a) (where the *firm* funds its holdings of assets in one currency with liabilities in another) access to foreign exchange markets, particularly in less frequently traded currencies;
 - (b) access to secured funding, including by way of repo transactions; and
 - (c) the extent to which the *firm* may rely on committed facilities made available to it;
- (2) (if applicable) the possible effect of each scenario analysed on currencies whose exchange rates are currently pegged or fixed; and
- (3) that:
 - (a) general market turbulence may trigger a substantial increase in the extent to which *persons* exercise rights against the *firm* under off balance sheet instruments to which the *firm* is party;
 - (b) access to *OTC derivative* and foreign exchange markets are sensitive to credit-ratings;
 - (c) the scenario may involve the triggering of early amortisation in asset securitisation transactions with which the *firm* has a connection; and
 - (d) its ability to securitise assets may be reduced.

Contingency funding plans

11.1.23 G *GENPRU* 1.2.26R states that a *firm* must at all times maintain overall financial resources adequate to ensure that there is no significant risk that its liabilities cannot be met as they fall due. *GENPRU* 1.2.42R(1)(b) provides that for the purposes of determining the adequacy of its overall financial resources, a *firm* must estimate the financial resources it would need in each of the circumstances and events considered in carrying out its stress testing and scenario analysis in order to, inter alia, meet its liabilities as they fall due.

- 11.1.24 E (1) A *firm* should have an adequately documented *contingency funding plan* for taking action to ensure, so far as it can, that, in each of the scenarios analysed under *GENPRU* 1.2.42R(1)(b), it would still have sufficient liquid financial resources to meet liabilities as they fall due.
- (2) The *contingency funding plan* should cover what events or circumstances will lead the *firm* to put into action any part of the plan.
- (3) The *contingency funding plan* of a *firm* described in *SYSC* 11.1.1R(2) to *SYSC* 11.1.1R(4) should cover the extent to which the actions in (1) include:
- (a) selling, using as *collateral* in secured funding (including repo), or securitising, its assets;
 - (b) otherwise reducing its assets;
 - (c) modifying the structure of its liabilities or increasing its liabilities; and
 - (d) the use of committed facilities.
- (4) A *firm's contingency funding plan* should, where relevant, take account of the impact of stressed market conditions on:
- (a) the behaviour of any credit-sensitive liabilities it has; and
 - (b) its ability to securitise assets.
- (5) A *firm's contingency funding plan* should contain administrative policies and procedures that will enable the *firm* to manage the plan's implementation effectively, including:
- (a) the responsibilities of senior management;
 - (b) names and contact details of members of the team responsible for implementing the *contingency funding plan*;
 - (c) where, geographically, team members will be assigned;
 - (d) who within the team is responsible for contact with head office (if appropriate), analysts, investors, external auditors, press, significant *client's*, regulators, lawyers and others; and
 - (e) mechanisms that enable senior management and the *governing body* to receive management information that is both relevant and timely.
- (6) Contravention of any of (1) to (5) may be relied upon as tending to

establish contravention of *GENPRU* 1.2.30R(2)(c).

Documentation

- 11.1.25 G *GENPRU* 1.2.60R requires a *firm* to document its assessment of the adequacy of its liquidity financial resources, how it intends to deal with those risks, and details of the stress tests and scenario analyses carried out and the resulting financial resources estimated to be required. Accordingly, a *firm* should document both its stress testing and scenario analysis (see *SYSC* 11.1.18G) and its *contingency funding plan* (see *SYSC* 11.1.23G).

Management information systems

- 11.1.26 G A *firm* should have adequate information systems for controlling and reporting *liquidity risk*. The management information system should be used to check for compliance with the *firm's* established policies, procedures and limits.
- 11.1.27 G Reports on *liquidity risk* should be provided on a timely basis to the *firm's governing body*, senior management and other appropriate personnel. The appropriate content and format of reports depends on a *firm's* liquidity management practices and the nature, scale and complexity of the *firm's* business. Reports to the *firm's governing body* may be less detailed and less frequent than reports to senior management with responsibility for managing *liquidity risk*.
- 11.1.28 G The *FSA* would expect management information to normally contain the following:
- (1) a cash-flow or funding gap report;
 - (2) a funding maturity schedule;
 - (3) a list of large providers of funding; and
 - (4) a limit monitoring and exception report.
- 11.1.29 G When considering what else might be included in *liquidity risk* management information, a *firm* should consider other types of information that may be important for understanding its *liquidity risk* profile. This may include:
- (1) asset quality and trends;
 - (2) any changes in the *firm's* funding strategy;
 - (3) earnings projections; and
 - (4) the *firm's* reputation in the market and the condition of the market itself.

Limit setting

- 11.1.30 G A *firm's* senior management should decide what limits need to be set, in accordance with the nature, scale and complexity of its activities. The structure of limits should reflect the need for a *firm* to have systems and controls in place to guard against a spectrum of possible risks, from those arising in day-to-day *liquidity risk* management to those arising in stressed conditions.
- 11.1.31 G A *firm* should periodically review and, where appropriate, adjust its limits when conditions or risk tolerances change.
- 11.1.32 G Policy or limit exceptions should receive the prompt attention of the appropriate management and should be resolved according to processes described in approved policies.

Annex D

Senior Management Arrangements, Systems and Controls Handbook (SYSC)

In this Annex, the place where the text is being inserted is indicated and the text is not underlined.

- 12 Group risk systems and controls requirement
- 12.1 Application
- 12.1.1 R Subject to SYSC 12.1.2R to SYSC 12.1.4R, this section applies to each of the following which is a member of a *group*:
- (1) a *firm* that falls into any one or more of the following categories:
 - (a) a *regulated entity*;
 - (b) an *ELMI*;
 - (c) an *insurer*;
 - (d) a *BIPRU firm*;
 - (e) a non-*BIPRU firm* that is a *parent financial holding company* in a *Member State* and is a member of a *UK consolidation group*; and
 - (f) a *firm* subject to the *rules* in *IPRU(INV)* Chapter 14.
 - (2) a *UCITS firm*, but only if its *group* contains a *firm* falling into (1); and
 - (3) the *Society*.
- 12.1.2 R Except as set out in SYSC 12.1.4R, this section applies with respect to different types of *group* as follows:
- (1) SYSC 12.1.8R and SYSC 12.1.10R apply with respect to all *groups*, including *FSA regulated EEA financial conglomerates*, other *financial conglomerates* and *groups* dealt with in SYSC 12.1.13R to SYSC 12.1.16R;
 - (2) the additional requirements set out in SYSC 12.1.11R and SYSC 12.1.12R only apply with respect to *FSA regulated EEA financial conglomerates*; and
 - (3) the additional requirements set out in SYSC 12.1.13R to SYSC 12.1.16R only apply with respect to *groups* of the kind dealt with by whichever of those *rules* apply.
- 12.1.3 R This section does not apply to:

- (1) an *incoming EEA firm*; or
- (2) an *incoming Treaty firm*; or
- (3) a *UCITS qualifier*; or
- (4) an *ICVC*.

12.1.4 R (1) This *rule* applies in respect of the following *rules*:

- (a) *SYSC 12.1.8R(2)*;
- (b) *SYSC 12.1.10R(1)*, so far as it relates to *SYSC 12.1.8R(2)*;
- (c) *SYSC 12.1.10R(2)*; and
- (d) *SYSC 12.1.11R* to *SYSC 12.1.15R*.

(2) The *rules* referred to in (1):

- (a) only apply with respect to a *financial conglomerate* if it an *FSA regulated EEA financial conglomerate*;
- (b) (so far as they apply with respect to a *group* that is not a *financial conglomerate*) do not apply with respect to a *group* for which a *competent authority* in another *EEA state* is lead regulator;
- (c) (so far as they apply with respect to a *financial conglomerate*) do not apply to a *firm* with respect to a *financial conglomerate* of which it is a member if the interest of the *financial conglomerate* in that *firm* is no more than a *participation*;
- (d) (so far as they apply with respect to other *groups*) do not apply to a *firm* with respect to a *group* of which it is a member if the only relationship of the kind set out in paragraph (3) of the definition of *group* between it and the other members of the *group* is nothing more than a *participation*; and
- (e) do not apply with respect to a *third-country group*.

- 12.1.5 G For the purpose of this section, a *group* is defined in the *Glossary*, and includes the whole of a *firm's* group, including financial and non-financial undertakings. It also covers undertakings with other links to *group* members if their omission from the scope of *group* risk systems and controls would be misleading. The scope of the *group* systems and controls requirements may therefore differ from the scope of the quantitative requirements for *groups*.

Purpose

- 12.1.6 G The purpose of this chapter is to set out how the systems and control requirements imposed by *SYSC* (Senior Management Arrangements, Systems and Controls) apply where a *firm* is part of a *group*. If a *firm* is a member of a *group*, it should be able to assess the potential impact of risks arising from other parts of its *group* as well as from its own activities.
- 12.1.7 G This section implements articles 73(3) (Supervision on a consolidated basis of credit institutions) and 138 (Intra-group transactions with mixed activity holding companies) of the *Banking Consolidation Directive*, article 9 of the *Financial Groups Directive* (Internal control mechanisms and risk management processes) and article 8 of the *Insurance Groups Directive* (Intra-group transactions).

General rules

- 12.1.8 R A *firm* must:
- (1) have adequate, sound and appropriate risk management processes and internal control mechanisms for the purpose of assessing and managing its own exposure to *group* risk, including sound administrative and accounting procedures; and
 - (2) ensure that its *group* has adequate, sound and appropriate risk management processes and internal control mechanisms at the level of the *group*, including sound administrative and accounting procedures.
- 12.1.9 G For the purposes of *SYSC* 12.1.8R, the question of whether the risk management processes and internal control mechanisms are adequate, sound and appropriate should be judged in the light of the nature, scale and complexity of the *group's* business.
- 12.1.10 R The internal control mechanisms referred to in *SYSC* 12.1.8R must include:
- (1) mechanisms that are adequate for the purpose of producing any data and information which would be relevant for the purpose of monitoring compliance with any prudential requirements (including any reporting requirements and any requirements relating to capital adequacy, solvency, systems and controls and large exposures):
 - (a) to which the *firm* is subject with respect to its membership of a *group*; or

- (b) that apply to or with respect to that *group* or part of it; and
- (2) mechanisms that are adequate to monitor funding within the *group*.

Financial conglomerates

- 12.1.11 R Where this section applies with respect to a *financial conglomerate*, the risk management processes referred to in SYSC 12.1.8R(2) must include:
- (1) sound governance and management processes, which must include the approval and periodic review by the appropriate managing bodies within the *financial conglomerate* of the strategies and policies of the *financial conglomerate* in respect of all the risks assumed by the *financial conglomerate*, such review and approval being carried out at the level of the *financial conglomerate*;
 - (2) adequate capital adequacy policies at the level of the *financial conglomerate*, one of the purposes of which must be to anticipate the impact of the business strategy of the *financial conglomerate* on its risk profile and on the capital adequacy requirements to which it and its members are subject;
 - (3) adequate procedures for the purpose of ensuring that the risk monitoring systems of the *financial conglomerate* and its members are well integrated into their organisation; and
 - (4) adequate procedures for the purpose of ensuring that the systems and controls of the members of the *financial conglomerate* are consistent and that the risks can be measured, monitored and controlled at the level of the *financial conglomerate*.
- 12.1.12 R Where this section applies with respect to a *financial conglomerate*, the internal control mechanisms referred to in SYSC 12.1.8R(2) must include:
- (1) mechanisms that are adequate to identify and measure all material risks incurred by members of the *financial conglomerate* and appropriately relate capital in the *financial conglomerate* to risks; and
 - (2) sound reporting and accounting procedures for the purpose of identifying, measuring, monitoring and controlling *intra-group transactions and risk concentrations*.

BIPRU firms and other firms to which BIPRU 8 applies

- 12.1.13 R If this *rule* applies under SYSC 12.1.14R to a *firm*, the *firm* must:
- (1) comply with SYSC 12.1.8R(2) in relation to any *UK consolidation group* or *non-EEA sub-group* of which it is a member, as well as in relation to its *group*; and
 - (2) ensure that the risk management processes and internal control mechanisms at the level of any *UK consolidation group* or *non-EEA*

sub-group of which it is a member comply with the obligations set out in the following provisions on a consolidated (or sub-consolidated) basis:

- (a) SYSC 3.2.23R and SYSC 3.2.24R;
- (b) SYSC 3.2.26R;
- (c) SYSC 3.2.28R to SYSC 3.2.36R;
- (d) SYSC 11.1.11R and SYSC 11.1.12R;
- (e) BIPRU 2.3.7R(1);
- (f) BIPRU 9.1.6R and BIPRU 9.13.21R (Liquidity plans);
- (g) BIPRU 10.12.3R (Concentration risk policies).

[Note: article 73(3) of the *Banking Consolidation Directive*]

- 12.1.14 R SYSC 12.1.13R applies to a *firm* that is:
- (1) an *ELMI*;
 - (2) a *BIPRU firm*; or
 - (3) a non-*BIPRU firm* that is a *parent financial holding company* in a *Member State* and is a member of a *UK consolidation group*.

- 12.1.15 R In the case of a *firm* that:
- (1) is an *ELMI* or a *BIPRU firm*; and
 - (2) has a *mixed-activity holding company* as a *parent undertaking*;

the risk management processes and internal control mechanisms referred to in SYSC 12.1.8R must include sound reporting and accounting procedures and other mechanisms that are adequate to identify, measure, monitor and control transactions between the *firm's parent undertaking mixed-activity holding company* and any of the *mixed-activity holding company's subsidiary undertakings*.

Insurance undertakings

- 12.1.16 R In the case of an *insurer* that has a *mixed-activity insurance holding company* as a *parent undertaking*, the risk management processes and internal control mechanisms referred to in SYSC 12.1.8R must include sound reporting and accounting procedures and other mechanisms that are adequate to identify, measure, monitor and control transactions between the *firm's parent undertaking mixed-activity insurance holding company* and any of the *mixed-activity insurance holding company's subsidiary undertakings*.

- 12.1.17 G SYSC 12.1.16R cannot apply to a *building society* as it cannot have a *mixed-*

activity holding company as a parent undertaking. SYSC 12.1.16R cannot apply to a friendly society as it cannot have a mixed-activity insurance holding company as a parent undertaking.

Nature and extent of requirements and allocation of responsibilities within the group

- 12.1.18 G Assessment of the adequacy of a *group's* systems and controls required by this section will form part of the *FSA's* risk management process.
- 12.1.19 G The nature and extent of the systems and controls necessary under SYSC 12.1.8R(1) to address *group* risk will vary according to the materiality of those risks to the *firm* and the position of the *firm* within the *group*.
- 12.1.20 G In some cases the management of the systems and controls used to address the risks described in SYSC 12.1.8R(1) may be organised on a *group-wide* basis. If the *firm* is not carrying out those functions itself, it should delegate them to the *group* members that are carrying them out. However, this does not relieve the *firm* of responsibility for complying with its obligations under SYSC 12.1.8R(1). A *firm* cannot absolve itself of such a responsibility by claiming that any breach of that *rule* is caused by the actions of another member of the *group* to whom the *firm* has delegated tasks. The risk management arrangements are still those of the *firm*, even though personnel elsewhere in the *firm's group* are carrying out these functions on its behalf.
- 12.1.21 G SYSC 12.1.8R(1) deals with the systems and controls that a *firm* should have in respect of the exposure it has to the rest of the *group*. On the other hand, the purpose of SYSC 12.1.8R(2) and the *rules* in this section that amplify it is to require *groups* to have adequate systems and controls. However a *group* is not a single legal entity on which obligations can be imposed. Therefore the obligations have to be placed on individual *firms*. The purpose of imposing the obligations on each *firm* in the *group* is to make sure that the *FSA* can take supervisory action against any *firm* in a *group* whose systems and controls do not meet the standards in this section. Thus responsibility for compliance with the *rules* for *group* systems and controls is a joint one.
- 12.1.22 G If both a *firm* and its *parent undertaking* are subject to SYSC 12.1.8R(2), the *FSA* would not expect systems and controls to be duplicated. In this case, the *firm* should assess whether and to what extent it can rely on its parent's *group* risk systems and controls.

Annex E

Senior Management Arrangements, Systems and Controls Handbook (SYSC)

In this Annex, the place where the text is being inserted is indicated and the text is not underlined.

To be inserted after SYSC 12

- 13 Operational risk: systems and controls
- 13.1 Application
- 13.1.1 G SYSC 13 applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 13.1.2 G SYSC 13 applies to:
- (1) an *EEA-deposit insurer*; and
 - (2) a *Swiss general insurer*;
- only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.
- 13.1.3 G SYSC 13 applies to a *UK ISPV*.
- 13.2 Purpose
- 13.2.1 G SYSC 13 provides *guidance* on how to interpret SYSC 3.1.1R and SYSC 3.2.6R, which deal with the establishment and maintenance of systems and controls, in relation to the management of operational risk. Operational risk has been described by the Basel Committee on Banking Supervision as "the risk of loss, resulting from inadequate or failed internal processes, people and systems, or from external events". This chapter covers systems and controls for managing risks concerning any of a *firm's* operations, such as its IT systems and *outsourcing* arrangements. It does not cover systems and controls for managing credit, market, liquidity and insurance risk.
- 13.2.2 G Operational risk is a concept that can have a different application for different *firms*. A *firm* should assess the appropriateness of the *guidance* in this chapter in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3*, to organise and control its affairs responsibly and effectively.

- 13.2.3 G A *firm* should take steps to understand the types of operational risk that are relevant to its particular circumstances, and the operational losses to which they expose the *firm*. This should include considering the potential sources of operational risk addressed in this chapter: people; processes and systems; external events.
- 13.2.4 G Operational risk can affect, amongst other things, a *firm's* solvency, or lead to unfair treatment of consumers or lead to financial crime. A *firm* should consider all operational risk events that may affect these matters in establishing and maintaining its systems and controls.
- 13.3 Other related Handbook sections
- 13.3.1 G The following is a non-exhaustive list of *rules* and *guidance* in the *Handbook* that are relevant to a *firm's* management of operational risk:
- (1) *SYSC 14* and *INSPRU 5.1* contain specific *rules* and *guidance* for the establishment and maintenance of operational risk systems and controls in a *prudential context*.
 - (2) *COB* contains *rules* and *guidance* that can relate to the management of operational risk; for example, *COB 2* (Rules which apply to all firms conducting designated investment business), *COB 3* (Financial promotion), *COB 5* (Advising and selling), *COB 7* (Dealing and managing) and *COB 9* (Client assets).
- 13.4 Requirements to notify the FSA
- 13.4.1 G Under *Principle 11* and *SUP 15.3.1R*, a *firm* must notify the *FSA* immediately of any operational risk matter of which the *FSA* would reasonably expect notice. *SUP 15.3.8G* provides *guidance* on the occurrences that this requirement covers, which include a significant failure in systems and controls and a significant operational loss.
- 13.4.2 G Regarding operational risk, matters of which the *FSA* would expect notice under *Principle 11* include:
- (1) any significant operational exposures that a *firm* has identified;
 - (2) the *firm's* invocation of a business continuity plan; and
 - (3) any other significant change to a *firm's* organisation, infrastructure or business operating environment.
- 13.5 Risk management terms
- 13.5.1 G In this chapter, the following interpretations of risk management terms apply:
- (1) a *firm's* risk culture encompasses the general awareness, attitude and behaviour of its *employees* and *appointed representatives* to risk and

the management of risk within the organisation;

- (2) operational exposure means the degree of operational risk faced by a *firm* and is usually expressed in terms of the likelihood and impact of a particular type of operational loss occurring (for example, fraud, damage to physical assets);
- (3) a *firm's* operational risk profile describes the types of operational risks that it faces, including those operational risks within a *firm* that may have an adverse impact upon the quality of service afforded to its *clients*, and its exposure to these risks.

13.6 People

13.6.1 G A *firm* should consult SYSC 3.2.2G to SYSC 3.2.5G for *guidance* on reporting lines and delegation of functions within a *firm* and SYSC 3.2.13G to SYSC 3.2.14G for *guidance* on the suitability of *employees* and *appointed representatives*. This section provides additional *guidance* on management of *employees* and other human resources in the context of operational risk.

13.6.2 G A *firm* should establish and maintain appropriate systems and controls for the management of operational risks that can arise from *employees*. In doing so, a *firm* should have regard to:

- (1) its operational risk culture, and any variations in this or its human resource management practices, across its operations (including, for example, the extent to which the compliance culture is extended to in-house IT staff);
- (2) whether the way *employees* are remunerated exposes the *firm* to the risk that it will not be able to meet its regulatory obligations (see SYSC 3.2.18G). For example, a *firm* should consider how well remuneration and performance indicators reflect the *firm's* tolerance for operational risk, and the adequacy of these indicators for measuring performance;
- (3) whether inadequate or inappropriate training of *client*-facing services exposes *clients* to risk of loss or unfair treatment including by not enabling effective communication with the *firm*;
- (4) the extent of its compliance with applicable regulatory and other requirements that relate to the welfare and conduct of *employees*;
- (5) its arrangements for the continuity of operations in the event of *employee* unavailability or loss;
- (6) the relationship between indicators of 'people risk' (such as overtime, sickness, and *employee* turnover levels) and exposure to operational losses; and
- (7) the relevance of all the above to *employees* of a third party supplier who are involved in performing an *outsourcing* arrangement. As

necessary, a *firm* should review and consider the adequacy of the staffing arrangements and policies of a service provider.

Employee responsibilities

- 13.6.3 G A *firm* should ensure that all *employees* are capable of performing, and aware of, their operational risk management responsibilities, including by establishing and maintaining:
- (1) appropriate segregation of *employees'* duties and appropriate supervision of *employees* in the performance of their responsibilities (see SYSC 3.2.5G);
 - (2) appropriate recruitment and subsequent processes to review the fitness and propriety of *employees* (see SYSC 3.2.13G and SYSC 3.2.14G);
 - (3) clear policy statements and appropriate systems and procedures manuals that are effectively communicated to *employees* and available for *employees* to refer to as required. These should cover, for example, compliance, IT security and health and safety issues;
 - (4) training processes that enable *employees* to attain and maintain appropriate competence; and
 - (5) appropriate and properly enforced disciplinary and employment termination policies and procedures.
- 13.6.4 G A *firm* should have regard to SYSC 13.6.3G in relation to *approved persons*, people occupying positions of high personal trust (for example, security administration, payment and settlement functions); and people occupying positions requiring significant technical competence (for example, *derivatives* trading and technical security administration). A *firm* should also consider the *rules* and *guidance* for *approved persons* in other parts of the *Handbook* (including *APER* and *SUP*) and the *rules* and *guidance* on *senior manager* responsibilities in SYSC 2.1 (Apportionment of Responsibilities).
- 13.7 Processes and systems
- 13.7.1 G A *firm* should establish and maintain appropriate systems and controls for managing operational risks that can arise from inadequacies or failures in its processes and systems (and, as appropriate, the systems and processes of third party suppliers, agents and others). In doing so a *firm* should have regard to:
- (1) the importance and complexity of processes and systems used in the end-to-end operating cycle for products and activities (for example, the level of integration of systems);
 - (2) controls that will help it to prevent system and process failures or identify them to permit prompt rectification (including pre-approval

or reconciliation processes);

- (3) whether the design and use of its processes and systems allow it to comply adequately with regulatory and other requirements;
- (4) its arrangements for the continuity of operations in the event that a significant process or system becomes unavailable or is destroyed; and
- (5) the importance of monitoring indicators of process or system risk (including reconciliation exceptions, compensation payments for *client* losses and documentation errors) and experience of operational losses and exposures.

Internal documentation

- 13.7.2 G Internal documentation may enhance understanding and aid continuity of operations, so a *firm* should ensure the adequacy of its internal documentation of processes and systems (including how documentation is developed, maintained and distributed) in managing operational risk.

External documentation

- 13.7.3 G A *firm* may use external documentation (including contracts, transaction statements or advertising brochures) to define or clarify terms and conditions for its products or activities, its business strategy (for example, including through press statements), or its brand. Inappropriate or inaccurate information in external documents can lead to significant operational exposure.

- 13.7.4 G A *firm* should ensure the adequacy of its processes and systems to review external documentation prior to issue (including review by its compliance, legal and marketing departments or by appropriately qualified external advisers). In doing so, a *firm* should have regard to:
- (1) compliance with applicable regulatory and other requirements (such as *COB* 3 (Financial promotion));
 - (2) the extent to which its documentation uses standard terms (that are widely recognised, and have been tested in the courts) or non-standard terms (whose meaning may not yet be settled or whose effectiveness may be uncertain);
 - (3) the manner in which its documentation is issued; and
 - (4) the extent to which confirmation of acceptance is required (including by *customer* signature or counterparty confirmation).

IT systems

- 13.7.5 G IT systems include the computer systems and infrastructure required for the automation of processes, such as application and operating system software; network infrastructure; and desktop, server, and mainframe hardware. Automation may reduce a *firm's* exposure to some 'people risks' (including by reducing human errors or controlling access rights to enable segregation of duties), but will increase its dependency on the reliability of its IT systems.
- 13.7.6 G A *firm* should establish and maintain appropriate systems and controls for the management of its IT system risks, having regard to:
- (1) its organisation and reporting structure for technology operations (including the adequacy of senior management oversight);
 - (2) the extent to which technology requirements are addressed in its business strategy;
 - (3) the appropriateness of its systems acquisition, development and maintenance activities (including the allocation of responsibilities between IT development and operational areas, processes for embedding security requirements into systems); and
 - (4) the appropriateness of its activities supporting the operation of IT systems (including the allocation of responsibilities between business and technology areas).

Information security

- 13.7.7 G Failures in processing information (whether physical, electronic or known by *employees* but not recorded) or of the security of the systems that maintain it can lead to significant operational losses. A *firm* should establish and maintain appropriate systems and controls to manage its information security risks. In doing so, a *firm* should have regard to:
- (1) confidentiality: information should be accessible only to *persons* or systems with appropriate authority, which may require firewalls within a system, as well as entry restrictions;
 - (2) integrity: safeguarding the accuracy and completeness of information and its processing;
 - (3) availability and authentication: ensuring that appropriately authorised *persons* or systems have access to the information when required and that their identity is verified;
 - (4) non-repudiation and accountability: ensuring that the *person* or system that processed the information cannot deny their actions.
- 13.7.8 G A *firm* should ensure the adequacy of the systems and controls used to protect the processing and security of its information, and should have regard to established security standards such as ISO17799 (Information

Security Management).

Geographic location

- 13.7.9 G Operating processes and systems at separate geographic locations may alter a *firm's* operational risk profile (including by allowing alternative sites for the continuity of operations). A *firm* should understand the effect of any differences in processes and systems at each of its locations, particularly if they are in different countries, having regard to:
- (1) the business operating environment of each country (for example, the likelihood and impact of political disruptions or cultural differences on the provision of services);
 - (2) relevant local regulatory and other requirements regarding data protection and transfer;
 - (3) the extent to which local regulatory and other requirements may restrict its ability to meet regulatory obligations in the *United Kingdom* (for example, access to information by the *FSA* and local restrictions on internal or external audit); and
 - (4) the timeliness of information flows to and from its headquarters and whether the level of delegated authority and the risk management structures of the overseas operation are compatible with the *firm's* head office arrangements.
- 13.8 External events and other changes
- 13.8.1 G The exposure of a *firm* to operational risk may increase during times of significant change to its organisation, infrastructure and business operating environment (for example, following a corporate restructure or changes in regulatory requirements). Before, during, and after expected changes, a *firm* should assess and monitor their effect on its risk profile, including with regard to:
- (1) untrained or de-motivated *employees* or a significant loss of *employees* during the period of change, or subsequently;
 - (2) inadequate human resources or inexperienced *employees* carrying out routine business activities owing to the prioritisation of resources to the programme or project;
 - (3) process or system instability and poor management information due to failures in integration or increased demand; and
 - (4) inadequate or inappropriate processes following business re-engineering.
- 13.8.2 G A *firm* should establish and maintain appropriate systems and controls for the management of the risks involved in expected changes, such as by

ensuring:

- (1) the adequacy of its organisation and reporting structure for managing the change (including the adequacy of senior management oversight);
- (2) the adequacy of the management processes and systems for managing the change (including planning, approval, implementation and review processes); and
- (3) the adequacy of its strategy for communicating changes in systems and controls to its *employees*.

Unexpected changes and business continuity management

- 13.8.3 G *SYSC 3.2.19G* provides high level *guidance* on business continuity. This section provides additional *guidance* on managing business continuity in the context of operational risk.
- 13.8.4 G The high level requirement for appropriate systems and controls at *SYSC 3.1.1R* applies at all times, including when a business continuity plan is invoked. However, the *FSA* recognises that, in an emergency, a *firm* may be unable to comply with a particular *rule* and the conditions for relief are outlined in *GEN 1.3* (Emergency).
- 13.8.5 G A *firm* should consider the likelihood and impact of a disruption to the continuity of its operations from unexpected events. This should include assessing the disruptions to which it is particularly susceptible (and the likely timescale of those disruptions) including through:
- (1) loss or failure of internal and external resources (such as people, systems and other assets);
 - (2) the loss or corruption of its information; and
 - (3) external events (such as vandalism, war and "acts of God").
- 13.8.6 G A *firm* should implement appropriate arrangements to maintain the continuity of its operations. A *firm* should act to reduce both the likelihood of a disruption (including by succession planning, systems resilience and dual processing); and the impact of a disruption (including by contingency arrangements and insurance).
- 13.8.7 G A *firm* should document its strategy for maintaining continuity of its operations, and its plans for communicating and regularly testing the adequacy and effectiveness of this strategy. A *firm* should establish:
- (1) formal business continuity plans that outline arrangements to reduce the impact of a short, medium or long-term disruption, including:
 - (a) resource requirements such as people, systems and other

- assets, and arrangements for obtaining these resources;
 - (b) the recovery priorities for the *firm's* operations; and
 - (c) communication arrangements for internal and external concerned parties (including the *FSA*, *clients* and the press);
- (2) escalation and invocation plans that outline the processes for implementing the business continuity plans, together with relevant contact information;
 - (3) processes to validate the integrity of information affected by the disruption;
 - (4) processes to review and update (1) to (3) following changes to the *firm's* operations or risk profile (including changes identified through testing).
- 13.8.8 G The use of an alternative site for recovery of operations is common practice in business continuity management. A *firm* that uses an alternative site should assess the appropriateness of the site, particularly for location, speed of recovery and adequacy of resources. Where a site is shared, a *firm* should evaluate the risk of multiple calls on shared resources and adjust its plans accordingly.
- 13.9 Outsourcing
- 13.9.1 G As *SYSC 3.2.4G* explains, a *firm* cannot contract out its regulatory obligations and should take reasonable care to supervise the discharge of outsourced functions. This section provides additional *guidance* on managing *outsourcing* arrangements (and will be relevant, to some extent, to other forms of third party dependency) in relation to operational risk. *Outsourcing* may affect a *firm's* exposure to operational risk through significant changes to, and reduced control over, people, processes and systems used in outsourced activities.
- 13.9.2 G *Firms* should take particular care to manage *material outsourcing* arrangements and, as *SUP 15.3.8G(1)(e)* explains, a *firm* should notify the *FSA* when it intends to enter into a *material outsourcing* arrangement.
- 13.9.3 G A *firm* should not assume that because a service provider is either a regulated *firm* or an intra-group entity an *outsourcing* arrangement with that provider will, in itself, necessarily imply a reduction in operational risk.
- 13.9.4 G Before entering into, or significantly changing, an *outsourcing* arrangement, a *firm* should:
- (1) analyse how the arrangement will fit with its organisation and reporting structure; business strategy; overall risk profile; and ability to meet its regulatory obligations;

- (2) consider whether the agreements establishing the arrangement will allow it to monitor and control its operational risk exposure relating to the *outsourcing*;
- (3) conduct appropriate due diligence of the service provider's financial stability and expertise;
- (4) consider how it will ensure a smooth transition of its operations from its current arrangements to a new or changed *outsourcing* arrangement (including what will happen on the termination of the contract); and
- (5) consider any concentration risk implications such as the business continuity implications that may arise if a single service provider is used by several *firms*.

13.9.5 G In negotiating its contract with a service provider, a *firm* should have regard to:

- (1) reporting or notification requirements it may wish to impose on the service provider;
- (2) whether sufficient access will be available to its internal auditors, external auditors or *actuaries* (see section 341 of the *Act*) and to the *FSA* (see *SUP 2.3.5R* (Access to premises) and *SUP 2.3.7R* (Suppliers under material outsourcing arrangements));
- (3) information ownership rights, confidentiality agreements and *Chinese walls* to protect *client* and other information (including arrangements at the termination of the contract);
- (4) the adequacy of any guarantees and indemnities;
- (5) the extent to which the service provider must comply with the *firm's* policies and procedures (covering, for example, information security);
- (6) the extent to which a service provider will provide business continuity for outsourced operations, and whether exclusive access to its resources is agreed;
- (7) the need for continued availability of software following difficulty at a third party supplier;
- (8) the processes for making changes to the *outsourcing* arrangement (for example, changes in processing volumes, activities and other contractual terms) and the conditions under which the *firm* or service provider can choose to change or terminate the *outsourcing* arrangement, such as where there is:
 - (a) a change of ownership or *control* (including insolvency or

- receivership) of the service provider or *firm*; or
- (b) significant change in the business operations (including sub-contracting) of the service provider or *firm*; or
 - (c) inadequate provision of services that may lead to the *firm* being unable to meet its regulatory obligations.
- 13.9.6 G In implementing a relationship management framework, and drafting the service level agreement with the service provider, a *firm* should have regard to:
- (1) the identification of qualitative and quantitative performance targets to assess the adequacy of service provision, to both the *firm* and its *clients*, where appropriate;
 - (2) the evaluation of performance through service delivery reports and periodic self certification or independent review by internal or external auditors; and
 - (3) remedial action and escalation processes for dealing with inadequate performance.
- 13.9.7 G In some circumstances, a *firm* may find it beneficial to use externally validated reports commissioned by the service provider, to seek comfort as to the adequacy and effectiveness of its systems and controls. The use of such reports does not absolve the *firm* of responsibility to maintain other oversight. In addition, the *firm* should not normally have to forfeit its right to access, for itself or its agents, to the service provider's premises.
- 13.9.8 G A *firm* should ensure that it has appropriate contingency arrangements to allow business continuity in the event of a significant loss of services from the service provider. Particular issues to consider include a significant loss of resources at, or financial failure of, the service provider, and unexpected termination of the *outsourcing* arrangement.
- 13.10 Insurance
- 13.10.1 G Whilst a *firm* may take out insurance with the aim of reducing the monetary impact of operational risk events, non-monetary impacts may remain (including impact on the *firm's* reputation). A *firm* should not assume that insurance alone can replace robust systems and controls.
- 13.10.2 G When considering utilising insurance, a *firm* should consider:
- (1) the time taken for the *insurer* to pay claims (including the potential time taken in disputing cover) and the *firm's* funding of operations whilst awaiting payment of claims;
 - (2) the financial strength of the *insurer*, which may determine its ability to pay claims, particularly where large or numerous small claims are

made at the same time; and

- (3) the effect of any limiting conditions and exclusion clauses that may restrict cover to a small number of specific operational losses and may exclude larger or hard to quantify indirect losses (such as lost business or reputational costs).

14 Prudential risk management and associated systems and controls

14.1 Application

14.1.1 R This section applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) an *incoming EEA firm*; or
- (3) an *incoming Treaty firm*.

14.1.2 R This section applies to:

- (1) an *EEA-deposit insurer*; and
- (2) a *Swiss general insurer*;

only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.

Purpose

14.1.3 G This section sets out some *rules* and *guidance* on the establishment and maintenance of systems and controls for the management of a *firm's* prudential risks. A *firm's* prudential risks are those that can reduce the adequacy of its financial resources, and as a result may adversely affect confidence in the financial system or prejudice *consumers*. Some key prudential risks are credit, market, liquidity, operational, insurance and group risk.

14.1.4 G The purpose of this section is to serve the *FSA's regulatory objectives* of consumer protection and market confidence. In particular, this section aims to reduce the risk that a *firm* may pose a threat to these *regulatory objectives*, either because it is not prudently managed, or because it has inadequate systems to permit appropriate senior management oversight and control of its business.

14.1.5 G Both adequate financial resources and adequate systems and controls are necessary for the effective management of prudential risks. A *firm* may hold financial resources to help alleviate the financial consequences of minor weaknesses in its systems and controls (to reflect possible impairments in the accuracy or timing of its identification, measurement, monitoring and control of certain risks, for example). However, financial resources cannot adequately compensate for significant weaknesses in a *firm's* systems and controls that could fundamentally undermine its ability to control its affairs effectively.

How to interpret this section

- 14.1.6 G This section is designed to amplify *Principle 3* (Management and control) which requires that a *firm* take reasonable care to organise and control its affairs responsibly and effectively, with adequate risk management systems. This section is also designed to be complementary to *SYSC 2*, *SYSC 3* and *SYSC 13* in that it contains some additional *rules* and *guidance* on senior management arrangements and associated systems and controls for *firms* that could have a significant impact on the *FSA's* objectives in a *prudential context*.
- 14.1.7 G In addition to supporting *PRIN* and *SYSC 2*, *SYSC 3* and *SYSC 13*, this section lays the foundations for the more specific *rules* and *guidance* on the management of credit, market, liquidity, operational, insurance and group risks that are in *SYSC 11*, *SYSC 12*, *SYSC 15*, *SYSC 16* and *INSPRU 5.1*. Many of the elements raised here in general terms are expanded upon in these sections.
- 14.1.8 G Appropriate systems and controls for the management of prudential risk will vary from *firm* to *firm*. Therefore, most of the material in this section is *guidance*. In interpreting this *guidance*, a *firm* should have regard to its own particular circumstances. Following from *SYSC 3.1.2 G*, this should include considering the nature, scale and complexity of its business, which may be influenced by factors such as:
- (1) the diversity of its operations, including geographical diversity;
 - (2) the volume and size of its transactions; and
 - (3) the degree of risk associated with each area of its operation.
- 14.1.9 G The *guidance* contained within this section is not designed to be exhaustive. When establishing and maintaining its systems and controls a *firm* should have regard not only to other parts of the *Handbook*, but also to material that is issued by other industry or regulatory bodies.

The role of systems and controls in a prudential context

- 14.1.10 G In a *prudential context*, a *firm's* systems and controls should provide its senior management with an adequate means of managing the *firm*. As such, they should be designed and maintained to ensure that senior management is able to make and implement integrated business planning and risk management decisions on the basis of accurate information about the risks that the *firm* faces and the financial resources that it has.

The prudential responsibilities of senior management and the apportionment of those responsibilities

- 14.1.11 G Ultimate responsibility for the management of prudential risks rests with a *firm's governing body* and relevant *senior managers*, and in particular with those individuals that undertake the *firm's governing functions* and the

apportionment and oversight function. In particular, these responsibilities should include:

- (1) overseeing the establishment of an appropriate business plan and risk management strategy;
- (2) overseeing the development of appropriate systems for the management of prudential risks;
- (3) establishing adequate *internal controls*; and
- (4) ensuring that the *firm* maintains adequate financial resources.

The delegation of responsibilities within the firm

- 14.1.12 G Although authority for the management of a *firm's* prudential risks is likely to be delegated, to some degree, to individuals at all levels of the organisation, overall responsibility for this activity should not be delegated from its *governing body* and relevant *senior managers*.
- 14.1.13 G Where delegation does occur, a *firm* should ensure that appropriate systems and controls are in place to allow its *governing body* and relevant *senior managers* to participate in and control its prudential risk management activities. The *governing body* and relevant *senior managers* should approve and periodically review these systems and controls to ensure that delegated duties are being performed correctly.

Firms subject to risk management on a group basis

- 14.1.14 G Some *firms* organise the management of their prudential risks on a stand-alone basis. In some cases, however, the management of a *firm's* prudential risks may be entirely or largely subsumed within a whole *group* or *sub-group* basis.
- (1) The latter arrangement may still comply with the *FSA's* prudential policy on systems and controls if the *firm's governing body* formally delegates the functions that are to be carried out in this way to the *persons* or bodies that are to carry them out. Before doing so, however, the *firm's governing body* should have explicitly considered the arrangement and decided that it is appropriate and that it enables the *firm* to meet the *FSA's* prudential policy on systems and controls. The *firm* should notify the *FSA* if the management of its prudential risks is to be carried out in this way.
 - (2) Where the management of a *firm's* prudential risks is largely, but not entirely, subsumed within a whole *group* or *sub-group* basis, the *firm* should ensure that any prudential issues that are specific to the *firm* are:

- (a) identified and adequately covered by those to whom it has delegated certain prudential risk management tasks; or
 - (b) dealt with by the *firm* itself.
- 14.1.15 G Any delegation of the management of prudential risks to another part of a *firm's group* does not relieve it of responsibility for complying with the *FSA's* prudential policy on systems and controls. A *firm* cannot absolve itself of such a responsibility by claiming that any breach of the *FSA's* prudential policy on systems and controls is effected by the actions of a third party *firm* to whom the *firm* has delegated tasks. The risk management arrangements are still those of the *firm*, even though personnel elsewhere in the *firm's group* are carrying out these functions on its behalf. Thus any references in *GENPRU*, *INSPRU* or *SYSC* to what a *firm*, its personnel and its management should and should not do still apply, and do not need any adjustment to cover the situation in which risk management functions are carried out on a *group-wide* basis.
- 14.1.16 G Where it is stated in *GENPRU*, *INSPRU* or *SYSC* that a particular task in relation to a *firm's* systems and controls should be carried out by a *firm's governing body* this task should not be delegated to another part of its *group*. Furthermore, even where the management of a *firm's* prudential risks is delegated as described in *SYSC* 14.1.14G, responsibility for its effectiveness and for ensuring that it remains appropriate remains with the *firm's governing body*. The *firm's governing body* should therefore keep any delegation under review to ensure that delegated duties are being performed correctly.

Business planning and risk management

- 14.1.17 G Business planning and risk management are closely related activities. In particular, the forward-looking assessment of a *firm's* financial resources needs, and of how business plans may affect the risks that it faces, are important elements of prudential risk management. A *firm's* business planning should also involve the creation of specific risk policies which will normally outline a *firm's* strategy and objectives for, as appropriate, the management of its market, credit, liquidity, operational, insurance and group risks and the processes that it intends to adopt to achieve these objectives. *SYSC* 14.1.18R to *SYSC* 14.1.25G set out some *rules* and *guidance* relating to business planning and risk management in a *prudential context* (see also *SYSC* 3.2.17G, which states that a *firm* should plan its business appropriately).
- 14.1.18 R A *firm* must take reasonable steps to ensure the establishment and maintenance of a business plan and appropriate systems for the management of prudential risk.
- 14.1.19 R When establishing and maintaining its business plan and prudential risk management systems, a *firm* must document:

- (1) an explanation of its overall business strategy, including its business objectives;
- (2) a description of, as applicable, its policies towards market, credit (including provisioning), liquidity, operational, insurance and group risk (that is, its risk policies), including its appetite or tolerance for these risks and how it identifies, measures or assesses, monitors and controls these risks;
- (3) the systems and controls that it intends to use in order to ensure that its business plan and risk policies are implemented correctly;
- (4) a description of how the *firm* accounts for assets and liabilities, including the circumstances under which items are netted, included or excluded from the *firm's* balance sheet and the methods and assumptions for valuation;
- (5) appropriate financial *projections* and the results of its stress testing and scenario analysis (see *GENPRU* 1.2 (Adequacy of financial resources)); and
- (6) details of, and the justification for, the methods and assumptions used in financial *projections* and stress testing and scenario analysis.

14.1.20 G The prudential risk management systems referred to in *SYSC* 14.1.18R and *SYSC* 14.1.19R are the means by which a *firm* is able to:

- (1) identify the prudential risks that are inherent in its business plan, operating environment and objectives, and determine its appetite or tolerance for these risks;
- (2) measure or assess its prudential risks;
- (3) monitor its prudential risks; and
- (4) control or mitigate its prudential risks.

INSPRU 4.1.63E is an *evidential provision* relating to *SYSC* 14.1.18R concerning risk management systems in respect of *liquidity risk* arising from substantial exposures in foreign currencies.

14.1.21 G A *firm* should consider the relationship between its business plan, risk policies and the financial resources that it has available (or can readily access), recognising that decisions made in respect of one element may have consequences for the other two.

14.1.22 G A *firm's* business plan and risk management systems should be:

- (1) effectively communicated so that all *employees* and contractors understand and adhere to the procedures related to their own responsibilities;

- (2) regularly updated and revised, in particular when there is significant new information or when actual practice or performance differs materially from the documented strategy, policy or systems.
- 14.1.23 G The level of detail in a *firm's* business plan and its approach to the design of its risk management systems should be appropriate to the scale and complexity of its operations, and the nature and degree of risk that it faces.
- 14.1.24 G A *firm's* business plan and systems documentation should be accessible to the *firm's* management in line with their respective responsibilities and, upon request, to the *FSA*.
- 14.1.25 G *SYSC* 14.1.19R(5) requires a *firm* to *document* its financial projections and the results of its stress testing and scenario analysis. Such financial projections, stress tests and scenario analysis should be used by a *firm's governing body* and relevant *senior managers* when deciding upon how much risk the *firm* is willing to accept in pursuit of its business objectives and how risk limits should be set. Further *rules* and *guidance* on stress testing and scenario analysis are outlined in *GENPRU* 1.2 (Adequacy of financial resources) and *SYSC* 11 (Liquidity risk systems and controls).

Internal controls: introduction

- 14.1.26 G *Internal controls* should provide a *firm* with reasonable assurance that it will not be hindered in achieving its objectives, or in the orderly and legitimate conduct of its business, by events that may reasonably be foreseen. More specifically in a *prudential context*, *internal controls* should be concerned with ensuring that a *firm's* business plan and risk management systems are operating as expected and are being implemented as intended. The following *rule* (*SYSC* 14.1.27R) reflects the importance of *internal controls* in a *prudential context*.
- 14.1.27 R A *firm* must take reasonable steps to establish and maintain adequate *internal controls*.
- 14.1.28 G The precise role and organisation of *internal controls* can vary from *firm* to *firm*. However, a *firm's internal controls* should normally be concerned with assisting its *governing body* and relevant *senior managers* to participate in ensuring that it meets the following objectives:
- (1) safeguarding both the assets of the *firm* and its *customers*, as well as identifying and managing liabilities;
 - (2) maintaining the efficiency and effectiveness of its operations;
 - (3) ensuring the reliability and completeness of all accounting, financial and management information; and
 - (4) ensuring compliance with its internal policies and procedures as well as all applicable laws and regulations.
- 14.1.29 G When determining the adequacy of its *internal controls*, a *firm* should

consider both the potential risks that might hinder the achievement of the objectives listed in SYSC 14.1.28G, and the extent to which it needs to control these risks. More specifically, this should normally include consideration of:

- (1) the appropriateness of its reporting and communication lines (see SYSC 3.2.2G);
- (2) how the delegation or contracting of functions or activities to *employees, appointed representatives* or other third parties (for example *outsourcing*) is to be monitored and controlled (see SYSC 3.2.3G to SYSC 3.2.4G, SYSC 14.1.12G to SYSC 14.1.16G and SYSC 14.1.33G; additional guidance on the management of *outsourcing* arrangements is also provided in SYSC 13.9);
- (3) the risk that a *firm's employees* or contractors might accidentally or deliberately breach a *firm's* policies and procedures (see SYSC 13.6.3G);
- (4) the need for adequate segregation of duties (see SYSC 3.2.5G and SYSC 14.1.30G to SYSC 14.1.33G);
- (5) the establishment and control of risk management committees (see SYSC 14.1.34G to SYSC 14.1.37G);
- (6) the need for risk assessment and the establishment of a risk assessment function (see SYSC 3.2.10G and SYSC 14.1.38G to SYSC 14.1.41G);
- (7) the need for internal audit and the establishment of an internal audit function and audit committee (see SYSC 3.2.15G to SYSC 3.2.16G and SYSC 14.1.42G to SYSC 14.1.45G).

Internal controls: segregation of duties

14.1.30 G The effective segregation of duties is an important internal control in the *prudential context*. In particular, it helps to ensure that no one individual is completely free to commit a *firm's* assets or incur liabilities on its behalf. Segregation can also help to ensure that a *firm's governing body* receives objective and accurate information on financial performance, the risks faced by the *firm* and the adequacy of its systems. In this regard, a *firm* should ensure that there is adequate segregation of duties between *employees* involved in:

- (1) taking on or controlling risk (which could involve risk mitigation);
- (2) risk assessment (which includes the identification and analysis of risk); and
- (3) internal audit.

14.1.31 G In addition, a *firm* should normally ensure that no single individual has

unrestricted authority to do all of the following:

- (1) initiate a transaction;
- (2) bind the *firm*;
- (3) make payments; and
- (4) account for it.

14.1.32 G Where a *firm* is unable to ensure the complete segregation of duties (for example, because it has a limited number of staff), it should ensure that there are adequate compensating controls in place (for example, frequent review of an area by relevant *senior managers*).

14.1.33 G Where a *firm* outsources a *controlled function*, such as *internal audit*, it should take reasonable steps to ensure that every individual involved in the performance of this service is independent from the individuals who perform its external audit. This should not prevent services from being undertaken by a *firm's* external auditors provided that:

- (1) the work is carried out under the supervision and management of the *firm's* own internal staff; and
- (2) potential conflicts of interest between the provision of external audit services and the provision of *controlled functions* are properly managed.

Internal controls: risk management committees

14.1.34 G In many *firms*, especially if there are multiple business lines, it is common for the *governing body* to delegate some tasks related to risk control and management to committees such as asset and liability committees (ALCO), credit risk committees and market risk committees.

14.1.35 G Where a *firm* decides to create one or more risk management committee(s), adequate *internal controls* should be put in place to ensure that these committees are effective and that their actions are consistent with the objectives outlined in SYSC 14.1.28G. This should normally include consideration of the following:

- (1) setting clear terms of reference, including membership, reporting lines and responsibilities of each committee;
- (2) setting limits on their authority;
- (3) agreeing routine reporting and non-routine reporting escalation procedures;
- (4) agreeing the minimum frequency of committee meetings; and

- (5) reviewing the performance of these risk management committees.
- 14.1.36 G The decision to delegate risk management tasks, along with the terms of reference of the committees and their performance, should be reviewed periodically by the *firm's governing body* and revised as appropriate.
- 14.1.37 G The effective use of risk management committees can help to enhance a *firm's internal controls*. In establishing and maintaining its risk management committees, a *firm* should consider:
- (1) their membership, which should normally include relevant *senior managers* (such as the head of group risk, head of legal, and the heads of market, credit, liquidity and operational risk, etc.), business line managers, risk management personnel and other appropriately skilled people, for example, actuaries, lawyers, accountants, IT specialists, etc.;
 - (2) using these committees to:
 - (i) inform the decisions made by a *firm's governing body* regarding its appetite or tolerance for risk taking;
 - (ii) highlight risk management issues that may require attention by the *governing body*;
 - (iii) consider risk at the firm-wide level and, within delegated limits, to determine the allocation of risk limits and financial resources across business lines; and
 - (iv) consider how exposures may be unwound, hedged, or otherwise mitigated, as appropriate.

Internal controls: risk assessment

- 14.1.38 G Risk assessment is the process through which a *firm* identifies and analyses (using both qualitative and quantitative methodologies) the risks that it faces. A *firm's* risk assessment activities should normally include consideration of:
- (1) its total exposure to risk at the *firm-wide* level (that is, its exposure across business lines and risk categories);
 - (2) capital allocation and the need to calculate risk weighted returns for different business lines;
 - (3) the potential correlations that can exist between the risks in different business lines; this should also include looking for risks to which a *firm's* business plan is particularly sensitive, such as interest rate risk, or multiple dealings with the same *counterparty*;
 - (4) the use of stress tests and scenario analysis;

- (5) whether there are risks inherent in the *firm's* business that are not being addressed adequately;
 - (6) the risk adjusted return that the *firm* is achieving; and
 - (7) the adequacy and timeliness of management information on market, credit, insurance, liquidity, operational and group risks from the business lines, including risk limit utilisation.
- 14.1.39 G In accordance with SYSC 3.2.10G a *firm* should consider whether it needs to set up a separate *risk assessment function* (or functions) that is responsible for assessing the risks that the *firm* faces and advising its *governing body* and *senior managers* on them.
- 14.1.40 G Where a *firm* does decide that it needs a separate *risk assessment function*, the *employees* or contractors that carry out this function should not normally be involved in risk taking activities such as business line management (see SYSC 14.1.30G to SYSC 14.1.33G on the segregation of duties).
- 14.1.41 G A summary of the results of the analysis undertaken by a *firm's risk assessment function* (including, where necessary, an explanation of any assumptions that were adopted) should normally be reported to relevant *senior managers* as well as to the *firm's governing body*.

Internal audit

- 14.1.42 G A *firm* should ensure that it has appropriate mechanisms in place to assess and monitor the appropriateness and effectiveness of its systems and controls. This should normally include consideration of:
- (1) adherence to and effectiveness of, as appropriate, its market, credit, liquidity, operational, insurance, and group risk policies;
 - (2) whether departures and variances from its documented systems and controls and risk policies have been adequately documented and appropriately reported, including whether appropriate pre-clearance authorisation has been sought for material departures and variances;
 - (3) adherence to and effectiveness of its accounting policies, and whether accounting records are complete and accurate;
 - (4) adherence to and effectiveness of its management reporting arrangements, including the timeliness of reporting, and whether information is comprehensive and accurate; and
 - (5) adherence to *FSA rules* and regulatory prudential standards.
- 14.1.43 G In accordance with SYSC 3.2.15G and SYSC 3.2.16G, a *firm* should consider whether it needs to set up a dedicated *internal audit function*.
- 14.1.44 G Where a *firm* decides to set up an *internal audit function*, this function should provide independent assurance to its *governing body*, audit

committee or an appropriate *senior manager* of the integrity and effectiveness of its systems and controls.

- 14.1.45 G In forming its judgements, the *person* performing the *internal audit function* should test the practical operation of a *firm's* systems and controls as well as its accounting and risk policies. This should include examining the adequacy of supporting records.

Management information

- 14.1.46 G Many individuals, at various levels of a *firm*, need management information relating to their activities. However, SYSC 14.1.47G to SYSC 14.1.50G concentrates on the management information that should be available to those at the highest level of a *firm*, that is, the *firm's governing body* and relevant *senior managers*. In so doing SYSC 14.1.47G to SYSC 14.1.50G amplify SYSC 3.2.11G and SYSC 3.2.12G (which outline the FSA's high level policy on senior management information) by providing some additional *guidance* on the management information that should be available in a *prudential context*.

- 14.1.47 G The role of management information should be to help a *firm's governing body* and *senior managers* to understand risk at a firm-wide level. In so doing, it should help them to:

- (1) determine whether a *firm* is prudently managed with adequate financial resources;
- (2) make the decisions that fall within their ambit (for example, the high level business plans, strategy and risk tolerances of the *firm*); and
- (3) oversee the execution of tasks for which they are responsible.

- 14.1.48 G A *firm* should consider what information needs to be made available to its *governing body* and *senior managers*. Some possible examples include:

- (1) firm-wide information such as the overall profitability and value of a *firm* and its total exposure to risk;
- (2) reports from committees to which the *governing body* has delegated risk management tasks, if applicable;
- (3) reports from a *firm's internal audit* and *risk assessment functions*, if applicable, including exception reports, where risk limits and policies have been breached or systems circumvented;
- (4) financial projections under expected and abnormal (that is, stressed) conditions;
- (5) reconciliation of actual profit and loss to previous financial projections and an analysis of any significant variances;
- (6) matters which require a decision from the *governing body* or *senior*

managers, for example a significant variation to a business plan, amendments to risk limits, the creation of a new business line, etc;

- (7) compliance with *FSA rules* and regulatory prudential standards;
- (8) risk weighted returns; and
- (9) liquidity and funding requirements.

14.1.49 G The management information that is provided to a *firm's governing body* and *senior managers* should have the following characteristics:

- (1) it should be timely, its frequency being determined by factors such as:
 - (a) the volatility of the business in which the *firm* is engaged (that is, the speed at which its risks can change);
 - (b) any time constraints on when action needs to be taken; and
 - (c) the level of risk that the *firm* is exposed to, compared to its available financial resources and tolerance for risk;
- (2) it should be reliable, having regard to the fact that it may be necessary to sacrifice a degree of accuracy for timeliness; and
- (3) it should be presented in a manner that highlights any relevant issues on which those undertaking *governing functions* should focus particular attention.

14.1.50 G The production of management and other information may require the collation of data from a variety of separate manual and automated systems. In such cases, responsibility for the integrity of the information may be spread amongst a number of operational areas. A *firm* should ensure that it has appropriate processes to validate the integrity of its information.

Record keeping

14.1.51 G *SYSC 3.2.20R* requires a *firm* to take reasonable care to make and retain adequate records. The following policy on record keeping supplements *SYSC 3.2.20R* by providing some additional *rules* and *guidance* on record keeping in a *prudential context*. The purpose of this policy is to:

- (1) facilitate the prudential supervision of a *firm* by ensuring that adequate information is available regarding its past/current financial situation and business activities (which includes the design and implementation of systems and controls); and
- (2) help the *FSA* to satisfy itself that a *firm* is operating in a prudent manner and is not prejudicing the interests of its *customers* or market confidence.

- 14.1.52 G In addition to the record keeping requirements in *GENPRU*, *INSPRU* and *SYSC*, a *firm* should remember that it may be obliged, under other applicable laws or regulations, to keep similar or additional records.
- 14.1.53 R (1) A *firm* must make and regularly update accounting and other records that are sufficient to enable the *firm* to demonstrate to the *FSA*:
- (a) that the *firm* is financially sound and has appropriate systems and controls;
 - (b) the *firm's* financial position and exposure to risk (to a reasonable degree of accuracy); and
 - (c) the *firm's* compliance with the *rules* in *GENPRU*, *INSPRU* and *SYSC*.
- (2) The records in (1) must be retained for a minimum of three years, or longer as appropriate.
- 14.1.54 G A *firm* should be able to make available the records described in *SYSC* 14.1.53 R within a reasonable timeframe when requested to do so by the *FSA*.
- 14.1.55 G The *FSA* recognises that not all records are specific to a particular point in time. As such, while it may be appropriate to update some records on a daily or continuous basis, for example expenditure and details of certain transactions, it may not be appropriate to update other records as regularly as this, for example those relating to its business plan and risk policies. A *firm* should decide how regularly it should update particular records.
- 14.1.56 G A *firm* should decide which records it needs to hold, noting that compliance with *SYSC* 14.1.53R does not require it to hold records on every single aspect of its activities. Some specific *guidance* on the types of records that a *firm* should hold is set out in each of the risk specific sections on systems and controls (see *SYSC* 11, *SYSC* 12, *SYSC* 14.1.65G, *SYSC* 15 to *SYSC* 17 and *INSPRU* 5.1).
- 14.1.57 G In deciding which records to hold, a *firm* should also take into account that failure to keep adequate records could make it harder for it to satisfy the *FSA* that it is compliant with the *rules* in *GENPRU*, *INSPRU* or *SYSC*, and to defend any enforcement action taken against it.
- 14.1.58 G A *firm* should keep the records required in *GENPRU*, *INSPRU* and *SYSC* in an appropriate format and language (in terms of format this could include holding them on paper or in electronic or some other form). However, whatever format or language a *firm* chooses, *SYSC* 3.2.20R requires that records be capable of being reproduced on paper and in English (except where they relate to business carried on from an establishment situated in a country where English is not an official language).
- 14.1.59 G In accordance with *SYSC* 3.2.20R, a *firm* should retain the records that it needs to comply with *SYSC* 14.1.53R for as long as they are relevant for the

purposes for which they were made.

- 14.1.60 R A *firm* must keep the *records* required in SYSC 14.1.53R in the *United Kingdom*, except where:
- (1) they relate to business carried on from an establishment in a country or territory that is outside the *United Kingdom*; and
 - (2) they are kept in that country or territory.
- 14.1.61 R When a *firm* keeps the records required in SYSC 14.1.53R outside the *United Kingdom*, it must periodically send an adequate summary of those records to the *United Kingdom*.
- 14.1.62 G Where a *firm* outsources the storage of some or all of its records to a third party service provider, it should ensure that these records are readily accessible and can be reproduced within a reasonable time period. The *firm* should also ensure that these records are stored in compliance with the *rules* and *guidance* on record keeping in *GENPRU*, *INSPRU* or *SYSC*. Additional *guidance* on the management of *outsourcing* agreements is provided in SYSC 13.
- 14.1.63 G A *firm* may rely on records that have been produced by a third party (for example, another *group* company or an external agent, such as an outsource service provider). However where the *firm* does so it should ensure that these records are readily accessible and can be reproduced within a reasonable time period. The *firm* should also ensure that these records comply with the *rules* and *guidance* on record keeping in *GENPRU*, *INSPRU* or *SYSC*.
- 14.1.64 G In accordance with SYSC 3.2.21G, a *firm* should have adequate systems and controls for maintaining the security of its records so that they are reasonably safeguarded against loss, unauthorised access, alteration or destruction.
- Operational risk
- 14.1.65 G As well as covering other types of risk, the *rules* and *guidance* set out in this chapter deal with a *firm's* approach to operational risk. In particular:
- (1) SYSC 14.1.18R requires a *firm* to take reasonable steps to ensure that the risk management systems put in place to identify, assess, monitor and control operational risk are adequate for that purpose;
 - (2) SYSC 14.1.19R(2) requires a *firm* to document its policy for operational risk, including its risk appetite and how it identifies, assesses, monitors and controls that risk; and
 - (3) SYSC 14.1.27R requires a *firm* to take reasonable steps to establish and maintain adequate *internal controls* to enable it to assess and

monitor the effectiveness and implementation of its business plan and prudential risk management systems.

- 15 Credit risk management systems and controls
- 15.1 Application
- 15.1.1 G SYSC 15.1 applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 15.1.2 G SYSC 15.1 applies to:
- (1) an *EEA-deposit insurer*; and
 - (2) a *Swiss general insurer*;
- only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.

Purpose

- 15.1.3 G This section provides *guidance* on how to interpret SYSC 14 insofar as it relates to the management of credit risk.
- 15.1.4 G Credit risk is incurred whenever a *firm* is exposed to loss if another party fails to perform its financial obligations to the *firm*, including failing to perform them in a timely manner. It arises from both on and off balance sheet items. For contracts for traded *financial instruments*, for example the purchase and sale of *securities* or *over the counter derivatives*, risks may arise if the *firm's counterparty* does not honour its side of the contract. This constitutes counterparty risk, which can be considered a subset of credit risk. Another risk is issuer risk, which could potentially result in a *firm* losing the full price of a market instrument since default by the issuer could result in the value of its bonds or stocks falling to nil. In insurance *firms*, credit risk can arise from *premium* debtors, where cover under *contracts of insurance* may either commence before premiums become due or continue after their non-payment. Credit risk can also arise if a *reinsurer* fails to fulfil its financial obligation to repay a *firm* upon submission of a *claim*.
- 15.1.5 G Credit risk concerns the *FSA* in a *prudential context* because inadequate systems and controls for credit risk management can create a threat to the *regulatory objectives* of market confidence and consumer protection by:
- (1) the erosion of a *firm's* capital due to excessive credit losses thereby threatening its viability as a going concern;
 - (2) an inability of a *firm* to meet its own obligations to depositors, *policyholders* or other market *counterparties* due to its capital

erosion.

- 15.1.6 G Appropriate systems and controls for the management of credit risk will vary with the scale, nature and complexity of the *firm's* activities. Therefore the material in this section is *guidance*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3* to organise and control its affairs responsibly and effectively.

Requirements

- 15.1.7 G High level requirements for prudential systems and controls, including those for credit risk, are set out in SYSC 14. In particular:
- (1) SYSC 14.1.19R(2) requires a *firm* to document its policy for credit risk, including its risk appetite and how it identifies, measures, monitors and controls that risk;
 - (2) SYSC 14.1.19R(2) requires a *firm* to document its provisioning policy. Documentation should describe the systems and controls that it intends to use to ensure that the policy is correctly implemented;
 - (3) SYSC 14.1.18R requires it to establish and maintain risk management systems to identify, measure, monitor and control credit risk (in accordance with its credit risk policy), and to take reasonable steps to ensure that its systems are adequate for that purpose; or
 - (4) in line with SYSC 14.1.11G, the ultimate responsibility for the management of credit risk should rest with a *firm's governing body*. Where delegation of authority occurs the *governing body* and relevant *senior managers* should approve and periodically review systems and controls to ensure that delegated duties are being performed correctly.

Credit risk policy

- 15.1.8 G SYSC 14.1.18R requires a *firm* to establish, maintain and document a business plan and risk policies. They should provide a clear indication of the amount and nature of credit risk that the *firm* wishes to incur. In particular, they should cover for credit risk:
- (1) how, with particular reference to its activities, the *firm* defines and measures credit risk;
 - (2) the *firm's* business aims in incurring credit risk including:
 - (a) identifying the types and sources of credit risk to which the *firm* wishes to be exposed (and the limits on that exposure) and those to which the *firm* wishes not to be exposed (and how that is to be achieved, for example how exposure is to be avoided or mitigated);

- (b) specifying the level of diversification required by the *firm* and the *firm's* tolerance for risk concentrations (and the limits on those exposures and concentrations); and
 - (c) drawing the distinction between activities where credit risk is taken in order to achieve a return (for example, lending) and activities where credit exposure arises as a consequence of pursuing some other objective (for example, the purchase of a *derivative* in order to mitigate *market risk*);
- (3) how credit risk is assessed both when credit is granted or incurred and subsequently, including how the adequacy of any security and other risk mitigation techniques is assessed;
- (4) the detailed limit structure for credit risk which should:
- (a) address all key risk factors, including *intra-group* exposures and indirect exposures (for example, exposures held by *related* and *subsidiary undertakings*);
 - (b) be commensurate with the volume and complexity of activity; and
 - (c) be consistent with the *firm's* business aims, historical performance, and its risk appetite;
- (5) procedures for:
- (a) approving new or additional exposures to *counterparties*;
 - (b) approving new products and activities that give rise to credit risk;
 - (c) regular risk position and performance reporting;
 - (d) limit exception reporting and approval; and
 - (e) identifying and dealing with the problem exposures caused by the failure or downgrading of a *counterparty*;
- (6) the methods and assumptions used for the stress testing and scenario analysis required by *GENPRU* 1.2 (Adequacy of financial resources), including how these methods and assumptions are selected and tested; and
- (7) the allocation of responsibilities for implementing the credit risk policy and for monitoring adherence to, and the effectiveness of, the policy.

Counterparty assessment

- 15.1.9 G The *firm* should make a suitable assessment of the risk profile of the *counterparty*. The factors to be considered will vary according to both the type of credit and the *counterparty* being considered. This may include:
- (1) the purpose of the credit, the duration of the agreement and the source of repayment;
 - (2) an assessment and continuous monitoring of the credit quality of the *counterparty*;
 - (3) an assessment of the *claims* payment record where the *counterparty* is a *reinsurer*;
 - (4) an assessment of the nature and amount of risk attached to the *counterparty* in the context of the industrial sector or geographical region or country in which it operates, as well as the potential impact on the *counterparty* of political, economic and market changes; and
 - (5) the proposed terms and conditions attached to the granting of credit, including ongoing provision of information by the *counterparty*, covenants attached to the facility as well as the adequacy and enforceability of *collateral*, security and guarantees.
- 15.1.10 G It is important that sound and legally enforceable documentation is in place for each agreement that gives rise to credit risk as this may be called upon in the event of a default or dispute. A *firm* should therefore consider whether it is appropriate for an independent legal opinion to be sought on documentation used by the *firm*. Documentation should normally be in place before the *firm* enters into a contractual obligation or releases funds.
- 15.1.11 G Where *premium* payments are made via *brokers* or *intermediaries*, the *firm* should describe how it monitors and controls its exposure to those *brokers* and *intermediaries*. In particular, the policy should identify whether the risk of default by the *broker* or *intermediary* is borne by the *firm* or the *policyholder*.
- 15.1.12 G Any variation from the usual credit policy should be documented.
- 15.1.13 G A *firm* involved in loan syndications or consortia should not rely on other parties' assessment of the credit risks involved. It will remain responsible for forming its own judgement on the appropriateness of the credit risk thereby incurred with reference to its stated credit risk policy. Similarly a *firm* remains responsible for assessing the credit risk associated with any insurance or *reinsurance* placed on its behalf by other parties.
- 15.1.14 G Where a credit scoring approach or other *counterparty* assessment process is used, the *firm* should periodically assess the particular approach taken in the light of past and expected future *counterparty* performance and ensure that any statistical process is adjusted accordingly to ensure that the business

written complies with the *firm's* risk appetite.

- 15.1.15 G In assessing its contingent exposure to a *counterparty*, the *firm* should identify the amount which would be due from the *counterparty* if the value, index or other factor upon which that amount depends were to change.

Credit risk measurement

- 15.1.16 G A *firm* should measure its credit risk using a robust and consistent methodology which should be described in its credit risk policy; the appropriate method of measurement will depend upon the nature of the credit product provided. The *firm* should consider whether the measurement methodologies should be backtested and the frequency of such backtesting.
- 15.1.17 G A *firm* should also be able to measure its credit exposure across its entire portfolio or within particular categories such as exposures to particular industries, economic sectors or geographical areas.
- 15.1.18 G Where a *firm* is a member of a *group* that is subject to consolidated reporting, the *group* should be able to monitor credit exposures on a consolidated basis. See *SYSC 12*, *INSPRU 6.1* and *GENPRU 3*.
- 15.1.19 G A *firm* should have the capability to measure its credit exposure to individual *counterparties* on at least a daily basis.

Risk monitoring

- 15.1.20 G A *firm* should implement an effective system for monitoring its credit risk which should be described in its credit risk policy.
- 15.1.21 G A *firm* should have a system of management reporting which provides clear, concise, timely and accurate credit risk reports to relevant functions within the *firm*. The reports could cover exceptions to the *firm's* credit risk policy, non-performing exposures and changes to the level of credit risk within the *firm's* credit portfolio. A *firm* should have procedures for taking appropriate action according to the information within the management reports, such as a review of *counterparty* limits, or of the overall credit policy.
- 15.1.22 G Individual credit facilities and overall limits should be periodically reviewed in order to check their appropriateness for both the current circumstances of the *counterparty* and the *firm's* current internal and external economic environment. The frequency of review should be appropriate to the nature of the facility.
- 15.1.23 G A *firm* should utilise appropriate stress testing and scenario analysis of credit exposures to examine the potential effects of economic or industry downturns, market events, changes in interest rates, changes in foreign exchange rates, changes in liquidity conditions and changes in levels of insurance losses where relevant.

Problem exposures

- 15.1.24 G A *firm* should have systematic processes for the timely identification, management and monitoring of problem exposures. These processes should be described in the credit risk policy.
- 15.1.25 G A *firm* should have adequate procedures for recovering exposures in arrears or that have had provisions made against them. A *firm* should allocate responsibility, either internally or externally, for its arrears management and recovery.

Provisioning

- 15.1.26 G SYSC 14.1.19R(2) requires a *firm* to document its provisioning policy. A *firm's* provisioning policy can be maintained either as a separate document or as part of its credit risk policy.
- 15.1.27 G At intervals that are appropriate to the nature, scale and complexity of its activities a *firm* should review and update its provisioning policy and associated systems.
- 15.1.28 G In line with SYSC 15.1.6G, the *FSA* recognises that the frequency with which a *firm* reviews its provisioning policy once it has been established will vary from *firm* to *firm*. However, the *FSA* expects a *firm* to review at least annually whether its policy remains appropriate for the business it undertakes and the economic environment in which it operates.
- 15.1.29 G In line with SYSC 14.1.12G, the provisioning policy referred to in SYSC 15.1.26G must be approved by the *firm's governing body* or another appropriate body to which the *firm's governing body* has delegated this responsibility.
- 15.1.30 G In line with SYSC 14.1.24G, the *FSA* may request a *firm* to provide it with a copy of its current provisioning policy.
- 15.1.31 G Provisions may be general (against the whole of a given portfolio), specific (against particular exposures identified as bad or doubtful) or both. The *FSA* expects contingent liabilities (for example guarantees) and anticipated losses to be recognised in accordance with accepted accounting standards at the relevant time, such as those embodied in the Financial Reporting Standards issued by the Accounting Standards Board.

Risk mitigation

- 15.1.32 G A *firm* may choose to use various credit risk mitigation techniques including the taking of *collateral*, the use of letters of credit or guarantees, or *counterparty netting* agreements to manage and control their *counterparty* exposures. The use of such techniques does not obviate the need for thorough credit analysis and procedures. The reliance placed by a *firm* on *risk* mitigation should be described in the credit risk policy.

- 15.1.33 G A *firm* should consider the legal and financial ability of a guarantor to fulfil the guarantee if called upon to do so.
- 15.1.34 G A *firm* should monitor the validity and enforceability of its *collateral* arrangements.
- 15.1.35 G The *firm* should analyse carefully the protection afforded by risk mitigants such as netting agreements or credit *derivatives*, to ensure that any residual risk is identified, measured, monitored and controlled.

Record keeping

- 15.1.36 G Prudential records made under SYSC 14.1.53R should include appropriate records of:
- (1) credit exposures, including aggregations of credit exposures, as appropriate, by:
 - (a) groups of connected *counterparties*; or
 - (b) types of *counterparty* as defined, for example, by the nature or geographical location of the *counterparty*;
 - (2) credit decisions, including details of the decision and the facts or circumstances upon which it was made; and
 - (3) information relevant to assessing current *counterparty* and risk quality.
- 15.1.37 G Credit records should be retained as long as they are needed for the purpose described in SYSC 15.1.36G (subject to the minimum three year retention period). In particular, a *firm* should consider whether it is appropriate to retain information regarding *counterparty* history such as a record of credit events as well as a record indicating how credit decisions were taken.

- 16 Market risk management systems and controls
- 16.1 Application
- 16.1.1 G SYSC 16.1 applies to an *insurer* unless it is:
- (1) a *non-directive friendly society*; or
 - (2) an *incoming EEA firm*; or
 - (3) an *incoming Treaty firm*.
- 16.1.2 G SYSC 16.1 applies to:
- (1) an *EEA-deposit insurer*; and
 - (2) a *Swiss general insurer*;
- only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.
- 16.1.3 G *Firms* should also see *GENPRU* 1.2 (*GENPRU* 1.2.64G to *GENPRU* 1.2.78G) and *INSPRU* 3.1.
- Purpose
- 16.1.4 G
- (1) The purpose of this section is to amplify *SYSC* 14 insofar as it relates to *market risk*.
 - (2) *Market risk* includes equity, interest rate, foreign exchange (FX), commodity risk and interest rate risk on *long-term insurance contracts*. The price of *financial instruments* may also be influenced by other risks such as *spread risk*, *basis risk*, correlation, *specific risk* and *volatility risk*.
 - (3) This section does not deal with the risk management of *market risk* in a *group* context. A *firm* that is a member of a *group* should also read *SYSC* 12 (Group risk systems and controls) which outlines the *FSA's* requirements for the risk management of *market risk* within a *group*.
 - (4) Appropriate systems and controls for the management of *market risk* will vary with the scale, nature and complexity of the *firm's* activities. Therefore the material in this section is *guidance*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations as set out in *Principle 3* to organise and control its affairs responsibly and effectively.

Requirements

- 16.1.5 G High level requirements for prudential systems and controls, including those for *market risk*, are set out in SYSC 14. In particular:
- (1) SYSC 14.1.19R(2) requires a *firm* to document its policy for *market risk*, including its risk appetite and how it identifies, measures, monitors and controls that risk;
 - (2) SYSC 14.1.19R(4) requires a *firm* to document its asset and liability recognition policy. Documentation should describe the systems and controls that it intends to use to comply with the policy;
 - (3) SYSC 14.1.19R requires a *firm* to establish and maintain risk management systems to identify, measure, monitor and control *market risk* (in accordance with its *market risk* policy), and to take reasonable steps to establish systems adequate for that purpose; and
 - (4) In line with SYSC 14.1.11G, the ultimate responsibility for the management of *market risk* should rest with a *firm's governing body*. Where delegation of authority occurs the *governing body* and relevant *senior managers* should approve and adequately review systems and controls to check that delegated duties are being performed correctly.

Market risk policy

- 16.1.6 G SYSC 14 requires a *firm* to establish, maintain and document a business plan and risk policies. They should provide a clear indication of the amount and nature of *market risk* that the *firm* wishes to incur. In particular, they should cover for *market risk*:
- (1) how, with particular reference to its activities, the *firm* defines and measures *market risk*;
 - (2) the *firm's* business aims in incurring *market risk* including:
 - (a) identifying the types and sources of *market risk* to which the *firm* wishes to be exposed (and the limits on that exposure) and those to which the *firm* wishes not to be exposed (and how that is to be achieved, for example how exposure is to be avoided or mitigated); and
 - (b) specifying the level of diversification required by the *firm* and the *firm's* tolerance for risk concentrations (and the limits on those exposures and concentrations).
- 16.1.7 G The *market risk* policy of a *firm* should be endorsed by the *firm's governing body* and implemented by its senior management, who should take adequate steps to disseminate the policy and train the relevant staff such that they can effectively implement the policy.

- 16.1.8 G The *market risk* policy of a *firm* should enforce the risk management and control principles and include detailed information on:
- (1) the *financial instruments*, commodities, assets and liabilities (and mismatches between assets and liabilities) that a *firm* is exposed to and the limits on those exposures;
 - (2) the *firm's* investment strategy as applicable between each insurance fund;
 - (3) activities that are intended to hedge or mitigate *market risk* including mismatches caused by for example differences in the assets and liabilities and maturity mismatches; and
 - (4) the methods and assumptions used for measuring linear, non-linear and geared *market risk* including the rationale for selection, ongoing validation and testing. Methods might include stress testing and scenario analysis, asset/liability analysis, correlation analysis, Value-at-Risk (VaR) and *options* such as delta, gamma, vega, rho and theta. Exposure to non-linear or geared *market risk* is typically through the use of *derivatives*.

Risk identification

- 16.1.9 G A *firm* should have in place appropriate risk reporting systems that enable it to identify the types and amount of *market risk* to which it is, and potentially could be, exposed. The information that systems should capture may include but is not limited to:
- (1) position information which may include a description of individual *financial instruments* and their cash flows; and
 - (2) market data which may consist of raw time series of market rates, index levels and prices and derived time series of benchmark yield curves, spreads, implied volatilities, historical volatilities and correlations.

Risk measurement

- 16.1.10 G Having identified the *market risk* that the *firm* is exposed to on at least a daily basis, a *firm* should be able to measure and manage that *market risk* on a consistent basis. This may be achieved by:
- (1) regularly stress testing all or parts of the *firm's* portfolio to estimate potential economic losses in a range of market conditions including abnormal markets. Corporate level stress test results should be discussed regularly by risk monitors, senior management and risk takers, and should guide the *firm's market risk* appetite (for example, stress tests may lead to discussions on how best to unwind or hedge a position), and influence the internal capital allocation process;

- (2) measuring the *firm's* exposure to particular categories of *market risk* (for example, equity, interest rate, foreign exchange and commodities) as well as across its entire portfolio of *market risks*;
- (3) analysing the impact that new transactions or businesses may have on its *market risk* position on an on-going basis; and
- (4) regularly backtesting realised results against internal model generated *market risk* measures in order to evaluate and assess its accuracy. For example, a *firm* should keep a database of daily risk measures such as VaR and *options* such as delta, gamma, vega, rho and theta, and use these to back test predicted profit and loss against actual profit and loss for all trading desks and business units, and monitor the number of exceptions from agreed confidence bands.

Valuation

- 16.1.11 G A *firm* should take reasonable steps to establish systems and control procedures such that the *firm* complies with the requirements of *GENPRU* 1.3 (Valuation).
- 16.1.12 G The systems and controls referred to in *SYSC* 16.1.11G should include the following:
- (1) the department responsible for the validation of the value of assets and liabilities should be independent of the business trading area, and should be adequately resourced by suitably qualified staff. The department should report to a suitably qualified individual, independent from the business trading area, who has sufficient authority to enforce the systems and controls policies and any alterations to valuation treatments where necessary;
 - (2) all valuations should be checked and validated at appropriate intervals. Where a *firm* has chosen not to validate all valuations on a daily basis this should be agreed by senior management;
 - (3) a *firm* should establish a review procedure to check that the valuation procedures are followed and are producing valuations in compliance with the requirements in this section. The review should be undertaken by suitably qualified staff independent of the business trading area, on a regular and ad hoc basis. In particular, this review procedure should include:
 - (a) the quality and appropriateness of the price sources used;
 - (b) valuation reserves held; and
 - (c) the valuation methodology employed for each product and consistent adherence to that methodology;
 - (4) where a valuation is disputed and the dispute cannot be resolved in a timely manner it should be reported to senior management. It should

continue to be reported to senior management until agreement is reached;

- (5) where a *firm* is marking positions to market it should take reasonable steps to establish a price source that is reliable and appropriate to enable compliance with the provisions in this section on an ongoing basis;
- (6) a *firm* should document its policies and procedures relating to the entire valuation process. In particular, the following should be documented:
 - (a) the valuation methodologies employed for all product categories;
 - (b) details of the price sources used for each product;
 - (c) the procedures to be followed where a valuation is disputed;
 - (d) the valuation adjustment and reserving policies;
 - (e) the level at which a difference between a valuation assigned to an asset or liability and the valuation used for validation purposes will be reported on an exceptions basis and investigated;
 - (f) where a *firm* is using its own internal estimate to produce a valuation, it should document in detail the process followed in order to produce the valuation; and
 - (g) the review procedures established by a *firm* in relation to the requirements of this section should be adequately documented and include the rationale for the policy;
- (7) a *firm* should maintain records which demonstrate:
 - (a) senior management's approval of the policies and procedures established; and
 - (b) management sign-off of the reviews undertaken in accordance with SYSC 16.1.11G.

Risk monitoring

- 16.1.13 G Risk monitoring is the operational process by which a *firm* monitors compliance with defined policies and procedures of the *market risk* policy. The *firm's* risk monitoring system should be independent of the *employees* who are responsible for exposing the *firm* to *market risk*.
- 16.1.14 G The *market risk* policy of a *firm* may require the production of *market risk* reports at various levels within the *firm*. These reports should provide sufficiently accurate *market risk* data to relevant functions within the *firm*,

and should be timely enough to allow any appropriate remedial action to be proposed and taken, for example:

- (1) at a *firm* wide level, a *market risk* report may include information:
 - (a) summarising and commenting on the total *market risk* that a *firm* is exposed to and *market risk* concentrations by business unit, asset class and country;
 - (b) on VaR reports against risk limits by business unit, asset class and country;
 - (c) commenting on significant risk concentrations and market developments; and
 - (d) on *market risk* in particular legal entities and geographical regions;
- (2) at the business unit level, a *market risk* report may include information summarising *market risk* by currency, trading desk, maturity or duration band, or by instrument type;
- (3) at the trading desk level, a *market risk* report may include detailed information summarising *market risk* by individual trader, instrument, position, currency, or maturity or duration band; and
- (4) all risk data should be readily reconcilable back to the prime books of entry with a fully documented audit trail.

16.1.15 G Risk monitoring may also include information on:

- (1) the procedures for taking appropriate action in response to the information within the *market risk* reports;
- (2) ensuring that there are controls and procedures for identifying and reporting trades and positions booked at off-market rates;
- (3) the process for new product approvals;
- (4) the process for dealing with situations (authorised and unauthorised) where particular *market risk* exposures exceed predetermined risk limits and criteria; and
- (5) the periodic review of the risk monitoring process in order to check its suitability for both current market conditions and the *firm's* overall risk appetite.

16.1.16 G Risk monitoring should be subject to periodic independent review by suitably qualified staff.

Risk control

- 16.1.17 G Risk control is the independent monitoring, assessment and supervision of business units within the defined policies and procedures of the *market risk* policy. This may be achieved by:
- (1) setting an appropriate *market risk* limit structure to control the *firm's* exposure to *market risk*; for example, by setting out a detailed *market risk* limit structure at the corporate level, the business unit level and the trading desk level which addresses all the key *market risk* factors and is commensurate with the volume and complexity of activity that the *firm* undertakes;
 - (2) setting limits on risks such as price or rate risk, as well as those factors arising from *options* such as delta, gamma, vega, rho and theta;
 - (3) setting limits on net and gross positions, *market risk* concentrations, the maximum allowable loss (also called "stop-loss"), VaR, potential risks arising from stress testing and scenario analysis, gap analysis, correlation, liquidity and volatility; and
 - (4) considering whether it is appropriate to set intermediate (early warning) thresholds that alert management when limits are being approached, triggering review and action where appropriate.

Record keeping

- 16.1.18 G High level requirements for record keeping are set out in SYSC 14.
- 16.1.19 G In relation to *market risk*, a *firm* should retain appropriate prudential records of:
- (1) off and on market trades in *financial instruments*;
 - (2) the nature and amounts of off and on balance sheet exposures, including the aggregation of exposures;
 - (3) trades in *financial instruments* and other assets and liabilities; and
 - (4) methods and assumptions used in stress testing and scenario analysis and in VaR models.
- 16.1.20 G A *firm* should keep a data history to enable it to perform back testing of methods and assumptions used for stress testing and scenario analysis and for VaR models.

17 Insurance risk systems and controls

17.1 Application

17.1.1 G SYSC 17.1 applies to an *insurer* unless it is:

- (1) a *non-directive friendly society*; or
- (2) an *incoming EEA firm*; or
- (3) an *incoming Treaty firm*.

17.1.2 G SYSC 17.1 applies to:

- (1) an *EEA-deposit insurer*; and
- (2) a *Swiss general insurer*;

only in respect of the activities of the *firm* carried on from a *branch* in the *United Kingdom*.

Purpose

17.1.3 G This section provides *guidance* on how to interpret SYSC 14 (Prudential risk management and associated systems and controls) in so far as it relates to the management of insurance risk. Insurance risk refers to fluctuations in the timing, frequency and severity of insured events, relative to the expectations of the *firm* at the time of underwriting. Insurance risk can also refer to fluctuations in the timing and amount of *claim* settlements. For *general insurance business* some specific examples of insurance risk include variations in the amount or frequency of *claims* or the unexpected occurrence of multiple *claims* arising from a single cause. For *long-term insurance business* examples include variations in the mortality and persistency rates of *policyholders*, or the possibility that guarantees could acquire a value that adversely affects the finances of a *firm* and its ability to treat its *policyholders* fairly consistent with the *firm's* obligations under *Principle 6*. More generally, insurance risk includes the potential for expense overruns relative to pricing or provisioning assumptions.

17.1.4 G Insurance risk concerns the *FSA* in a *prudential context* because inadequate systems and controls for its management can create a threat to the *regulatory objectives* of market confidence and consumer protection. Inadequately managed insurance risk may result in:

- (1) the inability of a *firm* to meet its contractual insurance liabilities as they fall due; and
- (2) the inability of a *firm* to treat its *policyholders* fairly consistent with the *firm's* obligations under *Principle 6* (for example, in relation to bonus payments).

- 17.1.5 G *Guidance* on the application of this section to a *firm* that is a member of a *group* is provided in SYSC 12 (Group risk systems and controls).
- 17.1.6 G The *guidance* contained within this section should be read in conjunction with the rest of SYSC.
- 17.1.7 G Appropriate systems and controls for the management of insurance risk will vary with the scale, nature and complexity of a *firm's* activities. Therefore, the material in this section is *guidance*. A *firm* should assess the appropriateness of any particular item of *guidance* in the light of the scale, nature and complexity of its activities as well as its obligations, as set out in *Principle 3*, to organise and control its affairs responsibly and effectively.

General requirements

- 17.1.8 G High level *rules* and *guidance* for prudential systems and controls for insurance risk are set out in SYSC 14. In particular:
- (1) SYSC 14.1.18R requires a *firm* to take reasonable steps to establish and maintain a business plan and appropriate risk management systems;
 - (2) SYSC 14.1.19R(2) requires a *firm* to document its policy for insurance risk, including its risk appetite and how it identifies, measures, monitors and controls that risk; and
 - (3) SYSC 14.1.27R requires a *firm* to take reasonable steps to establish and maintain adequate *internal controls* to enable it to assess and monitor the effectiveness and implementation of its business plan and prudential risk management systems.

Insurance risk policy

- 17.1.9 G A *firm's* insurance risk policy should outline its objectives in carrying out *insurance business*, its appetite for insurance risk and its policies for identifying, measuring, monitoring and controlling insurance risk. The insurance risk policy should cover any activities that are associated with the creation or management of insurance risk. For example, underwriting, *claims* management and settlement, assessing *technical provisions* in the balance sheet, risk mitigation and risk transfer, record keeping and management reporting. Specific matters that should normally be in a *firm's* insurance risk policy include:
- (1) a statement of the *firm's* willingness and capacity to accept insurance risk;
 - (2) the classes and characteristics of *insurance business* that the *firm* is prepared to accept;
 - (3) the underwriting criteria that the *firm* intends to adopt, including how these can influence its rating and pricing decisions;

- (4) its approach to limiting significant aggregations of insurance risk, for example, by setting limits on the amount of business that can be underwritten in one region or with one *policyholder*;
- (5) where relevant, the *firm's* approach to pricing *long-term insurance contracts*, including the determination of the appropriate level of any reviewable *premiums*;
- (6) the *firm's* policy for identifying, monitoring and managing risk when it has delegated underwriting authority to another party (additional *guidance* on the management of *outsourcing* arrangements is provided in SYSC 13.9);
- (7) the *firm's* approach to managing its expense levels, including acquisition costs, recurring costs, and one-off costs, taking account of the margins available in both the prices for products and in the *technical provisions* in the balance sheet;
- (8) the *firm's* approach to the exercise of any discretion (e.g. on charges or the level of benefits payable) that is available in its *long-term insurance contracts*, in the context also of the legal and regulatory constraints existing on the application of this discretion;
- (9) the *firm's* approach to the inclusion of options within new *long-term insurance contracts* and to the possible exercise by *policyholders* of options on existing contracts;
- (10) the *firm's* approach to managing persistency risk;
- (11) the *firm's* approach to managing risks arising from timing differences in taxation or from changes in tax laws;
- (12) the *firm's* approach to the use of *reinsurance* or the use of some other means of risk transfer;
- (13) how the *firm* intends to assess the effectiveness of its risk transfer arrangements and manage the residual or transformed risks (for example, how it intends to handle disputes over contract wordings, potential payout delays and *counterparty* performance risks);
- (14) a summary of the data and information to be collected and reported on underwriting, *claims* and risk control (including internal accounting records), management reporting requirements and external data for risk assessment purposes;
- (15) the risk measurement and analysis techniques to be used for setting underwriting *premiums*, *technical provisions* in the balance sheet, and assessing capital requirements; and
- (16) the *firm's* approach to stress testing and scenario analysis, as required by GENPRU 1.2 (Adequacy of financial resources), including the methods adopted, any assumptions made and the use that is to be

made of the results.

- 17.1.10 G Further, more detailed, *guidance* is given in SYSC 17.1.11G to SYSC 17.1.37G on the identification, measurement, monitoring and control (including the use of *reinsurance* and other forms of risk transfer) of insurance risk. A *firm* should consider what additional material to that set out above should be included in its insurance risk policy on each of these for its various activities.

Risk identification

- 17.1.11 G A *firm* should seek to identify the causes of fluctuations in the occurrence, amount and timing of its insurance liabilities. A *firm* should also seek to identify aggregations of risk that may give rise to large single or multiple *claims*.
- 17.1.12 G The identification of insurance risk should normally include:
- (1) in connection with the *firm's* business plan:
 - (a) processes for identifying the types of insurance risks that may be associated with a new product and for comparing the risk types that are present in different classes of business (in order to identify possible aggregations in particular insurance risks); and
 - (b) processes for identifying business environment changes (for example landmark legal rulings) and for collecting internal and external data to test and modify business plans;
 - (2) at the point of sale, processes for identifying the underwriting risks associated with a particular *policyholder* or a group of *policyholders* (for example, processes for identifying potential *claims* for mis-selling and for collecting information on the *claims* histories of *policyholders*, including whether they have made any potentially false or inaccurate claims, to identify possible adverse selection or moral hazard problems);
 - (3) after the point of sale, processes for identifying potential and emerging *claims* for the purposes of *claims* management and *claims* provisioning; this could include:
 - (a) identifying possible judicial rulings;
 - (b) keeping up to date with developments in market practice; and
 - (c) collecting information on industry wide initiatives and settlements.
- 17.1.13 G A *firm* should also identify potential pricing risks, where the liabilities or costs arising from the sale of a product may not be as expected.

Risk measurement

- 17.1.14 G A *firm* should have in place appropriate systems for collecting the data it needs to measure insurance risk. At a minimum this data should be capable of allowing a *firm* to evaluate the types of *claims* experienced, *claims* frequency and severity, expense levels, persistency levels and, where relevant, potential changes in the value of guarantees and options in *long-term insurance contracts*.
- 17.1.15 G A *firm* should ensure that the data it collects and the measurement methodologies that it uses are sufficient to enable it to evaluate, as appropriate:
- (1) its exposure to insurance risk at all relevant levels, for example, by contract, *policyholder*, product line or insurance class;
 - (2) its exposure to insurance risk across different geographical areas and time horizons;
 - (3) its total, *firm-wide*, exposure to insurance risk and any other risks that may arise out of the *contracts of insurance* that it issues;
 - (4) how changes in the volume of business (for example via changes in *premium* levels or the number of new contracts that are underwritten) may influence its exposure to insurance risk;
 - (5) how changes in *policy* terms may influence its exposure to insurance risk; and
 - (6) the effects of specific loss scenarios on the insurance liabilities of the *firm*.
- 17.1.16 G A *firm* should hold data in a manner that allows for it to be used in a flexible way. For example, data should be sufficiently detailed and disaggregated so that contract details may be aggregated in different combinations to assess different risks.
- 17.1.17 G A *firm* should be able to justify its choice of measurement methodologies. This justification should normally be documented.
- 17.1.18 G A *firm* should periodically review the appropriateness of the measurement methodologies that it uses. This could, for example, include back testing (that is, by comparing actual versus expected results) and updating for changes in market practice.
- 17.1.19 G A *firm* should ensure that it has access to the necessary skills and resources that it needs to measure insurance risk using its chosen methodology.
- 17.1.20 G When measuring its insurance risks, a *firm* should consider how emerging experience could be used to update its underwriting process, in particular in relation to contract terms and pricing and also its assessment of the *technical*

provisions in the balance sheet.

- 17.1.21 G A *firm* should have the capability to measure its exposure to insurance risk on a regular basis. In deciding on the frequency of measurement, a *firm* should consider:
- (1) the time it takes to acquire and process all necessary data;
 - (2) the speed at which exposures could change; and
 - (3) that it may need to measure its exposure to certain types of insurance risk on a daily basis (for example, weather catastrophes).

Risk monitoring

- 17.1.22 G A *firm* should provide regular and timely information on its insurance risks to the appropriate level of management. This could include providing reports on the following:
- (1) a statement of the *firm's* profits or losses for each class of business that it underwrites (with an associated analysis of how these have arisen for any *long-term insurance contracts*), including a variance analysis detailing any deviations from budget or changes in the key performance indicators that are used to assess the success of its business plan for insurance;
 - (2) the *firm's* exposure to insurance risk at all relevant levels (see SYSC 17.1.15G(1)), as well as across different geographical areas and time zones (see SYSC 17.1.15G(2)), also senior management should be kept informed of the *firm's* total exposure to insurance risk (see SYSC 17.1.15G(3));
 - (3) an analysis of any internal or external trends that could influence the *firm's* exposure to insurance risk in the future (e.g. new weather patterns, socio-demographic changes, expense overruns etc);
 - (4) any new or emerging developments in *claims* experience (e.g. changes in the type of *claims*, average *claim* amounts or the number of similar *claims*);
 - (5) the results of any stress testing or scenario analyses;
 - (6) the amount and details of new business written and the amount of business that has lapsed or been cancelled;
 - (7) identified fraudulent *claims*;
 - (8) a watch list, detailing, for example, material/catastrophic events that could give rise to significant numbers of new *claims* or very large *claims*, contested *claims*, client complaints, legal and other developments;

- (9) the performance of any *reinsurance*/risk transfer arrangements; and
 - (10) progress reports on matters that have previously been referred under escalation procedures (see SYSC 17.1.23G).
- 17.1.23 G A *firm* should establish and maintain procedures for the escalation of appropriate matters to the relevant level of management. Such matters may include:
- (1) any significant new exposures to insurance risk, including for example any landmark rulings in the courts;
 - (2) a significant increase in the size or number of *claims*;
 - (3) any breaches of the limits set out in SYSC 17.1.27G and SYSC 17.1.28G, in particular senior management should be informed where any maximum limits have been breached (see SYSC 17.1.29G); and
 - (4) any unauthorised deviations from its insurance risk policy (including those by a *broker*, *appointed representative* or other delegated authority).
- 17.1.24 G A *firm* should regularly monitor the effectiveness of its analysis techniques for setting provisions for *claims* on *general insurance contracts*.
- 17.1.25 G A *firm* should have appropriate procedures in place to allow managers to monitor the application (and hence the effect) of its *reinsurance* programme. This would include, for a general *insurer*, procedures for monitoring how its *reinsurance* programme affects the gross provisions that it makes for outstanding *claims* (including *claims* that are incurred but not reported).

Risk control

- 17.1.26 G A *firm* should take appropriate action to ensure that it is not exposed to insurance risk in excess of its risk appetite. In so doing, the *firm* should be both reactive, responding to actual increases in exposure, and proactive, responding to potential future increases. Being proactive should involve close co-ordination between the processes of risk control, risk identification and risk measurement, as potential future exposures need to be identified and understood before effective action can be taken to control them.
- 17.1.27 G A *firm* should consider setting limits for its exposure to insurance risk, which trigger action to be taken to control exposure. Periodically these limits should be amended in the light of new information (e.g. on the expected number or size of *claims*). For example, limits could be set for:
- (1) the *firm's* aggregate exposure to a single source of insurance risk or for events that may be the result of a number of different sources;

- (2) the *firm's* exposure to specific geographic areas or any other groupings of risks whose outcomes may be positively correlated;
 - (3) the number of fraudulent *claims*;
 - (4) the number of very large *claims* that could arise;
 - (5) the number of unauthorised deviations from its insurance risk policy;
 - (6) the amount of insurance risk than can be transferred to a particular *reinsurer*;
 - (7) the level of expenses incurred in respect of each relevant business area; and
 - (8) the level of persistency by product line or distribution channel.
- 17.1.28 G A *firm* should also consider setting individual underwriting limits for all *employees* and agents that have the authority to underwrite insurance risk. This could include both monetary limits and limits on the types of risk that they can underwrite. Where individual underwriting limits are set, the *firm* should ensure that they are adhered to.
- 17.1.29 G In addition to setting some 'normal' limits for insurance risk, a *firm* should consider setting some maximum limits, beyond which immediate, emergency action should be taken. These maximum limits could be determined through stress testing and scenario analysis.
- 17.1.30 G A *firm* should pay close attention to the wording of its *policy* documentation to ensure that these wordings do not expose it to more, or higher, *claims* than it is expecting. In so doing, the *firm* should consider:
- (1) whether it has adequate in-house legal resources;
 - (2) the need for periodic independent legal review of *policy* documentation;
 - (3) the use of standardised documentation and referral procedures for variation of terms;
 - (4) reviewing the documentation used by other insurance companies;
 - (5) revising documentation for new *policies* in the light of past experience; and
 - (6) the operation of law in the jurisdiction of the *policyholder*.
- 17.1.31 G A *firm* should ensure that it has appropriate systems and controls for assessing the validity of *claims*. This could involve consideration of the evidence that will be required from *policyholders* and how this evidence is to be tested as well as procedures to determine when experts such as loss

adjusters, lawyers or accountants should be used.

- 17.1.32 G Particular care should be taken to ensure that a *firm* has appropriate systems and controls to deal with large *claims* or large groups of *claims* that could significantly deplete its financial resources. This should include systems to ensure that senior management (that is, the *governing body* and relevant *senior managers*) is involved in the processing of such *claims* from the outset.
- 17.1.33 G A *firm* should consider how it intends to use *reinsurance* or some other form of insurance risk transfer agreement to help to control its exposure to insurance risk. Additional *guidance* on the use of *reinsurance*/risk transfer is provided below.

Reinsurance and other forms of risk transfer

- 17.1.34 G Before entering into or significantly changing a *reinsurance* agreement, or any other form of insurance risk transfer agreement, a *firm* should:
- (1) analyse how the proposed *reinsurance*/risk transfer agreement will affect its exposure to insurance risk, its underwriting strategy and its ability to meet its regulatory obligations;
 - (2) ensure there are adequate legal checking procedures in respect of the draft agreement;
 - (3) conduct an appropriate due diligence of the *reinsurer's* financial stability (that is, solvency) and expertise; and
 - (4) understand the nature and limits of the agreement (particular attention should be given to the wording of contracts to ensure that all of the required risks are covered, that the level of available cover is appropriate, and that all the terms, conditions and warranties are unambiguous and understood).
- 17.1.35 G In managing its *reinsurance* agreements, or any other form of insurance risk transfer agreement, a *firm* should have in place appropriate systems that allow it to maintain its desired level of cover. This could involve systems for:
- (1) monitoring the risks that are covered (that is, the scope of cover) by these agreements and the level of available cover;
 - (2) keeping underwriting staff informed of any changes in the scope or level of cover;
 - (3) properly co-ordinating all *reinsurance*/risk transfer activities so that, in aggregate, the desired level and scope of cover is maintained;
 - (4) ensuring that the *firm* does not become overly reliant on any one *reinsurer* or other risk transfer provider; or

- (5) conducting regular stress testing and scenario analysis to assess the resilience of its *reinsurance* and risk transfer programmes to catastrophic events that may give rise to large and or numerous *claims*.
- 17.1.36 G In making a claim on a *reinsurance* contract (that is, its *reinsurance* recoveries) or some other risk transfer contract a *firm* should ensure:
- (1) that it is able to identify and recover any money that it is due in a timely manner; and
- (2) that it makes adequate financial provision for the risk that it is unable to recover any money that it expected to be due, as a result of either a dispute with or a default by the *reinsurer*/risk transfer provider. Additional *guidance* on credit risk in *reinsurance*/risk transfer contracts is provided in *INSPRU* 2.1 (Credit risk in insurance)].
- 17.1.37 G Where the planned level or scope of cover from a *reinsurance*/risk transfer contract is not obtained, a *firm* should consider revising its underwriting strategy.

Record keeping

- 17.1.38 G The *FSA's* high level *rules* and *guidance* for record keeping are outlined in *SYSC* 3.2.20R (Records). Additional *rules* and *guidance* in relation to the *prudential context* are set out in *SYSC* 14.1.51G to *SYSC* 14.1.64G. In complying with these *rules* and *guidance*, a *firm* should retain an appropriate record of its insurance risk management activities. This may, for example, include records of:
- (1) each new risk that is underwritten (noting that these records may be held by agents or cedants, rather than directly by the *firm* provided that the *firm* has adequate access to those records);
- (2) any material aggregation of exposure to risk from a single source, or of the same kind or to the same potential catastrophe or event;
- (3) each notified *claim* including the amounts notified and paid, precautionary notices and any re-opened *claims*;
- (4) *policy* and contractual documents and any relevant representations made to *policyholders*;
- (5) other events or circumstances relevant to determining the risks and commitments that arise out of *contracts of insurance* (including discretionary benefits and charges under any *long-term insurance contracts*);
- (6) the formal wordings of *reinsurance* contracts; and

- (7) any other relevant information on the *firm's reinsurance* or other risk-transfer arrangements, including the extent to which they:
 - (a) have been exhausted by recoveries on paid *claims*; and
 - (b) will be exhausted by recoveries on reported *claims* and, to the extent known, on incurred but not reported *claims*.

17.1.39 G A *firm* should retain its underwriting and *claims* histories for as long as they may be needed to inform pricing or provisioning decisions.

- 18 Guidance on Public Interest Disclosure Act: whistleblowing
- 18.1 Application
- 18.1.1 G This chapter is relevant to every *firm* to the extent that the Public Interest Disclosure Act 1998 ("PIDA") applies to it.
- Purpose
- 18.1.2 G (1) The purposes of this chapter are:
- (a) to remind *firms* of the provisions of PIDA; and
 - (b) to encourage *firms* to consider adopting and communicating to workers appropriate internal procedures for handling workers' concerns as part of an effective risk management system.
- (2) In this chapter "worker" includes, but is not limited to, an individual who has entered into a contract of employment.
- 18.1.3 G The *guidance* in this chapter concerns the effect of PIDA in the context of the relationship between *firms* and the *FSA*. It is not comprehensive guidance on PIDA itself.
- 18.2 Practical measures
- Effect of Public Interest Disclosure Act 1998
- 18.2.1 G (1) Under PIDA, any clause or term in an agreement between a worker and his employer is void in so far as it purports to preclude the worker from making a protected disclosure (that is, "blow the whistle").
- (2) In accordance with section 1 of PIDA:
- (a) a protected disclosure is a qualifying disclosure which meets the relevant requirements set out in that section;
 - (b) a qualifying disclosure is a disclosure, made in good faith, of information which, in the reasonable belief of the worker making the disclosure, tends to show that one or more of the following (a "failure") has been, is being, or is likely to be, committed:
 - (i) a criminal offence; or
 - (ii) a failure to comply with any legal obligation; or
 - (iii) a miscarriage of justice; or

- (iv) the putting of the health and safety of an individual in danger; or
- (v) damage to the environment; or
- (vi) deliberate concealment relating to any of (i) to (v);

it is immaterial whether the relevant failure occurred, occurs or would occur in the *United Kingdom* or elsewhere, and whether the law applying to it is that of the *United Kingdom* or of any other country or territory.

Internal procedures

- 18.2.2 G (1) *Firms* are encouraged to consider adopting (and encouraged to invite their *appointed representatives* to consider adopting) appropriate internal procedures which will encourage workers with concerns to blow the whistle internally about matters which are relevant to the functions of the *FSA*.
- (2) Smaller *firms* may choose not to have as extensive procedures in place as larger *firms*. For example, smaller *firms* may not need written procedures. The following is a list of things that larger and smaller *firms* may want to do.
- (a) For larger *firms*, appropriate internal procedures may include:
- (i) a clear statement that the *firm* takes failures seriously (see SYSC 18.2.1G(2)(b));
 - (ii) an indication of what is regarded as a failure;
 - (iii) respect for the confidentiality of workers who raise concerns, if they wish this;
 - (iv) an assurance that, where a protected disclosure has been made, the *firm* will take all reasonable steps to ensure that no *person* under its control engages in victimisation;
 - (v) the opportunity to raise concerns outside the line management structure, such as with the Compliance Director, Internal Auditor or Company Secretary;
 - (vi) penalties for making false and malicious allegations;
 - (vii) an indication of the proper way in which concerns may be raised outside the *firm* if necessary (see (3));
 - (viii) providing access to an external body such as an independent charity for advice;

- (ix) making whistleblowing procedures accessible to staff of key contractors; and
 - (x) written procedures.
- (b) For smaller *firms*, appropriate internal procedures may include:
- (i) telling workers that the *firm* takes failures seriously (see SYSC 18.2.1G(2)(b)) and explaining how wrongdoing affects the organisation;
 - (ii) telling workers what conduct is regarded as failure;
 - (iii) telling workers who raise concerns that their confidentiality will be respected, if they wish this;
 - (iv) making it clear that concerned workers will be supported and protected from reprisals;
 - (v) nominating a senior officer as an alternative route to line management and telling workers how they can contact that individual in confidence;
 - (vi) making it clear that false and malicious allegations will be penalised by the *firm*;
 - (vii) telling workers how they can properly blow the whistle outside the *firm* if necessary (see (3));
 - (viii) providing access to an external body for advice such as an independent charity for advice; and
 - (ix) encouraging managers to be open to concerns.
- (3) (a) *Firms* should also consider telling workers (through the *firm's* internal procedures, or by means of an information sheet available from the *FSA's* website, or by some other means) that they can blow the whistle to the *FSA*, as the regulator prescribed in respect of financial services and markets matters under PIDA.
- (b) The *FSA* will give priority to live concerns or matters of recent history, and will emphasise that the worker's first port of call should ordinarily be the *firm* (see Frequently Asked Questions on <http://www.fsa.gov.uk/Pages/Doing/Contact/Whistle/FAQ/index.shtml>).
- (c) For the *FSA's* treatment of confidential information, see SUP 2.2.4G.

Link to fitness and propriety

- 18.2.3 G The *FSA* would regard as a serious matter any evidence that a *firm* had acted to the detriment of a worker because he had made a protected disclosure (see *SYSC 18.2.1G(2)*) about matters which are relevant to the functions of the *FSA*. Such evidence could call into question the fitness and propriety of the *firm* or relevant members of its staff, and could therefore, if relevant, affect the *firm's* continuing satisfaction of *threshold condition 5* (Suitability) or, for an *approved person*, his status as such.

Annex F

Senior Management Arrangements, Systems and Controls Handbook (SYSC) coming into force on 1 November 2007

In this Annex, underlining indicates new text and striking through indicates deleted text. In this Annex where an entire section is being deleted, the place where the change will be made is indicated and the text will not be struck through.

Amend SYSC 1.1 as follows

1.1 Application of SYSC 2 and SYSC 3

....

1.1.1 R Who?

SYSC 2 and SYSC 3 apply to every firm except that:

...

- (6) ~~*SYSC 3.2.23R to SYSC 3.2.36R apply only to a BIPRU firm for a common platform firm, SYSC 3 does not apply.*~~

...

1.3.1A G ~~From 1 January 2007 until 1 November 2007, the application of the common platform requirements is limited by SYSC TP 1.~~[deleted]

...

1.3.4 R ~~[To follow.]~~ The provisions on record-keeping in SYSC 9 apply as set out in SYSC 1.3.2R, except that they only apply to the carrying on of *ancillary activities* that are performed in relation to:

- (1) *designated investment business;*
- (2) *home finance activity; and*
- (3) *insurance mediation activity.*

...

Amend SYSC 3 as follows

...

3.1.1A R [deleted]

...

3.2.23R R [deleted]

3.2.24 R [deleted]

3.2.25 R [deleted]

3.2.26 R [deleted]

3.2.27 R [deleted]

3.2.28 R [deleted]

3.2.29 R [deleted]

3.2.30 R [deleted]

3.2.31 R [deleted]

3.2.32 R [deleted]

3.2.33 R [deleted]

3.2.34 R [deleted]

3.2.35 R [deleted]

3.2.36 R [deleted]

Amend SYSC 12 as follows

...

12.1.13 R If this *rule* applies under SYSC 12.1.14R to a *firm*, the *firm* must:

(1) ...; and

(2) ensure that the risk management processes and internal control mechanisms at the level of any *UK consolidation group* or *non-EEA sub-group* of which it is a member comply with the obligations set out in the following provisions on a consolidated (or sub-consolidated) basis:

- (a) ~~SYSC 3.2.23R and SYSC 3.2.24R~~ SYSC 4.1.1R and SYSC 4.1.2R;
- (b) ~~SYSC 3.2.26R~~ SYSC 4.1.7R;
- (c) ~~SYSC 3.2.28R to SYSC 3.2.36R~~ SYSC 5.1.7R;
- (d) ~~SYSC 11.1.11R and SYSC 11.1.12R~~ SYSC 7;
- (e) ~~BIPRU 2.3.7R(1)~~ SYSC 11.1.11R and SYSC 11.1.12R;
- (f) ~~BIPRU 9.1.6R and BIPRU 9.13.21R (Liquidity plans)~~ BIPRU 2.3.7R(1);
- (g) ~~BIPRU 10.12.3R (Concentration risk policies)~~ BIPRU 9.1.6R and BIPRU 9.13.21R (Liquidity plans);
- (h) BIPRU 10.12.3R (Concentration risk policies).

Annex G

Principles for Businesses sourcebook (PRIN)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 1.2.5 G A *firm* is therefore not required to classify its *clients* (because *COB* 4.1.4 R does not apply) and may choose to comply with *Principles* 6, 7, 8 and 9 as if all its *clients* were *customers*. Alternatively, it may choose to distinguish between *market counterparties* and *customers* in complying with those *Principles*. But, in that case, the *firm* would need to classify any *client* treated as a *market counterparty*. In doing this, the requirements in *SYSC* will apply, including the requirement to establish appropriate systems and controls ~~*SYSC* 3.1.1 R~~ and the requirement to make and retain adequate records ~~*SYSC* 3.2.20 R~~. In classifying its *market counterparties*, it would be open to such a *firm*, although not obligatory, to permit *intermediate customers* to opt up to *market counterparty* status in accordance with *COB* 4.1.12 R. It would also have to treat a *market counterparty* as a *customer* if the *firm* had chosen to treat the *client* as a *private customer* in the circumstances set out in *COB* 4.1.14 R.

...

Annex H

Threshold Conditions (COND)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

2.4.4(2) G (2) ...

- (d) whether the *firm* has taken reasonable steps to identify and measure any risks of regulatory concern that it may encounter in conducting its business (see *COND* 2.4.6 G) and has installed appropriate systems and controls and appointed appropriate human resources to measure them prudently at all times; see *SYSC* 3.1 (Systems and Controls), ~~and~~ *SYSC* 3.2 (Areas covered by systems and controls) and *SYSC* 4.1.1R (Organisational requirements); and

...

2.4.5 G In complying with ~~*SYSC* 3.1.1R~~ (Systems and controls), a *firm* should plan its business appropriately so that it is able to identify, measure and manage the likely risks of regulatory concern it will face (*SYSC* 3.2.17 G (Business strategy) and *SYSC* 7 (Risk control)).

...

2.4.6 G (3) The *FSA* would expect the level of detail in a *firm's* business plan or strategy plan in (2) to be appropriate to the complexity of the *firm's* proposed *regulated activities* and *unregulated activities* and the risks of regulatory concern it is likely to face (see *SYSC* 3.2.11 G (Management information) and *SYSC* 7 (Risk control)). Notes on the contents of a business plan are given in the business plan section of the application pack for *Part IV permission*. A *firm* requiring specific *guidance* on the contents and level of detail of its business plan should contact the Corporate Authorisation department (see *AUTH* 3: Applications for *Part IV permission*), or, if relevant, its usual supervisory contact at the *FSA*, or seek professional assistance.

...

2.5.6 G In determining whether a *firm* will satisfy, and continue to satisfy, threshold condition 5 in respect of conducting its business with integrity and in compliance with proper standards, the relevant matters, as referred to in *COND* 2.5.4 G (2), may include but are not limited to whether:

...

- (6) the *firm* has taken reasonable care to establish and maintain effective systems and controls for compliance with applicable requirements

and standards under the regulatory system that apply to the *firm* and the *regulated activities* for which it has, or will have, permission (see SYSC 3.2.6 R to SYSC 3.2.8 R (Compliance) and SYSC 6.1.1 to SYSC 6.1.5);

...

2.5.7 G In determining whether a *firm* will satisfy and continue to satisfy threshold condition 5 in respect of having competent and prudent management and exercising due skill, care and diligence, relevant matters, as referred to in COND 2.5.4 G (2), may include, but are not limited to whether:

...

(3) the *governing body* of the *firm* is organised in a way that enables it to address and control the *regulated activities* of the *firm*, including those carried on by *managers* to whom particular functions have been delegated (see SYSC 2.1 (Apportionment of responsibilities) and SYSC 3.2 (Areas covered by systems and controls) and SYSC 4.1.1 (General organisational requirements));

...

(5) the *firm* has made arrangements to put in place an adequate system of internal control to comply with the requirements and standards under the *regulatory system* (see SYSC 3.1 (Systems and Controls) and SYSC 4.1 (General organisational requirements));

(6) the *firm* has approached the control of financial and other risk in a prudent manner (for example, by not assuming risks without taking due account of the possible consequences) and has taken reasonable care to ensure that robust information and reporting systems have been developed, tested and properly installed (see SYSC 3.2.10G (Risk assessment) and SYSC 7.1 (Risk control));

...

(8) the *firm* has developed human resources policies and procedures that are reasonably designed to ensure that it employs only individuals who are honest and committed to high standards of integrity in the conduct of their activities (see, for example, SYSC 3.2.13G (Employees and agents) and SYSC 5.1 (Employees, agents and other relevant persons));

...

(10) the *firm* has in place systems and controls against *money laundering* of the sort described in SYSC 3.2.6 R to SYSC 3.2.6J G and SYSC 6.3 (Financial crime);

Annex I

Conduct of Business sourcebook (COB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

2.4.1A R This section does not apply to a *common platform firm* if SYSC 10.2 (Chinese walls) applies to the *firm*.

...

5.10.1A R This section does not apply to a *common platform firm* if SYSC 10.1 (conflicts of interest) applies to the *firm*.

....

Application

- 7.1.1 R
- (1) This section applies to a *firm* when it is conducting *designated investment business* with or for a *customer*.
 - (2) COB 7.1.4 E (1) do not apply in relation to *investment research* (see COB 7.3 (Dealing ahead of investment research)).
 - (3) This section does not apply to a *common platform firm* if SYSC 10.1 (conflicts of interest) applies to the *firm*.

Annex J

Insurance: Conduct of Business sourcebook (ICOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

1.2.2 G ...

- (3) *Firms* which outsource *regulated activities* are reminded of the guidance on *outsourcing* in SYSC 3.2.4 G and the rules in SYSC 8.

...

7.4.7A R ICOB 7.4.5R to ICOB 7.4.7G do not apply to a common platform firm if SYSC 10.1 (conflicts of interest) applies to the firm.

...

Summary of Handbook provisions for insurance intermediaries

Annex 2	High level standards	Senior management arrangements, Systems and Controls, SYSC	Applies in respect of (1) and (2), except SYSC 3.2.6A R to SYSC 3.2.6J G1 <u>and SYSC 4-10</u>
---------	----------------------	------------------------------------------------------------	------------------------------------------------------------------------------------------------

...

...

3.3.9 G (1) A *firm* is reminded that *non-investment financial promotions* (including those which are exempt) may be subject to more general *rules* including *Principle 7* (Communications with clients), SYSC 3 (Systems and controls) ICOB 2.2.3 R (Clear, fair and not misleading communication) and ICOB 5 (Product disclosure).

...

Annex K

Mortgages: Conduct of Business sourcebook (MCOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

1.2.1A G *Firms* which outsource *regulated activities* are reminded of the *guidance* on *outsourcing* in SYSC 3.2.4G and SYSC 8.

...

3.2.8 G *Firms* are reminded that *qualifying credit promotions* (including those which are exempt) may be subject to more general *rules*, including *Principle 7* (Communications with clients), SYSC 3 to SYSC 10 (Systems and controls) and MCOB 2.2.6 R (Clear, fair and not misleading communication).

...

4.3.3 G SYSC 3.2.6 R and SYSC 6.1.1R (Compliance) require a *firm* (including a *common platform firm*) to ~~'take reasonable care to establish, implement and maintain effective systems and controls for compliance with applicable requirements and standards under the *regulatory system*'~~. In meeting this requirement in relation to MCOB 4.3.2 R , a *firm* which states that it provides a service based on a limited number of *mortgage lenders* (see MCOB 4.3.1 R (1)(b)) should have adequate systems and controls in place to monitor whether business is actually placed with those *mortgage lenders*.

...

13.3.8 G *Firms* that propose to outsource aspects of *customer* relationships (including debt collection) should note that, as set out in SYSC 3.2.4 G(1) and SYSC 8, the *FSA* will continue to hold them responsible for the way in which this work is carried on.

...

Annex L

Client Assets sourcebook (CASS)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 2.2.20 G A *firm* that holds *safe custody investments* with a *custodian* or *recommends custodians to private customers*, is expected to establish and maintain a system for assessing the appropriateness of its selection of the *custodian* and to assess the continued appointment of that *custodian* periodically as often as is reasonable in the relevant market. In order to comply with SYSC 3.2.20R and SYSC 9 (Records), the *firm* is also expected to make and retain a record of the grounds on which it satisfies itself as to the appropriateness of its selection or, following a periodic assessment, continued appropriateness of the *custodian*.

...

Annex M

Market Conduct sourcebook (MAR)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 3.6.1 G (1) ...
- (2) *MAR* 3.6 also provides additional *guidance* on the record-keeping requirements of *SYSC* 3.2.20R and *SYSC* 9 (Records).

...

- 3.6.6 G If the records identified in *MAR* 3.6.3G are substituted by written or electronic confirmations produced in accordance with *SYSC* 3.2.20 R and *SYSC* 9 (Records), then that confirmation may be an adequate record of the transaction.

...

Annex N

Training and Competence sourcebook (TC)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 1.1.4 G *Principle 3* is amplified in SYSC. A *firm* must take reasonable care to establish and maintain such systems and controls as are appropriate to its business (SYSC 3.1.1R and SYSC 4.1.1R to SYSC 4.1.5R). Also, a *firm's* systems and controls should enable it to satisfy itself of the suitability of anyone who acts for it (SYSC 3.2.13G and SYSC 5.1.2G). This would include the competence of the individual for the role.

Application of the handbook to incoming EEA firms

13A Annex 1	G	(1) Module of Handbook	(2) Potential application to an incoming EEA firm with respect to activities carried on from an establishment of the firm (or its appointed representative) in the United Kingdom	(3) Potential application to an incoming EEA firm with respect to activities carried on other than from an establishment of the firm (or its appointed representative) in the United Kingdom
		...		
		<i>SYSC</i>	<i>SYSC</i> 1 contains application provisions only. <i>SYSC</i> 2 and <i>SYSC</i> 3 apply as set out in <i>SYSC</i> 1.1.1 R (1): (1) <i>SYSC</i> 2.1.1 R (1) and <i>SYSC</i> 2.1.2 G do not apply; (2) ... (3) <i>SYSC</i> 3 applies, but only in so far as responsibility for the matter in question is not reserved by a European Community instrument to the <i>firm's Home State regulator</i> . <i>SYSC</i> 1.1.7 R (Where?) further restricts the territorial application of <i>SYSC</i> 1 to <i>SYSC</i> 3 for an <i>incoming EEA firm</i> . Further <i>guidance</i> is contained in <i>SYSC</i> 2.1.6 G, Question 12. <i>SYSC</i> 4 <i>SYSC</i> 18 applies to the extent that the Public Interest Disclosure Act 1998 applies to the <i>firm</i>

Annex P

Enforcement manual (ENF)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 11.5.2 G However, in some cases, it will not be appropriate to take disciplinary measures against a *firm* for the actions of an *approved person* (for example, if the *firm* can show that it took all reasonable steps to prevent the breach). In other cases, it may be appropriate for the *FSA* to take action against both the *firm* and the *approved person*. For example, a *firm* may have breached the rule requiring it to take reasonable care to establish and maintain such systems and controls as are appropriate to its business *SYSC 3.1.1 R* or *SYSC 4.1.1R*), and an *approved person* may have taken advantage of those deficiencies to front run orders or misappropriate assets.

...

- 11.7.1 G In a number of circumstances the *regulatory system* requires a *firm* to take reasonable care in relation to particular behaviour. For example, *Principle 3* requires a *firm* to take reasonable care to organise and control its affairs responsibly and effectively, with adequate risk management systems, and *SYSC 3.1.1 R* (taken with *SYSC 3.1.2 G*) and *SYSC 4.1.1R* (taken with *4.1.2G*) requires a *firm* to take reasonable care to establish and maintain such systems and controls as are appropriate to the nature, scale and complexity of its business.

...

- 11.9.1 G The *FSA*'s money laundering *rules* are set out in *SYSC 3.2* and *SYSC 6.3 (Financial crime)* The *FSA*, when considering whether to take disciplinary action in respect of a breach of those *rules*, will have regard to whether a *firm* has followed relevant provisions in the Joint Money Laundering Steering Group's Guidance Notes for the Financial Sector.

Annex Q

Credit Unions sourcebook (CRED)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 4.1.3 G SYSC 1 to SYSC 3 apply to all credit unions in respect of the carrying on of their regulated activities and unregulated activities in a prudential context. ~~SYSC 4~~ SYSC 18 applies to all credit unions without restriction.

...

- 4.1.8 G ~~SYSC 4~~ SYSC 18 reminds firms of the provisions of the Public Interest Disclosure Act 1998 and encourages them to consider adopting appropriate internal whistleblowing procedures. This applies equally to *credit unions* but is not the subject of further *guidance* in this chapter.

¹ This definition is based on the definition contained in the CRD (Consequential Amendments) Instrument 2006 which was consulted on in the consultation paper Strengthening Capital Standards 2 (CP 06/3)

durable medium (a) paper; or

(b) ~~(in accordance with article 2(f) of the *Distance Marketing Directive* and article 2(12) of the *Insurance Mediation Directive*)~~ any instrument which enables the recipient to store information addressed personally to him in a way accessible for future reference for a period of time adequate for the purposes of the information and which allows the unchanged reproduction of the information stored; this includes, in particular, floppy disks, CD-ROMs, DVDs and the hard drive of the recipient's computer on which the electronic mail is stored, but not Internet websites unless they fulfill the criteria in this definition.

(in relation to *MiFID business* or *equivalent business of a third country investment firm*, if the relevant rule implements the *MiFID implementing Directive*) the instrument used must be:

- (i) appropriate to the context in which the business is to be carried on; and
- (ii) chosen by the consumer when offered the choice between that instrument and paper.

[Note: article 2(f) and Recital 20 of the *Distance Marketing Directive*, article 2(12) of the *Insurance Mediation Directive* and article 2(2) of the *MiFID implementing Directive*]

eligible counterparty means a market counterparty.

equivalent business of a third country investment firm the business of a *third country investment firm* carried on from an establishment in the *United Kingdom* that would be *MiFID business* if that firm were a *MiFID investment firm*.

financial instrument ...

- (2) (for the purposes of *BIPRU* and *GENPRU*) an instrument listed in Section B of the Annex to the *ISD*; and
- (3) (for the *common platform requirements*) any of the instruments specified in Section C of Annex I of *MiFID*.

group ...

- (5) (in relation to a *common platform firm*) means the group of which that *firm* forms a part, consisting of a parent undertaking, its subsidiaries and the entities in which the parent undertaking or its subsidiaries hold a participation, as well as undertakings linked to each other by a relationship within the meaning of article 12(1) of

Directive 83/349/EEC on consolidated accounts.

[Note: article 2(5) of the *MiFID implementing Directive*]

investment service

- (1) ...
- (2) (for the *common platform requirements*) any of the services and activities listed in Section A of Annex 1 to *MiFID* involving the provision of a service in relation to a *financial instrument*.

investment services and activities; or

any of the services and activities listed in Section A of Annex I to *MiFID* relating to any *financial instrument*.

investment services or activities; or

investment services and/or activities

MiFID

The European Parliament and Council Directive on markets in financial instruments (No. 2004/39/EC).

See also *MiFID Regulation* and *MiFID implementing Directive*.

MiFID business

investment services and activities and, where relevant, *ancillary services* carried on by a *MiFID investment firm*.

MiFID implementing Directive

Commission Directive No. 2006/73/EC implementing Directive 2004/39/EC of the European Parliament and of the Council as regards *organisational requirements and operating conditions* for investment firms and defined terms for the purposes of that Directive.

MiFID investment firm

(in summary) a *firm* to which *MiFID* applies including, for some purposes only, a *credit institution* and *UCITS investment firm*.

(in full) a *firm* which is:

- (1) an *investment firm* with its head office in the *EEA* (or, if it has a registered office, that office);
- (2) a *BCD credit institution* (only when providing an *investment service or activity* in relation to the *rules implementing the articles referred to in article 1(2) of MiFID*);
- (3) a *UCITS investment firm* (only when providing the services referred to in article 5(3) of the *UCITS Directive* in relation to the *rules implementing the articles of MiFID* referred to in article 5(4) of that Directive);

unless, and to the extent that, *MiFID* does not apply to it as a result of article 2 (Exemptions) or article 3 (Optional exemptions) of *MiFID*.

MiFID Regulation

Commission Regulation (EC) 1287/2006 implementing Directive 2004/39/EC of the European Parliament and of the Council as regards organisational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive

outsourcing

- (1) (except in *SYSC* 8) the use of a *person* to provide customised services to a *firm* other than:
- (a) a member of the *firm's* governing body acting in his capacity as such; or
 - (b) an individual employed by a *firm* under a contract of service.
- (2) (in *SYSC* 8) an arrangement of any form between a *firm* and a service provider by which that service provider performs a process, a service or an activity which would otherwise be undertaken by the *firm* itself.

[Note: article 2(6) of the *MiFID implementing Directive*]

professional client

means an *intermediate customer*.

regulatory system

the arrangements for regulating a *firm* or other *person* in or under the *Act*, including the *threshold conditions*, the *Principles* and other *rules*, the *Statements of Principle*, codes and *guidance* and including any relevant directly applicable provisions of a European Regulation such as those contained in the *MiFID Regulation*.

relevant person

- (1) (in *COMP*) a *person* for *claims* against whom the *compensation scheme* provides cover, as defined in *COMP* 6.2.1R.
- (2) any of the following:
- (a) a *director, partner* or equivalent, *manager* or *appointed representative* (or where applicable, *tier agent*) of the *firm*;
 - (b) a *director, partner* or equivalent, or *manager* of any *appointed representative* (or where applicable, *tier agent*) of the *firm*;
 - (c) an *employee* of the *firm* or of an *appointed representative* (or where applicable, *tier agent*) of the *firm*; as well as any other natural person whose

services are placed at the disposal and under the control of the *firm* or a *tiered agent* of the *firm* and who is involved in the provision by the *firm* of *regulated activities*;

- (d) a natural person who is involved in the provision of services to the *firm* or its *appointed representative* (or where applicable, *tiered agent*) under an *outsourcing* arrangement for the purpose of the provision by the *firm* of *regulated activities*.

[Note: article 2(3) of the *MiFID implementing Directive*]

retail client

means a *private customer*.

senior personnel

those *persons* who effectively direct the business of the *firm*, which could include a *firm's governing body* and other *persons* who effectively direct the business of the *firm*.

supervisory function

any function within a *common platform firm* that is responsible for the supervision of its *senior personnel*.

third country investment firm

a *firm* which would be a *MiFID investment firm* if it had its head office in the *EEA*.

tiered agent

a *person* who, under the full and unconditional responsibility of only one *MiFID investment firm* on whose behalf it acts, promotes *investment services* and/or *ancillary services* to *clients* or prospective *clients*, receives and transmits instructions or orders from the *client* in respect of *investment services* or *financial instruments*, places *financial instruments* and/or provides *investment advice* to *clients* or prospective *clients* in respect of those *financial instruments* or *investment services*.

[Note: article 4(1)(25) of *MiFID*]

**THE GENERAL PRUDENTIAL SOURCEBOOK (TRANSITIONAL PROVISIONS
AND SCHEDULES) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 150(2) (Actions for damages);
 - (3) section 156 (General supplementary powers); and
 - (4) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force as follows:
- (1) The following provisions of the General Prudential Sourcebook (GENPRU) come into force on 31 December 2006:
 - (a) GENPRU TP 1 to GENPRU TP 6 and GENPRU TP 10 to GENPRU TP 13;
 - (b) Schedules 1 to 6 to GENPRU.
 - (2) The remainder of this instrument comes into force on 1 January 2007.

Amendments to the Handbook

- D. The Financial Services Authority creates a new chapter TP (Transitional provisions) and Schedules to GENPRU in accordance with Annex A to this instrument.

Citation

- E. This instrument may be cited as the General Prudential Sourcebook (Transitional Provisions and Schedules) Instrument 2006.

By order of the Board
23 November 2006

Annex A

Chapter TP of GENPRU and GENPRU Schedules

In this Annex all the text is new and is not underlined.

TP Transitional provisions

1 Application of GENPRU TP 1 to GENPRU TP 6 and other general provisions for insurers

Application of GENPRU TP 1 to GENPRU TP 6

1.1 R *GENPRU* TP 1 - *GENPRU* TP 6 apply to an *insurer*.

1.2 G *GENPRU* TP 1 - *GENPRU* TP 6 apply to an *insurer* to whom the relevant *GENPRU rule* listed in *GENPRU* TP Table 3R, *GENPRU* TP 4.3R, *GENPRU* TP 5.2R or *GENPRU* TP 6.2R applies. An *insurer* to whom *GENPRU* does not apply is not subject to *GENPRU* TP.

Version of IPRU to be used

1.3 R Any reference in *GENPRU* TP 1 - *GENPRU* TP 6 to *IPRU (INS)* or to *IPRU (FSOC)* is to the version in force on 30 December 2004.

2 IPRU(INS) waivers

Duration of transitional

2.1 R *GENPRU* TP 2 applies until the relevant *GENPRU* rule is revoked.

Continuing effect of waivers

2.2 R A rule in *GENPRU* listed in the Table at *GENPRU* TP 3 is disapplied, or is modified in its application, to a firm:

- (1) in order to produce the same effect, including any conditions, as a waiver had on the corresponding rule in *IPRU (INS)*;
- (2) for the same period as the waiver would have lasted, if shorter than the period in *GENPRU* TP 2.1R;

provided the conditions set out in *GENPRU* TP 2.3R are satisfied.

2.3 R The conditions referred to in *GENPRU* TP 2.2R are:

- (1) the rule is shown in the Table at *GENPRU* TP 3 as corresponding with the rule in *IPRU (INS)* in relation to which the waiver was granted to the firm;
- (2) the waiver was current as respects the firm immediately before 31 December 2004; and
- (3) there is no specific transitional rule relating to the waiver.

2.4 R *GENPRU* TP 2.2R does not have effect if, and to the extent that, it would be inconsistent with any community obligation of the *United Kingdom*.

2.5 R A firm which has the benefit of a waiver to which *GENPRU* TP 2.2R applies must:

- (1) notify the *FSA* immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the waiver;
- (2) maintain a written record of the rule in *GENPRU* to which it considers the waiver applies; and
- (3) make the record available to the *FSA* on request.

3 Table: IPRU(INS) waivers

3.1 R This table belongs to *GENPRU* TP 2.

Rules in GENPRU	Corresponding rules in IPRU (INS)
1.3.47R	4.2 (3)
2.1.13R	2.9 (3)
2.1.24R	2.9
2.1.25R	2.9
2.1.34R	2.4 (6)
2.2.107R	2.10 (7)
2.2.251R	4.14
	4.5 (7)

4 Capital instruments

Duration

- 4.1 R *GENPRU* TP 4 applies until the relevant *rule* is revoked

Application

- 4.2 R Subject to *GENPRU* TP 4.4R, *GENPRU* TP 4 applies to a *firm* which immediately before 31 December 2004 had the benefit of a *waiver* in relation to *IPRU (INS)* rule 2.10 or 5.2, or a written concession in relation to a pre-commencement provision listed in *GENPRU* TP 4.7R, in either case allowing the *firm* to exclude from the calculation of its liabilities obligations under a particular capital instrument issued by the *firm*.

Waivers

- 4.3 R Subject to *GENPRU* TP 4.4R and to compliance with the conditions set out in *GENPRU* TP 4.6R, a *firm* will be treated as complying with *GENPRU* 2.2.271R(3), *GENPRU* 2.2.177R(2), *GENPRU* 2.2.177R(3), *GENPRU* 2.2.180R and *GENPRU* 2.2.181R, in relation to the capital instrument to which the *waiver* or written concession referred to in *GENPRU* TP 4.2R related, so long as the *firm* is not obliged to pay any interest under the terms of the capital instrument in circumstances where the *firm* does not have *capital resources* equal to or in excess of its required margin of solvency under the *Insurance Directives*.
- 4.4 R *GENPRU* TP 4.3R ceases to apply to a *firm*:
- (1) once the *firm* has redeemed the capital instrument; or
 - (2) on or after any date upon which the *firm* has the option to redeem the capital instrument and may prudently do so.
- 4.5 R Subject to compliance with the conditions set out in *GENPRU* TP 4.6R, a *firm* will be treated as complying with *GENPRU* 2.2.159R(6), *GENPRU* 2.2.159R(10), *GENPRU* 2.2.159R(12), and *GENPRU* 2.2.163R in relation to the capital instrument to which the *waiver* or written concession referred to in *GENPRU* TP 4.2R related.
- 4.6 R The conditions referred to in *GENPRU* TP 4.3R and *GENPRU* TP 4.5R are:
- (1) the *firm* must notify the *FSA* immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the *waiver* or written concession;
 - (2) the *firm* must maintain a written record of the *rule* in *GENPRU* to which it considers the *waiver* or written concession applies; and
 - (3) the *firm* must make the record available to the *FSA* on request.

- 4.7 R The pre-*commencement* provisions referred to in *GENPRU* TP 4.2R are those contained in:
- (1) the Insurance Companies Act 1982 and relevant secondary legislation; and
 - (2) the Friendly Societies Act 1992 and relevant secondary legislation.

5 Calls for supplementary contributions

Duration

5.1 R *GENPRU* TP 5 applies until the relevant *rule* is revoked

Application

5.2 R *GENPRU* TP 5 applies to a *firm* which immediately before 31 December 2004 had the benefit of a *waiver* in relation to *IPRU (INS)* rule 2.10 (4).

Waivers

5.3 R For the period specified in *GENPRU* TP 5.1R or the same period as the *waiver* would have lasted if shorter, subject to *GENPRU* TP 5.4R and to compliance with the conditions set out in *GENPRU* TP 5.5R, for the purposes of calculating its *capital resources* a *firm* may include the value of claims against its members by way of calls for supplementary contributions as *core tier one capital* to the same extent as it was permitted by the *waiver* to include the value of those claims in the calculation of its margin of solvency.

5.4 R *GENPRU* TP 5.3R does not apply for the purposes of *GENPRU* 2.2.34R (Guarantee fund) or *SUP* Appendix 2.4 (Capital resources below guarantee fund).

5.5 R The conditions referred to in *GENPRU* TP 5.3R are:

- (1) the limits specified in the *waiver* on the extent to which the *firm's* claim against its members by way of call for supplementary contributions may be brought into account apply as if the reference (if any) in the *waiver* to the *firm's* required margin of solvency referred to its *general insurance capital requirement* and the reference (if any) in the *waiver* to the *firm's* margin of solvency referred to its *capital resources*; and
- (2) the *firm* must comply with any further conditions imposed by the *waiver*.

6 Implicit items waivers

Duration

6.1 R *GENPRU* TP 6 applies until the relevant *rule* is revoked

Application

6.2 R *GENPRU* TP 6 applies to a *firm* which immediately before 31 December 2004 had the benefit of a *waiver* in relation to *IPRU (INS)* rule 2.10 (5) or *IPRU (FSOC)* rule 4.7 (3).

Waivers

6.3 R For the period specified in *GENPRU* TP 6.1R or the same period as the *waiver* would have lasted if shorter, subject to *GENPRU* TP 6.4R and to compliance with the conditions set out in *GENPRU* TP 6.5R, for the purpose of calculating its *capital resources* a *firm* may include the value of *implicit items* at Stage B of the *capital resources table* applicable to the *firm* to the same extent to which it was permitted by the *waiver* to include the value of those *implicit items* in the calculation of its margin of solvency.

6.4 R *GENPRU* TP 6.3R does not apply for the purposes of *GENPRU* 2.2.41R (Limits on forms of capital apply separately to long-term insurance business and general insurance business).

6.5 R The conditions referred to in *GENPRU* TP 6.3R are:

- (1) the limits specified in the *waiver* on the extent to which the value of *implicit items* may be brought into account apply as if the reference (if any) in the *waiver* to the *firm's* required margin of solvency referred to its *minimum capital requirement* and the reference (if any) in the *waiver* to the *firm's* margin of solvency referred to its *capital resources*; and
- (2) the *firm* must comply with any further conditions imposed by the *waiver*.

- 7 Pillar 3 capital resources
- Application
- 7.1 R This section applies to a *BIPRU firm*.
- Purpose
- 7.2 G This section implements Article 154(4) of the *Banking Consolidation Directive*.
- Duration
- 7.3 R This section applies until 31 December 2012.
- Transitional provision
- 7.4 R A *firm* may elect not to apply *GENPRU 2.2.239R(2) to (4)* (50:50 split between deductions from *tier one capital* and *tier two capital*) to *material insurance holdings* acquired before 1 January 2007.

8 Miscellaneous capital resources definitions for BIPRU firms

Application

8.1 R This section applies to a *BIPRU firm*.

8.2 R Any provision of this section that applies on a consolidated basis under *GENPRU* TP 8.3R applies to any *firm* to which *BIPRU* 8 (Group risk – consolidation) applies.

Consolidation

8.3 R A provision of this section applies on a consolidated basis for the purpose of *BIPRU* 8 (Group risk – consolidation) to the extent that, and in the same way that, the provision in *BIPRU* to which it relates applies on a consolidated basis.

Specific issues of TONS and other securities

8.4 R A *bank* may treat a *security* forming part of an issue of *securities* listed in *GENPRU* TP 8.5R as eligible for inclusion within stage B of the *capital resources table* (Perpetual non-cumulative preference shares) if it would not otherwise be eligible if:

- (1) on 31 December 2006 the *bank* was subject to *IPRU(BANK)*;
- (2) the *bank* issued it on or before 31 December 2006; and
- (3) as at 31 December 2006 the *bank* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* as permanent share capital and tier one capital as referred to in chapter CA of *IPRU(BANK)*.

8.5 R The issues of *securities* referred to in *GENPRU* TP 8.4R are as follows:

- (1) Barclays £400mn 6% perpetual TONs;
- (2) Abbey National £175m 6.984% perpetual TOPIC;
- (3) Northern Rock £200m 7.053% perpetual TONs;
- (4) Barclays \$1bn 6.86% perpetual TONs;
- (5) Lloyds TSB \$850m 6.90% perpetual capital securities; and
- (6) Abbey National \$500m 7.375% T1MBS.

PIBS

8.6 R A *building society* may treat a *PIBS* as eligible for inclusion within stage B of the *capital resources table* (Perpetual non-cumulative preference shares) if it would not otherwise be eligible if:

- (1) on 31 December 2006 the *firm* was subject to *IPRU(BSOC)*;
- (2) the *building society* issued it before 18 November 2004; and
- (3) as at 31 December 2006 the *building society* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BSOC)* as tier one capital as referred to in Annex 1A of chapter 1 of volume 1 of *IPRU(BSOC)*.

Preference shares

8.7 R A *bank* or *BIPRU investment firm* may treat a *preference share* as eligible for inclusion within stage B of the *capital resources table* (Perpetual non-cumulative preference shares) if it would not otherwise be eligible if:

- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)* or *IPRU(INV)*;
- (2) the *firm* issued it on or before 31 December 2006;
- (3) as at 31 December 2006 the *firm* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* or *IPRU(INV)* as capital of a type that corresponded to *tier one capital resources*;
- (4) it would have been eligible for inclusion within stage B of the *capital resources table* except for the fact that it does not meet *GENPRU 2.2.64R(4)(b)* (Restrictions on mandatory *coupons* for *tier one capital*) or *GENPRU 2.2.109R(1)* (Restrictions on mandatory *coupons* for perpetual non-cumulative *preference shares*) or both of those *rules*;
- (5) the only reason that it does not meet *GENPRU 2.2.64R(4)(b)* or *GENPRU 2.2.109R(1)* is because a mandatory cash *coupon* is payable;
- (6) the *firm* has the right not to pay the cash *coupon* if it is in breach of any of the *main BIPRU firm Pillar 1 rules* or to the extent that paying such *coupon* would result in a breach of any of those *rules*; and
- (7) any amount not paid under (6) does not accumulate.

Innovative tier one capital

- 8.8 R A *bank* may treat an item of a *capital instrument* as eligible for inclusion within stage C of the *capital resources table* (Innovative tier one capital) if it would not otherwise be eligible if:
- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*;
 - (2) the *bank* issued it on or before 31 December 2006;
 - (3) as at 31 December 2006 the *bank* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* as innovative tier one capital as referred to in chapter CA of *IPRU(BANK)*;
 - (4) it would have been eligible for inclusion within stage C of the *capital resources table* except for the fact that it does not meet *GENPRU 2.2.64R(4)(b)* (Restrictions on mandatory *coupons* for *tier one capital*);
 - (5) the only reason that it does not meet *GENPRU 2.2.64R(4)(b)* is because a mandatory cash *coupon* is payable;
 - (6) the *bank* has the right not to pay the cash *coupon* if it is in breach of any of the *main BIPRU firm Pillar 1 rules* or to the extent that paying such *coupon* would result in a breach of any of those *rules*; and
 - (7) any amount not paid under (6) does not accumulate.

Upper tier 2 instruments: Deferral of interest

- 8.9 R A *bank* or *BIPRU investment firm* may treat a *capital instrument* as eligible for inclusion within stage G of the *capital resources table* (Upper tier two capital) if it would not otherwise be eligible if:
- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)* or *IPRU(INV)*;
 - (2) the *firm* issued it on or before 31 December 2006;
 - (3) as at 31 December 2006 the *firm* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* or *IPRU(INV)* as capital of a type that corresponded to *upper tier two capital resources*;
 - (4) it would have been eligible for inclusion within stage G of the *capital resources table* except for the fact that it does not meet *GENPRU 2.2.177R(2)*;
 - (5) the only reason that it does not meet *GENPRU 2.2.177R(2)* is because a mandatory cash *coupon* is payable;

(6) the *firm* has the right not to pay the cash *coupon* if it is in breach of any of the *main BIPRU firm Pillar 1 rules* or to the extent that paying such *coupon* would result in a breach of any of those *rules*; and

(7) any amount not paid under (6) does not accumulate.

Lower tier 2 instruments: Additional events of default for building societies

8.10 R A *building society* may treat a *capital instrument* as eligible for inclusion within stage H of the *capital resources table* (Lower tier two capital) if it would not otherwise be eligible if:

(1) on 31 December 2006 the *building society* was subject to *IPRU(BSOC)*;

(2) the *building society* issued it on or before 31 December 2006;

(3) as at 31 December 2006 the *building society* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BSOC)* as Term Subordinated Debt falling within its Tier Two Capital (as referred to in Annex 1A of Chapter 1 and Chapter 2 of *IPRU(BSOC)*);

(4) it would have been eligible for inclusion within stage H of the *capital resources table* except for the fact that it does not meet *GENPRU 2.2.159R(2)* (Events of default); and

(5) the only reason that it does not meet *GENPRU 2.2.159R(2)* is because it contains an event of default permitted by paragraph 2.8.10G(3) of Volume 1 of *IPRU(BSOC)* (cancellation of a society's registration under the Building Societies Act 1986 otherwise than under section 103(1)(a) of that Act).

Conversion ratio

8.11 R *GENPRU 2.2.138R(2)* (Tier one capital: Conversion ratio) does not apply to a *capital instrument* issued by a *firm* if:

(1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;

(2) the *firm* issued it on or before 31 December 2006; and

(3) as at 31 December 2006 the *firm* included it, and was entitled to include it, in the calculation of its capital resources under:

(a) (in the case of a *bank*) *IPRU(BANK)* as innovative tier one capital as referred to in chapter CA of *IPRU(BANK)*; or

- (b) (in the case of any other type of *firm*) *IPRU(BSOC)* or *IPRU(INV)* as capital of a type that corresponded to *tier one capital*.

Legal opinions

8.12 R *GENPRU 2.2.118R* (Legal opinions for *innovative tier one capital*) does not apply to a *capital instrument* issued by a *firm* if:

- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;
- (2) the *firm* issued the *capital instrument* on or before 31 December 2006;
- (3) (in the case of a *bank*) as at 31 December 2006 the *bank* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* as innovative tier one capital as referred to in chapter CA of *IPRU(BANK)*; and
- (4) (in any other case) the *firm* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BSOC)* or *IPRU(INV)* as capital of a type that corresponded to *tier one capital*.

8.13 R The following *rules*:

- (1) *GENPRU 2.2.159R(12)* (Legal opinions for *tier two capital*);
- (2) *GENPRU 2.2.163R* (Legal opinions for *tier two capital* governed by a foreign law);
- (3) *GENPRU 2.2.181R* (Legal opinions for *upper tier two capital*); and
- (4) *GENPRU 2.2.244R* (Application of certain *rules* about *tier two capital* to *tier three capital*) so far as it applies the *rules* in (1) to (3);

do not apply to a *capital instrument* issued by a *firm* if:

- (5) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;
- (6) the *firm* issued the *capital instrument* on or before 31 December 2006; and
- (7) as at 31 December 2006 the *firm* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)* as capital of the type that corresponds to:

- (a) (where the *firm* disapplies the *rule* in (1) or (2)) *tier two capital*; or
- (b) (where the *firm* disapplies the *rule* in (3)) *upper tier two capital*; or
- (c) (where the *firm* disapplies the *rule* in (4)) *tier three capital*.

Version of IPRU

- 8.14 R Any reference in this section to a type of capital in *IPRU* is to a type of capital in *IPRU* in the form *IPRU* was in on 31 December 2006.

Eligibility

- 8.15 G If this section says that an item of capital is eligible for inclusion within a particular stage of the *capital resources table* this is still subject to the application of the *capital resources gearing rules*.

Waivers and concessions

- 8.16 G A reference to a *firm* being entitled to include *capital instruments* in the calculation of its capital resources under *IPRU* at a particular level includes the *firm* being able to do this under a *waiver* or, in the case of *IPRU(BANK)* or *IPRU(BSOC)*, a written approval by the *FSA*.

Combinations of provisions

- 8.17 G A *firm* may combine the use of two or more of the provisions in this section.

9 Individual capital guidance for BIPRU firms

Application

9.1 G This section applies to a *BIPRU firm* that is a *bank* or *building society* for which the *FSA* has given:

(1) (in the case of a *building society*) a threshold ratio under *IPRU(BSOC)*; or

(2) (in the case of a *bank*) an individual capital ratio under *IPRU(BANK)*;

that was in effect on 31 December 2006 but to which the *FSA* has not yet given *individual capital guidance*.

Duration

9.2 G This section applies to a *firm* until it receives *individual capital guidance*.

9.3 G *GENPRU TP 9.4G - GENPRU TP 9.6G* only apply until 31 December 2007. Thereafter (if they do not already apply) *GENPRU TP 9.7G - GENPRU TP 9.10G* apply.

Pre 2007 capital requirements

9.4 G *GENPRU TP 9.5G - GENPRU TP 9.6G* apply if, and for as long as, a *firm* applies the treatment in *BIPRU TP 3.4R* (Pre CRD capital requirements applying on a solo basis during 2007) to all its *exposures*.

9.5 G If *GENPRU TP 9.4G* applies, any threshold ratio or individual capital ratio remains in force. However compliance with such ratios should be measured by reference to *capital resources*.

9.6 G Where necessary, a *firm* should apply the adjustment set out in section 4.1.3 of chapter CO of *IPRU(BANK)* (CAD banks) as it stood on 31 December 2006 to its *trading book* capital requirements.

BIPRU capital requirements

9.7 G *GENPRU TP 9.8G - GENPRU TP 9.10G* apply to a *firm* if *GENPRU TP 9.5G - GENPRU TP 9.6G* do not apply.

9.8 G Any threshold ratio or individual capital ratio remains in force adjusted as follows:

(1) the *firm* should work out the percentage of its *capital resources requirement* as at the date in *GENPRU TP 9.10G* represented by the absolute amount in *GENPRU TP 9.9G*; and

- (2) the *firm* should hold *capital resources* of an amount at least equal to the percentage specified in (1) of its *capital resources requirement* from time to time.
- 9.9 G The absolute amount referred to in *GENPRU* TP 9.8G is:
- (1) (if *GENPRU* TP 9.7G - *GENPRU* TP 9.10G apply to the *firm* on 1 January 2007) the amount of capital resources it had to hold under *IPRU* on 31 December 2006 in order to meet the ratio referred to in *GENPRU* TP 9.1G; and
- (2) (in any other case) the amount of *capital resources* it had to hold immediately prior to the date in *GENPRU* TP 9.10G in order to meet the ratio referred to in *GENPRU* TP 9.1G.
