

MONEY LAUNDERING PROVISIONS INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 ("the Act"):
- (1) section 64(1) and 64(2) (Conduct: statements and codes);
 - (2) section 138 (General rule-making power);
 - (3) section 146 (Money laundering rules);
 - (4) section 149 (Evidential provisions);
 - (5) section 150(2) (Actions for damages);
 - (6) section 156 (General supplementary powers); and
 - (7) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. Annex A, Part 2 of Annex D and Annex K to this instrument come into force on 31 August 2006. Otherwise, this instrument comes into force on 1 March 2006.

Revocation of the Money Laundering sourcebook

- D. The Money Laundering sourcebook (ML) is revoked in its entirety with effect from 31 August 2006.

Amendments to the Handbook

- E. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended or deleted in accordance with the Annexes listed in column (2).

(1)	(2)
Glossary of definitions	Annex A

Professional Firms sourcebook (PROF)	Annex R

Citation

- F. This instrument may be cited as the Money Laundering Provisions Instrument 2006.

By order of the Board
26 January 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

<i>client</i>	<p>(1) (except in <i>ML</i>; in <i>PROF</i>; in relation to a <i>regulated mortgage contract</i>) any <i>person</i> with or for whom a <i>firm</i> conducts or intends to conduct <i>designated investment business</i> or any other <i>regulated activity</i>); and</p> <p>(a) ...</p> <p>...</p> <p>(2) (in <i>ML</i>) (in relation to a <i>relevant firm</i>) any <i>person</i> engaged in, or who has had contact with the <i>relevant firm</i> with a view to engaging in, any <i>transaction</i> with that <i>relevant firm</i>:</p> <p>(a) on his own behalf; or</p> <p>(b) as agent for or on behalf of another. <u>[deleted]</u></p> <p>(3) ...</p> <p>(4) (in relation to a <i>regulated mortgage contract</i>, except in <i>ML</i> and <i>PROF</i>) the individual or trustee who is the borrower or potential borrower under that contract.</p>		
<i>group</i>	<p>(1) ...</p> <p>(2) (in relation to an <i>ICVC</i>) a group as in (1) but (in <i>ML</i> and <i>SYSC</i>) including also the <i>ICVC's authorised corporate director</i> (if any).</p> <p>...</p> <p>(3) ...</p>		
<i>identification evidence</i>	Evidence of the type referred to in <i>ML</i> 3.1.3R(1).		
<i>insolvent</i>	(in <i>ML</i>) insolvent under regulation 13 of the <i>Money Laundering Regulations</i> .		
<i>know your business information</i>	(in <i>ML</i>) information which a <i>relevant firm</i> has about:	(a) the financial circumstances of a <i>client</i> or any <i>person</i> on whose behalf the <i>client</i> has been acting or is acting; and	(b) the features of the <i>transactions</i> which the <i>relevant firm</i> has entered into with or for the <i>client</i> (or that <i>person</i>).
<i>ML</i>	the Money Laundering sourcebook.		

<i>Money Laundering Regulations</i>	the Money Laundering Regulations 2003 (SI 2003/3075) (see <i>ML</i>).
<i>money laundering reporting officer</i>	the individual appointed by a <i>relevant firm</i> in accordance with <i>ML</i> 7.1 <u><i>SYSC 3.2.6IR</i></u> .
<i>relevant firm</i>	(in <i>ML</i>) a <i>firm</i> of the kind described in <i>ML</i> 1.1.2R.
<i>relevant regulated activities</i>	(in <i>ML</i>) activities of the kind described in <i>ML</i> 1.1.4R.
<i>transaction</i>	(in <i>ML</i>) any transaction, including the giving of advice and any other business or service undertaken in the course of carrying on a <i>regulated activity</i> .

Annex B

Amendments to Senior Management Arrangements, Systems and Controls

In this Annex, underlining indicates new text and striking through indicates deleted text.

Who?

1.1.1 R SYSC 2 and SYSC 3 apply to every *firm* except that:

...

(2A) for an incoming Treaty firm which has permission only for cross border services and which does not carry on regulated activities in the United Kingdom, SYSC 3.2.6AR to SYSC 3.2.6JG do not apply;

(3) ~~SYSC 2 does not apply to a sole trader as long as he does not employ any person who is required to be approved under section 59 of the Act (Approval for particular arrangements); and~~

for a sole trader:

(a) SYSC 2 does not apply as long as he does not employ any person who is required to be approved under section 59 of the Act (Approval for particular arrangements);

(b) SYSC 3.2.6IR does not apply if he has no employees;

(4) for a UCITS qualifier:

(a) SYSC 2.1.1R and SYSC 2.1.2G do not apply;

(b) SYSC 2.1.3R to SYSC 2.2.3G apply, but only in relation to allocation of the function in SYSC 2.1.3R(2) and only with respect to the activities in SYSC 1.1.4R;

(c) SYSC 3 applies, but only with respect to the activities in SYSC 1.1.4R; and

(5) for an authorised professional firm when carrying on non-mainstream regulated activities, SYSC 3.2.6AR to SYSC 3.2.6JG do not apply.

...

What?

1.1.3 R SYSC 2 and SYSC 3 apply with respect to the carrying on of:

- (1) *regulated activities*;
- (2) activities that constitute *dealing in investments as principal*, disregarding the exclusion in article 15 of the *Regulated Activities Order* (Absence of holding out etc); and
- (3) *ancillary activities* in relation to *designated investment business, regulated mortgage activity and insurance mediation activity*;

except that SYSC 3.2.6AR to SYSC 3.2.6JG do not apply as described in SYSC 1.1.3AR.

1.1.3A R SYSC 3.2.6AR to SYSC 3.2.6JG do not apply:

- (1) with respect to the activities described in SYSC 1.1.3R(2) and (3); or
- (2) in relation to the following regulated activities:
 - (a) general insurance business;
 - (b) insurance mediation activity in relation to a general insurance contract or pure protection contract;
 - (c) long-term insurance business which is outside the Consolidated Life Directive (unless it is otherwise one of the regulated activities specified in this rule);
 - (d) business relating to contracts which are within the Regulated Activities Order only because they fall within paragraph (e) of the definition of “contract of insurance” in article 3 of that Order;
 - (e) (i) arranging, by the Society of Lloyd’s, of deals in general insurance contracts written at Lloyd’s; and
(ii) managing the underwriting capacity of a Lloyd’s syndicate as a managing agent at Lloyd’s; and
 - (f) mortgage mediation activity and administering a regulated mortgage contract.

1.1.4 R SYSC 2 and SYSC 3, except SYSC 3.2.6AR to SYSC 3.2.6JG, also apply with respect to the *communication and approval of financial promotions* which:

...

1.1.5 R SYSC 2 and SYSC 3, except SYSC 3.2.6AR to SYSC 3.2.6JG, also:

- (1) apply with respect to the carrying on of *unregulated activities* in a *prudential context*; and

- (2) take into account any activity of other members of a *group* of which the *firm* is a member.

...

Where?

...

- 1.1.9 R *SYSC 2 and SYSC 3, except SYSC 3.2.6AR to SYSC 3.2.6JG, also apply in a prudential context to a UK domestic firm with respect to activities wherever they are carried on.*
- 1.1.10 R *SYSC 3, except SYSC 3.2.6AR to SYSC 3.2.6JG, also applies in a prudential context to an overseas firm (other than an incoming EEA firm, incoming Treaty firm or UCITS qualifier) with respect to activities wherever they are carried on.*

...

Systems and controls in relation to €compliance, financial crime and money laundering

- 3.2.6 R *A firm must take reasonable care to establish and maintain effective systems and controls for compliance with applicable requirements and standards under the regulatory system and for countering the risk that the firm might be used to further financial crime.*
- 3.2.6A R *A firm must ensure that these systems and controls:*
- (1) *enable it to identify, assess, monitor and manage money laundering risk; and*
- (2) *are comprehensive and proportionate to the nature, scale and complexity of its activities.*
- 3.2.6B G *“Money laundering risk” is the risk that a firm may be used to further money laundering. Failure by a firm to manage this risk effectively will increase the risk to society of crime and terrorism.*
- 3.2.6C R *A firm must carry out regular assessments of the adequacy of these systems and controls to ensure that it continues to comply with SYSC 3.2.6AR.*
- 3.2.6D G *A firm may also have separate obligations to comply with relevant legal requirements, including the Terrorism Act 2000, the Proceeds of Crime Act 2002 and the Money Laundering Regulations. SYSC 3.2.6R to SYSC 3.2.6JG are not relevant for the purposes of regulation 3(3) of the Money Laundering Regulations, section 330(8) of the Proceeds of Crime Act 2002 or section 21A(6) of the*

Terrorism Act 2000.

- 3.2.6E G The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *firm* has followed relevant provisions in the guidance for the UK financial sector issued by the Joint Money Laundering Steering Group.
- 3.2.6F G In identifying its *money laundering* risk and in establishing the nature of these systems and controls, a *firm* should consider a range of factors, including:
- (1) its customer, product and activity profiles;
 - (2) its distribution channels;
 - (3) the complexity and volume of its transactions;
 - (4) its processes and systems; and
 - (5) its operating environment.
- 3.2.6G G A *firm* should ensure that the systems and controls include:
- (1) appropriate training for its employees in relation to *money laundering*;
 - (2) appropriate provision of information to its *governing body* and senior management, including a report at least annually by that *firm's money laundering reporting officer (MLRO)* on the operation and effectiveness of those systems and controls;
 - (3) appropriate documentation of its risk management policies and risk profile in relation to *money laundering*, including documentation of its application of those policies (see SYSC 3.2.20R to SYSC 3.2.22G);
 - (4) appropriate measures to ensure that *money laundering* risk is taken into account in its day-to-day operation, including in relation to:
 - (a) the development of new products;
 - (b) the taking-on of new customers; and
 - (c) changes in its business profile; and
 - (5) appropriate measures to ensure that procedures for identification of new customers do not unreasonably deny access to its services to potential customers who cannot reasonably be expected to produce detailed evidence of identity.

3.2.6H R A firm must allocate to a director or senior manager (who may also be the money laundering reporting officer) overall responsibility within the firm for the establishment and maintenance of effective anti-money laundering systems and controls.

The money laundering reporting officer

3.2.6I R A firm must:

- (1) appoint an individual as MLRO, with responsibility for oversight of its compliance with the FSA's rules on systems and controls against money laundering; and
- (2) ensure that its MLRO has a level of authority and independence within the firm and access to resources and information sufficient to enable him to carry out that responsibility.

3.2.6J G The job of the MLRO within a firm is to act as the focal point for all activity within the firm relating to anti-money laundering. The FSA expects that a firm's MLRO will be based in the United Kingdom.

The compliance function

- 3.2.7 G (1) Depending on the nature, scale and complexity of its business, it may be appropriate for a firm to have a separate compliance function. The organisation and responsibilities of a compliance function should be documented. A compliance function should be staffed by an appropriate number of competent staff who are sufficiently independent to perform their duties objectively. It should be adequately resourced and should have unrestricted access to the firm's relevant records as well as ultimate recourse to its governing body.
- (2) ~~The regulatory objectives are defined in section 2 of the Act and include the reduction of financial crime. This objective is more fully described in section 6 of the Act. This describes financial crime as including any offence involving (a) fraud or dishonesty, (b) misconduct in, or misuse of information relating to, a financial market, or (c) handling the proceeds of crime.~~[deleted]
- (3) ~~In applying SYSC 3.2.6R, where financial crime is concerned, firms must also comply with other Handbook requirements (in particular, ML) and their legal obligations under the Money Laundering Regulations and the Proceeds of Crime Act 2002.~~[deleted]

...

SYSC TP 1.1

There are no transitional provisions in SYSC. However, GEN contains some technical transitional provisions that apply throughout the Handbook and which are designed to ensure a smooth transition at commencement.

Money Laundering Transitional Provisions

Extra time provisions

Compliance with ML and SYSC 3.2.6AR to SYSC 3.2.6JG

<u>(1)</u>	<u>(2)</u> <u>Material to which the transitional provision applies</u>	<u>(3)</u>	<u>(4)</u> <u>Transitional provision</u>	<u>(5)</u> <u>Transitional provision: dates in force</u>	<u>(6)</u> <u>Handbook provision: coming into force</u>
<u>(1)</u>	<u>SYSC 3.2.6AR to SYSC 3.2.6JG</u>	<u>R</u>	<u>Compliance with ML also counts as compliance with SYSC 3.2.6AR to SYSC 3.2.6JG and vice versa.</u>	<u>From 1 March 2006 to 31 August 2006</u>	<u>(1) 1 March 2006</u>
<u>(2)</u>	<u>ML</u>				<u>(2) In force until 31 August 2006</u>

Annex C

Amendments to Threshold Conditions

In this Annex, underlining indicates new text and striking through indicates deleted text.

2.5.7 G ...

...

- (10) the *firm* has in place ~~the appropriate money laundering prevention systems and training, including identification, record keeping and internal reporting procedures (see *ML*)~~ systems and controls against money laundering of the sort described in SYSC 3.2.6R to SYSC 3.2.6JG;

...

...

Annex D

Amendments to Statements of Principle and Code of Practice for Approved Persons

In this Annex, underlining indicates new text and striking through indicates deleted text. The changes detailed in Part 1 to this Annex take effect on 1 March 2006 and those detailed in Part 2 take effect on 31 August 2006.

Part 1

- 4.7.9 E In the case of the *money laundering reporting officer*, failing to discharge the responsibilities imposed on him by the *firm* in accordance with chapter 7 of the *Money Laundering* sourcebook (*ML*) or SYSC 3.2.6IR falls within *APER* 4.7.2E.

...

Part 2

- 4.7.9 E In the case of the *money laundering reporting officer*, failing to discharge the responsibilities imposed on him by the *firm* in accordance with ~~chapter 7 of the *Money Laundering* sourcebook (*ML*) or SYSC 3.2.6IR~~ falls within *APER* 4.7.2E.

...

Annex E

Amendments to the Interim Prudential sourcebook for Banks

In this Annex, underlining indicates new text and striking through indicates deleted text.

Volume 2

Adequate records, systems and controls

AR Section 3: Accounting and other records and internal – ~~control systems~~ systems and controls

- 3.3.7 22 It is a requirement of the Money Laundering Regulations 1993 that authorised banks have policies and procedures in place to guard against their business and the financial system being used for the purpose of money laundering. ~~The Joint Money Laundering Steering Group Guidance Notes ('Money Laundering Guidance Notes for the Financial Sector' revised and consolidated by the Joint Money Laundering Steering Group in June 1997) provide a practical interpretation of the Regulations. The FSA expects banks to adopt policies and procedures in line with those Guidance Notes.~~ The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *firm* has followed relevant provisions in the guidance for the UK financial sector issued by the Joint Money Laundering Steering Group.
- a) ~~See also the sourcebook on money laundering. See Money Laundering Sourcebook SYSC 3.2 for the FSA's *rules* on systems and controls against *money laundering*.~~

Annex F

Amendments to the Interim Prudential sourcebook for Building Societies

In this Annex, underlining indicates new text and striking through indicates deleted text.

Volume 1

Annex 9B: Internal ~~control systems~~ systems and controls

Section 3.3

- 3.3.7 22 It is a requirement of the Money Laundering Regulations 1993 that authorised banks have policies and procedures in place to guard against their business and the financial system being used for the purpose of money laundering. ~~The Joint Money Laundering Steering Group Guidance Notes ('Money Laundering Guidance Notes for the Financial Sector' revised and consolidated by the Joint Money Laundering Steering Group in June 1997) provide a practical interpretation of the Regulations. The FSA expects banks to adopt policies and procedures in line with those Guidance Notes. The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *firm* has followed relevant provisions in the guidance for the UK financial sector issued by the Joint Money Laundering Steering Group.~~ The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *firm* has followed relevant provisions in the guidance for the UK financial sector issued by the Joint Money Laundering Steering Group.
(a) ~~See also the sourcebook on money laundering, SYSC 3.2 for the FSA's *rules* on systems and controls against *money laundering*.~~ See also the sourcebook on money laundering, SYSC 3.2 for the FSA's *rules* on systems and controls against *money laundering*.

Annex G

Amendments to the Conduct of Business sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

- 4.1.6 G *Firms* are reminded that *COB* 4.1.5 R:
- (1) ~~does not relieve them of any obligation under the *Money Laundering* sourcebook relating to C2 (there is a different definition of “*client*” in that sourcebook); [deleted]~~
- ...
- ...
- 5.2.2 G A *firm* that arranges an *execution-only transaction* for a *private customer* is not generally required to obtain any personal or financial information about that *customer*; ~~except when the *Money Laundering* sourcebook applies~~. However, the *Insurance Mediation Directive* requires that a statement of the demands and needs of a *client* is provided to the *client*, whether advice is given or not. ...
- ...
- 10.1.4 G ...
- (6) an *operator* of an *authorised unit trust scheme* is also required to comply with the *Collective Investment Schemes sourcebook (CIS)*; and
- (7) an *operator* of an *ICVC* is also required to comply with the *Collective Investment Schemes sourcebook (CIS)*; ~~and~~ .
- (8) ~~an *operator* is also required to comply with the *Money Laundering sourcebook (ML)*. [deleted]~~
- ...
- 11.1.11 G All *depositories* and *trustee firms* are also required to comply in particular with the *Principles for Businesses (PRIN)*; and *Senior Management Arrangements, Systems and Controls (SYSC)* ~~and the *Money Laundering sourcebook (ML)*~~.

Amendments to the Enforcement manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

- 11.9.1 G The *FSA's money laundering rules* are set out in ~~ML 1 to ML 8~~ SYSC 3.2. The *FSA*, when considering whether to take disciplinary action in respect of a breach of those *rules*, will have regard to whether a *firm* has followed relevant provisions in the Joint Money Laundering Steering Group's Guidance Notes for the Financial Sector.

...

Annex O

Amendments to the Collective Investment Schemes sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

1.2.21 G ~~*ML* is also relevant in particular when considering *CIS* 4.4.3R, *CIS* 7.10 and *CIS* 15.4.3R. [deleted]~~

...

Annex P

Amendments to the Credit Unions sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text. Where entire sections of text have been deleted, this is indicated in the text and the deleted text is not shown struck through.

Systems and controls in relation to ~~€~~compliance and financial crime

...

- 4.3.37A G SYSC 3.2.6AR requires a *credit union* to ensure that these systems and controls:
- (1) enable it to identify, assess, monitor and manage *money laundering* risk; and
 - (2) are comprehensive and proportionate to the nature, scale and complexity of that *credit union*'s activities.
- 4.3.37B G '*Money laundering* risk' is the risk that a *credit union* may be used to further *money laundering*. Failure by a *credit union* to manage this risk effectively will increase the risk to society of crime and terrorism.
- 4.3.37C G SYSC 3.2.6CR requires a *credit union* to carry out regular assessments of the adequacy of these systems and controls to ensure that they continue to meet this requirement.
- 4.3.37D G A *credit union* may also have separate obligations to comply with relevant legal requirements, including the Terrorism Act 2000, the Proceeds of Crime Act 2002 and the *Money Laundering Regulations*. SYSC 3.2.6R to 3.2.6JG are not relevant guidance for the purposes of regulation 3(3) of the *Money Laundering Regulations*, section 330(8) of the Proceeds of Crime Act 2002 or section 21A(6) of the Terrorism Act 2000.
- 4.3.37E G The FSA, when considering whether a breach of its *rules* on systems and controls against *money laundering* has occurred, will have regard to whether a *credit union* has followed relevant provisions in guidance for the UK financial sector issued by the Joint Money Laundering Steering Group.
- 4.3.37F G In identifying its *money laundering* risk and in establishing the nature of these systems and controls, a *credit union* should consider a range of factors, including:
- (1) its customer, product and activity profile;

- (2) its distribution channels;
- (3) the complexity and volume of its transactions;
- (4) its processes and systems; and
- (5) its operating environment.

4.3.37G G A credit union should ensure that these systems and controls include:

- (1) appropriate training for that credit union's employees in relation to money laundering;
- (2) appropriate provision of information to that credit union's governing body and senior management, including a report at least annually by that credit union's money laundering reporting officer on the operation and effectiveness of those systems and controls;
- (3) appropriate documentation of that credit union's risk management policies and risk profile in relation to money laundering, including documentation of that credit union's application of those policies (see SYSC 3.2.20R to SYSC 3.2.22G);
- (4) appropriate measures to ensure that money laundering risk is taken into account in the day-to-day operation of that credit union, including in relation to:
 - (a) the development of new products;
 - (b) the taking-on of new customers; and
 - (c) changes in its business profile; and
- (5) appropriate measures to ensure that procedures for identification of new customers do not unreasonably deny access to that credit union's services to potential customers who cannot reasonably be expected to produce detailed evidence of identity.

4.3.37H G SYSC 3.2.6HR requires a credit union to allocate to a director or senior manager (who may also be the money laundering reporting officer) overall responsibility within the credit union for the establishment and maintenance of effective anti-money laundering systems and controls.

The money laundering reporting officer

4.3.37I G SYSC 3.2.6IR requires a credit union to:

- (1) appoint a money laundering reporting officer, who shall be responsible for oversight of that credit union's compliance with the FSA's rules on systems and controls against money laundering; and
- (2) ensure that its money laundering reporting officer has a level of authority and independence within that credit union and access to resources and information sufficient to enable him to carry out that responsibility.

4.3.37J G The job of the money laundering reporting officer within a credit union is to act as the focal point for all activity within that credit union relating to anti-money laundering. The FSA expects that a credit union's money laundering reporting officer will be based in the United Kingdom.

The compliance function

4.3.37K G Depending on the nature, scale and complexity of its business, it may be appropriate for a credit union to have a separate compliance function. The organisation and responsibilities of a compliance function should be documented. A compliance function should be staffed by an appropriate number of competent staff who are sufficiently independent to perform their duties objectively. It should be adequately resourced and should have unrestricted access to the credit union's relevant records as well as ultimate recourse to its governing body.

4.3.38 G *Guidance on compliance is located in SYSC 3.2.68R – SYSC 3.2.9G.*

**CAPITAL RESOURCES FOR INSURANCE AND MORTGAGE MEDIATION
ACTIVITIES INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making powers);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 1 March 2006.

Amendments to the Handbook

- D. The Integrated Prudential sourcebook is amended in accordance with Annex A to this instrument.
- E. The Supervision manual is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Capital Resources for Insurance and Mortgage Mediation Activity Instrument 2006.

By order of the Board
26 January 2006

9.3.52 R Table: Items which are eligible to contribute to the capital resources of a firm

	Item	Additional explanation
1.
...		
3.	Audited <u>Reserves (Notes 1 and 2)</u>	<p>These are, <u>subject to Note 1</u>, the audited accumulated profits retained by the <i>firm</i> (after deduction of tax, dividends and proprietors' or <i>partners'</i> drawings) and other reserves created by appropriations of share premiums and similar realised appropriations. Reserves also include gifts of capital, for example, from a <i>parent undertaking</i>.</p> <p>For the purposes of calculating capital resources, a <i>firm</i> must make the following adjustments to its audited reserves, where appropriate.</p> <p>(1) ...</p> <p>...</p>
4.	<u>Interim net profits (Notes 1 and 2)</u>	If a <i>firm</i> seeks to include interim net profits in the calculation of its capital resources, the profits have, <u>subject to Note 1</u> , to be verified by the <i>firm's</i> external auditor, net of tax, anticipated dividends or proprietors' drawings and other appropriations.
...		

Notes:

1 In general, small insurance intermediaries which only carry on insurance mediation activities in relation to non-investment insurance contracts and small mortgage intermediaries may be exempt from the requirement to appoint an auditor under the Companies Act 1985 (section 249A (Exemptions from audit)). If so, the firm may include unaudited reserves and unverified interim net profits in the calculation of its capital resources.

2 Mortgage lenders and mortgage administrators to which the Companies Act 1985 applies are required to appoint an auditor under that Act (section 249B (Cases where exemptions not available)). These firms will only be able to include audited reserves and verified interim net profits in the calculation of its capital resources.

PENSION TERM ASSURANCE INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making powers);
 - (b) section 156 (General supplementary powers); and
 - (c) section 157 (Guidance); and
 - (2) the other powers referred to in Schedule 4 of the General Provisions.
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 April 2006.

Amendments to the Handbook

- D. The Glossary of definitions is amended in accordance with Annex A to this instrument.
- E. The Insurance: Conduct of Business sourcebook is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Pension Term Assurance Instrument 2006.

By order of the Board
23 February 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text. Where new definitions are being inserted, the text is not underlined.

- life policy*
- ~~(1)~~ ~~(except in COB, AUTH App 1 and AUTH App 5):~~
 - ~~(a)~~ ~~(in accordance with the definition of 'qualifying contract of insurance' in article 3(1) of the Regulated Activities Order) a long-term insurance contract other than a reinsurance contract and a pure protection contract; or~~
 - ~~(b)~~ ~~a long-term care insurance contract.~~
 - ~~(2)~~ ~~(in COB except COB 3):~~
 - ~~(a)~~ ~~a long-term insurance contract in (1) or~~
 - ~~(b)~~ ~~a pension policy.~~
 - ~~(3)~~ ~~(in COB 3) a long-term insurance contract in (1) (a) or a pension policy.~~
 - (1) (in accordance with the definition of 'qualifying contract of insurance' in article 3(1) of the Regulated Activities Order) a long-term insurance contract other than a reinsurance contract and a pure protection contract; or
 - (2) (except in PERG and COB 3) a long-term care insurance contract; or
 - (3) (in COB) a pension policy; or
 - (4) (in relation to a firm's permission) a pension term assurance policy.

Insert the following new definition in the appropriate alphabetical position:

- pension term assurance policy* a personal pension policy which is a pure protection contract and in connection with which tax relief is available under Chapter 4 of Part 4 of the Finance Act 2004.

Annex B

Amendments to the Insurance: Conduct of Business sourcebook

In this Annex underlining indicates new text and striking through indicates deleted text. Where an entire section of text is being inserted, the place where the change will be made is indicated and the text is not struck through or underlined.

Pension term assurance policies: election to apply COB rules

- 1.2.17 R (1) ICOB does not apply to the extent that:
- (a) the activities within ICOB 1.2.1R relate to a *pension term assurance policy*; and
 - (b) the *firm* has elected to comply with COB;
- but the *firm* must then comply with the rest of the Handbook treating the *pension term assurance policy* as a *life policy* and a *designated investment*, and not as a *non-investment insurance contract*.
- (2) A *firm* must make a record in a *durable medium* of the election (and any reversal of or amendment to the election) which includes:
- (a) the date from which the election takes effect; and
 - (b) a precise description of the part of the *firm's* business to which the election applies;
- and must retain that record indefinitely.

...

- 4.3.4 G An *insurance intermediary* should base his *personal recommendation* on what the *customer* tells him. ~~Subject to ICOB 4.3.2R(1), ICOB 4.3.2R(2) and ICOB 4.3.5R~~ Provided it complies with the *rules* in this section, the *insurance intermediary* is not required to take into account the *customer's* existing insurance cover (or, in the case of a *personal recommendation* relating to a *pension term assurance policy*, existing pension arrangements), or details of that cover (or those arrangements), if the *customer* is not able to provide this information.

...

Pension term assurance policies

- 4.3.8 R Unless the *insurance intermediary* has sufficient information to conclude whether or not the *customer's* existing pension arrangements are likely to significantly affect the suitability of any *personal recommendation* of a *pension term assurance policy* that it might make, it must either:

- (1) not make a *personal recommendation* until details of the pension arrangements are made available to it; or
- (2) make clear to the *customer* that the *personal recommendation* may not be suitable because it has not taken into account full details of the *customer's* existing pension arrangements.

...

5.5.8 G A significant exclusion or limitation is one that would tend to affect the decision of *retail customers* generally to buy. In determining what exclusions or limitations are significant an *insurer* should, in particular, consider the exclusions or limitations that relate to the significant features and benefits in *ICOB 5.5.5R(4)* and factors which may have an adverse effect on the benefit payable under the contract. Another type of significant limitation might be that the contract only operates through certain means of communication e.g. telephone or Internet.

**INSURANCE: CONDUCT OF BUSINESS SOURCEBOOK (AMENDMENT
NO 2) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers listed in Schedule 4 to the Insurance: Conduct of Business sourcebook.
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 March 2006.

Amendments to the Glossary of definitions

- D. The Glossary of definitions is amended in accordance with Annex A to this instrument.

Amendments to the Insurance: Conduct of Business sourcebook

- E. The Insurance: Conduct of Business sourcebook is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Insurance: Conduct of Business Sourcebook (Amendment No 2) Instrument 2006.

By order of the Board
23 February 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend the following definitions as shown:

- charge* (1) ...
- (2) (except in *LR*) any *fee* or charge made to ~~a *client* in connection with:~~
- (a) a *client* in connection with *designated investment business*; or
- (b) a *customer* in connection with any *insurance mediation activities* in respect of a *non-investment insurance contract*;
- whether levied by the *firm* or any other *person*, including a *mark-up* or *mark-down*.
- customer* ...
- (3) (in *ICOB*) ~~a *person* who is a *policyholder*, or a prospective *policyholder*, of a *policy* other than a *reinsurance contract* but~~ (except in *ICOB* 2 (general rules), *ICOB* 7 (claims handling) and (in respect of those chapters) *ICOB* 1 (application and purpose)) excluding a *policyholder* or prospective *policyholder* who does not make the arrangements preparatory to him concluding the *contract of insurance*.
- ...

Annex B

Amendments to the Insurance: Conduct of Business sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text. Where an entire section of text is deleted the place where the change will be made is indicated and the text is not shown struck through.

...

- 1.2.1 R (1) ...
- (2) Where a *firm* (or its *appointed representative*) ("A") has outsourced *insurance mediation activities* to a *third party processor*, any rule in *ICOB* which requires the *third party processor*, when acting as such, to disclose its identity to a *customer* must be read as applying to the *third party processor* only to the extent that it applies to A and as requiring disclosure of the identity of A ~~the *firm* (or *appointed representative*, as appropriate)~~ which is taking responsibility for the acts and omissions of the *third party processor* when carrying on the outsourced activities.

...

Customers and policyholders

- 1.2.5A G (1) In *ICOB 2* (General rules) and *ICOB 7* (Claims handling) (and in *ICOB 1* (Application and purpose) in respect of those chapters), a *customer* is a *policyholder* or a prospective *policyholder*. Otherwise, only a *policyholder* or prospective *policyholder* who makes the arrangements preparatory to him concluding the *contract of insurance* (directly or through an agent) is a *customer*.
- (2) A *policyholder* includes anyone who, upon the occurrence of the contingency insured against, is entitled to make a *claim* directly to the *insurance undertaking*.

...

- 1.2.15 R (1) If a *non-investment insurance contract* is a *group policy*, *ICOB* (except for *ICOB 2* (General rules) and *ICOB 7* (Claims handling)) does not apply with respect to a *person* under such a *policy* who is not the legal holder of the *policy*, subject to (2).

...

- 1.2.16 G (1) ...
- (2) ~~In *ICOB* a *customer* is a *policyholder* or a prospective *policyholder*. A *policyholder* includes anyone who, upon the occurrence of the contingency insured against, could expect to have a *claim*, made by him directly to the *insurance undertaking*, accepted by the *insurance*~~

~~undertaking. PA~~ policyholder includes a member of a *group policy* who did not conclude the *group policy* with the *insurance undertaking* but who is entitled under the terms of that *policy* to make a *claim* on the *insurance undertaking*. This would include a dependant of a *policyholder* member of a *group policy* if that dependant has a direct right to *claim*. Where ~~such a customer person does not~~ concludes a *group policy*, only limited provisions in *ICOB* will apply to ~~him~~ other policyholders as specified in *ICOB* 1.2.15R and by the definition of *customer*.

- (3) A *person* whose right or interest in a *contract of insurance* that is a *group policy* does not entitle him to make a *claim* directly to an *insurance undertaking* (for example, because he is required to make his *claim* to an employer or trustees) is not a *customer* or a policyholder.
- (4) ~~The rules at~~ *ICOB* 5.3.29R and *ICOB* 5.4.8R provides for ~~commercial~~ *customers* who conclude *group policies* to be given a *policy summary*, unless the customer is a commercial customer and there is no policyholder who is capable of being a retail customer, and to be informed that they should give that *policy summary* to each *policyholder* who is capable of being a retail customer.

...

...

2.10 Excessive charges to retail customers

- 2.10.1 R An insurance intermediary must ensure that its charges to a retail customer are not excessive.
- 2.10.2 G When determining whether a charge is excessive, an insurance intermediary should consider:
- (1) the amount of its charges for the services or product in question, compared with charges for similar services or products in the market;
- (2) whether the charges are an abuse of the trust that the retail customer has placed in the insurance intermediary; and
- (3) the nature and extent of the disclosure of the charges to the retail customer.
- 2.10.3 G In assessing whether an insurance intermediary's charges are excessive, the FSA will take account of the charges imposed by insurance intermediaries of similar size and that conduct a similar volume of business.
- 2.10.4 G ICOB 2.10.1R does not apply to premiums, but does cover fees (including any fees that an insurance intermediary charges where it receives no commission from an insurer in respect of the contract of insurance).

...

4.1.3 R Table: Application of *ICOB* 4 by activity and customer type

This table belongs to *ICOB* 4.1.1R

Insurance mediation activity	Type of customer	Applicable section
...
<i>arranging</i> except <i>introducing</i>	<i>commercial customer</i>	Whole chapter except <i>ICOB</i> 4.2.19R, <i>ICOB</i> 4.3, <i>ICOB</i> 4.5 and <i>ICOB</i> 4.7
...
<i>advising</i>	<i>commercial customer</i>	Whole chapter except <i>ICOB</i> 4.2.19R, <i>ICOB</i> 4.5 and <i>ICOB</i> 4.7
...

4.1.4 R The following provisions in *ICOB* do not apply to an *insurance intermediary* that is an *insurer* ~~when dealing with a *commercial customer*~~:

- (1) *ICOB* 4.2 (Status disclosure) ~~except *ICOB* 4.2.4G to *ICOB* 4.2.7R (permitting use of the initial disclosure document and combined initial disclosure document) and *ICOB* 4.2.19R (overseas business for UK retail customers)~~, provided that when providing the service on the telephone to a *retail customer* wishing to enter into a *non-investment insurance contract*, the *insurer* proceeds on the basis of providing at least the following information:
 - (a) its name;
 - (b) (if it initiated the call) the commercial purpose of the call; and
 - (c) the identity of the *person* in contact with the *customer* and his link with the *insurer*;
- (2) *ICOB* 4.4.1R(1) (Statement of demands and needs), in accordance with *ICOB* 4.4.2R(1) and (1A) (commercial customers and non-advised sales to retail customers) ~~unless the *insurer* makes a *personal recommendation* to the *commercial customer*~~; and
- (3) ...

However, an *insurer* must ensure that its *appointed representative* nevertheless complies with the requirements of this chapter (unless acting as the *insurer's third party processor*).

...

4.1.7 G The purpose of this chapter is to ensure that:

...

(4) ~~the charges that an insurance intermediary imposes on a retail customer are not excessive;~~[deleted]

...

...

4.2.2 R ...

(3) Exemption: telephone sales

(a) ...

(aa) The insurance intermediary must provide its name and (if it initiated the call) the commercial purpose of the call.

(b) Provided the customer gives his explicit consent to receiving only limited information, the insurance intermediary may proceed on the basis of at least the following information:

(i) ~~the name of the insurance intermediary;~~

(ii) ~~(if the call is initiated by the insurance intermediary) the commercial purpose of the call;~~

(iii) the identity of the person in contact with the customer and his link with the insurance intermediary; and

(iv) that other information is available on request, and the nature of the information.

(c) ...

...

...

4.2.8 R Table: Information to be provided before conclusion of the contract or immediately after conclusion of the contract

This table belongs to *ICOB 4.2.2R*.

...	...
(4)	Unless the insurance intermediary is an insurer, or a third party processor acting as such on behalf of an insurer, d Details of any holding, direct or indirect, that an insurance intermediary has that

	represents more than 10 per cent of the voting rights or of the capital in an <i>insurance undertaking</i> .
(5)	Unless the <i>insurance intermediary</i> is an <i>insurer</i>, or a third party processor acting as such on behalf of an <i>insurer</i>, d Details of any holding, direct or indirect, that an <i>insurance undertaking</i> or parent of an <i>insurance undertaking</i> has that represents more than 10 per cent of the voting rights or of the capital in the <i>insurance intermediary</i> .
...	...

...

4.4.2 R (1) ...

(1A) Non-advised sales by insurers to retail customers

- (a) ICOB 4.4.1R(1) does not apply to an *insurance intermediary* that is an *insurer* when dealing with a *retail customer*, unless the *insurer* makes a *personal recommendation* to that *retail customer*.
- (b) Where ICOB 4.4.1R(1) does not apply under (a), the *insurer* must provide the *retail customer* with a statement that confirms the *insurer* has not *personally recommended* that contract.
- (c) Unless (d) or (e) applies, the statement in (b) must be provided in a *durable medium* before the conclusion of the contract (including at *renewal*).
- (d) If the *customer* requests the statement in (b) orally or requires immediate cover, the *insurer* may provide the statement orally provided that it does so before the conclusion of the contract and provides the statement in a *durable medium* immediately after the conclusion of the contract.
- (e) Where a contract is concluded by telephone, the statement in (b) must be provided immediately after the conclusion of the contract in a *durable medium*.

(2) ...

(3) Notwithstanding (1) and (1A), an *insurer* must ensure that its *appointed representative* complies with the requirements of this section (unless acting as the *insurer's third party processor*).

...

Delete ICOB 4.5 in its entirety, the deleted text is not shown struck through.

4.5 [deleted – material moved to ICOB 2.10]

...

- 5.3.18 R No less than 21 days before the expiry of the policy, An insurance intermediary must:
- (1) if the *insurance undertaking* is willing to invite *renewal* of the *policy*, take reasonable steps to provide the retail customer with renewal terms in a durable medium in accordance with ICOB 5.3.21R ~~no less than 21 days before the expiry of the policy~~; or
 - (2) take reasonable steps to notify the retail customer ~~no less than 21 days before the expiry of the policy~~ if the *insurance undertaking* is not willing to invite *renewal*; or
 - (3) notify the retail customer that the *insurance intermediary* no longer deals with the *insurance undertaking*.

**COLLECTIVE INVESTMENT SCHEMES SOURCEBOOKS
(MISCELLANEOUS AMENDMENTS) INSTRUMENT 2006**

Powers Exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 140 (Restriction on managers of authorised unit trust schemes);
 - (c) section 156 (General supplementary powers);
 - (d) section 157(1) (Guidance);
 - (e) section 238(5) (Restrictions on promotion);
 - (f) section 242 (Applications for authorisation of unit trust schemes);
 - (g) section 247 (Trust scheme rules); and
 - (h) section 248 (Scheme particulars rules); and
 - (2) regulation 6 (FSA rules) of the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228).
- B. The rule-making powers and related provisions listed above are specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 6 April 2006.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions	Annex A
Collective Investment Schemes sourcebook (CIS)	Annex B
New Collective Investment Schemes sourcebook (COLL)	Annex C

Citation

- E. This instrument may be cited as the Collective Investment Schemes Sourcebooks (Miscellaneous Amendments) Instrument 2006.

By order of the Board
23 February 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend the following definition as shown:

IMA SORP the Statement of Recommended Practice for financial statements of *authorised funds* issued by the Investment Management Association and effective as at ~~1 December 2003~~ 1 January 2006.

Annex B

Amendments to the Collective Investment Schemes sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

Borrowing limits

5.5.4 R ...

- (4) ~~[deleted] For an ICVC, borrowing does not include any arrangement for the ICVC to pay to a third party (including the ACD) any costs which the ICVC is entitled to amortise under CIS 8.3.4R (Set up costs) and which were paid on behalf of the ICVC by the third party.~~

...

5A.15.4 R ...

- (6) ~~[deleted] For an ICVC, borrowing does not include any arrangement for the ICVC to pay to a third party (including the ACD) any costs which the ICVC is entitled to amortise under CIS 8.3.4R (Set up costs) and which were paid on behalf of the ICVC by the third party.~~

...

Appointment of an ACD

7.2.2 R ...

- (3) For an ICVC that holds annual general meetings under the OEIC Regulations, The the ...

...

Set up costs

8.3.4 R

- (1) ~~[deleted] When (2) applies, costs of the *authorisation* and incorporation of an ICVC and of its *initial offer* or *issue of shares* (or *initial offer* or *issue of shares* in respect of a *sub-fund*) may, subject to CIS 8.3.1R (Promotional payments), be amortised over a period not exceeding five years.~~
- (2) ~~[deleted] Amortisation under (1) is only permitted if, on or before 30 November 2000, it had commenced and been disclosed in the *prospectus*.~~

...

Resolutions

11.2.5 R ...

(3) Where a resolution (including an extraordinary resolution) is required to conduct business at a meeting of shareholders and every shareholder is prohibited under CIS 11.2.6R(4)(a) (Voting rights) from voting, it shall not be necessary to convene such a meeting and a resolution may, with the prior written agreement of the depositary to the process, instead be passed with the written consent of shareholders representing 50% or more, or for an extraordinary resolution 75% or more, of the shares of the scheme in issue.

...

Voting rights

11.3.9 R ...

(7) Where every unitholder is prohibited under (6)(a) from voting, the unitholders may, with the prior written agreement of the trustee to the process, instead approve the business of the meeting by written resolution and any resolution approved in this manner by unitholders representing 75% or more of the units of the scheme in issue shall have the effect of an extraordinary resolution, duly approved under the rules of this chapter.

...

Consequences of commencement of winding up

14.2.5 R ...

- (3) The ACD must as soon as practicable after the effective time:
- (a) ~~[deleted] publish notice of the commencement of the winding up (if the head office of the ICVC is situated in England and Wales or Wales) in the London Gazette, or (if the head office of the ICVC is situated in Scotland) in the Edinburgh Gazette; and~~
 - (b) if the ACD has not previously notified ...

...

Authorised fund

2 A description of the *authorised fund* including:

...

(b) ...

(ba) whether it is a UCITS scheme or a non-UCITS retail scheme;

...

...

Contracts and other relationships with parties

11 ...

(a) (i) a summary of the material provisions of the contract between the ICVC and the ~~authorised fund manager~~ ACD which may ...

...

(iii) ... a statement of that fact; ~~and~~

(iv) ... in summary form; and

(v) for an ICVC that does not hold annual general meetings, a statement that copies of contracts of service between the ICVC and its directors, including the ACD, will be provided to a unitholder on request;

...

...

General information

23 ...

- (c) ... *units*; ~~and~~
- (d) ... *scheme property* ~~;~~ and
- (e) for an ICVC, whether or not annual general meetings will be held.

...

Guidance on contents of the prospectus

- 4.2.6 G (1) ...
- (a) ...
 - (b) ...
 - (ii) a statement of the policy of the *authorised fund manager* in relation to insurance ~~and~~ of immovables forming part of ...

...

...

- (3) In relation to *COLL 4.2.5R(27)*, the *prospectus* might include a statement of the *authorised fund manager's* policy in relation to *holding units* in the *scheme* as *principal*, and in particular whether it seeks to make a profit from doing so. It might also include a prominent statement of non-accountability ...

...

Guidance on significant changes

- 4.3.7 G ...
- (3) Where the *directors* of an ICVC elect to discontinue holding annual general meetings under paragraph 37A of the *OEIC Regulations*, they are required to give 60 days' written notice to *shareholders*. For the purpose of *COLL 4.3.6R* this should be treated as a significant change to the operation of the *scheme*.

...

Resolutions

- 4.4.7 R ...
- (3) Where a resolution (including an *extraordinary resolution*) is required to conduct business at a meeting of *unitholders* and every *unitholder* is prohibited under *COLL 4.4.8R(4)* from voting, it shall not be necessary to convene such a meeting and a resolution may, with the prior written

agreement of the *depository* to the process, instead be passed with the written consent of *unitholders* representing 50% or more, or for an *extraordinary resolution* 75% or more, of the *units* of the *scheme* in *issue*.

Voting rights

4.4.8 R ...

- (3) ~~For joint *unitholders* of a *unit*, only the vote of the first named in the *register* of *unitholders* can be taken.~~
For joint *unitholders*, the vote of the most senior who votes, whether in person or by proxy, must be accepted to the exclusion of the votes of the other joint *unitholders*. For this purpose seniority must be determined by the order in which the names stand in the *register* of *unitholders*.

...

...

Chairman, adjournment and minutes

4.4.11 R (1) A meeting of *unitholders* must have a chairman, nominated;

(a) in the case of an *AUT*, by the *trustee*;

(b) in the case of an *ICVC*, by a *director* other than the *ACD* or an *associate* of the *ACD* or, if no such nomination is made, by the *depository*.

...

Notices to unitholders

4.4.12 R (1) ...

(a) ...

(i) ~~delivered to~~ sent by post to or left at the *unitholder's* address as appearing in the *register*; or

(ii) ~~delivered~~ sent by using an electronic medium in accordance with *COLL* 4.4.13R (Other notices); or

...

...

Contents of the annual long report

- 4.5.7 R (1) ...
- (2) An annual long report on a *scheme* which is an *umbrella* must be prepared for the *umbrella* as a whole and must contain:
...
- (3) The *directors* of an *ICVC* or the *manager* of an *AUT* must ensure that the accounts referred to in (1)(a) ~~and~~, (2)(a) and (4)(a) give a true and fair view of the net income and the net gains and the losses on the *scheme property* of the *authorised fund* or, in the case of (2)(a) and (4)(a), the *sub-fund*, for the *annual accounting period* in question ...
- (4) The *authorised fund manager* of a *scheme* which is an *umbrella* may, in addition to complying with (2), prepare a further annual long report for any one or more individual *sub-funds* of the *scheme*, in which case it must contain:
- (a) in relation to the *sub-fund*:
- (i) the full accounts for the *annual accounting period* which must be prepared in accordance with the requirements of the *IMA SORP*;
- (ii) the report of the *authorised fund manager* in accordance with *COLL 4.5.9R*; and
- (iii) the comparative table in accordance with *COLL 4.5.10R*;
- (b) the report of the *depository* in accordance with *COLL 4.5.11R*; and
- (c) the report of the auditor in accordance with *COLL 4.5.12R*.

Contents of the half-yearly long report

- 4.5.8 R ...
- (2) A half-yearly long report on a *scheme* which is an *umbrella* must be prepared for the *umbrella* as a whole and must contain:
- (a) for each *sub-fund*:
- (i) the full accounts for the ~~annual~~ *half-yearly accounting period* which must be ...
- ...
- ...

- (3) The authorised fund manager of a scheme which is an umbrella may, in addition to complying with (2), prepare a further half-yearly long report for any one or more individual sub-funds of the scheme. Such reports must contain the full accounts and the report of the authorised fund manager that would be required by (1) if the sub-fund were a separate authorised fund.

Annual and half-yearly long reports for sub-funds of an umbrella

4.5.8A G The authorised fund manager may, but need not, prepare annual and half-yearly long reports for any individual sub-fund of an umbrella in accordance with COLL 4.5.7R(4) and COLL 4.5.8R(3) and make them available on request to any unitholder investing in the relevant sub-fund. However, if the authorised fund manager does so, this does not relieve it of its duty:

- (1) to prepare annual and half-yearly long reports on the umbrella as a whole (COLL 4.5.7R(2) and COLL 4.5.8R(2)); and
- (2) to make available and publish the annual and half-yearly long reports for the umbrella as a whole (COLL 4.5.14R).

Authorised fund manager's report

4.5.9 R The matters set out in (1) to ~~(12)~~(13) must be included in any authorised fund manager's report, except where otherwise indicated:

...

(11) for a report on an umbrella prepared in accordance with COLL 4.5.7R(2) or COLL 4.5.8R(2):

(a) (for an ICVC), a statement to the effect that, ...

(b) ... as a whole; and

(12) ... that scheme invests-; and

(13) for a report on an individual sub-fund of a scheme which is an umbrella prepared in accordance with COLL 4.5.7R(4) or COLL 4.5.8R(3):

(a) (for an ICVC) a statement corresponding to that required by (11)(a) making it clear that if the liability relates to another sub-fund of the umbrella, the shortfall or any part of it might have to be met out of the assets of the sub-fund to which the report relates; and

(b) a statement that the latest long report prepared for the

umbrella as a whole is available on request.

...

Provision of short report

- 4.5.13 R (1) ...
- (2) ...
- (a) ... accounting period; ~~and~~
- (b) ... at his request; and
- (c) to any other person free of charge on request.

...

Publication and availability of annual and half-yearly long report

- 4.5.14 R (1) The *authorised fund manager* must, within four *months* after the end of each *annual accounting period* and two *months* after the end of each *half-yearly accounting period* respectively, make available and publish the long reports prepared in accordance with *COLL 4.5.7R(1) to (3)* (Contents of the annual long report) ~~or and~~ *COLL 4.5.8R(1) to (2)* (Contents of the half-yearly report).
- (2) ...
- (a) be supplied free of charge to ~~unitholders who request it~~ any person on request;
- ...

...

Investment in collective investment schemes

- 5.2.13 R ...
- (2) and *COLL 5.2.16R* (Investment in other group schemes); ~~and~~
- (3) ... in *collective investment schemes*; and
- (4) where the second scheme is an umbrella, the provisions in (2) and (3) apply to each sub-fund as if it were a separate scheme.

...

(d) review the *prospectus* periodically and revise it to take account of any significant change or new matter.

...

Report and accounts

8.3.5 R ...

(2A) Where the first *annual accounting period* of a *scheme* is less than 12 months, a half-yearly report need not be prepared.

...

(4) ~~[deleted] The *authorised fund manager* must comply with the requirements of the *IMA SORP*.~~

(5) The *authorised fund manager* must provide free of charge on the request of ~~a purchaser of units~~ any person eligible to invest in the *scheme* a copy of the latest annual or half-yearly report before the conclusion of ~~that~~ any sale to such person.

...

(7) For a *scheme* which is an *umbrella*, any annual report provided under (3) or (5) may be a report prepared under *COLL 8.3.5AR(3)*,

but the *authorised fund manager* must nevertheless provide free of charge the report prepared under *COLL 8.3.5AR(2)* if a *unitholder* or any other *person* eligible to invest in the *scheme* requests it.

Contents of the annual report

- 8.3.5A R (1) An annual report, other than for a *scheme* which is an *umbrella*, must contain:
- (a) the full accounts for the *annual accounting period* prepared in accordance with the requirements of the *IMA SORP*;
 - (b) the report of the *authorised fund manager* in accordance with *COLL 8.3.5CR* (*Authorised fund manager's report*);
 - (c) the report of the *depository* in accordance with *COLL 8.3.5DR* (*Report of the depository*); and
 - (d) the report of the auditor in accordance with *COLL 4.5.12R* (*Report of the auditor*).
- (2) An annual report on a *scheme* which is an *umbrella* must be prepared for the *umbrella* as a whole and must contain:
- (a) for each *sub-fund*, the full accounts required by (1)(a) and the report of the *authorised fund manager* in accordance with *COLL 8.3.5CR*;
 - (b) an aggregation of the accounts required by (a);
 - (c) the report of the *depository* in accordance with *COLL 8.3.5DR*; and
 - (d) the report of the auditor in accordance with *COLL 4.5.12R*.
- (3) The *authorised fund manager* of a *scheme* which is an *umbrella* may, in addition to complying with (2), prepare a further annual report for any one or more individual *sub-funds* of the *umbrella*, in which case it must contain:
- (a) for the *sub-fund*, the full accounts required by (1)(a) and the report of the *authorised fund manager* in accordance with *COLL 8.3.5CR*;
 - (b) the report of the *depository* in accordance with *COLL 8.3.5DR*; and
 - (c) the report of the auditor in accordance with *COLL 4.5.12R*.

- (4) The directors of an ICVC or the manager of an AUT must ensure that the accounts referred to in (1)(a), (2)(a) and (3)(a) give a true and fair view of the net income and the net gains and losses on the scheme property of the authorised fund or sub-fund for the relevant annual accounting period, and of the financial position of the authorised fund or sub-fund as at the end of that period.

Contents of the half-yearly report

- 8.3.5B R (1) A half-yearly report on an authorised fund or sub-fund must contain:
- (a) the full accounts for the half-yearly accounting period which must be prepared in accordance with the requirements of the IMA SORP; and
 - (b) the report of the authorised fund manager in accordance with COLL 8.3.5CR.
- (2) For a scheme which is an umbrella, the authorised fund manager may choose whether the half-yearly report is prepared for the umbrella as a whole, or for each individual sub-fund, or both.

Authorised fund manager's report

- 8.3.5C R The report of the authorised fund manager must include:
- (1) a review of the investment activities during the period to which the report relates;
 - (2) particulars of any fundamental or significant change to the authorised fund made since the date of the last report; and
 - (3) any other information which would enable unitholders to make an informed judgement on the development of the activities of the authorised fund during the period and the results of those activities as at the end of the period.

Report of the depositary

- 8.3.5D R (1) The depositary must make an annual report to unitholders which must be included in the annual report.
- (2) The depositary's report must contain:
- (a) a description, which may be in summary form, of the duties of the depositary under COLL 8.5.4R (Duties of the depositary) and in respect of the safekeeping of the scheme property; and
 - (b) a statement whether in any material respect:

- (i) the issue, sale, redemption and cancellation and calculation of the price of the units and the application of the authorised fund's income, have not been carried out in accordance with the rules in this sourcebook and, where applicable, the OEIC Regulations and the instrument constituting the scheme; and
- (ii) the investment and borrowing powers and restrictions applicable to the authorised fund have been exceeded.

...

Investment in a collective investment scheme that is an umbrella

8.4.5A R Where the second scheme in COLL 8.4.5R is an umbrella, the provisions apply to each sub-fund as if it were a separate scheme.

...

Valuation of an OTC derivative

8.4.7A R A transaction in an OTC derivative must be capable of valuation which it will only be if the authorised fund manager having taken reasonable care determines that, throughout the life of the derivative (if the transaction is entered into), it will be able to value the investment concerned with reasonable accuracy:

- (1) on the basis of the pricing model; or
 - (2) on some other reliable basis reflecting an up-to-date market value;
- which has been agreed between the authorised fund manager and the depositary.

Chapter 11 Guidance on property investment clubs and land investment schemes

11.1 Background

Q1. What is the purpose of these questions and answers (“Q&As”) and who should be reading them?

These Q&As are principally aimed at those involved in the running of property investment clubs or schemes involving the sale of plots of land with arrangements for obtaining planning permission in respect of them or for the disposal of the land as a whole. They are intended to help such persons understand whether they will be carrying on a *regulated activity* and need

to be an *authorised person* or *exempt person* under section 19 of the Financial Services and Markets Act 2000. The Q&As may also be of assistance to investors in such schemes concerned about whether the scheme they are investing in should be run by an authorised or exempt person.

The Q&As that follow are set out in two sections:

- Guidance on property investment clubs (PERG 11.2)
- Guidance on land investment schemes (PERG 11.3)

11.2 Guidance on property investment clubs

Q2. What are property investment clubs?

In general, property investment clubs, (sometimes also known as buy-to-let schemes, buy-to-let syndicates or property investment syndicates) are schemes allowing members of the public to invest in property and which possess some or all of the following characteristics:

- a pooling of resources to allow investment in, or collective management of, real property;
- much or all of the property purchased being financed by money borrowed by the members of the scheme (a typical split being 15% equity and 85% debt), with the borrowing often being arranged by the property investment club itself for members;
- the offer of educational training on the property market;
- other help given to members by the property investment club, including help with the purchase, and the sale, of the property (sometimes involving forward purchase contracts);
- the properties concerned are often newly, or not yet, built; and
- discounts are often offered, or are purported to be offered, on the price of the property (usually from the developer in recognition of a bulk purchase by club members).

Q3. Does the FSA regulate property investment clubs?

The FSA regulates the operation and promotion of property investment clubs if, in substance, they amount to *collective investment schemes*.

If a scheme, in substance, is a collective investment scheme, it cannot escape the need for regulation by being dressed up as something else.

Q4. What is a collective investment scheme and will my property investment club be one?

Broadly speaking, a collective investment scheme is any arrangement:

- the purpose or effect of which is to enable those taking part (either by owning the property, or part of it, or otherwise) to participate in or receive profits or income arising from the acquisition, holding, management or disposal of the property;
- where persons taking part do not have day-to-day control over the management of the property; and
- where either the contributions and profits or income are pooled, or the property is managed as a whole by or on behalf of the operator of the scheme, or both.

Whether your property investment club is a collective investment scheme or not will depend on its individual structure and the facts surrounding it. If your club meets each of the above conditions and is not exempt, then its operation and promotion should come under FSA regulation. This is regardless of whether that was intended by the person operating or promoting the club.

Q5. Can a body corporate be used rather than a collective investment scheme?

Yes, if all your rights in a scheme derive from ownership of securities issued by a body corporate, the scheme will not be a collective investment scheme. This is unless the body corporate is an *open-ended investment company* or a limited liability partnership. PERG 9 has guidance on the meaning of open-ended investment company.

Q6. What is the purpose of the ‘day-to-day control’ test and the nature of day-to-day control?

The purpose of the ‘day-to-day control’ test is to try to draw an important distinction about the nature of the investment that each investor is making. If the substance is that each investor is investing in a property whose management will be under his control, the arrangements should not be regarded as a collective investment scheme. On the other hand, if the substance is that each investor is getting rights under a scheme that provides for someone else to manage the property, the arrangements would be regarded as a collective investment scheme.

Day-to-day control is not defined and so must be given its ordinary meaning. In our view, this means you have the power, from day-to-day, to decide how the property is managed. You can delegate actual management so long as you still have day-to-day control over it.

Q7. The participants in my property investment club do not get involved in every single management decision, but appoint agents to take decisions for them in accordance with criteria agreed between them. Have the participants lost day-to-day control?

We do not consider that day-to-day control means that each participant would themselves need to be involved in each and every decision taken, so long as they retain day-to-day control over the management. For example, delegating rent collection, cleaning and management services in relation to a property, by appointing agents to carry out these tasks would not necessarily mean that the participants lose day-to-day control, so long as the participants retain day-to-day control over the management of the agency contracts.

Q8. Must each participant individually have day-to-day control for my property investment club not to be a collective investment scheme?

Yes, though this does not prevent two or more individuals having day-to-day control together. (This may happen, for example, where business partners buy several flats in a block and manage them jointly.) But the more distant any individual participant is from controlling the management of the property himself, the less likely it is that the individual participants can be said to have control which is ‘day-to-day’.

Q9. I run a property investment club where the participants have a right to be consulted on management decisions or at least give directions. Do they have day-to-day control?

Not by virtue of those rights alone. Simply having the right to be consulted or give directions is not enough to give a participant day-to-day control.

Also, if all management decisions are taken by the operator (or a person appointed by him) using generic mandates (for example, a power of attorney) from participants, then it is unlikely to be the case that the participants have day-to-day control. It is more likely in this case that the scheme is effectively one where management is devolved entirely to the operator, with participants only retaining a notional control over the decision-making of the operator – in essence amounting to a right to be consulted or give directions, rather than day-to-day control.

Q10. I have promoted or set up a property investment club such that the documents that each participant signs explicitly say that they have day-to-day control over the management of the property - does that mean it is not a collective investment scheme?

No. In our view, regardless of what rights or powers the documentation purports to give its participants, it is important to look at what happens in fact. It is the substance rather than the form that counts. So, if the participants are stated to have day-to-day control, simply as an attempt to avoid the property investment club amounting to a collective investment scheme, but they do not, in fact, have such day-to-day control, then the club may still amount to a collective investment scheme. In that case, its operation and promotion would be regulated by the FSA.

Q11. I run a property investment club where all of the major participants have day-to-day control over the management of the property but, by choice, one or two of the smaller participants do not. Does this mean that the club could still be a collective investment scheme?

Yes, if the other elements are present. In order for the arrangements not to be a collective investment scheme, all individual participants, regardless of their contribution or stated preferences, must have day-to-day control. So, if one participant does not have day-to-day control then the whole scheme could amount to a collective investment scheme.

Q12. I run a scheme where each person owns individual properties or parts of properties in the property investment club. Each person owns property either directly, or indirectly (for example, through a limited company or a limited liability partnership

of which he is the owner or through a limited partnership). Is this scheme likely to be a collective investment scheme?

No, unless the properties belonging to each person, company, limited liability partnership or limited partnership are managed as a whole by or on behalf of the operator of the scheme. So, the mere fact that the operator is managing a number of properties and achieves economies of scale in his management charges or in things such as insurance cover would not mean that the properties are being managed as a whole. Neither would the fact that the operator may be able to offer reductions in sale price because of bulk discounts negotiated with developers. This is provided the operator is managing each property on an individual basis.

As an example, if a managing agent manages a block of flats on the basis that the only profit or income each individual flat owner obtains is what arises from the management of his property, there is no management as a whole. However, if the managing agent managed the flats in such a way that each individual flat owner received an income from total lettings, regardless of whether that person's flat was let or not, the properties are managed as a whole and the arrangements are likely to be a collective investment scheme.

Q13. Does it make a difference if people participate through a corporate vehicle?

No. But it should be noted that a limited liability partnership or limited partnership, through which a person indirectly owns the property concerned, may amount to a collective investment scheme itself. This is if the partnership has more than one investor participant and subject to the considerations set out in this guidance.

Q14. I run a property investment club where the participants own their own individual properties which are rented out but the rental income is pooled and I decide on which property should be rented at any time and to whom. Is this likely to be a collective investment scheme?

Yes. This is because:

- the property in respect of which the arrangements are made is the property belonging to each of the participants;
- you are managing that property as a whole; and
- the participants do not have day-to-day control over the management of that property.

Q15. If my property investment club is not a collective investment scheme because participants acquire shares in a body corporate, does that mean that I do not need to be authorised?

Not necessarily. Depending on the circumstances, you may be involved in making arrangements for the participants to buy, sell or subscribe for their shares which is itself a regulated activity and may only be carried on by an authorised or exempt person.

Q16. Does the FSA regulate the mortgages that are used to finance property investment clubs?

No. The FSA only regulates the provision of mortgages on property where the borrower intends to use at least 40% of it as a dwelling for him or a close relative. This is typically not the case with properties purchased through property investment clubs.

Q17. What are the consequences of a property investment club being regulated by the FSA?

If a property investment club were considered to be a collective investment scheme, and therefore its operation and promotion regulated by the FSA, then any person operating the scheme in the *United Kingdom* or advising investors on the merits of participating or arranging for them to do so, must be an authorised or exempt person. If such a person was not authorised or exempt, he would be liable to commit a criminal offence. It is only the activities of such persons that would be regulated by the FSA. The property investment club itself would not be regulated by the FSA as a product in the way that authorised unit trusts or authorised open-ended investment companies (which are collective investment schemes) are. Also, agreements entered into by an unauthorised person in the course of their operating, advising on or arranging for persons to participate in a collective investment scheme are potentially unenforceable against the other party and the other party may be entitled to compensation from the unauthorised person.

Q18. Are there restrictions on the promotion of my property investment club?

Yes, if it is a collective investment scheme or involves investors acquiring securities issued by a body corporate – otherwise not. If your property investment club is a collective investment scheme, you would not be able to promote it to the general public and, unless exempt, any promotional material would need to comply with FSA rules. PERG 8 has guidance about the restrictions on all kinds of *financial promotion*.

Q19. Does the FSA or Treasury intend to regulate all property investment clubs?

We understand that, as at 6 March 2006, there is no current intention to change existing regulatory boundaries.

11.3 Guidance on land investment schemes involving planning permission arrangements

Q20. I run a business arranging for the sale of individual plots of development land to investors who are also required to use my services in obtaining planning permission for or disposing of the land as a whole (or both). Might I need to be authorised?

Yes, this is likely to be the case. This will be because the role you have in obtaining planning permission or in negotiating and effecting the sale of the land (or both) may mean that you are operating a collective investment scheme (see Q4). The purpose or effect of the arrangements would appear to be to enable investors, as owners of parts of the land, to receive profits arising from your services in obtaining planning permission or arranging disposal in respect of the land as a whole. If the planning or disposal process is such that individual investors do not have day-to-day control over it, the arrangements are likely to amount to a collective investment scheme, and to operate it you would need to be authorised

or exempt. The restrictions on financial promotions referred to in Q18 would also need to be considered.

Q21. I run a business which arranges for individual plots of land to be sold to potential investors and, whilst I refer to the possibility of obtaining planning permission as a way of increasing the value of the land, I don't, nor does anyone connected to me, have a role in pursuing any such permission nor any other control over the land as a whole. Do I need to be authorised?

No. If all of the participants have control over the obtaining of planning permission relevant to their individual plots of land the arrangements will not be a collective investment scheme. Arranging for investment in plots of land by itself is not a regulated activity as plots of land are not of themselves *specified investments*.

FEES PROVISIONS INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority ("FSA") makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 ("the Act"):
- (1) section 72 (The competent authority);
 - (2) section 74(4) (The official list);
 - (3) section 99(1) (Fees);
 - (4) section 101 (Listing rules: general provisions);
 - (5) section 138 (General rule-making power);
 - (6) section 156 (General supplementary powers);
 - (7) section 157(1) and (4) (Guidance);
 - (8) section 213 (The Compensation Scheme);
 - (9) section 223 (Management expenses);
 - (10) paragraph 17(1) of Schedule 1 (Fees); and
 - (11) paragraphs 1 (General), 4 (Rules), and 7 (Fees) of Schedule 7 (The Authority as Competent Authority for Part VI).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 1 April 2006.

Amendments to the Handbook

- D. The Fees manual is amended in accordance with Annex A to this instrument.
- E. The Supervision manual is amended in accordance with Annex B to this instrument.
- F. The Credit Unions sourcebook is amended in accordance with Annex C to this instrument.

Citation

- G. This instrument may be cited as the Fees Provisions Instrument 2006.

By order of the Board
23 March 2006

Annex A

Amendments to the Fees manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

- 2.2.1 R If a *person* does not pay the total amount of a periodic fee (including fees relating to reportable transactions to the FSA using the FSA's Direct Reporting System or FSA's Transaction Reporting System (see SUP 17)), FOS levy or case fee, ...

...

FEES 3 Annex 4R

Application and tranche fees in relation to listing rules

Part 1

Fee type	Fee amount
Application Fees for the period 1 July 2005 to 31 March 2006	
Application for <i>listing</i>	<u>£225200 plus £100 per each additional issue of securities with its own International Securities Identification Number.</u>
...	

...

FEES 3 Annex 5R

Document vetting and approval fees in relation to listing and prospectus rules

...

Part 2

...

...	
Tranches — upfront fee per tranche for draw downs in the following 12 months. Payment in advance for more than 75 draw downs will attract a 10% discount.	£100

...

FEES 3 Annex 6R

Fees payable for guidance on the availability of a waiver (or concession) in connection with rules implementing Basel Capital Accord

Part 1

Fees payable other than applications for guidance on the availability of a waiver (or concession) to allow a firm to use the Effective Expected Potential Exposure estimates

Table 1

Application group	Description of group	Application fee 2005/2006 2006/07		
		Advanced IRB (£'000)	Foundation IRB (£'000)	AMA (£'000)
Group 1	Five or more significant overseas entities applying for <i>guidance</i> on the availability of a <i>waiver</i> or concession in connection with future <i>rules</i> implementing the revised Basel Capital Accord (including any amendments)	247219	214190	167148

...

Table 2

Application group	Description of group		Application fee 2005/2006 2006/07		
	Modified eligible liabilities (£m)	Number of traders as at 31 December 2004 2005	Advanced IRB (£'000)	Foundation IRB (£'000)	AMA (£'000)
Group 2	>40,000	>200	214190	183162	135120
Group 3	>5,000 - 40,000	26 - 200	8777	6659	4742
Group 4	0 - 5,000	0 - 25	3935	2825	2220
(1)	Advanced and Foundation IRB applications are applications for <i>guidance</i> regarding the Internal Ratings Based approach for credit risk. AMA applications are applications for guidance regarding the Advanced Measurement Approach for operational risk.				
(2)	For the purposes of Table 2, a <i>firm's</i> A.1 or A10 tariff data for the relevant period will be used to provide the value of modified eligible liabilities or number of traders.				

...

Part 2

Fees payable for applications for guidance on the availability of a waiver (or concession) to allow a firm to use the Effective Expected Potential Exposure estimates

£50,000

MARKET CONDUCT SOURCEBOOK (AMENDMENT NO 7) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 ("the Act"):
- (1) section 119 (The code);
 - (2) section 138 (General rule-making power);
 - (3) section 149 (Evidential provisions); and
 - (4) section 157(1) (Guidance).

Commencement

- B. This instrument comes into force on 6 April 2006.

Amendment to the Glossary of definitions

- C. The Glossary of definitions is amended in accordance with Annex A to this instrument.

Amendment to the Market Conduct sourcebook

- D. The Market Conduct sourcebook is amended in accordance with Annex B to this instrument.

Citation

- E. This instrument may be cited as the Market Conduct Sourcebook (Amendment No 7) Instrument 2006.

By order of the Board
23 March 2006

Annex A

Amendment to the Glossary of definitions

In this Annex, underlining indicates new text.

Insert the following new definition in the appropriate alphabetical position:

metal market
aberrations regime

The practices set out in the London Metal Exchange's document "Market Aberrations: The Way Forward" published in October 1998 which govern the behaviour expected of long position holders, as clarified and explained by Schedule 1 to the Memorandum from the Executive Director, Regulation and Compliance, London Metal Exchange, to All Members of the London Metal Exchange dated 15 December 2005.

Annex B

Amendments to the Market Conduct sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

1.6.14 E The following are accepted by the FSA as *accepted market practices* for the purposes of *market abuse (manipulating transactions)*:

- (1) ~~The practices set out in the London Metal Exchange's document "Market Aberrations: The Way Forward" published in October 1998~~ *metal market aberrations regime* ~~which govern the behaviour expected of long position holders (see MAR 1 Annex 2G).~~

...

1.9.3 C *Behaviour* that complies with the requirements imposed on long position holders in the ~~London Metal Exchange's document "Market Aberrations: The Way Forward" published in October 1998~~ *metal market aberrations regime* will not amount to *market abuse (distortion)*.

...

MAR 1 Annex 2 G

Accepted Market Practices

...

Table: Part 2 – Accepted Market Practice: Market aberrations on the London Metal Exchange

Description of the AMP:	
Behaviour conforming with the London Metal Exchange Document "Market Aberrations: the Way Forward" published in October 1998 <u><i>metal market aberrations regime</i></u> which governs the behaviour expected of long position holders in this market.	
Rationale for why the practice would constitute manipulation	
Behaviour which gives rise to the application of the London Metal Exchange Document "Market Aberrations: the Way Forward" published in October 1998 <u><i>metal market aberrations regime</i></u> may involve transactions or orders to trade which:	
(i)	give or are likely to give, false or misleading signals as to the supply of or demand for or price of <i>financial instruments</i> ;
(ii)	secure, by a person or persons acting in collaboration, the price of one or several <i>financial instruments</i> at an abnormal or artificial level.

List of Factors
The following factors were taken into account by the FSA when assessing behaviour conforming with the London Metal Exchange Document "Market Aberrations: the Way Forward" <i>metal market aberrations regime</i> as an accepted market practice:
<i>The level of transparency (to the rest of the market) of the practice in question</i>
The Metal Market Aberrations Regime <i>metal market aberrations regime</i> has been published to the market by the Exchange on which it applies. The transparency criterion is therefore met. Those who have long positions at or above the thresholds specified in the Market Aberrations Regime <i>metal market aberrations regime</i> are required to advertise to the market that they will be prepared to lend stock.
<i>The need to safeguard the operation of market forces and the proper interplay of the forces of supply and demand</i>
The Metal Market Aberrations Regime <i>metal market aberrations regime</i> is designed to facilitate the operation of supply and demand on the market by avoiding abusive squeezes or other circumstances which could result in or involve distortion of the market for the investment in question.
...
<i>The degree to which the practice takes into account the trading mechanism of the relevant market and enables market participants to react properly and in a timely manner to the new market situation created by the practice</i>
The practice in the London Metal Exchange Document "Market Aberrations: the Way Forward" <i>metal market aberrations regime</i> was developed taking into account the trading mechanism of the LME. The behaviour required of long position holders under the London Metal Exchange Document "Market Aberrations: the Way Forward" , <i>metal market aberrations regime</i> is monitored by the LME compliance department on a daily basis using public and confidential regulatory information available to it. ...
<i>The risk inherent in the practice for the integrity of directly or indirectly related markets in the financial instrument, including any market in the financial instrument which exists on an exchange (or other trading venue) and related markets in directly related financial instruments:</i>
The practices in the London Metal Exchange Document "Market Aberrations: the Way Forward" <i>metal market aberrations regime</i> were <i>was</i> developed to maintain the integrity of the markets in <i>financial instruments</i> traded in the LME. The practices have <i>regime has</i> been shown to be an aid in maintaining the integrity of those markets.
<i>The outcome of any investigation of the practice by any regulatory body, including the extent to which a practice breaches existing rules or regulations designed to prevent market manipulation on the market in question or on directly or indirectly related markets in the EU-</i>
The FSA <i>FSA</i> supports the regime outlined in the London Metal Exchange Document "Market Aberrations: the Way Forward" <i>metal market aberrations regime</i> and, under the

previous Code of Market Conduct applying to trading on the LME, provided a safe harbour for behaviour in conformity with the ~~practices outlined in the document~~ metal market aberrations regime.

...

Overriding Principles

The ~~FSA~~FSA had regard to the following overriding principles to ensure that the ~~practices outlined in the London Metal Exchange Document "Market Aberrations: the Way Forward"~~ metal market aberrations regime ~~do~~ does not undermine market integrity, while fostering innovation and the continued dynamic development of financial markets:

...

Conditions relating to legitimate reasons and proper execution:-

The ~~regime in the London Metal Exchange Document "Market Aberrations: the Way Forward"~~ metal market aberrations regime specifies the behaviour required in the circumstances where it is triggered and conduct in conformity with the ~~regime~~ metal market aberrations regime is for legitimate reasons.

PERIMETER GUIDANCE (PENSION ACTIVITIES) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of its powers under section 157(1) (Guidance) of the Financial Services and Markets Act 2000 (“the Act”).

Commencement

- B. This instrument comes into force on 6 May 2006.

Amendments to the Perimeter Guidance manual

- C. The Perimeter Guidance manual (PERG) is amended in accordance with the Annex to this instrument. The general guidance in PERG does not form part of the Handbook.

Citation

- D. This instrument may be cited as the Perimeter Guidance (Pension Activities) Instrument 2006.

By order of the Board
23 March 2006

New text to be added as Chapter 10

10 Guidance on activities related to pension schemes

10.1 Background

Q1. What is the purpose of these questions and answers (“Q&As”) and who should be reading them?

These Q&As are aimed at *persons* involved in the establishment or running of a pension scheme or in providing services to such persons and should be read, in particular, by:

- pension scheme trustees;
- those who provide services to pension schemes or their trustees; and
- employers or affinity groups who provide pension schemes for their employees or members.

They are intended to help such persons understand:

- whether they will be carrying on a *regulated activity* and so need to be an *authorised* or *exempt person* under section 19 of the Financial Services and Markets Act 2000; and
- whether their communications are *financial promotions* and, if so, whether they will be exempt from the restriction in section 21 of that Act.

The Q&As are primarily concerned with identifying the regulated activities (such as dealing or arranging deals in investments, managing investments or advising on investments) that may be carried on by persons (including trustees) who are involved with *occupational pension schemes* and personal pension schemes. They are also concerned, but only in relation to *stakeholder pension schemes*, with identifying when the regulated activity of operating such a scheme will be carried on (see Q26).

The Q&As complement the general *guidance* on regulated activities in Chapter 2 of our Perimeter Guidance Manual (“PERG”), the general guidance on insurance mediation activities in Chapter 5 of PERG (PERG 5) and the relevant legislation.

The Q&As that follow are set out in sections:

- general issues (PERG 10.2);
- issues for pension scheme trustees (PERG 10.3);
- issues for pension scheme service providers other than trustees (PERG 10.4); and
- issues for employers or affinity groups (PERG 10.5);

and are complemented by:

- Annex 1 : Flow chart showing the steps to be considered in deciding whether authorisation is needed;
- Annex 2: Flow chart showing the additional steps to be considered by trustees of occupational pension schemes and other persons in deciding whether authorisation is needed for managing the assets of such a scheme;
- Annex 3: Table summarising the regulatory position of pension scheme trustees and service providers;
- Annex 4: Table summarising the regulatory position of employers and affinity groups; and

- Annex 5: Table summarising the regulatory position concerning financial promotions by trustees, employers and affinity groups.

10.2 General issues

Q2. I propose to provide services to a pension scheme – in what circumstances will I need to be authorised by the FSA or be an exempt person?

You will need to be an *authorised* or *exempt person* if you will:

- be carrying on *regulated activities*;
- be doing so by way of business; and
- be doing so in the *United Kingdom*.

Q3. How will I know if my proposed activities are regulated?

Regulated activities are specified in the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 (“the *Regulated Activities Order*”). They include:

- *dealing* (broadly, entering into a transaction as principal or agent to *buy* or *sell* certain investments);
- *arranging* (broadly, bringing about an investment transaction between other parties or making arrangements to assist other *persons* to enter into such transactions);
- *managing investments* (broadly, discretionary management of assets that include or may include certain investments);
- *assisting in the administration and performance of a contract of insurance* (broadly, notifying and providing evidence in support of or negotiating claims on behalf of policyholders);
- *safeguarding and administering investments*, being assets that include or may include certain investments (otherwise known as custody services);
- *advising on investments* (broadly, advising an investor on the merits of his *buying* or *selling* certain particular investments);
- *establishing, operating or winding up a stakeholder pension scheme*.

But some activities are specifically excluded from the FSA’s regulatory scope.

Q4. What kind of investments do these regulated activities relate to?

Securities, such as shares, debt securities, warrants or unit trusts, and *contractually based investments* such as options, futures and cash-settled instruments (contracts for differences) or long-term insurance policies with an investment element (such as unit-linked insurance or annuities). Some *regulated activities*, such as *arranging* and *advising on investments*, also relate to all *contracts of insurance*.

Q5. What exclusions are available?

There are various exclusions – some relate to a single activity and others relate to several. Further guidance on exclusions is given in the remaining questions.

Q6. How do I know if I am carrying on activities by way of business?

Whether a particular *person* will be carrying on a *regulated activity* by way of business (and so needs *authorisation* or exemption) will invariably depend on that person's individual circumstances. A number of factors need to be taken into account in determining whether the by-way-of-business test is met. These include:

- the degree of continuity;
- the existence of a commercial element;
- the scale of the activity;
- the proportion which the activity bears compared to other activities carried on by the same person which are not regulated; and
- the nature of the particular regulated activity that is carried on.

Corporate pension scheme trustees and other persons who provide professional services to pension schemes are likely to be carrying on their activities by way of business. Unpaid individuals who act as trustees are not likely to be. Neither are in-house trustee companies set up by an employer to operate its *occupational pension scheme* (“OPS”) or the employer if it acts as the trustee itself. In this respect, however, article 4 of the Financial Services and Markets Act 2000 (Carrying on Regulated Activities by Way of Business) Order 2001 (“the *Business Order*”) amends this test for trustees and other persons who manage the assets of an OPS. The effect of the amendment is that a trustee will need to be authorised if he is managing the investments of an OPS, whether or not he would normally be regarded as doing so by way of business. This is unless certain conditions are met (as explained in questions 7 to 22).

In addition, article 3(4) of the *Business Order* provides that any person who carries on an *insurance mediation activity* by way of business must be remunerated for doing so. Guidance on the application of the by-way-of-business test to insurance mediation activities is in Chapter 5.4 of PERG.

10.3 Pension scheme trustees

Q7. I am a trustee of an occupational pension scheme (“OPS”) – will I need to be authorised if I also manage the investments held under my scheme?

Only if you are involved in the day-to-day management of the assets and your scheme is not a *small self-administered scheme*.

Occupational pension scheme trustees are subject to special treatment when they manage investments held under their scheme. This means that they may need to be *authorised* even though they are not carrying on their managing activities by way of business in the normal sense (they may be unpaid individuals for example).

That aside, and broadly speaking, you will not need to be *authorised* if:

- you delegate day-to-day decision-making about *securities* or *contractually based investments* to an *authorised, exempt* or *overseas person* (typically a fund manager); or
- the only day-to-day decisions you take relate to pooled investment products and are only taken after you have obtained and considered advice from a regulated person; or
- your scheme is fully insured and you do not take or need to delegate any day-to-day decisions; or
- your scheme is a small self-administered scheme.

Q8. What decisions can I make, as a trustee of an OPS (other than a small-self administered scheme), if I am not authorised?

You can make:

(1) strategic decisions, such as decisions:

- about the adoption or revision of a statement of investment principles as required by relevant pensions legislation; or
- about the formulation of a general asset allocation policy; or
- about prescribing the method and frequency for rebalancing asset classes, and the permitted ranges of divergence, following the setting of the general asset allocation policy; or
- about the proportion of the assets that should constitute investments of particular kinds; or
- affecting the balance between income and growth; or
- about the appointment of fund managers; or
- as to which pooled investment products to make available for members to choose from under a money purchase scheme;

(2) decisions that are needed to be taken in exceptional circumstances, such as:

- in a take-over situation; or
- where the person managing the scheme's assets has a conflict of interest; or
- where the decision is sensitive (such as one relating to investments in the same market sector as the employer or in the employer's own securities); or
- where the decision raises sensitive policy considerations (such as investments in certain territories or markets or in ethical or green areas); or
- where the trustees are required to make decisions:
 - about investments acquired purely as a result of a demutualisation by an insurer or building society in which the scheme holds investments or deposits;or

- following a change in fund managers which results in the scheme holding investments which the new fund manager is unable or unwilling to take on;

(3) day-to-day decisions about investment in pooled investment products, namely:

- *collective investment schemes* such as unit trusts, limited partnerships, hedge funds or open-ended investment companies;
- shares or debt securities issued by an investment company such as an investment trust or a venture capital trust;
- contracts of insurance such as annuities or unit-linked investment policies;

(This is subject to the decisions being made only after you have taken and considered advice from an *authorised, exempt or overseas person* or an *exempt professional firm* (that is, a firm of solicitors, accountants or actuaries who can carry on incidental *regulated activities* without *authorisation*).);

and

(4) decisions of any kind about investing in assets that are not *securities* or *contractually based investments* – such as real property, cash or precious metals.

Q9. As an unauthorised OPS trustee, what decisions am I unable to make?

You will be unable to make most day-to-day decisions. Generally speaking, these will be:

- decisions to *buy, sell* or hold particular *securities* or *contractually based investments* such as a fund manager would be expected to make in his everyday management of a client's portfolio (other than day-to-day decisions about investment in pooled investment vehicles taken after obtaining advice as per Q8(3)); or
- decisions made as a result of regular or frequent interventions outside scheduled review meetings in the decision-making of external fund managers; or
- recommendations made to fund managers, on a regular basis, with a force amounting to direction relating to individual *securities* or *contractually based investments*.

Q10. As an OPS trustee, will I be making day-to-day decisions by implementing strategic decisions on a regular basis?

No. For example, you will not be making day-to-day decisions merely because the application of the method for rebalancing asset classes and permitted ranges of divergence result in mechanical changes being made regularly to the asset allocation policy. This is because the decisions are made at the time the method and frequency are set and not when those decisions result in a change to the policy.

Similarly, there may be occasions when you may determine that, in the absence of instructions from a member, his contributions will automatically be placed in a particular fund. Provided this follows a pre-determined procedure that is rigidly applied and not subject to frequent alteration, it may be regarded as the routine application of a strategic decision and not as a day-to-day decision in its own right.

Q11. As an OPS trustee, I need, from time to time, to sell investments to raise cash to meet obligations to scheme members. Is this likely to mean that I am making day-to-day decisions?

No, unless you are making regular decisions as to which particular investments to dispose of to release the necessary cash. This would not include situations where, in realising assets, you are merely applying pre-agreed strategic policy decisions with no element of discretion. In that situation, the decision is made at the time that the policy is set and is strategic.

Q12. Does the fact that, as an OPS trustee, I only infrequently make decisions about investments mean that the decisions I do make will not be regarded as day-to-day decisions?

No. The mere fact that a decision may be taken only infrequently does not, of itself, prevent that decision being a day-to-day decision. It is the nature of the decision that is important, not its frequency. For example, if you were responsible for the investment of scheme assets in a portfolio of Government stocks and debt securities, the fact that you might only occasionally need to make decisions about buying new, or selling existing, investments would not prevent those decisions being day-to-day decisions. Similarly, the fact that you may be the trustee of a small scheme where decisions about the investment of scheme assets arise only infrequently does not, of itself, prevent those decisions being day-to-day decisions.

Q13. As an OPS trustee, will I be making day-to-day decisions if I decide on the purchase of annuities to be held under the scheme?

Not in most circumstances. Typically, you may choose to select what you consider to be the most suitable annuity provider on each occasion that a decision has to be made. If this is the case, provided that you are not purchasing annuities on a frequent basis, it is unlikely that the decisions you make would be day-to-day decisions (on the basis that you are making strategic decisions about which provider to use rather than decisions about investment of the scheme assets). Less typically, your choice of annuity provider might be determined at the outset so that, each time an annuity has to be purchased, that chosen provider is used. If this occurs, you may be regarded as having made a strategic decision with regard to the most appropriate provider and then as carrying out that strategic decision on each occasion that an annuity is purchased.

But, even if your decision to purchase an annuity is a day-to-day decision, you can still make it. This is provided you meet the conditions for making decisions that involve taking and considering advice about investment in pooled investment vehicles (see Q8(3)).

Q14. As an OPS trustee, if I make decisions about the purchase of annuities on the winding-up of the scheme, am I making day-to-day decisions?

No. Decisions taken about annuities in such exceptional circumstances would not be regarded as day-to-day decisions. This also applies to decisions about annuities taken in the context of ensuring provision of benefits for a member's ex-spouse.

Q15. As an OPS trustee, I make investments on the instructions of members of the scheme. Does this mean that I have to be authorised as I have effectively delegated day-

to-day decision-making to persons who are not authorised, exempt or overseas persons? What about the member – is he then managing the assets of an OPS so as to need authorisation?

No, on both points. You will not be regarded as *managing investments* (so that issues about delegation of day-to-day decision-making do not arise) provided the investment is to be purchased solely for the benefit of the member and you, in practice, invariably seek to match the scheme's obligations to the member by purchasing those investments. This includes where the member instructs you to purchase a particular annuity. But the position may be different should you choose not to match the obligations that the scheme incurs through the members' instructions by purchasing the relevant investments. If you then make decisions about what alternative investments to make, you are likely to be *managing investments* and the decisions you make may be day-to-day decisions.

The member would be regarded as managing assets that belong beneficially to him rather than assets that belong to another. So, he would not be regarded as *managing investments* either.

Q16. Am I going to be managing investments by exercising voting rights conferred by investments that I hold as trustee under my OPS? If so, will this be viewed as my taking a day-to-day decision?

No, you will not be *managing investments* unless the exercise of the rights would result in your *buying, selling, subscribing for or underwriting securities or contractually based investments*. This will not usually be the case. For example, voting to support a take-over offer to be made by a company in which the scheme holds shares would not involve *managing investments* as it would not result in your acquiring or disposing of investments. Neither would voting on the re-appointment of company directors or auditors or on whether a company in whom the scheme holds shares should make a rights issue (although deciding to subscribe to the rights issue when it is made would amount to managing investments).

Deciding to accept an offer to buy company shares held by you under the scheme, in the context of a proposed take-over of that company, would involve *managing investments*. But the decision you make would be viewed as strategic and not a day-to-day decision.

Q17. When may a decision I make as an OPS trustee that results in my investing in a pooled investment vehicle other than an annuity be regarded as a strategic decision?

This will arise where the decision:

- represents the initial decision to invest the scheme wholly or to a substantial amount, and on an ongoing basis, in a particular vehicle such as a life policy or unit trust scheme (on the basis that an initial decision of this kind is of such importance to the scheme that it may be regarded as strategic); or
- may be seen to be a decision to appoint a discretionary fund manager.

Q18. When will a decision that I make as an OPS trustee be regarded as one to appoint a discretionary fund manager?

This will be the case when the decision:

- seeks to implement a strategic decision to invest part of the scheme assets in a particular area or asset class (such as venture capital or emerging markets);
- is based principally on the suitability of appointing the fund manager to manage that part of the scheme assets; and
- to use a pooled investment vehicle rather than a segregated portfolio is secondary to the decision to appoint the fund manager.

Where the circumstances surrounding the appointment of a fund manager suggest that the decision is day-to-day, you may still be able to make that decision. This is provided you meet the conditions for making decisions that involve taking and considering advice about investment in pooled investment vehicles (see Q8(3)).

Q19. As an unauthorised OPS trustee, I have made a decision to invest in an investment vehicle which allows me to switch between various sub-funds. Can I make decisions about switching between those sub-funds?

Yes. However, taking decisions of this kind other than to implement strategic decisions on asset allocation is likely to involve taking day-to-day decisions. So, you would need to meet the conditions for making decisions that involve taking and considering advice about investment in pooled investment vehicles (see Q8(3)).

Q20. I understand that, as an unauthorised trustee of a small self-administered scheme (a “SSAS”) I can make day-to-day investment decisions. What types of scheme qualify as a SSAS?

There are two kinds of scheme that qualify as a SSAS. These are:

(1) an “insured SSAS” - that is an OPS:

- that has no more than 50 members; and
- where:
 - the contributions made by or for each member are used in the acquisition of a contract of insurance or an annuity on the life of that member;
 - the only decision to be made is the selection of the relevant contract; and
 - each member has been given the opportunity to make that choice himself, whether or not he chooses to do so; and

(2) a “12 relevant member SSAS” – that is an OPS:

- with no more than 12 relevant members (broadly speaking, ‘relevant members’ are existing or former employees for whom contributions are being or have been made and for whom benefits under the scheme are or may become payable);
- that is established under an irrevocable trust;
- where all the relevant members are trustees of the scheme (except those who are unfit to act or incapable of acting as trustee); and
- where all day-to-day decisions relating to the management of the assets of the scheme which are *securities* or *contractually based investments* (other than decisions that satisfy the conditions involving taking and considering advice about investment in pooled investment vehicles – see Q8(3)) are required to be taken by:

- all or a majority of the relevant members who are trustees; or
- an *authorised person* or *exempt person*, in each case acting either alone or jointly with all or a majority of the relevant members.

Q21. My 12 relevant member SSAS requires that all day-to-day decisions are taken by the trustee beneficiaries. The SSAS has an independent trustee who is not a beneficiary or an authorised or exempt person. If the independent trustee takes a day-to-day decision in breach of the scheme’s requirement, what effect does that have on him and on the relevant members?

The independent trustee's actions will not cause the trustee beneficiaries any regulatory difficulties, even though he has acted in breach of the requirements of the SSAS. This is because it is the existence of the requirement about day-to-day decision-making that is important and not whether it may be breached. The independent trustee may, as a result of having taken the decision, be regarded as managing the SSAS’s investments. But whether or not this would be the case will depend on the particular circumstances in which the decision came to be made.

Q22. I am a trustee of a 12 relevant member SSAS but not a relevant member. My role requires me to monitor investments made by the scheme – won't I be drawn into making day-to-day decisions?

No. You should be able to perform your role in monitoring and, where necessary, objecting to particular transactions without needing authorisation. Merely operating a blocking vote where a certain proposed investment would, for whatever reason, be prohibited, would not be regarded as taking part in the decision to make, or to refrain from making, that investment. If you merely express a view as to whether or not a certain proposed investment would be permitted you would not, thereby, be making a decision to buy the investment. However, to reduce the risk of being drawn into making day-to-day decisions, you may wish to make a point of not participating in a vote except where the investment could not, in your view, be made without breaching the relevant requirements.

Q23. My company acts as the corporate trustee for a self-invested personal pension scheme (“SIPP”). Will it need to be authorised?

No, provided it is able to satisfy various exclusions. But note that, under government proposals for reforming the way in which personal pension schemes are permitted to be established and registered, it may need to be authorised by 6 April 2007 for operating a personal pension scheme – see HM Treasury’s Consultation Document entitled “Proposed changes to the eligibility rules for establishing a pension scheme - A consultation document, September 2005”. This is available on HM Treasury’s website at: http://www.hm-treasury.gov.uk/consultations_and_legislation/pension_scheme/consult_pensionscheme_index.cfm. The document sets out several options and indicates that the Treasury’s preferred option is to introduce a new regulated activity of establishing, operating or winding up a personal pension scheme other than a stakeholder pension scheme (where those activities are already regulated). The new regulated activity would come into force on 6 April 2007. At the same time, rights under a personal pension scheme would become an investment for the purposes of existing *regulated activities* such as *dealing, arranging, managing investments and advising on investments*. The FSA proposes to consult on further perimeter *guidance* about the changes to regulatory scope in this area during the course of 2006.

Your company's position until April 2007 will depend on a combination of the activities that it carries on and the availability of certain exclusions. These exclusions may also apply to trustees of pension schemes other than SIPPs with the exception of that for *managing investments* (which will not apply to a trustee of an OPS).

(1) Your company is likely to be *dealing in investments as principal* in entering into investment transactions on behalf of the trust. However, in general terms, it would avoid this if either:

- it is a bare trustee acting on the instructions of the member or his agent and it does not hold itself out as someone who provides a dealing service (see article 66(1) of the *Regulated Activities Order*); or
- it does not hold itself out to the public as someone who carries on business as a market maker or dealer in *securities* and, if it buys or sells *contractually based investments*, it only does so with or through a regulated person (see articles 15 and 16 of the *Regulated Activities Order*).

But you will not be *dealing in investments as agent* merely because you commit co-trustees to a transaction by entering into it on behalf of the scheme.

(2) Your company should not be *arranging* because this activity does not apply where a person arranges transactions to which he is to be a party (see articles 25 and 26 of the *Regulated Activities Order*).

(3) Your company is likely to be *managing investments* if it has discretionary control over the assets held under the trust. But it will not be managing investments if:

- it is acting solely on instructions from the members or from a fund manager or other agent appointed to instruct it on their behalf; or
- it is not holding itself out as an investment manager and is not remunerated for managing investments in addition to what it is paid for acting as trustee (see article 66(3) of the *Regulated Activities Order*).

(4) As trustee, your company is likely to be responsible for *safeguarding and administering investments* held as scheme assets. If it makes use of a specialist custodian it will be *arranging safeguarding and administration of assets*. These are potentially regulated activities. But they will not be if:

- your company is not holding itself out as a custodian and is not remunerated for providing custody services in addition to what it is paid for acting as trustee (see article 66(4) of the *Regulated Activities Order*); or
- (as respects arranging for another person to provide custody services) it delegates custody to a suitably *authorised* or *exempt person* (see article 66(4A) of the *Regulated Activities Order*).

(5) Your company will not be *advising on investments* unless it advises a prospective member on the merits of his *buying* or *selling* interests in *securities* or *relevant investments* to

be held under the trust. If it gives advice to its co-trustees about trust investments or to existing members about their interests under the trust, its advice will be excluded provided it is not remunerated for giving the advice in addition to what it is paid for acting as trustee (see article 66(6) of the Regulated Activities Order).

Q24. My company acts as corporate trustee of a trust-based stakeholder pension scheme. Does it need to be authorised?

This depends on the responsibilities that your company assumes as trustee. *Establishing, operating or winding up a stakeholder pension scheme* are regulated activities in their own right. These are functions that are often carried out by the trustees of a trust-based stakeholder pension scheme other than where the trustees are mere bare trustees. This is apart from establishing a scheme which is a function that may often be carried out by a third party such as a product provider. See Q25 to Q28 for further guidance on these activities.

Q25. What does establishing a stakeholder pension scheme involve?

The establisher of a personal pension scheme is the *person* responsible for putting in place the arrangements founding the scheme and registering it with HM Revenue & Customs. With a trust-based scheme, this will usually be the person who executes the trust as principal. In a scheme established by deed poll, it will usually be the person who enters into the deed poll. There will usually only be one person who establishes the scheme. Any professional firms that he may employ to act as his agent (such as solicitors) would not be establishing the scheme. The establisher may also be the operator but need not be. An employer will not be establishing a stakeholder pension scheme purely as a result of his having designated such a scheme to meet the statutory requirement to do so.

Q26. What does operating a stakeholder pension scheme involve?

The 'operator' is the *person* responsible, under the scheme's constitution, for ensuring continuing compliance with the management and administration requirements in respect of the assets and income of, and the benefits payable under, the scheme as imposed under relevant pensions and tax legislation. For example, with a trust-based scheme, the trustees will often be the operator by virtue of the responsibilities they assume under the trust deed. In situations where the trustees' role is merely to act as a bare trustee holding the scheme assets, it may be the case that there is a third party who has responsibility for the management and administration of the scheme and its assets and who will be the scheme's operator. The scheme may be established by an *authorised person* who acts as a provider of investment products or services to the scheme. This does not make that person the operator of the scheme if, as a matter of fact, he has appointed another person (such as a trustee) to carry out all of the operator's functions in his place.

Q27. What is my position as the operator of a stakeholder pension scheme if I delegate day-to-day functions such as administration of the scheme or management of the scheme assets to another person?

A *person* who accepts responsibility, and remains responsible, for carrying on a *regulated activity* is carrying on that activity even though he may delegate or outsource the day-to-day carrying out of the functions to another person. So, if the operator of a scheme delegates some or all of his functions to another person, he will still be the regulated operator of the

scheme. At the same time, none of the people to whom he delegates his activities will become an operator of the scheme. However, they may be carrying on other regulated activities in performing their delegated or outsourced tasks (such as *arranging* or *managing investments*), in which case they will be subject to regulation for those activities.

Q28. What does winding-up a stakeholder pension scheme involve?

The *person* who winds-up a *stakeholder pension scheme* will be the person who is responsible for putting in place the arrangements for bringing the scheme to an end in a way that complies with the relevant provisions of the instrument that established the scheme and any relevant rules under pensions or tax legislation. This will, more often than not, be the operator of the scheme.

Q29. I am one of several trustees of a pension scheme. Sometimes I arrange an investment transaction on behalf of all the trustees but another trustee actually signs the purchase agreement and becomes the registered owner of the trust asset – does this mean that I could be regarded as arranging deals in investments on behalf of my fellow trustee?

No. You will not be *arranging* in these circumstances. This is because the interest that you acquire as trustee in the investment means that you will be regarded as being a party to the transaction. Arrangements made by a person in relation to transactions of which he is to be a party as principal or agent are excluded from *arranging*.

Q30. As a professional trustee of a pension scheme, am I affected by the implementation of the Insurance Mediation Directive (IMD)?

No. A pension scheme trustee may perform tasks on behalf of the other trustees (such as signing proposal forms or giving dealing instructions to insurers or brokers or notifying claims on the death of a scheme member). But he will not be providing an insurance mediation service to them. This is because, under the policy, he will share equal rights and equal responsibility with his co-trustees and so may be regarded as acting solely in the capacity of policyholder rather than intermediary. Also, the pension scheme trustee will not be providing an insurance mediation service on behalf of the members as the members will not be policyholders.

10.4 Pension scheme service providers other than trustees

Q31. I provide administration services to pension schemes. Will I require authorisation or exemption?

Yes, if your services include any of the following activities and you cannot make use of an exclusion.

(1) Receiving instructions from the trustees or members about the *buying* or *selling* of trust investments (being *securities* or *relevant investments*) and then instructing a broker or product provider to effect the transaction. This is because you are likely to be *arranging*.

This will include arranging for investments such as units in a unit trust scheme or in a life policy managed fund to be realised or surrendered to raise cash.

(2) Entering into investment transactions concerning *securities* or *relevant investments* on behalf of the trustees. This is because you will be *dealing in investments as agent*.

(3) *Assisting in the administration and performance of contracts of insurance*. This will only be likely to apply if you handle claims under policies held by the scheme on behalf of the trustees or other policyholders. For example, if you were making a claim for benefits payable on the death of a member under the ‘death in service’ benefits provided by a pension scheme. To be carrying on this regulated activity you must be assisting the trustees in both the administration and performance. Whilst dealing with claims on the death of a scheme member is likely to involve assisting in the administration of the contract of insurance, it will only involve assisting in the performance if you assist the trustees, as policyholders, to satisfy a contractual obligation that they have under it. This will typically include assisting the trustees to notify the claim in the manner specified in the policy. Detailed guidance on this regulated activity is available in Chapter 5.7 of PERG.

(4) Arranging the appointment of a custodian on behalf of the trustees. This is because you will be *arranging safeguarding and administration of assets*. But you will not be doing so simply because you instruct a fund manager to buy investments which the fund manager will then safeguard and administer in accordance with pre-existing arrangements.

Services that typically will not involve any regulated activities include:

- maintaining records;
- liaising with tax authorities;
- arranging actuarial advice;
- paying over contributions to a product provider or fund manager for investment in line with pre-agreed instructions; and
- paying out benefits.

Q32. What are the exclusions that might apply to me as a pensions administration service provider?

One or more of the following exclusions might be available to you depending on the nature and scope of the services you provide:

- *dealing in investments as agent* and *arranging* with or through an *authorised person* (articles 22 and 29 of the *Regulated Activities Order*);
- *dealing in investments as agent, arranging and advising on investments* as a necessary part of providing other non-regulated services (article 67 of the *Regulated Activities Order*); and
- services provided to a member of your *group* (article 69 of the *Regulated Activities Order*).

Q33. How would the exclusions for dealing or arranging with or through an authorised person in articles 22 and 29 apply to me as a pensions administration service provider?

The exclusions will apply to you if:

- you are an *unauthorised person*;
- you are *dealing in investments as agent* or *arranging* on behalf of the pension scheme trustee or member (your ‘client’);
- the transaction into which you are entering or which you are arranging is either with an authorised product provider such as a unit trust manager or is effected by an authorised intermediary such as a stockbroker;
- you do not advise your client on the merits of his entering into the transaction;
- you are not paid by anyone other than your client; and
- the transaction does not involve *contracts of insurance*.

So, the exclusions can apply to a transaction involving any investment other than rights under a contract of insurance. Given that many pension schemes invest wholly or partly in contracts of insurance, there may be limited occasions where articles 22 or 29 will exclude all dealing or arranging activity of this kind.

The requirement that you do not receive any payment other than from your client does not prevent you receiving payment from the *authorised person* but you must then treat the sums paid to you as belonging to your client. There is nothing to prevent you then using the sums to offset payments due to you from your client for services rendered to him. This is provided that you have your client’s agreement to do so.

Q34. When will regulated activities form a necessary part of my pension administration services so that I can use the exclusion in article 67?

Broadly speaking, a regulated activity will form a necessary part of your pension administration service if you could not reasonably expect to be able to provide your non-regulated administration services to the scheme trustee or member without conducting the regulated activity. This may apply where you are simply arranging for the payment of regular contributions that the broker or product provider will apply in line with standing instructions. This would, for example, apply to you if you were to be providing payroll services.

There are further conditions that must be met for the exclusion to apply:

- you must not be remunerated for the regulated activity separately from the remuneration you get from providing pension administration services; and
- you must not be a person who is required to be regulated by the *Insurance Mediation Directive*.

So, the exclusion cannot apply to you if you are providing a service that involves assisting in the conclusion or the administration and performance of *contracts of insurance*. But it may apply where you are providing other services relating to contracts of insurance (for example, arranging post-conclusion transactions such as surrenders or switches) or to other investments such as shares or unit trusts.

Q35. I provide pension administration services to a corporate pension scheme trustee who is a member of the same group as me. Does this mean that the exclusion for services provided to other group members in article 69 will apply to me?

Yes, provided the services:

- may properly be regarded as being provided solely to the trustee (as will be the case where the trustee has delegated or outsourced the carrying out of regulated activities to you but remains responsible to the members for the performance of those activities) and not to the members; and
- do not relate to *contracts of insurance*.

If the services do relate to contracts of insurance, you are still unlikely to need authorisation because you will only be carrying out *insurance mediation activities* by way of business if you are remunerated for providing services to third parties. Members of your *group* are not considered to be third parties.

Q36. As an administration service provider, I have authority over the pension scheme trustees' bank account. Does this mean I have to be authorised?

No. Holding or controlling money belonging to a client is not, of itself, a regulated activity. It is only if you are holding or controlling the money in connection with performing a *regulated activity* that you will need to be *authorised*. This may arise, for example, if you are arranging investment transactions on behalf of the trustees and have authority to settle the transaction using funds in the trustees' bank account.

Q37. The trustees authorise me, as administration service provider, to determine how much money should be transferred for investment each month to ensure that the scheme has enough cash available to meet its obligations. Does this have regulatory implications for me?

No, unless it results in your concluding that there is a need to realise funds and instructing a broker or product provider to liquidate investments to do so. Should that happen, you are likely to be *dealing in investments as agent* or *arranging* subject to the possible availability of an exclusion such as that in article 29 of the *Regulated Activities Order* (see Q33). If you are able to exercise delegated powers to determine, on the trustees' behalf, which particular investments should be sold or surrendered, you are likely to be *managing investments* and need to be an *authorised* or *exempt person*.

Q38. My services to the pension trustees include advising them on investments and investment strategy. Is this likely to be regulated advice and mean that I must be authorised or exempt?

Yes, if the advice:

- relates to a particular *security* or *relevant investment* such as the ABC unit trust scheme or the XYZ unit-linked insurance policy – advice on investment strategy or the choice of fund managers or brokers is not regulated advice;
- is advice and not simply information – so, there must be a recommendation to *buy*, *sell* or hold on to the particular investments;
- relates to the merits (that is the pros or cons) of buying or selling the particular investment; and
- is given to a *person* who is acting as an investor or who would enter into transactions as agent for the investor – so, advice to trustees about scheme investments will be given to them in their capacity as investors.

Q39. I give advice to the members of a pension scheme. Is this likely to be regulated advice and mean that I must be authorised or exempt?

It may be if the advice concerns a personal pension scheme but probably not if it concerns an OPS. The same factors apply to advice given to a member as apply to advice given to trustees (see Q38). But a particular factor is likely to be whether the member is himself *buying* or *selling* a *security* or *relevant investment* (a “regulated investment”).

With a trust-based pension scheme, the trustees will usually hold the legal title to the scheme’s investments with the members having a beneficial interest in those investments. These beneficial interests may themselves be regulated investments (under article 89 of the *Regulated Activities Order*) that can be bought or sold by the member.

So, for example, the interests which a member may acquire in *units* or *life policies* held under a SIPP will amount to a regulated investment held by the investor, even though the legal title to the investments is held by the trustees on the member’s behalf. Advice to the member on the merits of acquiring or disposing of those interests will then be regulated advice. But advice on the merits of acquiring or disposing of interests in other assets such as real property or cash will not be regulated advice.

Where an OPS is concerned, the interests obtained by members are specifically excluded from being regulated investments (see article 89(2) of the *Regulated Activities Order*). This means that a member of an OPS does not acquire a regulated investment simply through having additional voluntary contributions held under the trust for his benefit. So, advice to the member on the merits of his making additional voluntary contributions will not be regulated advice.

The position with *stakeholder pension schemes* is different. The rights under such a scheme (whether it is trust-based or contractual) are a specific type of regulated investment. So, advice on the merits of joining or leaving a stakeholder pension scheme will be regulated advice. This is the case even if the scheme is also an OPS.

The rights or interests that a person acquires under free-standing additional voluntary contribution arrangements will be regulated investments if and to the extent that the underlying investments are *securities* or *contractually based investments*. Where this is the case, advice on the merits of making free-standing additional voluntary contributions will be regulated advice.

If operating a personal pension scheme becomes a regulated activity in line with the government’s proposals (see Q23), the rights that a member obtains under any such scheme (including a SIPP) will become regulated investments in their own right and so advice on the merits of *buying* or *selling* such rights would be regulated.

Q40. I provide administration services to the providers of pension products such as insurers. Is my position any different to that of a person who provides administration services to pension scheme trustees?

Potentially, yes. This is because:

- you are unlikely to be *assisting in the administration and performance of a contract of insurance* because of the exclusion in article 39B of the *Regulated Activities Order* for persons who manage claims on behalf of a regulated insurer; and
- although you are likely to be carrying on *dealing* or *arranging* activities if you handle such things as arranging new policies, additional payments, surrenders, switches or assignments, some of the exclusions may not apply to you, for example:
 - the exclusions in articles 22 and 29 of the *Regulated Activities Order* (see Q33) will not apply because you will be remunerated by the authorised person rather than by the trustee; and
 - the exclusion in article 69 of the *Regulated Activities Order* (see Q35) will not apply because, as a group company of the insurer, you will not be providing services solely to it but also providing services directly to the trustees on behalf of the insurer.

Q41. Does the fact that I provide administration services to the providers of pension products such as insurers on an outsourced basis and act in their name affect my position?

No. The need for *authorisation* or exemption depends on the nature of the activities that you carry on. The mere fact that you may carry on the services under your authorised client's name does not, of itself, remove the need for you to be authorised or exempt in your own right if the services you perform involve *regulated activities*.

10.5 Employers and affinity groups (such as trade unions)

Q42. Will I, as an employer, ever need to be regulated for providing pension benefits to my staff?

No, unless you are carrying on a *regulated activity* and, if so, satisfy the by-way-of-business test (see Q44).

Q43. When am I, as an employer, likely to be carrying on a regulated activity?

You are unlikely to be carrying on a *regulated activity* in the case of an OPS (other than one that is also a *stakeholder pension scheme*) unless you provide services that involve *regulated activity* to the trustees (such as giving them advice or arranging trust transactions). Any service that you might provide to your employees concerning their rights under the OPS will not be a regulated activity. But if you provide your staff with the opportunity to participate in a *group personal pension scheme* or a *stakeholder pension scheme*, you are likely to be *arranging*. You may also be *advising on investments* if you provide your employees with advice on the merits of their joining the scheme (see Q39).

Q44. As an employer, I am offering staff a personal pension scheme. Will I satisfy the by-way-of-business test?

Most probably not. To need *authorisation* you would need to be carrying on the *arranging* activity on commercial lines. This means that you would need to be expecting to obtain some form of commercial benefit from providing your staff, or a third party such as the

intermediary who sets up the scheme for you, with services. This also applies if you were to be advising your employees on the merits of joining the scheme. However, giving advice also brings into play the restriction on making *financial promotions* (see Q47 to Q50).

As an employer, you are likely to be obtaining a commercial benefit from providing a pension scheme for your staff if you receive a direct benefit such as a commission or introduction fee. Or the commercial benefit may be indirect, for example, a reduction in premiums payable on another product such as key man or buildings insurance as an alternative to a direct fee.

But you would not gain a commercial benefit purely because:

- you negotiate special terms for your employees or for your own contributions or for both; or
- you hope to acquire or retain a more satisfied or happier or efficient workforce; or
- you recover the actual costs of arranging for your staff to be able to participate in the scheme.

In addition, if your scheme is an insurance-based scheme, such as a *group personal pension scheme*, your activity will potentially involve *insurance mediation activity*. If so, to satisfy the by-way-of-business test, you would also need to be remunerated.

The vast majority of employers or affinity groups do not set out to make a regular profit from arranging pension benefits for their staff or members and so will not satisfy the by-way-of-business test and will not need to be an *authorised or exempt person*.

Q45. As an employer, administration services that involve regulated activities are provided to my OPS in-house by my staff. Does this mean that I or my staff will need to be authorised or exempt?

No, on the basis that neither you nor they are likely to satisfy the by-way-of-business test. This is unless you are providing the services on a commercial basis (see Q44). This would arise if you provide the service in return for a reward that goes beyond the mere recovery of the costs you incur in doing so.

Q46. As an employer, I have designated a stakeholder pension scheme for my employees in accordance with the statutory requirement to do so. Does this mean that I am carrying on the regulated activity of establishing a stakeholder pension scheme?

No. The scheme has already been established by another person and you are merely choosing it as the stakeholder pension scheme which is to be offered by you to your employees.

Q47. As an employer, are there restrictions on my providing staff with details of pension schemes?

Yes, but in most circumstances you should be able to make use of an exemption.

If you make an invitation or inducement to your staff to join a *personal pension scheme* or a nominated *stakeholder pension scheme*, you are likely to be making a *financial promotion*. This is prohibited under section 21 of the Financial Services and Markets Act 2000 unless:

- you are an authorised person; or
- its contents are approved by an *authorised person*; or
- it falls within a relevant exemption.

It should be noted that the prohibition applies to financial promotions made in the course of business. It is our view that employers who promote their chosen pension schemes to their employees will be doing so in the course of business.

There are no restrictions on your promoting a non-stakeholder OPS to your employees. This is because neither rights under an OPS nor interests in any investments held under it (such as interests in additional voluntary contributions schemes) are treated as regulated investments.

Q48. What are the exemptions that are available to employers?

Where an employer is obliged by law to offer its employees a *stakeholder pension scheme*, any *financial promotion* made for that purpose will be exempt under article 29 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (“the *Financial Promotion Order*”).

There is also a specific exemption for employers who make financial promotions to their staff in article 71 of the Financial Promotion Order. This applies, broadly speaking, where:

- the promotion is about a *group personal pension scheme* or a *stakeholder pension scheme*;
- the employer contributes to the pension scheme and discloses details of its contribution to the employee;
- the employer does not obtain any direct commercial benefit from promoting the scheme to its employees; and
- the employer informs the employee in any written promotion of his right to seek independent financial advice from a regulated person.

Q49. Are there any other exemptions available to employers or any that apply to affinity groups?

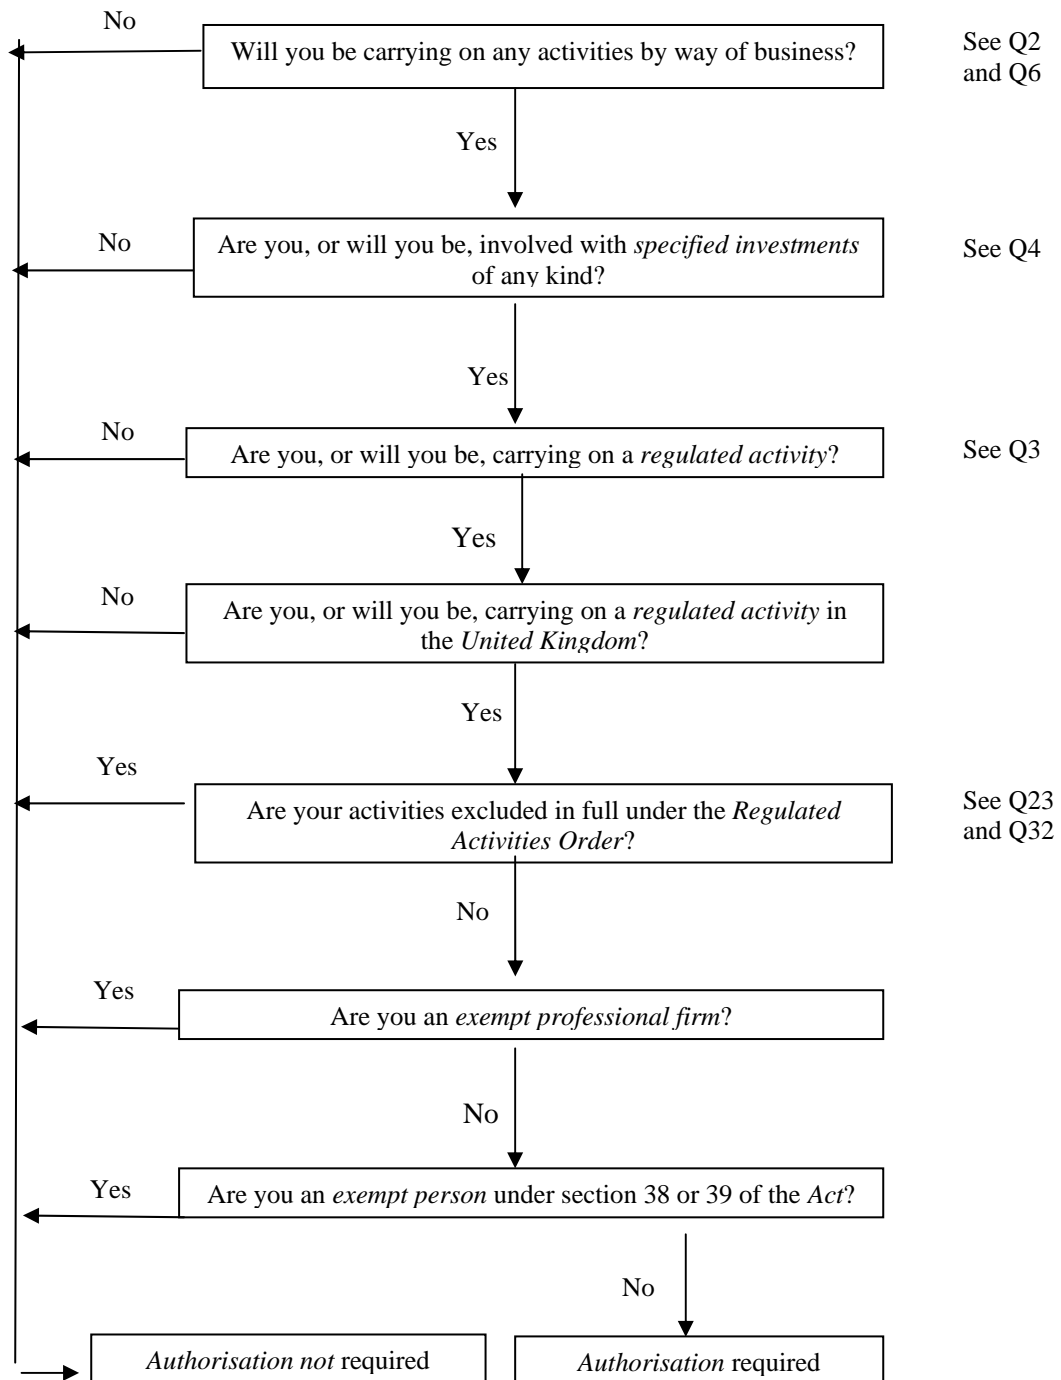

There are a few exemptions that may be relevant. For example:

- follow-up promotions, such as may be made after the employer has made a promotion under article 71 of the Financial Promotion Order – see article 14 of the Financial Promotion Order; and
- one-off promotions (that is, promotions that take account of the personal circumstances of the recipient) – see articles 28 and 28A of the Financial Promotion Order.

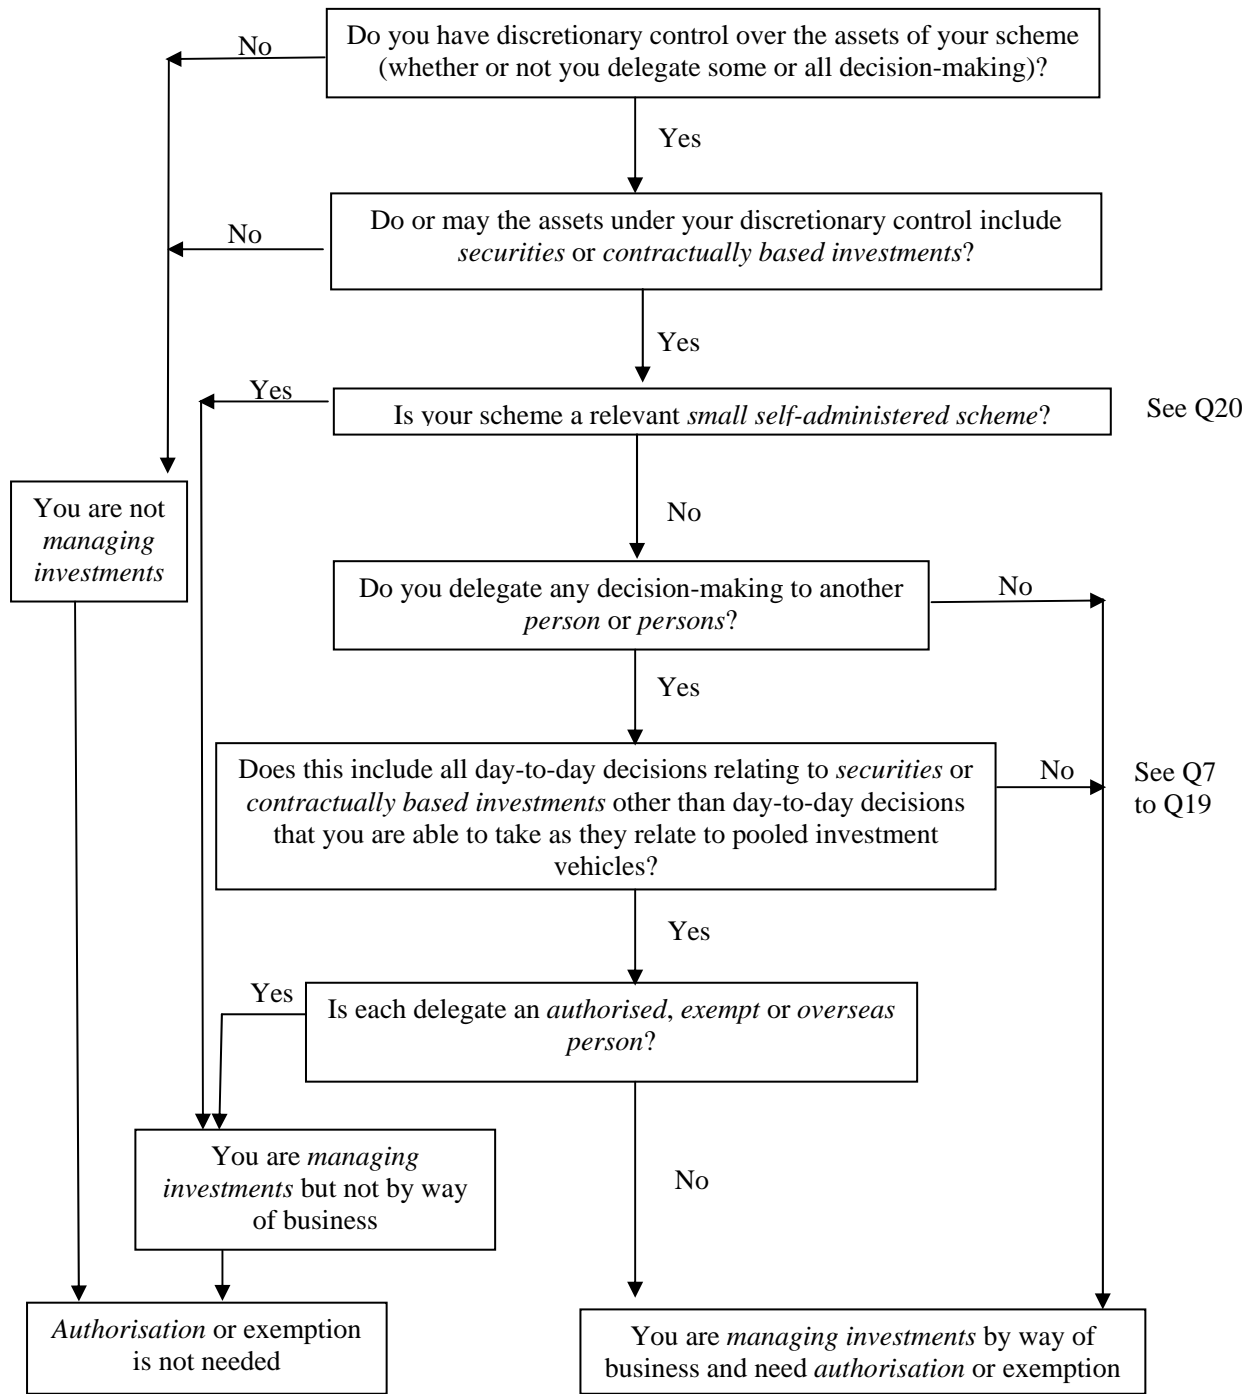

Q50. Can I find out more about the financial promotion restriction?

Yes. Chapter 8 of PERG has detailed *guidance* about the scope of the financial promotion restriction and the exemptions that are available.

10 Annex 1: Flow chart showing the steps to be considered in deciding whether authorisation is needed.

10 Annex 2: Flow chart showing the additional steps to be considered by trustees of occupational pension schemes and other persons in deciding whether authorisation is needed for managing the assets of such a scheme

10 Annex 3: Table summarising regulatory position of pension scheme trustees and service providers

Potential regulated activity	When will such regulated activities be carried on?
<i>Dealing in investments as principal</i> (article 14 of the <i>Regulated Activities Order</i>)	Pension scheme trustees will be entering into investment transactions as principal but should be able to rely on the exclusions in articles 15, 16 or 66(1) of the Regulated Activities Order (see Q23(1)).
<i>Dealing in investments as agent</i> (article 21 of the <i>Regulated Activities Order</i>)	<p>Service providers who enter into investment transactions under delegated authority from pension scheme trustees or members are likely to be dealing in investments as agent (see Q31(2)).</p> <p>Pension scheme trustees are not dealing in investments as agent simply because their actions result in co-trustees acquiring or disposing of interests in trust assets. This is because they will be acting as principals (see Q23(1)).</p> <p>Article 22 of the Regulated Activities Order excludes from its scope, subject to certain conditions, an <i>unauthorised person</i> who deals in investments as agent with or through an <i>authorised person</i>. This exclusion is disapplied where the arrangements relate to a contract of insurance (such as a unit-linked policy, an annuity, term assurance or any general insurance contract). Service providers may be able to make limited use of this exclusion (see Q33).</p> <p>Article 67 of the Regulated Activities Order provides an exclusion for persons whose profession or business does not otherwise consist of regulated activities and who deal in investments as agent as a necessary part of their profession or business without being separately remunerated for doing so. This exclusion does not apply, in broad terms, where a</p>

	<p>person is carrying on <i>insurance mediation</i>. Service providers may be able to make limited use of this exclusion – for instance, where providing payroll services (see Q34).</p> <p>Article 69 of the Regulated Activities Order excludes persons who are dealing in investments other than contracts of insurance as agent for other members of their <i>group</i>.</p> <p>However, service providers who are carrying on <i>insurance mediation activities</i> solely for, and are remunerated solely by, another group member will not satisfy the by-way-of-business test (see Q35).</p>
<p><i>Arranging (bringing about) deals in investments and making arrangements with a view to transactions in investments</i> (article 25 of the Regulated Activities Order)</p>	<p>Service providers who arrange transactions involving <i>securities</i> or <i>relevant investments</i> for pension scheme trustees or members are likely to be carrying on one or both of the <i>arranging</i> activities (see Q31(1)).</p> <p>Pension scheme trustees are not arranging simply because their actions result in co-trustees acquiring or disposing of interests in trust assets. This is because they will be acting as principal (see Q29).</p> <p>Service providers should be able to make good use of the exclusion in article 29 of the Regulated Activities Order for arranging deals with or through an <i>authorised person</i>.</p> <p>However, this exclusion does not apply where the arrangements relate to a contract of insurance (such as a unit-linked policy, an annuity, term assurance or any general insurance contract). This may affect the position of service providers where they are involved with such things as:</p> <ul style="list-style-type: none"> (1) arranging trust investments for the trustees; (2) arranging for employees to participate in a personal pension scheme; or (3) arranging for employees to participate in a <i>stakeholder pension scheme</i>.

	<p>Where such activities relate to a contract of insurance, the service provider is likely to need to be an authorised or exempt person provided he satisfies the by-way-of-business test (see Q33).</p> <p>Article 67 of the Regulated Activities Order provides an exclusion for persons whose profession or business does not otherwise consist of regulated activities and who are arranging as a necessary part of their profession or business without being separately remunerated for doing so. This exclusion does not apply, in broad terms, where a <i>person</i> is carrying on <i>insurance mediation</i>. Service providers may be able to make limited use of this exclusion – for instance, where providing payroll services (see Q34).</p> <p>Article 69 of the Regulated Activities Order provides an exclusion for persons who are arranging on behalf of other members of their <i>group</i>. This exclusion does not apply where the transaction involves a contract of insurance. However, service providers who are carrying on <i>insurance mediation activities</i> solely for, and are remunerated solely by, another group member will not satisfy the by-way-of-business test (see Q35).</p>
<p><i>Managing investments</i> (article 37 of the Regulated Activities Order)</p>	<p>Trustees of occupational pension schemes (whether or not they would otherwise be regarded as acting by way of business) will need authorisation or exemption for managing investments unless:</p> <ul style="list-style-type: none"> • the scheme is a small self-administered scheme that meets certain requirements; or • they do not need to take any day-to-day decisions about investing the scheme’s assets; or • they delegate the taking of all day-to-day decisions to an authorised, exempt or overseas person; or

	<ul style="list-style-type: none"> the only day-to-day decisions that they take relate to pooled investment vehicles and they obtain and consider advice from an expert (see Q7 to Q22). <p>The flow chart in Annex B sets out the steps that an OPS trustee will need to go through to determine whether he will need authorisation or exemption for managing investments. This also applies to any other person who may be managing the assets of an OPS.</p> <p>A personal pension scheme trustee will not need authorisation if he is unpaid. Other trustees who manage the investments of a personal pension scheme will not be managing investments provided they do not:</p> <ul style="list-style-type: none"> hold themselves out as providing a service of managing investments; or receive additional remuneration for managing investments (see Q23(3)).
<p><i>Assisting in the administration and performance of a contract of insurance</i> (article 39A of the Regulated Activities Order)</p>	<p>Pension scheme trustees will not be regarded as carrying on this activity simply because they make claims on behalf of their co-trustees as well as on their own behalf. This is where the trustees are acting jointly and share the same rights and obligations as policyholders (see Q30).</p> <p>Service providers are likely to carry on this activity if they notify a claim under the ‘death in service’ benefits under a scheme in conjunction with handling the claim on behalf of the pension scheme trustees. This is because such services involve assisting in both administration and performance. But they will not be carrying on this activity provided they do not assist the trustees to perform any contractual obligation that they may have under the relevant policy. For example, the trustees may notify the claim themselves in</p>

	<p>accordance with the policy leaving the service provider to deal with administration only. Redeeming units under a unit-linked contract of insurance with a view to funding benefits or assigning benefits for any reason will not involve making a claim or otherwise assisting in performance (see Q31(3)).</p> <p>The exclusion in article 67 of the Regulated Activities Order extends to persons whose profession or business does not otherwise consist of carrying on a regulated activity and who are assisting in the administration and performance of a contract of insurance as a necessary part of their profession or business without being separately remunerated for doing so. The exclusion only applies where a person is not required to be regulated by the Insurance Mediation Directive. This means, in effect, that service providers will only be able to use the exclusion in connection with assisting in the administration and performance of a contract of insurance if they are merely providing information (see Q34).</p> <p>Where a person is assisting in the administration and performance of a contract of insurance solely for, and is remunerated solely by, another <i>group</i> member, he will not satisfy the by-way-of-business test because he is not carrying on <i>insurance mediation activities</i> for a third party and so does not require to be authorised or exempt (see Q35).</p>
<p><i>Safeguarding and administering investments or arranging safeguarding and administration of assets</i> (article 40 of the Regulated</p>	<p>Some pension scheme trustees will not be carrying on this activity by way of business. For example, individuals who act as unpaid trustees of an occupational pension scheme (see Q6).</p>

<p>Activities Order).</p>	<p>Other trustees will not be carrying on this activity provided they do not :</p> <ul style="list-style-type: none"> • hold themselves out as providing a service of safeguarding and administering investments or arranging safeguarding and administration of investments; or • receive additional remuneration for safeguarding and administering investments or arranging safeguarding and administration of investments. <p>In addition, trustees will not be arranging safeguarding and administration of investments where they arrange for this to be done by a regulated person or a person acting on his behalf (see Q23(4)).</p> <p>Service providers would be arranging safeguarding and administration of investments if they arrange for the appointment of a custodian on behalf of the trustees. But they will not be arranging for another person to safeguard and administer simply by virtue of instructing a fund manager to buy investments which the fund manager will then safeguard and administer in accordance with pre-existing arrangements (see Q31(4)).</p>
<p><i>Establishing, operating or winding-up a stakeholder pension scheme</i> (article 52 of the Regulated Activities Order)</p>	<p>The trustee of a trust-based stakeholder pension scheme will often be its operator. This is where the trustee is responsible under the instruments establishing the scheme for complying with the management and administration requirements in respect of the assets and income of, and the benefits payable under, the scheme as imposed under relevant pensions and tax legislation (see Q26).</p>
<p><i>Advising on investments</i> (article 53 of the Regulated Activities Order)</p>	<p>Trustees of pension schemes will not be advising on investments provided the advice is given only:</p> <ul style="list-style-type: none"> • to a fellow trustee for the purposes of the trust; or

	<ul style="list-style-type: none"> • to a member about his interest in the trust fund, and provided that the trustee: • does not receive additional remuneration for advising on investments; and • is not required to be regulated under the Insurance Mediation Directive (which should not be the case either because he does not provide mediation services to his co-trustees or because he is not remunerated specifically for giving advice) (see Q23(5) and Q30). <p>Service providers would be advising on investments if they provide advice to the trustees on the merits of the trust making particular investments (see Q39 and Q40).</p> <p>Article 67 of the Regulated Activities Order provides an exclusion for persons whose profession or business does not otherwise consist of regulated activities and who are advising on investments as a necessary part of their profession or business without being separately remunerated for doing so. This exclusion does not apply, in broad terms, where a person is carrying on <i>insurance mediation</i>. Service providers may be able to make limited use of this exclusion – for instance, where providing actuarial advice to the trustees of an occupational pension scheme (see Q34).</p>
--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

10 Annex 4: Table summarising regulatory position of employers and affinity groups.

Activity carried on by employer or affinity group	Potential implications in terms of regulated activities and the need for authorisation
Establishing or setting up an <i>occupational pension scheme</i> or a <i>group personal pension scheme</i> or a <i>stakeholder pension scheme</i> .	Establishing an occupational pension scheme is not a regulated activity. Setting up a group personal pension scheme is likely to involve <i>arranging</i> (see Q43).

	<p>Establishing a stakeholder pension scheme is a regulated activity in its own right. But an employer who is designating a stakeholder pension scheme as required by law is not, as a result of that fact alone, establishing the scheme (see Q46).</p> <p>In any event, the employer or affinity group will only need to be authorised or exempt if they are carrying on regulated activity by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>
<p>Acting as trustee of a trust-based stakeholder pension scheme.</p>	<p>This will be a regulated activity if the trustee is operating the stakeholder pension scheme. But the employer or affinity group will only need to be authorised or exempt if, as trustee, they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>
<p>Arranging for employees to participate in an occupational pension scheme or a group personal pension scheme or a stakeholder pension scheme.</p>	<p>Arranging for employees to participate in an occupational pension scheme (other than one that is also a stakeholder pension scheme) is not a regulated activity as the employees are not acquiring investments. Arranging for employees to participate in a group personal pension scheme is likely to involve <i>arranging</i> as is arranging for employees to participate in a stakeholder pension scheme. But the employer or affinity group will only need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>

<p>Advising employees on the merits of participating in an occupational pension scheme or a group personal pension scheme or a stakeholder pension scheme, including advising employees against joining a personal pension scheme or advising them to transfer from a personal pension scheme.</p>	<p>Advice on the merits of participating in an occupational pension scheme (other than one that is also a stakeholder pension scheme) is not a regulated activity as the employees are not acquiring investments. Advice on the merits of participating in a group personal pension scheme or a stakeholder pension scheme will be a regulated activity. Advice against joining or to transfer from a personal pension scheme will be a regulated activity if the advice relates to a particular security or relevant investment that is or is to be held under the scheme or if the scheme is a stakeholder pension scheme. If the advice relates to personal pension schemes generally but not one in particular it will not be a regulated activity (see Q39 and Q40).</p> <p>But the employer or affinity group will only need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>
<p>Assisting in the administration of an occupational pension scheme or a group personal pension scheme or a stakeholder pension scheme.</p>	<p>Any of these could involve regulated activity (see Q31). But the employer or affinity group will only need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>
<p>Providing in-house administration services to the trustee of the employer's OPS and safekeeping services for documents of title such as bearer certificates.</p>	<p>This may amount to <i>safeguarding and administering investments</i> if the employer undertakes both activities.</p> <p>But the employer or affinity group will only</p>

	need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).
--	-----------------------------------------------------------------------------------------------------------------------------------------------

10 Annex 5: Table summarising regulatory position concerning financial promotions by trustees, employers and affinity groups.

Person communicating	Subject or purpose of communication	Need for approval or exemption available
Employer, affinity group or trustee	To provide information on any aspect or type of pension arrangements without seeking to persuade the recipient to take a particular course of action.	Approval or exemption not needed. Mere information will not be a <i>financial promotion</i> .
Employer, affinity group or trustee	To persuade employees or members to join an <i>occupational pension scheme</i> which is not a <i>stakeholder pension scheme</i> .	Approval or exemption not needed as interests arising under the trusts of an occupational pension scheme which is not a stakeholder pension scheme are not investments and so the communication will not be a financial promotion (see Q47).
Employer, affinity group or trustee	To persuade employees or members to join a stakeholder pension scheme or a <i>group personal pension scheme</i> .	Approval or exemption needed as rights under a stakeholder pension scheme will be, and rights under a group personal pension scheme are likely to be or to include, investments. Promotions about stakeholder pension schemes will be exempt where employers are

		<p>making them in order to meet their statutory obligation to provide a stakeholder pension scheme for their employees.</p> <p>Employers may be able to use the specific exemption for promotions made to employees if the conditions in the exemption are satisfied (see Q48).</p> <p>Individuals who act as unpaid trustees will not be making promotions in the course of business, so approval or exemption will not be required.</p> <p>Affinity groups may or may not be promoting in the course of business depending primarily on whether they are carrying on their main activities as a business.</p>
Employer or affinity group	To persuade employees or members to make free-standing additional voluntary contributions (FSAVCs) or to take out any other type of personal pension scheme (other than a stakeholder pension scheme or a group personal pension scheme).	Approval or exemption is likely to be needed as rights under FSAVCs and other personal pension schemes are likely to be or to include investments.
Employer, affinity group or trustee	To persuade employees or members to take out additional voluntary contributions (AVCs) or	Approval or exemption not needed as interests in AVCs or annuities arising under the trusts of an occupational pension scheme which is not a stakeholder pension scheme

	<p>an annuity to be held under an occupational pension scheme which is not a stakeholder pension scheme.</p>	<p>are not investments and so the communication will not be a financial promotion (see Q47).</p>
<p>Employer, affinity group or trustee</p>	<p>To persuade employees or members not to join, or not to leave the occupational pension scheme to join, a stakeholder pension scheme or a group personal pension scheme or not to switch funds by reference to which their benefits are calculated.</p>	<p>Approval or exemption not needed as persuading persons not to acquire, or not to dispose of, investments is not a financial promotion.</p>
<p>Employer, affinity group or trustee</p>	<p>To persuade members of a pension scheme to switch funds by reference to which their benefits are calculated.</p>	<p>Approval or exemption not needed when the scheme is an occupational pension scheme which is not a stakeholder pension scheme as the rights being switched are not investments and so the communication will not be a financial promotion (see Q47).</p> <p>Where the switching rights occur under a stakeholder pension scheme or a group personal pension scheme, approval or exemption will be needed as the rights are investments.</p> <p>Employers may be able to use the specific exemption for promotions made to employees where the promotion relates to switching rights under a group personal</p>

		<p>pension scheme or a stakeholder pension scheme and the other conditions in the exemption are satisfied (see Q48).</p> <p>Trustees will be exempt as they are making the promotion to a member and it relates to the management or distribution of the trust fund.</p>
Trustee	To persuade co-trustees to enter into an investment transaction.	Trustees will be exempt as they are making the promotion to a fellow trustee and it is made for the purposes of the trust fund.

FEES PROVISIONS (AMENDMENT) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 72 (The competent authority);
 - (2) section 74(4) (The official list);
 - (3) section 99(1) (Fees);
 - (4) section 101 (Listing rules: general provisions);
 - (5) section 138 (General rule-making power);
 - (6) section 156 (General supplementary powers);
 - (7) paragraph 17(1) of Schedule 1 (Fees); and
 - (8) paragraphs 1 (General), 4 (Rules), and 7 (Fees) of Schedule 7 (The Authority as Competent Authority for Part VI).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 1 May 2006.

Amendments to the Handbook

- D. The Fees manual (FEES) is amended in accordance with Annex A to this instrument.
- E. The Supervision manual (SUP) is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Fees Provisions (Amendment) Instrument 2006.

By order of the Board
27 April 2006

COB 6 Annex 1R Decision trees for stakeholder pension schemes (as required in COB 6.5.8R): text, content and format (R)

STAKEHOLDER PENSION DECISION TREES

Decision trees provide information and help you to answer the question: “Would a stakeholder pension be a good choice for me as part of my financial planning for retirement?”

Decision trees are intended to help you make your own choice about your pension arrangements. They do not give you financial or professional advice and you should not regard them as doing so.

[Insert current tax year]

You need to read the following notes before using the decision tree

flowcharts. There is also more information starting on page [insert page number] that you can refer to at any stage.

What is a stakeholder pension?

A stakeholder pension is a *private pension* - it's *not a State pension*. It must meet minimum standards laid down by the Government about charges, flexibility and the regular information you must be given. The standards are designed to help ensure that all stakeholder pensions give good basic value. There's more about this in the "Further information" section on page [insert page number].

With a stakeholder pension, you can pay regular contributions, and you can also make lump-sum contributions whenever you like. Your employer can also make contributions. You will benefit from tax relief on your own contributions – there's more about the tax advantages in the "Further information" section on page [insert page number].

Your contributions are invested to build up your own pension fund. The amount of your fund when you come to retire is not guaranteed and depends on how much has been paid in, the type of investment fund you choose, how those investments perform, and the level of charges. A stakeholder pension scheme will usually offer you a range of investment funds, with differing degrees of investment risk and potential investment growth.

You do not need to ~~can~~ retire to and draw your stakeholder pension benefits. You can take benefits at any time ~~between~~ from a certain minimum ages. The minimum age is currently increasing from 50 to 55, and this will happen ~~but~~ by April 2010 at the latest ~~it will be increased to 55~~. The precise timing of this increase may vary between different stakeholder pension schemes. ~~However, you must start to draw your benefits by age 75~~. You will need to bear this in mind when deciding on your retirement plans. You can't withdraw any money from your pension fund before you reach the minimum retirement age ~~retire and take your pension~~.

When you ~~retire~~ take benefits, you can choose to take up to 25% (a quarter) of your pension fund as a tax-free lump sum. And you can use the rest of your pension fund (or all of it, if you decide against a tax-free lump sum) to buy an "annuity". ~~The~~ An annuity will pay you a regular income during your retirement. That income will depend on the size of your pension fund and annuity rates at the time you take your pension. You may have to pay tax on your annuity income.

Is a stakeholder pension a good choice for me?

You can contribute to a stakeholder pension whether you are in employment, a fixed-contract worker, self-employed, or even not working. You can get one from a range of providers including a bank, building society, insurance company, investment company, or through a financial adviser.

Stakeholder pensions suit a wide range of people. But they are likely to be particularly attractive to people who have no existing pension provision apart from the State pensions, such as the self-employed or any employee whose employer does not contribute to a workplace-based pension scheme. ~~In some cases,~~ stakeholder pensions can be used to top up the benefits provided by an employer's own scheme. But if your employer offers to match any additional voluntary contributions (AVCs) that you choose to make to his scheme, this is likely to be a better way of topping-up than through your own separate stakeholder pension.

Stakeholder pensions have many advantages for many people, but they may not be the right choice for everyone. These decision trees are intended to help you decide what would be a good choice for you.

Do I need to save for my retirement through a stakeholder pension?

To answer this question, you must make your own judgment. Will your State pensions, any existing private pensions, any employer-sponsored pensions and any other sources of income be enough for you to live on when you retire? You need to think about the standard of living you want to enjoy when you retire and the income you'll need to support it.

Ask yourself these seven questions:

- ***Roughly how much will I need to live on when I retire?***

Try to work out how much money you will need to live on when you have retired to afford the things you'll want and the things you'll want to do.

- ***Will I qualify for the full basic State Pension?***

You cannot get your basic State Pension until you reach State pension age (currently 65 for men and 60 for women). Details of how the State Pension age for women is changing are on page [insert page number].

You can get a basic State Pension by building up enough qualifying years before State Pension age. A qualifying year is a tax year in which you have enough earnings on which you have paid, are treated as having paid or have been credited with, National Insurance (NI) contributions. Men normally need 44 qualifying years to get the full basic State Pension; women currently normally need 39 qualifying years to get the full basic State Pension. In 2020, when State Pension age for women is raised from 60 to 65, the normal requirement will increase to 44 qualifying years for the full basic State Pension.

To check the amount you will receive, you can get a State Pension forecast – see the details on page [insert page number].

The Government reviews the amount of the basic State Pension every year. The current rates are shown in a table under “Further information” on page [insert page number].

- ***Will I qualify for an additional pension through the State Second Pension (formerly State Earnings Related Pension Scheme – SERPS)?***

The State Second Pension is payable when you reach State Pension age, on top of the basic State Pension. The amount depends on your earnings while you were in employment and the National Insurance contributions you paid. Since April 2002, you may also qualify for an additional State Pension if you are a carer or have a long-term illness or disability.

Self-employed people do not qualify for the State Second Pension (formerly SERPS).

Those employees who were “contracted-out” of the State Second Pension will not qualify for the additional pension for the period when they were contracted out. Some people will be contracted out through an employer’s occupational pension scheme and some through private pension arrangements. Check with your employer or pension provider if you are not sure.

- ***Does my current employer provide a pension scheme and how much will that give me?***

Check with your employer if you are not sure about membership. If you are a member of an employer's scheme, you should get regular statements setting out what your benefits may be when you retire. If you cannot find these statements, check with your employer.

- ***Am I already contributing to a personal pension scheme or a stakeholder pension? If so, how much income will they give me?***

If you are already contributing to a personal pension or stakeholder pension, you need to find out what retirement income they might provide. Look at the most recent benefit statements you have been sent, or check with your pension plan provider.

- ***Have I any old pensions, maybe from previous employers' schemes or from personal pension schemes? If so, how much income will they give me?***

Check on the pension plans you have contributed to in the past but no longer pay into today. You need to have some idea of the retirement income you may get from them.

To check on the value of old pension plans, look at the most recent benefit statements you have been sent. If you cannot find any statements, contact your pension plan provider, for example the insurance company or the employer that offered the pension to you.

- ***Will the Government's Pension Credit make a difference to me?***

Pension Credit is designed to make sure that people aged 60 and over have a minimum income, and that those aged 65 and over with modest savings get some credit for having saved. These savings could, for example, be in the form of an employer's pension, a stakeholder or other personal pension, or the State Second Pension. This is not a complete list, and you could have other savings that will count.

~~Pension Credit means that, f~~For most people, ~~most of the time,~~ it will pay to save in a pension or some other vehicle, even with the effect of Pensions Credit. For a limited group of people, however, the decision will not be so clear-cut, and these people will have to think carefully about their personal circumstances. In particular, people in their fifties and over who have not been able to save much and have only a limited ability to save as they approach retirement should seek expert advice before they take out a stakeholder pension. See "Where to get more help" on page [insert page number].

You need to bear in mind that governments can change the rules for State pensions and benefits at any time. So it may be unwise to rely on any particular type or level of benefit being available when you retire.

There's more information about getting a forecast of your State pensions (page [insert page number]) and how to track down pensions provided by any former employers² or personal pensions (page [insert page number]).

If the income you expect in retirement is less than you want, you need to think about saving more to make up the difference. A stakeholder pension is one of your options. But before you decide anything, you need to think about your priorities.

What else should I think about before contributing to a stakeholder pension?

You may have other financial commitments that will affect what you can afford to contribute to a stakeholder pension. Or you may feel that other financial needs must come first. For example, ask yourself:

- ***What are my other financial commitments?***

For example, mortgage repayments, rent, life assurance, and credit cards. Make sure you do your sums before thinking about a stakeholder scheme and that you would still be able to afford your other commitments.

- ***Would I be prepared, if necessary, to give up anything so that I can pay into a stakeholder pension?***

Remember that saving through a pension scheme is a long-term commitment. Any change in how you spend your money may need to last for a long time.

- ***Should I be thinking of other things first?***

For example, you may want to consider life assurance protection for you and your family, or building up some “rainy-day” cash savings before thinking about a stakeholder pension.

If you are a member of your current employer’s pension scheme, it may make sense to pay additional voluntary contributions to that scheme rather than contribute to a stakeholder scheme. And if you are currently contributing to a personal pension or stakeholder pension, it may make sense to increase your contributions to that scheme rather than start a separate stakeholder pension, especially if you have a stakeholder pension that has kept to the original 1% limit on charges. There's more about charges under “Further information” on page [insert page number].

How much should I contribute to my stakeholder pension?

Contributions to stakeholder pensions can be as low as £20. But, even a regular monthly contribution of £20 over several years will not give you a large pension when you retire. And the older you are when you start saving, the less time there is for your pension fund to grow to something worthwhile.

Estimated pensions in the Pension Table

The Pension Table later on will give you a fair idea of the pension income you could get, depending on your age and contributions. **But please remember that the figures in the table are only estimates and are not guaranteed. You may get less, or you may get more.**

The pension figures are also shown before income tax. When you receive your pension during retirement you may be taxed on it.

The estimated pensions are based on the ~~new~~ stakeholder pension charge limit of 1.5% for the first 10 years– (if the stakeholder pension scheme has kept to the original 1% charge limit on the fund, then the estimated pension figures in the Pensions Table will be higher). There's more about charges under “Further information” on page [insert page number].

The figures in the table are calculated on the basis of the following assumptions:

Before you retire

Your monthly contributions increase in line with inflation.....2.5% a year.
Before charges, your fund grows by.....7% a year.
Charges deducted from your fund.....1.5% of fund a year for 10 years,then reducing to 1%.

When you retire

Your entire fund is used to buy an annuity, and you do not take any tax-free lump sum.
Annuity rates assume that the investment return after retirement is.....4.2 ~~0.6~~% a year in excess of inflation.
Your pension increases in line with inflation.
Your spouse will receive half your pension on your death.

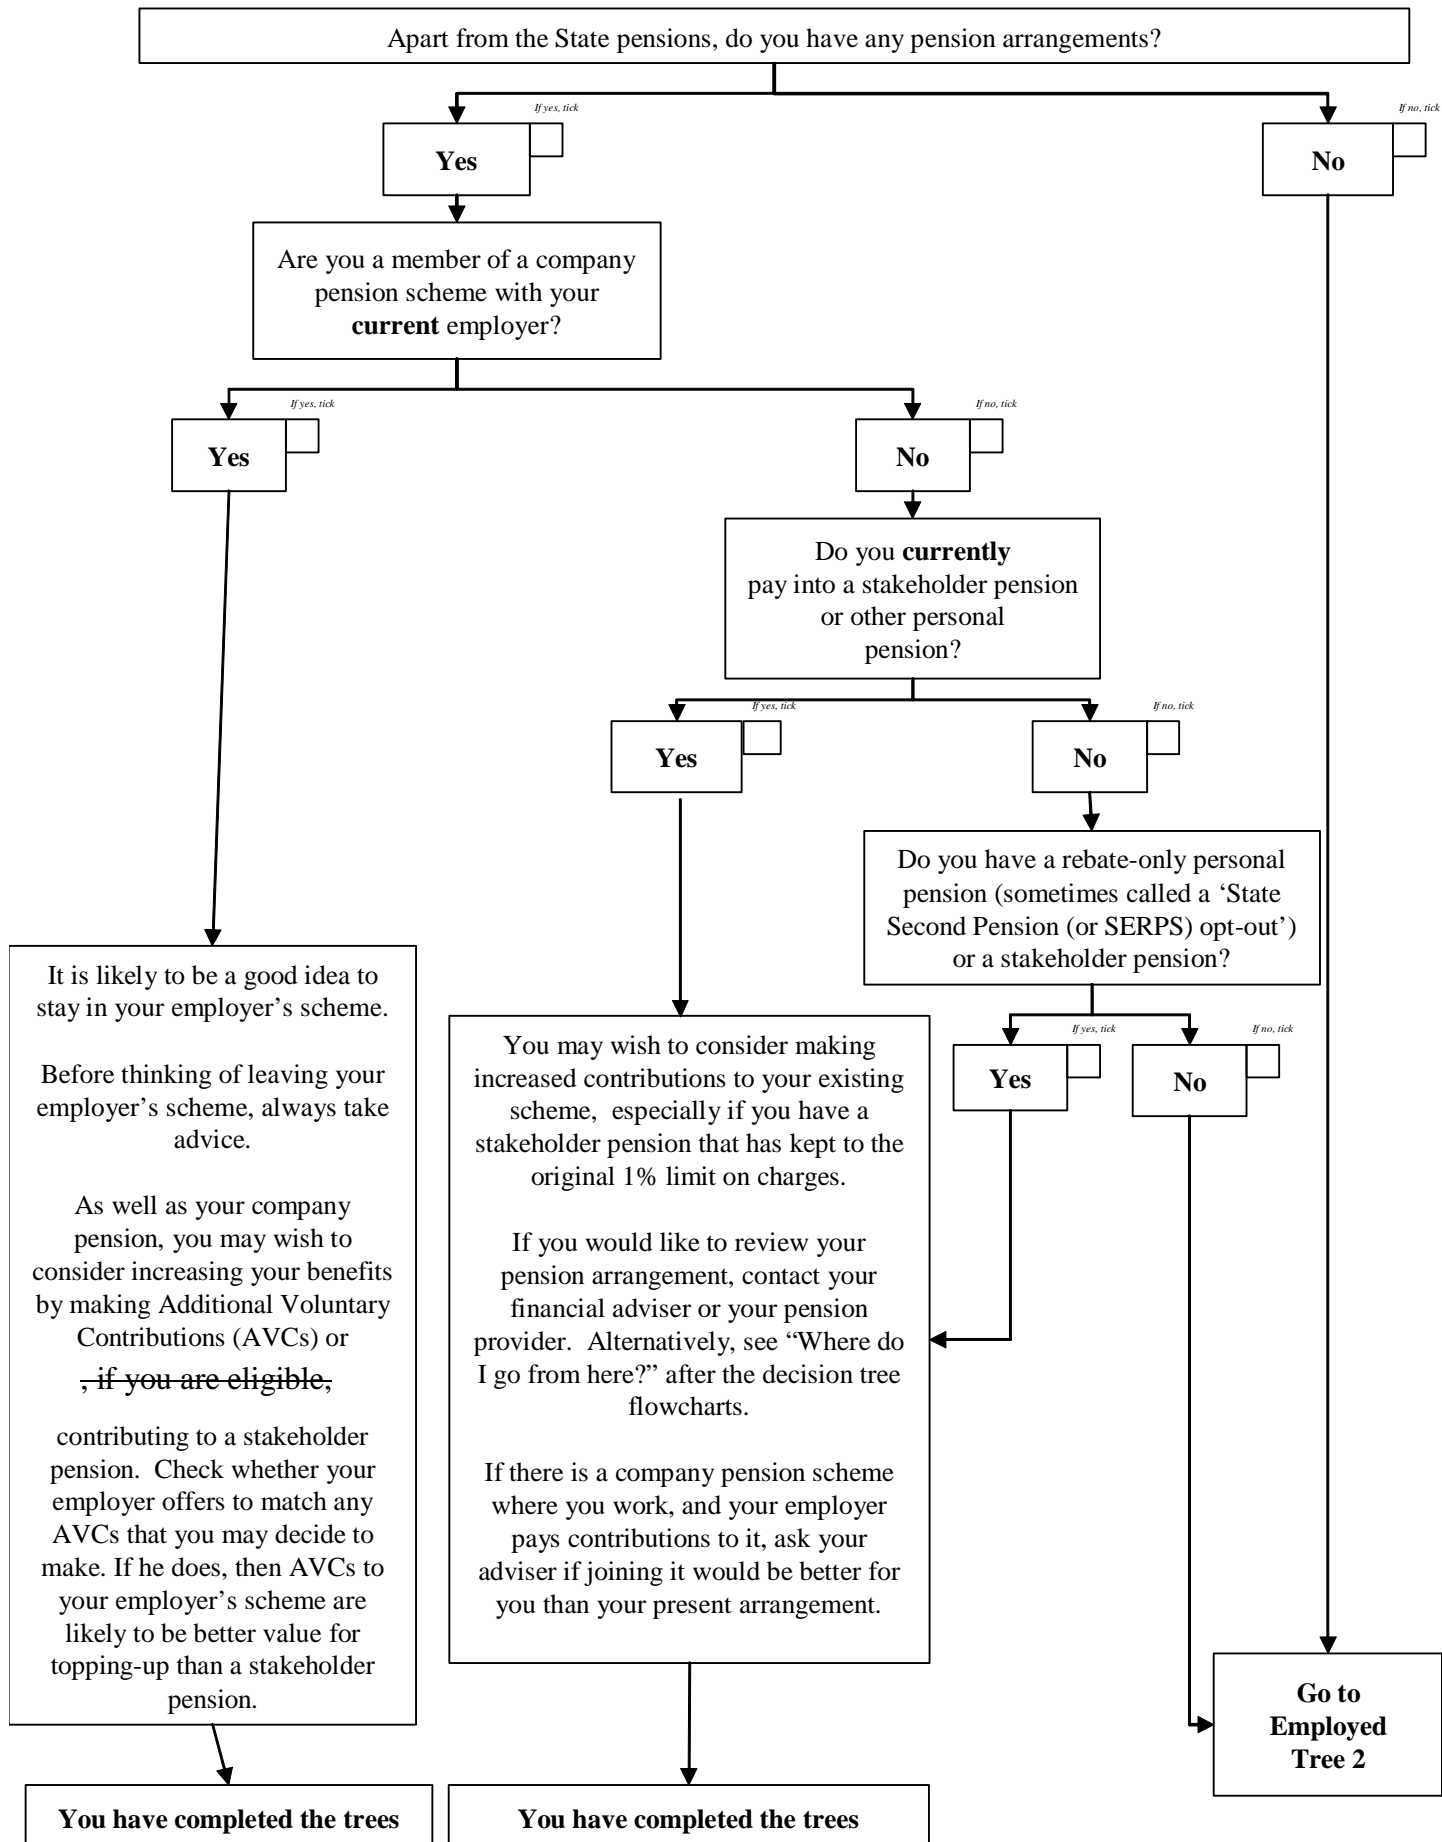

How do I use the decision trees?

- **These decision trees have been designed to help you decide whether a stakeholder pension would be a good choice for you. Please take the time to read and use them carefully, giving accurate answers to the questions. Because the decision trees do not give personalised advice, any decision you take is your own responsibility.**
- **There are separate decision trees for:**
 - **Employed people**
 - **Self-employed people**
 - **People who are not employed**
- **When you have found the right decision tree, work through the questions from the top of the page and tick the box for each question you answer.**
- **If the tree asks you about your present pension arrangements and you are not sure of the correct answer, find out the right information – don't guess.**
- **If the tree recommends you take advice, or if you are not sure what is right for you, then you should seek advice. You may have to pay for this advice.**
- **After the decision trees, you'll find further information about what to do next.**

Pension Table

How much should I save towards a pension?

THIS IS AN IMPORTANT DECISION

Most people save every month. It is better if you can keep up your monthly contributions.

The following table shows the **estimated monthly pension**, at today's prices, that you would get for different **regular monthly contributions**. The contribution shown is assumed to **increase each year in line with inflation**. The government will also add tax rebates to increase the actual amounts paid into your stakeholder pension (although all tax breaks are subject to change). The estimated pension figures include this tax rebate. They also assume that your pension will increase in line with inflation.

**Remember: these estimates are not guaranteed – you could get more or less than the amounts shown.
A stakeholder pension would be on top of any State pensions you are entitled to.**

The table gives you an idea of how much you need to pay now – as a regular monthly contribution – to receive the monthly pension you want when you retire. First look down the left-hand column to find the age closest to your age now. Then look across to find the monthly contribution you want to pay and the age at which you want to retire.

Your approximate age now	What you pay per month for the first year (tax rebates will be added to this amount)							
	£ 20		£ 50		£ 100		£ 200	
	Initial monthly pension if you retire at 65	Initial monthly pension if you retire at 60	Initial monthly pension if you retire at 65	Initial monthly pension if you retire at 60	Initial monthly pension if you retire at 65	Initial monthly pension if you retire at 60	Initial monthly pension if you retire at 65	Initial monthly pension if you retire at 60
20	<u>£ 98</u>	<u>£ 67</u>	<u>£ 245</u>	<u>£ 169</u>	<u>£ 490</u>	<u>£ 339</u>	<u>£ 980</u>	<u>£ 679</u>
25	<u>£ 79</u>	<u>£ 54</u>	<u>£ 197</u>	<u>£ 135</u>	<u>£ 395</u>	<u>£ 270</u>	<u>£ 790</u>	<u>£ 540</u>
30	<u>£ 62</u>	<u>£ 42</u>	<u>£ 157</u>	<u>£ 105</u>	<u>£ 314</u>	<u>£ 210</u>	<u>£ 628</u>	<u>£ 421</u>
35	<u>£ 49</u>	<u>£ 32</u>	<u>£ 122</u>	<u>£ 80</u>	<u>£ 245</u>	<u>£ 160</u>	<u>£ 490</u>	<u>£ 320</u>
40	<u>£ 40</u>	<u>£ 23</u>	<u>£ 101</u>	<u>£ 58</u>	<u>£ 202</u>	<u>£ 117</u>	<u>£ 404</u>	<u>£ 234</u>
45	<u>£ 27</u>	<u>£ 16</u>	<u>£ 68</u>	<u>£ 40</u>	<u>£ 136</u>	<u>£ 80</u>	<u>£ 273</u>	<u>£ 161</u>
50	<u>£ 18</u>	<u>£ 9</u>	<u>£ 47</u>	<u>£ 24</u>	<u>£ 94</u>	<u>£ 49</u>	<u>£ 188</u>	<u>£ 98</u>
55	<u>£ 11</u>	<u>£ 4</u>	<u>£ 28</u>	<u>£ 11</u>	<u>£ 57</u>	<u>£ 23</u>	<u>£ 114</u>	<u>£ 46</u>
60	<u>£ 5</u>		<u>£ 13</u>		<u>£ 26</u>		<u>£ 53</u>	

Have you found the level of monthly pension that you need in the table and can you afford the monthly contribution?

If yes, tick

Yes, I've found the pension I need and can afford the monthly contribution

Consider starting a stakeholder pension or restart making contributions to a stakeholder pension. If you are employed, check if your employer offers workplace access to a particular stakeholder pension and if he offers a contribution to it.
If in doubt seek help from an expert adviser.
See "Where do I go from here?" on the next page.

You have completed the trees

If no, tick

No, I can't find the pension I need or I can't afford the contribution

For details of where to get further help, see "Where do I go from here?" on the next page.

[Insert current tax year]

Where do I go from here?

You've worked your way through the decision trees and now need to make some decisions. You may be confident that contributing to a stakeholder pension would be a good choice for you, or you may want more help before reaching a decision on what to do.

Have you decided that a stakeholder pension is a good choice for you:

If so, it is a good idea to contact several firms selling stakeholder pensions and ask them for a brochure or a Key Features Document, so that you can compare products. The Key Features Document sets out important details about that particular firm's stakeholder pension product.

You can compare different stakeholder pension and personal pension schemes by using the FSA's *Comparative Tables*, which you can find at www.fsa.gov.uk/tables. You can also look at a register of stakeholder schemes published by The Pensions Regulator at www.thepensionsregulator.gov.uk/stakeholderpensions/ (~~The Pensions Regulator replaced the Occupational Pensions Regulatory Authority in April 2005~~).

You can also contact an adviser to help you choose a particular stakeholder provider. See ~~the list~~ [Where to get more help](#) below ~~of useful contacts~~.

Do you need more help?

You may need to get more help before making a decision, particularly if you are in one or more of the following situations:

- You already have a pension arrangement but want to know if you should save more.
- Your personal circumstances do not seem to fit the questions in the decision trees.
- You wish to get advice that takes account of all your personal circumstances.
- You are not sure how to answer some of the questions in the decision trees.
- You are not sure if you are making the right decision.
- You feel you cannot afford to save for retirement.

You should consider getting advice if:

- you are not sure that saving through a pension plan is a good idea for you; or
- you want to look at other ways of saving and investing for the long term.

Some organisations that may be able to help you are listed below.

Where to get more help

You could contact the Pensions Advisory Service helpline on 0845 6012923. Their information is free but call charges may vary.

You can also visit their website at www.stakeholderhelpline.org.uk

If you already have a financial adviser, you may want to speak to them about your retirement needs. If you do not have a financial adviser but want to talk to one, the following organisations can help:

- IFA Promotions: 0800 085 3250 or at www.unbiased.co.uk
- Institute of Financial Planning: 0117 945 2470 or at www.financialplanning.org.uk
- The Personal Finance Society: at www.thepfs.org/findanadviser
- Solicitors for Independent Financial Advice: 01372 721172 or at www.sifa.co.uk

Alternatively, contact the pension provider of your choice.

Remember that advisers may charge for any help or advice they give you, so check first on how much you would have to pay.

The next section gives further detailed information about stakeholder pensions, State pensions and how to track down old pension schemes.

Further information

The minimum standards

Stakeholder pensions must meet the standards laid down by the Government.

The standards include:

v **Charges**

Providers of stakeholder pensions usually charge for managing your money. There is an upper limit of 1.5% of the value of your fund each year for the first 10 years (so on a fund value of £10,000, the maximum charge is £150 a year), which then reduces to 1%.

But if you started your stakeholder pension before 6 April 2005, the maximum that you can be charged is ~~still~~ 1%. If you took out a stakeholder pension before 6 April 2005, it may be cheaper to continue contributing to it rather than take out a new stakeholder pension.

v **Flexibility**

You can contribute regularly or occasionally. It is always best to make regular weekly or monthly contributions but you can change the amount. You can pay in as little as £20, and you can stop paying in without having to pay any penalty, and restart later.

If you are employed and your employers provide a stakeholder pension, they may, if you wish, deduct your contributions direct from your pay and put them into your pension fund.

You can take your stakeholder pension with you when you change jobs. You can switch to another stakeholder pension at any time if you want to, without having to pay any charges for the transfer.

v **Information**

Your stakeholder pension provider must give you regular information about your fund. This will include an annual statement to let you know how much you have paid in and how your fund is growing. It will also include a forecast of how much your pension could be in today's prices. Look out for this forecast – it's called a Statutory Money Purchase Illustration – which is updated each year and will help you decide whether you are making enough provision for your retirement.

v **Investments**

But one thing you must understand is that **the minimum standards do not necessarily mean that your money is protected**. The performance of your stakeholder pension depends on the type of investment fund you choose and how those investments perform. Remember that investments linked to the stock market can fall as well as rise.

You don't have to make decisions about how your contributions are to be invested. Stakeholder pensions must provide what is called "**lifestyling**" for anyone who does not want to make a choice. Lifestyling means that at least five years before retirement your pension savings will start to be moved into less risky investments. This will help to guard against falls in investment value as retirement approaches. You can, however, choose to turn off the lifestyling before it begins.

Tax relief

Everybody who contributes to a stakeholder pension will get tax relief on their contributions.

Under present tax arrangements, for each £1 you pay into your stakeholder pension fund, HM Revenue and Customs will pay an extra 28p into your fund, even if you don't normally pay income tax.

Example

If you pay in £50 a month, income tax relief will increase your contribution to £64.10.

The Government has simplified the tax rules for pensions since April 2006. Under the new tax rules, you can pay as much as you like into a stakeholder pension, **but there are limits on the amount of tax relief given.** You will receive tax relief on yearly contributions made by and for you in any year up to:

- £2,808; or
- 100% of your UK earnings;

whichever is more.

~~Because of the tax advantages, there are limits on how much you can contribute to a stakeholder pension. These limits are set by HM Revenue and Customs and depend on your taxable earnings and your age. There are also special limits for people without any earnings and those who are members of employers' occupational pension schemes.~~

Most people can contribute up to £3,600 to a stakeholder pension in any tax year, including basic-rate tax relief. This means you could pay in £2,808 and the income tax relief would increase your contribution to £3,600.

~~If you are self-employed or in non-pensionable employment you may be able to contribute more than £3,600 and still get income tax relief, depending on your age and earnings. For example, up to age 35 you can contribute up to 17.5% of your earnings in any tax year. If you are over 35, there is a scale that allows you to contribute higher percentages of your earnings.~~

If you pay income tax at the higher rate, you will be able to claim back the extra tax from HM Revenue and Customs at the end of each tax year.

Even if you have no form of paid employment, you can set up a stakeholder pension. You can then benefit from tax relief on your contributions, even if you don't pay any income tax.

There is however a maximum "annual allowance" – set at £215,000 for tax year 2006/07 – which applies to all contributions made by you and on your behalf (including from an employer). If the contributions made by and for you in any year exceed the annual allowance, the contributions above the annual allowance will still attract tax relief, but you will have to pay a 40% tax charge on any contributions which exceed the annual allowance.

There is also an overall "lifetime allowance" on the total amount of money you can save in your pension free of any tax charge when you come to draw your benefits. This is set at £1.5 million for tax year 2006/07, rising in stages to £1.8 million by tax year 2010/11. It includes the value of all the other current or old pension schemes you may have from previous jobs. There is information on how to get details of your old pension plans on page [insert page number].

The Government is simplifying the tax rules for pensions from April 2006. From then on, you will be able to contribute as much of your taxable earnings to your pension as you want – up to a maximum limit set at £215,000 for tax year 2006/07 – and still benefit from tax relief.

~~There will also be an overall "lifetime allowance" on the total amount of money you can save in your pension and still benefit from tax relief. This is set at £1.5 million for tax year 2006/07 and also includes the value of old pensions from previous jobs. There is information on how to get details of your old pension plans on page [insert page number].~~

State pensions

Rates of State pensions and benefits change every year. The following table shows the current rates of basic State Pension (assuming a full National Insurance contribution record) and the minimum income provided by Pension Credit.

THE BASIC STATE PENSION AND PENSION CREDIT RATES GIVEN HERE ARE THOSE ANNOUNCED BY THE GOVERNMENT AS APPLYING IN THE TAX YEAR [Insert current tax year].

	Weekly	Monthly equivalent
BASIC STATE PENSION from age 65 (men) or 60 (women)		
One person with a full NI contribution record	[...]	[...]
Full rate based on a spouse's NI contribution record	[...]	[...]
Couples who have <i>both</i> paid full National Insurance contribution	[...] each	[...] each
PENSION CREDIT guarantees a minimum income from age 60 of at least:		
Single person	[...]	[...]
Couple	[...]	[...]

You can get a forecast of your State pensions by calling the Retirement Pension Forecasting Team on 0845 3000 168, or if you have hearing or speech difficulties and have a textphone, on textphone 0845

3000 169. Lines are open from 8am to 8pm Monday to Friday and 9am to 1pm on Saturday. You can complete an application form over the phone or ask for the forecast form BR19 to be sent to you. Or you can write to:

Retirement Pension Forecasting Team
The Pension Service
Room TB001
Tyneview Park
Whitley Road
Newcastle upon Tyne
NE98 1BA

You can also complete the form on the Internet using the Pension Service website, www.thepensionsservice.gov.uk/resourcecentre/e-services/home.asp then print it out and post it in the normal way.

There are changes to the State Pension age which affect women born on or after 6 April 1950. The State Pension age for women will be increased gradually over a ten-year period from 2010 so that by 2020 women born on or after 6 April 1955 will not get a State Pension until age 65. For more information on these changes, see the Pension Service guide *Pensions for women – Your guide* (PM6) or by using the State Pension age calculator on The Pension Service website:

http://www.thepensionsservice.gov.uk/resource_centre/calc.asp.

<http://www.thepensionsservice.gov.uk/resourcecentre/home/statepensioncalc.asp>

The DWP produces a series of guides that give basic information on pensions. You can get copies by calling the DWP on 0845 731 3233. The line is open 24 hours a day and call charges may vary. A textphone service is available on 0845 604 0210. You can also order copies of these information guides on the Internet at www.thepensionsservice.gov.uk/resourcecentre/home/downloads.asp

You can get more information about Pension Credit on the Pension Service's website at www.thepensionsservice.gov.uk/pensioncredit/home.asp or by telephoning 0800 99 1234.

Old pension plans

To check on the value of old pension plans, look at the most recent benefit statements you have been sent. If you cannot find any statements, contact the pension plan provider, for example the insurance company or the employer that offered the pension to you.

Alternatively, the Pension Tracing Service can help you identify pension schemes you have belonged to in the past. The Pension Tracing Service is free and you can phone them on 0845 6002 537 and ask for a tracing request form or write to them at:

Pension Tracing Service
The Pension Service
Whitley Road
Newcastle upon Tyne
NE98 1BA

There is also an online form available at www.thepensionsservice.gov.uk.

Using a stakeholder pension to contract out of the State Second Pension

You can use a stakeholder pension to contract-out of the State Second Pension (S2P), but it's not an easy decision.

Everyone in employment earning above the lower earnings limit (a minimum level of earnings set by the Government for State benefit purposes) is automatically included in the ~~State Second Pension S2P~~ S2P unless they decide to leave it or are contracted-out through an employer's occupational pension scheme. Leaving the ~~State Second Pension S2P~~ S2P is called 'contracting-out'. If you contract-out, you give up your ~~State Second Pension S2P~~ S2P entitlement and instead build up a replacement for it in your own private pension arrangement, such as a stakeholder pension.

Whether you would be better off contracting-out of the ~~State Second Pension S2P~~ S2P or staying in it depends on your own personal circumstances and attitude to investment risk.

An independent report written for the FSA in August 2005 says that, in purely financial terms, most people who contract-out or stay contracted-out this year are likely to get a lower pension than if they were in S2P. The report looks at recent trends and makes assumptions about future investment returns and interest rates. It also assumes that S2P will stay in its current form. The government is currently looking at pensions reform and it is difficult to predict what will happen to S2P in the future.

If you have already contracted-out through a personal or stakeholder pension, you should review your decision now. Your decision is about the future but you should review it every year. It does not affect past years in which you were contracted-out.

You may wish need to get advice on what may be the best thing for you to do. See the "where to get more help" section page [insert page number]. The FSA publishes information on its website at www.fsa.gov.uk, designed to help you understand the issues, but it's not intended to replace professional advice.

For more information about contracting out, read the **FSA Factsheet: The State Second Pension and contracting out**. You can view or order this factsheet online at www.fsa.gov.uk/consumer or from the FSA Consumer Helpline on 0845 606 1234.

Deciding to contract out in one tax year does not commit you to do the same in later years. In fact, it's important to review your decision regularly.

**SIGNIFICANT MANAGEMENT FUNCTION REPORTING REQUIREMENT
AMENDMENT INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power); and
 - (2) section 157(1) (Guidance).
- B. The rule-making power listed above is specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 6 May 2006.

Amendments to the Handbook

- D. The Supervision manual (SUP) is amended in accordance with Annex A to this instrument.
- E. The Enforcement manual (ENF) is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Significant Management Function Reporting Requirement Amendment Instrument 2006.

By order of the Board
27 April 2006

Annex A

Amendments to the Supervision manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

10.9.8 R Reporting requirement

~~A firm must, by no later than 31 July each year, provide the FSA with:~~

- ~~(1) the name of every individual who is approved to perform any of its significant management functions; and~~
- ~~(2) brief details of the job performed by that individual, as at 30 June of that year;~~

~~unless it has, within the 12 months preceding 30 June, already provided the FSA with that information. [deleted]~~

- 10.9.9 G The broad description of each *significant management function* means that an individual may perform a different function within the *significant management function* without needing prior approval. However, the FSA does require a notification of the job performed by such people once a year. Typically, a *firm* will give this information to the FSA as a matter of routine during the year but, if not, SUP 10.9.8 R requires it to do so by 31 July. The *rule* requires the *firm* to provide a report only in respect of individuals performing a *significant management function*: if there are none, there is no need to provide a report. [deleted]

10 Ann 4D

Form A Application to perform controlled functions under the approved persons regime

...

Section 3 ARRANGEMENTS AND CONTROLLED FUNCTIONS

...

Unless the *firm* indicates otherwise, the *FSA* assumes that the *arrangement* given on the application form includes all of the activities that fall within the description of the *controlled function*. This means that a *firm* may alter a *candidate's* responsibilities within the broad description of a *controlled function* without needing further approval from the *FSA*. ~~However, in relation to the significant management functions, firms must comply with the reporting requirements in SUP 10.9.8R and SUP 10.9.9G.~~

Notification requirements

SUP 16 Annex 18A Retail Mediation Activities Return (RMAR)

SECTION E: Professional Indemnity Insurance (PII) Self-Certification

Is the firm exempt from the PII requirements in respect of any regulated activities? (tick as appropriate)
 Does your firm hold a comparable guarantee or equivalent cover in lieu of PII or is it otherwise exempt from holding PII in respect of any regulated activities? (tick as appropriate)
 If the firm does not hold a comparable guarantee or equivalent cover and is not exempt if not exempt has the firm renewed its PII cover since the last reporting date? does the firm currently hold PII?
 Has the firm renewed its PII cover since the last reporting date?

Mortgage advising/arranging	Non-inv insurance advising/arranging/dealing/assisting	Retail investment advising/arranging

Please complete the following section as appropriate, in relation to each applicable PII policy:
 What activities are covered by the policy?

Mortgage advising/arranging	
Non-inv insurance advising/arranging/dealing/assisting	
Retail investment advising/arranging	

Is the cover compliant? If your policy excludes all business activities carried on prior to a particular date (i.e. a retroactive start date), then insert the date here, if not please insert 'n/a'

Annual premium

Those firms subject to the Insurance Mediation Directive (IMD) should state their limit in Euros, those that are not subject to the IMD should select Sterling.

- a) Limit of Indemnity - single claim Firms with unlimited indemnity should enter "unlimited" (lower case)
 - b) Limit of Indemnity - aggregate. Firms with unlimited indemnity should enter "unlimited" (lower case)
- Policy excess

Please select
 Euros (€)
 Sterling (£)

Amount of additional capital required for increased excess(es) (where applicable, total amount for all PII policies)

Personal investment firms only:
 Total amount of additional own funds required for policy exclusion(s)

Total of additional own funds required

Total of readily realisable own funds

Excess/deficit of readily realisable own funds

Increased excess(es) for specific business types (only in relation to business you have undertaken in the past or will undertake during the period covered by the policy)

business type	amount	
		add row

Section E: Professional Indemnity Insurance

Data is required in relation to all PII policies that a *firm* has in place, up to a limit of ten (~~the firm will be prompted~~ the system will prompt you to submit data ...

...to the full requirements of *PRU* 9.2.

Firms which are subject to the requirements in both *PRU* and *IPRU* must apply the PII rules outlined in *IPRU(INV)*13.1.4 (1), not *PRU* 9.2

Section E: guide for completion of individual fields

Part 1

<p><u>Is the firm exempt from the PII requirements in respect of any regulated activities? Does your firm hold a comparable guarantee or equivalent cover in lieu of PII, or is it otherwise exempt from holding PII in respect of any regulated activities (tick as appropriate)?</u></p>	<p><u>This question will establish whether a <i>firm</i> is exempt from the requirements and so is not required to hold PII.</u></p> <p>The conditions for <u>comparable guarantees and exemptions from the PII requirements ...</u></p> <p>... applies in respect of comparable guarantees)_</p> <p><u>If the <i>firm</i> is required to hold PII – i.e. is not exempt from holding PII – you should enter 'no' in the data field.</u></p> <p><u>A <i>firm</i> is NOT exempt from holding PII if:</u></p> <ul style="list-style-type: none"> • <u>the <i>firm</i> has a group policy with an insurer; or</u> • <u>the <i>firm</i> has permission for the regulated business that requires PII, but does not currently carry it out; or</u> • <u>it is a <i>personal investment firm</i> meeting the exemption requirements for <i>mortgage intermediaries</i> and <i>insurance intermediaries</i> in <i>PRU</i> 9.2.</u>
<p><u>If the firm does not hold a comparable guarantee or equivalent cover and is not exempt, has the firm renewed its PII cover since the last reporting date? does the firm currently hold PII?</u></p>	<p>The purpose of this question is to ensure that <i>firms</i> do not have to fill in the same information each time they report when the information only changes annually.</p> <p><u>If the <i>firm</i> is reporting for the first time, you should enter 'yes' here and complete the data fields below.</u></p>

	<p><u>Firms</u> are required to take out and maintain PII at all times.</p> <p>You should only enter 'n/a' if the <i>firm</i> is exempt from the PII requirements in respect of <u>for all of the regulated activities</u> forming part of the RMAR.</p>
<p><u>Has the firm renewed its PII cover since the last reporting date?</u></p>	<p><u>This question will ensure that a firm does not fill in Part 2 of the PII section of the RMAR each time it reports, if the information only changes annually.</u></p> <p><u>If the firm is reporting for the first time, you should enter 'yes' here and complete the data fields.</u></p> <p><u>You should only enter 'n/a' if the firm is exempt from the PII requirements for all the regulated activities forming part of the RMAR.</u></p>

Part 2

At this point, if the firm has PII policy details to report, it should do so by clicking on the 'add PII policy' button in the summary screen. This will then prompt you to name the sub-section, e.g. 'policy1'. You may also add further sub-sections if the firm has two or more policies (up to a maximum of ten).

<p>What activities are covered by the policy(ies)?</p>	<p>...</p>
<p>Is the cover compliant?</p> <p><u>If your policy excludes all business activities carried on prior to a particular date (i.e. a retroactive start date), then insert the date here, if not please insert 'n/a'</u></p>	<p>The required terms for PII cover are set out in the Prudential Sourcebooks as follow:</p> <p>Insurance intermediaries and mortgage intermediaries – PRU 9.2.</p> <p>Personal investment firms – IPRU(INV) 13.1</p> <p>Authorised professional firms that carry on retail investment activities should note that by ticking this box they are providing confirmation that they are in compliance with IPRU(INV) 2.3.2E, which requires them to have PII cover that is at least equivalent to the requirements of their designated professional body.</p> <p><u>Required terms of PII are set out for personal investment firms in IPRU(INV) 13.1.4 and for mortgage intermediaries and general insurance intermediaries in PRU 9.2.10.</u></p> <p><u>Examples of a retroactive start date:</u></p>

	<p><u>(1) A firm has a retroactive start date of 01/01/2005 on its policy if:</u></p> <ul style="list-style-type: none"> • <u>A client is advised by the firm to purchase an XYZ policy on 01/03/2004 (i.e. before the retroactive date).</u> • <u>The client makes a formal complaint about the sale of the XYZ policy to the firm on 01/04/2006 (i.e. while this PII cover is still in place).</u> • <u>The complaint is upheld, but the firm's current PII Insurer will not pay out any redress for this claim as the transaction took place before 01/01/2005, the retroactive date in the policy.</u> <p><u>Insert '01/01/05' for this question on the RMAR.</u></p> <p><u>(2) A firm does not have a retroactive start date if:</u></p> <ul style="list-style-type: none"> • <u>A client is advised by the firm to purchase an XYZ policy on 01/03/2006.</u> • <u>The client makes a formal complaint about the sale of the XYZ policy to the firm on 01/04/2006 (i.e. while this PII cover is still in place).</u> • <u>The complaint is upheld, and the firm's current PII Insurer will pay out any redress owed by the firm to the client over any prescribed excess, and to the limit of indemnity provided for. There is no date in the policy before which any business transacted may not give rise to a valid claim.</u> <p><u>Insert 'n/a' for this question on the RMAR.</u></p>
Annual premium	This should be the annual premium that is paid by the firm, net of tax and any other add-ons.
Limit of indemnity	<p>You should record ... in aggregate.</p> <p><u>Those firms subject to Insurance Mediation Directive (IMD) requirements should state their limit in Euros; those that are not subject to the IMD should select 'Sterling' from the drop-down list.</u></p> <p><u>For Insurance insurance intermediaries, see PRU 9.2.13R and select either 'Euros' or 'Sterling' as applicable.</u></p>

	<p>For Mortgage <u>mortgage-intermediaries</u>, should state their limits in Sterling (see PRU 9.2.15R).</p> <p>For <i>personal investment firms</i>, see IPRU(INV) 13.1.4(2)R and 13.1.4(5)E and select either 'Euros' or 'Sterling' as applicable.</p> <p>... the policy documentation. <u>If there is more than one limit, only the highest needs to be recorded in this field.</u></p> <p><u>If the firm's PII policy has an unlimited limit of indemnity for either single claims or in the aggregate, then they should enter 'unlimited' (lower case) in the relevant data field.</u></p>
...	...
Increased excess(es) for specific business types <u>(only in relation to business you have undertaken in the past or will undertake during the period covered by the policy)</u>	<p>If the prescribed excess limit is exceeded in respect of <u>for</u> a type ...</p> <p>...</p>
Policy exclusion(s) for specific business types <u>(only in relation to business you have undertaken in the past or will undertake during the period covered by the policy)</u>	<p>If there are any exclusions in the <i>firm's</i> PII policy, the business type(s) to which they relate should be entered here <u>which relate to any types of businesses or activities that the firm has carried out either in the past or during the lifetime of the policy, enter the business type(s) to which the exclusions relate should be entered here.</u></p> <p>...</p>
Renewal date <u>Start Date</u>	The next date by which the current cover needs to be renewed. <u>The date the current cover began.</u>
<u>End Date</u>	<u>The date the current cover expires.</u>
Insurer name <u>(please select from the drop down list)</u>	<p>The name of the insurance undertaking providing cover. If cover is provided by a Lloyd's syndicate, the name of the syndicate should be stated.</p> <p><u>The firm should select the name of the insurance undertaking or Lloyd's syndicate providing cover. If the PII provider is not listed you should select 'other' and enter the name of the insurance undertaking or Lloyd's syndicate providing cover in the free-text box.</u></p> <p>If a policy is underwritten by more than one <i>insurance undertaking or Lloyd's syndicate</i>, you should state <u>select 'multiple' along</u> and state with the number <u>names of all the insurance undertakings or Lloyd's syndicates</u></p>

	<u>in the free-text box.</u>
<u>Annual income as stated on the most recent proposal form</u>	<u>This should be the income as stated on the <i>firm's</i> most recent PII proposal form. For a <i>personal investment firm</i>, this is relevant income arising from all of the <i>firm's</i> activities for the last accounting year before the policy began or was renewed (IPRU(INV) 13.1.3(3)R). For <i>insurance intermediaries</i> and <i>mortgage intermediaries</i> this is the annual income given in the <i>firm's</i> most recent annual financial statement from the relevant <i>regulated activity</i> or activities (PRU 9.3.42R to 44R).</u>
...	...
Amount of additional own funds required for policy exclusion(s)	<i>Personal investment firms</i> only - this should be calculated in accordance <u>line</u> with ...
Total of additional own funds required	<i>Personal investment firms</i> only - this is the same figure as in section D1, representing the total of additional own funds that are required under IPRU(INV) 13.1.4(8)R to 13.1.4(13)G for all of-the <i>firm's</i> PII policies.
...	
Excess/deficit...	...readily realisable own funds'.

PERIODIC FEES (2006/2007) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 72 (The competent authority);
 - (2) section 74(4) (The official list);
 - (3) section 99(1) (Fees);
 - (4) section 101 (Listing rules: general provisions);
 - (5) section 138 (General rule-making power);
 - (6) section 156 (General supplementary powers);
 - (7) section 157(1) and (4) (Guidance);
 - (8) section 234 (Industry funding);
 - (9) paragraph 17(1) of Schedule 1 (Fees) and
 - (10) paragraphs 1 (General), 4 (Rules), and 7 (Fees) of Schedule 7 (The Authority as Competent Authority for Part VI).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 1 June 2006.

Amendments to the Handbook

- D. The Fees manual (FEES) is amended in accordance with Annex A to this instrument.
- E. The Supervision manual (SUP) is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the Periodic Fees (2006/2007) Instrument 2006.

By order of the Board
25 May 2006

Annex A

Amendments to the Fees manual

In this Annex, underlining indicates new text and striking through indicates deleted text, save that where an entire new section is being inserted or deleted, the instructions are described and the text is not underlined or struck through.

3.2.7 R Table of application, notification and vetting fees

(1) Fee payer	(2) fee payable	Due date
(a) Any applicant for <i>Part IV permission</i> (including an <i>incoming firm</i> applying for <i>top-up permission</i>)	<p><u>(1) Unless (2) applies, in respect of a particular application, the highest of the tariffs set out in FEES 3 Annex 1R part 1 which apply to that application</u></p> <p><u>(2) In respect of a particular application which is:</u></p> <p><u>(i) a straightforward or moderately complex case for the purposes of FEES 3 Annex 1R part 1, and</u></p> <p><u>(ii) only involves a simple change of legal status as set out in FEES 3 Annex 1R part 6,</u></p> <p><u>the fee payable is 50% of the tariff that would otherwise be payable in FEES 3 Annex 1R part 1</u></p>	On or before the application is made
...		
(o) A <i>firm</i> applying for guidance on the availability of a <i>waiver</i> or concession <u>(or guidance on the availability of either)</u> in connection with future rules <u>(or future rules)</u> implementing ...	<p><u>(2) (a) Unless (b) applies A a firm submitting a second application for a waiver or concession or guidance ...</u></p> <p><u>(b) No fee is payable by a firm in relation to a successful application for a waiver or a concession based on a minded to grant decision in respect of the same matter following a complete application for guidance in accordance with prescribed</u></p>	

	<u>submission requirements.</u>	
(p) A <i>firm</i> applying for a variation of its <i>Part IV permission</i>	<p>(1) Unless (2) applies, if the <u>proposed new</u> business of the <i>firm</i> will<u>would</u> fall within one or more activity groups specified in Part 1 of <i>FEES</i> 4 Annex 1R not applicable before the <u>application</u> grant of the variation (if the variation is granted), the fee is 50% of the highest of the tariffs set out in <i>FEES</i> 3 Annex 1R which apply to that application</p> <p>(2) If the <u>only change is that the</u> A.12 activity group tariff applied to the <i>firm's</i> business before the variation and the A.13 activity group will apply after variation, no fee is payable.</p> <p>(3) <u>In all other cases, other than applications by credit unions, the fee payable is £250, unless the variation involves only the reduction (and no other increases) in the scope of a Part IV permission in which case no fee is payable.</u></p>	On or before the date the application is made

FEES 3 Annex 1R
Authorisation fees payable

...

Part 5 – Activity Groupings R

The activity group definitions are set out in ~~SUP 20~~ FEES 4 Ann 1R.

Part 6 - ~~Application for a certificate under article 54 of the Regulated Activities Order~~
~~The amount payable in relation to each application is £2,000.~~ Change of legal status

An application involving only a simple change of legal status for the purposes of FEES 3.2.7R(a) is from an applicant:

- (1) which is a new legal entity intending to carry on the business, using the same business plan, of an existing firm with no outstanding regulatory obligations cancelling its Part IV permission, and
(2) which is to:

- (a) have the same or narrower permission, and the same branches (if any), as the firm;
(b) assume all of the rights and obligations in connection with the regulated activities carried on by the firm;

(c) continue the same compliance arrangements and compliant client asset and *client money* procedures, as the *firm*, subject to any changes required only as a result of the change of legal status;

(d) continue with a risk profile and arrangements for controlling and monitoring risk which will not be materially different from those of the *firm*; and

(e) have the individuals within the *firm* that are responsible for *insurance mediation activity* perform the same role for the applicant.

FEES 4 Annex 2R

Delete existing annex save the above heading and replace with the following text:

4 Annex 2R Fee tariff rates, permitted deductions and EEA/Treaty firm modifications for the period from 1 April 2006 to 31 March 2007

R	Part 1	
	This table shows the tariff rates applicable to each fee block.	
	(1)	For each activity group specified in the table below, the fee is the total of the sums payable for each of the tariff bands applicable to the <i>firm's</i> business, calculated as follows:
	(a)	the relevant minimum fee; plus
	(b)	an additional fee calculated by multiplying the <i>firm's</i> tariff base by the appropriate rates applying to each tranche of the tariff base, as indicated.
(2)	A <i>firm</i> may apply the relevant tariff bases and rates to non-UK business, as well as to its UK business, if:	

	(a)	it has reasonable grounds for believing that the costs of identifying the <i>firm's UK</i> business separately from its non-UK business in the way described in Part 2 of <i>FEES</i> 4 Annex 1R are disproportionate to the difference in fees payable; and
	(b)	it notifies the <i>FSA</i> in writing at the same time as it provides the information concerned under <i>FEES</i> 4.4 (Information on which fees are calculated), or, if earlier, at the time it pays the fees concerned.
(3)	For a <i>firm</i> which has not complied with <i>FEES</i> 4.4.2 R (Information on which fees are calculated) for this period:	
	(a)	the fee is calculated using (where relevant) the valuation or valuations of business applicable to the previous period, multiplied by the factor of 1.10;
	(b)	an additional administrative fee of £250 is payable; and
	(c)	the minimum total fee (including the administrative fee in (b)) is £400.
Activity group	Fee payable	
A.1	Minimum fee (£)	150
	£ million of Modified Eligible Liabilities (MELs)	Fee (£/£m or part £m of MELs)
	0 - 0.5	0
	>0.5 - 2	additional flat fee of £360
	>2 - 10	additional flat fee of £510
	>10 - 200	30.96
	>200 - 2,000	30.93

FEES 4 Annex 3R

Delete existing annex save the above heading and replace with the following text:

4 Annex Transaction reporting fees
3R

R Transaction reporting fees for the period from 1 April 2006 to 31 March 2007

This table shows the fees payable for transaction reporting.

Fee type	Fee amount (including VAT)	
Transaction charge	Number of transactions per annum	Fee per transaction (inc. VAT)
	For the first 1,000	0p
	1,001 - 1,000,000	3p
	1,000,001 - 4,000,000	2.75p
	4,000,001 - 8,000,000	2.5p
	8,000,001 - 13,000,000	2.25p
	13,000,001 - 20,000,000	2p
	>20,000,000	1.75p
Firms using the Direct Reporting System software or the Transaction Reporting System will be additionally invoiced for:		
(a)	an initial software licence fee of £587.50 (including VAT) for users of the Direct Reporting System;	
(b)	an annual enrolment fee of £235 (including VAT) per licence held on 1 April each year for users of the Direct Reporting System; and	
(c)	an annual enrolment fee of £235 (including VAT) per registration held on 1 April each year for users of the Transaction Reporting System.	

FEES 4 Annex 4R

Delete existing annex save the above heading and replace with the following text:

4 Annex 4R Periodic fees in relation to collective investment schemes payable for the period 1 April 2006 to 31 March 2007

R Part 1 - Periodic fees payable

Scheme type	Basic fee (£)	Total funds/sub-funds aggregate	Fund factor	Fee (£)
ICVC AUT Section 264 of the <i>Act</i> Section 270 of the <i>Act</i>	620	1-2	1	620
		3-6	2.5	1,550
		7-15	5	3,100
		16-50	11	6,820
		>50	22	13,640
Section 272 of the <i>Act</i>	2,540	1-2	1	2,540
		3-6	2.5	6,350
		7-15	5	12,700
		16-50	11	27,940
		>50	22	55,880

Fees are charged according to the number of funds or sub-funds operated by a *firm* as at 31 March 2006. Where a new *collective investment scheme* becomes authorised during a year, fees are charged according to the number of funds or sub-funds operated by a firm as at the date of authorisation. Where more than one fund or sub-fund is operated the number of funds (not including the umbrella or parent fund) produces a 'fund factor' in accordance with the table above which is then applied to a basic fee to produce one total fee per operator. Fund factors are applied per operator rather than per scheme so that the fees relate to the number of funds rather than the number of schemes. This means that, for example, an authorised fund manager of three schemes pays the same as an operator or authorised fund manager of one scheme with three sub-funds (as only the sub-funds are counted).

4 Annex Periodic fees for designated professional bodies payable in relation to the period 1
5R April 2006 to 31 March 2007

R Table. Fees payable by Designated Professional Bodies

Name of Designated Professional Body	Amount payable	Due date
The Law Society of England & Wales	£62,860	30 April 2006
	£38,500	1 September 2006
The Law Society of Scotland	£16,090	1 July 2006
The Law Society of Northern Ireland	£14,500	1 July 2006
The Institute of Actuaries	£10,190	1 July 2006
The Institute of Chartered Accountants in England and Wales	£36,150	1 July 2006
The Institute of Chartered Accountants of Scotland	£12,290	1 July 2006
The Institute of Chartered Accountants in Ireland	£11,050	1 July 2006
The Association of Chartered Certified Accountants	£21,160	1 July 2006
The Council for Licensed Conveyancers	£11,890	1 July 2006
Royal Institution of Chartered Surveyors	£12,320	1 July 2006

Notes

(1) The *FSA register* includes details of *exempt professional firms* carrying out *insurance mediation activity*.

(2) In addition to the periodic fees shown above, the sum of £31,400 will be due from the *designated professional bodies*, divided between the bodies in proportion to the number of *exempt professional firms* each has on the *FSA register* on 14 January 2006. This is a contribution towards the costs of developing this part of the *FSA register*.

(3) Each of the *designated professional bodies* will be invoiced for the appropriate amount in January 2006. The invoices must be paid on or before 28 February 2006.

FEES 4 Annex 7R

Delete existing annex save the above heading and replace with the following text:

4 Annex 7R Periodic fees in relation to the Listing Rules for the period 1 April 2006 to 31 March 2007

Fee type	Fee amount
Annual fees for the period 1 April 2006 to 31 March 2007	
Annual Issuer Fees - all <i>listed issuers</i> of <i>shares</i> , <i>depository receipts</i> and <i>securitised derivatives</i> . This fee represents the total annual fee for a <i>listed issuer</i> - no additional annual fee is due under the <i>disclosure rules</i> .	<p>(1) For all <i>issuers</i> of <i>securitised derivatives</i>, <i>depository receipts</i> and <i>global depository receipts</i> the fees payable are set out in Table 1.</p> <p>(2) For all other <i>issuers</i>, fees to be determined according to market capitalisation as set out in Table 2. The fee is calculated as follows:</p> <p>(a) the relevant minimum fee; plus</p> <p>(b) the cumulative total of the sums payable for each of the bands calculated by multiplying each relevant tranche of the <i>firm's</i> market capitalisation by the rate indicated for that tranche. Where <i>issuers</i> have more than one type of <i>share</i> in issue, the highest market capitalisation of all of its securities in issue is used.</p> <p>(3) Notwithstanding (2), <i>overseas issuers</i> with a <i>listing of equity securities</i> which is not a <i>primary listing</i> will only pay 80% of</p>

	the fee otherwise payable under (2).
Annual fees are charged in annual cycles beginning on 1 April of a year and ending on 31 March of the following year. For fees purposes <i>issuers</i> should take into account only equity ordinary <i>shares</i> , including those issued by suspended <i>issuers</i> .	

Table 1
Annual fees for issuers of *securitised derivatives*, depositary receipts and global depositary receipts

Issuer	Fee amount
<i>Issuers of securitised derivatives</i>	£3,075
Issuers of depositary receipts and global depositary receipts	£3,690

4 Annex 8R Periodic fees in relation to the disclosure rules for the period 1 April 2006 to 31 March 2007

Annual fees for the period 1 April 2006 to 31 March 2007	
All non-listed <i>issuers</i> of <i>shares</i> , depositary receipts and securitised derivatives. Annual fees for listed <i>issuers</i> in respect of Disclosure Rules obligations are incorporated in the annual fee for listed <i>issuers</i> under the Listing Rules.	(1) For all non-listed <i>issuers</i> of securitised derivatives, depositary receipts and global depositary receipts the fees payable are set out in Table 1.
	(2) For all other non-listed <i>issuers</i> , fees to be determined according to market capitalisation as set out in Table 2. The fee is calculated as follows:
	(a) the relevant minimum fee; plus
	(b) the cumulative total of the sums payable for each of the bands calculated by multiplying each relevant tranche of the <i>firm's</i> market capitalisation by the rate indicated for that tranche.
Fees from other fee schedules contained in other sections of the sourcebook may be applicable to a single submission.	

Table 1

Annual fees for non-listed issuers of securitised derivatives, depositary receipts and global depositary receipts

16 - Mortgage	Flat fee	Levy of £50

lenders, advisers and <i>arrangers</i> (excluding <i>firms</i> in blocks 13, 14 & 15)		
17 - General insurance mediation (excluding <i>firms</i> in blocks 13, 14 & 15)	Flat fee	Levy of £50
4	[not used]	
5	The <i>industry blocks</i> in the table are based on the equivalent activity groups set out in Part 1 of <i>FEES 4 Annex 1R</i> .	
6	Where the tariff base in the table is defined in similar terms as that for the equivalent activity group in Part 2 of <i>FEES 4 Annex 1R</i> , it must be calculated in the same way as that tariff base - taking into account only the <i>firm's relevant business</i> .	

Annex B

Amendments to the Supervision manual

In this Annex underlining indicates new text.

16.3.14 R (1) If a *firm* does not submit a complete report by the date on which it is due in accordance with the *rules in, or referred to in, this chapter or the provisions of relevant legislation* and any prescribed submission procedures, the *firm* must pay an administrative fee of £250.

...

16.3.14A G Failure to submit a report in accordance with the *rules in, or referred to in, this chapter or the provisions of relevant legislation* may also lead to the imposition of a financial penalty and other disciplinary sanctions (see *ENF* 13.5). *A firm may be subject to reporting requirements under relevant legislation other than the Act, not referred to in this chapter. An example of this is reporting to the FSA by building societies under those parts of the Building Societies Act 1986 which have not been repealed (see SUP 16.1.4G).* If it appears to the *FSA* that, in the exceptional circumstances of a particular case, the payment of any fee would be inequitable, the *FSA* may reduce or remit all or part of the fee in question which would otherwise be payable (see *FEES* 2.3).

SUP 16 Ann 18BG Notes for completion of the Retail Mediation Activities Return ('RMAR')

...

Section J: data required for calculation of fees

Firms with an *accounting reference date* of between 1 February and 31 August (inclusive) must report the information required in this section solely in their half year end *RMAR*. All other *firms* must report the information in their year end *RMAR*. *Firms which do not yet have data for a full 12 months ending on their accounting reference date (for example if they have not traded for a complete financial year by the time of the accounting reference date) should complete Section J with an 'annualised' figure based on the actual income up to their accounting reference date. That is, such firms should pro-rate the actual figure as if the firm had been trading for 12 months up to the accounting reference date. So for a firm with 2 months of actual income of £5000 as at its accounting reference date, the 'annualised' figure that the firm should report is £30,000.*

...

SUP 16 Ann 19BG Notes for completion of the Mortgage Lending and Administration Return ('MLAR')

...

SECTION J: FEE TARIFF MEASURES

J1 Introduction

...

* Refer to *FEES 4* Annex 1R of the *FSA Handbook* for the *FSA* fee tariff*

*Refer to *FEES 5* Annex 1R of the *FSA Handbook* for the *FOS* fee tariff*

To the extent that the *FOS* fee tariff measure requires other relevant activities that the *firm* carries out to be taken into account, these should be included in J1.3.

**INTERIM PRUDENTIAL SOURCEBOOKS (MISCELLANEOUS AMENDMENTS)
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 June 2006.

Amendments to the Handbook

- D. The modules of the FSA’s Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Interim Prudential sourcebook for Banks (IPRU(BANK))	Annex A
Interim Prudential sourcebook for Building Societies (IPRU(BSOC))	Annex B
Interim Prudential sourcebook for Investment Businesses (IPRU(INV))	Annex C
Supervision manual (SUP)	Annex D

Citation

- E. This instrument may be cited as the Interim Prudential Sourcebooks (Miscellaneous Amendments) Instrument 2006.

By order of the Board
25 May 2006

Annex A

Amendments to Interim Prudential sourcebook for Banks

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend Volume 1, CA (Definition of Capital) as follows:

4 ELEMENTS OF A BANK'S CAPITAL BASE

...

4.3 Tier 2 - supplementary capital

5 Tier 2 (or supplementary) capital consists of:

- (a) Reserves arising from the revaluation of tangible fixed assets and fixed asset investments, including any net unrealised gains for the fair valuation of equities held in the available-for-sale financial assets category and any unrealised gains on investment property.

...

5 TIER 1 CAPITAL

...

5.2 Reserves

6 *Reserves* are accumulated profits retained by the bank after the payment of all dividends and tax, and other reserves created by appropriations of share premia and other surpluses.

- a) Dividends should be deducted from reserves as soon as they are declared.

(a) For the purposes of calculating prudential capital a bank should:

- (i) deduct unrealised gains or, where applicable, add back in unrealised losses, on cash flow hedges of financial instruments measured at cost or amortised cost;
- (ii) deduct unrealised gains or, where applicable, add back in unrealised losses, on debt instruments held in the available-for-sale financial assets category;
- (iii) deduct unrealised gains or, where applicable, add back in unrealised losses, which are not attributable to changes in a benchmark interest rate, arising when a bank, upon initial recognition, designates its financial liabilities as at fair value through profit or loss;
- (iv) deduct unrealised gains on investment property;

...

6 UPPER TIER 2 CAPITAL

This section provides detail on the constituent elements of Upper Tier 2 capital.

6.1 Reserves arising from the revaluation of tangible fixed assets and fixed asset investments

1 *Reserves arising from the revaluation of tangible fixed assets*, or fixed asset investments, are reserves created when such assets are revalued to bring them in line with replacement costs. This category also includes any unrealised gains arising on revaluing investment property which is ineligible for inclusion in Tier 1 capital. These reserves are eligible for inclusion in Upper Tier 2 capital.

- a) *Fixed assets* are assets such as land, buildings, plant, equipment and other assets acquired for carrying on the business of a company.
- b) Where *negative goodwill* is required to be identified under the adopted accounting framework it will be included in reserves. *Negative goodwill* arises when a company/ portfolio is purchased below the value of its assets. The difference is called negative goodwill.
- c) For the definition of *goodwill* see the section on deductions from capital.
- d) Unrealised gains may arise on revaluing investment property, where applicable.

...

Amend Volume 1, BC (Credit risk in the banking book) as follows:

3 RISK WEIGHTING FRAMEWORK: ON BALANCE SHEET

...

3.2 Counterparty weights

...

3.2.2 Zero weighting

4 The following types of asset may attract a zero weighting:

...

- (g) certificates of tax deposit; ~~and~~

- (h) items in suspense where they represent position risk; and
- (i) a defined benefit asset.

Amend Volume 2, VA (Valuation) as follows:

2 GENERAL POLICY ON VALUATION

...

- 4 Unless a different practice has been agreed in writing with the FSA, non - CAD bank should value both its trading and its banking books on an *accruals* basis rather than on a cash basis; and a CAD bank should value its trading book on a *mark-to-market* basis and its banking book on an *accruals* basis.

...

- f) For risk-weighting purposes a bank should deduct unrealised gains or, where applicable, add back in unrealised losses on debt instruments held in the available-for-sale financial assets category.

...

Annex B

Amendments to Interim Prudential sourcebook for Building Societies

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend Volume 1 (Prudential Standards), Chapter 1 Solvency, as follows:

1.8 DEDUCTIONS

...

1.8.4 G

...

- (4) a "defined benefit asset" is the excess of the value of the assets in a defined benefit occupational pension scheme over the present value of the scheme liabilities, to the extent that a society, as employer, should recognise that excess as a ~~liability~~ an asset in its balance sheet.

Amend Volume 1 (Prudential Standards), Chapter 1 Solvency, Annex 1A as follows:

CALCULATION OF "OWN FUNDS"

G

1A.1 Tier 1 Capital

1A.1.1 Reserves as disclosed in the latest year end balance sheet;

plus

cumulative interim profits for the year to date which have been verified by the society's external auditors (see Annex 1E); or

less

cumulative losses (if any) for the year to date and any unrealised gains on investment property reported in retained earnings (these should be reported as part of the revaluation reserve (see 1A.4)).

...

1A.4 Revaluation Reserves

1A.4.1 Societies may include revaluation reserves arising out of the differences between book values and the current market value of property fixed assets and unrealised gains on investment property but only if:

....

Amend Volume 1 (Prudential Standards), Chapter 1 Solvency, Annex 1B as follows:

RISK ASSET WEIGHTS

G

1B.1 General

1B.1.1 Risk weights should be applied net of any specific or individual provision. Items subject to deduction from Own Funds should be zero weighted (this includes unrealised gains or losses held in the available-for-sale financial assets category (see 1A.1.5(2) and any defined benefit asset)). Assets held by a subsidiary undertaking are weighted on the same basis as if held by the parent society.

Amend Volume 1 (Prudential Standards), Chapter 10 Securitisation to insert a new paragraph 10.3.4AG after 10.3.4G as follows:

10.3.4AG The adoption of International Accounting Standards by some societies changes the accounting treatment of securitised assets for those societies from 1 January 2005. The Building Societies Act 1986 (Modification of the Lending Limit and Funding Limit Calculations) Order 2004 (S.I. 2004/3200) amends the Building Societies Act 1986 so that securitised assets and related liabilities may continue to be excluded from nature limit calculations, regardless of how they are included in the accounts of a society. Therefore societies which use International Accounting Standards to prepare their accounts will not be disadvantaged in relation to the nature limits.

Annex C

Amendments to Interim Prudential sourcebook for Investment Businesses

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend IPRU(INV) Chapter 3 (Financial resources for Securities and Futures Firms which are not Investment Firms) as follows:

Insert a new rule 3-62(8)R after 3-62(7)G as follows:

3-62(8) R Where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but excluding from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 3-75 (Liquidity adjustment) as follows:

3-75 Liquidity adjustment

...

Intangible assets

3-75(2) R The liquidity adjustment for intangible assets is nil (these must be deducted from capital to arrive at *tangible net worth* under 3-62). Intangible assets do not include a deferred acquisition cost asset.

...

Other assets

3-75(13)R The liquidity adjustment for assets other than those specifically stated above is the balance sheet value of the asset concerned. Other assets do not include a *defined benefit asset* or a deferred acquisition cost asset.

Amend IPRU(INV) Chapter 5 (Financial Resources) as follows:

Amend IPRU(INV) Table 5.2.2(1) (Calculation of own funds and liquid capital) as follows:

TABLE 5.2.2(1) CALCULATION OF OWN FUNDS AND LIQUID CAPITAL

...

PART II
DETAILED REQUIREMENTS

...

2A Audited reserves

For the calculation of *own funds* and *liquid capital* the following adjustments apply to the audited reserves figure:

- (a) a *firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year.

Note

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

- (d) a *firm* must not include any unrealised gains from investment property.

Note

Unrealised gains from investment property should be reported as part of revaluation reserves.

- (e) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

3 Intangible assets

Intangible assets comprise:...

(Item 6)

- (a) ...
- (b) ...
- (c) ...

	<u>Intangible assets do not include a deferred acquisition cost asset.</u>

TABLE 5.2.3(5)(e) OTHER ASSETS REQUIREMENT	
...	
	PART II RISK FACTORS
...	
<u>Defined benefit asset</u>	<u>NIL</u>
<u>Deferred acquisition cost asset</u>	<u>NIL</u>
All other assets ...	

Amend IPRU(INV) Chapter 7 (UCITS Management Companies), Table belonging to rule 7.2.1R(1) as follows:

7.3 METHOD OF CALCULATION OF FINANCIAL RESOURCES

7.3.1R This table belongs to *rule 7.2.1R(1)*

PART II DETAILED REQUIREMENTS
...

2A Audited reserves

For the calculation of financial resources, the following adjustments apply to the audited reserves figure:

- (a) a *firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year.

Note

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

- (d) a *firm* must not include any unrealised gains from investment property.

Note

Unrealised gains from investment property should be reported as part of revaluation reserves.

- (e) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but excluding from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

3 Intangible assets (Item 6)

Intangible assets comprise:...

- (a) ...
- (b) ...
- (c) ...

Intangible assets do not include a deferred acquisition cost asset.

...

10 Illiquid assets (Item 14) Illiquid assets comprise:...

(a) ...

...

(i) ...

Illiquid assets do not include a *defined benefit asset* or a *deferred acquisition cost asset*.

...

Amend IPRU(INV) Chapter 10 (Financial Resources for Securities and Futures Firms which are Investment Firms) as follows:

Amend IPRU(INV) 10-61R (Initial capital) as follows:

10-61(3A) R When calculating *initial capital*, a *firm* may include its audited retained earnings only after making the following adjustments:

- (a) a *firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) a *firm* must not include any unrealised gains from investment property (these should be reported as part of revaluation reserves);
- (d) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Externally-verified interim net profits or current account

10-61(4A) R When calculating *initial capital*, a *firm* may include its partners' current accounts figure only after making the following adjustments:

- (a) a *firm* must deduct any unrealised gains or, where applicable add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;

- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

...

Intangible assets

- 10-61(5) R A *firm* must deduct from *initial capital*, when calculating *original own funds*, the full balance sheet value of intangible assets including goodwill, capitalised development costs, licences, exchange seats held as part of its trading requirement, trademark and similar rights etc. Intangible assets do not include a deferred acquisition cost asset.

Amend IPRU(INV) 10-65(11)R (Liquidity adjustment on illiquid assets: Other assets) as follows:

Other assets

- 10-65(11) The liquidity adjustment for assets other than those specifically stated above where the asset is not due to be repaid within 90 days, is either 8% multiplied by the appropriate counterparty weight, or 100% of the balance sheet value, except that there is no liquidity adjustment for amounts due which are secured by *acceptable collateral*. Other assets do not include a *defined benefit asset* or a deferred acquisition cost asset.

Amend IPRU(INV) Chapter 13 (Calculation of own funds) as follows:

Amend IPRU(INV) 13.3.2AR as follows:

- 13.3.2A R For the purpose of calculating a *Category A firm's own funds*, the following adjustments apply to audited reserves or, (for non-corporate entities), current accounts figures.
- (1) a *Category A firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
 - (2) a *Category A firm* must derecognise any *defined benefit asset*;

- (3) a *Category A firm* may substitute for a *defined benefit liability* its *deficit reduction amount*. The election must be applied consistently in respect of any one financial year;
- (4) a *Category A firm* must deduct any unrealised gains on investment property and include these within revaluation reserves;
- (5) where applicable, a *Category A firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but excluding from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 13.4.1R (Financial Resources Test 1A - Adjusted net current assets) as follows:

13.4.1 R A *Category A firm* must adjust its *net current assets* as follows:

exclude assets which cannot be realised or recovered within twelve months;

exclude amounts receivable from *connected persons* to the extent that they are not *properly secured*, except amounts that are *deposits* referred to at item (11) in Part I of table 13.5.4(1) or at item (11) in Part I of table 13.5.4(2);

value *investments* at current *market value*, using the *bid price* for a *net long position* in an investment and the *offer price* for a *net short position* in an investment-;

where applicable, deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 13.5.4R (Calculation of financial resources to meet tests 1, 1A or 2) as follows:

13.5.4 R A *Category A firm* must be able to calculate its financial resources at any time on the basis of the balance sheet it could draw up at that time. For this purpose:

a *Category A1 firm* ...

a *Category A2 or A3 firm*,...

- (3) the assets and liabilities in the balance sheet are also subject to the following adjustments:

- (a) a *firm* must deduct any unrealised gains, or where applicable, back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
- (b) in respect of a *defined benefit occupational pension scheme*, a *firm* must derecognise any *defined benefit asset*;
- (c) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year;
- (d) where applicable, a *firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 13.10.2AR as follows:

13.10.2A R For the purpose of calculating a *Category B firm's own funds*, the following adjustments apply to audited retained profits or, (for non-corporate entities), current accounts figures.

- (1) a *Category B firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
- (2) a *Category B firm* must derecognise any *defined benefit asset*;
- (3) a *Category B firm* may substitute for a *defined benefit liability* its *deficit reduction amount*. The election must be applied consistently in respect of any one financial year.
- (4) a *Category B firm* must deduct any unrealised gains on investment property and include these within revaluation reserves;
- (5) where applicable, a *Category B firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 13.11.2R (Financial Resources Test 1A - Adjusted net current assets) as follows:

13.11.2 R A *Category B firm* must adjust its *net current assets* as follows:

exclude assets which cannot be realised or recovered within twelve months;

exclude amounts receivable from *connected persons* to the extent that they are not *properly secured*, except amounts that are *deposits* referred to in item (11) of table 13.12.3(1) or item (11) in table 13.12.3(2);

value *investments* at current *market value*, using the *bid price* for a *net long position* in an investment and the *offer price* for a *net short position* in an investment;:

where applicable, deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Amend IPRU(INV) 13.12.3R(3) (Calculation of financial resources to meet tests 1, 1A or 2) as follows

- 13.12.3 R
- (1) ...
 - (2) ...
 - (3) the assets and liabilities in the balance sheet are also subject to the following adjustments:
 - (a) a *Category B firm* must deduct any unrealised gains or, where applicable, add back in any unrealised losses on cash flow hedges of financial instruments measured at cost or amortised cost;
 - (b) in respect of a *defined benefit occupational pension scheme*, a *Category B firm* must derecognise any *defined benefit asset*;
 - (c) a *Category B firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*. The election must be applied consistently in respect of any one financial year;:
 - (d) where applicable, a *Category B firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.

Annex D

Amendments to the Supervision manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend SUP 16 Annex 2G form BSD3 as follows:

LIABILITIES

CORE CAPITAL – TIER 1

...

A500 Reserves

...

A500.2 Disclosed prior years reserves (excluding item A580), disclosed current year's positive movement on reserves and negative movements on reserves

Report the disclosed, undistributed balance on profit and loss account attributable to previous years (ie revenue reserves), reserves arising from exchange rate translation differences and other reserves (eg capital redemption reserves and capital gifts). Do not report reserves arising from the revaluation of fixed assets or the unrealised gains on investment property; such reserves and unrealised gains should be shown under item A580.

...

SUPPLEMENTARY TIER 2

A580 Fixed asset revaluation reserves

Report reserves relating to the revaluation of fixed assets and unrealised gains on investment property.

...

Amend SUP 16 Annex 4G form MFS1 as follows:

...

SECTION B: BALANCE SHEET: Liabilities

...

B3 CAPITAL

B3.1 Reserves should include general and any 'special' reserves but not revaluation reserves or any unrealised gains on investment property (which should be included at B3.3).

Amend SUP 16 Annex 4G form QFS1 as follows:

SECTION D: CAPITAL AVAILABLE: Own Funds

...

TIER I CAPITAL

D1.1 Reserves at start of year

Reserves exclude revaluation reserves which are to be shown at D2.1 and any unrealised gains on investment property.

...

**INTERIM PRUDENTIAL SOURCEBOOK FOR INSURERS
(AMENDMENT NO 9) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 150(2) (Actions for damages);
 - (3) section 156 (General supplementary powers); and
 - (4) section 340 (Appointment).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 June 2006.

Amendments to the Handbook

- D. The Interim Prudential sourcebook for Insurers (IPRU(INS)) is amended in accordance with the Annex to this instrument.

Citation

- E. This instrument may be cited as the Interim Prudential Sourcebook for Insurers (Amendment No 9) Instrument 2006.

By order of the Board
25 May 2006

Annex

Amendments to the Interim Prudential sourcebook for Insurers

In this Annex, underlining indicates new text and striking through indicates deleted text. Where a new section of text is inserted, this is indicated and the new text is not underlined

Chapter 9

FINANCIAL REPORTING

...

Certificates by Directors

9.34 (1) Except for reporting under rule 9.3A, ~~t~~There must be annexed to the documents referred to in rules 9.12, 9.13 and 9.14 a certificate in accordance with the requirements of Part I of **Appendix 9.6** which must be signed by the persons required by rule 9.33 to sign the documents to which the certificate relates.

(2) In respect of reporting under rule 9.3A, there must be annexed to the documents referred to in that rule a certificate in accordance with the requirements of Part IA of **Appendix 9.6** which must be signed by a *director of the insurer.*

...

APPENDIX 9.6 (rules 9.34 and 9.35)

CERTIFICATES BY DIRECTORS AND REPORT OF THE AUDITORS

Part I

Certificate by directors

1. (1) Subject to 3, the certificate required by rule 9.34(1) must state –

...

2. Subject to 3, if the *insurer* carries on *long-term insurance business*, the certificate required by rule 9.34(1) must also state that –

...

- (d) ...
 - (i) ~~advice in preparing the return~~ from every *actuary* appointed by the *insurer* to perform the *actuarial function* in accordance with *SUP* 4.3.13R; and
 - (ii) if applicable, advice from every *actuary* appointed by the *insurer* to perform the *with-profits actuary function* in accordance with *SUP* 4.3.16AR.

3. ...

Insert after Part I the following Part IA.

Part IA

Certificate by a director on the half-yearly balance sheet and report for realistic valuation

- 3A. Subject to 3C, the certificate required by rule 9.34(2) must state that the *return* has been properly prepared in accordance with the requirements in *IPRU(INS)* and *PRU*.
- 3B. Subject to 3C, the certificate required by rule 9.34(2) must also state that –
 - (a) the amount provided for *long-term insurance liabilities* for the purpose of determining the *insurer's capital resources* as shown in **Form 2** constitutes proper provision at the end of the six month period referred to in rule 9.3A(1) for those liabilities (including all liabilities arising from *deposit back arrangements*); and
 - (b) the *director* has, in preparing the *return*, taken and paid due regard to–
 - (i) advice from every *actuary* appointed by the *insurer* to perform the *actuarial function* in accordance with *SUP* 4.3.13R; and
 - (ii) advice from every *actuary* appointed by the *insurer* to perform the *with-profits actuary function* in accordance with *SUP* 4.3.16AR.
- 3C. (1) Where, in the opinion of the *director* signing the certificate, the circumstances are such that any of the statements required by 3A and 3B cannot truthfully be made, the relevant statements must be omitted.
- (2) Where, by virtue of (1), any statements have been omitted from the certificate, this fact, and the reasons for omission, must be stated in a note to the certificate.

**ANNUAL QUESTIONNAIRE FOR AUTHORISED PROFESSIONAL FIRMS
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 July 2006.

Amendments to the Handbook

- D. The Glossary of definitions is amended in accordance with Annex A to this instrument.
- E. The Supervision manual (SUP) is amended in accordance with Annex B to this instrument.
- F. The Professional Firms sourcebook (PROF) is amended in accordance with Annex C to this instrument.

Citation

- G. This instrument may be cited as the Annual Questionnaire for Authorised Professional Firms Instrument 2006.

By order of the Board
25 May 2006

Website <http://www.fsa.gov.uk>

Registered as a Limited Company in England and Wales No 1920623. Registered Office as above

Guidance notes

This form should be completed only by *authorised professional firms* as defined in the *FSA's Handbook of rules and guidance*.

Completing this Form

This form must be submitted to the *FSA* within four months of the *accounting reference date* to which it relates.

The ~~Form~~ form must be completed in black ink and (if in manuscript) in BLOCK LETTERS.

All dates must be provided in numeric form (e.g. 29/02/2000 for 29 February 2000).

Tick the appropriate box where a yes/no answer is required.

~~Further details must be given in section 4 (supplementary information) if there is insufficient space for a detailed answer.~~

~~Additional information can be attached to the Form. It must be securely attached to the rest of the form and you must indicate at question 4.02 the number of additional sheets attached.~~

Expressions in the form in italics have the meaning given in the *Glossary* to the *FSA's Handbook of rules and guidance* (or, if no meaning is given there, are to be interpreted in accordance with the related expressions defined in the *Glossary*).

Section 1 – Professional regulation

This section must be completed to show which of the *designated professional bodies* the *firm* is regulated by.

Section 2 – Supervision and monitoring data

The questions must be completed for the period ending on the *firm's* latest *accounting reference date*.

Section 3 – Financial resources and reporting

The questions must be completed for the period ending on the *firm's* latest *accounting reference date*.

Section 4 – Supplementary information

This section provides space for additional information which could not be included elsewhere in the form.

If there is still insufficient space, please use a separate sheet or sheets, marked with the *firm's* name and *FSA* firm reference number. Additional information must be securely attached to the rest of the form and you must indicate in question 4.02 the number of additional sheets attached.

Declaration

~~The declaration must be signed as follows:~~

- ~~(i) If the *firm* is a sole practitioner, by that person;~~
- ~~(ii) If the *firm* is a *partnership* (or *limited liability partnership*), by two *partners* (or designated members);~~
- ~~(iii) If the *firm* is a *company*, by two *directors*. If the *company* has only one *director*, by the *director* and the *Company Secretary*.~~

See SUP SUP 16.3 for method of submission.

~~Annual questionnaire for authorised professional firms~~

1.01 Legal status

Indicate whether the *firm* is:

a an individual who is entitled to ~~practice~~ practise a profession regulated by a *designated professional body* and in doing so is subject to its rules; or YES NO

b a *person* (not being an individual) which is managed and controlled by one or more individuals each of whom is entitled to ~~practice~~ practise a profession regulated by a *designated professional body* and in doing so is subject to the rules of the *designated professional body*. YES NO

1.02 Designated Professional Body

To which of the following *designated professional bodies* is the ~~firm~~ firm subject?

- 19. Employment
- 20. Human Rights
- 21. Immigration
- 22. Intellectual Property
- 23. Landlord & Tenant
- 24. Matrimonial/Family
- 25. Personal Injury
- 26. Planning
- 27. Probate/Executory
- 28. Professional Negligence
- 29. Property/Conveyancing
- 30. Road Traffic
- 31. Trusts
- 32. Other

Specify: _____

c Does the *firm* have any branches or other places of business? YES NO

d b Does the *firm* have any appointed representatives? YES NO

If YES, how many?
(Give figure as at the date of this questionnaire)

 I have supplied further information related to this page in Section 4 YES NO

2.02 Income from mainstream regulated activities

a What was the total income from the *firm's mainstream regulated activities* during the latest and previous periods?
(Income excludes commission rebated to *clients* (as defined for *PROF*) or used to enhance policies)

b During the period, what please indicate the proportion of this income was generated from: the following regulated activities?
(An estimate to the nearest 10% is sufficient)

	Percentage
i) Fund <u>Investment management activities</u> (see 3.08 9)	
ii) Corporate finance <u>activities</u> (see 2.04)	
iii) Packaged products <u>Retail investment activities</u>	
iv) <u>Mortgage mediation activities</u>	
v) <u>Insurance mediation activities</u>	
iv) vi <u>Other</u>	
TOTAL	100 %

2.02 c How much income from *regulated activities* arose from ~~retained commission received from third parties?~~

£000

(An estimate to the nearest 10% is sufficient.)

d c Did the *firm* during the period: ~~carry on any regulated activities~~ in relation to

- (i) Trusts _____ YES NO
- (ii) Powers of attorney _____ YES NO
- (iii) Pension transfers/pension opt-outs _____ YES NO
- (iv) FSAVCs _____ YES NO
- (v) Endowments _____ YES NO
- (vi) Handling (i) Handle client money?
(i.e. money held in the course of *designated investment business*, mortgage mediation activity or insurance mediation activity)
YES NO
- (vii) Handling (ii) Handle custody assets?
(i.e. assets held in the course of *designated investment business*) e.g. custodial investments)
YES NO
- e** Did the *firm* during the period introduce *clients* to other *authorised persons*? _____ YES NO

2.03 Execution-only transactions

How many transactions during the period in the course of mainstream regulated activities were *execution-only* transactions?

- None
- 1 – 10
- > 10

(PLEASE TICK APPROPRIATE BOX)

Annual questionnaire for authorised professional firms

2.04 Did the *firm* carry out any **corporate finance business** in the period? YES NO

If YES

Describe the nature of services provided during the period (summarise if necessary), and indicate whether the *firm* or any individual, *company* or trust within or associated with the *firm*, has taken an equity share as a result of a deal or been remunerated on a contingency basis.

Nature of services provided _____ Equity share taken or contingency basis for fee?

YES NO

YES NO

YES NO

YES NO

YES NO

 I have supplied further information related to this page in Section 4 YES NO

Annual questionnaire for authorised professional firms

Annual questionnaire for authorised professional firms Page 5

2.04 5 Life policies

Were any *life policies*, including *pension policies* arranged by the *firm* **surrendered or cancelled** in the period?

YES NO

If YES

(i) How many?

(ii) Are any of them associated with a complaint against the *firm* about ~~peer~~ the advice on investments provided?

YES NO

If YES, how many?

2.05 6 Indemnity commission

Was the *firm* ~~been~~ asked to repay or did it repay **indemnity commission** during the period?

YES NO

If YES

(i) On how many cases?

(ii) Do these requests for repayment represent more than 5 per cent of the *firm's commission* income received on indemnity terms during the period?

YES NO

2.06 7 Material changes

Since the *accounting reference date*, have there been, or will there be, changes in the way the *firm* carries on its *regulated activities* or other business, which may have a material effect on the type and volume of such work?

YES NO

If YES, please explain the main changes and their expected effects.

(e.g. New branch or department ~~dealing with regulated activities~~, new computer systems, employment of staff with relevant expertise, merger of businesses, ~~hiving off of business area dealing with regulated activities~~)

2.07 8 Record keeping

a Has the *firm* maintained **accounting and other records** in accordance with the *FSA's Handbook of rules and guidance*?

YES NO

If NO, please explain

b Has the *firm* maintained records to enable the *FSA* to verify the calculations prepared to support the financial declarations made in this questionnaire?

YES NO

If NO, please explain

 I have supplied further information related to this page in Section 4 YES NO

2.08 9 Professional indemnity insurance

a Are the terms of the *firm's* professional indemnity insurance policy compliant with the requirements set out in the Handbook? YES NO
(The professional indemnity insurance requirements for *authorised professional firms* are set out in PRU 9.2 and IPRU(INV) 13.)

If NO, please explain.

b Does the policy exclude any type of business or activity that has been carried on by the *firm* in the past, or that is currently carried on by the *firm* or that will be carried on by the *firm* during the time for which the policy is in force? YES NO

If YES, please provide further information on the excluded line of business or activity and explain how the *firm* has mitigated (or will mitigate) the risk of not having the business or activity covered in the policy.

c In relation to the *firm's* current policy, please provide the following information:

(i) Expiry date of the *firm's* current professional indemnity policy.
(For *firms* who are members of the Law Society of Scotland: please give details of the *firm's* *firm's* professional indemnity insurance under the Law Society of Scotland's Master Policy.)

b-(ii) Limit of indemnity: per claim

in aggregate

c (iii) Excess per claim

d (iv) Annual premium

 I have supplied further information related to this page in Section in 4.01 YES NO

Annual questionnaire for authorised professional firms

3.01 Material change in total income

a Was there any material change in the *firm's* total income (from all activities) during the period as compared with the previous period?

YES NO

If YES, please give details

For the purposes of this question 'material' is regarded as 25% of total income at the end of the accounting period, but will depend also on the size and nature of the *firm's* business.

Details should include the actual change in the figures to show the impact and the reasons for the change, which might include opening a new branch/office, gain/loss of sources of business, downsizing/merger.

b Has the *firm* made a profit after tax for the period?

YES NO

If NO, please explain how the loss has occurred.

3.02 Net assets and liabilities

a If the *firm* has produced accounts with a balance sheet as at the ~~end of the period ending on the firm's~~ *firm's* latest accounting reference date, please state the *firm's* total:

Latest Accounting Reference Date

Previous Accounting Reference Date

(i) net assets, or

(ii) net liabilities

b If the *firm* has net liabilities, please explain how the *firm* has met its liabilities and will continue to meet them as they fall due in future.

 I have supplied further information related to this page in Section 4 YES NO

3.03 Bank position

a Please state the *firm's* net bank position at the *firm's* latest *accounting reference date*

- (i) net credit balance (£000), or
- (ii) net overdrawn balance (£000)

b Overdraft facility (£000)

c Overdraft review date

d Details of security for the overdraft

3.04 Other loans borrowings

Please state whether the *firm* has any other ~~loans~~ borrowings.

YES NO

If YES, please give details

3.05 Bank overdraft

If the above bank balance is overdrawn by more than the overdraft limit, please provide details of the current position and explain how the *firm* has met and will continue to meet its liabilities as they fall due.

3.06 Contingent liabilities

Are there outstanding any legal proceedings or County Court Judgements or Decrees (Scotland) against the *firm* or its principals or any other contingent liabilities that may affect the *firm's* ability to meet its liabilities as they fall due in the future?

YES NO

If YES, please give details

 I have supplied further information related to this page in Section 4 YES NO

Annual questionnaire for authorised professional firms

3.07 Solvency

Have the *partners/directors* of the *firm* carried out appropriate procedures to enable them to satisfy themselves that the *firm* is able to meet its liabilities as they fall due until the end of the current accounting period (or twelve months from the last *accounting reference date*, if later)?

YES NO

(Supporting papers should be retained. The *FSA* may at any time require a *firm* to produce evidence to demonstrate that it can meet this requirement.)

3.08 Pensions/FSAVCs

Has the *firm* had to review any *pension transfer/pension opt out or FSAVC* cases? (This information is additional to that information provided in the return to the Pensions Review Monitoring Department)

YES NO

If YES, please provide the following information in respect of the amounts that have been included in the *firm's* accounts to its latest *accounting reference date*, or would be included if the accounts had been prepared by the date of signature of this Questionnaire

Accounting Reference Date _____ **£000**

a The provision in respect of redress

b The provision for the cost of conducting the review to completion

c Details and amounts of any contingent liabilities not recorded on the balance sheet in respect of *pension transfers and pension opt outs or FSAVCs*

3.09 3.08 Fund Investment management

Did the *firm* provide any investment management services act as an *investment manager* during the period?

YES NO

If YES, please provide the following information:

a If this includes **discretionary** management, what type of services has the *firm* provided during the period?

(e.g. *Managing investments for private customers/intermediate customers/non-UK customers, trustee activities, ISA manager management*)

b Funds under **discretionary** management:

Date _____ **£000**

(i) At the start of the accounting period

(ii) At the end of the accounting period

(iii) At latest practicable date within 1 month of date of signature of the Declaration on page 12

 I have supplied further information related to this page in Section YES NO

Annual questionnaire for authorised professional firms

3.09 c Funds under **non-discretionary** management:

Date

£000

At latest practicable date within
~~1 month of date of signature of the
Declaration on page 10~~

d Total funds under management :
(exclude 'custody only' funds)

Date

£

At latest practicable date within
~~1 month of date of signature of the
Declaration on page 12~~

I have supplied further information related to this ~~page~~ in Section in 4.01 YES NO

Annual questionnaire for authorised professional firms

4.01 Please use this space to provide any additional information relating to the previous sections.

If there is insufficient space, please continue on a separate sheet of paper, and clearly identify the section and question to which the additional information relates. Please include the name of the *firm* and the FSA firm reference number.

Question

Information

4.02 How many additional sheets are being submitted?

~~Annual questionnaire for authorised professional firms~~

Declaration

THIS DECLARATION MUST BE COMPLETED BY ALL FIRMS

I/ we confirm that the ~~firm~~ firm is, and continues to be, an ~~'authorised professional firm'~~ *authorised professional firm*. ~~as defined in the Financial Services Authority's Handbook of Rules and Guidance.~~

I/ we declare that the ~~firm~~ firm is able to meet its liabilities as they fall due until the end of the current accounting period (or twelve months from the last accounting reference date, if later).

Knowingly or recklessly giving the ~~FSA~~ FSA information which is false or misleading in a material particular may be a criminal offence (sections 398 and 400 of the Financial Services and Markets Act 2000). It should not be assumed that information is known to the ~~FSA~~ FSA merely because it is in the public domain or has previously been disclosed to the ~~FSA~~ FSA or another regulatory body.

I confirm that the information in this form is accurate and complete to the best of my knowledge and belief.

Name of *firm*

...

3.3.1 R Securing continuity of long term insurance cover

The *FSCS* must make arrangements to secure continuity of insurance for an *eligible claimant* under a *protected contract of insurance* which is a *long term insurance contract* with a *relevant person*, if:

...

- (2) it is reasonably practicable to do so;
- (3) the cost of doing so would, in the opinion of the *FSCS* at the time it proposes to make the arrangements, be likely to be no more than the cost of paying compensation under COMP 3.2 in the opinion of the *FSCS* at the time it proposes to make the arrangements, it would be beneficial to the generality of *eligible claimants* covered by the proposed arrangements, and, in situations where the cost of securing continuity of insurance might exceed the cost of paying compensation under COMP 3.2, any additional cost is likely to be justified by the benefits; and

...

...

3.3.2 F R In making arrangements to secure continuity of insurance the FSCS must use its reasonable endeavours to seek the most cost-effective arrangements available.

3.3.3 R (1) ...

(a) ...

(b) ...

~~if at the time it proposes to take the measures, it considers that the cost of doing so is likely to be no more than the cost of paying compensation under COMP 3.2~~ if, in the opinion of the FSCS at the time it proposes to make the measures, it would be beneficial to the generality of eligible claimants covered by the proposed measures, and, in situations where the cost of taking those measures might exceed the cost of paying compensation under COMP 3.2, any additional cost is likely to be justified by the benefits.

...

...

5.4.4 R For the purposes of COMP 5.4.3R and COMP 5.4.5R(1)(b), the situation of a risk or commitment is determined as follows:

...

(4) in cases not covered by (1) to (3):

(a) where the policyholder who first took out the contract of insurance is an individual, the risk or commitment is situated where he has his habitual residence at the date when the *contract of insurance* commenced;

(b) where the policyholder who first took out the contract of insurance is not an individual, the risk or commitment is situated where the establishment to which the risk or commitment relates is situated at the date when the *contract of insurance* commenced.

...

7.2.3 R

...

(3) If the FSCS makes recoveries through rights assigned under COMP 7.2.1R, it may deduct from any recoveries paid over to the claimant under COMP 7.2.4R part or all of its reasonable costs of recovery and of distribution (if any).

...

Notice to customers and the FSCS

14.4.6 R When an incoming *EEA firm's top-up cover* comes to an end under *COMP 14.4.1R*, *COMP 14.4.4R* or *COMP 14.4.5R*, it must:

(1) inform all the clients of its *UK branch* no later than six weeks after the date that its participation ends that they are no longer protected by the *compensation scheme*, and of the level of compensation which is then available to them; and

(2) within two months, notify the FSCS whether it has done so.

14.4.7 R If an *incoming EEA firm* fails to comply with *COMP 14.4.6R(1)*, the *FSCS* must inform the *firm's Home State regulator* of that fact.

...

**PERIODIC FEES (UNAUTHORISED MUTUAL SOCIETIES REGISTRATION)

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text. Where new definitions are being inserted, the text is not underlined.

Insert the following new definition in the appropriate alphabetical position:

- exchange traded fund* a fund:
- (a) which is an *open-ended investment company*; and
 - (b) the *units* of which are traded on a *regulated market* or *designated investment exchange*.

Amend the following definition as shown:

- inter-professional investment* any of the following *investments* specified in Part III of the *Regulated Activities Order* (Specified investments) or, in the case of *units* in an *exchange traded fund*, defined in the *Glossary*:
- (a) *share* (article 76);
 - (b) *debenture* (article 77);
 - (c) *government and public security* (article 78);
 - (d) *warrant* (article 79);
 - (e) *certificate representing certain securities* (article 80);
 - (f) *option* (article 83); for the purposes of the *permission* regime, this is sub-divided into:
 - (i) *option* (excluding a *commodity option* and an *option on a commodity future*);
 - (ii) *commodity option* and *option on a commodity future*;
 - (g) *future* (article 84); for the purposes of the *permission* regime, this is sub-divided into:
 - (i) *future* (excluding a *commodity future* and a *rolling spot forex contract*);
 - (ii) *commodity future*;
 - (iii) *rolling spot forex contract*;

- (h) *contract for differences* (article 85); for the purposes of the *permission* regime, this is sub-divided into:
 - (i) *contract for differences* (excluding a *spread bet* and a *rolling spot forex contract*);
 - (ii) *spread bet*;
 - (iii) *rolling spot forex contract*;
- (i) *rights to or interests in investments* in (a) to (h) (article 89);₂
- (j) *units in an exchange traded fund.*

HANDBOOK ADMINISTRATION (NO 3) INSTRUMENT 2006**Powers exercised**

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”) referred to in Schedule 4 to the General Provisions (GEN) (Powers exercised) of the Handbook.
- B. The rule-making powers referred to above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 July 2006.

Amendments to the Handbook

- D. The modules of the FSA Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions	Annex A
General Provisions (GEN)	Annex B
Fees manual (FEES)	Annex C
Conduct of Business sourcebook (COB)	Annex D

Citation

- E. This instrument may be cited as the Handbook Administration (No 3) Instrument 2006.

By order of the Board
22 June 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend the following definitions as shown.

<i>advising on investments</i>	<p>the <i>regulated activity</i>, specified in article 53 of the <i>Regulated Activities Order</i> (Advising on investments), which is in summary: advising a <i>person</i> if the advice is:</p> <ul style="list-style-type: none">(a) given to the <i>person</i> in his capacity as an investor or potential investor, or in his capacity as agent for an investor or a potential investor; and(b) advice on the merits of his doing any of the following (whether as principal or agent):<ul style="list-style-type: none">(i) <i>buying, selling</i>, subscribing for or underwriting a particular <i>investment</i> which is a <i>security</i> or <i>relevant investment</i> (that is, any <i>designated investment, funeral plan contract, pure protection contract, general insurance contract</i> or right to or interests in a <i>funeral plan contract</i>); or(ii) exercising any right conferred by such an <i>investment</i>, other than a <i>pure protection contract</i> or a <i>general insurance contract</i>, to <i>buy, sell</i>, subscribe for or underwrite such an <i>investment</i>.
...	
<i>appropriate personal pension</i>	<p>a <i>personal pension policy</i> or a <i>personal pension contract</i> under which contributions are made to a <i>personal pension scheme</i> which is an appropriate scheme under section 1(8) <u>7(4)</u> of the Social Security Act 1986 <u>Pension Schemes Act 1993</u> or article 3(8) <u>section 3(4)</u> of the Social Security (Northern Ireland) Order 1986 <u>Pension Schemes (Northern Ireland) Act 1993</u>.</p>
...	
<i>individual pension account</i>	<p>an account for the holding of <i>IPA eligible investments</i> operated by a firm in accordance with the Personal Pension Schemes (Restriction on Discretion to Approve) (Permitted Investments) Regulations 2001 (SI 2001/117), which satisfies the conditions described in <u>regulation 2(2) of the Stamp Duty and Stamp Duty Reserve Tax (Definition of Unit Trust Scheme and Open-ended Investment Company) Regulations 2001 (SI 2001/964)</u>.</p>

...

insurance undertaking an undertaking, or (in CASS 5 and COMP) a *member*, whether or not an *insurer*, which carries on *insurance business*.

...

IPA eligible investments a type of investment specified in regulation ~~4.(6)~~ 2(2) (condition 5) of The Personal Pension Schemes (Restriction on Discretion to Approve) (Permitted Investments) Regulations 2001 (SI 2001/117) the Stamp Duty and Stamp Duty Reserve Tax (Definition of Unit Trust Scheme and Open-ended Investment Company) Regulations 2001 (SI 2001/964).

...

option the *investment*, specified in article ~~77~~ 83 of the *Regulated Activities Order* (Options), which is an option to acquire or dispose of:

- (a) a *designated investment* (other than an option); or
- (b) currency of the *United Kingdom* or of any other country or territory; or
- (c) palladium, platinum, gold or silver; or
- (d) an option to acquire or dispose of an option specified in (a), (b) or (c).

...

pure protection contract (1) a *long-term insurance contract* in respect of which the following conditions are met:

- (a) the benefits under the contract are payable only on death or in respect of incapacity due to injury, sickness or infirmity;
- (b) the contract provides that benefits are payable on death (other than death due to an accident) only where the death occurs within ten years of the date on which the life of the person in question was first insured under the contract, or where the death occurs before that person attains a specified age not exceeding seventy years;
- (c) the contract has no surrender value, or the consideration consists of a single premium and the surrender value does not exceed that premium; and

(d) the contract makes no provision for its conversion or extension in a manner which would result in it ceasing to comply with any of (a), (b) or (c); ~~and~~ or

(e) ~~the contract is not a reinsurance contract.~~ [deleted]

(2) a reinsurance contract covering all or part of a risk to which a person is exposed under a long-term insurance contract.

...

terms of business

a statement in a *durable medium* of the terms and conditions on which a *firm* will ~~conduct *designated investment* business~~ carry on a *regulated activity* with or for a *client* or *retail customer*.

Annex B

Amendments to the General Provisions (GEN)

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend GEN 2.1 as shown. Deleted paragraphs are not shown struck through.

2.1 ~~Application and purpose~~ Introduction

Application

2.1.1 G ~~[deleted]~~

2.1.2 R This chapter applies to every *person* to whom any ~~rule~~ provision in the
- *Handbook* applies. In relation to a provision other than a rule, the rules in this chapter apply as if they were part of that provision.

2.1.3 P ~~[deleted]~~

2.1.4 E ~~[deleted]~~

2.1.5 D ~~[deleted]~~

2.1.6 G ~~[deleted]~~

2.1.7 R ~~[deleted]~~

2.1.8 R ~~[deleted]~~

2.1.9 G ~~[deleted]~~

~~Purpose~~ The Reader's Guide

2.1.10 G ~~The purpose of GEN 2 is to facilitate interpretation of the Handbook, in conjunction with the Reader's Guide. The Reader's Guide supplements this chapter. It provides an introduction to the structure and contents of the Handbook and its related materials, explaining how the different modules fit together and how to interpret and use the Handbook.~~

...

Continuity of authorised partnerships and unincorporated associations

2.2.18 R (1) If a *firm*, which is a ~~partnership~~ partnership or unincorporated association, is dissolved, ~~any firm~~ but its authorisation continues to have effect under section 32 of the Act (Partnerships and unincorporated associations) in relation to any partnership or unincorporated association which succeeds to the business of the

dissolved firm, the successor partnership or unincorporated association is to be regarded as the same firm for the purposes of the Handbook unless the context otherwise requires.

- (2) ~~For the purposes of (1), a firm is to be regarded as succeeding to the business of another firm only if:~~
- (a) ~~the members of the resulting firm are substantially the same as those of the former firm; and~~
 - (b) ~~succession is to the whole or substantially the whole of the business of the former firm. [deleted]~~
- (3) ~~In (1), “partnership” does not include a partnership which is constituted under the law of any place outside the United Kingdom and is a body corporate. [deleted]~~

2.2.19 G In principle, it is possible to view a change of ~~partners~~ partners in a ~~partnership~~ partnership, or a change in the membership of the unincorporated association, as the formation of a new ~~partnership~~ partnership or association. *GEN* 2.2.18R reflects section 32 of the *Act* (Partnerships and unincorporated associations), which provides for the continuing ~~authorisation of partnerships~~ partnerships and unincorporated associations following a change in ~~partners~~ partners or members if certain conditions are satisfied. In particular, this continuity does not apply if a limited liability partnership or individual sole trader succeeds to the business of a dissolved partnership; authorisation of the limited liability partnership or sole trader would need to be applied for. *GEN* 2.2.18 R ensures a similar effect to section 32 in relation to the status of the ~~partnership~~ partnership or unincorporated associations as a “firm” or “authorised person” for the purposes of the *Handbook*. ~~This continuity does not apply if a limited liability partnership succeeds to the business of a dissolved partnership; authorisation of the limited liability partnership would need to be applied for.~~

Annex C

Amendments to the Fees manual (FEES)

In this Annex, striking through indicates deleted text.

FEES 4 Annex 5R

...

Notes

- (1) The *FSA register* includes details of *exempt professional firms* carrying out *insurance mediation activity*.
- (2) In addition to the periodic fees shown above, the sum of £31,400 will be due from the *designated professional bodies*, divided between the bodies in proportion to the number of *exempt professional firms* each has on the *FSA register* on 14 January 2006. This is a contribution towards the costs of developing this part of the *FSA register*.
- (3) ~~Each of the *designated professional bodies* will be invoiced for the appropriate amount in January 2006. The invoices must be paid on or before 28 February 2006.~~

Annex D

Amendments to the Conduct of Business sourcebook (COB)

In this Annex, underlining indicates new text.

Annex E

Amendments to the Insurance: Conduct of Business sourcebook (ICOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

5.3.1 R If a *non-investment insurance contract* is not a *distance contract*, an *insurance intermediary* must, in good time before the conclusion of the contract:

(1) ...

(2) draw the attention of the *retail customer* orally to ... the section of the *policy summary* on significant ~~and~~ or unusual exclusions or limitations.

...

5.3.6 R (1) ...

(2) The following exemptions from (1) apply:

(a) Telephone sales

...an *insurance intermediary* may proceed on the basis of at least the following information:

...

(iv) significant ~~and~~ or unusual exclusions or limitations;

...

(b) Certain other means of distance communication

...the *insurance intermediary* must provide the following information by other means before the conclusion of the contract:

...

(iv) significant ~~and~~ or unusual exclusions or limitations;

...

...

5.3.27 G When explaining the implications of a change in accordance with *ICOB* 5.3.24R(2) or *ICOB* 5.3.25R(2)(a) to a *retail customer*, an *insurance intermediary* should explain any changes to the benefits and significant ~~and~~ or unusual exclusions arising from the change.

Annex F

Amendments to the Client Assets sourcebook (CASS)

In this Annex, underlining indicates new text and striking through indicates deleted text.

4.3.98 G The purpose of CASS 4.3.99R to CASS 4.3.102R is to set out those situations in which a *firm* will have fulfilled its contractual and fiduciary obligations in relation to any *client money* held for or on behalf of its *client*, or in relation to the *firm's* ability to require repayment of that *money* from a third party.

...

5.5.79 G The purpose of CASS 5.5.80R to CASS 5.5.83R is to set out those situations in which a *firm* will have fulfilled its contractual and fiduciary obligations in relation to any *client money* held for or on behalf of its *client*, or in relation to the *firm's* ability to require repayment of that *money* from a third party.

...

5.6.9 R *Client money* received by the *firm* ... after a *primary pooling event* ... must be placed in a *client bank account* that has been opened after that event and must be handled in accordance with the *client money rules*, and returned to the relevant *client* without delay, except to the extent that:

(1) ...

(2) it is *money* relating to a *client*, for whom the *client money entitlement requirement*, calculated in accordance with CASS 5.5.66R or CASS 5.5.68R, shows that *money* is due from the *client* to the *firm* ...

Annex G

Amendments to the Supervision manual (SUP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

10.10 Customer functions

...

- 10.10.7 R (1) The *investment adviser function* is the function of:
- (a) *advising on investments* other than a *non-investment insurance contract*; and
 - (b) performing functions within the *customer trading function* in connection with *advising on investments* other than *non-investment insurance contracts*.
- (2) This function does not include:
- (a) the *investment adviser (trainee) function*; ~~and~~
 - (b) the *pension transfer specialist function*; ~~and~~
 - (c) *advising on investments in the course of carrying on the activity of providing basic advice on a stakeholder product.*

...

...

Form of notification when acquiring or increasing control

11.3.7 D A notification (“notice of *control*”) given to the *FSA* by a *person* who is acquiring *control* or increasing his *control* over a *UK domestic firm*, in a way described in *SUP* 11.4.2R(1) to (4), or acquiring *control* in a way described in *SUP* 11.4.2AR(1), must:

- (1) where the *controller* or a proposed *controller* is not an *authorised person*, contain the information required in:
 - (a) ~~Controllers Form A (*SUP* 11 Annex 4); and~~
 - (b) ~~one or more of Controllers Form B (*SUP* 11 Annex 5) in accordance with *SUP* 11.3.8D; or~~

the relevant controllers form;

...

- (2) where the *controller* or proposed *controller* is any other *authorised person*, contain the information required in ~~these sections of Controllers Form A (SUP 11 Annex 4) which deal with details of the proposed change in control and the persons involved in the notification~~ the relevant controllers form; and

...

11.3.8 D The information in ~~Controllers Form B~~ is required in relation to the following *persons*:

- (1) ~~if the controller is an individual, that individual;~~
- (2) ~~if the controller is a body corporate:~~
- (a) ~~the individual who is its chief executive; and~~
- (b) ~~one other individual who is a director of the body corporate;~~
- (3) ~~if the controller is a partnership or is a controller because he is a partner in a partnership:~~
- (a) ~~the individual who is a managing partner or equivalent in the partnership; and~~
- (b) ~~one other individual who is a partner in the partnership.~~
[deleted]

11.3.9 D If a ~~Controllers Form B~~ relevant controllers form, or an Application to perform *controlled functions* under the *approved persons* regime (Form A in SUP 10 Annex 4D) in respect of a *governing function*, has already been submitted to the *FSA* in relation to a relevant individual, then the information in that form need not be submitted to the *FSA* as long as details of any changes in the information previously submitted, or confirmation that there are none, is submitted.

...

11.3.11 G The *FSA*, for administrative reasons, expects notifications within SUP 11.3.7D to be given on ~~Controllers Form A or Controllers Form B~~ the relevant controllers form, as appropriate. If notifications are not made on these forms the applicant must inform the *FSA* of the reasons for not using them.

11.3.12 G If a *controller* or proposed *controller* considers that the requirements in SUP 11.3.7D to SUP 11.3.9D are not appropriate to his circumstances,

(for example,:

- (1) if the *control* is temporary; ~~or~~
- (2) if ~~Form B is required (under ■ SUP 11.3.8 D) in relation to:~~
 - (a) ~~an individual who is an approved person; or~~
 - (b) ~~a partnership of which one or more of the partners are bodies corporate;~~

he should consult the *FSA*. The *FSA* has power, under section 182(3) of the *Act* (Notification), to amend those requirements if it considers it appropriate to do so.

...

Joint and shared notifications

- 11.5.8 G A *firm* and its *controller* or proposed *controller* may discharge an obligation to notify the *FSA* by submitting a single joint notification containing the information required from the *firm* and the *controller* or proposed *controller*. In this case, the ~~Controllers Form A~~ relevant controllers form may be used to submit a notification on behalf of both the *firm* and the *controller* or proposed *controller*.

...

SUP 11 Annexes 4D and 5D are deleted in their entirety. The deleted text is not shown struck through.

CAPITAL RESOURCES FOR SMALL FIRMS INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers);
 - (3) section 157(1) (Guidance); and
 - (4) section 340 (Appointment of auditors and actuaries).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. Annexes A to C to this instrument come into force on 6 October 2006.
- D. Annex D to this instrument comes into force on 1 January 2007.

Amendments to the Handbook

- E. The Integrated Prudential sourcebook (PRU) is amended in accordance with Annex A to this instrument.
- F. The Interim Prudential sourcebook for Investment Businesses (IPRU(INV)) is amended in accordance with Annex B to this instrument.
- G. The Supervision manual (SUP) is amended in accordance with Annexes C and D to this instrument.

Citation

- H. This instrument may be cited as the Capital Resources for Small Firms Instrument 2006.

By order of the Board
27 July 2006

Annex A

Amendments to the Integrated Prudential sourcebook (PRU)

...

9.3.52 R Table: Items which are eligible to contribute to the capital resources of a firm

Item	Additional explanation
1. ...	
...	
3. Reserves (Notes 1 and 2)	...
4. Interim net profits (Notes 1 and 2)	...
...	
6. General/ collective provisions (<u>Note 1</u>)	These are provisions that a <i>firm</i> carrying on <i>mortgage lending</i> or <i>mortgage administration</i> holds against potential losses that have not yet been identified but which experience indicates are present in the <i>firm's</i> portfolio of assets. Such provisions must be freely available to meet these unidentified losses wherever they arise. <u>Subject to Note 1, G</u> general/collective provisions must be verified by external auditors and disclosed in the <i>firm's</i> annual report and accounts.
...	
Notes	
1	In general, small <i>insurance intermediaries</i> which only carry on <i>insurance mediation activities</i> in relation to <i>non-investment insurance contracts</i> and small <i>mortgage intermediaries</i>, may be <u>Reserves must be audited and interim net profits, general and collective provisions must be verified by the <i>firm's</i> external auditor unless the <i>firm</i> is exempt from the requirement to appoint an auditor under provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)). If so, the <i>firm</i> may include unaudited reserves and unverified interim net profits in the calculation of its capital resources.</u>
2	<i>Mortgage lenders</i> and <i>mortgage administrators</i> to which the Companies Act 1985 applies are required to appoint an auditor under that Act (section 249B (Cases where exemptions not available)). These <i>firms</i> will only be able to include audited reserves and verified interim net profits in the calculation of its capital resources.

Annex B

Amendments to the Interim Prudential sourcebook for Investment Businesses (IPRU(INV))

In this Annex, underlining indicates new text and striking through indicates deleted text.

Chapter 3: Financial resources for Securities and Futures Firms which are not Investment Firms

...

Calculation of relevant annual expenditure

3-73(2) R Subject to (3), ~~and (4)~~ and (5) below, a *firm* must calculate its *relevant annual expenditure* with reference to the *firm's* most recent ~~audited annual financial statements submitted to the FSA~~, as follows:

(a) ...

Absence of ~~audited~~ annual financial statements

3-73(3) R If a *firm* does not have ~~audited~~ *annual financial statements*, it must:

(a) where it has just commenced trading ~~or has not been authorised long enough to have submitted audited annual financial statements to the FSA (or to the FSA's predecessor)~~, base its *relevant annual expenditure* on budgeted or other accounts which it submitted to the *FSA* ~~(or to the FSA's predecessor)~~ as part of its application; or

(b) ...

...

Recent authorisation

3-73(5) R If a *firm* has not been authorised long enough to have prepared *annual financial statements* after authorisation, it must base its *relevant annual expenditure* on budgeted or other accounts which it submitted to the *FSA* as part of its application.

...

Appendix 1 – Glossary of Terms for IPRU(INV) 3

...

annual accounting reference date

means the date as at which the ~~audited~~ *annual financial statements* are prepared as initially notified by the *firm* to the *FSA* or as subsequently notified under rule 3-31 for all other purposes and which may not be more than 55 weeks since the previous *annual accounting reference date* or, if applicable, the date on which the *firm* commenced trading;

...

audited annual financial statements means statements drawn up in accordance with Schedule 4 to the Companies Act 1985 or, where applicable, *international accounting standards* as at the *firm's annual accounting reference date* ~~together with~~ and, where required, an auditor's report thereon;

auditor's report means a report drawn up in the format required by the *Supervision manual* which a *firm* must submit to the *FSA* in conjunction with the *firm's audited annual financial statements*;

...

reporting statement means any one or more of the following types of report as required by the *Supervision manual*:

(a) ~~audited~~-audited *annual financial statements*;

(b) ...

...

...

Appendix 43 - Guidance Notes on the financial resources and accounting treatment of soft commission agreements

1. ...

2. The *FSA* is of the view that it is not responsible for setting accounting policies in relation to a *firm's audited annual financial statements*. However, the *FSA* considers that it is preferable for all *firms* participating in "soft commission agreements" to have consistent accounting policies. Without such consistency, certain *firms* would have a competitive advantage in terms of their *financial resources*. Therefore, for the purposes of completing *financial reporting statement* submitted to the *FSA*, appropriate accounting policies should be used. The guidance and interpretations made in this Appendix should be considered in this context.

3. ...

...

Chapter 5: Interim Prudential Requirements for Former IMRO Firms

...

5.2.3(4) (a) R ...

(c) The *liquid capital requirement* for an *ISD firm* whose *expenditure based requirement* consists of 6/52 of its *annual audited expenditure*, determined in accordance with Table 5.2.3(5)(a), is the greater of:

(i) one quarter of its *annual ~~audited~~ expenditure* calculated in accordance with rule 5.2.4(1); and

(ii) ...

...

Annual ~~Audited~~ Expenditure

5.2.4(1) R *Annual ~~audited~~ expenditure* is:

...

5.2.4(2) G *A firm's financial resources requirement* will be recalculated and, where required, audited annually when its *annual financial return* is prepared. The *firm* must maintain *financial resources* sufficient to meet its new *financial resources requirement* from the date on which the *annual financial return* is prepared, and where required, approved by the auditor. The *expenditure based requirement* applicable at the *accounting reference date* to which the *annual financial return* is prepared will be that based on the previous year's figures. This will usually be the same as that used in the fourth quarter's *quarterly financial return* prepared to the same *accounting reference date*.

...

5.2.4(3) R *A firm's annual expenditure must be audited unless the firm is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).*

...

TABLE 5.2.2(1) CALCULATION OF OWN FUNDS AND LIQUID CAPITAL

PART I

METHOD OF CALCULATION

A firm must calculate its *own funds* and *liquid capital* as shown below, subject to the detailed requirements set out in Part II.

Financial resources	Category	Part II Para
Tier 1		
(1) Paid-up share capital (excluding preference shares)	A	2
(2) Share premium account		

(3) ~~Audited~~ Reserves

2A

(4) Non-cumulative preference shares

...

PART II

DETAILED REQUIREMENTS

1 Ratios ...

(Items 10, 11 and 15)

...

2A ~~Audited~~ Reserves ...

Note 1

A firm should keep a record ...

Note 2

Reserves must be audited unless the *firm* is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).

...

7 Qualifying arrangements (Item 13) (a) ...

(b) A *firm* which is not an *ISD firm* may only include *qualifying undertakings* in its calculation of *liquid capital* if:

(i) it maintains *liquid capital* equivalent to 6/52 of its *annual ~~audited~~ expenditure* in a form other than *qualifying undertakings*; and

(ii) ...

...

8 Net trading book profits (Item 14)	<p>...</p> <p>Note</p> <p><i>Non-trading book</i> interim profits may only be included in Tier 1 of the calculation if they have been independently verified by the <i>firm's</i> external auditors, <u>unless the <i>firm</i> is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).</u></p> <p>...</p> <p>A <i>firm</i> wishing to include interim profits in Tier 1 capital in a <i>financial return</i> should submit to the <i>FSA</i> with the <i>financial return</i> a verification report signed by its external auditor which states whether the interim results are fairly stated, <u>unless the <i>firm</i> is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).</u></p> <p>Profits on the sale of capital items or arising from other activities which are not directly related to the <i>investment business</i> of the <i>firm</i> may also be included within the calculation of <i>liquid capital</i>, <u>but (unless the <i>firm</i> is exempt as above) only</u> if they can be separately verified by the <i>firm's</i> auditors. In such a case, such profits can form part of the <i>firm's</i> Tier 1 capital as audited profits.</p>

- 5.7.1(5) R If the *firm* notifies the *FSA* under *rule 5.7.1(4)* that it will not apply the rules in this section, it must:
- (a) ...
 - (d) make a note in its ~~audited~~ financial statements that it is not subject to regulatory consolidated capital requirements.

...

Appendix 1 (Interpretation)

Glossary of Terms for Chapter 5 (Former IMRO Firms)

...

annual audited expenditure has the meaning given in rule 5.2.4(1) (Determination).

...

qualifying capital item means that part of a *firm's* capital which has the following characteristics:

- (a) ...
- (c) its amount is determined by the management of the *firm* and verified by independent auditors (unless the *firm* is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit))), and is made known to, and is monitored by, *FSA*.

...

Chapter 13: Financial Resources Requirements for Personal Investment Firms

...

Calculation

13.10.2 R A *Category B firm's own funds* must be calculated in accordance with table 13.10(2).

Table 13.10(2)

This table forms part of *rule* 13.10.2

OWN FUNDS	
Companies	Sole Traders: Partnerships
Paid-up <i>share</i> capital (excluding preference <i>shares</i> redeemable by shareholders within 2 years)	...
<i>Share</i> premium account	
Audited <u>Retained</u> profits (see 13.10.2AR) and verified interim net profits (<u>Note 1</u>)	
...	
<u>Note 1</u>	
<u>Retained profits must be audited and interim net profits must be verified</u>	

by the *firm's* external auditor, unless the *firm* is exempt from the provisions of Part VII of the Companies Act 1985 relating to the audit of accounts (section 249A (Exemptions from audit)).

13.10.2A R For the purpose of calculating a *Category B firm's own funds*, the following adjustments apply to ~~audited~~ retained profits or, (for non-corporate entities), current accounts figures:

(1) ...

...

...

Annex C

Amendments to the Supervision manual (SUP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

3.1.1A G For the avoidance of doubt, this chapter does not apply to the following firms if they do not hold client money or client assets and do not appoint an auditor under or as a result of a statutory provision other than in the Act:

- (1) authorised professional firms;
- (2) energy market participants, including oil market participants, to whom IPRU(INV) 3 does not apply;
- (3) exempt insurance intermediaries;
- (4) insurance intermediaries not subject to SUP 3.1.2R(10);
- (5) investment management firms;
- (6) mortgage administrators;
- (7) mortgage intermediaries;
- (8) mortgage lenders;
- (9) personal investment firms, including small personal investment firms;
- (10) securities and futures firms; and
- (11) service companies.

3.1.2 R Applicable sections (see SUP 3.1.1R)

(1) Category of firm	(2) Sections applicable to the firm	(3) Sections applicable to its auditor
(1) <u>Authorised professional firm</u> which is required by IPRU(INV) 2.1.2R to comply with chapters 3, 5, 10 or 13 of IPRU(INV) <u>and which has an auditor appointed under or as a result of a statutory provision other than in the Act</u> (Note 1)	SUP 3.1 – SUP 3.7	SUP 3.1, SUP 3.2, SUP 3.8 – SUP 3.10
...		
(7) <u>Investment management firm, personal investment firm</u> (other than a <u>small personal investment firm</u>), UCITS management company, or <u>securities and futures firm</u> (Note 3) <u>which, in each case, has an auditor</u>	SUP 3.1 – SUP 3.7	SUP 3.1, SUP 3.2, SUP 3.8 – SUP 3.10

	<u>appointed under or as a result of a statutory provision other than in the Act</u>		
(7A)	<u>Investment management firm, personal investment firm (other than a small personal investment firm), or securities and futures firm not within (7) to which either or both of CASS 2 (Client assets) and CASS 4 (Client money and mandates: designated investment business) applies</u>	<u>SUP 3.1 – SUP 3.7</u>	<u>SUP 3.1, SUP 3.2, SUP 3.8, SUP 3.10</u>
(7B)	<u>UCITS management company</u>	<u>SUP 3.1 – SUP 3.7</u>	<u>SUP 3.1, SUP 3.2, SUP 3.8 – SUP 3.10</u>
...			
(9)	<u>Mortgage lender which has an auditor appointed under or as a result of a statutory provision other than in the Act</u>	<u>SUP 3.1 – SUP 3.7</u>	<u>SUP 3.1, SUP 3.2, SUP 3.8</u>
...			

...

Limited application for certain types of firm and their auditors

3.2.4 G ~~SUP 3.1.1.R and SUP 3.1.2R~~ limit the application of this chapter in relation to:

- (1) ~~authorised professional firms to which COB 9.1 (Custody) and COB 9.3 (Client money) do not apply or which are not required by IPRU(INV);~~
- (2) ~~oil market participants, and energy market participants, to whom IPRU(INV) 3 does not apply;~~
- (3) ~~small personal investment firms;~~
- (4) ~~service companies;~~
- (5) ~~exempt insurance intermediaries;~~
- (6) ~~insurance intermediaries not subject to SUP 3.1.2R(!0)~~
- (7) ~~mortgage intermediaries; and~~
- (8) ~~mortgage administrators.~~

Such ~~firms~~ are not required, under this chapter, to appoint an auditor because ~~SUP 3.3 (Appointment of auditors) does not apply~~. If such ~~firms~~ appoint an

auditor under or as a result of a statutory provision other than in the Act, for example, under the Companies Act 1985, SUP 3.7 (Notification of matters raised by auditor) and SUP 3.8 (Rights and duties of all auditors) nevertheless apply to help the FSA discharge its functions under the Act. See SUP 3.1.2R, Note 4, for further clarification concerning *insurance intermediaries* and those which qualify as *exempt insurance intermediaries*. [deleted]

Insurance intermediaries and their auditors

- 3.2.5 G It is the responsibility of an *insurance intermediary's* senior management to determine, on a continuing basis, whether the *insurance intermediary* is an *exempt insurance intermediary* for the purposes of this requirement and to appoint an auditor if management determines the *firm* is no longer exempt. SUP 3.7 (amplified by SUP 15) sets out what a *firm* should consider when deciding whether it should notify the FSA of matters raised by its auditor.

...

- 16.7.21 R Financial reports required from *service companies* (see SUP 16.7.20R)

Report	Frequency	Due Date

...

Expenditure Based Requirement (test 2)

This is a capital requirement for *personal investment firms* that are not *low resource firms*, based on a *firm's* overall audited expenditure. The Expenditure Based Requirement is calculated as a fraction of the *firm's* annual fixed costs which, for this purpose, are based upon the *firm's* annual ~~audited~~ expenditure and, in general terms, exclude cost items that would not be incurred were there no income. Thus staff bonuses and *partners'* profit shares (unless guaranteed) and any shared commissions are not treated as fixed costs for the purposes of the calculation.

...

SUP 16 Annex 19 BG: Notes for Completion of the Mortgage Lending & Administration Return ('MLAR')

...

C1-2 CAPITAL RESOURCES

...

(3) ~~Audited~~ Reserves

~~Audited~~ Reserves are ~~audited~~ accumulated profits retained by the *firm* (after deduction of tax, dividends and proprietors' or *partners'* drawings) and other reserves created by appropriations of *share* premiums and similar realised appropriations. Reserves also include gifts of capital, for example, from a parent company. For *partnerships*, ~~audited~~ reserves include *partners'* current accounts according to the most recent financial statement. Reserves must be audited unless the *firm* is eligible to include unaudited reserves in its capital resources calculation under PRU 9.3.52R.

The ~~audited~~ reserves figure is subject to the following adjustments, where appropriate:

(a) ...

...

(4) Interim net profits and partners' interim current accounts

A *firm* is not required to take into account interim net profits. However, if it does, the profits have to be verified by the *firm's* external auditors, net of tax, anticipated dividends or proprietors' drawings and other appropriations unless the *firm* is eligible to include unverified interim net profits in its capital resources calculation under PRU 9.3.52R.

...

(6) General /collective provisions

Firms should report general/collective provisions that are held against potential losses that have not yet been identified, but which experience indicates are present in the *firm's* portfolio of assets. Such provisions must be freely available to meet these unidentified losses wherever they arise. General/collective provisions must be verified by external auditors and disclosed in the *firm's* annual report and accounts unless the *firm* is eligible to include unaudited general and collective provisions in its capital resources calculation under PRU 9.3.52R.

...

Treatment of eligible capital items (listed above) in section C1:

C1.1 Reserves: include items

- ~~audited~~ reserves
- revaluation reserves

C1.2 Interim profits: include items

- ~~externally verified~~ interim net profits
- ~~externally verified~~ *partners'* interim current accounts

...

C5 Capital requirements

...

C5.2 Total income

Firms should report the amount of total income in their most recent ~~audited~~ (or other) financial statements, and an estimate of income for the current reporting year.

...

**NEW COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK
(ACCOUNTING REFERENCE PERIODS AND OTHER AMENDMENTS)
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in or under:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 140 (Restriction on managers of authorised unit trust schemes);
 - (c) section 156 (General supplementary powers);
 - (d) section 157(1) (Guidance);
 - (e) section 238(5) (Restrictions on promotion);
 - (f) section 242 (Applications for authorisation of unit trust schemes);
 - (g) section 247 (Trust scheme rules); and
 - (h) section 248 (Scheme particulars rules); and
 - (2) regulation 6 (FSA rules) of the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228).
- B. The rule-making powers and related provisions listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 August 2006.

Amendments to the Handbook

- D. The Glossary of definitions is amended in accordance with Annex A to this instrument.
- E. The New Collective Investment Schemes sourcebook (COLL) is amended in accordance with Annex B to this instrument.

Citation

- F. This instrument may be cited as the New Collective Investment Schemes Sourcebook (Accounting Reference Periods and Other Amendments) Instrument 2006.

By order of the Board
27 July 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend the following definitions as shown:

...

*accounting
reference date* ...

(2) (in *COLL* and *CIS*): the date stipulated in the *prospectus* on which the *annual accounting period* of an *authorised fund* ends.

...

*annual
accounting
period* ...

(2) (in *COLL*): the ~~12-month~~ period determined in accordance with *COLL* 6.8.2R(3) to (7) (*Accounting periods*) stipulated in the *prospectus* which ends on the ~~accounting reference date~~.

...

*UCITS
Directive*

the Council Directive of 20 December 1985 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) (No 85/611/EEC), as amended by Directives 88/220/EEC, 95/26/EC, 2000/64/EC, 2001/107/EC, 2001/108/EC ;

Annex B

Amendments to the New Collective Investment Schemes sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

Preparation of long and short reports

4.5.3 R ...

- (4) ~~The first annual accounting period of a scheme must begin:~~
- (a) ~~on the first day of any period of initial offer; or~~
 - (b) ~~in any other case, on the date of the relevant authorisation order.~~ [deleted]

...

Spread: government and public securities

5.6.8 R ...

- (2) The requirements in COLL 5.2.12R (Spread: government and public securities) apply to investment in *government and public securities* by a *non-UCITS retail scheme*, except for COLL 5.2.12R(4) which will apply to such a scheme only to the extent that it concerns the most recently published prospectus of the scheme.

...

Prohibition on promotional payments

- 6.7.12 R (1) No payment may be made from *scheme property* to any person ...
- (2) Paragraph (1) shall not apply to the costs of preparing and printing the simplified prospectus or key features of the authorised fund, provided the prospectus states in accordance with COLL 4.2.5R(13) and (14) (Table: contents of the prospectus) that these costs are properly payable to the authorised fund manager from scheme property.

Prohibition on promotional payments: guidance

6.7.13 G Examples of payments which are not permitted by COLL 6.7.12R include:

...

- (2) payments or costs in relation to the preparation or dissemination of *financial promotions* (other than ~~the preparation of key features or the simplified prospectus~~ costs allowed under COLL 6.7.12R(2)); and

...

...

Accounting periods

6.8.2 R ...

- (2) A half-yearly accounting period begins with the first day of an annual accounting period and ends on:

(a) the day which is six months later before the last day of that annual accounting period; or

(b) ~~ends on~~ some other reasonable date as set out in the *prospectus* of the *scheme*.

- (3) The first annual accounting period of a scheme must begin:

(a) on the first day of any period of initial offer; or

(b) in any other case, on the date of the relevant authorisation order;

and in either case must end on the next accounting reference date, except where (4) applies.

- (4) When the accounting reference date of a scheme falls less than six months after the beginning of the first annual accounting period, that period may be extended until the subsequent accounting reference date.

- (5) Each annual accounting period of a scheme subsequent to the first period is to run for a period of 12 months, beginning on the next day after the accounting reference date, except where (6) applies.

- (6) Following a revision to the prospectus of the scheme that includes a change to the accounting reference date, the annual accounting period may be shortened, or extended by up to six months, so as to end on the new accounting reference date.

- (7) The authorised fund manager must consult the depositary and the

scheme's auditor before shortening or extending an accounting period in accordance with (4) or (6).

6.8.2A G When the annual accounting period of a scheme is extended under COLL 6.8.2R(4) or (6), resulting in a longer than usual period before the publication of reports to unitholders, the authorised fund manager should make summary information about the investment activities of the scheme available to unitholders during that period, in accordance with Principles 6 (Customers' interests) and 7 (Communications with clients).

...

Report and accounts

8.3.5 R ...

- (2) ~~The first annual accounting period must begin:~~
- (a) ~~on the first day of any period of initial offer; or~~
 - (b) ~~in any other case, on the date of the relevant authorisation order. [deleted]~~

...

Income

8.5.15 R ...

(1A) COLL 6.8.2R (2) to (7) (Accounting periods) also apply to the half-yearly accounting period and annual accounting period of a qualified investor scheme.

KEYFACTS LOGO INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in the following sections of the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making powers);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance); and
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 November 2006.

Amendments to the Handbook

- D. The modules of the FSA’s Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

General amendment to Handbook forms	Annex A
General Provisions (GEN)	Annex B
Conduct of Business sourcebook (COB)	Annex C
Insurance: Conduct of Business sourcebook (ICOB)	Annex D
Mortgages: Conduct of Business sourcebook (MCOB)	Annex E

Citation

- E. This instrument may be cited as the Keyfacts Logo Instrument 2006.

By order of the Board
28 September 2006

Annex A

General amendment to Handbook forms

All instances in the Handbook of the keyfacts logo in column (1) of the table below are replaced with the keyfacts logo and regulatory mark in column (2) of the table.

(1)	(2)
 The logo consists of the word "keyfacts" in a white, lowercase, sans-serif font, centered within a black speech bubble shape that points downwards and to the right.	 The logo is identical to the one in column (1), but includes a small registered trademark symbol (®) to the upper right of the word "keyfacts".

Annex B

Amendments to the General Provisions sourcebook

In this Annex underlining indicates new text and striking through indicates deleted text.

...

GEN 5 The FSA logo and the keyfacts logo

...

Purpose

5.1.2 G The FSA logo is a registered UK service mark, with number 2150560. The keyfacts logo is a registered Community trade mark, with the number 386688. ~~and is~~ Both are the property of the FSA. ~~It is~~ They are also subject to copyright and may be used or reproduced with permission of the FSA only. If the FSA or keyfacts logos are ~~is~~ reproduced or otherwise used by any person without such permission the FSA may seek to enforce its rights over its property through the Courts.

5.1.3 G *GEN 5 Annex 1 is a general licence, which sets out the circumstances in which the FSA permits firms and their appointed representatives to reproduce the FSA and keyfacts logos. A firm or an appointed representative need not apply for an individual licence if it uses or reproduces the ~~FSA logos~~ in accordance with the general licence.*

5.1.4 G The FSA has no policy to allow use of the ~~FSA logos~~ by a firm or appointed representative other than as set out in GEN 5 Annex 1. If, however, a firm or appointed representative wishes to use or reproduce either of the FSA logos other than in accordance with the general licence, it may apply to the FSA for an individual licence, giving full reasons why it considers the FSA should grant the licence.

...

The keyfacts logo

5.1.5 R A firm must not use the keyfacts logo other than as and when it is required or permitted to be used by the rules, and in accordance with the general licence in GEN 5 Annex 1G.

...

Annex 1 G Licence for use of the FSA and keyfacts logos by authorised firms and

appointed representatives

Application

- 1.1 The *FSA* grants this licence to *firms* and *appointed representatives*.

The FSA and keyfacts logos

- 2.1 The FSA logo is made up of two elements which together make up the registered UK service mark, with number 2150560:

...

- 2.2 ~~Together, these elements make up the registered UK service mark, with number 2150560.~~ The keyfacts logo is made up of two elements which together make up the registered Community trade mark, with number 3866688:

(1) the symbol (the rectangular speech bubble); and

(2) the word 'keyfacts'.

- 2.3 There are two versions of the FSA logo, version A and a smaller version B in which the scroll has been simplified. There are two versions of the keyfacts logo, a low resolution version and a high resolution version.

- 2.4 Copyright subsists in the FSA and keyfacts logos.

- 2.5 Copies of the FSA and keyfacts logos that are capable of being reproduced for printing can be found on the *FSA's* website at ~~http://www.fsa.gov.uk/pubs/other/copies_of_the_fsa_logo/index.html~~ http://www.fsa.gov.uk/Pages/Library/Other_publications/Logos_and_Photos/index.shtml.

Permission to use the FSA logo

...

Permission to use the keyfacts logo

- 3A.1 A firm and its appointed representatives are permitted to use the keyfacts logo as and when it is required or permitted to be used by the rules.

3A.2 The following are examples of places where the *rules* require or permit the keyfacts logo to be used:

(1) In *COB*:

- (a) in an initial disclosure document or combined initial disclosure document (*COB* 4.3.9R); and
- (b) in a fees and commission statement (*COB* 4.3.11R).

(2) In *ICOB*:

- (a) in an initial disclosure document or combined initial disclosure document (*ICOB* 4.2.4G to *ICOB* 4.2.7R);
- (b) in a *policy summary* (*ICOB* 5.5.5R); and
- (c) in a *key features* as an alternative to a *policy summary* (*ICOB* 5.5.4R).

(3) In *MCOB*:

- (a) in an initial disclosure document or combined initial disclosure document (*MCOB* 4.4.1R, *MCOB* 4.4.7R, *MCOB* 8.3.1R and *MCOB* 8.4.1R); and
- (b) in an *illustration* (*MCOB* 5.6.2R and *MCOB* 9.4.2R).

Conditions on appearance of the FSA logo

...

Conditions on appearance of the keyfacts logo

4A.1 The permission in paragraph 3A.1 is subject to the following conditions:

- (1) the regulatory mark (®) is attached to the keyfacts logo;
- (2) the keyfacts logo and regulatory mark appear:
 - (a) in black type;

- (b) reversed out white on a coloured background; or
- (c) in colour provided that this does not diminish their prominence;
- (3) the two elements of the keyfacts logo appear together in the same way, and in the same proportion, as in the Community trade mark;
- (4) the keyfacts logo is not redrawn in any way, or matched by a typesetter;
- (5) the low resolution version of the keyfacts logo is used only in documents intended to be read on a computer, television or other screen; and
- (6) if the keyfacts logo is reproduced electronically, no hyperlink is incorporated.

Further conditions on the use of the FSA and keyfacts logos

5.1 The permissions in paragraphs 3.1 and 3A.1 are ~~is~~ also subject to the conditions that any material, whether produced on paper or electronically, on which the FSA or keyfacts logos are ~~is~~ displayed does not:

- (1) in any way imply that the *FSA* is endorsing the *firm* or its *appointed representatives* or products, services or communications (see also *GEN* 1.2.2R(1)); or
- (2) misrepresent the *firm's* or its *appointed representative's* relationship with the *FSA* or present false information about the *FSA*; or
- (3) contain content that could be construed as distasteful, offensive or controversial; or
- (4) infringe any intellectual property or other rights of any *person* or otherwise not comply with any relevant law or regulation.

Commencement and duration

7.1 This licence comes into effect on 1 May 2003 except that in relation to the keyfacts logo it comes into effect on 6 November 2006.

7.2 The *FSA* may alter or revoke this licence at any time, by giving at least two months' notice on the *FSA's* website.

Interpretation

8.1 This licence is to be interpreted in accordance with chapter 2 of the General provisions (Interpreting the Handbook) of the *FSA's* Handbook of Rules and Guidance. In particular, expressions in italics are defined in the Handbook Glossary.

Governing law and jurisdiction

9.1 This licence is governed by and interpreted in line with English law. The courts of any jurisdiction in the United Kingdom have the exclusive jurisdiction to settle any dispute in connection with this licence.

FEES PROVISIONS (REMISSION OF FEES LIMITATION) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers);
 - (3) section 157(1) (Guidance);
 - (4) section 234 (Industry funding); and
 - (5) paragraph 17(1) of Schedule 1 (Fees).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 October 2006.

Amendments to the Handbook

- D. The Fees manual (FEES) is amended in accordance with the Annex to this instrument.

Citation

- E. This instrument may be cited as the Fees Provisions (Remission of Fees Limitation) Instrument 2006.

By order of the Board
28 September 2006

Annex

Amendments to the Fees manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

Remission of Fees

- 2.3.1 R If it appears to the *FSA*, or *FOS Ltd* (in relation to any *FOS* case fee only), that in the exceptional circumstances of a particular case, the payment of any fee or *FOS* levy would be inequitable, the *FSA* or *FOS Ltd*, as relevant, may (unless *FEES* 2.3.2BR applies) reduce or remit all or part of the fee or levy in question which would otherwise be payable.
- 2.3.2 R If it appears to the *FSA*, or *FOS Ltd* (in relation to any *FOS* case fee only), that in the exceptional circumstances of a particular case to which *FEES* 2.3.1R does not apply, the retention by the *FSA*, or *FOS Ltd*, as relevant, of a fee or *FOS* levy which has been paid would be inequitable, the *FSA*, or *FOS Ltd*, may (unless *FEES* 2.3.2BR applies) refund all or part of that fee or levy.
- 2.3.2A G A poor estimate or forecast by a fee payer, when providing information relevant to an applicable tariff base, is unlikely, of itself, to amount to an exceptional circumstance for the purposes of *FEES* 2.3.1R or 2.3.2R. By contrast, a mistake of fact or law by a fee payer may give rise to such a claim.
- 2.3.2B R The *FSA* may not consider a claim under *FEES* 2.3.1R and/or 2.3.2R to reduce, remit or refund any overpaid amounts paid by a fee payer in respect of a particular period, due to a mistake of fact or law by the fee payer, if the claim is made by the fee payer more than 2 years after the beginning of the period to which the overpayment relates.
- 2.3.3 G ~~*FEES* 2.3.1R, and *FEES* 2.3.2R~~ and *FEES* 2.3.2BR do not apply to the payment of shares of the *FSCS* levy.

FINANCIAL REINSURANCE INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 150(2) (Actions for damages);
 - (3) section 156 (General supplementary powers);
 - (4) section 157(1) (Guidance); and
 - (5) section 340 (Appointment).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 October 2006 and:
- (1) Annex B applies to insurers in relation to their respective financial years ending on and after 31 December 2006; and
 - (2) Annex C applies to the Society of Lloyd's and managing agents in relation to financial years ending on and after 31 December 2006.

Amendments to the Handbook

- D. The Integrated Prudential sourcebook (PRU) is amended in accordance with Annex A to this instrument.
- E. The Interim Prudential sourcebook for insurers (IPRU(INS)) is amended in accordance with Annex B to this instrument.
- F. The Lloyd's sourcebook (LLD) is amended in accordance with Annex C to this instrument.

Citation

- G. This instrument may be cited as the Financial Reinsurance Instrument 2006.

By order of the Board
28 September 2006

Annex A

Amendments to the Integrated Prudential sourcebook (PRU)

In PRU 7.1 (Insurance risk systems and controls) insert the following new paragraph after PRU 7.1.34G:

- 7.1.34A G A *firm* should analyse regularly the full effect of all its *reinsurance* agreements and other risk transfer agreements (both current and proposed), including any related agreements or side-letters, on both its current and potential future financial position, and ensure that:
- (1) all significant risks related to these agreements, and the residual risks borne by the *firm*, have been identified; and
 - (2) appropriate risk mitigation techniques have been applied to manage and control the risks.

Annex B

Amendments to the Interim Prudential sourcebook for insurers (IPRU(INS))

In this Annex underlining indicates new text. Where an entire section of text is inserted, the place where the change is made is indicated and the text is not underlined.

Chapter 9

FINANCIAL REPORTING

CONTENTS

Part I – Accounts and statements

...

9.32 Additional information on general insurance business ceded

9.32A Additional information on financial reinsurance and financing arrangements: general insurers

9.32B Additional information on financial reinsurance and financing arrangements: guidance

...

Insert after rule 9.32 new rule 9.32A and accompanying guidance 9.32B as follows:

Additional information on financial reinsurance and financing arrangements: general insurers

- 9.32A
- (1) An *insurer* which carries on *general insurance business* must annex to the documents referred to in rules 9.12, 9.13 and 9.14, and relating to the *financial year in question*, a statement of the information required by this rule.
 - (2) This rule applies to any *contract of insurance* under which *general insurance business* has been *ceded* by the *insurer*, where -
 - (a) the value placed on future payments in respect of the contract in the *return* for the *financial year in question* is not commensurate with the economic value provided by that contract, after taking account of the level of risk transferred; or
 - (b) there are terms or foreseeable contingencies (other than the insured event) that have the potential to affect materially the value placed on the contract in the *insurer's* balance sheet at, or any time after, the end of the *financial year in question*.
 - (3) In determining whether a *contract of insurance* meets one or both of the

- conditions in (2), the *insurer* must -
- (a) treat as part of a contract any agreements, correspondence (including side-letters) or understandings that amend or modify, or purport to amend or modify, the contract or its operation; and
 - (b) consider whether the contract meets the condition in (2)(a) when considered together with one or more other *contracts of insurance* entered into between:
 - (i) the *insurer* and the *reinsurer* under the first contract; or
 - (ii) the *insurer* and any other *person*, where it could reasonably be predicted, at the time the most recent contract was entered into, that the contracts when considered together would meet the condition in (2)(a).
- (4) Subject to (9), for each *contract of insurance* to which this rule applies the statement must contain the following information -
- (a) the *financial year* of the *return* in which the contract was first reported in the *return*;
 - (b) the financial effect of the contract on the *insurer's capital resources* as shown in line 13 of **Form 1** of the *return* for the *financial year in question*;
 - (c) the amount of any undischarged obligation of the *insurer* under the contract and a brief description of the conditions for the discharge of such obligation; and
 - (d) how any undischarged obligations, including any contingent obligations, have been taken into account in determining the *insurer's capital resources*.
- (5) The statement must include a general description of how the *insurer* makes the financial assessment that enables it to determine whether a contract satisfies the condition in (2)(a), even if there are no contracts in respect of which information is required by (4).
- (6) This rule also applies to any **financing arrangement**, which for the purpose of this rule means any contract, other than a *contract of insurance*, that has been entered into by the *insurer*, in respect of *contracts of insurance* written by the *insurer*, which has the effect of increasing the *capital resources* of the *insurer* in line 13 of **Form 1**, and which includes terms for –
- (a) the transfer of assets to the *insurer*, the creation of a *debt* to the *insurer* or the transfer from the *insurer* to another party of liabilities to *policyholders* (or any combination of these); and
 - (b) either an obligation for the *insurer* to return (with or without interest)

some or all of such assets, a provision for the diminution of such *debt* or a provision for the recapture of such liabilities, in each case, in specified circumstances.

- (7) In determining whether a contract falls within the definition of 'financing arrangement' in (6), the *insurer* must -
- (a) treat as part of a contract any agreements, correspondence (including side-letters) or understandings that amend or modify, or purport to amend or modify, the contract or its operation; and
 - (b) consider whether the contract meets the conditions in (6) when considered together with one or more other contracts entered into between:
 - (i) the *insurer* and the *counterparty* under the first contract; or
 - (ii) the *insurer* and any other *person*, where it could reasonably be predicted, at the time the most recent contract was entered into, that the contracts when considered together would meet the conditions in (6).
- (8) Subject to (9), for each 'financing arrangement' entered into by the *insurer* the statement must contain the following information -
- (a) the *financial year* of the *return* in which the 'financing arrangement' was first reported in the *return*;
 - (b) the financial effect of the 'financing arrangement' on the *insurer's capital resources* as shown in line 13 of **Form 1** of the *return* for the *financial year in question*;
 - (c) the amount of any undischarged obligation of the *insurer* under the 'financing arrangement' and a brief description of the conditions for the discharge of such obligation; and
 - (d) how any undischarged obligations, including any contingent obligations, have been taken into account in determining the *insurer's capital resources*.
- (9) No information need be supplied pursuant to (4) or (8) in respect of a *contract of insurance* or 'financing arrangement' if, when it is considered in aggregate with all such contracts with the same *reinsurer* or *counterparty* or any other *person* with whom the *insurer* has entered into a contract in the circumstances described in (3)(b)(ii) or, as the case may be, (7)(b)(ii) -
- (a) A is less than 1% of B in the *return* for the *financial year in question*; and
 - (b) the *insurer* expects A to remain less than 1% of B for the foreseeable future;

where:

- (i) A is the financial effect on the *insurer's capital resources* as a result of the existence of the contract(s); and
 - (ii) B is the *insurer's total technical provisions*.
- (10) Where the statement required by (1) includes information about a *contract of insurance* in respect of which information has been included in the statement required by rule 9.32 relating to the *financial year in question*, the *insurer* must include in the statement under (1) a cross-reference to that other information.

Additional information on financial reinsurance and financing arrangements: guidance

- 9.32B
- (1) In line with normal practice, an *insurer* may take account of an appropriate risk margin to reflect the nature and level of risk transferred, including any uncertainty in the amount and timing of future payments, when assessing the economic value of the transaction at the end of the *financial year in question* in order to see whether the condition in rule 9.32A(2)(a) is met. In addition, an *insurer* would be expected to take account of any credit or legal risk associated with the transaction when assessing its economic value.
 - (2) For most *proportional reinsurance treaties* and most standard *non-proportional reinsurance treaties*, such as contracts providing excess-of-loss cover, which include a significant transfer of risk to the *reinsurer* and do not contain any of the features described in (5) below, it is likely that the *insurer* will be able to determine that the contracts do not meet the condition in rule 9.32A(2)(a) without making a detailed calculation. The approach taken to the assessment made for the purpose of rule 9.32A(2)(a) should, however, still be described in the statement provided as required by rule 9.32A(5).
 - (3) When considering whether there are foreseeable contingencies, other than the insured event, that may affect the contract's given value, the *insurer* should consider the normal commercial uncertainties about the size of the *claim* that may ultimately be payable (for example, the outcome of any possible court action) to be part of the insured event. These normal commercial uncertainties would not then trigger any disclosure requirement under rule 9.32A.
 - (4) It is likely that one or both of the conditions in rule 9.32A(2) will be satisfied if the *contract of insurance* contains features that have the effect of materially limiting the size of the difference between -
 - (a) the extent of the indemnity cover provided by the contract and by any related or potentially related contracts, and
 - (b) the *premiums* payable under those contracts,

relative to the size of the *premiums* payable under those contracts.

- (5) Some characteristic features which the *insurer* should consider carefully in relation to a *contract of insurance* before deciding whether one or both of the conditions in rule 9.32A(2) are satisfied with respect to a particular contract include (but are not limited to) the following -
- (a) sliding scale fees, retrospectively rated *premiums* and profit-sharing formulae which adjust cash flows between the *insurer* and the *reinsurer* based on loss experience (for example, increasing payments from the *insurer* as losses increase and decreasing payments as losses decrease, subject to maximum and minimum limits);
 - (b) provision for an *experience account* or arrangements having similar effect, including arrangements which recognise an assumed rate of investment return;
 - (c) provision for, or a contingent obligation on, the *insurer* to make payments to the *reinsurer* or to any other *person*, where the payments -
 - (i) depend upon the loss experience of *general insurance business* that has been or may be carried on by the *insurer*; and
 - (ii) are not simply reinstatement *premiums*;
 - (d) provision for termination or commutation of the contract at the sole discretion of the *reinsurer*, when there is a positive balance of money due from the *reinsurer*;
 - (e) a provision for, or a contingent obligation on, the *insurer* to make payments to the *reinsurer* or to any other *person*, where the payments are in respect of business carried on in a period outside of the term of the contract;
 - (f) the contract includes a term requiring the *insurer* to enter into a further contract if the loss experience of the business subject to the contract attains a specified level;
 - (g) the term of the contract exceeds, or may exceed, 12 months, and the *premium* or amount of indemnity payable under the contract in subsequent years may be affected by the loss experience of earlier years;
 - (h) dual triggers which require the occurrence of both -
 - (i) an insurable event; and
 - (ii) a change in a separate variable specified in the contract;

in order to trigger payment of a benefit/*claim*;

- (i) amounts payable under the contract could affect, or depend on, other contracts or agreements entered into by the *insurer*, or a *person connected* with the *insurer*, except where -
 - (i) that effect or dependence is clear from the description of that other contract or agreement given by the *insurer*; or
 - (ii) that effect or dependence arises solely as part of the normal market mechanism for the pricing of a risk; and
 - (j) terms that defer payment of *claims* -
 - (i) for a period of more than 12 months after the amount payable under the contract has been agreed; or
 - (ii) until some specified date that is more than 12 months after the end of the term of the contract.
- (6) For the purpose of rule 9.32A(4), (8) and (9), the 'financial effect' of the transaction (that is, the contract or 'financing arrangement') on the *insurer's capital resources* should normally be regarded as the sum of (a) the value placed on the transaction in the *return* for the *financial year in question* plus (b) the net sum of all receipts less payments made in respect of the transaction since the transaction was first reported in the *return*.

...

Chapter 11

DEFINITIONS

PART 1

DEFINITIONS

Insert the following new definition in the appropriate alphabetical place:

<i>experience account</i>	<p>an account (whether real or notional) established under a <i>contract of insurance</i> where:</p> <ul style="list-style-type: none">(a) <i>premiums</i> payable or paid, or amounts related to <i>premiums</i> payable or paid, under the contract are credited to the account;(b) <i>claims</i> payable or paid or incurred, or amounts related to <i>claims</i> payable or paid or incurred, under the contract are deducted from the account; and
---------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>(c) either:</p> <ul style="list-style-type: none">(i) some part of the amount held in the account is paid out on expiry or termination of the contract in accordance with rights specified in the contract; or(ii) the amount held in the account affects the amount payable under the contract.

Annex C

Amendments to the Lloyd's sourcebook (LLD)

In this Annex underlining indicates new text and striking through indicates deleted text. Where an entire section of text is inserted, the place where the change is made is indicated and the text is not underlined.

...

- 15.2.4 R With the exception of the statements required to be annexed to the *Lloyd's Return* by LLD 15.3.6R, the ~~The~~ *Lloyd's Return* must be examined and reported on by the auditors appointed to audit the affairs of the *Society*.

...

Insert after LLD 15.3.5R new rules LLD 15.3.6R and LLD 15.3.7R as follows:

- 15.3.6 R The *Society* must annex to the *Lloyd's Return* a copy of each statement completed by a *managing agent* under LLD 15.13.9R.
- 15.3.7 R For the purposes of the *Lloyd's Return* and LLD 15.3.6R, the *Society* must, for each statement annexed, identify the *syndicate* to which the *contract of insurance* or 'financing arrangement' relates.

...

Insert after LLD 15.13.6R new guidance paragraph LLD 15.13.6AG as follows:

- 15.13.6 G The statements required to be annexed to the return by LLD 15.13.9R should
A not be included in the audit under LLD 15.13.6R.

...

Insert after LLD 15.13.8R new rule LLD 15.13.9R as follows:

- 15.13.9 R A *managing agent* must annex to each return which it prepares under LLD 15.13.1R a statement of the information required by *IPRU(INS) rule 9.32A*, as if in that *rule* references to:

- (1) '*insurer*' were to the *members* carrying on *insurance business* through the relevant *syndicate*;
- (2) the '*return*' were to the return required to be prepared by it in respect of the business carried on through the relevant *syndicate* under *LLD 15.13.1R*;
- (3) the '*insurer's* balance sheet' were to the *syndicate* balance sheet;
- (4) the '*insurer's capital resources*' were to the *capital resources* managed by or at the direction of the *managing agent* in respect of the *insurance business* carried on through the relevant *syndicate*; and
- (5) the '*insurer's* total *technical provisions*' were to the *technical provisions* in respect of the *insurance business* carried on through the relevant *syndicate*.

PERSONAL PENSION SCHEMES INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (the “Act”):
- (1) section 138 (General rule-making power);
 - (2) section 139 (4) (miscellaneous ancillary matters);
 - (3) section 145 (financial promotions rules);
 - (4) section 156 (General supplementary powers);
 - (5) section 157 (Guidance);
 - (6) section 213 (The compensation scheme);
 - (7) section 214 (General);
 - (8) section 226 (Compulsory jurisdiction);
 - (9) section 227 (Voluntary jurisdiction); and
 - (10) the other rule and guidance making powers listed in Schedule 4 (Powers exercised) to the General Provisions module of the FSA’s Handbook.
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. (1) Annex A and Annex C of this instrument come into force on 2 October 2006.
- (2) Annex E of this instrument comes into force on 1 November 2006.
- (3) The balance of this instrument comes into force on 6 April 2007.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

Annex A

Amendments to the Glossary of definitions from 2 October 2006

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend or insert the following definitions as indicated:

- establishing, operating or winding up a personal pension scheme the regulated activity, specified in article 52(b) of the Regulated Activities Order (Establishing etc. a pension scheme), of establishing, operating or winding up a personal pension scheme.
- occupational pension scheme* (a) (as a scheme specified in article 3(1) of the Regulated Activities Order (Interpretation)) which is, in summary, a pension scheme established for the purpose of providing benefits to people with service in employments of a prescribed description. ~~any scheme or arrangement which is comprised in one or more instruments or agreements and which has, or is capable of having, effect in relation to one or more descriptions or categories of employment so as to provide benefits, in the form of pensions or otherwise, payable on termination of service, or on death or retirement, to or in respect of earners with a qualifying service in an employment of any such description or category.~~
- operator* (1) (except in ENF):
...
(f) (in relation to an *investment trust savings scheme*) any person appointed, by those responsible for managing the property of the *investment trust*, to manage the *investment trust savings scheme*:-
(g) (in relation to a personal pension scheme or stakeholder pension scheme) the person who carries on the regulated activity specified in article 52 of the Regulated Activities Order (Establishing etc. a pension scheme).
- personal pension scheme* (a) ~~a scheme of investment in accordance with section 630 of the Income and Corporation Taxes Act 1988.~~
(in relation to a specified investment) the investment specified in article 82(2) of the Regulated Activities Order (Rights under a pension scheme) which is rights under a personal pension scheme in (b);
(b) (in relation to a scheme) (in accordance with article 3(1) of the Regulated Activities Order) a pension scheme or arrangement which:
(i) is not an occupational pension scheme or stakeholder

pension scheme; and

(ii) is comprised in one or more instruments or agreements capable of providing benefits on retirement, death or on having reached a particular age.

stakeholder pension scheme

(a) (in relation to a *specified investment*) the *investment* specified in article 82(1) of the *Regulated Activities Order* (Rights under a stakeholder pension scheme) which is rights under a stakeholder pension scheme in (b);

(b) (in relation to a scheme) a scheme established in accordance with Part I of the Welfare Reform and Pensions Act 1999 and the Stakeholder Pension Schemes Regulations 2000 (S.I. 2000/1403).

Annex B

Amendments to the Glossary of definitions from 6 April 2007

In this Annex, underlining indicates new text and striking through indicates deleted text.

Amend or insert the following definitions as indicated:

<i>agreeing to carry on a regulated activity</i>	<p>the <i>regulated activity</i>, specified in article 64 of the <i>Regulated Activities Order</i> (Agreeing to carry on specified kinds of activity), of agreeing to carry on an activity specified in Part II of that Order other than:</p> <p>...</p> <p>(g) <i>establishing, operating or winding up a stakeholder pension scheme</i>;</p> <p><u>(h) <i>establishing, operating or winding up a personal pension scheme</i>.</u></p>
<i>alternative trading system</i>	<p>a system that brings together multiple buying and selling interests in <i>designated investments</i> (other than <i>life policies</i>, <u><i>personal pension schemes</i></u>, <i>or stakeholder pension schemes</i> or rights to or interests in <u>any of those investments</u> <i>life policies or stakeholder pension schemes</i>), in the system and according to non-discretionary rules set by the system's operator in a way that results in a contract but does not include:</p> <p>(a) a system that is operated by an <i>RIE</i> or that is a <u><i>regulated market</i></u> or an <i>EEA commodities market</i>; or</p> <p>(b) a <i>bilateral system</i>.</p>
<i>appropriate personal pension</i>	<p>a <i>personal pension policy</i>, <u>a <i>personal pension deposit</i></u> or a <i>personal pension contract</i> under which contributions are made to a <i>personal pension scheme</i> which is an appropriate scheme under section 7(4) of the Pension Schemes Act 1993 or section 3(4) of the Pension Schemes (Northern Ireland) Act 1993.</p>
<i>client</i>	<p>(1) (except in <i>PROF</i> in relation to a <i>regulated mortgage contract</i>) any <i>person</i> with or for whom a <i>firm</i> conducts or intends to conduct <i>designated investment business</i> or any other <i>regulated activity</i>; and</p> <p>...</p> <p>(b) 'client' includes:</p>

(iv) ...

(v) for a firm that is establishing, operating or winding up a personal pension scheme, a member or beneficiary of that scheme;

(c) 'client' does not include:

(i) a trust beneficiary not in (b)(v);

...

designated investment a security or a contractually-based investment (other than a funeral plan contract and a right to or interest in a funeral plan contract), that is, any of the following investments, specified in Part III of the Regulated Activities Order (Specified Investments), and a long-term care insurance contract which is a pure protection contract:

...

(h) stakeholder pension scheme (article 82(1));

(ha) personal pension scheme (article 82(2));

...

designated investment business any of the following activities, specified in Part II of the Regulated Activities Order (Specified Activities), which is carried on by way of business:

...

(l) establishing, operating or winding up a stakeholder pension scheme (article 52(a));

(la) establishing, operating or winding up a personal pension scheme (article 52(b));

...

establishing operating or winding up a stakeholder pension scheme

the regulated activity, specified in article 52(a) of the Regulated Activities Order (Establishing etc. a stakeholder pension scheme), of establishing, operating or winding up a stakeholder pension scheme.

intermediate customer

(1) (except in COB 3) a client who is not a market counterparty and who is:

...

(g) a trustee of a trust (other than an occupational pension scheme, SSAS, personal pension scheme or stakeholder pension scheme)

which has (or has had at any time during the previous two years) assets of at least £10 million (or its equivalent in any other currency at the relevant time) calculated by aggregating the value of the cash and *designated investments* forming part of the trust's assets, but before deducting its liabilities;

(h) a trustee of an *occupational pension scheme*, or *SSAS*, or a trustee or operator of a *personal pension scheme* or *stakeholder pension scheme* where the ~~trust~~ *scheme* has (or has had at any time during the previous two years):

(i) at least 50 members; and

(ii) assets under management of at least £10 million (or its equivalent in any other currency at the relevant time);

...

investment management firm

a *firm* whose *permitted activities* include *designated investment business*, which is not an *authorised professional firm*, bank, *ELMI*, *building society*, *credit union*, *energy market participant*, *friendly society*, *ICVC*, *insurer*, *media firm*, *oil market participant*, *service company*, *incoming EEA firm* (without a *top-up permission*), *incoming Treaty firm* (without a *top-up permission*), *UCITS management company* or *UCITS qualifier* (without a *top-up permission*), whose *permission* does not include a *requirement* that it comply with *IPRU(INV) 3* or *10* (Securities and futures firms) or *13* (Personal investment firms) and which is within (a), (b) or (c):

(a) a *firm*:

...

(c) ...

...

(E) *establishing, operating or winding up a collective investment scheme* (other than an *AUT* or *ICVC*);

(Ea) *establishing, operating or winding up a personal pension scheme*; and

...

<i>open-market option</i>	<p>the option to apply:</p> <p>(a) the proceeds of a <u>personal pension policy scheme or pension contract</u>; or</p> <p>...</p>
<i>overseas person</i>	<p>(in accordance with article 3(1) of the <i>Regulated Activities Order</i> (Interpretation)) a <i>person</i> who:</p> <p>(a) carries on any of the following <i>regulated activities</i>:</p> <p>...</p> <p>(xiv) <i>establishing, operating or winding up a stakeholder pension scheme</i>;</p> <p>(xiva) <u><i>establishing, operating or winding up a personal pension scheme</i></u>;</p> <p>...</p>
<i>packaged product</i>	<p>...</p> <p>(d) <i>a stakeholder pension scheme</i>;</p> <p>(e) <u><i>a personal pension scheme</i></u>;</p> <p>whether or not (in the case of (a), (b) or (c)) held within a <i>PEP</i>, an <i>ISA</i> or a <i>CTF</i> and whether or not the packaged product is also a <i>stakeholder product</i>.</p>
<i>pension transfer</i>	<p>a transaction resulting from a decision made, with or without advice from a <i>firm</i>, by a <i>customer</i> who is an individual, to transfer deferred benefits from:</p> <p>(a) an <i>occupational pension scheme</i>; or</p> <p>(b) an <i>individual pension contract</i> providing fixed or guaranteed benefits that replaced similar benefits under a <i>defined benefits pension scheme</i>; or</p> <p>(c) (in <i>COB 6.7</i> (Cancellation and withdrawal) a <i>stakeholder pension scheme</i> or a <i>personal pension scheme</i>)</p> <p>to a <i>stakeholder pension scheme</i> or to a <i>personal pension scheme</i> (including a self-invested <u><i>self-invested personal pension scheme</i></u>), or to any deferred annuity <i>policy</i> (including a <i>pension buy-out contract</i>) where the eventual benefits depend in whole or in part on investment performance in the period up to the <i>intended retirement date</i>.</p>

<i>personal pension deposit</i>	<u>a contract under which rights to benefits are obtained by making contributions to a <i>personal pension scheme</i> operated by a <i>deposit-taking firm</i>.</u>
<i>personal pension product</i>	<u>a contract under which rights to benefits are obtained by making contributions to a <i>personal pension scheme</i> other than a <i>personal pension policy</i>, a <i>personal pension contract</i>, a <i>personal pension deposit</i> or a <i>SIPP</i>.</u>
<i>product provider</i>	<p>(1) (except in <i>ICOB</i> and <i>COB</i>) a <i>firm</i> which is:</p> <ul style="list-style-type: none"> (i) a <i>long-term insurer</i>; (ii) a <i>friendly society</i>; (iii) the <i>operator</i> of a <i>regulated collective investment scheme</i> or an <i>investment trust savings scheme</i>. <p>(2) (in <i>ICOB</i>) in relation to a <i>non-investment insurance contract</i>, an <i>insurer</i> not acting as an <i>insurance intermediary</i>.</p> <p>(3) (in <i>COB</i>) a <i>firm</i> which is:</p> <ul style="list-style-type: none"> (i) a <i>long-term insurer</i>; (ii) a <i>friendly society</i>; (iii) <u>the <i>operator</i> of a <i>regulated collective investment scheme</i> or an <i>investment trust savings scheme</i>;</u> (iv) <u>the <i>operator</i> of a <i>personal pension scheme</i>.</u>
<i>regulated activity</i>	<p>(in accordance with section 22 of the <i>Act</i> (The classes of activity and categories of investment)) any of the following activities specified in Part II of the <i>Regulated Activities Order</i> (Specified Activities):</p> <p>...</p> <ul style="list-style-type: none"> (o) <i>establishing, operating or winding up a stakeholder pension scheme</i> (article 52(a)); (oa) <i>providing basic advice on a stakeholder product</i> (article 52B); (ob) <u><i>establishing, operating or winding up a personal pension scheme</i> (article 52(b));</u> <p>...</p>
<i>regulated collective investment scheme</i>	(a) an <i>ICVC</i> ; or

	(b) an <i>AUT</i> ; or
	(c) a recognised scheme;
	whether or not the <i>units</i> are held within a <i>PEP</i> , <i>ISA</i> or <u><i>personal pension scheme contract</i></u> .
<i>retail investment</i>	...
	(c) a <i>stakeholder pension scheme</i> ; or
	<u>(ca) a <i>personal pension scheme</i>; or</u>
	...
<i>security</i>	(1) (except in <i>LR</i> and <i>ENF</i> 21 (in accordance with article 3(1) of the <i>Regulated Activities Order</i> (Interpretation)) any of the following <i>investments</i> specified in that Order:
	...
	(g) <i>stakeholder pension scheme</i> (article 82(1));
	<u>(ga) <i>personal pension scheme</i> (article 82(2));</u>
	...
<u><i>self-invested personal pension scheme</i></u>	<u>an arrangement which forms all or part of a <i>personal pension scheme</i>, which gives the member the power to direct how some or all of the member's contributions are invested.</u>
<i>simplified prospectus scheme</i>	means:
	(a) a <i>UCITS scheme</i> that is not a recognised scheme under section 264 of the <i>Act</i> (Schemes constituted in other EEA States); or
	(b) a <i>key features scheme</i> for which an election that is permitted by <i>COB</i> 6.2.22R(2)(Key features schemes) has been made;
	<u>whether or not the <i>units</i> are held within a <i>PEP</i>, <i>ISA</i> or <i>personal pension scheme</i>.</u>
<u><i>SIPP</i></u>	<u>a <i>self-invested personal pension scheme</i>.</u>
<i>small personal investment firm</i>	a <i>personal investment firm</i> :
	(a) which is not an <i>ISD investment firm</i> ;
	<u>(b) whose <i>permission</i> does not include <i>establishing</i>.</u>

operating or winding up a personal pension scheme;

(c) which is not a *network*; and

~~(b)~~

(d) which has fewer than 26 *representatives*.

~~(e)~~

specified investment

any of the following *investments* specified in Part III of the *Regulated Activities Order* (Specified Investments):

...

(i) *stakeholder pension scheme* (article 82(1));

(ia) *personal pension scheme* (article 82(2));

...

Annex D

Amendments to the Interim Prudential sourcebook for Investment Businesses IPRU (INV)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 2.1.2 R (1) An *authorised professional firm* of a kind falling within (2) must comply with such of *IPRU(INV)* 3, 5, 10 or 13 which in accordance with *IPRU(INV)* 2.1.4R, most appropriately correlates to the type and scale of the business which it conducts.
- (2) The type of *authorised professional firm* to which (1) applies is one:
- ...
- (f) whose main business, having regard to (3), is not the practice of its profession or professions; ~~or~~
- (g) whose *permission* includes a requirement that it acts in conformity with the financial resources *rules* applicable to another type of firm; ~~or;~~
- (h) whose *permission* includes *establishing, operating or winding up a personal pension scheme.*

...

- 2.1.4 R This table belongs to IPRU (INV) 2.1.1R
- | TYPE OF BUSINESS ACTIVITY | CHAPTER OF SOURCEBOOK |
|------------------------------------------------------------------------------------------|-------------------------------------------------|
| ... | <i>Investment management firm – IPRU(INV) 5</i> |

....

packaged product means ~~a life policy or a unit in a regulated collective investment scheme;~~

...

....

5.2.3(2) R The *financial resources requirement* for a firm which is not an *ISD firm* is an own funds requirement determined in accordance with paragraph (a) of rule 5.2.3(3) if its permitted business does not include establishing, operating or winding up a personal pension scheme and:

...

...

Table 5.2.3(5)(a) EXPENDITURE BASED REQUIREMENT

PART 1

CALCULATION OF REQUIREMENT

A firm's expenditure based requirement is a fraction of its annual audited expenditure determined in accordance with Part II of this Table.

PART II

FRACTIONS

1 The fraction is 6/52 where:

...

(c) the firm is:

(i) an investment manager (including the operator of an unregulated collective investment scheme in relation to which the firm carries on the activity of an investment manager); or

(ii) one whose permitted business includes establishing, operating or winding up a personal pension scheme,

unless paragraph 2 applies.

2 The fraction is 13/52 where the firm is:

(a) an investment manager as in paragraph 1(c)(i) above;

(b) one whose permitted business includes establishing, operating or winding up a personal pension scheme; or is

(c) a custodian,

and the firm either:

(d) itself holds customers' monies or assets; or

~~(a)~~

(e) procures the appointment as custodian of its customers' monies or assets of

~~(b)~~ an associate of the firm which is not an approved bank.

...

10-60(2)

10-60(3) R A category D firm whose permission includes establishing, operating or winding-up a personal pension scheme must comply with the higher of the financial resources requirements applied by rules 10-60 to 10-176 and the requirements applied by rules 5.2.1(1) to 5.2.7(5) of IPRU(INV).

....

13.9.1A G Table 13B is a summary of the financial resources test for a category B firm.

Table 13B This table forms part of *rule* 13.9.1

SUMMARY OF FINANCIAL RESOURCES FOR *CATEGORY B FIRMS*

Annex F

Amendments to the Conduct of Business sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

1.10.2 G This sourcebook adopts the concepts of “initial service agreement” and “successive operations” from the *DMD*.

- (1) A *firm’s* contract with a *customer* may take the form of an initial service agreement under which successive operations or a series of operations of the same nature are performed over time. Where this is the case, the *DMD* disclosure and cancellation requirements apply in relation to the initial service agreement only and not to the successive or separate operations. However, if new elements are added to the initial service agreement, the addition of those new elements is treated as a new contract to which the *DMD* disclosure and cancellation requirements apply. In accordance with recital 17 of the *Distance Marketing Directive*, examples are:

...

Other examples are, in the *FSA’s* view:

...

- (f) concluding a *life policy*, *personal pension scheme* ~~*contract*~~ or *stakeholder pension scheme* that includes a pre-selected option providing for future increases or decreases in regular *premiums* or payments, and subsequent index-linked changes to those premiums or increases or decreases to pension contributions following fluctuations in salary.

...

1.11.1G Table: Application of rules in COB in relation to deposits

...

Notes:

...

(3) This table does not deal with the application of COB in relation to *personal pension deposits*.

...

3.7.1 R (1) A *firm* must make an adequate record of each *non-real time financial promotion* which it has confirmed as complying with the *rules* in this chapter:

- (2) A record in (1) must be retained for the following periods:

...

- (b) six years in the case of a *financial promotion* relating to a *life policy*, *personal pension scheme* ~~*contract*~~ or *stakeholder pension scheme*;

...

...

4.1.12 R A *firm* may classify a *client* (other than another *firm*, *regulated collective investment scheme*, or an *overseas financial services institution*) who would otherwise be an *intermediate customer* as a *market counterparty* if:

(1) the *client* at the time he is classified is one of the following:

(a) ...

...

(e) a trustee of a trust (other than an *occupational pension scheme*, *SSAS*, *personal pension scheme* or *stakeholder pension scheme*) with assets of at least 10 million (or its equivalent in any other currency), calculated by aggregating the value of the cash and *designated investments* forming part of the trust's assets, but before deducting its liabilities;

(f) a trustee of an *occupational pension scheme*, ~~or SSAS~~, or a trustee or operator of a *personal pension scheme* or *stakeholder pension scheme* where the ~~trust~~ scheme has (or has had at any time during the previous two years):

(i) at least 50 members; and

(ii) assets under management of not less than £10 million (or its equivalent in any other currency at the relevant time); and

...

4.2.14 R (1) A *firm* must make a record of each *terms of business* it provides to a *customer*, and any amendment to them, as soon as the *terms of business* come into force.

(2) A *firm* must retain each record referred to in (1):

...

(b) for six years, where the *terms of business* relate to a *life policy*, *personal pension scheme* ~~*contract*~~ or *stakeholder pension scheme*; and

4.3.3 R ...

- (8) A firm must take reasonable steps to ensure that its representatives on first making contact with a private customer with a view to advising on investments in SIPPs, personal pension deposits, or personal pension products, inform the customer of the amount and nature (i.e. fees and/or commission (or equivalent) and/or a combination of fees and commission (or equivalent)) of any payments that the customer will have to pay, directly or indirectly, for the advice on investments.

4.3.7 R (1) A firm which has started to provide a private customer with services in relation to packaged products following the provision of a fees and commission statement or the original payment information must not (at least until the completion of those services):

- (b) subject to (4), arrange to retain any commission which exceeds the maximum amount or rate disclosed ~~in the statement~~;

without first providing a further appropriate ~~statement~~ statement or further payment information and obtaining the customer's prior consent to the proposed alteration in a durable medium.

- (3) If a firm decides to provide a private customer with advice on investments on a type of packaged product (which falls within a product group specified in Notes 14 or 18A to COB 4 Annex 6R) in relation to which the fees and commission statement previously given to the customer does not contain the information required in those Notes 14 to COB 4 Annex 6R, it must issue a new and appropriate ~~statement~~ statement or payment information to that customer.

- (4) (a) Notwithstanding (1)(b) a firm is not required to provide a further fees and commission statement or further payment information for the purposes of (1) if:
- (i) the maximum amounts or rates already disclosed in the statement ~~already provided~~ to the customer only apply to products policies of the example term or age of customer policyholder given ~~in the fees and commission statement~~, or to products policies with shorter terms; and

(ii) the *firm* arranges a product policy for a term longer than the example term ~~in the *statement*~~ (or longer than the term deemed for the example age given) and the increase in the *commission* which the *firm* arranges to retain over the maximum already disclosed in the *statement* is not more than an amount that is directly proportional to the increase in the duration of the term of the product policy (or to the term deemed from the age of customer policyholder).

(b) If requested by a *customer*, a *firm* must explain the basis of the higher maximum *commission* or *fees* charged in accordance with (4)(a)(ii).

...

...

4.3.13 G (1) *COB* 4.3.11 R requires a *firm* to maintain statements showing the amount it may charge its *customers* by way of *fees*, or which it may receive from others by way of *commission*, in either case in respect of the services it provides in relation to the sale of certain packaged products. Consistent with *COB* 5.1 and *COB* 5.5 the basis on which a *firm* may provide such services may differ from *customer to customer* (for example as to whether the *firm* will select from the whole market, or a limited number of *product providers*).

...

4.3.27 R A *firm* must take reasonable steps to ensure that its *representatives* on first making contact with an employee with a view to advising on his employer's *group personal pension scheme* or *stakeholder pension scheme*, inform the employee:

...

(3) the amount and nature (i.e. *fees* and/or *commission* (or *equivalent*) and/or a combination of *fees* and *commission* (or *equivalent*)) of any payments that the employee will have to pay, directly or indirectly, for the *advice on investments*.

COB 4 Annex 1 Exemptions from terms of business requirement

...

The following notes do not form part of the template.

...

Note 12 If a *fees and commission statement* contains information relating to *commission*, then a *firm* must set out information concerning *commission (or equivalent)* in the tabular format prescribed. The headings for Tables 1 and Table 2; the headings and sub-headings for each column; the product headings in each row of the first column; and the example term and age set out in the second column of each table are all prescribed and must not be amended. If the boxes entitled 'Personal and Stakeholder pensions' are to be included, the positioning and wording of those boxes is prescribed and must not be amended.

...

Note 14 The text and information contained in the commission section of Section 4 must be included if a *firm* reasonably expects to provide those services to a *private customer* receiving the *fees and commission statement* in respect of any of the following product groups.

Regular contribution business

The following product groups relate to regular contribution investments (including annual and quarterly premium contracts) and includes any non-contractual top-ups or increments (to existing regular contribution investments) which generate *commission (or equivalent)*.

(a) Collective investments (See note 18)

Any regulated collective investment scheme or investment trust savings scheme.

...

(d) Personal and stakeholder pensions

Any personal pension scheme, FSAVC scheme or stakeholder pension scheme (other than a SIPP, personal pension product, personal pension deposit, group personal pension scheme or stakeholder pension scheme arranged on a group basis for the employees of a particular employer). (See note 18)

...

Lump sum business

The following product groups relate to single contribution business, including commission (or equivalent) generating, non-contractual, top-ups or increments to existing lump sum investments.

...

(c) Personal and stakeholder pensions

Any personal pension scheme, FSAVC scheme or stakeholder pension scheme (other than a SIPP, personal pension product, personal pension deposit, group personal pension scheme or stakeholder pension scheme arranged on a group basis for the employees of a particular employer). (See note 18)

...

Note 15 *A firm which conducts business with private customers in relation to any packaged products not falling within any of the product groups for which maximum commission is disclosed on the fees and commission statement, may provide a customer with information about commission (or equivalent) relating to that business by way of a separate annex. For the purpose of the rules, any such information does not form part of a firm's fees and commission statement.*

...

Note 18 ...

Note 18A Where a firm expects to advise on SIPPs, personal pension products or personal pension deposits, in addition to a product listed in Note 14, this box and prescribed wording must be included.

...

COB 4 Annex 7 R Identifying and describing the maximum rate of commission (or equivalent), the market average and the Example

1. A *firm* must state in each *fees and commission statement* it issues:
 - (a) its maximum rate of *commission* (or *equivalent*) for each product group in the statement in accordance with Note 18 of COB 4 Annex 6R;
 - (b) the market average rate for each product group in accordance with Note 19 of COB 4 Annex 6R;
 - (c) an illustration in the example column of an amount of *commission* (or *equivalent*) calculated by reference to its maximum rate for each product group in the statement and the example contribution levels stated in the tables (ie eg £100 per month or £10,000 lump sum) in accordance with Note 20 of COB 4 Annex 6R.

...

- 5.1.6B G (10) ...
- (11) Advice on pensions as a sector or category of the market includes advice on all *personal pension schemes* including *SIPPs*.
-
- ...
- 5.2.9 R (1) Unless (2) applies, a *firm* must make and retain a record of a *private customer's* personal and financial circumstances that it has obtained in satisfying *COB 5.2.5R*. The *firm* must retain the record for a minimum period after the information is obtained, as follows:
- ...
- (b) six years for a record relating to a *life policy*, *personal pension scheme* ~~*contract*~~ or *stakeholder pension scheme*; or
- ...
- ...
- 5.3.1 R This section applies to a *firm* when it:
- ...
- (3) manages the assets of an *occupational pension scheme (OPS)*, *personal pension scheme* or ~~a *stakeholder pension scheme*~~; or
- ...
- ...
- Requirement for suitability: manager of OPS, *personal pension scheme* and stakeholder pension scheme
- 5.3.12 R A *firm* that manages the assets of an *occupational pension scheme*, *personal pension scheme* or *stakeholder pension scheme* must take reasonable steps to ensure the suitability of specific transactions and of the investment portfolio under management with regard to the *investment* objectives specified in the portfolio mandate.
- ...
- 5.3.14 R (1) ...
- (2) If, following a *personal recommendation* by a *firm* that does not fall within (1), a *private customer*:
- (a) buys, sells, surrenders, converts, cancels, or suspends *premiums* for or contributions to, ~~a *pension contract*~~ *personal pension scheme* or a *stakeholder pension scheme*; or

...

the *firm* must provide the *customer* with a *suitability letter*, within the time period stipulated by *COB 5.3.18 R*, unless one of the exceptions in *COB 5.3.19 R* applies.

...

5.3.19A R A *firm* must make and retain a record of a *private customer's* suitability letter that it has provided in satisfying *COB 5.3.14 R*. The record must be retained for a minimum period after the letter is provided, as follows:

...

(2) for a record relating to a *life policy*, ~~*pension contract*~~ *personal pension scheme* or *stakeholder pension scheme*, six years;

...

...

6.1.5 R A *firm* must ensure that any *key features* or information document it produces in relation to a *packaged product*, *cash deposit ISA* or *cash deposit CTF* is in writing, whether in printed hard copy or in electronic format, and:

...

(2) is separate from any other material given to the *customer*, unless it is produced for a *key features scheme*, ~~*or stakeholder pension scheme*~~, *or personal pension scheme other than a personal pension policy*; in that case it may be included as part of another item of sales or marketing material, but only if the *key features* or information document appears with due prominence.

...

6.4.1 R *COB 6.4* applies to a *firm* in accordance with *COB 6.1.1R*, in respect of *occupational pension schemes*, ~~*self-invested personal pension schemes*~~, *income withdrawals* and *short-term annuities*, *cash deposit ISAs*, *cash deposit CTFs*, *Revenue allocated CTFs*, *traded life policies*, ~~*stakeholder pension schemes*~~, *packaged products*, other *deposits* and *long-term care insurance contracts*.

...

6.4.5 G ...

SIPPs, *personal pension deposits* and *personal pension products*

6.4.5A R When a *firm* sells, manages, *personally recommends* or arranges the sale of a *SIPP*, *personal pension deposit* or *personal pension product* (not the assets within them) to or for a *private customer*, the *firm* must, unless *COB*

6.4.27R to COB 6.4.31AR apply, provide the *private customer* with:

- (1) sufficient information about the relevant scheme for the *private customer* to be able to make an informed decision before that customer completes an application for that scheme; and
- (2) (in respect of a *distance contract* with a *retail customer*) the relevant contractual terms and conditions and the information set out in COB App 1,

in a *durable medium* in good time before the customer is bound by the transaction.

6.4.5B G The sufficient information provided should include the range and depth of information normally found in *key features*.

6.4.5C R COB 6.4.5AR does not apply to a scheme *operator* when its scheme is sold on the *personal recommendation* of, or arranged to be sold by, another *person*, provided that other *person*:

- (1) is a *firm* (or an *appointed representative*) operating from an establishment maintained by the *firm* (or *appointed representative*) in the *United Kingdom*; or
- (2) is operating from an establishment in an *EEA State* whose law imposes an obligation on the *person* to provide information about the scheme in accordance with articles 3 and 5(1) and (2) of the *Distance Marketing Directive*.

Assets to be held within a SIPP

6.4.5D R Where a *firm* makes a *personal recommendation* to a *private customer* about the purchase of an asset to be held within a *SIPP*, the *firm* must, unless COB 6.4.27R to COB 6.4.31AR applies, provide the *private customer* with:

- (1) sufficient information about that asset, and the risks and advantages of the proposed asset purchase, for the customer to be able to make an informed decision about the asset purchase before it takes place; and
- (2) (in respect of a *distance contract* with a *retail customer*) the relevant contractual terms and conditions and the information set out in COB App 1;

in a *durable medium* in good time before the customer is bound by the transaction.

6.4.5E G If this chapter requires a particular type of product disclosure for a particular type of asset, the product disclosure provided in accordance with those *rules* is sufficient information for this purpose.

~~Self-invested personal pension schemes~~ Sales of life policies (etc.) to operators of personal pension schemes

6.4.6 R (1) A *firm* which sells, *personally recommends* or arranges the sale of a new group or master *life policy*, the first in a series of individual *life*

policies or the first units in a particular key features scheme packaged product (other than a or simplified prospectus scheme to the operator of a personal pension scheme, must provide the operator of that scheme with key features) to or for a member, prospective member or trustees of a self-invested personal pension scheme, must provide key features to that member or trustees, (in accordance with COB 6.2.7R to COB 6.2.25R) or for the sale of a simplified prospectus scheme, provide a simplified prospectus to that member or trustees, (in accordance with COB 6.2.26R to COB 6.2.45R), as the case may be.

(2) ...

6.4.6A G The illustrative figures included in the key features or simplified prospectus can be on an example basis, using a range of representative actual or hypothetical scheme members (covering, for example, different ages, sexes and salaries), provided the illustrative figures and the range of representative scheme members are sufficient for the operator to be able to assess the effectiveness of the relevant investment for scheme members.

....

6.4.7 G [deleted] Investments within a self-invested personal pension scheme (a "SIPP") are effected by the trustees on behalf of scheme members. Key features or a simplified prospectus should be given to the trustees and to members of SIPPs when packaged products (whether life policies or schemes) are recommended by a firm to scheme members or effected by SIPP trustees. Notice of the right to cancel should also be copied to SIPP members in these circumstances, in accordance with COB 6.7.31 R.

6.4.8 R Except in relation to a SIPP, personal pension deposit or personal pension product, When a firm personally recommends, arranges or effects income withdrawals or the purchase of a short-term annuity annuities to or for a private customer, the customer must be provided with key features or with a simplified prospectus in good time before he signs any form of application or authority electing to make those withdrawals or purchases, whether that election or purchase is made with advice on investments or on an execution-only basis, unless COB 6.4.10R to COB 6.4.12R or COB 6.4.27R to COB 6.4.31R (telephone sales and other exemptions) applies.

6.4.8A R When a firm personally recommends, arranges or effects an income withdrawal from a SIPP, personal pension deposit or personal pension product to or for a private customer, it must provide that customer with:

- (1) sufficient information about the income withdrawal for the customer to be able to make an informed decision; and
- (2) (in respect of a distance contract with a retail customer), the relevant contractual terms and conditions and the information set out in COB App 1,

in a durable medium in good time before the customer is bound by the transaction.

6.4.8B G The sufficient information provided should include the range and depth of information normally found in key features.

...

- 6.4.11 R When a *private customer* makes a series of elections within a period of 12 months to make *income withdrawals*, or purchase *short-term annuities*, the *firm* that is *personally recommending*, arranging or effecting the elections may provide ~~one~~ a combined set, or separate sets, of key features, or simplified prospectuses or equivalent information for those elections (as appropriate), ~~or may provide separate sets of key features, for elections which relate to life policies and key features schemes or separate simplified prospectuses for simplified prospectus schemes.~~

...

Entering into a distance contract for accepting deposits (other than a cash deposit ISA or a personal pension deposit)

- 6.4.25 R A *retail customer* must be provided with all the contractual terms and conditions and the information in COB App 1 in a *durable medium* in good time before he is bound by a *distance contract* or offer under which the *firm* will *accept deposits* (other than a *cash deposit ISA*; (for which see COB 6.5.42R) or a personal pension deposit (for which see COB 6.4.5AR)), unless an exemption in COB 6.4.27R to COB 6.4.31R (telephone sales and other exemptions) applies.

- 6.4.31A R This exemption applies where a *private customer* is automatically enrolled by his employer in a *stakeholder pension scheme*; ~~or a personal pension scheme policy or a pension contract~~ provided through the workplace. In that case, in good time before the *private customer* is bound by the contract or offer, he must be provided with the appropriate *key features* or other information.

...

...

- 6.5.16A G

...

- 6.5.16B G Although there is no requirement to provide a projection for a SIPP, personal pension deposit or personal pension product, a firm may still produce one if it wishes. A firm that chooses to produce such a projection should do so in a way which is consistent with COB 6.6 (Projections).

...

...

- 6.5.22 G

....

- 6.5.22.A G There is no requirement for a tabular illustration of charges under a SIPP, personal pension deposit or personal pension product. Instead, a firm should ensure that the information provided contains a full and fair description of all of the charges that apply or may apply to the private customer in respect of the scheme, including asset transactions under a

SIPP.

...

...

6.6.1 R COB 6.6 applies to a *firm* in respect of *projections* for *life policies, key features schemes, simplified prospectus schemes, personal pension schemes* and *stakeholder pension schemes*.

...

6.6.4 R ...

6.6.4A G If a *firm* produces a *projection* for a *SIPP*, it should do so in a way which is consistent with the principles in *COB 6.6 (Projections)*.

...

6.7.1 R COB 6.7 applies to:

...

(5) the operator of a *personal pension scheme* or a *stakeholder pension scheme*;

...

6.7.5 G Cancellable investment agreements.

This table belongs to COB 6.7.4. G

Notes:

...

12. ...

13. A private customer's right to cancel a contract for a SIPP may lapse in certain circumstances (see COB 6.7.13AR (Right to cancel a personal pension deposit, a personal pension product or a SIPP)).

- 6.7.7 R A retail customer has a right to cancel:
- (1) ...
 - (2) a contract to join for a stakeholder pension scheme, a personal pension deposit, a personal pension product or a SIPP for which a right to cancel applies under COB 6.7.12R or COB 6.7.13AR;
 - (3) ...
 - (4) a variation of a *life policy, personal pension scheme contract* or *stakeholder pension scheme* for which a right to cancel applies under COB 6.7.23R, COB 6.7.23AR and COB 6.7.26AR.
- 6.7.8 R The trustees of an *occupational pension scheme*, the operator of a personal pension scheme or the trustees and managers of a *stakeholder pension scheme* must be treated so far as necessary as a *retail customer* for the purposes of the *cancellation rules*, and acquire the same right to cancel as a *retail customer*.
- 6.7.9 G (1) COB 6.7.8R applies, for example, when the trustees or operators of a personal pension scheme purchase life policies or schemes as investments of their pension schemes. Individual members of a personal pension scheme or a stakeholder pension schemes have a

right to cancel initial membership of the scheme and, in some circumstances, a subsequent variation of their contributions.

....

...

- 6.7.10 G When a *retail customer* has a right to cancel under COB 6.7.7R, that right must (unless COB 6.7.11R applies) be exercised:
- (1) (in the case of a *life policy, personal pension ~~scheme policy,~~ personal pension contract* or *stakeholder pension scheme*) within 30 days; or

...

...

- 6.7.12 R (1) A *retail customer* who has entered into a contract for a *stakeholder pension scheme* has a right to cancel, unless:
- (a) the right to cancel is disappplied for a *distance contract* by case 15 of row 2 to COB 6.7.17R; or
- (b) the relevant transaction is funded (wholly or partly) by a pension transfer, but only if and to the extent that the right to cancel has been replaced by a right to withdraw (see COB 6.7.17R (Cancellable contracts and exceptions – non-life).
- (2) ...

...

Right to cancel a personal pension deposit, a personal pension product or a SIPP

- 6.7.13A R A retail customer who has entered into a contract to join a personal pension deposit, personal pension product or a SIPP has a right to cancel, unless:
- (1) the right to cancel is disappplied for a distance contract by case 15 of row 2 to COB 6.7.17R (Cancellable contracts and exceptions – non-life);
- (2) the relevant transaction is funded (wholly or partly) by a pension transfer, but only if and to the extent that the right to cancel has been replaced by a right to withdraw (see COB 6.7.19R (Cancellation substitute)); or
- (3) (in the case of a SIPP) the performance of the contract (to join the SIPP) has been fully completed by both parties at the customer's express request before the customer exercises his right to cancel.

- 6.7.13B G If a customer requests that a firm complete a transaction to join a SIPP before the expiry of the cancellation period, the firm should, in having regard

to the information needs of the *customer*, make the *customer* aware that he will lose his right to cancel and satisfy itself on reasonable grounds that the *customer* understands the cost and other implications.

...

6.7.15 R Cancellable contracts and exceptions-life

This table belongs to COB 6.7.7R(1)

Cancellable contracts and exceptions- life

Long-term insurance contracts which a *retail customer* has a right to cancel under COB 6.7.7 R(1)(subject to Row 2)

...

Row 2 There is no right to cancel where any one or more of the following cases applies:

3. ...

3A. A *pension policy* that is itself a *SIPP*;

4. ~~*pension policy* or *stakeholder pension scheme*~~ funded (wholly or in part) from payment derived from:

(a) a *pension transfer*, to the extent that the right to cancel is provided through the right to withdraw (see COB 6.7.14R(2)), using the cancellation substitute in COB 6.7.19R; or

(b) ...

...

6.7.17 R Cancellable contracts and exceptions – non-life

Contracts which a *retail customer* has a right to cancel under COB 6.7.7R (1) (subject to row 2):

Row 1 A. ...

B. ...

C. subscriptions (but see notes 1, 2 and 5 in COB 6.7.18R) which can be invested only in *units* (whether or not held within an *ISA*, *PEP*, ~~*pension contract*, *personal pension product*~~ or *SIPP*) in an *AUT*, *recognised scheme* or *ICVC* purchased from:

(a) ...

D. *distance contracts* (but see notes 6 and 8 in COB 6.7.18R) (whether or not held within a *CTF*) (other than for a *life policy*, *stakeholder pension scheme*, *personal pension deposit*, *personal pension product*, *SIPP*, *cash deposit ISA*, *cash deposit CTF* or a contract in A, B or C) the making or performance of which by the

firm constitutes or is part of:

...

Row 2 There is no right to cancel where any one or more of the following cases applies:

...

12. ~~*pension contract or stakeholder pension scheme*~~ funded (wholly or in part) from payments derived from a *pension transfer* to the extent that the right to cancel is provided through a right to withdraw (see *COB 6.7.14R (2)*) using the cancellation substitute in *COB 6.7.19R*;

6.7.19 R This table belongs to *COB 6.7.12R, COB 6.7.13AR(2), COB 6.7.14R(2)*, cases 4(a) and 7(a) of row 2 to *COB 6.7.15R*, case 12 of row 2 to *COB 6.7.17R, COB 6.7.23R(3)* and *COB 6.7.26AR(2)*.

Cancellation substitute

The *retail customer's* right to cancel under *COB 6.7.7R (1)*; ~~or *COB 6.7.7R (4)*~~ or *COB 6.7.13AR(2)* is provided through (see note 2) a right to withdraw only if:

....

.....

6.7.23 R (1) After an increase in regular or single *premiums* or payments (including a *pension transfer*) to a *life policy, personal pension scheme* ~~*contract*~~ or *stakeholder pension scheme*, a *retail customer* has a right to cancel (see *COB 6.7.7R (4)*) in the following circumstances unless (2) applies:

...

(2) Paragraph (1) does not apply if:

...

(c) the variation is in respect of a *life policy* held within a *CTF*; or

(d) the variation is in respect of a *SIPP* that is itself a *life policy*.

....

6.7.26A R (1) If a *customer* who is an individual varies an existing *personal pension scheme* ~~or *stakeholder pension scheme*~~ by exercising an option to make *income withdrawals*, he has a right to cancel that first variation.

....

....

6.7.31 R When the *customer* is a trustee or an operator of a personal pension scheme who is reasonably believed by the *firm* to be expected to act on the instructions of the individual beneficiary, scheme member or purchaser of the *policy* or contract, the *firm* must send the notice of the right to cancel in *COB* 6.7.30R to:

- (1) the trustee or operator, as appropriate; and
- (2) the beneficiary, scheme member or purchaser;

and must inform the beneficiary, scheme member or purchaser of the need to give instructions, within the specified cancellation period, to the trustee or operator where the right to cancel is to be exercised.

...

6.7.47 R Where notice of cancellation or withdrawal has been served on a *firm* (or its *appointed representative* or agent), the *firm* must make and retain records (which include a copy of any receipt of notice issued to the *customer* and the *customer's* original notice instructions):

- (1) ...
- (2) for a minimum period of:
 - (a) six years in the case of a record relevant to a *life policy*, ~~*pension contract*~~ *personal pension scheme* or *stakeholder pension scheme*; and

...

....

6.7.51 R By exercising a right to cancel under *COB* 6.7.7R(1), (2), ~~(4)~~, (5) or (6), the *customer* withdraws from the contract and:

...

.....

6.7.52 R Obligations on cancellation
Unless the agreement relates to a *CTF*, when a *retail customer* exercises a right to cancel under *COB* 6.7.7R(1), (2), ~~(3)~~ or (4):

...

....

6.7.57 R Table: Contracts which are subject to a shortfall

This table belongs to *COB* 6.7.54R

Investment agreements subject to shortfall

...

Part II: any contract specified in COB 6.7.13AR or row 1 of *COB 6.7.17R* (unless note 2 applies):

which is: where the *investment agreement* is effected as a:

...

(1) ...

(1A) a person

pension

product

...

...

(a) ...

...

7.5.4 R *COB 7.5.3R* does not apply in any of the following circumstances:

(1) the *customer order* is for:

(a) the purchase of a *life policy*; ~~or~~

(b) the purchase or sale of *units* in a *regulated collective investment scheme* from or to the *operator* of that *scheme*; or

(c) an asset to be held within a *personal pension scheme*, unless that asset is itself a *designated investment*;

...

7.15.4 R *COB 7.15.3R* does not apply to:

(1) a transaction in an asset in a *personal pension scheme*, unless that asset is itself a *designated investment*; or

(2) a *non-market-price transaction* if it is subject to the rules of a *recognised investment exchange*.

...

11.1.1 R This Chapter:

(1) applies to *depositories* and *trustee firms* when acting as such;

(2) does not apply to *trustee firms* when acting as the trustee of a *personal pension scheme* or *stakeholder pension scheme*.

Amendments to the Authorisation Manual (AUTH)

In this Annex, underlining indicates new text and striking through indicates deleted text.

- 3.16 ~~Specific obligations: applicants seeking to establish, operate or wind up a stakeholder pension scheme~~
- 3.16.1 ~~G Applicants should be aware that, in addition to requiring *permission* from the FSA to *establish, operate or wind up a stakeholder pension scheme*, a firm will need to obtain exempt approval of the *stakeholder pension scheme* from ⁺HM Revenue and Customs⁺ and to register the scheme with the ⁺Pensions Regulator⁺.~~
- 3.16.2 ~~G Establishment and operation of a *stakeholder pension scheme* may involve heavy investment in new systems or changes to existing systems which, in view of the limit on charges, might not be recovered for some time. So, the FSA will normally require an applicant wishing to *establish, operate or wind up a stakeholder pension scheme* to provide financial projections for the whole period up to the point at which the new business is expected to break even. The applicant must also be able to demonstrate to the FSA that it is ready, willing and organised to comply with the requirements (including those in *COB 5*, *COB 6* and *TC 2*) applicable to operation of a *stakeholder pension scheme*~~

Amendments to the Compensation Sourcebook (COMP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

Table COMP 4.2.2R Persons not eligible to claim unless COMP 4.3 applies (see COMP 4.2.1R)

This table belongs to COMP 4.2.1R

- 4.2.2 R (1) *Firms* (other than a *sole trader firm*; ~~a credit union~~; a trustee of a *stakeholder pension scheme* (which is not an *occupational pension scheme*) or *personal pension scheme*; a *firm carrying on the regulated activity of operating, or winding up, a stakeholder pension scheme* (which is not an *occupational pension scheme*) or *personal pension scheme*; or a *small business*; in each case, whose *claim* arises out of a *regulated activity* for which they do not have a *permission*)
...
- (9) *Bodies corporate* in the same *group* as the *relevant person in default* unless that *body corporate* ~~except *bodies corporate* which fall within COMP 4.2.2 R (4) (a) or (b)~~ is:
(i) a trustee that falls within COMP 4.2.2 R(1) or (4); or
(ii) carrying on the regulated activity of operating, or winding up, a stakeholder pension scheme (which is not an *occupational pension scheme*) or *personal pension scheme*.
...
- 5.5.1 R *Protected investment business* is:
(1) *designated investment business* carried on by the *relevant person* with, or for the benefit of, the claimant (so long as that claimant has a claim), or as agent on ~~his~~ the claimant's behalf;
...
- 12.6 Quantification: trustees, operators of pension schemes, persons winding up pension schemes, personal representatives, agents, and joint claims
Trustees, operators of pension schemes and persons winding up pension schemes
- 12.6.1 R If a claimant's *claim* includes a *claim* as:
(1) trustee; or
(2) the operator of, or the person carrying on the regulated activity of winding up, a stakeholder pension scheme (which is not an *occupational pension scheme*) or *personal pension scheme*,
the *FSCS* must treat him in respect of that *claim* as if his ~~claim as trustee were~~ a was the claim of a different *person*.

- 12.6.2 R If a claimant has a *claim* as:
A
- (1) ~~a the trustee of a kind falling within COMP 4.2.2 R(1) or COMP 4.2.2R(4)(a) or (b)~~ of a small self-administered scheme or an occupational pension scheme of an employer which is not a large company, large partnership or large mutual association or the trustee or operator of, or the person carrying on the regulated activity of winding up, a stakeholder pension scheme (which is not an occupational pension scheme) or personal pension scheme,
 - (2) for one or more members of a pension scheme (or, where relevant, the ~~widow or widower or surviving civil partner~~ beneficiary of any member) whose benefits are *money-purchase benefits*,
- the *FSCS* must treat the member or members (or, where relevant, the ~~widow or widower or surviving civil partner~~ beneficiary of any member) as having the *claim*, and not the claimant.
- 12.6.3 R If any group of *persons* has a *claim* as:
- (1) trustees; or
 - (2) operators of, or as persons carrying on the regulated activity of winding up, a stakeholder pension scheme (which is not an occupational pension scheme) or a personal pension scheme,
- (or any combination thereof), the *FSCS* must treat them as a single and continuing *person* distinct from the *persons* who may from time to time be the trustees, operators or persons winding up the relevant pension scheme.
- 12.6.4 R ...
Where the same *person* has a *claim* as:
- (1) trustee for different trusts or for different stakeholder pension schemes (which are not occupational pension schemes) or personal pension schemes; or
 - (2) the operator of, or the person carrying on the regulated activity of winding up, different stakeholder pension schemes (which are not occupational pension schemes) or personal pension schemes,
- COMP* applies as if the *claims* relating to each of these trusts or schemes were claims of different *persons*.
- 12.6.6 R ...
Where any of the provisions of *COMP* 12.6.1R to *COMP* 12.6.5 R apply, the *FSCS* must try to ensure that any compensation paid to:
- (1) the trustee; or
 - (2) the operator of, or the person carrying on the regulated activity of

winding up, a stakeholder pension scheme (which is not an occupational pension scheme) or personal pension scheme,

is, in each case:

- (13) ~~is~~ for the benefit of members or beneficiaries who would be *eligible claimants* if they had a *claim* themselves; and
- (24) ~~does not exceed~~ no more than the amount of the loss suffered by those members or beneficiaries.

...

12.6.11 R In applying *COMP* to *claims* arising out of business done with a *branch* or ~~establishment~~ *establishment* of the *relevant person* outside the *United Kingdom*, the *FSCS* must interpret references to:

- (1) *persons* entitled as personal representatives, trustees, bare trustees or agents, operators of pension schemes or persons carrying on the regulated activity of winding up pension schemes; or
- (2) ~~or references to~~ *persons* having a joint beneficial *claim* or carrying on business in partnership,

as references to *persons* entitled, under the law of the relevant country or territory, in a capacity appearing to the *FSCS* to correspond as nearly as may be to that capacity.

**MORTGAGES: CONDUCT OF BUSINESS SOURCEBOOK (AMENDMENT NO 3)
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers listed in Schedule 4 to the Mortgages: Conduct of Business sourcebook.
- B. The rule-making powers referred to above are specified for the purpose of section 153(2) (Rule-making instruments) of the Financial Services and Markets Act 2000.

Commencement

- C. This instrument comes into force on 31 October 2006.

Amendments to the Handbook

- D. The Mortgages: Conduct of Business sourcebook (MCOB) is amended in accordance with the Annex to this instrument.

Citation

- E. This instrument may be cited as the Mortgages: Conduct of Business Sourcebook (Amendment No 3) Instrument 2006.

By order of the Board
28 September 2006

Annex

Amendments to the Mortgages: Conduct of Business sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 3.6.3 R (1) ...
- (2) A *non-real time qualifying credit promotion* which includes a comparison or contrast must:
- (a) compare ~~qualifying credit~~ credit meeting the same needs or which is intended for the same purpose;
 - (b) objectively compare one or more material, relevant, verifiable and representative features of ~~the qualifying credit~~ that credit, which may include price;

...

...

- 3.6.5 G In relation to *MCOB 3.6.3R*:
- ...
- (2) if a *non-real time qualifying credit promotion* includes information on the performance of the *firm*, on conditions in the market, interest rates, *APRs* or other *price information* this information should be relevant and recent. *Firms* should therefore avoid including this information in *qualifying credit promotions* which have a long shelf-life, ~~and where the information can become outdated;~~ and without a clear and prominent warning that the information can become outdated; and

...

...

- 3.6.13 R A *non-real time qualifying credit promotion* must, unless *MCOB 3.6.15R* (Transient advertising) applies, prominently contain one or more of the following statements in the circumstances described:

...

- (3) in all cases except (1) and (2): 'Your home may be repossessed if you do not keep up repayments on your mortgage.'; or if it refers in whole or in part to *qualifying credit* secured on property which is not the *customer's* home the statement may be amended but only to the extent

necessary in order to reflect that fact.

...

(6) where a *non-real time financial promotion* relates to both *qualifying credit* and credit which is not *qualifying credit* the statements required by (2) or (3) may be modified by replacing ‘mortgage’ with ‘mortgage or any other debt secured on it’.

...

5.6.9 R The amount referred to in *MCOB* 5.6.6R(2) is:

(1) ...

(2) where the *regulated mortgage contract* is a revolving credit agreement such as a secured overdraft or *mortgage credit card*;

(a) (if it provides for an initial drawdown and *linked borrowing facilities* that would allow the *customer* to increase the amount of the loan without any further approval from the *mortgage lender*) the amount of the initial drawdown; or

(b) (in all other cases) the total borrowing that the *firm* is willing to provide under the *regulated mortgage contract*; or

(3) ...

...

5.6.124 R (1) The following words must be prominently displayed in the *illustration*, after the contact details: ‘Your home may be repossessed if you do not keep up repayments on your mortgage’.

(2) If the loan may be secured on property which is not the *customer's* home the statement in (1) may be amended but only to the extent necessary in order to reflect that fact.

...

6.4.4 R The *illustration* provided as part of the *offer document* in accordance with *MCOB* 6.4.1R(1) must meet the requirements of *MCOB* 5.6 (Content of illustrations) with the following modifications:

...

~~(10) details of insurance which the *customer* has chosen to take out through the *firm*, whether or not this insurance was included in the *illustration* provided in accordance with *MCOB* 5 (Pre-application disclosure), must be included in Section 9 of the *illustration* that is part of the *offer document*;~~[deleted]

...

...

7.5.1 R Subject to *MCOB 7.5.2R*, a *firm* must provide the *customer* with a statement at least once a year (or, in relation to the first statement, within the first 13 months):

...

...

7.6.27 R ~~For the purposes of *MCOB 7.6.22R*, *MCOB 5.6.17R* is replaced with the following;~~

~~"Section 2: 'Which service are we providing you with?'~~

~~Under the section heading 'Which service are we providing you with?' the following text should be included:~~

~~'We are providing you with an illustration for the [addition/removal] of [a party/parties] to this mortgage. You must make your own choice about whether changing the parties to this mortgage is right for you.' [deleted]~~

...

9.4.13 R The amount referred to in *MCOB 9.4.6R(2)* is:

(1) ...

(2) where the *regulated lifetime mortgage contract* is a revolving credit agreement such as a secured overdraft or *mortgage credit card*;

(a) (if it provides for an initial drawdown and linked borrowing facilities that would allow the *customer* to increase the amount of the loan without any further approval from the *mortgage lender*) the amount of the initial drawdown; or

(b) (in all other cases) the total borrowing that the *firm* is willing to provide under the *regulated lifetime mortgage contract*; or

(3) ...

...

9.5.4 R The *illustration* provided as part of the *offer document* in accordance with *MCOB 6.4.1R(1)* must meet the requirements of *MCOB 9.4*, with the following modifications:

...

- (9) ~~details of insurance which the *customer* has chosen to take out through the *firm*, whether or not this insurance was included in the *illustration* provided in accordance with *MCOB 9*, must be included in Section 12 of the *illustration* that is part of the *offer document*;~~[deleted]

...

...

Addition or removal of a party to a contract

- 9.8.8 R For the purposes of *MCOB 7.6.22R*, *MCOB 9.4.19R* is replaced with the following:

~~"Section 2: 'Which service are we providing you with?'~~

~~Under the section heading 'Which service are we providing you with?' the following text should be included:~~

~~"We are providing you with an illustration for the addition/removal of a party/parties to this lifetime mortgage. You must make your own choice about whether changing the parties to this lifetime mortgage is right for you.";~~[deleted]

**SUPERVISION MANUAL (RETAIL MEDIATION ACTIVITIES RETURN)
(SUSPENSION) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 156 (General supplementary powers); and
 - (3) section 157(1) (Guidance).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force with immediate effect.

Amendments to the Supervision manual

- D. The commencement of the Supervision manual (Retail Mediation Activities Return) Instrument 2006 (FSA 2006/14) is suspended until the Financial Services Authority by subsequent instrument provides for the commencement of this instrument.

Citation

- E. This instrument may be cited as the Supervision manual (Retail Mediation Activities Return) (Suspension) Instrument 2006.

Annex A

Amendments to the Conduct of Business sourcebook (COB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

Business with UK clients from non-UK offices

1.4.3 R This sourcebook applies in relation to activities not within *COB* 1.4.2R (UK establishments: general) carried on with or for a *client* in the *United Kingdom*, except in any of the following cases:

(1) ...; or

(2) ...

(c) ...; or

(3) (except as set out in (2) and in *COB* 1.4.12R (IMD passported activities)) when an *incoming EEA firm* is providing *cross-border services in the United Kingdom under the IMD*.

...

IMD passported activities

1.4.12 R ...

(3) ~~In addition to the situation in *COB* 1.4.3R, t~~The *IMD minimum implementation provisions* apply, on the basis outlined in (4), to an *incoming EEA firm* providing *cross-border services in the United Kingdom under the IMD* unless the *firm's Home State regulator* imposes measures which implement the articles for these activities.

(4) ...

(5) The only provisions in *COB* that apply to *passported activities* carried on by an *EEA firm* under the *IMD* from a *branch in the UK* are:

...

(a) the *IMD minimum implementation provisions*, on the basis in (4), unless the *firm's Home State regulator* imposes measures which implement articles 12 and 13 of the *IMD* for these activities;

(b) *COB* 1.4.5R (Financial promotions), *COB* 1.4.4R (Overseas business for UK private customers) and *COB* 1.4.10R (Electronic commerce activities and communications);

(c) the other provisions in *COB* relating to articles 12 and 13 of

the *IMD* (beyond the minimum required to implement these articles), unless the *firm's Home State regulator* imposes measures of like effect for those activities; and

- (d) (if the activities are in connection with a *distance contract* with a *retail customer*) the provisions in *COB* which implement the *DMD*, unless the *firm's Home State* imposes measures which implement, or correspond to obligations provided for by, the *DMD*.

Annex B

Amendments to the Insurance: Conduct of Business sourcebook (ICOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

IMD passported activities

1.3.10 R ...

- (3) ~~In addition to ICOB 1.3.1R~~ Notwithstanding the other rules in this section, the only provisions in ICOB that apply to an incoming EEA firm carrying on passported activities under the IMD in the United Kingdom are:
- (a) ~~the provisions in ICOB 1.3.11R do not apply to an incoming EEA firm carrying on passported activities under the IMD from a branch in the United Kingdom if the firm's Home State regulator imposes minimum measures which implement articles 12 and 13 of the IMD for these activities~~ ICOB 1.3.8R (Electronic commerce activities and communications) and ICOB 3 (Financial promotion);
 - (b) ~~the provisions in ICOB 1.3.11R apply to an incoming EEA firm providing cross border services in the United Kingdom if the firm's Home State regulator does not impose minimum measures which implement articles 12 and 13 of the IMD for those activities; and~~
 - (c) ~~the other provisions in ICOB relating to articles 12 and 13 of the IMD (beyond the minimum required to implement these articles) apply to an incoming EEA firm providing cross-border services in the United Kingdom, unless the firm's Home State regulator imposes measures of like effect for those activities; and~~
 - (d) (if the activities are carried on from a branch in the UK and are in connection with a distance contract with a retail customer) the provisions in ICOB which implement the DMD in respect of a distance non-investment mediation contract, unless the firm's Home State imposes measures which implement, or correspond to obligations provided for by, the DMD.

GIBRALTAR (PASSPORTING) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the power in section 157(1) (Guidance) of the Financial Services and Markets Act 2000.

Commencement

- B. This instrument comes into force on 6 October 2006.

Amendments to the Handbook

- C. The Supervision manual (SUP) is amended in accordance with the Annex to this instrument.

Citation

- D. This instrument may be cited as the Gibraltar (Passporting) Instrument 2006.

By order of the Board
28 September 2006

Annex

Amendments to the Supervision manual (SUP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 13.1.2 G ...So, references in this chapter to an *EEA State* or an *EEA right* include references to Gibraltar and the entitlement under the ~~Gibraltar Order~~ Gibraltar Order respectively.
- 13A.1.3 G (1) Under the ~~Gibraltar Order~~ Gibraltar Order made under section 409 of the *Act* (~~Gibraltar Order~~), a Gibraltar firm is treated as an *EEA firm* under Schedule 3 to the *Act* if it is:
- (a) authorised in Gibraltar under the *Insurance Directives*; or
 - (b) authorised in Gibraltar under the *Banking Consolidation Directives*; or
 - (c) authorised in Gibraltar under the *Insurance Mediation Directive*; or
 - (d) authorised in Gibraltar under the *Investment Services Directive*.
- (1A) Similarly, an *EEA firm* which:
- (a) has satisfied the Gibraltar establishment conditions and has established a *branch* in the *UK*; or
 - (b) has satisfied the Gibraltar service conditions and is providing *cross border services* into the *UK*;
- is treated as having satisfied the *establishment conditions* or *service conditions* (as appropriate) under Schedule 3 to the *Act*. Regulations 4 to 7 of the *EEA Passport Rights Regulations* will apply to the establishment of the *branch* or the provision of *cross border services*.
- (2) ~~A Gibraltar insurance company companies, credit institutions, insurance intermediaries and investment firms is are~~ allowed to passport ~~its their~~ services into the *United Kingdom* if ~~it complies they~~ comply with the relevant notification procedures. ~~Similarly, a Gibraltar credit institution is allowed to passport into the United Kingdom to provide banking services provided those services fall within items 1 to 6 in Annex 1 to the *Banking Consolidation*~~

~~Directive.~~ So, any references in this chapter to *EEA State* or *EEA right* include references to Gibraltar and the entitlement under the ~~Gibraltar Order~~ Gibraltar Order where appropriate.

- (3) ~~The entitlement in the Gibraltar Order does not, however, extend to investment services as Gibraltar investment firms have not been granted the right to passport into the United Kingdom. [deleted]~~

...

14.1.3 G (1) Under the ~~Gibraltar Order~~ Gibraltar Order made under section 409 of the *Act*, a Gibraltar firm is treated as an *EEA firm* under Schedule 3 to the *Act* if it is:

- (a) authorised in Gibraltar under the *Insurance Directives*; or
- (b) authorised in Gibraltar under the *Banking Consolidation Directive*; or
- (c) authorised in Gibraltar under the *Insurance Mediation Directive*; or
- (d) authorised in Gibraltar under the *Investment Services Directive*.

(1A) Similarly, an *EEA firm* which:

- (a) has satisfied the Gibraltar establishment conditions and has established a *branch* in the *UK*; or
- (b) has satisfied the Gibraltar service conditions and is providing *cross border services* into the *UK*;

is treated as having satisfied the *establishment conditions* or *service conditions* (as appropriate) under Schedule 3 to the *Act*.

- (2) ~~A Gibraltar insurance company companies, *credit institutions*, *insurance intermediaries* and *investment firms* is are allowed to passport its their services into the *United Kingdom* if it complies they comply with the relevant notification procedures. Similarly, a Gibraltar *credit institution* is allowed to passport into the *United Kingdom* to provide banking services provided those services fall within items 1 to 6 in Annex 1 to the *Banking Consolidation Directive*.~~ So, any references in *SUP 14* to *EEA State* or *EEA right* include references to Gibraltar and the entitlement under the ~~Gibraltar Order~~ Gibraltar Order where appropriate.

- (1) section 157(1) (Guidance); and
 - (2) paragraph 7 of Schedule 1.

Commencement

- B. This instrument comes into force on 6 October 2006.

Amendments to the Handbook

- C. The Complaints against the FSA sourcebook (COAF) is amended in accordance with the Annex to this instrument.

Citation

- D. This instrument may be cited as the Complaints against the FSA Scheme (Amendment No 3) Instrument 2006.

By order of the Board
28 September 2006

Annex

Amendments to the Complaints against the FSA sourcebook (COAF)

In this Annex, underlining indicates new text and striking through indicates deleted text.

- 1.3.2 G (1) The *Complaints Commissioner* is appointed for a period of three years and may be dismissed from office only for reason of becoming:
- (a) incapacitated by physical or mental illness; or
 - (b) otherwise unfit to discharge the functions of his office;
- and subject in either event to the approval of the Treasury.
- (2) ~~No person who has attained the age of 70 years is eligible to be or to remain a *Complaints Commissioner*.~~[deleted]
- (3) The *Complaints Commissioner* must not be an employee of the *FSA* and is required to act independently of, and without favouring, the *FSA*.

...

- 1.4.7 G The *FSA* will not make any charge to complainants ~~in relation to~~ for the operation of the *complaints scheme*.

...

- 1.5.2A G In carrying out the investigation, the suitably senior member of staff will undertake a paper-based review of the complaint, by considering any documents supplied initially by the complainant, and any relevant *FSA* documents, or following communications from the *FSA* under *COAF* 1.5.1CG. The investigation will not involve an interview of the complainant.

...

Time limit for the referral of a matter to the Complaints Commissioner

- 1.5.6A G (1) When the *FSA* writes to a complainant with its final report of its investigation, or explaining that it will not investigate a complaint under the *complaints scheme* under *COAF* 1.5.1BG, the *FSA* will inform the complainant that, if he is dissatisfied, he must refer the *FSA's* decision to the *Complaints Commissioner* within three months of the date of that letter.
- (2) If the *Complaints Commissioner* receives a referral of a matter outside the three months time limit, it will be for the *Complaints*

Commissioner to decide whether there is a good reason why the matter should be considered out of time.

...

- 1.5.19A G (1) The *Complaints Commissioner* will send a preliminary report, with a time limit within which the *FSA* and the complainant may indicate in writing any disagreement with or comments on the preliminary report.
- (2) At the end of this time limit, the *Complaints Commissioner* will produce a final report after taking into account, at his discretion, any disagreements or comments notified to him. The final report will be the conclusion of the investigation procedure set out in *COAF* 1.5 and the complaint will then be regarded as closed by the *Complaints Commissioner* and the *FSA*.

2 Transitional complaints scheme

...

2.3 Coverage and scope of the scheme

...

2.3.7 G The *FSA* will not make any charge to complainants ~~in relation to~~ for the operation of the *transitional complaints scheme*.

...

2.4.2A G In carrying out the investigation, the suitably senior member of staff will undertake a paper-based review of the complaint, by considering any documents supplied initially by the complainant, and any relevant *FSA* documents, or following communications from the *FSA* under *COAF* 2.4.1BG. The investigation will not involve an interview of the complainant.

...

Time limit for the referral of a matter to the *Complaints Commissioner*

- 2.4.6A G (1) When the *FSA* writes to a complainant with its final report of its investigation, or explaining that it will not investigate a complaint under the *complaints scheme* under *COAF* 2.4.1AG, the *FSA* will inform the complainant that, if he is dissatisfied, he must refer the *FSA*'s decision to the *Complaints Commissioner* within three months of the date of that letter.
- (2) If the *Complaints Commissioner* receives a referral of a matter outside the three months time limit, it will be for the *Complaints Commissioner* to decide whether there is a good reason why the

matter should be considered out of time.

...

- 2.4.18A G (1) The *Complaints Commissioner* will send a preliminary report, with a time limit within which the *FSA* and the complainant may indicate in writing any disagreement with or comments on the preliminary report.
- (2) At the end of this time limit, the *Complaints Commissioner* will produce a final report after taking into account, at his discretion, any disagreements or comments notified to him. The final report will be the conclusion of the investigation procedure set out in *COAF 2.4* and the complaint will then be regarded as closed by the *Complaints Commissioner* and the *FSA*.

**NEW COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK
(DUAL PRICING) INSTRUMENT 2006**

Powers Exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 140 (Restriction on managers of authorised unit trust schemes);
 - (c) section 156 (General supplementary powers);
 - (d) section 157 (Guidance);
 - (e) section 238(5) (Restrictions on promotion);
 - (f) section 242 (Applications for authorisation of unit trust schemes);
 - (g) section 247 (Trust scheme rules); and
 - (h) section 248 (Scheme particulars rules); and
 - (2) regulation 6 (FSA rules) of the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228).
- B. The rule-making powers and related provisions listed above are specified for the purpose of section 153(2) of the Act (Rule-making instruments).

Commencement

- C. This instrument comes into force on 6 October 2006, except that text in Annex A which is placed in bold square brackets is deleted with effect from 12 February 2007.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

(1)	(2)
Glossary of definitions	Annex A

Citation

- E. This instrument may be cited as the New Collective Investment Schemes Sourcebook (Dual Pricing) Instrument 2006.

By order of the Board
28 September 2006

Annex A

Amendments to the Glossary of definitions

In this Annex underlining indicates new text and striking through indicates deleted text. However, Handbook text in this Annex placed in bold square brackets is deleted with effect from 12 February 2007 but is not shown struck through.

Amend the following definitions as shown:

...

bid price the price ~~price~~ at which a person could sell a unit in a dual-priced authorised fund AUF or a security.

...

cancellation price (in *COLL*)
(in relation to the *cancellation of units in a dual-priced authorised fund*) the price for each unit payable by the depositary to the authorised fund manager on that cancellation.

...

dilution (in *COLL* [and *CIS*]) the amount of *dealing* costs incurred, or expected to be incurred, by ~~an ICVC~~ or for the account of a *single-priced authorised fund AUF* to the extent that these costs may reasonably be expected to result, or have resulted, from the acquisition or disposal of *investments* by ~~the ICVC~~ or for the account of the *single-priced authorised fund AUF* as a consequence (whether or not immediate) of the increase or decrease in the cash resources of the ~~ICVC or single-priced authorised fund AUF~~ resulting from the *issue* or *cancellation* of units over a period;

for the purposes of this definition, *dealing* costs include both the costs of *dealing* in an *investment*, professional fees incurred, or expected to be incurred, in relation to the acquisition or disposal of ~~an immovable approved immovables~~ and, where there is a spread between the *buying* and *selling* prices of the *investment*, the indirect cost resulting from the differences between those prices ~~prices~~.

...

dilution adjustment an adjustment to the price ~~price~~ of a unit determined by the ~~ACD, or the authorised fund manager~~ of a *single-priced authorised fund AUF*, under *COLL* 6.3.8 R (Dilution) [or, as the case may be, *CIS* 4.6.4R (Dilution adjustment)] for the purpose of reducing *dilution*.

...

dilution levy a charge of such amount or at such rate as is determined by ~~the an ACD of an ICVC or a~~ authorised fund manager of a *single-priced authorised fund AUF* to be made for the purpose of reducing the effect of *dilution*.

...

*dual-priced
AUT* [an *AUT* that is not a *single-priced-AUT*.]

...

*dual-priced
authorised
fund* an *authorised fund* or, in the case of an *umbrella*, a *sub-fund* (if it were a separate *fund*), that is not a *single-priced authorised fund*.

...

initial price (in *COLL* [and *CIS*])

in relation to a *unit* of any *class*:

(a) ~~(in relation to a share of an *ICVC* or a unit in a single priced *AUT* *single-priced authorised fund*,)~~ the price to be paid for a unit of any class during the period of the initial offer under *COLL* 6.2.3R (Initial offers) or, as the case may be, *CIS* 4.2.4 R (*Issue of units: initial offer*); or

(b) ~~(in relation to a unit in a dual-priced *authorised fund, AUT*)~~ such the amount as may be agreed by the *depository trustee* and *authorised fund manager* as being the maximum amount price, inclusive of the manager's preliminary charge, if any *preliminary charge*, which that may be paid to the *authorised fund manager*; ~~for units on an initial offer.~~

during the period of the *initial offer* under *COLL* 6.2.3R (Initial offer) [or, as the case may be, *CIS* 4.2.4R (*Issue of units: initial offer*) or *CIS* 15.2.4R and 15.2.5R (*Issue of units: initial offer*)].

...

issue price (in relation to the *issue of units* of a *dual-priced AUT authorised fund*) the ~~price~~ price for each unit payable by the *authorised fund manager* to the *trustee depository* on that *issue*.

...

large deal [(in *CIS*) a *transaction* (or *series of transactions* in one *dealing period*) by any person to buy, sell or exchange units in an *authorised fund* at a total value of £15,000 or its equivalent in the *base currency* of the *authorised fund*, or;

(a) for the purpose of *SDRT provision*, such other value; or

(b) for all or any other specified purposes, such greater value;

as may be specified in the *prospectus*;]

(in *COLL*) a transaction (or ~~series of transactions~~ *series of transactions* in one *dealing period*) by any person to buy, sell or exchange units in an *authorised fund*, of any value as set out in the *prospectus*, for the purposes of:

(a) an *SDRT provision*;

(b) a *dilution levy*; ~~or~~

(c) a *dilution adjustment*; or

(d) calculating the prices, for a dual-priced authorised fund, at which units may be sold or redeemed.

...

offer price the price at which a *person* could purchase a *unit* in a *dual-priced authorised fund AUT* or a *security*.

...

price [(in CIS)

(in relation to a ~~unit~~ *unit* in an ~~ICVC~~ *ICVC* or a ~~single-priced AUT~~ *single-priced AUT*) the ~~price~~ *price* of the *unit* calculated in accordance with ~~COLL 6.3 (Valuation and pricing)~~ or, as the case may be, ~~CIS~~ *CIS* 4 (Single ~~pricing~~ *pricing* and ~~dealing~~ *dealing*).]

(in COLL)

(in relation to a unit in an authorised fund) the price of the unit calculated in accordance with COLL 6.3 (Valuation and pricing).

...

redemption price [(in CIS)

the ~~authorised fund manager's price~~ *authorised fund manager's price* for *redemption* under ~~CIS~~ *CIS*.15.4.9R (Redemption price parameters).]

(in COLL)

the price payable by the authorised fund manager for each unit it redeems from a unitholder, calculated in accordance with COLL 6.3 (Valuation and pricing).

...

sale price (in COLL)

the price payable to the authorised fund manager for each unit it sells to a unitholder, calculated in accordance with COLL 6.3 (Valuation and pricing).

...

single-priced AUT [an *AUT* for the *units* of which there is only one *price* applicable by reference to a *valuation point*.]

...

single-priced authorised fund an authorised fund or, in the case of an umbrella, a sub-fund (if it were a separate fund), for the units of which there is only one price applicable by reference to a valuation point.

...

unitisation arrangements for a newly formed ~~dual-priced~~ AUT under which:

(a) the whole or part of the property of a *body corporate* (or a *collective investment scheme*) becomes the first property to be held on the trusts of the AUT; and

(b) the *holders* of :

(i) shares (or units) in the body corporate (or collective investment scheme) being wound up; or

(ii) units in the collective investment scheme, the property of which is being transferred;

become the first *participants* in the AUT.

...

Annex B

Amendments to the New Collective Investment Schemes sourcebook

In this Annex, underlining indicates new text and striking through indicates deleted text.

Table: contents of the prospectus

4.2.5 R ...

Valuation and pricing of scheme property

16 In relation to the valuation ~~and pricing~~ of *scheme property* and pricing of units:

(a) either:

(i) in the case of a *single-priced authorised fund*, a provision that there must be only a single *price* for any *unit* as determined from time to time by reference to a particular *valuation point*; ~~or~~

(ii) in the case of a *dual-priced authorised fund*, the *authorised fund manager's policy* for determining *prices* for the sale and redemption of *units* by reference to a particular *valuation point* and an explanation of how those *prices* may differ;

(b) ...

(iii) where relevant, how the *price* of *units* of each *class* will be determined for *dealing* purposes; ~~and~~

...

(v) where relevant in the case of a *dual-priced authorised fund*, the *authorised fund manager's policy* in relation to *large deals*; and

...

Dilution

- (2) ...
- (b) the ~~*issue*~~ *issue* of ~~*units*~~ *units* is prevented under *COLL* 6.2.18R (Limited issue).
- ...
- (6) ... for the purposes of ~~*buying or selling*~~ *dealing in units* if later ...
 - (7) ... must *sell* or *redeem units* at a ~~*price*~~ *price* determined no later than ...
 - (8) ~~The *authorised fund manager* must not *sell a unit* for more than the *price* of a *unit* of the relevant *class* at the relevant *valuation point*, to which may be added any *preliminary charge* permitted and any~~

payment required under ~~COLL 6.3.7R~~ and ~~COLL 6.3.8R~~. [deleted]

(9) The ~~authorised fund manager~~ must not redeem a *unit* for less than the ~~price~~ of a *unit* of the relevant *class* at the relevant *valuation point*, less any ~~redemption charge~~ permitted and any deduction under ~~COLL 6.3.7R~~ and ~~COLL 6.3.8R~~. [deleted]

(10) Paragraphs (4), (5) and ~~(9)~~ COLL 6.3.5AR (2) (Sale and redemption prices for single-priced authorised funds) do not apply where the *authorised fund manager* is buying ~~units~~ units as *principal* ...

Sale and redemption: guidance

6.2.17 G (1) ... after which it will not accept instructions to *sell* or *redeem* ~~units~~ units at that *valuation point*. ...

...

Limited issue

6.2.18 R ...

(2) ... for the further *issue* of *units* unless, at the time of the ~~issue~~ issue, he it is satisfied on reasonable grounds ...

...

Limited redemption

6.2.19 R (1) .. and the *prospectus* of a *non-UCITS retail fund scheme* that invests substantially in ~~approved immovables~~ immovables or whose investment objective ...

...

Deferred redemption

6.2.21 R ...

(2) ...

(a) the consistent treatment of all *unitholders* who have sought to ~~redeem~~ redeem *units* at any *valuation point* at which ~~redemptions~~ redemptions are deferred; and

...

...

Purpose

6.3.2 G ...

(2) ... This section protects *clients* by:

- (a) setting out ~~rules and guidance~~ guidance to ensure the prices of units in ~~an~~ both a single-priced authorised fund and a dual-priced authorised fund ~~is~~ are calculated fairly and regularly;
 - (b) allowing for... scheme property caused by:
...
 - (c) making appropriate provision to ensure clients are treated fairly where units are being ~~dealt with~~ dealt in at a known (~~historie~~ historic) price; and
 - (d) ensuring that ~~the prices~~ is are made public in an appropriate manner.
- (3) ... instead of the base currency of the umbrella. Consequently different methods of pricing units may be applied by an authorised fund manager to different sub-funds of an umbrella.
- (4) The authorised fund manager must follow the same method of pricing for each class of units in an authorised fund, or in a sub-fund of an umbrella.

Valuation

- 6.3.3 R (1) To determine the price of units the authorised fund manager must carry out a fair and accurate valuation of all the scheme property in accordance with the instrument constituting the scheme and the prospectus.
- (2) For a dual-priced authorised fund, each valuation of the scheme property must consist of two parts, carried out on an issue basis and a cancellation basis respectively.

Valuation points

- 6.3.4 R ...
- (8) The authorised fund manager may determine to have an additional valuation point for an authorised fund as a result of market movement under COLL 6.3.9 (Forward and historic pricing) or otherwise, in which case ~~he~~ it must inform the depository.

Price of a unit

- 6.3.5 R (1) An authorised fund manager must ensure that the ~~The~~ price of a unit of any class ~~must be~~ is calculated :
- (a) by reference to the net value of the scheme property; and
 - (b) ~~must be calculated~~ in accordance with the provisions of both the instrument constituting the scheme and the prospectus.

...

- (3) For each class of units in a single-priced authorised fund, a single price must be calculated at which units are to be issued and cancelled.
- (4) For each class of units in a dual-priced authorised fund, an issue price and a cancellation price must be calculated by reference to the respective parts of the valuation carried out under COLL 6.3.3R (2).

Sale and redemption prices for single-priced authorised funds

6.3.5A R The authorised fund manager of a single-priced authorised fund must not:

- (1) sell a unit for more than the price of a unit of the relevant class at the relevant valuation point, to which may be added any preliminary charge permitted and any payments required under COLL 6.3.7R and COLL 6.3.8R; or
- (2) redeem a unit for less than the price of a unit of the relevant class at the relevant valuation point, less any redemption charge permitted and any deductions under COLL 6.3.7R and COLL 6.3.8R.

Sale and redemption price parameters for dual-priced authorised funds

6.3.5B R (1) The authorised fund manager of a dual-priced authorised fund must not:

- (a) sell a unit for more than the maximum sale price of a unit of the relevant class at the relevant valuation point, to which may be added any payment required under COLL 6.3.7R; or
 - (b) redeem a unit for less than the cancellation price of a unit of the relevant class at the relevant valuation point, less any redemption charge permitted and any deduction under COLL 6.3.7R.
- (2) The maximum sale price of units under (1)(a) is the total of:
- (a) the issue price; and
 - (b) the current preliminary charge.
- (3) The sale price of units under (1)(a) must not be less than the relevant redemption price under (1)(b).
- (4) The redemption price under (1)(b) must not exceed the relevant issue price of the relevant units.
- (5) Subject to COLL 6.7.9R (Charges for the exchange of units in an umbrella), in the case of an umbrella:
- (a) the maximum price at which units in one sub-fund that is a dual-priced authorised fund may be acquired in exchange for units in another sub-fund must not exceed the relevant maximum sale price (less any preliminary charge) of the new units; and

- (b) the minimum price at which the old units in a sub-fund that is a dual-priced authorised fund may be taken in exchange must not be less than the equivalent cancellation price.

6.3.5C G The prospectus may make provision for large deals to be carried out at a higher sale price or a lower redemption price than those published, provided they do not exceed the relevant maximum and minimum parameters.

Valuation and pricing guidance

6.3.6 G Table: This table belongs to *COLL 6.3.2G (2)(a)* and *COLL 6.3.3R (Valuation)*

...

1 The valuation of scheme property

...

- (2) ~~An investment for which different prices are quoted according to whether it is being bought or sold should be valued at its mid-market price. The instrument constituting the scheme should set out the valuation method that will apply where a single price for buying and selling a security is quoted.~~

For some or all of the investments comprising the scheme property, different prices may be quoted according to whether they are being bought (offer prices) or sold (bid prices). The valuation of a single-priced authorised fund should reflect the mid-market value of such investments. In the case of a dual-priced authorised fund, the issue basis of the valuation will be carried out by reference to the offer prices of investments and the cancellation basis by reference to the bid prices of those same investments. The prospectus should explain how investments will be valued for which a single price is quoted for both buying and selling.

...

- (5) (a) no reliable price exists for a ~~security~~ security at a valuation point; or

...

(7) ...

- (c) the basis and reliability of the alternative ~~price~~ price used; and

...

...

2 The pricing controls of the authorised fund manager

...

(2) ...

(b) ~~investment~~ investment transactions are accurately and promptly reflected in valuations;

(c) the components of the valuation (including stock, cash and ~~units in issue~~ issue) are regularly reconciled to their source or prime records and any reconciling items resolved promptly and debtors reviewed for recoverability;

...

(f) dividends are accounted for as soon as ~~stocks~~ securities are quoted ex-dividend (unless it is prudent to account for them on receipt):

(g) fixed interest dividends, interest and expenses are accrued at each ~~valuation point~~ valuation point;

...

(3) ... and may choose a longer interval, if appropriate, given the level of activity on the ~~fund~~ authorised fund or the materiality of any effect on the *price*.

...

(6) Where the ~~pricing~~ pricing function is delegated to a third party, ■ COLL 6.6.15 R (1) (Committees and delegation) will apply.

...

3 The depositary's review of the authorised fund manager's systems and controls

(1) ...These checks also apply where an *authorised fund manager* has delegated all or some of its ~~pricing~~ pricing functions to a third party.

...

(5) ...verifying, on a sample basis, if necessary, the assets, liabilities, accruals, ~~units in issue~~ issue, *securities* prices ...

...

4 The recording and reporting of instances of incorrect pricing

...

(3) A *depositary* should also report to the *FSA* immediately any instance of incorrect ~~pricing~~ pricing where the error is 0.5% or more of the *price* of a

unit, ...

- (4) In accordance with ~~SUP~~ SUP 16.6.8R, a *depository* should also make a return to the *FSA* on a quarterly basis which summarises the number of instances of incorrect ~~pricing~~ pricing during a particular period.

5 The rectification of pricing breaches

- (1) ... and the *scheme* itself, for instances of incorrect ~~pricing~~ pricing, except if it appears to the *depository* that the breach is of minimal significance.

- (2) A *depository* may consider that the instance of incorrect ~~pricing~~ pricing is of minimal significance if:

...

- (b) the error in ~~pricing~~ pricing of a *unit* is less than 0.5% of the correct *price*.

- (3) In determining (2), if the instance of incorrect ~~pricing~~ pricing is due to one or more factors or exists over a period of time, each *price* should be considered separately.

...

- (5) The *depository* should satisfy itself that any payments required following an instance of incorrect ~~pricing~~ pricing are accurately and promptly calculated and paid.

...

Forward and historic pricing

6.3.9 R ...

- (2) If *forward prices* only are to be used, all ~~deals~~ deals must be at a *forward price*.

- (3) ...

- (b) where the regular *valuation points* are more than one *business day* apart;

- (c) If the request to ~~deal~~ deal reaches the *authorised fund manager* through the post or by any similar form of non-interactive communication;

...

- (6) All *sub-funds* of a *scheme* which is ~~an~~ an *umbrella* must adopt the same pricing basis, ...

...

Publication of prices

6.3.11 R Where the *authorised fund manager* is prepared to ~~deal~~ deal in *units*, or is willing to *issue* or ~~cancel~~ cancel *units*,—under *COLL* 6.2.7, it must make the ~~dealing~~ dealing *prices* public in an appropriate manner.

Manner of price publication

- 6.3.12 G (1) ...
- (c) publication is consistent with the manner and frequency at which the *units* are ~~sold~~ dealt in;
- ...

...

Valuation, pricing and dealing

- 8.5.9 R ...
- (8) ~~Immediately after completing a valuation under (6), the *authorised fund manager* must notify the *depository* of:~~
- (a) ~~the price in the relevant currency of each type of *unit* as determined for the relevant *valuation point*; and~~
- (b) ~~the basis of any adjustment applied in relation to that *valuation point*. [deleted]~~
- (9) The *authorised fund manager* must publish in an appropriate manner the ~~price~~ price of any type of *unit* based on the ~~notification to the *depository* in (8)(a)~~ valuation carried out in accordance with (6).

...

PERIMETER GUIDANCE (PERSONAL PENSION SCHEMES) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of its powers under section 157(1) (Guidance) of the Financial Services and Markets Act 2000 (“the Act”).

Commencement

- B. Annex A of this instrument comes into force on 6 October 2006.
- C. Annex B of this instrument comes into force on 6 April 2007.

Amendments to the Perimeter Guidance manual (PERG)

- D. PERG is amended in accordance with Annex A and B. The general guidance in PERG does not form part of the Handbook.

By order of the Board

28 September 2006

ANNEX A

Amendments to the Perimeter Guidance manual

In this Annex, underlining indicates new text and striking through indicates deleted text, with the exception of Chapter 12 which represents new text.

1.4.2 G Table: list of general guidance to be found in *PERG*.

Chapter:	Applicable to:	About:
...		
<u>PERG 12:</u> <u>Running or advising on personal pension schemes</u>	<u>any person who needs to know whether his activities in relation to establishing, running, advising on or marketing personal pension schemes will amount to regulated activities</u>	<u>the regulated activities that arise in connection with establishing, running, advising on or marketing personal pension schemes and any exclusions that may be relevant</u>

2.5.5 G For *persons* who are *investment firms*, the activities ...

- (1) ...
- (6) groups and joint enterprises (see *PERG 2.9.9G*); ~~and~~
- (7) sale of a *body corporate* (see *PERG 2.9.11G*); ~~and~~
- (8) business angel-led enterprise capital funds (see *PERG 2.9.20G* to *PERG 2.9.22G*).

...

2.8.4C G The exclusions referred to in *PERG 2.8.4G*(1), (2), (5) and (6)(b), (c) and (d) will not be available to *persons* who, in carrying on the activity of *dealing in investments as principal*, are *investment firms* (see *PERG 2.5.4G* (*Investment services and activities*)).

Dealing in investments as agent

2.8.5 G The *regulated activity* of *dealing in investments as agent* applies to ...

...

(3) ...

(i) that involves a *contract of insurance* covering large risks situated outside the *EEA* (see *PERG 2.9.19G*);

(j) on behalf of the participants of a business angel-led enterprise capital fund and that person is a *body corporate* as specified in article 72E(7) of the *Regulated Activities Order*.

...

2.8.5A G The exclusions referred to in *PERG 2.8.5G* (1), (2) and (3)(b), (c), (d) and (j) will not be available to *persons* who, in carrying on the activity of *dealing in investments as agent*, are *investment firms* (see *PERG 2.5.4G* (*Investment services and activities*)).

Arranging deals in investments and arranging regulated mortgage contracts

2.8.6 G The exclusions in relation to the *regulated activities* of *arranging* are ...

...

(13) ...

(k) that involve a *contract of insurance* covering large risks situated outside the *EEA* (see *PERG 2.9.19G*);

(l) for or with a view to transactions to be entered into by or on behalf of the participants of a business angel-led enterprise capital fund and that person is a *body corporate* as specified in article 72E(7) of the *Regulated Activities Order*.

...

2.8.6A G The exclusions referred to in *PERG 2.8.6G*(4) and (13)(c), (d), (e) and (l) will not be available to *persons* who, in carrying on an *arranging* activity, are *investment firms* (see *PERG 2.5.4G* (*Investment services and activities*)).

Managing investments

2.8.7 G The activities of *persons* appointed under a power of attorney are excluded under article 38 of the *Regulated Activities Order*, from the *regulated activity of managing investments*, if specified conditions are satisfied. The exclusion only applies where a *person* is not carrying on *insurance mediation* or *reinsurance mediation* and is subject to further limitations discussed below. In addition, the following exclusions (outlined in *PERG 2.9*) apply in specified circumstances where a *person* manages assets:

- (1) ...
- (4) as an *incoming ECA provider* (see *PERG 2.9.18G*); or
- (5) belonging to the participants of a business angel-led enterprise capital fund and that person is a *body corporate* as specified in article 72E(7) of the *Regulated Activities Order*.

The exclusion in article 38 of the *Regulated Activities Order* and the exclusions referred to in *PERG 2.8.7G* (2), (3) and (5) will not be available to *persons* who, in carrying on the activity of *managing investments*, are *investment firms* (see *PERG 2.5.4G* (Investment services and activities)).

Safeguarding and administering investments

2.8.8 G The exclusions from the *regulated activity of safeguarding and administering investments* are as follows.

- (1) ...
- (4) ...
- (f) as an *incoming ECA provider* (see *PERG 2.9.18G*); ~~and~~
- (g) that are *contracts of insurance* and, in so doing, provides information to *policyholders* or potential *policyholders* on an incidental basis in the course of his carrying on a business or profession not otherwise consisting of *regulated activities* (see *PERG 2.9.19G*(2)); and
- (h) belonging to the participants in a business angel-led enterprise capital fund, but only where such safeguarding and administration is carried on by a *body corporate* as specified in article 72E(7) of the *Regulated Activities Order*.

...

Advising on investments

2.8.12 G ...

(2) The following exclusions apply in specified circumstances where a person is ~~advising on~~ advising on investments:

(a) ...

(f) that are *contracts of insurance* covering large risks situated outside the *EEA* (see *PERG 2.9.19G*);

(g) to be made by or on behalf of the participants of a business angel-led enterprise capital fund, when the advice is given to the participants in that fund and that person is a *body corporate* as specified in article 72E(7) of the *Regulated Activities Order*.

...

2.9.8 G ... in relation to rights under a *contract of insurance* or units in a *collective investment scheme* (or rights to, or interests in, either). The exclusions are also disappplied for persons who, in carrying on the relevant regulated activity, are investment firms (see *PERG 2.5.4G (Investment services and activities)*).

...

2.9.10 G ... *Guidance* on exclusions relevant to *insurance mediation activities* is in *PERG 5 (Insurance mediation activities)*. The exclusions are also disappplied for persons who, in carrying on the relevant regulated activity, are investment firms (see *PERG 2.5.4G (Investment services and activities)*).

...

2.9.12 G ... The exclusions in *PERG 2.9.11G(2), (3) and (4)* are disappplied where they concern a *contract of insurance*. *Guidance* on exclusions relevant to *insurance mediation activities* is in *PERG 5 (Guidance on insurance mediation activities)*. The exclusions are also disappplied for persons who, in carrying on the relevant regulated activity, are investment firms (see *PERG 2.5.4G (Investment services and activities)*).

...

2.9.22 The exclusions for business angel-led enterprise capital funds are also disappplied for persons who, in carrying on the relevant regulated activity, are investment firms (see *PERG 2.5.4G (Investment services and activities)*).

...

10 Guidance on activities related to pension schemes

10.1 Background

Q1. ...

The Q&As complement the general *guidance* on regulated activities in Chapter 2 of our Perimeter Guidance Manual ('PERG'), the general guidance on insurance mediation activities in Chapter 5 of PERG (PERG 5) and the relevant legislation. In addition, Chapter 12 of PERG (PERG 12) has further guidance about the regulated activities relating to the operation and sale of personal pension schemes that come into force on 6 April 2007.

The Q&As that follow are set out in sections:

...

- issues for pension scheme service providers other than trustees (PERG 10.4); and
- the application of EU Directives (PERG 10.4A); and
- issues for employers ...

...

10.3 Pension Scheme Trustees

Q30. ~~[Deleted] As a professional trustee of a pension scheme, am I affected by the implementation of the Insurance Mediation Directive (IMD)?~~

~~No. A pension scheme trustee may perform tasks on behalf of the other trustees (such as signing proposal forms or giving dealing instructions to insurers or brokers or notifying claims on the death of a scheme member). But he will not be providing an insurance mediation service to them. This is because, under the policy, he will share equal rights and equal responsibility with his co-trustees and so may be regarded as acting solely in the capacity of policyholder rather than intermediary. Also, the pension scheme trustee will not be providing an insurance mediation service on behalf of the members as the members will not be policyholders.~~

10.4A The application of EU Directives

Q41A. Are pension scheme trustees and administration service providers likely to be subject to authorisation under the Investment Services Directive or subject to the Capital Adequacy Directive?

This is possible, but in many instances it is likely that pension scheme

trustees and service providers will either not be providing an investment service for the purposes of, or otherwise be exempt under article 2.2 of, the *Investment Services Directive*. The following table expands on this in broad terms.

As for the *Capital Adequacy Directive*, this will only apply to persons who are *ISD investment firms* or *BCD credit institutions*.

<u>Activity</u>	<u>Potential ISD investment service?</u>	<u>Potential application of ISD or of an ISD article 2.2 exemption?</u>
<u>Dealing in scheme assets as trustee</u>	<u>Dealing in investments for own account</u>	<p><u>ISD will not apply provided the trustees are either not acting by way of business or otherwise are not holding themselves out as persons who provide a dealing service to third parties. This is because the trustees would not be regarded as providing an investment service to third parties on a professional basis</u></p> <p><u>Where the pension scheme is a collective investment undertaking, the trustee should be exempt under article 2.2(h) as depositary of the scheme</u></p>
<u>Issuing rights under a stakeholder pension scheme to members</u>	<u>None – the rights are not ISD investments</u>	<u>ISD does not apply</u>
<u>Pension scheme service provider:</u> <u>a. dealing in scheme assets as agent for the trustees</u> <u>b. arranging deals in scheme assets</u>	<u>a. Executing orders other than for own account</u> <u>b. Receiving and transmitting orders</u>	<p><u>ISD will potentially apply where the investments are ISD financial instruments (such as shares, debt securities or units)</u></p> <p><u>However, many pension schemes will be employee participation schemes, the administration of which is exempt under article 2.2(d)</u></p> <p><u>Where the service provider is providing services exclusively for the benefit of a corporate trustee who is a member of its group, the exemption in article 2.2(b)</u></p>

		<p><u>should apply</u></p> <p><u>Where the activity is receiving and transmitting orders, the intermediaries exemption in article 2.2(g) may apply</u></p> <p><u>Where the pension scheme is a collective investment undertaking, the scheme administrator may be exempt under article 2.2(h) as manager of the scheme</u></p>
<u>Managing the assets of the scheme</u>	<u>Investment management</u>	<p><u>ISD will not apply to trustees provided they are either not acting by way of business or otherwise are not holding themselves out as, or additionally remunerated for, providing investment management services. This is because the trustees would not be regarded as providing an investment service to third parties on a professional basis</u></p> <p><u>Also, where the pension scheme is a collective investment undertaking, the scheme administrator may, and the trustee will, be exempt under article 2.2(h) in respect of anything they do in the capacity of manager or depositary of the scheme respectively</u></p>
<u>Safeguarding and administering the scheme assets</u>	<u>None</u>	<u>Safekeeping and administration of investments is an ISD non-core service</u>
<u>Establishing, operating or winding up a stakeholder pension scheme</u>	<u>None</u>	<u>ISD does not apply</u>
<u>Advising trustees or members or prospective members</u>	<u>Investment advice</u>	<u>Investment advice is an ISD non-core service</u>

Q41B. Will the implementation of the Markets in Financial Instruments Directive be likely to affect the current position of pension scheme trustees and administration service providers under the Investment Services Directive and the Capital Adequacy Directive?

This is unlikely to be the case. The position under the Markets in Financial Instruments Directive should not be materially different to the position under the Investment Services Directive (or, as a result, the Capital Adequacy Directive) as regards the usual activities of pension scheme trustees and administration service providers. The one possible exception to this concerns investment advice which will become an investment service for the first time under the Markets in Financial Instruments Directive. This will not apply to advice given to scheme members about their rights under the scheme as those rights will not be financial instruments for the purposes of the Directive. But the Directive will apply to advice in the form of a recommendation to scheme trustees or members about their buying or selling a particular financial instrument for the purposes of the scheme. Financial instruments will include shares, debt securities and units in a collective investment scheme but not life policies or deposits. This will be subject to the possible availability of an exemption in article 2.1 of the Directive.

Draft guidance on the changes in regulatory scope that will be caused by the implementation of the Markets in Financial Instruments Directive and its effect on the application of the Capital Adequacy Directive was issued as Annex 5 to Consultation Paper 06/9 (Organisation systems and controls) and will, in due course, form Chapter 13 to PERG.

Q41C. As a professional trustee of a pension scheme, am I affected by the implementation of the Insurance Mediation Directive?

No. A pension scheme trustee may perform tasks on behalf of the other trustees (such as signing proposal forms or giving dealing instructions to insurers or brokers or notifying claims on the death of a scheme member). But he will not be providing an insurance mediation service to them. This is because, under the policy, he will share equal rights and equal responsibility with his co-trustees and so may be regarded as acting solely in the capacity of policyholder rather than intermediary. Also, the pension scheme trustee will not be providing an insurance mediation service on behalf of the members as the members will not be policyholders.

Q41D. As a pension scheme administration service provider, am I affected by the implementation of the Insurance Mediation Directive?

You may be. Detailed guidance about the potential effect of the *Insurance Mediation Directive* on the normal activities of administration service providers is in Q31 to Q41 and the table in Annex 3.

New text to be added as Chapter 12

12 Guidance for persons running or advising on personal pension schemes

12.1 Background

Q1. What is the purpose of these questions and answers ('Q&As') and who should be reading them?

These Q&As are aimed at, and should be read by, *persons* involved in the running of a *personal pension scheme* and those who give advice about or provide services to such schemes. They are intended to help such persons understand whether they will be carrying on a *regulated activity* and need *authorisation* or exemption under section 19 of the Financial Services and Markets Act 2000 following the changes to pension legislation that are proposed to take effect on 6 April 2007. Under the proposed changes, establishing, operating or winding up a personal pension scheme will become a *regulated activity* and rights under a personal pension scheme will become a *specified investment*. The Q&As complement the general *guidance* on regulated activities which is in Chapter 2 of our Perimeter Guidance manual ('PERG') and the general guidance about pensions-related activities which is in Chapter 10 of PERG.

The Q&As are set out under five sections:

- the scope of the proposed new regulated activity of *establishing, operating or winding up a personal pension scheme* (PERG 12.2);
- the implications of the proposed new specified investment of rights under a *personal pension scheme* (PERG 12.3);
- the application of EU Directives (PERG 12.4)
- *financial promotion* issues (PERG 12.5); and
- practical transitional considerations (PERG 12.6).

12.2 Establishing, operating or winding up a personal pension scheme

Q2. What is a personal pension scheme for the purposes of this regulated activity?

The term is defined in the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 (the *Regulated Activities Order*) as any scheme other than an *occupational pension scheme* (OPS) or a *stakeholder pension scheme* that is to provide benefits for people:

- (1) on retirement; or
- (2) on reaching a particular age; or
- (3) on termination of service in an employment.

Although the definition does not expressly say so, it is, in the FSA's view, clear from the context in which the term is applied, that such a scheme will be one that is intended to be registered with The Pensions Regulator and to be eligible for tax relief relating to pension schemes.

This will include *self-invested personal pension schemes* ('SIPPs') as well as personal pensions provided to consumers by product companies such as insurers, unit trust managers or deposit takers (including free-standing voluntary contribution schemes).

To determine whether a pension scheme is a personal pension scheme it is first necessary to determine whether it is an OPS. An OPS is defined in the Regulated Activities Order by reference to an OPS as defined in section 1 of the Pensions Schemes Act 1993 but without including paragraph (b) of that section. This means that a pension scheme is an OPS if, broadly speaking, it is a pension scheme:

- that is established:
 - for the purpose of providing benefits to, or in respect of, people with service in employments of a description; or
 - for that purpose and also for the purpose of providing benefits to, or in respect of, other people,

by persons who are, or who include, employees of that kind or their employers, or persons representing the interests of either, at the time the scheme is established; or

- that is prescribed or is of a prescribed description (such as a scheme that is prescribed under the Pension Schemes (Categories) Regulations 2005 (SI 2005/2401)).

The effect of omitting paragraph (b) from the Pensions Schemes Act definition of an OPS is that a pension scheme that would otherwise be an OPS but for the fact that its main administration takes place in another *EEA State* will be an OPS for the purposes of the Regulated Activities Order and this guidance.

Q3. What is involved in establishing a personal pension scheme?

The establisher of a *personal pension scheme* is the *person* responsible for putting in place the arrangements founding the scheme. With a trust-based scheme, this will usually be the person

who executes the trust as provider. In a scheme established by deed poll, it will be the person who enters into the deed poll. There will usually only be one person who establishes the scheme. Any professional firms that they may employ to act as their agent (such as solicitors) would not be establishing the scheme. The establisher may also be the operator but need not be. An employer will not be establishing a personal pension scheme (such as a *group personal pension scheme*) purely as a result of them having chosen such a scheme to offer to their employees.

The activity of establishing a personal pension scheme ceases once the scheme is established. This means that persons who have established schemes prior to 6 April 2007 will not require authorisation for establishing a personal pension scheme unless they intend to establish a new scheme after that date.

Q4. What is involved in operating a personal pension scheme?

The 'operator' is the *person* responsible to the members for managing and administering the assets and income of, and the benefits payable under, the scheme in accordance with relevant pensions and tax legislation, the scheme's constitution and the *regulatory system*. In this respect, the responsibilities that are placed under Part 4 of the Finance Act 2004 on a pension scheme administrator (as defined in section 270(1) of that Act) will mean that he is likely to be the operator of the scheme. In trust-based schemes, the trustees may act as scheme administrator or there may be a separate person who acts in that capacity. Where there are separate trustees, it may be the case that they are operating the scheme jointly with the scheme administrator by virtue of the responsibilities they assume under the trust deed for the management and administration of the scheme assets. However, in situations where the trustees' role is merely to act as a bare trustee holding the scheme assets, it is the scheme administrator who is likely to be the sole operator of the scheme. The scheme may be established by an *authorised person* who acts as a provider of investment products or services to the scheme. This does not make that person the operator of the scheme if, as a matter of fact, he has appointed another person to be responsible to the members for carrying out all the operator's functions as scheme administrator or as trustee, or both as the case may be. But a person to whom activities may be outsourced by the operator will not, thereby, become an operator of the scheme (see further guidance in Q6).

The fact that a member of a SIPP has the right to direct which investments are to be held for his benefit does not mean that he is to be regarded as operating the scheme as a result of exercising that right.

Q5. What is involved in winding up a personal pension scheme?

The *person* who winds-up a *personal pension scheme* will be the person who is responsible for putting in place the arrangements for bringing the scheme to an end in a way that complies with the relevant provisions of the instrument that established the scheme and any relevant rules under pensions or tax legislation. This will, more often than not, be the operator of the scheme.

Q6. What is my position as an operator of a personal pension scheme if I delegate day-to-day functions such as administration of the scheme or the management or custody of the scheme assets to another person?

As explained in Q4, the operator of a *personal pension scheme* is the person who is responsible to the members of the scheme for ensuring that the scheme is operated in accordance with relevant pensions and tax legislation, the scheme's constitution and the *regulatory system*. Provided he remains responsible to the members for such matters, he will remain the operator even though he may delegate or out-source the day-to-day carrying out of his functions as operator to another person. That other person will not become an operator of the scheme purely as a result of carrying out such functions on behalf of the operator. However, he may be carrying on other regulated activities in performing his delegated or out-sourced tasks (such as *arranging* or *managing investments*) in which case he will be subject to regulation for those activities.

Chapter 10.4 of PERG has general guidance about the circumstances in which persons who administer pension schemes on behalf of the operator or trustees may be carrying on a regulated activity including an *insurance mediation activity*.

Q7. As the operator of a personal pension scheme, is my position affected by whether the underlying property of the scheme is comprised of physical assets such as commercial property rather than investments such as shares or life policies?

No. It is the establishment, operation and winding up of the scheme that is regulated under the new activity – regardless of the type of assets the scheme will hold.

Q8. Will I need to be authorised for managing the assets of a personal pension scheme which is invested solely in physical assets such as commercial property on behalf of the operator?

No. Such assets will not become *designated investments*. However, the operator of the scheme will remain responsible for the management and administration of the assets as these are part of the regulated activity of operating the scheme.

Q9. Will I satisfy the 'by-way-of-business' test that is necessary for authorisation to be required?

The application of the by-way-of-business test to any particular *person* will always depend on that person's individual circumstances. A number of factors need to be taken into account in determining whether the test is met. These include:

- the degree of continuity;
- the existence of a commercial element;
- the scale of the activity;

- the proportion which the activity bears to other activities carried on by the same person but which are not regulated; and
- the nature of the particular *regulated activity* that is carried on.

In very broad terms, it is likely that any corporate body (including corporate trustees) that operates a *personal pension scheme* would be carrying on that activity by way of business. Chapter 10.5 of PERG has specific guidance about the limited circumstances in which employers may be likely to satisfy the by-way-of-business test when advising on or arranging pension benefits for their employees.

Q10. Can there be more than one person who operates a personal pension scheme?

Yes. For example, the *person* establishing a scheme may appoint a trustee and an administrator to operate the scheme jointly (see Q4). In this case, both the trustee and the administrator will need to be *authorised*. Or there could be two or more trustees who are jointly responsible for operating the scheme, in which case each will need to be *authorised* if they are doing so by way of business.

Q11. I am a trustee operating a self-invested personal pension scheme ('SIPP'). Can I continue to rely on the various exclusions available to trustees for other regulated activities such as dealing in investments, managing investments and safeguarding and administering investments?

Yes, you may continue to rely on existing exclusions for those activities. No changes are being made to those exclusions. Guidance on the exclusions is given in Chapter 10 (Q23) of PERG.

Q12. Do the same principles apply to establishing, operating or winding up a stakeholder pension scheme?

Yes. In principle, the answers given to other questions apply equally to *stakeholder pension schemes*. Establishing, operating and winding up a stakeholder pension scheme are already regulated activities. Guidance on these activities is given in Chapter 10 (Q24 to Q28) of PERG.

Q13. Does the regulated activity of establishing, operating or winding-up a personal pension scheme have any effect on occupational pension schemes?

No. But the establishment, operation and winding up of *occupational pension schemes* that are *stakeholder pension schemes* are regulated activities in their own right.

Q14. I intend to operate a personal pension scheme under which members will acquire benefits derived from the management of a pool of assets. Will the scheme become a collective investment scheme?

No. *Personal pension schemes* (along with *stakeholder pension schemes*) are specifically exempted from being *collective investment schemes*. However, where a personal pension scheme invests in a pooled investment vehicle of some kind, that vehicle may itself be a collective investment scheme unless another exemption applies to it.

12.3 Rights under a personal pension scheme

Q15. I am a financial intermediary dealing with pensions. Am I affected by the fact that rights under a personal pension scheme are a specified investment?

Yes. The *specified investment* of rights under a *personal pension scheme* is a *security*. This means that the following regulated activities apply in relation to such rights:

- *dealing*;
- *arranging*;
- *managing investments*;
- *safeguarding and administering investments*; and
- *advising on investments*.

Q16. What are the rights under a personal pension scheme that are specified investments and securities?

These are all the rights that membership of the scheme confers on a member. This may vary (for example, where the scheme is a SIPP) but is likely to include some or all of the following rights:

- to make payments to the scheme;
- to withdraw sums from the scheme in certain circumstances;
- to transfer value to another pension scheme;
- to receive benefits arising from the capital value of or income derived from particular assets or from the performance of a unitised fund;
- to place certain types of property (for example, commercial property) in the scheme;
- to instruct the operator which assets to buy or sell for the purposes of the scheme;
- to instruct the operator to switch funds from one managed or unitised fund to another;

- to appoint a *person* to manage the assets or to give instructions to the operator about which assets to buy or sell on behalf of the member; and
- to instruct the operator to borrow money to purchase assets (for example, to take out a mortgage on a commercial property).

Q17. Regulated activities such as dealing and arranging deals in, and advising on, investments relate to transactions involving the buying or selling of certain specified investments including securities. When will rights under a personal pension scheme be bought or sold so as to trigger these regulated activities?

The terms ‘bought’ and ‘sold’ are given a wide meaning and include any acquisition or disposal for valuable consideration. The term disposal is also given a wide meaning and, in relation to an investment comprising rights under a contract, includes surrendering, assigning or converting such rights. Taking these facts into account, the circumstances in which rights under a *personal pension scheme* may be bought or sold include:

- when the member first joins the scheme and acquires all the rights that the scheme provides to its members (since he has bought those rights);
- when the member makes regular or occasional additional payments to the scheme (since he has bought further rights being rights to an increased entitlement to benefits);
- when income withdrawals are made or benefits are transferred to another scheme or benefits are released to permit the purchase of an annuity (since the rights giving entitlement to benefits represented by the sums moved out of the scheme are surrendered and so sold);
- where the member or his agent instructs the operator to buy assets of any kind either from existing cash holdings or from the proceeds of selling existing assets (since, in switching the assets, the member is converting his rights from an entitlement to benefits from the performance of certain assets to an entitlement to benefits from the performance of other assets – the former rights are sold and the latter are bought); and
- where the member exercises his right to switch between managed or unitised funds (since, in switching funds, the member is converting his rights from an entitlement to benefits from the performance of one fund to an entitlement to benefits from the performance of another fund – again, the former rights are sold and the latter are bought).

The operator of a personal pension scheme will also be selling rights when he grants rights to a member.

Q18. The members of the personal pension scheme that I operate acquire rights to or interests in specified investments such as units or life policies. Such rights or interests are usually specified investments in their own right and arranging or advising on them is a regulated activity. Does the fact that rights under the personal pension scheme are themselves a specified investment affect this?

In certain circumstances this may be the case, but, in practice, the effect will be largely academic. Where the rights or interests would form part of the rights under a *personal pension scheme*, they will fall under that category of specified investment and will not be a specified investment in their own right. But where, for example, advice is being given on the merits of

acquiring rights to or interests in specified investments for the purpose of their being held under a personal pension scheme but not any one particular scheme, the rights or interests will remain specified investments in their own right. This is because there are no rights under a personal pension scheme at that stage.

This will only affect the rights that the member obtains. It does not alter the nature of any asset that is held by or on behalf of the operator for the purpose of providing benefits to the scheme member. So, any person who arranges for the scheme operator (or trustee as the case may be) to acquire assets is likely to be carrying on the regulated activity of *arranging* where those assets are *securities* or *relevant investments* but not where they involve other property such as real estate. This contrasts with a person who is arranging for scheme members to acquire rights under the scheme which will be a regulated activity regardless of the nature of the underlying property.

Q19. For advice to be regulated, it needs to relate to the merits of buying or selling a particular investment. When do rights under a personal pension scheme become ‘particular’ rights and so particular investments?

It is the rights under a *personal pension scheme* that must be a particular investment. This means that the rights must arise under a particular personal pension scheme. So, provided the rights on which advice is given relate to rights conferred, or to be conferred, by a particular scheme, they will be particular rights and advice on the merits of buying or selling them is likely to be regulated. This is the case, whatever the nature of the rights or of the underlying assets or prospective underlying assets. Conversely, if there is no particular personal pension scheme, there cannot be any particular rights.

As for advice to a prospective member on the merits of buying particular assets at a stage where there are no particular rights under a personal pension scheme, such advice is likely to be regulated where the assets are *securities* or *relevant investments* (as being advice on the merits of buying rights to or interests in those investments). But such advice will not be regulated where the assets are not investments of that kind (such as commercial property).

A person may be asked to advise a client on the merits of his acquiring a commercial property for holding it under a SIPP in circumstances where the client has an existing SIPP of which the adviser may or may not be aware. Provided the adviser has not been asked to, and it is reasonable for him to believe that he would not be expected to, advise his client on the merits of his holding the property under the particular SIPP, the advice may remain generic as respects rights under a personal pension scheme and so would not be subject to regulation.

Q20. Can you provide examples of when the regulated activities of advising on and arranging deals in investments are likely to arise in typical situations involving rights under a personal pension scheme?

Yes. The following table indicates whether certain typical scenarios are likely to involve regulated advising or arranging activities.

Scenario – advice given to a member or prospective member of a personal pension	Is the advice likely to be regulated (subject to any exclusion applying)?	Is arranging the transaction to which the advice relates likely to be regulated
---------------------------------------------------------------------------------	---------------------------------------------------------------------------	---------------------------------------------------------------------------------

scheme on the merits of ...		(subject to any exclusion applying)?
his joining a <i>personal pension scheme</i> (PPS) either generally or of a particular kind (such as a <i>self-invested personal pension scheme</i> (SIPP))	No – this would be generic advice	N/A
his joining a particular PPS that is already established	Yes – the rights are particular rights as the PPS already exists and offers specific rights	Yes – rights are being bought
establishing a PPS (typically a SIPP) intended solely for the prospective member's benefit	Yes – because the advice will concern establishing a particular scheme which will offer the investor particular rights (such as the right to make payments and direct investment)	Yes – rights are being bought
acquiring, for the purpose of holding under a PPS (typically a SIPP), but not any particular PPS, physical property of a particular description (such as commercial property) or particular physical property	No – there are no particular rights under a PPS at that stage, so the advice is generic as respects the acquiring of such rights	No
acquiring, for the purpose of holding under a PPS (typically a SIPP), but not any particular PPS, <i>securities</i> or <i>relevant investments</i> of a particular description or particular investments of that kind	<p>Yes, where the advice relates to acquiring particular investments of that kind – whilst the rights under the PPS may remain generic, the advice relates to acquiring rights to or interests in particular securities or relevant investments. Those rights or interests are themselves a particular investment</p> <p>No, where the advice only relates to acquiring a</p>	Yes – rights to or interests in specified investments are being bought

	particular type of investment – both the rights under the PPS and the investment remain generic	
acquiring a particular property for the purpose of holding it in a particular SIPP but where the advice to be given is limited to the tax or legal consequences of doing so	No. Although the advice relates to the merits of buying particular rights, provided the advice may reasonably be regarded as a necessary part of the service of providing tax or legal advice it should be excluded from the scope of regulation (see Q21)	No, provided the arranging is undertaken as a necessary part of providing tax or legal services. This may be more likely to arise in practice where, for example, a legal adviser goes on to arrange the conveyancing of the property as a necessary part of legal services. There may be limited circumstances in which it would be necessary for a tax adviser to go on to arrange for the client to acquire the rights under the PPS having given tax advice on the merits of doing so.
making additional payments into a particular PPS, either for investment in line with pre-existing arrangements or in accordance with instructions to be given to the operator, or of not making such additional payments	Yes – the advice relates to the merits of acquiring further particular rights	Yes – rights are to be bought
appointing a fund manager to manage the PPS assets on behalf of the member(s) or changing an existing fund manager	No – the advice is about the merits of exercising rights but not for the purpose of buying or selling particular investments – and no rights are being bought or sold	No, where the assets do not include <i>securities</i> or <i>relevant investments</i> Possibly, where the assets do include investments of that kind (because the arrangements are made with a view to the fund

		manager buying and selling, and possibly safeguarding and administering, investments)
changing the investment objectives with which the fund manager appointed to manage the PPS assets on behalf of the member(s) is instructed to comply	No – the advice is about the merits of exercising rights but not for the purpose of buying or selling particular specified investments – and no rights are being bought or sold	No
<p>placing particular assets or assets of a particular description, into a particular PPS, or of instructing the operator to purchase such assets, either:</p> <ul style="list-style-type: none"> • by means of funds to be made available by selling existing assets or of existing cash holdings within the PPS; or • from new funds to be provided by the member 	<p>Yes – the advice relates to either:</p> <ul style="list-style-type: none"> • disposing of particular rights and acquiring new particular rights; or • acquiring new particular rights 	Yes – rights are being bought or sold or both
instructing the operator to dispose of particular assets or assets of a particular description, to raise funds for purchasing other assets of any kind or to form a cash holding	Yes – the advice relates to disposing of particular rights as well as acquiring new particular rights	Yes – rights are being bought and sold
instructing the operator to realise an investment in a managed or unitised fund and re-invest the sums in another such fund	Yes – the advice relates to disposing of particular rights and acquiring new particular rights	Yes – rights are being bought and sold
withdrawing cash sums (income withdrawal)	Yes – the advice relates to disposing of particular	Yes – rights are being sold

	rights	
transferring existing assets of any kind or their cash value to another PPS	<p>Yes – the advice relates to disposing of particular rights</p> <p>There may also be regulated advice on the merits of acquiring rights under the new PPS</p>	Yes – rights are being sold and rights in the new PPS are being bought
instructing the operator/trustee to obtain a mortgage to purchase a particular commercial property to be held under the PPS	<p>Yes – the advice relates to acquiring new rights under the PPS in the form of the borrowed money or the property to be acquired with it</p> <p>But the advice given to the member on the mortgage itself is not regulated as the mortgage would not be a <i>regulated mortgage contract</i> (because, under tax rules, a member of a PPS cannot hold property under the scheme if he intends to make personal use of it).</p>	<p>Yes – rights are being bought</p> <p>Arranging for a personal pension scheme trustee to take out a mortgage will not be regulated as it will not be a <i>regulated mortgage contract</i></p>

Q21. What exclusions may be available for advising on investments in connection with acquiring or disposing of rights under a personal pension scheme?

The usual exclusions for *advising on investments* will potentially be available. In particular, article 67 of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 (the *Regulated Activities Order*):

- may permit firms such as solicitors or licensed conveyancers to advise on the implications of transferring title to real property to the operator of a particular *personal pension scheme*;
- may permit tax advisers or solicitors to advise their clients on the tax or legal consequences of holding property of any description, or of acquiring or exercising rights, under a particular personal pension scheme; and
- may permit firms such as surveyors or estate agents to advise on the merits of acquiring commercial property which is intended to be held under a particular personal pension scheme.

This is, in each case, so long as it may reasonably be regarded as necessary for them to provide the advice in order to provide their professional services and they are not remunerated for *advising on investments* separately from any remuneration they receive for providing their professional services.

If the rights relate to a contract of insurance, the adviser can still make use of the exclusion so long as he is not carrying on an activity that requires him to be regulated under the *Insurance Mediation Directive*. And that is only likely to be the case if the advice relates to the merits of his client directly acquiring rights under a contract of insurance (for example, because he is also a trustee of the scheme). Advice about acquiring a beneficial interest in a contract of insurance held under trust will not be subject to regulation under the Directive.

Q22. What exclusions may be available for arranging deals in investments in connection with acquiring or disposing of rights under a personal pension scheme?

The usual exclusions for *arranging* will potentially be available. The following exclusions may be particularly relevant.

Article 29 of the *Regulated Activities Order* will apply where the arranging is done with or through an *authorised person* and, broadly speaking, the arranger:

- is an *unauthorised person*;
- does not advise on the merits of the member or prospective member entering into the transaction; and
- is not rewarded other than by their client (the member).

This exclusion should mean that many firms providing professional services to members of the scheme (such as estate agents, surveyors, property developers and experts on valuing or appraising the particular type of asset that is to be acquired for the personal pension scheme) would be able to arrange for the property to be held under the scheme without needing *authorisation* or exemption. This is because the operator of the scheme will be an *authorised person* and the firm is likely to be paid by its client and not by the scheme operator.

Article 29 does not apply where the arrangements relate to a contract of insurance. But this will only affect the availability of the exclusion as it applies to personal pension schemes where either:

- the member is himself directly acquiring rights under the contract of insurance (for example, because the member is also a trustee of the scheme); or
- the rights which the member is acquiring (or disposing of) relate directly to rights under a contract of insurance that is or is to be held by or on behalf of the operator for the purpose of providing benefits to that member.

Article 33 of the *Regulated Activities Order* will allow *persons* such as estate agents, surveyors or property developers (whether or not they are *authorised*) to refer clients to an *authorised* or

exempt person for independent advice on the merits of their placing a commercial property in a particular personal pension scheme. Article 33 may also apply where a person arranges for an independent fund manager to be appointed to manage the assets of a personal pension scheme or for members or potential members to obtain independent advice in relation to their rights under the scheme. As with article 29, the article 33 exclusion does not apply where the introductions relate to a contract of insurance.

Article 67 of the *Regulated Activities Order* may permit firms such as solicitors and licensed conveyancers to arrange for the title to property to be transferred to the operator of the personal pension scheme. The exclusion could also apply to firms such as surveyors or estate agents arranging the transfer of title to commercial property. This is so long as it is necessary for them to arrange the transaction in order to provide their professional services and they are not separately remunerated for doing it.

Q23. I am an exempt professional firm. Will I be able to advise on, and arrange deals in, rights under personal pension schemes without needing FSA authorisation?

Rights under a personal pension scheme will be securities. This means that, subject to your being able to satisfy the general requirements of Part XX of the FSMA:

- you will be limited in your ability to give advice without authorisation; but
- you will be able to arrange deals in such rights without authorisation.

The limitation on your being able to give advice, as an exempt professional firm, to a member of a personal pension scheme will be, in broad terms, that:

- the advice must not consist of a recommendation to acquire or dispose of rights (unless it endorses a corresponding recommendation that has been given to the member by a suitably authorised or exempt person); and
- if, in addition, the advice relates to a contract of insurance, you must be a firm that is included in the FSA Register of Exempt Professional Firms.

12.4 Application of EU Directives

Q24. Do the changes in the scope of regulated activities concerning pension schemes that take effect on 6 April 2007 have any implications for pension scheme trustees or service providers under the Investment Services Directive (or, in future, the Markets in Financial Instruments Directive) or the Insurance Mediation Directive?

In general terms, if a pension scheme trustee or service provider does not need to be authorised under the *Investment Services Directive* prior to 6 April 2007 he should not need to be authorised for carrying on the same activities after that date. This is because rights under a personal pension scheme are not a financial instrument under the Directive and establishing, operating or winding up a personal pension scheme is not an investment service under the Directive. This will also be the case under the Markets in Financial Instruments Directive when it replaces the Investment Services Directive later in 2007. But this is subject to the fact that investment advice will become an investment service for the first time. Guidance on the application of the Investment Services Directive to the activities of pension scheme trustees and service providers generally is

in Chapter 10.4A of PERG. Draft guidance on the changes in regulatory scope that will be caused by the implementation of the Markets in Financial Instruments Directive was issued as Annex 5 to Consultation Paper 06/9 (Organisation systems and controls) and will form Chapter 13 to PERG.

Similarly, a pension scheme trustee or service provider who is not subject to regulation under the *Insurance Mediation Directive* prior to 6 April 2007 will not become subject to regulation purely as result of the changes in regulatory scope that take effect on 6 April 2007. Detailed guidance on the application of that Directive to pension scheme trustees and service providers is in Chapters 10.4 and 10.4A of PERG.

12.5 Financial promotion issues

Q25. Will the financial promotion restriction in section 21 of the Financial Services and Markets Act 2000 apply to promotions that invite or induce persons to become members of a personal pension scheme?

Yes, because they will be inviting or inducing persons to buy an investment in the form of the rights under the scheme that they would acquire by becoming a member.

Q26. Will the financial promotion restriction apply to a promotion of commercial property that is held out as being suitable for holding under a SIPP (but not any particular SIPP)?

Yes, if the promotion is an inducement to acquire the right to receive benefits derived from the performance of that property when it is held under a *personal pension scheme*. However, provided the promotion does not identify any particular scheme or scheme provider or person who can arrange or advise on the placing of the property into the scheme, the promotion should be exempt as a generic promotion under article 17 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the *Financial Promotion Order*).

Q27. Will any of the other exemptions in the Financial Promotion Order apply to promotions of a personal pension scheme?

Yes. All the usual exemptions that apply to the promotion of *securities* generally will apply. This includes the exemption for promotions made by an employer to their employees about a *group personal pension scheme* to which they are to contribute (article 72 of the *Financial Promotion Order*).

Q28. Can I find out more about the financial promotion restriction?

Yes. Chapter 8 of PERG has detailed guidance about the scope of the financial promotion restriction and the exemptions that are available.

12.6 Practical transitional considerations

Q29. I am currently operating a SIPP but am not an authorised person. Do I have to become authorised by 6 April 2007 or will there be any transitional arrangements to allow for the possibility that I do not obtain authorisation by that date?

Transitional arrangements have been put in place. The broad effect of these arrangements is that you will be able to benefit from interim authorisation as respects any of the new regulated activities that relate to personal pension schemes pending the final determination of your application. This is provided:

- you were carrying on the regulated activities, for which you are seeking permission, on or before 1 October 2006; and
- your application for authorisation was submitted on or before 23 March 2007.

Q30. I am already authorised. Do I need to seek a variation of permission to carry on any of the new regulated activities?

This depends on what activities are covered by your existing *permission*. If, immediately prior to 6 April 2007, your permission covers any regulated activity that relates to stakeholder pension schemes, you will automatically be granted permission to carry on each such regulated activity in relation to personal pension schemes. This is provided you have not exercised your right to notify the FSA by 23 March 2007 that you do not wish your permission to be extended in this way.

If your existing permission does not cover a regulated activity relating to stakeholder pension schemes, you will need to apply for a variation of permission if you wish to carry on any of the new regulated activities. As with applications for authorisation (see Q29), you will benefit from interim permission provided:

- you were carrying on the regulated activities, for which you are seeking to vary your permission, on or before 1 October 2006; and
- your application to vary your permission was submitted on or before 23 March 2007.

Q31. Can I avoid the need to be authorised by becoming an appointed representative of an authorised person?

You cannot be an *appointed representative* for *establishing, operating or winding up a personal pension scheme*. But you can be an appointed representative for activities such as advising on or arranging deals in rights under a *personal pension scheme*.

If you are an appointed representative prior to 6 April 2007 and you intend to carry on any of the new regulated activities, you will need to consider whether your existing agreement with your principal will cover those activities or whether it will need to be amended to do so. You may be an appointed representative of a life office for the purpose of advising on or arranging deals in its investment products and also undertake unregulated activities in relation to personal pension schemes offered by third parties. If those unregulated activities include activities that will become regulated from 6 April 2007, you will need either to become the appointed representative of another appropriately authorised firm or to seek authorisation yourself. This is because an appointed representative of a life office can only undertake regulated activities that arise directly from the life office's insurance business.

Remember also that a person cannot generally be authorised and exempt as an appointed representative at the same time. However, this rule is waived if you obtain interim authorisation to carry on the new regulated activities and wish, pending determination of your application for authorisation, to continue to conduct existing regulated activities as an appointed representative.

ANNEX B

Amendments to the Perimeter Guidance manual

In this Annex, underlining indicates new text and striking through indicates deleted text.

Rights under a ~~stakeholder~~ pension scheme

2.6.19 G ~~A stakeholder pension scheme is defined in section 1 of the Welfare Reform and Pensions Act 1999. Regulations made under that section set out detailed rules under which such schemes will operate (see the Stakeholder Pension Scheme Regulations 2000). Schemes must be registered with The Pensions Regulator and approved by the Board of HM Revenue and Customs. Rights under such schemes are specified investments for the purposes of the Regulated Activities Order. There are no exclusions in the Order.~~

Two types of investment are specified here:

- (1) rights under a stakeholder pension scheme; and
- (2) rights under a personal pension scheme.

2.6.19A G A stakeholder pension scheme is defined in section 1 of the Welfare Reform and Pensions Act 1999. Regulations made under that section set out detailed rules under which such schemes will operate (see the Stakeholder Pension Scheme Regulations 2000). Schemes must be registered with The Pensions Regulator.

2.6.19B G A personal pension scheme is, broadly speaking, a pension scheme which is not an occupational pension scheme or a stakeholder pension scheme. That is, a scheme or arrangement that is comprised in one or more instruments or agreements, having or capable of having effect so as to provide benefits to or in respect of people:

- (1) on retirement; or
- (2) on having reached a particular age; or
- (3) on termination of service in an employment.

2.6.19C G Rights under stakeholder pension schemes and personal pension schemes are specified investments for the purposes of the Regulated Activities Order.

There are no exclusions in the Order.

...

Establishing etc ~~stakeholder~~ pension schemes

- 2.7.14 G The *regulated activities* carried on in relation to ~~stakeholder pension schemes~~ pension schemes are the ~~establishment~~ establishing, operating or winding up of a stakeholder pension scheme and establishing, operating or winding up a personal pension scheme. ~~Managers of such schemes will require authorisation as they will be operating the schemes.~~ The identity of the operator of such a pension scheme depends on the facts. However, the scheme administrator will usually be the operator of the scheme either on its own or jointly with the scheme trustees. More detailed guidance on the scope of this activity is in PERG 12 (Q4).

...

- 2.7.21 Gcarrying on any of the activities that are regulated in relation to *collective investment schemes*, ~~and stakeholder pension schemes~~ or personal pension schemes. A person will need to make sure that...

...

Establishing etc ~~stakeholder~~ pension schemes

- 2.8.11 G The only exclusion from the range of activities specified as being regulated in relation to *stakeholder pension schemes* and personal pension schemes relates to *incoming ECA providers* (see PERG 2.9.18G).

...

- 2.10.14 G The *regulated activities* that may be carried on in this way are restricted by an Order made by the Treasury under section 327(6) of the *Act* (Exemption from the general prohibition) (the *Non-Exempt Activities Order*). Accordingly, under that section, a person may not by way of business carry on any of the following activities without *authorisation*:

(1) ...

(5) establishing, operating or winding up a stakeholder pension scheme or a personal pension scheme;

...

(9) Rights under a stakeholder pension scheme or a personal pension scheme.

...

10.1 Q1. ...

The Q&As are primarily concerned with identifying the regulated activities (such as dealing or arranging deals in investments, managing investments or advising on investments) that may be carried on by persons (including trustees) who are involved with *occupational pension schemes* and ~~personal pension schemes~~ *personal pension schemes*. They are also concerned, but only in relation to *personal pension schemes* and *stakeholder pension schemes*, with identifying when the regulated activity of operating such a scheme will be carried on (see Q26).

The Q&As complement the general *guidance* on regulated activities in Chapter 2 of our Perimeter Guidance Manual ('PERG'), the general guidance on insurance mediation activities in Chapter 5 of PERG (PERG 5) and the relevant legislation. In addition, Chapter 12 of PERG (PERG 12) has further guidance about the regulated activities relating to the operation and sale of personal pension schemes that ~~came~~ came into force on 6 April 2007.

The Q&As that follow are set out in sections:

...

Q3. ...

- *establishing, operating or winding up a stakeholder pension scheme;*
- *establishing, operating or winding up a personal pension scheme.*

...

Q4. ...

Securities, such as shares, debt securities, warrants, or unit trusts, or rights under a personal pension scheme or a stakeholder pension scheme and contractually based investments such as ...

...

Q23. ...

No, provided it is not establishing, operating or winding up the scheme and is able to satisfy various exclusions that apply to other regulated activities. But note that, under government proposals for reforming the way in which personal pension schemes are permitted to be established and registered, it may need to be authorised by 6 April 2007 for operating a personal pension scheme—see HM Treasury’s Consultation Document entitled “Proposed changes to the eligibility rules for establishing a pension scheme—A consultation document, September 2005”. This is available on HM Treasury’s website at: www.hm-treasury.gov.uk/consultations_and_legislation/pension_scheme/consult_pensionscheme_index.cfm. The document sets out several options and indicates that the Treasury’s preferred option is to introduce a new regulated activity of establishing, operating or winding up a personal pension scheme other than a stakeholder pension scheme (where those activities are already regulated). The new regulated activity would come into force on 6 April 2007. At the same time, rights under a personal pension scheme would become an investment for the purposes of existing *regulated activities* such as *dealing, arranging, managing investments and advising on investments*. The FSA proposes to consult on further perimeter *guidance* about the changes to regulatory scope in this area during the course of 2006. Guidance on the regulated activities of establishing, operating and winding up a personal pension scheme is in Q24 to Q28 and in PERG 12 (Q3 to Q5).

So, your company’s position until April 2007 will depend on a combination of the activities that it carries on and the availability of certain exclusions. These exclusions may also apply to trustees of pension schemes other than SIPPs, including trustees of stakeholder pension schemes, with the exception of that for *managing investments* (which will not apply to a trustee of an OPS).

...

(6) There are no exclusions from the regulated activities of *establishing*.

operating or winding up a stakeholder pension scheme or establishing, operating or winding up a personal pension scheme. Guidance to help you determine whether or not your company will be carrying on any of these activities is in Q24 to Q28 and in PERG 12 (Q3 to Q5).

Q24. My company acts as corporate trustee of a for both trust-based stakeholder and personal pension schemes. Does it need to be authorised?

This depends on the responsibilities that your company assumes as trustee. Establishing, operating or winding up a stakeholder pension scheme or a personal pension scheme are regulated activities in their own right. These are functions that ~~are~~ may often be carried out by the trustees of a trust-based ~~stakeholder pension~~ scheme other than where the trustees are mere bare trustees. This is apart from establishing a scheme which is a function that may often be carried out by a third party such as a product provider. See Q25 to Q28 and PERG 12 (Q3 to Q5) for further guidance on these activities.

Q25. What does establishing a stakeholder or personal pension scheme involve?

The establisher of a stakeholder or personal pension scheme is the *person* responsible for putting in place the arrangements founding the scheme ~~and registering it with HM Revenue & Customs~~. With a trust-based scheme, this will usually be the person who executes the trust as principal provider. In a scheme ...

Q26. What does operating a stakeholder or personal pension scheme involve?

The 'operator' is the *person* responsible, ~~under the scheme's constitution, for ensuring continuing compliance with the management and administration requirements in respect of the assets and income of, and the benefits payable under, the scheme as imposed under relevant pensions and tax legislation. For example, with~~ to the members for managing and administering the assets and income of, and the benefits payable under, the scheme in accordance with relevant pensions and tax legislation, the scheme's constitution and the regulatory system. In this respect, the responsibilities that are placed under Part 4 of the Finance Act 2004 on a pension scheme administrator (as defined in section 270(1) of that Act) will mean that he is likely to be the operator of the scheme. In a trust-based schemes, the trustees ~~will often be the operator by virtue of the responsibilities they assume under the trust deed. In~~ may act as scheme administrator or there may be a separate person who acts in that capacity. Where there are separate trustees, it may be the case that they are operating the scheme jointly with the scheme administrator by virtue of the responsibilities they assume under the trust deed for the management and administration of the scheme assets. However, in situations where the trustees' role is merely to act as a bare trustee holding the scheme assets, it

~~may be the case that there is a third party who has responsibility for the management and administration of the scheme and its assets and who will be the scheme's~~ it is the scheme administrator who is likely to be the sole operator of the scheme. The scheme may be established by an *authorised person* who acts as a provider of investment products or services to the scheme. This does not make that person the operator of the scheme if, as a matter of fact, he has appointed another person ~~(such as a trustee)~~ to be responsible to the members for carrying out all of the operator's functions as scheme administrator or as trustee, or both as the case may be in his place.

Q27. What is my position as the operator of a stakeholder or personal pension scheme if I delegate day-to-day functions such as administration of the scheme or management of the scheme assets to another person?

...

Q28. What does winding-up a stakeholder or personal pension scheme involve?

The *person* who winds-up such a stakeholder pension scheme ~~pension scheme~~ will be the person ...

...

10.4

Q31. ...

(4) Arranging the appointment of a custodian on behalf ... will then safeguard and administer in accordance with pre-existing arrangements.

(5) Arranging for persons to join or to leave a stakeholder pension scheme or a personal pension scheme or to exercise certain rights under such a scheme. This is because the rights themselves will be a form of investment and so you will be arranging. This is explained in more detail in PERG 12 (Q15 to Q20).

(6) Acting as the scheme administrator (as defined in section 270(1) of the Finance Act 2004) for a stakeholder pension scheme or a personal pension scheme. This is because you are likely to be operating the scheme (see Q26).

(7) Advising the trustees on the merits of buying or selling particular securities or relevant investments or advising a member on the merits of joining or leaving, or of exercising certain rights under, a stakeholder pension scheme or a personal pension scheme. This is because you will be advising on investments (see Q38 and Q39).

Services that typically will not involve any regulated activities ...

...

Q39. ...

It ~~may~~ is likely to be if the advice concerns a ~~personal pension scheme~~ personal pension scheme but probably not if it concerns an OPS that is not a stakeholder pension scheme. The same factors apply to advice given to a member as apply to advice given to trustees (see Q38). But a particular factor ~~is likely to~~ will be whether the member is himself *buying* or *selling* a *security* or *relevant investment* (a “regulated investment”).

~~With a trust-based pension scheme, the trustees will usually hold the legal title to the scheme’s investments with the members having a beneficial interest in those investments. These beneficial interests may themselves be regulated investments (under article 89 of the *Regulated Activities Order*) that can be bought or sold by the member.~~

~~So, for example, the interests which a member may acquire in *units* or *life policies* held under a SIPP will amount to a regulated investment held by the investor, even though the legal title to the investments is held by the trustees on the member’s behalf. Advice to the member on the merits of acquiring or disposing of those interests will then be regulated advice. But advice on the merits of acquiring or disposing of interests in other assets such as real property or cash will not be regulated advice.~~

It is usually the case that, where regulated investments are held under trust, the person for whose benefit the investments are held will acquire a beneficial interest in the investments. Such interests are regulated investments in their own right under article 89 of the *Regulated Activities Order*. Where an OPS that is not a *stakeholder pension scheme* is concerned, however, the interests obtained by members are specifically excluded from being regulated investments (see article 89(2) of the *Regulated Activities Order*). This means that a member of an a money purchase OPS does not acquire a regulated investment simply through having a beneficial interest in investments held under the trust for the purpose of providing his benefits. Similarly, an interest in investments that result from a member having made additional voluntary contributions and which are held under the trust for his benefit will not be a regulated investment. So, advice to the member on the merits of his making additional voluntary contributions under his OPS will not be regulated advice.

The position with *stakeholder pension schemes* and *personal pension schemes* (including free-standing additional voluntary contributions schemes) is different. The rights under such a scheme (whether it is trust-based or contractual) are a specific type of regulated investment. So, advice on the merits of joining or leaving, or of exercising certain rights under, such a ~~stakeholder pension~~ stakeholder pension scheme will be regulated advice. This is the case with a stakeholder pension scheme even if the scheme is also an OPS. More detailed guidance on the meaning of rights under a personal pension scheme

and the circumstances in which advice about such rights is regulated is in PERG 12 (Q15 to Q20). That guidance will apply equally to rights under a stakeholder pension scheme.

~~The rights or interests that a person acquires under free-standing additional voluntary contribution arrangements will be regulated investments if and to the extent that the underlying investments are *securities* or *contractually based investments*. Where this is the case, advice on the merits of making free-standing additional voluntary contributions will be regulated advice.~~

~~If operating a personal pension scheme becomes a regulated activity in line with the government's proposals (see Q23), the rights that a member obtains under any such scheme (including a SIPP) will become regulated investments in their own right and so advice on the merits of *buying* or *selling* such rights would be regulated.~~

Q40. I provide administration services to the providers of pension products such as insurers, unit trust managers or banks. Is my position any different to that of a person who provides administration services to pension scheme trustees?

Potentially, yes. This is because:

...

- although you are likely to be carrying on *dealing* or *arranging* activities if you handle such things as arranging new policies or units, additional payments, surrenders, switches or assignments, some of the exclusions may not apply to you, for example:

...

Q41A. ...

Activity	Potential ISD investment service?	Potential application of ISD or of an ISD article 2.2 exemption?
Dealing in scheme assets as trustee	...	
Issuing rights under a stakeholder <u>or personal</u> pension scheme to members	None – the rights are not ISD investments	ISD does not apply

...		
Establishing, operating or winding up a stakeholder <u>or</u> <u>personal</u> pension scheme	None	ISD does not apply
...		

Q43. ...

You are unlikely to be carrying on a *regulated activity* in the case of an OPS ... staff with the opportunity to participate in a ~~group~~ *personal pension scheme* or a *stakeholder pension scheme*, you are likely to be *arranging*. You may also be *advising on investments* if you provide your employees with advice on the merits of their joining the scheme (see Q39).

Q44. As an employer, I ~~am~~ may offering my staff a stakeholder pension scheme or a personal pension scheme. If I do so, wWill I satisfy the by-way-of-business test?

...

Annex 3

Table summarising regulatory position of pension scheme trustees and service providers

Potential regulated activity	When will such regulated activities be carried on?
...	...
<i>Establishing, operating or winding-up a stakeholder pension scheme</i> <u>or</u> <i>establishing, operating or winding-up a personal pension scheme</i> (article 52 of the Regulated Activities Order)	The trustee of a trust-based stakeholder <u>or</u> <u>personal</u> pension scheme will often <u>may</u> be its operator. This is where the trustee is <u>not merely</u> a bare trustee and <u>is</u> responsible under the instruments establishing the scheme for complying with the management and administration requirements in respect of the assets and income of, and the benefits payable under, the scheme as imposed under relevant pensions and tax legislation. <u>Persons who are not scheme trustees are only</u>

	<u>likely to be carrying on these activities if they are the scheme administrator</u> (see Q26).
...	...

Annex 4

Table summarising regulatory position of employers and affinity groups

Activity carried on by employer or affinity group	Potential implications in terms of regulated activities and the need for authorisation
...	...
Acting as trustee of a trust-based stakeholder pension scheme	This is <u>likely to</u> will be a regulated activity <u>as</u> if the trustee is <u>likely to be</u> operating the stakeholder pension scheme. But the employer or affinity group will only need to be authorised or exempt if, as trustee, they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).
Arranging for employees to participate in an occupational pension scheme or a group personal pension scheme or a stakeholder pension scheme	Arranging for employees to participate in an occupational pension scheme (other than one that is also a stakeholder pension scheme) is not a regulated activity as the employees are not acquiring investments. Arranging for employees to participate in <u>any form of a group personal pension scheme or in a stakeholder pension scheme</u> is likely to involve <i>arranging</i> as is arranging for employees to participate in a stakeholder pension scheme . But the employer or affinity group will only need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).
Advising employees on the merits of participating in an occupational pension scheme or a group personal pension scheme or a stakeholder pension scheme, including advising employees against joining a personal pension scheme or advising them to transfer from a personal	Advice on the merits of participating in an occupational pension scheme (other than one that is also a stakeholder pension scheme) is not a regulated activity as the employees are not acquiring investments. Advice on the merits of participating in a <u>particular</u> group personal pension scheme or a stakeholder pension scheme will be a regulated activity <u>because the rights that a person would acquire by becoming a member of the scheme are a form of investment</u> (see Q39). Advice against joining or to transfer from a <u>particular</u> personal pension scheme will be a

pension scheme	<p>regulated activity <u>for the same reasons</u> if the advice relates to a particular security or relevant investment that is or is to be held under the scheme or if the scheme is a stakeholder pension scheme. If the advice relates to personal pension schemes generally but not one in particular it will not be a regulated activity (see Q39 and Q40).</p> <p>But the employer or affinity group will only need to be authorised or exempt if they are acting by way of business which, in most instances, should not be the case (see Q6, Q44 and Q45).</p>

Person communicating	Subject or purpose of communication	Need for approval or exemption available
...
Employer, affinity group or trustee	To persuade employees or members to join a stakeholder pension scheme or a <i>group personal pension scheme</i> .	<p>Approval or exemption needed as rights under a stakeholder pension scheme will be, and rights under a group personal pension scheme are likely to be or to include, <u>themselves</u> investments.</p> <p>Promotions about stakeholder pension schemes ...</p>
Employer or affinity group	To persuade employees or members to make free-standing additional voluntary contributions (FSAVCs) or to take out any other type of personal pension scheme <i>personal pension scheme</i> (other than a stakeholder pension scheme or a	Approval or exemption is likely to <u>will</u> be needed as rights under FSAVCs and other personal pension schemes are likely to be or to include <u>themselves</u> investments.

	group personal pension scheme).	
...

12 Guidance for persons running or advising on personal pension schemes

12.1 Background

Q1. What is the purpose of these questions and answers ('Q&As') and who should be reading them?

These Q&As are aimed at, and should be read by, *persons* involved in the running of a *personal pension scheme* and those who give advice about or provide services to such schemes. They are intended to help such persons understand whether they will be carrying on a *regulated activity* and need *authorisation* or exemption under section 19 of the Financial Services and Markets Act 2000 following the changes to pension legislation that ~~took~~ are proposed to take effect on 6 April 2007. ~~Under the proposed changes, establishing, operating or winding up a personal pension scheme will become a regulated activity and rights under a personal pension scheme will become a specified investment.~~ The Q&As complement the general *guidance* on regulated activities which is in Chapter 2 of our Perimeter Guidance manual ('PERG') and the general guidance about pensions-related activities which is in Chapter 10 of PERG.

The Q&As are set out under ~~four~~ five sections:

- ~~the scope of the proposed new regulated activity of~~ *establishing, operating or winding up a personal pension scheme* (PERG 12.2);
- ~~the implications of the proposed new specified investment of rights under a personal pension scheme~~ (PERG 12.3);
- the application of EU Directives (PERG 12.4); and
- *financial promotion* issues (PERG 12.5); ~~and~~
- ~~practical transitional considerations~~ (PERG 12.6).

...

Q11. I am a trustee operating a self-invested personal pension scheme ('SIPP'). Can I ~~continue to~~ rely on the various exclusions available to trustees for other regulated activities such as dealing in investments, managing investments and safeguarding and administering investments?

Yes, provided you are able to satisfy the conditions applicable to the ~~you may continue to rely on existing exclusions for those activities.~~ No changes ~~are being~~ were made to those any of the

exclusions as a result of the changes in regulatory scope that took effect on 6 April 2007. Guidance on the exclusions is given in Chapter 10 (Q23) of PERG.

...

Q24. Do the changes in the scope of regulated activities concerning pension schemes that ~~take~~ took effect on 6 April 2007 have any implications for pension scheme trustees or service providers under the Investment Services Directive (or, in future, the Markets in Financial Instruments Directive) or the Insurance Mediation Directive?

In general terms, if a pension scheme trustee or service provider ~~does~~ did not need to be authorised under the *Investment Services Directive* prior to 6 April 2007 he should not need to be authorised ...

Similarly, a pension scheme trustee or service provider who was is not subject to regulation under the *Insurance Mediation Directive* prior to 6 April 2007 will not become subject to regulation purely as result of the changes in regulatory scope that ~~take~~ took effect on 6 April 2007. Detailed guidance ...

12.6 Practical transitional considerations

~~Q29. I am currently operating a SIPP but am not an authorised person. Do I have to become authorised by 6 April 2007 or will there be any transitional arrangements to allow for the possibility that I do not obtain authorisation by that date?~~

~~Transitional arrangements have been put in place. The broad effect of these arrangements is that you will be able to benefit from interim authorisation as respects any of the new regulated activities that relate to personal pension schemes pending the final determination of your application. This is provided:~~

- ~~• you were carrying on the regulated activities for which you are seeking permission on or before 1 October 2006; and~~
- ~~• your application for authorisation was submitted on or before 23 March 2007.~~

~~Q30. I am already authorised. Do I need to seek a variation of permission to carry on any of the new regulated activities?~~

~~This depends on what activities are covered by your existing *permission*. If, immediately prior to 6 April 2007, your permission covers any regulated activity that relates to stakeholder pension schemes, you will automatically be granted permission to carry on each such regulated activity in relation to personal pension schemes. This is provided you have not exercised your right to notify the FSA by 23 March 2007 that you do not wish your permission to be extended in this way.~~

~~If your existing permission does not cover a regulated activity relating to stakeholder pension schemes, you will need to apply for a variation of permission if you wish to carry on any of the new regulated activities. As with applications for authorisation (see Q29) you will benefit from interim permission provided:~~

- you were carrying on the regulated activities, for which you are seeking to vary your permission, on or before 1 October 2006; and
- your application to vary your permission was submitted on or before 23 March 2007.

Q31. Can I avoid the need to be authorised by becoming an appointed representative of an authorised person?

You cannot be an *appointed representative* for *establishing, operating or winding up a personal pension scheme*. But you can be an appointed representative for activities such as advising on or arranging deals in rights under a *personal pension scheme*.

If you are an appointed representative prior to 6 April 2007 and you intend to carry on any of the new regulated activities, you will need to consider whether your existing agreement with your principal will cover those activities or whether it will need to be amended to do so. You may be an appointed representative of a life office for the purpose of advising on or arranging deals in its investment products and also undertake unregulated activities in relation to personal pension schemes offered by third parties. If those unregulated activities include activities that will become regulated from 6 April 2007, you will need either to become the appointed representative of another appropriately authorised firm or to seek authorisation yourself. This is because an appointed representative of a life office can only undertake regulated activities that arise directly from the life office's insurance business.

Remember also that a person cannot generally be authorised and exempt as an appointed representative at the same time. However, this rule is waived if you obtain interim authorisation to carry on the new regulated activities and wish, pending determination of your application for authorisation, to continue to conduct existing regulated activities as an appointed representative.

**INTERIM PERMITTED PERSONS
(PERSONAL PENSIONS) INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 156 (General supplementary powers);
 - (c) section 213 (The compensation scheme); and
 - (d) section 214 (General); and
 - (2) article 6 of the Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) Order 2006 (SI No 2006/1969).
- B. The powers listed above are specified for the purposes of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force on 6 April 2007.

Citation

- D. This instrument may be cited as the Interim Permitted Persons (Personal Pensions) Instrument 2006.

By order of the Board
28 September 2006

Annex

Directions and rules for Interim Permitted Persons in respect of Personal Pension Business

In this Annex, new provisions are being introduced and they are not underlined.

1. Application
 - 1.1 R These *rules* and directions apply to:
 - (1) an *authorised person* with an *interim permission*; and
 - (2) an *authorised person* with an *interim variation of permission*.
 2. The application of the Handbook and the disapplication of COMP
 - 2.1 D The *FSA* directs that the *Handbook* applies to an *authorised person* with an *interim permission* or an *interim variation of permission* as if that *person's application* had been granted in the terms applied for.
 - 2.2 D The *FSA* directs that the *Glossary* definition of '*relevant person*' does not include an *authorised person* with an *interim permission*.
 3. Disclosure of status
 - 3.1 R Whenever an *authorised person* with an *interim permission* or an *interim variation of permission* is required, and whenever that *person* is permitted and chooses, to disclose that:
 - (1) it is an *authorised person* or it is regulated by the *FSA*, and that disclosure is made in respect of; or
 - (2) it has a *permission* which includes, one or more of the *regulated activities* or the *specified investment* described in article 4 (Interim permission) of the *Order*, that *person* must instead disclose that:
 - (3) (if the *authorised person* has an *interim permission*):
 - (a) it is an authorised person with an interim permission, pending the determination of its application for a permission; and
 - (b) compensation will not be available from the Financial Services Compensation Scheme if the authorised person cannot meet its obligations.
 - (4) (if the *authorised person* has an *interim variation of permission*) it is an authorised person with an interim permission that allows it to carry on personal pension business pending the determination of its application for a variation of permission.
 - 3.3 R Whenever:
 - (1) an *authorised person* with an *interim permission* or an *interim variation of permission* is required, and whenever that *person* is permitted and chooses, to disclose that the *FSA* has approved one

or more of its *approved persons* for the purposes of section 59 of the *Act* (Approval for particular arrangements); and

- (2) the disclosure in (1) is related to one or more of the *regulated activities* or the *specified investment* described in article 4 (Interim permission) of the *Order*,

the *authorised person* must instead disclose (if it is the case) that one or more of the its approved persons has been approved on a interim basis pending the determination of an application for approved person status.

4. Defined terms

- 4.1 R In these *rules* and directions, the terms in (1) have the meanings ascribed to them by (2). Further, terms in italics that do not appear below have the meaning given to them in the *Glossary* in the *FSA's Handbook*.

	(1)	(2)
<i>application</i>		an application for: (1) a <i>Part IV permission</i> which includes; or (2) a variation of a <i>Part IV permission</i> so that it will include, the <i>regulated activity</i> of <i>establishing, operating or winding up a personal pension scheme</i> , or one or more of the <i>regulated activities</i> described in article 4(1)(b)(ii) of the <i>Order</i> in respect of rights under a <i>personal pension scheme</i> .
<i>interim permission</i>		a <i>Part IV permission</i> deemed to have been granted by article 4 (Interim permission) of the <i>Order</i> to a <i>person</i> because he has submitted an application for a <i>Part IV permission</i> .
<i>interim variation of permission</i>		a variation of a <i>Part IV permission</i> deemed to have been granted by article 4 (Interim permission) of the <i>Order</i> .
<i>Order</i>		the Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) Order 2006 (SI No 2006/1969).

HOME REVERSION AND HOME PURCHASE ACTIVITIES (CONSEQUENTIAL AMENDMENTS TO THE HANDBOOK) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making powers);
 - (b) section 139(4) (Miscellaneous ancillary matters);
 - (c) section 145 (Financial promotion rules);
 - (d) section 146 (Money laundering rules);
 - (e) section 149 (Evidential provisions);
 - (f) section 150(2) (Actions for damages);
 - (g) section 156 (General supplementary powers);
 - (h) section 157(1) (Guidance);
 - (i) section 213 (The compensation scheme);
 - (j) section 214 (General);
 - (k) section 234 (Industry funding);
 - (l) section 332(1) (Rules in relation to persons to whom the general prohibition does not apply);
 - (m) section 340(1) (Appointment of auditors and actuaries); and
 - (n) paragraph 17(1) of Schedule 1 (Fees); and
 - (2) regulation 3 of The Electronic Commerce Directive (Financial Services and Markets) Regulations 2002 (S.I. 2002/1775); and
 - (3) the other powers referred to in Schedule 4 of the General Provisions.
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Financial Services and Markets Act 2000.

Commencement

- C. Subject to The Financial Services and Markets Act 2000 (Regulated Activities) (Amendment) (No.2) Order 2006 (SI No 2006/2383) being in force on 6 November 2006, this instrument comes into force as follows:
- (1) the amendments in Part 1 of Annex A and Part 1 of Annex D come into force on 6 November 2006;
 - (2) the remainder of this instrument comes into force on 6 April 2007.

Amendments to the Handbook

- D. The Prudential sourcebook for Mortgage Firms and Insurance Intermediaries (or MIPRU) shall be cited as Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries (or MIPRU) and all references in the Handbook are changed accordingly.
- E. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with Annexes to this instrument listed in column (2) below:

(1)	(2)
Glossary of definitions	Annex A
Principles for Businesses (PRIN)	Annex B
General Provisions sourcebook (GEN)	Annex C
Fees Manual (FEES)	Annex D
Senior Management Arrangements, Systems and Controls sourcebook (SYSC)	Annex E
Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries (or MIPRU)	Annex F
Conduct of Business sourcebook (COB)	Annex G
Insurance: Conduct of Business sourcebook (ICOB)	Annex H
Training and Competence sourcebook (TC)	Annex I
Supervision manual (SUP)	Annex J
Compensation sourcebook (COMP)	Annex K
Electronic Commerce Directive sourcebook (ECO)	Annex L

- F. All references to '*regulated lifetime mortgage contract*' in the Handbook are amended to '*lifetime mortgage*'.

Citation

- G. This instrument may be cited as the Home Reversion and Home Purchase Activities (Consequential Amendments to the Handbook) Instrument 2006.

By order of the Board
25 October 2006

Annex A

Amendments to the Glossary of definitions

Part 1

Insert the following new definitions in the appropriate alphabetical position:

advising on a home finance transaction any of the *regulated activities* of *advising on regulated mortgage contracts*, *advising on a home purchase plan* or *advising on a home reversion plan*.

advising on a home purchase plan the *regulated activity*, specified in article 53C of the *Regulated Activities Order*, which is in summary: advising a *person* if the advice:

- (a) is given to him in his capacity as a *home purchaser* or potential *home purchaser*; and
- (b) is advice on the merits of his:
 - (i) entering into a particular *home purchase plan*; or
 - (ii) varying the terms of a *home purchase plan* entered into by him on or after 6 April 2007 in such a way as to vary his obligations under that plan.

advising on a home reversion plan the *regulated activity*, specified in article 53B of the *Regulated Activities Order*, which is in summary: advising a *person* if the advice:

- (a) is given to him in his capacity as *reversion occupier* or plan provider or potential *reversion occupier* or potential plan provider; and
- (b) is advice on the merits of his:
 - (i) entering into a particular *home reversion plan*; or
 - (ii) varying the terms of a *home reversion plan* entered into by him on or after 6 April 2007 in such a way as to vary his obligations under that plan.

arranging (bringing about) a home finance transaction any of the *regulated activities* of *arranging (bringing about) a regulated mortgage contract*, *arranging (bringing about) a home purchase plan* or *arranging (bringing about) a home reversion plan*.

arranging (bringing the *regulated activity*, specified in article 25C(1) of the *Regulated Activities*

<i>about) a home purchase plan</i>	<p><i>Order</i>, which is in summary: making arrangements for another <i>person</i> to:</p> <ul style="list-style-type: none"> (a) enter into a <i>home purchase plan</i> as <i>home purchaser</i>; or (b) vary the terms of a <i>home purchase plan</i> entered into by him as <i>home purchaser</i> on or after 6 April 2007.
<i>arranging (bringing about) a home reversion plan</i>	<p>the <i>regulated activity</i>, specified in article 25B(1) of the <i>Regulated Activities Order</i>, which is in summary: making arrangements for another <i>person</i> to:</p> <ul style="list-style-type: none"> (a) enter into a <i>home reversion plan</i> as <i>reversion occupier</i> or as plan provider; or (b) vary the terms of a <i>home reversion plan</i> entered into by him as <i>reversion occupier</i> or as plan provider on or after 6 April 2007.
<i>entering into a home finance transaction</i>	any of the <i>regulated activities</i> of <i>entering into a regulated mortgage contract</i> , <i>entering into a home purchase plan</i> or <i>entering into a home reversion plan</i> .
<i>entering into a home purchase plan</i>	the <i>regulated activity</i> , specified in article 63F(1) of the <i>Regulated Activities Order</i> , which is in summary: entering into a <i>home purchase plan</i> as provider.
<i>entering into a home reversion plan</i>	the <i>regulated activity</i> , specified in article 63B(1) of the <i>Regulated Activities Order</i> , which is in summary: entering into a <i>home reversion plan</i> as provider, or acquiring any obligations or rights (including his interest in land) of the plan provider under a <i>home purchase plan</i> entered into by him on or after 6 April 2007.
<i>home finance adviser</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) for <i>advising on a home finance transaction</i> .
<i>home finance arranger</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) for <i>arranging a home finance transaction</i> .
<i>home finance provider</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) for <i>entering into a home finance transaction</i> .
<i>home purchase plan</i>	(in accordance with article 63F(3) of the <i>Regulated Activities Order</i>) an arrangement comprised in one or more instruments or agreements which meets the following conditions at the time it is entered into:

- (a) the arrangement is one under which a *person* (the 'home purchase provider') buys a *qualifying interest in land* or an undivided share of a *qualifying interest in land*;
- (b) where an undivided share of a *qualifying interest in land* is bought, the interest is held on trust for the home purchase provider and the individual or trustees in (c) as beneficial tenants in common;
- (c) the arrangement provides for the obligation of an individual or trustees (the *home purchaser*) to buy the interest bought by the home purchase provider during the course of or at the end of a specified period; and
- (d) the *home purchaser* (if he is an individual) or an individual who is a beneficiary of the trust (if the *home purchaser* is a trustee), or a related person, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling during that period and intends to do so;

in this definition "related person" means:

- (A) that *person's* spouse or civil partner;
- (B) a *person* (whether or not of the opposite sex) whose relationship with that *person* has the characteristics of the relationship between husband and wife; or
- (C) that *person's* parent, brother, sister, child, grandparent or grandchild.

home purchase provider a *firm* with *permission* (or which ought to have *permission*) for *entering into a home purchase plan*.

home purchaser the individual (or trustees), specified in article 63F(3) of the *Regulated Activities Order*, who in summary:

- (a) is (or are) obliged under a *home purchase plan* to buy the interest in land bought by the home purchase provider (as defined in article 63F(3) of the *Regulated Activities Order*) over the course of or at the end of a specified period; and
- (b)
 - (i) in the case of an individual, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling and intends to do so; or
 - (ii) in the case of trustees, are trustees of a trust a beneficiary of which is an individual described in (i).

*home
reversion plan*

(in accordance with article 63B(3) of the *Regulated Activities Order*) an arrangement comprised in one or more instruments or agreements which meets the following conditions at the time it is entered into:

- (a) the arrangement is one under which a *person* (the *reversion provider*) buys all or part of a *qualifying interest in land* from an individual or trustees (the *reversion occupier*);
- (b) the *reversion occupier* (if he is an individual) or an individual who is a beneficiary of the trust (if the *reversion occupier* is a trustee), or a related person, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling and intends to do so; and
- (c) the arrangement specifies that the entitlement to occupy will end on the occurrence of one or more of:
 - (i) a *person* in (b) becoming a resident of a care home;
 - (ii) a *person* in (b) dying; or
 - (iii) the end of a specified period of at least twenty years from the date the *reversion occupier* entered into the arrangement;

in this definition "related person" means:

- (A) that *person's* spouse or civil partner;
- (B) a *person* (whether or not of the opposite sex) whose relationship with that *person* has the characteristics of the relationship between husband and wife; or
- (C) that *person's* parent, brother, sister, child, grandparent or grandchild.

*qualifying
interest in land*

(in accordance with article 63B(4)(a) of the *Regulated Activities Order*) land (other than timeshare accommodation) in the *UK* which is:

- (a) in relation to land in England and Wales, an estate in fee simple absolute or a term of years absolute whether subsisting at law or in equity; or
- (b) in relation to land in Scotland, the interest of an owner in land or the tenant's right over or interest in a property subject to a lease; or
- (c) in relation to land in Northern Ireland, any freehold estate or any leasehold estate whether subsisting at law or in equity.

reversion occupier the individual (or trustees), specified in article 63B(3) of the *Regulated Activities Order*, who in summary:

- (a) is (or are) the *person* (or *persons*) from whom all or part of an interest in land is bought as part of an arrangement comprising a *home reversion plan*; and
- (b)
 - (i) in the case of an individual, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling and intends to do so; or
 - (ii) in the case of trustees, are trustees of a trust a beneficiary of which is an individual described in (i).

reversion provider a *firm* with *permission* (or which ought to have *permission*) for *entering into a home reversion plan*.

Part 2

Insert in the following new definitions in the appropriate alphabetical position:

administering a home finance transaction any of the *regulated activities* of *administering a regulated mortgage contract*, *administering a home purchase plan* or *administering a home reversion plan*.

administering a home purchase plan the *regulated activity*, specified in article 63F(2) of the *Regulated Activities Order*, which is in summary: *administering a home purchase plan* where the plan was entered into by way of business on or after 6 April 2007.

administering a home reversion plan the *regulated activity*, specified in article 63B(2) of the *Regulated Activities Order*, which is in summary: *administering a home reversion plan* where the plan was entered into on or after 6 April 2007.

annual statement provisions (in *MCOB*) in relation to a:

- (a) *regulated mortgage contract*, *MCOB 7.5*;
- (b) *home purchase plan*, *MCOB 7.8.3R* to *MCOB 7.8.6R*; and
- (c) *instalment reversion plan*, *MCOB 9.9.1R* to *MCOB 9.9.4R*.

APR rules *MCOB 10*.

distance marketing information

(in MCOB) MCOB 6 Annex 1.

distance home purchase mediation contract

a *distance contract*, the making or performance of which constitutes, or is part of:

- (a) *advising on a home purchase plan*;
- (b) *arranging (bringing about) a home purchase plan*;
- (c) *making arrangements with a view to a home purchase plan*;
or
- (d) *agreeing to carry on a regulated activity in (a) to (c)*.

equity release activity

any *regulated mortgage activity* carried on in relation to a *lifetime mortgage*, or a *reversion activity*.

equity release adviser

a *firm* with *permission* (or which ought to have *permission*) for:

- (a) *advising on regulated mortgage contracts* (when carried on in relation to a *lifetime mortgage*); or
- (b) *advising on a home reversion plan*.

equity release arranger

a *firm* with *permission* (or which ought to have *permission*) for *arranging a*:

- (a) *regulated mortgage contract* (when carried on in relation to a *lifetime mortgage*); or
- (b) *home reversion plan*.

equity release intermediary

a *firm* with *permission* (or which ought to have *permission*) to carry on *equity release mediation activity*.

equity release mediation activity

any of the *regulated activities* of:

- (a) *arranging a regulated mortgage contract* (when carried on in relation to a *lifetime mortgage*) or a *home reversion plan*;
- (b) *advising on a regulated mortgage contract* (when carried on in relation to a *lifetime mortgage*) or a *home reversion plan*;
or
- (c) *agreeing to carry on a regulated activity in (a) or (b)*.

<i>equity release provider</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) for: <ul style="list-style-type: none"> (a) <i>entering into a regulated mortgage contract</i> (when carried on in relation to a <i>lifetime mortgage</i>); or (b) <i>entering into a home reversion plan</i>.
<i>equity release transaction</i>	a <i>lifetime mortgage</i> or a <i>home reversion plan</i> .
<i>home finance activity</i>	any <i>home finance mediation activity</i> , <i>home finance providing activity</i> or <i>administering a home finance transaction</i> .
<i>home finance administrator</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) for <i>administering a home finance transaction</i> .
<i>home finance intermediary</i>	a <i>firm</i> with <i>permission</i> (or which ought to have <i>permission</i>) to carry on a <i>home finance mediation activity</i> .
<i>home finance mediation activity</i>	any <i>mortgage mediation activity</i> , <i>home purchase mediation activity</i> or <i>reversion mediation activity</i> .
<i>home finance providing activity</i>	any of the <i>regulated activities</i> of: <ul style="list-style-type: none"> (a) <i>entering into a regulated mortgage contract</i>; (b) <i>entering into a home purchase plan</i>; (c) <i>entering into a home reversion plan</i>; or (d) <i>agreeing to carry on a regulated activity</i> in (a) to (c).
<i>home finance transaction</i>	a <i>regulated mortgage contract</i> , <i>home purchase plan</i> or <i>home reversion plan</i> .
<i>home purchase activity</i>	any of the <i>regulated activities</i> of: <ul style="list-style-type: none"> (a) <i>arranging (bringing about) a home purchase plan</i> (article 25C(1)); (b) <i>making arrangements with a view to a home purchase plan</i> (article 25C(2)); (c) <i>advising on a home purchase plan</i> (article 53C);

- (d) *entering into a home purchase plan* (article 63F(1));
- (e) *administering a home purchase plan* (article 63F(2)); or
- (f) *agreeing to carry on a regulated activity in (a) to (e)* (article 64).

home purchase administrator a firm with *permission* (or which ought to have *permission*) for *administering a home purchase plan*.

home purchase adviser a firm with *permission* (or which ought to have *permission*) for *advising on a home purchase plan*.

home purchase arranger a firm with *permission* (or which ought to have *permission*) for *arranging a home purchase plan*.

home purchase intermediary a firm with *permission* (or which ought to have *permission*) to carry on a *home purchase mediation activity*.

home purchase mediation activity any of the following *regulated activities*:

- (a) *arranging (bringing about) a home purchase plan* (article 25C(1));
- (b) *making arrangements with a view to a home purchase plan* (article 25C(2));
- (c) *advising on a home purchase plan* (article 53C); or
- (d) *agreeing to carry on a regulated activity in (a) to (c)* (article 64).

instalment reversion plan a *home reversion plan* under which more than one payment is made to the *customer* during the life of the plan.

keyfacts logo provisions GEN 5.1 and GEN 5 Annex 1G.

making arrangements with a view to a home finance transaction any of the *regulated activities* of *making arrangements with a view to a regulated mortgage contract, making arrangements with a view to a home reversion plan or making arrangements with a view to a home purchase plan*.

making arrangements with a view to a home purchase plan the *regulated activity*, specified in article 25C(2) of the *Regulated Activities Order*, which is in summary: making arrangements with a view to a *person* who participates in the arrangements entering into a *home purchase plan* as *home purchaser*.

making arrangements with a view to a home reversion plan the *regulated activity*, specified in article 25B(2) of the *Regulated Activities Order*, which is in summary: making arrangements with a view to a *person* who participates in the arrangements entering into a *home reversion plan* as *reversion occupier* or as plan provider.

reversion activity any of the *regulated activities* of:

- (a) *arranging (bringing about) a home reversion plan* (article 25B(1));
- (b) *making arrangements with a view to a home reversion plan* (article 25B(2));
- (c) *advising on a home reversion plan* (article 53B);
- (d) *entering into a home reversion plan* (article 63B(1));
- (e) *administering a home reversion plan* (article 63B(2)); or
- (f) *agreeing to carry on a regulated activity* in (a) to (e) (article 64).

reversion administrator a *firm* with *permission* (or which ought to have *permission*) for *administering a home reversion plan*.

reversion adviser a *firm* with *permission* (or which ought to have *permission*) for *advising on a home reversion plan*.

reversion arranger a *firm* with *permission* (or which ought to have *permission*) for *arranging a home reversion plan*.

reversion intermediary a *firm* with *permission* (or which ought to have *permission*) to carry on a *reversion mediation activity*.

reversion mediation activity any of the following *regulated activities*:

- (a) *arranging (bringing about) a home reversion plan* (article 25B(1));

- (b) *making arrangements with a view to a home reversion plan* (article 25B(2));
- (c) *advising on a home reversion plan* (article 53B); or
- (d) *agreeing to carry on a regulated activity* in (a) to (c) (article 64).

unauthorised reversion provider a person who carries on, or proposes to carry on, the activity specified in article 63B(1) of the *Regulated Activities Order* which is entering into a *home reversion plan* as plan provider, and who does not have *permission* for, and is not an *exempt person* in relation to, *entering into a home reversion plan*.

Amend the following definitions as shown and reorder in the appropriate alphabetical position. Underlining indicates new text and striking through indicates deleted text. Where an entire definition is deleted the place where the change will be made is indicated and the text is not shown struck through.

arranging (a) (except in relation to a ~~*regulated mortgage contract*~~ *home finance transaction*)...

(b) ...

(c) (in relation to a *home purchase plan*) *arranging (bringing about) a home purchase plan, making arrangements with a view to a home purchase plan or agreeing to carry on either of those regulated activities.*

(d) (in relation to a *home reversion plan*) *arranging (bringing about) a home reversion plan, making arrangements with a view to a home reversion plan or agreeing to carry on either of those regulated activities.*

arrears (in relation to a *regulated mortgage contract* or a *home purchase plan*) either:

- (a) a shortfall (equivalent to two or more regular payments) in the accumulated total payments actually made by the *customer* measured against the accumulated total amount of payments due to be received from the *customer*; or
- (b) remaining in breach, for more than one month, of an agreed borrowing limit or of an obligation to pay or repay where the loan or *home purchase plan* does not have a regular payment or repayment plan.

client (1) (except in *PROF*; and in relation to a ~~*regulated mortgage contract*~~

home finance transaction) ...

...

Annex E

Amendments to the Senior Management Arrangements, Systems and Controls sourcebook (SYSC)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

What?

1.1.3 R SYSC 2 and SYSC 3 apply with respect to the carrying on of:

...

(3) *ancillary activities in relation to designated investment business, ~~regulated mortgage~~home finance activity and insurance mediation activity;*

...

1.1.3A R SYSC 3.2.6AR to SYSC 3.2.6JG do not apply:

...

(2) in relation to the following *regulated activities*:

...

(e) ... ;~~and~~

(f) *mortgage mediation activity and administering a regulated mortgage contract;*

(g) *home purchase mediation activity and administering a home purchase plan; and*

(h) *reversion activity.*

...

Annex F

Amendments to the Prudential sourcebook for Mortgage and Home Finance Firms, and Insurance Intermediaries (MIPRU)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

1.1 Application

1.1.1 G This sourcebook applies to a *firm* with *Part IV permission* to carry on:

- (1) *insurance mediation activity*;
- (2) ~~*mortgage*~~ *home finance* *mediation activity*;
- (3) ~~*mortgage lending*~~ *home financing*;
- (4) ~~*mortgage*~~ *home finance* *administration*; and
- (5) *insurance business*;

as specified in the beginning of each of the remaining chapters.

...

3 Professional indemnity insurance

...

Application

3.1.1 R This chapter applies to a *firm* with *Part IV permission* to carry on any of the following activities:

- (1) *insurance mediation activity*;
- (2) ~~*mortgage*~~ *home finance* *mediation activity*;

...

(4) in relation to ~~*mortgage*~~ *home finance* *mediation activity*, this chapter does not apply to a *firm* if:

(a) ...

...

(5) ...

(6) in relation to ~~*mortgage*~~ *home finance* *mediation activity*, this chapter does not apply to an *authorised professional firm* if:

- (a) ...
- (b) whose ~~mortgage~~ home finance mediation activity is incidental to its main business.

...

- 3.2.2 G The minimum *limits of indemnity* for a firm whose *Part IV permission* covers both *insurance mediation activity* and ~~mortgage~~ home finance mediation activity is the higher of the *limits of indemnity* for these activities. If the firm opts for a single comparable guarantee to finance the claims which might arise as a result of both activities, the requirements for *insurance mediation activity* apply.

...

- 3.2.4 R The contract of professional indemnity insurance must incorporate terms which make provision for:

(1) ...

...

(5) continuous cover in respect of claims arising from work carried out from the date on which the firm was given *Part IV permission* for the *insurance mediation activity* or ~~mortgage~~ home finance mediation activity concerned; and

(6) ...

...

Minimum limits of indemnity: ~~mortgage~~ home finance intermediary

- 3.2.9 R If the firm is a ~~mortgage~~ home finance intermediary, then the minimum *limit of indemnity* is the higher of 10% of *annual income* up to £1 million, and:

...

...

4 Capital resources

...

- 4.1.1 R This chapter applies to a firm with *Part IV permission* to carry on any of the following activities unless an exemption in this section applies:

(1) *insurance mediation activity*;

(2) ~~mortgage~~ home finance mediation activity;

- (3) *entering into a ~~regulated mortgage contract~~ home finance transaction (that is, ~~mortgage lending~~ home financing);*
- (4) *administering a ~~regulated mortgage contract~~ home finance transaction (that is, ~~mortgage~~ home finance administration).*

...

- 4.1.9 G (1) ...
- (2) ...
- (3) A credit union cannot carry on home purchase activities or reversion activities because the Credit Unions Act 1979 restricts the circumstances whereby credit unions can hold land.

...

Application: social housing firms

- 4.1.13 G There are special provisions for a *social housing firm* when it is carrying on ~~mortgage lending~~ home financing or ~~mortgage~~ home finance administration (see MIPRU 4.2.7R).

...

Purpose: social housing firms

- 4.1.18 R *Social housing firms* undertake small amounts of ~~mortgage~~ home finance business even though their main business consists of activities other than *regulated activities*. Their ~~mortgage lending~~ home financing is only done as an adjunct to their primary purpose (usually the provision of housing) and is substantially different in character to that done by commercial lenders. Furthermore, they are *subsidiaries* of local authorities or registered social landlords which are already subject to separate regulation. The FSA does not consider that it would be proportionate to the risks involved with such business to impose significant capital requirements for these *firms*. The capital resources requirement for *social housing firms* therefore simply provides that, where their *Part IV permission* is limited to ~~mortgage lending~~ home financing and ~~mortgage~~ home finance administration, their net tangible assets must be greater than zero.

...

Capital resources requirement: social housing firms

- 4.2.7 R The capital resources requirement for a *social housing firm* whose *Part IV permission* is limited to carrying on the *regulated activities* of:
- (1) ~~mortgage lender~~ home financing; or
 - (2) ~~mortgage~~ home finance administration (or both);

is that the *firm's* net tangible assets must be greater than zero.

- 4.2.8 G If a *social housing firm* is carrying on ~~*mortgage-lending home financing*~~ or ~~*mortgage home finance administration*~~ (and no other *regulated activity*), its net tangible assets must be greater than zero. However, if it carries on *insurance mediation activity* or ~~*mortgage home finance mediation activity*~~, there is no special provision and the capital resources requirement for *firms* carrying on mediation activities only applies to it as appropriate.

...

- 4.2.10 R Table: Application of capital resources requirements

	Regulated activities	Provisions
1.	(a) <i>insurance mediation activity</i> ; or	MIPRU 4.2.11R
	(b) <i>mortgage home finance mediation activity</i> (or both);	
	and no other <i>regulated activity</i> .	
2.	(a) <i>mortgage-lending home financing</i> ; or	MIPRU 4.2.12R to MIPRU 4.2.17E
	(b) <i>mortgage-lending-home financing</i> and <i>mortgage home finance administration</i> ;	
	and no other <i>regulated activity</i> .	
3.	<i>mortgage home finance administration</i> ;	MIPRU 4.2.18R to MIPRU 4.2.19R
	and no other <i>regulated activity</i> .	
4.	<i>insurance mediation activity</i> ; and	MIPRU 4.2.20R
	(a) <i>mortgage-lending-home financing</i> ; or	
	(b) <i>mortgage home finance administration</i> (or both).	
5.	<i>mortgage home finance mediation activity</i> ; and	MIPRU 4.2.21R
	(a) <i>mortgage-lending-home financing</i> , or	
	(b) <i>mortgage home finance administration</i> (or both).	
6.	Any combination of <i>regulated activities</i> not within rows 1 to 5.	MIPRU 4.2.22R

Capital resources requirement: mediation activity only

- 4.2.11 R (1) If a *firm* carrying on *insurance mediation activity* or ~~*mortgage home finance mediation activity*~~ (and no other *regulated activity*) does not hold *client money* or other *client assets* in relation to these activities, its capital resources requirement is the higher of:
- (a) £5,000; and
 - (b) 2.5% of the *annual income* from its *insurance mediation activity* or ~~*mortgage home finance mediation activity*~~ (or both).
- (2) If a *firm* carrying *insurance mediation activity* or ~~*mortgage home finance mediation activity*~~ (and no other *regulated activity*) holds *client money* or other *client assets* in relation to these activities, its capital resources requirement is the higher of:
- (a) £10,000; and
 - (b) 5% of the *annual income* from its *insurance mediation activity* or ~~*mortgage home finance mediation activity*~~ (or both).

Capital resources requirement: ~~*mortgage lending home financing*~~ and *home finance administration* (but not ~~*mortgage home finance administration*~~ only)

- 4.2.12 R (1) The capital resources requirement for a *firm* carrying on ~~*mortgage lending home financing*~~, or ~~*mortgage lending home financing*~~ and ~~*mortgage home finance administration*~~ (and no other *regulated activity*) is the higher of:
- (a) £100,000; and
 - (b) 1% of:
 - (i) its total assets plus total undrawn commitments and unreleased amounts under the *home reversion plan*; less:
 - (ii) excluded loans or amounts plus intangible assets (see Note 1 in the table in *MIPRU 4.4.4R*).
- (2) Undrawn commitments and unreleased amounts means the total of those amounts which a ~~borrower~~ *customer* has the right to draw down or to receive from the *firm* but which have not yet been drawn down or received, excluding those under an agreement:
- (a) which has an original maturity of up to one year; or
 - (b) which can be unconditionally cancelled at any time by the lender or provider.

- 4.2.13 G When considering what is an undrawn commitment or unreleased amount, the *FSA* takes into account an amount which a ~~borrower~~ *customer* has the right to draw down or to receive under a *home finance transaction*, but which has not yet been drawn down or received, whether the commitment or obligation is

revocable or irrevocable, conditional or unconditional.

- 4.2.14 R When calculating total assets, the *firm* may exclude a loan or plan which has been transferred to a third party only if it meets the following conditions:
- (1) the first condition is that the loan or the plan must have been transferred in a legally effective manner by:
 - (a) novation; or
 - (b) legal or equitable assignment; or
 - (c) sub-participation; or
 - (d) declaration of trust; and
 - (2) the second condition is that the ~~lender~~ home finance provider:
 - (a) retains no material economic interest in the loan or the plan; and
 - (b) has no material exposure to losses arising from it.
- 4.2.15 E (1) When seeking to rely on the second condition, a *firm* should ensure that the loan or plan qualifies for the 'linked presentation' accounting treatment under Financial Reporting Standard 5 (Reporting the substance of transactions) issued in April 1994, and amended in December 1994 and September 1998 (if applicable to the *firm*).
- (2) ...
- ...
- 4.2.17 E (1) When seeking to rely on the second condition, a *firm* should not provide material credit enhancement in respect of the loan or plan unless it deducts the amount of the credit enhancement from its capital resources before meeting its capital resources requirement.
- (2) Credit enhancement includes:
 - (a) any holding of subordinated loans or notes in a transferee that is a special purpose vehicle; or
 - (b) over collateralisation by transferring loans or plans to a larger aggregate value than the *securities* to be issued; or
 - (c) any other arrangement with the transferee to cover a part of any subsequent losses arising from the transferred loan or plan.
- (3) Contravention of (1) may be relied upon as tending to establish contravention of the second condition.

Capital resources requirement: ~~mortgage~~ home finance administration only

4.2.18 R The capital resources requirement for a *firm* carrying on mortgage home finance administration only, which has all or part of the ~~regulated mortgage contracts~~ home finance transactions that it administers on its balance sheet, is the amount which is applied to a *firm* carrying on ~~mortgage lending~~ home financing or ~~mortgage lending~~ home financing and mortgage home finance administration, and no other *regulated activity* (see MIPRU 4.2.12R).

4.2.19 R The capital resources requirement for a *firm* carrying on mortgage home finance administration only, which has all the ~~regulated mortgage contracts~~ home finance transactions that it administers off its balance sheet is the higher of:

- (1) £100,000; and
- (2) 10% of its *annual income*.

Capital resources requirement: insurance mediation activity and ~~mortgage lending~~ home financing or mortgage home finance administration

4.2.20 R The capital resources requirement for a *firm* carrying on *insurance mediation activity* and ~~mortgage lending~~ home financing or mortgage home finance administration is the sum of the requirements which are applied to the *firm* by:

- (1) the capital resources requirement *rule* for a *firm* carrying on *insurance mediation activity* or mortgage home finance mediation activity and no other *regulated activity* (see MIPRU 4.2.11R); and
- (2) (a) the capital resources requirement *rule* of a *firm* carrying on ~~mortgage lending~~ home financing, or ~~mortgage lending~~ home financing and mortgage home finance administration (and no other *regulated activity*) (see MIPRU 4.2.12R); or
(b) if, in addition to its *insurance mediation activity*, the *firm* carries on mortgage home finance administration and has all the assets that it administers off balance sheet, the capital resources requirement *rule* for such *firm* (see MIPRU 4.2.19R).

Capital resources requirement: mortgage home finance mediation activity and ~~mortgage lending~~ home financing or mortgage home finance administration

4.2.21 R (1) If a *firm* carrying on ~~mortgage home finance mediation activity~~ and ~~mortgage lending~~ home financing or ~~mortgage home finance administration~~ does not hold *client money* or other *client assets* in relation to its ~~mortgage home finance mediation activity~~, the capital requirement is the amount applied to a *firm*, according to the activities carried on by the *firm*, by:

- (a) the capital resources requirement *rule* for a *firm* carrying on ~~mortgage lending~~ home financing, or ~~mortgage lending~~ home financing and mortgage home finance administration, and no other *regulated activity* (see MIPRU 4.2.12R); or

(b) if, in addition to its *mortgage home finance mediation activity*, the *firm* carries on *mortgage home finance administration* and has all the assets that it administers off balance sheet, the capital resources requirement *rule* for such *firm* (see MIPRU 4.2.19R).

(2) If the *firm* holds *client money* or other *client* assets in relation to its *mortgage home finance mediation activity*, the capital resources requirement is:

(a) the amount calculated under (1); plus

(b) the amount which is applied to a *firm* carrying on *insurance mediation activity* or *mortgage home finance mediation activity*, (and no other *regulated activity*) that holds *client money* or other *client* assets in relation to these activities (see MIPRU 4.2.11R(2)).

...

4.2.22 R The capital resources requirement for a *firm* carrying any other combination of *regulated activities* is the amount which is applied to a *firm* carrying on *insurance mediation activity* and *mortgage lending home financing* or *mortgage home finance administration* (see MIPRU 4.2.20R).

...

4.3.3 R For a *firm* which carries on *insurance mediation activity* or *mortgage home finance mediation activity*, *annual income* is the amount of all brokerage, fees, *commissions* and other related income (for example, administration charges, overrides, profit shares) due to the *firm* in respect of or in relation to those activities.

...

Annual income for *mortgage home finance administration*

4.3.7 R For the purposes of the calculation of capital resources requirement of a *firm* carrying on *mortgage home finance administration* only with all the assets it administers off balance sheet, *annual income* is the sum of:

...

...

4.4.2 R Table: Items which are eligible to contribute to the capital resources of a *firm*

1. Share capital ...

...

6. General/ collective provisions (Note 1)

These are provisions that a *firm* carrying on *mortgage lending home financing* or *mortgage home finance administration* holds against potential losses that have

	not yet been identified but which experience indicates are present in the <i>firm's</i> portfolio of assets. Such provisions must be freely available to meet these unidentified losses wherever they arise. Subject to Note 1, general/collective provisions must be verified by external auditors and disclosed in the <i>firm's</i> annual report and accounts.
--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

...

...

Subordinated loans

4.4.7 R A subordinated debt must not form part of the capital resources of the *firm* unless it meets the following conditions:

(1) (for a *firm* which carries on *insurance mediation activity*, ~~or mortgage home finance mediation activity~~ (or both) but not ~~mortgage-lending home financing~~ or ~~mortgage home finance administration~~) it has an original maturity of:

- (a) at least two years; or
- (b) it is subject to two years' notice of repayment;

(2) ...

...

4.4.8 R (1) This *rule* applies to a *firm* which:

- (a) carries on:
 - (i) *insurance mediation activity*; or
 - (ii) ~~mortgage home finance mediation activity~~ (or both); and
- (b) in relation to those activities, holds *client money* or other *client assets*;

but is not carrying on ~~mortgage-lending home financing~~ or ~~mortgage home finance administration~~.

...

Reversion providers: additional requirement for instalment reversions

4.4.10 R (1) If the *reversion provider* agrees under the terms of an *instalment reversion plan* to pay the *reversion occupier* for the *qualifying interest in land* over a period of time, then the *provider* must:

- (a) take out and maintain adequate insurance from an *insurance*

undertaking authorised in the EEA or a person of equivalent status in:

(i) a Zone A country; or

(ii) the Channel Islands, Gibraltar, Bermuda or the Isle of Man; or

(b) enter into a written agreement with a credit institution;

to meet these obligations in the event that the reversion provider is unable to do so.

(2) This rule does not apply if:

(a) the instalment reversion plan is linked to an investment and it is reasonably anticipated that the amounts due to the reversion occupier under the plan will be paid out of the proceeds of the investment to the occupier by a product provider other than the reversion provider; or

(b) the reversion provider acquires its interest in the property in steps proportionate to the instalments paid.

4.4.11 G The additional requirement for reversion providers aims to protect the reversion occupier against the insolvency of the reversion provider where the reversion occupier has agreed to receive the price for the part of the qualifying interest in land sold in instalments rather than in a lump sum. The requirement does not arise, for example, in relation to reversions linked to annuities as the reversion occupier has no credit risk on the reversion provider. Also, the requirement does not arise in relation to 'mini-reversions' (or 'staged reversions') as under these plans the reversion occupier continues to own the qualifying interest in land.

5 Insurance undertakings and ~~mortgage lenders~~ home finance providers using insurance or ~~mortgage~~ home finance mediation services

...

Application

5.1.1 R This chapter applies to a firm with a Part IV permission to carry on:

(1) *insurance business*; or

(2) ~~mortgage-lending~~ home financing;

(3) and which uses, or proposes to use, the services of another person consisting of:

(a) *insurance mediation*; or

(b) *insurance mediation activity*; or

(c) ~~mortgage~~ home finance mediation activity.

Purpose

5.1.2 G The purpose of this chapter is to implement article 3.6 of the *Insurance Mediation Directive* in relation to *insurance undertakings*. The provisions of this section have been extended to ~~mortgage lenders~~ home finance providers in relation to *insurance mediation activity*, and to *insurance undertakings* and ~~mortgage lenders~~ home finance providers in relation to ~~mortgage~~ home finance mediation activity, to ensure that *firms* using these services are treated in the same way and to ensure that *clients* have the same protection. To avoid the loss of protection where an intermediary itself uses the services of an *unauthorised person*, this chapter also ensures that each person in the chain of those providing services is authorised.

...

5.2.1 R A *firm* must not use, or propose to use, the services of another person consisting of:

- (1) *insurance mediation*; or
- (2) *insurance mediation activity*; or
- (3) ~~mortgage~~ home finance mediation activity;

unless two conditions are satisfied.

...

5.2.2 R The first condition is that the person, in relation to the activity:

- (1) ...

...

- (6) in relation to ~~mortgage~~ home finance mediation activity, is not carrying this activity on in the *United Kingdom*.

...

Annex G

Amendments to the Conduct of Business sourcebook (COB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

General application: what?

1.3.1 R *COB* applies to *firms* with respect to the carrying on of:

(1) all *regulated activities* except:

(a) ~~*regulated mortgage*~~ *home finance* activities; or

...

...

1.3.2 G ...

(7) *MCOB* applies to a *firm* that carries on ~~*regulated mortgage*~~ *home finance* activity.

...

...

3.1.2 G This chapter applies generally to *firms* in relation to all *financial promotions*. This wide application is however cut back by *COB* 3.2 (Application: what?) and *COB* 3.3 (Application: where?) which limit the application of this chapter for:

(1) *financial promotions* for *deposits*, *general insurance contracts*, *pure protection contracts*, *reinsurance contracts* and ~~*regulated mortgage contracts*~~, *qualifying credit*, *home purchase plans* and *home reversion plans*;

...

...

Financial promotions for ~~*regulated mortgage contracts*~~ *home finance transactions*

3.2.3A R This chapter does not apply to a *firm* to the extent that in relation to a *financial promotion* is a *qualifying credit promotion* of a *qualifying credit*, *home purchase plan* or *home reversion plan* (but see ~~*MCOB*~~ 3 (Financial promotions) the *financial promotion rules* in the Mortgage and Home Finance: Conduct of Business sourcebook).

...

4.3.3 R ...

(6) A firm which is required in accordance with this rule to provide an *initial disclosure document* to a *private customer* may instead provide the *customer* with a *combined initial disclosure document* if it has reasonable grounds to be satisfied that the *services* which it is likely to provide to the *customer* will, in addition to *packaged products*, relate to one or more of the following:

(a) *regulated mortgage contracts other than lifetime mortgages*;

(aa) *home purchase plans*;

(b) ~~*regulated lifetime mortgage contracts*~~ *equity release transactions*;

(c) ...

...

...

5.1.11B G (1) ...

(2) A firm that carries on business ~~both~~ in relation to *packaged products*, ~~and~~ *regulated mortgage contracts* ~~and~~ *home reversion plans* can do so in relation to the whole market and therefore be "independent" for one but offer only a limited service for the others. ...

...

...

5.3.29 G Guidance on matters which should be taken into account when assessing the suitability of various personal recommendations. This table belongs to COB 5.3.13G(4).

Suitability guidance		
...
H	Borrowing to invest	
	When considering the suitability of a particular <i>investment product</i> which is linked directly or indirectly to any form of loan, or mortgage <u>or home reversion plan</u> , a firm:	

	(a)	should take account of the source of the funds being invested and the suitability of the overall transaction; and
	(b)	must follow any relevant suitability and other rules in <i>COB</i> and <i>MCOB</i> .
For example, the circumstances in which a recommendation to enter into an regulated lifetime mortgage contract <u>equity release transaction</u> and invest the funds into a <i>long-term care insurance contract</i> might be appropriate are limited, and both <i>COB</i> 5.3 and <i>MCOB</i> 8.5 apply.		

...

Disclosure on making first contact: information about services

5A.2.1 R ...

(4) A *firm* which is required by this *rule* to provide an *initial disclosure document* to a *private customer* may instead provide the *customer* with a *combined initial disclosure document*, that complies with *COB* 4.3.9R(2), if it has reasonable grounds to be satisfied that the *services* which it is likely to provide to the *customer* will, in addition to *stakeholder products*, relate to one or more of the following:

(a) *regulated mortgage contracts* other than lifetime mortgages;

(aa) home purchase plans;

(b) ~~regulated lifetime mortgage contracts~~equity release transactions;

(c) ...

...

...

COB 4 Annex 5R: Combined initial disclosure document ~~required by COB 4.3.9R(2)~~ (“CIDD”)

This Annex belongs to COB 4.3.9R(2), ICOB 4.2.7R(1), MCOB 4.4.1R(1) and MCOB 4.10.2R(1).

1. ~~Firms should omit the notes, asterisks and square brackets which appear in the following specimen.~~

This specimen covers services in relation to *packaged products, non-investment insurance contracts* and ~~*regulated mortgage contracts*~~ *home finance transactions* (including ~~*lifetime mortgages*~~ and ~~home reversion schemes~~ *equity release transactions*).

If the *firm* is ~~only~~ not providing services in relation to ~~two types of these~~ all products, the parts of the CIDD that are not relevant must be omitted.

Information about *regulated mortgage contracts* and *home purchase plans* can be combined in the same CIDD. A *firm* must not give information about *equity release transactions* in a CIDD that contains information about either *regulated mortgage contracts* (other than *lifetime mortgages*) or *home purchase plans*. Where a *firm* offers these types of services as well as *equity release transactions* it will need to have different versions of the CIDD and issue the CIDD that is appropriate for the services that it expects to provide to the *customer* concerned. Where relevant, this will mean the *firm* issuing the *customer* with both documents.

Firms must omit the notes and square brackets that appear in the following CIDD. The CIDD must contain the keyfacts logo, headings and text in the order shown and in accordance with the notes. [Note 1]

...

- No fee. [We will be paid by commission from the provider. [Note 17]
- A fee of £[] payable at the outset and £[] payable when you apply for an Islamic home purchase plan. [We will also be paid commission from the provider]. [Note 17] [Note 18]

Refund of fees [Note 19]

If we charge you a fee, and your Islamic home purchase plan does not go ahead, you will receive: [Note 20]

- A full refund [if the provider] rejects your application]. [Note 21]
- A refund of £ [] [if your application falls through]. [Note 21] [Note 22]
- No refund [if you decide not to proceed]. [Note 21]

5 Who regulates us? [Note 23]

[XYZ Financial Services] [123 Any Street, Some Town, ST21 7QB] [Note 24] [Note 25] is authorised and regulated by the Financial Services Authority. Our FSA Register number is []. [Note 26]

Our permitted business is []. [Note 27]

[or] [Note 28]

[Name of *appointed representative*] [Note 3] [Note 4] is an appointed representative of [name of *firm*] [address of *firm*] [Note 24] [Note 25] which is authorised and regulated by the Financial Services Authority. [Name of *firm's*] FSA Register number is [].

[Name of *firm's*] permitted business is [] [Note 27]

You can check this on the FSA's Register by visiting the FSA's website www.fsa.gov.uk/register or by contacting the FSA on 0845 606 1234.

~~[Home reversion schemes are not regulated by the FSA.] [Note 14]~~

6 Loans and ownership [Note 29]

[B&C Investments plc owns 20% of our share capital.]

[London Union plc provides us with loan finance of £250,000 per year.]

[XYZ Financial Services (or we) have 20% of the voting rights in Royal Edinburgh.]

[Note 29][Note 30]Note 31][Note 32][Note 33][Note 34]

7 What to do if you have a complaint [Note 23]

If you wish to register a complaint, please contact us:

...**in writing** Write to [XYZ Financial Services], [Complaints Department, 123 Any Street, Some Town, ST21 7QB].

... **by phone** Telephone [0121 100 1234]. [Note 35]

If you cannot settle your complaint with us, you may be entitled to refer it to the Financial Ombudsman Service. [Note 36] [Note 36A] [Note 37] ~~[The Financial Ombudsman Service does not consider complaints about home reversion schemes.] [Note 14]~~

8 Are we covered by the Financial Services Compensation Scheme (FSCS)? [Note 23] [Note 38] [Note 38A]

We are covered by the FSCS. You may be entitled to compensation from the scheme if we cannot meet our obligations. This depends on the type of business and the circumstances of the claim.

...

[Lifetime] [Mortgages] [and] [Home Purchase Plans] [Equity Release Products] [Note 14]

[Mortgage], [and] [Home purchase] [and] [Equity release] advising and arranging is covered for 100% of the first £30,000 and 90% of the next £20,000 so the maximum compensation is £48,000. ~~[Home reversion schemes are not covered by the Financial Services Compensation Scheme.] [Note 14]~~

Further information about compensation scheme arrangements is available from the FSCS.

[Note 40] Message from the Financial Services Authority

Think carefully about this information before deciding whether you want to go ahead. If you are at all unsure about which ~~lifetime mortgage or home reversion~~ scheme equity release product is right for you, you should ask your adviser to make a recommendation.

Please remember that home reversion schemes are not regulated by the FSA.

[Note 41] Think carefully about the product and services you need. [We can only offer services in relation to Islamic home purchase plans and cannot provide advice on standard mortgages.] [If you want [information] or [advice] on standard mortgages, please ask.]

The following notes do not form part of the CIDD.

...

Note 6 – for services in relation to *packaged products* and ~~*regulated mortgage contracts, regulated lifetime mortgage contracts*~~ and ~~home reversion schemes~~ the *firm* must select, for example by ticking, one box which is appropriate for the service which it expects to provide to the *customer*. ... For services in relation to *equity release transactions*, firms must select by ticking the box (es) which is (are) appropriate for the service that they expect to provide to the *customer*. This means a *firm* selecting a maximum of two boxes within this section. *Firms* must not omit the boxes not selected (but see Note 7A).

...

Note 7A – The ‘Compliance with Islamic law’ subsection is optional unless the *firm* holds itself, its *regulated mortgage contract* or *home purchase plan* products or services out as compliant with Islamic law in the CIDD. If a *firm* includes Section 1A then it must describe the section on the CIDD as section 2 and renumber subsequent sections accordingly.

A *firm* that wishes to hold itself, its *regulated mortgage contract* or *home purchase plan* products or services out as compliant with religious or philosophical beliefs other than Islamic law in the CIDD may also use the sub-section in accordance with this note and modify the wording in the section to the extent appropriate.

Note 7B – if the *firm* does not advise or give personalised information on both types of *equity release transactions*, then it must indicate to the *customer* the sector that the *firm* does not cover. However, if the *firm's* scope of service does not include *equity release transactions*, the last box ('We do not offer [*lifetime mortgages*] [*home reversion plans*]'), must be omitted.

Note 8 – insert “can” if the *firm's* range of products is determined by any contractual obligation. This does not apply where a *product provider, insurer, lender, lender, or company home purchase provider* or *home reversion provider* is selling its own products.

...

Note 10 – if the *firm* selects this box, it will be offering the products of one provider to the *customer* for a particular product type. It should therefore follow the format specified in (1) below except when offering its own products, in which case it should follow (2) instead. ...

(1) Insert the name of the provider, namely ... the ~~*lender*~~ *lender* for *regulated mortgage contracts* and ~~*regulated lifetime mortgage contracts*~~, and the ~~*company*~~ *home purchase provider* for *home purchase plans* and the *home reversion provider* for *home reversion plans*. ... If the *firm* does not offer all of the ~~*mortgages or home reversion schemes*~~ *home finance transactions* generally available from that provider, it must insert the words "a limited range of" as shown in the specimen.

(2) ...

(3) If the *firm* offers *home reversion plans* from only one *reversion provider*, and *lifetime mortgages* from only one *lender*, which is different from the *reversion provider*, then the *firm* should identify the *lender* and the *reversion provider* and specify the type of *equity release transaction* to which they relate. For example,

"We can only offer lifetime mortgages from ABC Mortgages Ltd and home reversion plans from XYZ Reversions Ltd."

Note 11 – for services provided in relation to ~~regulated mortgage contracts, regulated lifetime mortgage contracts and home reversion schemes~~ home finance transactions, this sentence is required only where a *firm* selects this service option. It may also be omitted if a *firm* chooses to list all of the ~~lenders~~ lenders, home purchase providers and home reversion providers it offers ~~mortgages~~ home finance transactions from ~~instead of the text "a limited number of lenders"~~, in the previous line, so long as the *firm* offers all of the products generally available from each ~~lender~~.

...

Note 13 – if the *firm* does not select this box, it must alter the wording to say "a single group of companies" for *packaged products*, "a single insurer" for *non-investment insurance contracts*, "a single lender" for *regulated mortgage contracts* or ~~regulated lifetime mortgages~~ ~~contracts~~ and "a single company" (or "a single provider") for ~~home reversion schemes~~ home purchase plans and home reversion plans. For example: "We only offer the products from a single group of companies" should replace the text in the specimen CIDD.

Note 13A – A *firm* that carries on home purchase activities may omit the word "Islamic" from "Islamic home purchase plan(s)" if one or more home purchase plans within its scope of service is not held out as compliant with Islamic law. If "Islamic" is omitted, it should be omitted consistently throughout the document. However, a *firm* may omit the word "Islamic" in sections 5 and 8 without having to omit it throughout the document. A *firm* that wishes to hold itself, its products or services out as compliant with religious or philosophical belief other than Islamic law in the IDD may make appropriate amendments to references to "Islamic" and "Islamic law".

Note 14 – in describing the services and products provided, *firms* must omit the text in brackets that do not apply and ensure that they describe accurately their activities with respect of the services and products that they offer, as follows:

(1) Headings and sub-headings:

- a. If the *firm* offers both regulated mortgage contracts and home purchase plans, it must include the heading "Home Finance Products" in the CIDD and describe the regulated mortgage contracts and home purchase plans that it offers under two separate sub-headings. The sub-headings ("Mortgages" and "Home Purchase Plans") must be numbered accordingly. If the *firm* only offers one of these two products, then the heading "Home Finance Products" should be omitted and the heading will read "Mortgages" or "Home Purchase Plans", as appropriate.
- b. If the *firm* offers equity release transactions, then the heading "Home Finance Products" should be omitted and the heading will read "Equity Release Products" (even if the *firm* offers equity release transactions from only one sector).

(2) Describing the products:

- a. If a firm advises or gives personalised information on lifetime mortgages, it must change “mortgage” to “lifetime mortgage”, where the firm sells only regulated lifetime mortgage contracts.
- b. If a firm advises or gives personalised information on home reversion plans, it must use the text in brackets relating to home reversion plans.
- c. If the firm advises or gives personalised information on products from both equity release market sectors, then it must use the term 'equity release products' when referring to them collectively.

(3) Describing the provider: If a firm advises or gives personalised information on home purchase plans or home reversion plans, it must change Firms must insert the text relating to home reversion schemes and change “mortgage” to “product” and “lender” to “company” or “provider”, as appropriate. if they advise or give personalised information on schemes in addition to advising on investments or giving personalised information on regulated lifetime mortgage contracts.

...

Note 17 – if the firm receives commission instead of, or in addition to, fees from the customer for services relating to ~~regulated home finance transactions mortgage contracts, regulated lifetime mortgage contracts~~ or home reversion schemes, it must insert a plain language explanation of this (see specimen for a plain language example). If the firm will pay over to the customer any commission the firm receives, it may refer to that fact here.

Note 18 – insert a plain language description of when any fees are payable for services relating to ~~regulated home finance transactions mortgage contracts, regulated lifetime mortgage contracts~~ or home reversion schemes. ... If a firm offers more than one pricing option in relation to equity release transactions, it should specify the pricing policy for each of them. For example, "A fee of £100 payable at the outset and £120 when you apply for a lifetime mortgage and £80 when you apply for a home reversion plan". ~~it may illustrate each with a separate box.~~ If a firm does not charge a fee, the text for the second box should be abbreviated to 'A fee'.

Note 19 – omit this part of the CIDDD on ‘Refund of fees’ if the firm has indicated that there will be “No fee” for services in relation to ~~regulated home finance transactions mortgage contracts, regulated lifetime mortgage contracts~~ or home reversion schemes or that any fee will be payable only if the product completes.

...

Note 21 – insert a short, plain language description of the circumstances in which the fee for services in relation to ~~regulated home finance transactions mortgage contracts, regulated lifetime mortgage contracts~~ or home reversion schemes is refundable or not refundable as described. If the refund policy is different depending on the equity release transaction in question, the firm should specify the refund policy for each of them. For example, "A refund of £100 if your lifetime mortgage application falls through and a refund of £120 if your home reversion plan application falls through."

Note 22 – a *firm* may delete this line if it does not offer a partial refund for services in relation to ~~*regulated home finance transactions*~~ ~~*mortgage contracts*~~, ~~*regulated lifetime mortgage contracts*~~ or ~~home reversion schemes~~ in any circumstances.

Section 5: Who regulates us?

Note 23 – ... This section may be omitted for services relating to ~~*regulated mortgage contracts*~~ (including ~~*regulated lifetime mortgage contracts*~~) and ~~home reversion schemes~~ ~~*home finance transactions*~~ in accordance with MCOB 4.4.1R(3). If this section is omitted, the other sections of the CIDD must be renumbered accordingly.

...

Lifetime mortgage Home finance products warning

Note 40 - This warning box should be added when the *firm* sells ~~*regulated lifetime mortgages*~~ ~~*contracts*~~ or ~~home reversion schemes~~ ~~*home reversion plans*~~ or both.

Note 41 - A *firm* must only include this paragraph if the services to which the CIDD relates include *home purchase activities*. If the *firm* does not carry on *regulated mortgage activities*, it must include the second sentence and delete the third. If the *firm* carries on *regulated mortgage activities* as well as *home purchase activities* it must omit the second sentence and include the third.

Annex H

Amendments to the Insurance: Conduct of Business sourcebook (ICOB)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

- 3.1.3 G A communication may contain both a *non-investment financial promotion* and one or more of ~~a financial promotions of other products and a qualifying credit promotion~~, for example, a leaflet from a firm which describes the range of insurance, savings and mortgage products it provides. In such cases, ~~ICOB 3, COB 3 and MCOB 3~~ the financial promotion rules in this, the Conduct of Business and the Mortgages and Home Finance: Conduct of Business sourcebooks will all be relevant.

...

Retail and commercial customers: disclosure before or immediately after conclusion of the contract

- 4.2.1 G ...
- (2) ... For example, an *insurance intermediary* who is also providing services in connection with *packaged products* or ~~regulated mortgage contracts~~ home finance transactions may wish to combine the information required by ~~ICOB 4.2~~ this section with the status disclosure requirements in ~~COB or MCOB~~ the Conduct of Business and Mortgages and Home Finance: Conduct Business sourcebooks, and provide the information to the *customer* on initial contact, using the ~~combined initial disclosure document in ICOB 4 Annex 2~~ combined initial disclosure document.

...

- (4) ... An *insurance intermediary* may use the ~~initial disclosure document in ICOB 4 Annex 1~~ initial disclosure document, the ~~combined initial disclosure document in ICOB 4 Annex 2~~ combined initial disclosure document, a terms of business letter, or another document to provide information to the *customer*.

...

- 4.2.4 G (1) ... Alternatively, in circumstances where the *insurance intermediary* has reasonable grounds to be satisfied that the services which it is likely to provide will, in addition to relating to *non-investment insurance contracts*, also relate to ~~regulated mortgage contracts, regulated lifetime mortgage contracts~~ home

finance transactions or *packaged products*, the *insurance intermediary* may use the ~~combined initial disclosure document set out in *ICOB 4 Annex 2*~~*combined initial disclosure document*.

...

...

4.2.7 R If an *insurance intermediary* chooses to use the ~~combined initial disclosure document at *ICOB 4 Annex 2*~~*combined initial disclosure document*...

Delete ICOB 4 Annex 2R. The deleted text is not shown.

ICOB 4 Annex 2R: Combined initial disclosure document (“CIDD”)

Annex I

Amendments to the Training and Competence sourcebook (TC)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

2.1.1A G Although not subject to TC 2, a firm should have regard to TC 2 in relation to its home purchase activities when deciding how it wishes to align its systems and controls with the high level commitments in TC 1.

Where?

2.1.2 R ...

(2) In relation to *regulated mortgage activities* or home reversion activities carried on with or for a *customer*, this chapter applies if the *customer* is resident in:

(a) the *United Kingdom*; or

(b) another *EEA State*, but in this case only if the activity is carried on from an establishment maintained by the firm or its *appointed representative* in the *United Kingdom* only;

at the time that the ~~*regulated mortgage activity*~~activity is carried on.

...

...

2.1.4 R Activities to which TC 2 applies

	Activity	Extent of Application
1. Employees engaging in:	<p>...</p> <p>Advising (without dealing)</p> <p>...</p> <p><u>(pa) advising a customer on a home reversion plan;</u></p> <p>...</p> <p><u>(ra) designing scripted questions for use in sales to customers of home reversion plans which do not involve personal recommendations;</u></p> <p>...</p>	<p>1. ...</p> <p>2. In relation to <i>regulated mortgage activities</i> <u>and home reversion activities</u>, whole of TC 2 applies.</p> <p>3. ...</p>
2. ...	<p>...</p> <p>(b) <i>safeguarding and administering investments</i> or holding of <i>client money</i> (unless held in the course of carrying on a <i>mortgage mediation activity</i>, <u>a reversion mediation activity</u>, or an <i>insurance mediation activity</i> only in relation to a <i>non-investment insurance contract</i>);</p> <p>...</p> <p>(g) the sales to customers of <i>regulated lifetime mortgage contracts</i> <u><i>equity release transactions</i></u> which do not involve <i>personal recommendations</i>.</p>	<p>...</p>

...

- 2.4.3 G In TC 2.4.2R(1)(b) an adequate level of application of knowledge and skills includes:
- (1) specific knowledge of the *firm's* relevant systems and procedures, and of the kinds of *designated investment business* and, regulated mortgage activities and home reversion activities carried on by the *firm*; and

...

...

2.5.1A R The time limits to which TC 2.5.1R applies

Activity in TC 2.1.4R		Examination must be passed:
1.
	(p)- <u>and</u> (q)	within two years of starting the activity
	<u>(pa)</u>	<u>no time limit</u>
...
	<u>(ra)</u>	<u>no time limit</u>
...

...

Insert the following new transitional provisions. The place where the text is added is shown, but the text is not underlined.

TC TP 2

Transitional provisions relating to home reversion plans

(1)	(2) Material to which the transitional provision applies	(3)	(4) Transitional provision	(5) Transitional provision: dates in force	(6) Handbook provision: coming into force
1	TC 2	R	<p>Competent employees who carry on lifetime mortgage and home reversion activities</p> <p>(1) This transitional provision applies:</p> <p>(a) in relation to <i>home reversion plans</i>; and</p> <p>(b) in respect of an individual employed by a <i>firm</i> at 6 April 2007, if that individual had before that date been assessed as competent by the <i>firm</i> in relation to:</p>	From 6 April 2007 for two years	Apply in relation to <i>home reversion plans</i> from 6 April 2007

		<p>(i) advising on <i>lifetime mortgages</i>;</p> <p>(ii) designing scripted questions for use in non-advised sales to customers of <i>lifetime mortgages</i>; or</p> <p>(iii) overseeing non-advised sales of <i>lifetime mortgages</i>.</p> <p>(2) The <i>firm</i> in 1(b) will (subject to (4)) be deemed to have complied with <i>TC 2.4.5R</i> in respect of activities carried on in relation to <i>home reversion plans</i> that correspond to those in (1)(b) provided that:</p> <p>(a) the individual has been assessed as competent to apply the knowledge and skills necessary to engage in or oversee the relevant home reversion activity before 6 April 2007;</p> <p>(b) the home reversion activity which the individual engages in or oversees continues to be the same, or substantially the same as that immediately before 6 April 2007; and</p> <p>(c) the individual has not experienced any significant break of employment since the previous assessment.</p> <p>(3) Any other <i>firm</i> which subsequently employs the individual in 1(b) will (subject to (4)) be deemed to have complied with <i>TC 2.4.5R(1)(b)</i> provided that:</p> <p>(a) the conditions in 2(b) and (c) are met; and</p> <p>(b) the <i>firm</i> assesses the individual to be competent in accordance with <i>TC 2.4.5R(1)(a)</i>.</p> <p>(4) If the individual has not passed</p>		
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

			an appropriate home reversions top-up examination before 6 April 2009, a <i>firm</i> in (2) or (3) will cease to be deemed to comply with TC 2.4.5R in relation to that individual.		
2		G	<p>Until 5 April 2009, a <i>firm</i> may rely on paragraph 1 to assess an individual as competent to:</p> <p>(1) advise on <i>home reversion plans</i>;</p> <p>(2) design scripted questions for use in non-advised sales to customers of <i>home reversion plans</i>; or</p> <p>(3) oversee non-advised sales of <i>home reversion plans</i>,</p> <p>if that individual had been assessed by the <i>firm</i> as competent before 6 April 2007 in relation to corresponding <i>lifetime mortgage</i> activities and the activity or role of that individual in relation to his home reversion activities after that date remains the same or substantially the same as it was prior to it.</p> <p>After 5 April 2009 a <i>firm</i> may not rely on paragraph 1 to assess an individual as competent: the individual must be assessed as competent and must have passed an appropriate home reversions top-up examination if they are to continue to carry on a home reversion activity in (1), (2) or (3) after that date. If the individual has not passed an appropriate home reversions top-up examination before 6 April 2009, the individual must be assessed as competent and must have passed an appropriate examination on equity release if they are to carry on a home reversion activity in</p>	From 6 April 2007 for two years	Apply in relation to <i>home reversion plans</i> from 6 April 2007

			(1), (2) or (3).		
3		G	A <i>firm</i> which relies on paragraph 1 of this table in establishing the competence of an individual should have regard to TC 2.6. In particular, a <i>firm</i> should keep under review the status of an individual deemed competent under paragraph 1 and consider whether an individual may no longer be competent (for example in the light of repeated failures to pass an appropriate home reversion top-up examination).	From 6 April 2007 for two years	Apply in relation to <i>home reversion plans</i> from 6 April 2007
4	TC 2	R	<p>Competent employees who carry on home reversion activities only</p> <p>(1) This transitional provision applies:</p> <p>(a) in relation to <i>home reversion plans</i>; and</p> <p>(b) in respect of an individual employed by a <i>firm</i> at 6 April 2007 other than an individual described in paragraph (1)(b) of transitional provision 1.</p> <p>(2) The <i>firm</i> in 1(b) will (subject to (4)) be deemed to have complied with TC 2.4.5R in respect of:</p> <p>(a) advising on <i>home reversion plans</i>;</p> <p>(b) designing scripted questions for use in non-advised sales to customers of <i>home reversion plans</i>; or</p> <p>(c) overseeing non-advised sales of <i>home reversion plans</i>,</p> <p>provided that:</p> <p>(A) the individual has been assessed as competent to apply the knowledge and skills necessary to</p>	From 6 April 2007 for two years	Apply in relation to <i>home reversion plans</i> from 6 April 2007

			<p>engage in or oversee the relevant home reversion activity before 6 April 2007;</p> <p>(B) the home reversion activity which the individual engages in or oversees continues to be the same, or substantially the same as that immediately before 6 April 2007; and</p> <p>(C) the individual has not experienced any significant break of employment since the previous assessment.</p> <p>(3) Any other <i>firm</i> which subsequently employs the individual in 1(b) will (subject to (4)) be deemed to have complied with TC 2.4.5R(1)(b) provided that:</p> <p>(a) the conditions in 2(B) and (C) are met; and</p> <p>(b) the <i>firm</i> assesses the individual to be competent in accordance with TC 2.4.5R(1)(a).</p> <p>(4) If the individual has not passed an appropriate examination before 6 April 2009, a <i>firm</i> in (2) or (3) will cease to be deemed to comply with TC 2.4.5R in relation to that individual.</p>		
5		G	<p>Until 5 April 2009, a <i>firm</i> may rely on paragraph 4 of this table to assess an individual as competent to:</p> <p>(i) advise on <i>home reversion plans</i>;</p> <p>(ii) design scripted questions for use in non-advised sales to customers of <i>home reversion plans</i>; or</p> <p>(iii) oversee non-advised sales of</p>	From 6 April 2007 for two years	Apply in relation to <i>home reversion plans</i> from 6 April 2007

			<p><i>home reversion plans,</i></p> <p>if that individual did not carry out (and therefore had not been assessed as competent in relation to) <i>lifetime mortgage</i> activities prior to 6 April 2007 and the activity or role of that individual in relation to his home reversion activities after that date remains the same or substantially the same as it was prior to it.</p> <p>After 5 April 2009 a <i>firm</i> may not rely on paragraph 4 to assess an individual as competent: the individual must be assessed as competent and must have passed an appropriate examination on equity release if they are to carry on a home reversion activity in (i), (ii) or (iii).</p>		
6		G	<p>A <i>firm</i> which relies on paragraph 4 of this table in establishing the competence of an individual should have regard to TC 2.6. In particular, a <i>firm</i> should keep under review the status of an individual deemed competent under paragraph 4 and consider whether an individual may no longer be competent (for example in the light of repeated failures to pass an appropriate exam).</p>	<p>From 6 April 2007 for two years</p>	<p>Apply in relation to <i>home reversion plans</i> from 6 April 2007</p>

Annex J

Amendments to the Supervision manual (SUP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

3.1.1A G For the avoidance of doubt, this chapter does not apply to the following *firms* if they do not hold *client money* or client assets and do not appoint an auditor under or as a result of a statutory provision other than in the *Act*:

...

(6) ~~mortgage~~home finance administrators;

(7) ~~mortgage~~home finance intermediaries;

(8) ~~mortgage lenders~~home finance providers;

Applicable sections (see SUP 3.1.1R)

3.1.2 R

	(1) Category of firm	(2) Sections applicable to the firm	(3) Sections applicable to its auditor
...
(9)	Mortgage lender <u>Home finance provider</u> which has an auditor appointed under or as a result of a statutory provision other than in the <i>Act</i>	SUP 3.1 - SUP 3.7	SUP 3.1, SUP 3.2, SUP 3.8
...
(12)	Mortgage <u>Home finance intermediary</u> or mortgage <u>home finance administrator</u> which has an auditor appointed under or as a result of a statutory provision other than in the <i>Act</i> .	SUP 3.1, SUP 3.2, SUP 3.7	SUP 3.1, SUP 3.2, SUP 3.8

...

10.1.17 G ...

- (2) *SUP 10.1.16R* has a limited application to an *appointed representative* appointed by a *firm* to carry on *insurance mediation activity* or ~~*mortgage*~~*home finance* *mediation activity*.

...

...

...

What is a "network"?

- 12.2.6 G A *firm* is referred to as a '*network*' if ... However, a *network* does not include:

...

- (d) A ~~*mortgage lender*~~*home finance provider*.

Business for which an appointed representative is exempt

- 12.2.7 G (1) The *Appointed Representatives Regulations* ... describe, among other things, the business for which an *appointed representative* may be exempt, which is business which comprises any of:

...

- (d) ~~*arranging (bringing about) regulated mortgage contracts*~~*arranging (bringing about) a home finance transaction* (articles 25A(1), 25B(1) and 25C(1) of the *Regulated Activities Order*);

- (e) ~~*making arrangements with a view to regulated mortgage contracts*~~*making arrangements with a view to a home finance transaction* (articles 25A(2), 25B(2) and 25C(2) of the *Regulated Activities Order*);

...

- (j) ~~*advising on regulated mortgage contracts*~~*advising on a home finance transaction* (articles 53A, 53B and 53C of the *Regulated Activities Order*); and

...

...

What is an introducer appointed representative?

- 12.2.8 G ...

- (2) The permitted scope of appointment of an *introducer appointed representative* does not include in particular:

...

- (d) *advising on investments, providing basic advice on stakeholder products, advising on ~~regulated mortgage contracts~~ a home finance transaction or other activity that might reasonably lead a customer to believe that he had received basic advice or advice on investments or on ~~regulated mortgage contracts~~ home finance transactions or that the introducer appointed representative is permitted to provide basic advice or give advice on investments or on ~~regulated mortgage contracts~~ home finance transactions.*

...

...

- 12.4.5E G (1) Under the relevant Advising and Selling chapters of *COB*, *ICOB* and *MCOB*, the customer will receive ... details of the complaints procedure for the *product provider*, *insurer* or ~~*mortgage lender*~~ *home finance provider*.

...

- (3) The complaints procedure should also explain that the customer has a choice of whether to contact the ... ~~*mortgage lender*~~ *home finance provider* and that ...

...

...

- 12.5.2 G (1) Regulations 3(1) to (3B) of the *Appointed Representatives Regulations* makes it a requirement that ...

...

- (2) Under the *Appointed Representative Regulations*, an appointed representative is treated as representing other counterparties if, broadly, it:

...

- (e) *arranges:*

- (i) for persons to enter (or with a view to persons entering) as ~~borrowers~~ customers into ~~regulated mortgage contracts~~ home finance transactions (or as plan providers in the case of a home reversion plan) with other counterparties; ~~or~~
- (ii) for a person to vary a ~~regulated mortgage contract~~ home finance transaction entered into by a person as ~~borrower~~ customer (or as plan provider in the case of a home reversion plan) on or after

31 October 2004 (in the case of a regulated mortgage contract) or 6 April 2007 (in all other cases) with other counterparties; or

- (f) gives advice (within articles 53A, 53B or 53C of the *Regulated Activities Order* (~~Advising on investments~~)) on the merits of:
- (i) persons entering as ~~borrowers~~ customers into ~~regulated mortgage contracts~~ home finance transactions (or as plan provider in the case of a home reversion plan) with other counterparties; or
 - (ii) persons varying ~~regulated mortgage contracts~~ home finance transactions entered into by them as ~~borrower~~ customer (or as plan provider in the case of a home reversion plan) on or after 31 October 2004 (in the case of a regulated mortgage contract) or 6 April 2007 (in all other cases) with other counterparties;

...

...

...

Prohibition of multiple principals for certain activities

- 12.5.6A R (1) A firm must ensure that, if appointing an *appointed representative* (other than an *introducer appointed representative*), to carry on any of the following *regulated activities*, its written contract prohibits the *appointed representative* from carrying on any of the specified activities as an *appointed representative* for another firm:

...

- (c) any *regulated mortgage activities* in relation to *lifetime mortgages*: the prohibition must cover all *lifetime mortgages*;
- (d) any reversion activities: the prohibition must cover all reversion activities;
- (e) any home purchase activities: the prohibition must cover all home purchase activities.

...

12.5.6B G ...

- (2) The effect of ~~SUP 12.5.6AR(1)(b)~~ and ~~SUP 12.5.6AR(1)(c)~~ the rule prohibiting multiple principals for certain activities is that, in relation to ~~regulated mortgage~~ home finance activities with ~~customer~~, appointed representatives are restricted to having ~~two~~ four principals: one for regulated mortgage contracts other than lifetime mortgages, and one for lifetime mortgages, one for home reversion plans and one for home purchase plans.

...

Obligations of firms under the approved persons regime

- 12.6.8 G (1) ...
- (a) ...
- (b) although the *customer functions* (other than the investment manager function) apply to an *appointed representative*, the descriptions of the functions themselves do not extend to ... ~~mortgage~~ home finance *mediation activity* ...

Annex K

Amendments to the Compensation sourcebook (COMP)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

Areas of particular interest to claimants (see *COMP* 1.1.3G).

1.3.3 G This Table belongs to ~~COMP 4.3.3~~1.1.3G.

...
Q2	How much compensation will I be offered?		
A2	This depends on whether your <i>protected claim</i> is:		

	(4)	a <i>claim</i> in connection with protected mortgage <u>businesshome finance mediation</u> .	<i>COMP</i> 5.6

Q3	How will the FSCS calculate the compensation that is offered to me?		
A3	Again, this will depend on whether your <i>protected claim</i> is-a:		

	(4)	a <i>claim</i> in connection with protected mortgage <u>businesshome finance mediation</u> .	<i>COMP</i> 12.4.17R
...

...

Protected investment business and protected ~~mortgage business~~home finance mediation

4.3.7 G There are no exceptions to *COMP* 4.2.2R for *claims* made in connection with *protected investment business* or ~~protected mortgage business~~home finance mediation.

...

What is a protected claim?

5.2.1 R A *protected claim* is:

...

- (4) a claim in connection with *protected mortgage business home finance mediation* (see *COMP 5.6*); or

...

...

Protected mortgage business home finance mediation

5.6.1 R *Protected mortgage business home finance mediation* is:

- (1) *advising on regulated mortgage contracts a home finance transaction*; or
- (2) *arranging (bringing about) regulated mortgage contracts a home finance transaction*; or
- (3) *making arrangements with a view to regulated mortgage contracts a home finance transaction*; or
- (4) *agreeing to carry on a regulated activity in (1) to (3)*; or
- (5) the activities of a *mortgage lender home finance provider* which would be *arranging* but for article 28A of the *Regulated Activities Order* (*Arranging contracts or plans* to which the arranger is a party);

provided that the condition in *COMP 5.6.2R* is satisfied.

5.6.2 R *COMP 5.6.1R* applies only if the *protected mortgage business home finance mediation* was carried on by a *relevant person*:

- (1) with a *customer* who was a resident in the *United Kingdom*; or
- (2) from an establishment maintained by the *relevant person* (or its *appointed representative*) in the *United Kingdom* with a *customer* who was resident elsewhere in the *EEA*;

at the time the *protected mortgage business home finance mediation* was carried on.

...

6.3.4 R For *claims* arising in connection with *protected investment business* or *protected mortgage business*, *protected home finance mediation* or *protected non-investment insurance mediation*, the *FSCS* has the additional power to determine that a *relevant person* is in *default* if it is satisfied that a *protected claim* exists, and ...

...

8.2.4 R For claims made in connection with *protected investment business* or ~~*protected mortgage business*~~, *protected home finance mediation* or *protected non-investment insurance mediation*, the *FSCS* may disregard a defence of limitation where the *FSCS* considers that it would be reasonable to do so.

...

9.2.2 R The *FSCS* may postpone paying compensation if:

...

- (2) in the case of a *claim* relating to *protected investment business* which is not an *ICD claim* or a claim relating to ~~*protected mortgage business*~~ *home finance mediation*, the *FSCS* considers that the claimant should first exhaust his rights against the *relevant person* or any third party, or make and pursue an application for compensation to any other *person*; or

...

...

Table limits

10.2.3 R This table belongs to *COMP* 10.2.1R

Type of claim	Level of cover	Maximum payout
...
<i>Protected mortgage business</i> <i>home finance mediation</i>	100% × first £30,000 90% × next £20,000	£48,000
...

...

~~*Protected mortgage business*~~ *home finance mediation*

12.3.7 R For a *claim* made in connection with ~~*protected mortgage business*~~ *home finance mediation*, the *FSCS* must determine a specific date as the *quantification date*, and this date may be either on, before or after the date of determination of default.

...

~~*Protected mortgage business*~~ *home finance mediation*

12.4.17 R The *FSCS* may pay compensation for any *claim* made in connection with ~~*protected mortgage business*~~ *home finance mediation* only to the extent that the *FSCS* considers that the payment of compensation is essential in order to

provide the claimant with fair compensation.

- 12.4.18 R The *FSCS* must not pay compensation for any *claim* in connection with *protected ~~mortgage~~ businesshome finance mediation* to the extent that it relates to or depends on:

...

- 12.4.19 R The *FSCS* may decide to reduce the compensation that would otherwise be payable for a *claim* made in connection with *protected ~~mortgage~~ businesshome finance mediation* if it is satisfied that there is evidence of contributory negligence by the claimant and it would be inequitable for *FSCS* not to take account of that fact.

...

Annex L

Amendments to the Electronic Commerce Directive sourcebook (ECO)

In this Annex, underlining indicates new text and striking through indicates deleted text.

...

Exceptions: ~~regulated mortgage contracts~~ home finance transactions

1.2.5A R *ECO 1.2.1 R does not apply to an incoming ECA provider with respect to an electronic commerce activity which relates to a ~~regulated mortgage contract~~ home finance transaction.*

LISTING RULES (AMENDMENT) INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the powers and related provisions in the following sections of the Financial Services and Markets Act 2000:
- (1) section 73A (Part 6 rules);
 - (2) section 96 (Obligations of issuers of listed securities);
 - (3) section 101 (Listing rules: general provisions); and
 - (4) Schedule 7 (The Authority as Competent Authority for Part VI).

Commencement

- B. This instrument comes into force on 1 November 2006.

Amendments to the Handbook

- C. The Glossary of definitions is amended in accordance with Annex A to this instrument.
- D. The Listing Rules (LR) are amended in accordance with Annex B to this instrument.

Citation

- E. This instrument may be cited as the Listing Rules Amendment Instrument 2006.

By order of the Board
25 October 2006

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text.

Delete the definition of “Combined Code” and substitute the following definition:

Combined Code (in *LR*) in relation to an *issuer*:

- (1) in respect of a reporting period commencing on or after 1 November 2006, the Combined Code on Corporate Governance published in June 2006 by the Financial Reporting Council; or
- (2) in respect of a reporting period commencing before 1 November 2006, the Combined Code on Corporate Governance published in July 2003 by the Financial Reporting Council.

Annex B

Amendments to the Listing Rules (LR)

In this Annex, underlining indicates new text and striking through indicates deleted text.

In LR Appendix 1, delete the definition of “Combined Code” and substitute the following definition:

Combined Code

in relation to an *issuer*:

- (1) in respect of a reporting period commencing on or after 1 November 2006, the Combined Code on Corporate Governance published in June 2006 by the Financial Reporting Council; or
- (2) in respect of a reporting period commencing before 1 November 2006, the Combined Code on Corporate Governance published in July 2003 by the Financial Reporting Council.

**REINSURANCE DIRECTIVE (CONSEQUENTIAL AMENDMENTS)
INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 ("the Act"):
- (1) section 138 (General rule-making power);
 - (2) section 150(2) (Actions for damages);
 - (3) section 156 (General supplementary powers);
 - (4) section 157(1) (Guidance);
 - (5) section 340 (Appointment); and
 - (6) paragraph 17(1) of Schedule 1 (Fees).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force as follows:
- (1) Part 1 of Annex A and Annex C come into force on 6 November 2006; and
 - (2) the remainder of this instrument comes into force on 31 December 2006.

Amendments to the Handbook

- D. The modules of the FSA's Handbook of rules and guidance listed in column (1) below are amended in accordance with the Annexes to this instrument listed in column (2).

Annex A

Amendments to the Glossary of definitions

In this Annex, underlining indicates new text and striking through indicates deleted text. Where new definitions are being inserted, the text is not underlined.

Part 1: New definitions

Insert the following new definitions in the appropriate alphabetical position:

<i>captive reinsurer</i>	<p>a <i>pure reinsurer</i> owned by:</p> <ul style="list-style-type: none">(a) a financial <i>undertaking</i> other than an <i>insurance undertaking</i> or a <i>reinsurance undertaking</i>; or(b) a <i>group</i> of <i>insurance undertakings</i> or <i>reinsurance undertakings</i> to which the <i>Insurance Groups Directive</i> applies; or(c) a non-financial <i>undertaking</i>, <p>the purpose of which is to provide <i>reinsurance</i> cover exclusively for the risks of the <i>undertaking</i> or <i>undertakings</i> to which it belongs or of an <i>undertaking</i> or <i>undertakings</i> of the <i>group</i> of which that <i>pure reinsurer</i> is a member.</p>
<i>EEA ISPV</i>	<p>an <i>ISPV</i> (including a <i>UK ISPV</i>) whose head office is in any <i>EEA State</i> and which has received authorisation pursuant to article 46 of the <i>Reinsurance Directive</i> from its <i>Home State Regulator</i>.</p>
<i>EEA pure reinsurer</i>	<p>a <i>reinsurance undertaking</i> (other than an <i>ISPV</i>) whose head office is in any <i>EEA State</i> except the <i>United Kingdom</i> and which has received authorisation under article 3 of the <i>Reinsurance Directive</i> from its <i>Home State Regulator</i>.</p>
<i>insurance special purpose vehicle</i>	<p>an <i>undertaking</i>, other than an <i>insurance undertaking</i> or <i>reinsurance undertaking</i> which has received an official authorisation in accordance with article 6 of the <i>First Non-Life Directive</i>, article 4 of the <i>Consolidated Life Directive</i> or article 3 of the <i>Reinsurance Directive</i>:</p> <ul style="list-style-type: none">(a) which assumes risks from such <i>insurance undertakings</i> or <i>reinsurance undertakings</i>; and(b) which fully funds its exposures to such risks through the proceeds of a debt issuance or some other financing mechanism where the repayment rights of the providers of

such debt or other financing mechanism are subordinated to the *undertaking's reinsurance obligations*.

ISPV an *insurance special purpose vehicle*.

life protection reinsurance business *reinsurance acceptances which are contracts of insurance:*

- (a) falling within *long-term insurance business class I*; or
- (b) falling within *long-term insurance business class III* and providing *index-linked benefits*;

that are not:

- (c) *with-profits insurance contracts*; or
- (d) *whole life assurances*; or
- (e) contracts to pay annuities on human life; or
- (f) contracts which pay a sum of money on the survival of the life assured to a specific date or on his earlier death.

mixed insurer an *insurer* (other than a *pure reinsurer*) which carries on *reinsurance business* and where one or more of the following conditions is met in respect of its *reinsurance acceptances*:

- (a) the *premiums* collected in respect of those acceptances during the previous *financial year* exceeded 10% of its total *premiums* collected during that year;
- (b) the *premiums* collected in respect of those acceptances during the previous *financial year* exceeded €50 million; and
- (c) the *technical provisions* in respect of those acceptances at the end of the previous *financial year* exceeded 10% of its total *technical provisions* at the end of that year.

permanent health reinsurance business *reinsurance acceptances which are contracts of insurance falling within long-term insurance business class IV*.

Reinsurance Directive the Directive of 16 November 2005 of the European Parliament and of the Council (No 2005/68/EC) on reinsurance and amending the *First Non-Life Directive* and the *Third Non-Life Directive* as well as the *Insurance Groups Directive* and the *Consolidated Life Directive*.

reinsurance undertaking an *insurance undertaking* whose *insurance business* is restricted to *reinsurance*.

UK ISPV an *ISPV* with a *Part IV permission* to effect or carry out contracts of *insurance*.

Part 2: Amended definitions

Amend the following definitions as shown:

admissible asset (1)...
(2) ~~(in PRU)~~ otherwise:
(a) (in relation to an *insurer* which is not a *pure reinsurer*) an asset that falls into one or more categories in *PRU 2 Annex 1R*; or
(b) (in relation to a *pure reinsurer*) an asset the holding of which is consistent with compliance by the *firm* with *INSPRU 3.1.61AR*.

EEA firm ...
(f) ...
(g) an *undertaking* pursuing the activity of *reinsurance* (within the meaning of article 1 of the *Reinsurance Directive*) which has received authorisation under article 3 of the *Reinsurance Directive* from its *Home State Regulator*.

insurance health risk and life protection reinsurance capital component one of the components of the *long-term insurance capital requirement* as set out in *PRU 7.2.85R* to *PRU 7.2.86R*.

insurance holding company (1) a *parent undertaking*, other than an *insurance undertaking*, the main business of which is to acquire and hold participations in *subsidiary undertakings* and which fulfils the following conditions:
(a) its *subsidiary undertakings* are either exclusively or mainly *insurance undertakings*; and
(b) at least one of those *subsidiary undertakings* is an *UK insurer* or an *EEA firm* that is a *regulated insurance entity* or a *reinsurance undertaking*; ~~and~~

(e) ~~it is not a mixed financial holding company.~~

a parent undertaking, other than an insurance undertaking, that fulfils the conditions in paragraphs (1) (a) and (b) of this definition is not an insurance holding company if:

(c) it is a mixed financial holding company; and

(d) notice has been given in accordance with Article 4(2) of the Financial Groups Directive that the financial conglomerate of which it is a mixed financial holding company is a financial conglomerate.

(2) ...

insurer

a firm with permission to ~~effect~~effect or carry out contracts of insurance (other than ~~a bank~~a UK ISPV).

regulated related undertaking

a related undertaking that is any of the following:

....

(f) an insurance holding company; or

(g) an EEA ISPV.

Instructions for completion of Forms 11 and 12

...

1. For a *composite firm*, Forms 11 and 12 must be completed separately for the total *general insurance business* and for the total *long-term insurance business* which is *class IV*, ~~or~~ supplementary accident and sickness insurance business or *life protection reinsurance business*. For other *firms*, the forms must be completed for the total *general insurance business* or for the total *long-term insurance business* which is *class IV*, ~~or~~ supplementary accident and sickness insurance business or *life protection reinsurance business*, as appropriate.
2. Notwithstanding instruction 1, if the gross annual office premiums for *class IV* business, *life protection reinsurance business* and supplementary accident and sickness insurance in force on the 'valuation date' do not exceed 1% of the gross annual office premiums in force on that date for all *long-term insurance business*, Forms 11 and 12 need not be completed for *long-term insurance business* as long as it can be stated that the entry in line 21 of Form 60 exceeds the amount that would be obtained if Forms 11 and 12 were to be completed for *long-term insurance business*. In this circumstance, the method of estimating the entry in line 21 of Form 60, together with a statement of the gross annual office premiums in force at the 'valuation date' in respect of *Class IV* business, *life protection reinsurance business* and supplementary accident and sickness insurance, must be given in a supplementary note (code 6001).
3. When completing Forms 11 and 12 for *long-term insurance business* the accounting conventions for *general insurance business* should be followed, but reasonable approximations may be used if they are unlikely to result in an underestimate of the *insurance health risk and life protection reinsurance capital component*.

...

7. ~~If the financial year began before 1 January 2004: then~~
 - ~~11.14.2, 11.24.2, 11.52.2 and 12.27.2 should be left blank;~~
 - ~~lines 21 to 41, column 2, of Form 12 relating to *long term insurance business*, should be left blank; and~~
 - ~~no amounts should be included in column 2 of Form 11 that relate to *class IV* business.~~

If the financial year ends after 30 December 2006, the amounts to be shown in column 2 must be the amounts shown in column 1 for the previous financial year, unless Forms 11 and 12 were not completed for the previous financial year. In that event column 2 must be left blank, apart from the amounts in 11.51.2 and 12.43.2. The amounts in 11.51.2 and 12.43.2 must be calculated in accordance with the rules in force at the date to which they relate, so for a previous financial year ending prior to 31 December 2006 they must exclude *life protection reinsurance business*.

...

10. *Premiums* and *claims* are defined by references to *contracts of insurance* and these themselves are defined by the *Regulated Activities Order* so that *premiums* or *claims* may be included for contracts that would not be treated as insurance under normal accounting conventions. All direct and indirect costs related to the *claims* must be included. For *life protection reinsurance business* and *permanent health reinsurance business* the discount to the premium, during any initial period, to allow for acquisition expenses of the cedant must be ignored, i.e. an adjustment must be made to *premiums* written and *premiums* earned as if the *premium* is the amount excluding the discount and the discount had been accounted for as an expense.

...

Instructions for completion of Form 11

...

2. In accordance with *PRU 7.2.54R*, the reinsurance ratio calculated at line 49 must be:

- ~~100%~~ 1.00 if sub-total C is zero
- ~~100%~~ 1.00 if sub-total D / sub-total C exceeds ~~100%~~ 1.00;
- ~~50%~~ 0.50 if sub-total D / sub-total C is less than ~~50%~~ 0.50; and
- sub-total D / sub-total C, otherwise.

The ratio at line 49 must be shown to two decimal places, but the unrounded ratio must be used for calculating **Form 11** line 50 and **Form 12** line 41.

...

Instructions for completion of Form 13

...

11. Lines 60 to 63 and 85 relate only to *general insurance business*. The amount in lines 60-62 recoverable from *Insurance Special Purpose Vehicles* must be disclosed in a supplementary note (code 1320).

Instructions for completion of Form 60

1. The *insurance death risk capital component* in lines 11-1-4-5 column 5 is based on capital at risk for those contracts where it is not negative. Capital at risk is the benefit payable as a result of death less the *mathematical reserves* after distribution of surplus. Life protection reinsurance business written by a pure reinsurer or a mixed insurer is reported in line 11. Other ~~b~~Business in classes I, II and IX must be split between lines 142, 123 and 134 in accordance with PRU 7.2.82R. Line 142 is for temporary insurance on death where the original term of the contract is 3 years or less ~~or for a pure reinsurer~~. Line 123 is for temporary insurance where the original term is 5 years or less but more than 3 years. Line 134 is for other class I, II or IX business. For a *pure reinsurer* the factor of 0.3% in column 1 of line 1-4-5 must be replaced by 0.1%.
2. In lines 11-1-4-5 columns 2 and 3 are the gross and net capital at risk in accordance with PRU 7.2.83R. For lines 142-134 the reinsurance factor is calculated in aggregate, so column 4 is the sum of lines 142-134 column 3 divided by the sum of lines 142-134 column 2, subject to a minimum of 0.5 in accordance with PRU 7.2.81R. For line 1-4-5 column 4 is column 3 divided by column 2, subject to a minimum of 0.5 in accordance with PRU 7.2.81R. Column 5 is column 1 x column 2 x column 4.
3. The *insurance health risk and life protection reinsurance capital component* in line 21 column 5 must be equal to the entry at line 43 in Form 12 for *long-term insurance business*, unless an estimate has been made in accordance with instruction 2 to Forms 11 and 12. In this case a supplementary note (code 6001) is required as described in that instruction.
4. For the purpose of calculating the *insurance expense risk capital component* and the *insurance market risk capital component* linked contracts must be allocated to:
 - lines 323 and 423 where the *firm* bears an investment risk,
 - lines 334 and 434 where the *firm* does not bear an investment risk but where the allocation to cover *management expenses* is fixed for a period exceeding 5 years from the commencement of the contract, and
 - lines 3-4-5 and 4-4-5, otherwise.Life protection reinsurance business and permanent health reinsurance business written by a pure reinsurer or a mixed insurer must be allocated to lines 31 and 41.
5. The *insurance expense risk capital component* for linked contracts where the *firm* bears no investment risk and the allocation to cover *management expenses* does not have a fixed upper limit for a period exceeding 5 years from the commencement of the contract in line 345 is 25% of net *administrative expenses* in accordance with PRU 7.2.88R(1).
6. The *insurance expense risk capital component* for class V in line 367 column 5 is 1% of the assets of the tontine in accordance with PRU 7.2.88R(2).
7. The *insurance expense risk capital component* for other business in lines 342, 323, 334, 356 and 378 column 5 is 1% of adjusted *mathematical reserves* after distribution of surplus in accordance with PRU 7.2.88R(3). Column 4 is column 3 divided by column 2, subject to a minimum of 85% (50% for a pure reinsurer) in accordance with PRU 7.2.90R. Column 5 is column 1 x column 2 x column 4.
8. The *insurance market risk capital component* in lines 434 and 4-4-5 column 5 for class III, VII and VIII contracts where the *firm* does not bear any investment risk and in line 456 for class V contracts is nil in accordance with PRU 7.2.89R.
9. The *insurance market risk capital component* in line 442, 423, 456 and 478 column 5 is 3% of adjusted *mathematical reserves* after distribution of surplus in accordance with PRU 7.2.89R. Column 4 is column 3 divided by column 2 subject to a minimum of 85% (50% for a pure reinsurer) in accordance with PRU 7.2.90R. Column 5 is column 1 x column 2 x column 4. The amount in line 49 column 3 must equal the amount in Form 14 line 11.
10. The *long term insurance capital requirement* in line 51 column 5 is the sum of column 5 in lines 156, 21, 389 and 489.

11. ...

12. Where the previous financial year ends before 31 December 2006, column 6 must be completed using the corresponding figures from the previous return, e.g. line 12 column 6 contains the amount previously shown in line 11 column 5.

THE GENERAL PRUDENTIAL SOURCEBOOK INSTRUMENT 2006

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions in the Financial Services and Markets Act 2000 (“the Act”):
- (1) section 138 (General rule-making power);
 - (2) section 149 (Evidential provisions);
 - (3) section 150(2) (Actions for damages);
 - (4) section 156 (General supplementary powers);
 - (5) section 157(1) (Guidance); and
 - (6) section 316(1) (Direction by Authority).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. This instrument comes into force as follows:
- (1) Chapters 1 and 2 of the General Prudential Sourcebook (GENPRU) as they apply to insurers and insurance special purpose vehicles come into force on 31 December 2006.
 - (2) Sections 1.5 and 2.3 of GENPRU come into force on 31 December 2006.
 - (3) The remainder of this instrument comes into force on 1 January 2007.

Amendments to the Handbook

- D. (1) The Financial Services Authority creates GENPRU to form a new module within the Prudential Standards block of its Handbook of Rules and Guidance in accordance with the following provisions:
- (a) each provision of the Integrated Prudential Sourcebook (PRU) listed in column (1) of the table in Annex A is redesignated to form part of GENPRU in accordance with the corresponding entry in column (2) of the table in Annex A;
 - (b) each provision of the Lloyd's sourcebook (LLD) listed in column (1) of the table in Annex A is redesignated to form part of GENPRU in accordance with the corresponding entry in column (2) of the table in Annex A;

- (c) the provisions in (a) and (b) designated as "Restated text" in column (3) of the table in paragraph D(2) are amended so that they read as set out in Annex B to this instrument;
 - (d) the provisions in (a) designated as "Amended text" in column (3) of the table in paragraph D(2) are amended in accordance with Annex C to this instrument;
 - (e) the Financial Services Authority makes the rules, gives the guidance and makes the requirements designated as "New text" in column (3) of the table in paragraph D(2); and
 - (f) all the above provisions are combined so that they appear in the appropriate numerical order.
- (2) The table referred to in paragraph D(1)(c) to (e) is as follows:

GENPRU	Current designation in PRU or LLD (where applicable)	How dealt with in this instrument
GENPRU 1.1	N/A	New text
GENPRU 1.2	PRU 1.2	Restated text
GENPRU 1.3	PRU 1.3	Restated text

Citation

E. This instrument may be cited as the General Prudential Sourcebook Instrument 2006.

By order of the Board
25 October 2006

Annex A

Redesignation of PRU and LLD

- (1) The table referred to in paragraph D(1) of this instrument is as follows.
- (2) Where a reference in the Table in this Annex A is to a chapter and section only, the whole of the section listed in column (1) is redesignated as set out in column (2). The module, chapter and section of each provision is redesignated as set out in column (2); otherwise the numbering of the paragraphs in the redesignated section remains the same.

Annex B

Chapters 1 and 2 of GENPRU

In this Annex new text is not underlined and text that is deleted is not shown.

GENPRU 1.1 Application and scope

1.1 Application

Application

1.1.1 G There is no overall application statement for *GENPRU*. Each chapter or section has its own application statement.

1.1.2 G Broadly speaking however, *GENPRU* applies to:

- (1) an *insurer*;
- (2) a *bank*;
- (3) a *building society*;
- (4) a *BIPRU investment firm*; and
- (5) groups containing such *firms*.

Scope

1.1.3 R *GENPRU* applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.

1.2 Adequacy of financial resources

Application

1.2.1 R This section applies to:

- (1) a *BIPRU firm*;
- (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*; and
- (3) a *firm* to which *GENPRU 1.2.2R* applies.

1.2.2 R The *firms* referred to in *GENPRU 1.2.1R(3)* are:

- (1) an *incoming EEA firm* which:
 - (a) is a *full BCD credit institution*; and
 - (b) has a *branch* in the *United Kingdom*; and
- (2) a *third country BIPRU firm* which:
 - (a) is a *bank*; and
 - (b) has a *branch* in the *United Kingdom*.

1.2.3 R This section applies to a *firm* in *GENPRU 1.2.2R* in relation to *liquidity risk* only. Accordingly, for such a *firm*, the systems, processes and resources required by this section are only those that are required with respect to *liquidity risk*.

1.2.4 R For a *firm* described in *GENPRU 1.2.2R*, this section applies only with respect to the *branch*.

1.2.5 R This section applies to an *incoming EEA firm* only to the extent that the relevant matter is not reserved by the relevant *Single Market Directive* to the *firm's Home State regulator*.

1.2.6 R If an *insurer* carries on:

- (1) *long-term insurance business*; and
- (2) *general insurance business*;

This section applies separately to each type of business.

- 1.2.7 G The *guidance* in this section is drafted with respect to a *firm* to which this section and the other provisions of *GENPRU* and *BIPRU* referred to in this section apply in full. The *guidance* in this section is also applicable to a *firm* that falls into *GENPRU* 1.2.2R. However, the *guidance* in this section only applies to such a *firm* in respect of *liquidity risk* and it should be read accordingly.
- 1.2.8 G In the case of an *incoming EEA firm* that is a *full BCD credit institution* and of a *third country BIPRU firm* that is a *bank*, this section only applies to its *United Kingdom branch*. However, as a *branch* is not itself a legal entity separate from the rest of a *firm*, this restriction does not mean that the rest of the *firm* can necessarily be left out of account when considering compliance with this section. For example, the availability of the *branch's* liquidity resources may be affected by general liquidity problems in the *firm*. Similarly, there may be liquidity resources elsewhere in the *firm* that are available to meet liquidity problems in the *branch*.
- 1.2.9 G One factor that may affect the degree to which it is necessary to take into account the *firm* as a whole is the extent to which the *firm* manages the liquidity of the *branch* on an autonomous basis, or includes the *branch* within integrated liquidity management of the *firm* as a whole. In the latter case, the requirement in the *general stress and scenario testing rule*, insofar as it applies to liquidity, to carry out scenario analyses may be satisfied by the *firm* meeting similar requirements set by the regulator in its home country in respect of the *firm* as whole, provided that the *firm* separately identifies the impacts on the *United Kingdom branch* of the scenarios analysed. However, in the case of an *incoming EEA firm*, the application of this section is further restricted by *GENPRU* 1.2.5R.
- 1.2.10 G The scope of application of this section is not restricted to *insurers* that are subject to the relevant EC Directives.
- 1.2.11 G The adequacy of a *firm's* financial resources needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise and so, except as described in *GENPRU* 1.2.8G, this section applies to a *firm* in relation to the whole of its business. In the case of a *UCITS investment firm* this means that this section is not limited to *designated investment business* excluding *scheme management activity*. It also applies to *scheme management activity* and to activities that are not *designated investment business*.

Purpose

- 1.2.12 G Adequate financial resources and adequate systems and controls are necessary for the effective management of prudential risks. This section therefore has requirements relating to both of these topics.
- 1.2.13 G This section amplifies *Principle 4*, under which a *firm* must maintain adequate financial resources. It is concerned with the adequacy of the financial resources that a *firm* needs to hold in order to be able to meet its liabilities as they fall due. These resources include both capital and liquidity resources.

- 1.2.14 G In the case of a *bank* or *building society* this section implements Article 123 and (in part) Annex XI of the *Banking Consolidation Directive*. In the case of a *BIPRU investment firm* this section implements Article 34 of the *Capital Adequacy Directive* so far as that Article applies Article 123 of the *Banking Consolidation Directive*.
- 1.2.15 G This section also has *rules* requiring a *firm* to identify and assess risks to its being able to meet its liabilities as they fall due, how it intends to deal with those risks, and the amount and nature of financial resources that the *firm* considers necessary. *GENPRU 1.2.60R* provides that a *firm* should document that assessment. The *FSA* will review that assessment as part of its own assessment of the adequacy of a *firm's* capital. This review by the *FSA* forms part of the *FSA's* ARROW assessment of a *firm*.
- 1.2.16 G This section also has *rules* requiring a *firm* to carry out appropriate stress tests and scenario analyses for the risks it has previously identified and to establish the amount of financial resources needed in each of the circumstances and events considered in carrying out the stress tests and scenario analyses.
- 1.2.17 G The basic requirements in this section are drafted to apply to a *firm* on a solo basis. This section then goes on to describe when its requirements do and do not apply on a solo basis and on a consolidated basis (see *GENPRU 1.2.45R* to *GENPRU 1.2.47R* and *GENPRU 1.2.57R* to *GENPRU 1.2.58R*). It also sets out some details about how the solo requirements are adjusted when they are applied on a consolidated basis (see *GENPRU 1.2.48R* to *GENPRU 1.2.56G* and *GENPRU 1.2.59R*).

Outline of other related provisions

- 1.2.18 G *GENPRU 2.1* sets out the minimum *capital resources requirements* for a *firm*. *GENPRU 2.2* sets out how *capital resources* are defined and measured for the purpose of meeting the requirements of *GENPRU 2.1*.
- 1.2.19 G (1) *BIPRU 2.2* (Internal capital adequacy standards) and *INSRU 7.1* (Individual capital assessment) set out detailed *guidance* on how a *firm* should carry out the assessment referred to in *GENPRU 1.2.15G*. The more thorough, objective, and prudent a *firm's* assessment is, and can be demonstrated as being, the more reliance the *FSA* will be able to place on the results of that assessment.
- (2) *BIPRU 2.2* and *INSRU 7.1* also have information on how the *FSA* will review and respond to the assessments referred to in *GENPRU 1.2.15G*. In particular they deal with the giving of individual capital *guidance* to a *firm*, which is *guidance* about the amount and quality of capital resources that the *FSA* thinks a *firm* should hold under the *overall financial adequacy rule* as it applies on a solo level and a consolidated level.
- 1.2.20 G *SYSC* sets out general *rules* and *guidance* on the establishment and maintenance of systems and controls.

- 1.2.21 G (1) SYSC 11 sets out material on systems and controls that apply specifically to *liquidity risk*.
- (2) Chapters LM and LS of IPRU(BANK) contain *guidance* on the *overall financial adequacy rule* so far as it relates to adequate liquidity for *banks* and the *firms* to which GENPRU 1.2.2R (Application of this section to certain non-EEA firms) applies.
- (3) Chapter 5 of volume 1 of IPRU(BSOC) contains *guidance* and an *evidential provision* on the *overall financial adequacy rule* so far as it relates to adequate liquidity for a *building society*.
- (4) SYSC 11.1.21E is an *evidential provision* relating to the *general stress and scenario testing rule* concerning stress testing and scenario analyses. SYSC 11.1.24E is *evidential provision* relating to the *overall Pillar 2 rule* about *contingency funding plans*.
- (5) GENPRU 2.2 (Adequacy of financial resources) requires certain BIPRU *investment firms* to deduct *illiquid assets* when calculating their *capital resources*.
- 1.2.22 G BIPRU 2.3 contains *rules* and *guidance* on interest rate risk in the *non-trading book*. That material elaborates on the general obligation in the *overall Pillar 2 rule*.
- 1.2.23 G For a BIPRU firm using a VaR model BIPRU 7.10.72R (Risk management standards: Stress testing) sets out certain stress tests that the firm should carry out.
- 1.2.24 G BIPRU 10.6.22R (Stress testing of credit risk concentrations) sets out further stress tests that a firm should carry out if it uses certain approaches to collateral for the purposes of the *rules* about concentration risk.
- 1.2.25 G For a BIPRU firm using the IRB approach BIPRU 4.3.39R to BIPRU 4.3.40R set out a recession credit rating migration stress test that the firm should carry out. Further *rules* and *guidance* on such stress tests are set out in BIPRU 2.2 (Internal capital adequacy standards).

Requirement to have adequate financial resources

- 1.2.26 R A firm must at all times maintain overall financial resources, including *capital resources* and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due.
- 1.2.27 G The liabilities referred to in the *overall financial adequacy rule* include a firm's contingent and prospective liabilities. It excludes liabilities that might arise from transactions that a firm has not entered into and which it could avoid, for example, by ceasing to trade. It includes liabilities or costs that arise as a consequence of strategies other than continuing as a going concern. It also includes claims that could be made against a firm, which ought to be paid in accordance with fair treatment of *customers*, even if such claims could not be legally enforced.

- 1.2.28 G A *firm* should therefore make its assessment of adequate financial resources on realistic valuation bases for assets and liabilities taking into account the actual amounts and timing of cash flows under realistic adverse projections.
- 1.2.29 G Risks may be addressed through holding capital to absorb losses that unexpectedly materialise. The ability to pay liabilities as they fall due also requires liquidity. Therefore, in assessing the adequacy of a *firm*'s financial resources, both capital and liquidity needs should be considered. A *firm* should also consider the quality of its financial resources such as the loss-absorbency of different types of capital and the time required to liquidate different types of asset. SYSC 11.1.24E is an *evidential provision* relating to the *overall financial adequacy rule* concerning *contingency funding plans*.

Systems, strategies, processes and reviews

- 1.2.30 R A *firm* must have in place sound, effective and complete processes, strategies and systems:
- (1) to assess and maintain on an ongoing basis the amounts, types and distribution of financial resources, *capital resources* and internal capital that it considers adequate to cover:
 - (a) the nature and level of the risks to which it is or might be exposed;
 - (b) the risk in the *overall financial adequacy rule*; and
 - (c) the risk that the *firm* might not be able to meet its *CRR* in the future; and
 - (2) that enable it to identify and manage the major sources of risks referred to in (1), including the major sources of risk in each of the following categories where they are relevant to the *firm* given the nature and scale its business:
 - (a) credit risk;
 - (b) *market risk*;
 - (c) *liquidity risk*;
 - (d) *operational risk*;
 - (e) insurance risk;
 - (f) concentration risk;
 - (g) residual risk;
 - (h) *securitisation* risk;
 - (i) business risk;

- (j) interest rate risk (including, in the case of a *BIPRU firm*, interest rate risk in the *non-trading book*); and
 - (k) pension obligation risk.
- 1.2.31 R (1) This *rule* defines some of the terms used in the *overall Pillar 2 rule*.
- (2) Residual risk means the risk that *credit risk mitigation* techniques used by the *firm* prove less effective than expected.
- (3) *Securitisation* risk includes the risk that the *capital resources* held by a *firm* in respect of assets which it has *securitised* are inadequate having regard to the economic substance of the transaction, including the degree of risk transfer achieved.
- (4) Business risk means any risk to a *firm* arising from changes in its business, including the risk that the *firm* may not be able to carry out its business plan and its desired strategy.
- (5) Pension obligation risk is the risk to a *firm* caused by its contractual or other liabilities to or with respect to a pension scheme (whether established for its employees or those of a related *company* or otherwise). It also means the risk that the *firm* will make payments or other contribution to or with respect to a pension scheme because of a moral obligation or because the *firm* considers that it needs to do so for some other reason.
- 1.2.32 G (1) This paragraph gives *guidance* on some of the terms used in the *overall Pillar 2 rule*.
- (2) Insurance risk refers to the inherent uncertainties as to the occurrence, amount and timing of insurance liabilities.
- (3) Interest rate risk in the *non-trading book* is explained in *BIPRU 2.3* (Interest rate risk in the non-trading book).
- (4) In a narrow sense, business risk is the risk to a *firm* that it suffers losses because its income falls or is volatile relative to its fixed cost base. However, in a broader sense, it is exposure to a wide range of macro-economic, geopolitical, industry, regulatory and other external risks that might deflect a *firm* from its desired strategy and business plan. *GENPRU 1.2.73G* provides further *guidance* on business risk.
- (5) Further material on pension obligation risk can be found in *GENPRU 1.2.79G - GENPRU 1.2.86G*.
- 1.2.33 R (1) This *rule* amplifies some of the obligations in the *overall Pillar 2 rule*.
- (2) In the case of a *BIPRU firm* the processes, strategies and systems relating to concentration risk must include those necessary to ensure compliance with *BIPRU 10* (Concentration risk requirements).

- (3) As part of its obligations in respect of *market risk*, a *BIPRU firm* must consider whether the value adjustments and provisions taken for *positions* and portfolios in the *trading book* enable the *firm* to sell or hedge out its *positions* within a short period without incurring material losses under normal market conditions.
- (4) The processes, strategies and systems required by the *overall Pillar 2 rule* must take into account stress tests and scenario analyses that the *firm* is required to carry out under any other provision of the *Handbook*.
- 1.2.34 G In the *overall Pillar 2 rule*, internal capital refers to the financial resources of a *firm* which it treats as being held against the risks listed in the *overall Pillar 2 rule*. The obligation in that *rule* to assess the distribution of such capital refers, in relation to a *firm* making an assessment on a solo basis, for example, to the need to take account of circumstances where part of a *firm's* financial resources are held by a *branch* of that *firm* which are subject to restrictions on its ability to transfer that capital. An assessment of internal capital distribution might also take account of such of a *firm's* financial resources as may be ring-fenced in the event of its insolvency.
- 1.2.35 R The processes, strategies and systems required by the *overall Pillar 2 rule* must be comprehensive and proportionate to the nature, scale and complexity of the *firm's* activities.
- 1.2.36 R As part of its obligations under *GENPRU* 1.2.30R(1) (Main requirement relating to risk processes, strategies and systems), a *firm* must identify separately the amount of *tier one capital*, *tier two capital*, *tier three capital*, other capital eligible to form part of its *capital resources* and each category of capital (if any) that is not eligible to form part of its *capital resources* which it considers adequate for the purposes described in *GENPRU* 1.2.30R(1).
- 1.2.37 R The processes and systems required by the *overall Pillar 2 rule* must:
- (1) include an assessment of how it intends to deal with each of the major sources of risk identified in accordance with *GENPRU* 1.2.30R(2); and
 - (2) take into account the impact of diversification effects and how such effects are factored into the *firm's* systems for measuring risks.
- 1.2.38 G Certain risks such as systems and controls weaknesses may not be adequately addressed by, for example, holding additional capital and a more appropriate response would be to rectify the weakness. In such circumstances, the amount of financial resources required to address these risks might be zero. However, a *firm* should consider whether holding additional capital might be an appropriate response until the identified weaknesses are rectified. A *firm*, should, in accordance with *GENPRU* 1.2.60R (Documentation of risk assessments), document the approaches taken to manage these risks.
- 1.2.39 R A *firm* must:
- (1) carry out regularly the assessments required by the *overall Pillar 2 rule*; and

- (2) carry out regularly assessments of the processes, strategies and systems required by the *overall Pillar 2 rule* to ensure that they remain compliant with *GENPRU 1.2.35R*.

- 1.2.40 G A *firm* should carry out assessments of the sort described in the *overall Pillar 2 rule* and *GENPRU 1.2.39R* at least annually, or more frequently if changes in the business, strategy, nature or scale of its activities or operational environment suggest that the current level of financial resources is no longer adequate. The appropriateness of the internal process, and the degree of involvement of senior management in the process, will be taken into account by the *FSA* when reviewing a *firm's* assessment as part of the *FSA's* own assessment of the adequacy of a *firm's* financial resources. The processes and systems should ensure that the assessment of the adequacy of a *firm's* financial resources is reported to its senior management as often as is necessary.
- 1.2.41 G The assessments undertaken by *firms in run-off* may not need to be as comprehensive or frequent compared to a *firm* not in run off since this may better reflect the reduced nature and complexity of its business and reduced access to new capital. Whilst a *firm in run-off* will still need to carefully monitor the progress of the run off, a more comprehensive assessment may only be appropriate on commencement of the run off or when considering a reduction in capital through the payment of a dividend or other capital distribution or if the *firm's* circumstances change materially.

Stress and scenario tests

- 1.2.42 R (1) As part of its obligation under the *overall Pillar 2 rule*, a *firm* must, for each of the major sources of risk identified in accordance with *GENPRU 1.2.30R(2)*, carry out stress tests and scenario analyses that are appropriate to the nature of those major sources of risk, as part of which the *firm* must:
- (a) take reasonable steps to identify an appropriate range of realistic adverse circumstances and events in which the risk identified crystallises; and
 - (b) estimate the financial resources the *firm* would need in each of the circumstances and events considered in order:
 - (i) to be able to meet its liabilities as they fall due;
 - (ii) to be able to meet the *CRR*;
 - (iii) to carry out the plans referred to in *GENPRU 1.2.37R(1)*; and
 - (iv) otherwise to meet, to the extent that it considers necessary, that major source of risk.
- (2) In carrying out the stress tests and scenario analyses in (1), a *BIPRU firm* with an *IRB permission* must incorporate and take into account the stress tests required to be carried out under *BIPRU 4.3.39R* to *BIPRU 4.3.40R* (Stress tests used in assessment of capital adequacy).

- (3) In carrying out the stress tests and scenario analyses in (1), a *BIPRU firm* must incorporate and take into account any other stress tests and scenario analyses that it is required to carry out under any other provision of the *Handbook*.

- 1.2.43 G Stress tests and scenario analyses should be carried out at least annually. A *firm* should, however, consider whether the nature of the major sources of risks identified by it in accordance with *GENPRU 1.2.30R(2)* (Main requirement relating to risk processes, strategies and systems) and their possible impact on its financial resources suggest that such tests and analyses should be carried out more frequently. For instance, a sudden change in the economic outlook may prompt a *firm* to revise the parameters of some of its stress tests and scenario analyses. Similarly, if a *firm* has recently become exposed to a particular sectoral concentration, it may wish to add some stress tests and scenario analyses in order to reflect that concentration. *SYSC 11.1.21E* is an *evidential provision* relating to the *general stress and scenario testing rule* concerning scenario analysis in relation to *liquidity risk*.

Application of this section on a solo and consolidated basis: General

- 1.2.44 G (1) *GENPRU 1.2.45R - GENPRU 1.2.56G* explain when the *ICAAP rules* apply on a solo basis and when they apply on a consolidated basis. This material also explains how the *ICAAP rules* are adjusted to apply on a consolidated basis.
- (2) *GENPRU 1.2.57R - GENPRU 1.2.59R* provide that the *overall financial adequacy rule* always applies on a solo basis. They also explain when and how it applies on a consolidated basis.

Application of this section on a solo and consolidated basis: Processes and tests

- 1.2.45 R If an *insurer* is a member of an *insurance group* and *INSPRU 6.1.9R*, *INSPRU 6.1.10R* or *INSPRU 6.1.15R* (Requirement to maintain group capital) apply to it with respect to that *insurance group* the *ICAAP rules*:
- (1) apply to that *insurer* on a consolidated basis; and
- (2) do not apply to it on a solo basis.
- 1.2.46 R The *ICAAP rules* do not apply on a solo basis to a *BIPRU firm* to which the *ICAAP rules*:
- (1) apply on a consolidated basis under *BIPRU 8.2.1R* (Basic consolidation rule for a *UK consolidation group*); or
- (2) apply on a sub-consolidated basis under *BIPRU 8.3.1R* (Basic consolidation rule for a *non-EEA sub-group*).
- 1.2.47 R The *ICAAP rules* apply on a solo basis:

- (1) to an *insurer* to which those *rules* do not apply on a consolidated basis under *GENPRU 1.2.45R*;
 - (2) to a *BIPRU firm* to which those *rules* do not apply on a consolidated or sub-consolidated basis as referred to in *GENPRU 1.2.46R* (including a *BIPRU investment firm* with an *investment firm consolidation waiver*); and
 - (3) a *firm* referred to in *GENPRU 1.2.2R* (Application of this section to certain non-EEA firms).
- 1.2.48 R The requirements of the *ICAAP rules* as they apply on a consolidated basis must be carried out on the basis of the consolidated position of:
- (1) (if *GENPRU 1.2.45R* applies) that *insurance group*;
 - (2) (if *BIPRU 8.2.1R* (Basic consolidation rule for a *UK consolidation group*) applies) the *UK consolidation group* of which the *firm* is a member ; and
 - (3) (if *BIPRU 8.3.1R* (Basic consolidation rule for a *non-EEA sub- group*) applies) the *non-EEA sub-group* of which the *firm* is a member.
- 1.2.49 R (1) In accordance with the general principles in *GENPRU 1.2.48R* and *BIPRU 8* (Group risk – consolidation), for the purpose of the *ICAAP rules* as they apply on a consolidated basis:
- (a) the *firm* must ensure that the relevant group as defined in (2) have the processes, strategies and systems required by the *overall Pillar 2 rule*;
 - (b) the risks to which the *overall Pillar 2 rule* and the *general stress and scenario testing rule* refer are those risks as they apply to each member of the relevant group;
 - (c) the reference in the *overall Pillar 2 rule* to amounts and types of financial resources, *capital resources* and internal capital (referred to in this *rule* as resources) must be read as being to the amounts and types that the *firm* considers should be held by the members of the relevant group as defined in (2);
 - (d) other references to resources must be read as being to resources of the members of the relevant group as defined in (2);
 - (e) references to the *CRR* are to the consolidated capital requirements applicable to the relevant group under *BIPRU 8* (Group risk - consolidation) or, as the case may be, *INSRU 6* (Group risk: Insurance groups);
 - (f) the reference in the *overall Pillar 2 rule* to the distribution of resources must be read as including a reference to the distribution between members of the relevant group as defined in (2); and

- (g) the reference in the *overall Pillar 2 rule* to the *overall financial adequacy rule* must be read as being to that *rule* as adjusted under *GENPRU 1.2.59R* (Application of the *overall financial adequacy rule* on a consolidated basis).
- (2) For the purpose of this *rule* the relevant group is the group referred to in *GENPRU 1.2.48R* and the members of that group are those *undertakings* that are included in the scope of consolidation with respect to the *insurance group, UK consolidation group* or, as the case may be, *non-EEA sub-group* in question.
- 1.2.50 G *GENPRU 1.2.49R* means that non-financial members of the *firm's* group are excluded from the *group* assessment. Notwithstanding the scope of *GENPRU 1.2.49R*, a *firm* should nevertheless take account of risks arising from the activities of those excluded members in its overall assessment of risk.
- 1.2.51 R (1) This *rule* relates to the assessment of the amounts, types and distribution of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") under the *overall Pillar 2 rule* as applied on a consolidated basis and to the assessment of diversification effects as referred to in *GENPRU 1.2.37R(2)* as applied on a consolidated basis.
- (2) A *firm* must be able to explain how it has aggregated the risks referred to in the *overall Pillar 2 rule* and the resources required by each member of the relevant group as referred to in *GENPRU 1.2.49R(2)* and how it has taken into account any diversification benefits with respect to the group in question.
- (3) In particular, to the extent that the transferability of resources affects the assessment in (2), a *firm* must be able to explain how it has satisfied itself that resources are transferable between members of the group in question in the stressed cases and the scenarios referred to in the *general stress and scenario testing rule*.
- 1.2.52 R (1) A *firm* must allocate the total amount of financial resources, *capital resources* and internal capital identified as necessary under the *overall Pillar 2 rule* (as applied on a consolidated basis) between different parts of the relevant group (as defined in *GENPRU 1.2.49R*). *GENPRU 1.2.36R* (Identifying different tiers of capital) does not apply to this allocation.
- (2) The *firm* must carry out the allocation in (1) in a way that adequately reflects the nature, level and distribution of the risks to which the group is subject and the effect of any diversification benefits.
- 1.2.53 R A *firm* must also allocate the total amount of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") identified as necessary under the *overall Pillar 2 rule* as applied on a consolidated basis between each *firm* which is a member of the relevant group (as defined in *GENPRU 1.2.49R*) on the following basis:

- (1) the amount allocated to each *firm* must be decided on the basis of the principles in *GENPRU* 1.2.52R(2); and
 - (2) if the process in (1) were carried out for each group member, the total so allocated would equal the total amount of resources identified as necessary under the *overall Pillar 2 rule* as applied on a consolidated basis.
- 1.2.54 G A *firm* to which the *ICAAP rules* apply on a consolidated basis need not prepare a consolidated basis assessment if such an assessment has been prepared by another member of its *group*. Where that is the case, a *firm* may adopt such an assessment as its own. A *firm* nevertheless remains responsible for the assessment.
- 1.2.55 G The purpose of *GENPRU* 1.2.51R - *GENPRU* 1.2.53R is to enable the *FSA* to assess the extent, if any, to which a *firm*'s assessment, calculated on a consolidated basis, is lower than it would be if each separate legal entity were to assess the amount of capital it would require to mitigate its risks (to the same level of confidence) were it not part of a group subject to consolidated supervision under *BIPRU* 8 (Group risk - consolidation) or *INSPRU* 6.1 (Group risk: Insurance groups). The reason the *FSA* wishes to make this assessment is so that individual capital *guidance* which it gives is fair and comparable as between different *firms* and groups. Group diversification benefits which a *firm* might assert exist can be a material consideration in a capital adequacy assessment. Understanding the methods used to aggregate the different risks (for example, the correlation assumptions) is crucial to a proper evaluation of such benefits.
- 1.2.56 G Whereas a single legal entity can generally use its capital to absorb losses wherever they arise, there are often practical and legal restrictions on the ability of a group to do so. For instance:
- (1) capital which is held by overseas regulated *firms* may not be capable of being remitted to a *firm* in the *UK* which has suffered a loss;
 - (2) a *firm* which is insolvent or likely to become so may be obliged to look to the interests of its creditors first before transferring capital to other group *companies*; and
 - (3) a parent *company* may have to balance the interests of its shareholders against the protection of the creditors of a *subsidiary undertaking* which is or might become insolvent and may, rationally, conclude that a *subsidiary undertaking* should be allowed to fail rather than provide capital to support it.

Application of this section on a solo and consolidated basis: Adequacy of resources

- 1.2.57 R The *overall financial adequacy rule* applies to a *firm* on a solo basis whether or not it also applies to the *firm* on a consolidated basis.
- 1.2.58 R The *overall financial adequacy rule* applies to a *firm* on a consolidated basis if the *ICAAP rules* apply to it on a consolidated basis.

- 1.2.59 R (1) When the *overall financial adequacy rule* applies on a consolidated basis, the *firm* must ensure that at all times its group maintains overall financial resources, including capital resources and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that the liabilities of any members of its group cannot be met as they fall due.
- (2) The group referred to in (1) is the relevant group as defined in *GENPRU 1.2.49R*.
- (3) The members of the group referred to in (1) must be identified in accordance with *GENPRU 1.2.49R*.

Documentation of risk assessments

- 1.2.60 R A *firm* must make a written record of the assessments required under this section. These assessments include assessments carried out on a consolidated basis and on a solo basis. In particular it must make a written record of:
- (1) the major sources of risk identified in accordance with *GENPRU 1.2.30R(2)* (Main requirement relating to risk processes, strategies and systems);
- (2) how it intends to deal with those risks; and
- (3) details of the stress tests and scenario analyses carried out and the resulting financial resources estimated to be required in accordance with the *general stress and scenario testing rule*.
- 1.2.61 R A *firm* must retain the records of its assessments referred to in *GENPRU 1.2.60R* for at least three years.
- 1.2.62 G Where a *firm* assesses the adequacy of its *CRR* in its particular circumstances in accordance with *BIPRU 2.2* (Internal capital adequacy standards) and *INSRU 7.1* (Individual capital assessment) as a basis for deciding what financial resources are adequate, it should include this in the documentation produced in accordance with *GENPRU 1.2.60R*.

Additional guidance on stress tests and scenario analyses

- 1.2.63 G Both stress tests and scenario analyses can be undertaken by a *firm* to further a better understanding of the vulnerabilities that it faces under extreme conditions. They are based on the analysis of the impact of unlikely, but not impossible, events. These events can be financial, operational or legal or relate to any other risk that might have an economic impact on the *firm*.
- 1.2.64 G Stress testing typically refers to shifting the values of individual parameters that affect the financial position of a *firm* and determining the effect on the *firm's* financial position.

- 1.2.65 G Scenario analysis typically refers to a wider range of parameters being varied at the same time. Scenario analyses often examine the impact of adverse events on the *firm's* financial position, for example, simultaneous movements in a number of risk categories affecting all of a *firm's* business operations, such as business volumes, investment values and interest rate movements.
- 1.2.66 G There are three broad purposes of stress testing and scenario analysis. Firstly, it can be used as a means of quantifying how much capital might be absorbed if an adverse event or events occurred. As such it represents a simple 'what if' approach to estimating exposure to risks. This might be a proportionate approach to risk management for an unsophisticated business. Secondly, it can be used to provide a check on the outputs and accuracy of risk models; particularly, in identifying non-linear effects when aggregating risks. Thirdly, it can be used to explore the sensitivities in longer term business plans and how capital needs might change over time.
- 1.2.67 G The *general stress and scenario testing rule* requires a *firm*, as part of carrying out stress tests and scenario analyses, to take reasonable steps to identify an appropriate range of realistic circumstances and events in which a risk would crystallise. In particular:
- (1) a *firm* need only carry out stress tests and scenario analyses in so far as the circumstances or events are reasonably foreseeable, that is to say, their occurrence is not too remote a possibility; and
 - (2) a *firm* should also take into account the relative costs and benefits of carrying out the stress tests and scenario analyses in respect of the circumstances and events identified.
- 1.2.68 G Subject to *GENPRU 1.2.76G*, the purpose of stress tests and scenario analyses under the *general stress and scenario testing rule* is to test the adequacy of overall financial resources. Scenarios need only be identified, and their impact assessed, in so far as this facilitates that purpose. In particular, the nature, depth and detail of the analysis depend, in part, upon the *firm's* capital strength and the robustness of its risk prevention and risk mitigation measures.
- 1.2.69 G Both stress testing and scenario analyses are forward-looking analysis techniques, which seek to anticipate possible losses that might occur if an identified risk crystallises. In applying them, a *firm* should decide how far forward to look. This should depend upon:
- (1) how quickly it would be able to identify events or changes in circumstances that might lead to a risk crystallising resulting in a loss; and
 - (2) after it has identified the event or circumstance, how quickly and effectively it could act to prevent or mitigate any loss resulting from the risk crystallising and to reduce exposure to any further adverse event or change in circumstance.

- 1.2.70 G The time horizon over which stress tests and scenario analysis should be carried out should depend on the maturity and liquidity of the *positions* stressed. For example, for the *market risk* arising from the holding of investments this should depend upon:
- (1) the extent to which there is a regular, open and transparent market in those assets, which would allow fluctuations in the value of the investment to be more readily and quickly identified; and
 - (2) the extent to which the market in those assets is sufficiently liquid (and would remain liquid in the changed circumstances contemplated in the stress test or scenario analysis) to allow the *firm*, if needed, to sell, hedge or otherwise mitigate the risks relating to its holding so as to prevent or reduce exposure to future price fluctuations.
- 1.2.71 G In identifying scenarios, and assessing their impact, a *firm* should take into account, where material, how changes in circumstances might impact upon:
- (1) the nature, scale and mix of its future activities; and
 - (2) the behaviour of *counterparties*, and of the *firm* itself, including the exercise of choices (for example, options embedded in financial instruments or *contracts of insurance*).
- 1.2.72 G In determining whether it would have adequate financial resources in the event of each identified realistic adverse scenario, a *firm* should:
- (1) only include financial resources that could reasonably be relied upon as being available in the circumstances of the identified scenario; and
 - (2) take account of any legal or other restriction on the use of financial resources.
- 1.2.73 G
- (1) A *firm* should conduct stress tests and scenario analyses which project its financial position (both profitability and balance sheet position) so as to estimate both its *capital resources* and *capital resource requirements* throughout an economic or business cycle.
 - (2) A *firm* will need to consider the cycles it is most exposed to and whether these are general economic cycles or specific to particular markets, sectors or industries. The length of time over which such projections would be appropriate will therefore vary, but typically might be between three and five years.
 - (3) The projections should be based on the *firm's* business plan, but flexed to incorporate adverse trading conditions and any changes in strategy which the *firm* could and would take in response to those conditions.

- (4) Changes in strategy might be necessary for instance because capital needed to be able to continue its business at existing volumes is eroded. A *firm* may also alter its capital management strategy to restrict distributions of profits or to raise additional capital. The combined effect on capital and retained earnings should be estimated. A *firm* should document how it would react to such economic and business risks.
- (5) The *FSA* will take the projections referred to in this paragraph and the plan referred to in (4) into account as part of its *SREP*. The purpose of examining them is to enable the *FSA* to judge, at an appropriate level of certainty, whether the *firm* will be able to meet its obligations throughout a recession.
- 1.2.74 G A *firm* may consider scenarios in which expected future profits will provide capital reserves against future risks. However, it would only be appropriate to take into account profits that can be foreseen with a reasonable degree of certainty as arising before the risk against which they are being held could possibly arise. In estimating future reserves, a *firm* should deduct future dividend payment estimates from projections of future profits.
- 1.2.75 G (1) A *firm* should assess the nature and severity of the economic recession or business cycle changes which are relevant to it given the nature and scale of its business. When projecting its *capital resources* and *CRR* a *firm* should consider a range of stresses and scenarios both in nature and severity.
- (2) Stress and scenario analyses should, in the first instance, be aligned with the risk appetite of the *firm* and the calibration of such stress and scenario analyses should be reconciled back to a clear statement setting out the premise upon which the *firm's* internal capital assessment under the *overall Pillar 2 rule* is based.
- (3) A *firm* with an *IRB permission* should ensure that the range of stresses and scenarios considered encompasses the severity of recession specified in BIPRU 4.3.40R (Stress tests used in assessment of capital adequacy), which is one that might be expected to occur once in a 25 year period. Other firms may also find that this a useful reference point when discussing their assessments with the *FSA*.
- (4) A *firm* may also consider scenarios in which the amount of capital it currently holds would be exhausted. This would provide useful information about the reasonableness or remoteness of such scenarios arising. Where a *firm* uses capital models as part of its risk management processes, considering the sensitivity of model results to variations around the most likely ruin scenario focuses testing on the most relevant scenarios.
- 1.2.76 G A *firm* should use the results of its stress testing and scenario analysis not only to assess capital needs, but also to decide if measures should be put in place to minimise the adverse effect on the *firm* if the risk covered by the stress or scenario test actually materialises. Such measures might be a contingency plan or might be more concrete risk mitigation steps.

- 1.2.77 G Additional *guidance* on stress tests and scenario analyses for the assessment of *capital resources* is available in *BIPRU* 2.2 (Internal capital adequacy standards) and *INSPRU* 7.1 (Individual capital assessment).
- 1.2.78 G Additional *guidance* in relation to stress tests and scenario analysis for *liquidity risk* is available in *SYSC* 11 (Liquidity risk systems and controls).
- Pension obligation risk
- 1.2.79 G *GENPRU* 1.2.80G - *GENPRU* 1.2.86G contain *guidance* on the assessment required by *GENPRU* 1.2.30R(2)(k) (Pension risk).
- 1.2.80 G The pension scheme itself (i.e. the scheme's assets and liabilities) is not the focus of the risk assessment; it is the *firm's* obligations towards the pension scheme which is.
- 1.2.81 G If a *firm* has a current funding obligation in excess of normal contributions or there is a risk that such a funding obligation will arise then, when calculating available capital resources, it should reverse out any accounting deficit and replace this in its capital adequacy assessment with its best estimate, calculated in discussion with the scheme's actuaries or trustees, of the cash that will need to be paid into the scheme in addition to normal contributions over the foreseeable future. This may differ from the approach taken in assessing pension scheme risks for the purposes of calculating resources to meet the *CRR*, where a *firm* may not need to consider funding obligations beyond the next five years.
- 1.8.82 G A *firm* should assess the risks that increase its obligations towards the pension scheme that might lead to the *firm* not being able to pay its other liabilities as they fall due.
- 1.2.83 G A *firm* may wish to consider the following scenarios:
- (1) one in which the *firm* gets into difficulties with an effect on its ability to fund the pension scheme; and
 - (2) one in which the pension scheme position deteriorates (for example, because investment returns fall below expected returns or because of increases in life expectancy) with an effect on the *firm's* funding obligations; taking into account the management actions the *firm* could and would take.
- 1.2.84 G Scenarios in which a *firm's* employees suffer a loss or members of a pension scheme suffer a loss do not necessarily affect the *firm's* ability to pay its liabilities as they fall due.
- 1.2.85 G A *firm* should consider issues such as:
- (1) the extent to which trustees of the pension scheme or a pension regulator (such as the one created under the Pensions Act 2004) can compel a certain level of contributions or a one-off payment in adverse financial situations or in order to meet the minimum legal requirements under the scheme's trust deed and rules or under the applicable laws relating to the pension scheme;

- (2) whether the valuation bases used to set pension scheme contribution rates are consistent with the *firm's* current business plans and anticipated changes in the workforce; and
- (3) which valuation basis is appropriate given the expected investment return on scheme assets and actions the *firm* can take if those returns do not materialise.

1.2.86 G A *firm* should carry out analyses only to a degree of sophistication and complexity which is commensurate with the materiality of its pension risks.

1.3 Valuation

Application

1.3.1 R (1) This section of the *Handbook* applies to an *insurer*, unless it is:

(a) a *non-directive friendly society*;

(b) an *incoming EEA firm*; or

(c) an *incoming Treaty firm*.

(2) This section of the *Handbook* applies to a *BIPRU firm*.

(3) This section of the *Handbook* applies to a *UK ISPV*.

Purpose

1.3.2 G This section sets out, for the purposes of *GENPRU*, *BIPRU* and *INSPRU*, *rules* and *guidance* as to how a *firm* should recognise and value assets, liabilities, *exposures*, equity and income statement items.

1.3.3 G (1) In the case of a *BIPRU firm*, this section implements Article 74 of the *Banking Consolidation Directive*, Article 64(4) of the *Banking Consolidation Directive* (Own funds) and Article 33 and Part B of Annex VII of the *Capital Adequacy Directive*.

(2) In the case of an *insurer*, *GENPRU* 1.3.4R implements the requirements of Articles 23.3(viii) and 24.2(iv) of the *Consolidated Life Directive*.

General requirements: Accounting principles to be applied

1.3.4 R Subject to *GENPRU* 1.3.9R to *GENPRU* 1.3.10R and *GENPRU* 1.3.36R, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation, whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to an asset, liability, *exposure*, equity or income statement item, a *firm* must, for the purpose of that *rule*, recognise the asset, liability, *exposure*, equity or income statement item and measure its value in accordance with whichever of the following are applicable:

(1) the *insurance accounts rules*, or the Friendly Societies (Accounts and Related Provisions) Regulations 1994;

(2) Financial Reporting Standards and Statements of Standard Accounting Practice issued or adopted by the Accounting Standards Board;

(3) Statements of Recommended Practice, issued by industry or sectoral bodies recognised for this purpose by the Accounting Standards Board;

(4) the Building Societies (Accounts and Related Provisions) Regulation 1998;

- (5) *international accounting standards*; and
- (6) the Companies Act 1985.

as applicable to the *firm* for the purpose of its external financial reporting (or as would be applicable if the *firm* was a company with its head office in the *United Kingdom*).

- 1.3.5 G Except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* makes different provision, *GENPRU* 1.3.4R applies whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to the value or amount of an asset, liability, *exposure*, equity or income statement item, including:
- (1) whether, and when, to recognise or de-recognise an asset or liability;
 - (2) the amount at which to value an asset, liability, *exposure*, equity or income statement item; and
 - (3) which description to place on an asset, liability, *exposure*, equity or income statement item.
- 1.3.6 G In particular, unless an exception applies, *GENPRU* 1.3.4R should be applied for the purposes of *GENPRU*, *BIPRU* and *INSPRU* to determine how to account for:
- (1) netting of amounts due to or from the *firm*;
 - (2) the securitisation of assets and liabilities (see also *GENPRU* 1.3.7G);
 - (3) leased tangible assets;
 - (4) assets transferred or received under a *sale and repurchase* or *stock lending* transaction; and
 - (5) assets transferred or received by way of initial or variation margin under a *derivative* or similar transaction.
- 1.3.7 G In the case of an *insurer* or a *UK ISPV*, where assets or liabilities are securitised, *GENPRU* 1.3.4R only permits de-recognition where Financial Reporting Standard 5 (or, where applicable, International Accounting Standard 39) permits either de-recognition or the linked presentation. However, the *FSA* will consider granting a *waiver* to permit de-recognition in other circumstances provided that the *firm* can demonstrate that securitisation has effectively transferred risk
- 1.3.8 G Articles 23.3(viii) and 24.2(iv) of the *Consolidated Life Directive* require assets of an *insurer* that are managed on its behalf by a *subsidiary undertaking* to be taken into account for the purposes of determining the *insurer's admissible assets* and its assets in excess of concentration limits. The application of *GENPRU* 1.3.4R will result in such assets remaining on the balance sheet of the *insurer*.

General requirements: Adjustments to accounting values

- 1.3.9 R For the purposes of *GENPRU*, *BIPRU* and *INSPRU*, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation:
- (1) when a *firm*, upon initial recognition, designates its liabilities as at fair value through profit or loss, it must always adjust any value calculated in accordance with *GENPRU* 1.3.4R by subtracting any unrealised gains or adding back in any unrealised losses which are not attributable to changes in a benchmark interest rate;
 - (2) in respect of a *defined benefit occupational pension scheme*:
 - (a) a *firm* must derecognise any *defined benefit asset*;
 - (b) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*.
- 1.3.10 R An election made under *GENPRU* 1.3.9R(2) must be applied consistently for the purposes of *GENPRU*, *BIPRU* and *INSPRU* in respect of any one financial year.
- 1.3.11 G A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *FSA* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.
- 1.3.12 G The provisions of *GENPRU* 1.3.9R to *GENPRU* 1.3.10R and *GENPRU* 1.3.36R apply only to the extent that the items referred to in those paragraphs would otherwise be recognised under the accounting requirements applicable to the *firm*. Some of those requirements may only be relevant to a *firm* subject to *international accounting standards*.

General requirements: Methods of valuation and systems and controls

- 1.3.13 R
- (1) Except to the extent that *GENPRU*, *BIPRU* or *INSPRU* provide for another method of valuation, *GENPRU* 1.3.14R to *GENPRU* 1.3.34R (Marking to market, Marking to model, Independent price verification, Adjustments or reserves) apply:
 - (a) for the purposes set out in *GENPRU* 1.3.41R;
 - (b) for the purposes set out in *GENPRU* 1.3.39R; and
 - (c) to any balance sheet position measured at market value or fair value.
 - (2) A *firm* must establish and maintain systems and controls sufficient to provide prudent and reliable valuation estimates.
 - (3) Systems and controls under (2) must include at least the following elements:

- (a) documented policies and procedures for the process of valuation, including clearly defined responsibilities of the various areas involved in the determination of the valuation, sources of market information and review of their appropriateness, frequency of independent valuation, timing of closing prices, procedures for adjusting valuations, month-end and ad-hoc verification procedures; and
- (b) reporting lines for the department accountable for the valuation process that are:
 - (i) clear and independent of the front office; and
 - (ii) ultimately to a main board executive director.

General requirements: Marking to market

- 1.3.14 R Wherever possible, a *firm* must use mark to market in order to measure the value of the investments and positions to which this *rule* applies under *GENPRU* 1.3.13R and *GENPRU* 1.3.38R to *GENPRU* 1.3.41R. Marking to market is valuation (on at least a daily basis in the case of the *trading book* positions of a *BIPRU firm*) at readily available close out prices from independent sources.
- 1.3.15 R For the purposes of *GENPRU* 1.3.14R, examples of readily available close out prices include exchange prices, screen prices, or quotes from several independent reputable brokers.
- 1.3.16 R When marking to market, a *firm* must use the more prudent side of bid/offer unless the *firm* is a significant market maker in a particular position type and it can close out at the mid-market price.

General requirements: Marking to model

- 1.3.17 R Where marking to market is not possible, a *firm* must use mark to model in order to measure the value of the investments and positions to which this *rule* applies under *GENPRU* 1.3.13R and *GENPRU* 1.3.38R to *GENPRU* 1.3.41R. Marking to model is any valuation which has to be benchmarked, extrapolated or otherwise calculated from a market input. *GENPRU* 1.3.18R to *GENPRU* 1.3.25R apply when marking to model.
- 1.3.18 R When the model used is developed by the *firm*, that model must be:
 - (1) based on appropriate assumptions which have been assessed and challenged by suitably qualified parties independent of the development process;
 - (2) independently tested, including validation of the mathematics, assumptions, and software implementation; and
 - (3) (in the case of a *BIPRU firm*) developed or approved independently of the front office.

- 1.3.19 R A *firm* must ensure that its senior management are aware of the positions which are subject to mark to model and understand the materiality of the uncertainty this creates in the reporting of the performance of the business of the *firm* and the risks to which it is subject.
- 1.3.20 R A *firm* must source market inputs in line with market prices so far as possible and assess the appropriateness of the market inputs for the position being valued and the parameters of the model on a frequent basis.
- 1.3.21 R A *firm* must use generally accepted valuation methodologies for particular products where these are available.
- 1.3.22 R A *firm* must establish formal change control procedures, hold a secure copy of the model, and periodically use that model to check valuations.
- 1.3.23 R A *firm* must ensure that its risk management functions are aware of the weaknesses of the models used and how best to reflect those in the valuation output.
- 1.3.24 R A *firm* must periodically review the model to determine the accuracy of its performance.
- 1.3.25 R Examples of periodical review are assessing the continued appropriateness of the assumptions, analysis of profit and loss versus risk factors and comparison of actual close out values to model outputs.

General requirements: Independent price verification

- 1.3.26 R In addition to marking to market or marking to model, a *firm* must perform independent price verification. This is the process by which market prices or model inputs are regularly verified for accuracy and independence.
- 1.3.27 G For independent price verification, where independent pricing sources are not available or pricing sources are more subjective (for example, only one available broker quote), prudent measures such as valuation adjustments may be appropriate.
- 1.3.28 R In the case of the *trading book* positions of a *BIPRU firm*, while daily marking to market may be performed by dealers, verification of market prices and model inputs must be performed by a unit independent of the dealing room, at least monthly (or, depending on the nature of the market/trading activity, more frequently).

General requirements: Valuation adjustments or reserves

- 1.3.29 R The recognition of any gains or losses arising from valuations subject to *GENPRU* 1.3.13R and *GENPRU* 1.3.38R to *GENPRU* 1.3.41R must be recognised for the purpose of calculating *capital resources* in accordance with *GENPRU* 1.3.14R to *GENPRU* 1.3.34R (Marking to market, Marking to model, Independent price verification, Adjustments or reserves). However if *GENPRU*, *BIPRU* or *INSPRU* provide for another treatment of such gains or losses, that other treatment must be applied.

- 1.3.30 R A *firm* must establish and maintain procedures for considering valuation adjustments or reserves. These procedures must be compliant with the requirements set out in *GENPRU* 1.3.33R.
- 1.3.31 R A *firm* using third-party valuations, or marking to model, must consider whether valuation adjustments are necessary.
- 1.3.32 R A *firm* must consider the need for establishing reserves for less liquid positions and, on an ongoing basis, review their continued appropriateness in accordance with the requirements set out in *GENPRU* 1.3.33R. Less liquid positions could arise from both market events and institution-related situations e.g. concentration positions and/or stale positions.
- 1.3.33 R (1) This paragraph sets out the requirements referred to in *GENPRU* 1.3.30R and *GENPRU* 1.3.32R.
- (2) A *firm* must consider the following adjustments or reserves: unearned credit spreads, close-out costs, operational risks, early termination, investing and funding costs, future administrative costs and, where appropriate, model risk.
- (3) A *firm* must consider several factors when determining whether a valuation reserve is necessary for less liquid positions. These factors include the amount of time it would take to hedge out the position/risks within the position; the average and volatility of bid/offer spreads; the availability of market quotes (number and identity of market makers); the average and volatility of trading volumes; market concentrations; the ageing of positions; the extent to which valuation relies on marking to model and the impact of other model risks.
- 1.3.34 R If the result of establishing adjustments or reserves under *GENPRU* 1.3.29R to *GENPRU* 1.3.33R is a valuation which differs from the fair value determined in accordance with *GENPRU* 1.3.4R, a *firm* must reconcile the two valuations.
- 1.3.35 G Reconciliation differences under *GENPRU* 1.3.34R should not be reflected in the valuations under *GENPRU* 1.3 but should be disclosed to the *FSA* in prudential returns.

Specific requirements: BIPRU firms

Adjustments to accounting values

- 1.3.36 R (1) For the purposes of *GENPRU* and *BIPRU*, the adjustments in (2) and (3) apply to values calculated pursuant to *GENPRU* 1.3.4R in addition to those required by *GENPRU* 1.3.9R to *GENPRU* 1.3.10R.
- (2) A *BIPRU firm* must not recognise either:
- (a) the fair value reserves related to gains or losses on cash flow hedges of financial instruments measured at amortised cost; or

- (b) any unrealised gains or losses on debt instruments held in the available-for-sale category.
 - (3) A *BIPRU investment firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.
 - (4) The items referred to in (2) and (3) must be excluded from *capital resources*.
- 1.3.37 G Provisions for equity instruments held in the available-for-sale category can be found in *GENPRU 2.2.185R*.
- Trading book and revaluations
- 1.3.38 R *GENPRU 1.3.39R* to *GENPRU 1.3.40R* apply only to a *BIPRU firm*.
- 1.3.39 R *Trading book* positions are subject to prudent valuation rules as specified in *GENPRU 1.3.14R* to *GENPRU 1.3.34R* (Marking to market, Marking to model, Independent price verification, Adjustments or reserves). In accordance with those *rules*, a *firm* must ensure that the value applied to each of its *trading book* positions appropriately reflects the current market value. This value must contain an appropriate degree of certainty having regard to the dynamic nature of *trading book* positions, the demands of prudential soundness and the mode of operation and purpose of capital requirements in respect of *trading book* positions.
- 1.3.40 R *Trading book* positions must be re-valued at least daily.
- Specific requirements: firms carrying on insurance business
- Investments, derivatives and quasi-derivatives
- 1.3.41 R (1) For the purposes of *GENPRU* and *INSPRU*, an *insurer* or a *UK ISPV* must apply *GENPRU 1.3.14R* to *GENPRU 1.3.34R* (Marking to market, Marking to model, Independent price verification, Adjustments or reserves) to account for:
- (a) investments that are, or amounts owed arising from the disposal of:
 - (i) *debt securities*, bonds and other money- and capital-market instruments;
 - (ii) loans;
 - (iii) *shares* and other variable yield participations;
 - (iv) *units* in *UCITS schemes*, *non-UCITS retail schemes*, *recognised schemes* and any other *collective investment scheme* that invests only in *admissible assets* (including any *derivatives* or *quasi-derivatives* held by the scheme); and

(b) *derivatives and quasi-derivatives*

(2) In the case of an *insurer*, (1) is subject to *GENPRU 1.3.43R*.

Shares in and debts due from related undertakings

- 1.3.42 R *GENPRU 1.3.43R* to *GENPRU 1.3.57R* apply only to *insurers*.
- 1.3.43 R *GENPRU 1.3.13R* and *GENPRU 1.3.41R* do not apply to *shares* in, and *debts* due from a *related undertaking* that is:
- (1) a *regulated related undertaking*;
 - (2) an *ancillary services undertaking*; or
 - (3) any other *subsidiary undertaking*, the *shares* of which a *firm* elects to value in accordance with *GENPRU 1.3.47R*.
- 1.3.44 G The effect of *GENPRU 1.3.43R* is that *shares* in, and *debts* due from, *related undertakings* of the types referred to are not valued on a mark to market basis by *insurers*. As a result, *debts* due from these *undertakings*, and *shares* in *related undertakings* which are *ancillary services undertakings*, are valued at their accounting book value in accordance with *GENPRU 1.3.4R*. *Shares* in *related undertakings* referred to in *GENPRU 1.3.43R*(1) or (3) are valued by *insurers* in accordance with *GENPRU 1.3.45R* to *GENPRU 1.3.50R*.
- 1.3.45 R Except where the contrary is expressly stated in *GENPRU*, whenever a rule in *GENPRU* or *INSPRU* refers to *shares* held in, and *debts* due from, an *undertaking* referred to in *GENPRU 1.3.43R*(1) or *GENPRU 1.3.43R*(3), a *firm* must value the *shares* held in accordance with *GENPRU 1.3.47R*.
- 1.3.46 R In relation to *shares* in, and *debts* due from, an *undertaking* referred to in *GENPRU 1.3.43R*(1), *GENPRU 1.3.45R* does not apply for the purposes of *GENPRU 2.2.256R* (Adjustments for regulated related undertakings other than insurance undertakings) and *INSPRU 6.1* (Group risk: Insurance groups).
- 1.3.47 R For the purposes of *GENPRU 1.3.45R*, the value of the *shares* held in an *undertaking* referred to in *GENPRU 1.3.43R*(1) or *GENPRU 1.3.43R*(3) is the sum of:
- (1) the regulatory surplus value of that *undertaking*; less
 - (2) for the purposes of *GENPRU 2.2.256R* (Adjustments for regulated related undertakings other than insurance undertakings), the book value of the total investments in the *tier one capital resources* and *tier two capital resources* of that *undertaking* by the *firm* and its *related undertakings*; or
 - (3) for other purposes in *GENPRU* and *INSPRU*, the sum of:
 - (a) the book value of the investments by the *firm* and its *related undertakings* in the *tier two capital resources* of the *undertaking*; and

- (b) if the *undertaking* is an *insurance undertaking*, its ineligible surplus capital and any restricted assets of the *undertaking* which have been excluded under *INSPRU* 6.1.41R(1).
- 1.3.48 R For the purposes of *GENPRU* 1.3.47R(1), the regulatory surplus value of an *undertaking* referred to in *GENPRU* 1.3.43R(1) or *GENPRU* 1.3.43R(3) is, subject to *GENPRU* 1.3.49R, the sum of:
- (1) the total capital after deductions of the *undertaking*; less
 - (2) the *individual capital resources requirement* of the *undertaking*.
- 1.3.49 R (1) Subject to *GENPRU* 1.3.50R, for the purposes of *GENPRU* 1.3.48R, only the relevant proportion of the:
- (a) total capital after deductions of the *undertaking*; and
 - (b) *individual capital resources requirement* of the *undertaking*;
- is to be taken into account.
- (2) In (1), the relevant proportion is the proportion of the total number of *shares* issued by the *undertaking* held, directly or indirectly, by the *firm*.
- 1.3.50 R If the *individual capital resources requirement* of an *undertaking* in *GENPRU* 1.3.43R(1) that is a *subsidiary undertaking* exceeds total capital after deductions, then the full amount of the items referred to in *GENPRU* 1.3.49R(1) must be taken into account for the purposes of *GENPRU* 1.3.48R.
- 1.3.51 R For the purposes of *GENPRU* 1.3.47R to *GENPRU* 1.3.50R:
- (1) in relation to an *undertaking* referred to in *GENPRU* 1.3.43R(1):
 - (a) subject to (2), *individual capital resources requirement* has the meaning given by *INSPRU* 6.1.34R;
 - (b) total capital after deductions means:
 - (i) when used in relation to a *regulated related undertaking* that is subject to the *capital resources table*, the total capital after deductions (as calculated at stage M of the *capital resources table*) of the *undertaking*; and
 - (ii) when used in relation to a *regulated related undertaking* that is not subject to the *capital resources table*, the total capital after deductions calculated as if that *undertaking* were required to calculate its total capital after deductions in accordance with stage M of the calculation in the *capital resources table*, but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the relevant *sectoral rules* applicable to it; and

- (c) ineligible surplus capital has the meaning given by *INSPRU* 6.1.67R;
- (2) in relation to an *undertaking* referred to in *GENPRU* 1.3.43R(3),

- (a) the *individual capital resources requirement* is zero; and
- (b) the total capital after deductions means the total capital after deductions of the *undertaking* calculated as if the *undertaking* were an *insurance holding company* required to calculate its total capital resources in accordance with the *capital resources table* but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the *sectoral rules* for the *insurance sector*.

1.3.52 G *GENPRU* 1.3.47R to *GENPRU* 1.3.51R set out several different valuation bases for an *insurer's shares* in *related undertakings*. The regulatory surplus value (defined in *GENPRU* 1.3.48R) measures the *related undertaking's* own capital surplus or deficit. This is used: (i) in *GENPRU* 1.3.47R as a basis for calculating the impact on the firm's position of its investments in *related undertakings*; and (ii) in *INSPRU* 6.1 as a starting point for the calculation of ineligible surplus capital.

1.3.53 G *GENPRU* 1.3.47R determines how, for the purposes of the solo capital adequacy calculation of an *insurer*, that *insurer's capital resources* should be adjusted to take into account its investments in *related undertakings*.

1.3.54 G The *rules* that specify how, for the purposes of the adjusted solo capital calculation, an *insurer* should incorporate its *related undertakings* into its *capital resources* and *capital resources requirement* are set out in *INSPRU* 6.1.

Insurance Special Purpose Vehicles

1.3.55 R Except where a *rule* in *GENPRU* or *INSPRU* makes a different provision, an *insurer* must not place any value on amounts recoverable from an *ISPV* for the purposes of any *rule* in *GENPRU* or *INSPRU*.

1.3.56 G An *insurer* may value amounts recoverable from an *ISPV* if it obtains a *waiver* of *GENPRU* 1.3.55R under section 148 of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 148(4) of the *Act*, before the *FSA* will consider granting such a *waiver* are set out in *INSPRU* 1.6.13G to *INSPRU* 1.6.18G.

General insurance business: Community co-insurance operations -

1.3.57 R Where a *relevant insurer* determines the amount of a liability in order to make provision for outstanding *claims* under a *Community co-insurance operation*, then, if the *leading insurer* has informed the *relevant insurer* of the amount of the provision made by the *leading insurer* for such *claims*, the amount determined by the *relevant insurer*:

- (1) must be at least as great as the amount of the provision made by the *leading insurer*; or

- (2) in a case where it is not the practice in the *United Kingdom* to make such provision separately, must be sufficient, when all liabilities are taken into account, to include provision at least as great as that made by the *leading insurer* for such *claims*,

due regard being had in either case to the proportion of the risk covered by the *relevant insurer* and by the *leading insurer* respectively.

GENPRU 1.4 Actions for damages

1.4 Actions for damages

1.4.1 R A contravention of the *rules* in *GENPRU* does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

1.5 Application of GENPRU 1 to Lloyd's

Application of GENPRU 1.2

- 1.5.1 R *GENPRU 1.2 applies to managing agents and to the Society in accordance with:*
- (1) for *managing agents*, *INSPRU 8.1.4R*; and
 - (2) for the *Society*, *INSPRU 8.1.2R*.
- 1.5.2 R *GENPRU 1.5.7R applies to members, pursuant to the insurance market direction in GENPRU 1.5.5D.*
- Insurance market direction
- 1.5.3 G The *insurance market direction* in *GENPRU 1.5.5D* is given under section 316(1) of the *Act* (Direction by Authority) and applies to *members*.
- 1.5.4 G The purpose of the *insurance market direction* in *GENPRU 1.5.5D* is to enable the *FSA* to make the rule in *GENPRU 1.5.7R* applying to *members*, in order to:
- (1) protect *policyholders* against the risk that *members* may not have adequate financial resources to meet liabilities under or in respect of *contracts of insurance* as they fall due;
 - (2) promote confidence in the market at Lloyd's by requiring *members* to maintain financial resources which are adequate to meet their liabilities.
- 1.5.5 D With effect from 1 January 2005, Part X of the *Act* (Rules and Guidance) applies to the *members* of the *Society* taken together in relation to the *insurance market activities* of *effecting* and *carrying out contracts of insurance* written at Lloyd's, for the purpose of applying the *rules* and *guidance* in *GENPRU 1.5.7R* to *GENPRU 1.5.9G*.
- 1.5.6 G Part X of the *Act* is a *core provision* specified in section 317(1) of the *Act* (The core provisions). Section 317(2) provides that references in an applied *core provision* to an *authorised person* are to be read as references to a *person* in the class to which the *insurance market direction* applies. From 1 January 2005, references in Part X of the *Act* are to be read as references to *members* for the purposes of *GENPRU 1.5.7R* to *GENPRU 1.5.9G*.
- Members' obligation to maintain adequate financial resources
- 1.5.7 R The *members* taken together must at all times maintain overall financial resources, including capital and liquidity resources, that are adequate, both as to amount and quality, to ensure that there is no significant risk that

liabilities under or in respect of *contracts of insurance* written at Lloyd's will not be met as they fall due.

- 1.5.8 G Under *GENPRU*:
- (1) *managing agents* must ensure that adequate financial resources are available to support the *insurance business* carried on through each *syndicate* that they manage; and
 - (2) the *Society* must, having regard to the availability and value of the *central assets*, ensure that the financial resources supporting the *insurance business* of each *member* are adequate at all times.
- 1.5.9 G In practice, compliance with the requirements described in *GENPRU* 1.5.8G is likely to have the effect that *members* comply with *GENPRU* 1.5.7R.

Application of *GENPRU* 1.3

- 1.5.10 R *GENPRU* 1.3 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, *INSPRU* 8.1.4R; and
- (2) for the *Society*, *INSPRU* 8.1.2R.

Amounts receivable but not yet received

- 1.5.11 R When recognising and valuing assets that are available to meet liabilities arising from a *member's insurance business*, neither the *Society* nor *managing agents* may attribute any value to any amounts receivable but not yet received from that *member* or another *member*, except for:
- (1) timing differences provided that a corresponding amount has been deducted from *syndicate assets* or *funds at Lloyd's*;
 - (2) the *Society's callable contributions*, which are valued according to *GENPRU* 1.5.17R to *GENPRU* 1.5.18R; and
 - (3) debts owed by a *member* to another *member* of the *Society* where the debt is a liability arising out of the *insurance business* he carries on at Lloyd's.

Letters of credit, guarantees and life assurance policies

- 1.5.12 R When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may, if the conditions in *GENPRU* 1.5.13R are satisfied, attribute a value to letters of credit and guarantees that it holds in respect of a *member's insurance business*.

- 1.5.13 R The conditions referred to in *GENPRU* 1.5.12R are that letters of credit and

guarantees must be:

- (1) in the form prescribed by the *Society* from time to time and notified to the *FSA*; and
 - (2) issued by a *credit institution* or an *insurance undertaking*.
- 1.5.14 R When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may attribute a value to verifiable sums arising out of life assurance policies.
- 1.5.15 R The *Society* must value any letter of credit, guarantee or life assurance policy at its net realisable value. The *Society* must make all appropriate deductions, including those in respect of:
- (1) the expenses of realisation; and
 - (2) any reduction in value that would be likely to occur if the asset needed to be realised at short notice to meet liabilities falling due earlier than expected.
- 1.5.16 R If a *member* relies on a value attributed to a letter of credit or guarantee to meet any applicable *capital resources requirement* and that letter of credit or guarantee will expire in less than one month, the *Society* must take appropriate steps to ensure that the applicable *capital resources requirement* will continue to be met, including taking steps to ensure that sums due under the letter of credit or guarantee are drawn down when due and carried to the appropriate *Lloyd's trust fund*.
- The *Society's* callable contributions
- 1.5.17 R For the purposes of *GENPRU* 1.5.15R(2), the amount assumed to be callable from a *member* must not exceed the lower of:
- (1) the maximum *callable contribution* that *member* is or may be liable to make in that *financial year*; and
 - (2) the amount by which the *member's* own *capital resources* exceed the *member's* own *capital resources requirement*.
- 1.5.18 R The *Society* must value *callable contributions* taking appropriate account of any legal, constructive or other limits on its ability to call for contributions from *members* or to realise the amount called.
- 1.5.19 R The *Society* must give the *FSA* adequate advance notice if it proposes to change the maximum amount of the *callable contribution* that *members* may be liable to make in any *financial year*.
- 1.5.20 G The *FSA* would normally expect not less than six months' notice under *GENPRU* 1.5.19R.

Liabilities

- 1.5.21 R Subject to *GENPRU* 1.5.22R, the *Society* must recognise and value all of a *member's* liabilities in respect of its *insurance business*.
- 1.5.22 R The *Society* need not recognise or value a *member's* liabilities that are recognised and valued at *syndicate* level by *managing agents* in accordance with *GENPRU* 1.3.
- 1.5.23 R For the purposes of calculating a *member's capital resources*, when valuing a *member's funds at Lloyd's* the *Society* must deduct the value of a *member's* liabilities determined under *GENPRU* 1.5.21R.
- 1.5.24 G The liabilities to be valued under *GENPRU* 1.5.21R and deducted under *GENPRU* 1.5.23R include:
- (1) amounts owing to *members' agents*;
 - (2) amounts owing to the *Society*;
 - (3) an appropriate accrual for tax payable on any profits;
 - (4) (where required under any applicable accounting principle in accordance with *GENPRU* 1.3.4R), any contingent liability relating to liabilities reinsured into Equitas Reinsurance Ltd; and
 - (5) amounts apportioned to *members* in respect of the *credit equalisation provision* under *INSPRU* 1.4.
- 1.5.25 R In recognising and valuing a *member's* liabilities, the *Society* and *managing agents* may, to the extent permitted by applicable accounting principles, leave out of account the liabilities in respect of 1992 and prior *general insurance business* reinsured by Equitas Reinsurance Limited.
- 1.5.26 G There may be contingent liabilities associated with the reinsurance into Equitas. *GENPRU* 1.3 requires *managing agents* and the *Society* to treat those contingent liabilities in accordance with applicable accounting principles: see *GENPRU* 1.3.4R. Depending on the circumstances, *managing agents* or the *Society* may need to disclose or account for such a liability.

2.1 Calculation of capital resources requirements

Application

- 2.1.1 R This section applies to:
- (1) a *BIPRU firm*; and
 - (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*.
- 2.1.2 G The scope of application of this section is not restricted to *firms* that are subject to the relevant EC Directives.
- 2.1.3 R (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
- (2) Where an *insurer* carries on both *long-term insurance business* and *general insurance business*, except where a particular provision provides otherwise, this section applies separately to each type of business.
- 2.1.4 G The adequacy of a *firm's capital resources* needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise.
- 2.1.5 G The requirements in this section apply to a *firm* on a solo basis.

Purpose

- 2.1.6 G *Principle 4* requires a *firm* to maintain adequate financial resources. *GENPRU 2* sets out provisions that deal specifically with the adequacy of that part of a *firm's* financial resources that consists of *capital resources*. The adequacy of a *firm's* *capital resources* needs to be assessed both by that *firm* and the *FSA*. Through its *rules*, the *FSA* sets minimum *capital resources requirements* for *firms*. It also reviews a *firm's* own assessment of its capital needs, and the processes and systems by which that assessment is made, in order to see if the minimum *capital resources requirements* are appropriate (see *GENPRU 1.2* (Adequacy of financial resources), *BIPRU 2.2* (Internal capital adequacy standards) and *INSPRU 7.1* (Individual capital assessment)).

- 2.1.7 G This section sets *capital resources requirements* for a *firm*. *GENPRU 2.2* (Capital resources) sets out how, for the purpose of meeting *capital resources requirements*, the amounts or values of capital, assets and liabilities are to be determined. More detailed *rules* relating to capital, assets and liabilities are set out in *GENPRU 1.3* (Valuation) and, for an *insurer*, *INSPRU* and, for a *BIPRU firm*, *BIPRU*.
- 2.1.8 G (1) This section implements minimum EC standards for the *capital resources* required to be held by an *insurer* undertaking business that falls within the scope of the *Consolidated Life Directive* (2002/83/EC), the *Reinsurance Directive* (2005/68/EC) or the *First Non-Life Directive* (1973/239/EEC) as amended.
- (2) This section also implements provisions of the *Capital Adequacy Directive* and *Banking Consolidation Directive* concerning the level of *capital resources* which a *BIPRU firm* is required to hold. In particular it implements (in part) Articles 9, 10 and 75 of the *Banking Consolidation Directive* and Articles 5, 9, 10 and 18 of the *Capital Adequacy Directive*.
- (3) In the case of a *UCITS investment firm* this section implements (in part) Article 5a of the *UCITS Directive*.

Monitoring requirements

- 2.1.9 R A *firm* must at all times monitor whether it is complying with *GENPRU 2.1.13R* (the main capital adequacy *rule* for *insurers*) or the *main BIPRU firm Pillar 1 rules* and be able to demonstrate that it knows at all times whether it is complying with those *rules*.
- 2.1.10 G For the purposes of *GENPRU 2.1.9R*, a *firm* should have systems in place to enable it to be certain whether it has adequate *capital resources* to comply with *GENPRU 2.1.13R* and the *main BIPRU firm Pillar 1 rules* (as applicable) at all times. This does not necessarily mean that a *firm* needs to measure the precise amount of its *capital resources* and its *CRR* on a daily basis. A *firm* should, however, be able to demonstrate the adequacy of its *capital resources* at any particular time if asked to do so by the *FSA*.
- 2.1.11 R A *firm* must notify the *FSA* immediately of any breach, or expected breach, of *GENPRU 2.1.13R* (in the case of an *insurer*) or the *main BIPRU firm Pillar 1 rules* (in the case of a *BIPRU firm*).

Additional capital requirements

- 2.1.12 G The *FSA* may impose a higher capital requirement than the minimum requirement set out in this section as part of the *firm's Part IV permission* (see *GENPRU 1.2* (Adequacy of financial resources), *BIPRU 2.2* (Internal capital adequacy standards) and *INSPRU 7.1* (Individual capital assessment)).

Main requirement: Insurers

- 2.1.13 R (1) Subject to (2), an *insurer* must maintain at all times *capital resources* equal to or in excess of its *capital resources requirement (CRR)*.

- (2) An *insurer* which is a *participating insurance undertaking* and, in relation to its own *group capital resources*, is in compliance with *INSPRU 6.1.9R* (Requirement to maintain group capital), is deemed to comply with this *rule*.
- 2.1.14 R An *insurer* must comply with *GENPRU 2.1.13R* separately in respect of both its *long-term insurance business* and its *general insurance business* unless it is a *pure reinsurer* or a *captive reinsurer* which has a single *MCR* in respect of its entire business in accordance with *GENPRU 2.1.26R*.
- 2.1.15 G In order to comply with *GENPRU 2.1.14R*, an *insurer* carrying on both *general insurance business* and *long-term insurance business* will need to allocate its *capital resources* between its *general insurance business* and *long-term insurance business* so that the *capital resources* allocated to its *general insurance business* are equal to or in excess of its *CRR* for its *general insurance business* and the *capital resources* allocated to its *long-term insurance business* are equal to or in excess of its *CRR* for its *long-term insurance business*. Whereas *long-term insurance assets* cannot be used towards meeting a *firm's CRR* for its *general insurance business*, surplus *general insurance assets* may be used towards meeting the *CRR* for its *long-term insurance business* (see *INSPRU 1.5.30R* to *INSPRU 1.5.32G*). *INSPRU 1.5* (Internal-contagion risk) sets out the detailed requirements for the separation of *long-term* and *general insurance business*.
- 2.1.16 G *Insurers* commonly use different terminology for the various *GENPRU* requirements. For example, the *MCR* is traditionally known as the required minimum margin.

Calculation of the CRR for an insurer

- 2.1.17 R The *CRR* for any *insurer* carrying on *general insurance business* is equal to the *MCR* in *GENPRU 2.1.24R* or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in *GENPRU 2.1.26R*.
- 2.1.18 R The *CRR* for any *insurer* to which this *rule* applies (see *GENPRU 2.1.19R* and *GENPRU 2.1.20R*) is the higher of:
- (1) the *MCR* in *GENPRU 2.1.25R*; and
 - (2) the *ECR* in *GENPRU 2.1.38R*.
- 2.1.19 R Subject to *GENPRU 2.1.20R*, *GENPRU 2.1.18R* applies to an *insurer* carrying on *long-term insurance business*, other than:
- (1) a *non-directive mutual*;
 - (2) an *insurer* which has no *with-profits insurance liabilities*; and
 - (3) an *insurer* which has *with-profits insurance liabilities* that are, and at all times since 31 December 2004 (the coming into force of *GENPRU 2.1.18R*) have remained, less than £500 million.

- 2.1.20 R *GENPRU* 2.1.18R also applies to an *insurer* of a type listed in *GENPRU* 2.1.19R(3) if:
- (1) the *insurer* makes an election that *GENPRU* 2.1.18R is to apply to it; and
 - (2) that election is made by written notice given to the *FSA* in a way that complies with the requirements for written notice in *SUP* 15.7 (Form and method of notification).
- 2.1.21 G The effect of *GENPRU* 2.1.19R(3) is that an *insurer* to which *GENPRU* 2.1.18R applies because it has *with-profits insurance liabilities* of £500 million or more, will continue to be subject to *GENPRU* 2.1.18R even if its *with-profits insurance liabilities* fall below £500 million. However, if that happens, it may apply for a *waiver* from *GENPRU* 2.1.18R under section 148 of the *Act*. In exercising its discretion under section 148 of the *Act*, the *FSA* will have regard (among other factors) to whether there has been a material and permanent change to the *insurer's* business and to the prospects of it continuing to have *with-profits insurance liabilities* of less than £500 million.
- 2.1.22 G An *insurer* that has always had *with-profits insurance liabilities* of less than £500 million since *GENPRU* 2.1.18R came into force may wish to “opt in” to *GENPRU* 2.1.18R and therefore become a *realistic basis life firm*. By doing so, it becomes obliged to calculate a *with-profits insurance capital component* (see *GENPRU* 2.1.38R and *INSPRU* 1.3 (With-profits insurance capital component)), but it also becomes entitled to certain modifications to the way that a *firm* is required to calculate its *mathematical reserves* (see *INSPRU* 1.2.46R (Future net premiums: adjustment for deferred acquisition costs) and *INSPRU* 1.2.76R (Persistency assumptions)). The *firm* is also then required to report its liabilities on a realistic basis (see *IPRU(INS)* rule 9.31R(b)). In order to “opt in”, the *insurer* must make an election under *GENPRU* 2.1.20R that *GENPRU* 2.1.18R is to apply to it. If an *insurer* that has elected to calculate and report its *with-profits insurance liabilities* on a realistic basis subsequently decides that it no longer wishes to do so, it may seek to “opt out” by applying for a *waiver* from *GENPRU* 2.1.18R under section 148 of the *Act*. In exercising its discretion under section 148 of the *Act*, the *FSA* will have regard (among other factors) to whether there has been a material and permanent change to the *firm's* business and to whether it continues to have *with-profits insurance liabilities* of less than £500 million.
- 2.1.23 R The *CRR* for an *insurer* carrying on *long-term insurance business*, but to which *GENPRU* 2.1.18R does not apply, is equal to the *MCR* in *GENPRU* 2.1.25R or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in *GENPRU* 2.1.26R.

Calculation of the *MCR* (Insurer only)

- 2.1.24 R Subject to *GENPRU* 2.1.26R, for an *insurer* carrying on *general insurance business* the *MCR* in respect of that business is the higher of:
- (1) the *base capital resources requirement* for *general insurance business* applicable to that *firm*; and

(2) the *general insurance capital requirement*.

2.1.25 R Subject to GENPRU 2.1.26R, for an *insurer* carrying on *long-term insurance business* the *MCR* in respect of that business is the higher of:

(1) the *base capital resources requirement* for *long-term insurance business* applicable to that *firm*; and

(2) the sum of:

(a) the *long-term insurance capital requirement*; and

(b) the *resilience capital requirement*.

2.1.26 R For a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*:

(1) the *MCR* in respect of its *general insurance business* is the *general insurance capital requirement*; and

(2) the *MCR* in respect of its *long-term insurance business* is the sum of:

(a) the *long-term insurance capital requirement*; and

(b) the *resilience capital requirement*;

unless the sum of:

(3) the *general insurance capital requirement*; and

(4) the sum of:

(a) the *long-term insurance capital requirement*; and

(b) the *resilience capital requirement*;

is lower than the *base capital resources requirement*, in which case the *firm* has a single *MCR* in respect of its entire business equal to the *base capital resources requirement*.

- 2.1.27 G The *MCR* gives effect to the EC Directive minimum requirements. For *general insurance business*, the EC Directive minimum is the higher of the *general insurance capital requirement* and the relevant *base capital resources requirement*. For *long-term insurance business*, the EC Directive minimum is the higher of the *long-term insurance capital requirement* and the *base capital resources requirement*. For *pure reinsurers* and *captive reinsurers* carrying on both *general insurance business* and *long-term insurance business*, however, the *base capital resources requirement* is the EC Directive required minimum only when it is higher than the sum of the *general insurance capital requirement* and the *long-term insurance capital requirement*. The *base capital resources requirement* is the minimum guarantee fund for the purposes of article 29(2) of the *Consolidated Life Directive (2002/83/EC)*, article 17(2) of the *First Non-Life Directive (1973/239/EEC)* as amended and article 40(2) of the *Reinsurance Directive (2005/68/EC)*. The *resilience capital requirement* is an *FSA* requirement that is additional to the EC minimum requirement for *long-term insurance business*.
- 2.1.28 G The calculation of the *resilience capital requirement* is set out in *INSPRU 3.1 (Market Risk in insurance)*.

Calculation of the base capital resources requirement for an insurer

- 2.1.29 R The amount of an *insurer's base capital resources requirement* is set out in the table in *GENPRU 2.1.30R*. If an *insurer* falls within one or more of the descriptions of type of *firm* set out in *GENPRU 2.1.30R*, its *base capital resources requirement* is the highest amount set out against the different types of *firm* within whose description it falls.

2.1.30 R Table: Base capital resources requirement for an insurer
This table belongs to *GENPRU 2.1.29R*

<i>Firm category</i>		Amount: Currency equivalent of
<i>General insurance business</i>		
<i>Liability insurer (classes 10-15)</i>	<i>Directive mutual</i>	€2.4 million
	<i>Non-directive insurer</i>	€300,000
	<i>Other (including mixed insurer but excluding pure reinsurer and captive reinsurer)</i>	€3.2 million
<i>Other insurer</i>	<i>Directive mutual</i>	€1.65 million
	<i>Non-directive insurer (classes 1 to 8, 16 or 18)</i>	€225,000
	<i>Non-directive insurer (classes 9 or 17)</i>	€150,000
	<i>Mixed insurer</i>	€3.2 million
	<i>Other (excluding pure reinsurer and captive reinsurer)</i>	€2.2 million
<i>Long-term insurance business</i>		
<i>Mutual</i>	<i>Directive</i>	€2.4 million
	<i>Non-directive</i>	€600,000
<i>Any other insurer (including mixed insurer but excluding pure reinsurer and captive reinsurer)</i>		€3.2 million
<i>All business (general insurance business and long-term insurance business)</i>		
<i>Pure reinsurer</i>		€3.2 million
<i>Captive reinsurer</i>		€1 million

- 2.1.31 G (1) Under the *Insurance Directives* the amount of the *base capital resources requirement* specified in the last column of the table in *GENPRU 2.1.30R* for an *insurer* which is not a *non-directive insurer* is subject to annual review. The relevant amounts will be increased by the percentage change in the European index of consumer prices (comprising all EU member states, as published by Eurostat) from 20 March 2002, to the relevant review date, rounded up to a multiple of €100,000, provided that where the percentage change since the last increase is less than 5%, no increase will take place.
- (2) Similar provisions for the index-linking of the *base capital resources requirement* are included in the *Reinsurance Directive*, although in that case the index-linking starts from 10 December 2005. However, to ensure consistency as between all *firms* affected by the index-linking of the *base capital resources requirement* under the *Insurance Directives* and the *Reinsurance Directive*, the *FSA* intends, so far as possible, to amend the amounts in *GENPRU 2.1.30R* for all such *firms* (and *GENPRU 2.3.9R* for the *base capital resources requirements* applying to Lloyd's) when an index-linked increase is required by the *Insurance Directives*. The *FSA* may, however, have to depart from this approach where the result would be that the *base capital resources requirement* required for any type of *firm* under *GENPRU 2.1.30R* is less than the increased amount resulting from the operation of an index-linking provision to which it is subject.
- 2.1.32 G Any increases in the *base capital resources requirement* referred to in *GENPRU 2.1.31G* will be published on the *FSA* website.
- 2.1.33 R In the case of an *insurer* and for the purposes of the *base capital resources requirement*, the exchange rate from the Euro to the pound sterling for each year beginning on 31 December is the rate applicable on the last day of the preceding October for which the exchange rates for the currencies of all the European Union member states were published in the Official Journal of the European Union.

Calculation of the general insurance capital requirement (Insurer only)

- 2.1.34 R An *insurer* must calculate its *general insurance capital requirement* as the highest of:
- (1) the *premiums amount*;
 - (2) the *claims amount*; and
 - (3) the *brought forward amount*.
- 2.1.35 G The calculation of each of the *premiums amount*, *claims amount* and *brought forward amount* is set out in *INSPRU 1.1* (Capital resources requirement and technical provisions for insurance business).

Calculation of the long-term insurance capital requirement (Insurer only)

- 2.1.36 R An *insurer* must calculate its *long-term insurance capital requirement* as the sum of:

- (1) the *insurance death risk capital component*;
- (2) the *insurance health risk and life protection reinsurance capital component*;
- (3) the *insurance expense risk capital component*; and
- (4) the *insurance market risk capital component*.

2.1.37 G The calculation of each of the capital components is set out in *INSPRU 1.1* (Capital resources requirement and technical provisions for insurance business).

Calculation of the ECR (Insurer only)

2.1.38 R For an *insurer* carrying on *long-term insurance business* the *ECR* in respect of that business is the sum of:

- (1) the *long-term insurance capital requirement*;
- (2) the *resilience capital requirement*; and
- (3) the *with-profits insurance capital component*.

2.1.39 G Details of the *resilience capital requirement* and the *with-profits insurance capital component* are set out in *INSPRU 3.1* (Market Risk in insurance) and *INSPRU 1.3* (With-profits insurance capital component) respectively.

Main requirement: BIPRU firms

2.1.40 R A *BIPRU firm* must maintain at all times *capital resources* equal to or in excess of the amount specified in the table in *GENPRU 2.1.45R* (Calculation of the variable capital requirement for a BIPRU firm).

2.1.41 R A *BIPRU firm* must maintain at all times *capital resources* equal to or in excess of the *base capital resources requirement* (see the table in *GENPRU 2.1.48R*).

2.1.42 R At the time that it first becomes a *bank, building society* or *BIPRU investment firm*, a *firm* must hold *initial capital* of not less than the *base capital resources requirement* applicable to that *firm*.

2.1.43 G The purpose of the *base capital resources requirement* for a *BIPRU firm* is to act as a minimum capital requirement or floor. It has been written as a separate requirement as there are restrictions in *GENPRU 2.2* (Capital resources) on the types of capital that a *BIPRU firm* may use to meet the *base capital resources requirement* which do not apply to some other parts of the capital requirement calculation. In order to preserve the *base capital resources requirement's* role as a floor rather than an additional requirement, *GENPRU 2.2.60R* allows a *BIPRU firm* to meet the *base capital resources requirement* with capital that is also used to meet the variable capital requirements in *GENPRU 2.1.40R*.

- 2.1.44 G The *base capital resources requirement* and the variable capital requirement in *GENPRU 2.1.40R* are together called the *capital resources requirement (CRR)* in the case of a *BIPRU firm*.

Calculation of the variable capital requirement for a BIPRU firm

- 2.1.45 R Table: Calculation of the variable capital requirement for a BIPRU firm
This table belongs to *GENPRU 2.1.40R*

<i>Firm category</i>	<i>Capital requirement</i>	
<i>Bank, building society or full scope BIPRU investment firm</i>	the sum of the following:	
	(1)	the <i>credit risk capital requirement</i> ;
	(2)	the <i>market risk capital requirement</i> ; and
	(3)	the <i>operational risk capital requirement</i> .
<i>BIPRU limited activity firm</i>	the sum of the following:	
	(1)	the <i>credit risk capital requirement</i> ;
	(2)	the <i>market risk capital requirement</i> ; and
	(3)	the <i>fixed overheads requirement</i> .
<i>BIPRU limited licence firm (including UCITS investment firm)</i>	the higher of (1) and (2):	
	(1)	the sum of:
		(a) the <i>credit risk capital requirement</i> ; and
		(b) the <i>market risk capital requirement</i> ; and
	(2)	the <i>fixed overheads requirement</i> .

Adjustment of the variable capital requirement calculation for UCITS investment firms

- 2.1.46 R A *UCITS investment firm* must only calculate the variable capital requirement under *GENPRU 2.1.40R* in respect of *designated investment business*. For this purpose *scheme management activity* is excluded from *designated investment business*.

Calculation of the base capital resources requirement for a BIPRU firm

- 2.1.47 R The amount of a *BIPRU firm's base capital resources requirement* is set out in the table in *GENPRU 2.1.48R*.

- 2.1.48 R Table: Base capital resources requirement for a BIPRU firm
This table belongs to *GENPRU 2.1.47R*

<i>Firm category</i>	Amount: Currency equivalent of
<i>Bank</i>	€5 million
<i>Building society</i>	The higher of €1 million and £1 million
<i>BIPRU 730K firm</i>	€730,000
<i>BIPRU 125K firm</i>	€125,000
<i>BIPRU 50K firm</i>	€50,000
<i>UCITS investment firm</i>	The amount specified in <i>UPRU 2.1.2R(1)</i> (Financial resources requirement). However the capital that a <i>firm</i> must hold in respect of that requirement is as defined by <i>GENPRU</i> and not as specified in that <i>rule</i> . The reference in that <i>rule</i> to initial capital does not therefore apply.

Definition of BIPRU 730K firm, BIPRU 125K firm and BIPRU 50K firm

- 2.1.49 G The terms *BIPRU 730K firm*, *BIPRU 125K firm* and *BIPRU 50K firm* are defined in *BIPRU 1.1* (Application and purpose). However for convenience the table in *GENPRU 2.1.50G* briefly summarises them.
- 2.1.50 G Table: Definition of BIPRU 730K firm, BIPRU 125K firm and BIPRU 50K firm
This table belongs to *GENPRU 2.1.49G*

Category of BIPRU investment firm	Definition	
<i>BIPRU 50K firm</i>	(1)	it does not deal in any <i>financial instruments</i> for its own account or underwrite issues of <i>financial instruments</i> on a firm commitment basis;
	(2)	it offers one or more of the following services:
	(a)	reception and transmission of investors' orders for <i>financial instruments</i> ; or

Category of BIPRU investment firm	Definition		
		(b)	the execution of investors' orders for <i>financial instruments</i> ; or
		(c)	the management of individual portfolios of investments in <i>financial instruments</i> ; and
	(3)	it does not hold clients' money and/or securities and it is not authorised to do so (it should have a <i>limitation</i> or <i>requirement</i> prohibiting the holding of client money and its <i>permission</i> should not include <i>safeguarding and administering investments</i>).	
<i>BIPRU 125K firm</i>	(1)	it does not deal in any <i>financial instruments</i> for its own account or underwrite issues of <i>financial instruments</i> on a firm commitment basis;	
	(2)	it offers one or more of the following services:	
		(a)	reception and transmission of investors' orders for <i>financial instruments</i> ; or
		(b)	the execution of investors' orders for <i>financial instruments</i> ; or
		(c)	the management of individual portfolios of investments in <i>financial instruments</i> ; and
	(3)	it holds clients' money and/or securities or it is authorised to do so.	
<i>BIPRU 730K firm</i>	is subject to the <i>Capital Adequacy Directive</i> and is neither a <i>BIPRU 50K firm</i> nor a <i>BIPRU 125K firm</i> .		

Calculation of the credit risk capital requirement (BIPRU firm only)

2.1.51 R A *BIPRU firm* must calculate its *credit risk capital requirement* as the sum of:

- (1) the *credit risk capital component*;
- (2) the *counterparty risk capital component*; and
- (3) the *concentration risk capital component*.

Calculation of the market risk capital requirement (BIPRU firm only)

- 2.1.52 R (1) A *BIPRU firm* must calculate its *market risk capital requirement* as the sum of:
- (a) the *interest rate PRR* (including the basic *interest rate PRR* for equity derivatives set out in *BIPRU 7.3* (Equity PRR and basic interest rate PRR for equity derivatives));
 - (b) the *equity PRR*;
 - (c) the *commodity PRR*;
 - (d) the *foreign currency PRR*;
 - (e) the *option PRR*; and
 - (f) the *collective investment undertaking PRR*.
- (2) Any amount calculated under *BIPRU 7.1.9R - BIPRU 7.1.13R* (Instruments for which no PRR treatment has been specified) must be allocated between the *PRR* charges in (1) in the most appropriate manner.

Calculation of the fixed overheads requirement (BIPRU investment firm only)

- 2.1.53 R In relation to a *BIPRU investment firm* which is required to calculate a *fixed overheads requirement*, the amount of that requirement is equal to one quarter of the *firm's* relevant fixed expenditure calculated in accordance with *GENPRU 2.1.54R*.
- 2.1.54 R For the purpose of *GENPRU 2.1.53R*, and subject to *GENPRU 2.1.55R* to *GENPRU 2.1.57R*, a *BIPRU investment firm's* relevant fixed expenditure is the amount described as total expenditure in its most recent audited *annual report and accounts*, less the following items (if they are included within such expenditure):
- (1) staff bonuses, except to the extent that they are guaranteed;
 - (2) employees' and directors' shares in profits, except to the extent that they are guaranteed;
 - (3) other appropriations of profits;
 - (4) shared commission and fees payable which are directly related to commission and fees receivable, which are included within total revenue;
 - (5) interest charges in respect of borrowings made to finance the acquisition of the *firm's readily realisable investments*;
 - (6) interest paid to customers on *client money*;
 - (7) interest paid to counterparties;

- (8) fees, brokerage and other charges paid to *clearing houses*, exchanges and *intermediate brokers* for the purposes of *executing*, registering or clearing transactions;
 - (9) foreign exchange losses; and
 - (10) other variable expenditure.
- 2.1.55 R The relevant fixed expenditure of a *firm* in the following circumstances is:
- (1) where its most recent audited *annual report and accounts* do not represent a twelve month period, an amount calculated in accordance with *GENPRU 2.1.54R*, pro-rated so as to produce an equivalent annual amount; and
 - (2) where it has not completed twelve months' trading, an amount based on forecast expenditure included in the budget for the first twelve months' trading, as submitted with its application for *authorisation*.
- 2.1.56 R A *firm* must adjust its relevant fixed expenditure calculation so far as necessary if and to the extent that since the date covered by the most recent audited *annual report and accounts* or (if *GENPRU 2.1.55R(2)* applies) since the budget was prepared:
- (1) its level of fixed expenditure changes materially; or
 - (2) its *regulated activities* comprised within its *permission* change.
- 2.1.57 R If a *firm* has a material proportion of its expenditure incurred on its behalf by third parties and such expenditure is not fully recharged to that *firm* then the *firm* must adjust its relevant fixed expenditure calculation by adding back in the whole of the difference between the amount of the expenditure and the amount recharged.
- 2.1.58 G For the purpose of *GENPRU 2.1.57R*, the *FSA* would consider as material 10% of a *firm's* expenditure incurred on its behalf by third parties.
- 2.1.59 G For the purpose of *GENPRU 2.1.54R* to *2.1.57R*, fixed expenditure is expenditure which is inelastic relative to fluctuations in a *firm's* levels of business. Fixed expenditure is likely to include most salaries and staff costs, office rent, payment for the rent or lease of office equipment, and insurance *premiums*. It may be viewed as the amount of funds which a *firm* would require to enable it to cease business in an orderly manner, should the need arise. This is not an exhaustive list of such expenditure and a *firm* will itself need to identify (taking appropriate advice where necessary) which costs amount to fixed expenditure.

Calculation of base capital resources requirement for banks authorised before 1993

- 2.1.60 R (1) This *rule* applies to a *bank* that meets the following conditions:

- (a) on 31 December 2006 it had the benefit of *IPRU(BANK) rule 3.3.12* (Reduced minimum capital requirement for a *bank* that is a *credit institution* which immediately before 1 January 1993 was authorised under the Banking Act 1987);
 - (b) the relevant amount (as referred to in *IPRU(BANK) rule 3.3.12*) applicable to it was below €5 million as at 31 December 2006; and
 - (c) on 1 January 2007 it did not comply with the *base capital resources requirement* as set out in the table in *GENPRU 2.1.48R* (€5 million requirement).
 - (2) Subject to (3), the applicable *base capital resources requirement* as at any time (the "relevant time") is the higher of:
 - (a) the relevant amount applicable to it under *IPRU(BANK) rule 3.3.12* as at 31 December 2006 as adjusted under *GENPRU 2.1.62R(2)*; and
 - (b) the highest amount of eligible *capital resources* which that *bank* has held between 1 January 2007 and the relevant time.
 - (3) This *rule* ceases to apply when:
 - (a) that *bank's* eligible *capital resources* at any time since 1 January 2007 equal or exceed €5 million; or
 - (b) a *person* (other than an existing controller) becomes the *parent undertaking* of that *bank*.
 - (4) If this *rule* ceases to apply under (3)(a) it continues not to apply if the *bank's* eligible *capital resources* later fall below €5 million.
- 2.1.61 G Where two or more *banks* merge, all of which individually have the benefit of *GENPRU 2.1.60R*, the *FSA* may agree in certain circumstances that the *base capital resources requirement* for the *bank* resulting from the merger may be the sum of the aggregate *capital resources* of the merged *banks*, calculated at the time of the merger, provided this figure is less than €5 million.
- 2.1.62 R For the purpose of *GENPRU 2.1.60R*:
- (1) an existing controller of a *bank* means:
 - (a) a *person* who has been a *parent undertaking* of that *bank* since 31 December 2006 or earlier; or
 - (b) a *person* who became a *parent undertaking* of that *bank* after 31 December 2006 but who, when he became a *parent undertaking* of that *bank*, was a *subsidiary undertaking* of an existing controller of that *bank*;

- (2) the relevant amount of capital as referred to in *GENPRU* 2.1.60R(2)(a) is adjusted by identifying the time as of which the amount of capital it was obliged to hold under *IPRU(BANK) rule* 3.3.12 as referred to in *GENPRU* 2.1.60R(2)(a) was fixed and then recalculating the capital resources it held at that time in accordance with the definition of eligible *capital resources* (as defined in (3)); and
- (3) eligible *capital resources* mean *capital resources* eligible under *GENPRU* 2.2 (Capital resources) to be used to meet the *base capital resources requirement*.

2.2 Capital resources

Application

2.2.1 R This section applies to:

- (1) a *BIPRU firm*; and
- (2) an *insurer* unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*.

Purpose

2.2.2 G *GENPRU 2.1* (Calculation of capital resources requirement) sets out minimum *capital resources requirements* for a *firm*. This section (*GENPRU 2.2*) sets out how, for the purpose of these requirements, *capital resources* are defined and measured.

2.2.3 G This section implements minimum EC standards for the composition of *capital resources* required to be held by an *insurer* undertaking business that falls within the scope of the *Consolidated Life Directive* (2002/83/EC), the *First Non-Life Directive* (1973/239/EEC) as amended or the *Reinsurance Directive* (2005/68/EC).

2.2.4 G This section also implements minimum EC standards for the composition of *capital resources* required to be held by a *BIPRU firm*. In particular it implements Articles 56 – 61, Articles 63 – 64, Article 66 and Articles 120 – 122 of the *Banking Consolidation Directive* (2006/48/EC) and Articles 12 – 16, Article 17 (in part), Article 22(1)(c) (in part) and paragraphs 13 - 15 of Part B of Annex VII of the *Capital Adequacy Directive* (2006/49/EC).

Contents guide

2.2.5 G The table in *GENPRU 2.2.6G* sets out where the main topics in this section can be found.

Simple capital issuers

- 2.2.7 G Parts of this section are irrelevant to a *BIPRU firm* whose *capital resources* consist of straightforward *capital instruments*. Therefore the *FSA's* Personal handbooks facility available on its website allows a *BIPRU firm* to screen out those parts of this section that are not relevant to a *simple capital issuer*. A *simple capital issuer* is a *BIPRU firm* that meets the following conditions:
- (1) it does not raise capital through a special purpose vehicle;
 - (2) it only includes *capital instruments* in its *tier one capital resources* consisting of ordinary *shares*, *PIBS* (relevant to *building societies* only), perpetual non-cumulative preference *shares* or partnership or *limited liability partnership* capital accounts (relevant to partnerships or *limited liability partnership* only);
 - (3) it only includes non-redeemable and non-convertible *capital instruments* in its *tier one capital resources*; and
 - (4) (if it includes *capital instruments* in its *tier one capital resources* on which *coupons* are payable) such *coupons* are non-cumulative, non-mandatory, in cash and not subject to a *step-up*.

Principles underlying the definition of capital resources

- 2.2.8 G The *FSA* has divided its definition of capital into categories, or tiers, reflecting differences in the extent to which the *capital instruments* concerned meet the purpose and conform to the characteristics of capital listed in *GENPRU 2.2.9G*. The *FSA* generally prefers a *firm* to hold higher quality capital that meets the characteristics of permanency and loss absorbency that are features of *tier one capital*. *Capital instruments* falling into *core tier one capital* can be included in a *firm's* regulatory capital without limit. Typically, other forms of capital are either subject to limits (see the *capital resources gearing rules*) or, in the case of some specialist types of capital, may only be included with the express consent of the *FSA* (which takes the form of a *waiver* under section 148 of the *Act*). Details of the individual components of capital are set out in the *capital resources table*.

Tier one capital

- 2.2.9 G *Tier one capital* typically has the following characteristics:
- (1) it is able to absorb losses;
 - (2) it is permanent;
 - (3) it ranks for repayment upon winding up, administration or similar procedure after all other debts and liabilities; and
 - (4) it has no fixed costs, that is, there is no inescapable obligation to pay dividends or interest.
- 2.2.10 G The forms of capital that qualify for *tier one capital* are set out in the *capital resources table* and include, for example, *share capital*, reserves, partnership and *sole trader capital*, verified interim net profits and, for a *mutual*, the *initial fund* plus permanent members' accounts. *Tier one capital* is divided into *core tier one capital*, perpetual non-cumulative *preference shares*, *permanent interest-bearing shares (PIBS)* and *innovative tier one capital*.

Upper and lower tier two capital

- 2.2.11 G *Tier two capital* includes forms of capital that do not meet the requirements for permanency and absence of fixed servicing costs that apply to *tier one capital*. *Tier two capital* includes, for example:
- (1) capital which is perpetual (that is, has no fixed term) but cumulative (that is, servicing costs cannot be waived at the issuer's option, although they may be deferred – for example, cumulative *preference shares*); only perpetual *capital instruments* may be included in *upper tier two capital*;
 - (2) capital which is not perpetual (that is, it has a fixed term) or which may have fixed servicing costs that cannot generally be either waived or deferred (for example, most subordinated debt); such capital should normally be of a medium to long-term maturity (that is, an original maturity of at least five years); dated *capital instruments* are included in *lower tier two capital*;

- (3) (for *BIPRU firms*) certain revaluation reserves such as reserves arising from the revaluation of land and buildings, including any net unrealised gains for the fair valuation of equities held in the available-for-sale financial assets category; and
- (4) (for *BIPRU firms*) general/collective provisions.

Tier three capital

- 2.2.12 G *Tier three capital* consists of forms of capital conforming least well to the characteristics of capital listed in *GENPRU 2.2.9G*: either subordinated debt of short maturity (*upper tier three capital*) or net *trading book* profits that have not been externally verified (*lower tier three capital*).

Non-standard capital instruments

- 2.2.13 G There may be examples of *capital instruments* that, although based on a standard form, contain structural features that make the *rules* in this section difficult to apply. In such circumstances, a *firm* may seek individual *guidance* on the application of those *rules* to the *capital instrument* in question. See *SUP 9* (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from capital

- 2.2.14 G Deductions should be made at the relevant stage of the calculation of *capital resources* to reflect capital that may not be available to the *firm* or assets of uncertain value (for example, holdings of intangible assets and assets that are inadmissible for an *insurer*, or, in the case of a *bank* or *building society*, where that *firm* has made investments in a *subsidiary undertaking* or in another *financial institution* or in respect of *participations* that it holds).
- 2.2.15 G Deductions should also be made, in the case of certain *BIPRU investment firms* for *illiquid assets* (see *GENPRU 2.2.19R*).
- 2.2.16 G A full list of deductions from *capital resources* is shown in the *capital resources table* applicable to the *firm*.

Which method of calculating capital resources applies to which type of firm

- 2.2.17 R A *firm* must calculate its *capital resources* in accordance with the version of the *capital resources table* applicable to the *firm*, subject to the *capital resources gearing rules*. The version of the *capital resources table* that applies to a *firm* is specified in the table in *GENPRU 2.2.19R*.
- 2.2.18 R In the case of a *BIPRU firm* the *capital resources table* also sets out how the *capital resources requirement* is deducted from *capital resources* in order to decide whether its *capital resources* equal or exceed its *capital resources requirement*.

2.2.19 R Table: Applicable capital resources calculation
This table belongs to *GENPRU 2.2.17R*

Type of <i>firm</i>	Location of <i>rules</i>	Remarks
<i>Insurer</i>	<i>GENPRU 2 Annex 1R</i>	
<i>Bank</i>	<i>GENPRU 2 Annex 2R</i>	
<i>Building society</i>	<i>GENPRU 2 Annex 3R</i>	
<i>BIPRU investment firm without an investment firm consolidation waiver</i>	<i>GENPRU 2 Annex 4R (Deducts material holdings)</i>	Applies to a <i>BIPRU investment firm</i> not using <i>GENPRU 2 Annex 5R</i> or <i>GENPRU 2 Annex 6R</i>
<i>BIPRU investment firm without an investment firm consolidation waiver</i>	<i>GENPRU 2 Annex 5R (Deducts illiquid assets)</i>	A <i>BIPRU investment firm</i> must give one <i>Month's</i> prior notice to the <i>FSA</i> before starting to use or stopping using this method
<i>BIPRU investment firm with an investment firm consolidation waiver</i>	<i>GENPRU 2 Annex 6R (Deducts illiquid assets and material holdings)</i>	A <i>firm</i> with an <i>investment firm consolidation waiver</i> must use this method. No other <i>BIPRU investment firm</i> may use it.

Calculation of capital resources: Which rules apply to BIPRU investment firms

2.2.20 G *GENPRU 2.2.19R* sets out three different methods of calculating *capital resources* for *BIPRU investment firms*. The differences between the three methods relate to whether and how *material holdings* and *illiquid assets* are deducted when calculating *capital resources*. The method depends on whether a *firm* has an *investment firm consolidation waiver*. If a *firm* does have such a *waiver*, it should deduct *illiquid assets*, own *group material holdings* and certain contingent liabilities. If a *firm* does not have such a *waiver*, it should choose to deduct either *material holdings* or, subject to notifying the *FSA*, *illiquid assets*.

2.2.21 G A consequence of a *firm* deducting all of its *illiquid assets* under *GENPRU 2 Annex 5R* is that it is allowed a higher limit on short term subordinated debt under *GENPRU 2.2.49R*.

Calculation of capital resources: Insurers

2.2.22 G *Capital resources* for an *insurer* can be calculated either as the total of eligible assets less foreseeable liabilities (which is the approach taken in the *Insurance Directives*) or by identifying the components of capital. Both calculations give the same result for the total amount of *capital resources*. The approach taken in this section has been to specify the components of capital and the relevant deductions. This is set out in the *capital resources table*. This approach is the same as that used for the calculation of *capital resources* for *banks, building societies* and *BIPRU investment firms*. A simple example, showing the reconciliation of the two methods, is given in the table in *GENPRU 2.2.23G*.

2.2.23 G Table: Approaches to calculating capital resources
This table belongs to *GENPRU 2.2.22G*

Liabilities		Assets	
Borrowings	100	Admissible assets	350
Ordinary <i>shares</i>	200	Intangible assets	100
Profit and loss account and other reserves	100	Other inadmissible assets	100
Perpetual subordinated debt	150		
Total	<u>550</u>	Total	<u>550</u>
Calculation of <i>capital resources</i> : eligible assets less foreseeable liabilities			
Total assets		550	
less intangible assets		(100)	
less inadmissible assets		(100)	
less liabilities (borrowings)		(100)	
<i>Capital resources</i>		<u>250</u>	
Calculation of <i>capital resources</i> : components of capital			
Ordinary <i>shares</i>		200	
Profit and loss account and other reserves		100	
Perpetual subordinated debt		150	

less intangible assets	(100)
less inadmissible assets	(100)
<i>Capital resources</i>	<u>250</u>

Limits on the use of different forms of capital: General

- 2.2.24 G As the various components of capital differ in the degree of protection that they offer the *firm* and its *customers* and *consumers*, restrictions are placed on the extent to which certain types of capital are eligible for inclusion in a *firm's capital resources*. These *rules* are called the *capital resources gearing rules*.

Limits on the use of different forms of capital: Use of higher tier capital in lower tiers

- 2.2.25 R A *firm* may include in a *lower stage of capital*, *capital resources* which are eligible for inclusion in a *higher stage of capital* if the *capital resources gearing rules* would prevent the use of that capital in that *higher stage of capital*. However:
- (1) the *capital resources gearing rules* applicable to that *lower stage of capital* apply to *higher stage of capital* included in that *lower stage of capital*; and
 - (2) (subject to *GENPRU 2.2.26R*) the *rules* in *GENPRU* governing the eligibility of capital in that *lower stage of capital* continue to apply.
- 2.2.26 R An item of *tier one capital* which is included in a *firm's tier two capital resources* under *GENPRU 2.2.25R* is not subject to the requirement to obtain a legal opinion in *GENPRU 2.2.159R(12)*.
- 2.2.27 R A *BIPRU firm* may include in a *lower stage of capital*, *innovative tier one capital* that it is prohibited from using under *GENPRU 2.2.42R* (*BIPRU firms* may not use *innovative tier one capital* to meet the *CRR*). However:
- (1) the *capital resources gearing rules* applicable to that *lower stage of capital* apply to that *innovative tier one capital*; and
 - (2) (subject to *GENPRU 2.2.28R*) the *rules* in *GENPRU* governing the eligibility of capital in that *lower stage of capital* continue to apply.
- 2.2.28 R The requirement to obtain a legal opinion in *GENPRU 2.2.159R(12)* does not apply to *innovative tier one capital* treated under *GENPRU 2.2.27R* but the requirements to obtain a legal opinion in *GENPRU 2.2.118R* continue to apply.

Limits on the use of different forms of capital: Limits relating to tier one capital applicable to all firms except BIPRU investment firms

- 2.2.29 R In relation to the *tier one capital resources* of an *insurer, bank or building society*, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions), at least 50% must be accounted for by *core tier one capital*.

Limits on the use of different forms of capital: Limits relating to tier one capital applicable to all firms

- 2.2.30 R In relation to the *capital resources* of an *insurer*, and subject to *GENPRU 2.2.42R* (Restriction on the use of *innovative tier one capital*), those of a *BIPRU firm*, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions), no more than 15% may be accounted for by *innovative tier one capital*.

Limits on the use of different forms of capital: Limits relating to tier one capital: Purpose of the requirements

- 2.2.31 G The purpose of the requirement in *GENPRU 2.2.29R* is to ensure that at least 50% of the *firm's tier one capital resources* (net of *tier one capital* deductions) is met by *core tier one capital* which provides maximum loss absorbency on a going concern basis to protect the *firm* from insolvency. Although a perpetual non-cumulative *preference share* or a *PIBS* is in legal form a *share*, it behaves in many ways like a perpetual fixed interest debt instrument. Within the 50% limit on non-*core tier one capital*, *GENPRU 2.2.30R* places a further sub-limit on the amount of *innovative tier one capital* that a *firm* may include in its *tier one capital resources*. This limit is necessary to ensure that most of a *firm's tier one capital* comprises items of capital of the highest quality.

Limits on the use of different forms of capital: Insurers

- 2.2.32 R At least 50% of an *insurer's MCR* must be accounted for by the sum of:
- (1) the amount calculated at stage A of the calculation in the *capital resources table* (Core tier one capital); and
 - (2) notwithstanding *GENPRU 2.2.29R*, the amount calculated at stage B of the calculation in the *capital resources table* (Perpetual non-cumulative preference shares);

less the amount calculated at stage E of the calculation in the *capital resources table* (Deductions from tier one capital).

- 2.2.33 R An *insurer* carrying on *long-term insurance business* must meet the higher of:
- (1) $\frac{1}{3}$ of the *long-term insurance capital requirement*; and
 - (2) the *base capital resources requirement*;

with the sum of the items listed at stages A (Core tier one capital), B (Perpetual non-cumulative preference shares), G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* less the sum of the items listed at stage E in the *capital resources table* (Deductions from tier one capital).

2.2.34 R An *insurer* carrying on *general insurance business* must meet the higher of:

- (1) 1/3 of the *general insurance capital requirement*; and
- (2) the *base capital resources requirement*;

with the sum of the items listed at stages A (Core tier one capital), B (Perpetual non-cumulative preference shares), G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* less the sum of the items listed at stage E (Deductions from tier one capital) in the *capital resources table*.

2.2.35 R In *GENPRU 2.2.33R* and *GENPRU 2.2.34R*:

- (1) items listed at stage B (Perpetual non-cumulative preference shares) in the *capital resources table* may be included notwithstanding *GENPRU 2.2.29R*;
- (2) *innovative tier one capital* that meets the conditions (other than *GENPRU 2.2.159R(12)* (Requirement for a legal opinion)) for it to be included as *upper tier two capital* at stage G (Upper tier two capital) in the *capital resources table* may be treated as an item listed at stage G; and
- (3) an *insurer* must exclude from the calculation the higher of the following:
 - (a) the amount (if any) by which the sum of the items listed at stages G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* exceeds the total (net of deductions) of the remaining constituents of adjusted stage M; and
 - (b) the amount (if any) by which the sum of the items listed at stage H in the *capital resources table* exceeds one-third of the total (net of deductions) of the remaining constituents of adjusted stage M;

where adjusted stage M means the amount calculated at stage M of the calculation in the *capital resources table* (Total capital after deductions) less the amount of any *innovative tier one capital* that is not treated as *upper tier two capital* for the purpose of *GENPRU 2.2.33R* or *GENPRU 2.2.34R*, as the case may be.

2.2.36 G The purposes of the requirements in *GENPRU 2.2.32R* to *GENPRU 2.2.34R* are to comply with the *Insurance Directives*' requirement that *insurers* maintain a *guarantee fund* of higher quality *capital resources* items and to ensure that at least 50% of the *insurer's capital resources* needed to meet its *MCR* provide maximum loss absorbency to protect the *insurer* from insolvency.

2.2.37 R Subject to *GENPRU 2.2.38R*, an *insurer* must exclude from the calculation of its *capital resources* the following:

- (1) the amount (if any) by which *tier two capital resources* exceed the amount calculated at stage F (Total tier one capital after deductions) of the calculation in the *capital resources table*; and
- (2) the amount (if any) by which *lower tier two capital resources* exceed 50% of the amount calculated at stage F of the calculation in the *capital resources table*.

2.2.38 R At least 75% of an *insurer's MCR* must be accounted for by the sum of:

- (1) the amount calculated at stage A (Core tier one capital) plus, notwithstanding *GENPRU 2.2.29R*, the amount calculated at stage B (Perpetual non-cumulative preference shares) less the amount calculated at stage E (Deductions from tier one capital) of the calculation in the *capital resources table*; and
- (2) the amount calculated at stage G (Upper tier two capital) of the calculation in the *capital resources table*.

2.2.39 G In *GENPRU 2.2.38R* the amount of any *innovative tier one capital* that meets the conditions for it to be included as *upper tier two capital* at stage G (Upper tier two capital) in the *capital resources table* may be included in the amount calculated at stage G.

2.2.40 G *GENPRU 2.2.37R* and *GENPRU 2.2.38R* give effect to the *Insurance Directives'* requirements that an *insurer's tier two capital resources* must not exceed its *tier one capital resources* and that no more than 25% of an *insurer's "required solvency margin"* should consist of *lower tier two capital resources*.

2.2.41 R An *insurer* that carries on both *long-term insurance business* and *general insurance business* must apply the relevant limits in *GENPRU 2.2.32R* to *GENPRU 2.2.38R* separately for each type of business.

Limits on the use of innovative tier one capital: BIPRU firm

2.2.42 R For the purpose of meeting the *main BIPRU firm Pillar 1 rules*, a *BIPRU firm* may not include *innovative tier one capital* in its *tier one capital resources*.

2.2.43 G A *BIPRU firm* may include *innovative tier one capital* in its *tier one capital resources* for the purpose of *GENPRU 1.2* (Adequacy of financial resources) and *BIPRU 10* (Concentration risk). A *firm* may also include it in its *upper tier two capital resources* under *GENPRU 2.2.25R* (Limits on the use of different forms of capital: Use of higher tier capital in lower tiers) for all purposes as long as it meets the conditions for treatment as *upper tier two capital*.

Limits on the use of different kinds of capital: Purposes for which tier three capital may not be used (BIPRU firm only)

2.2.44 R *Tier one capital* and *tier two capital* are the only type of *capital resources* that a *BIPRU firm* may use for the purpose of meeting:

- (1) the *credit risk capital component*;
- (2) the *operational risk capital requirement*;
- (3) the *counterparty risk capital component*; and
- (4) the *base capital resources requirement*.

2.2.45 R *GENPRU 2.2.44R* (and the *capital resources gearing rules* that relate to it) also applies for the purposes of any other requirement in the *Handbook* for which it is necessary to calculate the *capital resources* of a *BIPRU firm*, except for the purposes described in *GENPRU 2.2.47R* and except as may otherwise be stated in the relevant part of the *Handbook*.

Limits on the use of different kinds of capital: Tier two limits (BIPRU firm only)

2.2.46 R For the purpose of *GENPRU 2.2.44R*:

- (1) the amount of the items which may be included in a *BIPRU firm's tier two capital resources* must not exceed the amount calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions); and
- (2) the amount of the items which may be included in a *BIPRU firm's lower tier two capital resources* must not exceed 50% of the amount calculated at stage F of the calculation in the *capital resources table*.

Limits on the use of different kinds of capital: Purposes for which tier three capital may be used (BIPRU firm only)

2.2.47 R For the purposes of meeting:

- (1) the *market risk capital requirement*;
- (2) the *concentration risk capital component*; and
- (3) the *fixed overheads requirement* (where applicable);

a *BIPRU firm* may only use the following parts of its *capital resources*:

- (4) *tier one capital* to the extent that it is not required to meet the requirements in *GENPRU 2.2.44R* (*GENPRU 2.2.48R* explains how to calculate how much *tier one capital* is required to meet the requirements in *GENPRU 2.2.44R*);
- (5) *tier two capital* to the extent that it:
 - (a) comes within the limits in *GENPRU 2.2.46R* (100% limit for *tier two capital resources* and 50% limit for *lower tier two capital resources*); and
 - (b) it is not required to meet the requirements in *GENPRU 2.2.44R*;

(*GENPRU 2.2.48R* explains how to calculate how much *tier two capital* is required to meet the requirements in *GENPRU 2.2.44R*);

(6) *tier two capital* that cannot be used for the purposes in *GENPRU 2.2.44R* because it falls outside the limits in *GENPRU 2.2.46R*; and

(7) *tier three capital*.

2.2.48 R The amount of *tier one capital* and *tier two capital* that is not used to meet the requirements in *GENPRU 2.2.44R* as referred to in *GENPRU 2.2.47R*(4) and (5) is equal to the amount calculated at stage N of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions) less the parts of the *capital resources requirement* deducted immediately after stage N of the *capital resources table* (the parts of the *capital resources requirements* listed in *GENPRU 2.2.44R*).

Limits on the use of different kinds of capital: Combined tier two and tier three limits (BIPRU firm only)

2.2.49 R For the purpose of meeting the requirements in *GENPRU 2.2.47R*(1) to (3) and subject to *GENPRU 2.2.50R*, a *BIPRU firm* must not include any item in either:

(1) its *tier two capital resources* falling within *GENPRU 2.2.47R*(6) (excess *tier two capital*) ; or

(2) its *upper tier three capital resources*;

to the extent that the sum of (1) and (2) would exceed 250% of the amount resulting from the following calculation:

(3) calculate the amount at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions); and

(4) deduct from (3) those parts of the *firm's tier one capital* used to meet the requirements in *GENPRU 2.2.44R* as established by *GENPRU 2.2.48R*.

2.2.50 R In relation to a *BIPRU investment firm* which calculates its *capital resources* under *GENPRU 2 Annex 4R* (Capital resources table for a BIPRU investment firm deducting material holdings), the figure of 200% replaces that of 250% in *GENPRU 2.2.49R*.

Example of how the capital resources calculation for BIPRU firms works

2.2.51 G *GENPRU 2.2.52G* to *GENPRU 2.2.59G* illustrate how to calculate a *BIPRU firm's capital resources* and how the *capital resources gearing rules* work. In this example the *BIPRU firm* has a credit risk requirement of £100 and a market risk requirement of £90, making a total capital requirement of £190. Its *capital resources* are as set out in the table in *GENPRU 2.2.52G*.

- 2.2.52 G Table: Example of the calculation of the capital resources of a BIPRU firm
This table belongs to *GENPRU 2.2.51G*

Description of the stage of the capital resources calculation	Stage in the <i>capital resources table</i>	Amount (£)
Total <i>tier one capital</i> after deductions (excluding <i>innovative tier one instruments</i> – see <i>GENPRU 2.2.53G</i>)	Stage F	80
Total <i>tier two capital</i> (including <i>innovative tier one instruments</i> – see <i>GENPRU 2.2.53G</i>)	Stage K	80
Deductions	Stage M	(20)
Total <i>tier one capital</i> and <i>tier two capital</i> after deductions	Stage N	140
<i>Upper tier three capital</i> (this example assumes the <i>firm</i> has no <i>lower tier three capital</i> (<i>trading book profits</i>))	Stage Q	50
Total <i>capital resources</i>	Stage T	190

- 2.2.53 G *GENPRU 2.2.42R* (Limits on the use of innovative tier one capital) prohibits the inclusion of *innovative tier one instruments* in the *tier one capital* of a *BIPRU firm* for the purpose of meeting the *capital resources requirement*. Thus they are not included in the calculation of stage F of the *capital resources table*. Instead all *innovative tier one instruments* have been included in *tier two capital* in accordance with *GENPRU 2.2.25R* (Use of higher tiers of capital in lower tiers).
- 2.2.54 G In the example in the table in *GENPRU 2.2.52G* the *firm* has total *tier one capital* after deductions of £80. Its *tier two capital* of £80 is therefore the maximum permitted under *GENPRU 2.2.46R* (Tier two limits), that is 100% of *tier one capital*.
- 2.2.55 G The *credit risk capital requirement* is deducted after stage N of the *capital resources table* and the market risk requirement following stage T of the *capital resources table*. These calculations are shown in the table in *GENPRU 2.2.56G*.
- 2.2.56 G Table: Example of how capital resources of a BIPRU firm are measured against its capital resources requirement
This table belongs to *GENPRU 2.2.55G*

Description of the stage of the capital resources calculation	Stage in the <i>capital resources table</i>	Amount (£)
Total <i>tier one capital</i> and <i>tier two capital</i> after deductions	Stage N	140
Credit risk requirement		(100)
<i>Tier one capital</i> and <i>tier two capital</i> available to meet market risk requirement		40
<i>Tier three capital</i>	Stage Q	50
Total capital available to meet market risk requirement		90
Market risk requirement		(90)
Market risk requirement met subject to meeting gearing limit set out in <i>GENPRU 2.2.49R</i> – see <i>GENPRU 2.2.57G</i>		

- 2.2.57 G The gearing limit in *GENPRU 2.2.49* (Combined tier two and tier three limits) requires that the *upper tier three capital* used to meet the market risk requirement does not exceed 250% of the *tier one capital* used to meet market risk.
- 2.2.58 G In this example it is assumed that the maximum possible amount of *tier one capital* is carried forward to meet the market risk requirement. There are other options as to the allocation of *tier one capital* and *tier two capital* to the credit risk requirement. Therefore in this example the various tiers of *capital resources* are applied to meet the market risk requirement as follows:
- (1) the *tier one capital* used to meet market risk is £40;
 - (2) 250% of *tier one capital* used to meet market risk is £100; and
 - (3) the *upper tier three capital* used to meet market risk is £50.
- 2.2.59 G The 250% gearing limit is met as the limit of £100 is greater than the *upper tier three capital* of £50 used in this example.
- Capital used to meet the base capital resources requirement (BIPRU firm only)
- 2.2.60 R A *BIPRU firm* may use the *capital resources* used to meet the *base capital resources requirement* to meet any other part of the *capital resources requirement*.

- 2.2.61 G The explanation for *GENPRU 2.2.60R* can be found in *GENPRU 2.1.43G* (Base capital resources requirement). In brief the reason is that the *base capital resources requirement* is not in practice meant to act as an additional capital resources requirement. It is meant to act as a floor to the *capital resources requirement*.

Tier one capital: General

- 2.2.62 R A *firm* may not include a *capital instrument* in its *tier one capital resources* unless it complies with the following conditions:

- (1) it is included in one of the categories in *GENPRU 2.2.63R*;
- (2) it complies with the conditions set out in *GENPRU 2.2.64R*;
- (3) it is not excluded under *GENPRU 2.2.65R* (Connected transactions); and
- (4) it is not excluded by any of the *rules* in *GENPRU 2.2*.

- 2.2.63 R The categories referred to in *GENPRU 2.2.62R(1)* are:

- (1) *permanent share capital*;
- (2) *eligible partnership capital*;
- (3) *eligible LLP members' capital*;
- (4) *sole trader capital*;
- (5) a perpetual non-cumulative *preference share*;
- (6) (in the case of a *building society*) *PIBS*; and
- (7) an *innovative tier one instrument*.

General conditions for eligibility as tier one capital

- 2.2.64 R The conditions that an item of capital of a *firm* must comply with under *GENPRU 2.2.62R(3)* are as follows:

- (1) it is issued by the *firm*;
- (2) it is fully paid and the proceeds of issue are immediately and fully available to the *firm*;
- (3) it:
 - (a) cannot be redeemed at all or can only be redeemed on a winding up of the *firm*; or

- (b) complies with the conditions in *GENPRU 2.2.70R* (Basic requirements for redeemability) and *GENPRU 2.2.76R* (Redeemable instrument subject to a *step-up*) ;
- (4) the item of capital meets the following conditions in relation to any *coupon*:
 - (a) the *firm* is under no obligation to pay a *coupon*; or
 - (b) (if the *firm* is obliged to pay the *coupon*) the *coupon* is payable in the form of an item of capital that is included in a *higher stage of capital* or the *same stage of capital* as that first item of capital;
- (5) any *coupon* is either:
 - (a) non-cumulative; or
 - (b) (if it is cumulative) it must, if deferred, be paid by the *firm* in the form of *tier one capital* complying with (4)(b);
- (6) it is able to absorb losses to allow the *firm* to continue trading and in particular it complies with *GENPRU 2.2.80R* to *2.2.81R* (Loss absorption) and, in the case of an *innovative tier one instrument*, *GENPRU 2.2.116R* to *2.2.118R* (*Innovative tier one instrument* should not constitute a liability);
- (7) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses;
- (8) it is available to the *firm* for unrestricted and immediate use to cover risks and losses as soon as these occur;
- (9) it ranks for repayment upon winding up, administration or any other similar process no higher than a *share* of a company incorporated under the Companies Act 1985 or the Companies (Northern Ireland) Order 1986 (whether or not it is such a *share*); and
- (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9) and, where it applies, *GENPRU 2.2.271R* (Other requirements: insurers carrying on with-profits business (Insurer only)).

2.2.65 R An item of capital does not qualify for inclusion as *tier one capital* if the issue of that item of capital by the *firm* is connected with one or more other transactions which, when taken together with the issue of that item, could result in that item of capital no longer displaying all of the characteristics set out in *GENPRU 2.2.64R*(1) to (9).

Guidance on certain of the general conditions for eligibility as tier one capital

- 2.2.66 G *GENPRU* 2.2.65R is an example of the general principle in *GEN* 2.2.1 (Purposive interpretation). Its purpose is to emphasise that an item of capital does not meet the conditions for inclusion in *tier one capital* if in isolation it does meet those requirements but it fails to meet those requirements when other transactions are taken into account. Examples of such connected transactions might include guarantees or any other side agreement provided to the holders of the *capital instrument* by the *firm* or a connected party or a related transaction designed, for example, to enhance their security or to achieve a tax benefit, but which may compromise the loss absorption capacity or permanence of the original capital item.
- 2.2.67 G *GENPRU* 2.2.64R(2) is stricter than the Companies Act definition of fully paid, which only requires an undertaking to pay.
- 2.2.68 G The *FSA* considers that dividend pushers diminish the quality of capital by breaching the principle of complete discretion over *coupons* set out in *GENPRU* 2.2.64R(4). A dividend pusher operates so that, in a given period of time, payments must be made on senior securities if payments have previously been made on junior securities or securities ranking *pari passu*. As such, dividend pushers may not be included in the terms of *tier one capital*, unless the *firm* has the option to fund the “pushed payment” in stock.
- 2.2.69 G An item of capital does not comply with *GENPRU* 2.2.64R(10) if it is marketed as a *capital instrument* that would only qualify for a lower level of capital or on the basis that investing in it is like investing in an instrument in a lower tier of capital. For example, an undated *capital instrument* should not be marketed as a dated *capital instrument* if the terms of the *capital instrument* include an option by the issuer to redeem the *capital instrument* at a specified date in the future.

Redemption of tier one instruments

- 2.2.70 R A *firm* may not include a *capital instrument* in its *tier one capital resources*, unless its contractual terms are such that:
- (1) (if it is redeemable other than in circumstances set out in *GENPRU* 2.2.64R(3)(a) (redemption on a winding up)) it is redeemable only at the option of the *firm*; and
 - (2) the *firm* cannot exercise that redemption right:
 - (a) before the fifth anniversary of its date of issue;
 - (b) unless it has given notice to the *FSA* in accordance with *GENPRU* 2.2.74R; and
 - (c) unless at the time of exercise of that right it complies with the *main BIPRU firm Pillar 1 rules* and will continue to do so after redemption.
- 2.2.71 R A *firm* may include a term in a *tier one instrument* allowing the *firm* to redeem it before the date in *GENPRU* 2.2.70R(2)(a) if the following conditions are satisfied:

- (1) the other conditions in *GENPRU 2.2.70R* are met;
- (2) the circumstance that entitles the *firm* to exercise that right is a change in law or regulation in any relevant jurisdiction or in the interpretation of such law or regulation by any court or authority entitled to do so;
- (3) it would be reasonable for the *firm* to conclude that it is unlikely that that circumstance will occur, judged at the time of issue or, if later, at the time that the term is first included in the terms of the *tier one instrument*; and
- (4) the *firm's* right is conditional on it obtaining the *FSA's* consent in the form of a *waiver* of *GENPRU 2.2.72R*.

2.2.72 R A *firm* must not redeem a *tier one instrument* in accordance with a term included under *GENPRU 2.2.71R*.

2.2.73 G The purpose of *GENPRU 2.2.71R* to *GENPRU 2.2.72R* is this. In general a *tier one instrument* should not be redeemable by the *firm* before its fifth anniversary. However there may be circumstances in which it would be reasonable for the *firm* to redeem it before then. *GENPRU 2.2.71R* allows the *firm* to include a right to redeem the instrument before the fifth anniversary in certain circumstances. A tax call is an example of a term that may be allowed. *GENPRU 2.2.71R* says that the terms of the *tier one instrument* should provide that the *firm* should not be able to exercise that right without the *FSA's* consent. Any such consent will be given in the form of a *waiver* allowing early repayment. Thus although a *firm* may include a right to redeem early in the terms of a *tier one instrument* without the need to apply for a *waiver* the actual exercise of that right will require a *waiver*.

2.2.74 R A *firm* must not redeem any *tier one instrument* that it has included in its *tier one capital resources* unless it has notified the *FSA* of its intention at least one month before it does so.

2.2.75 R If a *firm* gives notice of the redemption or repayment of any *tier one instrument*, the *firm* must no longer include that instrument in its *tier one capital resources*.

Step-ups and redeemable tier one instruments

2.2.76 R In relation to an *innovative tier one instrument* or a *PIBS* which is redeemable and which satisfies any of the following conditions:

- (1) it is or may become subject to a *step-up*; or
- (2) a reasonable *person* would think that:
 - (a) the *firm* is likely to redeem it before the tenth anniversary of its date of issue; or
 - (b) the *firm* is likely to have an economic incentive to redeem it before the tenth anniversary of its date of issue;

the redemption date in *GENPRU 2.2.70R(2)(a)* is amended by replacing "fifth anniversary" with "tenth anniversary".

Meaning of redemption

- 2.2.77 R (1) This *rule* applies to a *tier one instrument*, *tier two instrument* or *tier three instrument* (instrument A) that under its terms is exchanged for or converted into another instrument or is subject to a similar process.
- (2) This *rule* also applies to instrument A if under its terms it is redeemed out of the proceeds of the issue of new securities.
- (3) If the instrument with which instrument A is replaced is included in the *same stage of capital* or a *higher stage of capital* as instrument A, instrument A is treated as not having been redeemed or repaid for the purposes of *GENPRU 2.2.*
- (4) (3) does not apply to *GENPRU 2.2.114R* (Redeemable instrument likely to be repaid etc), *GENPRU 2.2.74R* (Notice of redemption of *tier one instruments*), *GENPRU 2.2.174R* (Notice of redemption of *tier two instruments*) or *GENPRU 2.2.245R* (so far as it relates to notice of redemption of *tier three instruments*).
- (5) (3) only applies if it would be reasonable (taking into account the economic substance) to treat the original instruments as continuing in issue on the same or a more favourable basis. The question of whether that basis is more or less favourable must be judged from the point of view of the adequacy of the *firm's capital resources*.
- 2.2.78 R (1) A *share* is not redeemable for the purposes of this section merely because the Companies Act 1985 or the Companies (Northern Ireland) Order 1986 allows the *firm* that issued it to purchase it.
- (2) A *capital instrument* is not redeemable for the purposes of this section merely because the *firm* that issued it has a right to purchase it similar to the right in (1).
- 2.2.79 G This section generally uses the term repay and redeem interchangeably.

Loss absorption

- 2.2.80 R A *firm* may not include a *share* in its *tier one capital resources* unless (in addition to complying with the other relevant *rules* in *GENPRU 2.2*):
- (1) (in the case of a *firm* that is a company as defined in the Companies Act 1985 or the Companies (Northern Ireland) Order 1986) it is "called-up *share* capital" within the meaning given to that term in that Act or, as the case may be, that Order; or
- (2) (in the case of a *building society*) it is a "deferred share" as defined in the Building Societies (Deferred Shares) Order 1991; or

- (3) (in the case of any other *firm*) it is:
- (a) in economic terms; and
 - (b) in its characteristics as capital (including loss absorbency, permanency, ranking for repayment and fixed costs);
- substantially the same as called-up *share* capital falling into (1).

2.2.81 R A *firm* may not include a *capital instrument* other than a *share* in its *tier one capital resources* unless it complies with GENPRU 2.2.80R(3).

2.2.82 G There are additional loss absorption requirements for *innovative tier one capital* in GENPRU 2.2.116R to 2.2.118R (*Innovative tier one instrument* should not constitute a liability).

Core tier one capital: permanent share capital

2.2.83 R *Permanent share capital* means an item of capital which (in addition to satisfying GENPRU 2.2.64R) meets the following conditions:

- (1) it is:
- (a) an ordinary *share*; or
 - (b) a *members' contribution*; or
 - (c) part of the *initial fund* of a *mutual*;
- (2) any *coupon* on it is not cumulative, the *firm* is under no obligation to pay a *coupon* in any circumstances and the *firm* has the right to choose the amount of any *coupon* that it pays; and
- (3) the terms upon which it is issued do not permit redemption and it is otherwise incapable of being redeemed to at least the same degree as an ordinary *share* issued by a company incorporated under the Companies Act 1985 or the Companies (Northern Ireland) Order 1986 (whether or not it is such a *share*).

2.2.84 G GENPRU 2.2.83R has the effect that the *firm* should be under no obligation to make any payment in respect of a *tier one instrument* if it is to form part of its *permanent share capital* unless and until the *firm* is wound up. A *tier one instrument* that forms part of *permanent share capital* should not therefore count as a liability before the *firm* is wound up. The fact that relevant company law permits the *firm* to make earlier repayment does not mean that the *tier one instruments* are not eligible. However, the *firm* should not be required by any contractual or other obligation arising out of the terms of that capital to repay *permanent share capital*. Similarly a *tier one instrument* may still qualify if company law allows dividends to be paid on this capital, provided the *firm* is not contractually or otherwise obliged to pay them. There should therefore be no fixed costs.

Core tier one capital: profit and loss account and other reserves: Losses

- 2.2.85 R (1) Negative amounts, including any interim net losses (but in the case of a *BIPRU investment firm*, only material interim net losses), must be deducted from profit and loss account and other reserves.
- (2) For these purposes material interim net losses mean unaudited interim losses arising from a *firm's trading book* and *non-trading book* business which exceed 10% of the sum of its *capital resources* calculated at stages A (Core tier one capital) and B (Perpetual non-cumulative preference shares) in the *capital resources table*.
- (3) If interim losses as referred to in (2) exceed the 10% figure in (2) then a *BIPRU investment firm* must deduct the whole amount of those losses and not just the excess.

Core tier one capital: profit and loss account and other reserves: Losses arising from valuation adjustments (BIPRU firm only)

- 2.2.86 R (1) This *rule* applies to *trading book* valuation adjustments or reserves referred to in *GENPRU 1.3.29R* to *GENPRU 1.3.35G* (Valuation adjustments and reserves). It applies to a *BIPRU firm*.
- (2) When valuation adjustments or reserves give rise to losses of the current financial year, a *firm* must treat them in accordance with *GENPRU 2.2.85R*.
- (3) Valuation adjustments or reserves which exceed those made under the accounting framework to which a *firm* is subject must be treated in accordance with (2) if they give rise to losses and under *GENPRU 2.2.248R* (Net interim *trading book* profits) otherwise.

Core tier one capital: profit and loss account and other reserves: Dividends

- 2.2.87 R Dividends must be deducted from reserves as soon as they are declared.

Core tier one capital: profit and loss account and other reserves: Capital contributions

- 2.2.88 R A *firm* must account for a capital contribution as an increase in reserves and may, notwithstanding *GENPRU 2.2.63R*, count that increase in reserves as *core tier one capital*.
- 2.2.89 G An item of capital qualifies as a capital contribution if it is a gift of capital (and, as such, is not repayable) and a *coupon* is not payable on it.

Core tier one capital: profit and loss account and other reserves: Securitisation (BIPRU firm only)

- 2.2.90 R In the case of a *BIPRU firm* which is the *originator* of a *securitisation*, net gains arising from the capitalisation of future income from the *securitised* assets and providing *credit enhancement* to *positions* in the *securitisation* must be excluded from profit and loss account and other reserves.

Core tier one capital: profit and loss account and other reserves: Valuation

- 2.2.91 G Profit and loss account and other reserves should be valued in accordance with the *rules* in *GENPRU* 1.3 (Valuation).

Core tier one capital: profit and loss account and other reserves: Revaluation reserves (BIPRU firm only)

- 2.2.92 G A revaluation reserve is not included as part of a *BIPRU firm's* profit and loss account and other reserves. It is dealt with separately and forms part of a *BIPRU firm's upper tier two capital*.

Core tier one capital: partnership capital account (BIPRU firm only)

- 2.2.93 R *Eligible partnership capital* means a partners' account:
- (1) into which capital contributed by the partners is paid; and
 - (2) from which under the terms of the partnership agreement an amount representing capital may be withdrawn by a partner only if:
 - (a) he ceases to be a partner and an equal amount is transferred to another such account by his former partners or any *person* replacing him as their partner; or
 - (b) the partnership is otherwise dissolved or wound up and either the *BIPRU firm* has ceased to be *authorised* or no longer has a *Part IV permission*.

Core tier one capital: Eligible LLP members' capital (BIPRU firm only)

- 2.2.94 R *Eligible LLP members' capital* means a members' account:
- (1) into which capital contributed by the members is paid; and
 - (2) from which under the terms of the *limited liability partnership* agreement an amount representing capital may be withdrawn by a member only if:
 - (a) he ceases to be a member and an equal amount is transferred to another such account by his former fellow members or any *person* replacing him as a member; or
 - (b) the *limited liability partnership* is otherwise dissolved or wound up and either the *BIPRU firm* has ceased to be *authorised* or no longer has a *Part IV permission*.

Core tier one capital: Eligible LLP members' and partnership capital accounts (BIPRU firm only)

- 2.2.95 R A *BIPRU firm* that is a partnership or a *limited liability partnership* may not include *eligible partnership capital* or *eligible LLP members' capital* in its *tier one capital resources* unless (in addition to *GENPRU 2.2.62R* (General conditions relating to *tier one capital*)) it complies with *GENPRU 2.2.83R(2)* (*Coupons* should not be cumulative or mandatory). However *GENPRU 2.2.64R(3)* (Redemption) is replaced by *GENPRU 2.2.93R* or *GENPRU 2.2.94R*.
- 2.2.96 G If a *firm* has surplus *eligible partnership capital* or *eligible LLP members' capital* that it wishes to repay in circumstances other than those set out in *GENPRU 2.2.93R* or *GENPRU 2.2.94R* it may apply to the *FSA* for a *waiver* to allow it to do so. If a *firm* applies for such a *waiver* the information that the *firm* supplies with the application might include:
- (1) a demonstration that the *firm* would have sufficient *capital resources* to meet its *capital resources requirement* immediately after the repayment;
 - (2) a demonstration that the *firm* would have sufficient financial resources to meet any *individual capital guidance* and the *firm's* latest assessment under the *overall Pillar 2 rule* immediately after the repayment; and
 - (3) a two to three year capital plan demonstrating that the *firm* would be able to meet the requirements in (1) and (2) at all times without needing further capital injections.

Core tier one capital: Other capital items for limited liability partnerships and partnerships (BIPRU firm only)

- 2.2.97 R The items *permanent share capital* and *share premium account* (which form part of *core tier one capital*) and perpetual non-cumulative *preference shares* (which forms stage B of the *capital resources table*) do not apply to a *BIPRU firm* that is a partnership or a *limited liability partnership*.
- 2.2.98 R Without prejudice to *GENPRU 2.2.62R* (Tier one capital: General), the item other reserves (which forms part of the item profit and loss and other reserves) applies to a *BIPRU firm* that is a partnership or a *limited liability partnership* to the extent the reserves correspond to reserves that are eligible for inclusion as other reserves in the case of a *BIPRU firm* that is incorporated under the Companies Act 1985 or the Companies (Northern Ireland) Order 1986.
- 2.2.99 G A *BIPRU firm* that is a partnership or a *limited liability partnership* should include profit and loss (taking into account interim losses or material interim net losses) in its *core tier one capital*.

Core tier one capital: partnership and limited liability partnership excess drawings (BIPRU firm only)

- 2.2.100 R A *BIPRU firm* which is a partnership or *limited liability partnership* must deduct at stage E of the calculation in the *capital resources table* (Deductions from tier one capital) the amount by which the aggregate of the amounts withdrawn by its partners or members exceeds the profits of that *firm*. Amounts of *eligible partnership capital* or *eligible LLP members' capital* repaid in accordance with *GENPRU 2.2.93R* or *GENPRU 2.2.94R* are not included in this calculation.

Core tier one capital: Share premium account

- 2.2.101 R (1) A *firm* must include *share* premium account relating to the issue of a *share* forming part of its *core tier one capital* in its *core tier one capital*.
- (2) A *firm* must include *share* premium account relating to the issue of a *share* forming part of another tier of capital in that other tier.
- (3) A *firm* that is incorporated under the Companies Act 1985 or the Companies (Northern Ireland) Order 1986 may include its *share* premium account as *core tier one capital* notwithstanding (2) to the extent that the terms of issue of the *share* concerned provide that any premium is not repayable on redemption.
- (4) (3) applies to a *firm* that is not incorporated under the Companies Act 1985 or the Companies (Northern Ireland) Order 1986 if its *share* premium account is subject to substantially the same or greater restraints on use than a *share* premium account falling into (3).

Core tier one capital: externally verified interim net profits

- 2.2.102 R Externally verified interim net profits are interim profits which have been verified by a *firm's* external auditors after deduction of tax, declared dividends and other appropriations.
- 2.2.103 G A *firm* may include interim profits before a formal decision has been taken only if these profits have been verified, in accordance with the relevant Auditing Practices Board's Practice Note, by *persons* responsible for the auditing of the accounts.

Core tier one capital: valuation differences (insurer only)

- 2.2.104 R *GENPRU 2.2.104R* to *GENPRU 2.2.107R* only apply to an *insurer*.
- 2.2.105 R Valuation differences are all differences between the valuation of assets and liabilities as valued in *GENPRU* and the valuation that the *insurer* uses for its external financial reporting purposes, except valuation differences which are dealt with elsewhere in the *capital resources table*. The sum of these valuation differences must either be added to (if positive) or deducted from (if negative) an *insurer's capital resources* in accordance with the *capital resources table*.

- 2.2.106 G Additions to and deductions from *capital resources* will arise from the application of asset and liability valuation and admissibility *rules* (see *GENPRU* 1.3 (Valuation), *GENPRU* 2.2.251R (Deductions from total capital: Inadmissible assets) and *GENPRU* 2 Ann 7R (Admissible assets in insurance)). Downward adjustments include *discounting* of *technical provisions* for *general insurance business* (which is optional for financial reporting but not permitted for regulatory valuation – see *GENPRU* 2.2.107R) and derecognition of any *defined benefit asset* in respect of a *defined benefit occupational pension scheme* (see *GENPRU* 1.3.9R(2) (General requirements: Adjustments to accounting values)). Details of valuation differences relating to *technical provisions* and liability adjustments for *long-term insurance business* are set out in *INSPRU* 1.2 (Mathematical reserves). In particular, contingent loans or other arrangements which are not valued as a liability under *INSPRU* 1.2.79R(2) (Reinsurance) result in a positive valuation difference.
- 2.2.107 R (1) Subject to (3), this *rule* applies to an *insurer* that carries on *general insurance business* and which *discounts* or reduces its *technical provisions* for *claims* outstanding.
- (2) An *insurer* of a kind referred to in (1) must deduct from its *capital resources* the difference between the undiscounted *technical provisions* or *technical provisions* before deductions, and the discounted *technical provisions* or *technical provisions* after deductions. This adjustment must be made for all *general insurance business classes*, except for risks listed under *classes* 1 and 2. For *classes* other than 1 and 2, no adjustment needs to be made in respect of the discounting of annuities included in *technical provisions*. For *classes* 1 and 2 (other than annuities), if the expected average interval between the settlement date of the *claims* being discounted and the accounting date is not at least four years, the *insurer* must deduct:
- (a) the difference between the undiscounted *technical provisions* and the discounted *technical provisions*; or
- (b) where it can identify a subset of *claims* such that the expected average interval between the settlement date of the *claims* and the accounting date is at least four years, the difference between the undiscounted *technical provisions* and the discounted *technical provisions* for the other *claims*.
- (3) This *rule* does not apply to a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part IV permission* has not subsequently been varied to add back the *regulated activity* of *effecting contracts of insurance*.

Core tier one capital: fund for future appropriations (insurer only)

- 2.2.108 R In relation to an *insurer* the fund for future appropriations means the fund of the same name required by the *insurance accounts rules*, comprising all funds the allocation of which either to *policyholders* or to shareholders has not been determined by the end of the *financial year*, or the balance sheet items under *international accounting standards* which in aggregate represent as nearly as possible that fund.

Other tier one capital: perpetual non-cumulative preference shares

- 2.2.109 R A perpetual non-cumulative *preference share* may be included at stage B of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it satisfies the following conditions:

- (1) any *coupon* on it is not cumulative, and the *firm* is under no obligation to pay a *coupon* in any circumstances; and
- (2) it is not an *innovative tier one instrument*.

- 2.2.110 G The other main provisions relevant to the eligibility of a perpetual non-cumulative *preference share* for inclusion in *tier one capital* are *GENPRU 2.2.62R* (Tier one capital: General), *GENPRU 2.2.64R* (General conditions for eligibility as tier one capital), *GENPRU 2.2.65R* (Connected transactions), *GENPRU 2.2.70R* to *GENPRU 2.2.75R* (Redemption of *tier one instruments*) and *GENPRU 2.2.80R* (Loss absorption). The *rules* about *innovative tier one capital* are also relevant as they may result in perpetual non-cumulative *preference shares* being treated as *innovative tier one capital*. Perpetual non-cumulative *preference shares* should be perpetual and redeemable only at the *firm's* option. Perpetual *preference shares* should be non-cumulative if they are to be included at stage B of the calculation in the *capital resources table*. Any feature that, in conjunction with a call, would make a *firm* more likely to redeem perpetual non-cumulative *preference shares* would normally result in classification as an *innovative tier one instrument*. Such features would include, but not be limited to, a *step-up*, bonus *coupon* on redemption or redemption at a premium to the original issue price of the *share*.

Other tier one capital: permanent interest bearing shares (building societies only)

- 2.2.111 R A *building society* may include a *PIBS* at stage B of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it is a “deferred share” as defined in the Building Societies (Deferred Shares) Order 1991.

- 2.2.112 G The other main provisions relevant to inclusion of a *PIBS* in *tier one capital* are *GENPRU 2.2.62R* (Tier one capital: General), *GENPRU 2.2.64R* (General conditions for eligibility as tier one capital), *GENPRU 2.2.65R* (Connected transactions), *GENPRU 2.2.70R* to *GENPRU 2.2.75R* (Redemption of *tier one instruments*), *GENPRU 2.2.76R* (Step-ups and redeemable tier one instruments) and *GENPRU 2.2.80R* (Loss absorption). However many of the *rules* in this section about features of *capital instruments* that result in treatment as *innovative tier one capital* do not apply.

Other tier one capital: innovative tier one capital: general

- 2.2.113 R If an item of capital is stated to be an *innovative tier one instrument* by the *rules* in *GENPRU 2.2*, it cannot be included in stages A (Core tier one capital) or B (Perpetual non-cumulative preference shares) of the calculation in the *capital resources table*.

Other tier one capital: innovative tier one capital: redemption

- 2.2.114 R If a *tier one instrument*, other than a *PIBS*:
- (1) is redeemable; and
 - (2) a reasonable *person* would think that:
 - (a) the *firm* is likely to redeem it; or
 - (b) the *firm* is likely to have an economic incentive to redeem it;

that *tier one instrument* is an *innovative tier one instrument*.

- 2.2.115 G Any feature that in conjunction with a call would make a *firm* more likely to redeem a *tier one instrument*, other than a *PIBS*, would normally result in classification as *innovative tier one capital resources*. *Innovative tier one instruments* include but are not limited to those incorporating a *step-up* or principal stock settlement.

Other tier one capital: innovative tier one capital: loss absorption

- 2.2.116 R A *firm* may include a *capital instrument* that is not a *share* in its *innovative tier one capital resources* if (in addition to satisfying all the other requirements in relation to *tier one capital* and *innovative tier one capital*) it satisfies the condition in this *rule*. In addition a *firm* may not include any other capital in its *innovative tier one capital resources* unless it satisfies the condition in this *rule*. The condition in this *rule* is that the *firm's* obligations under the instrument either:
- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
 - (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:
 - (i) the *firm* is, or is likely to become, unable to pay its debts; or
 - (ii) its liabilities exceed its assets;

- (b) a *person* (including, but not limited to, a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and
- (c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (wrongful trading).

2.2.117 G The effect of *GENPRU 2.2.116R* is that if a *potential tier one instrument* does constitute a liability, this should only be the case when the *firm* is able to pay that liability but chooses not to do so. As *tier one capital resources* should be undated, this will generally only be relevant on a solvent winding up of the *firm*. The holder should agree that the *firm* has no liability (including any contingent or prospective liability) to pay any amount to the extent to which that liability would cause the *firm* to become insolvent if it made the payment or to the extent that its liabilities exceed its assets or would do if the payment were made. The terms of the *capital instrument* should be such that the *directors* can continue to trade in the best interests of the senior creditors even if this prejudices the interests of the holders of the instrument.

2.2.118 R A *firm* may not include an *innovative tier one instrument*, unless it is a *preference share*, in its *tier one capital resources* unless it has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the criteria in *GENPRU 2.2.64R(6)* (Loss absorption) and *GENPRU 2.2.80R* to *GENPRU 2.2.81R* (Loss absorption) are met.

2.2.119 G For the purpose of *GENPRU 2.2.118R*, an independent legal opinion may be given by an *employee* of that *firm*, but if an *employee* does so he should not be part of the business unit responsible for the transaction (including the drafting of the issue documentation).

Other tier one capital: innovative tier one capital: coupons

2.2.120 R A *tier one instrument*, other than a *PIBS*, with a cumulative or mandatory *coupon* is an *innovative tier one instrument*.

Other tier one capital: innovative tier one capital: step-ups

2.2.121 R If:

- (1) a *potential tier one instrument*, other than a *PIBS*, is or may become subject to a *step-up*; and
- (2) that *potential tier one instrument* is redeemable at any time (whether before, at or after the time of the *step-up*);

that *potential tier one instrument* is an *innovative tier one instrument*.

- 2.2.122 G See *GENPRU 2.2.146R* to *GENPRU 2.2.154G* for further *rules* and *guidance* on *step-ups*.
- Other tier one capital: innovative tier one capital: indirectly issued tier one capital (BIPRU firm only)
- 2.2.123 R *GENPRU 2.2.123R* to *GENPRU 2.2.137R* apply to a *BIPRU firm*.
- 2.2.124 R (1) *GENPRU 2.2.123R* - *GENPRU 2.2.137R* apply to capital of a *firm* if:
- (a) either or both of the conditions in (2) are satisfied; and
 - (b) any of the *SPVs* referred to in (2) is a *subsidiary undertaking* of the *firm*.
- (2) The conditions referred to in (1) are:
- (a) that capital is issued to an *SPV*; or
 - (b) the subscription for the capital issued by the *firm* is funded directly or indirectly by an *SPV*.
- (3) A *BIPRU firm* may not include capital coming within this *rule* in its *capital resources* unless the requirements in the following *rules* are satisfied:
- (a) (if (2)(a) applies and (2)(b) does not) *GENPRU 2.2.127R*, *GENPRU 2.2.129R* and *GENPRU 2.2.132R*; or
 - (a) (in any other case) *GENPRU 2.2.133R*.
- 2.2.125 R A *BIPRU firm* may only count capital to which *GENPRU 2.2.124R* applies as *innovative tier one capital*.
- 2.2.126 R For the purpose of *GENPRU 2.2*, an *SPV* is, in relation to a *BIPRU firm*, any *undertaking* whose main activity is to raise funds for that *firm* or for a *group* to which that *BIPRU firm* belongs.
- 2.2.127 R The *SPV* referred to in *GENPRU 2.2.124R*(2)(a) must satisfy the following conditions:
- (1) it is controlled by the *firm* and may not operate independently of the *firm*;
 - (2) the rights of investors in the *SPV* who do not belong to the *group* of the *BIPRU firm* in question are not such as to affect the ability of the *firm* to control the *SPV*; and
 - (3) all or virtually all of its *exposures* (calculated by reference to the amount) consist of *exposures* to the *firm* or to that *firm's group*.

- 2.2.128 G An *SPV* could take the form of a limited partnership. In such an arrangement, holders of a *capital instrument* issued by the *SPV* which do not belong to the *group* of the *BIPRU firm* in question should have no right to participate in the management of the partnership, whether under the partnership's constitutional documents or the transaction documents. In general, this means that they should be treated as limited partners. It is expected that the general partner, having control of the *SPV*, would be the *firm*.
- 2.2.129 R The *SPV* referred to in *GENPRU* 2.2.124R(2)(a) must fund its subscription for the capital issued by the *firm* by the issue of capital that satisfies the following conditions:
- (1) it must comply with the conditions for qualification as *tier one capital*, as amended by *GENPRU* 2.2.130R, as if the *SPV* was itself a *firm* seeking to include that capital in its *tier one capital resources*;
 - (2) its terms must include an obligation on the *firm* to substitute for the instrument issued by the *SPV* a *tier one instrument* issued by that *firm* that is not an *innovative tier one instrument* when the *capital resources* of the *firm* fall below, or are likely to fall below, its *capital resources requirement*;
 - (3) the conversion ratio in respect of the substitution described in (2) must be fixed when the *SPV* issues the *capital instrument*; and
 - (4) to the extent that investors have the benefit of an obligation by a *person* other than the *SPV*:
 - (a) that obligation must be one owed by a member of the *firm's group*; and
 - (b) the extent of that obligation must be no greater than would be permitted by *GENPRU* if that obligation formed part of the terms of a *capital instrument* issued by that member which complied with the *rules* in *GENPRU* relating to *innovative tier one capital*.
- 2.2.130 R For the purpose of *GENPRU* 2.2.129R and *GENPRU* 2.2.132R, *GENPRU* 2.2.118R (Requirement to obtain a legal opinion) does not apply.
- 2.2.131 R In relation to the obligation to substitute described in *GENPRU* 2.2.129R(2), a *firm* must take all reasonable steps to ensure that it has at all times authorised and unissued *tier one instruments* that are not *innovative tier one instruments* (and the authority to issue them) sufficient to discharge its obligation to substitute.
- 2.2.132 R The capital which the *firm* seeks to include in its *capital resources* under *GENPRU* 2.2.124R(3)(a) must satisfy the following conditions:
- (1) it meets the conditions for inclusion in *tier one capital* (subject to *GENPRU* 2.2.130R);
 - (2) its first call date (if any) must not arise before that on the instrument issued by the *SPV*; and

- (3) its terms relating to repayment must be the same as those of the instrument issued by the *SPV*.
- 2.2.133 R (1) This rule deals with any transaction:
- (a) under which an *SPV* directly or indirectly funds the subscription for capital issued by the *firm* as described in *GENPRU 2.2.124R*; or
- (b) that is directly or indirectly funded by a transaction in (1)(a).
- (2) Each *undertaking* that is a party to a transaction to which this *rule* applies (other than the *firm*) must be a *subsidiary undertaking* of the *firm*.
- (3) Each *SPV* that is a party to a transaction to which this *rule* applies must comply with *GENPRU 2.2.127R*.
- (4) Any capital to which (1) applies (other than the capital that is to be included in the *firm's capital resources*) must be in the form of capital that complies with *GENPRU 2.2.129R(1)* and (4), whether or not issued by an *SPV*.
- (5) The obligations in *GENPRU 2.2.129R(2)* and (3) only apply to capital issued by an *SPV* at the end of the chain of transactions beginning with the issue of capital by the *firm* referred to in *GENPRU 2.2.124R*.
- (6) *GENPRU 2.2.132R* applies to the capital issued by the *firm* as referred to in *GENPRU 2.2.124R*. For these purposes references in *GENPRU 2.2.132R* to the instrument issued by the *SPV* are to the instrument referred to in (5).
- 2.2.134 G The purpose of *GENPRU 2.2.133R* is to deal with a capital-raising under which the capital raised by a special purpose vehicle is passed through a number of *undertakings* before it is invested in the *firm*. If the *capital resources* of the *firm* fall below, or are likely to fall below, its *capital resources requirement* the *firm* should replace the capital issued by that first special purpose vehicle with a *tier one instrument* directly issued by the *firm* itself that is not an *innovative tier one instrument*.
- 2.2.135 R A *firm* which satisfies the conditions for the inclusion of capital set out in *GENPRU 2.2.124R*, must, in addition, if that transaction is in any respect unusual, notify the *FSA* at least one *Month* in advance of the date on which the *firm* intends to include that capital in its *capital resources*.
- 2.2.136 G The *FSA* is likely to consider as unusual a transaction which involves the raising by the *firm* of *tier one capital* through a *subsidiary undertaking* of that *firm* that is not an *SPV*. The *FSA* would expect a *firm* to request individual *guidance* in such circumstances.
- 2.2.137 R A *firm* must ensure that, in relation to a transaction falling within *GENPRU 2.2.124R*:

- (1) the marketing document for the transaction contains all the information which a reasonable third party would require to understand the transaction fully and its effect on the financial position of the *firm* and its *group*; and
- (2) the information in (1) and the transaction are easily comprehensible without the need for additional information about the *firm* and its *group*.

Tier one capital: Conversion ratio

- 2.2.138 R (1) This *rule* applies to a *potential tier one instrument* if:
- (a) it is redeemable by the *firm* (ignoring *GENPRU 2.2.77R* (Meaning of redemption));
 - (b) it provides that if the issuer does not exercise that right or does not do so in specified circumstances the issuer must or may have to redeem it in whole or in part through the issue of *shares* eligible for inclusion in the *firm's tier one capital resources* or the instrument converts or may convert into such *shares*; and
 - (c) *GENPRU 2.2.77R* means that the obligation in (1)(b) is treated as not being inconsistent with *GENPRU 2.2.70R(1)* (*Tier one capital* should not be redeemable at the option of the holder).
- (2) A *firm* must not include a *potential tier one instrument* to which this *rule* applies in its *tier one capital resources* if:
- (a) the conversion ratio as at the date of redemption may be greater than the conversion ratio as at the time of issue by more than 200%; or
 - (b) the market price of the conversion instruments issued in relation to one unit of the original capital item (plus any cash element of the redemption) may be greater than the issue price of that original capital item.
- (3) All determinations under this *rule* are made as at the date of issue of the original capital item.
- 2.2.139 R In *GENPRU 2.2.138R* to *GENPRU 2.2.142R*:
- (1) the original capital item means the capital item that is being redeemed; and
 - (2) the conversion instrument means the *tier one capital* to be issued on its redemption.
- 2.2.140 R In *GENPRU 2.2.138R* to *GENPRU 2.2.142R*, the conversion ratio means the ratio of:
- (1) the number of units of the conversion instrument that the *firm* must issue to satisfy its redemption obligation (so far as it is to be satisfied by the issue of conversion instruments) in respect of one unit of the original capital item; to

- (2) one unit of the original capital item.
- 2.2.141 R In *GENPRU* 2.2.138R to *GENPRU* 2.2.142R, the conversion ratio as at the date of issue of the original capital item is calculated as if the original capital item were redeemable at that time.
- 2.2.142 R If the conversion instruments or the original capital item are subdivided or consolidated or subject to any other occurrence that would otherwise result in like not being compared with like, the conversion ratio calculation in *GENPRU* 2.2.138R must be adjusted accordingly.
- 2.2.143 G (1) The significance of the limitations on conversion in *GENPRU* 2.2.138R(2) can be seen in the example in this paragraph.
- (2) A *firm* issues innovative notes with a par value of £100 each. The terms of the instrument provide that if the instrument is not called at par at the first call date the notes convert into a variable number of ordinary *shares*.
- (3) If the market price of the ordinary *shares* is 400 pence per share on the day of issue of the innovative notes then the maximum number of ordinary *shares* (M) that a single £100 par value innovative note can be converted into is calculated as follows:
- (a) $M = \text{Par value of innovative instrument} * 200\% / \text{market value of ordinary share};$
- (b) $M = £100 * 2 / £4 = 50 \text{ shares}.$
- (4) The practical effect is that conversion will result in the holder of an innovative capital note receiving ordinary *shares* equal to the par value of that note only when the market price of the ordinary *shares* remains above half the market price of the *shares* at the date of issue of the notes.
- (5) If the market price of the ordinary *shares* fell by half to 200 pence, the maximum permitted number of *shares* (50) would have to be issued in order to give an investor in the innovative note ordinary *shares* with a market value equal to £100. If the market price of the ordinary *shares* fell below 200 pence, the issue of the maximum permitted number of ordinary *shares* would have a market value below £100.
- 2.2.144 G (1) In addition to the maximum conversion ratio of 200%, *GENPRU* 2.2.138R(2) (b) does not permit a *firm* to issue *shares* that would have a market value that exceeds the issue price of the instrument being redeemed.
- (2) In the example in *GENPRU* 2.2.143G, if the market value of the ordinary *shares* was 250 pence at the conversion date, the maximum number of ordinary *shares* that may be issued to satisfy the redemption of one of the £100 par value innovative notes would be 40 (= £100 / £2.5).

Tier one capital: Requirement to have sufficient unissued stock

- 2.2.145 R (1) This *rule* applies to a *potential tier one instrument* of a *firm* where either:
- (a) the redemption proceeds; or
 - (b) any *coupon* on that capital item;
- can be satisfied by the issue of another *capital instrument*.
- (2) A *firm* may only include an item of capital to which this *rule* applies in its *tier one capital resources* if the *firm* has authorised and unissued *capital instruments* of the kind in question (and the authority to issue them):
- (a) that are sufficient to satisfy all such payments then due; and
 - (b) are of such amount as is prudent in respect of such payments that could become due in the future.

Step-ups: calculating the size of a step-up

- 2.2.146 R (1) Where a *rule* in this section says that a particular treatment applies to an item of capital that is subject to a *step-up* of a specified amount, the question of whether that *rule* is satisfied must be judged by reference to the cumulative amount of all *step-ups* since the issue of that item of capital rather than just by reference to a particular *step-up*.
- (2) Where a *step-up* arises through a change from paying a *coupon* on a debt instrument to paying a dividend on a *share* issued in settlement of the *coupon*, any net cost to the *firm* arising from the different tax treatment of the dividend compared to the tax treatment of interest may be ignored for the purpose of assessing the effect of that *step-up*.

Step-ups: Limits on the amount of step-ups on tier one and two capital

- 2.2.147 R (1) A *firm* may not include in its *tier one capital resources* a *tier one instrument* that is or may be subject to a *step-up* that does not meet the definition of moderate in the press release of the Basle Committee on Banking Supervision of 27th October 1998 called "Instruments eligible for inclusion in Tier 1 capital".
- (2) For the purpose of (1) the words in that press release "than, at national supervisory discretion, either" are replaced by "than the higher of the following two amounts".
- (3) The calculations required by this *rule* and *GENPRU 2.2.151R* must be carried out as at the date of issue of the relevant instrument.
- 2.2.148 G The effect of *GENPRU 2.2.147R* is that for inclusion in *tier one capital resources*, *step-ups* in instruments should be moderate. A moderate *step-up* for these purposes is one which results in an increase over the initial rate that is no greater than the higher of the following two amounts:

- (1) 100 basis points, less the swap spread between the initial index basis and the stepped-up index basis; or
 - (2) 50% of the initial credit spread, less the swap spread between the initial index basis and the stepped-up index basis.
- 2.2.149 G If a *coupon* paid on an item of capital is initially set at a specified spread above an index (the initial index basis), and the *coupon* moves to being set relative to another index (the stepped up index basis), there will be an implied *step-up* (positive or negative) even if the specified spread does not change. This is because each index may itself include a spread relative to the risk free rate and this spread may differ between the two indexes. The deduction of the swap spread in *GENPRU* 2.2.148G(1) and (2) above adjusts for this difference.
- 2.2.150 G Where the *step-up* involves a conversion from fixed to floating (or vice versa), or a switch in basis index, the swap spread should be fixed at pricing date, reflecting the differential in pricing between indices at the time. The significance of deducting the swap spread can be seen by the following example:
- (1) the pricing date:
 - (a) 10 year gilts (G) = 5.5% (the initial index basis);
 - (b) 3 month LIBOR is the stepped up index basis and the 10 year mid swap rate (L) = 5.9%;
 - (c) initial fixed *coupon* rate = G + 200bp;
 - (d) swap spread = 0.4% (= 5.9% - 5.5%);
 - (e) initial fixed coupon rate = 7.5%;
 - (f) the swap spread shows that there is 40bps of spread in the stepped up index basis relative to the initial index basis; and
 - (g) the initial fixed coupon rate of 7.5% is equivalent to the mid swap rate + 160bp, or L + 200bp – the swap spread;
 - (2) pricing of *stepped-up* rate at year 10 with *step-up* of 100bp without deducting swap spread:
 - (a) *stepped-up* floating rate = L + 200 + 100bp step-up = 8.9%; and
 - (b) effective *step-up* from initial fixed rate of 140bp (= 8.9% - 7.5%); and
 - (3) pricing of *stepped-up* rate at year 10 with step-up of 100bp with deduction of the swap spread:
 - (a) *stepped-up* floating *coupon* rate = L + 200 less 40bp swap spread (difference between 5.5% and 5.9%) + 100bp step-up = 8.5%

(b) effective *step-up* from initial rate of 100bp (= 8.5% - 7.5%).

2.2.151 R (1) Subject to (2), if a *tier two instrument* is or may be subject to a *step-up* that does not meet the definition of moderate in the press release of the Basle Committee on Banking Supervision referred to in *GENPRU 2.2.147R(1)* as adjusted under *GENPRU 2.2.147R(2)*, the first date that a *step-up* can take effect is deemed to be its final maturity date if that date is before its actual maturity date.

(2) If a *tier two instrument*:

(a) is or may be subject to a *step-up* during the period beginning on the fifth anniversary of the date of issue of that item and ending immediately before the tenth anniversary of the date of issue; and

(b) the *step-up* or possible *step-up* is one which may result in an increase over the initial rate that is greater than 50 basis points, less the swap spread between the initial index basis and the stepped-up index basis (all these terms must be interpreted in accordance with *GENPRU 2.2.147R*);

the first date that a *step-up* can take effect is deemed to be its final maturity date if that date is before its actual maturity date.

2.2.152 R An instrument does not breach *GENPRU 2.2.147R* or as the case may be, is not subject to a deemed maturity date under *GENPRU 2.2.151R*, even though it is or may be subject to a *step-up* that exceeds the amount specified in those *rules* if:

(1) the instrument is fungible with other instruments (the "existing stock") that are included in the *firm's tier one capital resources* (in the case of *GENPRU 2.2.147R*) or *tier two capital resources* (in the case of *GENPRU 2.2.151R*);

(2) (if there has been no more than one previous issue of the existing stock) the existing stock complied with those limits on its date of issue;

(3) (if there has been more than one previous issue of the existing stock) the first such issue of the existing stock complied with those limits on its date of issue; and

(4) the result of the *step-up* on the instrument to which this *rule* applies is that the *coupon* on that instrument and the *coupon* on the existing stock is the same.

2.2.153 R (1) A *firm* must not include in its *tier one capital resources* a *potential tier one instrument* that is or may become subject to a *step-up* if that *step-up* can arise earlier than the tenth anniversary of the date of issue of that item of capital.

(2) A *firm* must not include in its *tier two capital resources* a *capital instrument* that is or may become subject to a *step-up* if that *step-up* can arise earlier than the fifth anniversary of the date of issue of that item of capital.

- 2.2.154 G Debt instruments containing embedded options, e.g. issues containing options for the interest rate after the *step-up* to be at a margin over the higher of two (or more) reference rates, or for the interest rate in the previous period to act as a floor, may affect the funding costs of the borrower and imply a *step-up*. In such circumstances, a *firm* may wish to seek individual *guidance* on the application of the *rules* relating to *step-ups* to the *capital instrument* in question. See *SUP 9* (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from tier one: Intangible assets

- 2.2.155 R A *firm* must deduct from its *tier one capital resources* the value of intangible assets.
- 2.2.156 G Intangible assets include goodwill as defined in accordance with the requirements referred to in *GENPRU 1.3.4R* (General requirements: accounting principles to be applied) applicable to the *firm*. The treatment of deferred acquisition cost assets for *BIPRU investment firms* is dealt with in *GENPRU 1.3* (Valuation); they should not be deducted as an intangible asset.

Tier two capital: General

- 2.2.157 G *Tier two capital resources* are split into upper and lower tiers. A major distinction between *upper* and *lower tier two capital* is that only perpetual instruments may be included in *upper tier two capital* whereas dated instruments, such as fixed term *preference shares* and dated subordinated debt, may be included in *lower tier two capital*.
- 2.2.158 G *Tier two instruments* are *capital instruments* that combine the features of debt and equity in that they are structured like debt, but exhibit some of the loss absorption and funding flexibility features of equity.

General conditions for eligibility as tier two capital instruments

- 2.2.159 R A *capital instrument* must not form part of the *tier two capital resources* of a *firm* unless it meets the following conditions:
- (1) the claims of the creditors must rank behind those of all unsubordinated creditors;
 - (2) the only events of default must be non-payment of any amount falling due under the terms of the *capital instrument* or the winding-up of the *firm* and any such event of default must not prejudice the subordination in (1);
 - (3) to the fullest extent permitted under the laws of the relevant jurisdictions, the remedies available to the subordinated creditor in the event of non-payment or other breach of the terms of the *capital instrument* must (subject to *GENPRU 2.2.161R*) be limited to petitioning for the winding-up of the *firm* or proving for the debt in the liquidation or administration;
 - (4) any:

- (a) remedy permitted by (3);
- (b) remedy that cannot be excluded under the laws of the relevant jurisdictions as referred to in (3);
- (c) remedy permitted by *GENPRU 2.2.161R*; and
- (d) terms about repayment as referred to in (5);

must not prejudice the matters in (1) and (2) and in particular any damages permitted by (b) or (c) and repayment obligation must be subordinated in accordance with (1);

- (5) without prejudice to (1), the debt must not become due and payable before its stated final maturity date (if any) except on an event of default complying with (2) or as permitted by *GENPRU 2.2.172R* (Repayment at the option of the issuer) or *GENPRU 2.2.194R(2)* (Repayment of *lower tier two capital* at the option of the holder) and any remedy described in (4)(a) to (c) must not prejudice this requirement;
- (6) the debt agreement or terms of the *capital instrument* are governed by the law of England and Wales, or of Scotland or of Northern Ireland;
- (7) to the fullest extent permitted under the laws of the relevant jurisdictions, creditors must waive their right to set off amounts they owe the *firm* against subordinated amounts included in the *firm's capital resources* owed to them by the *firm*;
- (8) the terms of the *capital instrument* must be set out in a written agreement that contains terms that provide for the conditions set out in (1) to (7);
- (9) the debt must be unsecured and fully paid up;
- (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9) and, where it applies, *GENPRU 2.2.271R* (Other requirements: insurers carrying on with-profits business (Insurer only));
- (11) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses; and
- (12) the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual stating that the requirements in (1) to (7) and (insofar as it relates to whether the *capital instrument* is unsecured) (9) have been met.

2.2.160 R A holder of a non-deferred share of a *building society* must be treated as a senior unsecured creditor of that *building society* for the purpose of *GENPRU 2.2.159R*.

General conditions for eligibility as tier two capital instruments: Additional remedies

- 2.2.161 R A *capital instrument* may be included in a *firm's tier two capital resources* even though the remedies available to the subordinated creditor go beyond those referred to in *GENPRU 2.2.159R(3)*, if the following conditions are satisfied:
- (1) those remedies are not available for failure to pay any amount of principal, interest or expenses or in respect of any other payment obligation; and
 - (2) those remedies do not in substance amount to remedies to recover payment of the amounts in (1).
- 2.2.162 G If damages are a remedy that cannot be excluded as referred to in *GENPRU 2.2.159R(3)* those damages should be subordinated in accordance with *GENPRU 2.2.159R(1)*. Damages permitted by *GENPRU 2.2.161R* should also be subordinated in accordance with *GENPRU 2.2.159R(1)*.

General conditions for eligibility as tier two capital instruments: Alternative governing laws

- 2.2.163 R *GENPRU 2.2.159R(6)* does not apply if the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the same degree of subordination has been achieved under the law that governs the debt and the agreement as that which would have been achieved under the laws of England and Wales, Scotland, or Northern Ireland.

General conditions for eligibility as tier two capital instruments: Standard form documentation

- 2.2.164 G The *FSA* is more concerned that the subordination provisions listed in *GENPRU 2.2.159R* should be effective than that they should follow a particular form. The *FSA* does not, therefore, prescribe that the loan agreement or *capital instrument* should be drawn up in a standard form.

Guidance on the general conditions for eligibility as tier two capital instruments

- 2.2.165 G For the purposes of *GENPRU 2.2.159R(5)* the debt agreement or terms of the instrument should not contain any clause which might require early repayment of the debt (e.g. cross default clauses, negative pledges and restrictive covenants). A cross default clause is a clause which says that the loan goes into default if any of the borrower's other loans go into default. It is intended to prevent one creditor being repaid before other creditors, e.g. obtaining full repayment through the courts. A negative pledge is a clause which puts the loan into default if the borrower gives any further charge over its assets. A restrictive covenant is a term of contract that directly, or indirectly, could lead to early repayment of the debt. Some covenants, e.g. relating to the provision of management information or ownership restrictions, are likely to comply with *GENPRU 2.2.159R(3)* as long as monetary redress is ruled out, or any payments are covered by the subordination clauses.

- 2.2.166 G *GENPRU 2.2.159R(3)* allows a *capital instrument* to form part of the *tier two capital resources* even though the laws of the relevant jurisdiction do not allow remedies to be limited in the way described there. For example it is not possible to limit certain remedies in the case of an issue in the United States that is SEC-registered and subject to the provisions of the Trust Indenture Act.
- 2.2.167 G The purpose of *GENPRU 2.2.159R(7)* is to ensure that all of the *firm's* assets are available to *consumers* ahead of subordinated creditors. The waiver should apply both before and during liquidation or administration.
- 2.2.168 G The *guidance* in *GENPRU 2.2.119G* (Employee may give legal opinion) also applies for the purpose of *GENPRU 2.2.159R(12)* and *GENPRU 2.2.163R*.

Tier two capital instruments: Connected transactions

- 2.2.169 R An item of capital does not comply with *GENPRU 2.2.159R* (General conditions for eligibility as tier two *capital instruments*) or *GENPRU 2.2.177R* (Upper tier two capital: General) if the issue of that item of capital by the *firm* is connected with one or more other transactions which, when taken together with the issue of that item, could result in that item of capital no longer displaying all of the characteristics set out in whichever of those *rules* apply.
- 2.2.170 G *GENPRU 2.2.66G* (*Guidance* on *GENPRU 2.2.65R*) applies to *GENPRU 2.2.169R* in the same way as it does to *GENPRU 2.2.65R* (The equivalent of *GENPRU 2.2.169R* in relation to *tier one capital*).

Amendment of tier two instruments

- 2.2.171 R A *firm* must not amend the terms of the capital or the documents referred to in *GENPRU 2.2.159R(8)* unless:
- (1) at least one *Month* before the amendment is due to take effect, the *firm* has given the *FSA* notice in writing of the proposed amendment and the *FSA* has not objected; and
 - (2) that notice includes confirmation that the legal opinions referred to in *GENPRU 2.2.159R(12)* and, if applicable, *GENPRU 2.2.163R* (General conditions for eligibility as tier two *capital instruments*: Alternative governing laws) and *GENPRU 2.2.181R* (Legal opinions for *upper tier two instruments*), continue in full force and effect in relation to the terms of the debt and documents after any proposed amendment.

Redemption of tier two instruments

- 2.2.172 R A *tier two instrument* may be redeemable at the option of the *firm*, but any term of the instrument providing for the *firm* to have the right to exercise such an option must not provide for that right to be exercisable earlier than the fifth anniversary of the date of issue of the instrument.

2.2.173 R *GENPRU 2.2.71R to GENPRU 2.2.73G (Tier one instruments may be redeemed by the issuer before the fifth anniversary in limited circumstances) apply to GENPRU 2.2.172R in the same way as they do to GENPRU 2.2.70R (The issuer should not redeem tier one capital before the fifth anniversary).*

2.2.174 R In relation to a *tier two instrument*, a *firm* must notify the *FSA*:

- (1) in the case of an *insurer*, six *Months*; and
- (2) in the case of a *BIPRU firm*, one *Month*;

before the date of the proposed repayment (unless that *firm* intends to repay an instrument on its final maturity date) providing details of how it will meet its *capital resources requirement* after such repayment.

Tier two capital: step-ups

2.2.175 G The *rules and guidance* in *GENPRU 2.2.146R to GENPRU 2.2.154G* on *step-ups* cover *tier two capital* as well as *tier one capital*.

Upper tier two capital: General

2.2.176 G Examples of *capital instruments* which may be eligible to count in *upper tier two capital resources* include the following:

- (1) perpetual cumulative *preference shares*;
- (2) perpetual subordinated debt; and
- (3) other instruments that have the same economic characteristics as (1) or (2).

2.2.177 R A *capital instrument* must (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) meet the following conditions before it can be included in a *firm's upper tier two capital resources*:

- (1) it must have no fixed maturity date;
- (2) the terms of the instrument must provide for the *firm* to have the option to defer any *coupon* on the debt, except that the *firm* need not have that right in the case of a *coupon* payable in the form of an item of capital that is included in the *same stage of capital* or a *higher stage of capital* as that first item of capital;
- (3) the terms of the instrument must provide for the loss-absorption capacity of the *capital instrument* and unpaid *coupons*, whilst enabling the *firm* to continue its business;
- (4) it meets the conditions in *GENPRU 2.2.169R* (Connected transactions) and *GENPRU 2.2.180R* (Loss absorption); and

- (5) the terms of the instrument are such that either the instrument or debt is not redeemable or repayable or it is repayable or redeemable only at the option of the *firm*.
- 2.2.178 R If a *firm* gives notice of the redemption or repayment of an *upper tier two instrument*, the *firm* must no longer include it in its *upper tier two capital resources*.
- 2.2.179 G For the purpose of *GENPRU 2.2.177R(2)*, *GENPRU 2.2.68G* (Dividend pushers) applies equally in relation to the inclusion of an instrument in *upper tier two capital resources*.

Upper tier two capital: Loss absorption

- 2.2.180 R A *capital instrument* may only be included in *upper tier two capital resources* if a *firm's* obligations under the instrument either:
- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
 - (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:
 - (i) the *firm* is, or is likely to become, unable to pay its debts; or
 - (ii) its liabilities exceed its assets;
 - (b) a *person* (including but not limited to a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and
 - (c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (wrongful trading).

Upper tier two capital: Legal opinions

- 2.2.181 R A *firm* may not include an *upper tier two instrument* in its *upper tier two capital resources* unless it has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the criteria in *GENPRU 2.2.177R(3)* and *GENPRU 2.2.180R* (Loss absorption) are met. This *rule* does not apply to a perpetual cumulative *preference share*.

Upper tier two capital: Guidance

- 2.2.182 G *GENPRU 2.2.180R* is an example of the general principle in *GENPRU 2.2.177R(3)*.

2.2.183 G The *guidance* in GENPRU 2.2.117G (There should be no liability to the extent that the *firm* would become insolvent, etc) also applies for the purpose of GENPRU 2.2.180R.

2.2.184 G The *guidance* in GENPRU 2.2.119G (Employee may give legal opinion) also applies for the purpose of GENPRU 2.2.181R.

Upper tier two capital: Revaluation reserves (BIPRU firm only)

- 2.2.185 R (1) This *rule* applies to a *BIPRU firm*.
- (2) A *BIPRU firm* must, in relation to equities held in the available-for-sale financial assets category:
- (a) deduct any net losses at stage E of the calculation in the *capital resources table* (Deductions from tier one capital); and
 - (b) include any net gains (after deduction of deferred tax) in revaluation reserves at stage G of the calculation in the *capital resources table* (Upper tier two capital).
- (3) A *BIPRU firm* must include any net gains, after deduction of deferred tax, on revaluation reserves of investment properties at stage G of the calculation in the *capital resources table*. A *firm* must include any losses on such revaluation reserves in profit and loss account and other reserves.
- (4) A *BIPRU firm* must include any net gains, after deduction of deferred tax, on revaluation reserves of land and buildings at stage G of the calculation in the *capital resources table*. A *firm* must include any losses on such revaluation reserves in profit and loss account and other reserves.
- (5) (2) only applies to a *firm* to the extent that the category of asset referred to in that paragraph exists under the accounting framework that applies to the *firm* as referred to in GENPRU 1.3.4R (General requirements: accounting principles to be applied).
- (6) (3) and (4) apply to a *firm* whatever the accounting treatment of those items is under the accounting framework that applies to the *firm* as referred to in GENPRU 1.3.4R.

2.2.186 G Subject to GENPRU 2.2.185R, a *BIPRU firm* should value its revaluation reserves in accordance with the *rules* in GENPRU 1.3 (Valuation).

Upper tier two capital: General/collective provisions (BIPRU firm only)

- 2.2.187 R A *BIPRU firm* which adopts the *standardised approach* to credit risk may include general/collective provisions in its *tier two capital resources* only if:
- (1) they are freely available to the *firm*;
 - (2) their existence is disclosed in internal accounting records; and

- (3) their amount is determined by the management of the *firm*, verified by independent auditors and notified to the *FSA*.

2.2.188 R The value of general/collective provisions which a *firm* may include in its *tier two capital resources* as referred to in *GENPRU 2.2.187R* may not exceed 1.25% of the sum of the following:

- (1) the sum of the *market risk capital requirement* and the *operational risk capital requirement* (if applicable), multiplied by a factor of 12.5; and
- (2) the sum of *risk-weighted* assets under the *standardised approach* for credit risk.

2.2.189 R Where a *firm* is unable to determine whether collective/general provisions relate only to *exposures* on either the *standardised approach* or the *IRB approach*, that *firm* must allocate them on a basis which is reasonable and consistent.

Upper tier two capital: Surplus provisions (BIPRU firm only)

2.2.190 R A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* may include in its *upper tier two capital resources* positive amounts resulting from the calculation in *BIPRU 4.3.8R* (Treatment of expected loss amounts), up to 0.6% of the *risk weighted exposure amounts* calculated under that approach.

2.2.191 R A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* may not include in its *capital resources* value adjustments and provisions included in the calculation in *BIPRU 4.3.8R* (Treatment of *expected loss* amounts under the *IRB approach* for *trading book exposures*) or value adjustments and provisions for *exposures* that would otherwise have been eligible for inclusion in general/collective provisions other than in accordance with *GENPRU 2.2.190R*.

2.2.192 R For the purpose of *GENPRU 2.2.190R* and *GENPRU 2.2.191R*, *risk weighted exposure amounts* must not include those calculated in respect of *securitisation positions* which have a *risk weight* of 1250%.

2.2.193 R If a *BIPRU firm* calculates *risk weighted exposure amounts* under the *IRB approach* for the purposes of *BIPRU 14* (Capital requirements for settlement and counterparty risk) it must not include valuation adjustments referred to in *BIPRU 14.2.18R(1)* (Treatment of expected loss amounts) in its *capital resources* except in accordance with that *rule*.

Lower tier two capital

2.2.194 R A *firm* may include a *capital instrument* in its *lower tier two capital resources* if (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) either the holder has no right to repayment or it satisfies either of the following conditions:

- (1) it has an original maturity of at least five years; or

- (2) it is redeemable on notice from the holder, but the period of notice of repayment required to be given by the holder is five years or more.
- 2.2.195 G A *firm* may include perpetual *capital instruments* that do not meet the conditions in *GENPRU 2.2.177R* (Eligibility conditions for *upper tier two capital*) in *lower tier two capital resources* if they meet the general conditions described in *GENPRU 2.2.159R* (General conditions for eligibility as tier two *capital instruments*).
- 2.2.196 R (1) For the purposes of calculating the amount of a *lower tier two instrument* which may be included in a *firm's capital resources*:
- (a) in the case of an instrument with a fixed maturity date, in the final five years to maturity; and
- (b) in the case of an instrument with or without a fixed maturity date but where five years' or more notice of redemption or repayment has been given, in the final five years to the date of redemption or repayment;
- the principal amount must be amortised on a straight line basis.
- (2) If a *firm* gives notice of the redemption or repayment of a *lower tier two instrument* and (1) does not apply, the *firm* must no longer include it in its *lower tier two capital resources*.
- 2.2.197 G If a *firm* wishes to include in *lower tier two capital resources* an instrument with or without a fixed maturity date but where less than five years' notice of redemption or repayment has been given, it should seek individual *guidance* from the *FSA*.

The effect of swaps on debt capital

- 2.2.198 R *GENPRU 2.2.198R* to *GENPRU 2.2.201R* apply to a *tier one instrument*, *tier two instrument* or *tier three instrument* of a *firm* that is treated as a liability under the accounting framework to which it is subject as referred to in *GENPRU 1.3.4R* (General requirements: accounting principles to be applied) (a "debt instrument").
- 2.2.199 R A *firm* must recognise for the purpose of this section any effect that changes in exchange rates or interest rates have on a debt instrument (as defined in *GENPRU 2.2.198R*) under the accounting framework to which the *firm* is subject as referred to in *GENPRU 1.3.4R* (General requirements: accounting principles to be applied).
- 2.2.200 R A *firm* must recognise, in accordance with *GENPRU 2.2.201R*, the effect of a *foreign currency* hedge on a debt instrument (as defined in *GENPRU 2.2.198R*) denominated in a *foreign currency* or of an interest rate hedge on a fixed rate *coupon* debt instrument if:
- (1) the accounting framework to which the *firm* is subject as referred to in *GENPRU 1.3.4R* (General requirements: accounting principles to be applied) provides for a fair value hedge accounting relationship between a liability and its related hedge;

- (2) such a relationship exists under that accounting framework between that debt instrument and that hedge;
- (3) (if the debt instrument is a *tier one instrument*) the *firm's* obligations under that hedge comply with the conditions in *GENPRU 2.2.64R* to *GENPRU 2.2.65R* (General conditions for eligibility as tier one capital);
- (4) (if the debt instrument is a *tier two instrument* or an *upper tier three instrument*) the *firm's* obligations under that hedge comply with the conditions in *GENPRU 2.2.159R* to *GENPRU 2.2.169R* (General conditions for eligibility as tier two capital instruments) as modified, in the case of an *upper tier three instrument*, by *GENPRU 2.2.244R* (Application of *tier two capital rules* to *tier three capital debt*) except as follows:
 - (a) *GENPRU 2.2.159R(9)* only applies to the extent that it requires that hedge to be unsecured; and
 - (b) *GENPRU 2.2.159R(12)* (legal opinion) does not apply.

2.2.201 R A *firm* must recognise the effect of a hedge as referred to in *GENPRU 2.2.200R* by including the net accounting fair value of the hedging instrument in the valuation of the debt instrument (as defined in *GENPRU 2.2.198R*).

Deductions from tiers one and two: Qualifying holdings (bank or building society only)

2.2.202 R *GENPRU 2.2.202R* to *GENPRU 2.2.207R* only apply to a *bank* or *building society*.

2.2.203 R A *qualifying holding* is a direct or indirect holding of a *bank* or *building society* in a non-financial *undertaking* which represents 10% or more of the capital or of the voting rights or which makes it possible to exercise a significant influence over the management of that *undertaking*.

2.2.204 R For the purpose of *GENPRU 2.2.203R*, a non-financial *undertaking* is an *undertaking* other than:

- (1) a *credit institution* or *financial institution*;
- (2) an *undertaking* whose exclusive or main activities are a direct extension of banking or concern services ancillary to banking, such as leasing, factoring, the management of unit trusts, the management of data processing services or any other similar activity; or
- (3) an *insurer*.

2.2.205 R The amount of *qualifying holdings* that a *bank* or *building society* must deduct in the calculation in the *capital resources table* is:

- (1) (if the *firm* has one or more *qualifying holdings* that exceeds 15% of its relevant *capital resources*) the sum of such excesses; and

- (2) to the extent not already deducted in (1), the amount by which the sum of each of that *firm's qualifying holdings* exceeds 60% of its relevant *capital resources*.

2.2.206 R The relevant *capital resources* of a *firm* mean for the purposes of this *rule* the sum of the amount of *capital resources* calculated at stages L (Total tier one capital plus tier two capital) and Q (Total tier three capital) of the calculation in the *capital resources table* as adjusted in accordance with the following:

- (1) the *firm* must not take into account the items referred to in any of the following:
 - (a) *GENPRU 2.2.190R* to *GENPRU 2.2.193R* (surplus provisions); or
 - (b) *GENPRU 2.2.236R* (*expected loss* amounts and other negative amounts); or
 - (c) *GENPRU 2.2.237R* (*securitisation positions*);
- (2) the *firm* must make the deductions to be made at stage S of the calculation in the *capital resources table* (Deductions from total capital); and
- (3) the *firm* need not deduct any *excess trading book position* under (2).

2.2.207 R The following are not included as *qualifying holdings*:

- (1) *shares* that are not held as investments; or
- (2) *shares* that are held temporarily during the normal course of underwriting; or
- (3) *shares* held in a *firm's* name on behalf of others.

Deductions from tiers one and two: Material holdings (BIPRU firm only)

2.2.208 R *GENPRU 2.2.208R* to *GENPRU 2.2.216G* only apply to a *BIPRU firm*.

2.2.209 R A *material holding* is:

- (1) a *BIPRU firm's* holdings of *shares* and any other interest in the capital of an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) exceeding 10% of the *share* capital of the issuer, and, where this is the case, any holdings of subordinated debt of the same issuer are also included as a *material holding*; the full amount of the holding is a *material holding*; or

- (2) a *BIPRU firm's* holdings of *shares*, any other interest in the capital and subordinated debt in an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) not deducted under (1) if the total amount of such holdings exceeds 10% of that *firm's capital resources* at stage N (Total tier one capital plus tier two capital after deductions) of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
 - (3) a *bank* or *building society's* aggregate holdings in the *non-trading book* of *shares*, any other interest in the capital, and subordinated debt in all *credit institutions* or *financial institutions* not deducted under (1) or (2) if the total amount of such *holdings* exceeds 10% of that *firm's capital resources* at stage N of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
 - (4) a *material insurance holding*.
- 2.2.210 G For the purpose of the definition of a *material holding*, *share* capital includes *preference shares*. *Share* premium should be taken into account when determining the amount of *share* capital.
- 2.2.211 R When calculating the size of its *material holdings* a *firm* must only include an actual holding (that is, a long cash position). A *firm* must not net such holdings with a short position.
- 2.2.212 R A *material insurance holding* means the holdings of a *BIPRU firm* of items of the type set out in *GENPRU 2.2.213R* in any:
- (1) *insurance undertaking*; or
 - (2) *insurance holding company*;
- that fulfils one of the following conditions:
- (3) it is a *subsidiary undertaking* of that *firm*; or
 - (4) that *firm* holds a *participation* in it.
- 2.2.213 R An item falls into this provision for the purpose of *GENPRU 2.2.212R* if it is:
- (1) an *ownership share*; or
 - (2) subordinated debt or another item of capital that falls into Article 16(3) of the *First Non-Life Directive* or, as applicable, Article 27(3) of the *Consolidated Life Directive*.
- 2.2.214 R The amount to be deducted with respect to each *material insurance holding* is the higher of:

- (1) the book value of the *material insurance holding*; and
 - (2) the *solo capital resources requirement* for the *insurance undertaking* or *insurance holding company* in question calculated in accordance with Part 3 of *GENPRU 3 Annex 1R* (Method 3 of the capital adequacy calculations for financial conglomerates).
- 2.2.215 R For the purpose of the definition of a *material holding*, holdings must be valued using the valuation method which the holder uses for its external financial reporting purposes.
- 2.2.216 G
- (1) This paragraph gives *guidance* on how the calculation under *GENPRU 2.2.214R(1)* should be carried out where an *insurance undertaking* is accounted for using the embedded value method.
 - (2) On acquisition, any “goodwill” element (that is, the difference between the acquisition value according to the embedded value method and the actual investment) should be deducted from *tier one capital resources*.
 - (3) The embedded value should be deducted from the total of *tier one capital resources* and *tier two capital resources*.
 - (4) Post-acquisition, where the embedded value of the *undertaking* increases, the increase should be added to reserves, while the new embedded value is deducted from total *capital resources*.
 - (5) This means that the net impact on the level of total *capital resources* is zero, although *tier two capital resources* headroom will increase with any increase in *tier one capital resources* reserves.
 - (6) Embedded value is the value of the *undertaking* taking into account the present value of the expected future inflows from existing life assurance business.

Deductions from tiers one and two: Reciprocal cross holdings (BIPRU firm only)

- 2.2.217 R *GENPRU 2.2.217R* to *GENPRU 2.2.220R* apply to a *BIPRU firm*.
- 2.2.218 R A *BIPRU firm* must deduct at stage M of the calculation in the *capital resources table* (Deductions from the totals of tier one and two) any *reciprocal cross-holdings*. However a *BIPRU firm* must not deduct such holdings to the extent that they fall to be deducted at Part 1 of stage M of the calculation in the *capital resources table* (Deductions for *material holdings*, *qualifying holdings* and certain other items).
- 2.2.219 R A *reciprocal cross-holding* means a holding of the *BIPRU firm* of *shares*, any other interest in the capital, and subordinated debt, whether in the *trading* or *non-trading* book, in:
- (1) a *credit institution*; or

(2) a *financial institution*;

that satisfies the following conditions:

- (3) the holding is the subject of an agreement or arrangement between the *BIPRU firm* and either the issuer of the instrument in question or a member of a *group* to which the issuer belongs;
- (4) under the terms of the agreement or arrangement described in (3) the issuer invests in the *BIPRU firm* or in a member of the *group* to which that *BIPRU firm* belongs; and
- (5) the effect of that agreement or arrangement on the capital position of the *BIPRU firm*, the issuer, or any member of a *group* to which either belongs, under any relevant rules is significantly more beneficial than it is in economic terms, taking into account the agreement or arrangement as a whole.

2.2.220 R For the purpose of *GENPRU 2.2.219R*, a relevant rule means a *rule* in *GENPRU*, *BIPRU* or *INSRU* or any other capital adequacy or solvency requirements of the *FSA* or any other regulator, territory or country.

Deductions from tiers one and two: Connected lending of a capital nature (bank only)

2.2.221 R *GENPRU 2.2.221R* to *GENPRU 2.2.235G* only apply to a *bank*.

2.2.222 R *Connected lending of a capital nature* means all lending within *GENPRU 2.2.227R* or *GENPRU 2.2.229R* and guarantees within *GENPRU 2.2.231R* or *GENPRU 2.2.233R*.

2.2.223 R A *bank* must not deduct any item as *connected lending of a capital nature* to the extent that it falls to be deducted at Part 1 of stage M of the calculation in the *capital resources table* (Deductions for *material holdings*, *qualifying holdings* and certain other items) or as a *reciprocal cross-holding*.

2.2.224 R For the purpose of the *rules* in this section about *connected lending of a capital nature* and in relation to a *bank*, a connected party means another *person* (“P”) who fulfils at least one of the following conditions and is not solo-consolidated with the *bank* under *BIPRU 2.1* (Solo consolidation):

- (1) P is *closely related* to the *bank*; or
- (2) P is an *associate* of the *bank*; or
- (3) the same *persons* significantly influence the *governing body* of P and the *bank*.

- 2.2.225 R For the purpose of *GENPRU 2.2.224R*, in relation to a *person* (“P”) to which a *bank* has an *exposure* when P is acting on his own behalf and also an *exposure* to P when P acts in his capacity as a trustee, custodian or general partner of an investment trust, unit trust, venture capital or other investment fund, pension fund or similar fund (a "fund") the *bank* may choose to treat this latter *exposure* as an *exposure* to the fund, unless such treatment would be misleading.
- 2.2.226 G *BIPRU 10.3.13G (Guidance on BIPRU 10.3.12R)* applies to *GENPRU 2.2.225R* as it applies to *BIPRU 10.3.12R* (Exposures to trustees for concentration risk purposes).
- 2.2.227 R A loan is *connected lending of a capital nature* if:
- (1) it is made by the *bank* to a connected party; and
 - (2) it falls into *GENPRU 2.2.228R*.
- 2.2.228 R A loan falls into this *rule* for the purposes of *GENPRU 2.2.227R(2)* if, whether through contractual, structural, reputational or other factors:
- (1) based on the terms of the loan and the other knowledge available to the *bank*, the borrower would be able to consider it from the point of view of its characteristics as capital as being similar to *share* capital or subordinated debt; or
 - (2) the position of the lender from the point of view of maturity and repayment is inferior to that of the senior unsecured and unsubordinated creditors of the borrower.
- 2.2.229 R A loan is also *connected lending of a capital nature* if:
- (1) it funds directly or indirectly a loan to a connected party of the *bank* falling into *GENPRU 2.2.229R* or an investment in the capital of a connected party of the *bank*; and
 - (2) it falls into *GENPRU 2.2.228R*.
- 2.2.230 G It is likely that a loan is not *connected lending of a capital nature* if:
- (1) it is secured by collateral that is eligible for the purposes of *credit risk mitigation* under the *standardised approach* to credit risk as set out in *BIPRU 5.4 (Financial collateral)* and *BIPRU 5.5 (Other funded credit risk mitigation)* ; or
 - (2) it is repayable on demand (and should be treated as such for accounting purposes by the borrower and lender) and the *bank* can demonstrate that there are no potential obstacles to exercising the right to repay, whether contractual or otherwise.
- 2.2.231 R A guarantee is *connected lending of a capital nature* if it is a guarantee by the *bank* of a loan from a third party to a connected party of the *bank* and:

- (1) the loan meets the requirements of *GENPRU 2.2.228R*; or
 - (2) the rights that the *bank* would have against the borrower with respect to the guarantee meet the requirements of *GENPRU 2.2.228R(2)*.
- 2.2.232 R A guarantee is also *connected lending of a capital nature* if it is a guarantee by the *bank* of a loan falling into *GENPRU 2.2.229R(1)*; and
- (1) the loan meets the conditions in *GENPRU 2.2.228R*; or
 - (2) the guarantee meets the conditions in *GENPRU 2.2.231R(2)*.
- 2.2.233 R The amount of a guarantee that constitutes *connected lending of a capital nature* that a *firm* must deduct is the amount guaranteed.
- 2.2.234 G A loan may initially fall outside the definition of *connected lending of a capital nature* but later fall into it. For example, if the initial lending to a connected party is subsequently downstreamed to another connected party the relationship between the *bank* and the ultimate borrower may be such that, looking at the arrangements as a whole, the *undertaking* to which the *bank* lends is able to regard the loan to it as being capable of absorbing losses.
- 2.2.235 G Lending to a connected party will not normally be *connected lending of a capital nature* where that party:
- (1) is acting as a vehicle to pass funding to an unconnected party; and
 - (2) has no other creditors whose claims could be senior to those of the lender.

Deductions from tiers one and two: Expected losses and other negative amounts (BIPRU firm only)

- 2.2.236 R A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* must deduct:
- (1) any negative amounts arising from the calculation in *BIPRU 4.3.8R* (Treatment of expected loss amounts); and
 - (2) any *expected loss amounts* calculated in accordance with *BIPRU 4.7.12R* (*Expected loss amounts* under the simple risk weight approach to calculating *risk-weighted exposure amounts* for *exposures* belonging to the *equity exposure IRB exposure class*) or *BIPRU 4.7.17R* (*Expected loss amounts* under the *PD/LGD approach*).

Deductions from tiers one and two: Securitisation positions (BIPRU firm only)

- 2.2.237 R A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* or the *standardised approach* to credit risk must deduct from its *capital resources* the exposure amount of *securitisation positions* which receive a *risk weight* of 1250% under *BIPRU 9* (Securitisation), unless the *firm* includes the *securitisation positions* in its calculation of *risk weighted exposure amounts* (see *BIPRU 9.10* (Reduction in risk-weighted exposure amounts)).

Deductions from tiers one and two: Special treatment of material holdings and other items (BIPRU firm only)

- 2.2.238 R *GENPRU 2.2.238R* to *GENPRU 2.2.241G* apply to a *BIPRU firm* and relate to the deductions in respect of:

- (1) *material holdings*;
- (2) *expected loss* amounts and other negative amounts referred to in *GENPRU 2.2.236R*; and
- (3) *securitisation positions* referred to in *GENPRU 2.2.237R*.

- 2.2.239 R (1) The treatment in the *capital resources table* of the deductions in *GENPRU 2.2.238R* only has effect for the purpose of the *capital resources gearing rules*.
- (2) In other cases (3) and (4) apply.
- (3) A *BIPRU firm* making the deductions described in *GENPRU 2.2.238R* must deduct 50% of the total amount of those deductions at stage E (Deductions from tier one capital) and 50% at stage J (Deductions from tier two capital) of the calculation in the *capital resources table* after the application of the *capital resources gearing rules*.
- (4) To the extent that half of the total of:
- (a) *material holdings*;
 - (b) *expected loss* amounts and other negative amounts; and
 - (c) *securitisation positions*;

exceeds the amount calculated at stage I (Total tier two capital) of that calculation, a *firm* must deduct that excess from the amount calculated at stage F (Total tier one capital after deductions) of the *capital resources table*.

- 2.2.240 G The alternative calculation in *GENPRU 2.2.239R*(3) to (4) is only relevant to *BIPRU 11* (Pillar 3 disclosures) and certain reporting requirements under *SUP*. However the deduction of *material holdings* at Part 2 of stage E of the *capital resources table* in the case of a *BIPRU investment firm* with an *investment firm consolidation waiver* has effect for all purposes.

Tier three capital: upper tier three capital resources (BIPRU firm only)

- 2.2.241 R *GENPRU 2.2.241R to GENPRU 2.2.245R only apply to a BIPRU firm.*
- 2.2.242 R *A BIPRU firm may include subordinated debt in its upper tier three capital resources only if:*
- (1) *it has an original maturity of at least two years or is subject to at least two years' notice of repayment; and*
 - (2) *payment of interest or principal is permitted only if, after that payment, the firm's capital resources would be not less than its capital resources requirement.*
- 2.2.243 R *A BIPRU firm which includes subordinated debt in its tier three capital resources must notify the FSA one month in advance of all payments of either interest or principal made when the firm's capital resources are less than 120% of its capital resources requirement.*
- 2.2.244 R *The rules in the table in GENPRU 2.2.245R apply to short term subordinated debt that a BIPRU firm includes in its tier three capital resources in the same way that they apply to a firm's tier two capital resources with the adjustments in that table.*
- 2.2.245 R *Table: Application of tier two capital rules to tier three debt
This table belongs to GENPRU 2.2.244R*

<i>Tier two capital rule</i>	<i>Adjustment</i>
<i>GENPRU 2.2.159R (General conditions for eligibility as tier two capital)</i>	<p>The references in <i>GENPRU 2.2.159R(5)</i> (Capital must not become repayable prior to stated maturity date except in specified circumstances) to repayment at the option of the holder are replaced by a reference to <i>GENPRU 2.2.242R(1)</i> (<i>Upper tier three capital</i> should have maturity or notice period of at least two years)</p> <p>The reference in <i>GENPRU 2.2.159R(10)</i> (Description of <i>tier two capital</i> in marketing documents) to <i>GENPRU 2.2.271R</i> (Other requirements: insurers carrying on with-profits business (Insurer only)) does not apply</p>

Tier three capital: lower tier three capital resources (BIPRU firm only)

- 2.2.246 R *GENPRU 2.2.246R* to *GENPRU 2.2.249R* only apply to a *BIPRU firm*.
- 2.2.247 R A *BIPRU firm's* net interim *trading book* profits mean its net *trading book* profits adjusted as follows:
- (1) they are net of any foreseeable charges or dividends and less net losses on its other business; and
 - (2) a *firm* must not take into account items that have already been included in the calculation of *capital resources* as part of the calculation of the following items:
 - (a) interim net profits (see stage (A) of the *capital resources table*); or
 - (b) interim net losses or material interim net losses (see stage (A) of the *capital resources table*); or
 - (c) profit and loss and other reserves (see stage (A) of the *capital resources table*).

- 2.2.248 R *Trading book* profits and losses, other than those losses to which *GENPRU* 2.2.86R(2) (Valuation adjustment and reserves) refers, originating from valuation adjustments or reserves as referred to in *GENPRU* 1.3.29R to *GENPRU* 1.3.35G (Valuation adjustments or reserves) must be included in the calculation of net interim *trading book* profits and be added to or deducted from *tier three capital resources*.
- 2.2.249 R *Trading book* valuation adjustments or reserves as referred to in *GENPRU* 1.3.29R to *GENPRU* 1.3.35G which exceed those made under the accounting framework to which a *firm* is subject must be treated in accordance with *GENPRU* 2.2.248R if not required to be treated under *GENPRU* 2.2.86R(2).

Deductions from total capital: Inadmissible assets (insurers only)

- 2.2.250 R *GENPRU* 2.2.250R to *GENPRU* 2.2.253G only apply to an *insurer*.
- 2.2.251 R For the purposes of the *capital resources table*, an *insurer* which is not a *pure reinsurer* must deduct from total *capital resources* the value of any asset which is not an *admissible asset* as listed in *GENPRU* 2 Ann 7R (Admissible assets in insurance), unless the asset is held to cover *property-linked liabilities* or *index-linked liabilities* under *INSPRU* 3.1.57R or *INSPRU* 3.1.58R (Covering linked liabilities).
- 2.2.252 G *GENPRU* 2.2.251R does not apply to intangible assets which should be deducted from *tier one capital resources* under *GENPRU* 2.2.155R (Deductions from tier one: Intangible assets).
- 2.2.253 G The list of *admissible assets* has been drawn with the aim of excluding assets:
- (1) for which a sufficiently objective and verifiable basis of valuation does not exist; or
 - (2) whose realisability cannot be relied upon with sufficient confidence; or
 - (3) whose nature presents an unacceptable custody risk; or
 - (4) the holding of which may give rise to significant liabilities or onerous duties.

Deductions from total capital: Adjustments for related undertakings

- 2.2.254 R *GENPRU* 2.2.254R to *GENPRU* 2.2.258G only apply to an *insurer*.
- 2.2.255 R An *insurer* must deduct from its *capital resources* the value of its investments in each of its *related undertakings* that is an *ancillary services undertaking*.

- 2.2.256 R In relation to each of its *related undertakings* that is a *regulated related undertaking* (other than an *insurance undertaking*) an *insurer* must add to (if positive), at stage J in the *capital resources table* (Positive adjustments for related undertakings), or deduct from (if negative), at stage L in the *capital resources table* (Deductions from total capital), its *capital resources* the value of its *shares* in that *undertaking* calculated in accordance with *GENPRU 1.3.47R* (Shares in and debts due from related undertakings).
- 2.2.257 G For the purposes of *GENPRU 2.2.255R*, investments must be valued at their accounting book value in accordance with *GENPRU 1.3.4R* (General requirements: accounting principles to be applied).
- 2.2.258 G *Related undertakings* which are also *insurance undertakings* are not included in *GENPRU 2.2.256R* because an *insurer* that is a *participating insurance undertaking* is subject to the requirements of *INSRU 6.1* (Group Risk: Insurance Groups).

Deductions from total capital: Illiquid assets (BIPRU investment firm only)

- 2.2.259 R *GENPRU 2.2.259R* to *GENPRU 2.2.262G* only apply to a *BIPRU investment firm*.
- 2.2.260 R *Illiquid assets* means illiquid assets including
- (1) tangible fixed assets (except land and buildings if they are used by a *firm* as security for loans, but this exclusion is only up to the value of the principal outstanding on the loans); or
 - (2) any holdings in the *capital resources* of *credit institutions* or *financial institutions*, except to the extent that:
 - (a) they have already been deducted as a *material holding*; or
 - (b) they are *shares* which are included in a *firm's trading book* and included in the calculation of the *firm's market risk capital requirement*; or
 - (3) holdings of other *securities* which are not *readily realisable securities*; or
 - (4) deficiencies of net assets in *subsidiary undertakings*; or
 - (5) deposits which are not repayable within 90 days (except for payments in connection with margined *futures* or *options* contracts); or
 - (6) loans and other amounts owed to a *firm* except where they are due to be repaid within 90 days; or
 - (7) physical stocks except for *positions* in *physical commodities* which are included in the calculation of a *firm's commodity PRR*.

- 2.2.261 G If a loan or other amount owing to a *firm* was originally due to be paid more than 90 days from the date of the making of the loan or the incurring of the payment obligation, as the case may be, it may be treated as liquid for the purposes of *GENPRU 2.2.260R(6)* where through the passage of time the remaining time to the contractual repayment date falls below 90 days.
- 2.2.262 G If a loan or other amount is due to be paid within 90 days (whether measured by reference to original or remaining maturity), a *firm* should consider whether it can reasonably expect the amount owing to be paid within that period. If the *firm* cannot reasonably expect it to be paid within that period the *firm* should treat it as illiquid.

Deductions from total capital: Excess trading book position (bank or building society only)

- 2.2.263 R *GENPRU 2.2.263R* to *GENPRU 2.2.265R* only apply to a *bank* or *building society*.
- 2.2.264 R (1) The *excess trading book position* is the excess of:
- (a) a *bank* or *building society's* aggregate net long (including notional *trading book positions* in *shares*, subordinated debt or any other interest in the capital of *credit institutions* or *financial institutions*;
- over;
- (b) 25% of that *firm's* *capital resources* calculated at stage T (Total capital after deductions) of the *capital resources table* (calculated before deduction of the *excess trading book position*).
- (2) Only the excess amount calculated under (1) must be deducted.
- 2.2.265 R The *standard market risk PRR rules* apply for establishing what is a net *position* and the amount and value of that *position* for the purposes of *GENPRU 2.2.264R*, ignoring *rules* which would otherwise exclude such *positions* from *BIPRU 7.2* (Interest rate PRR) or *BIPRU 7.3* (Equity PRR and basic interest rate PRR for equity derivatives) on the basis that they are to be deducted from a *bank* or *building society's* *capital resources*, or for any other reason.

Other capital resources: Unpaid share capital or initial funds and calls for supplementary contributions (Insurer only)

- 2.2.266 G *GENPRU 2.2.266G* to *GENPRU 2.2.269G* only apply to an *insurer*.
- 2.2.267 G Unpaid *share* capital or, in the case of a *mutual*, *unpaid initial funds* and calls for supplementary contributions are excluded from the *capital resources* of a *firm* except to the extent allowed in a *waiver* under section 148 of the *Act* (Modification or waiver of rules).

- 2.2.268 G Subject to a *waiver*, under the *Insurance Directives* a maximum of one half of unpaid *share* capital or, in the case of a *mutual*, one half of the *unpaid initial fund* may be included in an *insurer's capital resources*, once the paid-up part amounts to 25% of that *share* capital or fund, up to 50% of total *capital resources*.
- 2.2.269 G In the case of a *mutual* carrying on *general insurance business* and subject to a *waiver*, calls for supplementary contributions within the *financial year* may only be included in a *firm's capital resources* up to a maximum of 50% of the difference between the maximum contributions and the contributions actually called in, subject to a limit of 50% of total *capital resources*. In the case of a *mutual* carrying on *long-term insurance business*, the *Consolidated Life Directive* does not permit calls for supplementary contributions to be included in a *firm's capital resources*.

Other requirements: insurers carrying on with-profits business (Insurer only)

- 2.2.270 R *GENPRU 2.2.270R* to *GENPRU 2.2.275G* only apply to an *insurer*.
- 2.2.271 R An *insurer* carrying on *with-profits insurance business* must, in addition to the other requirements in respect of *capital resources* elsewhere in *GENPRU 2.2*, meet the following conditions before a *capital instrument* can be included in that *insurer's capital resources*:
- (1) the *insurer* must manage the *with-profits fund* so that discretionary benefits under a *with-profits insurance contract* are calculated and paid disregarding, insofar as is necessary for its *customers* to be treated fairly, any liability the *firm* may have to make payments under the *capital instrument*;
 - (2) the intention to manage the *with-profits fund* on the basis set out in (1) must be disclosed in the *firm's Principles and Practices of Financial Management*; and
 - (3) no amounts, whether interest, principal, or other amounts, must be payable by the *firm* under the *capital instrument* if the *firm's* assets would then be insufficient to enable it to declare and pay under a *with-profits insurance contract* discretionary benefits that are consistent with the *firm's* obligations under *Principle 6* (Customers' interests).
- 2.2.272 G The purpose of *GENPRU 2.2.271R* is to achieve practical subordination of *capital instruments* if they are to qualify as *capital resources* to the liabilities an *insurer* has to *with-profits policyholders*, including liabilities which arise from the regulatory duty to treat *customers* fairly in setting discretionary benefits. (*Principle 6* (Customers' interests) requires a *firm* to pay due regard to the interests of its customers and treat them fairly.) It is not sufficient for a *capital instrument* to be subordinated to such liabilities only on winding up of the *firm* because such liabilities to *policyholders* may have been reduced by the inappropriate use of management discretion to enable funds to be applied in repaying subordinated *capital instruments* before winding up proceedings commence.

- 2.2.273 G *GENPRU 2.2.271R* is an additional requirement to all other *rules* in this section concerning the eligibility of a *capital instrument* to count as a component of an *insurer's capital resources*. Subordinated debt instruments will be the main type of *capital instrument* to which this *rule* is relevant, including both *upper tier two* (undated) and *lower tier two* (dated) subordinated debt instruments. Subordinated debt instruments which are issued by a *related undertaking* are not intended to be covered by this *rule* and may be included in *group capital resources* as appropriate if the other eligibility criteria are met.
- 2.2.274 G *GENPRU 2.2.64R(10)* and *GENPRU 2.2.159R(10)* contain provisions concerning the marketing of a *capital instrument*. In relation to a *firm* to which *GENPRU 2.2.271R* applies, in order to comply with *GENPRU 2.2.64R(10)* and *GENPRU 2.2.159R(10)*, it should draw to the attention of subscribers the risk that payments may be deferred or cancelled in order to operate the *with-profits fund* so as to give priority to the payment of discretionary benefits to *with-profits policyholders*.
- 2.2.275 G (1) *Upper tier two instruments* should meet the requirements of *GENPRU 2.2.177R(3)* which goes beyond the requirement in *GENPRU 2.2.271R(3)* since it requires a *firm* to have the option to defer payments in all circumstances, not just if necessary to treat *customers* fairly. However, for *lower tier two instruments*, *GENPRU 2.2.271R(3)* represents an additional requirement since a failure to pay amounts of interest or principal on a due date must not constitute an event of default under *GENPRU 2.2.159R(2)* for *firms* carrying on *with-profits insurance business*.
- (2) For *firms* which are *realistic basis life firms* compliance with *GENPRU 2.2.271R(3)* would usually be achieved if the *capital instrument* provides that no amounts will be payable under it unless the *firm's capital resources* exceed its *capital resources requirement*. However, such *firms* should ensure that the terms of the *capital instrument* refer to *FSA capital resources requirements* in force from time to time, including the current realistic reserving requirements and are not restricted to former minimum capital requirements based only on the *Insurance Directives'* required minimum margin of solvency. For *firms* which are not *realistic basis life firms*, compliance with *GENPRU 2.2.271R(3)* will probably require specific reference to be made to treating *customers* fairly in the terms of the *capital instrument*.

Public sector guarantees

- 2.2.276 R A *BIPRU firm* may not include a guarantee from a state or public authority in its *capital resources*.

2.3 Application of GENPRU 2 to Lloyd's

Application of GENPRU 2.1

- 2.3.1 R *GENPRU 2.1 applies to the Society in accordance with INSPRU 8.1.2R.*
- 2.3.2 R *GENPRU 2.1.38R to GENPRU 2.1.39G apply to managing agents in accordance with INSPRU 8.1.4R.*
- 2.3.3 G *GENPRU 2.1.13R requires the Society to ensure, in relation to each member's insurance business, that capital resources equal to or in excess of the member's capital resources requirement (CRR) are maintained. GENPRU 2.1 sets out the overall framework of the CRR. INSPRU 1.1 sets out the calculation of the components of the general insurance capital requirement and the long-term insurance capital requirement.*
- 2.3.4 G *Managing agents are required to calculate the ECR for the purposes of carrying out syndicate ICAs under INSPRU 7.1. As with-profits insurance business is not carried on through any syndicate, the calculation of the with-profits insurance capital component will not be applicable. INSPRU 1.3 is not applied to Lloyd's.*

Calculation of the MCR

- 2.3.5 R For the purposes of *GENPRU 2.1.24R*, the *Society* must calculate the *MCR* in respect of the *general insurance business* of each *member* as the higher of:
- (1) the *member's* share of the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate; and
 - (2) the *general insurance capital requirement* for the *member*, calculated according to *GENPRU 2.3.11R*.
- 2.3.6 R For the purposes of *GENPRU 2.3.5R(1)*, the *Society* must determine the *member's* share by apportioning the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate between *members* in proportion to the result for each *member* of *GENPRU 2.3.11R*.
- 2.3.7 R For the purposes of *GENPRU 2.1.25R*, the *Society* must calculate the *MCR* in respect of the *long-term insurance business* of each *member* as the higher of:
- (1) the *member's* share of the *base capital resources requirement* in respect of *long-term insurance business* for the *members* in aggregate; and
 - (2) the sum of, for each *member*:

- (a) the *long-term insurance capital requirement*; and
- (b) the *resilience capital requirement*.

2.3.8 R For the purposes of *GENPRU 2.3.7R(1)*, the *Society* must determine the *member's* share by applying to the aggregate long-term business *base capital resources requirement* the ratio of the result for the *member* of *GENPRU 2.3.7R(2)* to the aggregate of the results of *GENPRU 2.3.7R(2)* for all *members*.

Calculation of the base capital resources requirement

2.3.9 R The amount of the *base capital resources requirement* for the *members* in aggregate is:

- (1) for *general insurance business*, €3.2 million; and
- (2) for *long-term insurance business*, €3.2 million.

Calculation of the general insurance capital requirement

2.3.10 R For the purposes of *GENPRU 2.1.34R*, the *Society* must calculate the *general insurance capital requirement* for the *members* in aggregate as the higher of:

- (1) the aggregate for all *members* of the higher of, for each *member*, the result of the *premiums amount* and the *claims amount*; and
- (2) the *brought forward amount*.

2.3.11 R The *Society* must determine the *general insurance capital requirement* for each *member* by apportioning the result of *GENPRU 2.3.10R* between *members* on a fair and reasonable basis, provided that the *general insurance capital requirement* for a *member* must not be less than the higher of the result of the *premiums amount* and the *claims amount* for that *member*.

2.3.12 G The *Society* should calculate the *premiums amount* and the *claims amount* for each *member* on the basis of the *member's* own *general insurance business*, including *insurance business* that attaches to the reinsuring *member* for the purposes of *GENPRU* following an *approved reinsurance to close* (see *INSPRU 8.2.16R*).

2.3.13 R The *Society* must calculate the *general insurance capital requirement* it would have to determine under *GENPRU 2.1.34R* if it were an *insurer* carrying on all the *general insurance business* carried on by its *members*, but eliminating *inter-syndicate reinsurance* (the *Society GICR*).

2.3.14 G For the purpose of *GENPRU 2.3.13R* the *Society* may make appropriate approximations, taking reasonable care to avoid underestimating the *Society*

GICR.

- 2.3.15 R The *Society* must determine each *member's* share of the *Society GICR* by allocating the *Society GICR* between the *members* in proportion to the result for each *member* of *GENPRU 2.3.11R*.

Application of *GENPRU 2.2*

- 2.3.16 R Subject to *GENPRU 2.3.18R*, *GENPRU 2.3.19R* and *GENPRU 2.3.21R*, *GENPRU 2.2* applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, *INSPRU 8.1.4R*; and
- (2) for the *Society*, *INSPRU 8.1.2R*.

- 2.3.17 G *GENPRU 2.1* sets out minimum *capital resources requirements* for a *firm* and for Lloyd's *members*. *GENPRU 2.2* sets out how, for the purpose of these requirements, *capital resources* are defined and measured. *GENPRU 2.2* applies:

- (1) to *managing agents* for their calculation of the *capital resources* managed by them in respect of each *syndicate* they manage (by reference, where there is a change in the underlying capital provision, to each open *syndicate* year); and
- (2) to the *Society* for its calculation of:
 - (a) each *member's capital resources*; and
 - (b) its own *capital resources*.

- 2.3.18 R *GENPRU 2.2.32R* to *GENPRU 2.2.41R* (Limits on the use of different forms of capital) do not apply to *managing agents*.

- 2.3.19 R *GENPRU 2.2.32R* to *GENPRU 2.2.41R* (Limits on the use of different forms of capital) do apply to the *Society* with respect to:

- (1) the *capital resources* requirements for the *members* in aggregate; and
- (2) the aggregate *capital resources* supporting the *insurance business* of all the *members*.

- 2.3.20 R *GENPRU 2.2.74R* does not apply to the *Society* or to *managing agents*.

- 2.3.21 R In this section (*GENPRU 2.3*), "the aggregate *capital resources* supporting the *insurance business* of all the *members*" are:

- (1) the aggregate of all the *members' capital resources* calculated under

GENPRU 2.3.25R; and

- (2) the *Society's capital resources* excluding callable contributions.

Calculation of capital resources

- 2.3.22 R *The capital resources table* applies with the modifications that:
- (1) *core tier one capital* includes *Lloyd's members' contributions* in accordance with GENPRU 2.3.34R, subject, in the case of letters of credit, guarantees and verifiable sums arising out of life assurance policies, to compliance with GENPRU 1.5.8R to GENPRU 1.5.12R; and
- (2) the *Society* may also recognise and value *callable contributions*, pursuant to GENPRU 2.3.24R.
- 2.3.23 G *Lloyd's member's contributions* are *admissible assets* under GENPRU 2.3.34R and include letters of credit, guarantees and verifiable sums arising out of life assurance policies held as *funds at Lloyd's*. Assets that may be valued as part of *capital resources* under PRU are not necessarily, however, permitted investments for *members* under the terms of any *Lloyd's trust deed*.
- 2.3.24 R In calculating its *capital resources*, the *Society* may, subject to GENPRU 1.5.13R to GENPRU 1.5.14R, recognise and value *callable contributions*.
- 2.3.25 R The *Society* must calculate each *member's capital resources* as the sum of:
- (1) a *member's* proportionate share of the *capital resources* held at *syndicate* level for each *syndicate* in which the *member* participates; and
- (2) the value of a *member's funds at Lloyd's* after deducting liabilities in compliance with GENPRU 1.5.18R.
- 2.3.26 R In order to comply with GENPRU 2.1.13R the *Society* must ensure at all times that:
- (1) each *member's capital resources requirement* is covered by:
- (a) that *member's capital resources*, calculated according to GENPRU 2.3.25R; and
- (b) to the extent that (a) is insufficient, by the *Society's own capital resources*; and
- (2) the *Society GICR* is covered by the aggregate *capital resources* supporting the *insurance business* of all the *members*.

2.3.27 R For the purposes of *GENPRU 2.3.26R(1)(b)*, the *Society* must maintain at all times *capital resources* sufficient to meet the aggregate of, for each *member*, the amount, if any, by which the *member's capital resources* fall short of the *member's capital resources requirement*.

2.3.28 R The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with *GENPRU 2.2.33R* as the higher of:

- (1) 1/3 of the *long-term insurance capital requirement* for the *members* in aggregate; and
- (2) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of *GENPRU 2.3.7R(2)*.

2.3.29 R For the purposes of *GENPRU 2.2.34R*, the *Society* must ensure that the aggregate *capital resources* supporting the *insurance business* of all the *members* meet the higher of:

- (1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;
- (2) 1/3 of the *Society GICR*; and
- (3) the *base capital resources requirement*;

with the sum of the items listed in *GENPRU 2.2.34R*.

2.3.30 R The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with *GENPRU 2.2.34R* as the higher of:

- (1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;
- (2) 1/3 of the *Society GICR*; and
- (3) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of *GENPRU 2.3.11R*.

Characteristics of tier one capital

2.3.31 R A *Lloyd's member's contribution* may be included in *tier one capital resources* to the extent that:

- (1) the proceeds are immediately and fully available in respect of the *member's insurance business* at *Lloyd's*;

- (2) (except in relation to letters of credit), it complies with *GENPRU 2.2.64R(3)* or cannot be repaid to a *member* until all of the *member's* liabilities in respect of its *insurance business* at Lloyd's have been extinguished, covered or reinsured by an *approved reinsurance to close*;
- (3) it otherwise complies with *GENPRU 2.2.64R(5)* to *GENPRU 2.2.64R(10)*.

Adjustments for related undertakings

- 2.3.32 R *GENPRU 2.2.256R* (Adjustment for regulated related undertakings other than insurance undertakings) applies to the *Society* with the modification that the *Society* must also value its *insurance undertakings* in accordance with *GENPRU 2.2.256R*.
- 2.3.33 R If a *related undertaking* is an *insurance undertaking* which has a deficit in the *capital resources* available to cover its *capital resources requirement*, the *Society* must make provision for:
- (1) its proportionate share of that deficit; or
 - (2) in the case of a *subsidiary undertaking*, the whole of that deficit.

Modification of *GENPRU 2 Annex 7R* for Lloyd's

- 2.3.34 R In the case of *members*, *Lloyd's members' contributions* are included in *GENPRU 2 Annex 7R* and include:
- (1) letters of credit;
 - (2) guarantees; and
 - (3) verifiable sums arising out of life assurance policies;

held as *funds at Lloyd's*.

- 2.3.35 G The effect of *GENPRU 2.3.34R* is that *Lloyd's members' contributions*, including letters of credit, guarantees and life assurance policies, are *admissible assets*.

GENPRU 2 Annex 1R

Capital resources table for an insurer

Capital resources calculation for an insurer		
Type of capital	Related text	Stage
Core tier one capital		(A)
<i>Permanent share capital</i>	<i>GENPRU 2.2.83R</i>	
Profit and loss account and other reserves (taking into account interim net losses)	<i>GENPRU 2.2.85R;</i> <i>GENPRU 2.2.87R to</i> <i>GENPRU 2.2.88R</i>

<i>Free deliveries</i>	<i>BIPRU 14.4</i>	
Total capital after deductions = R-S		(T)
<p>In calculating whether a <i>firm's capital resources</i> exceed its <i>capital resources requirement</i>, the <i>market risk capital requirement</i>, the <i>concentration risk capital component</i> and (if applicable) the <i>fixed overheads requirement</i> must be deducted here.</p>		

Part 2 of the capital resources calculation for an investment firm with a waiver from consolidated supervision

Note (1): Where the table refers to related text, it is necessary to refer to that text in order to understand fully what is included in the descriptions of capital items and deductions set out in the table.

Note (2): If the amount calculated at:
 (a) stage N less the deductions in respect of the *capital resources requirement* made immediately following stage N; or
 (b) stage T less the deductions in respect of the *capital resources requirement* made immediately following stages N and T;
 is a negative number the *firm's capital resources* are less than its *capital resources requirement*.

Note (3): Stage C must be omitted except where *capital resources* are being used for a purpose for which *innovative tier one capital* may be used (see *GENPRU 2.2.27R*).

Note (4): The *material holdings* that must be deducted at part 2 of stage E are *material holdings* issued by *undertakings* which would have been members of the *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver* if:

- | | | |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (1) | in relation to a <i>BIPRU investment firm</i> , the holding forms part of the <i>undertaking's tier one capital resources</i> ; or | |
| (2) | (subject to (3)) in relation to any other <i>undertaking</i> , the holding would form part of the <i>undertaking's tier one capital resources</i> if: | |
| | (a) | that <i>undertaking</i> were a <i>BIPRU firm</i> with a <i>Part IV permission</i> ; and |
| | (b) | it had carried on all its business in the <i>United Kingdom</i> and had obtained whatever <i>permissions</i> for doing so are required under the <i>Act</i> ; or |
| (3) | in relation to any <i>undertaking</i> not falling within (1) and for which the methodology in (2) does not give an answer, the holding would form part of its <i>tier one capital resources</i> if the <i>undertaking</i> were a <i>BIPRU firm</i> of the same category as the <i>firm</i> carrying out the calculation under this Annex. | |

Note (5): The *material holdings* that must be deducted by a *firm* at part 3 of stage E and at stage J or at Part 1 of stage M are *material holdings* issued by *undertakings* which would have been members of that *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver* and which do not fall into Note (4).

Part 2 of the capital resources calculation for an investment firm with a waiver from consolidated supervision

Note (6): The contingent liabilities that must be deducted by a *firm* at Part 1 of stage M are any contingent liabilities which the *firm* has in favour of *investment firms*, *financial institutions*, *asset management companies* and *ancillary services undertakings* which would have been members of the *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver*.

GENPRU 2 Annex 7R

Admissible assets in insurance

- (1) Investments that are, or amounts owed arising from the disposal of:
 - (a) *debt securities*, bonds and other money and capital market instruments;
 - (b) loans;
 - (c) *shares* and other variable yield participations;
 - (d) *units* in *UCITS schemes*, *non-UCITS retail schemes*, *recognised schemes* and any other *collective investment scheme* that invests only in *admissible assets* (including any *derivatives* or *quasi-derivatives* held by the scheme);
 - (e) land, buildings and immovable property rights;
 - (f) an *approved derivative* or *quasi-derivative* transaction that satisfies the conditions in *INSPRU 3.2.5R* or an *approved stock lending* transaction that satisfies the conditions in *INSPRU 3.2.36R*.
- (2) Debts and claims
 - (a) debts owed by *reinsurers*, including *reinsurers'* shares of *technical provisions* (but excluding amounts recoverable from an *ISPV**);
 - (b) deposits with and debts owed by *ceding undertakings*;
 - (c) debts owed by *policyholders* and *intermediaries* arising out of direct and *reinsurance* operations (except where overdue for more than 3 months and other than *commission* prepaid to agents or *intermediaries*);
 - (d) for *general insurance business* only, claims arising out of salvage and subrogation;
 - (e) for *long-term insurance business* only, advances secured on, and not exceeding the *surrender value* of, *long-term insurance contracts* issued by the *insurer*;
 - (f) tax recoveries;
 - (g) claims against *compensation funds*.
- (3) Other assets
 - (a) tangible fixed assets, other than land and buildings;
 - (b) cash at *bank* and in hand, *deposits* with *credit institutions* and any other bodies authorised to receive *deposits*;
 - (c) for *general insurance business* only, *deferred acquisition costs*;
 - (d) accrued interest and rent, other accrued income and prepayments;

(e) for *long-term insurance business* only, reversionary interests.

* A *firm* may treat amounts recoverable from an *ISPV* as an *admissible asset* if it obtains a *waiver* under section 148 of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 148(4) of the *Act*, before the *FSA* will consider granting such a *waiver* are set out in *INSPRU* 1.6.13G to *INSPRU* 1.6.18G.

G Implicit items under the Act

1	<p>The <i>capital resources table</i> does not permit <i>implicit items</i> to be included in the calculation of a <i>firm's capital resources</i>, except subject to a <i>waiver</i> under section 148 of the <i>Act</i>. Article 27(4) of the <i>Consolidated Life Directive</i> states that <i>implicit items</i> can be included in the calculation of a <i>firm's capital resources</i>, within limits, provided that the supervisory authority agrees. Certain <i>implicit items</i>, however, are not eligible for inclusion beyond 31 December 2009 (see paragraph 5). The <i>FSA</i> may be prepared to grant a <i>waiver</i> from the <i>capital resources table</i> to allow <i>implicit items</i>, in line with the purpose of the <i>Consolidated Life Directive</i>, and provided the conditions as set out in article 27(4) of the <i>Consolidated Life Directive</i> are met. Such a <i>waiver</i> would allow an <i>implicit item</i> to count towards the <i>firm's capital resources</i> available to count against its <i>capital resources requirement (CRR)</i> set out for <i>realistic basis life firms</i> in <i>GENPRU 2.1.18R</i> and for <i>regulatory basis only life firms</i> in <i>GENPRU 2.1.23R</i>. An <i>implicit item</i> may potentially count as <i>tier one capital</i> (but not <i>core tier one capital</i>) or <i>tier two capital</i>. Where a <i>waiver</i> is granted allowing an <i>implicit item</i> as <i>tier one capital</i>, the value of the <i>implicit item</i> so allowed must be included at stage B of the <i>capital resources table</i>. If the application of the value of the <i>implicit item</i> is restricted by <i>GENPRU 2.2.29R</i>, which requires that at least 50% of a <i>firm's tier one capital resources</i> must be accounted for by <i>core tier one capital</i>, the remainder may be included at stage G of the calculation in the <i>capital resources table</i>, subject to <i>GENPRU 2.2.31R</i>. An <i>implicit item</i> treated as <i>tier two capital</i> will also be included at stage G of the calculation, again subject to <i>GENPRU 2.2.81R</i>. Article 29(1) of the <i>Consolidated Life Directive</i> requires that <i>implicit items</i> be excluded from the capital eligible to cover the <i>guarantee fund</i>. Under <i>GENPRU 2.2.33R</i> a <i>firm</i> must meet the <i>guarantee fund</i> from the sum of the items listed at stages A, B, G and H of the <i>capital resources table</i> less the sum of the items listed at stage E of the <i>capital resources table</i>. The <i>FSA</i> will only grant an <i>implicit items waiver</i> if the <i>waiver</i> includes a modification to <i>GENPRU 2.2.33R</i> to ensure that the <i>implicit item</i> does not count towards meeting the <i>guarantee fund</i>.</p>
2	<p>Under section 148 of the <i>Act</i>, the <i>FSA</i> may, on the application of a <i>firm</i>, grant a <i>waiver</i> from <i>PRU</i>. There are general requirements that must be met before any <i>waiver</i> can be granted. As explained in SUP 8, the <i>FSA</i> may not give a <i>waiver</i> unless the <i>FSA</i> is satisfied that:</p>
	<p>(1) compliance by the <i>firm</i> with the <i>rules</i> will be unduly burdensome, or would not achieve the purpose for which the <i>rules</i> were made; and</p>
	<p>(2) the <i>waiver</i> would not result in undue risk to <i>persons</i> whose</p>

	interests the <i>rules</i> are intended to protect.
3	<p>The <i>FSA</i> will assess compliance with the requirements in the light of all the relevant circumstances. This will include consideration of the costs incurred by compliance with a particular <i>rule</i> or whether a <i>rule</i> is framed in a way that would make compliance difficult in view of the <i>firm's</i> circumstances. For example, the <i>firm</i> may demonstrate that if an <i>implicit item</i> were not allowed, the <i>firm</i> would either have to suffer increased (and unwarranted) costs in injecting further <i>capital resources</i> or operate with a lower equity backing ratio (see case studies in paragraph 43). Even if a <i>firm</i> can demonstrate a case for an <i>implicit item waiver</i>, it should not assume that the <i>FSA</i> will grant the <i>waiver</i> requested, or that any <i>waiver</i> will be granted for the full amount of the <i>implicit item</i> which could be granted, as set out in this annex. The <i>FSA</i> will consider each application on its own merits, and taking into account all relevant circumstances, including the financial situation and business prospects of the <i>firm</i>.</p>
4	<p><i>Implicit items</i> are economic reserves which are contained within the long-term insurance business provisions. Article 27(4) of the <i>Consolidated Life Directive</i> identifies three types of <i>implicit item</i>, in respect of: future profits, <i>zillmerisation</i> and hidden reserves. This annex is intended to amplify the <i>guidance</i> in <i>SUP 8</i> relating to the granting of <i>waivers</i> for <i>implicit items</i> and to provide <i>guidance</i> on other aspects. Whilst this <i>guidance</i> applies to applications for <i>waivers</i> for <i>implicit items</i> generally, for a <i>realistic basis life firm</i>, to the extent that an <i>implicit item</i> is allocated to a <i>with-profits fund</i>, this <i>guidance</i> relates to <i>implicit items</i> for the purposes of determining the <i>regulatory value of assets</i> (see <i>INSPRU 1.4.24R</i>).</p>
5	<p>The <i>Consolidated Life Directive</i> (reflecting the changes introduced by the <i>Solvency 1 Directive</i>) requires member states to end a <i>firm's</i> ability to take into account future profits <i>implicit items</i> by (at the latest) 31 December 2009. Until then, the maximum amount of the <i>implicit item</i> relating to future profits permitted under the <i>Consolidated Life Directive</i> is limited to 50% of the product of the estimated annual profits and the average period to run (not exceeding six years) on the <i>policies</i> in the portfolio. The <i>Consolidated Life Directive</i> further limits the maximum amount of these economic reserves that can be counted to 25% of the lesser of the available solvency margin and the required solvency margin. The changes introduced by the <i>Solvency 1 Directive</i> take effect for financial years beginning on or after 1 January 2004. However, the <i>Consolidated Life Directive</i> allows for a transitional period of five years, which runs from 20 March 2002 (the publication date of the <i>Solvency 1 Directive</i>), for <i>firms</i> to become fully compliant with these new requirements. <i>Firms</i> will need to consider the potential impact of these changes when engaging in future capital planning. When applying for an <i>implicit item waiver</i> a <i>firm</i> should provide the <i>FSA</i> with a plan showing how the <i>firm</i> intends to maintain its capital adequacy over the</p>

	period to 31 December 2009. <i>Firms</i> should also be aware that the <i>FSA</i> will typically only grant <i>waivers</i> for a maximum of 12 months.
Future Profits	
6	The future profits <i>implicit item</i> allows <i>firms</i> to take credit for margins in the <i>mathematical reserves</i> to the extent that these are expected to emerge from in force business. The future profit from in force business should be assessed, in the first instance, on prudent assumptions, to demonstrate that there is an 'economic reserve'. Having demonstrated that it exists, the amount should be limited to an amount calculated using a formula that takes into account the actual profit which has emerged over the last five years (see paragraph 28).
Zillmerisation	
7	<i>Zillmerisation</i> is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future <i>premiums</i> . <i>Firms</i> can make a direct adjustment to their reserves for <i>zillmerisation</i> , subject to the <i>rules</i> on <i>mathematical reserves</i> . However, where no such adjustment has been made, the <i>FSA</i> will consider an application for a <i>waiver</i> to take into account an <i>implicit item</i> .
Hidden reserves	
8	Hidden reserves are reserves resulting from the underestimation of assets (other than <i>mathematical reserves</i>).
Process for applying for a waiver, including limits applicable when a waiver is granted	
9	This annex sets out the procedures to be followed and the form of calculations and data which should be submitted by <i>firms</i> to the <i>FSA</i> . This <i>guidance</i> should also be read in conjunction with the general requirements relating to the <i>waiver</i> process described in <i>SUP</i> 8. The <i>FSA</i> expects that applications for <i>waivers</i> in respect of future profits and <i>zillmerising</i> will not normally be considered to pass the "not result in undue risk to persons whose interests the <i>rules</i> are intended to protect" test unless the relevant criteria set out in this <i>guidance</i> have been satisfied and an application for such a <i>waiver</i> may require further criteria to be satisfied for this test to be passed. As set out below, <i>waivers</i> in respect of either <i>zillmerising</i> or hidden reserves will not normally be given except in very exceptional circumstances.
Timing	
10	A <i>long-term insurer</i> may apply to the <i>FSA</i> for a <i>waiver</i> in respect of <i>implicit items</i> . A <i>waiver</i> will not apply retrospectively (see <i>SUP</i> 8.3.6G). Consequently, applications intended for a particular accounting reference date will normally need to be made well before

	that reference date. Applications by <i>firms</i> must be made to the <i>FSA</i> in writing and include the relevant details specified under <i>SUP</i> 8.3.3D. Given the uncertainty in predicting the future, <i>waivers</i> will normally be granted for a maximum of 12 months at a time and any further applications will need to be made accordingly.
11	The information that will be required to enable an application to be considered as set out below, should normally include a demonstration of how the <i>capital resources requirement</i> is to be met, with and without the <i>waiver</i> . Clearly, up-to-date information may not be available before the <i>financial year-end</i> . In some cases information from the previous year-end's <i>return</i> may be used, as long as any known significant changes in the structure of the <i>firm</i> , or the assumptions used, have been taken into account.
12	If the application for a <i>waiver</i> is granted, when a <i>firm</i> submits its next <i>return</i> the amount of the <i>implicit item</i> shown should not exceed that supported by the <i>firm's</i> calculations as at the valuation date. In the event that the amount of the future profits item calculated by the <i>firm</i> based on these updated assumptions is less than the amount calculated at the time of the <i>firm's</i> <i>waiver</i> application, the lower figure should be used in the <i>return</i> .
13	An <i>implicit item</i> in respect of <i>zillmerising</i> or hidden reserves is related to the basis on which liabilities or assets have been valued. In the case of hidden reserves, as explained below, the granting of a <i>waiver</i> will be dependent on the overall <i>capital resources</i> of the <i>firm</i> . <i>Waivers</i> in respect of these <i>implicit items</i> will, therefore, only be made in relation to the position shown in a particular set of <i>returns</i> and it will be essential for <i>firms</i> to submit applications to the <i>FSA</i> well in advance of the latest date for the submission of the relevant <i>return</i> .
14	<i>Waivers</i> may be withdrawn by the <i>FSA</i> at any time (e.g. where the <i>FSA</i> considers the amount in respect of which a <i>waiver</i> has been given can no longer be justified). This may be as a result of changes in the <i>firm's</i> position or as a result of queries arising on scrutiny of the <i>returns</i> .
Information to be submitted	
15	An application for a <i>waiver</i> (which includes an application for an extension to or other variation of a <i>waiver</i>) should be prepared using the standard application form for a <i>waiver</i> (see <i>SUP</i> 8 Annex 2D). In addition, the application should be accompanied by full supporting information to enable the <i>FSA</i> to arrive at a decision on the merits of the case. In particular, the application should state clearly the nature and the amounts of the <i>implicit items</i> that a <i>firm</i> wishes to count against its <i>capital resources requirement</i> and whether it proposes to treat the <i>implicit item</i> as <i>tier one capital</i> or <i>tier two capital</i> . In order to assess an application, the <i>FSA</i> needs information as to the make-up of

	<p>the <i>firm's capital resources</i>, the quality of the capital items which have been categorised into each tier of capital and a breakdown of capital both within and outside the <i>firm's long-term insurance fund</i> or <i>funds</i> and between the <i>firm's with-profits funds</i> and <i>non-profit funds</i>. An explanation as to the appropriateness of the proposed treatment of the <i>implicit item</i> under the <i>capital resources table</i> should also be provided, including a demonstration that, in allowing for <i>implicit items</i>, there has been no double counting of future margins and that the basis for valuing such margins is prudent.</p>
16	<p>The <i>FSA</i> recognises that the assessment of the insurance <i>technical provisions</i> reflects the contractual obligations of the <i>firm</i>. <i>Implicit items</i> are therefore margins over and above an economic assessment in these <i>technical provisions</i> only. Non-contractual "constructive" obligations arising from a <i>firm's</i> regulatory duty to treat <i>customers</i> fairly e.g. regarding future terminal bonuses, are not fully captured by the <i>technical provisions</i>. A <i>firm</i> must instead be satisfied that it has sufficient <i>capital resources</i> at all times to meet its obligations under <i>Principle 6</i>. The granting of a <i>waiver</i> for an <i>implicit item</i> does not in any way detract from this requirement and a <i>firm</i> will need to be satisfied that this condition is still met.</p>
17	<p>As a minimum, applications for a future profits <i>implicit item</i> should be supported by the information contained in Forms 13, 14, 18, 19, 40, 41, 42, 48, 49, the answers to questions 1 to 12 of the abstract of the valuation report, Appendix 9.4 of <i>IPRU(INS)</i>, the abstract of the valuation report for the realistic valuation, Appendix 9.4A of <i>IPRU(INS)</i> and Forms 51, 52, 53, 54 and 58. For a <i>zillmerisation</i> <i>implicit item</i>, only those items noted above forming part of the abstract valuation report will normally be needed. Applications for a <i>waiver</i> in respect of a hidden reserves <i>implicit item</i> will normally be considered only if accompanied by the information which is contained in the annual regulatory <i>returns</i>. In particular, the balance sheet forms, <i>long-term insurance business</i> revenue accounts, and abstract of the valuation report as set out in Appendices 9.1, 9.3 and 9.4 of <i>IPRU(INS)</i> should be provided. This is not to say that a full regulatory <i>return</i> must be provided in the specified format, simply that the information contained in these forms should be provided. Where appropriate, the information may be summarised.</p>
18	<p>The following supporting information relating to the calculation of the amounts claimed should be supplied for each type of <i>implicit item</i> in respect of which a <i>waiver</i> is sought:</p> <p>Future profits: in addition to information related to the prospective calculation and retrospective calculation described below, the profits reported in each of the last five <i>financial years</i> up to the date of the most recent available valuation under <i>rule 9.4</i> of <i>IPRU(INS)</i> which has been submitted to the <i>FSA</i> prior to, or together with, the application, and the amounts and nature of any exceptional items left out of account; the method used for calculating the average period to</p>

	<p>run and the results for each of the main categories of business, both before and after allowing for premature termination (where the calculation has been made in two stages); and the basis on which this allowance has been made.</p> <p><i>Zillmerising</i>: the categories of contracts for which an item has been calculated and the percentages of the <i>relevant capital sum</i> in respect of which an adjustment has been made.</p> <p>Hidden reserves: particulars, with supporting evidence, of the undervaluation of assets for which recognition is sought.</p>
Continuous monitoring by firms	
19	<p><i>Firms</i> should take into account any material changes in financial conditions or other relevant circumstances that may have an impact on the level of future profits that can prudently be taken into account.</p> <p><i>Firms</i> should also re-evaluate whether an application to vary an <i>implicit item waiver</i> should be made whenever circumstances have changed. In the event that circumstances have changed such that an amendment is appropriate, the <i>firm</i> must contact the <i>FSA</i> as quickly as possible in accordance with <i>Principle 11</i>. (See <i>SUP 8.5.1R</i>). In this context, the <i>FSA</i> would expect notice of any matter that materially impacts on the <i>firm's</i> financial condition, or any <i>waivers</i> granted.</p>
Future profits - factors to take into account when submitting calculations to support waiver applications	
20	<p>Where an application is made in respect of a <i>firm</i> which has separate <i>with-profits funds</i> and <i>non-profit funds</i>, the <i>firm</i> should ensure that the <i>capital resources requirement</i> in respect of the <i>non-profit fund</i> is not covered by future profits attributable to <i>policyholders</i> arising in the <i>with-profits fund</i>. Furthermore, for a <i>realistic basis life firm</i> the amount of the <i>implicit item</i> allocated to each <i>with-profits fund</i> should be calculated separately, as the amount allocated to each <i>with-profits fund</i> will be taken into consideration in the calculation of the <i>with-profits insurance capital component</i> (see <i>INSPRU 1.4.24R</i>).</p>
21	<p><i>Firms</i> need to assess prospective future profit (i.e. how much can reasonably be expected to arise) and compare this to maximum limits (in article 27(4) of the <i>Consolidated Life Directive</i>), which relate to past profits.</p>
Future profits - prospective calculation	
22	<p>The application for a <i>waiver</i> should be supported by details of a prospective calculation of future profits arising from in-force business. The information supplied to the <i>FSA</i> should include a description of the method used in the calculation and of the assumptions made, together with the results arising. From 31 December 2009 at the latest, future profits <i>implicit items</i> will no longer be permitted under the <i>Consolidated Life Directive</i>. Where a <i>firm</i> first applies for an <i>implicit items waiver</i> after <i>GENPRU 2.2</i> comes into effect, under the</p>

prospective calculation a *firm* should only take into consideration future profits that are expected to emerge in the period up to 31 December 2009. *Implicit item waivers* granted before *GENPRU 2.2* comes into effect will continue to operate under the terms of those *waivers*, but an application to vary the terms of such a *waiver*, for example to extend the effective period, is an application for a new *waiver* for which a *firm* should usually only take into consideration future profits that are expected to emerge in the period up to 31 December 2009.

Assumptions

23 The assumptions made should be prudent, rather than best estimate, assumptions of future experience (that is, the prudent assumptions should allow for the fair market price for assuming that risk including associated expenses). In particular, it would not normally be considered appropriate for the projected return on any asset to be taken to be higher than the risk-free yield (that is, assessed by reference to the yield arrived at using a model of future risk free yields properly calibrated from the forward gilts market). It may also be appropriate to bring future withdrawals into account on a suitably prudent basis. For *with-profits business*, the assumptions for future investment returns should not capitalise future bonus loadings except where the *with-profits policyholders* share in risks other than the investment performance of the fund. Furthermore, the rate at which future profits are discounted should include an appropriate margin over a risk free rate of return. Calculations should also be carried out to demonstrate that the prospective calculation of the future profits arising from the in-force business supporting the application for the *implicit item* would be sufficient to support the amount of the *implicit item* under each scenario described for use in determining the *resilience capital requirement* - where the *waiver* relates to an *implicit item* allocated to more than one fund, this should be demonstrated separately for that element of the *implicit item* allocated to each fund. For an *implicit item* allocated to a *with-profits fund*, proper allowance should be made for any shareholder transfers to ensure that the *implicit item* is not supported by future profits which will be required to support those transfers. To the extent, if any, that future profits are dependent on the levying of explicit expense related charges (for example as in the case of unit-linked business) the documentation submitted should include a demonstration of the prudence of the assumptions made as to the level at which future charges will be levied and expenses incurred.

Other limitations on the extent to which waivers for implicit items will be granted to a realistic basis life firm

24 Where a *waiver* in respect of an *implicit item* is granted to a *realistic basis life firm* additional limits may apply by reference to a comparison of *realistic excess capital* and *regulatory excess capital*

	including allowance for the effect of the <i>waiver</i> . Where the <i>waiver</i> relates to an <i>implicit item</i> allocated partly or entirely to a <i>with-profits fund</i> , the <i>waiver</i> will contain a limitation to the effect that the <i>regulatory excess capital</i> for that <i>with-profits fund</i> , allowing for the effect of the <i>waiver</i> , may not exceed that fund's <i>realistic excess capital</i> . This limitation will apply on an ongoing basis so that, for example, in the case of an <i>implicit item</i> allocated to a <i>with-profits fund</i> , the amount of the <i>implicit item</i> would be limited to zero whenever the <i>regulatory excess capital</i> exceeded the <i>realistic excess capital</i> of that fund.
Other charges to future profits	
25	To avoid double counting, no account should be taken of any future surplus arising from assets corresponding to explicit items which have been counted towards the <i>capital resources requirement</i> such as shareholders funds, surplus carried forward or investment reserves. Deductions should be made in the calculation of future surpluses for the impact of any other arrangements which give rise to a charge over future surplus emerging (e.g. financial <i>reinsurance</i> arrangements, subordinated loan capital or contingent loan agreements). Deductions should also be made to the extent that any credit has been taken for the purposes of <i>INSPRU 1.4.45R(2)(c)</i> for the present value of future profits relating to non-profit business written in a <i>non-profit fund</i> . The information supplied to the <i>FSA</i> should identify the amount and reason for any adjustments made to the calculation of the prospective amount of future profits.
26	The <i>firm</i> should confirm to the <i>FSA</i> that the calculations have been properly carried out and that there are no other factors that should be taken into account.
Future profits - retrospective calculation	
Overriding limit	
27	The maximum amount of the <i>implicit item</i> relating to future profits permitted under the <i>Consolidated Life Directive</i> is 50% of the product of the estimated annual profit and the average period to run (not exceeding six years (ten years during the transitional period referred to in paragraph 5)) on the <i>policies</i> in the portfolio. Article 27(4) of the <i>Consolidated Life Directive</i> also imposes a further limit on the amount of the <i>implicit item</i> equal to 25% of the lower of:
	(1) the <i>firm's capital resources</i> ; and
	(2) the higher of its <i>base capital resources requirement</i> for <i>long-term insurance business</i> and its <i>long-term insurance capital requirement</i> .

	Once the transitional period set out in article 71(1) of the <i>Consolidated Life Directive</i> has expired in 2007 (see paragraph 5), the <i>FSA</i> will not allow a <i>waiver</i> for more than the amount permitted by article 27(4) of the Directive.
Definition of profits	
28	The estimated annual profit should be taken as the average annual surplus arising in the <i>long-term insurance fund</i> over the last five <i>financial years</i> up to the date of the most recent available valuation which has been submitted to the <i>FSA</i> prior to, or together with, the application. For this purpose, deficiencies arising should be treated as negative surpluses. Where a <i>firm's financial year</i> has altered, the surplus arising in a period falling partly outside the relevant five year period should be assumed to accrue uniformly over the period in question for the purpose of estimating the profits arising within the five year period. When there has been a transfer of a block of business into the <i>firm</i> (or out of the <i>firm</i>) during the period, surplus arising from the transferred block should be included (or excluded) for the full five year period. Where a portion of a block of business is transferred, the surplus included (or excluded) should be a reasonable estimate of the surplus arising from the portion transferred.
29	Where a <i>firm</i> has been carrying on <i>long-term insurance business</i> for less than 5 years, the total profits made during the past five years should be taken to be the aggregate of any surpluses that have arisen during the period in which <i>long-term insurance business</i> has been carried on less any deficiencies that may have arisen during that period. The resulting total should still be divided by five to obtain the estimated annual profit.
Exceptional items	
30	Substantial items of an exceptional nature should be excluded from the calculation of the estimated annual profit. Such items include profits arising from an exceptional change in the value at which assets are brought into account, where this is not reflected in a similar change in the amount of the liabilities, and profits arising from a change in the overall valuation approach between one year and another. An exceptional loss (i.e. a reduction of an exceptional nature in the surplus arising) may be excluded from the calculation only to the extent that it can be set against a profit or profits up to the amount of the loss and arising from a similar cause. It is not intended, however, that any adjustment should be made for the effect on surplus of a net strengthening of reserves for costs associated with an expansion of the business or for special capital expenditure, such as the purchase of computer systems.
Double counting	

31	<p>The inclusion of investment income arising from the assets representing the explicit components of <i>capital resources</i> (as part of the estimated annual profit for the purpose of determining the future profits <i>implicit item</i>) would result in double-counting. If those assets were required to meet the effects of adverse developments, this would automatically result in the cessation of the contribution to profits from the associated investment income. It would clearly not be appropriate for the <i>FSA</i> to grant a <i>waiver</i> which would enable a <i>firm</i> to meet the <i>capital resources requirement</i> on the basis of counting both the capital values of the assets and the value of the income flow which they can be expected to generate.</p>
32	<p>The definition of the estimated annual profit as the surplus arising in the <i>long-term insurance fund</i> ensures that any contribution to surplus arising from transfers from the profit and loss account, including investment income on shareholders' assets, is not included in the estimated annual profit. Thus double-counting should not arise in respect of shareholders' assets. Double-counting may arise, however, in respect of the investment income from the assets representing the explicit components of <i>capital resources</i> carried within the <i>long-term insurance fund</i> (e.g. surplus carried forward or investment reserves), but the amount of such investment income is not separately identified in the <i>return</i>.</p>
33	<p>Where there is reason to suspect that the elimination of any such double-counting would reduce a <i>firm's capital resources</i> to close to or below the required level, or would otherwise be significant, the <i>FSA</i> will request this information with a view to taking account of this factor in determining the amount of the <i>implicit item</i>. Additional information concerning investment income should be furnished with an application for a <i>waiver</i>, if a <i>firm</i> believes that any double-counting would fall into one of the categories mentioned above.</p>
Average period to run	
34	<p>The average number of years remaining to run on <i>policies</i> should be calculated on the basis of the weighted average of the periods for individual <i>contracts of insurance</i>, using as weights the actuarial present value of the benefits payable under the contracts. A separate weighted average should be calculated for each of the various categories of contract and the results combined to obtain the weighted average for the portfolio as a whole. Approximate methods of calculation, which the <i>firm</i> considers will give results similar to the full calculation, will be accepted. In particular, the <i>FSA</i> will normally accept the calculation of an average period to run for a specific category of contract on the basis of the average valuation factor for future benefits derived from data contained in the abstract of the valuation report in the regulatory <i>returns</i>. A <i>firm</i> will be asked to demonstrate the validity of the method adopted only where an abnormal distribution of the business in force gives grounds for doubt</p>

	about its accuracy.
35	Calculations will normally be requested only for the main categories of <i>insurance business</i> , accounting for not less than 90% of the <i>mathematical reserves</i> , except where there are grounds for expecting that the exclusion of certain categories of <i>policies</i> under this provision might have a significant effect on the resulting average period to run. Detailed calculations will not be required where a <i>waiver</i> is sought in respect of a low multiple of the annual profits, well within the average period to run for the <i>firm</i> .
36	Where, for a particular category of business, a method of valuation is used which does not involve the calculation of the value of future benefits and which is significant for the <i>firm</i> in question, the calculation of the average period to run should be based on estimates of the value of future benefits.
Premature termination of contracts	
37	Allowance should be made for the premature termination of <i>contracts of insurance</i> , based on the actual experience of the <i>firm</i> over the last five years, or other appropriate period, and taking into account specific features of contracts such as options which can be expected to lead to premature termination (e.g. guaranteed surrender values on income bonds written as <i>long-term insurance contracts</i> and option dates on flexible whole-life contracts). The adjustment should be made separately for each of the main categories of business. The use of industry-wide rates of termination will be acceptable where a <i>firm</i> is satisfied that this will result in sufficient allowance being made having regard to the <i>firm's</i> own experience. Methods of calculation that involve a degree of approximation will be permitted.
38	For certain types of contract, where the period left to run is most naturally defined as the term to a fixed maturity or expiry date, the allowance for premature termination should also take into account terminations resulting from death.
Overall limit	
39	The overall average period left to run calculated as described above should be limited to a maximum of six years under article 27(4) of the <i>Consolidated Life Directive</i> (or a maximum of ten years during the transitional period referred to in paragraph 5) before applying it to the estimated annual profit in order to determine the maximum value of the future profits <i>implicit item</i> .
Definition of period to run	
40	The definition of the period to run and the basis of the allowance for early termination should clearly be considered together. For certain types of contracts (e.g. pension contracts with a range of retirement

	ages or other options), there is inherent uncertainty about the likely term to run. In such circumstances any estimate for determining the amount of the future profits <i>implicit item</i> for which a <i>waiver</i> is sought should be based on prudent assumptions tending, if anything, to underestimate the average period to run.
Zillmerising	
41	The <i>FSA</i> does not normally expect to grant <i>waivers</i> permitting <i>implicit items</i> due to <i>zillmerisation</i> except in very exceptional circumstances. <i>Zillmerisation</i> is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future <i>premiums</i> . <i>Firms</i> can make a direct adjustment to their reserves for <i>zillmerisation</i> , subject to the requirements on <i>mathematical reserves</i> set out in <i>INSPRU</i> 1.3.43R, and this is the usual approach. However, where no such adjustment has been made, or where the maximum adjustment has not been made in the <i>mathematical reserves</i> , the <i>FSA</i> will consider an application for an <i>implicit item</i> , if the amount is consistent with the amount that would have been allowed as an adjustment to <i>mathematical reserves</i> under <i>INSPRU</i> 1.3.43R.
Hidden reserves	
42	The <i>FSA</i> will grant <i>waivers</i> permitting <i>implicit items</i> due to hidden reserves only in very exceptional circumstances. These items relate to hidden reserves resulting from the underestimation of assets. The <i>rules</i> for the valuation of assets and liabilities (see <i>GENPRU</i> 1.3) which apply to assets and liabilities other than <i>mathematical reserves</i> are based on the valuation used by the <i>firm</i> for the purposes of its external accounts, with adjustments for regulatory prudence such as concentration limits for large holdings, and would not normally be expected to contain hidden reserves.
Case studies on "unduly burdensome"	
43	Some examples of situations where the existing <i>rules</i> might be considered to be unduly burdensome are given below:
	<ul style="list-style-type: none"> • A <i>firm</i> writes <i>with-profits business</i>. The <i>firm's</i> investment policy is affected by its published financial position. Application of the <i>rules</i> without an <i>implicit item</i> would result in the <i>firm</i> adopting a lower equity backing ratio. It may be possible to demonstrate that, in the circumstances, it would be unduly burdensome to require the <i>firm</i> to incur costs (which might prejudice <i>policyholders</i>) resulting from the lower equity backing ratio, rather than take allowance for an <i>implicit item</i>.
	<ul style="list-style-type: none"> • A <i>firm</i> has purchased a block of in-force business, on which the future profits may be reasonably estimated. However, this asset is given no value under the <i>rules</i>. It may be possible to demonstrate that it is unduly burdensome for the <i>firm</i> to recognise the cost of acquiring the

	assets whilst giving no value to the asset acquired.
•	A <i>firm</i> has a block of in-force business, on which the future profits may be reasonably estimated. Application of the <i>rules</i> without an <i>implicit item</i> would result in a need to obtain additional capital. It may be possible to demonstrate that it is unduly burdensome, having regard to the particular circumstances of the <i>firm</i> , to require it to incur the costs involved in the injection of further capital rather than take allowance for an <i>implicit item</i> .
•	A <i>firm</i> has purchased matching assets for guaranteed annuity liabilities. The operation of the asset and liability valuation <i>rules</i> leads to statutory losses in certain circumstances in spite of good matching of assets and liabilities on a realistic basis of assessment. It may be possible to demonstrate that it is unduly burdensome to require the <i>firm</i> to incur the costs involved in the injection of further capital rather than take allowance for an <i>implicit item</i> .
Conditions which will typically be applied to implicit items waivers	
Limits	
44	Where <i>implicit items waivers</i> are granted, the value cannot exceed (and will normally be less than) the monetary limits described in paragraph 27, except that during the transitional period the pre-Solvency I limits will apply. In addition, time limits will apply and <i>wavers</i> will normally only last for 12 months.
Publicity	
45	The <i>FSA</i> will publish the <i>waiver</i> (see <i>SUP</i> 8.6 and <i>SUP</i> 8.7). Public disclosure is standard practice unless the <i>FSA</i> is satisfied that publication is inappropriate or unnecessary (see section 148 of the <i>Act</i>). Any request that a direction not be published should be made to the <i>FSA</i> in writing with grounds in support, as set out in <i>SUP</i> 8.6. Disclosure of a <i>waiver</i> will normally be required in the <i>firm's</i> annual <i>returns</i> .

Annex C

Chapter 3 of GENPRU

In this Annex the text shown is redesignated text. Where changes are to be made to the redesignated text, new text is underlined and text that is deleted is shown as struck-through.

3.1 ~~8.4~~ Cross sector groups

Application

- ~~8.4.13.1.1~~ R (1) *GENPRU 8.43.1* applies to every *firm* that is a member of a *financial conglomerate* other than:
- (a) an *incoming EEA firm*;
 - (b) an *incoming Treaty firm*;
 - (c) a *UCITS qualifier*; and
 - (d) an *ICVC*.
- (2) *GENPRU 3.18.4* does not apply to a *firm* with respect to a *financial conglomerate* of which it is a member if the interest of the *financial conglomerate* in that *firm* is no more than a *participation*.
- (3) *GENPRU 3.18.4.25* (Capital adequacy requirements: high level requirement), *GENPRU 3.18.4.26R* (Capital adequacy requirements: application of Method 4 from Annex I of the Financial Groups Directive), *GENPRU 3.18.4.29R* (Capital adequacy requirements: application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive) and *GENPRU 3.18.4.35R* (Risk concentration and intra group transactions: the main rule) do not apply with respect to a *third-country financial conglomerate*.

Purpose

3.1.28.4.2 G GENPRU 3.18.4 implements the *Financial Groups Directive*. However, material on the following topics is to be found elsewhere in the *Handbook* as follows:

- (1) further material on *third-country financial conglomerates* can be found in GENPRU 3.28.5;
- (2) *SUP 15.9* contains notification *rules* for members of *financial conglomerates*;
- (3) material on reporting obligations can be found in *SUP 16.7.7382R* and *SUP 16.7.7483R*; and
- (4) material on systems and controls in *financial conglomerates* can be found in PRU 8.1SYSC 12.

Introduction: identifying a financial conglomerate

3.1.3
8.4.3

- G
- (1) In general the process in (2) to (8) applies for identifying *financial conglomerates*.
 - (2) *Competent authorities* that have authorised *regulated entities* should try to identify any *consolidation group* that is a *financial conglomerate*. If a *competent authority* is of the opinion that a *regulated entity* authorised by that *competent authority* is a member of a *consolidation group* which may be a *financial conglomerate* it should communicate its view to the other *competent authorities* concerned.
 - (3) A *competent authority* may start (as described in (2)) the process of deciding whether a group is a *financial conglomerate* even if it would not be the *coordinator*.
 - (4) A member of a group may also start that process by notifying one of the *competent authorities* that have authorised group members that its group may be a *financial conglomerate*, for example by notification under *SUP 15.9*.
 - (5) If a group member gives a notification in accordance with (4), that does not automatically mean that the group should be treated as a *financial conglomerate*. The process described in (6) to (9) still applies.
 - (6) The *competent authority* that would be *coordinator* will take the lead in establishing whether a group is a *financial conglomerate* once the process has been started as described in (2) and (3).
 - (7) The process of establishing whether a group is a *financial conglomerate* will normally involve discussions between the *financial conglomerate* and the *competent authorities* concerned.

- (8) A *financial conglomerate* should be notified by its *coordinator* that it has been identified as a *financial conglomerate* and of the appointment of the *coordinator*. The notification should be given to the *parent undertaking* at the head of the group or, in the absence of a *parent undertaking*, the *regulated entity* with the largest balance sheet total in the *most important financial sector*. That notification does not of itself make a group into a *financial conglomerate*; whether or not a group is a *financial conglomerate* is governed by the definition of *financial conglomerate* as set out in GENPRU 3.1 8.4.
- (9) GENPRU 3 8 Ann 3 4G is a questionnaire (together with its explanatory notes) that the *FSA* asks groups that may be *financial conglomerates* to fill out in order to decide whether or not they are.

Introduction: The role of other competent authorities

- 3.1.4
8.4.4 G A lead supervisor (called the *coordinator*) is appointed for each *financial conglomerate*. Article 10 of the *Financial Groups Directive* describes the criteria for deciding which *competent authority* is appointed as *coordinator*. Article 11 of the *Financial Groups Directive* sets out the tasks of the *coordinator*.

Definition of financial conglomerate: basic definition

- 3.1.5
8.4.5 R A *financial conglomerate* means a *consolidation group* that is identified as a *financial conglomerate* in accordance with the decision tree in GENPRU 3 8 Ann 43R.

Definition of financial conglomerate: sub-groups

- 3.1.6
8.4.6 R A *consolidation group* is not prevented from being a *financial conglomerate* because it is part of a wider:
- (1) *consolidation group*; or
 - (2) *financial conglomerate*; or
 - (3) group of persons linked in some other way.

Definition of financial conglomerate: the financial sectors: general

- 3.1.7
8.4.7 R For the purpose of the definition of *financial conglomerate*, there are two *financial sectors* as follows:
- (1) the *banking sector* and the *investment services sector*, taken together; and
 - (2) the *insurance sector*.

- 3.1.8
8.4.8 R (1) This *rule* applies for the purpose of the definition of *financial conglomerate* and the *financial conglomerate definition decision tree*.
- (2) Any *mixed financial holding company* is considered to be outside the *overall financial sector* for the purpose of the tests set out in the boxes titled

Threshold Test 1, Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree*.

- (3) Determining whether the tests set out in the boxes titled Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree* are passed is based on considering the consolidated and/or aggregated activities of the members of the *consolidation group* within the *insurance sector* and the consolidated and/or aggregated activities of the members of the *consolidation group* within the *banking sector* and the *investment services sector*.

Definition of financial conglomerate: adjustment of the percentages

3.1.9
8.4.9

R Once a *financial conglomerate* has become a *financial conglomerate* and subject to supervision in accordance with the *Financial Groups Directive*, the figures in the *financial conglomerate definition decision tree* are altered as follows:

- (1) the figure of 40% in the box titled Threshold Test 1 is replaced by 35%;
- (2) the figure of 10% in the box titled Threshold Test 2 is replaced by 8%; and
- (3) the figure of six billion Euro in the box titled Threshold Test 3 is replaced by five billion Euro.

3.1.10
8.4.10

R The alteration in GENPRU 3.1.98.4.9R only applies to a *financial conglomerate* during the period that:

- (1) begins when the *financial conglomerate* would otherwise have stopped being a *financial conglomerate* because it does not meet one of the unaltered thresholds referred to in GENPRU 3.1.98.4.9R; and
- (2) covers the three years following that date.

Definition of financial conglomerate: balance sheet totals

3.1.11
8.4.11

R The calculations referred to in the *financial conglomerate definition decision tree* regarding the balance sheet must be made on the basis of the aggregated balance sheet total of the members of the *consolidation group*, according to their annual accounts. For the purposes of this calculation, *undertakings* in which a *participation* is held must be taken into account as regards the amount of their balance sheet total corresponding to the aggregated proportional share held by the *consolidation group*. However, where consolidated accounts are available, they must be used instead of aggregated accounts.

Definition of financial conglomerate: solvency requirement

3.1.12
8.4.12

R The solvency and capital adequacy requirements referred to in the *financial conglomerate definition decision tree* must be calculated in accordance with the provisions of the relevant *sectoral rules*.

Definition of financial conglomerate: discretionary changes to the definition

3.1.13
8.4.13

G Articles 3(3) to 3(6), Article 5(4) and Article 6(5) of the *Financial Groups Directive* allow *competent authorities*, on a case by case basis, to:

- (1) change the definition of *financial conglomerate* and the obligations applying with respect to a *financial conglomerate*;
- (2) apply the scheme in the *Financial Groups Directive* to *EEA regulated entities* in specified kinds of group structures that do not come within the definition of *financial conglomerate*; and
- (3) exclude a particular entity in the scope of capital adequacy requirements that apply with respect to a *financial conglomerate*.

Capital adequacy requirements: introduction

3.1.14
8.4.14

G The capital adequacy provisions of GENPRU 3.1.18.4 are designed to be applied to *EEA-based financial conglomerates*.

3.1.15
8.4.15

G GENPRU 3.1.25.4.25R is a high level capital adequacy *rule*. It applies whether or not the *FSA* is the *coordinator* of the *financial conglomerate* concerned.

3.1.16
8.4.16

G GENPRU 3.1.26.4.26R to GENPRU 3.1.31.4.31R and GENPRU 38 Ann 1R implement the detailed capital adequacy requirements of the *Financial Groups Directive*. They only deal with a *financial conglomerate* for which the *FSA* is the *coordinator*. If another *competent authority* is *coordinator* of a *financial conglomerate*, those *rules* do not apply with respect to that *financial conglomerate* and instead that *coordinator* will be responsible for implementing those detailed requirements.

3.1.17
8.4.17

G Annex I of the *Financial Groups Directive* lays down four methods for calculating capital adequacy at the level of a *financial conglomerate*. Those four methods are implemented as follows:

- (1) Method 1 calculates capital adequacy using accounting consolidation. It is implemented by GENPRU 3.1.29.4.29R to GENPRU 3.1.31.4.31R and Part 1 of GENPRU 38 Ann 1R.
- (2) Method 2 calculates capital adequacy using a deduction and aggregation approach. It is implemented by GENPRU 3.1.29.4.29R to GENPRU 3.1.31.4.31R and Part 2 of GENPRU 38 Ann 1R.
- (3) Method 3 calculates capital adequacy using book values and the deduction of capital requirements. It is implemented by GENPRU 3.1.29.4.29R to GENPRU 3.1.31.4.31R and Part 3 of GENPRU 38 Ann 1R.

- (4) Method 4 consists of a combination of Methods 1, 2 and 3 from Annex I of the *Financial Groups Directive*, or a combination of two of those Methods. It is implemented by ~~GENPRU 3.1.268.4.26R~~ to ~~GENPRU 3.1.288.4.28R~~, ~~GENPRU 3.1.308.4.30R~~ and Part 4 of GENPRU 38 Ann 1R.

3.1.18
8.4.18

- G Part 4 of GENPRU 38 Ann 1R (Use of Method 4 from Annex I of the *Financial Conglomerates Directive*) applies the *FSA's sectoral rules* with respect to the *financial conglomerate* as a whole, with some adjustments. Where Part 4 of GENPRU 38 Ann 1R applies the *FSA's sectoral rules* for:

- (1) the *insurance sector*, that involves a combination of Methods 2 and 3; and
- (2) the *banking sector* and the *investment services sector*, that involves a combination of Methods 1 and 3.

3.1.19
8.4.19

- G Paragraph 5.75 of GENPRU 38 Ann 1R (Capital adequacy calculations for financial conglomerates) deals with a case in which there are no capital ties between entities in a *financial conglomerate*. In particular, the *FSA*, after consultation with the other *relevant competent authorities* and in accordance with Annex I of the *Financial Groups Directive*, will determine which proportional share of a solvency deficit in such an entity will have to be taken into account, bearing in mind the liability to which the existing relationship gives rise.

3.1.20
8.4.20

- G (1) In the following cases, the *FSA* (acting as *coordinator*) may choose which of the four methods for calculating capital adequacy laid down in Annex I of the *Financial Groups Directive* should apply:
- (a) where a *financial conglomerate* is headed by a *regulated entity* that has been authorised by the *FSA*; or
 - (b) the only *relevant competent authority* for the *financial conglomerate* is the *FSA*.
- (2) ~~GENPRU 3.1.288.4.28R~~ automatically applies Method 4 from Annex I of the *Financial Groups Directive* in these circumstances except in the cases set out in ~~GENPRU 3.1.288.4.28R(1)(e)~~ and ~~GENPRU 3.1.288.4.28R(1)(f)~~. The process in ~~GENPRU 3.1.228.4.22G~~ does not apply.

3.1.21
8.4.21

- G Where ~~GENPRU 3.1.208.4.20G~~ does not apply, the Annex I method to be applied is decided by the *coordinator* after consultation with the *relevant competent authorities* and the *financial conglomerate* itself.

- 3.1.22
8.4.22 G The method of calculating capital adequacy chosen in respect of a *financial conglomerate* as described in GENPRU 3.1.218.4.21G will be applied with respect to that *financial conglomerate* by varying the *Part IV permission* of a *firm* in that *financial conglomerate* to include a *requirement*. That *requirement* will have the effect of obliging the *firm* to ensure that the *financial conglomerate* has capital resources of the type and amount needed to comply with whichever of the methods in GENPRU 38 Ann 1R is to be applied with respect to that *financial conglomerate*. The powers in the *Act* relating to *waivers* and varying a *firm's Part IV permission* can be used to implement one of the methods from Annex I of the *Financial Groups Directive* in a way that is different from that set out in GENPRU 3.18.4 and GENPRU 38 Ann 1R if that is necessary to reflect the consultations referred to in GENPRU 3.1.218.4.21G.
- 3.1.23
8.4.23 G If there is more than one *firm* in a *financial conglomerate* with a *Part IV permission*, the *FSA* would not normally expect to apply the *requirement* described in GENPRU 3.1.228.4.22G to all of them. Normally it will only be necessary to apply it to one.
- 3.1.24
8.4.24 G The *FSA* expects that in all or most cases falling into GENPRU 3.1.218.4.21G, the *rules* in Part 4 of GENPRU 38 Ann 1R will be applied.
- Capital adequacy requirements: high level requirement
- 3.1.25
8.4.25 R (1) A *firm* that is a member of a *financial conglomerate* must at all times have capital resources of such an amount and type that results in the capital resources of the *financial conglomerate* taken as a whole being adequate.
- (2) This *rule* does not apply with respect to any *financial conglomerate* until notification has been made that it has been identified as a *financial conglomerate* as contemplated by Article 4(2) of the *Financial Groups Directive*.
- Capital adequacy requirements: application of Method 4 from Annex I of the *Financial Groups Directive*
- 3.1.26
8.4.26 R If this *rule* applies under GENPRU 3.1.278.4.27R to a *firm* with respect to a *financial conglomerate* of which it is a member, the *firm* must at all times have capital resources of an amount and type:
- (1) that ensure that the *financial conglomerate* has capital resources of an amount and type that comply with the *rules* applicable with respect to that *financial conglomerate* under Part 4 of GENPRU 38 Ann 1R (as modified by that annex); and
- (2) that as a result ensure that the *firm* complies with those *rules* (as so modified) with respect to that *financial conglomerate*.
- 3.1.27
8.4.27 R GENPRU 3.1.268.4.26R applies to a *firm* with respect to a *financial conglomerate* of which it is a member if one of the following conditions is satisfied:
- (1) the condition in GENPRU 3.1.288.4.28R is satisfied; or

- (2) this *rule* is applied to the *firm* with respect to that *financial conglomerate* as described in GENPRU 3.1.308.4.30R.

Capital adequacy requirements: compulsory application of Method 4 from Annex I of the Financial Groups Directive

3.1.28
8.4.28

- R (1) The condition in this *rule* is satisfied for the purpose of GENPRU 3.1.278.4.27R(1) with respect to a *firm* and a *financial conglomerate* of which it is a member (with the result that GENPRU 3.1.268.4.26R automatically applies to that *firm*) if:
- (a) notification has been made in accordance with regulation 2 of the *Financial Groups Directive Regulations* that the *financial conglomerate* is a *financial conglomerate* and that the *FSA* is *coordinator* of that *financial conglomerate*;
 - (b) the *financial conglomerate* is not part of a wider *FSA regulated EEA financial conglomerate*;
 - (c) the *financial conglomerate* is not an *FSA regulated EEA financial conglomerate* under another *rule* or under paragraph (b) of the definition of *FSA regulated EEA financial conglomerate* (application of supplementary supervision through a *firm's Part IV permission*);
 - (d) one of the following conditions is satisfied:
 - (i) the *financial conglomerate* is headed by a *regulated entity* that is a *UK domestic firm*; or
 - (ii) the only *relevant competent authority* for that *financial conglomerate* is the *FSA*;
 - (e) this *rule* is not disapplied under paragraph 5.75 of GENPRU 38 Ann 1R (No capital ties); and
 - (f) the *financial conglomerate* meets the condition set out in the box titled Threshold Test 2 (10% average of balance sheet and solvency requirements) in the *financial conglomerate definition decision tree*.
- (2) Once GENPRU 3.1.268.4.26R applies to a *firm* with respect to a *financial conglomerate* of which it is a member under GENPRU 3.1.278.4.27R(1), (1)(f) ceases to apply with respect to that *financial conglomerate*. Therefore the fact that the *financial conglomerate* subsequently ceases to meet the condition in (1)(f) does not mean that the condition in this *rule* is not satisfied.

Capital adequacy requirements: application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive

3.1.29
8.4.29 R If with respect to a *firm* and a *financial conglomerate* of which it is a member, this *rule* is applied to the *firm* with respect to that *financial conglomerate* as described in GENPRU 3.1.308.4.30R, the *firm* must at all times have capital resources of an amount and type that ensures that the *conglomerate capital resources* of that *financial conglomerate* at all times equal or exceed its *conglomerate capital resources requirement*.

Capital adequacy requirements: use of Part IV permission to apply Annex I of the Financial Groups Directive

3.1.30
8.4.30 R With respect to a *firm* and a *financial conglomerate* of which it is a member:

(1) GENPRU 3.1.268.4.26R (Method 4 from Annex I of the *Financial Groups Directive*) is applied to the *firm* with respect to that *financial conglomerate* for the purposes of GENPRU 3.1.278.4.27R(2); or

(2) GENPRU 3.1.298.4.29R (Methods 1 to 3 from Annex I of the *Financial Groups Directive*) is applied to the *firm* with respect to that *financial conglomerate*;

if the *firm's Part IV permission* contains a *requirement* obliging the *firm* to comply with GENPRU 3.1.268.4.26R or, as the case may be, GENPRU 3.1.298.4.29R.

3.1.31
8.4.31 R If GENPRU 3.1.298.4.29R (Methods 1-3 from Annex I of the *Financial Groups Directive*) applies to a *firm* with respect to a *financial conglomerate* of which it is a member, the definitions of *conglomerate capital resources* and *conglomerate capital resources requirement* that apply for the purposes of that *rule* are the ones from whichever of Part 1, Part 2 or Part 3 of GENPRU 38 Ann 1R is specified in the *requirement* referred to in GENPRU 3.1.308.4.30R.

Risk concentration and intra-group transactions: introduction

3.1.32
8.4.32 G GENPRU 3.1.358.4.35R implements Article 7(4) and Article 8(4) of the *Financial Groups Directive*, which provide that where a *financial conglomerate* is headed by a *mixed financial holding company*, the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate*, if any, shall apply to that sector as a whole, including the *mixed financial holding company*.

3.1.33
8.4.33 G Articles 7(3) (Risk concentration) and 8(3) (Intra-group transactions) and Annex II (Technical application of the provisions on intra-group transactions and risk concentration) of the *Financial Groups Directive* say that Member States may apply at the level of the *financial conglomerate* the provisions of the *sectoral rules* on *risk concentrations* and *intra-group transactions*. GENPRU 3.18.4 does not take up that option, although the *FSA* may impose such obligations on a case by case basis.

Risk concentration and intra-group transactions: application

- 3.1.34
8.4.34 R GENPRU 3.1.358.4.35R applies to a *firm* with respect to a *financial conglomerate* of which it is a member if:
- (1) the condition in Articles 7(4) and 8(4) of the *Financial Groups Directive* is satisfied (the *financial conglomerate* is headed by a *mixed financial holding company*); and
 - (2) that *financial conglomerate* is an *FSA regulated EEA financial conglomerate*.

Risk concentration and intra group transactions: the main rule

- 3.1.35
8.4.35 R A *firm* must ensure that the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate* referred to in GENPRU 3.1.348.4.34R are complied with with respect to that *financial sector* as a whole, including the *mixed financial holding company*. The *FSA's sectoral rules* for these purposes are those identified in the table in GENPRU 3.1.368.4.36R.

Risk concentration and intra-group transactions: Table of applicable sectoral rules

- 3.1.36
8.4.36 R Table: application of sectoral rules
This table belongs to GENPRU 3.1.358.4.35R

The most important financial sector	Applicable sectoral rules	
	Risk concentration	Intra-group transactions
<u>Banking and investment services sector</u>	Rules 3.3.13, 3.3.19 and 3.3.21 of chapter GN of IPRU(BANK) (as they apply to large exposures on a consolidated basis) <u>BIPRU 8.9 (Consolidated concentration risk requirements) including BIPRU TP as it applies to a UK consolidation group.</u>	Rules 3.3.13, 3.3.19 and 3.3.21 of chapter GN of IPRU(BANK) (as they apply to large exposures on a solo basis) <u>BIPRU 10 (Concentration Risk) including BIPRU TP as it applies on a solo basis and relates to BIPRU 10.</u>
<u>Insurance sector</u>	None	<u>Rule 9.39 of IPRU(INS)</u>
<u>Investment services sector</u>	Rule 14.3.2 in Chapter 14 of IPRU(INV)	Rule 10-190 in Chapter 10 of IPRU(INV) as it applies on a solo basis
Note:	The <i>rules</i> as applied in column three apply without any concession or exemption for exposures to other group members.	

The most important financial sector	Applicable sectoral rules	
	Risk concentration	Intra-group transactions
Note	The decision tree in paragraph 4.5 of <u>GENPRU 38 Ann 1R</u> applies for the purpose of identifying the <i>most important financial sector</i> .	
Note	<u>Any waiver granted to a member of the financial conglomerate, on a solo or consolidated basis, shall not apply in respect of the financial conglomerate for the purposes of GENPRU 3.1.36R.</u>	

- 3.1.37 R (1) Where the rules for the banking and investment services sector are being applied, a mixed financial holding company must be treated as being a financial holding company.
- (2) Where the rules for the insurance sector are being applied, a mixed financial holding company must be treated as being an insurance holding company.
- 3.1.38 R (1) This rule applies for the purposes of the definitions of:
- (a) a concentration risk group counterparty; and
- (b) a consolidation concentration risk group counterparty;
- as they apply for the purposes of the rules for the banking and investment services sector as applied by GENPRU 3.1.36R.
- (2) For the purposes of BIPRU 3.2.27R(1)(a) and (b) (as they apply to the definition in GENPRU 3.1.38R(1)(a)), the conditions are also satisfied if the counterparty and the firm are included within the scope of consolidated supervision on a full basis with respect to the same financial conglomerate under GENPRU 3.1 or the relevant implementation measures in another EEA State for the Financial Groups Directive.
- (3) Subject to (4), for the purposes of BIPRU 8.9.11R(3) (as it applies to the definition in GENPRU 3.1.38R(1)(b)), the conditions are also satisfied if the counterparty and the firm are included within the scope of consolidated supervision on a full basis with respect to the same financial conglomerate under GENPRU 3.1 or the relevant implementation measures in another EEA State for the Financial Groups Directive.
- (4) BIPRU 8.9.11R(3)(a) does not apply.
- 8.4.37 G The material in IPRU(BANK) that has particular application to the rules in IPRU(BANK) referred to in the table in PRU 8.4.36R is:
- (1) (in the case of column 2) Chapter LE as it applies on a consolidated basis;
- (2) (in the case of column 3) Chapter LE as it applies on a solo basis.

8.4.38 G ~~The table in PRU 8.4.36R does not refer to the rules for building societies as a building society cannot have a mixed financial holding company as a parent.~~

The financial sectors: asset management companies

- ~~3.1.39~~
~~8.4.39~~ R (1) In accordance with Article 30 of the *Financial Groups Directive* (Asset management companies), this *rule* deals with the inclusion of an *asset management company* that is a member of a *financial conglomerate* in the scope of regulation of *financial conglomerates*. This *rule* does not apply to the definition of *financial conglomerate*.
- (2) An *asset management company* is in the *overall financial sector* and is a *regulated entity* for the purpose of:
- (a) ~~GENPRU 3.1.26R~~~~8.4.26R~~ to ~~GENPRU 3.1.36R~~~~8.4.36R~~;
- (b) ~~GENPRU 3~~ Ann 1R (Capital adequacy calculations for financial conglomerates) and ~~GENPRU 3~~ Ann 2R (Prudential rules for third country groups); and
- (c) any other provision of the *Handbook* relating to the supervision of *financial conglomerates*.
- (3) In the case of a *financial conglomerate* for which the *FSA* is the *coordinator*, all *asset management companies* must be allocated to one *financial sector* for the purposes in (2), being either the *investment services sector* or the *insurance sector*. But if that choice has not been made in accordance with (4) and notified to the *FSA* in accordance with (4)(d), an *asset management company* must be allocated to the *investment services sector*.
- (4) The choice in (3):
- (a) must be made by the *undertaking* in the *financial conglomerate* holding the position referred to in Article 4(2) of the *Financial Groups Directive* (group member to whom notice must be given that the group has been found to be a *financial conglomerate*);
- (b) applies to all *asset management companies* that are members of the *financial conglomerate* from time to time;
- (c) cannot be changed; and
- (d) must be notified to the *FSA* as soon as reasonably practicable after the notification in (4)(a).
- (5) This rule applies even if:
- (a) a UCITS management company is a BIPRU investment firm; or
- (b) an asset management company is an investment firm.

3.28.5 Third-country groups

Application

3.2.1
8.5.1 R *GENPRU 3.28.5* applies to every *firm* that is a member of a *third-country group*.
But it does not apply to:

- (1) an *incoming EEA firm*; or
- (2) an *incoming Treaty firm*; or
- (3) a *UCITS qualifier*; or
- (4) an *ICVC*.

Purpose

3.2.2
8.5.2 G *GENPRU 3.28.5* implements in part Article 18 of the *Financial Groups Directive* and Article ~~143~~^{56a} of the *Banking Consolidation Directive*.

Equivalence

3.2.3
8.5.3 G The first question that must be asked about a *third-country financial group* is whether the *EEA regulated entities* in that *third-country group* are subject to supervision by a *third-country competent authority*, which is equivalent to that provided for by the *Financial Groups Directive* (in the case of a *financial conglomerate*) or the *EEA prudential sectoral legislation* for the *banking sector* or the *investment services sector* (in the case of a *banking and investment group*). Article 18(1) of the *Financial Groups Directive* sets out the process for establishing equivalence with respect to *third-country financial conglomerates* and ~~the first three paragraphs of Article 143 (1) and (2)~~^{56a} of the *Banking Consolidation Directive* does so with respect to *third-country banking and investment groups*.

Other methods: General

3.2.4
8.5.4 G If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in *GENPRU 3.2.38.5.3G*, *competent authorities* may apply other methods that ensure appropriate supervision of the *EEA regulated entities* in that *third-country group* in accordance with the aims of supplementary supervision under the *Financial Groups Directive* or consolidated supervision under the applicable *EEA prudential sectoral legislation*.

Supervision by analogy: introduction

- 3.2.5
8.5.5 G If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in *GENPRU 3.2.38.5.3G*, a *competent authority* may, rather than take the measures described in *GENPRU 3.2.48.5.4G*, apply, by analogy, the provisions concerning supplementary supervision under the *Financial Groups Directive* or, as applicable, consolidated supervision under the applicable *EEA prudential sectoral legislation*, to the *EEA regulated entities* in the *banking sector*, *investment services sector* and (in the case of a *financial conglomerate*) *insurance sector*.
- 3.2.6
8.5.6 G The *FSA* believes that it will only be right to adopt the option in *GENPRU 3.2.58.5.5G* in response to very unusual group structures.
- 3.2.7
8.5.7 G *GENPRU 3.2.88.5.8R* and *GENPRU 3.2.98.5.9R* and *GENPRU 38 Ann 2* set out *rules* to deal with the situation covered in *GENPRU 3.2.58.5.5G*. Those *rules* do not apply automatically. Instead, they can only be applied with respect to a particular *third-country group* through the *Part IV permission* of a *firm* in that *third-country group*. Broadly speaking the procedure described in *GENPRU 3.1.228.4.22G* also applies to this process.

Supervision by analogy: rules for third-country conglomerates

- 3.2.8
8.5.8 R If the *Part IV permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country financial conglomerate* of which it is a member, it must comply, with respect to that *third-country financial conglomerate*, with the *rules* in Part 1 of *GENPRU 38 Ann 2R*, as adjusted by Part 3 of that annex.

Supervision by analogy: rules for third-country banking and investment groups

- 3.2.9
8.5.9 R If the *Part IV permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country banking and investment group* of which it is a member, it must comply, with respect to that *third-country banking and investment group*, with the *rules* in Part 2 of *GENPRU 38 Ann 2R*, as adjusted by Part 3 of that annex.

GENPRU 38 Ann 1R

Capital adequacy calculations for financial conglomerates (GENPRU 3.1.268-4.26R and GENPRU 3.1.298-4.29R)

1 Table: PART 1: Method of Annex I of the Financial Groups Directive (Accounting Consolidation Method)

Capital resources	1.1	The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are the capital of that <i>financial conglomerate</i> , calculated on an accounting consolidation basis, that qualifies under paragraph 1.2.	
	1.2	The elements of capital that qualify for the purposes of paragraph 1.1 are those that qualify in accordance with the <i>applicable sectoral rules</i> , in accordance with the following:	
		(1)	the <i>conglomerate capital resources requirement</i> is divided up in accordance with the contribution of each <i>financial sector</i> to it; and
		(2)	the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular <i>financial sector</i> must be met by capital resources that are eligible in accordance with the <i>applicable sectoral rules</i> for that <i>financial sector</i> .
Capital resources requirement	1.3	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the capital adequacy and solvency requirements for each <i>financial sector</i> calculated in accordance with the <i>applicable sectoral rules</i> for that <i>financial sector</i> .	
Consolidation	1.4	The information required for the purpose of establishing whether or not a <i>firm</i> is complying with <u>GENPRU 3.1.298-4.29R</u> (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the consolidated accounts of the <i>financial conglomerate</i> , together with such other sources of information as appropriate.	
	1.5	The <i>applicable sectoral rules</i> that are applied under this Part are the <i>applicable sectoral consolidation rules</i> . Other <i>applicable sectoral rules</i> must be applied if required.	

2 Table: PART 2: Method 2 of Annex I of the Financial Groups Directive (Deduction and aggregation Method)

Capital resources	2.1	<p>The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are equal to the sum of the following amounts (so far as they qualify under paragraph 2.3) for each member of the <i>overall financial sector</i>:</p> <p>(1) (for the <i>person</i> at the head of the <i>financial conglomerate</i>) its <i>solo capital resources</i>;</p> <p>(2) (for any other member):</p> <p>(a) its <i>solo capital resources</i>; less</p> <p>(b) the book value of the <i>financial conglomerate's</i> investment in that member.</p>
	2.2	<p>The deduction in paragraph 2.1(2) must be carried out separately for each type of capital represented by the <i>financial conglomerate's</i> investment in the member concerned.</p>
	2.3	<p>The elements of capital that qualify for the purposes of paragraph 2.1 are those that qualify in accordance with the <i>applicable sectoral rules</i>. In particular, the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular member of a <i>financial sector</i> must be met by capital resources that would be eligible under the <i>sectoral rules</i> that apply to the calculation of its <i>solo capital resources</i>.</p>
Capital resources requirement	2.4	<p>The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the <i>solo capital resources requirement</i> for each member of the <i>financial conglomerate</i> that is in the <i>overall financial sector</i>.</p>
Partial inclusion	2.5	<p>The capital resources and capital resources requirements of a member of the <i>financial conglomerate</i> in the <i>overall financial sector</i> must be included proportionally. If however the member is a <i>subsidiary undertaking</i> and it has a <i>solvency deficit</i>, they must be included in full.</p>
Accounts	2.6	<p>The information required for the purpose of establishing whether or not a <i>firm</i> is complying with <u>GENPRU 3.1.298.4.29R</u> (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the individual accounts of members of the <i>financial conglomerate</i>, together with such other sources of information as appropriate.</p>

3. Table: PART 3: Method 3 of Annex I of the Financial Groups Directive
(Book value/Requirement Method)

Capital resources	3.1	The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are equal to the capital resources of the <i>person</i> at the head of the <i>financial conglomerate</i> that qualify under paragraph 3.2.
	3.2	The elements of capital that qualify for the purposes of paragraph 3.1 are those that qualify in accordance with the <i>applicable sectoral rules</i> . In particular, the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular member of a <i>financial sector</i> must be met by capital resources that would be eligible under the <i>sectoral rules</i> that apply to the calculation of its <i>solo capital resources</i> .
Capital resources requirement	3.3	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the following amounts for each member of the <i>overall financial sector</i> :
	(1)	(in the case of the <i>person</i> at the head of the <i>financial conglomerate</i>) its <i>solo capital resources requirement</i> ;
	(2)	(in the case of any other member) the higher of the following two amounts:
	(a)	its <i>solo capital resources requirement</i> ; and
	(b)	the book value of the interest of the <i>person</i> at the head of the <i>financial conglomerate</i> in that member.
	3.4	A <i>participation</i> may be valued using the equity method of accounting.
Partial inclusion	3.5	The capital resources requirement of a member of the <i>financial conglomerate</i> in the <i>overall financial sector</i> must be included proportionally. If however the member has a <i>solvency deficit</i> and is a <i>subsidiary undertaking</i> , it must be included in full.
Accounts	3.6	The information required for the purpose of establishing whether or not a <i>firm</i> is complying with <u>GENPRU 3.1.298.4.29R</u> (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the individual accounts of members of the <i>financial conglomerate</i> , together with such other sources of information as appropriate.

- 4 Table: PART 4: Method 4 of Annex I of the Financial Groups Directive (Combination of Methods 1, 2 and 3)

Applicable sectoral rules	4.1	The <i>rules</i> that apply with respect to a particular <i>financial conglomerate</i> under GENPRU 3.1.268.4.26R are those relating to capital adequacy and solvency set out in the table in paragraph 4.2.
---------------------------	-----	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

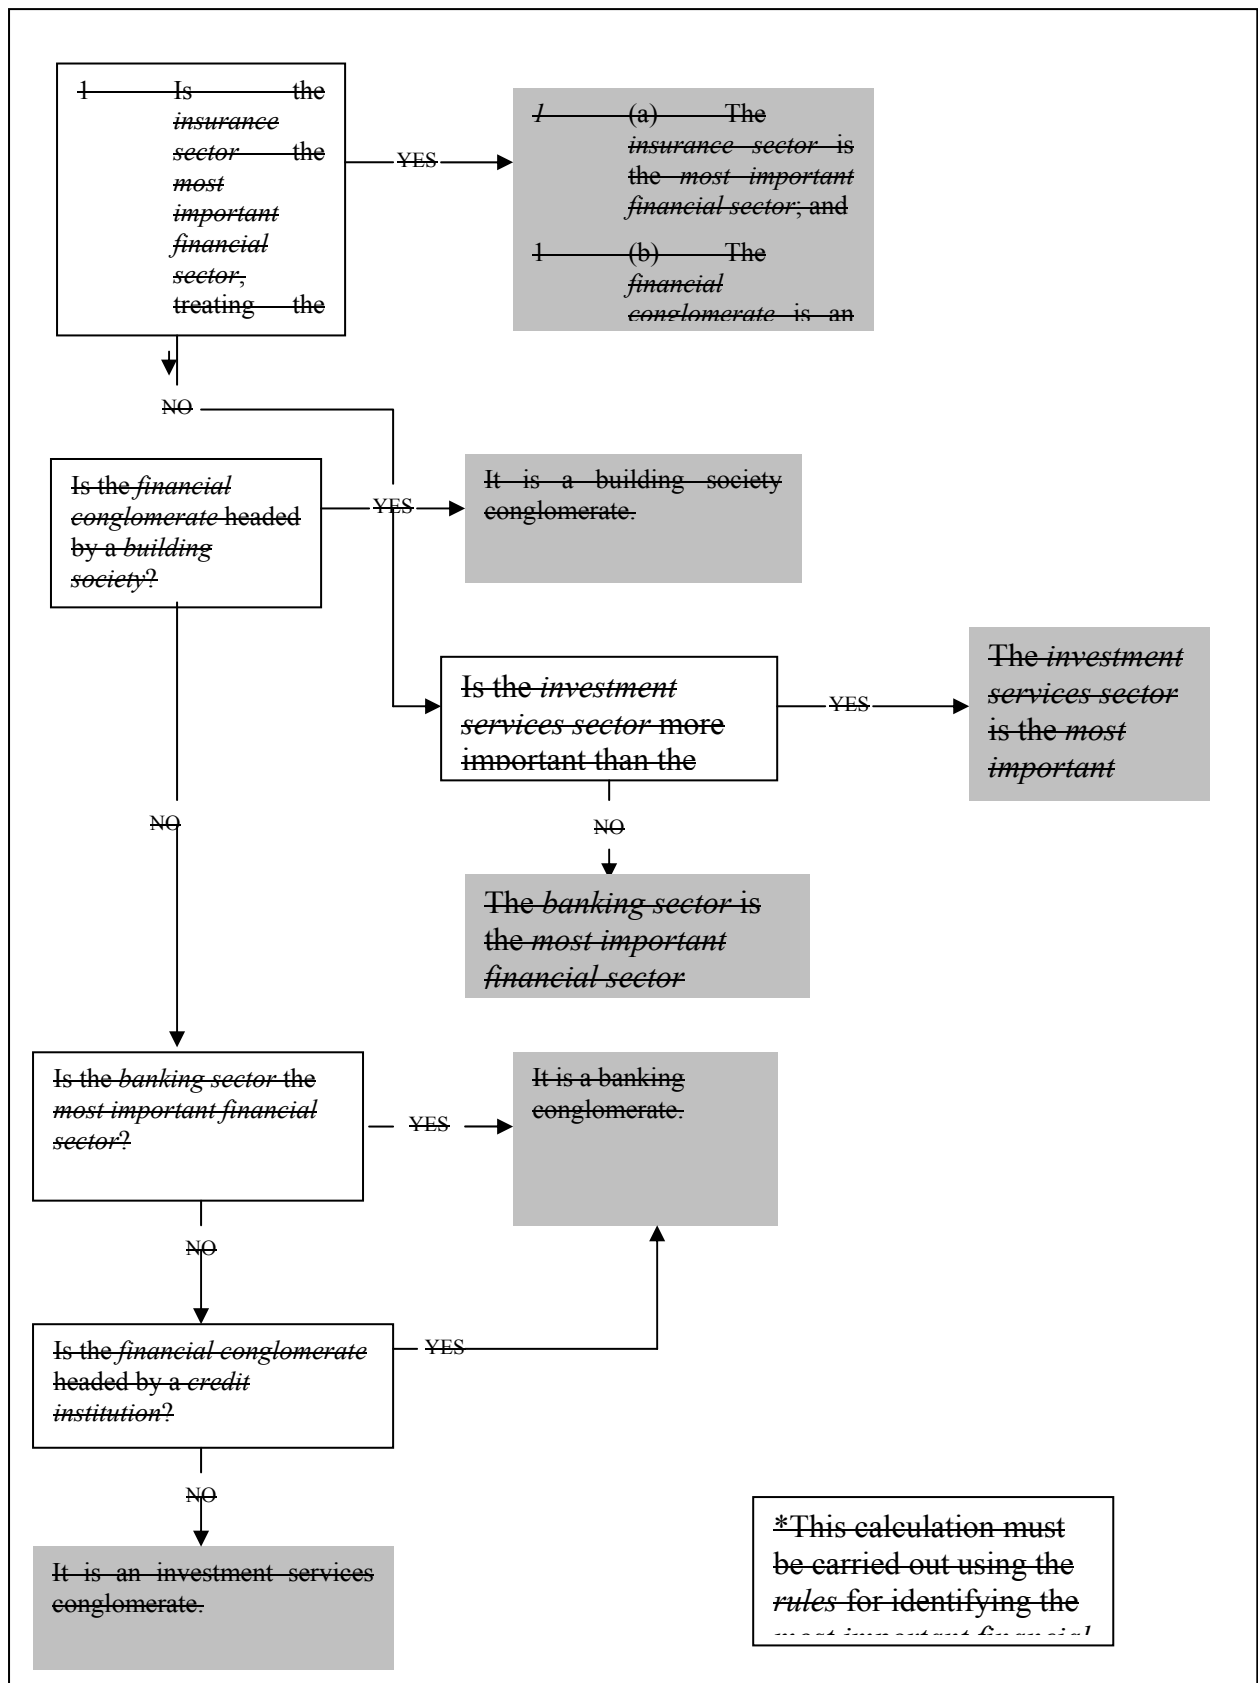

- 5 Table: Paragraph 4.2: Application of sectoral consolidation rules

Type of financial conglomerate	Applicable sectoral consolidation rules
<i>Banking and investment services conglomerate</i>	BIPRU 8 and BIPRU TP, subject to paragraph 4.5 IPRU(BANK) Chapter GN rule 3.3.13 (as it applies on a consolidated basis), subject to paragraph 4.7.
<i>Insurance conglomerate</i>	INSPRU 6.1 PRU 8.3 amended in accordance with Part 5.
<i>Building society conglomerate</i>	IPRU(BSOC) (Volume 1) Chapter 1, rule 1.2.1 (as it applies on a consolidated basis).
<i>Investment services conglomerate</i>	Chapter 14 of IPRU(INV).

Types of financial conglomerate	4.3	<p>(1) <u>This paragraph sets out how to determine the category of <i>financial conglomerate</i> for the purposes of paragraphs 4.1 and 4.2.</u></p> <p>(2) <u>If there is an <i>EEA regulated entity</i> at the head of the <i>financial conglomerate</i>, then:</u></p> <p>(a) <u>if that entity is in the <i>banking sector</i> or the <i>investment services sector</i>, the <i>financial conglomerate</i> is a <i>banking and investment services conglomerate</i>; or</u></p> <p>(b) <u>if that entity is in the <i>insurance sector</i>, the <i>financial conglomerate</i> is an <i>insurance conglomerate</i>.</u></p> <p>(3) <u>If (2) does not apply and the <i>most important financial sector</i> is the <i>banking and investment services sector</i>, it is a <i>banking and investment services conglomerate</i>.</u></p> <p>(4) <u>If (2) and (3) does not apply, it is an <i>insurance conglomerate</i>.</u></p>
How to apply chapter 14 of IPRU(INV)	4.3	<p>Where chapter 14 of <i>IPRU(INV)</i> applies:</p> <p>(1) the <i>main investment services undertaking</i> is treated as being the main firm for the purpose of rule 14.4.2 of chapter 14 of <i>IPRU(INV)</i>;</p> <p>(2) if the <i>main investment services undertaking</i> is not subject to any of the <i>FSA's sectoral rules</i> applied by chapter 14 of <i>IPRU(INV)</i>, then the <i>FSA's sectoral rules</i> that are applied are those that would do so if:</p> <p>(a) it were a <i>UK domestic firm</i>; and</p> <p>(b) it had a <i>permission</i> that includes all the <i>regulated activities</i> that it would need to have in its <i>Part IV permission</i> if it carried on all its activities in the <i>United Kingdom</i>.</p>
The different types of financial conglomerate	4.4	<p>(1) The decision tree in paragraph 4.5:</p> <p>(a) decides into which of the categories listed in the table in paragraph 4.2 a <i>financial conglomerate</i> falls; and</p> <p>(b) modifies the definition of the <i>most important financial sector</i> for the purposes of <i>PRU 8 Ann 1R</i> and for the purposes of any other provision in <i>PRU 8 (Group risk)</i> that applies that decision tree.</p>

(2) Paragraph 6.1(2) (*financial institution allocated to the banking sector*) and paragraph 6.1(3) (*allocation of asset management companies*) apply for the purpose of 4.4 and the table in paragraph 4.5.

7 Table: Paragraph 4.5: Types of financial conglomerate and definition of most important financial sector

8 Table

A mixed financial holding company	4.46	<p>A <i>mixed financial holding company</i> must be treated in the same way as:</p> <ol style="list-style-type: none"> (1) a <i>financial holding company</i> (if the rules in <u>BIPRU 8 IPRU(BANK)</u> or <u>IPRU(INV)</u> are applied; or (2) an <i>insurance holding company</i> (if the rules in <u>INSPRU 6.1 PRU 8.3</u> are applied).
E-money	4.57	<p>If there are no <i>full credit institutions</i> or <i>investment firms</i> in a <i>banking and investment services conglomerate</i> but there are one or more <i>e-money issuers</i>, the <i>sectoral rules</i> in <u>BIPRU 8 IPRU(BANK)</u> are amended as follows :</p> <ol style="list-style-type: none"> (1) the rules in <i>ELM</i> that apply on a solo basis must be used to establish the capital requirement for the <i>e- money issuers</i>; and (2) for the purpose of (1), those rules in <i>ELM</i> shall be amended by calculating the amount of the deductions in respect of <i>ownership shares</i> and capital falling into <i>ELM 2.4.17R(6)</i> in accordance with paragraph 3.3(2).

9 Table: PART 5: Principles applicable to all methods

Transferability of capital	5.1	<p>Capital may not be included in:</p> <ol style="list-style-type: none"> (1) a <i>firm's conglomerate capital resources</i> under <u>GENPRU 3.1.298-4.29R</u>; or (2) in the capital resources of the <i>financial conglomerate</i> for the purposes of <u>GENPRU 3.1.268-4.26R</u>; <p>if the effectiveness of the transferability and availability of the capital across the different members of the <i>financial conglomerate</i> is insufficient, given the objectives (as referred to in the third unnumbered sub-paragraph of paragraph 2(ii) of Annex I of the <i>Financial Groups Directive</i> (Technical principles)) of the capital adequacy rules for <i>financial conglomerates</i>.</p>
Double counting	5.2	<p>Capital must not be included in:</p>

<p>Cross sectoral capital</p>	<p>(1) a <i>firm's conglomerate capital resources</i> under <u>GENPRU 3.1.298.4.29R</u>; or</p> <p>(2) the capital resources of the <i>financial conglomerate</i> for the purposes of <u>GENPRU 3.1.268.4.26R</u>;</p> <p>if:</p> <p>(3) it would involve double counting or multiple use of the same capital; or</p> <p>(4) it results from any inappropriate intra-group creation of capital.</p> <p>5.3 In accordance with the second sub-paragraph of paragraph 2(ii) of Section I of Annex I of the <i>Financial Groups Directive</i> (Other technical principles and insofar as not already required in Parts 1-3):</p> <p>(1) the solvency requirements for each different <i>financial sector</i> represented in a <i>financial conglomerate</i> required by <u>GENPRU 3.1.268.4.26R</u> or, as the case may be, <u>GENPRU 3.1.298.4.29R</u> must be covered by own funds elements in accordance with the corresponding <i>applicable sectoral rules</i>; and</p> <p>(2) if there is a deficit of own funds at the <i>financial conglomerate</i> level, only cross sectoral capital (as referred to in that sub-paragraph) shall qualify for verification of compliance with the additional solvency requirement required by <u>GENPRU 3.1.268.4.26R</u> or, as the case may be, <u>GENPRU 3.1.298.4.29R</u>.</p>
<p>Application of sectoral rules; <u>General</u></p>	<p>5.4 The following adjustments apply to the <i>applicable sectoral rules</i> as they are applied by the <i>rules</i> in this annex.</p> <p>(1) The scope of those <i>rules</i> will be extended to cover any <i>mixed financial holding company</i> and each other member of the <i>overall financial sector</i>.</p> <p>(2) If any of those <i>rules</i> would otherwise not apply to a situation in which they are applied by <u>GENPRU 38 Ann 1R</u>, those <i>rules</i> nevertheless still apply (and in particular, any of those <i>rules</i> that would otherwise have the effect of disapplying consolidated supervision (or, in the case of the <i>insurance sector</i>, supplementary supervision) do not apply).</p> <p>(3) (If it would not otherwise have been included) an <i>ancillary investment services undertaking</i> is included in the <i>investment services sector</i>.</p>

Application
of sectoral
rules:
Insurance
sector

5.5

- (3) (If it would not otherwise have been included) an *ancillary insurance services undertaking* is included in the *insurance sector*.
- 4) ~~(In relation to the *insurance sector*) to the extent that:~~
- (a) ~~those *rules* merely require a report on whether or not a specified level of solvency is met (a soft limit); or~~
- (b) ~~the requirements in those *rules* concern having certain net assets of an amount at or above certain levels;~~
- ~~those requirements are restated so as to include an obligation at all times actually to have capital at or above that level (a hard limit), thereby turning a soft limit drafted by reference to assets and liabilities into a hard limit requiring capital to be held at or above specified levels. If those *rules* apply both a hard and a soft limit, and the level of the soft limit is higher, that soft limit is applied under this annex, but translated into a hard limit in accordance with the earlier provisions of (5).~~
- (46) The scope of ~~the~~ those *rules* is amended so as to remove restrictions relating to where members of the *financial conglomerate* are incorporated or have their head office, so that the scope covers every member of the *financial conglomerate* that would have been included in the scope of those *rules* if those members had their head offices in an *EEA State*.
- (57) (For the purposes of Parts 1 to 3) those *rules* must be adjusted, if necessary, when calculating the capital resources, capital resources requirements or solvency requirements for a particular *financial sector* to exclude those for a member of another *financial sector*.
- (6) Any waiver granted to a member of the *financial conglomerate* under those *rules* does not apply for the purposes of this annex.
- (1) This *rule* applies an adjustment to the *applicable sectoral rules for the insurance sector* as they are applied by the *rules* in this annex.
- (2) To the extent that:
- (a) those *rules* merely require a report on whether or not a specified level of solvency is met (a soft limit); or
- (b) the requirements in those *rules* concern having certain

		<p style="text-align: center;"><u>net assets of an amount at or above certain levels;</u></p> <p><u>those requirements are restated so as to include an obligation at all times actually to have capital at or above that level (a hard limit), thereby turning a soft limit into a hard limit and turning a limit drafted by reference to assets and liabilities into a requirement that the level of capital be maintained at or above a specified level. If those rules apply both a hard and a soft limit, and the level of the soft limit is higher, that soft limit is applied under this annex, but translated into a hard limit in accordance with the earlier provisions of this rule.</u></p>
<p><u>Application of sectoral rules:</u> <u>Banking sector and investment services sector</u></p>	<p>5.6</p>	<p><u>The following adjustments apply to the applicable sectoral rules for the banking sector and the investment services sector as they are applied by the rules in this annex.</u></p> <ol style="list-style-type: none"> (1) <u>References in those rules to non-EEA sub-groups do not apply.</u> (2) <u>(For the purposes of Parts 1 to 3), where those rules require a group to be treated as if it were a single undertaking, those rules apply to the banking sector and investment services sector taken together.</u> (3) <u>Any investment firm consolidation waivers granted to members of the financial conglomerate do not apply.</u> (4) <u>(For the purposes of Parts 1 to 4), without prejudice to the application of requirements in BIPRU 8 preventing the use of an advanced prudential calculation approach on a consolidated basis, any advanced prudential calculation approach permission that applies for the purpose of BIPRU 8 does not apply.</u> (5) <u>(For the purposes of Parts 1 to 4), BIPRU 8.5.9R and BIPRU 8.5.10R do not apply.</u> (6) <u>(For the purposes of Parts 1 to 4), where the financial conglomerate does not include a credit institution, the method in GENPRU 2 Annex 4R must be used for calculating the capital resources and BIPRU 8.6.8R does not apply.</u>
<p>No capital ties</p>	<p>5.7 5</p>	<p>(1) This rule deals with a financial conglomerate in which some of the members are not linked by capital ties at the time of the notification referred to in <u>GENPRU 3.1.288-4.28R(1)</u> (Capital adequacy requirements: Compulsory application of Method 4</p>

from Annex I of the Financial Groups Directive).

(2) If:

- (a) GENPRU 3.1.268.4.26R (Capital adequacy requirements: Application of Method 4 from Annex I of the Financial Groups Directive) would otherwise apply with respect to a *financial conglomerate* under GENPRU 3.1.288.4.28R; and
- (b) all members of that *financial conglomerate* are linked directly or indirectly with each other by capital ties except for members that collectively are of negligible interest with respect to the objectives of supplementary supervision of *regulated entities* in a *financial conglomerate* (the "peripheral members");

GENPRU 3.1.288.4.28R continues to apply. Otherwise GENPRU 3.1.288.4.28R does not apply with respect to a *financial conglomerate* falling into (1).

(3) If GENPRU 3.1.288.4.28R applies with respect to a *financial conglomerate* in accordance with (2) the peripheral members must be excluded from the calculations under GENPRU 3.1.268.4.26R.

(4) If:

- (a) GENPRU 3.1.268.4.26R applies with respect to a *financial conglomerate* falling into (1) under GENPRU 3.1.278.4.27R(2) (Use of *Part IV permission* to apply Annex I of the *Financial Groups Directive*); or
- (b) GENPRU 3.1.298.4.49R (Capital adequacy requirements: Application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive) applies with respect to a *financial conglomerate* falling into (1);

then:

- (c) the treatment of the links in (1) (including the treatment of any *solvency deficit*) is as provided for in the *requirement* referred to in GENPRU 3.1.308.4.30R; and
- (d) GENPRU 3.1.268.4.26R or GENPRU 3.1.298.4.29R, as the case may be, apply even if the *applicable sectoral rules* do not deal with how *undertakings* not linked by capital ties are to be dealt with for the purposes of consolidated supervision (or, in the case of the *insurance sector*, supplementary supervision).

- (5) Once GENPRU 3.1.268.4.26R applies to a *firm* with respect to a *financial conglomerate* of which it is a member under GENPRU 3.1.278.4.27R(1) (automatic application of Method 4 from Annex I of the *Financial Groups Directive* on satisfaction of the condition in GENPRU 3.1.288.4.28R), the disapplication of GENPRU 3.1.288.4.28R under (2) ceases to apply with respect to that *financial conglomerate*.

<p>Defining the financial sectors</p>	<p>6.1</p>	<p>For the purposes of Parts 1 to 3 of this annex (but, unless specified otherwise in paragraph 4.4, not for the purposes of the definition of <i>most important financial sector</i>):</p> <p>(1) the banking sector and the investment services sector are considered separately;</p> <p>(2) if a financial institution could otherwise fall into both the banking sector and the investment services sector, it must be allocated to the banking sector;</p> <p>(13) an asset management company is allocated in accordance with GENPRU 3.1.398.4.39R; and</p> <p>(24) a mixed financial holding company must be treated as being a member of the most important financial sector.</p>
<p><u>Solo capital resources requirement: Banking sector and investment service sector</u></p>	<p>6.2</p>	<p>(1) <u>The solo capital resources requirement of an undertaking in the banking sector or the investment services sector must be calculated in accordance with this rule, subject to paragraphs 6.5 and 6.6.</u></p> <p>(2) <u>The solo capital resources requirement of a building society is its CRR.</u></p> <p>(3) <u>The solo capital resources requirement of an e-money issuer is:</u></p> <p>(a) <u>(in the case of ELMI) the capital resources requirement that applies to it under ELM; or</u></p> <p>(b) <u>(in any other case) the capital resources requirement that would apply to it under ELM if it were an ELMI incorporated in the United Kingdom.</u></p> <p>(4) <u>If there is a credit institution in the financial conglomerate, the solo capital resources requirement for any undertaking in the banking sector or the investment services sector is, subject to (2) and (3), calculated in accordance with the rules for calculating the CRR of a bank that is a BIPRU firm.</u></p> <p>(5) <u>If:</u></p>

- (a) the financial conglomerate does not include a credit institution;
- (b) there is at least one CAD investment firm in the financial conglomerate; and
- (c) all the CAD investment firms in the financial conglomerate are limited licence firms or limited activity firms;

the solo capital resources requirement for any undertaking in the banking sector or the investment services sector is calculated in accordance with the rules for calculating the CRR of:

- (d) (if there is a limited activity firm in the financial conglomerate), a BIPRU limited activity firm; or
- (e) (in any other case), a BIPRU limited licence firm.

(6) If:

- (a) the financial conglomerate does not include a credit institution; and
- (b) (5) does not apply;

the solo capital resources requirement for any undertaking in the banking sector or the investment services sector is calculated in accordance with the rules for calculating the CRR of a full scope BIPRU investment firm.

(7) Any CRR calculated under a BIPRU TP may be used for the purposes of the solo capital resources requirement in this rule in the same way that the CRR can be used under BIPRU 8.

Solo capital resources requirement: application of rules

6.3 Any exemption that would otherwise apply under any rules applied by paragraph 6.2 do not apply for the purposes of this Annex.

Solo capital resources requirement: Insurance sector

6.4 (1) The solo capital resources requirement of an undertaking in the insurance sector must be calculated in accordance with this rule.

(2) Subject to (3), the solo capital resources requirement of an undertaking in the insurance sector is the capital resources

<p><u>Solo capital resources requirement: EEA firms in the banking sector or investment services sector</u></p>		<p>requirement identified in <i>INSPRU</i> 6.1.34R (1) to (8) as applying to that <i>undertaking</i>.</p> <p>(3) <u><i>INSPRU</i> 6.1.34R (1)(b) does not apply for the purposes of this annex.</u></p>
	<p>6.5</p>	<p><u>The solo capital resources requirement for an EEA regulated entity (other than a BIPRU firm, an insurer or an EEA insurer) that is subject to the solo capital adequacy sectoral rules for its financial sector of the competent authority that authorised it is equal to the amount of capital it is obliged to hold under those sectoral rules provided that the following conditions are satisfied:</u></p> <p>(1) <u>(for the purposes of the banking sector and the investment services sector) those sectoral rules must correspond to the FSA's sectoral rules identified in paragraph 6.2 as applying to that financial sector;</u></p> <p>(2) <u>the entity must be subject to those sectoral rules in (1); and</u></p> <p>(3) <u>paragraph 6.3 applies to the entity and those sectoral rules.</u></p>
<p><u>Solo capital resources requirement: non-EEA firms subject to equivalent regimes in the banking sector or investment services sector</u></p>	<p>6.6</p>	<p><u>The solo capital resources requirement for a recognised third country credit institution or a recognised third country investment firm is the amount of capital resources that it is obliged to hold under the sectoral rules for its financial sector that apply to it in the state or territory in which it has its head office provided that:</u></p> <p>(1) <u>there is no reason for the firm applying the rules in this annex to believe that the use of those sectoral rules would produce a lower figure than would be produced under paragraph 6.2; and</u></p> <p>(2) <u>paragraph 6.3 applies to the entity and those sectoral rules.</u></p>
<p>Solo capital resources requirement: mixed financial holding</p>	<p>6.7 4</p>	<p>The solo capital resources requirement of a mixed financial holding company is a notional capital requirement. It is the capital adequacy requirement that applies to regulated entities in the most important financial sector under the table in paragraph 6.108.</p>

company		
Solo-capital resources requirement: UK-domestic firms	6.2	The solo-capital resources requirement for a <i>regulated entity</i> that is a <i>UK domestic firm</i> is its solo-regulatory capital requirement under the <i>FSA's sectoral rules</i> for its <i>financial sector</i> applicable to it.
Solo-capital resources requirement: EEA firms	6.3	The solo-capital resources requirement for an <i>EEA regulated entity</i> that is subject to the solo-capital adequacy <i>sectoral rules</i> for its <i>financial sector</i> of the competent authority that authorised it is equal to the amount of capital resources it is obliged to hold under those <i>sectoral rules</i> .
Solo-capital resources requirement: non-EEA firms subject to equivalent regimes	6.5	<p>The solo-capital resources requirement for a <i>regulated entity</i> that:</p> <ul style="list-style-type: none"> (1) does not fall into paragraphs 6.2 to 6.4; (2) is subject to any of the <i>sectoral rules</i> referred to in paragraph 6.6 applicable to its <i>financial sector</i>; and (3) is incorporated in and has its head-office in: <ul style="list-style-type: none"> (a) (where the <i>sectoral rules</i> in (2) are for the <i>banking sector</i> or the <i>investment services sector</i>) the same state or territory as the regulator for those <i>sectoral rules</i>, as referred to in paragraph 6.6(1) or 6.6(2)); or (b) (where the <i>sectoral rules</i> in (2) are for the <i>insurance sector</i>) the designated state or territory in question, as referred to in 6.6(3); <p>is equal to the amount of capital resources it is obliged to hold under those <i>sectoral rules</i>. However, where 3(b) would otherwise apply, paragraph 6.7 may be applied instead.</p>
	6.6	<p>The sectoral rules referred to in paragraph 6.5 are:</p> <ul style="list-style-type: none"> (1) (for the <i>banking sector</i>) the sectoral rules of or administered by one of the regulators listed in Appendix D of chapter CS of <i>IPRU(BANK)</i>; (2) (for the <i>investment services sector</i>) the sectoral rules of or administered by one of the regulators listed in Appendix 59 of chapter 10 of <i>IPRU(INV)</i>; and (3) (for the <i>insurance sector</i>) the sectoral rules of the states or territories referred to in the definition of designated states or territories in chapter 11 of <i>IPRU(INS)</i> (Definitions), but

<p>Solo capital resources: other members</p>	<p style="text-align: center;">excluding EEA States.</p> <p>6.7 The solo capital resources requirement for:</p> <p>(1) any of the following:</p> <ul style="list-style-type: none"> (a) a UK domestic firm; (b) an EEA regulated entity; or (c) a regulated entity that is incorporated in and has its head office in one of the states or territories referred to in paragraphs 6.5; <p>that is not subject to the solo capital adequacy sectoral rules referred to in paragraph 6.2, 6.3, or 6.6 (including in a case in which this paragraph applies under (i) of the definition of sectoral rules); and</p> <p>(2) any member of a financial conglomerate in the overall financial sector otherwise not treated under paragraphs 6.2 to 6.6;</p> <p>is a notional capital requirement. It is the capital resources requirement that would apply to it under the following rules:</p> <ul style="list-style-type: none"> (3) (in the case of an asset management company) the rules in Chapter 7 of IPRU(INV); and (4) (in any other case), the rules applicable to its financial sector under the table in paragraph 6.8.

11 Table: Paragraph 6.8: The FSA's sectoral rules for the solo capital resources requirement

Financial sector	FSA's sectoral rules
<i>Banking sector</i>	The <i>FSA's sectoral rules for banks</i> , except that <i>e-money issuers</i> are subject to <i>ELM</i> .
<i>Insurance sector</i>	The <i>FSA's sectoral rules for insurance undertakings</i> .
<i>Investment services sector</i>	(1) The <i>rules in IPRU(INV)</i> that would apply on the assumptions in paragraph 4.3(2). (2) (If (1) does not result in the application of any <i>rules in IPRU(INV)</i>) the <i>rules in IPRU(INV)</i> that would be applied to it under <i>rule 14.5.2 of Chapter 14 of IPRU(INV)</i> (<i>Group financial resources requirement</i>).

12 Table

Solo capital resources requirement: the insurance sector	6.8 ⁹	References to capital requirements in the provisions of <i>GENPRU 38 Ann 1R</i> defining <i>solo capital resources requirement</i> must be interpreted in accordance with paragraph 5.4 (5) .
Applicable sectoral consolidation rules	6.9 ¹⁰	The <i>applicable sectoral consolidation rules</i> for a <i>financial sector</i> are the <i>FSA's sectoral rules</i> about capital adequacy and solvency on a consolidated basis that are applied in the table in paragraph 6.10 4 .

13 Table: Paragraph 6.104: Application of sectoral consolidation rules

Financial sector	Type of financial conglomerate	FSA's sectoral rules
<i>Banking sector</i>	<i>Building society conglomerate</i>	The rules for building societies.
	Any other type	The rules for banks - <u>BIPRU 8 and BIPRU TP</u> , as adjusted under paragraph 4.5
<i>Insurance sector</i>	N/A	The rules for insurance undertakings -INSRU 6.1.
<i>Investment services sector</i>	N/A	The rules for investment firms <u>BIPRU 8 and BIPRU TP</u>
Note 1: Paragraph 4.6 applies for the purposes of those <i>rules</i> .		

14 Table:

Applicable sectoral consolidation rules (contd.) <u>Part 5</u>	6.12 <u>1</u>	<p>The <i>rules</i> referred to in the third column of the table in paragraph 6.11 are as follows: <u>This Part 6 is subject to Part 5 of this Annex.</u></p> <p>(1) the rules for building societies are the ones for <i>building society conglomerates</i> listed in the table in paragraph 4.2;</p> <p>(2) the rules for banks are the ones for <i>banking conglomerates</i> listed in the table in paragraph 4.2 as adjusted under paragraph 4.7;</p> <p>(3) the rules for insurance undertakings are whichever of the ones for <i>insurance conglomerates</i> that are applied by the table in paragraph 4.2; and</p> <p>(4) the rules for investment firms are the ones for <i>investment services conglomerates</i> listed in the table in paragraph 4.2 as applied under paragraph 4.3 (How to apply chapter 14 of IPRU(INV)).</p>
-------------------------------------------------------------------	------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

GENPRU 38 Ann 2R

Prudential rules for third country groups (GENPRU 3.2.88.5.8R to GENPRU 3.2.98.5.9R)

1 Table: PART 1: Third-country financial conglomerates

1.1	This Part of this annex sets out the <i>rules</i> with which a <i>firm</i> must comply under <u>GENPRU 3.2.88.5.8R</u> with respect to a <i>financial conglomerate</i> of which it is a member.
1.2	A <i>firm</i> must comply, with respect to the <i>financial conglomerate</i> referred to in paragraph 1.1, with whichever of <u>GENPRU 3.1.268.4.26R</u> and <u>GENPRU 3.1.298.4.29R</u> is applied under paragraph 1.3.
1.3	For the purposes of paragraph 1.2: <ol style="list-style-type: none">(1) the <i>rule</i> in <u>GENPRU 3.18.4</u> that applies as referred to in paragraph 1.2 is the one that is specified by the <i>requirement</i> referred to in <u>GENPRU 3.2.88.5.8R</u>;(2) (where <u>GENPRU 3.1.298.4.29R</u> is applied) the definitions of <i>conglomerate capital resources</i> and <i>conglomerate capital resources requirement</i> that apply for the purposes of that <i>rule</i> are the ones from whichever of Part 1, Part 2 or Part 3 of <u>GENPRU 38 Ann 1R</u> is specified in that <i>requirement</i>; and(3) the <i>rules</i> so applied (including those in <u>GENPRU 38 Ann 1R</u>) are adjusted in accordance with paragraph 3.1.
1.4	If the condition in Articles 7(4) and 8(4) of the <i>Financial Groups Directive</i> is satisfied (the <i>financial conglomerate</i> is headed by a <i>mixed financial holding company</i>) with respect to the <i>financial conglomerate</i> referred to in paragraph 1.1 the <i>firm</i> must also comply with <u>GENPRU 3.1.358.4.35R</u> (as adjusted in accordance with paragraph 3.1) with respect to that <i>financial conglomerate</i> .
1.5	A <i>firm</i> must comply with the following with respect to the <i>financial conglomerate</i> referred to in paragraph 1.1: <ol style="list-style-type: none">(1) <u>SYSC 12 PRU 8.1</u> (as it applies to <i>financial conglomerates</i> and as adjusted under paragraph 3.1); and(2) <u>GENPRU 3.1.258.4.25R</u>.

2 Table: PART 2: Third-country banking and investment groups

2.1	This Part of this annex sets out the <i>rules</i> with which a <i>firm</i> must comply under <u>GENPRU 3.2.98.5.9R</u> with respect to a <i>third-country banking and investment group</i> of which it is a member.
2.2	A <i>firm</i> must comply with one of the sets of <i>rules</i> specified in paragraph 2.3 as adjusted under paragraph 3.1 with respect to the <i>third-country banking and investment group</i> referred to in paragraph 2.1.
2.3	The <i>rules</i> referred to in paragraph 2.2 are as follows: <ul style="list-style-type: none"> (1) the <i>applicable sectoral consolidation rules</i> in <u>BIPRU 8IPRU(BANK)</u>; or (2) the applicable sectoral consolidation rules for the investment services sector; or (23) the <i>rules</i> in <u>ELM 7</u>.
2.4	The set of <i>rules</i> from paragraph 2.3 that apply with respect to a particular <i>third-country banking and investment group</i> (as referred to in paragraph 2.1) are those that would apply if they were adjusted in accordance with paragraph 3.1.
2.5	The <i>sectoral rules</i> applied by Part 2 of this annex cover all prudential <i>rules</i> applying on a consolidated basis including those relating to large exposures.
2.6	A <i>firm</i> must comply with <u>SYSC 12PRU 8.1</u> (as it applies to <i>banking and investment groups</i> and as adjusted under paragraph 3.1) with respect to the <i>third-country banking and investment group</i> referred to in paragraph 2.1.

3 Table: PART 3: Adjustment of scope

3.1	The adjustments that must be carried out under this paragraph are that the scope of the <i>rules</i> referred in Part 1 or Part 2 of this annex, as the case may be, are amended: <ul style="list-style-type: none"> (1) so as to remove any provisions disapplying those <i>rules</i> for <i>third-country groups</i>; (2) so as to remove all limitations relating to where a member of the <i>third-country group</i> is incorporated or has its head office; and (3) so that the scope covers every member of the <i>third-country group</i> that would have been included in the scope of those <i>rules</i> if those members had their head offices in, and were incorporated in, an <i>EEA State</i>.

GENPRU 38 Ann 3G: CLASSIFICATION OF GROUPS (GENPRU 3.1.38.4.3G)

(form ref)

Part 1 : General Information

A	Name of Group:	
----------	----------------	--

B	Name of FSA supervisor:	
----------	-------------------------	--

C	Name of entity at head of the group:	
----------	--------------------------------------	--

D	Type of entity at head of the group:	D1	EU regulated entity country of authorisation	
----------	--------------------------------------	-----------	----------------------------------------------	--

(select one of D1, D2, D3 and D4)

(a)	Credit institution	<input type="checkbox"/>
(b)	Investment firm	<input type="checkbox"/>
(c)	Insurance firm	<input type="checkbox"/>

(tick one)

D2	EU non-regulated entity country of location	
-----------	---------------------------------------------	--

D3	Non-EU regulated entity country of authorisation	
-----------	--------------------------------------------------	--

D4	Non- EU non-regulated entity country of location	
-----------	--------------------------------------------------	--

E	Year-end for group consolidation purposes	
----------	-------------------------------------------	--

Part 2 : Threshold Information

F1	Is at least one of the entities in the group within the insurance sector and at least one in the banking/investment sector?	<input type="checkbox"/> Yes	<input type="checkbox"/> No (go to part 3)
F2	For D2 & D4 groups only: enter the ratio of the balance sheet total of the financial sectors in the group to the balance sheet total of the group as a whole. <i>Enter percentage in box*.</i>	<input type="text"/>	%
F3	What is the smallest financial sector?	<input type="checkbox"/>	Insurance
		<input type="checkbox"/>	Banking/Investment
F4	Ratio of balance sheet total of smallest financial sector to the balance sheet total of the financial sector entities in the group. <i>Enter percentage in box*.</i>	<input type="text"/>	%
F5	Ratio of the solvency requirement of the smallest financial sector to the solvency requirements of the total financial sector entities in the group. <i>Enter percentage in box*.</i>	<input type="text"/>	%
F6	What is the balance sheet total of the smallest financial sector in the group (identified in F3)*?	<input type="text"/>	(€'m)

*see guidance notes on a recommended method of calculation

Part 3: Conclusion on reason for becoming a financial conglomerate

G Select **ONE** of the following based on the answers in section 1 & 2.

If answer to F1 is NO or if none of the following are met then select type Z:

Z		Not a conglomerate.
----------	--	---------------------

If the group is category D1 or D3 and the average of F4 and F5 is greater than 10% then select type i.

i		Conglomerate headed by a regulated institution with significant cross sector activities. [article 3(2)]
----------	--	---------------------------------------------------------------------------------------------------------

If the group is category D1 or D3 and the average of F4 and F5 is less than 10% but F6 is greater than €6bn then select ii.

ii		Possible conglomerate headed by a regulated institution with presumed significant cross sector activities. [article 3(3)]
-----------	--	---------------------------------------------------------------------------------------------------------------------------

If the group is category D2 or D4 and the answer to F2 is greater than 40% AND the average of F4 and F5 is greater than 10% then select type iii.

iii		Conglomerate headed by non-regulated entity with significant cross sector activities. [article 3(1) & 3(2)]
------------	--	-------------------------------------------------------------------------------------------------------------

If the group is category D2 or D4 and the answer to F2 is greater than 40% AND the average of F4 and F5 is less than 10% but F6 is greater than €6bn then select type iv.

iv		Possible conglomerate headed by non-regulated entity with presumed significant cross sector activities. [article 3(1) & 3(3)]
-----------	--	-------------------------------------------------------------------------------------------------------------------------------

Part 4: Other relevant information

H1	<p>Who do you think are the relevant competent authorities for your group (i.e. supervisors in EEA States in which the group has significant regulated activity)?</p> <p>See article 2 (17)(a) for definition of relevant competent authorities.</p>	
H2	<p>Who do you think should be the likely coordinator for the group (i.e. EEA supervisor of the group's most important regulated activity in the EU)?</p> <p>See article 10(1) and 10(2).</p>	
H3	<p>Do you consider that balance sheet value and solvency requirements were an appropriate criterion to determine whether a group is financial and whether cross sector activities exist? If not, do you consider there are other parameters (as referred to in article 3(5)) that would be more appropriate?</p>	
H4	<p>Do you have any other relevant comments?</p> <p>(use continuation sheet if necessary)</p>	

GENPRU 38 Ann 3G: Guidance Notes for Classification of Groups

Purpose and scope

The form is designed to identify groups and sub-groups that are likely to be financial conglomerates under the Financial Groups Directive. A group may be a financial conglomerate if it contains both insurance and banking/investment businesses and meets certain threshold tests. The FSA needs to identify conglomerates with their head offices in the EEA and those with their head offices outside the EEA, although this does not necessarily mean that the latter will be subject to EEA conglomerate supervision.

This form's purpose is to enable the FSA to obtain sufficient information so as to be able to determine how likely a group/sub-group is to be a financial conglomerate. In certain cases this can only be determined after consultation with the other EU relevant competent authorities. A second purpose of the form is therefore to identify any groups and sub-groups that may need such consultation so that this can be made as soon as possible. This should allow firms time to prepare to comply.

The third purpose of the form is to gain information from firms on the most efficient way to implement the threshold calculations in detail (consistently with the directive). We have, therefore, asked for some additional information in part 4 of the form.

A copy of this form will can be found on the FSA's Financial Groups Website with current contact details.

Please include workings showing the method employed to determine the percentages in part 2 (for the threshold conditions) and giving details of all important assumptions / approximations made in doing the calculations.

The definition of financial conglomerate includes not only conventional groups made up of parent-subsidiary relationships but groups linked by control and "consolidation Article 12(1) relationships". If this is the case for your group, please submit along with this form a statement that this is the case. Please include in that statement an explanation of how you have included group members not linked by capital ties in the questionnaire calculations.

A consolidation Article 12(1) relationship arises between undertakings in the circumstances set out in Article 12(1) of the Seventh Company Law Directive. These are set out in the Handbook Glossary (in the definition of consolidation Article 12(1) relationship). Broadly speaking, undertakings come within this definition if they do not form a conventional group but:

- (a) are managed on a unified basis; or
- (b) have common management.

General guidance

We would like this to be completed based on the most senior parent in the group, and, if applicable, for the company heading the most senior conglomerate group in the EEA. If appropriate, please also attach a list of all other likely conglomerate sub-groups.

Please use the most recent accounts for the top level company in the group together with the corresponding accounts for all subsidiaries and participations that are included in the consolidated accounts. Please indicate the names of any significant subsidiaries with a different year-end from the group's year-end.

Please note the following:

- (a) Branches should be included as part of the parent entity.
- (b) Include in the calculations overseas entities owned by the relevant group or sub-group.
- (c) There are only two sectors for this purpose: banking/investment and insurance.
- (d) You will need to assign non-regulated financial entities to one of these sectors:
 - **banking/investment** activities are listed in – Annex 1 to the Banking Consolidation Directive IPRU Banks CS 10 Appendix A
 - **insurance** activities are listed in - IPRU Insurers Annex 11.1 and 11.2 p 163-168.
 - Any **operator of a UCITS scheme, insurance intermediary, mortgage broker and mixed financial holding company** does not fall into the directive definitions of either financial sector or insurance sector and should be treated for these purposes as being outside the financial sector. They should therefore be ignored for the purposes of these calculations.

Threshold tests

For the purpose of completing section 2 of the form relating to the threshold tests, the following guidance should be used. However, if you consider that for your group there is a more appropriate calculation then you may use this calculation so long as the method of computation is submitted with the form.

Calculating balance sheet totals

Generally, use total (gross) assets for the balance sheet total of a group/entity. However, investments in other entities that are part of the group will need to be deducted from the sector that has made the investment and the balance sheet total of the entity is added to the sector in which it operates.

Our expectation of how this may be achieved efficiently is as follows:

- (i) Off-balance-sheet items should be excluded.
- (ii) Where off-balance sheet treatment of **funds under management** and on-balance sheet treatment of **policy holders' funds** may distort the threshold calculation, groups should consult the FSA on the appropriateness of using other measures under article 3.5 of the Financial Groups Directive.
- (iii) If consolidated accounts exist for a sub-group consisting of financial entities from only one of the two sectors, these consolidated accounts should be used to measure the balance-sheet total of the sub-group (i.e. total assets less investments in entities in the other sector). If consolidated accounts do not exist, intra-group balances should be netted out when calculating the balance sheet total of a single sector (but cross-sector intra-group balances should not be netted out).
- (iv) Where consolidated accounts are used, minority interests should be excluded and goodwill should be included.
- (v) Where accounting standards differ between entities, groups should consult the FSA if they believe this is likely materially to affect the threshold calculation.
- (vi) Where there is a subsidiary or participation in the opposite sector from its parent (i.e. insurance sector for a banking/investment firm parent and vice versa), the balance sheet amount of the subsidiary or participation should be allocated to its sector using its individual accounts.
- (vii) The balance-sheet total of the parent entity/sub-group is measured as total assets of the parent/sub-group less the book value of its subsidiaries or participations in the other sector (i.e. the value of the subsidiary or participation in the parent's consolidated accounts is deducted from the parent's consolidated assets).
- (viii) The cross-sector subsidiaries or participations referred to above, valued according to their own accounts, are allocated pro-rata, according to the aggregated share owned by the parent/sub-group, to their own sector.
- (ix) If the cross-sector entities above themselves own group entities in the first sector (i.e. that of the top parent/sub-group) these should (in accordance with the methods above) be excluded from the second sector and added to the first sector using individual accounts.

Solvency (capital adequacy) requirements

Generally, the solvency requirements should be according to sectoral rules of the FSA that would apply to the type of entity ~~(that is EEA prudential sectoral legislation—see Glossary)~~. However, you can use EEA rules or local rules in the circumstances set out in Part 6 of GENPRU 3 Ann 1R. ~~for convenience, you may choose to use either EEA rules, FSA rules or local rules.~~ But if this choice makes a significant difference, either with respect to whether the group is a financial conglomerate or with respect to which sector is the biggest, you should consult with the FSA. Non-regulated financial entities should have proxy requirements calculated on the basis of the most appropriate sector. If sub-groups submit single sector consolidated returns then the solvency requirement may be taken from those returns.

Our expectation of how this may be achieved efficiently is as follows:

- (i) If you complete a solvency return for a sub-group consisting of financial entities from only one of the two sectors, the total solvency requirement for the sub-group should be used.
- (ii) Solvency requirements taken must include any deductions from available capital so as to allow the appropriate aggregation of requirements.
- (iii) Where there is a regulated subsidiary or participation in the opposite sector from its parent/sub-group, the solvency requirement of the subsidiary or participation should be from its individual regulatory return. If there is an identifiable contribution to the parent's solvency requirement in respect of the cross-sector subsidiary or participation, the parent's solvency requirement may be adjusted to exclude this.
- (iv) Where there is an unregulated financial undertaking in the opposite sector from its parent/sub-group, the solvency requirement of the subsidiary or participation should be one of the following:
 - (a) as if the entity were regulated by the FSA under the appropriate sectoral rules;
 - (b) using EU minimum requirements for the appropriate sector; or
 - (c) using non-EU local requirements* for the appropriate sector.

Please note on the form which of these options you have used, according to the country and sector, and whether this is the same treatment as in your latest overall group solvency calculation.

- (v) For banking/investment requirements, use the total amount of capital required.

(vi) For insurance requirements, use the total amount of capital required. ~~Required Minimum Margin:~~

~~(a) UK firms, Form 9: for general insurance business = capital resources requirement [line 29]; for long term insurance business = capital resources requirement (higher of Minimum Capital Requirement and Enhanced Capital Resources Requirement) [line 52].~~

~~(b) Overseas firms, either:~~

- ~~• the local requirement*;~~
- ~~• the EU minimum; or~~
- ~~• the FSA requirement.~~

~~* N.B. local requirements may only be used if they are at least equivalent to the EU minimum (designated states or territories). However, local requirements of a non-designated state or territory may be used if the resulting ratio in F5 is significantly below the 10% threshold (for this purpose "significantly below" may be taken to mean <5%).~~

Market share measures

These are not defined by the directive. The aim is to identify any standard industry approaches to measuring market share in individual EU countries by sector, or any data sources which are commonly used as a proxy.

Article I.

Article II. Threshold tests

Test F2

B/S of banking/investment + insurance sector = result %

B/S total

Test F3/F4/F5

B/S of insurance sector

B/S of banking/investment sector + insurance sector = A%

B/S of banking/investment sector

B/S of banking/investment sector + insurance sector = B%

Solvency requirement of insurance sector

Solvency requirement of banking/investment sector + insurance sector = C%

Solvency requirement of banking/investment sector

Solvency requirement of banking/investment sector + insurance sector = D%

The relevant percentage for the insurance sector is:

$$(A\% + C\%)/2 = I\%$$

The relevant percentage for the banking/investment sector is:

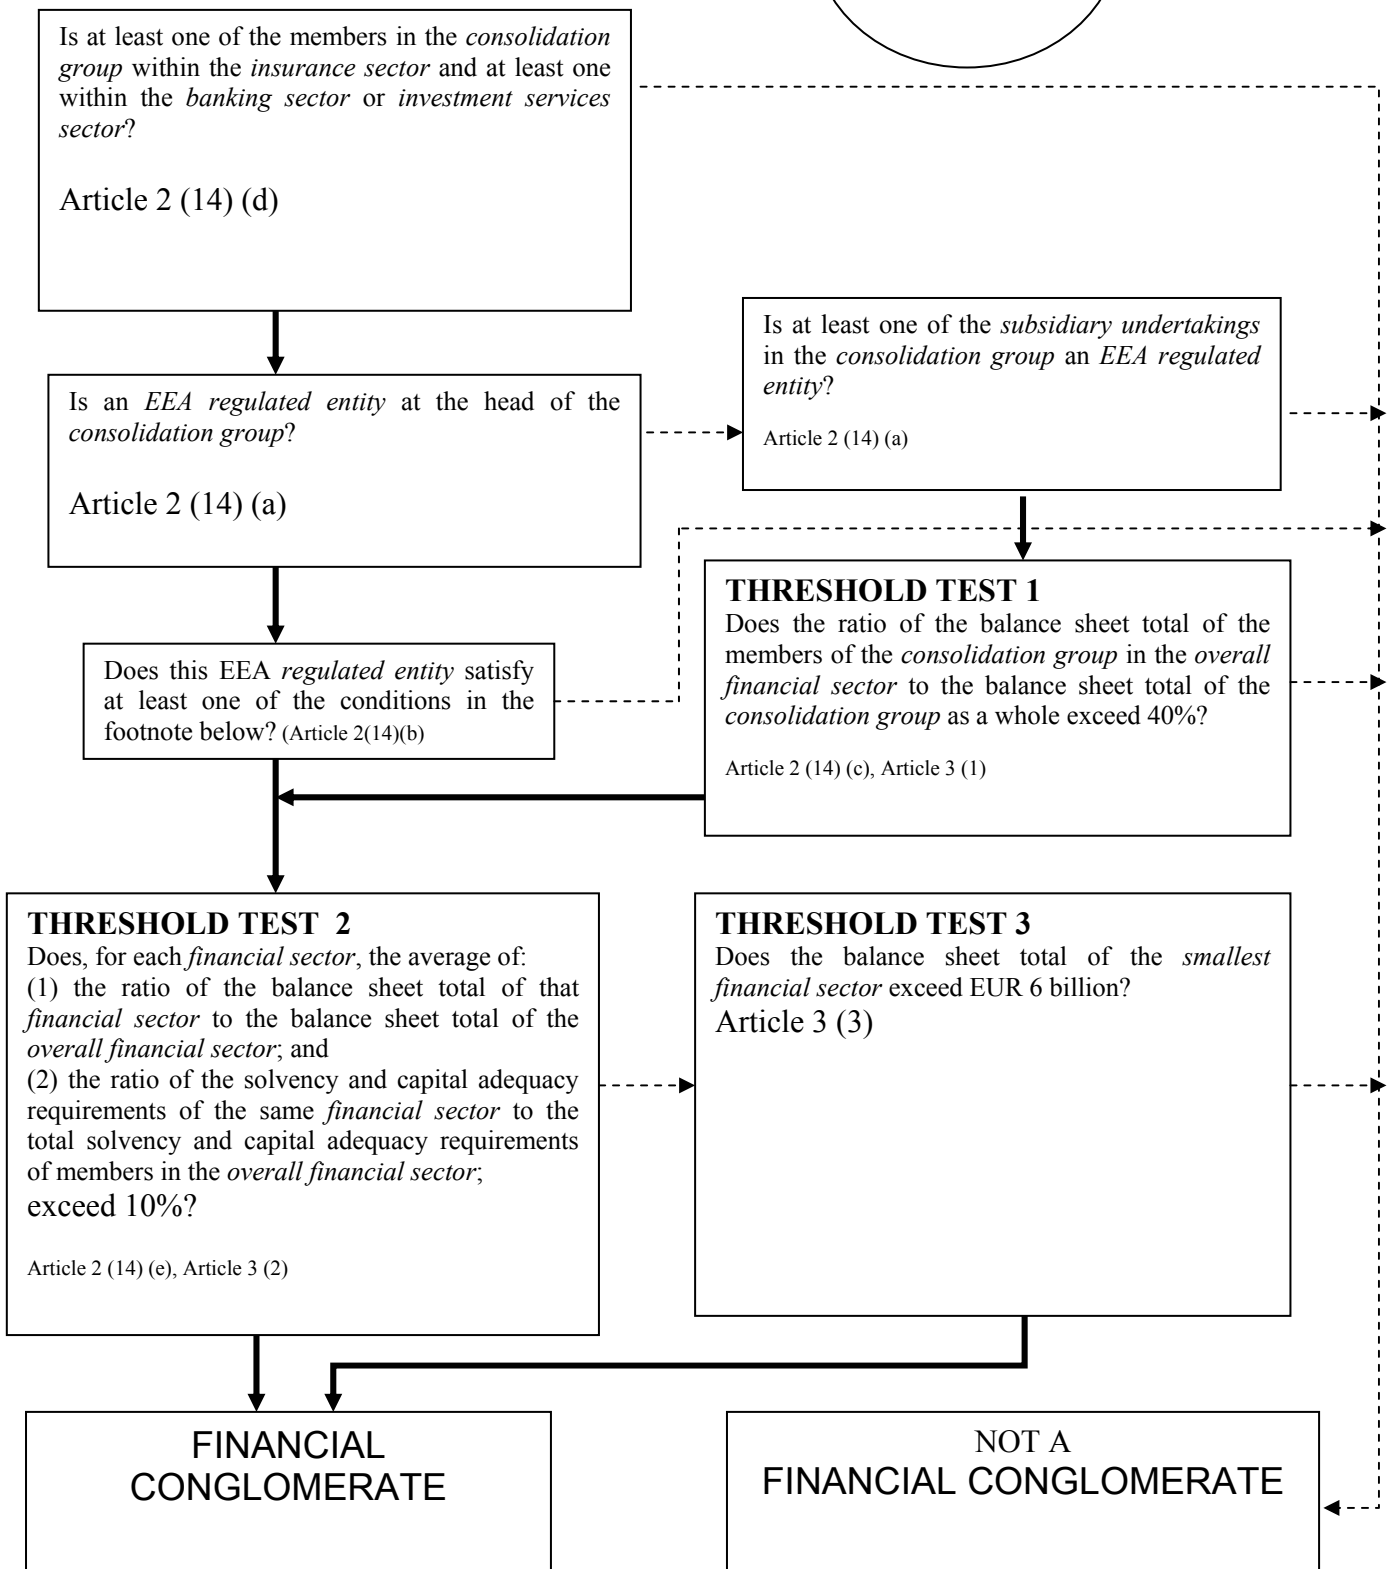

$$(B\% + D\%)/2 = BI\%$$

The smallest sector is the sector with the smallest relevant percentage.

Article III. If $I\% < BI\%$ then F3 is insurance, F4 = A%, and F5 = C%

Article IV. If $BI\% < I\%$ then F3 is banking/investment, F4 = B% and F5 = D%

GENPRU 38 Ann 4R (see GENPRU 3.18.4.5R)

Footnote: The conditions are that the *EEA regulated entity* at the head of the *consolidation group*:

(1) is a *parent undertaking* of a member of the *consolidation group* in the *overall financial sector*;

- (2) has a *participation* in a member of the *consolidation group* that is in the *overall financial sector*; or
- (3) has a *consolidation Article 12(1) relationship* with a member of the *consolidation group* that is in the *overall financial sector*.

**THE PRUDENTIAL SOURCEBOOK FOR BANKS, BUILDING SOCIETIES
AND INVESTMENT FIRMS INSTRUMENT 2006**

Powers exercised

- A. The Financial Services Authority makes this instrument in the exercise of the following powers and related provisions:
- (1) the following sections of the Financial Services and Markets Act 2000 (“the Act”):
 - (a) section 138 (General rule-making power);
 - (b) section 148(3) (Modification or waiver of rules);
 - (c) section 149 (Evidential provisions);
 - (d) section 150(2) (Actions for damages);
 - (e) section 156 (General supplementary powers); and
 - (f) section 157 (Guidance); and
 - (2) regulation 2(3) of the Capital Requirements Regulations 2006 (Application for permission).
- B. The rule-making powers listed above are specified for the purpose of section 153(2) (Rule-making instruments) of the Act.

Commencement

- C. (1) This instrument comes into force on 1 January 2007 except (subject to (2)) as follows:
- (a) the provisions providing for the advanced measurement approaches to operational risk do not apply until 1 January 2008 including in particular BIPRU 6.2.7R, BIPRU 6.2.9R and BIPRU 6.5; and
 - (b) the provisions providing for the advanced internal ratings based approach (the advanced IRB approach) do not apply until 1 January 2008 including in particular BIPRU 4.2.24R, BIPRU 4.4.40R to BIPRU 4.4.55R, BIPRU 4.8.22R(3) and BIPRU 4.8.26R.
- (2) The provisions providing for applications to use the advanced measurement approaches to operational risk and the advanced IRB approach come into force on 1 January 2007, including in particular BIPRU 1.3.7D to BIPRU 1.3.9D and BIPRU 1.3.14D.

Amendments to the Handbook

- D. The Annex to this instrument inserts into the Handbook the Prudential Sourcebook For Banks, Building Societies and Investment Firms to form a new module within the Prudential Standards block.

Citation

- E. This instrument may be cited as the Prudential Sourcebook For Banks, Building Societies and Investment Firms Instrument 2006.

By order of the Board
25 October 2006

Annex

Text of BIPRU

In this Annex, all text is new and is not underlined.

Insert the following new sourcebook, the Prudential Sourcebook For Banks, Building Societies and Investment Firms (BIPRU).

- 1.1 Application
- Application
- 1.1.1 G There is no overall application statement for *BIPRU*. Each chapter or section has its own application statement. Broadly speaking however, *BIPRU* applies to:
- (1) a *bank*;
 - (2) a *building society*;
 - (3) a *BIPRU investment firm*; and
 - (4) groups containing such *firms*.
- 1.1.2 R *BIPRU* applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
- 1.1.3 G In the main *BIPRU* only applies to a *UCITS investment firm* in respect of *designated investment business* (excluding *scheme management activity*). However *BIPRU* 2.2 (Internal capital adequacy standards), *BIPRU* 2.3 (Interest rate risk in the non-trading book), *BIPRU* 8 (Group risk - consolidation) and *BIPRU* 11 (Disclosure) apply to the whole of its business.
- Purpose
- 1.1.4 G *BIPRU* 1.1 implements in part Articles 3(1)(b), 5, 9, 10 and 20 of the *Capital Adequacy Directive*. However it amends those definitions so as to base the classification of *investment firms* on the *ISD* rather than the *MiFID*. *BIPRU* 1.1 will be amended so as to base that classification on the *MiFID* when the *MiFID* is applied to *firms* by the *FSA*.
- Guidance on the categorisation of *BIPRU investment firms*
- 1.1.5 G *Guidance* on the categorisation of *investment firms* for the purposes of *BIPRU* and *GENPRU* from 1 November 2007 will be included in *PERG* 13 (Guidance on the scope of the Markets in Financial Instruments Directive and the recast Capital Adequacy Directive).
- The definition of a *BIPRU firm*
- 1.1.6 R Subject to *BIPRU* 1.1.7R, a *BIPRU firm* means a *firm* that is:
- (1) a *building society*; or
 - (2) a *bank*; or
 - (3) a *full scope BIPRU investment firm*; or

- (4) a *BIPRU limited licence firm*; or
 - (5) a *BIPRU limited activity firm*.
- 1.1.7 R None of the following is a *BIPRU firm* and each of the following is excluded from each of the categories of *BIPRU investment firm* listed in *BIPRU* 1.1.6R(3) to (5) and *BIPRU* 1.1.18R(2) to (4):
- (1) an *incoming EEA firm*;
 - (2) an *incoming Treaty firm*;
 - (3) any other *overseas firm*;
 - (4) an *ELMI*;
 - (5) an *insurer*; and
 - (6) an *ICVC*.
- 1.1.8 R A *firm* falling within *BIPRU* 1.1.6R(3) to (5) is a *BIPRU investment firm*. A *BIPRU investment firm* includes a *UCITS investment firm* that is not excluded under *BIPRU* 1.1.7R.
- 1.1.9 G *EEA firms* are subject to the prudential standards of their home state regulator. But the *Banking Consolidation Directive* permits a host state *competent authority* to require a *BCD credit institution* to meet certain standards relating to its liquidity. The *FSA's* approach to liquidity for such *firms* is set out in *IPRU(BANK)* and *SYSC* 11 (Liquidity risk systems and controls).
- 1.1.10 G
- (1) This paragraph applies to an *undertaking* that would be a *third country BIPRU firm* if it were *authorised* under the *Act*.
 - (2) Except in exceptional circumstances, it is the *FSA's* policy that it will not give an overseas applicant a *Part IV permission* unless the *FSA* is satisfied that the applicant will be subject to prudential regulation by its home state *regulatory body* that is broadly equivalent to that provided for in the *Handbook* and the applicable *EEA prudential sectoral legislation*. The *FSA* will take into account not only the requirements to which the *firm* is subject but how they are enforced. The *FSA* will also take into account the laws, regulations and administrative provisions to which it is subject in its home state. The reasons for that policy include:
 - (a) it is unlikely that a *firm* that is not subject to equivalent supervision will be able to satisfy the *threshold conditions* (and in particular *threshold condition 5* (Suitability)) and it is unlikely that it will be possible to establish that the *firm* does satisfy them;

- (b) such a *firm* is likely to pose a threat to the interests of *consumers* and potential *consumers*, particularly as effective supervision of an *overseas firm* depends on cooperation between the *FSA* and the *regulatory body* that authorises the *firm* in its home country and on the *FSA* being able to place appropriate reliance on the supervision carried out by such *regulatory body*; and
 - (c) under Article 38(1) of the *Banking Consolidation Directive* the *FSA* should not apply to *branches* of *credit institutions* having their head office outside the *EEA*, when commencing or carrying on their business, provisions which result in more favourable treatment than that accorded to *branches* of *credit institutions* having their head office in the *EEA*.
- (3) If an *undertaking* is not subject to equivalent supervision in its home state and it wishes to carry on in the *United Kingdom regulated activities* coming within the scope of the activities that define a *BIPRU firm* it should establish a *subsidiary undertaking* in the *United Kingdom*. Such a *subsidiary undertaking* should be able to show, amongst other things, how it would comply with the *threshold conditions* (and in particular *threshold conditions* 3 (Close links) and 5 (Suitability)).
- (4) If in exceptional circumstances the *FSA* does grant a *Part IV permission* to an *undertaking* that is not subject to equivalent prudential regulation the *FSA* is likely to take measures under the *regulatory system* to compensate for the lack of equivalent supervision. These may include applying the prudential requirements for *BIPRU firms* to the *firm*.
- (5) An *overseas firm* that is subject to equivalent supervision is subject to the *threshold conditions* and the *Principles*. *BIPRU* and *GENPRU* do not generally apply. However *GENPRU* 1.2 (Adequacy of financial resources) applies to a *credit institution* with respect to liquidity risk in relation to its *United Kingdom branch*.

Types of investment firm: Limited activity firms

1.1.11 R A *limited activity firm* means (as specified by Article 20(3) of the *Capital Adequacy Directive* (Exemptions from operational risk)) a *CAD investment firm* that satisfies the following conditions:

- (1) it meets the criteria in (a) or the criteria in (b):
 - (a) it *deals on own account* only:
 - (i) for the purpose of fulfilling or executing a client order; or

- (ii) for the purpose of gaining entrance to a clearing and settlement system or a *recognised investment exchange* or *designated investment exchange* when acting in an agency capacity or executing a client order; or
- (b) it satisfies the following conditions:
- (i) it does not hold client money or securities in relation to *investment services* that it provides and is not authorised to do so;
 - (ii) the only *core investment service* it undertakes is *dealing on own account*;
 - (iii) it has no external customers in relation to *investment services* it provides; and
 - (iv) the execution and settlement of its transactions in relation to *investment services* it provides takes place under the responsibility of a clearing institution and are guaranteed by that clearing institution;
- (2) (in the case of a *CAD investment firm* that is a *BIPRU investment firm*) its *base capital resources requirement* is €730,000;
- (3) (in the case of a *CAD investment firm* that is an *EEA firm*) it is subject to the *CRD implementation measures* of its *Home State* for Article 9 of the *Capital Adequacy Directive* (Initial capital requirement of €730,000); and
- (4) (in the case of any other *CAD investment firm*) its *base capital resources requirement* would be €730,000 if it had been a *BIPRU investment firm* on the basis of the assumptions in *BIPRU* 1.1.14R(3)(a) and (b).

Types of investment firm: Limited licence firms

1.1.12 R A *limited licence firm* means (as specified by Article 20(2) of the *Capital Adequacy Directive* (Exemptions from operational risk)) a *CAD investment firm* that is not authorised to:

- (1) *deal on own account*; or
- (2) provide the investment services of underwriting or placing *financial instruments* (as referred to in point 4 of Section A of Annex I of the *ISD*) on a firm commitment basis.

Types of investment firm: CAD full scope firm

1.1.13 R A *CAD full scope firm* means a *CAD investment firm* that is not a *limited activity firm* or a *limited licence firm*.

Types of investment firm: CAD investment firm

1.1.14 R (1) In accordance with Article 3(1)(b) of the *Capital Adequacy Directive*, a person is a *CAD investment firm* if it falls into (2) or (3).

(2) A person whose head office is in an *EEA State* is a *CAD investment firm* if it is an *investment firm* that is subject to the requirements imposed by the *ISD* but excludes the following:

(a) a *bank*, a *building society* or an *ELMI*;

(b) a *credit institution*;

(c) a *local*; and

(d) an *exempt CAD firm*.

(3) An *investment firm* whose head office is not in an *EEA State* is a *CAD investment firm* if it would have fallen into (2) if:

(a) its head office had been in an *EEA State*; and

(b) it had carried on all its business in the *EEA* and had obtained whatever authorisations for doing so are required under the *ISD*.

1.1.15 G An *investment firm* with the benefit of an exemption pursuant to Article 2(2) of the *ISD* is excluded from the definition of a *CAD investment firm* and hence from the definition of *BIPRU investment firm*.

Types of investment firm: Exempt CAD firm

1.1.16 R In accordance with Article 3(1)(b)(iii) of the *Capital Adequacy Directive* (Definitions), an *exempt CAD firm* means an *investment firm* that satisfies the following conditions:

(1) it would have been a *CAD investment firm* if *exempt CAD firms* were not excluded from the definition; and

(2) the only *core investment service* for which it is authorised is receiving and transmitting orders from investors (as referred to in Section A of Annex I of the *ISD*) without holding money or securities belonging to its clients in relation to *investment services* it provides and for that reason it may not at any time place itself in debt with those clients.

Types of BIPRU investment firm

- 1.1.17 R (1) A *BIPRU limited licence firm* means a *limited licence firm* that falls into (4).
- (2) A *BIPRU limited activity firm* means a *limited activity firm* that falls into (4).
- (3) A *full scope BIPRU investment firm* means a *CAD full scope firm* that falls into (4).
- (4) A *limited licence firm, limited activity firm* or *CAD full scope firm* falls into (4) if:
- (a) it is a *firm*; and
 - (b) its head office is in the *United Kingdom* and it is not otherwise excluded from the definition of *BIPRU firm* under *BIPRU 1.1.7R*.

Alternative classification of BIPRU investment firms

- 1.1.18 R *BIPRU investment firms* are divided into the following classes for the purposes of the calculation of the *base capital resources requirement* and for the purpose of any other provision of the *Handbook* that applies this classification:
- (1) a *UCITS investment firm*;
 - (2) a *BIPRU 50K firm*;
 - (3) a *BIPRU 125K firm*; and
 - (4) a *BIPRU 730K firm*.

Types of investment firm: BIPRU 125K firm

- 1.1.19 R A *BIPRU 125K firm* means a *BIPRU investment firm* that satisfies the following conditions:
- (1) it does not:
 - (a) *deal on own account*; or
 - (b) underwrite issues of *financial instruments* (as referred in Section A of Annex I of the *ISD*) on a firm commitment basis;
 - (2) it holds clients' money or securities in relation to *investment services* it provides or is authorised to do so;

- (3) it offers one or more of the following services (all as referred to in Section A of Annex I of the *ISD*):
 - (a) reception and transmission of investors' orders for *financial instruments*; or
 - (b) the execution of investors' orders for *financial instruments*; or
 - (c) the management of individual portfolios of investments in *financial instruments*; and
- (4) it is not a *UCITS investment firm*.

Types of investment firm: BIPRU 50K firm

1.1.20 R A *BIPRU 50K firm* means a *BIPRU investment firm* that satisfies the following conditions:

- (1) it satisfies the conditions in *BIPRU 1.1.19R(1)* and (3);
- (2) it does not hold clients' money or securities in relation to *investment services* it provides and it is not authorised to do so; and
- (3) it is not a *UCITS investment firm*.

Types of investment firm: 730K firm

1.1.21 R A *BIPRU investment firm* that is not a *UCITS investment firm*, a *BIPRU 50K firm* or a *BIPRU 125K firm* is a *BIPRU 730K firm*.

Types of investment firm: Part IV permission

1.1.22 R A *firm* also falls into one of the categories of *BIPRU investment firm* listed in *BIPRU 1.1.6R(3)* to (5) or *BIPRU 1.1.18R* if its *Part IV permission* contains a *requirement* that it comply with the *rules* in *GENPRU* and *BIPRU* applicable to that category of *firm*. If a *firm* is subject to such a *requirement* and it would otherwise also fall into another category of *BIPRU investment firm* it does not fall into that other category.

Meaning of dealing on own account

- 1.1.23 R (1) *Dealing on own account* means (for the purpose of *GENPRU* and *BIPRU*) the service of dealing in any *financial instruments* for own account as referred to in point 2 of Section A of the Annex to the *ISD*, subject to (2) and (3).
- (2) In accordance with Article 5(2) of the *Capital Adequacy Directive* (Definition of dealing on own account), a *CAD investment firm* that executes investors' orders for *financial instruments* and holds such *financial instruments* for its own account does not for that reason *deal on own account* if the following conditions are met:

- (a) such *positions* only arise as a result of the *CAD investment firm's* failure to match investors' orders precisely;
 - (b) the total market value of all such *positions* is no higher than 15% of the *CAD investment firm's initial capital*;
 - (c) (in the case of a *BIPRU investment firm*) it complies with the *main BIPRU firm Pillar 1 rules* and *BIPRU 10* (Concentration risk);
 - (d) (in the case of a *CAD investment firm* that is an *EEA firm*) it complies with the *CRD implementation measures* of its *Home State* for Articles 18 and 20 (Minimum capital requirements) and 28 (Large exposures) of the *Capital Adequacy Directive*;
 - (e) (in the case of any other *CAD investment firm*) it would comply with the *rules* in (2)(c) if it had been a *BIPRU investment firm* on the basis of the assumptions in *BIPRU 1.1.14R(3)(a)* and (b); and
 - (f) such *positions* are incidental and provisional in nature and strictly limited to the time required to carry out the transaction in question.
- (3) In accordance with Article 5(2) of the *Capital Adequacy Directive*, the holding of *non-trading book positions* in *financial instruments* in order to invest *capital resources* is not *dealing on own account* for the purposes referred to in *BIPRU 1.1.18R*.

Interpretation of the definition of types of firm and undertaking

- 1.1.24 R For the purposes of the definitions in *BIPRU 1.1*, a *person* does any of the activities referred to in *BIPRU 1.1* if:
- (1) it does that activity anywhere in the world; or
 - (2) if its *permission* includes that activity; or
 - (3) (in the case of an *EEA firm*) it is authorised by its *Home State regulator* to do that activity; or
 - (4) (if the carrying on of that activity is prohibited in a state or territory without an authorisation in that state or territory) that *firm* has such an authorisation.
- 1.1.25 R For the purposes of the definitions in *BIPRU 1.1*, a *person* offers any of the services referred to in *BIPRU 1.1.19R(3)* if:
- (1) it offers that service anywhere in the world; or
 - (2) any of *BIPRU 1.1.24R(1)* to (4) apply.

- 1.1.26 R For the purposes of the definitions in *BIPRU* 1.1, a *person* has an authorisation to do any of the activities referred to in *BIPRU* 1.1 if any of *BIPRU* 1.1.24R(2) to (4) apply.

1.2 Definition of the trading book

Application

1.2.1 R This section applies to a *BIPRU firm*.

Purpose

1.2.2 G This section implements certain provisions of the *Capital Adequacy Directive* and the *Banking Consolidation Directive* relating to the *trading book*. The precise provisions being implemented are listed as a note after each *rule*.

Definition of the trading book: General

1.2.3 R The *trading book* of a *firm* consists of all *positions* in *CRD financial instruments* and *commodities* held either with trading intent or in order to hedge other elements of the *trading book* and which are either free of any restrictive covenants on their tradability or able to be hedged.

[Note: *CAD* Article 11(1)]

Definition of the trading book: Positions

1.2.4 R The term *positions* includes proprietary positions and positions arising from client servicing and market making.

[Note: *CAD* Article 11(2) second sentence]

1.2.5 G *Positions* arising from client servicing include those arising out of contracts where a *firm* acts as principal (even in the context of activity described as ‘broking’ or ‘customer business’). Such *positions* should be allocated to a *firm's trading book* if the intent is trading (see *BIPRU* 1.2.10R). This applies even if the nature of the business means that generally the only risks incurred by the *firm* are counterparty risks (i.e. no market risk charges apply). If the nature of the business means that generally the only risks incurred by the *firm* are counterparty risks, the *position* will generally still meet the trading intent requirement in *BIPRU* 1.2.10R if the *position* would meet the trading intent requirement if *position* risk did arise. The *FSA* understands that business carried out under International Uniform Brokerage Execution (“Give-Up”) Agreements involve back to back trades as principal. Thus *positions* arising out of business carried out under such agreements should be allocated to a *firm's trading book*.

Definition of the trading book: Repos

- 1.2.6 R Term trading-related repo-style transactions that a *firm* accounts for in its *non-trading book* may be included in the *trading book* for capital requirement purposes so long as all such repo-style transactions are included. For this purpose, trading-related repo-style transactions are defined as those that meet the requirements of *BIPRU 1.2.4R*, *BIPRU 1.2.10R* and *BIPRU 1.2.12R*, and both legs are in the form of either cash or securities includable in the *trading book*. Regardless of where they are booked, all repo-style transactions are subject to a *non-trading book* counterparty credit risk charge.

[Note: *CAD* Annex VII Part D point 4]

CRD financial instruments

- 1.2.7 R A *CRD financial instrument* means any contract that gives rise to both a financial asset of one party and a financial liability or equity instrument of another party.

[Note: *CAD* Article 3(1)(e)]

- 1.2.8 R *CRD financial instruments* include both primary *CRD financial instruments* or cash instruments, and derivative *CRD financial instruments* the value of which is derived from the price of an underlying *CRD financial instrument*, a rate, an index or the price of another underlying item and include as a minimum the instruments specified in Section C of Annex I to the *MIFID*.

[Note: *CAD* Article 3(1) last paragraph]

- 1.2.9 G Generally, for the purpose of the definition of *CRD financial instrument*:
- (1) a financial asset means cash, the right to receive cash or another financial asset, the contractual right to exchange financial assets on potentially favourable terms or an equity instrument; and
 - (2) a financial liability means the contractual obligation to deliver cash or another financial asset or to exchange financial liabilities under conditions that are potentially unfavourable.

Trading intent

- 1.2.10 R *Positions* held with trading intent for the purpose of the definition of the *trading book* are those held intentionally for short-term resale and/or with the intention of benefiting from actual or expected short-term price differences between buying and selling prices, or from other price or interest rate variations.

[Note: *CAD* Article 11(2) first sentence]

1.2.11 R Trading intent must be evidenced on the basis of the strategies, policies and procedures set up by the *firm* to manage the *position* or portfolio in accordance with *BIPRU* 1.2.12R.

[**Note:** *CAD* Article 11(3)]

1.2.12 R *Positions*/portfolios held with trading intent must comply with the following requirements:

- (1) there must be a clearly documented trading strategy for the *position*/instrument or portfolios, approved by senior management, which must include the expected holding horizon;
- (2) there must be clearly defined policies and procedures to monitor the *position* against the *firm's* trading strategy including the monitoring of turnover and stale *positions* in the *firm's trading book*; and
- (3) there must be clearly defined policies and procedures for the active management of the *position*, which must include the following:
 - (a) *positions* entered into on a trading desk;
 - (b) *position* limits are set and monitored for appropriateness;
 - (c) dealers have the autonomy to enter into/manage the *position* within agreed limits and according to the approved strategy;
 - (d) *positions* are reported to senior management as an integral part of the *firm's* risk management process; and
 - (e) *positions* are actively monitored with reference to market information sources and an assessment made of the marketability or hedge-ability of the *position* or its component risks, including the assessment of, the quality and availability of market inputs to the valuation process, level of market turnover, sizes of *positions* traded in the market.

[**Note:** *CAD* Annex VII Part A]

Internal hedges

1.2.13 R Internal hedges may be included in the *trading book*, in which case *BIPRU* 1.2.14R to *BIPRU* 1.2.16R apply.

[**Note:** *CAD* Article 11(5)]

- 1.2.14 R (1) An internal hedge is a *position* that materially or completely offsets the component risk element of a *non-trading book position* or a set of *positions*. *Positions* arising from internal hedges are eligible for *trading book* capital treatment, provided that they are held with trading intent and that the general criteria on trading intent and prudent valuation specified in *BIPRU 1.2.12R* and the *trading book systems and controls rules*. In particular:
- (a) internal hedges must not be primarily intended to avoid or reduce capital requirements;
 - (b) internal hedges must be properly documented and subject to particular internal approval and audit procedures;
 - (c) the internal transaction must be dealt with at market conditions;
 - (d) the bulk of the market risk that is generated by the internal hedge must be dynamically managed in the *trading book* within the authorised limits; and
 - (e) internal transactions must be carefully monitored.
- (2) Monitoring must be ensured by adequate procedures.

[Note: *CAD Annex VII Part C point 1*]

- 1.2.15 R The treatment referred to in *BIPRU 1.2.14R* applies without prejudice to the capital requirements applicable to the “*non-trading book leg*” of the internal hedge.

[Note: *CAD Annex VII Part C point 2*]

- 1.2.16 R Notwithstanding *BIPRU 1.2.14R* to *BIPRU 1.2.15R*, when a *firm* hedges a *non-trading book* credit risk exposure using a credit derivative booked in its *trading book* (using an internal hedge), the *non-trading book* exposure is not deemed to be hedged for the purposes of calculating capital requirements unless the *firm* purchases from an eligible third party protection provider a credit derivative meeting the requirements set out in *BIPRU 5.7.13R* (Additional requirements for credit derivatives) with regard to the *non-trading book* exposure. Where such third party protection is purchased and is recognised as a hedge of a *non-trading book* exposure for the purposes of calculating capital requirements, neither the internal nor external credit derivative hedge may be included in the *trading book* for the purposes of calculating capital requirements.

[Note: *CAD Annex VII Part C point 3*]

Size thresholds

- 1.2.17 R (1) Subject to (3), a *firm* may calculate its capital requirements for its *trading book* business in accordance with the *standardised approach* to credit risk (or, if it has an *IRB permission*, the *IRB approach*) as it applies to the *non-trading book* where the size of the *trading book* business meets the following requirements:
- (a) the *trading book* business of the *firm* does not normally exceed 5% of its total business;
 - (b) its total *trading book positions* do not normally exceed €15 million; and
 - (c) the *trading book* business of the *firm* never exceeds 6% of its total business and its total *trading book positions* never exceed €20 million.
- (2) Subject to (3), if (1) applies, the following are disapplied:
- (a) the *rules* relating to the *interest rate PRR*, the *equity PRR*, the *CIU PRR* and the *PRR* calculated under *BIPRU 7.11* (Credit derivatives in the trading book);
 - (b) the *rules* relating to the *option PRR* (but only in relation to *positions* which under *BIPRU 7.6.5R* (Table: Appropriate calculation for an option or warrant) may be subject to one of the other *PRR charges* listed in (2)(a) or which would be subject to such a *PRR charge* if *BIPRU 7.6.5R* did not require an *option PRR* to be calculated);
 - (c) *BIPRU 7.10* (Use of a Value at Risk Model) so far as *BIPRU 7.10* relates to the risks covered by the requirements in (a) and (b); and
 - (d) *BIPRU 14* (Capital requirements for settlement and counterparty risk).
- (3) If (1) applies, the following continue to apply:
- (a) the *rules* relating to the *commodity PRR* and the *foreign currency PRR*;
 - (b) the *rules* relating to the *option PRR* (so far as not disapplied under (2)(b));
 - (c) *BIPRU 7.10* (so far as not disapplied under (2)(c));
 - (d) *BIPRU 14.2.3R* to *BIPRU 14.2.8R* (Credit derivatives); and

- (e) *BIPRU 14.2.15R to BIPRU 14.2.16R* (Collateral for *repurchase transactions* and other products).

[Note: *CAD Article 18(2)*]

- 1.2.18 R In order to calculate the proportion that *trading-book* business bears to total business for the purpose of *BIPRU 1.2.17R(1)(a) to (c)* the *firm* must refer to the size of the combined on- and off-balance-sheet business. For this purpose, debt instruments must be valued at their market prices or their principal values, equities at their market prices and derivatives according to the nominal or market values of the instruments underlying them. Long *positions* and short *positions* must be summed regardless of their signs.

[Note: *CAD Article 18(3)*]

- 1.2.19 R If a *firm* should happen for more than a short period to exceed either or both of the limits imposed in *BIPRU 1.2.17R(1)(a) and (b)* or either or both of the limits imposed in *BIPRU 1.2.17R(1)(c)*:

(1) *BIPRU 1.2.17R* ceases to apply; and

(2) the *firm* must notify the *FSA*.

[Note: *CAD Article 18(4)*]

- 1.2.20 G As required by *BIPRU 8.7.21R* (Special rules for the consolidated market risk requirement), a *firm* should consider whether it meets the threshold conditions in *BIPRU 1.2.17R* on both an unconsolidated (or solo) basis and a consolidated basis. If a *firm's* trading activities on both an unconsolidated (or solo) basis and a consolidated basis are below the threshold size, it may be appropriate for the *firm* not to adopt the *trading book* treatment. However, even if the *firm* does not apply the *trading book* treatment it should still adopt a *trading book policy statement*. That statement may be restricted to identifying the activities the *firm* normally considers to be trading and that would constitute part of its *trading book*. The *firm* should use this policy statement to help it to decide whether or not adopting the *trading book* treatment is appropriate.

Systems and controls for the trading book

- 1.2.21 R A *firm* must implement policies and processes for the measurement and management of all material sources and effects of market risks.

[Note: *BCD Annex V, Part 7 point 10*]

- 1.2.22 R A *firm* must establish and maintain systems and controls to manage its *trading book*, in accordance with the *trading book systems and controls rules, BIPRU 1.2.6R* (Definition of the trading book: Repos) and the *overall financial adequacy rule to BIPRU 1.2.27R* (Trading book policy statements).

[Note: CAD Article 11(4)]

1.1.23 R A *firm* must establish and maintain systems and controls sufficient to provide prudent and reliable valuation estimates.

[Note: CAD Annex VII Part B point 1]

1.2.24 R Systems and controls must include at least the following elements:

- (1) documented policies and procedures for the process of valuation (including clearly defined responsibilities of the various areas involved in the determination of the valuation, sources of market information and review of their appropriateness, frequency of independent valuation, timing of closing prices, procedures for adjusting valuations, month end and ad-hoc verification procedures); and
- (2) reporting lines for the department accountable for the valuation process that are clear and independent of the front office.

[Note: CAD Annex VII Part B point 2]

1.2.25 R The reporting line in relation to the matters covered by *BIPRU* 1.2.21R to *BIPRU* 1.2.24R must ultimately be to an executive *director* on the *firm's* governing body.

[Note: CAD Annex VII Part B point 2 (last sentence)]

Trading book policy statements

1.2.26 R A *firm* must have clearly defined policies and procedures for determining which *positions* to include in the *trading book* for the purposes of calculating its capital requirements, consistent with the criteria set out in *BIPRU* 1.2.3R to *BIPRU* 1.2.4R, *BIPRU* 1.2.10R to *BIPRU* 1.2.11R, *BIPRU* 1.2.13R and *BIPRU* 1.2.22R and taking into account the *firm's* risk management capabilities and practices. Compliance with these policies and procedures must be fully documented and subject to periodic internal audit.

[Note: CAD Annex VII Part D point 1]

1.2.27 R A *firm* must have clearly defined policies and procedures for overall management of the *trading book*. At a minimum these policies and procedures must address:

- (1) the activities the *firm* considers to be trading and as constituting part of the *trading book* for capital requirement purposes;
- (2) the extent to which a *position* can be marked-to-market daily by reference to an active, liquid two-way market;

- (3) for *positions* that are marked-to-model, the extent to which the *firm* can:
 - (a) identify all material risks of the *position*;
 - (b) hedge all material risks of the *position* with instruments for which an active, liquid two-way market exists; and
 - (c) derive reliable estimates for the key assumptions and parameters used in the model;
- (4) the extent to which the *firm* can, and is required to, generate valuations for the *position* that can be validated externally in a consistent manner;
- (5) the extent to which legal restrictions or other operational requirements would impede the *firm's* ability to effect a liquidation or hedge of the *position* in the short term;
- (6) the extent to which the *firm* can, and is required to, actively risk manage the *position* within its trading operation; and
- (7) the extent to which the *firm* may transfer risk or *positions* between the *non-trading book* and *trading book* and the criteria for such transfers.

[Note: CAD Annex VII Part D point 2]

- 1.2.28 G The policies and procedures referred to in *BIPRU* 1.2.27R(1) should cover:
- (1) the *CRD financial instruments* and *commodities* that the *firm* proposes to trade in, including the currencies, maturities, issuers and quality of issues; and
 - (2) any instruments to be excluded from its *trading book*.
- 1.2.29 R (1) The policies and procedures referred to in the *overall financial adequacy rule* and *BIPRU* 1.2.27R must be recorded in a single written document. A *firm* may record those policies and procedures in more than one written document if the *firm* has a single written document that identifies:
- (a) all those other documents; and
 - (b) the parts of those documents that record those policies and procedures.
- (2) A *trading book policy statement* means the single document referred to in this *rule*.

- 1.2.30 R (1) A *firm* must notify the *FSA* as soon as is reasonably practicable when it adopts a *trading book policy statement*.
- (2) A *firm* must notify the *FSA* as soon as is reasonably practicable if the *trading book policy statement* is subject to significant changes.
- 1.2.31 G A significant change for the purpose of the *overall Pillar 2 rule* includes new types of customers or business requiring different funding or provisioning.
- 1.2.32 G There is likely to be an overlap between what the *trading book policy statement* should contain and other documents such as dealing or treasury manuals. A cross reference to the latter in the *trading book policy statement* is adequate and material in other documents need not be set out again in the *trading book policy statement*. However where this is the case the matters required to be included in the *trading book policy statement* should be readily identifiable.
- 1.2.33 G The *trading book policy statement* may be prepared on either a consolidated or a solo (or solo-consolidated) basis. It should be prepared on a consolidated basis when a group either manages its trading risk centrally or employs the same risk management techniques in each group member. A *trading book policy statement* prepared on a consolidated basis should set out how it applies to each *firm* in the group and should be approved by each such *firm's governing body*.
- Treatments common to the trading book and the non-trading book
- 1.2.34 G Capital requirements for *foreign currency* risk and *commodity position* risk are the same whether the risk arises in the *trading book* or the *non-trading book*. The calculation of capital requirements for *foreign currency* risk is set out in *BIPRU 7.5*. The calculation of capital requirements for *commodity position* risk is set out in *BIPRU 7.4*.
- Trading book treatments
- 1.2.35 G All *positions* that are in a *firm's trading book* require capital to cover *position* risk and may require capital to cover counterparty credit risk and to cover large exposures. Counterparty credit risk in the *trading book* is dealt with by *BIPRU 14* and capital for *large exposures* is covered by *BIPRU 10*.
- Non-trading book treatments
- 1.2.36 G All *positions* that are not in a *firm's trading book* are included in its *non-trading book* and subject capital requirements for the *non-trading book* unless they are deducted from *capital resources* under *GENPRU 2.2* (Capital resources).

1.3 Applications for advanced approaches

Application

- 1.3.1 R This section of the *Handbook* applies to every *BIPRU firm* that wishes to apply for a permission to use any of the approaches set out in *BIPRU* 1.3.2G.

Purpose

- 1.3.2 G (1) A *firm* may apply for an *Article 129 permission* or a *waiver* in respect of:
- (a) the *IRB approach*;
 - (b) the *advanced measurement approach*;
 - (c) the *CCR internal model method*; and
 - (d) the *VaR model approach*.
- (2) A *firm* should apply for a *waiver* if it wants to:
- (a) apply the *CAD 1 model approach*;
 - (b) apply the *master netting agreement internal models approach*;
 - (c) disapply consolidated supervision under *BIPRU* 8 for its *UK consolidation group* or *non-EEA sub-group*;
 - (d) apply the treatment in *BIPRU* 2.1 (Solo-consolidation waiver); or
 - (e) apply the treatment in *BIPRU* 10.8 (Exemption from limits in *BIPRU* 10.5 for concentration risk counterparty).

Article 129

- 1.3.3 G An *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of its *EEA parent financial holding company* that wish to use any of the approaches listed in *BIPRU* 1.3.2G(1) in respect of its group,

including members of its group that are *BIPRU firms*, may apply for an *Article 129 permission*.

- 1.3.4 G The *Article 129 procedure* allows an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of its *EEA parent financial holding company* to apply for permission to use the approaches in *BIPRU 1.3.2G(1)* without making separate applications to the *competent authority* of each *EEA State* where members of a *firm's* group are authorised.
- 1.3.5 G The *Capital Requirements Regulations 2006* set out the *Article 129 procedure*.
- 1.3.6 G Where a *firm* or its group has been granted an *Article 129 permission*, each *competent authority*, including the lead *competent authority*, will need to take action to apply that *Article 129 permission* to the *institutions* that they authorise. Part 3 of the *Capital Requirements Regulations 2006* governs how the *FSA* will take that action, whether or not the *FSA* is the lead *competent authority*.

Article 129 permissions and waivers – specific conditions

- 1.3.7 D When an *advanced measurement approach* is intended to be used by an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of an *EEA parent financial holding company*, the application of a *firm* in accordance with *BIPRU 1.3.14D* must include the elements listed in *BIPRU 6.5.5R* (Minimum standards for the advanced measurement approach).

[**Note:** *BCD Article 105(2)*]

- 1.3.8 D When an *advanced measurement approach* is intended to be used by an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of an *EEA parent financial holding company*, the application of a *firm* must include a description of the methodology used for allocating *operational risk* capital between the different entities of the group.

[**Note:** *BCD Annex X Part 3 point 30*]

- 1.3.9 D For the purposes of *BIPRU 1.3.8D*, the application of a *firm* must indicate whether and how diversification effects are intended to be factored in the risk measurement system.

[**Note:** *BCD Annex X Part 3 point 31*]

Waiver – general

- 1.3.10 G As explained in *SUP* 8, under section 148 of the *Act*, the *FSA* may not grant a *waiver* to a *firm* unless it is satisfied that:
- (1) compliance by the *firm* with the *rules*, or with the *rules* as modified, would be unduly burdensome or would not achieve the purpose for which the *rules* were made; and
 - (2) the *waiver* would not result in undue risk to *persons* whose interests the *rules* are intended to protect.
- 1.3.11 G The conditions relating to the use of an approach listed in *BIPRU* 1.3.2G referred to in the relevant chapter of *BIPRU* are minimum standards. Satisfaction of those conditions does not automatically mean the *FSA* will grant a *waiver* referred to in those paragraphs. The *FSA* will in addition also apply the tests in section 148 of the *Act*.
- 1.3.12 G In the *FSA's* view, if the minimum standards referred to in *BIPRU* 1.3.11G are satisfied, the conditions referred to in *BIPRU* 1.3.10G(1) will generally be met.

Forms and method of application

- 1.3.13 D Subject to *BIPRU* 1.3.14D to *BIPRU* 1.3.21D, if a *firm* wishes to apply for a *waiver* to apply an approach set out in *BIPRU* 1.3.2G, it must comply with *SUP* 8.3.3D.
- 1.3.14 D If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *advanced measurement approach*, it must complete and submit the form in *BIPRU* 1 Ann 1D.
- 1.3.15 D If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *IRB approach*, it must complete and submit the form in *BIPRU* 1 Ann 2D.
- 1.3.16 D If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *CCR internal model method*, it must complete and submit the form in *BIPRU* 1 Ann 3D.
- 1.3.17 D Where a *firm* makes an application in accordance with *BIPRU* 1.3.14D, *BIPRU* 1.3.15D or *BIPRU* 1.3.16D, the *firm* must state on the application whether it is making an application for a *waiver* or an *Article 129 permission*.
- 1.3.18 D Where a *firm* applies for a *VaR model permission*, the *firm* must state whether it is making an application for a *waiver* or an *Article 129 permission*.

- 1.3.19 G In respect of the application for *waivers* to apply the approaches set out in *BIPRU 1.3.2G(1)*, the *FSA* will aim to give decisions on applications as soon as practicable. However, the *FSA* expects that it will take a significant period to determine and give a decision due to the complexity of the issues raised by the applications. Details of timelines for applications for waivers to use advanced approaches and under the *Article 129 procedure* are set out on the *FSA* website.
- 1.3.20 D Where a *firm* applies for a *solo consolidation waiver*, it must demonstrate how each of the conditions set out in *BIPRU 2.1.20R* to *BIPRU 2.1.24R* are met and address the criteria set out in the *guidance* in *BIPRU 2.1.25G* as part of its application in accordance with *BIPRU 1.3.13D*.
- 1.3.21 G Before sending in an application for a *waiver* or *Article 129 permission*, a *firm* may find it helpful to discuss the application with its usual supervisory contact at the *FSA*. However, the *firm* should still ensure that all relevant information is included in the application.

BIPRU 1.4: Actions for damages

1.4 Actions for damages

1.4.1 R A contravention of the *rules* in *BIPRU* does not give rise to a right of action by a *private person* under section 150 of the *Act* (and each of those *rules* is specified under section 150(2) of the *Act* as a provision giving rise to no such right of action).

2.1 Solo consolidation

Application

2.1.1 R This section applies to a *BIPRU firm* that has a *solo consolidation waiver*.

Purpose

2.1.2 G The purpose of this section is to implement Articles 70 and 118 of the *Banking Consolidation Directive*. It also implements Articles 2 and 28 of the *Capital Adequacy Directive* so far as they apply those provisions of the *Banking Consolidation Directive* to *CAD investment firms*.

2.1.3 G The *rules* in *GENPRU* and *BIPRU* do not allow a *firm* that is a *parent undertaking* to incorporate the capital and requirements of a *subsidiary undertaking* in the calculation of that *firm's capital resources* and *capital resources requirement*. A *firm* that wishes to incorporate a *subsidiary undertaking* for this purpose should therefore apply for a *solo consolidation waiver*.

Applying for a solo consolidation waiver

2.1.4 G *BIPRU* 1.3 (Applications for advanced approaches) explains how to apply for a *solo consolidation waiver*.

General

2.1.5 G The *FSA* will not grant a *firm* a *solo consolidation waiver* with respect to a *subsidiary undertaking* unless the *firm* and the *subsidiary undertaking* meet the standards in *BIPRU* 2.1.19R to *BIPRU* 2.1.24R.

2.1.6 G A *solo consolidation waiver* will modify the relevant parts of *GENPRU*, *BIPRU* and *SYSC* referred to in *BIPRU* 2.1.7R to *BIPRU* 2.1.8R to apply *BIPRU* 2.1 to a *firm*.

The basic rules for solo consolidation

2.1.7 R A *firm* that has a *solo consolidation waiver* must incorporate in the calculation of its requirements under the *main BIPRU firm Pillar 1 rules* and *BIPRU* 10 (Concentration risk requirement) each *subsidiary undertaking* to which the *solo consolidation waiver* applies. This does not apply to the *base capital resources requirement*.

2.1.8 R (1) A *firm* that has a *solo consolidation waiver* must meet the obligations in *SYSC* 12.1.13R (Application of certain systems and controls *rules* on a consolidated basis) on a consolidated basis with respect to the *firm* and each *subsidiary undertaking* to which the *firm's solo consolidation waiver* applies.

- (2) If (1) applies, *SYSC* 12.1.13R applies to the group made up of the *firm* and its *subsidiary undertakings* referred to in (1) in the same way as it applies to a *UK consolidation group* or *non-EEA sub-group*.
- (3) If (1) applies, the provisions of *SYSC* and *BIPRU* listed in *SYSC* 12.1.13R do not apply to the *firm* on a solo basis.

Solo consolidation and capital and concentration risk requirements

- 2.1.9 R *BIPRU* 2.1.10R to *BIPRU* 2.1.18R apply for the purposes of *BIPRU* 2.1.7R.
- 2.1.10 R A *firm* must treat itself and each *subsidiary undertaking* referred to in *BIPRU* 2.1.7R as a single *undertaking* and must apply, on that basis, *BIPRU* 8 (Group risk – consolidation) to the group made up of the *firm* and such *subsidiary undertakings* in the same way as *BIPRU* 8 applies to a *UK consolidation group* or *non-EEA sub-group*.
- 2.1.11 R Subject to *BIPRU* 2.1.13R, a *firm* must calculate its *capital resources* in accordance with *BIPRU* 8.6 (Consolidated capital resources).
- 2.1.12 R A *firm* must calculate its *capital resources requirement* in accordance with *BIPRU* 8.7.13R(3) (Treating group members as a single undertaking for consolidation purposes).
- 2.1.13 R Where *GENPRU* applies a different method of calculating *capital resources* or *capital resources requirements* depending on the category into which the *firm* in question falls, the method that applies is the one that would apply to the *firm* on a solo basis.
- 2.1.14 G For example, the effect of *BIPRU* 2.1.13R is that if a *firm* that is applying *BIPRU* 2.1 is a *limited licence firm* it should continue to apply the *capital resources* and *capital resources requirement* applicable to a *limited licence firm*.
- 2.1.15 R A *firm* must continue to calculate its *base capital resources requirement* and the requirement in *GENPRU* 2.1.42R (Calculation of capital resources requirement on authorisation) on a solo basis.
- 2.1.16 R A *firm* must apply *BIPRU* 10 (Concentration risk requirement) in accordance with *BIPRU* 8.9 (Consolidated concentration risk requirements). Accordingly the *firm* must apply *BIPRU* 8.9 to the group made up of the *firm* and the *subsidiary undertakings* referred to in *BIPRU* 2.1.7R in the same way as *BIPRU* 8.9 applies to a *UK consolidation group* or *non-EEA sub-group*.
- 2.1.17 G One effect of *BIPRU* 2.1.16R is that *BIPRU* 10.8 (UK integrated groups) and *BIPRU* 10.9 (Wider integrated groups) do not apply. The corresponding provisions of *BIPRU* 8.9 (Consolidated concentration risk requirements) apply instead.

2.1.18 R A *firm* must include in full any *subsidiary undertaking* in respect of which the *firm* applies *BIPRU 2.1* in the calculations under *BIPRU 2.1.7R*.

Minimum standards

2.1.19 R A *firm* must not apply *BIPRU 2.1* to a *subsidiary undertaking* to which the *firm's solo consolidation waiver* applies *BIPRU 2.1* unless in addition it meets the conditions in *BIPRU 2.1.20R* to *BIPRU 2.1.24R*.

2.1.20 R The risk evaluation, measurement and control procedures of the *firm* must cover the *subsidiary undertaking* referred to in *BIPRU 2.1.19R*.

2.1.21 R The *firm* must hold more than 75% of the voting rights attaching to the *shares* in the capital of the *subsidiary undertaking* referred to in *BIPRU 2.1.19R* and must have the right to appoint or remove a majority of the members of the *governing body* of the *subsidiary undertaking*.

2.1.22 R The material *exposures* or material liabilities of the *subsidiary undertaking* referred to in *BIPRU 2.1.19R* must be to the *firm*.

2.1.23 R Where the *firm* is a *parent institution in a Member State*, it must have measures in place that ensure the satisfactory allocation of risks within the group consisting of the *firm* and each *subsidiary undertaking* to which *BIPRU 2.1* is applied.

2.1.24 R A *firm* must be able to demonstrate fully to the *FSA* the circumstances and arrangements, including legal arrangements, by virtue of which there are no material practical or legal impediments, and none are foreseen, to the prompt transfer of the *capital resources* of the *subsidiary undertaking* referred to in *BIPRU 2.1.19R* or repayment of liabilities when due by the *subsidiary undertaking* to the *firm*.

2.1.25 G The following are the criteria that the *FSA* will take into account when considering whether the condition in *BIPRU 2.1.24R* is going to be met:

- (1) the speed with which funds can be transferred or liabilities repaid to the *firm* and the simplicity of the method for the transfer or repayment;
- (2) whether there are any interests other than those of the *firm* in the *subsidiary undertaking* and what impact those other interests may have on the *firm's* control over the *subsidiary undertaking* and on the ability of the *firm* to require a transfer of funds or repayment of liabilities;
- (3) whether the prompt transfer of funds or repayment of liabilities to the *firm* might harm the reputation of the *firm* or its *subsidiary undertakings*;

- (4) whether there are any tax disadvantages for the *firm* or the *subsidiary undertaking* as a result of the transfer of funds or repayment of liabilities;
- (5) whether there are any exchange controls that may have an impact on the transfer of funds or repayment of liabilities;
- (6) whether there are assets in the *subsidiary undertaking* available either to be transferred or liquidated for the purposes of the transfer of funds or repayment of liabilities;
- (7) whether any regulatory requirements impact on the ability of the *subsidiary undertaking* to transfer funds or repay liabilities promptly;
- (8) whether the purpose of the *subsidiary undertaking* prejudices the prompt transfer of funds or repayment of liabilities;
- (9) whether the legal structure of the *subsidiary undertaking* prejudices the prompt transfer of funds or repayment of liabilities;
- (10) whether the contractual relationships of the *subsidiary undertaking* with the *firm* and other third parties prejudices the prompt transfer of funds or repayment of liabilities;
- (11) whether past and proposed flows of funds between the *subsidiary undertaking* and the *firm* demonstrate the ability to make prompt transfer of funds or repayment of liabilities; and
- (12) whether the degree of solo consolidation by the *firm* undermines the *FSA's* ability to assess the soundness of the *firm* as a legal entity (taking into account any other *subsidiary undertakings* to which *BIPRU 2.1* is being applied).

- 2.1.26 G The effect of *BIPRU 2.1.19R* is that even though a *firm's solo consolidation waiver* applies *BIPRU 2.1* with respect to a *subsidiary undertaking*, the *firm* should not apply *BIPRU 2.1* with respect to that *subsidiary undertaking* unless in addition it meets the conditions in *BIPRU 2.1.20R* to *BIPRU 2.1.24R*.
- 2.1.27 G A *firm* should not apply *BIPRU 2.1* to a *subsidiary undertaking* to which the *firm's solo consolidation waiver* applies if it ceases to be a *subsidiary undertaking* of the *firm* even if the *solo consolidation waiver* is not varied by removing the *subsidiary undertaking*.
- 2.1.28 G If a *subsidiary undertaking* referred to in *BIPRU 2.1.27G* later becomes a *subsidiary undertaking* again the *firm* should not apply *BIPRU 2.1* to it unless the *solo consolidation waiver* is varied to re-apply it with respect to the *subsidiary undertaking*.

2.2 Internal capital adequacy standards

Application

2.2.1 G *BIPRU 2.2* applies to a *BIPRU firm*.

Purpose

- 2.2.2 G (1) *BIPRU 2.2* sets out *guidance* on *GENPRU 1.2* (Adequacy of financial resources) so far as it applies to a *BIPRU firm*. In particular it sets out *guidance* on how a *firm* should carry out its *ICAAP*, as well as some factors the *FSA* will take into consideration when undertaking a *SREP*. The terms *ICAAP* and *SREP* are explained in *BIPRU 2.2.4G*. *BIPRU 2.2.41R - BIPRU 2.2.43R* are *rules* that apply to a *firm* with an *IRB permission*.
- (2) *BIPRU 2.2* is for the most part written on the basis that *GENPRU 1.2* (Adequacy of financial resources) applies to a *firm* on a solo basis. However it is still relevant when *GENPRU 1.2* applies on a consolidated basis. When *GENPRU 1.2* applies on a consolidated basis, *BIPRU 2.2* should be read with appropriate adjustments.

Meaning of capital

2.2.3 G For the purpose of *BIPRU 2.2*, “capital” refers to a *firm’s* financial resources, *capital resources* and internal capital, all as referred to in the *overall Pillar 2 rule*.

The ICAAP and the SREP: Introduction

- 2.2.4 G The adequacy of a *firm’s* capital needs to be assessed both by a *firm* and the *FSA*. This process involves:
- (1) an *internal capital adequacy assessment process (ICAAP)*, which a *firm* is obliged to carry out in accordance with the *ICAAP rules*; and
 - (2) a *supervisory review and evaluation process (SREP)*, which is conducted by the *FSA*.

The ICAAP and the SREP: The ICAAP

- 2.2.5 G The obligation to conduct an *ICAAP*, includes requirements on a *firm* to:
- (1) carry out regularly assessments of the amounts, types and distribution of financial resources, *capital resources* and internal capital that it considers adequate to cover the nature and level of the risks to which it is or might be exposed (*GENPRU 1.2.30R* to *GENPRU 1.2.41G* (the *overall Pillar 2 rule* and related *rules*);
 - (2) identify the major sources of risk to its ability to meet its liabilities as they fall due (the *overall Pillar 2 rule*);

- (3) conduct stress and scenario tests (the *general stress and scenario testing rule*), taking into account, in the case of a *firm* with an *IRB permission*, the stress test required by *BIPRU 4.3.39R* to *BIPRU 4.3.40R* (Stress tests used in assessment of capital adequacy for a *firm* with an *IRB permission*);
 - (4) ensure that the processes, strategies and systems required by the *overall Pillar 2 rule* and used in its *ICAAP*, are both comprehensive and proportionate to the nature, scale and complexity of that *firm's* activities (*GENPRU 1.2.35R*); and
 - (5) document its *ICAAP* (*GENPRU 1.2.60R*).
- 2.2.6 G Where a *firm* is a member of a group, it should base its *ICAAP* on the consolidated financial position of the group. The group assessment should include information on diversification benefits and transferability of resources between members of the group and an apportionment of the capital required by the group as a whole to the *firm* (*GENPRU 1.2.44G* to *GENPRU 1.2.56G* (Application of *GENPRU 1.2* on a solo and consolidated basis: Processes and tests)). A *firm* may, instead of preparing the *ICAAP* itself, adopt as its *ICAAP* an assessment prepared by other group members.
- 2.2.7 G A *firm* should ensure that its *ICAAP* is:
- (1) the responsibility of the *firm's governing body*;
 - (2) reported to the *firm's governing body*; and
 - (3) forms an integral part of the *firm's* management process and decision-making culture.

The ICAAP and the SREP: The SREP

- 2.2.8 G The *FSA* will review an *ICAAP* and, if the *firm* has an *IRB permission*, the result of the *firm's* stress test carried out under *BIPRU 4.3.39R* to *BIPRU 4.3.40R* (Stress tests used in assessment of capital adequacy for a *firm* with an *IRB permission*), as part of its *SREP*. Provided that the *FSA* is satisfied with the appropriateness of a *firm's* capital assessment, the *FSA* will take into account that *firm's ICAAP* and stress test in its *SREP*. More material on stress tests for a *firm* with an *IRB permission* can be found in *BIPRU 2.2.41R* to *BIPRU 2.2.45G*.
- 2.2.9 G The *SREP* is a process under which the *FSA*:
- (1) reviews the arrangements, strategies, processes and mechanisms implemented by a *firm* to comply with *GENPRU*, *BIPRU* and *SYSC* and with requirements imposed by or under the *regulatory system* and evaluates the risks to which the *firm* is or might be exposed;
 - (2) determines whether the arrangements, strategies, processes and mechanisms implemented by the *firm* and the capital held by the *firm* ensures a sound management and coverage of the risks in (1); and

- (3) (if necessary) requires the *firm* to take the necessary actions or steps at an early stage to address any failure to meet the requirements referred to in (1).
- 2.2.10 G As part of its *SREP*, the *FSA* may ask a *firm* to provide it with the results of that *firm's ICAAP*, together with an explanation of the process used. Where appropriate, the *FSA* will ask for additional information on the *ICAAP*.
- 2.2.11 G As part of its *SREP*, the *FSA* will consider whether the amount of capital which a *firm* should hold to meet its *CRR* in *GENPRU 2.1* (Calculation of capital resources requirements) is sufficient for that *firm* to comply with the *overall financial adequacy rule*. Where the amount of capital which the *FSA* considers a *firm* should hold is not the same as that which results from a *firm's ICAAP*, the *FSA* expects to discuss any such difference with that *firm*. Where necessary, the *FSA* may consider the use of its powers under section 166 of the *Act* (reports by skilled persons) to assist in such circumstances.
- 2.2.12 G After completing a review as part of the *SREP*, the *FSA* will normally give that *firm* individual guidance (*individual capital guidance*), advising it of the amount of capital which it should hold to meet the *overall financial adequacy rule*.
- 2.2.13 G If a *firm* considers that *ICG* given to it is inappropriate to its circumstances it should, consistent with *Principle 11* (relations with regulators), inform the *FSA* that it disagrees with that *guidance*. The *FSA* may reissue *individual capital guidance* if after discussion with the *firm* the *FSA* concludes that the amount of capital that the *firm* should hold to meet the *overall financial adequacy rule* is different from the amount initially suggested by the *FSA*.
- 2.2.14 G The *FSA* will not give *individual capital guidance* to the effect that the amount of capital advised in that *guidance* is lower than the amount of capital which a *firm* should hold to meet its *CRR*.
- 2.2.15 G If, after discussion, the *FSA* and a *firm* still do not agree on an adequate level of capital, the *FSA* may consider using its powers under section 45 of the *Act* to vary on its own initiative a *firm's Part IV permission* so as to require it to hold capital in accordance with the *FSA's* view of the capital necessary to comply with the *overall financial adequacy rule*. *SUP 7* provides further information about the *FSA's* powers under section 45.

The drafting of individual capital guidance

- 2.2.16 G If the *FSA* gives *individual capital guidance* to a *firm*, the *FSA* will state what amount and quality of capital the *FSA* considers the *firm* needs to hold in order to comply with the *overall financial adequacy rule*. It will generally do so by saying that the *firm* should hold *capital resources* of an amount at least equal to a specified percentage of that *firm's capital resources requirement*.
- 2.2.17 G (1) *Individual capital guidance* may refer to two types of *capital resources*.
- (2) The first type is referred to as general capital. It refers to total *tier one capital resources* and *tier two capital resources* after deductions.

- (3) The second type is referred to as total capital. It refers to total *tier one capital resources*, *tier two capital resources* and *tier three capital resources* after deductions.
- 2.2.18 G (1) In both of the cases in *BIPRU 2.2.17G capital resources* should be calculated in the same way as they are in *GENPRU 2.2 (Capital resources)*. This includes the *rules* limiting the amount of capital that can be included in the various tiers of capital when *capital resources* are being calculated.
- (2) *GENPRU 2.2.42R* does not allow *innovative tier one capital* to count as *tier one capital resources* for certain purposes. This restriction does not apply for the purposes in *BIPRU 2.2.17G*.
- 2.2.19 G (1) *Individual capital guidance* may also be given with respect to group capital resources. This paragraph explains how such *guidance* should be interpreted unless the *individual capital guidance* specifies another interpretation.
- (2) If *BIPRU 8.2.1R (General consolidation rule for a UK consolidation group)* applies to the *firm* the *guidance* relates to its *UK consolidation group*. If *BIPRU 8.3.1R (General consolidation rule for a non-EEA sub-group)* applies to the *firm* the *guidance* relates to its *non-EEA sub-group*. If both apply to the *firm* the *guidance* relates to its *UK consolidation group* and to its *non-EEA sub-group*.
- (3) The *guidance* will be on the *overall financial adequacy rule* as it applies on a consolidated basis under *GENPRU 1.2.59R (Application of GENPRU 1.2 on a solo and consolidated basis: Adequacy of resources)* and insofar as it refers to capital resources.
- (4) *BIPRU 2.2.16G* to *BIPRU 2.2.18G* apply for the purpose of this paragraph as they apply to *guidance* given on a solo basis. References to *capital resources* should be read as being to *consolidated capital resources*.

Failure to meet individual capital guidance

- 2.2.20 G A *firm's* continuing to hold capital in accordance with its *individual capital guidance* and its ability to carry on doing so is a fundamental part of the *FSA's* supervision of that *firm*. Therefore if a *firm's capital resources* have fallen, or are expected to fall, below the level advised in *individual capital guidance*, then, consistent with *Principle 11 (Relations with regulators)*, a *firm* should inform the *FSA* of this fact as soon as practicable, explaining why this has happened or is expected to happen and:
- (1) what action the *firm* intends to take to increase its capital resources or to reduce its risks and hence its capital requirements; or
- (2) what modification the *firm* considers should be made to the *individual capital guidance* which it has been given.

- 2.2.21 G In the circumstance set out in *BIPRU 2.2.20G*, the *FSA* may ask a *firm* for alternative or more detailed proposals and plans or further assessments and analyses of capital adequacy and risks faced by the *firm*. The *FSA* will seek to agree with the *firm* appropriate timescales and scope for any such additional work, in light of the circumstances which have arisen.
- 2.2.22 G If a *firm* has not accepted *individual capital guidance* given by the *FSA* it should, nevertheless, inform the *FSA* as soon as practicable if its capital resources have fallen, or are expected to fall, below the level suggested by that *individual capital guidance*.
- 2.2.23 G *BIPRU 2.2.20G - BIPRU 2.2.22G* also apply to *individual capital guidance* given on a consolidated basis as referred to in *BIPRU 2.2.19G*.

Proportionality of an ICAAP

- 2.2.24 G *BIPRU 2.2.25G to 2.2.27G* set out what the *FSA* considers to be a proportional approach to preparing an *ICAAP* as referred to in *GENPRU 1.2.35R* (The processes, strategies and systems required by the *overall Pillar 2 rule* should be comprehensive and proportionate), according to the relative degree of complexity of a *firm's* activities. If a *firm* adopts the appropriate approach, it may enable the *FSA* more easily to review a *firm's ICAAP* when the *FSA* undertakes its *SREP*. The *FSA* is also likely to place more reliance on an *ICAAP* which takes the appropriate form described in *BIPRU 2.2.25G to 2.2.27G* than would otherwise be the case although there may also be circumstances in which the *FSA* will be able to rely on an *ICAAP* that is not drawn up in that form.
- 2.2.25 G (1) This paragraph applies to a *firm* whose activities are simple.
- (2) In carrying out its *ICAAP* it could:
- (a) identify and consider that *firm's* largest losses over the last 3 to 5 years and whether those losses are likely to recur;
 - (b) prepare a short list of the most significant risks to which that *firm* is exposed;
 - (c) consider how that *firm* would act, and the amount of capital that would be absorbed, in the event that each of the risks identified were to materialise;
 - (d) consider how that *firm's CRR* might alter under the scenarios in (c) and how its *CRR* might alter in line with its business plans for the next 3 to 5 years;
 - (e) consider whether any of the risks in the *overall Pillar 2 rule* is applicable to the *firm* (it is unlikely that any of those risks not already identified in (a) or (b) will apply to a *firm* whose activities are simple);

- (f) document the ranges of capital required in the scenarios identified and form an overall view on the amount and quality of capital which that *firm* should hold, ensuring that its senior management is involved in arriving at that view; and
 - (g) (in order to determine the amount of capital that would be absorbed in the circumstances detailed in (c)) carry out simple sensitivity tests where the *firm* analyses the impact of a shift in the key risk parameters identified in (b) on the earnings of the *firm*.
- (3) A *firm* is also expected to form a view on the consolidated amount of capital it should hold as well as the capital required to be held in respect of each of the individual risks identified under the *overall Pillar 2 rule*. For that purpose, it may conservatively sum the results of the individual tests performed in (2)(c). If the *firm* chooses however to reduce that sum on the understanding that not all risks will materialise at the same time, then the *firm* should perform scenario tests that demonstrate that a reduction in capital is legitimate.
- (4) A *firm* should consider the impact of an economic or industry downturn on its future earnings taking into account its business plans.

2.2.26 G In relation to a *firm* whose activities are moderately complex, in carrying out its *ICAAP BIPRU 2.2.25G*(3) to (4) apply. In addition, it could:

- (1) having consulted the management in each major business line, prepare a comprehensive list of the major risks to which the business is exposed;
- (2) estimate, with the aid of historical data, where available, the range and distribution of possible losses which might arise from each of those risks and consider using shock stress tests to provide risk estimates;
- (3) consider the extent to which that *firm*'s *CRR* adequately captures the risks identified in (1) and (2);
- (4) for areas in which the *CRR* is either inadequate or does not address a risk, estimate the additional capital (if any) needed to protect that *firm* and its *customers*, in addition to any other risk mitigation action that *firm* plans to take;
- (5) consider the risk that that *firm*'s own analyses of capital adequacy may be inaccurate and that it may suffer from management weaknesses, which affect the effectiveness of its risk management and mitigation;
- (6) project that *firm*'s business activities forward in detail for one year and in less detail for the next 3 to 5 years and estimate how that *firm*'s capital and *CRR* would alter, assuming that business develops as expected;

- (7) assume that business does not develop as expected and consider how that *firm's* capital and *CRR* would alter and what that *firm's* reaction to a range of adverse economic scenarios might be (see *GENPRU 1.2.30R* to *GENPRU 1.2.43G* (the *overall Pillar 2 rule* and related rules);
- (8) document the results obtained from the analyses in (2), (4), (6), and (7) in a detailed report for that *firm's* senior management, and, where relevant, its *governing body*; and
- (9) ensure that systems and processes are in place to review against performance the accuracy of the estimates made in (2), (4), (6) and (7).

2.2.27

- G (1) This paragraph applies to a proportional *ICAAP* in the case of a *firm* whose activities are complex.
- (2) A proportional approach to that *firm's ICAAP* should cover the matters identified in *BIPRU 2.2.26G*, but is likely also to involve the use of models, most of which will be integrated into its day-to-day management and operation.
- (3) Models of the sort referred to in (2) may be linked so as to generate an overall estimate of the amount of capital that a *firm* considers appropriate to hold for its business needs. For example, a *firm* is likely to use value at risk models for *market risk* (see *BIPRU 7.10*), advanced modelling approaches for credit risk (see *BIPRU 4*) and, possibly, *advanced measurement approaches* for *operational risk* (see *BIPRU 6.5*). A *firm* might also use economic scenario generators to model stochastically its business forecasts and risks. A *firm* may also link such models to generate information on the economic capital desirable for that *firm*. A model which a *firm* uses to generate its target amount of economic capital is known as an economic capital model (ECM). Economic capital is the target amount of capital which maximises the return for a *firm's* stakeholders for a desired level of risk.
- (4) A *firm* is also likely to be part of a *group* and to be operating internationally. There is likely to be centralised control over the models used throughout the *group*, the assumptions made and their overall calibration.

- (5) The more a *firm* integrates into its business such economic capital modelling, the more it is likely to focus on managing risks for the benefit of its stakeholders. Consequently, ECMs may produce capital estimates that differ from the amount of capital needed for regulatory purposes. For the *FSA* to rely on the results of a *firm*'s models, including ECMs, a *firm* should be able to explain the basis and results of its models and how the amount of capital produced by its models reflects the amount of capital needed for regulatory purposes. It may be that those amounts are not equal. Where they are not equal, the *FSA* will expect a *firm* to discuss any differences with the *FSA*. However, it may prove difficult to reconcile the outcome of a *firm*'s modelling with the *FSA*'s own assessment of the adequacy of that *firm*'s capital. This may be the case when, for instance, matters of judgment are involved in arriving at a *firm*'s capital assessment, or the *FSA* relies on information which cannot be fully disclosed to the *firm* (for example comparisons with the *firm*'s peers). Nevertheless, a *firm* whose ECM produces a different amount of capital to that required for regulatory purposes is still obliged to comply with the *overall Pillar 2 rule*. A *firm* should therefore be able to explain to the *FSA* how the outcome of its ECM is adjusted so that it complies with the *overall financial adequacy rule* and the *overall Pillar 2 rule*.
- (6) Stress testing should provide senior management with a consolidated view of the amount of risk the *firm* is or might be exposed to under the chosen stress events. Senior management should therefore be presented with information that considers the possibility of the risks materialising simultaneously in various proportions. For instance, it would be misrepresentative to simulate *market risk* stressed events without considering that, in those circumstances, market *counterparties* may be more likely to default. Accordingly, a *firm* could:
- (a) carry out combined stress tests where assets and liabilities are individually subjected to simultaneous changes in two or more risk drivers; for instance, the change in value of each loan made by a *firm* may be estimated using simultaneous changes to both interest rates and stock market or property values;
 - (b) integrate the results of market and credit risk models rather than aggregating the results of each model separately; and
 - (c) consider scenarios which include systemic effects on the *firm* of wider failures in the *firm*'s market or systems upon which the *firm* depends and also any possible systemic effects caused by the *firm* itself suffering losses which affect other market participants which in turn exacerbate the *firm*'s position.
- (7) Furthermore, if a complex *firm* uses an ECM it should validate the assumptions of the model through a comprehensive stress testing programme. In particular this validation should:

- (a) test correlation assumptions (where risks are aggregated in this way) using combined stresses and scenario analyses;
- (b) use stress tests to identify the extent to which the *firm's* risk models omit non-linear effects, for instance the behaviour of derivatives in market risk models; and
- (c) consider not just the effect of parallel shifts in interest rate curves, but also the effect of curves becoming steeper or flatter.

Guidance on risks to be covered in an ICAAP

- 2.2.28 G *BIPRU 2.2.30G to BIPRU 2.2.40G set out guidance on some of the sources of risk identified in the overall Pillar 2 rule. BIPRU 2.2.41R to 2.2.45G have material relating to a firm with an IRB permission.*
- 2.2.29 G (1) *A firm may take into account factors other than those identified in the overall Pillar 2 rule when it assesses the level of capital it wishes to hold. These factors might include external rating goals, market reputation and its strategic goals. However, a firm should be able to distinguish, for the purpose of its dialogue with the FSA, between capital it holds in order to comply with the overall financial adequacy rule and to meet the risks set out in the overall Pillar 2 rule and that held for other purposes.*
- (2) *The calibration of the CRR assumes that a firm's business is well-diversified, well-managed with assets matching its liabilities and good controls, and stable with no large, unusual or high risk transactions. A firm may find it helpful to assess the extent to which its business in fact differs from these assumptions and therefore what adjustments it might be reasonable for it to make to the CRR to arrive at an adequate level of capital resources.*

Interest rate risk arising from non-trading book activities

- 2.2.30 G *A firm should assess its exposure to changes in interest rates, in particular risks arising from the effect of interest rate changes on non-trading book activities that are not captured by the CRR. In doing so, a firm may wish to use stress tests to determine the impact on its balance sheet of a change in market conditions.*

Securitisation risk

- 2.2.31 G *A firm should assess its exposure to risks transferred through the securitisation of assets should those transfers fail for whatever reason. A firm should consider the effect on its financial position of a securitisation arrangement failing to operate as anticipated or of the values and risks transferred not emerging as expected.*

Residual risk

- 2.2.32 G A *firm* should assess its exposure to residual risks that may result from the partial performance or failure of *credit risk mitigation* techniques for reasons that are unconnected with their intrinsic value. This could result from, for instance, ineffective documentation, a delay in payment or the inability to realise payment from a guarantor in a timely manner. Given that residual risks can always be present, a *firm* should assess the appropriateness of its *CRR* against its assumptions which underlie any risk mitigation measures it may have in place.

Concentration risk

- 2.2.33 G A *firm* should assess, and monitor, in detail its exposure to sectoral, geographic, liability and asset concentrations. The *FSA* considers that concentrations in these areas increase a *firm's* exposure to credit risk. Where a *firm* identifies such concentrations it should consider the adequacy of its *CRR*.

Liquidity risk

- 2.2.34 G In accordance with the *overall Pillar 2 rule* a *firm* should consider its exposure to *liquidity risk* and assess its response should that risk materialise.
- 2.2.35 G When assessing *liquidity risk*, a *firm* should consider the extent to which there is a mismatch between assets and liabilities.
- 2.2.36 G A *firm* should also, when assessing *liquidity risk*, consider the amount of assets it holds in highly liquid, marketable forms that are available should unexpected cash flows lead to a liquidity problem. The price concession of liquidating assets is of prime concern when assessing such *liquidity risk* and should therefore be built into a *firm's ICAAP*.
- 2.2.37 G Some further areas to consider in developing the *liquidity risk* scenario might include:
- (1) any mismatching between expected asset and liability cash flows;
 - (2) the inability to sell assets quickly;
 - (3) the extent to which a *firm's* assets have been pledged; and
 - (4) the possible need to reduce large asset positions at different levels of market liquidity and the related potential costs and timing constraints.

Business risk: General

- 2.2.38 G A *firm's CRR*, being risk-sensitive, may vary as business cycles and economic conditions fluctuate over time. A deterioration in business or economic conditions could require a *firm* to raise capital or, alternatively, to contract its businesses, at a time when market conditions are most unfavourable to raising capital. Such an effect is known as procyclicality.

- 2.2.39 G To reduce the impact of cyclical effects, a *firm* should aim to maintain an adequate capital buffer during an upturn in business and economic cycles such that it has sufficient capital available to protect itself in unfavourable market conditions.
- 2.2.40 G To assess its expected capital requirements over the economic and business cycles, a *firm* may wish to project forward its financial position taking account of its business strategy and expected growth according to a range of assumptions as to the state of the economic or business environment which it faces. For example, an *ICAAP* should include an analysis of the impact that the actions of a *firm's* competitors might have on its performance, in order to see what changes in its environment the *firm* could sustain. Projections over a three to five year period would be appropriate in most circumstances. A *firm* may then calculate its projected *CRR* and assess whether it could be met from expected financial resources.

Business risk: Stress tests for firms using the IRB approach

- 2.2.41 R A *firm* with an *IRB permission* must ensure that there is no significant risk that it will not be able to meet its capital resource requirements for credit risk under *GENPRU 2.1* (Calculation of capital resources requirements) at all times throughout an economic cycle, including the capital resources requirements for credit risk indicated by any stress test carried out under *BIPRU 4.3.39R* to *BIPRU 4.3.40R* (Stress tests used in assessment of capital adequacy for a *firm* with an *IRB permission*) as being likely to apply in the scenario tested. For the purpose of deciding what *capital resources* are or will be available to meet those credit risk requirements from time to time a *firm* must exclude *capital resources* that are likely to be required to meet its other capital requirements under *GENPRU 2.1* at the relevant time. A *firm* must also be able to demonstrate to the *FSA* at any time that it is complying with this *rule*.
- 2.2.42 R *BIPRU 2.2.41R* applies to a *firm* on a solo basis if *BIPRU 4* (IRB approach) applies to it on a solo basis and applies on a consolidated basis if *BIPRU 4* does.
- 2.2.43 R If *BIPRU 2.2.41R* applies to a *firm* on a consolidated basis the following adjustments are made to *BIPRU 2.2.41R* in accordance with the general principles of *BIPRU 8* (Group risk – consolidation):
- (1) references to *capital resources* are to the *consolidated capital resources* of the *firm's UK consolidation group* or, as the case may be, its *non-EEA sub-group*; and
 - (2) references to the capital requirements in *GENPRU 2.1* (Calculation of capital resources requirements) are to the consolidated capital requirements with respect to the *firm's UK consolidation group* or, as the case may be, its *non-EEA sub-group* under *BIPRU 8* (Group risk - consolidation).

- 2.2.44 G If a *firm's* current available *capital resources* are less than the capital resources requirement indicated by the stress test that need not be a breach of *BIPRU 2.2.41R*. The *firm* may wish to set out any countervailing effects and off-setting actions that can be demonstrated to the satisfaction of the *FSA* as being likely to reduce the difference referred to in the first sentence. The *FSA* is only likely to consider a demonstration of such actions as credible if those actions are set out in a capital management plan based on the procedures in *GENPRU 1.2.73G* (Stress tests and scenario analyses throughout an economic or business cycle) and including a plan of the type referred to in *GENPRU 1.2.73G(4)* that has been approved by the *firm's* senior management or *governing body*.
- 2.2.45 G The countervailing factors and off-setting actions that a *firm* may rely on as referred to in *BIPRU 2.2.44G* include, but are not limited to, projected balance sheet shrinkage, growth in *capital resources* resulting from retained profits between the date of the stress test and the projected start of the economic downturn, the possibility of raising new capital in a downturn, the ability to reduce dividend payments or other distributions, and the ability to allocate capital from other risks which can be shown to be negatively correlated with the *firm's* credit risk profile.

Systems and controls

- 2.2.46 G A *firm* may decide to hold additional capital to mitigate any weaknesses in its overall control environment. These weaknesses might be indicated by the following:
- (1) a failure by a *firm* to complete an assessment of its systems and controls to establish whether they comply with *SYSC*; or
 - (2) a failure by a *firm's* senior management to approve its financial results; or
 - (3) a failure by a *firm* to consider an analysis of relevant internal and external information on its business and control environment.
- 2.2.47 G In considering if there are any systems and control weaknesses and their effect on the adequacy of the *CRR*, a *firm* should be able to demonstrate to the *FSA* that all the issues identified in *SYSC 3.2* (Areas covered by systems and controls) have been considered and that appropriate plans and procedures exist to deal adequately with adverse scenarios.

Risks which may be considered according to the nature of the activities of a firm

- 2.2.48 G (1) *BIPRU 2.2.49G* to *BIPRU 2.2.70G* set out *guidance* for:
- (a) a *bank* or *building society*;
 - (b) an asset management *firm*; and
 - (c) a securities *firm*;
- whose activities are either simple or moderately complex.

- (2) *BIPRU 2.2.49G to BIPRU 2.2.70G* provide examples of the sorts of risks which such a *firm* might typically face and of stress tests or scenario analyses which it might carry out as part of its *ICAAP*.
- (3) The material on securities *firms* is also relevant to a *commodities firm*.

Banks and building societies

- 2.2.49 G The *FSA* considers that the concentration risk resulting from concentrated portfolios is significant for most *banks* and *building societies*.
- 2.2.50 G If a *bank* or *building society* chooses to use the *CRR* as a starting point for its capital assessment, it should remember that, when assessing its exposure to concentration risk, the calculation of the *CRR* is based on the assumption that a *firm* is well-diversified.
- 2.2.51 G In assessing the degree of credit concentration, a *bank* or *building society* should consider its degree of credit concentration in a particular economic or geographic area. Where the business of a *firm* is, by its nature, concentrated (for example, a specialised *firm* lending to one sector only), a *firm* should consider the impact of adverse economic factors, such as a rise in unemployment in the area in which it has a concentration of *exposures*, and its impact on asset quality. A gradual change of cultural environment could also affect a *bank* or *building society* and a *firm* should consider whether this issue should be the subject of scenario analysis.
- 2.2.52 G Typically, a *building society's* portfolio is concentrated. The extent to which a *building society* can diversify its business is limited. A *building society* should, nevertheless, consider the impact of geographic concentrations on its capital by, for instance, analysing the effect of local economic factors such as unemployment and its impact on arrears, house prices and loan-to-value ratios.
- 2.2.53 G Similarly, a *building society* should consider the concentration in its portfolio of certain product types that have, inherently, a more than average risk (for example, lifetime mortgages). It should, through scenario analyses in relation to its portfolio, assess the potential impact on its profitability and capital of those scenarios.
- 2.2.54 G In relation to the *BIPRU 10* (Concentration risk), a *bank* or *building society* should take into account factors such as future business growth and cyclicity when it assesses the amount of capital which it will need to remain in compliance with those *rules*. A *firm* may also consider in its assessment whether any *large exposures* that it has identified are positively correlated.
- 2.2.55 G Where a *bank* or *building society* lends to a *counterparty* which it assesses as representing a high credit risk, it should assess whether compliance with the *rules* in *BIPRU* in relation to credit risk is sufficient for it to manage that risk prudently.

- 2.2.56 G The performance of specialised portfolios may, in some instances, depend on key individuals. This factor exacerbates concentration risk because the skill of those individuals in part limits the risk arising from a concentrated portfolio. The impact of those individuals is likely to be correspondingly greater in small *firms*. In developing its stress tests and scenario analyses, a *bank* or *building society* should therefore consider the impact of losing key individuals on its ability to operate normally, as well as the direct impact on its revenues.
- 2.2.57 G A *bank* or *building society* should assess the sensitivity of its financial position to adverse movements in interest rates. For instance, a *bank* or *building society* should assess its sensitivity to interest rate risk arising from interest rate mismatches between assets and liabilities. A *building society* is exposed to interest rate risk to the extent that it borrows on a short term basis but lends over a longer period.
- 2.2.58 G When assessing the adequacy of its capital, a *bank* or *building society* should not only consider the vulnerability of its revenue, but also the sensitivity of its funding and, in particular, its ability to raise additional funding in time of economic stress. A *bank* or *building society* should therefore consider whether its funding pool is sufficiently diversified. For example, where a *bank* is reliant solely on its parent to provide funding, its access to funds may be suddenly restricted should the parent's creditworthiness be downgraded. Similarly, a *bank* or *building society* may consider the impact of an increase in bond rates or a rating downgrade, if relevant, on its capital cost and its subsequent ability to raise capital.
- 2.2.59 G A *bank* or *building society* should assess the impact of its business plans on its capital over the time horizon which it uses in its business plans. A *bank* or *building society* should assess the impact on its capital of diversifying its activities and the risk it runs of failing to manage that new business successfully. For that purpose, it may consider the cost of a price war to enter a new competitive market or the risk of mis-pricing some products as a result of not having sufficient expertise in its new area of business.
- 2.2.60 G A *bank* or *building society* is also exposed to reputational risk, as its ability to underwrite new business is heavily reliant on the standing of the reputation of the *firm*. A *bank* or *building society* may consider the impact on its financial position of legal disputes which damage its reputation.

An asset management firm

- 2.2.61 G An asset manager is primarily exposed to *operational risk* and reputational risk.
- 2.2.62 G When assessing reputational risk an asset manager should consider issues such as:
- (1) how poor performance can affect its ability to generate profits;
 - (2) the effect on its financial position should one or more of its key fund managers leave that *firm*;

- (3) the effect on its financial position should it lose some of its largest customers; and
 - (4) how poor customer services can affect its financial position; for example, a *firm* which has outsourced the management of customer accounts may want to consider the impact on its own reputation of the service provider failing to deliver the service.
- 2.2.63 G As an asset manager's mandates become more complex, the risk of it failing to comply fully with the terms of its contracts increases. In the event of such failure, a *firm* can be exposed to substantial losses resulting from *customers'* claims and legal actions. Although the *FSA* would expect an asset manager to have in place adequate controls to mitigate that risk, it may also like to consider the potential cost to it should *customers* claim that it has not adhered to mandates. Past claims and compensation may provide a useful benchmark for an asset manager to assess its sensitivity to future legal action. In assessing the adequacy of its capital, an asset manager may therefore consider whether it could absorb the highest operational loss it has suffered over the last 3 to 5 years.
- 2.2.64 G In relation to the issues identified in *BIPRU 2.2.63G*, an asset manager should consider, for example:
- (1) the direct cost to it resulting from fraud or theft;
 - (2) the direct cost arising from *customers'* claims and legal action in the future; an asset manager could consider the impact on its financial position if a legal precedent were to encourage its *customers* to take legal action against that *firm* for failing to advise correctly on a certain type of product; the relevance of such scenarios is likely to depend on whether the asset manager is acting on a discretionary basis or solely as advisor; and
 - (3) where it has obtained professional indemnity insurance, the deductibles and individual or aggregate limits on the sums insured.
- 2.2.65 G The *FSA* expects an asset manager to consider the impact of economic factors on its ability to meet its liabilities as they fall due. An asset manager should therefore develop scenarios which relate to its strategic and business plan. An asset manager might therefore consider:
- (1) the effect of a market downturn affecting both transaction volumes and the market values of assets in its funds; in assessing the impact of such a scenario, an asset manager may consider the extent to which it can remain profitable (for example, by rapidly scaling down its activities and reducing its costs);
 - (2) the impact on current levels of capital if it plans to undertake a significant restructuring; and

- (3) the impact on current levels of capital if it plans to enter a new market or launch a new product; it should assess the amount of capital it needs to hold, when operating for the first time in a market in which it lacks expertise.

A securities firm

- 2.2.66 G (1) A securities *firm* may consider the impact of the situations listed in (a) to (c) on its capital levels when assessing its exposure to concentration risk:
- (a) the potential loss that could arise from large exposures to a single *counterparty*;
 - (b) the potential loss that could arise from exposures to large transactions or to a product type; and
 - (c) the potential loss resulting from a combination of events such as a sudden increase in volatility leaving a hitherto fully-margined client unable to meet the margin calls due to the large size of the underlying *position* and the subsequent difficulties involved in liquidating its *position*.
- (2) An example of the analysis in (1)(b) relates to a securities *firm* which relies on the income generated by a large, one-off corporate finance transaction. It may want to consider the possibility of legal action arising from that transaction which prevents the payment of its fees. Additionally, an underwriting *firm* may, as a matter of routine, commit to place a large amount of securities. It may therefore like to assess the impact of losses arising from a failure to place the securities successfully.
- 2.2.67 G Where a securities *firm* deals in illiquid securities (for example, unlisted securities or securities listed on illiquid markets), or holds illiquid assets, potentially large losses can arise from trades that have failed to settle or because of large unrealised market losses. A securities *firm* may therefore consider the impact of *liquidity risk* on its exposure to:
- (1) credit risk; and
 - (2) *market risk*.
- 2.2.68 G Counterparty risk *rules* only partially capture the risk of settlement failure as the quantification of risk is only based on mark-to-market values and does not take account of the volatility of the securities over the settlement period. A securities *firm's* assessment of its exposure to counterparty risk should take into account:
- (1) whether it acts as arranger only or whether it also executes trades;
 - (2) the types of execution venues which it uses; for example, the London Stock Exchange or a retail service provider (RSP) have more depth than alternative trading systems (ATS); and

- (3) whether it offers extended settlements and free delivery compared to delivery versus payment business.
- 2.2.69 G (1) A securities *firm* should also consider the impact of external factors on the levels of capital it needs to hold. Scenarios covering such external factors should relate to its strategy and business plan. A securities *firm* might wish to consider the questions in (2) to (7).
- (2) Whether it plans to participate in a one-off transaction that might strain temporarily or permanently its capital.
- (3) Whether the unevenness of its revenue suggests that it should hold a capital buffer. Such an assessment could be based, for instance, on an analysis of past revenue and the volatility of its capital.
- (4) How its income might alter as interest rates fluctuate where it is obliged to pay interest to its clients in excess of interest it earns on client money deposits.
- (5) How its capital would be affected by a market downturn. For instance, how sensitive that *firm* is to a sharp reduction of trading volumes.
- (6) How political and economic factors will affect that *firm's* business. For instance, a *commodity firm* may wish to consider the impact of a sharp increase in prices on initial margins and, consequently, on its liquidity.
- (7) Whether it anticipates expanding its activities (for example, by offering clearing services), and if so, the impact on its capital.
- 2.2.70 G A securities *firm* may also want to assess the impact of its internal credit limits on its levels of capital. For instance, a *firm* whose internal procedures authorise dealing without cash in the account or without pre-set dealing limits might consider more capital is required than if it operated stricter internal credit limits.

Capital models

- 2.2.71 G A *firm* may approach its assessment of adequate capital by developing a model, including an ECM (see *BIPRU 2.2.27G*), for some or all of its business risks. The assumptions required to aggregate risks modelled and the confidence levels adopted should be considered by a *firm's* senior management. A *firm* should also consider whether any relevant risks, including systems and control risks, are not captured by the model.
- 2.2.72 G A *firm* should not expect the *FSA* to accept as adequate any particular model that it develops or automatically to reflect the results from the model in any *individual capital guidance*. However, the *FSA* will take into account the results of a sound and prudent model when giving *individual capital guidance* (see *GENPRU 1.2.19G* (Outline of provisions related to *GENPRU 2.1* (Adequacy of financial resources))).
- 2.2.73 G There is no prescribed approach as to how a *firm* should develop its internal capital model. However, a *firm* should be able to demonstrate:

- (1) the confidence levels set and whether these are linked to its corporate strategy;
 - (2) the time horizons set for the different types of business that it undertakes;
 - (3) the extent of historic data used and back-testing carried out;
 - (4) that it has in place a process to verify the correctness of the model's outputs; and
 - (5) that it has the skills and resources to operate, maintain and develop the model.
- 2.2.74 G In relation to the use of an ECM (see *BIPRU 2.2.27G*), the *FSA* is likely to place more reliance on a *firm's ICAAP* if the *firm* provides the following information:
- (1) a comparison of the amount of capital that the ECM generates in respect of each of the risks captured in the *CRR* before aggregation with the corresponding components of the *CRR* calculation; and
 - (2) evidence that the *guidance* in *BIPRU 2.2.71G* to *2.2.78G* has been followed.
- 2.2.75 G If a *firm* adopts a top-down approach to developing its internal model, it should be able to allocate the outcome of the internal model to risks it has previously identified in relation to each separate legal entity, business unit or business activity, as appropriate. In relation to a *firm* which is a member of a group, *GENPRU 1.2.53R* (Application of *GENPRU 1.2* on a solo and consolidated basis: Processes and tests) sets out how internal capital identified as necessary by that *firm's ICAAP* should be allocated.
- 2.2.76 G If a *firm's* internal model makes explicit or implicit assumptions in relation to correlations within or between risk types, or in relation to diversification benefits between business types, the *firm* should be able to explain to the *FSA*, with the support of empirical evidence, the basis of those assumptions.
- 2.2.77 G A *firm's* model should also reflect the past experience of both the *firm* and the sectors in which it operates.
- 2.2.78 G The values assigned to inputs into a *firm's* model should be derived either stochastically, by assuming the value of an item can follow an appropriate probability distribution and by selecting appropriate values at the tail of the distribution, or deterministically, using appropriate prudent assumptions. For options or guarantees which change in value significantly in certain economic or demographic circumstances, a stochastic approach would normally be appropriate.

2.3 Interest rate risk in the non-trading book

Application

2.3.1 R This section of the *Handbook* applies to a *BIPRU firm*.

- 2.3.2 G (1) Interest rate risk in the *non-trading book* will normally be a major source of risk for:
- (a) a *bank*;
 - (b) a *building society*; and
 - (c) a *BIPRU investment firm* that deals on own account (including underwriting on a *firm* commitment basis) and whose *non-trading book* business equals or exceeds 15% of its total business.
- (2) However it will not normally be a significant risk for any other *BIPRU investment firm*.
- (3) The test in (1)(c) should be carried out in the same way as it is for the purpose of the 5% test in *BIPRU 1.2.17R* (Definition of the trading book).
- (4) Where *BIPRU 2.3* is applied on a consolidated basis (see *BIPRU 2.3.13R*) the test in (1)(c) should be carried out in the same way as it is under *BIPRU 8.7.24R* (Trading book size for the purposes of consolidation).
- 2.3.3 G Interest rate risk in the *non-trading book* may arise from a number of sources for example:
- (1) risks related to the mismatch of repricing of assets and liabilities and off balance sheet short and long-term positions;
 - (2) risks arising from hedging exposure to one interest rate with exposure to a rate which reprices under slightly different conditions;
 - (3) risk related to the uncertainties of occurrence of transactions e.g. when expected future transactions do not equal the actual transactions; and
 - (4) risks arising from consumers redeeming fixed rate products when market rates change.

Purpose

2.3.4 G *BIPRU 2.3* sets out more detail on how the systems and controls requirements in *SYSC 3* (Systems and controls) and *GENPRU 1.2.30R* (Processes, strategies and systems for risks) and the requirements about stress and scenario testing in *GENPRU 1.2.36R* apply to interest rate risk in the *non-trading book*.

2.3.5 G *BIPRU 2.3* implements Article 124(5) of the *Banking Consolidation Directive*.

Proportionality

2.3.6 G The *guidance* on proportionality in *BIPRU 2.2* applies to *BIPRU 2.3*.

Stress testing for interest rate risk: General requirement

2.3.7 R (1) As part of its obligations under *GENPRU 1.2.30R* (Processes, strategies and systems for risks) and *GENPRU 1.2.36R* (Stress and scenario tests) a *firm* must carry out an evaluation of its exposure to the interest rate risk arising from its non-trading activities.

(2) The evaluation under (1) must cover the effect of a sudden and unexpected parallel change in interest rates of 200 basis points in both directions.

(3) A *firm* must immediately notify the *FSA* if any evaluation under this *rule* suggests that, as a result of the change in interest rates described in (2), the economic value of the *firm* would decline by more than 20% of its *capital resources*.

2.3.8 G A *firm* should, under *BIPRU 2.3.8R(2)*, apply a 200 basis point shock to each major currency exposure.

2.3.9 G For a larger and/or more complex *firm*, appropriate systems to evaluate and manage interest rate risk in the *non-trading book* may include:

(1) the ability to measure the exposure and sensitivity of the *firm's* activities, if material, to changes in the shape of the yield curve, changes between different market rates (i.e. basis risk) and changes to assumptions (for example those about customer behaviour);

(2) consideration as to whether a purely static analysis of the impact on their current portfolio of a given shock or shocks should be supplemented by a more dynamic simulation approach; and

(3) scenarios in which different interest rate paths are computed and in which some of the assumptions (e.g. about behaviour, contribution to risk and balance sheet size and composition) are themselves functions of interest rate level.

- 2.3.10 G Under *GENPRU* 1.2.60R, a *firm* is required to make a written record of its assessments made under *GENPRU* 1.2. A *firm's* record of its approach to evaluating and managing interest rate risk as it affects the *firm's* non-trading activities should cover the following issues:
- (1) the internal definition of and boundary between “banking book” and “trading activities” (see *BIPRU* 1.2);
 - (2) the definition of economic value and its consistency with the method used to value assets and liabilities (e.g. discounted cashflows);
 - (3) the size and the form of the different shocks to be used for internal calculations;
 - (4) the use of a dynamic and / or static approach in the application of interest rate shocks;
 - (5) the treatment of commonly called “pipeline transactions” (including any related hedging);
 - (6) the aggregation of multicurrency interest rate exposures;
 - (7) the inclusion (or not) of non-interest bearing assets and liabilities (including capital and reserves);
 - (8) the treatment of current and savings accounts (i.e. the maturity attached to exposures without a contractual maturity);
 - (9) the treatment of fixed rate assets (liabilities) where customers still have a right to repay (withdraw) early;
 - (10) the extent to which sensitivities to small shocks can be scaled up on a linear basis without material loss of accuracy (i.e. covering both convexity generally and the non-linearity of pay-off associated with explicit option products);
 - (11) the degree of granularity employed (for example offsets within a time bucket); and
 - (12) whether all future cash flows or only principal balances are included.
- 2.3.11 G The *FSA* will periodically review whether the level of the shock referred to in *BIPRU* 2.3.7R(2) is appropriate in the light of changing circumstances, in particular the general level of interest rates (for instance periods of very low interest rates) and their volatility. A *firm's* internal systems should therefore be flexible enough to compute its sensitivity to any standardised shock that is prescribed. If a 200 basis point shock would imply negative interest rates or if such a shock would otherwise be considered inappropriate, the *FSA* will consider adjusting the requirements accordingly.

Stress testing for interest rate risk: Frequency

- 2.3.12 R (1) A *firm* must carry out the evaluations required by *BIPRU 2.3.7R* as frequently as necessary for it to be reasonably satisfied that it has at all times a sufficient understanding of the degree to which it is exposed to the risks referred to in that *rule* and the nature of that exposure. In any case it must carry out those evaluations no less frequently than required by (2) or (3).
- (2) The minimum frequency of the evaluation in *BIPRU 2.3.7R(1)* is once each year.
- (3) The minimum frequency of the evaluation in *BIPRU 2.3.7R(2)* is once each quarter.

Consolidation

- 2.3.13 R *GENPRU 1.2.45R* to *GENPRU 1.2.59R* (Application of *GENPRU 1.2* on a solo and consolidated basis) apply to *BIPRU 2.3* as they apply to *GENPRU 1.2.30R* and *GENPRU 1.2.36R*.

- 3 Standardised credit risk
- 3.1 Application and purpose
- Application
- 3.1.1 R *BIPRU 3 applies to a BIPRU firm.*
- Purpose
- 3.1.2 G *BIPRU 3 implements:*
- (1) Articles 78 to 80, paragraph (1) of Article 81, Article 83, Annex II and Parts 1 and 3 of Annex VI of the *Banking Consolidation Directive*;
 - (2) Article 18 of the *Capital Adequacy Directive* so far as it applies Articles 78 to 80, paragraph (1) of Article 81, Article 83 and Parts 1 and 3 of Annex VI of the *Banking Consolidation Directive* to *investment firms*; and
 - (3) Article 40 of the *Capital Adequacy Directive* for the purposes of the calculation of credit risk under the *Banking Consolidation Directive*.
- 3.1.3 G *BIPRU 3.1 sets out how a firm should calculate the credit risk capital component, which is one of the elements that make up the credit risk capital requirement under GENPRU 2.1.51R. Part of that calculation involves calculating risk weighted exposure amounts for exposures in the firm's non-trading book. The rest of BIPRU 3 sets out how the firm should carry out that calculation.*
- 3.1.4 G *BIPRU 5 deals with the effect of credit risk mitigation on the calculation of risk weighted exposure amounts. BIPRU 13 deals with the calculation of exposure values for certain kinds of products. BIPRU 14.3 deals with the calculation of the counterparty risk capital component for unsettled transactions in the trading book and non-trading book. BIPRU 14.4 deals with capital resources with respect to free deliveries.*
- Calculation of the credit risk capital component
- 3.1.5 R *The credit risk capital component of a firm is 8% of the total of its risk weighted exposure amounts for exposures falling into BIPRU 3.1.6R, calculated in accordance with BIPRU 3.*
- 3.1.6 R *An exposure falls into this rule if:*
- (1) it is in a firm's *non-trading book*; and

- (2) it has not been deducted from the *firm's capital resources* under *GENPRU 2.2*.

- 3.2 The central principles of the standardised approach to credit risk
- 3.2.1 R Subject to *BIPRU* 13:
- (1) the *exposure* value of an asset item must be its balance-sheet value, subject to any value adjustments required by *GENPRU* 1.3; and
- (2) the *exposure* value of an off-balance sheet item listed in the table in *BIPRU* 3.7.2R must be the percentage of its value set out in that table.
- [**Note:** *BCD* Article 78(1) part]
- 3.2.2 R The off-balance sheet items listed in the table in *BIPRU* 3.7.2R must be assigned to the risk categories as indicated in that table.
- [**Note:** *BCD* Article 78(1) part]
- 3.2.3 R Where an *exposure* is subject to *funded credit protection*, a *firm* may modify the *exposure* value applicable to that item in accordance with *BIPRU* 5.
- [**Note:** *BCD* Article 78(3)]
- 3.2.4 G *BIPRU* 13 sets out the method for determination of the *exposure* value of a *financial derivative instrument*, with the effects of contracts of novation and other netting agreements taken into account for the purposes of that method in accordance with *BIPRU* 13.7.
- [**Note:** reference to *BCD* Article 78(2) first sentence. Implementation in *BIPRU* 13]
- 3.2.5 G *BIPRU* 13.3 and *BIPRU* 13.8 set out the provisions applying to the treatment and determination of the *exposure* value of *repurchase transactions, securities or commodities lending or borrowing transactions, long settlement transactions* and *margin lending transactions (SFTs)*.
- [**Note:** reference to *BCD* Article 78(2) second sentence. Implementation in *BIPRU* 13]
- 3.2.6 G *BIPRU* 13 also sets out the methods for the determination of *exposure* values for *long settlement transactions*.
- 3.2.7 G *BIPRU* 13.8 provides that, in the case of a *firm* using the *financial collateral comprehensive method* under *BIPRU* 5, where an *exposure* takes the form of an *SFT*, the *exposure* value should be increased by the volatility adjustment appropriate to such *securities* or *commodities* set out in *BIPRU* 5.4.30R to *BIPRU* 5.4.65R

(Supervisory volatility adjustments approach and the own estimates of volatility adjustments approach).

[**Note:** reference to *BCD* Article 78(1), part. Implementation in *BIPRU* 13]

- 3.2.8 G *BIPRU* 13.3.13R and *BIPRU* 13.8.8R set out the provisions relating to determination of the *exposure* value of certain credit risk *exposures* outstanding with a *central counterparty*, where the *central counterparty's counterparty credit risk exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[**Note:** reference to *BCD* Article 78(4). Implementation in *BIPRU* 13]

Exposure Classes

- 3.2.9 R A *firm* must assign each *exposure* to one of the following *exposure* classes:
- (1) claims or contingent claims on central governments or *central banks*;
 - (2) claims or contingent claims on regional governments or local authorities;
 - (3) claims or contingent claims on administrative bodies and non-commercial *undertakings*;
 - (4) claims or contingent claims on *multilateral development banks*;
 - (5) claims or contingent claims on *international organisations*;
 - (6) claims or contingent claims on *institutions*;
 - (7) claims or contingent claims on *corporates*;
 - (8) retail claims or contingent retail claims;
 - (9) claims or contingent claims secured on real estate property;
 - (10) past due items;
 - (11) items belonging to regulatory high-risk categories;
 - (12) claims in the form of *covered bonds*;
 - (13) *securitisation* positions;
 - (14) short-term claims on *institutions* and *corporates*;

(15) claims in the form of *CIUs*; or

(16) other items.

[**Note:** *BCD* Article 79(1)]

3.2.10 R To be eligible for the *retail exposure* class, an *exposure* must meet the following conditions:

(1) the *exposure* must be either to an individual *person* or *persons*, or to a small or medium sized entity;

(2) the *exposure* must be one of a significant number of *exposures* with similar characteristics such that the risks associated with such lending are substantially reduced; and

(3) the total amount owed to the *firm*, its *parent undertakings* and its *subsidiary undertakings*, including any past due *exposure*, by the obligor client or *group of connected clients*, but excluding claims or contingent claims secured on residential real estate collateral, must not, to the knowledge of the *firm*, exceed €1 million.

[**Note:** *BCD* Article 79(2)]

3.2.11 R A *firm* must take reasonable steps to acquire the knowledge referred to in *BIPRU* 3.2.10R(3).

[**Note:** *BCD* Article 79(2)(c) last sentence]

3.2.12 R *Securities* are not eligible for the *retail exposure* class.

[**Note:** *BCD* Article 79(2) last sentence]

3.2.13 R The present value of retail minimum lease payments is eligible for the *retail exposure* class.

[**Note:** *BCD* Article 79(3)]

Retail exposures: Significance

3.2.14 G A key driver of the preferential *risk weight* afforded *retail exposures* is the lower correlation and systematic risk associated with such *exposures*. This aspect is unrelated to the absolute number of *retail exposures*. Accordingly in defining what constitutes a significant number of *retail exposures* for the purpose of *BIPRU* 3.2.10R(2), a *firm* need only satisfy itself that the number of *retail exposures* is sufficiently large to diversify away idiosyncratic risk. This assessment will be subject to supervisory review and part of a *firm's SREP*. It will be looked at as one of the issues relating to overall diversification.

Retail exposures: Aggregation: Reasonable steps

- 3.2.15 G In deciding what steps are reasonable for the purposes of *BIPRU* 3.2.11R, a *firm* may take into account complexity and cost, as well as the materiality of the impact upon its capital calculation. A *firm* should be able to demonstrate to the *FSA* that it has complied with the obligation to take reasonable steps under *BIPRU* 3.2.11R in the way it takes these factors into account..

Retail exposures: Aggregation: Single risk

- 3.2.16 G (1) The definition of *group of connected clients* is set out in the *Glossary*. Paragraph (2) of that definition is "two or more *persons* ... who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other or all of the others would be likely to encounter repayment difficulties".
- (2) Say that a *firm* has *exposures* to A and B. When deciding whether A and B come within paragraph (2) of the definition two conditions should be satisfied. Firstly the connections between A and B should mean that if A experiences financial problems, B should be likely to encounter repayment difficulties. Secondly, the connections between A and B should mean that if B experiences financial problems, A should be likely to encounter repayment difficulties.
- (3) The *guidance* in *BIPRU* 3.2.16G is provided for the purpose of *BIPRU* 3.2.10R only and not for the purposes of any other provision in the Handbook that uses the defined term *group of connected clients*.

Retail exposures: Aggregation: Personal and business exposures

- 3.2.17 G If a *firm* has *exposures* to an owner of a *retail SME* in his personal capacity and *exposures* to the *retail SME* the *firm* should aggregate the two types of *exposure* for the purpose of *BIPRU* 3.2.10R(3), although it should not include claims secured on residential real estate collateral. In deciding what steps are reasonable for the purposes of *BIPRU* 3.2.11R in aggregating these two types of *exposure*, a *firm* may take into account the materiality of those personal *exposures*. A *firm* should be able to demonstrate to the *FSA* that it has complied with the obligation to take reasonable steps under *BIPRU* 3.2.11R when taking into account materiality in this way.

Retail exposures: Exchange rate

- 3.2.18 G Where an exposure is denominated in a currency other than the euro, a *firm* may calculate the euro equivalent for purposes of *BIPRU* 3.2.10R using any appropriate set of exchange rates provided its choice has no obvious bias and that the *firm* is consistent in its

approach to choosing rates.

Retail exposures: Frequency of monitoring

- 3.2.19 G A *firm* may monitor compliance with the €1m threshold in *BIPRU* 3.2.10R on the basis of approved limits provided it has internal control procedures that are sufficient to ensure that amounts owed cannot diverge from approved limits to such an extent as to give rise to a material breach of the €1m threshold.
- 3.2.20 R (1) To calculate *risk weighted exposure amounts*, *risk weights* must be applied to all *exposures*, unless deducted from *capital resources*, in accordance with the provisions of *BIPRU* 3.4.
- (2) The application of *risk weights* must be based on the *standardised credit risk exposure class* to which the *exposure* is assigned and, to the extent specified in *BIPRU* 3.4, its credit quality.
- (3) Credit quality may be determined by reference to:
- (a) the credit assessments of *eligible ECAs* in accordance with the provisions of *BIPRU* 3; or
- (b) the credit assessments of export credit agencies as described in *BIPRU* 3.4.
- [Note: *BCD* Article 80(1)]
- 3.2.21 R For the purposes of applying a *risk weight*, as referred to in *BIPRU* 3.2.20R, the *exposure* value must be multiplied by the *risk weight* specified or determined in accordance with the *standardised approach*.
- [Note: *BCD* Article 80(2)]
- 3.2.22 R Notwithstanding *BIPRU* 3.2.20R, where an *exposure* is subject to credit protection the *risk weight* applicable to that item may be modified in accordance with *BIPRU* 5.
- [Note: *BCD* Article 80(4)]
- 3.2.23 R *Risk weighted exposure amounts* for *securitised exposures* must be calculated in accordance with *BIPRU* 9.
- [Note: *BCD* Article 80(5)]
- 3.2.24 R *Exposures* the calculation of *risk weighted exposure amounts* for which is not otherwise provided for under the *standardised approach* must be assigned a *risk weight* of 100%.

[Note: BCD Article 80(6)]

Zero risk-weighting for intra-group exposures

- 3.2.25 R (1) Subject to *BIPRU* 3.2.35R, and with the exception of *exposures* giving rise to liabilities in the form of the items referred to in *BIPRU* 3.2.26R, a *firm* is not required to comply with *BIPRU* 3.2.20R (Calculation of risk weighted exposures amounts under the standardised approach) in the case of the *exposures* of the *firm* to a counterparty which is its *parent undertaking*, its *subsidiary undertaking* or a *subsidiary undertaking* of its *parent undertaking* or to which the *firm* is linked by a *consolidation Article 12(1) relationship* provided that the following conditions are met:
- (a) the counterparty is:
 - (i) an *institution* whose head office is in an *EEA State*; or
 - (ii) an *institution* not within (a)(i), *financial holding company*, *financial institution*, *asset management company* or *ancillary services undertaking* subject to appropriate prudential requirements;
 - (b) the condition in *BIPRU* 3.2.27R is satisfied;
 - (c) the counterparty is subject to the same risk evaluation, measurement and control procedures as the *firm*;
 - (d) the counterparty is established in the *United Kingdom* and either it is incorporated in the *United Kingdom* or (if that counterparty is of a type that falls within the scope of that Regulation) the centre of its main interests is situated within the *United Kingdom* within the meaning of the Council Regulation of 29 May 2000 on insolvency proceedings (Regulation 1346/2000/EC); and
 - (e) there is no current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities from the counterparty to the *firm*.
- (2) Where a *firm* chooses under (1) not to apply *BIPRU* 3.2.20R, it must assign a *risk weight* of 0% to the *exposure*.
- (3) A *firm* need not apply the treatment in (1) and (2) to every *exposure* that is eligible for that treatment.

[Note: BCD Article 80(7), part]

- 3.2.26 R A *firm* must not apply the treatment in BIPRU 3.2.25R to *exposures* giving rise to liabilities in the form of any of the following items:
- (1) in the case of a *BIPRU firm*, any *tier one capital* or *tier two capital*; and
 - (2) in the case of any other *undertaking*, any item that would be *tier one capital* or *tier two capital* if the *undertaking* were a *BIPRU firm*.

[Note: BCD Article 80(7), part]

- 3.2.27 R (1) The condition referred to in BIPRU 3.2.25R(1)(b) is that both the *counterparty* and the *firm* are:
- (a) included within the scope of consolidation on a full basis with respect to the same *UK consolidation group* and BIPRU 8.3.1R applies to the *firm* with respect to that *UK consolidation group*; or
 - (b) included within the scope of consolidation on a full basis with respect to the same *group* by a *competent authority* of an *EEA State* other than the *United Kingdom* under the *CRD implementation measures* about consolidated supervision for that *EEA State*; or
 - (c) (provided that this consolidation is carried out to standards equivalent to those in (a) and (b)) included within the scope of consolidation on a full basis with respect to the same *group* by a *third country competent authority* under prudential rules for the *banking sector* or *investment services sector* of or administered by that *third country competent authority*.
- (2) A *group* is subject to consolidation to equivalent standards for the purpose of (1)(c) only if the *firm* or another *EEA firm* in that *group* has been notified in writing by the *FSA* or a *competent authority* of another *EEA State* pursuant to Article 143 of the *Banking Consolidation Directive* that that *group* is subject to equivalent supervision.

[Note: BCD Article 80(7), part]

- 3.2.28 G For the purpose of BIPRU 3.2.25R(1)(c) it is the risk management functions of the group that should be integrated, rather than the group's operational management. A *firm* should ensure that if risk management functions are integrated in this way it should be possible for the *FSA* to undertake qualitative supervision of the management of the integrated risk management function.

- 3.2.29 G An *undertaking* is included within the scope of consolidation of a group on a full basis as referred to in *BIPRU 3.2.27R(1)* if it is at the head of the group or if its assets and liabilities are taken into account in full as referred to in *BIPRU 8.5.2R* (Basis of inclusion of undertakings in consolidation).
- 3.2.30 G In the case of an *undertaking* that is a *firm* the requirement in *BIPRU 3.2.25R(1)(e)* for the prompt transfer of *capital resources* refers to *capital resources* in excess of the capital and financial resources requirements to which it is subject under the *regulatory system*.
- 3.2.31 G The requirement in *BIPRU 3.2.25R(1)(e)* for the prompt repayment of liabilities refers to the prompt repayment of liabilities when due.
- 3.2.32 G The *guidance* in *BIPRU 3.2.30G - BIPRU 3.2.31G* does not apply to *BIPRU 2.1* (Solo consolidation) even though the provisions have similar wording. This is because the purpose of the provisions in *BIPRU 2.1* is to define the conditions under which two *undertakings* should be treated as a single *undertaking*. The purpose of *BIPRU 3.2.25R(1)* is to define the circumstances in which it is appropriate to apply a zero *risk weight*.
- 3.2.33 G A *firm* that has chosen to apply the treatment in *BIPRU 3.2.25R* should monitor the *exposures* to which a 0% *risk weight* is applied under that treatment and report these to the *FSA* as required.
- 3.2.34 G If a *firm* has an *IRB permission* and *exposures* are exempted from the *IRB approach* under *BIPRU 4.2.26R(6)* the *firm* may apply a 0% *risk weight* to them under *BIPRU 3.2.25R(2)* (Zero risk weighting for intra-group exposures) if the conditions in *BIPRU 3.2.25R(1)* are satisfied.
- 3.2.35 R
- (1) A *firm* may not apply *BIPRU 3.2.25R* unless it has given one month's prior notice to the *FSA* that it intends do so.
 - (2) A *firm* need only give the *FSA* the notice required in (1) once rather than with respect to each *exposure*.
 - (3) A *firm* may stop applying *BIPRU 3.2.25R* or may stop applying it to some *exposures*.
 - (4) If a *firm* stops applying *BIPRU 3.2.25R* it may start to apply it again if it notifies the *FSA* under (1) that it intends do so.
 - (5) A *firm* must notify the *FSA* if it becomes aware that any *exposure* that it has treated as exempt under *BIPRU 3.2.25R* has ceased to meet the conditions for exemption or if the *firm* ceases to treat an *exposure* under that *rule*.

3.2.36 G The *FSA* may discuss with a *firm* that makes the notification required in *BIPRU* 3.2.35R(1) the reasons why the *firm* believes it meets the conditions in *BIPRU* 3.2.25R(1).

3.2.37 G *BIPRU* 3 Annex 1G is a flow chart guide to assessing whether an intra-group *exposure* can be zero *risk weighted* using the *standardised approach* subject to the conditions set out in *BIPRU* 3.2.25R – *BIPRU* 3.2.35G.

Exposures to recognized third-country investment firms, clearing houses and investment exchanges

3.2.38 R For the purposes of the *standardised approach* (including as it applies for the purposes of *BIPRU* 14) and without prejudice to *BIPRU* 13.3.13R and *BIPRU* 13.8.8R (Exposure to a central counterparty), *exposures to recognised third-country investment firms* and *exposures to recognised clearing houses, designated clearing houses, recognised investment exchanges* and *designated investment exchanges* must be treated as exposures to *institutions*.

[**Note:** *CAD* Article 40]

3.3 The use of the credit assessments of ratings agencies

- 3.3.1 R An external credit assessment may be used to determine the *risk weight* of an *exposure* in accordance with *BIPRU 3.2.20R* to *BIPRU 3.2.26R* only if the *ECAI* which provides it is recognised by the *FSA* as an *eligible ECAI* for the purposes of the *standardised approach to credit risk*.

[Note: *BCD* Article 81(1)]

Recognition of ratings agencies

- 3.3.2 G The *FSA* will recognise an *ECAI* as an *eligible ECAI* for the purposes of *BIPRU 3*, or will refuse to recognise an *ECAI* or will revoke its recognition of an *ECAI* as an *eligible ECAI* in accordance with the *Capital Requirements Regulations 2006*.
- 3.3.3 G Regulation 22 of the *Capital Requirements Regulations 2006* deals with recognition by the *FSA* of *eligible ECAs* for *exposure risk weighting* purposes. Regulation 25 deals with revoking recognition.
- 3.3.4 G The criteria which the *FSA* must apply when assessing *ECAs* for recognition for *exposure risk weighting* purposes are set out in Regulation 22 and Schedule 1 to the *Capital Requirements Regulations 2006*. In making an assessment against those criteria and in carrying out the mapping process described in *BIPRU 3.3.7G* to *BIPRU 3.3.9G* the *FSA* will have regard to the approach set out in the Committee of European Banking Supervisors' "Guidelines on the recognition of External Credit Assessment Institutions" dated 20 January 2006. The *FSA* does not expect to recognise an *ECAI* unless the information set out in those guidelines has been submitted to it.
- 3.3.5 G The list of *eligible ECAs* is published on the *FSA* website. When the *FSA* recognises an *ECAI* as an *eligible ECAI*, it publishes that decision by amending the list of *eligible ECAs* on the *FSA* website to include the name of the *eligible ECAI*. When the *FSA* determines that the recognition of an *ECAI* should be revoked, it publishes that decision by deleting the name of the *ECAI* from the list on the *FSA* website
- 3.3.6 G The list of *eligible ECAs* includes those who have been recognised as eligible for *exposure risk weighting* purposes by a *competent authority* of another *EEA State* and are subsequently recognised as *eligible ECAs* by the *FSA* without carrying out its own evaluation process under Regulation 22(2) of the *Capital Requirements Regulations 2006*.

Mapping of credit assessments

- 3.3.7 G Under Regulation 22(3) of the *Capital Requirements Regulations 2006* the *FSA* is obliged to determine, taking into account the requirements set out in Schedule 2 to the *Capital Requirements Regulations 2006*, with which of the *credit quality steps* set out in Part 1 of Annex VI of the *Banking Consolidation Directive* the relevant credit assessments of an *eligible ECAI* are to be associated. Those determinations should be objective and consistent.
- 3.3.8 R The *credit quality step* with which a relevant credit assessment of an *eligible ECAI* is to be associated is that in the table mapping the credit assessments of *eligible ECAs* to *credit quality steps* published by the *FSA* under Regulation 22(3) of the *Capital Requirements Regulations 2006*.
- 3.3.9 G The table mapping the credit assessments of *eligible ECAs* to *credit quality steps* is published on the *FSA* website and amended from time to time in line with additions to and deletions from the list of *eligible ECAs*. The table includes mappings made by a *competent authority* of another *EEA State* which are subsequently recognised by the *FSA* without carrying out its own determination process under Regulation 22(5) of the *Capital Requirements Regulations 2006*.

3.4 Risk weights under the standardised approach to credit risk

Risk weights: Exposures to central governments or central banks: Treatment

3.4.1 R Without prejudice to *BIPRU 3.4.2R* to *BIPRU 3.4.9R*, *exposures* to central governments and *central banks* must be assigned a 100% *risk weight*.

[Note: *BCD Annex VI Part 1 point 1*]

3.4.2 R Subject to *BIPRU 3.4.4R*, *exposures* to central governments and *central banks* for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in *BIPRU 3.4.3R* in accordance with the assignment by the *FSA* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAIs* to six steps in a *credit quality assessment scale*.

[Note: *BCD Annex VI Part 1 point 2*]

Table: Exposures to central governments and central banks for which a credit assessment by a nominated ECAI is available

3.4.3 R This table belongs to *BIPRU 3.4.2R*.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	0 %	20 %	50 %	100 %	100 %	150 %

3.4.4 R *Exposures* to the European Central Bank must be assigned a 0% *risk weight*.

[Note: *BCD Annex VI Part 1 point 3*]

Exposures in the national currency of the borrower

3.4.5 R *Exposures* to *EEA States*' central governments and *central banks* denominated and funded in the domestic currency of that central government and *central bank* must be assigned a *risk weight* of 0%.

[Note: *BCD Annex VI Part 1 point 4*]

3.4.6 R When the *competent authorities* of a third country which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* assign a *risk weight* which is lower than that indicated in *BIPRU 3.4.1R* to *BIPRU 3.4.3R* to *exposures* to their central government and *central bank*

denominated and funded in the domestic currency, a *firm* may *risk weight* such *exposures* in the same manner.

[Note: *BCD* Annex VI Part 1 point 5]

Use of credit assessments by export credit agencies

3.4.7 R An export credit agency credit assessment may be recognised by a *firm* for the purpose of determining the *risk weight* to be applied to an *exposure* under the *standardised approach* if either of the following conditions is met:

- (1) the credit assessment is a consensus risk score from export credit agencies participating in the OECD “Arrangement on Guidelines for Officially Supported Export Credits”; or
- (2) the export credit agency publishes its credit assessments, and the export credit agency subscribes to the OECD agreed methodology, and the credit assessment is associated with one of the eight minimum export insurance premiums (MEIP) that the OECD agreed methodology establishes.

[Note: *BCD* Annex VI Part 1 point 6]

3.4.8 R *Exposures* for which a credit assessment by an export credit agency is recognised for *risk weighting* purposes must be assigned a *risk weight* according to the table in *BIPRU* 3.4.9R.

[Note: *BCD* Annex VI Part 1 point 7]

Table: Exposure for which a credit assessment by an export credit agency is recognised

3.4.9 R This table belongs to *BIPRU* 3.4.8R.

MEIP	0	1	2	3	4	5	6	7
<i>Risk weight</i>	0%	0%	20%	50%	100%	100%	100%	150%

Exposures to regional governments or local authorities: General

3.4.10 R Without prejudice to *BIPRU* 3.4.15R to *BIPRU* 3.4.19R:

- (1) a *firm* must *risk weight exposures* to regional governments and local authorities in accordance with *BIPRU* 3.4.11R to *BIPRU* 3.4.14R;

and

- (2) the preferential treatment for short-term *exposures* specified in *BIPRU 3.4.37R*, *BIPRU 3.4.390R* and *BIPRU 3.4.44R* must not be applied.

[Note: *BCD Annex VI Part 1 point 8*]

Exposures to regional governments or local authorities: Central government risk weight based method

- 3.4.11 R (1) *Exposures* to regional governments and local authorities must be assigned a *risk weight* according to the *credit quality step* to which *exposures* to the central government of the jurisdiction in which the regional government or local authority is established are assigned in accordance with the table in *BIPRU 3.4.12R*.
- (2) *Exposures* to an unrated regional government or local authority must not be assigned a *risk weight* lower than that applied to *exposures* to its central government.

[Note: *BCD Annex VI Part 1 points 25 and 26*]

Table: Central government risk weight based method

- 3.4.12 R This table belongs to *BIPRU 3.4.11R*.

<i>Credit quality step</i> to which central government is assigned	1	2	3	4	5	6
<i>Risk weight of exposure</i>	20%	50%	100%	100%	100%	150%

- 3.4.13 R For *exposures* to regional governments and local authorities established in countries where the central government is unrated, the *risk weight* must be not more than 100%.

[Note: BCD Annex VI Part 1 point 27]

- 3.4.14 R For *exposures* to regional governments and local authorities with an original effective maturity of three months or less, the *risk weight* must be 20%.

[Note: BCD Annex VI Part 1 point 28]

- 3.4.15 R A *firm* must treat an *exposure* to a regional government or local authority of the *United Kingdom* listed in BIPRU 3 Annex 2R as an *exposure* to the central government of the *United Kingdom*.

[Note: BCD Annex VI Part 1 point 9]

- 3.4.16 G The *FSA* will include a regional government or local authority in the list in BIPRU 3 Annex 2R where there is no difference in risk between *exposures* to that body and *exposures* to the central government of the *United Kingdom* because of the specific revenue-raising powers of the regional government or local authority, and the existence of specific institutional arrangements the effect of which is to reduce the risk of default.

[Note: BCD Annex VI Part 1 point 9]

- 3.4.17 R A *firm* must treat an *exposure* to a regional government or local authority of an *EEA State* other than the *United Kingdom* as an *exposure* to the central government in whose jurisdiction that regional government or local authority is established if that regional government or local authority is included on the list of regional governments and local authorities drawn up by the *competent authority* in that *EEA State* under a *CRD implementation measure* with respect to point 9 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

[Note: BCD Annex VI Part 1 point 9]

- 3.4.18 R *Exposures* to churches or religious communities constituted in the form of a legal *person* under public law must, in so far as they raise taxes in accordance with legislation conferring on them the right to do so, be treated as *exposures* to regional governments and local authorities, except that BIPRU 3.4.15R and BIPRU 3.4.17R do not apply.

[Note: BCD Annex VI Part 1 point 10]

- 3.4.19 R When competent authorities of a third country jurisdiction which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* treat *exposures* to regional governments and local authorities as *exposures* to their central government, a *firm* may *risk weight exposures* to such regional governments and local authorities in the same manner.

[Note: BCD Annex VI Part 1 point 11]

Exposures to administrative bodies and non-commercial undertakings

- 3.4.20 R *BIPRU 3.4.21R to BIPRU 3.6.26R set out the provisions applying to exposures to administrative bodies and non-commercial undertakings.*

Treatment

- 3.4.21 R Without prejudice to *BIPRU 3.4.22R to BIPRU 3.4.26R*, exposures to administrative bodies and non-commercial undertakings must be assigned a 100% risk weight.

[Note: BCD Annex VI Part 1 point 12]

Public sector entities

- 3.4.22 R Without prejudice to *BIPRU 3.4.23R to BIPRU 3.4.26R*, exposures to public sector entities must be assigned a 100% risk weight.

[Note: BCD Annex VI Part 1 point 13]

- 3.4.23 R A firm may treat an exposure to a public sector entity as an exposure to a regional government or local authority in accordance with *BIPRU 3.4.11R to BIPRU 3.4.14R*.

[Note: BCD Annex VI Part 1 point 14]

- 3.4.24 R In exceptional circumstances a firm may treat an exposure to a public sector entity established in the United Kingdom as an exposure to the central government of the United Kingdom if there is no difference in risk between exposures to that body and exposures to the central government of the United Kingdom because of the existence of an appropriate guarantee by the central government.

[Note: BCD Annex VI Part 1 point 15]

- 3.4.25 R Where a competent authority of another EEA State implements points 14 or 15 of Part 1 of Annex VI of the *Banking Consolidation Directive* by exercising the discretion to treat exposures to public sector entities as exposures to institutions or as exposures to the central government of the EEA State concerned, a firm may risk weight exposures to the relevant public sector entities in the same manner

[Note: BCD Annex VI Part 1 point 16]

- 3.4.26 R When *competent authorities* of a third country jurisdiction, which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA*, treat *exposures to public sector entities* as *exposures to institutions*, a *firm* may risk weight *exposures to the relevant public sector entities* in the same manner.

[Note: BCD Annex VI Part 1 point 17]

Exposures to multilateral development banks: Treatment

- 3.4.27 R Without prejudice to *BIPRU 3.4.28R* to *BIPRU 3.4.29R*:
- (1) a *firm* must treat *exposures to multilateral development banks* in the same manner as *exposures to institutions* in accordance with *BIPRU 3.4.34R* to *BIPRU 3.4.39R* (Exposures to institutions: credit assessment based method); and
 - (2) the preferential treatment for short-term *exposures* specified in *BIPRU 3.4.37R*, *BIPRU 3.4.39R* and *BIPRU 3.4.44R* must not be applied.

[Note: BCD Annex VI Part 1 point 19]

- 3.4.28 R An *exposure to a multilateral development bank* listed in point (1) of the definition in the *glossary* must be assigned a 0% *risk weight*.

[Note: BCD Annex VI Part 1 point 20]

- 3.4.29 R A *risk weight* of 20% must be assigned to the portion of unpaid capital subscribed to the European Investment Fund.

[Note: BCD Annex VI Part 1 point 21]

Exposures to international organisations

- 3.4.30 R *Exposures to the following international organisations* must be assigned a 0% *risk weight*:
- (1) the European Community;
 - (2) the International Monetary Fund; and
 - (3) the Bank for International Settlements.

[Note: BCD Annex VI Part 1 point 22]

Exposures to institutions: General

- 3.4.31 R *BIPRU 3.4.32R to BIPRU 3.4.48R set out the treatment to be accorded to exposures to institutions.*

Exposures to institutions: Treatment

- 3.4.32 R Without prejudice to *BIPRU 3.4.33R to BIPRU 3.4.47R*, *exposures to financial institutions* authorised and supervised by the *competent authorities* responsible for the authorisation and supervision of *credit institutions* and subject to prudential requirements equivalent to those applied to *credit institutions* must be *risk weighted* as *exposures to institutions*.

[Note: BCD Annex VI Part 1 point 24]

Exposures to institutions: Risk weight floor on exposures to unrated institutions

- 3.4.33 R *Exposures to an unrated institution* must not be assigned a *risk weight* lower than that applied to *exposures to its central government*.

[Note: BCD Annex VI Part 1 point 25]

Exposures to institutions: Credit assessment based method

- 3.4.34 R *Exposures to institutions* with an original effective maturity of more than three months for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in *BIPRU 3.4.35R* in accordance with the assignment by the *FSA* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAIs* to six steps in a *credit quality assessment scale*.

[Note: BCD Annex VI Part 1 point 29]

Table: Exposures to institutions with an original effective maturity of more than three months for which a credit assessment by a nominated ECAI is available

- 3.4.35 R This table belongs to *BIPRU 3.4.34R*.

<i>Credit quality step</i>	1	2	3	4	5	6
----------------------------	---	---	---	---	---	---

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	50%	100%	100%	150%

- 3.4.36 R Without prejudice to *BIPRU 3.4.33R*, *exposures to unrated institutions* must be assigned a *risk weight* of 50%.

[**Note:** *BCD Annex VI Part 1 point 30*]

- 3.4.37 R *Exposures to an institution with an original effective maturity of three months or less for which a credit assessment by a nominated ECAI is available must be assigned a risk weight according to the table in BIPRU 3.4.38R in accordance with the assignment by the FSA in accordance with the Capital Requirements Regulations 2006 of the credit assessments of eligible ECAs to six steps in a credit quality assessment scale.*

[**Note:** *BCD Annex VI Part 1 point 31*]

Table: Exposures to an institution with an original effective maturity of three months or less for which a credit assessment by a nominated ECAI is available

- 3.4.38 R This table belongs to *BIPRU 3.4.37R*.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	20%	20%	50%	50%	150%

- 3.4.39 R Without prejudice to *BIPRU 3.4.33R*, *exposures to unrated institutions* having an original effective maturity of three months or less must be assigned a 20% *risk weight*

[**Note:** *BCD Annex VI Part 1 point 32*]

Exposures to institutions: Interaction with short-term credit assessments

- 3.4.40 R If there is no short-term credit assessment as set out in *BIPRU 3.4.112R*, the general preferential treatment for short-term *exposures* as specified in *BIPRU 3.4.37R* applies to all *exposures* to *institutions* of up to three months residual maturity.

[Note: *BCD Annex VI Part 1 point 34*]

- 3.4.41 R If there is a short-term credit assessment as set out in *BIPRU 3.4.112R* and such an assessment determines the application of a more favourable or identical *risk weight* than the use of the general preferential treatment for short-term *exposures*, as specified in *BIPRU 3.4.37R*, then the short-term assessment and *risk weighting* specified in *BIPRU 3.4.112R* must be used for that specific *exposure* only. Other short-term *exposures* must follow the general preferential treatment for short-term *exposures*, as specified in *BIPRU 3.4.37R*.

[Note: *BCD Annex VI Part 1 point 35*]

- 3.4.42 R If there is a short-term credit assessment as set out in *BIPRU 3.4.112R* and such an assessment determines a less favourable *risk weight* than the use of the general preferential treatment for short-term *exposures*, as specified in *BIPRU 3.4.37R*, then the general preferential treatment for short-term *exposures* must not be used and all unrated short-term claims must be assigned the same *risk weight* as that applied by the specific short-term assessment.

[Note: *BCD Annex VI Part 1 point 36*]

- 3.4.43 G *BIPRU 3 Annex 2G* contains a flow diagram guide to determining the *risk weight* to be applied to short-term *exposures* to *institutions* according to whether a short-term credit assessment is available.

Exposures to institutions: Short-term exposures in the national currency of the borrower

- 3.4.44 R A *firm* may assign to an *exposure* to an *institution* formed under the law of the *United Kingdom* of a residual maturity of 3 months or less denominated and funded in pounds sterling a *risk weight* that is one category less favourable than the preferential *risk weight*, as described in *BIPRU 3.4.5R* (Exposures in the national currency of the borrower), assigned to *exposures* to the central government of the *United Kingdom*.

[Note: *BCD Annex VI Part 1 point 37*]

- 3.4.45 R (1) Where a *competent authority* of another *EEA State* implements point 37 of Part 1 of Annex VI of the *Banking Consolidation Directive* by exercising the discretion to allow the treatment in that point, a *firm*

may assign to the relevant national currency *exposures* the *risk weight* permitted by that *CRD implementation measure*.

- (2) When the *competent authority* of a third country which applies supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* assigns to an *exposure* to an *institution* formed under the law of that third country of a residual maturity of 3 months or less denominated and funded in the national currency a *risk weight* that is one category less favourable than the preferential *risk weight*, as described in *BIPRU* 3.4.6R (Exposures in the national currency of the borrower), assigned to *exposures* to the central government of that third country, a *firm* may *risk weight* such *exposures* in the same manner.

[**Note:** *BCD* Annex VI Part 1 point 37]

- 3.4.46 R No *exposures* of a residual maturity of 3 months or less denominated and funded in the national currency of the borrower may be assigned a *risk weight* less than 20%.

[**Note:** *BCD* Annex VI Part 1 point 38]

Exposures to institutions: Investments in regulatory capital instruments

- 3.4.47 R Investments in *equity* or regulatory capital instruments issued by *institutions* must be *risk weighted* at 100%, unless deducted from *capital resources*.

[**Note:** *BCD* Annex VI Part 1 point 39]

Exposures to institutions: Minimum reserves required by the ECB

- 3.4.48 R Where an *exposure* to an *institution* is in the form of minimum reserves required by the European Central Bank or by the *central bank* of an *EEA State* to be held by the *firm*, a *firm* may assign the *risk weight* that would be assigned to *exposures* to the *central bank* of the *EEA State* in question provided:

- (1) the reserves are held in accordance with Regulation (EC) No. 1745/2003 of the European Central Bank of 12 September 2003 or a subsequent replacement regulation or in accordance with national requirements in all material respects equivalent to that Regulation; and
- (2) in the event of the bankruptcy or insolvency of the *institution* where the reserves are held, the reserves will be fully repaid to the *firm* in a timely manner and will not be available to meet other liabilities of the

institution.

[Note: BCD Annex VI Part 1 point 40]

Exposures to corporates: General

- 3.4.49 G *BIPRU 3.4.50R to BIPRU 3.4.52R set out the treatment to be accorded to exposures to corporates.*

Exposures to corporates: Treatment

- 3.4.50 R *Exposures for which a credit assessment by a nominated ECAI is available must be assigned a risk weight according to the table in BIPRU 3.4.51R in accordance with the assignment by the FSA in accordance with the Capital Requirements Regulations 2006 of the credit assessments of eligible ECAIs to six steps in a credit quality assessment scale.*

[Note: BCD Annex VI Part 1 point 41]

Table: Exposures for which a credit assessment by a nominated ECAI is available

- 3.4.51 R This table belongs to *BIPRU 3.4.50R*.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	100%	100%	150%	150%

- 3.4.52 R *Unrated exposures must be assigned a 100% risk weight or the risk weight of its central government, whichever is the higher.*

[Note: BCD Annex VI Part 1 point 42]

Retail exposures

- 3.4.53 R *Exposures that comply with the criteria listed in BIPRU 3.2.10R must be assigned a risk weight of 75%. However a firm may treat such an exposure under BIPRU 3.2.24R (100% risk weight).*

[Note: BCD Annex VI Part 1 point 43]

Exposures secured by real estate property

- 3.4.54 R *BIPRU 3.4.55R to BIPRU 3.4.94R* set out the treatment to be accorded to *exposures* secured by real estate property.
- 3.4.55 R Without prejudice to *BIPRU 3.4.56R to BIPRU 3.4.94R*, *exposures* fully secured by real estate property must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 44]

Exposures secured by mortgages on residential property

- 3.4.56 R Without prejudice to *BIPRU 3.4.85R*, an *exposure* or any part of an *exposure* fully and completely secured, to the satisfaction of the *firm*, by mortgages on residential property which is or shall be occupied or let by the owner or the beneficial owner in the case of personal investment companies must be assigned a *risk weight* of 35%.

[Note: BCD Annex VI Part 1 point 45]

- 3.4.57 R *Exposures* fully and completely secured, to the satisfaction of the *firm*, by shares in Finnish residential housing companies, operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation, in respect of residential property which is or shall be occupied or let by the owner must be assigned a *risk weight* of 35%.

[Note: BCD Annex VI Part 1 point 46]

- 3.4.58 R Without prejudice to *BIPRU 3.4.85R*, an *exposure* or any part of an *exposure* to a tenant under a property leasing transaction concerning residential property under which the *firm* is the lessor and the tenant has an option to purchase, must be assigned a *risk weight* of 35% provided that the *firm* is satisfied that the *exposure* of the *firm* is fully and completely secured by its ownership of the property.

[Note: BCD Annex VI Part 1 point 47]

- 3.4.59 G An Ijara mortgage is an example of an *exposure* described in *BIPRU 3.4.58R*.
- 3.4.60 R (1) In the exercise of its judgement for the purposes of *BIPRU 3.4.56R to BIPRU 3.4.58R*, a *firm* may be satisfied only if the conditions in (2) to (6) are met.

- (2) The value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macroeconomic factors affect both the value of the property and the performance of the borrower.
- (3) The risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.
- (4) The minimum requirements about:
 - (a) legal certainty in *BIPRU 3.4.64R*;
 - (b) monitoring of property values in *BIPRU 3.4.66R*;
 - (c) documentation in *BIPRU 3.4.72R*; and
 - (d) insurance in *BIPRU 3.4.73R*;
 are met.
- (5) The valuation *rules* set out in *BIPRU 3.4.77R* to *BIPRU 3.4.80R* are met.
- (6) The value of the property exceeds the *exposures* by a substantial margin as set out in *BIPRU 3.4.81R*, *BIPRU 3.4.83R*, *BIPRU 3.4.84R* or *BIPRU 3.4.85R* (as applicable).

[Note: *BCD Annex VI Part 1 point 48*]

3.4.61 R *BIPRU 3.4.60R(3)* does not apply to *exposures* fully and completely secured by mortgages on residential property which is situated within the *United Kingdom*.

[Note: *BCD Annex VI Part 1 point 49*]

3.4.62 G The *Banking Consolidation Directive* permits a *competent authority* to disapply the condition in *BIPRU 3.4.60R(3)*, if it has evidence that a well-developed and long-established residential real estate market is present in its territory with loss rates which are sufficiently low to justify such treatment. *BIPRU 3.4.61R* implements that option. However, if the evidence changes so that these conditions are no longer satisfied, the *FSA* may be obliged to revoke *BIPRU 3.4.61R*.

3.4.63 R If a *CRD implementation measure* of another *EEA State* exercises the

discretion in point 49 of Part 1 of Annex VI of the *Banking Consolidation Directive* to dispense with the condition corresponding to *BIPRU 3.4.60R(3)* (The risk of the borrower should not materially depend upon the performance of the underlying property or project) , a *firm* may apply a *risk weight* of 35% to such *exposures* fully and completely secured by mortgages on residential property situated in that *EEA State*.

[**Note:** *BCD Annex VI Part 1 point 50*]

- 3.4.64 R The requirements about legal certainty referred to in *BIPRU 3.4.60R(4)(a)* are as follows:
- (1) the mortgage or *charge* must be enforceable in all relevant jurisdictions which are relevant at the time of conclusion of the credit agreement, and the mortgage or *charge* must be properly filed on a timely basis;
 - (2) the arrangements must reflect a perfected lien (i.e. all legal requirements for establishing the pledge shall have been fulfilled); and
 - (3) the protection agreement and the legal process underpinning it must enable the *firm* to realise the value of the protection within a reasonable timeframe.

[**Note:** *BCD Annex VIII Part 2 point 8(a)*]

- 3.4.65 G The term protection agreement in *BIPRU 3.4.64R(3)* refers to the contract or deed by which the mortgage or charge is established.

- 3.4.66 R (1) The requirements about monitoring of property values referred to in *BIPRU 3.4.60R(4)(b)* are as follows:
- (a) the value of the property must be monitored on a frequent basis and at a minimum once every three years for residential real estate;
 - (b) more frequent monitoring must be carried out where the market is subject to significant changes in conditions;
 - (c) statistical methods may be used to monitor the value of the property and to identify property that needs revaluation;
 - (d) the property valuation must be reviewed by an independent valuer when information indicates that the value of the property may have declined materially relative to general market prices; and
 - (e) for loans exceeding €3 million or 5% of the *capital resources* of the *firm*, the property valuation must be reviewed by an

independent valuer at least every three years.

- (2) For the purposes of (1), ‘independent valuer’ means a person who possesses the necessary qualifications, ability and experience to execute a valuation and who is independent from the credit decision process.

[Note: BCD Annex VIII Part 2 point 8(b)]

- 3.4.67 G A property will need to be revalued over time to ensure that the original purchase price does not overstate the degree of security provided by the property. Ijara providers should undertake revaluations in the same way as providers of conventional mortgages.
- 3.4.68 G For the purposes of *BIPRU* 3.4.66R(1)(a), the monitoring of property values should be an inherent part of risk managing and tracking the portfolio. The requirement to monitor property values does not include the physical assessment of each property in the portfolio.
- 3.4.69 G For the purposes of *BIPRU* 3.4.66R(1)(d) and (e), the review of a property valuation is more in-depth than the normal monitoring process required by *BIPRU* 3.4.66R(1)(a). This requirement is likely to include a review of the property value on an individual *exposure* basis. Where an *exposure* is secured by multiple properties, the review can be undertaken at the level of the *exposure*, rather than at the level of each individual property.
- 3.4.70 G The review of property values required by *BIPRU* 3.4.66(1)(e) may lead to an amendment of the value assigned to the property under by *BIPRU* 3.4.80R.
- 3.4.71 G For the purposes of *BIPRU* 3.4.66R(2), necessary qualifications need not be professional qualifications but the firm should be able to demonstrate that he or she has the necessary ability and experience to undertake the review.
- 3.4.72 R The requirements about documentation referred to in *BIPRU* 3.4.60R(4)(c) are that the types of residential real estate accepted by the *firm* and its lending policies in this regard must be clearly documented.

[Note: BCD Annex VIII Part 2 point 8(c)]

- 3.4.73 R The requirements about insurance referred to in *BIPRU* 3.4.60R(4)(d) are that the *firm* must have procedures to monitor that the property taken as protection is adequately insured against damage.

[Note: BCD Annex VIII Part 2 point 8(d)]

- 3.4.74 G For the purposes of *BIPRU* 3.4.73R a *firm* should, as a minimum, ensure that it is a requirement of each loan that the property taken as collateral must have adequate buildings insurance at all times, which should be reviewed when any new loan is extended against the property.

- 3.4.75 G A *firm* may deal with the risk that insurance on properties taken as protection may be inadequate by taking out insurance at the level of the portfolio.
- 3.4.76 R The valuation *rules* referred to in *BIPRU* 3.4.60R(5) are set out in *BIPRU* 3.4.77R to *BIPRU* 3.4.80R.
- 3.4.77 R The property must be valued by an independent valuer at or less than the market value. In those *EEA States* that have laid down rigorous criteria for the assessment of the mortgage lending value in statutory or regulatory provisions the property may instead be valued by an independent valuer at or less than the mortgage lending value.
- [Note: *BCD* Annex VIII Part 3 point 62]
- 3.4.78 R Market value means the estimated amount for which the property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value must be documented in a transparent and clear manner.
- [Note: *BCD* Annex VIII Part 3 point 63]
- 3.4.79 R Mortgage lending value means the value of the property as determined by a prudent assessment of the future marketability of the property taking into account long-term sustainable aspects of the property, the normal and local market conditions, the current use and alternative appropriate uses of the property. Speculative elements must not be taken into account in the assessment of the mortgage lending value. The mortgage lending value must be documented in a transparent and clear manner.
- [Note: *BCD* Annex VIII Part 3 point 64]
- 3.4.80 R The value of the collateral must be the market value or mortgage lending value reduced as appropriate to reflect the results of the monitoring required under *BIPRU* 3.4.64R(4)(b) and *BIPRU* 3.4.66R and to take account of any prior claims on the property.
- [Note: *BCD* Annex VIII Part 3 point 65]
- 3.4.81 R A *firm* may not treat an *exposure* as fully and completely secured by residential property located in the *United Kingdom* for the purpose of *BIPRU* 3.4.56R or *BIPRU* 3.4.58R unless the amount of the *exposure* or of the secured part of the *exposure* referred to in *BIPRU* 3.4.56R or *BIPRU* 3.4.58R, as the case may be, is 80% or less of the value of the residential property on which it is secured.
- 3.4.82 G (1) The application of *BIPRU* 3.4.81R may be illustrated by an example. If a firm has a mortgage *exposure* of £100,000 secured on residential property in the *United Kingdom* that satisfies the criteria listed in *BIPRU* 3.4.56R to *BIPRU* 3.4.80R and the value of that property is

£100,000, then £80,000 of that *exposure* may be treated as fully and completely secured and *risk weighted* at 35%. The remaining £20,000 may be *risk weighted* at 75% provided the *exposure* meets the criteria in *BIPRU* 3.2.10R. The portion *risk weighted* at 75% should be treated as a *retail exposure* for the purposes of the aggregation calculations specified in *BIPRU* 3.2.10R(3). A diagrammatic illustration of this example is in (2).

(2)

EXAMPLE

- £100,000 loan secured on property valued at £100,000
- First £80,000 (80% LTV) *risk weighted* at 35%
- Remaining £20,000 *risk weighted* at 75% if meets retail criteria: counts to retail aggregation calculation
- Overall *risk weight* = 43%

(2) The same approach applies to *exposures* described in *BIPRU* 3.4.58R. On initiation a 35% *risk weight* should be applied to the first 80% of the principal/"purchase price" outstanding, with a 75% *risk weight* being applied to the remainder of the principal (assuming that the *exposure* meets the requirements in *BIPRU* 3.2 to be treated as a *retail exposure*).

3.4.83 R A *firm* may only treat an *exposure* as fully and completely secured by residential property situated in another *EEA State* for the purposes of *BIPRU* 3.4.56R or *BIPRU* 3.4.58R if it would be treated as fully and completely secured by the relevant *CRD implementation measures* in that *EEA State* implementing points 45 and 47 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

3.4.84 R For the purposes of *BIPRU* 3.4.56R or *BIPRU* 3.4.58R, a *firm* may only treat an *exposure* as fully and completely secured by residential property situated in the territory of a *third-country competent authority* that is listed as equivalent for credit risk in *BIPRU* 8 Ann 3R if it would be treated as fully and completely secured under the applicable requirements of that *third country competent authority* (including any applicable loan-to-value ceiling).

3.4.85 R For the purposes of *BIPRU* 3.4.56R or *BIPRU* 3.4.58R, where the residential property in question is situated in the territory of a *third-country competent authority* that is not listed as equivalent for credit risk in *BIPRU* 8 Ann 3R:

(1) a *firm* must not treat an *exposure* as fully and completely secured by the residential property in question unless the value of the property exceeds the *exposures* by a substantial margin, which must be at least 20%;

(2) the *firm* must apply a *risk weight* of 50% to the *exposure*.

- 3.4.86 G For the purposes of *BIPRU* 3.4.85R(1) and in order to satisfy itself that an *exposure* is fully and completely secured by the relevant property, a *firm* should make its own assessment of the appropriate margin in each case, using its knowledge of the market in the relevant country and of its own portfolio.
- 3.4.87 G If a *firm* has more than one *exposure* secured on the same property they should be aggregated and treated as if they were a single *exposure* secured on the property for the purposes of *BIPRU* 3.4.56R and *BIPRU* 3.4.58R and *BIPRU* 3.4.81R, *BIPRU* 3.4.83R and *BIPRU* 3.4.84R.
- 3.4.88 G If an *exposure* is secured on property that is used in part for residential purposes in accordance with *BIPRU* 3.4.56R and partly for commercial purposes (such as a farm, public house, guest house or shop) it may be treated as secured by residential real estate if the *firm* can demonstrate that the property's main use is, or will be, residential and that the value of the property is not significantly affected by its commercial use.

Exposures secured by mortgages on commercial real estate

- 3.4.89 R *Exposures* or any part of an *exposure* secured by mortgages on offices or other commercial premises which cannot properly be considered to fall within any other *standardised credit risk exposure class* or to qualify for a lower *risk weight* under *BIPRU* 3 must be assigned a *risk weight* of 100%.

[**Note:** *BCD* Annex VI Part 1 point 51]

- 3.4.90 R *Exposures* fully and completely secured by shares in Finnish housing companies, operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation, in respect of offices or other commercial premises may be assigned a *risk weight* of 50%.

[**Note:** *BCD* Annex VI Part 1 point 52]

- 3.4.91 R If a *CRD implementation measure* in another *EEA State* implements the discretion in point 51 of Part 1 of Annex VI of the *Banking Consolidation Directive*, a *firm* may apply the same treatment as that *CRD implementation measure* to *exposures* falling within the scope of that *CRD implementation measure* which are fully and completely secured by mortgages on offices or other commercial premises situated in that *EEA State*.

[**Note:** *BCD* Annex VI Part 1 points 51 and 57]

- 3.4.92 R If a *CRD implementation measure* in another *EEA State* implements the discretion in point 53 of Part 1 of Annex VI of the *Banking Consolidation Directive*, a *firm* may apply the same treatment as that *CRD implementation*

measure to exposures related to property leasing transactions concerning offices or other commercial premises situated in that *EEA State* and governed by statutory provisions whereby the lessor retains full ownership of the rented assets until the tenant exercises his option to purchase, as long as that *exposure* falls within the scope of that *CRD implementation measure*.

[**Note:** *BCD Annex VI Part 1 points 53 and 57*]

- 3.4.93 R In particular, if a *firm* applies *BIPRU 3.4.91R* or *BIPRU 3.4.92R*, it must comply with the corresponding *CRD implementation measures* in relation to points 54-56 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

[**Note:** *BCD Annex VI Part 1 points 54 to 56*]

- 3.4.94 R (1) If a *CRD implementation measure* in another *EEA State* implements the discretion in point 58 of Part 1 of Annex VI of the *Banking Consolidation Directive* to dispense with the condition in point 54(b) for *exposures* fully and completely secured by mortgages on commercial property situated in that *EEA State*, a *firm* may apply the same treatment as that *CRD implementation measure to exposures* fully and completely secured by mortgages on commercial property situated in that *EEA State* falling within the scope of that *CRD implementation measure*.
- (2) However a *firm* may not apply the treatment in (1) if the eligibility to use that treatment under the *CRD implementation measure* referred to in (1) ceases as contemplated under point 59 of Annex VI of the *Banking Consolidation Directive* (condition in point 54(b) must apply where conditions in point 58 are not satisfied).

[**Note:** *BCD Annex VI Part 1 points 58, 59 and 60*]

Past due items

- 3.4.95 G *BIPRU 3.4.96R* to *BIPRU 3.4.101R* set out the treatment to be accorded to past due items.

- 3.4.96 R Without prejudice to the provisions contained in *BIPRU 3.4.97R* to *BIPRU 3.4.101R*, the unsecured part of any item that is past due for more than 90 days (irrespective of the amount of that item or of the unsecured portion of that item) must be assigned a *risk weight* of:

- (1) 150% if value adjustments are less than 20% of the unsecured part of the *exposure* gross of value adjustments; and
- (2) 100% if value adjustments are no less than 20% of the unsecured part of the *exposure* gross of value adjustments.

[Note: BCD Annex VI Part 1 point 61]

- 3.4.97 R For the purpose of defining the secured portion of the past due item, eligible collateral and guarantees must be those eligible for *credit risk mitigation* purposes under *BIPRU 5*.

[Note: BCD Annex VI Part 1 point 62]

- 3.4.98 G For the purposes of *BIPRU 3.4.97R*, the secured portion of a past due item is dealt with under *BIPRU 5* (Credit risk mitigation). A *firm* may treat the secured portion of an *exposure* covered by a mortgage indemnity product that meets the relevant *CRM* eligibility criteria as secured for the purposes of *BIPRU 3.4.97R*. The *risk weight* to be applied to the secured portion is determined under *BIPRU 5.7.21R* to *BIPRU 5.7.24R*. The *risk weight* of the unsecured portion is determined in accordance with *BIPRU 3.4.96R*.

- 3.4.99 R *Exposures* indicated in *BIPRU 3.4.56R* to *BIPRU 3.4.63R* (*Exposures* secured by mortgages on residential property) must be assigned a *risk weight* of 100% net of value adjustments if they are past due for more than 90 days. If value adjustments are no less than 20% of the *exposure* gross of value adjustments, the *risk weight* to be assigned to the remainder of the *exposure* is 50%.

[Note: BCD Annex VI Part 1 point 64]

- 3.4.100 G The application of *BIPRU 3.4.96R* and *BIPRU 3.4.99R* may be illustrated on the basis of a £110,000 loan on a property valued at £100,000, where £80,000 of the loan is secured and £30,000 of the exposure is unsecured and provisions of £20,000 are taken:

(1) Option 1 (application of *BIPRU 3.4.96R*):

- (a) provision of £20,000 taken on £80,000 secured *exposure*;
- (b) provision exceeds 20%, so the *firm* should *risk weight* the remaining £60,000 secured *exposure* at 50%;
- (c) the *risk weight* to be applied to the unsecured *exposure* of £30,000 is 50%;
- (d) the average *risk weight* to be assigned to the net *exposure* of £90,000 is 83%.

(2) Option 2 (application of *BIPRU 3.4.99R*):

- (a) provision of £20,000 taken on £30,000 unsecured *exposure*;
- (b) provision exceeds 20%, so the *firm* should *risk weight* the

remaining £10,000 unsecured *exposure* at 100%;

- (c) the *risk weight* to be applied to the secured *exposure* of £80,000 is 100%;
- (d) the average *risk weight* to be assigned to the net *exposure* of £90,000 is 100%.

3.4.101 R *Exposures* indicated in *BIPRU* 3.4.89R to *BIPRU* 3.4.94R (*Exposures* secured by mortgages on commercial real estate) must be assigned a *risk weight* of 100% if they are past due for more than 90 days.

[**Note:** *BCD* Annex VI Part 1 point 65]

3.4.102 R Non past due items to be assigned a 150% *risk weight* under *BIPRU* 3.4 and for which value adjustments have been established may be assigned a *risk weight* of:

- (1) 100% if value adjustments are no less than 20% of the *exposure* value gross of value adjustments; and
- (2) 50%, if value adjustments are no less than 50% of the *exposure* value gross of value adjustments.

[**Note:** *BCD* Annex VI Part 1 point 67]

Items belonging to regulatory high-risk categories

3.4.103 R *BIPRU* 3.4.104R sets out the treatment to be accorded to items belonging to regulatory high-risk categories.

3.4.104 R *Exposures* listed in *BIPRU* 3 Annex 3R must be assigned a *risk weight* of 150%.

[**Note:** *BCD* Annex VI Part 1 point 66]

3.4.105 G For the purposes of point 66 of Part 1 of Annex VI of the *Banking Consolidation Directive*, the *exposures* listed in *BIPRU* 3 Annex 3R are in the view of the *FSA* associated with particularly high risk.

Exposures in the form of covered bonds

3.4.106 R *BIPRU* 3.4.107R to *BIPRU* 3.4.110R set out the treatment to be accorded to *exposures* in the form of *covered bonds*.

3.4.107 R (1) *Covered bonds* means covered bonds as defined in paragraph (1) of the definition in the *glossary* (Definition based on Article 22(4) of the *UCITS Directive*) and collateralised by any of the following eligible assets:

- (a) *exposures* to or guaranteed by central governments, *central banks*, *public sector entities*, regional governments and local authorities in the *EEA*;
- (b)
 - (i) *exposures* to or guaranteed by non-*EEA* central governments, non-*EEA* *central banks*, *multilateral development banks*, *international organisations* that qualify for the *credit quality step 1*;
 - (ii) *exposures* to or guaranteed by non-*EEA* *public sector entities*, non-*EEA* regional governments and non-*EEA* local authorities that are *risk weighted* as *exposures* to *institutions* or central governments and *central banks* according to *BIPRU 3.4.23*, *BIPRU 3.4.24*, *BIPRU 3.4.10* or *BIPRU 3.4.16* to *BIPRU 3.4.17* respectively and that qualify for the *credit quality step 1*; and
 - (iii) *exposures* in the sense of this point (b) that qualify as a minimum for the *credit quality step 2*, provided that they do not exceed 20% of the nominal amount of outstanding *covered bonds* of issuing *institutions* ;
- (c) *exposures* to *institutions* that qualify for the *credit quality step 1* but so that:
 - (i) the total exposure of this kind must not exceed 15% of the nominal amount of the outstanding *covered bonds* of the issuing *credit institution*;
 - (ii) *exposures* caused by transmission and management of payments of the obligors of, or liquidation proceeds in respect of, loans secured by real estate to the holders of *covered bonds* must not be comprised by the 15% limit; and
 - (iii) *exposures* to *institutions* in the *EEA* with a maturity not exceeding 100 days are not comprised by the step 1 requirement but those *institutions* must as a minimum qualify for *credit quality step 2*;
- (d) loans secured:
 - (i) by residential real estate or shares in Finnish residential housing companies as referred to in *BIPRU 3.4.57R* up to the lesser of the principal amount of the liens that are combined with any prior liens and 80% of the value of the pledged properties; or
 - (ii) by senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities governed by the laws of an *EEA State* *securitising*

residential real estate *exposures* provided that at least 90% of the assets of such Fonds Communs de Créances or of equivalent *securitisation* entities governed by the laws of an *EEA State* are composed of mortgages that are combined with any prior liens up to the lesser of the principal amounts due under the units, the principal amounts of the liens, and 80% of the value of the pledged properties and the units qualify for *credit quality step 1* where such units do not exceed 20% of the nominal amount of the outstanding issue;

- (e)
 - (i) loans secured by commercial real estate or shares in Finnish housing companies as referred to in *BIPRU 3.4.57R* up to the lesser of the principal amount of the liens that are combined with any prior liens and 60% of the value of the pledged properties; or
 - (ii) loans secured by senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities governed by the laws of an *EEA State securitising* commercial real estate *exposures* provided that, at least, 90% of the assets of such Fonds Communs de Créances or of equivalent *securitisation* entities governed by the laws of an *EEA State* are composed of mortgages that are combined with any prior liens up to the lesser of the principal amounts due under the units, the principal amounts of the liens, and 60% of the value of the pledged properties and the units qualify for *credit quality step 1* where such units do not exceed 20% of the nominal amount of the outstanding issue; or
 - (iii) a *firm* may recognise loans secured by commercial real estate as eligible where the loan to value ratio of 60% is exceeded up to a maximum level of 70% if the value of the total assets pledged as collateral for the *covered bonds* exceed the nominal amount outstanding on the *covered bond* by at least 10%, and the bondholders' claim meets the legal certainty requirements set out in *BIPRU 3* and *5*; the bondholders' claim must take priority over all other claims on the collateral; or
 - (f) loans secured by ships where only liens that are combined with any prior liens within 60% of the value of the pledged ship.
- (2) For the purposes of (1)(d)(ii) and (1)(e)(ii) *exposures* caused by transmission and management of payments of the obligors of, or liquidation proceeds in respect of, loans secured by pledged

properties of the senior units or debt *securities* must not be comprised in calculating the 90% limit.

- (3) For the purposes of *BIPRU* 3.4.107R to *BIPRU* 3.4.110R “collateralised” includes situations where the assets described in subpoints (1)(a) to (1)(f) are exclusively dedicated in law to the protection of the bond-holders against losses.
- (4) Until 31 December 2010 the 20% limit for senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities specified in subpoints (d) and (e) does not apply, provided that those senior units have a credit assessment by a *nominated ECAI* which is the most favourable category of credit assessment made by the *ECAI* in respect of *covered bonds*.
- (5) Until 31 December 2010 the figure of 60% in (1)(f) can be replaced with a figure of 70%.

[Note: *BCD* Annex VI Part 1 point 68]

- 3.4.108 R A *firm* must for real estate collateralising *covered bonds* meet the minimum requirements set out in *BIPRU* 3.4.64R to *BIPRU* 3.4.73R and the valuation rules set out in *BIPRU* 3.4.77R to *BIPRU* 3.4.80R.

[Note: *BCD* Annex VI Part 1 point 69]

- 3.4.109 R Notwithstanding *BIPRU* 3.4.107R to *BIPRU* 3.4.108R, *covered bonds* meeting the definition of Article 22(4) of the *UCITS Directive* and issued before 31 December 2007 are also eligible for the preferential treatment until their maturity.

[Note: *BCD* Annex VI Part 1 point 70]

- 3.4.110 R *Covered bonds* must be assigned a *risk weight* on the basis of the *risk weight* assigned to senior unsecured *exposures* to the *credit institution* which issues them. The following correspondence between *risk weights* applies:
- (1) if the *exposures* to the *institution* are assigned a *risk weight* of 20%, the *covered bond* must be assigned a *risk weight* of 10%;
 - (2) if the *exposures* to the *institution* are assigned a *risk weight* of 50%, the *covered bond* must be assigned a *risk weight* of 20%;
 - (3) if the *exposures* to the *institution* are assigned a *risk weight* of 100%, the *covered bond* must be assigned a *risk weight* of 50%; and
 - (4) if the *exposures* to the *institution* are assigned a *risk weight* of 150%, the *covered bond* must be assigned a *risk weight* of 100%.

[Note: *BCD* Annex VI Part 1 point 71]

Items representing securitisation positions

- 3.4.111 R *Risk weighted exposure* amounts for *securitisation* positions must be determined in accordance with *BIPRU 9*.

[**Note:** *BCD Annex VI Part 1 point 72*]

Short-term exposures to institutions and corporates

- 3.4.112 R Short-term *exposures* to an *institution* or *corporate* for which a short-term credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in *BIPRU 3.4.113R* in accordance with the mapping by the *FSA* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAs* to six steps in a *credit quality assessment scale*.

[**Note:** *BCD Annex VI Part 1 point 73*]

- 3.4.113 R Table: Short-term exposures on an institution or corporate for which a short-term credit assessment by a nominated ECAI is available
This table belongs to *BIPRU 3.4.112R*.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	100%	150%	150%	150%

Exposures in the form of collective investment undertakings (CIUs)

- 3.4.114 R *BIPRU 3.4.115R* to *BIPRU 3.4.125R* set out the treatment to be accorded to *exposures* in the form of *CIUs*.

- 3.4.115 R Without prejudice to *BIPRU 3.4.116R* to *BIPRU 3.4.125R*, *exposures* in *CIUs* must be assigned a *risk weight* of 100%.

[**Note:** *BCD Annex VI Part 1 point 74*]

- 3.4.116 R *Exposures* in the form of *CIUs* for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in *BIPRU 3.4.117R* in accordance with the assignment by the *FSA* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAs* to six steps in a *credit quality assessment*

scale.

[**Note:** *BCD Annex VI Part 1 point 75*]

- 3.4.117 R Table: Exposures in the form of CIUs for which a credit assessment by a nominated ECAI is available
This table belongs to *BIPRU 3.4.116R*.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	100%	100%	150%	150%

- 3.4.118 R Where a *firm* considers that a position in a *CIU* is associated with particularly high risks it must assign that position a *risk weight* of 150%.

[**Note:** *BCD Annex VI Part 1 point 76*]

- 3.4.119 G A *firm* should consider a *CIU* as being high risk where there is no external credit assessment from an *eligible ECAI* and where the *CIU* has specific features (such as high levels of leverage or lack of transparency) that prevent it from meeting the eligibility criteria laid out in *BIPRU 3.4.121R*.

- 3.4.120 G Other examples of high risk *CIUs* are: one in which a substantial element of the *CIU's* property is made up of items that would attract a *risk weight* of over 100%; or one whose mandate (as referred to in *BIPRU 3.4.124R*) would permit it to invest in a substantial amount of such items.

- 3.4.121 R Where *BIPRU 3.4.116R* does not apply, a *firm* may determine the *risk weight* for a *CIU* as set out in *BIPRU 3.4.123R* to *BIPRU 3.4.125R*, if the following eligibility criteria are met:

- (1) one of the following conditions is satisfied:
 - (a) the *CIU* is managed by a company which is subject to supervision in an *EEA State*; or
 - (b) the following conditions are satisfied:
 - (i) the *CIU* is managed by a company which is subject to supervision that is equivalent to that laid down in Community law; and
 - (ii) cooperation between *competent authorities* is

sufficiently ensured; and

- (2) the *CIU's* prospectus or equivalent document includes:
 - (a) the categories of assets in which the *CIU* is authorised to invest; and
 - (b) if investment limits apply, the relative limits and the methodologies to calculate them; and
- (3) the business of the *CIU* is reported on at least an annual basis to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period.

[**Note:** *BCD* Annex VI Part 1 point 77]

- 3.4.122 R If another *EEA competent authority* approves a third country *CIU* as eligible under a *CRD implementation measure* with respect to point 77(a) of Part 1 of Annex VI of the *Banking Consolidation Directive* then a *firm* may make use of this recognition.

[**Note:** *BCD* Annex VI Part 1 point 78]

- 3.4.123 R Where a *firm* is aware of the underlying *exposures* of a *CIU*, it may look through to those underlying *exposures* in order to calculate an average *risk weight* for the *CIU* in accordance with the *standardised approach*.

[**Note:** *BCD* Annex VI Part 1 point 79]

- 3.4.124 R Where a *firm* is not aware of the underlying *exposures* of a *CIU*, it may calculate an average *risk weight* for the *CIU* in accordance with the *standardised approach* subject to the following rules: it will be assumed that the *CIU* first invests, to the maximum extent allowed under its mandate, in the *standardised credit risk exposure classes* attracting the highest capital requirement, and then continues making investments in descending order until the maximum total investment limit is reached.

[**Note:** *BCD* Annex VI Part 1 point 80]

- 3.4.125 R A *firm* may rely on a third party to calculate and report, in accordance with the methods set out in *BIPRU* 3.4.123R to *BIPRU* 3.4.124R, a *risk weight* for the *CIU* provided that the correctness of the calculation and report is adequately ensured.

[**Note:** *BCD* Annex VI Part 1 point 81]

Other items

- 3.4.126 R *BIPRU* 3.4.127R to *BIPRU* 3.4.133R set out the treatment to be accorded to

other items as referred to in *BIPRU* 3.2.9(16).

Treatment

- 3.4.127 R Tangible assets within the meaning of Article 4(10) of the *Bank Accounts Directive* must be assigned a *risk weight* of 100%.
- [Note: *BCD* Annex VI Part 1 point 82]
- 3.4.128 R Prepayments and accrued income for which a *firm* is unable to determine the counterparty in accordance with the *Bank Accounts Directive*, must be assigned a *risk weight* of 100%.
- [Note: *BCD* Annex VI Part 1 point 83]
- 3.4.129 R Cash items in the process of collection must be assigned a 20% *risk weight*. Cash in hand and equivalent cash items must be assigned a 0% *risk weight*.
- [Note: *BCD* Annex VI Part 1 point 84]
- 3.4.130 R Holdings of equity and other participations except where deducted from *capital resources* must be assigned a *risk weight* of at least 100%.
- [Note: *BCD* Annex VI Part 1 point 86]
- 3.4.131 R Gold bullion held in own vaults or on an allocated basis to the extent backed by bullion liabilities must be assigned a 0% *risk weight*.
- [Note: *BCD* Annex VI Part 1 point 87]
- 3.4.132 R In the case of asset sale and *repurchase agreements* and outright forward purchases, the *risk weight* must be that assigned to the assets in question and not to the counterparties to the transactions.
- [Note: *BCD* Annex VI Part 1 point 88]
- 3.4.133 R Where a *firm* provides credit protection for a number of *exposures* under terms that the *n*th default among the *exposures* triggers payment and that this credit event terminates the contract, and where the product has an external credit assessment from an *eligible ECAI* the *risk weights* prescribed in *BIPRU* 9 must be assigned. If the product is not rated by an *eligible ECAI*, the *risk weights* of the *exposures* included in the basket must be aggregated, excluding *n-1 exposures*, up to a maximum of 1250% and multiplied by the nominal amount of the protection provided by the credit derivative to obtain the *risk weighted* asset amount. The *n-1 exposures* to be excluded from the aggregation must be determined on the basis that they include those *exposures* each of which produces a lower *risk weighted exposure amount*

than the *risk weighted exposure amount* of any of the *exposures* included in the aggregation.

[**Note:** *BCD* Annex VI Part 1 point 89]

3.5 Simplified method of calculating risk weights

- 3.5.1 G This section (*BIPRU 3.5*) sets out a simplified approach to calculating *risk weights*. This approach is only relevant to an *exposure* class for which *risk weights* are determined by the ratings of a *nominated ECAI* or an export credit agency. For other *exposure* classes a *firm* should use the normal approach under the *standardised approach*.
- 3.5.2 G The approach in this section is only likely to be relevant for a *limited licence firm* or a *limited activity firm* that has only incidental credit *exposures* and for whom it would be prohibitively costly to establish the systems needed to include the credit assessments of *ECAs* and export credit agencies in its regulatory capital calculations. However the approach may be used by other *firms* if appropriate. A *firm* should notify the *FSA* if it adopts the approach in this section.
- 3.5.3 G Rather than *risk weighting exposures* individually, a *firm* eligible to apply the simplified approach should apply a single *risk weight* to all *exposures* in each *exposure* class. The simplified *risk weight* for *exposures* in a particular class will be the *risk weighting* for unrated entities for each *exposure* class in which the external credit assessments influence *risk weights*.
- 3.5.4 G The table in *BIPRU 3.5.5G* has a summary of the *risk weights* that a *firm* should use if it uses the simplified method of calculating *risk weights* referred to in *BIPRU 3.5.1G*.
- 3.5.5 G Table : Simplified method of calculating risk weights

This table belongs to *BIPRU 3.5.4G*.

Exposure class	Exposure sub-class	Risk weights	Comments
Central government	<i>Exposures to United Kingdom government or Bank of England in sterling</i>	0%	
	<i>Exposures to United Kingdom government or Bank of England in the currency of another EEA State</i>	0%	See Note 2.

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to EEA State's central government or central bank in currency of that state</i>	0%	
	<i>Exposures to EEA State's central government or central bank in the currency of another EEA State</i>	0%	See Notes 2 and 3.
	<i>Exposures to central governments or central banks of certain countries outside the EEA in currency of that country</i>	See next column	The <i>risk weight</i> is whatever it is under local law. See <i>BIPRU</i> 3.4.6R for precise details.
	<i>Exposures to European Central Bank</i>	0%	
	<i>Other exposures</i>	100%	
Regional/local governments	<i>Exposures to the Scottish Parliament, National Assembly for Wales and Northern Ireland Assembly in sterling</i>	0%	
	<i>Exposures to the Scottish Parliament, National Assembly for Wales and Northern Ireland Assembly in the currency of another EEA State</i>	0%	See Note 2.
	<i>Exposures to EEA States' equivalent regional/local governments in currency of that state</i>	0%	See <i>BIPRU</i> 3.4.17R for details of type of local/regional government covered.
	<i>Exposures to EEA States' equivalent regional/local governments in the currency of another EEA State</i>	0%	See <i>BIPRU</i> 3.4.17R for details of type of local/regional government covered. See Notes 2 and 3.

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to local or regional governments of certain countries outside the EEA in currency of that country</i>	0%	See <i>BIPRU 3.4.19R</i> for details of type of local/regional government covered. See Note 1.
	<i>Exposures to United Kingdom or EEA States' local/regional government in currency of that state if the exposure has original effective maturity of 3 months or less</i>	20%	
	<i>Exposures to United Kingdom or EEA States' local/regional government in the currency of another EEA State if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 2. See Note 3 for local/regional government of an <i>EEA State</i> other than the <i>United Kingdom</i>
	<i>Exposures to local or regional governments of countries outside the EEA in currency of that country if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 1.
	<i>Other exposures</i>	100%	
<i>PSE</i>	<i>Exposures to a PSE of the United Kingdom or of an EEA State if that PSE is guaranteed by its central government and if the exposure is be in currency of that PSE's state.</i>	0%	<i>BIPRU 3.4.24R</i> describes the <i>United Kingdom PSEs</i> covered and <i>BIPRU 3.4.25R</i> describes the <i>EEA PSEs</i> covered.
	<i>Exposures to PSE of a country outside the EEA if that PSE is guaranteed by the country's central government and if the exposure is in currency of that country.</i>	0%	See <i>BIPRU 3.4.26R</i> and Note 1.

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to a PSE of the United Kingdom or of an EEA State in currency of that state if the exposure has original effective maturity of 3 months or less</i>	20%	
	<i>Exposures to a PSE of the United Kingdom or of an EEA State in the currency of another EEA State if the exposure has original effective maturity of 3 months or less</i>	20%	See Notes 2 and 3.
	<i>Exposures to PSE of a country outside the EEA in currency of that country if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 1.
	<i>Other exposures</i>	100%	
<i>Multilateral development banks</i>	<i>Exposures to multilateral development banks listed in paragraph (1) of the glossary definition</i>	0%	Simplified approach does not apply. Normal <i>rules</i> apply.
	<i>Other exposures</i>	Various	Treated as an <i>institution</i>
European Community, the International Monetary Fund and the Bank for International Settlements		0%	Simplified approach does not apply. Normal <i>rules</i> apply.
<i>Institutions</i>	<i>Exposures to United Kingdom institution in sterling with original effective maturity of three months or less</i>	20%	

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to United Kingdom institution in the currency of another EEA State with original effective maturity of three months or less</i>	20%	See Note 2.
	<i>Exposures to institution whose head office is in another EEA State in the currency of that state with original effective maturity of three months or less</i>	20%	
	<i>Exposures to institution whose head office is in another EEA State in the currency of another EEA State with original effective maturity of three months or less</i>	20%	See Notes 2 and 3.
	<i>Exposures to institution with a head office in a country outside the EEA in the currency of that country with original effective maturity of three months or less</i>	20%	See Note 1.
	<i>Exposures to United Kingdom institution in sterling with original effective maturity of over three months</i>	50%	
	<i>Exposures to United Kingdom institution in the currency of another EEA State with original effective maturity of over three months</i>	50%	See Note 2.

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to an EEA institution with a head office in another EEA State in the currency of that state with original effective maturity of over months</i>	50%	
	<i>Exposures to an EEA institution with a head office in another EEA State in the currency of another EEA State with original effective maturity of over months</i>	50%	See Notes 2 and 3.
	<i>Exposures to institution with a head office in a country outside the EEA in the currency of that country with original effective maturity of over months</i>	50%	See Note 1.
	<i>Other exposures</i>	100%	
<i>Corporates</i>		100%	
<i>Retail exposures</i>		75%	Simplified approach does not apply. Normal <i>rules</i> apply.
Mortgages on residential or commercial property		Various	Simplified approach does not apply. Normal <i>rules</i> apply.
Past due items		Various	Simplified approach does not apply. Normal <i>rules</i> apply.
High risk items		150%	Simplified approach does not apply. Normal <i>rules</i> apply.

Exposure class	Exposure sub-class	Risk weights	Comments
<i>Covered bonds</i>		Various	<i>Risk weights</i> are based on the <i>risk weight</i> of issuer as described in <i>BIPRU</i> 3.4.110R. The <i>risk weight</i> of the issuer for this purpose should be calculated under the simplified approach.
<i>Securitisation exposures</i>		Generally 1250%. May look through to underlying <i>exposures</i> if <i>BIPRU</i> 9 allows.	Use the <i>BIPRU</i> 9 rules for unrated <i>exposures</i> under the <i>standardised approach</i>
Short term <i>exposures</i> with rating			See <i>BIPRU</i> 3.4.112R. Not applicable as uses <i>ECAI</i> ratings.
<i>CIUs</i>	May look through to underlying under <i>BIPRU</i> 3.4.123R	Various	Simplified approach does not apply. Normal <i>rules</i> apply. May use simplified approach to underlying if simplified approach applies to underlying.
	May use average <i>risk weight</i> under <i>BIPRU</i> 3.4.124R	Various	Simplified approach does not apply. Normal <i>rules</i> apply. May use simplified approach to underlyings if simplified approach applies to underlying.
	High risk under <i>BIPRU</i> 3.4.118R	150%	Simplified approach does not apply. Normal <i>rules</i> apply.
	Others	100%	
Other items under <i>BIPRU</i> 3.2.9R(16)		Various	Simplified approach does not apply. Normal <i>rules</i> apply.

Exposure class	Exposure sub-class	Risk weights	Comments
<p>Note 1: The <i>risk weight</i> should not be lower than the <i>risk weight</i> that applies for national currency <i>exposures</i> of the central government of the third country in question under <i>BIPRU 3.5</i>. That means that this <i>risk weight</i> only applies if the third country is one of those to which <i>BIPRU 3.4.6R</i> (Preferential <i>risk weight</i> for <i>exposures</i> of the central government of countries outside the <i>EEA</i> that apply equivalent prudential standards) applies.</p>			
<p>Note 2: This is a transitional measure. It lasts until 31 December 2012.</p>			
<p>Note 3: The <i>risk weight</i> should not be lower than the <i>risk weight</i> that applies for <i>exposures</i> of the central government of the <i>EEA State</i> in question in the currency of another <i>EEA State</i> under <i>BIPRU 3.5</i>.</p>			

- 3.5.6 G If an *exposure* is guaranteed and if under *BIPRU 5* the *firm* may treat the *exposure* as being to the guarantor, the simplified approach may be used for the guarantor. The key provisions are *BIPRU 5.7.23R* to *BIPRU 5.7.25R*.
- 3.5.7 G If an *exposure* is collateralised and if under *BIPRU 5* the *firm* may recognise the collateral, the simplified approach may be used to determine the *risk weight* to be applied to the collateralised *exposure*. The key provisions are *BIPRU 5.4.18R* to *BIPRU 5.4.21R*.
- 3.5.8 R If a *firm* does not nominate one or more *eligible ECAIs* as referred to in *BIPRU 3.6.4R* the *firm* must not use the *financial collateral comprehensive method*.

- 3.6 Use of rating agencies' credit assessments for the determination of risk weights under the standardised approach to credit risk
- 3.6.1 R The use of *ECAI* credit assessments for the calculation of a *firm's risk weighted exposure amounts* must be consistent and in accordance with *BIPRU 3.5*. Credit assessments must not be used selectively.
- [Note: *BCD* Article 83(1)]
- 3.6.2 R Where the FSA's recognition of an *ECAI* is not limited to its solicited credit assessments, a *firm* may use an unsolicited credit assessment of an *eligible ECAI* for the calculation of a *firm's risk weighted exposure amounts*.
- [Note: *BCD* Article 83(2)]
- 3.6.3 G The FSA's recognition of an *ECAI* may be limited to its solicited credit assessments. Where this is the case a *firm* should not use unsolicited assessments. The FSA may indicate that the unsolicited ratings of an *eligible ECAI* are not to be used for the purposes of *BIPRU 3* if those assessments are considered to be inferior in quality to the general quality of solicited assessments or if it considers that the *ECAI's* strategy in relation to the issuing of unsolicited assessments is founded in the placing of undue pressure on the rated entity to pay for a rating..
- Treatment
- 3.6.4 R A *firm* may nominate one or more *eligible ECAs* to be used for the determination of *risk weights* to be assigned to asset and off-balance sheet items.
- [Note: *BCD* Annex VI Part 3 point 1]
- 3.6.5 R A *firm* which decides to use the credit assessments produced by an *eligible ECAI* for a certain class of items must use those credit assessments consistently for all *exposures* belonging to that class.
- [Note: *BCD* Annex VI Part 3 point 2]
- 3.6.6 R A *firm* which decides to use the credit assessments produced by an *eligible ECAI* must use them in a continuous and consistent way over time.
- [Note: *BCD* Annex VI Part 3 point 3]
- 3.6.7 R A *firm* can only use *ECAs'* credit assessments that take into account all amounts both in principal and in interest owed to it.

[Note: BCD Annex VI Part 3 point 4]

- 3.6.8 R If only one credit assessment is available from a *nominated ECAI* for a rated item, that credit assessment must be used to determine the *risk weight* for that item.

[Note: BCD Annex VI Part 3 point 5]

- 3.6.9 R If two credit assessments are available from *nominated ECAs* and the two correspond to different *risk weights* for a rated item, the higher *risk weight* must be applied.

[Note: BCD Annex VI Part 3 point 6]

- 3.6.10 R If more than two credit assessments are available from *nominated ECAs* for a rated item, the two assessments generating the two lowest *risk weights* must be referred to. If the two lowest *risk weights* are different, the higher *risk weight* must be assigned. If the two lowest *risk weights* are the same, that *risk weight* must be assigned.

[Note: BCD Annex VI Part 3 point 7]

- 3.6.11 R
- (1) If a *firm* has decided to make use of the credit assessments of export credit agencies, when *risk weighting exposures* to central governments or *central banks*, if two or more credit assessments are available to a *firm* from export credit agencies or if credit assessments are available to a *firm* from both *nominated ECAs* and export credit agencies, the *firm* must adopt the approach in this *rule*.
 - (2) If two credit assessments are available and correspond to different *risk weights* for a rated item, the higher *risk weight* must be applied.
 - (3) If more than two credit assessments are available for a rated item, the assessments generating the two lowest *risk weights* must be referred to:
 - (a) if the two lowest *risk weights* are the same, that *risk weight* must be applied; or
 - (b) if the two lowest *risk weights* are different, the higher of the two must be applied.
 - (4) If a *firm* does not for the purposes of *BIPRU 3* make any use of the consensus risk scores referred to in *BIPRU 3.4.7R(1)* it may treat those scores as not being available to it for the purpose of this *rule*. Likewise, if a *firm* does not for the purposes of *BIPRU 3* make any use of the credit assessments of a particular export credit agency as

referred to in *BIPRU 3.4.7R(2)* it may treat those assessments as not being available to it for the purpose of this *rule*.

Issuer and issue credit assessment

- 3.6.12 R Where a credit assessment exists for a specific issuing program or facility to which the item constituting the *exposure* belongs, this credit assessment must be used to determine the *risk weight* to be assigned to that item.

[**Note:** *BCD Annex VI Part 3 point 8*]

- 3.6.13 R Where no directly applicable credit assessment exists for a certain item, but a credit assessment exists for a specific issuing program or facility to which the item constituting the *exposure* does not belong or a general credit assessment exists for the issuer, then that credit assessment must be used if it produces a higher *risk weight* than would otherwise be the case or if it produces a lower *risk weight* and the *exposure* in question ranks *pari passu* or senior in all respects to the specific issuing program or facility or to senior unsecured *exposures* of that issuer as relevant.

[**Note:** *BCD Annex VI Part 3 point 9*]

- 3.6.14 R *BIPRU 3.6.12R* and *BIPRU 3.6.13R* are not to prevent the application of *BIPRU 3.4.107R* to *BIPRU 3.4.110R* (Exposures in the form of covered bonds).

[**Note:** *BCD Annex VI Part 3 point 10*]

- 3.6.15 R Credit assessments for issuers within a corporate group cannot be used as credit assessment of another issuer within the same corporate group.

[**Note:** *BCD Annex VI Part 3 point 11*]

Long-term and short-term credit assessments

- 3.6.16 R Short-term credit assessments may only be used for short-term asset and off-balance sheet items constituting *exposures* to *institutions* and *corporates*.

[**Note:** *BCD Annex VI Part 3 point 12*]

- 3.6.17 R Any short-term credit assessment may only apply to the item the short-term credit assessment refers to, and it must not be used to derive *risk weights* for any other item.

[**Note:** *BCD Annex VI Part 3 point 13*]

3.6.18 R Notwithstanding *BIPRU* 3.6.17R, if a short-term rated facility is assigned a 150% *risk weight*, then all unrated unsecured *exposures* on that obligor whether short-term or long-term must also be assigned a 150% *risk weight*.

[**Note:** *BCD* Annex VI Part 3 point 14]

3.6.19 R Notwithstanding *BIPRU* 3.6.17R, if a short-term rated facility is assigned a 50% *risk weight*, no unrated short-term *exposure* may be assigned a *risk weight* lower than 100%.

[**Note:** *BCD* Annex VI Part 3 point 15]

Domestic and foreign currency items

3.6.20 R A credit assessment that refers to an item denominated in the obligor's domestic currency cannot be used to derive a *risk weight* for another *exposure* on that same obligor that is denominated in a foreign currency.

[**Note:** *BCD* Annex VI Part 3 point 16]

3.6.21 R Notwithstanding *BIPRU* 3.6.20R, when an *exposure* arises through a *firm's* participation in a loan that has been extended by a *multilateral development bank* whose preferred creditor status is recognised in the market, the credit assessment on the obligors' domestic currency item may be used for *risk weighting* purposes.

[**Note:** *BCD* Annex VI Part 3 point 17]

3.7 Classification of off-balance-sheet items

- 3.7.1 R In accordance with *BIPRU 3.2.1R(2)* and *BIPRU 3.2.2R*, a *firm* must:
- (1) assign an off-balance sheet item listed in the table in *BIPRU 3.7.2R* to the risk category indicated in column 1 of that table; and
 - (2) determine the *exposure* value of that item as the percentage of its value for the appropriate risk category as set out in column 3 of the table in *BIPRU 3.7.2R*.

Table: Classification of off-balance-sheet items

- 3.7.2 R This table belongs to *BIPRU 3.7.1R*

[**Note:** *BCD Annex II*]

Category	Item	Percentage
Full risk	Guarantees having the character of credit substitutes Credit derivatives Acceptances Endorsements on bills not bearing the name of another <i>credit institution</i> Transactions with recourse Irrevocable standby letters of credit having the character of credit substitutes Assets purchased under outright forward purchase agreements Forward forward deposits The unpaid portion of partly-paid <i>shares</i> and <i>securities</i> Asset sale and repurchase agreements as defined in Article 12(3) and (5) of the <i>Bank Accounts Directive</i> Other items also carrying full risk	100%

Category	Item	Percentage
Medium risk	<p>Documentary credits issued and confirmed (see also medium/low risk).</p> <p>Warranties and indemnities (including tender, performance, customs and tax bonds) and guarantees not having the character of credit substitutes.</p> <p>Irrevocable standby letters of credit not having the character of credit substitutes.</p> <p>Undrawn credit facilities (agreements to lend, purchase <i>securities</i>, provide guarantees or acceptance facilities) with an original maturity of more than one year.</p> <p>Note issuance facilities (NIFs) and revolving underwriting facilities (RUFs).</p>	50%
Medium/low risk	<p>Documentary credits in which underlying shipment acts as collateral and other self-liquidating transactions.</p> <p>Undrawn credit facilities (agreements to lend, purchase <i>securities</i>, provide guarantees or acceptance facilities) with an original maturity of up to and including one year which may not be cancelled unconditionally at any time without notice or that do not effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness.</p>	20%

Category	Item	Percentage
Low risk	Undrawn credit facilities (agreements to lend, purchase <i>securities</i> , provide guarantees or acceptance facilities) which may be cancelled unconditionally at any time without notice, or that do effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness. Retail credit lines may be considered as unconditionally cancellable if the terms permit the <i>firm</i> to cancel them to the full extent allowable under consumer protection and related legislation.	0%

BIPRU 3 Annex 1 G

Guidance on the standardised approach zero risk weighting for intra-group exposures

This flow chart belongs to *BIPRU 3.2.25R – BIPRU 3.2.35G*.

Flowchart – zero risk weighting for intra-group exposures

3 Annex 2R

Regional governments and local authorities eligible for the treatment in BIPRU 3.4.15R

- | | |
|-----|-----------------------------|
| (1) | The Scottish Parliament |
| (2) | National Assembly for Wales |
| (3) | Northern Ireland Assembly |

3 Annex 3R

High risk exposures

- | | |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (1) | <i>Exposures</i> arising out of <i>venture capital business</i> (whether or not the <i>firm</i> itself carries on the <i>venture capital business</i>). |
| (2) | Any <i>exposure</i> of the type referred to in <i>BIPRU 3.4.118R</i> (High risk position in a <i>CIU</i>) that is illiquid and held with a view to long-term sale or realisation. |

Exposures to institutions: Interaction with short-term credit assessments in BIPRU 3.4.40R

- 4 The IRB approach
- 4.1 The IRB approach: Application, purpose and overview
- Application
- 4.1.1 R *BIPRU 4 applies to a firm with an IRB permission.*
- Purpose
- 4.1.2 G *BIPRU 4 implements the following provisions of the Banking Consolidation Directive:*
- (1) Articles 84 - 89; and
 - (2) Annex VII.
- 4.1.3 G *BIPRU 4 also implements Annex VIII of the Banking Consolidation Directive so far as it applies to the IRB approach. In particular, it implements (in part):*
- (1) from Part 1 of that Annex, points 12-16, 19-22, 26(g)(ii) and 27;
 - (2) from Part 2 of that Annex, points 8-11; and
 - (3) from Part 3 of that Annex, points 1, 11, 20, 23-24, 58(h), 61, 64-79 and 90-93.
- 4.1.4 G *BIPRU 4 also implements article 40 of the Capital Adequacy Directive as it applies to the IRB approach.*
- 4.1.5 G Other material on the *IRB approach* can be found in *BIPRU 8* (Group risk), *BIPRU 9* (Securitisation), *BIPRU 13* (The calculation of exposure values for financial derivatives, securities financing transactions and long settlement transactions) and *BIPRU 14* (Capital requirements for settlement and counterparty risk). *BIPRU 5* (Credit risk mitigation) also contains material applicable to the *IRB approach*.
- Overview
- 4.1.6 G The *IRB approach* is an alternative to the *standardised approach* for calculating a *firm's* credit risk capital requirements. It may be applied to all a *firm's exposures* or to some of them, subject to various limitations on partial use as set out in *BIPRU 4.2*. Under the *IRB approach* capital requirements are based on a *firm's* own estimates of certain parameters together with other parameters set out in the *Banking Consolidation Directive*.
- 4.1.7 G *Exposures* are divided into a number of distinct *exposure* classes. These are listed in *BIPRU 4.3.2R*. There is a special treatment for purchased receivables, although they do not form an *exposure* class on their own.
-

- 4.1.8 G For *exposures* in the *sovereign, institution and corporate IRB exposure class*, there is a *foundation IRB approach* under which a *firm* provides its own estimates of *PD* and an *advanced IRB approach* under which a *firm* additionally provides its own estimates of *LGD* and *conversion factors*. The distinction between the *foundation IRB approach* and the *advanced IRB approach* only applies to this *IRB exposure class*.
- 4.1.9 G For *retail exposures*, a *firm* provides its own estimates of *PD*, *LGD* and *conversion factors*.
- 4.1.10 G For the *corporate exposure* class there is a separate sub-class of *specialised lending exposure*. A *firm* may calculate *risk weights* for these *exposures*, where it is able to do so, in the same way as it does for the rest of its *corporate exposure* class, i.e. using the *foundation IRB approach* or the *advanced IRB approach*. Where a *firm* is not able to use this approach it may calculate *risk weights* for *specialised lending exposures* by slotting them into predetermined *risk weights*.
- 4.1.11 G For *equity exposures* there are two approaches based on market based measures and a third under which a *firm* uses its own estimates of *PD* only.
- IRB permissions: general
- 4.1.12 G The *rules* in *GENPRU* and *BIPRU* do not allow a *firm* to use the *IRB approach*. A *firm* that wishes to use the *IRB approach* should therefore apply for permission to use the *IRB approach* using the application procedure explained in *BIPRU* 1.3. If a *firm's* application is granted, its terms will be set out in an *IRB permission*.
- 4.1.13 G The *FSA* recognises that the nature of *IRB approaches* will vary between *firms*. The scope of and the requirements and conditions set out in an *IRB permission* may therefore differ in substance or detail from *BIPRU* 4 in order to address individual circumstances adequately. However any differences will only be allowed if they are compliant with the *Banking Consolidation Directive*. An *IRB permission* will implement any such variation by modifying the relevant provisions of *GENPRU* and *BIPRU*. An *IRB permission* may also include additional conditions to meet the particular circumstances of the *firm*.
- 4.1.14 G (1) The *FSA* will only grant an *IRB permission* if it is satisfied that the *firm's* systems for the management and rating of credit risk *exposures* are sound and implemented with integrity and, in particular, that they meet the standards in *BIPRU* 4.2.2R in accordance with the *minimum IRB standards*.
- (2) Under *BIPRU* 4.2.11R, a *firm* applying for an *IRB permission* is required to demonstrate that it has been using for the *IRB exposure classes* in question *rating systems* that were broadly in line with the *minimum IRB standards* for internal risk measurement and management purposes for at least three years prior to the date of its *IRB permission*.
-

- (3) Under *BIPRU 4.2.13R*, a *firm* applying for the use of own estimates of *LGDs* and/or *conversion factors* should demonstrate that it has been estimating and employing own estimates of *LGDs* and/or *conversion factors* in a manner that was broadly consistent with the *minimum IRB standards* for use of own estimates for at least three years prior to the date of its *IRB permission* or of a variation of its *IRB permission* that, in either case, entitles the *firm* to use own estimates of *LGDs* and/or *conversion factors*.

Link to standard rules: Incorporation of the IRB output into the capital calculation

- 4.1.15 G An *IRB permission* will modify *GENPRU 2.1.51R* (Calculation of the credit risk capital requirement) by amending, to the extent set out in the *IRB permission*, the calculation of the *credit risk capital requirement* in accordance with *BIPRU 4* and the other provisions of the *Handbook* relating to the *IRB approach*.
- 4.1.16 R A *firm* must calculate its *credit risk capital component* as the sum of:
- (1) (for *exposures* to which the *standardised approach* is applied) the *credit risk capital component* as calculated under *BIPRU 3.1.5R*; and
 - (2) (for *exposures* to which the *IRB approach* is applied to which the *standardised approach* would otherwise apply in accordance with *BIPRU 3.1.5R* (Credit risk capital component)), 8% of the total of the *firm's risk weighted exposure amounts* calculated in accordance with the *IRB approach*.
- 4.1.17 G For *exposures* covered by an *IRB permission*, *BIPRU 5* (Credit risk mitigation) is modified by *BIPRU 4.10*.
- 4.1.18 G Under *BIPRU 4.9*, a *firm* is required to deal with *securitisation positions* under those provisions of *BIPRU 9* applicable to a *firm* using the *IRB approach*.
- 4.1.19 G *Exposures* treated under *BIPRU 13* are required to be dealt with in accordance with the *IRB approach* to the extent set out in *BIPRU 13*.
- 4.1.20 G By modifying *GENPRU 2.1.51R* to allow the *firm* to use the *IRB approach* to calculate all or part of its *risk weighted exposure amounts*, the *FSA* is treating it like an application rule. The modification means that the provisions of *BIPRU* relating to the *IRB approach* supersede the rules relating to the *standardised approach* for *exposures* coming within the scope of the *IRB permission*.
- 4.1.21 R A reference in the *Handbook* to a provision of the *IRB approach*, in the case of a *firm*:
- (1) excludes any provision of the *IRB approach* set out in the *Handbook* that is not applied to that *firm* by its *IRB permission*;
 - (2) includes any additional provision contained in the *firm's IRB permission*; and
 - (3) takes into account any other amendments made to the provisions in the *Handbook* relating to the *IRB approach* made by the *firm's IRB permission*.
-

- 4.1.22 R To the extent that a *firm's IRB permission* does not allow it to use a particular approach in the *Handbook* relating to the *IRB approach* the *Handbook* provision in question does not apply to the *firm*.
- 4.1.23 R If a provision of the *Handbook* relating to the *IRB approach* says that a *firm* may do something if its *IRB permission* allows it, a *firm* may do that thing unless its *IRB permission* expressly says that it may not do so except that:
- (1) *BIPRU 4.2.18R - BIPRU 4.2.19R* (Sequential implementation of IRB approach) and *BIPRU 4.2.26R(1)-(5)* (Combined use of standardised approach with IRB approach) only apply if expressly permitted by a *firm's IRB permission*;
 - (2) a *firm* may not use the *advanced IRB approach* for the *sovereign, institution and corporate IRB exposure class* except to the extent expressly permitted by the *firm's IRB permission*;
 - (3) if a *firm* uses its own estimates of *LGD* and *conversion factors* it may only take into account *unfunded credit protection* to reduce *LGD* in the manner set out in its *IRB permission*;
 - (4) if a *firm* uses its own estimates of *LGD* and *conversion factors* it may only recognise the effects of financial collateral under *BIPRU 10.6.17R* (Exemptions for firms using own estimates of *LGD* and *conversion factors* under the *IRB approach*) in the manner set out in its *IRB permission*;
 - (5) a *firm* must deal with *equity exposures* in the manner set out in its *IRB permission*; and
 - (6) (in the case of *collateral* that is only eligible for recognition under paragraph 21 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (Other physical collateral)) a *firm* may not recognise as eligible collateral an item of a type referred to in *BIPRU 4.10.16R* (Other physical collateral) unless that item is of a type specified as permitted in its *IRB permission*.
- 4.1.24 G An *IRB permission* will set out *firm-specific* material. This will generally include:
- (1) details about the *firm's* methodology for carrying out the *IRB approach*, including the models and *rating systems* that a *firm* should use;
 - (2) reporting requirements; and
 - (3) requirements about internal control structure.
- Compliance
- 4.1.25 R If a *firm* ceases to comply with the requirements of the *IRB approach*, it must either present to the *FSA* a plan for a timely return to compliance or demonstrate that the effect of non-compliance is immaterial.

[Note BCD Article 84(5)]

- 4.1.26 G If a *firm* ceases to comply with the requirements of the *IRB approach*, the *FSA* may revoke the *IRB permission* or take other appropriate supervisory action.
- 4.1.27 G For the purposes of *BIPRU 4.1.25R*, the *FSA* will expect a *firm* to demonstrate that, taking into account all instances where the *firm* has not complied with the requirements of the *IRB approach*, the effect of non-compliance is immaterial.
-

4.2 The IRB approach: High level material

Application

4.2.1 R This section applies to all *exposures* treated under the *IRB approach*.

General approach to granting an IRB permission

4.2.2 R A *firm's* systems for the management and rating of credit risk *exposures* must be sound and implemented with integrity and, in particular, they must meet the following standards in accordance with the *minimum IRB standards*:

- (1) the *firm's rating systems* provide for a meaningful assessment of obligor and transaction characteristics, a meaningful differentiation of risk and accurate and consistent quantitative estimates of risk;
- (2) internal ratings and *default* and *loss* estimates used in the calculation of capital requirements and associated systems and processes play an essential role in the risk management and decision-making process, and in the credit approval, internal capital allocation and corporate governance functions of the *firm*;
- (3) the *firm* has a credit risk control unit responsible for its *rating systems* that is appropriately independent and free from undue influence;
- (4) the *firm* collects and stores all relevant data to provide effective support to its credit risk measurement and management process; and
- (5) the *firm* documents its *rating systems*, the rationale for their design and validates its rating systems.

[Note: BCD Article 84(2) (part)]

4.2.3 R Where an *EU parent credit institution* and its *subsidiary undertakings* or an *EU parent financial holding company* and its *subsidiary undertakings* use the *IRB approach* on a unified basis, the question whether the *minimum IRB standards* are met is answered by considering the *parent undertaking* and its *subsidiary undertakings* together unless the *firm's IRB permission* specifies otherwise.

[Note: BCD Article 84(2) (part)]

Outsourcing

- 4.2.4 G
- (1) This *guidance* sets out the basis on which a *firm* may rely upon a *rating system* or data provided by another member of its *group*.
 - (2) A *firm* may rely upon a *rating system* or data provided by another member of its *group* if the following conditions are satisfied:
-

- (a) the *firm* only does so to the extent that it is appropriate, given the nature and scale of the *firm's* business and portfolios and the *firm's* position within the *group*;
 - (b) the *group* is an *EEA banking and investment group*;
 - (c) the integrity of the *firm's* systems and controls is not adversely affected;
 - (d) the outsourcing of these functions meets the requirements of *SYSC*; and
 - (e) (if the provision of the *rating system* or data is not carried out in the *United Kingdom* or in the jurisdiction of the *competent authority* that is the lead regulator of the *group*) the *firm* can demonstrate to the *FSA* that the ability of the *FSA* and that lead regulator to carry out their responsibilities under the *Handbook*, the *Banking Consolidation Directive* and the *Capital Adequacy Directive* are not adversely affected.
- (3) If a *firm* does use a *rating system* or data provided by another member of its *group*, the requirements in *BIPRU 4* continue to apply to that *firm* in respect of that *rating system* and data. A *firm* cannot absolve itself of the responsibility for complying with those requirements by claiming that any breach is caused by the actions of a third party to which the *firm* has delegated tasks. The *rating system* and data provision are still those of the *firm*, even though personnel elsewhere in the *firm's* group are carrying out these functions on its behalf. So any references in *BIPRU* to what a *firm*, its personnel and its management should and should not do still apply.
- (4) If a *firm* does use a *rating system* or data provided by another *group* member, the *firm's governing body* should formally delegate those functions to the *persons* or bodies that are to carry them out.
- (5) Before delegating the provision of a *rating system* or data to another *group* member, the *firm's governing body* should have explicitly considered the arrangement and decided that it is appropriate and that it enables the *firm* to meet the conditions in (2).

Assessment and estimation

- 4.2.5 G (1) This paragraph provides *guidance* on *BIPRU 4.2.2R* and in particular *BIPRU 4.2.2R(1)*.
- (2) The information that a *firm* produces or uses for the purpose of the *IRB approach* should be reliable and take proper account of the different users of the information produced (customers, shareholders, regulators and other market participants).
- (3) A *firm* should establish quantified and documented targets and standards, against which it should test the accuracy of data used in its *rating systems*.
- (4) Tests under (3) might include:
-

- (a) report and accounts reconciliation, including completeness in relation to (b);
 - (b) whether every *exposure* has a *PD*, *LGD* and, if applicable, *conversion factor* for reporting purposes;
 - (c) whether the *firm's* risk control environment has key risk indicators for the purpose of monitoring and ensuring data accuracy;
 - (d) whether the *firm* has an adequate business and information technology infrastructure with fully documented processes;
 - (e) whether the *firm* has clear and documented standards on ownership of data (including inputs and manipulation) and timeliness of current data (daily, monthly, real time); and
 - (f) whether the *firm* has a comprehensive quantitative audit programme.
- (5) The reconciliation referred to in 4(a) should be reasonably fit for purpose. In particular it should meet the standards in (6) and (7).
- (6) For data inputs, testing for accuracy of data, including the reconciliation referred to in 4(a), should be sufficiently detailed so that, together with other available evidence, it gives reasonable assurance that data input into the *rating system* is accurate, complete and appropriate. Input data fails the required standard if it gives rise to a serious risk of material misstatement in the capital requirement either immediately or subsequently.
- (7) For data outputs, the *firm*, as part of the reconciliation referred to in 4(a), should be able to identify and explain material differences between the outputs produced under accounting standards and those produced under the requirements of the *IRB approach*, including in relation to areas that address similar concepts in different ways (for example *expected loss* on the one hand and accounting provisions on the other).
- (8) A *firm* should have clear and documented standards and policies about the use of data in practice (including information technology standards) which should in particular cover the *firm's* approach to the following:
- (a) data access and security;
 - (b) data integrity, including the accuracy, completeness, appropriateness and testing of data; and
 - (c) data availability.

Further requirements concerning the use test

- 4.2.6 R If a *firm* uses separate models for the purpose of the *IRB approach* and for its internal purposes as referred to in *BIPRU* 4.2.2R(2) it must be able to demonstrate the reasonableness of any differences between those models.
-

- 4.2.7 G (1) This paragraph provides *guidance* on *BIPRU* 4.2.2R and in particular *BIPRU* 4.2.2R(2).
- (2) The *IRB approach* as applicable to a *firm* should be an integral part of its business and risk management processes and procedures to the extent that credit risk is relevant to them. It should also have a substantial influence on its decision-making and actions. ~~In particular, the *FSA* would expect a *firm* to have regard to the following areas~~
- (a) particular regard should be had to the use of the *IRB approach* in:
- (i) credit approval;
 - (ii) individual and portfolio limit setting;
 - (iii) reporting of credit risk information; and
 - (iv) provisioning; ~~and~~
 - ~~(v) the setting and use of the significant criteria by reference to which other decisions to incur or maintain credit risk are taken or by reference to which credit risk is otherwise assessed;~~
- (b) other relevant aspects include ~~assessment of~~:
- (vi) assessment of economic capital;
 - (vii) internal capital allocation so far as related to credit risk;
 - (viii) risk appetite;
 - (ix) strategy and acquisitions;
 - (x) profitability and performance; and
 - (xi) performance-related remuneration;
- (c) the carrying out of the *firm's* obligations under the *overall Pillar 2 rule*; and
- (d) matters relating to the *firm's* infrastructure, including information technology, skills and resources and organisational culture.
-

- 4.2.8 G This paragraph provides further *guidance* on *BIPRU 4.2.2R* and in particular *BIPRU 4.2.2R(2)*. In the *FSA's* view risk management has an essential role in informing risk decisions. However, an essential role does not necessarily mean an exclusive role or even always a primary role. There may be justifiable differences between the *IRB approach* and the *firm's* use of *rating systems* for its internal purposes as referred to in *BIPRU 4.2.2R(2)*. For example, internal standards and policies may refer to estimates of *PD* and *LGD* for the length of the asset rather than to estimates based on a one-year period (in the case of *PD* estimates) or on an economic downturn (in the case of *LGD* estimates) required by the *IRB approach*.
- 4.2.9 G If a *firm* uses scorecards for its internal credit approval process and the models it uses for the purpose of the *IRB approach* are fundamentally different from those scorecards, a *firm's* demonstration of how this is compatible with *BIPRU 4.2.2R(2)* might include demonstrating that estimates calculated under the *IRB approach* are used to change sanctioning decisions at an individual or portfolio level. Examples of this might include amending cut-offs, the application of policy rules, the revision of an existing scorecard or the introduction of a new one or taking strategic decisions on which segments of the market to target.
- 4.2.10 G To the extent that a *firm* uses *LGD* estimates in its internal risk management processes that differ from the downturn *LGDs* used in the calculation of *risk weighted assets* (see *BIPRU 4.3.103R*), the reasons for the difference should be documented in accordance with *BIPRU 4.3.109R*.

Requirements concerning the experience requirement

- 4.2.11 R A *firm* must be able to demonstrate that it has been using for the *IRB exposure classes* in question *rating systems* that were broadly in line with the *minimum IRB standards* for internal risk measurement and management purposes for at least three years prior to the date of its *IRB permission*.

[**Note:** *BCD* Article 84(3)]

- 4.2.12 G In meeting the experience requirement under *BIPRU 4.2.11R*, the *FSA* would expect a *firm* to be able to demonstrate that it has been:
- (1) operating an internal *rating system* with estimates of *PD*;
 - (2) meeting the standards in *BIPRU 4* for senior management knowledge and reporting; and
 - (3) meeting the standards in *BIPRU 4* relating to the use of *rating systems* in its business;

for the required minimum 3 year period.

4.2.13 R A *firm* that has applied for the use of own estimates of *LGDs* and/or *conversion factors* must be able to demonstrate to the *FSA* that it has been estimating and employing own estimates of *LGDs* and/or *conversion factors* in a manner that was broadly consistent with the *minimum IRB standards* for use of own estimates of those parameters for at least three years prior to the date of its *IRB permission* or of a variation of its *IRB permission* that, in either case, entitled the *firm* to use own estimates of *LGDs* and/or *conversion factors*.

[**Note:** *BCD* Article 84(4)]

4.2.14 G In meeting the experience requirement under *BIPRU* 4.2.13R, the *FSA* would expect a *firm* to be able to demonstrate that it has been:

(1) operating an internal *rating system* with estimates of *LGD* and with *conversion factors*; and

(2) compliant with *BIPRU* 4.2.11R as applied to the *advanced IRB approach*.

for the required minimum 3 year period.

4.2.15 G In the *FSA's* view the standard required by *BIPRU* 4.2.11R and *BIPRU* 4.2.13R is for a *rating system* to be improved in the light of experience during the three year period so that it meets the minimum requirements more fully for the last year than for the two prior years, provided that the *rating system* has not changed so profoundly that experience from the first or second years becomes of marginal relevance in assessing the reliability of the changed *rating system*.

Implementation of the internal ratings based approach

4.2.16 R A *firm* must comply with any requirements in its *IRB permission* relating to the matters described in 4.2.17R – *BIPRU* 4.2.35G.

4.2.17 R Without prejudice to *BIPRU* 4.2.26R, a *firm* and any *parent undertaking* and its *subsidiary undertakings* must implement the *IRB approach* for all *exposures*.

[**Note:** *BCD* Article 85(1) (part)]

4.2.18 R To the extent that a *firm's IRB permission* permits this, implementation may be carried out sequentially across the different *IRB exposure classes* within the same business unit, across different business units in the same group or for the use of own estimates of *LGDs* or *conversion factors* for the calculation of *risk weights* for the *sovereign, institutional and corporate IRB exposure class*.

[**Note:** *BCD* Article 85(1) (part)]

4.2.19 R In the case of the *retail exposures*, implementation may (but only to the extent provided for in the *firm's IRB permission*) be carried out sequentially across the categories of *exposures* to which the different correlations in *BIPRU* 4.6.41R–*BIPRU* 4.6.44R correspond.

[Note: BCD Article 85(1) (part)]

- 4.2.20 R (1) Implementation of the *IRB approach* as referred to in *BIPRU 4.2.18R* must be carried out within a reasonable period of time as set out in the *IRB permission*.
- (2) The implementation must be carried out subject to strict conditions determined by the *FSA* and set out in the *IRB permission*.
- (3) A *firm* must not use the flexibility under *BIPRU 4.2.18R* selectively with the purpose of achieving reduced minimum capital requirements in respect of those *IRB exposure classes* or business units that are yet to be included in the *IRB approach* or in the use of own estimates of *LGDs* and *conversion factors*.

[Note: BCD Article 85(2)]

- 4.2.21 G (1) A *firm* should achieve full roll-out of the *IRB approach* to all its *exposures*, subject to the exemptions outlined in *BIPRU 4.2.26R*, within the period specified in its *IRB permission*. A *firm* should not retain a permanent mix of portfolios on the *standardised approach* and the *IRB approach*, on the *foundation IRB approach* and the *advanced IRB approach* or on a mixture of all approaches with the exception of portfolios covered by those exemptions.
- (2) This applies to a move:
- (a) from the *standardised approach* to the *IRB approach*;
- (b) from the *foundation IRB approach* to the *advanced IRB approach*; and
- (c) from the transitional *rules and guidance* for *BIPRU* to the *IRB approach*.
- (3) The period referred to in *BIPRU 4.2.20R(1)* will generally be not more than three years of starting use of the *IRB approach* or the *advanced IRB approach* as applicable.

- 4.2.22 R A *firm* using the *IRB approach* for any *IRB exposure class* must at the same time use the *IRB approach* for the *equity exposure class*.

[Note: BCD Article 85(3)]

- 4.2.23 R Subject to *BIPRU 4.2.17R – BIPRU 4.2.20R*, *BIPRU 4.2.22R* and *BIPRU 4.2.26R*, a *firm* that has an *IRB permission* must not use the *standardised approach* for the calculation of *risk-weighted exposure amounts* for the *exposures* to which the *IRB approach* applies under the *IRB permission*.

[Note: BCD Article 85(4)]

4.2.24 R Subject to *BIPRU 4.2.17R – BIPRU 4.2.22R* and *BIPRU 4.2.26R*, a *firm* whose *IRB permission* provides for the use of the *advanced IRB approach* for the calculation of *LGDs* and *conversion factors* for the *sovereign, institution and corporate IRB exposure class* must not use the *LGD values* and *conversion factors* applicable to the *foundation IRB approach* for the exposures to which the *advanced IRB approach* applies under the *IRB permission*.

[Note: BCD Article 85(5)]

4.2.25 G The *FSA* will not agree to a *firm's* request to revoke or vary its *IRB permission* so as to permit the *firm* to revert to the *standardised approach* except for demonstrated good cause. Likewise, the *FSA* will not agree to a *firm's* request to revoke or vary its *IRB permission* so as to permit the *firm* to revert to the *foundation IRB approach* if the *IRB permission* provides for it to use the *advanced IRB approach*, except for demonstrated good cause.

Combined use of methodologies: Basic provisions

- 4.2.26 R
- (1) To the extent that its *IRB permission* permits this, a *firm* permitted to use the *IRB approach* in the calculation of *risk weighted exposure amounts* and *expected loss amounts* for one or more *IRB exposure classes* may apply the *standardised approach* in accordance with this *rule*.
 - (2) A *firm* may apply the *standardised approach* to the *IRB exposure class* referred to in *BIPRU 4.3.2R(1)* (Sovereigns) where the number of material counterparties is limited and it would be unduly burdensome for the *firm* to implement a *rating system* for these counterparties. A *firm* may include in this treatment an *exposure* of the type described in *BIPRU 3.4.18R* (Exposures to churches or religious communities) that would fall within *BIPRU 3.4.15R* or *BIPRU 3.4.17R* (Exposure to a regional government or local authority) if those provisions had not been excluded by *BIPRU 3.4.18R*.
 - (3) A *firm* may apply the *standardised approach* to the *IRB exposure class* referred to in *BIPRU 4.3.2R(2)* (Institutions), where the number of material counterparties is limited and it would be unduly burdensome for the *firm* to implement a *rating system* for these counterparties.
 - (4) A *firm* may apply the *standardised approach* to exposures in non-significant business units as well as *IRB exposure classes* that are immaterial in terms of size and perceived risk profile.
 - (5) A *firm* may apply the *standardised approach* to exposures to the central government of the *United Kingdom* and to its regional governments, local authorities and administrative bodies, provided that:
-

- (a) there is no difference in risk between the *exposures* to the central government and those other *exposures* because of specific public arrangements; and
 - (b) *exposures* to the central government are assigned a 0% *risk weight* under the *standardised approach*.
- (6) A *firm* may apply the *standardised approach* to *exposures* of a *firm* to a counterparty which is its *parent undertaking*, its *subsidiary undertaking* or a *subsidiary undertaking* of its *parent undertaking* provided that the counterparty is an *institution*, a *financial holding company*, a *financial institution*, an *asset management company* or an *ancillary services undertaking* subject to appropriate prudential requirements.
 - (7) A *firm* may apply the *standardised approach* to *equity exposures* to entities whose credit obligations qualify for a 0% *risk weight* under the *standardised approach* (including those publicly sponsored entities where a zero *risk weight* can be applied).
 - (8) A *firm* may apply the *standardised approach* to *equity exposures* incurred under legislative programmes to promote specified sectors of the economy that provide significant subsidies for the investment to the *firm* and involve some form of government oversight and restrictions on the *equity* investments. This exclusion is limited to an aggregate of 10% of *capital resources*.
 - (9) A *firm* may apply the *standardised approach* to the *exposures* identified in *BIPRU* 3.4.48R (Exposures in the form of minimum reserves required by the European Central Bank or by the central bank of an EEA State) meeting the conditions specified therein.
 - (10) A *firm* may apply the *standardised approach* to state and state-reinsured guarantees pursuant to *BIPRU* 5.7.12R (Conditions for state and state-reinsured guarantees).

[Note: BCD Article 89(1)]

Combined use of methodologies: Documentation

- 4.2.27 G As part of the application for an *IRB permission*, a *firm* should have a well documented policy explaining the basis on which *exposures* are to be selected for permanent exemption from the *IRB approach* and for treatment under the *standardised approach*. The *firm's* roll out plan should also contain provisions for the continuing application of that policy on a consistent basis over time.

Combined use of methodologies: Sovereign and institutional, exposures

4.2.28 G A *firm* intending to make use of *BIPRU* 4.2.26R(2) or (3) should demonstrate to the *FSA* when applying for an *IRB permission* that it meets the requirements of those provisions with respect to its sovereign or, as the case may be, institutional, *exposures*.

Combined use of methodologies: Meaning of non-significance and immateriality

4.2.29 R For the purposes of *BIPRU* 4.2.26R(4), the *equity exposure IRB exposure class* of a *firm* must be considered material if its aggregate value, excluding *equity exposures* incurred under legislative programmes as referred to in *BIPRU* 4.2.26R(8), exceeds, on average over the preceding year, 10% of the *firm's capital resources*. If the number of those *equity exposures* is less than 10 individual holdings, that threshold is 5% of the *firm's capital resources*.

[Note: *BCD* Article 89(2)]

4.2.30 R (1) This *rule* sets out what must be treated as being non-significant business or immaterial for the purposes of *BIPRU* 4.2.26R(4), for *exposures* that do not fall within the *equity exposure IRB exposure class*.

(2) A *firm* may elect permanently to exclude *exposures* from the *IRB approach* and apply the *standardised approach*. However a *firm* may only make use of this exemption to the extent that:

(a) the *consolidated credit risk requirement* (adjusted under (6)) so far as it is attributable to the excluded *exposures*;

would be no more than 15% of:

(b) the *consolidated credit risk requirement* (adjusted under (6)) with respect to all *exposures* (including the ones dealt with under (a)).

(3) *Exposures* excluded under *BIPRU* 4.2.29R or *BIPRU* 4.2.26R(2), (3) and (5)-(7) must not be included in (a) or (b).

(4) The calculation in (2)(a) is based on the *standardised approach*.

(5) The calculation in (2)(b) is based on whichever of the *standardised approach* and the *IRB approach* would apply to the *exposures* referred to in (2)(b) at the time when the calculation is being made.

(6) The *consolidated credit risk requirement* is adjusted for the purposes of this *rule* as follows:

(a) the element based on the *concentration risk capital component* is excluded, with only the elements based on the *credit risk capital component* and the *counterparty risk capital component* being taken into account; and

(b) the calculation is carried out with respect to the group of *undertakings* referred to in *BIPRU* 4.2.17R.

(7) If a group with respect to which the calculation in this *rule* is being carried out is not required to calculate the *consolidated credit risk requirement*, the calculations in this *rule* must be carried out as if it were.

4.2.31 R If a *firm* applies to use the *advanced IRB approach* for the *sovereign, institution and corporate IRB exposure class*, BIPRU 4.2.26R(4) also applies with respect to *exposures* in that class. For these purposes, to the extent permitted in the *firm's IRB permission*, a *firm* may:

- (1) exclude some *exposures* from the *IRB approach* and apply the *standardised approach* to those *exposures*; and
- (2) exclude other *exposures* from the *advanced IRB approach* and apply the *foundation IRB approach* to those *exposures*.

4.2.32 G Where BIPRU 4.2.31R applies:

- (1) the 15% limit in BIPRU 4.2.30R(2) is a combined limit for excluded *exposures* remaining on the *standardised approach* and excluded *exposures* remaining on the *foundation IRB approach*; and
- (2) the calculation in BIPRU 4.2.30R(2)(a) is carried out under whichever method of calculation would be applicable to the *exposure* in question.

Combined use of methodologies: Territorial aspects

- 4.2.33 G
- (1) This *guidance* sets out at what level the tests in BIPRU 4.2.30R- BIPRU 4.2.32R will be applied in the case of a *firm* that is a member of a group that is part of a bigger group.
 - (2) If an *EEA banking and investment group* for which the *FSA* is the lead regulator is part of a wider *EEA banking and investment group* for which the *FSA* is also lead regulator then BIPRU 4.2.30R- BIPRU 4.2.32R apply with respect to that wider group.
 - (3) If an *EEA banking and investment group* for which the *FSA* is the lead regulator is part of a wider *EEA banking and investment group* for which another *competent authority* is lead regulator then BIPRU 4.2.26R(4) applies with respect to that wider group but the requirements of that lead regulator will generally apply in place of BIPRU 4.2.30R- BIPRU 4.2.32R.
 - (4) If an *EEA banking and investment group* for which the *FSA* is the lead regulator is part of a wider *third-country banking and investment group* that is subject to equivalent supervision by a regulatory authority outside the *EEA*, then BIPRU 4.2.26R(4) applies with respect to both that wider group and the sub-group of which the *FSA* is lead regulator. However the requirements of that third country regulator apply in place of BIPRU 4.2.30R- BIPRU 4.2.32R. The question of whether supervision is equivalent is decided in accordance with GENPRU 3.2 (Third country groups).
-

- (5) If an *EEA banking and investment group* for which the *FSA* is the lead regulator is part of a wider *third-country banking and investment group* that is not subject to equivalent supervision by a regulatory authority outside the *EEA*, then *BIPRU 4.2.30R- BIPRU 4.2.32R* will apply. *BIPRU 4.2.30R- BIPRU 4.2.32R* will apply to the whole group if *GENPRU 3.2.9R* (Supervision by analogy) applies. If *GENPRU 3.2.4G* (Alternative measures) applies, *BIPRU 4.2.30R- BIPRU 4.2.32R* will apply to the *EEA banking and investment group*.
- (6) In the case of a group described in (2) or (3) in respect of which the *Article 129 procedure* applies then *BIPRU 4.2.26R(4)* applies with respect to that wider group. The detailed requirements that apply will be decided in accordance with that procedure.

Combined use of methodologies: Intra-group exposures

- 4.2.34 G (1) Generally, the *FSA* will consider excluding, through a *firm's IRB permission*, exposures falling into *BIPRU 4.2.26R(6)* from the *IRB approach*. The degree to which this exclusion applies will be set out in the *firm's IRB permission*.
- (2) Exposures excluded under (1) will be eligible for a 0% *risk weight* under the *standardised approach* if they satisfy the conditions in *BIPRU 3.2.25R* to *BIPRU 3.2.27R* (Zero risk weight for certain intra-group exposures).
 - (3) Exposures to or holdings in any non-financial *undertakings* in a *firm's group* are not eligible for permanent exemption from the *IRB approach* under *BIPRU 4.2.26R(6)*, as they are not subject to consolidated supervision. It is also the *FSA's* policy that exposures to or holdings in any *insurance undertaking* are ineligible. Such exposures should remain on the *IRB approach* unless excluded under another part of *BIPRU 4.2.26R*.
 - (4) If a *firm* uses the exemption in (1) it should have a policy that:
 - (a) provides for the identification of connected counterparties excluded under (1);
 - (b) identifies exposures that would be permanently exempted from the *IRB approach* under (1); and
 - (c) identifies the connected counterparty exposures that are not permitted to be permanently exempted from the *IRB approach* under (1).
 - (5) The policy in (4) should be applied consistently to all exposures excluded under (1).

Combined use of methodologies: Purchase of a new businesses

- 4.2.35 G (1) This *guidance* deals with some possible effects of acquiring a major new business after the grant of an *IRB permission*.
-

- (2) A *firm* should if possible ensure that the *exposures* arising through the acquisition are dealt with in accordance with the *firm's IRB permission*.
 - (3) If the acquisition is made during the currency of a roll out plan under *BIPRU 4.2.18R*, a *firm* should ensure that the *exposures* arising through the acquisition are dealt with in accordance with that plan. For these purposes the existing and the acquired business should be considered together. The whole of the *firm's* business, including the newly acquired business, should be included in both the denominator and numerator of the fraction in *BIPRU 4.2.30R*.
 - (4) If a *firm* cannot comply with (2) the *FSA* will consider an application to vary the *firm's IRB permission* in order to deal with the acquisition. For example the *FSA* may agree to extend the time by which the roll out should be completed (see *BIPRU 4.2.20R*). However any such variation should be consistent with the provisions of *BIPRU 4.2* that would have applied if the acquisition had been included in the *firm's* original application for an *IRB permission*.
 - (5) If the acquisition is made after a *firm* has completed its roll out under *BIPRU 4.2.18R* the *FSA* will not in general agree to an application to treat an *exposure*:
 - (a) under the *standardised approach* if it would otherwise be treated under the *IRB approach* under the *firm's IRB permission*; or
 - (b) under the *foundation IRB approach* if it would otherwise be treated under the *advanced IRB approach* under the *firm's IRB permission*.
 - (6) Any application to disapply the policy in (5) will be treated in accordance with the approach set out in *BIPRU 4.2.25G*.
 - (7) The *FSA* will also adopt the approach in (5) while a roll out plan is in progress if, in relation to an *exposure* of a particular type, the period for completion of the roll out for those *exposures* under that plan has ended.
-

4.3 The IRB approach: Provisions common to different exposure classes

Application

4.3.1 R This section applies to all *exposures* treated under the *IRB approach*.

Exposure classes

4.3.2 R Each *exposure* must be assigned to one of the following *exposure* classes:

- (1) claims or contingent claims on central governments and *central banks*;
- (2) claims or contingent claims on *institutions*;
- (3) claims or contingent claims on corporates;
- (4) retail claims or contingent retail claims;
- (5) equity claims;
- (6) *securitisation* positions; and
- (7) *non credit-obligation assets*.

[**Note:** BCD Article 86(1)]

4.3.3 R The methodology used by a *firm* for assigning *exposures* to different *IRB exposure classes* must be appropriate and consistent over time.

[**Note:** BCD Article 86(9)]

Calculation of risk weighted exposure amounts

4.3.4 R The *risk weighted exposure amounts* for credit risk for *exposures* belonging to one of the *exposure* classes referred to in (1) to (4) must, unless deducted from *capital resources*, be calculated in accordance with the following provisions:

- (1) for *exposures* in the *sovereign, institution and corporate IRB exposure class*, BIPRU 4.4.57R to BIPRU 4.4.60R, BIPRU 4.4.79R, BIPRU 4.5.8R to BIPRU 4.5.10R (for *specialised lending exposures*), BIPRU 4.9.3R and BIPRU 4.8.16R to BIPRU 4.8.17R (for purchased *corporate exposure* receivables);
 - (2) for *exposures* in the *retail exposure class*, BIPRU 4.6.41R to BIPRU 4.6.44R, BIPRU 4.6.57R and BIPRU 4.8.18R to BIPRU 4.8.20R (for purchased *retail exposure* receivables);
 - (3) for *exposures* in the *equity exposure class*, BIPRU 4.7.5R to BIPRU 4.7.6R, BIPRU 4.7.9R to BIPRU 4.7.11R, BIPRU 4.7.14R to BIPRU 4.7.16R and BIPRU 4.7.24R to BIPRU 4.7.25R; and
-

- (4) for *exposures* in the *non credit-obligation assets exposure class*, BIPRU 4.9.6R.

[Note: BCD Article 87(1)]

- 4.3.5 R The calculation of *risk weighted exposure* amounts for credit risk and *dilution risk* must be based on the relevant parameters associated with the *exposure* in question. These include *probability of default (PD)*, *loss given default (LGD)*, maturity (M) and the *exposure* value of the *exposure*. *PD* and *LGD* may be considered separately or jointly, in accordance with the provisions relating to *PD* and *LGD* in BIPRU 4.4, 4.6 4.7 and 4.8 at:
- (1) for *exposures* in the *sovereign, institution and corporate IRB exposure class*, BIPRU 4.4.34R - BIPRU 4.4.35R, BIPRU 4.4.42R to 4.4.43R, BIPRU 4.4.63R - BIPRU 4.4.66R, BIPRU 4.4.80R and, for *PD* and *LGD* for *dilution risk* of purchased *corporate exposure* receivables, BIPRU 4.8.23R and BIPRU 4.8.26R;
 - (2) for *exposures* in the *retail exposure class*, BIPRU 4.6.50R - BIPRU 4.6.54R, BIPRU 4.6.58R, and, for *PD* and *LGD* for *dilution risk* of purchased *retail exposure* receivables, BIPRU 4.8.24R and BIPRU 4.8.27R; and
 - (3) for *exposures* in the *equity exposure class*, BIPRU 4.7.18R and BIPRU 4.7.20R - BIPRU 4.7.21R.

[Note: BCD Article 87(3)]

Calculation of expected loss amounts

- 4.3.6 R The *expected loss* amounts for *exposures* belonging to one of the *IRB exposure classes* referred to in (1) to (3) must be calculated in accordance with the methods set out in the following provisions:
- (1) for *exposures* in the *sovereign, institution and corporate IRB exposure class*, BIPRU 4.4.61R to BIPRU 4.4.62R and (for *specialised lending exposures*) BIPRU 4.5.13R to BIPRU 4.5.15R;
 - (2) for *exposures* in the *retail exposure class*, BIPRU 4.6.47R to 4.6.48R;
 - (3) for *exposures* in the *equity exposure class*, BIPRU 4.7.12R, BIPRU 4.7.17R and BIPRU 4.7.26R; and
 - (4) (for purchased receivables falling into one of the *IRB exposure classes* in (1) to (3)) BIPRU 4.8.30R.

[Note: BCD Article 88(1)]

- 4.3.7 R The calculation of *expected loss* amounts in accordance with *BIPRU 4.3.6R* must be based on the same input figures of *PD*, *LGD* and the *exposure* value for each *exposure* as being used for the calculation of *risk weighted exposure amounts* in accordance with *BIPRU 4*. For *defaulted exposures*, where a *firm* uses its own estimate of *LGDs*, *EL* must be the *firm's* best estimate of expected loss (*EL_{BE}*), for the *defaulted exposure* in accordance with *BIPRU 4.3.122R*.

[**Note:** *BCD* Article 88(2)]

Treatment of expected loss amounts

- 4.3.8 R The *expected loss* amounts calculated in accordance with *BIPRU 4.3.6R*(1), (2) and (4) must be subtracted from the sum of value adjustments and provisions related to these *exposures*. Discounts on balance sheet *exposures* purchased when in *default* according to *BIPRU 4.4.71R* must be treated in the same manner as value adjustments. *Expected loss* amounts for *securitised exposures* and value adjustments and provisions related to these *exposures* must not be included in this calculation.

[**Note:** *BCD* Annex VII Part 1 point 36]

Corporate governance

- 4.3.9 R All material aspects of the rating and estimation processes must be approved by the *firm's governing body* or a designated committee thereof and senior management. These parties must possess a general understanding of the *firm's rating systems* and detailed comprehension of its associated management reports.

[**Note:** *BCD* Annex VII Part 4 point 124]

- 4.3.10 G (1) A *firm's governing body* or *designated committee* may choose to approve only material aspects of the *firm's rating systems* and material changes to the *firm's rating systems*.
- (2) Where a *firm's governing body* or *designated committee* chooses to approve only material aspects of the *firm's rating systems* and material changes to the *firm's rating systems*:
- (a) the *firm's governing body* or *designated committee* should define the *firm's* overall approach to material aspects of rating and estimation processes for all *rating systems*, including non-material *rating systems* and approve a policy statement defining that approach; and
- (b) the *firm* should define and document the process for approval of non-material aspects of the *firm's rating systems*.

- 4.3.11 R Senior management must provide notice to the *governing body* or a designated committee thereof of material changes or exceptions from established policies that will materially impact the operations of the *firm's rating systems*.

[**Note:** *BCD* Annex VII Part 4 point 125]

- 4.3.12 G Where the *firm's rating systems* are used on a unified basis for the *parent undertaking* and its *subsidiary undertakings* under *BIPRU 4.2.3R*, and approval and reporting of the *ratings systems* are carried out at the group level, the governance requirements in *BIPRU 4.3.9R* and *BIPRU 4.3.11R* may be met if:
- (1) the *subsidiary undertakings* have delegated to the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* responsibility for approval of the *firm's rating systems*;
 - (2) the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* approves either:
 - (a) all aspects of the *firm's rating systems*, and material changes; or
 - (b) all aspects of the *firm's rating systems* that are material in the context of the group, and material changes to those, and a policy statement defining the overall approach to material aspects of rating and estimation processes for all *rating systems*, including non-material *rating systems*.

- 4.3.13 R Senior management must have a good understanding of the *rating system's* designs and operations. Senior management must ensure on an ongoing basis that the *rating systems* are operating properly. Senior management must be regularly informed by the credit risk control units about the performance of the rating process, areas needing improvement, and the status of efforts to improve previously identified deficiencies.

[Note: *BCD Annex VII Part 4 point 126*]

- 4.3.14 R Internal ratings-based analysis of the *firm's* credit risk profile must be an essential part of the management reporting required under *BIPRU 4.3.9R*, *BIPRU 4.3.11R* and *BIPRU 4.3.13R*. Reporting must include at least risk profile by grade, migration across grades, estimation of the relevant parameters per grade, and comparison of realised *default* rates and, to the extent that own estimates are used, of realised *LGDs* and realised *conversion factors* against expectations and stress-test results. Reporting frequencies must depend on the significance and type of information and the level of the recipient.

[Note: *BCD Annex VII Part 4 point 127*]

Credit risk control

- 4.3.15 R The credit risk control unit must be independent from the personnel and management functions responsible for originating or renewing *exposures* and report directly to senior management. The unit must be responsible for the design or selection, implementation, oversight and performance of the *rating systems*. It must regularly produce and analyse reports on the output of the *rating systems*.

[Note: *BCD Annex VII Part 4 point 128*]

- 4.3.16 R The areas of responsibility for the credit risk control unit(s) must include the following.
- (1) testing and monitoring grades and pools;
 - (2) production and analysis of summary reports from the *firm's rating systems*;
 - (3) implementing procedures to verify that grade and pool definitions are consistently applied across departments and geographic areas;
 - (4) reviewing and documenting any changes to the rating process, including the reasons for the changes;
 - (5) reviewing the rating criteria to evaluate if they remain predictive of risk (and changes to the rating process, criteria or individual rating parameters must be documented and retained);
 - (6) active participation in the design or selection, implementation and validation of models used in the rating process;
 - (7) oversight and supervision of models used in the rating process; and
 - (8) ongoing review and alterations to models used in the rating process.

[**Note:** *BCD Annex VII Part 4 point 129*]

- 4.3.17 R Notwithstanding *BIPRU 4.3.16R*, a *firm* using pooled data according to *BIPRU 4.3.92R – BIPRU 4.3.94R* (Overall requirements for estimation) may outsource the following tasks:
- (1) production of information relevant to testing and monitoring grades and pools;
 - (2) production of summary reports from the *firm's rating systems*;
 - (3) production of information relevant to review of the rating criteria to evaluate if they remain predictive of risk;
 - (4) documentation of changes to the rating process, criteria or individual rating parameters; and
 - (5) production of information relevant to ongoing review and alterations to models used in the rating process.

[**Note:** *BCD Annex VII Part 4 point 130 (part)*]

- 4.3.18 R A *firm* making use of *BIPRU 4.3.17R* must ensure that the *FSA* has access to all relevant information from the third party that is necessary for examining compliance with the *minimum IRB standards* and the *firm's IRB permission* and that the *FSA* may perform on-site examinations to the same extent as within the *firm*.
-

[Note: BCD Annex VII Part 4 point 130 (part)]

Documentation of rating systems

- 4.3.19 R A *firm* must document the design and operational details of its *rating systems*. The documentation must evidence compliance with the *minimum IRB standards* and the *firm's IRB permission*, and address topics including portfolio differentiation, rating criteria, responsibilities of parties that rate obligors and *exposures*, frequency of assignment reviews, and management oversight of the rating process.

[Note: BCD Annex VII Part 4 point 31]

- 4.3.20 R A *firm* must ensure that all documentation relating to its *rating systems* or otherwise required by the *rules* governing the *IRB approach* are stored, arranged and indexed in such a way that the *firm* would be able to make them all available to the *FSA*, or to make any class or description of them specified by the *FSA* available to the *FSA*, immediately on demand or within a short time thereafter.

- 4.3.21 R A *firm* must document the rationale for and analysis supporting its choice of rating criteria. A *firm* must document all major changes in the risk rating process, and such documentation must support identification of changes made to the risk rating process subsequent to the last review by the *FSA*. The organisation of rating assignment including the rating assignment process and the internal control structure must also be documented.

[Note: BCD Annex VII Part 4 point 32]

- 4.3.22 R A *firm* must document the specific definitions of default and loss used internally and demonstrate consistency with the definitions of *default* and *loss* set out in the *glossary* and *BIPRU 4*.

[Note: BCD Annex VII Part 4 point 33]

- 4.3.23 G A *firm's* documentation relating to data should include clear identification of responsibility for data quality. A *firm* should set standards for data quality and aim to improve them over time. A *firm* should measure its performance against those standards. A *firm* should ensure that its data is of high enough quality to support its risk management processes and the calculation of its capital requirements.

- 4.3.24 R Where a *firm* employs statistical models in the rating process, the *firm* must document its methodologies. This material must:
- (1) provide a detailed outline of the theory, assumptions and/or mathematical and empirical basis of the assignment of estimates to grades, individual obligors, *exposures*, or pools, and the data source(s) used to estimate the model;
 - (2) establish a rigorous statistical process (including out-of-time and out-of-sample performance tests) for validating the model; and
 - (3) indicate any circumstances under which the model does not work effectively.
-

[**Note:** BCD Annex VII Part 4 point 34]

Rating systems

- 4.3.25 R A *rating system* comprises all of the methods, processes, controls, data collection and IT systems that support the assessment of credit risk, the assignment of *exposures* to grades or pools (rating), and the quantification of *default* and *loss* estimates for a certain type of *exposure*.

[**Note:** BCD Annex VII Part 4 point 1]

- 4.3.26 R If a *firm* uses multiple *rating systems*, the rationale for assigning an obligor or a transaction to a *rating system* must be documented and applied in a manner that appropriately reflects the level of risk.

[**Note:** BCD Annex VII Part 4 point 2]

- 4.3.27 R Assignment criteria and processes must be periodically reviewed to determine whether they remain appropriate for the current portfolio and external conditions.

[**Note:** BCD Annex VII Part 4 point 3]

- 4.3.28 R Where a *firm* uses direct estimates of risk parameters these may be seen as the outputs of grades on a continuous rating scale.

[**Note:** BCD Annex VII Part 4 point 4]

Validation of internal estimates

- 4.3.29 R A *firm* must have robust systems in place to validate the accuracy and consistency of *rating systems*, processes, and the estimation of all relevant risk parameters (*PD*, *LGD*, *conversion factors* and *EL*). A *firm* must be able to demonstrate to the *FSA* that the internal validation process enables it to assess the performance of internal rating and risk estimation systems consistently and meaningfully.

[**Note:** BCD Annex VII Part 4 point 110]

- 4.3.30 R (1) A *firm* must validate its *rating systems*. Its validation process must include, as a minimum, the elements set out in (2) – (8).
- (2) A *firm* must establish and define standards of objectivity, accuracy, stability and conservatism that it designs its *ratings systems* to meet. It must have processes that establish whether its *rating systems* meet those standards.
- (3) A *firm* must establish and define standards of accuracy of calibration (i.e. whether outcomes are consistent with estimate) and discriminative power (i.e. the ability to rank-order risk) that it designs its *rating systems* to meet. It must have processes that establish whether its *rating systems* meet those standards.
-

- (4) A *firm* must have policies and standards that specify the actions to be taken when a *rating system* fails to meet the standards of accuracy and discriminative power referred to in (2) and (3).
- (5) A *firm*'s validation process must include a mix of developmental evidence, benchmarking and process verification. A *firm*'s validation process must include policies on how this mixture varies between different *rating systems*.
- (6) A *firm*'s validation process must include the use of both quantitative and qualitative techniques.
- (7) A *firm*'s validation process must include policies on how validation procedures are expected to vary over time.
- (8) A *firm*'s validation process must include independent input into and review of its *rating systems*.
- (9) The standards set under (2) and (3) must meet the *minimum IRB standards*.
- (10) For the purpose of (5):
 - (a) developmental evidence means evidence that substantiates whether the logic and quality of a *rating system* (including the quantification process) adequately discriminates between different levels of, and delivers accurate estimates of, *PD*, *EL*, *LGD* and *conversion factors* (as applicable); and
 - (b) process verification means the process of establishing whether the methods used in a *rating system* to discriminate between different levels of risk and to quantify *PD*, *EL*, *LGD* and *conversion factors* are being used, monitored and updated in the way intended in the design of the *rating system*.

- 4.3.31 G A *firm* should have regard to the involvement of management at an appropriately senior level in the validation process.
- 4.3.32 G The approach to validation may vary with the significance of the *exposures* covered by a *rating system*.
- 4.3.33 R A *firm* must regularly compare realised *default* rates with estimated *PDs* for each grade and where realised *default* rates are outside the expected range for that grade a *firm* must specifically analyse the reasons for the deviation. A *firm* using its own estimates of *LGDs* and/or *conversion factors* must also perform analogous analysis for own estimates of *LGDs* and *conversion factors*. Such comparisons must make use of historical data that cover as long a period as possible. A *firm* must document the methods and data used in such comparisons. This analysis and documentation must be updated at least annually.

[Note: BCD Annex VII Part 4 point 111]

- 4.3.34 G (1) This paragraph sets out *guidance* on assessing the adequacy of a *rating system's* discriminative power (see *BIPRU* 4.3.30R(3) on the meaning of discriminative power).
- (2) A *firm* should be able to explain the performance of its *rating systems* against its chosen measure (or measures) of discriminative power. In making this comparison a *firm* should rely primarily on actual historic *default* experience where this is available. In particular, a *firm* should be able to explain:
- (a) the extent of any potential inaccuracy in these measures, caused in particular by small sample size; and
- (b) the potential for divergence in the future, whether caused by changing economic conditions or other factors.
- (3) The assessment of discriminative power should include appropriate use of external benchmarks where available.
- (4) The *FSA* will, in assessing the *firm's* performance, take into consideration the sophistication of the measure of discrimination chosen.
- (5) In the case of a portfolio for which there is insufficient *default* experience to provide any confidence in statistical measures of discriminative power a *firm* need not carry out the procedure in (2) and may instead use other methods. For example, it may make use of comparison with an external measurement approach by analysing whether the *firm's rating systems* and the external approach rank common obligors in broadly similar ways. A *firm* should be able to explain the methodology it uses and the rationale for its use.
- 4.3.35 R A *firm* must also use other appropriate quantitative validation tools and comparisons with relevant external data sources. The analysis must be based on data that is appropriate to the portfolio, is updated regularly, and covers a relevant observation period. A *firm's* internal assessments of the performance of its *rating systems* must be based on as long a period as possible.
- [**Note:** *BCD* Annex VII Part 4 point 112]
- 4.3.36 R The methods and data used for quantitative validation must be consistent through time. Changes in estimation and validation methods and data (both data sources and periods covered) must be documented.
- [**Note:** *BCD* Annex VII Part 4 point 113]
- 4.3.37 R A *firm* must have sound internal standards for situations where deviations in realised *PDs*, *LGDs*, *conversion factors* and, where *EL* is used, total *losses*, from expectations become significant enough to call the validity of the estimates into question. These standards must take account of business cycles and similar systematic variability in *default* and *loss* experience. Where realised values continue to be higher than expected values, a *firm* must revise estimates upward to reflect its *default* and *loss* experience.
-

[Note: BCD Annex VII Part 4 point 114]

Internal audit

- 4.3.38 R Internal audit or another comparable independent auditing unit must review at least annually the *firm's rating systems* and its operations, including the operations of the *firm* and the estimation of *PDs, LGDs, ELs* and *conversion factors*. Areas of review must include adherence to all applicable minimum requirements.

[Note: BCD Annex VII Part 4 point 131]

Stress tests used in assessment of capital adequacy

- 4.3.39 R A *firm* must have in place sound stress testing processes for use in the assessment of its capital adequacy. Stress testing must involve identifying possible events or future changes in economic conditions that could have unfavourable effects on the *firm's* credit *exposures* and assessment of the *firm's* ability to withstand such changes.

[Note: BCD Annex VII Part 4 point 40]

- 4.3.40 R
- (1) A *firm* must regularly perform a credit risk stress test to assess the effect of certain specific conditions on its total capital requirements for credit risk. The test to be employed must be one chosen by the *firm*. The test to be employed must be meaningful and reasonably conservative. Stressed portfolios must contain the vast majority of a *firm's* total *exposures* covered by the *IRB approach*.
 - (2) The stress test must be designed to assess the *firm's* ability to meet its capital requirements for credit risk under *GENPRU 2.1* during all stages of the economic cycle and during an economic recession such as might be experienced once in 25 years.
 - (3) In particular the stress test must address the impact (including by ratings migration) of changes in the credit quality of its credit risk counterparties including its protection providers. A *firm* using the treatment set out in *BIPRU 4.4.79R* must in particular consider the impact of protection providers falling outside the eligibility criteria.
 - (4) The stress test must be conducted on the basis of the *firm's exposures* (on- and off-balance sheet) as they stand at the time of the stress test.
 - (5) The stress test must be carried out at least annually and also in the event of a significant change in the state of the economy.
 - (6) A *firm* need not assume that the recession referred to in (2) will occur in the 12 months immediately following the stress test. Instead, the stress test must incorporate a plausible time horizon for the occurrence of the cyclical deterioration of the severity tested for. A *firm* need not assume that the downturn will occur for all portfolios in all jurisdictions simultaneously.
-

[**Note:** *BCD* Annex VII Part 4 points 41 and 42]

4.3.41 G To the extent that the economic conditions assumed in the stress tests required under *BIPRU* 4.3.39R or *BIPRU* 4.3.40R coincide with the conditions assumed in the production of economic downturn *LGDs* (see *BIPRU* 4.3.103R), the *LGDs* to be used might be expected to be similar.

4.3.42 G The requirement in *BIPRU* 4.3.40R(2) is to identify, in a forward-looking manner, severe but plausible downturn conditions relevant to business lines and jurisdictions and to determine the likely impact of those conditions on a *firm's* credit risk regulatory capital requirements. The description of the economic recession contained in *BIPRU* 4.3.40R(2) should not be taken as stipulating one approach (e.g. statistical) over other approaches (e.g. scenario analysis) in the identification of the relevant recessionary circumstances.

Rating systems: Assignment to grades or pools

4.3.43 R A *firm* must have specific definitions, processes and criteria for assigning *exposures* to grades or pools within a *rating system*.

[**Note:** *BCD* Annex VII Part 4 point 17 (part)]

4.3.44 R The grade or pool definitions and criteria must be sufficiently detailed to allow those charged with assigning ratings consistently to assign obligors or facilities posing similar risk to the same grade or pool. This consistency must exist across lines of business, departments and geographic locations within each *rating system*.

[**Note:** *BCD* Annex VII Part 4 point 17 (part)]

4.3.45 G In meeting *BIPRU* 4.3.44R a *firm* should have regard to its application to each *rating system*.

4.3.46 R The documentation of the rating process must allow third parties to understand the assignments of *exposures* to grades or pools, to replicate grade and pool assignments and to evaluate the appropriateness of the assignments to a grade or a pool.

[**Note:** *BCD* Annex VII Part 4 point 17 (part)]

4.3.47 R The criteria referred to in *BIPRU* 4.3.43R must also be consistent with the *firm's* internal lending standards and its policies for handling troubled obligors and facilities.

[**Note:** *BCD* Annex VII Part 4 point 17 (part)]

- 4.3.48 R A *firm* must take all relevant information into account in assigning obligors and facilities to grades or pools. Information must be current and must enable the *firm* to forecast the future performance of the *exposure*. The less information a *firm* has, the more conservative must be its assignments of *exposures* to obligor and *facility grades* or pools. If a *firm* uses an external rating as a primary factor determining an internal rating assignment, the *firm* must ensure that it considers other relevant information.

[**Note:** BCD Annex VII Part 4 point 18]

Rating systems: General governance

- 4.3.49 G
- (1) This paragraph contains *guidance* on BIPRU 4.3.43R and more general *guidance* about the governance of *rating systems*.
 - (2) In determining the assignment referred to in BIPRU 4.3.43R, a *firm* should have regard to the sensitivity of the rating to movements in fundamental risk drivers.
 - (3) A *firm* should, for any *rating system*, be able to demonstrate that it acts appropriately or has an appropriate policy, as applicable, with respect to:
 - (a) any deficiencies caused by its not being sensitive to movements in fundamental risk drivers or for any other reason;
 - (b) periodic review and action in the light of such review;
 - (c) provision of appropriate internal guidance to staff to ensure consistency in the use of the *rating system*, including the assignment of *exposures* or facilities to pools or grades;
 - (d) dealing with potential weaknesses of the *rating system*;
 - (e) identifying appropriate and inappropriate uses of the *rating system* and acting on that identification;
 - (f) novel or narrow rating approaches; and
 - (g) ensuring the appropriate level of stability over time of the *rating system*.

Rating systems: Overrides

- 4.3.50 R For grade and pool assignments a *firm* must document the situations in which human judgement may override the inputs or outputs of the assignment process and the personnel responsible for approving these overrides. A *firm* must document these overrides and the personnel responsible. A *firm* must analyse the performance of the *exposures* whose assignments have been overridden. This analysis must include assessment of the performance of *exposures* whose rating has been overridden by a particular *person*, accounting for all the responsible personnel.
-

[**Note:** BCD Annex VII Part 4 point 25]

Rating systems: Use of models

- 4.3.51 R
- (1) This paragraph applies to the use of statistical models and/or other mechanical methods to assign *exposures* to *obligor grades*, obligor pools, *facility grades* or facility pools.
 - (2) A *firm* must be able to demonstrate to the *FSA* that the model has good predictive power and that capital requirements are not distorted as a result of its use.
 - (3) The input variables to the model must form a reasonable and effective basis for the resulting predictions. The model must not have material biases.
 - (4) A *firm* must have in place a process for vetting data inputs into the model, which includes an assessment of the accuracy, completeness and appropriateness of the data.
 - (5) A *firm* must be able to demonstrate to the *FSA* that the data used to build the model is representative of the population of the *firm*'s actual obligors or *exposures*.
 - (6) A *firm* must have a regular cycle of model validation that includes monitoring of model performance and stability, review of model specification and testing of model outputs against outcomes.
 - (7) A *firm* must complement the statistical model by human judgement and human oversight to review model-based assignments and to ensure that the models are used appropriately. Review procedures must aim at finding and limiting errors associated with model weaknesses. Human judgements must take into account all relevant information not considered by the model. A *firm* must document how human judgement and model results are to be combined.
 - (8) Use of a model obtained from a third-party vendor that claims proprietary technology is not a justification for exemption from documentation or any other of the requirements in *BIPRU 4* or a *firm's IRB permission* for *rating systems*. A *firm* must be able to satisfy the *FSA* that all those requirements are satisfied if it uses such a model.

[**Note:** BCD Annex VII Part 4 points 30 and 35 (part)]

- 4.3.52 G
- (1) This paragraph contains guidance on *BIPRU 4.3.51R(7)*.
 - (2) *BIPRU 4.3.51R(7)* does not require that each individual assignment of an *exposure* to a pool or grade should be the subject of an open-ended review by reference to factors not covered by the model if:
-

- (a) that is not necessary in order to meet the requirements of *BIPRU 4* about the ability of the *rating system* to predict and to discriminate (as referred to in *BIPRU 4.3.29R* to *BIPRU 4.3.30R* (Validation of internal estimates)); and
- (b) the outputs of the model are not designed to be supplemented by such a review.
- 4.3.53 G (1) This paragraph contains *guidance* on *BIPRU 4.3.51R* for the use of external models.
- (2) *BIPRU 4.3.51R(2) - (8)* also apply to mechanical methods to assign *exposures* or obligors to facility grades or pools and to a combination of models and mechanical methods.
- (3) The standards which a *firm* applies to an external model should not be lower than those for internal models.
- (4) The *FSA* will not accredit any individual model or vendor. The burden is on a *firm* to satisfy itself that external models are fit for purpose and meet the relevant requirements of the *IRB approach*.
- (5) Notwithstanding that commercial confidentiality may limit the willingness of vendors of external models to disclose all details, a *firm* should ensure that it is able to obtain sufficiently detailed information to be able to satisfy the requirements of the *IRB approach*.
- (6) A *firm* should have a clear understanding of responsibilities for support and maintenance of external models. This should include how new developments will be brought in and what entitlement the *firm* has to receive and/or request specific enhancements. A *firm* should ensure that the requirements of *BIPRU 4.3.51R* and other provisions of the *IRB approach* are complied with on an ongoing basis.
- (7) If a *firm* uses an external model it should have regard to the following:
- (a) the adequacy of the information it has about the population on which the model is built;
- (b) the comparability of the population referred to in (a) to the *exposures* with respect to which it is using that model;
- (c) what the drivers of the model are and their relevance to the *exposures* with respect to which it is using the model; and
- (d) how the *firm* satisfies itself that the standards required by the *IRB approach* for an internal model are met by the external model.

Rating systems: Data maintenance

4.3.54 R A *firm* must collect and store data on aspects of its internal ratings as required under *BIPRU* 11 (Disclosure).

[**Note:** *BCD* Annex VII Part 4 point 36]

Rating systems: IT systems

4.3.55 G A *firm* should ensure that IT systems relevant to the operation of its *rating systems* are sound and robust. A *firm's* IT systems should provide rapid availability of databases and appropriate archiving. Adequate controls should be in place to prevent unauthorised changes to data being made. Contingency processes and plans should be in place to deal with events of system failure. A *firm* should document work-flows and procedures related to data collection and storage.

Definition of default: Main provisions

4.3.56 R A *default* must be considered to have occurred with regard to a particular obligor when either or both of the two following events has taken place:

- (1) the *firm* considers that the obligor is unlikely to pay its credit obligations to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* in full, without recourse by the *firm* to actions such as realising security (if held); and
- (2) the obligor is past due more than 90 days on any material credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings*.

[**Note:** *BCD* Annex VII Part 4 point 44 (part)]

4.3.57 R The following provisions also apply with respect to the definition of *default*:

- (1) for overdrafts, days past due commence once an obligor has breached an advised limit, has been advised a limit smaller than current outstandings, or has drawn credit without authorisation and the underlying amount is material;
 - (2) an advised limit means a limit which has been brought to the knowledge of the obligor;
 - (3) days past due for credit cards commence on the minimum payment due date;
 - (4) in the case of *retail exposures* and *exposures to public sector entities* the number of days past due is as set out in *BIPRU* 4.4.22R and *BIPRU* 4.6.20R; and
 - (5) in all cases for the purposes of the definition of *default*, a credit obligation or, for overdrafts, the underlying amount, is material if, when added to the other *exposures* of the obligor, the total exceeds the amount which the *firm* treats as a material default for its internal risk measurement and management purposes.
-

[**Note:** BCD Annex VII Part 4 point 44 (part)]

Definition of default: Materiality

- 4.3.58 R Where a *firm* applies the definition of *default* at facility level in accordance with *BIPRU* 4.6.21R, it should define materiality for the purposes of *BIPRU* 4.3.57R(5) by reference to the facility amount only, disregarding other *exposures* of the obligor.
- 4.3.59 R A *firm* must have a policy which sets out how it will determine whether a credit obligation or, for overdrafts, the underlying amount, is material for the purposes of the definition of *default* in *BIPRU* 4.3.56R(2) and *BIPRU* 4.3.57R(5).

Definition of default: Identification of obligor

- 4.3.60 G (1) This paragraph contains *guidance* on the definition of *default*.
- (2) If:
- (a) a *firm* ordinarily assigns *exposures* in the *sovereign, institution and corporate IRB exposure class* to a member of a group substantially on the basis of membership of that group and a common group rating; and
- (b) the *firm* does so in the case of a particular group;
- (3) the *firm* should consider whether members of that group should be treated as a single obligor for the purpose of the definition of *default*.
- (4) The *FSA* would not expect a *firm* to treat an obligor as part of a single obligor under (2) if the *firm* rates its *exposures* on a stand alone basis or if its rating is notched. A rating is notched if it takes into account individual risk factors or otherwise reflects risk factors that are not applied on a common group basis.
- (5) Accordingly if a group has two members who are separately rated the *default* of one does not necessarily imply the *default* of the other.

Definition of default: Days past due

- 4.3.61 G (1) This paragraph contains *guidance* on the meaning of days past due for the purposes of the definition of *default*.
- (2) If an amount is overdue by the relevant number of days past due because of administrative oversight on the part of the obligor or the *firm*, a *firm* with sufficient information may, retrospectively if necessary, treat that as not involving a *default* if:
- (a) that failure is not associated with any increase in the risk referred to in *BIPRU* 4.3.56R(1); and

- (b) treating it as not being in *default* is consistent with the way that the *firm* treated the failure in its relationship with the obligor.
- (3) If a *firm* takes advantage of this provision it should have a policy about the circumstances in which it can apply the treatment in (2). That policy should be documented and consistently applied.
- 4.3.62 G Days past due is only one part of the definition of *default* and should be treated as a back-stop. A *firm* should not rely solely on the number of days past due set by *BIPRU* 4 but should also consider all other indicators of unlikelihood to pay when assessing whether a *default* has occurred.

Definition of default: Unlikelihood to pay

- 4.3.63 R
- (1) Elements to be taken as indications of unlikelihood to pay must include the items set out in this *rule*.
 - (2) The *firm* putting the credit obligation on non-accrued status must be taken as an indication of unlikelihood to pay.
 - (3) The *firm* making a value adjustment resulting from a significant perceived decline in credit quality subsequent to the *firm* taking on the *exposure* must be taken as an indication of unlikelihood to pay.
 - (4) The *firm* selling the credit obligation at a material credit-related economic loss must be taken as an indication of unlikelihood to pay.
 - (5) The *firm* consenting to a distressed restructuring of the credit obligation must be taken as an indication of unlikelihood to pay where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees. This includes in the case of *equity exposures* assessed under a *PD/LGD approach*, distressed restructuring of the equity itself.
 - (6) The *firm* having filed for the obligor's bankruptcy or a similar order in respect of an obligor's credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* must be taken as an indication of unlikelihood to pay.
 - (7) The obligor seeking or having been placed in bankruptcy or similar protection where this would avoid or delay repayment of a credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* must be taken as an indication of unlikelihood to pay.

[**Note:** *BCD* Annex VII Part 4 point 45]

- 4.3.64 G A *firm* may use the amount overdue as an additional indication of unlikelihood to pay. If a *firm* uses this approach, the days past due element of the definition of *default* continues to apply, including the provisions relating to the fixed number of days past due referred to in *BIPRU* 4.3.57R(4). A *firm* might make the use of a definition of *default* that takes into account the amount overdue consistent with the days past due element of the definition by setting the amount overdue at such a level that, taking into account:
- (1) the order in which payments are applied against overdue payments; and
 - (2) the number of payment dates, the time between them, the amount of the overdue payments that results in a *default* under the definition used by the *firm* and other relevant factors;

it is not possible for any payment to be past due by a number of days exceeding the maximum amount specified in *BIPRU* for the purposes of the definition of *default* without there being a *default* under the part of the definition of *default* based on the amount overdue.

- 4.3.65 G In the case of a *retail exposure*, a value adjustment resulting from significant perceived decline in credit quality falling within *BIPRU* 4.3.63R(3) need not necessarily be taken as an indication of unlikelihood to pay if a *firm* employs formulaic portfolio provisioning based on a number of days overdue for its *retail exposures*. However, if such an *exposure* reaches the compulsory days past due indicator for the purposes of the definition of *default* it should automatically be deemed to be in *default*, regardless of the provisioning situation.
- 4.3.66 G An obligation should be considered a distressed restructuring under *BIPRU* 4.3.63R(5) if an independent third party, with expertise in the relevant area, would not be prepared to provide financing on substantially the same terms and conditions.
- 4.3.67 G
- (1) The realisation or forfeiture of collateral may be taken as an indication of unlikelihood to pay for the purposes of the definition of *default*.
 - (2) However, the realisation or forfeiture of collateral may not indicate unlikelihood to pay:
 - (a) in the case of an *exposure* in a market (such as one that involves *retail exposures* involving margin lending) in which it is established practice for collateral to be sold if its value falls below a certain percentage of the *exposure* and the obligor does not restore the margin (but this exception does not apply if the value of the collateral has fallen below the amount outstanding); or
 - (b) if the *firm* is able to demonstrate that for some other reason the realisation or forfeiture of collateral is not a meaningful indication of unlikelihood to pay.
-

- 4.3.68 G (1) If an obligor approach is being taken with respect to *retail exposures* (that is, the application of the definition of *default* at an obligor level rather than at a facility level as set out in *BIPRU* 4.6.21R,) a *firm* should ensure that the *PD* associated with unsecured *exposures* is not understated as a result of the presence of any collateralised *exposures*. A *firm* should be able to explain to the *FSA*, if asked, how it has ensured that its estimate of *PD* is appropriate for both secured and unsecured *exposures* covered by an obligor rating approach.
- (2) In the view of the *FSA*, *firms* typically find that the *PD* of a residential mortgage is lower than the *PD* of an unsecured loan to the same borrower.

- 4.3.69 G A *firm* may, but without prejudice to *BIPRU* 4.4.22R and *BIPRU* 4.6.20R (Fixed numbers of days past due), use additional, or stricter, indicators of unlikeliness to pay if it uses these indicators for internal purposes in accordance with *BIPRU* 4.2.2R(2) (Use tests) and if the disclosures under *BIPRU* 11 (Disclosure) are on this basis.

Risk quantification: Definition of default: Other provisions

- 4.3.70 R A *firm* must (if it uses external data that is not itself consistent with the definition of *default*) be able to demonstrate to the *FSA* that appropriate adjustments have been made that achieve broad equivalence with the definition of *default*.

[Note: *BCD* Annex VII Part 4 point 46]

- 4.3.71 R If a *firm* considers that a previously *defaulted exposure* is such that no trigger of *default* continues to apply, the *firm* must rate the obligor or facility as it would for a non-*defaulted exposure*. Should the definition of *default* subsequently be triggered, another *default* must be deemed to have occurred.

[Note: *BCD* Annex VII Part 4 point 47]

- 4.3.72 G A *firm* should have a clear and documented policy for determining whether an *exposure* that has been in *default* should subsequently be returned to performing status.

Risk quantification: Overall requirements for estimation: General

- 4.3.73 R *BIPRU* 4.3.74R to *BIPRU* 4.3.131R apply to a *firm's* own estimates of risk parameters used in the *IRB approach*.

[Note: *BCD* Annex VII Part 4 point 43]

- 4.3.74 R A *firm's* own estimates of the risk parameters *PD*, *LGD*, *conversion factor* and *EL* must incorporate all relevant data, information and methods. The estimates must be derived using both historical experience and empirical evidence, and must not be based purely on judgemental considerations. The estimates must be plausible and intuitive and must be based on the material drivers of the respective risk parameters. The less data a *firm* has, the more conservative it must be in its estimation.

[Note: BCD Annex VII Part 4 point 49]

- 4.3.75 G (1) This paragraph provides guidance on BIPRU 4.3.73R.
- (2) Relevant data and information under BIPRU 4.3.73R includes external data.
- (3) Where internal *default* and *loss* experience is scarce, a *firm* should consider using material relevant external information. When using external information such as industry averages when determining *LGD* or *conversion factors*, a *firm* should consider whether this data is appropriate to its own experience and whether adjustments are necessary.
- 4.3.76 R (1) In calculating estimates of *PD*, *LGD* and *conversion factors* a *firm* must adjust the averages of historical experience referred to in the *historical averages rules* in order to ensure that those estimates are accurate estimates of the *default rate*, *loss rate* or *conversion factor* over the long-run.
- (2) The *historical average rules* means the requirements in BIPRU 4 relating to the calculation of *PD*, *LGD* and *conversion factors* using historical averages (and in particular BIPRU 4.4.24R, BIPRU 4.4.30R, BIPRU 4.8.7R, BIPRU 4.8.8R, BIPRU 4.6.24R, BIPRU 4.6.27R, BIPRU 4.3.99R and BIPRU 4.3.125R).
- 4.3.77 G Where a *firm* is able to demonstrate that the effect is immaterial in accordance with BIPRU 4.1.25R (Compliance), it may estimate average *LGDs* and *conversion factors* under the *historical average rules* in a way that does not strictly comply with BIPRU 4.3.94R (Default weighted average), provided the final estimates of *LGD* and *conversion factors* following the adjustments to averages of historical experience are made on the basis of *default* weighted averages for the *facility grade* or *pool* in question.
- 4.3.78 G A *firm* may carry out the adjustments under BIPRU 4.3.76R (Adjustments to averages of historical experience) by adjusting the data from which estimates are made rather than by adjusting the estimates themselves if it can demonstrate that capital requirements are not underestimated as a result.
- 4.3.79 G While the qualitative requirements in BIPRU 4 are important for all portfolios, they are of even greater importance in those cases where a *firm* lacks sufficient historical data to calibrate or validate its estimates of *PD*, *LGD* or *conversion factors* on the basis of proven statistical significance, sometimes referred to as low default portfolios.
- 4.3.80 R (1) A *firm* must collect data on what it considers to be the main drivers of the risk parameters *PD*, *LGD*, *conversion factor* and *EL* for each group of obligors or facilities.
- (2) A *firm* must document its identification of the main drivers of risk parameters.
-

(3) A *firm* must be able to demonstrate that its process of identification is reasonable and appropriate.

- 4.3.81 R In its processes for identifying the main drivers of risk parameters, a *firm* must set out its reasons for concluding that the data sources chosen provide in themselves sufficient discriminative power and accuracy and why additional potential data sources do not provide relevant and reliable information that would be expected materially to improve the discriminative power and accuracy of its estimates of the risk parameter in question. This does not require an intensive analysis of all factors.
- 4.3.82 G If a *firm* uses a rating model to assign exposures to the borrower or facility grades, it may reflect the data on main drivers of risk parameters by its inclusion in the model as a risk driver or as part of a subsequent process that adjusts the output of that model to calculate the risk parameters *PD*, *LGD*, *conversion factor* and *EL*.
- 4.3.83 R A *firm* must be able to provide a breakdown of its loss experience in terms of *default* frequency, *LGD*, *conversion factor*, or *loss* where *EL* estimates are used, by the factors it sees as the drivers of the respective risk parameters. A *firm* must be able to demonstrate to the *FSA* that its estimates are representative of long-run experience.

[**Note:** *BCD* Annex VII Part 4 point 50]

- 4.3.84 R Any changes in lending practice or the process for pursuing recoveries over the observation periods referred to in *BIPRU* 4.4.31R (Observation period for sovereigns, institutions and corporates for *PDs*), *BIPRU* 4.6.28R (Observation period for retail exposures for *PDs*), *BIPRU* 4.4.54R (Observation period for sovereigns, institutions and corporates for *LGDs*), *BIPRU* 4.6.33R (Observation period for retail exposures for *LGDs*), *BIPRU* 4.4.55R (Observation period for sovereigns, institutions and corporates for *conversion factors*) and *BIPRU* 4.6.38R (Observation period for retail exposures for *conversion factors*) must be taken into account. A *firm*'s estimates must reflect the implications of technical advances and new data and other information, as it becomes available. A *firm* must review its estimates when new information comes to light but at least on an annual basis.

[**Note:** *BCD* Annex VII Part 4 point 51]

- 4.3.85 R The population of *exposures* represented in the data used for estimation, the lending standards used when the data was generated and other relevant characteristics must be comparable with those of a *firm*'s *exposures* and standards. A *firm* must also be able to demonstrate to the *FSA* that the economic or market conditions that underlie the data are relevant to current and foreseeable conditions. The number of *exposures* in the sample and the data period used for quantification must be sufficient to provide a *firm* with confidence in the accuracy and robustness of its estimates.

[**Note:** *BCD* Annex VII Part 4 point 52]

- 4.3.86 G It may be reasonable for a *firm* to treat foreseeable in *BIPRU* 4.3.85R as referring to the most distant date to which it carries out detailed capital planning.

- 4.3.87 G A *firm* should be able to demonstrate to the *FSA*:
- (1) how, with respect to each *rating system*, both assignment of ratings and estimates of *PD*, *LGD* and *conversion factors* are affected by:
 - (a) movements in the economic cycle; and
 - (b) other cyclical effects which are material to levels of *default*, *loss* or the amount of *exposures* at *default* for the *exposures* covered by the *rating system*; and
 - (2) the level of conservatism inherent in its ratings, as provided for by *BIPRU*.
- 4.3.88 R A *firm* must add to its estimates a margin of conservatism that is related to the expected range of estimation errors. Where methods and data are less satisfactory and the expected range of errors is larger, the margin of conservatism must be larger.
- [**Note:** *BCD* Annex VII Part 4 point 54]
- 4.3.89 G Estimation of *PD* through the use of a technique set out in *BIPRU* does not remove the need to make conservative adjustments, where necessary, related to the expected range of estimation errors so that capital requirements produced by the relevant model or other *rating system* are not understated.
- 4.3.90 R If a *firm* uses different estimates for the calculation of *risk weights* and internal purposes it must be documented. The *firm* must be able to demonstrate to the *FSA* the reasonableness of such estimates.
- [**Note:** *BCD* Annex VII Part 4 point 55]
- 4.3.91 G If a *firm* can demonstrate to the *FSA* that for data that have been collected prior to 31 December 2006, appropriate adjustments have been made to achieve broad equivalence with the definitions of *default* or *loss*, the *FSA* may in the *IRB permission* allow the *firm* some flexibility in the application of the required standards for data.
- [**Note:** *BCD* Annex VII Part 4 point 56]
- Risk quantification: Overall requirements for estimation: Pooled data
- 4.3.92 R If a *firm* uses data that is pooled across *institutions* it must be able to demonstrate to the *FSA* that:
- (1) the *rating systems* and criteria of other firms in the pool are similar to its own;
 - (2) the pool is representative of the portfolio for which the pooled data is used; and
-

- (3) the pooled data is used consistently over time by the *firm* for its permanent estimates; and

[Note: BCD Annex VII Part 4 point 57]

4.3.93 G *BIPRU* 4.3.92R(1) is intended to ensure that data entering a pool is consistent and does not contain distortions as a result of different contributors' practices. It is not intended to constrain the use of pooled data by one *firm* that is contributed by a second *firm* where the differences do not affect the data being contributed.

4.3.94 R If a *firm* uses data that is pooled across *institutions* it remains responsible for the integrity of its *rating systems*. If a *firm* uses such data it must be able to demonstrate to the *FSA* that it has sufficient in-house understanding of its *rating systems*, including effective ability to monitor and audit the rating process.

[Note: BCD Annex VII Part 4 point 58]

Risk quantification: Overall requirements for estimation: Requirements specific to PD estimates

- 4.3.95 R (1) If:
- (a) a *firm's* internal experience of *exposures* of a type covered by a model or other *rating system* is 20 *defaults* or fewer; and
 - (b) in the *firm's* view, reliable estimates of *PD* cannot be derived from external sources of *default* data, including the use of market price related data, for all the *exposures* covered by the *rating system*;

the *firm* must estimate *PD* for *exposures* covered by that *rating system* in accordance with this *rule*.

- (2) A *firm* must use a statistical technique to derive the distribution of *defaults* implied by the *firm's* experience, estimating *PDs* (the "statistical *PD*") from the upper bound of a confidence interval set by the *firm* in order to produce conservative estimates of *PDs* in accordance with *BIPRU* 4.3.88R.
 - (3) The techniques chosen for the purposes of (2) must take account, as a minimum, of the following modelling issues:
 - (a) the number of *defaults* and number of obligor years in the sample;
 - (b) the number of years from which the sample was drawn;
 - (c) the interdependence between *default* events for individual obligors;
 - (d) the interdependence between *default* rates for different years; and
 - (e) the choice of the statistical estimators and the associated distributions and confidence intervals.
-

- (4) The *firm* must further adjust the statistical PD to the extent necessary to take account of the following:
- (a) any likely differences between the observed *default* rates over the period covered by the *firm's default* experience and the long-run PD for each grade in accordance with BIPRU 4.4.24R and BIPRU 4.6.24R; and
 - (b) any other information that indicates (taking into account the robustness and cogency of that information) that the statistical PD is likely to be an inaccurate estimate of PD.
- (5) This *rule* is in addition to the other requirements in BIPRU about the calculation of PD.
- (6) When a *firm* calculates whether it has 20 *defaults* or fewer under the calculation in (1)(a), it must only take into account *defaults* that occurred during periods that are relevant to the validation under BIPRU 4 of the model or other *rating system* in question.
- 4.3.96 G A *firm* may if appropriate also choose to use the approach in BIPRU 4.3.91R if the internal experience on *exposures* covered by a *rating system* is greater than 20 *defaults*.
- 4.3.97 G If a *firm* excludes defaulted exposures that have been cured (as referred to in BIPRU 4.3.71R) or restructured (as referred to in BIPRU 4.3.63R(5)) from estimates of LGD in accordance with BIPRU 4.3.110G, it may also exclude cures from estimates of PD for these exposures.
- Risk quantification: Overall requirements for estimation: Requirements specific to own-LGD estimates
- 4.3.98 R BIPRU 4.3.98R to BIPRU 4.3.123R set out requirements specific to own-LGD estimates.
- 4.3.99 R A *firm* must estimate LGDs by *facility grade* or pool on the basis of the average realised LGDs by *facility grade* or pool using all observed *defaults* within the data sources (*default weighted average*).
- [Note: BCD Annex VII Part 4 point 73]
- 4.3.100 R A *firm* must calculate the *default weighted average* on the basis of the number of *defaults* included in the calculations made under the *historical average rules* so far as they relate to the calculation of PDs and must not be weighted by the size of *exposures*.
- 4.3.101 R (1) A *firm's* estimates of LGDs must take into account:
- (a) data in respect of relevant incomplete workouts; and
-

- (b) the possibility that the proportion of *defaulted exposures* which are cured (as referred to in *BIPRU 4.3.71R*) or restructured (as referred to in *BIPRU 4.3.63R(5)*) or the length of the period over which a *firm* makes recoveries under a *defaulted exposure* may be different from the *firm's* observed historic experience.
- (2) An incomplete workout as referred to in (1)(a) means a *defaulted exposure* included in the data set on which the *firm's LGD* estimates are based, but for which the recovery process is still in progress, with the result that the final realised *losses* in respect of that *exposure* are not yet certain.
- 4.3.102 G The changes referred to in *BIPRU 4.3.101R(1)(b)* may be caused by external factors, such as the economic environment, as well as factors specific to the obligor, the transaction or the policies of the *firm*.
- 4.3.103 R A *firm* must use *LGD* estimates that are appropriate for an economic downturn if those are more conservative than the long-run average. To the extent a *rating system* is expected to deliver constant realised *LGDs* by grade or pool over time, a *firm* must make adjustments to its estimates of risk parameters by grade or pool to limit the capital impact of an economic downturn.

[Note: *BCD Annex VII Part 4 point 74*]

- 4.3.104 R (1) A *firm* must have a rigorous and well documented process for:
- (a) assessing the effects, if any, of economic downturn conditions on recovery rates; and
 - (b) producing *LGD* estimates consistent with downturn conditions as referred to in *BIPRU 4.3.103R*.
- (2) That process must include the following, which may be included in an integrated manner:
- (a) identification of appropriate downturn conditions for each *IRB exposure class* within each jurisdiction;
 - (b) identification of adverse dependencies, if any, between *default* rates and recovery rates; and
 - (c) incorporation of adverse dependencies, if identified, between *default* rates and recovery rates in the *firm's* estimates of *LGD* in a manner that meets the requirements in *BIPRU 4.3.103R* relating to an economic downturn.
-

- 4.3.105 G A *firm* may derive the *LGD* in accordance with *BIPRU* 4.3.104R(2)(c) either by directly assigning to the *facility grade* or pool an estimate of *LGD* appropriate for downturn conditions, or alternatively by estimating a *default* weighted average *LGD* in accordance with *BIPRU* 4.3.99 and *BIPRU* 4.3.76 and converting it into an *LGD* appropriate for downturn conditions by the use of a formula. It should be able to demonstrate that that formula produces well-founded estimates of *LGDs* consistent with downturn conditions for the *exposures* in question.
- 4.3.106 G A *firm* may combine *IRB exposure classes*, jurisdictions or both for the purpose of *BIPRU* 4.3.104R(2)(a) if it can demonstrate that the downturn conditions to which the portfolios are subject will be similar.
- 4.3.107 G The adverse dependencies referred to in *BIPRU* 4.3.104R(2)(b) will not always exist. However, if a *firm* uses *LGDs* that do not allow for such adverse dependencies, it should be able to justify its decision.
- 4.3.108 G Data relating to economic downturn conditions is likely to be scarce. Accordingly, a *firm* should use internal data, external data or a combination of data sources in order to produce appropriate downturn *LGD* estimates in accordance with *BIPRU* 4.3.103R.
- 4.3.109 R A *firm* must retain sufficient data on both *LGDs* calculated on a economic downturn basis and calculated on a long-run average basis (as referred to in *BIPRU* 4.3.103R) to be able to demonstrate to the *FSA* (if asked) that its estimates based on an economic downturn are no less conservative than the long-run average as referred to in that *rule*.
- 4.3.110 G Where a *firm* is able to demonstrate that the effect is immaterial in accordance with *BIPRU* 4.1.25R (Compliance), it may exclude *defaulted exposures* that have been cured (as referred to in *BIPRU* 4.3.671R) or restructured (as referred to in *BIPRU* 4.3.63R(5)) from the data about *default* and *loss* experience on which *LGDs* are calculated provided it can demonstrate that its calculation of capital requirements (including capital requirements resulting from the application of capital floors under the transitional *rules* and *guidance* in *BIPRU*) are not reduced as a result of this approximation.
- 4.3.111 R Irrespective of whether calculated on an economic downturn or long-run average basis, each *LGD* estimate must be at least zero.
- 4.3.112 G In order to support an *LGD* estimate which is very low or zero, a *firm* should be able to demonstrate that the estimate adequately reflects the expected experience on a *default* weighted average basis or in a downturn as appropriate, taking into account the costs and discount rate associated with realisations and the operation of *BIPRU* 4.3.118R.
-

- 4.3.113 R The methods that a *firm* uses for discounting cash flows for the purposes of estimating *LGDs* must take account of the uncertainties associated with the receipt of recoveries with respect to a *defaulted exposure*. If a *firm* intends to use a discount rate that does not take full account of the uncertainty in recoveries, it must be able to explain by what other process it has taken into account that uncertainty for the purposes of calculating *LGDs*.
- 4.3.114 G The uncertainty referred to in *BIPRU* 4.3.113R can be addressed by adjusting cash flows to certainty-equivalents or by using a discount rate that embodies an appropriate risk premium; or by a combination of the two.
- 4.3.115 G A *firm* may exclude from its calculation of *loss* indirect costs that it incurs for the purpose of making recoveries with respect to a *defaulted exposure* if it would also have incurred those costs if there had not been a *default*.
- 4.3.116 R A *firm* must consider the extent of any dependence between the risk of the obligor with that of the collateral or collateral provider. Cases where there is a significant degree of dependence must be addressed in a conservative manner.
- [Note: *BCD* Annex VII Part 4 point 75]
- 4.3.117 R Currency mismatches between the underlying obligation and the collateral must be treated conservatively in the *firm*'s assessment of *LGD*.
- [Note: *BCD* Annex VII Part 4 point 76]
- 4.3.118 R To the extent that *LGD* estimates take into account the existence of collateral, these estimates must not solely be based on the collateral's estimated market value. *LGD* estimates must take into account the effect of the potential inability of the *firm* expeditiously to gain control of its collateral and liquidate it.
- [Note: *BCD* Annex VII Part 4 point 77]
- 4.3.119 G (1) A *firm* may comply with *BIPRU* 4.3.118R by reducing the amount of the collateral taken into account for the purposes of calculating *LGD* (applying a haircut to the collateral), basing that reduction on validated realisation experience and using conservatism to reflect the uncertainties.
- (2) If collateral is used to reduce the *LGD*, a *firm* should be able to demonstrate how the risk in *BIPRU* 4.3.118R has been accounted for. To the extent that it is adequately accounted for in that way it need not be reflected again as part of the residual risk in relation to collateral under the *overall Pillar 2 rule*.
- 4.3.120 R To the extent that *LGD* estimates take into account the existence of collateral, a *firm* must establish internal requirements for collateral management, legal certainty and risk management that are generally consistent with those set out in *BIPRU* 5 (Credit risk mitigation) as modified by *BIPRU* 4.10.
- [Note: *BCD* Annex VII Part 4 point 78]
-

- 4.3.121 R To the extent that a *firm* recognises collateral for determining the exposure value for *counterparty credit risk* according to the *CCR standardised method* or the *CCR internal model method*, any amount expected to be recovered from the collateral must not be taken into account in the *LGD* estimates.
- [Note: BCD Annex VII Part 4 point 79]
- 4.3.122 R For the specific case of *exposures* already in *default*, a *firm* must use the sum of its best estimate of *expected loss* for each *exposure* given current economic circumstances and *exposure* status and the possibility of additional unexpected *losses* during the recovery period.
- [Note: BCD Annex VII Part 4 point 80]
- 4.3.123 R To the extent that unpaid late fees have been capitalised in a *firm's* income statement, they must be added to the *firm's* measure of *exposure* and *loss*.
- [Note: BCD Annex VII Part 4 point 81]
- Risk quantification: Overall requirements for estimation: Requirements specific to own-conversion factor estimates
- 4.3.124 R *BIPRU* 4.3.125R - *BIPRU* 4.3.131R set out requirements specific to own-*conversion factor* estimates.
- 4.3.125 R A *firm* must estimate *conversion factors* by *facility grade* or pool on the basis of the average expected *conversion factors* by *facility grade* or pool using all observed *defaults* within the data sources (*default* weighted average).
- [Note: BCD Annex VII Part 4 point 87]
- 4.3.126 G (1) A *firm* using own estimates of *conversion factors* should take into account all facility types that may result in an *exposure* when an obligor *defaults*, including uncommitted facilities.
- (2) A *firm* should treat a facility as an *exposure* from the earliest date at which a customer is able to make drawings under it.
- (3) To the extent that a *firm* makes available multiple facilities, it should be able to demonstrate:
- (a) how it deals with the fact that *exposures* on one may become *exposures* under another on which the *losses* are ultimately incurred; and
- (b) the impact of its approach on its capital requirements.
- 4.3.127 R A *firm* must use *conversion factor* estimates that are appropriate for an economic downturn if those are more conservative than the long-run average. To the extent a *rating system* is expected to deliver realised *conversion factors* at a constant level by grade or pool over time, a *firm* must make adjustments to its estimates of risk parameters by grade or pool to limit the capital impact of an economic downturn.
-

[Note: BCD Annex VII Part 4 point 88]

- 4.3.128 R A *firm's* estimates of *conversion factors* must reflect the possibility of additional drawings by the obligor up to and after the time a *default* event is triggered. The *conversion factor* estimate must incorporate a larger margin of conservatism where a stronger positive correlation can reasonably be expected between the *default* frequency and the magnitude of *conversion factor*.

[Note: BCD Annex VII Part 4 point 89]

- 4.3.129 R In arriving at estimates of *conversion factors* a *firm* must consider its specific policies and strategies adopted in respect of account monitoring and payment processing. A *firm* must also consider its ability and willingness to prevent further drawings in circumstances short of payment *default*, such as covenant violations or other technical *default* events.

[Note: BCD Annex VII Part 4 point 90]

- 4.3.130 R A *firm* must have adequate systems and procedures in place to monitor facility amounts, current outstandings against committed lines and changes in outstandings per obligor and per grade. A *firm* must be able to monitor outstanding balances on a daily basis.

[Note: BCD Annex VII Part 4 point 91]

- 4.3.131 R If a *firm* uses different estimates of *conversion factors* for the calculation of *risk weighted exposure amounts* and internal purposes it must be documented. The *firm* must be able to demonstrate their reasonableness to the FSA.

[Note: BCD Annex VII Part 4 point 92]

Risk quantification: Overall requirements for estimation: Comparability

- 4.3.132 G (1) This paragraph contains *guidance* about the interpretation of the requirements relating to comparability in BIPRU 4.3.85R. It is also relevant to the requirement for representative data in BIPRU 4.3.51R(5), to the references to comparability in the additional *guidance* in BIPRU 4.3.53G(7)(b) and to the requirements for similarity in BIPRU 4.3.92R.
- (2) In general, comparability should be based on analyses of the population of *exposures* represented in the data, the lending standards used when the data was generated (where relevant) and other relevant characteristics in relation to the corresponding properties of the *firm's* own portfolio. Other relevant characteristics could include the distribution of the obligors across industries, the size distribution of the *exposures* and similarity with respect to the geographic or demographic distribution of the *exposures*.
-

4.4 The IRB approach: Exposures to corporates, institutions and sovereigns

Application

- 4.4.1 R (1) This section applies with respect to the *sovereign, institution and corporate IRB exposure class*.
- (2) The *sovereign, institution and corporate IRB exposure class* includes *specialised lending exposures*.
- (3) Both *BIPRU 4.4* and *BIPRU 4.5* (Specialised lending exposures) apply to *specialised lending exposures*. A firm may calculate *risk weighted exposure amounts* for a *specialised lending exposure* either:
- (a) (if it is able to do so) in accordance with *BIPRU 4.4*; or
- (b) in accordance with *BIPRU 4.4* as modified by *BIPRU 4.5*.

Definition

- 4.4.2 R The following *exposures* must be treated as *exposures* to central governments and *central banks*:
- (1) *exposures* to regional governments, local authorities or *public sector entities* which are treated as *exposures* to central governments under the *standardised approach*; and
- (2) *exposures* to *multilateral development banks* and international organisations which attract a *risk weight* of 0% under the *standardised approach*.

[**Note:** *BCD* Article 86(2)]

- 4.4.3 R The following *exposures* must be treated as *exposures* to *institutions*:
- (1) *exposures* to regional governments and local authorities which are not treated as *exposures* to central governments under the *standardised approach*;
- (2) *exposures* to *public sector entities* which are treated as *exposures* to *institutions* under the *standardised approach*;
- (3) *exposures* to *multilateral development banks* which do not attract a 0% *risk weight* under the *standardised approach*; and
- (4) without prejudice to *BIPRU 13.3.13R* and *BIPRU 13.8.10R* (*Exposures* to a central counterparty) *exposures* to *recognised third-country investment firms* and *exposures* to *recognised clearing houses* and *designated investment exchanges*.

[Note: BCD Article 86(3) and CAD Article 40]

- 4.4.4 R Any credit obligation not assigned to the *IRB exposure classes* referred to in *BIPRU 4.3.2R(1)* (Sovereigns), *BIPRU 4.3.2R(2)* (Institutions) and *BIPRU 4.3.2R(4)-BIPRU 4.3.2R(6)* (Retail, equity and securitisations) must be assigned to the *corporate exposure class*.

[Note: BCD Article 86(7)]

Rating system: Structure of rating system

- 4.4.5 R *BIPRU 4.4.6R - BIPRU 4.4.21R* apply in addition to *BIPRU 4.3.25R - BIPRU 4.3.28R* (Rating systems).

- 4.4.6 R A *rating system* must take into account obligor and transaction risk characteristics.

[Note: BCD Annex VII Part 4 point 5]

- 4.4.7 R A *rating system* must have an obligor rating scale which reflects exclusively quantification of the risk of obligor *default*. The obligor rating scale must have a minimum of seven grades for non-*defaulted* obligors and one for *defaulted* obligors.

[Note: BCD Annex VII Part 4 point 6]

- 4.4.8 R An *obligor grade* means for the purpose of *BIPRU 4* as it applies to the *sovereign, institution and corporate IRB exposure class* a risk category within a *rating system's* obligor rating scale, to which obligors are assigned on the basis of a specified and distinct set of rating criteria, from which estimates of *PD* are derived. A *firm* must document both the relationship between *obligor grades* in terms of the level of *default* risk each grade implies and the criteria used to distinguish that level of *default* risk.

[Note: BCD Annex VII Part 4 point 7]

- 4.4.9 R A *firm* with portfolios concentrated in a particular market segment and range of *default* risk must have enough *obligor grades* within that range to avoid undue concentrations of obligors in a particular grade. Significant concentrations within a single grade must be supported by convincing empirical evidence that the *obligor grade* covers a reasonably narrow *PD* band and that the *default* risk posed by all obligors in the grade falls within that band.

[Note: BCD Annex VII Part 4 point 8]

Rating system: Assignment to grades or pools

- 4.4.10 G Material on assignment to grades or pools can be found in *BIPRU 4.3.43R - BIPRU 4.3.48R*.

Rating system: Assignment of exposures

- 4.4.11 R Each obligor must be assigned to an *obligor grade* as part of the credit approval process.
- [Note: BCD Annex VII Part 4 point 19]
- 4.4.12 R Each separate legal entity to which a *firm* is exposed must be separately rated. A *firm* must be able to demonstrate to the *FSA* that it has acceptable policies regarding the treatment of individual obligor clients and *groups of connected clients*.
- [Note: BCD Annex VII Part 4 point 22]
- 4.4.13 R Separate *exposures* to the same obligor must be assigned to the same *obligor grade*, irrespective of any differences in the nature of each specific transaction. Exceptions, where separate *exposures* are allowed to result in multiple grades for the same obligor are:
- (1) country transfer risk, this being dependent on whether the *exposures* are denominated in local or foreign currency;
 - (2) where the treatment of associated guarantees to an *exposure* may be reflected in an adjusted assignment to an *obligor grade*; and
 - (3) where consumer protection, bank secrecy or other legislation prohibit the exchange of client data.
- [Note: BCD Annex VII Part 4 point 23]
- Rating system: Overrides
- 4.4.14 G Material on overrides can be found in *BIPRU* 4.3.50R.
- Rating system: Integrity of assignment process
- 4.4.15 R Assignments and periodic reviews of assignments must be completed or approved by an independent party that does not directly benefit from decisions to extend the credit.
- [Note: BCD Annex VII Part 4 point 26]
- 4.4.16 R A *firm* must update assignments at least annually. High risk obligors and problem *exposures* must be subject to more frequent review. A *firm* must undertake a new assignment if material information on the obligor or *exposure* becomes available.
- [Note: BCD Annex VII Part 4 point 27]
- 4.4.17 G Although it will not usually be the case that facility ratings and *conversion factors* will have to be updated more frequently than annually, *LGDs* and *exposure* values are subject to more frequent recalculation due to their connection to drawn balances, which can vary on a daily basis.

4.4.18 R A *firm* must have an effective process to obtain and update relevant information on obligor characteristics that affect *PDs*, and on transaction characteristics that affect *LGDs* and *conversion factors*.

[**Note:** *BCD* Annex VII Part 4 point 28]

Rating system: Use of models

4.4.19 G Material on the use of models can be found in *BIPRU* 4.3.51R - *BIPRU* 4.3.53G.

Rating system: Documentation of rating systems

4.4.20 G Material on the documentation of rating systems can be found in *BIPRU* 4.3.19R - *BIPRU* 4.3.24R.

Rating system: Data maintenance

4.4.21 R In addition to complying with the material in *BIPRU* 4.3.54R (Data maintenance) a *firm* must collect and store:

- (1) complete rating histories on obligors and recognised guarantors;
- (2) the dates the ratings were assigned;
- (3) the key data and methodology used to derive the rating;
- (4) the person responsible for the rating assignment;
- (5) the identity of obligors and *exposures* that *defaulted*;
- (6) the date and circumstances of such *defaults*;
- (7) data on the *PDs* and realised *default* rates associated with rating grades and ratings migration; and
- (8) (in the case of a *firm* not using the *advanced IRB approach* in the calculation of *LGDs* and/or *conversion factors*) data on comparisons of realised *LGDs* to the values as set out in *BIPRU* 4.4.34R and *BIPRU* 4.8.25R and realised *conversion factors* to the values as set out in *BIPRU* 4.4.37R, *BIPRU* 4.4.45R and *BIPRU* 4.6.44R.

[**Note:** *BCD* Annex VII Part 4 point 37]

Risk quantification: Definition of default

- 4.4.22 R
- (1) This *rule*, in accordance with *BIPRU* 4.3.57R(4) (Definition of default), sets the exact number of days past due that a *firm* should abide by in the case of *exposures* to *PSEs*.
 - (2) For counterparts that are *PSEs* situated within the *United Kingdom* the number of days past due is 180.

- (3) For counterparts that are *PSEs* situated in another *EEA State* the number of days past due is the lower of:
- (a) 180; and
 - (b) the number of days past due fixed under the *CRD implementation measure* with respect to point 48 of Part 4 of Annex VII of the *Banking Consolidation Directive* for that *EEA State* for such *exposures*.
- (4) For counterparts that are *PSEs* in a state outside the *EEA* the number of days past due is the lower of:
- (a) 180; and
 - (b) (if a number of days past due for such *exposures* has been fixed under any law of that state applicable to *undertakings* in the *banking sector* or the *investment services sector* that implements the *IRB approach*) that number.

[**Note:** *BCD* Annex VII Part 4 point 44 (part) and point 48 (part)]

Risk quantification: Overall requirements for estimation: Requirements specific to PD estimation

4.4.23 R *BIPRU* 4.4.24R - *BIPRU* 4.4.31R apply to both the *foundation IRB approach* and the *advanced IRB approach*.

4.4.24 R A *firm* must estimate *PDs* by *obligor grade* from long run averages of one-year *default rates*.

[**Note:** *BCD* Annex VII Part 4 point 59]

4.4.25 R A *firm* must use *PD* estimation techniques only with supporting analysis. A *firm* must recognise the importance of judgmental considerations in combining results of techniques and in making adjustments for limitations of techniques and information.

[**Note:** *BCD* Annex VII Part 4 point 62]

4.4.26 G Where rating agency experience or the output of a statistical default model are the primary component of *PD* estimation, a *firm* should consider whether it needs to make adjustments for other relevant information, such as internal experience, conservatism and cyclical effects. In making these adjustments, a *firm* should consider the extent to which it needs to take account of the potential for both under-recording of actual *defaults* experienced and divergence of actual experience from the true underlying average *PD*.

- 4.4.27 R To the extent that a *firm* uses data on internal *default* experience for the estimation of *PDs* it must be able to demonstrate in its analysis that the estimates are reflective of underwriting standards and of any differences in the *rating system* that generated the data and the current *rating system*. Where underwriting standards or *rating systems* have changed, a *firm* must add a greater margin of conservatism in its estimate of *PD*.

[**Note:** BCD Annex VII Part 4 point 63]

- 4.4.28 R To the extent that a *firm* associates or maps its internal grades to the scale used by an *ECAI* or similar organisations and then attributes the *default* rate observed for the external organisation's grades to the *firm's* grades, mappings must be based on a comparison of internal rating criteria to the criteria used by the external organisation and on a comparison of the internal and external ratings of any common obligors. Biases or inconsistencies in the mapping approach or underlying data must be avoided. The external organisation's criteria underlying the data used for quantification must be oriented to *default* risk only and not reflect transaction characteristics. The *firm's* analysis must include a comparison of the *default* definitions used, subject to the requirements in *BIPRU* 4.3.56R to *BIPRU* 4.3.71R and *BIPRU* 4.4.22R (Definition of default). The *firm* must document the basis for the mapping.

[**Note:** BCD Annex VII Part 4 point 64]

- 4.4.29 G It is unlikely that a *firm* will be able to convince the FSA that it had considered all relevant and available information, as required by *BIPRU* 4.3.74R, if it used only data from one *ECAI* or similar organisation, where other relevant information is available.

- 4.4.30 R To the extent that a *firm* uses statistical *default* prediction models it may estimate *PDs* as the simple average of *default*-probability estimates for individual obligors in a given grade. The *firm's* use of *default* probability models for this purpose must meet the standards specified in *BIPRU* 4.3.51R.

[**Note:** BCD Annex VII Part 4 point 65]

- 4.4.31 R Irrespective of whether a *firm* is using external, internal, or pooled data sources, or a combination of the three, for its *PD* estimation, the length of the underlying historical observation period used must be at least five years for at least one source. If the available observation period spans a longer period for any source, and this data is relevant, this longer period must be used. A *firm* not permitted to use own estimates of *LGDs* or *conversion factors* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.

[**Note:** BCD Annex VII Part 4 point 66 (part)]

IRB foundation approach: General

- 4.4.32 R *BIPRU* 4.4.33R - *BIPRU* 4.4.39R set out requirements specific to the *foundation IRB approach*.

4.4.33 R Under the *foundation IRB approach* a *firm* must apply the *LGD* values set out in *BIPRU 4.4.34R* and *BIPRU 4.8.25R* and the *conversion factors* set out in *BIPRU 4.4.37*.

[**Note:** *BCD Article 87(8)*]

IRB foundation approach: LGDs

4.4.34 R A *firm* must use the following *LGD* values:

- (1) senior *exposures* without eligible collateral, 45%;
- (2) subordinated *exposures* without eligible collateral, 75%;
- (3) a *firm* may recognise funded and *unfunded credit protection* in the *LGD* in accordance with *BIPRU 5* (Credit risk mitigation), as modified by *BIPRU 4.10*;
- (4) *covered bonds* may be assigned an *LGD* value of 12.5%; and
- (5) for certain senior *corporate exposure* purchased receivables, for certain subordinated *corporate exposure* purchased receivables and for *dilution risk of corporate* purchased receivables the provisions of *BIPRU 4.8.25R* (LGDs for corporate receivables) apply.

[**Note:** *BCD Annex VII Part 2 point 8 (part)*]

4.4.35 R Until 31 December 2010, *covered bonds* as set out in *BIPRU 3.4.107R* to *BIPRU 3.4.110R* may be assigned an *LGD* value of 11.25% if:

- (1) assets as set out in *BIPRU 3.4.107R(1)(a)* to (c) collateralising the *covered bonds* all qualify for *credit quality assessment step one* as set out in *BIPRU 3*;
- (2) where assets set out in *BIPRU 3.4.107R(1)(d)* and (e) are used as collateral, the respective upper limits laid down in each of those points is 10% of the nominal amount of the outstanding issue;
- (3) assets as set out in *BIPRU 3.4.107R(1)(f)* are not used as collateral; or
- (4) the *covered bonds* are the subject of a credit assessment by a *nominated ECAI*, and the *ECAI* places them in the most favourable category of credit assessment that the *ECAI* could make in respect of *covered bonds*.

[**Note:** *BCD Annex VII Part 2 point 8 (part)*]

Foundation IRB approach: Exposure value and conversion factors

4.4.36 R *BIPRU 4.4.37R - BIPRU 4.4.39R* apply in addition to *BIPRU 4.4.71R - BIPRU 4.4.78R*.

- 4.4.37 R (1) The *exposure* value for the items set out in this *rule* must be calculated as the committed but undrawn amount multiplied by the applicable *conversion factor* set out in this *rule*.
- (2) For credit lines which are uncommitted, that are unconditionally cancellable at any time by the *firm* without prior notice, or that effectively provide for automatic cancellation due to deterioration in a borrower's credit worthiness, a *conversion factor* of 0 % applies. To apply a *conversion factor* of 0% a *firm* must actively monitor the financial condition of the obligor, and its internal control systems must enable it immediately to detect a deterioration in the credit quality of the obligor.
- (3) For short-term letters of credit arising from the movement of goods, a *conversion factor* of 20% applies for both the issuing and confirming *firms*.
- (4) For other credit lines, note issuance facilities (NIFs), and revolving underwriting facilities (RUFs), a *conversion factor* of 75% applies.
- (5) For undrawn purchase commitments for revolving purchased receivables falling under *BIPRU* 4.8.29R, the *conversion factor* set out in that *rule* applies.

[**Note:** *BCD* Annex VII Part 3 point 9 (part)]

- 4.4.38 R Where a commitment refers to the extension of another commitment, the lower of the two *conversion factors* associated with the individual commitment must be used.

[**Note:** *BCD* Annex VII Part 3 point 10]

- 4.4.39 R For all off-balance sheet items other than mentioned in *BIPRU* 4.4.37R, *BIPRU* 4.4.45R, *BIPRU* 4.4.71R - *BIPRU* 4.4.78R, *BIPRU* 4.6.44R *BIPRU* 4.8.28R and *BIPRU* 4.8.29R, the *exposure* value must be the following percentage of its value:

- (1) 100% if it is a full risk item;
- (2) 50% if it is a medium risk item;
- (3) 20% if it is a medium/low risk item; and
- (4) 0% if it is a low risk item.

For the purposes of this *rule* the off-balance sheet items must be assigned to risk categories as indicated in *BIPRU* 3.7 (Classification of off-balance sheet items).

[**Note:** *BCD* Annex VII Part 3 point 11]

Advanced IRB approach: General

- 4.4.40 R *BIPRU* 4.4.41R - *BIPRU* 4.4.55R set out requirements specific to the *advanced IRB approach*.

4.4.41 R Under the *advanced IRB approach* a firm must use its own estimates of *LGDs* and *conversion factors* in accordance with *BIPRU 4*.

[**Note:** *BCD Article 87(9)*]

Advanced IRB approach: *LGDs* and *PDs*

4.4.42 R A firm using own *LGD* estimates under the *advanced IRB approach* may recognise *unfunded credit protection* by adjusting *PDs* subject to *BIPRU 4.4.43R*.

[**Note:** *BCD Annex VII Part 2 point 6*]

4.4.43 R Notwithstanding *BIPRU 4.4.34R* and *BIPRU 4.8.25R*, if a firm's *IRB permission* permits it to use own *LGD* estimates under the *advanced IRB approach* for *exposures* to which *BIPRU 4* applies and permits it to use the approach in this rule, *unfunded credit protection* may be recognised by adjusting *PD* and/or *LGD* estimates subject to the *minimum IRB standards*. A firm must not assign guaranteed exposures an adjusted *PD* or *LGD* such that the adjusted *risk weight* would be lower than that of a comparable, direct *exposure* to the guarantor.

[**Note:** *BCD Annex VII Part 2 point 10*]

4.4.44 G A firm using the *advanced IRB approach* may only recognise *unfunded credit protection* in accordance with *BIPRU 4.4.43R*. The other methods for recognising *unfunded credit risk mitigation* under the *standardised approach* and *foundation IRB approach* are not available to a firm on the *advanced IRB approach*.

Advanced IRB approach: *Conversion factors*

4.4.45 R If a firm uses its own estimates of *conversion factors* under the *advanced IRB approach* it must calculate the *exposure* value of off-balance sheet *exposures* calculated with the use of *conversion factors* by using its own estimates of *conversion factors* across different product types as mentioned in *BIPRU 4.4.37R* and *BIPRU 4.4.39R(2) to (4)*.

[**Note:** *BCD Annex VII Part 3 point 9 (part)*]

4.4.46 G Under *BIPRU 4.4.45R*, a firm may calculate *exposure* values by calculating the amount expected to be claimed, instead of the maximum possible amount of the potential claim. The figure for the amount expected to be claimed should not be less than the current outstandings from time to time.

Advanced IRB approach: *Structure of the rating system*

4.4.47 R *BIPRU 4.4.48R - BIPRU 4.4.50R* are in addition to *BIPRU 4.3.25R - BIPRU 4.3.28R* and *BIPRU 4.4.6R - BIPRU 4.4.9R*.

4.4.48 R If a firm's *IRB permission* provides for it to use the *advanced IRB approach* for the calculation of *LGDs*, its *rating system* must incorporate a distinct facility rating scale which exclusively reflects *LGD* related transaction characteristics.

[Note: BCD Annex VII Part 4 point 9]

- 4.4.49 R A *facility grade* means for the purpose of the *advanced IRB approach* a risk category within a *rating system*'s facility scale to which *exposures* are assigned on the basis of a specified and distinct set of rating criteria from which own estimates of *LGDs* are derived. The grade definition must include both a description of how *exposures* are assigned to the grade and of the criteria used to distinguish the level of risk across grades.

[Note: BCD Annex VII Part 4 point 10]

- 4.4.50 R Significant concentrations within a single *facility grade* must be supported by convincing empirical evidence that the *facility grade* covers a reasonably narrow *LGD* band, respectively, and that the risk posed by all *exposures* in the grade falls within that band.

[Note: BCD Annex VII Part 4 point 11]

Advanced IRB approach: Assignment of exposures

- 4.4.51 R For a *firm* permitted to use own estimates of *LGDs* or *conversion factors* under the *advanced IRB approach*, each *exposure* must be assigned to a *facility grade* as part of the credit approval process. This is in addition to the requirements in *BIPRU* 4.4.11R - *BIPRU* 4.4.13R.

[Note: BCD Annex VII Part 4 point 20]

- 4.4.52 G *BIPRU* 4.4.50R and *BIPRU* 4.4.51R should be read in the light of *BIPRU* 4.3.28R.

Advanced IRB approach: Data maintenance

- 4.4.53 R As well as complying with *BIPRU* 4.3.54R and *BIPRU* 4.4.21R (Data maintenance), a *firm* using own estimates of *LGDs* and/or *conversion factors* under the *advanced IRB approach* must collect and store:

- (1) complete histories of data on the facility ratings and *LGD* and *conversion factor* estimates associated with each *rating scale*;
- (2) the dates the ratings were assigned and the estimates were done;
- (3) the key data and methodology used to derive the facility ratings and *LGD* and *conversion factor* estimates;
- (4) the person who assigned the facility rating and the person who provided *LGD* and *conversion factor* estimates;
- (5) data on the estimated and realised *LGDs* and *conversion factors* associated with each *defaulted exposure*;

- (6) data on the *LGD* of the *exposure* before and after evaluation of the effects of a guarantee or credit derivative, for a *firm* that reflects the credit risk mitigating effects of guarantees or credit derivatives through *LGD*; and
- (7) data on the components of *loss* for each *defaulted exposure*.

[**Note:** *BCD* Annex VII Part 4 Point 38]

Advanced IRB approach: Requirements specific to own-LGD estimates

- 4.4.54 R In addition to the requirements in *BIPRU* 4.3.74R - *BIPRU* 4.3.94R (General requirements about risk quantification) and *BIPRU* 4.3.98R - *BIPRU* 4.3.123R (Requirements for risk quantification specific to own-LGD estimates), estimates of *LGD* must be based on data over a minimum of five years, increasing by one year each year after implementation until a minimum of seven years is reached, for at least one data source. If the available observation period spans a longer period for any source, and the data is relevant, this longer period must be used.

[**Note:** *BCD* Annex VII Part 4 point 82]

Advanced IRB approach: Requirements specific to own-conversion factor estimates

- 4.4.55 R In addition to the requirements in *BIPRU* 4.3.124R - *BIPRU* 4.3.131R (Requirements specific to own-conversion factor estimates), estimates of *conversion factors* must be based on data over a minimum of five years, increasing by one year each year after implementation until a minimum of seven years is reached, for at least one data source. If the available observation period spans a longer period for any source, and the data is relevant, this longer period must be used.

[**Note:** *BCD* Annex VII Part 4 point 93]

Calculations: General

- 4.4.56 R The remainder of this section applies to both the *foundation IRB approach* and the *advanced IRB approach*.

Calculations: Risk-weighted exposure amounts

- 4.4.57 R Subject to *BIPRU* 4.4.59R to *BIPRU* 4.4.60R, *BIPRU* 4.5.6R, *BIPRU* 4.5.8R - *BIPRU* 4.5.10R (Risk weights for specialised lending), *BIPRU* 4.8.16R, *BIPRU* 4.8.17R (Risk weights for corporate exposure purchased receivables) and *BIPRU* 4.9.3R (Securitisation: provision of credit protection), *risk weighted exposure amounts* must be calculated according to the formulae in the table in *BIPRU* 4.4.58R and the adjustment formula in *BIPRU* 4.4.79R (Double default).

[**Note:** *BCD* Annex VII Part 1 point 3]

- 4.4.58 R Table: Formulae for the calculation of *risk weighted exposure amounts*
This table belongs to *BIPRU* 4.4.57R

Correlation (R)	$0.12 \times (1 - \text{EXP}(-50*PD))/(1-\text{EXP}(-50)) + 0.24*$ $[1-(1-\text{EXP}(-50*PD))/(1-\text{EXP}(-50))]$	
Maturity factor (b)	$(0.11852-0.05478*1n(PD))^2$	
	$(LGD*N[(1-R)^{-0.5}*G(PD)+(R/(1-R))^{0.5} *G(0.999)]-PD*LGD)*$ $(1-1.5*b)^{-1}*(1+(M-2.5)*b)*12.5*1.06$	
N(x)	denotes the cumulative distribution function for a standard normal random variable (i.e. the probability that a normal random variable with mean zero and variance of one is less than or equal to x). G(z) denotes the inverse cumulative distribution function for a standard normal random variable (i.e. the value x such that N(x) = z).	
PD = 0	For PD = 0, RW shall be: 0	
PD = 1	For PD = 1:	
	(i)	for <i>defaulted exposures</i> where a <i>firm</i> applies the LGD values set out in BIPRU 4.4.32R and BIPRU 4.8.25R RW shall be: 0;
	(ii)	for <i>defaulted exposures</i> where a <i>firm</i> uses its own estimates of LGDs, RW shall be: Max {0, 12.5 *(LGD- <u>EL_{BE}</u>)};
	where <u>EL_{BE}</u> must be the <i>firm</i> 's best estimate of <i>expected loss</i> for the <i>defaulted exposure</i> according to BIPRU 4.3.122R.	

[Note: BCD Annex VII Part 1 point 3]

- 4.4.59 R For *exposures* to companies where the total annual sales for the consolidated group of which the firm is a part is less than EUR 50 million a *firm* may use the following correlation formula for the calculation of *risk weights* for *corporate exposures*. In this formula S is expressed as total annual sales in millions of Euros with EUR 5 million <= S <= EUR 50 million. Reported sales of less than EUR 5 million must be treated as if they were equivalent to EUR 5 million. In accordance with BIPRU 4.8.21R, for purchased receivables the total annual sales are the weighted average by individual *exposures* of the pool. The formula for the calculation of correlation (R) is:

$$0.12 \times (1 - \text{EXP}(-50*PD))/(1-\text{EXP}(-50)) + 0.24*$$

$$[1-(\text{EXP}(-50*PD))/(1-\text{EXP}(-50))]$$

$$-0.04*(1-(S-5)/45)$$

[Note: BCD Annex VII Part 1 point 5 (part)]

- 4.4.60 R A *firm* must for the purpose of BIPRU 4.4.59R substitute total assets of the consolidated group for total annual sales when total annual sales are not a meaningful indicator of firm size and total assets are a more meaningful indicator than total annual sales.

[Note: BCD Annex VII Part 1 point 5 (part)]

Calculations: Expected loss amounts

- 4.4.61 R *Expected loss* amounts must be calculated according to the formulae in the table in BIPRU 4.4.62R.

[Note: BCD Annex VII Part 1 point 30 (part)]

- 4.4.62 Table: Formulae for the calculation of *expected loss* amounts
This table belongs to BIPRU 4.4.61R

<i>Expected loss (EL)</i>	equals $PD \times LGD$
<i>Expected loss amount</i>	equals $EL \times exposure$ value
For <i>defaulted exposures</i> ($PD = 1$) where a <i>firm</i> uses its own estimates of <i>LGDs</i> , <i>EL</i> must be EL_{BE} , the <i>firm's</i> best estimate of <i>expected loss</i> for the <i>defaulted exposure</i> according to BIPRU 4.3.122R.	
For exposures subject to the treatment set out in BIPRU 4.4.79R (Double default) <i>EL</i> must be 0.	

[Note: BCD Annex VII Part 1 point 30 (part)]

Calculations: PD

- 4.4.63 R A *firm* must provide its own estimates of *PDs* in accordance with its *IRB permission* and the *minimum IRB standards*.

[Note: BCD Article 87(6) (part)]

- 4.4.64 R The *PD* of a *corporate exposure* or an *exposure* in the *IRB exposure class* referred to in BIPRU 4.3.2R(2) (Institutions) must be at least 0.03%.

[Note: BCD Annex VII Part 2 point 2]

4.4.65 R The *PD* of obligors in *default* must be 100%.

[Note: BCD Annex VII Part 2 point 4]

4.4.66 R Subject to BIPRU 4.4.42R (*Advanced IRB approach: LGDs and PDs*) a *firm* may recognise *unfunded credit protection* in the *PD* in accordance with the provisions of BIPRU 5 (Credit risk mitigation), as modified by BIPRU 4.10. For *dilution risk*, however, a *firm* may also recognise *unfunded credit protection* providers which are specified in its *IRB permission* in addition to those indicated in the *CRM eligibility conditions*.

[Note: BCD Annex VII Part 2 point 5]

Calculations: Maturity

4.4.67 R A *firm* must calculate maturity (M) for each of the *exposures* referred to in this *rule* in accordance with this *rule* and subject to BIPRU 4.4.68R to BIPRU 4.4.70R. In all cases, M must be no greater than 5 years.

(1) For an instrument subject to a cash flow schedule M must be calculated according to the following formula:

$$M = \text{MAX}\{1; \text{MIN}\{\sum_t t * CF_t / \sum_t CF_t ; 5\}\}$$

where CF_t denotes the cash flows (principal, interest payments and fees) contractually payable by the obligor in period t .

(2) For derivatives subject to a master netting agreement M must be the weighted average remaining maturity of the *exposure*, where M must be at least 1 year. The notional amount of each *exposure* must be used for weighting the maturity.

(3) For *exposures* arising from fully or nearly-fully collateralised *financial derivative instruments* transactions and fully or nearly-fully collateralised *margin lending transactions* which are subject to a master netting agreement M must be the weighted average remaining maturity of the transactions where M must be at least 10 days. The notional amount of each transaction must be used for weighting the maturity.

- (5) Where a *firm* uses the *CCR internal model method* to calculate the *exposure* values, M must be calculated for *exposures* to which a *firm* applies this method and for which the maturity of the longest-dated contract contained in the *netting set* is greater than one year according to the following formula:

$$M = \text{MIN} \left(\frac{\sum_{k=1}^{tk \leq 1 \text{ year}} \text{Effective} EE_k * \Delta t_k * df_k + \sum_{tk > 1 \text{ year}}^{\text{maturity}} EE_k * \Delta t_k * df_k}{\sum_{k=1}^{tk \leq 1 \text{ year}} \text{Effective} EE_k * \Delta t_k * df_k} ; 5 \right)$$

where:

df_k = the risk-free discount factor for future time period t_k and the remaining symbols are defined in BIPRU 13.6.

- (6) Notwithstanding (7), a *firm* that uses a *CCR internal model method* model to calculate a one-sided credit valuation adjustment (CVA) may use the effective credit duration estimated by the model as M if permitted to do so by its *CCR internal model method permission*.
- (7) Subject to BIPRU 4.4.68R, for *netting sets* in which all contracts have an original maturity of less than one year the formula in (2) must be applied
- (8) If a *firm* is permitted under its *IRB permission* to use own *PD* estimates for *corporate exposure* purchased receivables, for drawn amounts M must equal the purchased receivables *exposure* weighted average maturity, where M must be at least 90 days. This same value of M must also be used for undrawn amounts under a committed purchase facility provided the facility contains effective covenants, early amortisation triggers, or other features that protect the purchasing *firm* against a significant deterioration in the quality of the future receivables it is required to purchase over the facility's term. Absent such effective protections, M for undrawn amounts must be calculated as the sum of the longest-dated potential receivable under the purchase agreement and the remaining maturity of the purchase facility, where M must be at least 90 days
- (9) For any other instrument than mentioned in this *rule* or when a *firm* is not in a position to calculate M as set out in (2), M must be the maximum remaining time (in years) that the obligor is permitted to take fully to discharge its contractual obligations, where M must be at least 1 year.

[**Note:** BCD Annex VII Part 2 point 13 (part)]

4.4.68 R Notwithstanding BIPRU 4.4.67R(2)-(3) and (8)-(9), M must be at least one-day for:

- (1) fully or nearly-fully collateralised *financial derivative instruments*;

- (2) fully or nearly-fully collateralised *margin lending transactions*; and
- (3) *repurchase transactions, securities or commodities lending or borrowing transactions*,

provided the documentation requires daily remargining and daily revaluation and includes provisions that allow for the prompt liquidation or setoff of collateral in the event of *default* or failure to re-margin.

[**Note:** BCD Annex VII Part 2 point 14 (part)]

- 4.4.69 G The last paragraph of paragraph 14 of Part 2 of Annex VII of the *Banking Consolidation Directive* says: “In addition, for other short-term exposures specified by the competent authorities which are not part of the credit institution’s ongoing financing of the obligor, M shall be at least one-day. A careful review of the particular circumstances shall be made in each case.” The FSA has not at this stage specified any such short-term exposure.

[**Note:** BCD Annex VII Part 2 point 14 (part)]

- 4.4.70 R Maturity mismatches must be treated as specified in *BIPRU 4.10* and *BIPRU 5* (Credit risk mitigation).

[**Note:** BCD Annex VII Part 2 point 16]

Calculations: Exposure value

- 4.4.71 R Unless provided otherwise in *BIPRU 4* the *exposure* value of on-balance sheet *exposures* must be measured gross of value adjustments. This also applies to assets purchased at a price different than the amount owed. For purchased assets, the difference between the amount owed and the net value recorded on the balance-sheet of the firm is denoted discount if the amount owed is larger, and premium if it is smaller.

[**Note:** BCD Annex VII Part 3 point 1]

- 4.4.72 R A *firm* must not treat the *exposure* value of a facility as being less than current drawings under it. Interest accrued to date on an *exposure* under a facility must be included in current drawings or an allowance for it must be built into the *conversion factor*.

- 4.4.73 R Where a *firm* uses master netting agreements in relation to *repurchase transactions or securities or commodities lending or borrowing transactions* the *exposure* value must be calculated in accordance with *BIPRU 5* (Credit risk mitigation), as modified by *BIPRU 4.10*, and *BIPRU 13.8*.

[**Note:** BCD Annex VII Part 3 point 2]

- 4.4.74 R For on-balance sheet netting of loans and deposits a *firm* must apply for the calculation of the *exposure* value the methods set out in *BIPRU 5* (Credit risk mitigation), as modified by *BIPRU 4.10*.

[Note: BCD Annex VII Part 3 point 3]

- 4.4.75 R The *exposure* value for leases must be the discounted minimum lease payments. Minimum lease payments are the payments over the lease term that the lessee is or can be required to make and any bargain option (i.e. option the exercise of which is reasonably certain). Any guaranteed residual value fulfilling the set of conditions in *BIPRU 5.7.1R* (Eligibility), as modified by *BIPRU 4.10.38R* and *BIPRU 4.10.39R* (Unfunded credit protection: Eligibility of providers) regarding the eligibility of protection providers as well as the minimum requirements for recognising other types of guarantees provided in *BIPRU 5.7.6R* (Minimum requirements: General) to *BIPRU 5.7.12R* (Additional requirements for guarantees) should also be included in the minimum lease payments.

[Note: BCD Annex VII Part 3 point 4]

- 4.4.76 R Where an *exposure* takes the form of *securities* or *commodities* sold, posted or lent under *repurchase transactions* or *securities or commodities lending or borrowing transactions*, *long settlement transactions* and *margin lending transactions*, the *exposure* value must be the value of the *securities* or *commodities* determined in accordance with *GENPRU 1.3* (Valuation). Where the *financial collateral comprehensive method* is used, the *exposure* value must be increased by the volatility adjustment appropriate to such *securities* or *commodities* as set out in *BIPRU 4.10* and *BIPRU 5* (Credit risk mitigation). The *exposure* value of *repurchase transactions*, *securities or commodities lending or borrowing transactions*, *long settlements transactions* and *margin lending transactions* must be determined in accordance with *BIPRU 13*.

[Note: BCD Annex VII Part 3 point 7]

- 4.4.77 R Notwithstanding *BIPRU 4.4.76R*, the *exposure* value of credit risk *exposures* outstanding, as determined by the *firm*, with a *central counterparty* must be determined in accordance with *BIPRU 13.3.3R* and *BIPRU 13.8.8R* (Exposure to central counterparty), provided that the *central counterparty's CCR exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[Note: BCD Annex VII Part 3 point 8]

- 4.4.78 R In the case of any *financial derivative instrument*, the *exposure* value must be determined by the methods set out in *BIPRU 13*.

[Note: BCD Annex VII Part 3 point 5]

Double default

- 4.4.79 R The *risk weighted exposure amount* for each *exposure* which meets the requirements set out in *BIPRU 5.7.2R* and *BIPRU 4.4.83R* (Double default) may be adjusted according to the following formula:

$$(1) \quad \text{Risk weighted exposure amount} = \text{RW} * \text{exposure value} * (0.15 + 160 * \text{PD}_{pp})$$

- (2) $PD_{pp} = PD$ of the protection provider
- (3) RW must be calculated using the relevant *risk weight* formula set out in *BIPRU 4.4.57R* for the *exposure*, the *PD* of the obligor and the *LGD* of a comparable direct *exposure* to the protection provider. The maturity factor (b) must be calculated using the lower of the *PD* of the protection provider and the *PD* of the obligor.

[**Note:** *BCD Annex VII Part 1 point 4*]

- 4.4.80 R Notwithstanding *BIPRU 4.4.34R* and *BIPRU 4.4.43R*, for the purposes of *BIPRU 4.4.79R*, the *LGD* of a comparable direct *exposure* to the protection provider shall either be the *LGD* associated with an unhedged facility to the guarantor or the unhedged facility of the obligor, depending upon whether in the event both the guarantor and the obligor *default* during the life of the hedged transaction available evidence and the structure of the guarantee indicate that the amount recovered would depend on the financial condition of the guarantor or obligor, respectively

[**Note:** *BCD Annex VII Part 2 point 11*]

- 4.4.81 R For the purposes of *BIPRU 4.4.79R*, M must be the effective maturity of the credit protection but at least 1 year.

[**Note:** *BCD Annex VII Part 2 point 13 (part)*]

- 4.4.82 R *BIPRU 4.4.83R* applies to the eligibility of protection providers under the *IRB approach* which qualify for the treatment set out in *BIPRU 4.4.79R*.

- 4.4.83 R An *institution*, an *insurance undertaking* (including an *insurance undertaking* that carries out *reinsurance*) or an export credit agency which fulfils the following conditions may be recognised as an eligible provider of *unfunded credit protection* which qualifies for the treatment set out in *BIPRU 4.4.79R*:

- (1) the protection provider has sufficient expertise in providing *unfunded credit protection*;
- (2) the protection provider is regulated in a manner equivalent to the rules laid down in the *Banking Consolidation Directive* or had, at the time the credit protection was provided, a credit assessment by a *recognised ECAI* which is associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures to corporates* under the *standardised approach*;
- (3) the protection provider had, at the time the credit protection was provided, or for any period of time thereafter, an internal rating with a *PD* equivalent to or lower than that associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures to corporates* under the *standardised approach*;

- (4) the protection provider has an internal rating with a *PD* equivalent to or lower than that associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures* to *corporates* under the *standardised approach*;

For the purpose of this *rule*, credit protection provided by an export credit agency must not benefit from any explicit central government counter-guarantee.

[**Note:** *BCD* Annex VIII Part 1 point 29]

- 4.4.84 R *BIPRU* 4.4.85R applies to the requirements to qualify for the treatment set out in *BIPRU* 4.4.79R.
- 4.4.85 R To be eligible for the treatment set out in *BIPRU* 4.4.79R, credit protection deriving from a guarantee or credit derivative must meet the following conditions:
- (1) the underlying obligation must be to:
 - (a) a *corporate exposure*, excluding an *exposure* to an *insurance undertaking* (including an *insurance undertaking* that carries out *reinsurance*); or
 - (b) an *exposure* to a regional government, local authority or *public sector entity* which is not treated as an *exposure* to a central government or a central bank according to *BIPRU* 4.4.2R; or
 - (c) an *exposure* to *retail SME*, classified as a *retail exposure* according to *BIPRU* 4.6.2R;
 - (2) the underlying obligors must not be members of the same *group* as the protection provider;
 - (3) the *exposure* must be hedged by one of the following instruments:
 - (a) single name unfunded credit derivatives or single name guarantees;
 - (b) first to *default* basket products, with these the treatment must be applied to the asset within the basket with the lowest *risk weighted exposure amount*;
 - (c) n^{th} to *default* basket products, with these the protection obtained is only eligible for consideration under this framework if eligible $(n-1)^{\text{th}}$ *default* protection has also been obtained or where $(n-1)$ of the assets within the basket has/have already *defaulted* and where this is the case the treatment must be applied to the asset within the basket with the lowest *risk weighted exposure amount*;
 - (4) the credit protection must meet the requirements set out in *BIPRU* 5.7.6R-*BIPRU* 5.7.8R (Minimum requirements: Operational requirements), *BIPRU* 5.7.11R (Additional requirements for guarantees) and *BIPRU* 5.7.13R-*BIPRU* 5.7.14R (Additional requirements for credit derivatives);

- (5) the *risk weight* that is associated with the *exposure* prior to the application of the treatment in *BIPRUI* 4.4.79R does not already factor in any aspect of the credit protection;
- (6) a *firm* must have the right and expectation to receive payment from the protection provider without having to take legal action in order to pursue the counterparty for payment;
- (7) the purchased credit protection must absorb all credit losses incurred on the hedged portion of an *exposure* that arise due to the occurrence of credit events outlined in the contract;
- (8) if the payout structure provides for physical settlement, then there must be legal certainty with respect to the deliverability of a loan, bond or contingent liability and if a *firm* intends to deliver an obligation other than the underlying *exposure*, it must ensure that the deliverable obligation is sufficiently liquid so that the *firm* would have the ability to purchase it for delivery in accordance with the contract;
- (9) the terms and conditions of credit protection arrangements must be legally confirmed in writing by both the protection provider and the *firm*;
- (10) a *firm* must have a process in place to detect excessive correlation between the creditworthiness of a protection provider and the obligor of the underlying *exposure* due to their performance being dependent on common factors beyond the systematic risk factor;
- (11) in the case of protection against *dilution risk*, the seller of purchased receivables must not be a member of the same *group* as the protection provider; and
- (12) with reference to (6), to the extent possible, a *firm* must take steps to satisfy itself that the protection provider is willing to pay promptly should a credit event occur.

[**Note:** *BCD* Annex VIII Part 2 point 22]

4.5 The IRB approach: Specialised lending exposures

Application

4.5.1 R *BIPRU 4.5* applies with respect to the *exposures* referred to in *BIPRU 4.5.3R*.

4.5.2 R Except for *BIPRU 4.5.1R* and *BIPRU 4.5.3R*, *BIPRU 4.5* only applies to the extent that a *firm* applies the method in *BIPRU 4.5.8R* (slotting).

Definition of specialised lending

4.5.3 R Within the *corporate exposure IRB exposure class*, a *firm* must separately identify as *specialised lending exposures*, *exposures* which possess the following characteristics:

- (1) the *exposure* is to an entity which was created specifically to finance and/or operate physical assets;
- (2) the contractual arrangements give the lender a substantial degree of control over the assets and the income that they generate; and
- (3) the primary source of repayment of the obligation is the income generated by the assets being financed, rather than the independent capacity of a broader commercial enterprise.

[**Note:** *BCD Article 86(6)*]

Treatment of specialised lending

4.5.4 R If a *firm* is using or is applying to use the *advanced IRB approach* for some or all of its *exposures* in the *sovereign, institution and corporate IRB exposure class*, then *specialised lending exposures* treated under *BIPRU 4.5.8R* (Slotting) must be treated as being dealt with under the *advanced IRB approach* for the purposes of the calculations in *BIPRU 4.2.30R* and *BIPRU 4.2.31R*. If a *firm* is not using or applying to use the *advanced IRB approach* for any of its *exposures* in the *sovereign, institution and corporate IRB exposure class*, in the cases in which it is necessary to distinguish between the *advanced IRB approach* and the *foundation IRB approach*, then *specialised lending exposures* treated under *BIPRU 4.5.8R* must be treated as being dealt with under the *foundation IRB approach* for the purposes of the calculations in *BIPRU 4.2.30R* and *BIPRU 4.2.31R*.

Structure of rating system

- 4.5.5 R A *firm* using the methods set out in *BIPRU* 4.5.8R (Slotting) for assigning *risk weights* for *specialised lending exposures* is exempt from the requirement to have an obligor rating scale which reflects exclusively quantification of the risk of obligor *default* for these *exposures*. Notwithstanding *BIPRU* 4.4.7R (Seven grades for exposures to sovereigns, institutions and corporates), a *firm* must have for these *exposures* four grades for non-*defaulted* obligors and one grade for *defaulted* obligors.

[**Note:** *BCD* Annex VII Part 4 point 12 and point 21]

Assignment of exposures

- 4.5.6 R (1) A *firm* using the methods set out in *BIPRU* 4.5.8R (Slotting) for assigning *risk weights* for *specialised lending exposures* must assign each of these *exposures* to a grade in accordance with *BIPRU* 4 Annex 1R, taking into account the following factors:
- (a) financial strength;
 - (b) political and legal environment;
 - (c) transaction and/or asset characteristics;
 - (d) strength of the sponsor and developer including any public private partnership income stream; and
 - (e) security package.
- (2) A *firm* must slot *exposures* into the five columns in the tables in *BIPRU* 4.5.9R and *BIPRU* 4.5.13R as follows:
- (a) a *firm* must slot an *exposure* categorised as strong under Annex X into column 1;
 - (b) a *firm* must slot an *exposure* categorised as good under the Annex X into column 2;
 - (c) a *firm* must slot an *exposure* categorised as satisfactory under Annex X into column 3;
 - (d) a *firm* must slot an *exposure* categorised as weak under Annex X into column 4;
 - (e) in accordance with *BIPRU* 4.5.5R a *firm* must slot an *exposure* in *default* into column 5.

[**Note:** *BCD* Annex VII Part 1 point 6 (part)]

Calculation of risk-weighted exposure amounts

4.5.7 R Notwithstanding *BIPRU 4.3.5R* (Use of relevant parameters for calculating risk weighted exposure amounts), the calculation of *risk weighted exposure amounts* for credit risk for *specialised lending exposures* may be calculated in accordance with *BIPRU 4.5.8R*.

[**Note:** *BCD Article 87(5)*]

4.5.8 R For *specialised lending exposures* in respect of which a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards* it must assign *risk weights* to these *exposures* according to the table in *BIPRU 4.5.9R*.

[**Note:** *BCD Annex VII Part 1 point 6 (part)*]

4.5.9 R Table: Risk weights for specialised lending
This table belongs to *BIPRU 4.5.9R*

Remaining maturity	Category 1 (Strong)	Category 2 (Good)	Category 3 (Satisfactory)	Category 4 (Weak)	Category 5
Less than 2.5 years	50%	70%	115%	250%	0%
Equal or more than 2.5 years	70%	90%	115%	250%	0%

The coverage of each of the categories is set out in *BIPRU 4.5.6R*

[**Note:** *BCD Annex VII Part 1 point 6 (part)*]

4.5.10 R A *firm* may generally assign preferential *risk weights* of 50% to *exposures* in category 1, and a 70% *risk weight* to *exposures* in category 2 if:

- (1) its *IRB permission* allows this; and
- (2) the *firm's* underwriting characteristics and other risk characteristics are substantially strong for the relevant category.

[**Note:** *BCD Annex VII Part 1 point 6 (part)*]

4.5.11 G (1) If a *firm* applies for an *IRB permission* or for a variation of an *IRB permission* that permits the treatment in *BIPRU 4.5.10R* it should demonstrate that its standards exceed those of the slotting criteria provided for in *BIPRU 4.5* and result in ratings that are stronger than the benchmarks referred to in (3).

- (2) If a *firm* has an *IRB permission* that permits the treatment in *BIPRU 4.5.10R* it should continue to be able to demonstrate the matters in (1) to the *FSA* if asked.
- (3) Although a *firm* should map its internal ratings to the supervisory categories set out in the table in *BIPRU 4.5.9R* using the slotting criteria provided in *BIPRU 4.5.6R*, each supervisory category broadly corresponds to a range of external credit assessments of BBB- or better, BB+ or BB, BB- or B+ and B to C- (or their equivalents). The fifth category covers *default*.

Calculation of expected loss amounts

- 4.5.12 R The *EL* values for *specialised lending exposures* where a *firm* uses the methods set out in *BIPRU 4.5.8R* for assigning *risk weights* must be assigned according to the table in *BIPRU 4.5.13R*.

[**Note:** *BCD* Annex VII Part 1 point 31 (part)]

- 4.5.13 R Table: Expected loss values for specialised lending
This table belongs to *BIPRU 4.5.12R*

Remaining maturity	Category 1 (Strong)	Category 2 (Good)	Category 3 (Satisfactory)	Category 4 (Weak)	Category 5
Less than 2.5 years	0%	0.4%	2.8%	8%	50%
Equal or more than 2.5 years	0.4%	0.8%	2.8%	8%	50%

The coverage of each of the categories is set out in *BIPRU 4.5.6R*

[**Note:** *BCD* Annex VII Part 1 point 31 (part)]

- 4.5.14 R Where a *firm's IRB permission* authorises it generally to assign preferential *risk weights* as outlined in *BIPRU 4.5.10R* of 50% to *exposures* in category 1, and 70% to *exposures* in category 2, the *EL* value for *exposures* in category 1 must be 0%, and for *exposures* in category 2 must be 0.4%.

[**Note:** *BCD* Annex VII Part 1 point 31 (part)]

4.6 The IRB approach: Retail exposures

Application

4.6.1 R *BIPRU* 4.6 applies with respect to the *exposures* referred to in *BIPRU* 4.6.2R.

Definition of retail exposures

4.6.2 R To be eligible to be treated as a *retail exposure*, *exposures* must meet the following criteria:

- (1) they must be either to an individual person or persons, or to a small or medium sized entity, provided in the latter case that the total amount owed to the *firm* and *parent undertaking* and its *subsidiary undertakings*, including any past due *exposure*, by the obligor client or *group of connected clients*, but excluding claims or contingent claims secured on residential real estate collateral, must not, to the knowledge of the *firm*, which must have taken reasonable steps to confirm the situation, exceed EUR 1 million;
- (2) they are treated by the *firm* in its risk management consistently over time and in a similar manner;
- (3) they are not managed just as individually as *exposures* in the *corporate exposure IRB exposure class*; and
- (4) they each represent one of a significant number of similarly managed *exposures*.

[**Note:** *BCD* Article 86(4) (part)]

4.6.3 R The present value of retail minimum lease payments is eligible to be treated as a *retail exposure*.

[**Note:** *BCD* Article 86(4) (part)]

- 4.6.4 G
- (1) This paragraph sets out *guidance* on *BIPRU* 4.6.2R so far as it relates to the boundary between *retail exposures* and *corporate exposures*.
 - (2) In deciding what steps are reasonable for the purposes of *BIPRU* 4.6.2R(1), a *firm* may take into account complexity and cost, as well as the materiality of the impact upon its capital calculation. A *firm* should be able to demonstrate to the *FSA* that it has complied with the obligation to take reasonable steps under *BIPRU* 4.6.2R(1) in the way it takes these factors into account.

- (3) If a *firm* has *exposures* to an owner of a *retail SME* in his personal capacity and *exposures* to the *retail SME* the *firm* should aggregate the two types of *exposure* for the purpose of *BIPRU* 4.6.2R(1), although it should not include claims secured on residential real estate collateral. In deciding what steps are reasonable for the purposes of *BIPRU* 4.6.2R(1) in aggregating these two types of *exposure*, a *firm* may take into account the materiality of those personal *exposures*. A *firm* should be able to demonstrate to the *FSA* that it has complied with the obligation to take reasonable steps under *BIPRU* 4.6.2R(1) when taking into account materiality in this way..
- (4) The definition of *group of connected clients* is set out in the *glossary*. Paragraph (2) of that definition is "two or more *persons* ... who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other or all of the others would be likely to encounter repayment difficulties". Say that a *firm* has *exposures* to A and B. When deciding whether A and B come within paragraph (2) of the definition two conditions should be satisfied. Firstly the connections between A and B should mean that if A experiences financial problems, B should be likely to encounter repayment difficulties. Secondly, the connections between A and B should mean that if B experiences financial problems, A should be likely to encounter repayment difficulties
- (5) A *firm* should have its own documented policy on the types of *exposures* that, in accordance with *BIPRU* 4.6, qualify as *retail SME exposures*. The *FSA* would not expect that a definition based on the EUR 1m *exposure* limit would be adequate on its own.
- (6) The purpose of the definition of *retail exposure* is to separate a non-granular retail and small and medium sized business portfolio from other business so that a separate capital calculation may be applied to that portfolio that takes into account its non-granularity. Where *retail exposures* are assigned to pools it is the statistical characteristics of these pools which are used to derive the *IRB approach* estimates. Therefore pools should be reasonably homogenous and subject to consistent risk management practices.
- (7) A *firm* should have sufficient controls to ensure that any inadvertent assignment of non-eligible *exposures* to the *retail exposure IRB exposure class* is sufficiently immaterial that it does not result in any significant distortion of the overall statistical characteristics of the sub-sets of that *IRB exposure class* which arise when the *exposures* are assigned to grades or pools. Cost considerations do not justify inclusion of non-eligible *exposures* if the effect would be material. Sample testing could be one method of demonstrating that the impact would be immaterial. *BIPRU* 4.1.25R applies to *exposures* treated in accordance with this sub-paragraph (7).
- (8) If an *exposure* to a small or medium sized business crosses the *retail exposure* size boundary it should be treated as a *corporate*, unless, in accordance with *BIPRU* 4.1.25R, the excess is immaterial because of its size or because it is temporary.

- (9) *BIPRU 4.6.2R* does not require that *exposures to retail SMEs* should never be individually managed. In deciding whether the frequency and extent of individual management does or does not make *exposures* ineligible for the *retail exposure IRB exposure class*, a *firm* should consider whether that individual management is:
- (a) sufficiently insignificant not to disrupt the homogeneity of the pool;
 - (b) consistent with the management of other *exposures* in the same *retail exposure* pool; and
 - (c) significantly different in extent from the individual management that occurs for *corporate exposures*, looked at as a whole.
- (10) Where an *exposure* is denominated in other currencies, a *firm* may calculate the Euro equivalent for the purposes of *BIPRU 4.6.2R(1)* using any appropriate set of exchange rates provided its choice has no obvious bias and that the *firm* is consistent in its approach to choosing rates.
- (11) A *firm* may monitor compliance with the €1m threshold in *BIPRU 4.6.2R(1)* on the basis of approved limits provided that it has internal control procedures that are sufficient to ensure that amounts owed cannot diverge from those approved limits to such an extent as to give rise to a breach of the €1m threshold or, if the *firm* is relying on provisions relating to reasonable steps in *BIPRU 4.6.2R(1)*, any material breach of that threshold.

Rating system: Structure of rating system

- 4.6.5 G Further material on the structure of rating systems can be found in *BIPRU 4.3.25R - BIPRU 4.3.28R*.

Rating system: Assignment to grades or pools

- 4.6.6 R *Rating systems* must reflect both obligor and transaction risk, and must capture all relevant obligor and transaction characteristics.

[**Note:** *BCD Annex VII Part 4 point 13*]

- 4.6.7 R The level of risk differentiation must ensure that the number of *exposures* in a given grade or pool is sufficient to allow for meaningful quantification and validation of the *loss* characteristics at the grade or pool level. The distribution of *exposures* and obligors across grades or pools must be such as to avoid excessive concentrations.

[**Note:** *BCD Annex VII Part 4 point 14*]

- 4.6.8 G (1) This paragraph contains *guidance* on the level of differentiation referred to in *BIPRU 4.6.7R*.

- (2) It is important that a *firm* achieves adequate segmentation to deliver robust estimates of *LGD* and *conversion factors*, as well as *PD*. Whether the focus should be more on *exposure* size or collateral type is a question of fact for the particular circumstances in which the assignment of *exposures* to grades or pools occurs. Typically the *FSA* would expect both to be important.
- (3) A *firm* may allocate *retail exposures* to pools based on direct estimates of *PD*, *LGD* and *conversion factors* as well as using an approach under which the *firm* segments first and attributes *PD*, *LGD* and *conversion factors* afterwards. However the result should in either case be that the pools are sufficiently homogenous.
- (4) The number and size of pools should be determined in relation to the objective of establishing homogeneous risk. Pools should be of sufficient size to permit the production of robust risk estimates but should not be so large as to obscure variations in quality.

4.6.9 R A *firm* must be able to demonstrate to the *FSA* that the process of assigning *exposures* to grades or pools provides for a meaningful differentiation of risk, provides for a grouping of sufficiently homogenous exposures, and allows for accurate and consistent estimation of *loss* characteristics at grade or pool level.

[**Note:** *BCD* Annex VII Part 4 point 15 (part)]

4.6.10 G For purchased receivables, *BIPRU* 4.8 contains material about assignment to grades or pools.

- 4.6.11 R
- (1) A *firm* must consider the following risk drivers when assigning *exposures* to grades or pools:
 - (a) obligor risk characteristics;
 - (b) transaction risk characteristics, including product or collateral types or both; and
 - (c) delinquency.
 - (2) In the case of (1)(b) a *firm* must explicitly address cases where several *exposures* benefit from the same collateral.
 - (3) However:
 - (a) a *firm* need not consider delinquency if this is compatible with its *IRB permission*; and
 - (b) (in the case of a *firm* with an *IRB permission* that permits the *firm* not to consider delinquency) it should be able to demonstrate to the *FSA* that delinquency is not a material risk driver for the *exposures* treated in this way.

[**Note:** *BCD* Annex VII Part 4 Point 16]

Rating system: Assignment of exposures

- 4.6.12 R Each *exposure* must be assigned to a grade or a pool as part of the credit approval process.

[**Note:** BCD Annex VII Part 4 point 24]

Rating system: Overrides

- 4.6.13 G Material on overrides can be found in *BIPRU* 4.3.50R.

Rating system: Integrity of assignment process

- 4.6.14 R A *firm* must at least annually update obligor and facility assignments or review the *loss* characteristics and delinquency status of each identified risk pool whichever is applicable. A *firm* must also at least annually review in a representative sample the status of individual *exposures* within each pool as a means of ensuring that *exposures* continue to be assigned to the correct pool.

[**Note:** BCD Annex VII Part 4 point 29]

- 4.6.15 G Annual rescore is one method of meeting the requirement in *BIPRU* 4.6.14R. However a *firm* need not carry out this update by means of a full re-run of a credit scoring model if it is able to demonstrate that its method is appropriate to the portfolio given its materiality and its impact on its capital requirements and that the *firm* still meets the *minimum IRB standards*.

Rating system: Use of models

- 4.6.16 G Material on the use of models can be found in *BIPRU* 4.3.51R - *BIPRU* 4.3.53G.

Rating system: Documentation

- 4.6.17 G Material on documentation can be found in *BIPRU* 4.3.19R - *BIPRU* 4.3.24R.

Rating system: Data maintenance

- 4.6.18 R In addition to complying with *BIPRU* 4.3.54R (Data maintenance) a *firm* must collect and store:

- (1) data used in the process of allocating *exposures* to grades or pools;
- (2) data on the estimated *PDs*, *LGDs* and *conversion factors* associated with grades or pools of *exposures*;
- (3) the identity of obligors and *exposures* that *defaulted*;
- (4) for *defaulted exposures*, data on the grades or pools to which the *exposure* was assigned over the year prior to *default* and the realised outcomes on *LGD* and *conversion factor*; and
- (5) data on *loss rates* for *qualifying revolving retail exposures*.

[**Note:** BCD Annex VII Part 4 point 39]

Risk quantification: Definition of default

- 4.6.19 G Material on the definition of *default* can be found in BIPRU 4.3.56R - BIPRU 4.3.72G.
- 4.6.20 R (1) This *rule*, in accordance with BIPRU 4.3.57R(4) (Definition of default), sets the exact number of days past due that a *firm* must abide by in the case of *retail exposures*.
- (2) For *retail exposures* to counterparts situated within the *United Kingdom* the number of days past due is 180 days with the exception of *retail SME exposures*. For these *exposures* the number is 90 days.
- (3) For *retail exposures* to counterparts situated in another *EEA State* the number of days past due is the lower of:
- (a) 180; and
- (b) the number of days past due fixed under the *CRD implementation measure* in that *EEA State* with respect to paragraph 48 of Part 4 of Annex VII of the *Banking Consolidation Directive* for such *exposures*.
- (4) For *retail exposures* to counterparts in a state outside the *EEA* the number of days past due is the lower of:
- (a) 180; and
- (b) (if a number of days past due for such *exposures* has been fixed under any national law of that state applicable to *undertakings* in the *banking sector* or the *investment services sector* that implements the *IRB approach*) that number.

[**Note:** BCD Annex VII Part 4 point 44 (part) and point 48 (part)]

- 4.6.21 R A *firm* may apply the definition of *default* at a facility level.

[**Note:** BCD Annex VII Part 4 point 44 (part)]

- 4.6.22 G Where a *firm* chooses to apply the definition of *default* at facility level and a customer has *defaulted* on a facility, then *default* on that facility is likely to influence the *PD* assigned to that customer on other facilities and so should be taken into account..

Risk quantification: Overall requirements for estimation

- 4.6.23 G Material on the overall requirements for estimation can be found in BIPRU 4.3.73R - BIPRU 4.3.94R.

Risk quantification: Requirements specific to PD estimation

- 4.6.24 R A *firm* must estimate *PDs* by obligor grade or pool from long run averages of one-year *default* rates.
- [Note: BCD Annex VII Part 4 point 67]
- 4.6.25 R Notwithstanding BIPRU 4.6.24R, *PD* estimates may also be derived from realised *losses* and appropriate estimates of *LGDs*.
- [Note: BCD Annex VII Part 4 point 68]
- 4.6.26 R A *firm* must regard internal data for assigning exposures to grades or pools as the primary source of information for estimating *loss* characteristics. A *firm* may use external data (including pooled data) or statistical models for quantification provided a strong link can be demonstrated between:
- (1) the *firm's* process of assigning *exposures* to grades or pools and the process used by the external data source; and
 - (2) the *firm's* internal risk profile and the composition of the external data.
- [Note: BCD Annex VII Part 4 point 69]
- 4.6.27 R If a *firm* derives long run average estimates of *PD* and *LGD* for *retail exposures* from an estimate of total *losses*, and an appropriate estimate of *PD* or *LGD*, the process for estimating total *losses* must meet the *IRB minimum standards* for estimation of *PD* and *LGD*, and the outcome must be consistent with the concept of *LGD* as set out in BIPRU 4.3.99R (Default weighted average).
- [Note: BCD Annex VII Part 4 point 70]
- 4.6.28 R Irrespective of whether a *firm* is using external, internal, pooled data sources or a combination of the three, for its estimation of *loss* characteristics, the length of the underlying historical observation period used must be at least five years for at least one source. If the available observation spans a longer period for any source, and these data are relevant, this longer period must be used. However:
- (1) a *firm* need not give equal importance to historic data if this is compatible with its *IRB permission*; and
 - (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *FSA* that more recent data is a better predictor of *loss* rates.
- [Note: BCD Annex VII Part 4 point 71 (part)]
- 4.6.29 R A *firm* may have, when implementing the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.
- [Note: BCD Annex VII Part 4 point 71 (part)]

- 4.6.30 R A *firm* must identify and analyse expected changes of risk parameters over the life of credit *exposures* (seasoning effects).
- [**Note:** *BCD* Annex VII Part 4 point 72]
- Risk quantification: Requirements specific to own-LGD estimation
- 4.6.31 R Notwithstanding *BIPRU* 4.3.99R (Default weighted average), *LGD* estimates may be derived from realised *losses* and appropriate estimates of *PDs*.
- [**Note:** *BCD* Annex VII Part 4 point 83]
- 4.6.32 R Notwithstanding *BIPRU* 4.3.128R (Additional drawings), a *firm* may reflect future drawings either in its *conversion factor* or in its *LGD* estimates.
- [**Note:** *BCD* Annex VII Part 4 point 84]
- 4.6.33 R Estimates of *LGD* must be based on data over a minimum of five years. Notwithstanding *BIPRU* 4.3.99R (Default weighted average):
- (1) a *firm* need not give equal importance to historic data if this is permitted by its *IRB permission*; and
 - (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *FSA* that more recent data is a better predictor of loss rates.
- [**Note:** *BCD* Annex VII Part 4 point 86 (part)]
- 4.6.34 R A *firm* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.
- [**Note:** *BCD* Annex VII Part 4 point 86 (part)]
- 4.6.35 G The *FSA* does not assume that all portfolios are sensitive to downturns. The *FSA* also accepts that for some portfolios, particularly in unsecured lending, the impact of the material drivers on *LGD* may be weak. However the burden is on the *firm* to demonstrate that its models are appropriate for the circumstances in which they are applied.
- 4.6.36 G Additional material on requirements specific to own-*LGD* estimation can be found in *BIPRU* 4.3.98R - *BIPRU* 4.3.123R.
- Risk quantification: Requirements specific to own-conversion factor estimates
- 4.6.37 R Notwithstanding *BIPRU* 4.3.128R (Additional drawings), a *firm* may reflect future drawings either in its *conversion factors* or in its *LGD* estimates.
- [**Note:** *BCD* Annex VII Part 4 point 94]

- 4.6.38 R Estimates of *conversion factors* must be based on data over a minimum of five years. Notwithstanding *BIPRU* 4.3.125R :
- (1) a *firm* need not give equal importance to historic data if this is permitted by its *IRB permission*; and
 - (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *FSA* if asked that more recent data is a better predictor of loss rates.

[**Note:** *BCD* Annex VII Part 4 point 95 (part)]

- 4.6.39 R A *firm* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.

[**Note:** *BCD* Annex VII Part 4 point 95 (part)]

- 4.6.40 G Additional material on requirements specific to own-*conversion factor* estimation can be found in *BIPRU* 4.3.124R - *BIPRU* 4.3.131R.

Calculation of risk weighted exposure amounts for retail exposures: General

- 4.6.41 R Subject to *BIPRU* 4.6.43R and *BIPRU* 4.6.44R, the *risk weighted exposure amounts* for *retail exposures* must be calculated according to the formulae in the table in *BIPRU* 4.6.42R.

[**Note:** *BCD* Annex VII Part 1 point 10 1st sentence]

- 4.6.42 R Table: Risk weighted exposure amounts for retail exposures
This table belongs to *BIPRU* 4.6.41R

Correlation (R)	$0.03 \times (1 - \text{EXP}(-35 \cdot PD)) / (1 - \text{EXP}(-35)) + 0.16 \cdot [1 - (1 - \text{EXP}(-35 \cdot PD)) / (1 - \text{EXP}(-35))]$
Risk weight (RW)	$(LGD \cdot N[(1-R)^{-0.5} \cdot G(PD) + (R/(1-R))^{0.5} \cdot G(0.999)] - PD \cdot LGD) \cdot 12.5 \cdot 1.06$
N(x)	denotes the cumulative distribution function for a standard normal random variable (i.e. the probability that a normal random variable with mean zero and variance of one is less than or equal to x).
G(z)	denotes the inverse cumulative distribution function for a standard normal random variable (i.e. the value x such that N(x) = z).
PD = 1	For PD = 1 (<i>defaulted exposure</i>), RW must be:

	<p>Max $\{0, 12.5 * (LGD - EL_{BE})\}$</p> <p>where EL_{BE} must be the firm's best estimate of <i>expected loss</i> for the <i>defaulted exposure</i> according to BIPRU 4.3.122R.</p>
<i>Risk weighted exposure amount</i>	equals $RW * exposure$ value

[Note: BCD Annex VII Part 1 point 10 (part)]

Calculation of risk weighted exposure amounts for retail exposures: Retail mortgages

- 4.6.43 R For *retail exposures* secured by real estate collateral a correlation (R) of 0.15 must replace the correlation formula in the table in BIPRU 4.6.42R.

[Note: BCD Annex VII Part 1 point 12]

Calculation of risk weighted exposure amounts for retail exposures: Qualifying revolving retail exposures

- 4.6.44 R (1) For *qualifying revolving retail exposures* a correlation (R) of 0.04 must replace the correlation formula in the table in BIPRU 4.6.42R.
- (2) *Retail exposures* qualify as *qualifying revolving retail exposures* if they meet the following conditions:
- (a) the *IRB permission* of the *firm* in question does not disapply this paragraph;
 - (b) the *exposures* are to individuals;
 - (c) the *exposures* are revolving, unsecured, and, to the extent they are not drawn, immediately and unconditionally cancellable by the *firm*;
 - (d) the maximum *exposure* to a single individual in the sub-portfolio is EUR 100,000 or less;
 - (e) the *firm* is able to demonstrate to the *FSA* that the use of the correlation formula in this paragraph is limited to portfolios that have exhibited low volatility of *loss rates*, relative to their average level of *loss rates*, especially within the low *PD* bands; and
 - (f) the *firm* is able to demonstrate to the *FSA* that treatment as a *qualifying revolving retail exposure* is consistent with the underlying risk characteristics of the sub-portfolio.

(3) In the context of this *rule* revolving *exposures* are defined as those where customers' outstanding balances are permitted to fluctuate based on their decisions to borrow and repay, up to a limit established by the *firm* in question. Undrawn commitments may be considered as unconditionally cancellable if the terms permit the *firm* to cancel them to the full extent allowable under consumer protection and related legislation.

[**Note:** BCD Annex VII Part 1 point 13 (part) and Part 3 point 9(a) (part)]

4.6.45 G A *firm* should be able to demonstrate the low volatility of *loss* rates mentioned in BIPRU 4.6.44R(2)(e) at the time of the initial application for an *IRB permission* and thereafter at any time on request. The benchmark level should be the volatility of *loss* rates for the *qualifying revolving retail exposure* portfolio relative to the volatilities of *loss* rates of other relevant types of *retail exposures*. A *firm* should demonstrate low volatility by reference to data on the mean and standard deviation of *loss* rates over a time period that can be regarded as representative of the long-run performance of the portfolios concerned.

4.6.46 G In the *FSA's* view a sub-portfolio consisting of credit card or overdraft obligations will usually meet the condition in BIPRU 4.6.44R(2)(f). In the *FSA's* view it is unlikely that any other type of *retail exposure* will do so. If a *firm* wishes to apply the treatment in BIPRU 4.6.44R(1) to product types other than credit card or overdraft obligations it should first discuss this with the *FSA*.

Calculation of expected loss amounts

4.6.47 R *Expected loss* amounts must be calculated according to the formulae in the table in BIPRU 4.6.48R.

[**Note:** BCD Annex VII Part 1 point 30 (part)]

4.6.48 R Table: Formulae for the calculation of expected loss amounts
This table belongs to BIPRU 4.6.48R

<i>Expected loss (EL)</i>	equals $PD \times LGD$
<i>Expected loss amount</i>	equals $EL \times exposure$ value
<p>For <i>defaulted exposures</i> ($PD = 1$) where a <i>firm</i> uses its own estimates of <i>LGDs</i>, <i>EL</i> must be <u>EL_{BE}</u> the <i>firm's</i> best estimate of <i>expected loss</i> for the <i>defaulted exposure</i> according to BIPRU 4.3.122R.</p> <p>For <i>exposures</i> subject to the treatment set out in BIPRU 4.4.79R (Double default) <i>EL</i> must be 0.</p>	

[Note: BCD Annex VII Part 1 point 30 (part)]

Calculation of PDs

- 4.6.49 R A *firm* must provide its own estimates of *PDs* in accordance with its *IRB permission* and the *minimum IRB standards*.

[Note: BCD Article 87(6) (part)]

- 4.6.50 R The *PD* of an *exposure* must be at least 0.03%.

[Note: BCD Annex VII Part 2 point 17]

- 4.6.51 R The *PD* of obligors in *default* must be 100%. If a *firm* is using the facility level approach described in *BIPRU 4.6.21R*, the *PD* of an *exposure* in *default* must be 100%.

[Note: BCD Annex VII Part 2 point 18]

- 4.6.52 R *Unfunded credit protection* may be recognised by adjusting *PDs* subject to *BIPRU 4.6.54R*. For *dilution risk*, where a *firm* does not use its own estimates of *LGDs*, this must be subject to compliance with *BIPRU 5* (Credit risk mitigation) modified by *BIPRU 4.10* and, for this purpose, a *firm* may recognise *unfunded credit protection* providers other than those indicated in the *CRM eligibility conditions* provided the *firm* is able to demonstrate that the unfunded protection provider giving the undertaking is sufficiently reliable and that the protection agreement is legally effective in accordance with *BIPRU 5.2.7R* (Unfunded credit protection).

[Note: BCD Annex VII Part 2 point 20]

Calculation of LGDs

- 4.6.53 R A *firm* must provide its own estimates of *LGDs* in accordance with its *IRB permission* and the *minimum IRB standards*.

[Note: BCD Article 87(7) (part)]

- 4.6.54 R *Unfunded credit protection* may be recognised as eligible by adjusting *PD* or *LGD* estimates subject to the *minimum IRB standards* as specified in *BIPRU 4.10.43 - BIPRU 4.10.48R* and in accordance with the *IRB permission* either in support of an individual *exposure* or a pool of *exposures*. A *firm* must not assign guaranteed *exposures* an adjusted *PD* or *LGD* such that the adjusted *risk weight* would be lower than that of a comparable, direct *exposure* to the guarantor.

[Note: BCD Annex VII Part 2 point 22]

Calculation of exposure values and own conversion factors

- 4.6.55 R Except where otherwise specified, *BIPRU 4.4.37R - BIPRU 4.4.39R* (Exposure value and conversion factors), *BIPRU 4.4.45R* (AIRB conversion factors) and *BIPRU 4.4.71R - BIPRU 4.4.78R* (Calculation of exposure values for sovereigns, institutions and corporates) also apply to *retail exposures*.
- 4.6.56 R A *firm* must provide its own estimates of *conversion factors* in accordance with its *IRB permission* and the *minimum IRB standards*.
- [**Note:** *BCD Article 87(7) (part)*]
- Double default
- 4.6.57 R The *risk weighted exposure amount* for each *exposure to retail SME* as defined in *BIPRU 4.6.2R* which meets the requirements set out in *BIPRU 4.4.83R* and *BIPRU 4.4.85R* may be calculated according to *BIPRU 4.4.79R* (Double default).
- [**Note:** *BCD Annex VII Part 1 point 11*]
- 4.6.58 R Notwithstanding *BIPRU 4.6.54,R* for the purposes of *BIPRU 4.4.80R* the *LGD* of a comparable direct *exposure* to the protection provider must either be the *LGD* associated with an unhedged facility to the guarantor or the unhedged facility of the obligor, depending upon whether in the event both the guarantor and obligor *default* during the life of the hedged transaction available evidence and the structure of the guarantee indicate that the amount recovered would depend on the financial condition of the guarantor or obligor, respectively.
- [**Note:** *BCD Annex VII Part 2 point 23*]

4.7 The IRB approach: Equity exposures

Application

4.7.1 R *BIPRU 4.7* applies with respect to the *exposures* referred to in *BIPRU 4.7.2R*.

Definition of equity exposures

4.7.2 R The following *exposures* must be classed as *equity exposures*:

- (1) non-debt *exposures* conveying a subordinated, residual claim on the assets or income of the issuer; and
- (2) debt *exposures* the economic substance of which is similar to the *exposures* specified in (1).

[**Note:** *BCD* Article 86(2)]

Calculation of risk-weighted exposure amounts

4.7.3 R Notwithstanding *BIPRU 4.3.5R* (Relevant parameters), the calculation of *risk weighted exposure amounts* for credit risk for all *exposures* belonging to the *equity exposure IRB exposure class* must be calculated in accordance with one of the following ways:

- (1) the simple risk weight approach (see *BIPRU 4.7.8R*);
- (2) the *PD/LGD approach* (see *BIPRU 4.7.13R*); and
- (3) the internal models approach (see *BIPRU 4.7.23R*);

in accordance with *BIPRU 4.7* and subject to the *firm's IRB permission*.

[**Note:** *BCD* Article 87(4) (part)]

4.7.4 R Even if a *firm's IRB permission* would otherwise permit the use of the internal models approach as referred to in *BIPRU 4.7.3R(3)*, it may only use that approach if it meets the minimum requirements in *BIPRU 4.7.27R - BIPRU 4.7.35R*.

[**Note:** *BCD* Article 87(4) (part)]

4.7.5 R A *firm* may employ different approaches to different portfolios where the *firm* itself uses different approaches internally. A *firm* must, if it uses different approaches in accordance with the previous sentence, be able to demonstrate to the *FSA* that the choice is made consistently and is not determined by regulatory arbitrage considerations.

[**Note:** *BCD* Annex VII Part 1 point 17]

- 4.7.6 R Notwithstanding *BIPRU 4.7.5R* a firm may, if its *IRB permission* permits it to do so, attribute the *risk weighted exposure amounts* for *equity exposures* to *ancillary services undertakings* according to the treatment of *non credit-obligation assets*.

[**Note:** *BCD Annex VII Part 1 point 18*]

Exposure value

- 4.7.7 R The *exposure* value must be the value presented in the financial statements. Admissible *equity exposure* measures are the following:

- (1) for investments held at fair value with changes in value flowing directly through income and into *capital resources*, the *exposure* value is the fair value presented in the balance sheet;
- (2) for investments held at fair value with changes in value not flowing through income but into a tax-adjusted separate component of equity, the *exposure* value is the fair value presented in the balance sheet; and
- (3) for investments held at cost or at the lower of cost or market value, the *exposure* value is the cost or market value presented in the balance sheet.

[**Note:** *BCD Annex VII Part 3 point 12*]

The calculation of risk-weighted exposure amounts for equity exposures: The simple risk weight approach: Introduction

- 4.7.8 R *BIPRU 4.7.9R* to *BIPRU 4.7.12R* set out the simple risk weight approach for calculating the *risk weighted exposure amounts* for *equity exposures* as referred to in *BIPRU 4.7.3R(1)*.

The calculation of risk-weighted exposure amounts for equity exposures: The simple risk weight approach: Risk weighted exposure amounts

- 4.7.9 R The *risk weighted exposure amounts* must be calculated according to the following formula:

$$\text{risk-weighted exposure amount} = \text{RW} * \text{exposure value};$$

where:

- (1) *risk weight* (RW) = 190% for private *equity exposures* in sufficiently diversified portfolios;
- (2) *risk weight* (RW) = 290% for exchange traded *equity exposures*; and
- (3) *risk weight* (RW) = 370% for all other *equity exposures*.

[**Note:** *BCD Annex VII Part 1 point 19*]

- 4.7.10 R Short cash positions and derivative instruments held in the *non-trading book* are permitted to offset long positions in the same individual stocks provided that these instruments have been explicitly designated as hedges of specific *equity exposures* and that they provide a hedge for at least another year. Other short positions must be treated as if they are long positions with the relevant *risk weight* assigned to the absolute value of each position. In the context of maturity mismatched positions, the method is that for *corporate exposures* as set out in *BIPRU 4.4.70R*.

[Note: *BCD Annex VII Part 1 point 20*]

- 4.7.11 R A *firm* may recognise *unfunded credit protection* obtained on an *equity exposure* in accordance with the methods set out in *BIPRU 5 (Credit risk mitigation)*, as modified by *BIPRU 4.10*.

[Note: *BCD Annex VII Part 1 point 21*]

The calculation of risk-weighted exposure amounts for equity exposures: The simple risk weight approach: Expected loss

- 4.7.12 R The *expected loss amounts* for *equity exposures* must be calculated according to the following formula:

(1) *expected loss amount* = $EL \times \text{exposure value}$; and

(2) the *EL* values must be the following:

(a) *expected loss (EL)* = 0.8% for private *equity exposures* in sufficiently diversified portfolios;

(b) *expected loss (EL)* = 0.8% for exchange traded *equity exposures*; and

(c) *expected loss (EL)* = 2.4% for all other *equity exposures*.

[Note: *BCD Annex VII Part 1 point 32*]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: Introduction

- 4.7.13 R *BIPRU 4.7.14R* to *BIPRU 4.7.22R* set out the *PD/LGD approach* for calculating the *risk weighted exposure amounts* for *equity exposures*.

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: Risk weighted exposure amounts

- 4.7.14 R The *risk weighted exposure amounts* must be calculated according to the formulas in *BIPRU 4.4.58R* (Risk weighted exposure amounts for sovereigns, institutions and corporates). If a *firm* does not have sufficient information to use the definition of *default* a scaling factor of 1.5 must be assigned to the *risk weights*.

[Note: *BCD Annex VII Part 1 point 22*]

- 4.7.15 R At the individual *exposure* level the sum of the *expected loss* amount multiplied by 12.5 and the *risk weighted exposure amount* must not exceed the *exposure* value multiplied by 12.5.

[Note: BCD Annex VII Part 1 point 23]

- 4.7.16 R A *firm* may recognise *unfunded credit protection* obtained on an *equity exposure* in accordance with the methods set out in *BIPRU 5* (Credit risk mitigation) as modified by *BIPRU 4.10*. This must be subject to an *LGD* of 90% on the *exposure* to the provider of the hedge. For private *equity exposures* in sufficiently diversified portfolios an *LGD* of 65% may be used.

[Note: BCD Annex VII Part 1 point 24]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: Calculation of expected loss amounts

- 4.7.17 R The *expected loss* amounts for *equity exposures* must be calculated according to the following formulae:

(1) *expected loss* (EL) = $PD \times LGD$; and

(2) *expected loss* amount = $EL \times exposure\ value$.

[Note: BCD Annex VII Part 1 point 33]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: PDs

- 4.7.18 R *PDs* must be determined according to the methods for *corporate exposures*. The following minimum *PDs* must be applied:

(1) 0.09% for exchange traded *equity exposures* where the investment is part of a long-term customer relationship;

(2) 0.09% for non-exchange traded *equity exposures* where the returns on the investment are based on regular and periodic cash flows not derived from capital gains;

(3) 0.40% for exchange traded *equity exposures* including other short positions as set out in *BIPRU 4.7.10R*; and

(4) 1.25% for all other *equity exposures* including other short positions as set out in *BIPRU 4.7.10R*.

[Note: BCD Annex VII Part 2 point 24]

- 4.7.19 R *BIPRU 4.4.29R* (five year observation period) applies to the *PD/LGD approach*.

[Note: BCD Annex VII Part 4 point 66 (part)]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: LGDs

- 4.7.20 R Private *equity exposures* in sufficiently diversified portfolios may be assigned an *LGD* of 65 %.

[Note: BCD Annex VII Part 2 point 25]

- 4.7.21 R All other *exposures* must be assigned an *LGD* of 90%.

[Note: BCD Annex VII Part 2 point 26]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: Maturity

- 4.7.22 R M (maturity) assigned to all *exposures* must be 5 years.

[Note: BCD Annex VII Part 2 point 27]

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Introduction

- 4.7.23 R *BIPRU 4.7.24R* to *BIPRU 4.7.35R* set out the internal models approach for calculating the *risk weighted exposure amounts* for *equity exposures* as referred to in *BIPRU 4.7.3R(3)*.

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Risk weighted exposure amounts

- 4.7.24 R The *risk weighted exposure amount* is the potential *loss* on the *firm's equity exposures* as derived using internal value-at-risk models subject to the 99th percentile, one-tailed confidence interval of the difference between quarterly returns and an appropriate risk-free rate computed over a long-term sample period, multiplied by 12.5. The *risk weighted exposure amounts* at the individual *exposure* level must not be less than the sum of minimum *risk weighted exposure amounts* required under the *PD/LGD approach* and the corresponding *expected loss amounts* multiplied by 12.5 and calculated on the basis of the *PD* values set out in *BIPRU 4.7.18(1)R* and the corresponding *LGD* values set out *BIPRU 4.7.20R* and *BIPRU 4.7.21R*.

[Note: BCD Annex VII Part 1 point 25]

- 4.7.25 R A *firm* may recognise *unfunded credit protection* obtained on an *equity position*.

[Note: BCD Annex VII Part 1 point 26]

The calculation of risk weighted exposure amounts for equity exposures: The internal models approach: Expected loss amounts

- 4.7.26 R The *expected loss* amounts for *equity exposures* under the internal models approach must be 0%.

[Note: BCD Annex VII Part 1 point 34]

The calculation of risk weighted exposure amounts for equity exposures: The internal models approach: Capital requirements and risk quantification

- 4.7.27 R
- (1) A *firm* must meet the standards set out in (2) to (9) for the purpose of calculating capital requirements.
 - (2) The estimate of potential *loss* must be robust to adverse market movements relevant to the long-term risk profile of the *firm's* specific holdings. The data used to represent return distributions must reflect the longest sample period for which data is available and be meaningful in representing the risk profile of the *firm's* specific *equity exposures*. The data used must be sufficient to provide conservative, statistically reliable and robust loss estimates that are not based purely on subjective or judgmental considerations. A *firm* must be able to demonstrate to the *FSA* that the shock employed provides a conservative estimate of potential *losses* over a relevant long-term market or business cycle.
 - (3) A *firm* must combine empirical analysis of available data with adjustments based on a variety of factors in order to attain model outputs that achieve appropriate realism and conservatism. In constructing Value at Risk (VaR) models estimating potential quarterly losses, a *firm* may use quarterly data or convert shorter horizon period data to a quarterly equivalent using an analytically appropriate method supported by empirical evidence and through a well-developed and documented thought process and analysis. Such an approach must be applied conservatively and consistently over time. Where only limited relevant data is available a *firm* must add appropriate margins of conservatism.
 - (4) The models used must be able to capture adequately all of the material risks embodied in equity returns including both the *general market risk* and *specific risk* exposure of the *firm's equity exposure* portfolio. The internal models must adequately explain historical price variation, capture both the magnitude and changes in the composition of potential concentrations, and be robust to adverse market environments. The population of risk *exposures* represented in the data used for estimation must be closely matched to or at least comparable with those of the *firm's equity exposures*.
 - (5) The internal model must be appropriate for the risk profile and complexity of a *firm's equity exposure* portfolio. Where a *firm* has material holdings with values that are highly non-linear in nature the internal models must be designed to capture appropriately the risks associated with such instruments.
 - (6) Mapping of individual positions to proxies, market indices, and risk factors must be plausible, intuitive, and conceptually sound.

- (7) A *firm* must be able to demonstrate to the *FSA* through empirical analyses the appropriateness of risk factors, including their ability to cover both *general market risk* and *specific risk*.
- (8) The estimates of the return volatility of *equity exposures* must incorporate relevant and available data, information, and methods. Independently reviewed internal data or data from external sources (including pooled data) must be used.
- (9) A rigorous and comprehensive stress-testing programme must be in place.

[Note: *BCD* Annex VII Part 4 point 115]

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Risk management and controls

- 4.7.28 R
- (1) With regard to the development and use of internal models for capital requirement purposes, a *firm* must establish policies, procedures, and controls to ensure the integrity of the model and modelling process. These policies, procedures, and controls must include the ones set out in the rest of this paragraph.
 - (2) There must be full integration of the internal model into the overall management information systems of the *firm* and in the management of the *non-trading book equity exposure* portfolio. In particular they must be used in:
 - (a) measuring and assessing *equity exposure* portfolio performance (including the risk adjusted performance);
 - (b) allocating economic capital to *equity exposures*; and
 - (c) evaluating overall capital adequacy and the investment management process.
 - (3) A *firm* must have established management systems, procedures, and control functions for ensuring the periodic and independent review of all elements of the internal modelling process, including approval of model revisions, vetting of model inputs, and review of model results, such as direct verification of risk computations. These reviews must assess the accuracy, completeness, and appropriateness of model inputs and results and focus on both finding and limiting potential errors associated with known weaknesses and identifying unknown model weaknesses. Such reviews may be conducted by an internal independent unit, or by an independent external third party.
 - (4) There must be adequate systems and procedures for monitoring investment limits and the risk exposures of *equity exposures*.

- (5) The units responsible for the design and application of the model must be functionally independent from the units responsible for managing individual investments.
- (6) Parties responsible for any aspect of the modelling process must be adequately qualified. Management must allocate sufficient skilled and competent resources to the modelling function.

[**Note:** *BCD Annex VII Part 4 point 116*]

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Validation and documentation

- 4.7.29 R A *firm* must have a robust system in place to validate the accuracy and consistency of its internal models and modelling processes. All material elements of the internal models and the modelling process and validation must be documented.

[**Note:** *BCD Annex VII Part 4 point 117*]

- 4.7.30 R A *firm* must use the internal validation process to assess the performance of its internal models and processes in a consistent and meaningful way.

[**Note:** *BCD Annex VII Part 4 point 118*]

- 4.7.31 R The methods and data used for quantitative validation must be consistent through time. Changes in estimation and validation methods and data (both data sources and periods covered) must be documented.

[**Note:** *BCD Annex VII Part 4 point 119*]

- 4.7.32 R A *firm* must regularly compare actual *equity exposure* returns (computed using realised and unrealised gains and losses) with modelled estimates. Such comparisons must make use of historical data that cover as long a period as possible. A *firm* must document the methods and data used in such comparisons. This analysis and documentation must be updated at least annually.

[**Note:** *BCD Annex VII Part 4 point 120*]

- 4.7.33 R A firm must make use of other quantitative validation tools and comparisons with external data sources. The analysis must be based on data that are appropriate to the portfolio, are updated regularly, and cover a relevant observation period. A *firm's* internal assessments of the performance of its models must be based on as long a period as possible.

[**Note:** *BCD Annex VII Part 4 point 121*]

4.7.34 R A *firm* must have sound internal standards for situations where comparison of actual *equity exposure* returns with the models' estimates calls the validity of the estimates or of the models as such into question. These standards must take account of business cycles and similar systematic variability in *equity exposure* returns. All adjustments made to internal models in response to model reviews must be documented and consistent with the *firm's* model review standards.

[**Note:** BCD Annex VII Part 4 point 122]

4.7.35 R The internal model and the modelling process must be documented, including the responsibilities of parties involved in the modelling, and the model approval and model review processes.

[**Note:** BCD Annex VII Part 4 point 123]

- 4.8 The IRB approach: Purchased receivables
- Application
- 4.8.1 R *BIPRU* 4.8 applies with respect to purchased receivables.
- 4.8.2 G Purchased receivables do not form an *IRB exposure class* on their own. For any purchased receivable, the provisions of the sections of *BIPRU* 4 that deal with the *IRB exposure class* to which it belongs also apply, as modified by this section.
- [Note: *BCD* Annex VII Part 4 point 15 (part)]
- Structure of rating systems
- 4.8.3 R For *retail exposure* that are purchased receivables, the grouping referred to in *BIPRU* 4.6.9R must reflect the seller's underwriting practices and the heterogeneity of its customers.
- Risk quantification: Overall requirements for estimation: General
- 4.8.4 G Further general material about the requirements for estimation can be found in *BIPRU* 4.3.73R - *BIPRU* 4.3.94R.
- 4.8.5 R The estimates for determining the risk parameters *PD*, *LGD*, *conversion factor* and *EL* must reflect all relevant information available to the purchasing *firm* regarding the quality of the underlying receivables, including data for similar pools provided by the seller, by the purchasing *firm*, or by external sources. The purchasing *firm* must evaluate any data relied upon which is provided by the seller.
- [Note: *BCD* Annex VII Part 4 point 53]
- Risk quantification: Overall requirements for estimation: Requirements specific to PD estimation
- 4.8.6 R With respect to *BIPRU* 4.6.26R (Internal and external data for PD estimation: retail exposures) a *firm* may use external and internal reference data for *PD* estimation. A *firm* must use all relevant data sources as points of comparison.
- [Note: *BCD* Annex VII Part 4 point 69 (part)]
- 4.8.7 R For *corporate exposure* purchased receivables a *firm* may estimate *ELs* by obligor grade from long run averages of one-year realised *default* rates.
- [Note: *BCD* Annex VII Part 4 point 60]

- 4.8.8 R If a *firm* derives long run average estimates of *PDs* and *LGDs* for *corporate exposure* purchased receivables from an estimate of *EL*, and an appropriate estimate of *PD* or *LGD*, the process for estimating total *losses* must meet the overall standards for estimation of *PD* and *LGD* set out in the *IRB minimum standards*, and the outcome must be consistent with the concept of *LGD* as set out in *BIPRU 4.3.99R*.

[**Note:** *BCD Annex VII Part 4 point 61*]

Risk quantification: Overall requirements for estimation: Requirements specific to own-LGD estimates

- 4.8.9 R A *firm* may use external and internal reference data for its *LGD* estimates in the case of *retail exposures* that are purchased receivables.

[**Note:** *BCD Annex VII Part 4 point 85*]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: General

- 4.8.10 R *BIPRU 4.8.11R - BIPRU 4.8.15R* set out minimum requirements specific to the treatment of purchased receivables under the *IRB approach*.

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Legal certainty

- 4.8.11 R The structure of the facility must ensure that under all foreseeable circumstances a *firm* has effective ownership and control of all cash remittances from the receivables. When the obligor makes payments directly to a seller or servicer a *firm* must verify regularly that payments are forwarded completely and within the contractually agreed terms. Servicer means an entity that manages a pool of purchased receivables or the underlying credit *exposures* on a day-to-day basis. A *firm* must have procedures to ensure that ownership over the receivables and cash receipts is protected against bankruptcy stays or legal challenges that could materially delay the lender's ability to liquidate or assign the receivables or retain control over cash receipts.

[**Note:** *BCD Annex VII Part 4 point 105*]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of monitoring systems

- 4.8.12 R (1) A *firm* must monitor both the quality of the purchased receivables and the financial condition of the seller and servicer. In particular a *firm* must comply with the remaining provisions of this *rule*.
- (2) A *firm* must assess the correlation among the quality of the purchased receivables and the financial condition of both the seller and servicer, and have in place internal policies and procedures that provide adequate safeguards to protect against such contingencies, including the assignment of an internal risk rating for each seller and servicer.

- (3) A *firm* must have clear and effective policies and procedures for determining seller and servicer eligibility. A *firm* or its agent must conduct periodic reviews of sellers and servicers in order to verify the accuracy of reports from the seller or servicer, detect fraud or operational weaknesses, and verify the quality of the seller's credit policies and servicer's collection policies and procedures. The findings of these reviews must be documented.
- (4) A *firm* must assess the characteristics of the purchased receivables pools including:
 - (a) over-advances;
 - (b) history of the seller's arrears, bad debts, and bad debt allowances;
 - (c) payment terms; and
 - (d) potential contra accounts.
- (4) A *firm* must have effective policies and procedures for monitoring on an aggregate basis single-obligor concentrations both within and across purchased receivables pools.
- (5) A *firm* must ensure that it receives from the servicer timely and sufficiently detailed reports of receivables ageings and dilutions to ensure compliance with the *firm*'s eligibility criteria and advancing policies governing purchased receivables, and provide an effective means with which to monitor and confirm the seller's terms of sale and dilution.

[Note: BCD Annex VII Part 4 point 106]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of work-out systems

- 4.8.13 R A *firm* must have systems and procedures for detecting deteriorations in the seller's financial condition and purchased receivables quality at an early stage, and for addressing emerging problems proactively. In particular a *firm* must have clear and effective policies, procedures, and information systems to monitor covenant violations, and clear and effective policies and procedures for initiating legal actions and dealing with problem purchased receivables.

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of systems for controlling collateral, credit availability and cash

[Note: BCD Annex VII Part 4 point 107]

- 4.8.14 R A *firm* must have clear and effective policies and procedures governing the control of purchased receivables, credit, and cash. In particular, written internal policies must specify all material elements of the receivables purchase programme, including the advancing rates, eligible collateral, necessary documentation, concentration limits, and the way cash receipts are to be handled. These elements must take appropriate account of all relevant and material factors, including the seller's and servicer's financial condition, risk concentrations, and trends in the quality of the purchased receivables and the seller's customer base, and internal systems must ensure that funds are advanced only against specified supporting collateral and documentation.

[Note: BCD Annex VII Part 4 point 108]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Compliance with the firm's internal policies and procedures

- 4.8.15 R A *firm* must have an effective internal process for assessing compliance with all internal policies and procedures. The process must include regular audits of all critical phases of the *firm's* receivables purchase programme, verification of the separation of duties between, firstly, the assessment of the seller and servicer and the assessment of the obligor and, secondly, between the assessment of the seller and servicer and the field audit of the seller and servicer and evaluations of back office operations, with particular focus on qualifications, experience, staffing levels, and supporting automation systems.

[Note: BCD Annex VII Part 4 point 109]

Calculation of risk-weighted asset amounts: Eligibility for different treatments: Corporate exposures

- 4.8.16 R For its *corporate exposure* purchased receivables a *firm* must comply with the minimum requirements set out in BIPRU 4.8.11R - BIPRU 4.8.15R. For *corporate exposure* purchased receivables that comply in addition with the conditions set out in BIPRU 4.8.18R, and where it would be unduly burdensome for a *firm* to use the risk quantification standards for *corporate exposures* as set out in the *minimum IRB standards* for these receivables, the risk quantification standards for *retail exposures* as set out in the *minimum IRB standards* may be used.

[Note: BCD Annex VII Part 1 point 7]

- 4.8.17 R For *corporate exposure* purchased receivables, refundable purchase discounts, collateral or partial guarantees that provide first-loss protection for *default losses*, dilution *losses*, or both, may be treated as first-loss positions under the provisions in BIPRU 9 (Securitisation) about the *IRB approach*.

[Note: BCD Annex VII Part 1 point 8]

Calculation of risk weighted asset amounts: Eligibility for different treatments: Retail exposures

- 4.8.18 R To be eligible for the *retail exposure* treatment purchased receivables must comply with the minimum requirements set out in *BIPRU 4.8.11R - BIPRU 4.8.15R* and the following conditions:
- (1) the *firm* has purchased the receivables from unrelated, third party sellers, and its *exposure* to the obligor of the receivable does not include any *exposures* that are directly or indirectly originated by the *firm* itself;
 - (2) the purchased receivables must be generated on an arm's-length basis between the seller and the obligor (and as such, intercompany accounts receivables and receivables subject to contra-accounts between firms that buy and sell to each other are ineligible);
 - (3) the purchasing *firm* has a claim on all proceeds from the purchased receivables or a pro-rata interest in the proceeds; and
 - (4) the portfolio of purchased receivables is sufficiently diversified.

[Note: *BCD Annex VII Part 1 point 14*]

- 4.8.19 R With respect to *retail exposures*, for purchased receivables, refundable purchase discounts, collateral or partial guarantees that provide first-loss protection for *default losses*, *dilution losses*, or both, may be treated as first-loss positions under the provisions in *BIPRU 9 (Securitisation)* about the *IRB approach*.

[Note: *BCD Annex VII Part 1 point 15*]

- 4.8.20 R For hybrid pools of purchased *retail exposure* receivables where the purchasing *firm* cannot separate *exposures* secured by real estate collateral and *qualifying revolving retail exposures* from other *retail exposures*, the *retail risk weight* function producing the highest capital requirements for those *exposures* must apply.

[Note: *BCD Annex VII Part 1 point 16*]

Calculation of risk weighted asset amounts for dilution risk

- 4.8.21 R The *risk weights* for *dilution risk* for purchased receivables (both *corporate exposures* and *retail exposures*) must be calculated according to this *rule*. The *risk weights* must be calculated according to the formula in *BIPRU 4.4.58R*. However, for the purposes of that formula, the total annual sales referred to in *BIPRU 4.4.59R* are the weighted average by individual *exposures* of the pool. The input parameters *PD* and *LGD* and the *exposure* value must be determined under the applicable provisions of *BIPRU 4* as modified by this section. *M* (maturity) must be 1 year. However:

- (1) a *firm* need not recognise *dilution risk* if its *IRB permission* permits this; and
- (2) (in the case of a *firm* with an *IRB permission* that permits the treatment of *dilution risk* in (1)) the *firm* must be able to convince the *FSA* that *dilution risk* is immaterial.

[Note: BCD Article 87(2) (part) and Annex VII Part 1 point 28]

Calculation of risk weighted exposure amounts: PDs

- 4.8.22 R For purchased *corporate exposure* receivables in respect of which a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the *PDs* for these *exposures* must be determined according to the following methods:
- (1) for senior claims on purchased *corporate exposure* receivables *PD* must be the *firm's* estimate of *EL* divided by *LGD* for these receivables;
 - (2) for subordinated claims on purchased *corporate exposure* receivables *PD* must be the *firm's* estimate of *EL*; and
 - (3) if a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate may be used.

[Note: BCD Annex VII Part 2 point 3]

- 4.8.23 R In the case of *corporate exposures*, for *dilution risk* of purchased receivables *PD* must be set equal to *EL* estimate for *dilution risk*. If a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for *dilution risk* of purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *PD* estimate may be used. A *firm* may recognise *unfunded credit protection* in the *PD* in accordance with the provisions of *BIPRU 9* and *BIPRU 5* as modified by *BIPRU 4.10*. A *firm* may recognise those *unfunded credit protection* providers set out in its *IRB permission* in addition to those indicated in the *CRM eligibility conditions*. Where a *firm's IRB permission* allows it to use its own *LGD* estimates for *dilution risk* of purchased corporate receivables, the *firm* may recognise *unfunded credit protection* by adjusting *PDs* subject to the provisions of *BIPRU 4.4.43R*.

[Note: BCD Annex VII Part 2 point 7]

- 4.8.24 R In the case of *retail exposures*, for *dilution risk* of purchased receivables *PD* must be set equal to *EL* estimates for *dilution risk*. If a *firm* can decompose its *EL* estimates for *dilution risk* of purchased receivables into *PDs* and *LGDs* in a reliable manner, the *PD* estimate may be used.

[Note: BCD Annex VII Part 2 point 19]

Calculation of risk weighted asset amounts: LGDs: Corporate exposures

- 4.8.25 R The following *LGD* values apply for purchased *corporate exposure* receivables:
- (1) for senior purchased *corporate exposure* receivables *exposures* where a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the value is 45%;

- (2) for subordinated purchased *corporate exposure* receivables *exposures* where a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the value is 100%; and
- (3) for *dilution risk* of purchased *corporate exposure* receivables, the value is 75%.

[Note: BCD Annex VII Part 2 point 8(e) to (g)]

- 4.8.26 R Notwithstanding BIPRU 4.4.34R and BIPRU 4.8.25R, for *dilution risk* and *default risk* if a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate for purchased *corporate exposure* receivables may be used.

[Note: BCD Annex VII Part 2 point 9]

Calculation of risk weighted asset amounts: *LGDs*: Retail exposures

- 4.8.27 R For *dilution risk* of purchased *retail exposure* receivables an *LGD* value of 75% must be used. If a *firm* can decompose its *EL* estimates for *dilution risk* of purchased receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate may be used.

[Note: BCD Annex VII Part 2 point 21]

Calculation of risk weighted asset amounts: Exposure value

- 4.8.28 R The *exposure* value for the calculation of *risk weighted exposure amounts* of purchased receivables must be the outstanding amount minus the capital requirements for *dilution risk* prior to *credit risk mitigation*.

[Note: BCD Annex VII Part 3 point 6]

- 4.8.29 R (1) The *exposure* value for the items in (2) must be calculated as the committed but undrawn amount multiplied by a *conversion factor*.
- (2) For undrawn purchase commitments for revolving purchased receivables that are unconditionally cancellable or that effectively provide for automatic cancellation at any time by the *firm* without prior notice, a *conversion factor* of 0% applies. To apply a *conversion factor* of 0%, a *firm* must actively monitor the financial condition of the obligor, and its internal control systems must enable it immediately to detect a deterioration in the credit quality of the obligor.

[Note: BCD Annex VII Part 3 point 9 (c)]

Calculation of expected loss amounts

- 4.8.30 R The *expected loss* amounts for *dilution risk* of purchased receivables must be calculated according to the following formula:

expected loss (EL) = PD × LGD; and

expected loss amount = EL × exposure value.

[**Note:** *BCD* Article 88(5) and Annex VII Part 1 point 35]

4.9 The IRB approach: Securitisation, non-credit obligations assets and CIUs

Application

4.9.1 R *BIPRU 4.9* applies with respect to *securitisation exposures, non credit-obligation assets and exposures to CIUs*.

Securitisation exposures

4.9.2 R The following must be calculated in accordance with *BIPRU 9* (Securitisation):

(1) *risk-weighted exposure amounts* for *securitised exposures* and for *exposures* belonging to the *IRB exposure class* referred to in *BIPRU 4.3.2R(6)* (securitisation positions); and

(2) the *expected loss* amounts for *securitised exposures*.

[**Note:** *BCD* Article 87(10) and Article 88(3)]

Provision of credit protection

4.9.3 R Where a *firm* provides credit protection for a number of *exposures* under terms that the n^{th} default among the *exposures* shall trigger payment and that this credit event shall terminate the contract, if the product has an external credit assessment from an *eligible ECAI* the *risk weights* set out in *BIPRU 9* must be applied. If the product is not rated by an *eligible ECAI*, the *risk weights* of the *exposures* included in the basket must be aggregated, excluding $n-1$ *exposures* where the sum of the *expected loss* amount multiplied by 12.5 and the *risk weighted exposure amount* must not exceed the nominal amount of the protection provided by the credit derivative multiplied by 12.5. The $n-1$ *exposures* to be excluded from the aggregation must be determined on the basis that they must include those *exposures* each of which produces a lower *risk weighted exposure amount* than the *risk weighted exposure amount* of any of the *exposures* included in the aggregation.

[**Note:** *BCD* Annex VII Part 1 point 9]

Non credit obligation assets: Introduction

4.9.4 *BIPRU 4.9.5R-BIPRU 4.9.10R* apply to *non credit-obligation assets*.

Non credit obligation assets: Inclusion of residual value of leases

4.9.5 The *non credit obligation assets IRB exposure class* includes the residual value of leased properties, if not included in the lease *exposure* as defined in *BIPRU 4.4.75R*.

[**Note:** *BCD* Article 86(8)]

Non credit obligation assets: Risk weighted exposure amount

- 4.9.6 R The *risk weighted exposure amounts* must be calculated according to the formula:

Risk-weighted exposure amount = 100% * *exposure* value except for when the *exposure* is a residual value in which case it should be provisioned for each year and will be calculated as follows:

$1/t * 100\% * \textit{exposure value}$;

where t is the number of years of the lease contract term.

[**Note:** BCD Annex VII Part 1 point 27]

- 4.9.7 G t should be an integer number reflecting the nearest number of whole years of the lease remaining and should decrease as the lease matures so that the discounted value steps up gradually from a small value to 100% as the end of the lease approaches.

- 4.9.8 R Where a *firm* has full recourse in respect of purchased receivables for *default* risk and for *dilution risk*, to the seller of the purchased receivables, *BIPRU* 4.8.21R and *BIPRU* 4.8.30R need not be applied. The *exposure* may instead be treated as a collateralised *exposure*.

[**Note:** BCD Article 87(2) (part)]

Non credit obligation assets: Exposure value

- 4.9.9 R The *exposure* value of *non credit-obligation assets* must be the value presented in the financial statements.

[**Note:** BCD Annex VII Part 3 point 13]

Non credit obligation assets: Expected loss amounts

- 4.9.10 R For *non credit-obligation assets* the *expected loss* amount must be zero.

[**Note:** BCD Article 88(4)]

Collective investment undertakings

- 4.9.11 R (1) Where *exposures* in the form of a CIU meet the criteria set out in *BIPRU* 3.4.121R to *BIPRU* 3.4.122R (Conditions for look through treatment under the standardised approach) and the *firm* is aware of all of the underlying *exposures* of the CIU, the *firm* must look through to those underlying *exposures* in order to calculate *risk weighted exposure amounts* and *expected loss* amounts in accordance with the methods set out in *BIPRU* 4.

- (2) Where (1) applies but a *firm* does not meet the conditions for using the methods set out in *BIPRU 4*, *risk weighted exposure amounts* and *expected loss* amounts must be calculated in accordance with the following approaches.
- (3) For *equity exposures* the approach set out in *BIPRU 4.7.9R-BIPRU 4.7.12R* (Simple risk weights) must be used. If, for those purposes, the *firm* is unable to differentiate between private equity, exchange-traded and other *equity exposures*, it must treat the *exposures* concerned as other *equity exposures*.
- (4) For all other underlying *exposures*, the *standardised approach* must be used, subject to the following modifications:
 - (a) the *exposures* are assigned to the appropriate *exposure* class under the *standardised approach* and attributed the *risk weight* of the *credit quality step* immediately above the *credit quality step* that would normally be assigned to the *exposure*; and
 - (b) *exposures* assigned to the higher *credit quality steps*, to which a *risk weight* of 150% would normally be attributed, are assigned a *risk weight* of 200%.

[Note: *BCD* Article 87(11)]

- 4.9.12 R (1) Where *exposures* in the form of a *CIU* do not meet the criteria set out in *BIPRU 3.4.121R* to *BIPRU 3.4.122R* (Conditions for look through treatment under the standardised approach) or the *firm* is not aware of all of the underlying *exposures* of the *CIU*, a *firm* must look through to the underlying *exposures* and calculate *risk weighted exposure amounts* and *expected loss* amounts in accordance with the approach set out in *BIPRU 4.7.9R - BIPRU 4.7.12R* (Simple risk weights). If, for those purposes, the *firm* is unable to differentiate between private equity, exchange-traded and other *equity exposures*, it must treat the *exposures* concerned as other *equity exposures*. For these purposes, non-equity *exposures* must be assigned to one of the classes (private equity, exchange traded equity or other equity) set out in *BIPRU 4.7.9R* (Simple risk weight approach) and unknown *exposures* must be assigned to the other equity class.
- (2) Alternatively to the method described in (1), a *firm* may calculate itself or rely on a third party to calculate and report the average *risk weighted exposure amounts* based on the *CIU's* underlying *exposures* and calculated in accordance with the remaining provisions of this *rule*, provided that the correctness of the calculation and the report is adequately ensured.

- (3) For *exposures* belonging to the *equity exposure IRB exposure class*, the approach set out in *BIPRU 4.7.9R - BIPRU 4.7.12R* (Simple risk weight approach) must be used. If, for those purposes, a *firm* is unable to differentiate between private equity, exchange-traded and other *equity exposures*, it must treat the *exposures* concerned as other *equity exposures*.
- (4) For all other underlying *exposures*, the *standardised approach* must be used, subject to the following modifications:
 - (a) the *exposures* must be assigned to the appropriate *exposure class* under the *standardised approach* and attributed the *risk weight* of the *credit quality step* immediately above the *credit quality step* that would normally be assigned to the *exposure*; and
 - (b) *exposures* assigned to the higher *credit quality steps*, to which a *risk weight* of 150% would normally be attributed, must be assigned a *risk weight* of 200%.

[Note: BCD Article 87(12)]

- 4.9.13 G For the purposes of *BIPRU 4.9.12R(1)*, in the case of non-equity *exposures* a *firm* should look at the risk profile of the underlying *exposures* and map these to an equivalent equity *risk weight*. For example, if the underlying *exposures* are exchange-traded, the *risk weight* of exchange-traded *equity exposures* will apply. If the underlying *exposures* are unknown, the *risk weight* of the other equity class will apply. Only under exceptional circumstances would supervisors expect to see non-equity *exposures* mapped to the diversified private equity *risk weight*.
- 4.9.14 G For the purposes of *BIPRU 4.9.12R(2)*, a *firm* should ensure that any third party relied on for the calculations and report possesses the necessary competence and experience to ensure that the calculations and report are correct.
- 4.9.15 R The *expected loss* amounts for *exposures* referred to in *BIPRU 4.9.11R-BIPRU 4.9.12R* must be calculated in accordance with the methods set out in *BIPRU 4.4.61R* (Calculation of expected loss for sovereigns, institutions and corporates), *BIPRU 4.5.12R- BIPRU 4.5.14R* (Calculation of expected loss for specialised lending), *BIPRU 4.6.47R- BIPRU 4.6.48R* (Calculation of expected loss for retail exposures), *BIPRU 4.7.12R, BIPRU 4.7.17R* and *BIPRU 4.7.26R* (Calculation of expected loss for equity exposures) and *BIPRU 4.8.30R* (Dilution risk of purchased receivables).

[Note: BCD Article 88(6)]

4.10 The IRB approach: Credit risk mitigation

Application

4.10.1 G *BIPRU 4.10 applies to all exposures treated under the IRB approach.*

Purpose

4.10.2 G *BIPRU 4.10 sets out modifications to BIPRU 5 (Credit risk mitigation) for those exposures for which the IRB approach is being used.*

General

4.10.3 R *A firm using the IRB approach, but not using its own estimates of LGD and conversion factors, may recognise credit risk mitigation in accordance with BIPRU 5 as modified by BIPRU 4.10 in the calculation of risk weighted exposure amounts for the purposes of the calculation of the credit risk capital component or as relevant expected loss amounts for the purposes of the calculation in GENPRU 2.2.191R to GENPRU 2.2.193R or GENPRU 2.2.236R.*

[**Note:** *BCD Article 91 (as it applies to the IRB approach)*]

4.10.4 R (1) *Where the requirements of BIPRU 5.2.2R – BIPRU 5.2.8R are met the calculation of risk weighted exposure amounts, and, as relevant, expected loss amounts, may be modified in accordance with BIPRU 5 as modified by BIPRU 4.10.*

(2) *No exposure in respect of which credit risk mitigation is obtained must produce a higher risk weighted exposure amount or expected loss amount than an otherwise identical exposure in respect of which there is no credit risk mitigation.*

(3) *Where the risk weighted exposure amount already takes account of credit protection under the IRB approach the calculation of the credit protection must not be further recognised under BIPRU 5 or BIPRU 4.10.*

(4) *Subject to BIPRU 5.2.8R (Maturity mismatches), BIPRU 5.2.9R (Combinations of credit risk mitigation in the standardised approach) and BIPRU 5.7.27R to BIPRU 5.7.28R (Basket credit risk mitigation techniques), where the CRM eligibility conditions and the CRM minimum requirements are satisfied, the calculation of risk weighted exposure amounts and expected loss amounts under the IRB approach may be modified in accordance with the provisions of BIPRU 5 and BIPRU 4.10 that deal with calculating the effects of credit risk mitigation.*

[**Note:** *BCD Article 93 and Annex VIII Part 3 point 1(as they apply to the IRB approach)*]

Eligibility of funded credit protection: General

- 4.10.5 R In addition to the collateral set out in *BIPRU 5.3.1R* to *BIPRU 5.3.2R*, *BIPRU 5.4.1R* to *BIPRU 5.4.8R* and *BIPRU 5.6.1R* (Eligibility of funded credit protection) the provisions of *BIPRU 4.10.6R* - *BIPRU 4.10.12R* (Eligibility of real estate collateral), *BIPRU 4.10.14R* (Eligibility: receivables), *BIPRU 4.10.16R* (Eligibility: other physical collateral), and *BIPRU 4.10.19R* (Eligibility: leasing), apply where a firm calculates *risk weighted exposure amounts* and *expected loss* amounts under the *IRB approach*.

[Note: *BCD Annex VIII Part 1 point 12*]

Real estate collateral: Types of eligible collateral: General

- 4.10.6 R (1) Residential real estate property which is or will be occupied or let by the owner or the beneficial owner in the case of personal investment companies and commercial real estate property, that is offices and other commercial premises, may be recognised as eligible collateral where the conditions set out in the remaining provisions of this paragraph are met.
- (2) The value of the property must not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro-economic factors affect both the value of the property and the performance of the borrower.
- (3) The risk of the borrower must not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility must not materially depend on any cash flow generated by the underlying property serving as collateral.

[Note: *BCD Annex VIII Part 1 point 13*]

- 4.10.7 R The condition in *BIPRU 4.10.6R(3)* does not apply to *exposures* secured by residential real estate property situated within the *United Kingdom*.

[Note: *BCD Annex VIII Part 1 point 16 (part)*]

- 4.10.8 G (1) Under paragraph 16 of Part 1 of Annex VIII of the *Banking Consolidation Directive*, a *competent authority* may only disapply the condition in *BIPRU 4.10.6R(3)* if the *competent authority* has evidence that the relevant market is well-developed and long-established with loss-rates which are sufficiently low to justify such action.
- (2) If the evidence were to change so that the action was no longer justified the *FSA* would expect to revoke *BIPRU 4.10.7R*.

- 4.10.9 R (1) The condition in *BIPRU 4.10.6R(3)* does not apply for *exposures* secured by residential real estate property situated within the territory of another *EEA State*.

(2) However (1) only applies if and to the extent that the *CRD implementation measures* for that *EEA State* in relation to the *IRB approach* implement the option set out in paragraph 16 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (waiver for residential real estate property) with respect to residential real estate property situated within that *EEA State*. Therefore (1) does not apply if the eligibility to use this treatment under those measures ceases as contemplated under paragraph 18 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (suspension of alternative treatment).

[**Note:** *BCD* Annex VIII Part 1 point 16 (part)]

- 4.10.10 R (1) The condition in *BIPRU* 4.10.6R(3) does not apply for commercial real estate property situated within the territory of another *EEA State*.
- (2) However (1) only applies if and to the extent that the *CRD implementation measures* for that *EEA State* in relation to the *IRB approach* implement the option set out in paragraph 17 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (waiver for commercial real estate property) with respect to commercial real estate property situated within that *EEA State*. Therefore (1) does not apply if the eligibility to use this treatment under those measures ceases as contemplated under paragraph 18 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (suspension of alternative treatment).

[**Note:** *BCD* Annex VIII Part 1 point 19]

Real estate collateral: Types of eligible collateral: Finnish housing legislation

- 4.10.11 R A *firm* may also recognise as eligible collateral shares in Finnish residential housing companies operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation in respect of residential property which is or will be occupied or let by the owner, as residential real estate collateral, provided that the conditions in *BIPRU* 4.10.6R are met.

[**Note:** *BCD* Annex VIII Part 1 point 14]

- 4.10.12 R A *firm* may also recognise as eligible collateral shares in Finnish housing companies operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation as commercial real estate collateral, provided that the conditions in *BIPRU* 4.10.6R are met.

[**Note:** *BCD* Annex VIII Part 1 point 15]

Real estate collateral: Minimum requirements for recognition

- 4.10.13 R For the recognition of real estate collateral: the minimum requirements in *BIPRU* 3.4.64R - *BIPRU* 3.4.73R must be met with the following adjustments:
- (1) those provisions apply to all real estate collateral eligible under *BIPRU* 4.10; and

- (2) the minimum frequency of valuation as referred to in *BIPRU* 3.4.66R is once every year for commercial real estate.

[**Note:** *BCD* Annex VIII Part 2 point 8 (as it applies to the *IRB approach*)]

Receivables: Types of eligible collateral

- 4.10.14 R Amounts receivable linked to a commercial transaction or transactions with an original maturity of less than or equal to one year may be recognised as eligible collateral. Eligible receivables do not include those associated with *securitisations*, sub-participations or credit derivatives or amounts owed by affiliated parties.

[**Note:** *BCD* Annex VIII Part 1 point 20]

Receivables: Minimum requirements for recognition

- 4.10.15 R
- (1) For the recognition of receivables as collateral the requirements in this paragraph must be met.
 - (2) The legal mechanism by which the collateral is provided must be robust and effective and ensure that the lender has clear rights over the proceeds.
 - (3) A *firm* must take all steps necessary to fulfil local requirements in respect of the enforceability of security interests. There must be a framework which allows the lender to have a first priority claim over the collateral subject to any claims of preferential creditors provided for in applicable insolvency law.
 - (4) A *firm* must have conducted sufficient legal review confirming the enforceability of the collateral arrangements in all relevant jurisdictions.
 - (5) The collateral arrangements must be properly documented, with a clear and robust procedure for the timely collection of collateral. A *firm's* procedures must ensure that any legal conditions required for declaring the default of the borrower and timely collection of collateral are observed. In the event of the obligor's financial distress or default, a *firm* must have legal authority to sell or assign the receivables to other parties without consent of the receivables obligors.
 - (6) A *firm* must have a sound process for determining the credit risk associated with the receivables. Such a process must include, among other things, analyses of the obligor's business and industry and the types of customers with whom the obligor does business. Where a *firm* relies on the obligor to ascertain the credit risk of the customers, the *firm* must review the obligor's credit practices to ascertain their soundness and credibility.

- (7) The margin between the amount of the *exposure* and the value of the receivables must reflect all appropriate factors, including the cost of collection, concentration within the receivables pool pledged by an individual obligor, and potential concentration risk within the *firm's* total *exposures* beyond that controlled by the *firm's* general methodology. A *firm* must maintain a continuous monitoring process appropriate to the receivables. Additionally, compliance with loan covenants, environmental restrictions, and other legal requirements must be reviewed on a regular basis.
- (8) The receivables pledged by an obligor must be diversified and not be unduly correlated with the obligor. Where there is material positive correlation, the attendant risks must be taken into account in the setting of margins for the collateral pool as a whole.
- (9) Receivables from affiliates of the obligor (including *subsidiary undertakings* and employees) must not be recognised as risk mitigants.
- (10) A *firm* must have a documented process for collecting receivable payments in distressed situations. The requisite facilities for collection must be in place, even when the *firm* normally looks to the obligor for collections.

[Note: BCD Annex VIII Part 2 point 9]

Other physical collateral: Types of eligible collateral

- 4.10.16 R A *firm* may recognise as eligible collateral a physical item of a type other than those types indicated in BIPRU 4.10.6R - BIPRU 4.10.12R (Eligibility of real estate collateral) if its *IRB permission* provides that the *firm* may treat collateral of that type as eligible and if the *firm* is able to demonstrate the following:
- (1) the existence of liquid markets for disposal of the collateral in an expeditious and economically efficient manner;
 - (2) the existence of well-established, publicly available market prices for the collateral; and
 - (3) there is no evidence that the net prices it receives when collateral is realised deviates significantly from the market prices referred to in (b).

[Note: BCD Annex VIII Part 1 point 21]

- 4.10.17 G If a *firm* wishes to recognise other types of collateral in accordance with BIPRU 4.10.16R (whether as part of its application for an *IRB permission* or under a variation of its *IRB permission*) it should demonstrate to the *FSA* how the criteria in BIPRU 4.10.16R(1) – (3) have been met with respect to that type of collateral.

Other physical collateral: Minimum requirements for recognition

- 4.10.18 R
- (1) If a type of other physical collateral referred to in BIRU 4.10.16R is potentially eligible under a *firm's IRB permission* a *firm* must only recognise it as eligible if the minimum requirements in (2) to (10) are met.
 - (2) The collateral arrangement must be legally effective and enforceable in all relevant jurisdictions and must enable the *firm* to realise the value of the property within a reasonable timeframe.
 - (3) With the sole exception of permissible prior claims referred to in *BIPRU* 4.10.15R(3), only first liens on, or charges over, collateral must be permissible. As such, the *firm* must have priority over all other lenders to the realised proceeds of the collateral.
 - (4) The value of the property must be monitored on a frequent basis and at a minimum once every year. More frequent monitoring must be carried out where the market is subject to significant changes in conditions.
 - (5) The loan agreement (or other agreement documenting the *exposure*) must include detailed descriptions of the collateral plus detailed specifications of the manner and frequency of revaluation.
 - (6) The types of physical collateral accepted by the *firm* and policies and practices in respect of the appropriate amount of each type of collateral relative to the *exposure* amount must be clearly documented in internal credit policies and procedures available for examination.
 - (7) The *firm's* credit policies with regard to the transaction structure must address appropriate collateral requirements relative to the *exposure* amount, the ability to liquidate the collateral readily, the ability to establish objectively a price or market value, the frequency with which the value can readily be obtained (including a professional appraisal or valuation), and the volatility or a proxy of the volatility of the value of the collateral.
 - (8) Both initial valuation and revaluation must take fully into account any deterioration or obsolescence of the collateral. Particular attention must be paid in valuation and revaluation to the effects of the passage of time on fashion- or date-sensitive collateral.
 - (9) The *firm* must have the right to inspect the property physically. It must have policies and procedures addressing its exercise of the right to physical inspection.
 - (10) The *firm* must have procedures to monitor that the property taken as protection is adequately insured against damage.

[Note: *BCD* Annex VIII Part 2 point 10]

Leasing: Types of eligible transactions and conditions of eligibility

- 4.10.19 R (1) Where the requirements set out in this paragraph are met, *exposures* arising from transactions whereby a *firm* leases property to a third party must be treated the same as loans collateralised by the type of property leased.
- (2) For the *exposures* arising from leasing transactions to be treated as collateralised by the type of property leased, the following conditions must be met:
- (a) the conditions set out or referred to in *BIPRU* 4.10.13R or *BIPRU* 4.10.18R as appropriate for the recognition as collateral of the type of property leased are met;
 - (b) there is robust risk management on the part of the lessor with respect to the use to which the leased asset is put, its age, and planned duration of its use, including appropriate monitoring of the value of the security;
 - (c) there is in place a robust legal framework establishing the lessor's legal ownership of the asset and its ability to exercise its rights as owner in a timely fashion; and
 - (d) where this has not already been ascertained in calculating the *LGD* level, the difference between value of the unamortised amount and the market value of the security must not be so large as to overstate the *credit risk mitigation* attributed to the leased assets.

[**Note:** *BCD* Annex VIII Part 1 point 22 and Part 2 point 11]

Calculating risk-weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Introduction

- 4.10.20 R *BIPRU* 4.10.21R - *BIPRU* 4.10.37R and *BIPRU* 4.10.49R set out how the calculation of *risk weighted exposure amounts* and *expected loss* amounts under *BIPRU* 4.1 - *BIPRU* 4.9 may be modified to take into account *credit risk mitigation* that meets the *CRM eligibility conditions* and the *CRM minimum requirements*.

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Valuation: Receivables

- 4.10.21 R The value of receivables for the purpose of calculating the effect of *credit risk mitigation* must be the amount receivable.

[**Note:** *BCD* Annex VIII Part 3 point 66]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Valuation: Other physical collateral

- 4.10.22 R Physical collateral recognised as eligible as described in *BIPRU* 4.10.16R must be valued for the purpose of calculating the effect of *credit risk mitigation* at its market value. Market value is the estimated amount for which the property would exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction.

[Note: BCD Annex VIII Part 3 point 67]

Calculating risk weighted exposure amounts and expected loss amounts: General treatment

- 4.10.23 R *BIPRU* 4.10.24R-*BIPRU* 4.10.29R apply to collateral in the form of real estate collateral, receivables, other physical collateral and leasing permitted by *BIPRU* 4.10 and *exposures* secured by such collateral.
- 4.10.24 R LGD* (the effective *loss given default*) calculated as set out in *BIPRU* 4.10.25R-*BIPRU* 4.10.28R must be taken as the *LG*D.

[Note: BCD Annex VIII Part 3 point 68]

- 4.10.25 R Where the ratio of the value of the collateral (C) to the *exposure* value (E) is below a threshold level of C* (the required minimum collateralisation level for the *exposure*) as laid down in *BIPRU* 4.10.28R, LGD* must be the *LG*D laid down in the other sections of *BIPRU* 4 for uncollateralised *exposures* to the counterparty.

[Note: BCD Annex VIII Part 3 point 69]

- 4.10.26 R Where the ratio of the value of the collateral to the *exposure* value exceeds a second, higher threshold level of C** (i.e. the required level of collateralisation to receive full *LG*D recognition) as laid down in *BIPRU* 4.10.28R, LGD* must be that prescribed in that table.

[Note: BCD Annex VIII Part 3 point 70]

- 4.10.27 R Where the required level of collateralisation C** is not achieved in respect of the *exposure* as a whole, the *exposure* must be considered to be two *exposures* – that part in respect of which the required level of collateralisation C** is achieved and the remainder.

[Note: BCD Annex VIII Part 3 point 71]

4.10.28

Table: Minimum LGD for secured portion of exposures
This table belongs to BIPRU 4.10.24R - BIPRU 4.10.27R

	LGD* for senior claims or contingent claims	LGD* for subordinated claims or contingent claims	Required minimum collateralisation level of the exposure (C*)	Required minimum collateralisation level of the exposure (C**)
Receivables	35%	65%	0%	125%
Residential real estate/commercial real estate	35%	65%	30%	140%
Other collateral	40%	70%	30%	140%

[Note: BCD Annex VIII Part 3 point 72 (part)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Alternative treatment for real estate collateral

- 4.10.29 R (1) A firm may apply the treatment in paragraph 74 of Part 3 of Annex VIII of the *Banking Consolidation Directive* (50% risk weight for exposures secured by real estate) in respect of *exposures* collateralised by:
- (a) residential real estate property; or
 - (b) commercial real estate property;
- located in the territory of another *EEA State*.
- (2) However (1)(a) or (1)(b) only applies if the *CRD implementing measures* for that *EEA State* with respect to the *IRB approach* have implemented the option set out in the provision of the *Banking Consolidation Directive* referred to in (1) with respect to the relevant category of real estate property situated within that *EEA State*.
- (3) The use of the treatment in (1) with respect to property in another *EEA State* must be subject to the same conditions as apply under the relevant *CRD implementation measures* for that *EEA State*.

[Note: BCD Annex VIII Part 3 point 75]

Calculating risk weighted exposure amounts and expected loss amounts: Mixed pools of collateral

4.10.30 R (1) Where:

- (a) *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach*; and
- (b) an *exposure* is collateralised by both financial collateral and other eligible collateral;

LGD* to be taken as the *LGD* for the purposes of the *IRB approach* must be calculated in accordance with this *rule*.

- (2) A *firm* must subdivide the volatility-adjusted value of the *exposure* (i.e. the value after the application of the volatility adjustment as set out in *BIPRU 5.4.28R* (Volatility adjustments under the financial collateral comprehensive method) into parts each covered by only one type of collateral. That is, the *firm* must divide the *exposure* into the part covered by eligible financial collateral, the part covered by receivables, the parts covered by commercial real estate property collateral and/or residential real estate property collateral, the part covered by other eligible collateral, and the unsecured part, as relevant.
- (3) LGD* for each part of *exposure* must be calculated separately in accordance with the relevant provisions of *BIPRU 5* (Credit risk mitigation) and *BIPRU 4.10*.

[Note: BCD Annex VIII Part 3 points 76 to 78]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Financial collateral simple method

4.10.31 R The *financial collateral simple method* must not be used under the *IRB approach*.

[Note: BCD Annex VIII Part 3 point 24 (part)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Master netting agreements

4.10.32 R (1) This *rule* sets out how the calculations under *BIPRU 5.6.11R* (Using the supervisory volatility adjustments or the own estimates volatility adjustments approaches to master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.

- (2) Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach*, E is the *exposure* value for each separate *exposure* under the agreement referred to in the provisions listed in (1) that would apply in the absence of the credit protection.

[**Note:** BCD Annex VIII Part 3 point 11 (as it applies to the *IRB approach*)]

- 4.10.33 R (1) This *rule* sets out how the calculations under *BIPRU 5.6.24R* (Using the internal models approach to master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.
- (2) Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach* E is the *exposure* value for each separate *exposure* under the agreement referred to in the provisions listed in (1) that would apply in the absence of the credit protection.

[**Note:** BCD Annex VIII Part 3 point 20 (as it applies to the *IRB approach*)]

- 4.10.34 R (1) This *rule* sets out how the calculations under *BIPRU 5.6.29R* (Calculating risk-weighted exposure amounts and expected loss amounts for master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.
- (2) E* must be taken as the *exposure* value of the *exposure* to the counterparty arising from the transactions subject to the master netting agreement referred to in the provisions listed in (1) for the purposes of *BIPRU 4*.

[**Note:** BCD Annex VIII Part 3 point 23 (as it applies to the *IRB approach*)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Financial collateral comprehensive method

- 4.10.35 R (1) This *rule* sets out how the calculations under *BIPRU 5.4.28R* (Calculating adjusted values under the financial collateral comprehensive method) must be modified under the *IRB approach*.
- (2) E as referred to in the provisions listed in (1) is the *exposure* value as would be determined under the *IRB approach* if the *exposure* was not collateralised. For this purpose, where a *firm* calculates *risk weighted exposure amounts* under the *IRB approach*, the *exposure* value of the items listed in *BIPRU 4.4.37R* to *BIPRU 4.4.39R*, *BIPRU 4.4.45R*, *BIPRU 4.6.44R(3)* and *BIPRU 4.8.29R* must be calculated using a *conversion factor* of 100% rather than the *conversion factors* or percentages indicated in those provisions.
- 4.10.36 R (1) This *rule* sets out the calculation of risk weighted exposure amounts and expected loss amounts under the financial collateral comprehensive method for a *firm* using the *IRB approach*.

- (2) LGD* (the effective *loss given default*) calculated as set out in this paragraph must be taken as the *LGD* for the purposes of *BIPRU 4*.
- (3) $LGD^* = LGD \times (E^*/E)$ where:
- (a) *LGD* is the *loss given default* that would apply to the *exposure* under the *IRB approach* if the *exposure* was not collateralised;
 - (b) *E* is the *exposure* value as calculated under *BIPRU 5.X [provision implementing paragraph 34 of Part 3 of Annex VIII of the Banking Consolidation Directive]* ; and
 - (c) *E** is as calculated under *BIPRU 5.X [provision implementing paragraph 34 of Part 3 of Annex VIII of the Banking Consolidation Directive]* (Calculation of adjusted values under the financial collateral comprehensive method).

[Note: *BCD Annex VIII Part 3 point 61*]

- 4.10.37 R (1) In the case of a *firm* using the *IRB approach* to calculate *risk weighted exposure amounts* and *expected loss* amounts, the *persons* in (2) are added to the list in *BIPRU 5.4.64R* (Definition of core market participant).
- (2) The *persons* referred to in (1) are other financial companies (including insurance companies) *exposures* to which do not have a credit assessment by an *eligible ECAI* and are internally rated as having a *probability of default* equivalent to that associated with the credit assessments of *ECAs* that are associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures* under the *standardised approach* to credit risk.

[Note: *BCD Annex VIII Part 3 point 58(h)* (as it applies to the *IRB approach*)]

Unfunded credit protection: Eligibility of providers

- 4.10.38 R (1) In the case of a *firm* using the *IRB approach* in calculating *risk weighted exposure amounts* and *expected loss* amounts, the *persons* in (2) are added to the list in *BIPRU 5.7.1R* (List of eligible providers of unfunded credit protection).
- (2) The *persons* referred to in (1) are other corporate entities, including *parent undertakings*, *subsidiary undertakings* and affiliate corporate entities of the *firm*, that do not have a credit assessment by an *eligible ECAI* and are internally rated as having a *probability of default* equivalent to that associated with the credit assessments of *ECAs* that are associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures* under the *standardised approach* to credit risk.

[Note: *BCD Annex VIII Part 1 point 26(g)(ii)*]

4.10.39 R Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach*, to be eligible a guarantor must be internally rated by a *firm* in accordance with the provisions of the *minimum IRB standards*.

[Note: BCD Annex VIII Part 1 point 27]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Introduction

4.10.40 R *BIPRU 4.10.41R* to *BIPRU 4.10.48R* set out the minimum requirements:

(1) assessing the effect of guarantees and credit derivatives for:

(a) *exposures* in the *sovereign, institutional and corporate IRB exposure class* where the *advanced IRB approach* is being used to calculate *LGDs*; and

(b) *retail exposures*; and

(2) additionally, in the case of *retail exposure* guarantees, to the assignment of *exposures* to grades or pools, and the estimation of *PD*.

[Note: BCD Annex VII Part 4 point 97]

4.10.41 R The requirements in *BIPRU 4.10.40R(2)* and *BIPRU 4.10.42R -BIPRU 4.10.48R* do not apply for guarantees provided by *institutions* and central governments and central banks if the *firm* has received approval under *BIPRU 4.2* to apply the *standardised approach* for *exposures* to such entities. In this case the requirements of *BIPRU 5* (credit risk mitigation) apply.

[Note: BCD Annex VII Part 4 point 96]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Eligible guarantors and guarantees

4.10.42 R A *firm* must have clearly specified criteria for the types of guarantors it recognises for the calculation of *risk weighted exposure amounts*.

[Note: Annex VII Part 4 point 98]

4.10.43 R For recognised guarantors the same requirements as for obligors as set out in *BIPRU 4.3.43R - BIPRU 4.3.48R* (Assignment to grades and pools), *BIPRU 4.4.11R - BIPRU 4.4.18R* and *BIPRU 4.4.51R* (Assignment of exposures and rating systems), *BIPRU 4.5.6R* (Assignment of exposures) and *BIPRU 4.6.11R* and *BIPRU 4.6.14R* (Assignment of exposures and rating systems) apply.

[Note: BCD Annex VII Part 4 point 99]

- 4.10.44 R The guarantee must be evidenced in writing, non-cancellable on the part of the guarantor, in force until the obligation is satisfied in full (to the extent of the amount and tenor of the guarantee) and legally enforceable against the guarantor in a jurisdiction where the guarantor has assets to attach and enforce a judgement. Guarantees prescribing conditions under which the guarantor may not be obliged to perform (conditional guarantees) may be recognised if the *IRB permission* permits this. A *firm* must (in the case of a *firm* with an *IRB permission* that permits conditional guarantees) be able to demonstrate to the *FSA* that the assignment criteria adequately address any potential reduction in the risk mitigation effect.

[Note: *BCD Annex VII Part 4 point 100*]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Adjustment criteria

- 4.10.45 R A *firm* must have clearly specified criteria for adjusting grades, pools or *LGD* estimates, and in the case of *retail exposures* and eligible purchased receivables, the process of allocating *exposures* to grades or pools, to reflect the impact of guarantees for the calculation of *risk weighted exposure amounts*. These criteria must comply with the minimum requirements referred to in *BIPRU 4.10.43*.

[Note: *BCD Annex VII Part 4 point 101*]

- 4.10.46 R The criteria in *BIPRU 4.10.45R* must be plausible and intuitive. They must address the guarantor's ability and willingness to perform under the guarantee, the likely timing of any payments from the guarantor, the degree to which the guarantor's ability to perform under the guarantee is correlated with the obligor's ability to repay, and the extent to which residual risk to the obligor remains.

[Note: *BCD Annex VII Part 4 point 102*]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Credit derivatives

- 4.10.47 R The minimum requirements for guarantees set out in *BIPRU 4.10* also apply for single name credit derivatives. In relation to a mismatch between the underlying obligation and the reference obligation of the credit derivative or the obligation used for determining whether a credit event has occurred the requirements set out under *BIPRU 5.7.14R* (Mismatches and credit derivatives) apply. For *retail exposures* and eligible purchased receivables, this paragraph applies to the process of allocating *exposures* to grades or pools.

[Note: *BCD Annex VII Part 4 point 103*]

- 4.10.48 R The criteria applied by *BIPRU 4.10.47R* must address the payout structure of the credit derivative and conservatively assess the impact this has on the level and timing of recoveries. A *firm* must consider the extent to which other forms of residual risk remain.

[Note: *BCD Annex VII Part 4 point 104*]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Calculating risk weighted exposure amounts and expected loss amounts

- 4.10.49 R (1) This *rule* relates to the calculation of *risk-weighted exposure amounts* and *expected loss* amounts in the case of *unfunded credit protection*.
- (2) *BIPRU 5.7.21R* (Tranching) applies for the purpose in (1).
- (3) The provisions in (4) replace those in *BIPRU 5.7.22R* to *BIPRU 5.7.25R* (Calculating risk weighted exposure amounts under the standardised approach in the case of unfunded credit protection).
- (4) For the covered portion of the *exposure* (based on the adjusted value of the credit protection G_A), the *PD* for the purposes of *BIPRU 4* may be the *PD* of the protection provider, or a *PD* between that of the borrower and that of the guarantor if a full substitution is deemed not to be warranted. In the case of subordinated *exposures* and non-subordinated unfunded protection, the *LGD* to be applied for the purposes of *BIPRU 4* may be that associated with senior claims.
- (5) For any uncovered portion of the *exposure* the *PD* must be that of the borrower and the *LGD* must be that of the underlying *exposure*.
- (6) G_A is the value of G^* as calculated under *BIPRU 5.7.17R* (Valuation of unfunded credit protection) further adjusted for any maturity mismatch as laid down in *BIPRU 4.10.51R* (Maturity mismatches).

[**Note:** *BCD Annex VIII Part 3* points 90 to 92]

Maturity mismatches

- 4.10.50 R In addition to *BIPRU 5.8.2R*, where there is a maturity mismatch the credit protection must not be recognised where the *exposure* is a short term *exposure* specified in the *firm's IRB permission* as being subject to a one-day floor rather than a one-year floor in respect of the maturity value (M) under *BIPRU 4.4.68R*.

[**Note:** *BCD Annex VIII Part 4* point 2(b)]

- 4.10.51 R G_A as calculated under *BIPRU 5.8.11R* is then taken as the value of the protection for the purposes of calculating the effects of *unfunded credit protection* under the *IRB approach*.

[**Note:** *BCD Annex VIII Part 4* point 8 (part)]

BIPRU 4 Annex 1R Supervisory Slotting Criteria for Specialised Lending

This Annex outlines the criteria that must be used to slot a *specialised lending exposure* into the categories in *BIPRU 4.5.6R*.

This table belongs to *BIPRU 4.5.6R* and must be used in accordance with that rule only for project finance exposures.

Table 1 – Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Market conditions	Few competing suppliers or substantial and durable advantage in location, cost, or technology. Demand is strong and growing	Few competing suppliers or better than average location, cost, or technology but this situation may not last. Demand is strong and stable	Project has no advantage in location, cost, or technology. Demand is adequate and stable	Project has worse than average location, cost, or technology. Demand is weak and declining
Financial ratios (e.g. debt service coverage ratio (DSCR), loan life coverage ratio (LLCR), project life coverage ratio (PLCR), and debt-to-equity ratio)	Strong financial ratios considering the level of project risk; very robust economic assumptions	Strong to acceptable financial ratios considering the level of project risk; robust project economic assumptions	Standard financial ratios considering the level of project risk	Aggressive financial ratios considering the level of project risk

	Strong	Good	Satisfactory	Weak
Stress analysis	The project can meet its financial obligations under sustained, severely stressed economic or sectoral conditions	The project can meet its financial obligations under normal stressed economic or sectoral conditions. The project is only likely to default under severe economic conditions	The project is vulnerable to stresses that are not uncommon through an economic cycle, and may default in a normal downturn	The project is likely to default unless conditions improve soon
<u>Financial structure</u>				
Duration of the credit compared to the duration of the project	Useful life of the project significantly exceeds tenor of the loan	Useful life of the project exceeds tenor of the loan	Useful life of the project exceeds tenor of the loan	Useful life of the project may not exceed tenor of the loan
Amortisation schedule	Amortising debt	Amortising debt	Amortising debt repayments with limited bullet payment	Bullet repayment or amortising debt repayments with high bullet repayment
Political and legal environment				
Political risk, including transfer risk, considering project type and mitigants	Very low exposure; strong mitigation instruments, if needed	Low exposure; satisfactory mitigation instruments, if needed	Moderate exposure; fair mitigation instruments	High exposure; no or weak mitigation instruments
Force majeure risk (war, civil unrest, etc),	Low exposure	Acceptable exposure	Standard protection	Significant risks, not fully mitigated

	Strong	Good	Satisfactory	Weak
Government support and project's importance for the country over the long term	Project of strategic importance for the country (preferably export-oriented). Strong support from Government	Project considered important for the country. Good level of support from Government	Project may not be strategic but brings unquestionable benefits for the country. Support from Government may not be explicit	Project not key to the country. No or weak support from Government
Stability of legal and regulatory environment (risk of change in law)	Favourable and stable regulatory environment over the long term	Favourable and stable regulatory environment over the medium term	Regulatory changes can be predicted with a fair level of certainty	Current or future regulatory issues may affect the project
Acquisition of all necessary supports and approvals for such relief from local content laws	Strong	Satisfactory	Fair	Weak
Enforceability of contracts, collateral and security	Contracts, collateral and security are enforceable	Contracts, collateral and security are enforceable	Contracts, collateral and security are considered enforceable even if certain non-key issues may exist	There are unresolved key issues in respect of actual enforcement of contracts, collateral and security
Transaction characteristics				
Design and technology risk	Fully proven technology and design	Fully proven technology and design	Proven technology and design – start-up issues are mitigated by a strong completion package	Unproven technology and design; technology issues exist and/or complex design

	Strong	Good	Satisfactory	Weak
<u>Construction risk</u>				
Permitting and siting	All permits have been obtained	Some permits are still outstanding but their receipt is considered very likely	Some permits are still outstanding but the permitting process is well defined and they are considered routine	Key permits still need to be obtained and are not considered routine. Significant conditions may be attached
Type of construction contract	Fixed-price date-certain turnkey construction EPC (engineering and procurement contract)	Fixed-price date-certain turnkey construction EPC	Fixed-price date-certain turnkey construction contract with one or several contractors	No or partial fixed-price turnkey contract and/or interfacing issues with multiple contractors
Completion guarantees	Substantial liquidated damages supported by financial substance and/or strong completion guarantee from sponsors with excellent financial standing	Significant liquidated damages supported by financial substance and/or completion guarantee from sponsors with good financial standing	Adequate liquidated damages supported by financial substance and/or completion guarantee from sponsors with good financial standing	Inadequate liquidated damages or not supported by financial substance or weak completion guarantees
Track record and financial strength of contractor in constructing similar projects.	Strong	Good	Satisfactory	Weak

	Strong	Good	Satisfactory	Weak
<u>Operating risk</u> Scope and nature of operations and maintenance (O & M) contracts Operator's expertise, track record, and financial strength	Strong long-term O&M contract, preferably with contractual performance incentives, and/or O&M reserve accounts Very strong, or committed technical assistance of the sponsors	Long-term O&M contract, and/or O&M reserve accounts Strong	Limited O&M contract or O&M reserve account Acceptable	No O&M contract: risk of high operational cost overruns beyond mitigants Limited/weak, or local operator dependent on local authorities
<u>Off-take risk</u> (a) If there is a take-or-pay or fixed-price off-take contract: (b) If there is no take-or-pay or fixed-price off-take contract:	Excellent creditworthiness of off-taker; strong termination clauses; tenor of contract comfortably exceeds the maturity of the debt Project produces essential services or a commodity sold widely on a world market; output can readily be absorbed at projected prices even at lower than historic market growth rates	Good creditworthiness of off-taker; strong termination clauses; tenor of contract exceeds the maturity of the debt Project produces essential services or a commodity sold widely on a regional market that will absorb it at projected prices at historical growth rates	Acceptable financial standing of off-taker; normal termination clauses; tenor of contract generally matches the maturity of the debt Commodity is sold on a limited market that may absorb it only at lower than projected prices	Weak off-taker; weak termination clauses; tenor of contract does not exceed the maturity of the debt Project output is demanded by only one or a few buyers or is not generally sold on an organised market

	Strong	Good	Satisfactory	Weak
<u>Supply risk</u>				
Price, volume and transportation risk of feed-stocks; supplier's track record and financial strength	Long-term supply contract with supplier of excellent financial standing	Long-term supply contract with supplier of good financial standing	Long-term supply contract with supplier of good financial standing – a degree of price risk may remain	Short-term supply contract or long-term supply contract with financially weak supplier – a degree of price risk definitely remains
Reserve risks (e.g. natural resource development)	Independently audited, proven and developed reserves well in excess of requirements over lifetime of the project	Independently audited, proven and developed reserves in excess of requirements over lifetime of the project	Proven reserves can supply the project adequately through the maturity of the debt	Project relies to some extent on potential and undeveloped reserves
Strength of Sponsor				
Sponsor's track record, financial strength, and country/sector experience	Strong sponsor with excellent track record and high financial standing	Good sponsor with satisfactory track record and good financial standing	Adequate sponsor with adequate track record and good financial standing	Weak sponsor with no or questionable track record and/or financial weaknesses
Sponsor support, as evidenced by equity, ownership clause and incentive to inject additional cash if necessary	Strong. Project is highly strategic for the sponsor (core business – long-term strategy)	Good. Project is strategic for the sponsor (core business – long-term strategy)	Acceptable. Project is considered important for the sponsor (core business)	Limited. Project is not key to sponsor's long-term strategy or core business

	Strong	Good	Satisfactory	Weak
Security Package				
Assignment of contracts and accounts	Fully comprehensive	Comprehensive	Acceptable	Weak
Pledge of assets, taking into account quality, value and liquidity of assets	First perfected security interest in all project assets, contracts, permits and accounts necessary to run the project	Perfected security interest in all project assets, contracts, permits and accounts necessary to run the project	Acceptable security interest in all project assets, contracts, permits and accounts necessary to run the project	Little security or collateral for lenders; weak negative pledge clause
Lender's control over cash flow (e.g. cash sweeps, independent escrow accounts)	Strong	Satisfactory	Fair	Weak
Strength of the covenant package (mandatory prepayments, payment deferrals, payment cascade, dividend restrictions...)	Covenant package is strong for this type of project	Covenant package is satisfactory for this type of project	Covenant package is fair for this type of project	Covenant package is insufficient for this type of project
Reserve funds (debt service, O&M, renewal and replacement, unforeseen events, etc)	Project may issue no additional debt	Project may issue extremely limited additional debt	Project may issue limited additional debt	Project may issue unlimited additional debt
	Longer than average coverage period, all reserve funds fully funded in cash or letters of credit from highly rated bank	Average coverage period, all reserve funds fully funded	Average coverage period, all reserve funds fully funded	Shorter than average coverage period, reserve funds funded from operating cash flows

This table belongs to *BIPRU* 4.5.6R and must be used in accordance with that rule only for income-producing real estate exposures

Table 2 – Supervisory Rating Grades for Income-Producing Real Estate Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Market conditions	The supply and demand for the project's type and location are currently in equilibrium. The number of competitive properties coming to market is equal or lower than forecasted demand	The supply and demand for the project's type and location are currently in equilibrium. The number of competitive properties coming to market is roughly equal to forecasted demand	Market conditions are roughly in equilibrium. Competitive properties are coming on the market and others are in the planning stages. The project's design and capabilities may not be state of the art compared to new projects	Market conditions are weak. It is uncertain when conditions will improve and return to equilibrium. The project is losing tenants at lease expiration. New lease terms are less favourable compared to those expiring
Financial ratios and advance rate	The property's debt service coverage ratio (DSCR) is considered strong (DSCR is not relevant for the construction phase) and its loan to value ratio (LTV) is considered low given its property type. Where a secondary market exists, the transaction is underwritten to market standards	The DSCR (not relevant for development real estate) and LTV are satisfactory. Where a secondary market exists, the transaction is underwritten to market standards	The property's DSCR has deteriorated and its value has fallen, increasing its LTV	The property's DSCR has deteriorated significantly and its LTV is well above underwriting standards for new loans

	Strong	Good	Satisfactory	Weak
Stress analysis	The property's resources, contingencies and liability structure allow it to meet its financial obligations during a period of severe financial stress (e.g. interest rates, economic growth)	The property can meet its financial obligations under a sustained period of financial stress (e.g. interest rates, economic growth). The property is likely to default only under severe economic conditions	During an economic downturn, the property would suffer a decline in revenue that would limit its ability to fund capital expenditures and significantly increase the risk of default	The property's financial condition is strained and is likely to default unless conditions improve in the near term
Cash-flow predictability				
(a) For complete and stabilised property.	The property's leases are long-term with creditworthy tenants and their maturity dates are scattered. The property has a track record of tenant retention upon lease expiration. Its vacancy rate is low. Expenses (maintenance, insurance, security, and property taxes) are predictable	Most of the property's leases are long-term, with tenants that range in creditworthiness. The property experiences a normal level of tenant turnover upon lease expiration. Its vacancy rate is low. Expenses are predictable	Most of the property's leases are medium rather than long-term with tenants that range in creditworthiness. The property experiences a moderate level of tenant turnover upon lease expiration. Its vacancy rate is moderate. Expenses are relatively predictable but vary in relation to revenue	The property's leases are of various terms with tenants that range in creditworthiness. The property experiences a very high level of tenant turnover upon lease expiration. Its vacancy rate is high. Significant expenses are incurred preparing space for new tenants
(b) For complete but not stabilised property	Leasing activity meets or exceeds projections. The project should achieve stabilisation in the near future	Leasing activity meets or exceeds projections. The project should achieve stabilisation in the near future	Most leasing activity is within projections; however, stabilisation will not occur for some time	Market rents do not meet expectations. Despite achieving target occupancy rate, cash flow coverage is tight due to disappointing revenue

	Strong	Good	Satisfactory	Weak
(c) For construction phase	The property is entirely pre-leased through the tenor of the loan or pre-sold to an investment grade tenant or buyer, or the bank has a binding commitment for take-out financing from an investment grade lender	The property is entirely pre-leased or pre-sold to a creditworthy tenant or buyer, or the bank has a binding commitment for permanent financing from a creditworthy lender	Leasing activity is within projections but the building may not be pre-leased and there may not exist a take-out financing. The bank may be the permanent lender	The property is deteriorating due to cost overruns, market deterioration, tenant cancellations or other factors. There may be a dispute with the party providing the permanent financing
Asset characteristics				
Location	Property is located in highly desirable location that is convenient to services that tenants desire	Property is located in desirable location that is convenient to services that tenants desire	The property location lacks a competitive advantage	The property's location, configuration, design and maintenance have contributed to the property's difficulties
Design and condition	Property is favoured due to its design, configuration, and maintenance, and is highly competitive with new properties	Property is appropriate in terms of its design, configuration and maintenance. The property's design and capabilities are competitive with new properties	Property is adequate in terms of its configuration, design and maintenance	Weaknesses exist in the property's configuration, design or maintenance
Property is under construction	Construction budget is conservative and technical hazards are limited. Contractors are highly qualified	Construction budget is conservative and technical hazards are limited. Contractors are highly qualified	Construction budget is adequate and contractors are ordinarily qualified	Project is over budget or unrealistic given its technical hazards. Contractors may be under qualified

	Strong	Good	Satisfactory	Weak
Strength of Sponsor/Developer				
Financial capacity and willingness to support the property.	The sponsor/developer made a substantial cash contribution to the construction or purchase of the property. The sponsor/developer has substantial resources and limited direct and contingent liabilities. The sponsor/developer's properties are diversified geographically and by property type	The sponsor/developer made a material cash contribution to the construction or purchase of the property. The sponsor/developer's financial condition allows it to support the property in the event of a cash flow shortfall. The sponsor/developer's properties are located in several geographic regions	The sponsor/developer's contribution may be immaterial or non-cash. The sponsor/developer is average to below average in financial resources	The sponsor/developer lacks capacity or willingness to support the property
Reputation and track record with similar properties.	Experienced management and high sponsors' quality. Strong reputation and lengthy and successful record with similar properties	Appropriate management and sponsors' quality. The sponsor or management has a successful record with similar properties	Moderate management and sponsors' quality. Management or sponsor track record does not raise serious concerns	Ineffective management and substandard sponsors' quality. Management and sponsor difficulties have contributed to difficulties in managing properties in the past
Relationships with relevant real estate actors	Strong relationships with leading actors such as leasing agents	Proven relationships with leading actors such as leasing agents	Adequate relationships with leasing agents and other parties providing important real estate services	Poor relationships with leasing agents and/or other parties providing important real estate services

	Strong	Good	Satisfactory	Weak
Security Package				
Nature of lien	Perfected first lien ¹	Perfected first lien ¹	Perfected first lien ¹	Ability of lender to foreclose is constrained
Assignment of rents (for projects leased to long-term tenants)	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to remit rents directly to the lender, such as a current rent roll and copies of the project's leases	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to the tenants to remit rents directly to the lender, such as current rent roll and copies of the project's leases	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to the tenants to remit rents directly to the lender, such as current rent roll and copies of the project's leases	The lender has not obtained an assignment of the leases or has not maintained the information necessary to readily provide notice to the building's tenants
Quality of the insurance coverage	Appropriate	Appropriate	Appropriate	Substandard

¹ Lenders in some markets extensively use loan structures that include junior liens. Junior liens may be indicative of this level of risk if the total LTV inclusive of all senior positions does not exceed a typical first loan LTV.

This table belongs to *BIPRU* 4.5.6R and must be used in accordance with that rule only for object finance exposures

Table 3 – Supervisory Rating Grades for Object Finance Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Market conditions	Demand is strong and growing, strong entry barriers, low sensitivity to changes in technology and economic outlook	Demand is strong and stable. Some entry barriers, some sensitivity to changes in technology and economic outlook	Demand is adequate and stable, limited entry barriers, significant sensitivity to changes in technology and economic outlook	Demand is weak and declining, vulnerable to changes in technology and economic outlook, highly uncertain environment
Financial ratios (debt service coverage ratio and loan-to-value ratio)	Strong financial ratios considering the type of asset. Very robust economic assumptions	Strong / acceptable financial ratios considering the type of asset. Robust project economic assumptions	Standard financial ratios for the asset type	Aggressive financial ratios considering the type of asset
Stress analysis	Stable long-term revenues, capable of withstanding severely stressed conditions through an economic cycle	Satisfactory short-term revenues. Loan can withstand some financial adversity. Default is only likely under severe economic conditions	Uncertain short-term revenues. Cash flows are vulnerable to stresses that are not uncommon through an economic cycle. The loan may default in a normal downturn	Revenues subject to strong uncertainties; even in normal economic conditions the asset may default, unless conditions improve
Market liquidity	Market is structured on a worldwide basis; assets are highly liquid	Market is worldwide or regional; assets are relatively liquid	Market is regional with limited prospects in the short term, implying lower liquidity	Local market and/or poor visibility. Low or no liquidity, particularly on niche markets

	Strong	Good	Satisfactory	Weak
Political and legal environment				
Political risk, including transfer risk	Very low; strong mitigation instruments, if needed	Low; satisfactory mitigation instruments, if needed	Moderate; fair mitigation instruments	High; no or weak mitigation instruments
Legal and regulatory risks	Jurisdiction is favourable to repossession and enforcement of contracts	Jurisdiction is favourable to repossession and enforcement of contracts	Jurisdiction is generally favourable to repossession and enforcement of contracts, even if repossession might be long and/or difficult	Poor or unstable legal and regulatory environment. Jurisdiction may make repossession and enforcement of contracts lengthy or impossible
Transaction characteristics				
Financing term compared to the economic life of the asset	Full payout profile/minimum balloon. No grace period	Balloon more significant, but still at satisfactory levels	Important balloon with potentially grace periods	Repayment in fine or high balloon
Operating risk				
Permits / licensing	All permits have been obtained; asset meets current and foreseeable safety regulations	All permits obtained or in the process of being obtained; asset meets current and foreseeable safety regulations	Most permits obtained or in process of being obtained, outstanding ones considered routine, asset meets current safety regulations	Problems in obtaining all required permits, part of the planned configuration and/or planned operations might need to be revised

	Strong	Good	Satisfactory	Weak
Scope and nature of O & M contracts	Strong long-term O&M contract, preferably with contractual performance incentives, and/or O&M reserve accounts (if needed)	Long-term O&M contract, and/or O&M reserve accounts (if needed)	Limited O&M contract or O&M reserve account (if needed)	No O&M contract: risk of high operational cost overruns beyond mitigants
Operator's financial strength, track record in managing the asset type and capability to re-market asset when it comes off-lease	Excellent track record and strong re-marketing capability	Satisfactory track record and re-marketing capability	Weak or short track record and uncertain re-marketing capability	No or unknown track record and inability to re-market the asset
Asset characteristics				
Configuration, size, design and maintenance (i.e. age, size for a plane) compared to other assets on the same market	Strong advantage in design and maintenance. Configuration is standard such that the object meets a liquid market	Above average design and maintenance. Standard configuration, maybe with very limited exceptions - such that the object meets a liquid market	Average design and maintenance. Configuration is somewhat specific, and thus might cause a narrower market for the object	Below average design and maintenance. Asset is near the end of its economic life. Configuration is very specific; the market for the object is very narrow
Resale value	Current resale value is well above debt value	Resale value is moderately above debt value	Resale value is slightly above debt value	Resale value is below debt value
Sensitivity of the asset value and liquidity to economic cycles	Asset value and liquidity are relatively insensitive to economic cycles	Asset value and liquidity are sensitive to economic cycles	Asset value and liquidity are quite sensitive to economic cycles	Asset value and liquidity are highly sensitive to economic cycles

	Strong	Good	Satisfactory	Weak
Strength of sponsor				
Operator's financial strength, track record in managing the asset type and capability to re-market asset when it comes off-lease	Excellent track record and strong re-marketing capability	Satisfactory track record and re-marketing capability	Weak or short track record and uncertain re-marketing capability	No or unknown track record and inability to re-market the asset
Sponsors' track record and financial strength	Sponsors with excellent track record and high financial standing	Sponsors with good track record and good financial standing	Sponsors with adequate track record and good financial standing	Sponsors with no or questionable track record and/or financial weaknesses
Security Package				
Asset control	Legal documentation provides the lender effective control (e.g. a first perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	Legal documentation provides the lender effective control (e.g. a perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	Legal documentation provides the lender effective control (e.g. a perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	The contract provides little security to the lender and leaves room to some risk of losing control on the asset
Rights and means at the lender's disposal to monitor the location and condition of the asset	The lender is able to monitor the location and condition of the asset, at any time and place (regular reports, possibility to lead inspections)	The lender is able to monitor the location and condition of the asset, almost at any time and place	The lender is able to monitor the location and condition of the asset, almost at any time and place	The lender is able to monitor the location and condition of the asset are limited

	Strong	Good	Satisfactory	Weak
Insurance against damages	Strong insurance coverage including collateral damages with top quality insurance companies	Satisfactory insurance coverage (not including collateral damages) with good quality insurance companies	Fair insurance coverage (not including collateral damages) with acceptable quality insurance companies	Weak insurance coverage (not including collateral damages) or with weak quality insurance companies

This table belongs to *BIPRU* 4.5.6R and must be used in accordance with that rule only for commodities finance exposures.

Table 4 – Supervisory Rating Grades for Commodities Finance Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Degree of over-collateralisation of trade	Strong	Good	Satisfactory	Weak
Political and legal environment				
Country risk	No country risk	Limited exposure to country risk (in particular, offshore location of reserves in an emerging country)	Exposure to country risk (in particular, offshore location of reserves in an emerging country)	Strong exposure to country risk (in particular, inland reserves in an emerging country)
Mitigation of country risks	Very strong mitigation: Strong offshore mechanisms Strategic commodity 1 st class buyer	Strong mitigation: Offshore mechanisms Strategic commodity Strong buyer	Acceptable mitigation: Offshore mechanisms Less strategic commodity Acceptable buyer	Only partial mitigation: No offshore mechanisms Non-strategic commodity Weak buyer

	Strong	Good	Satisfactory	Weak
Asset characteristics				
Liquidity and susceptibility to damage	Commodity is quoted and can be hedged through futures or OTC instruments. Commodity is not susceptible to damage	Commodity is quoted and can be hedged through OTC instruments. Commodity is not susceptible to damage	Commodity is not quoted but is liquid. There is uncertainty about the possibility of hedging. Commodity is not susceptible to damage	Commodity is not quoted. Liquidity is limited given the size and depth of the market. No appropriate hedging instruments. Commodity is susceptible to damage
Strength of sponsor				
Financial strength of trader	Very strong, relative to trading philosophy and risks	Strong	Adequate	Weak
Track record, including ability to manage the logistic process	Extensive experience with the type of transaction in question. Strong record of operating success and cost efficiency	Sufficient experience with the type of transaction in question. Above average record of operating success and cost efficiency	Limited experience with the type of transaction in question. Average record of operating success and cost efficiency	Limited or uncertain track record in general. Volatile costs and profits
Trading controls and hedging policies	Strong standards for counterparty selection, hedging, and monitoring	Adequate standards for counterparty selection, hedging, and monitoring	Past deals have experienced no or minor problems	Trader has experienced significant losses on past deals
Quality of financial disclosure	Excellent	Good	Satisfactory	Financial disclosure contains some uncertainties or is insufficient

	Strong	Good	Satisfactory	Weak
Security package				
Asset control	First perfected security interest provides the lender legal control of the assets at any time if needed	First perfected security interest provides the lender legal control of the assets at any time if needed	At some point in the process, there is a rupture in the control of the assets by the lender. The rupture is mitigated by knowledge of the trade process or a third party undertaking as the case may be	Contract leaves room for some risk of losing control over the assets. Recovery could be jeopardised
Insurance against damages	Strong insurance coverage including collateral damages with top quality insurance companies	Satisfactory insurance coverage (not including collateral damages) with good quality insurance companies	Fair insurance coverage (not including collateral damages) with acceptable quality insurance companies	Weak insurance coverage (not including collateral damages) or with weak quality insurance companies

- 5 Credit risk mitigation
- 5.1 Application and purpose
 - Application
 - 5.1.1 R *BIPRU 5 applies to a BIPRU firm.*
 - Purpose
 - 5.1.2 G *BIPRU 5 implements, in part, Articles 78(1) and 91 to 93 and Annex VIII of the Banking Consolidation Directive.*
 - 5.1.3 G *BIPRU 5 sets out the principles for the recognition of credit risk mitigation in the calculation of risk weighted exposure amounts for the purposes of the calculation of the credit risk capital component.*
 - 5.1.4 G *BIPRU 4.10 implements those parts of Articles 91 to 93 and Annex VIII of the Banking Consolidation Directive which are specific to the recognition of credit risk mitigation by firms using the IRB approach, and modifies the application of the provisions in BIPRU 5 to those firms.*
 - 5.1.5 G *In certain cases provisions specific to the IRB approach have been kept in BIPRU 5 in order to reduce duplication. The main examples are certain references to expected loss and references in the IRB approach in the provisions in BIPRU 5.7 about basket CRM techniques.*

- 5.2 The central principles of credit risk mitigation
- 5.2.1 R A *firm* using the *standardised approach* may recognise *credit risk mitigation* in accordance with *BIPRU 5* in the calculation of *risk weighted exposure amounts* for the purposes of the calculation of the *credit risk capital component*.
- [Note: *BCD* Article 91]
- 5.2.2 R The technique used to provide the credit protection together with the actions and steps taken and procedures and policies implemented by a *lending firm* must be such as to result in credit protection arrangements which are legally effective and enforceable in all relevant jurisdictions.
- [Note: *BCD* Article 92(1)]
- 5.2.3 R (1) A *firm* must not recognise credit protection as eligible until it has conducted sufficient legal review confirming that the credit protection arrangements are legally effective and enforceable in all relevant jurisdictions in accordance with *BIPRU 5.2.2.R*.
- (2) A *firm* must re-conduct legal reviews as necessary to ensure continuing enforceability and effectiveness.
- 5.2.4 R A *lending firm* must take all appropriate steps to ensure the effectiveness of the credit protection arrangement and to address related risks.
- [Note: *BCD* Article 92(2)]
- Funded credit protection
- 5.2.5 R In the case of *funded credit protection*:
- (1) to be eligible for recognition the assets relied upon must be sufficiently liquid and their value over time sufficiently stable to provide appropriate certainty as to the credit protection achieved having regard to the approach used to calculate *risk weighted exposure amounts* and to the degree of recognition allowed; eligibility is limited to the assets set out in the *CRM eligibility conditions*; and
- (2) the *lending firm* must have the right to liquidate or retain, in a timely manner, the assets from which the protection derives in the event of the default, insolvency or bankruptcy of the obligor - or other credit event set out in the transaction documentation - and, where applicable, of the custodian holding the collateral; the degree of correlation between the value of the assets relied upon for protection and the credit quality of the obligor must not be undue.

[Note: BCD Article 92(3) and (4)]

Treatment of credit linked notes

- 5.2.6 G A credit linked note should be treated, to the extent of its cash funding, as *funded credit protection*. Therefore the conditions in *BIPRU 5* regulating the eligibility of protection providers for *unfunded credit protection* do not apply. However the other provisions about the requirements for the recognition of *unfunded credit protection* do apply.

Unfunded credit protection

- 5.2.7 R In the case of *unfunded credit protection*:
- (1) to be eligible for recognition the party giving the undertaking must be sufficiently reliable, and the protection agreement legally effective and enforceable in the relevant jurisdictions, to provide appropriate certainty as to the credit protection achieved having regard to the approach used to calculate *risk weighted exposure amounts* and to the degree of recognition allowed; and
 - (2) eligibility is limited to the protection providers and types of protection agreement set out in the *CRM eligibility conditions*.

[Note: BCD Article 92(5)]

Minimum requirements

- 5.2.8 R The minimum requirements set out in *BIPRU 5* must be complied with.

[Note: BCD Article 92(6)]

- 5.2.9 R A *firm* must be able to satisfy the *FSA* that it has adequate risk management processes to control those risks to which the *firm* may be exposed as a result of carrying out *credit risk mitigation*.

[Note: BCD Annex VIII Part 2 point 1]

- 5.2.10 R Notwithstanding the presence of *credit risk mitigation* taken into account for the purposes of calculating *risk-weighted exposure amounts* and as relevant *expected loss* amounts, a *firm* must continue to undertake full credit risk assessment of the underlying *exposure* and must be in a position to demonstrate to the *FSA* the fulfilment of this requirement. In the case of *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* the underlying *exposure* must, for the purposes of this *rule* only, be deemed to be the net amount of the *exposure*.

[Note: BCD Annex VIII Part 2 point 2]

Calculating the effects of the credit risk mitigation

- 5.2.11 R Where the requirements of *BIPRU 5.2.2R* to *BIPRU 5.2.8R* are met the calculation of *risk-weighted exposure amounts*, may be modified in accordance with *BIPRU 5*.
- [Note: *BCD Article 93(1)*]
- 5.2.12 R No *exposure* in respect of which *credit risk mitigation* is obtained may produce a higher *risk-weighted exposure amount* than an otherwise identical *exposure* in respect of which there is no *credit risk mitigation*.
- [Note: *BCD Article 93(2)*]
- 5.2.13 R Where the *risk-weighted exposure amount* already takes account of credit protection under the *standardised approach* the calculation of the credit protection must not be further recognised under *BIPRU 5*.
- [Note: *BCD Article 93(3)*]
- 5.2.14 R Subject to *BIPRU 5.8R*, *BIPRU 5.9R* and *BIPRU 5.7.27R* to *BIPRU 5.7.28R*, where the *CRM eligibility conditions* and the *CRM minimum requirements* are satisfied, the calculation of *risk weighted exposure amounts* under the *standardised approach* may be modified in accordance with the provisions of *BIPRU 5*.
- [Note: *BCD Annex VIII Part 3 point 1*]
- 5.2.15 R Cash, *securities* or *commodities* purchased, borrowed or received under a *repurchase transaction* or *securities or commodities lending or borrowing transaction* must be treated as collateral.
- [Note: *BCD Annex VIII Part 3 point 2*]

5.3 On balance sheet netting

Eligibility

- 5.3.1 R A *firm* may recognise as eligible the on-balance sheet netting of mutual claims between the *firm* and its counterparty.

[Note: BCD Annex VIII Part 1 point 3]

- 5.3.2 R Without prejudice to BIPRU 5.6.1R, eligibility is limited to reciprocal cash balances between a *firm* and a counterparty. Only loans and deposits of the *lending firm* may be subject to a modification of *risk weighted exposure amounts* and, as relevant, *expected loss* amounts as a result of an on-balance sheet netting agreement.

[Note: BCD Annex VIII Part 1 point 4]

Minimum requirements

- 5.3.3 R For on-balance sheet netting agreements - other than master netting agreements covering *repurchase transactions, securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* - to be recognised for the purposes of BIPRU 5 the following conditions must be satisfied:

- (1) they must be legally effective and enforceable in all relevant jurisdictions, including in the event of the insolvency or bankruptcy of a counterparty;
- (2) the *firm* must be able to determine at any time those assets and liabilities that are subject to the on-balance sheet netting agreement;
- (3) the *firm* must monitor and control the risks associated with the termination of the credit protection; and
- (4) the *firm* must monitor and control the relevant *exposures* on a net basis.

[Note: BCD Annex VIII Part 2 point 3]

Calculating the effects of credit risk mitigation

- 5.3.4 R Loans and deposits with a *lending firm* subject to on-balance sheet netting are to be treated as cash collateral.

[Note: BCD Annex VIII Part 3 point 4]

5.4 Financial collateral

Eligibility

- 5.4.1 R (1) Where the *credit risk mitigation* used relies on the right of a *firm* to liquidate or retain assets, eligibility depends upon whether *risk-weighted exposure amounts*, and, as relevant, *expected loss* amounts, are calculated under the *standardised approach* or the *IRB approach*.
- (2) Eligibility further depends upon whether the *financial collateral simple method* is used or the *financial collateral comprehensive method*.
- (3) In relation to *repurchase transactions* and *securities or commodities lending or borrowing transactions*, eligibility also depends upon whether the transaction is booked in the *non-trading book* or the *trading book*.

[Note: BCD Annex VIII Part 1 point 6]

- 5.4.2 R The following financial items may be recognised as eligible collateral under all approaches and methods:
- (1) cash on deposit with, or *cash assimilated instruments* held by, the *lending firm*;
- (2) *debt securities* issued by central governments or *central banks* which *securities* have a credit assessment by an *eligible ECAI* or export credit agency recognised as eligible for the purposes of the *standardised approach*, which is associated with *credit quality step 4* or above under the *rules* for the *risk weighting* of *exposures* to central governments and *central banks* under the *standardised approach*;
- (3) *debt securities* issued by *institutions* which *securities* have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures* to a *credit institution* under the *standardised approach*;
- (4) *debt securities* issued by other entities which *securities* have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures* to *corporates* under the *standardised approach*;
- (5) *debt securities* with a short-term credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *short term exposures* under the *standardised approach*;

- (6) equities or *convertible* bonds that are included in a main index; and
- (7) gold.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.3 R For the purposes of BIPRU 5.4.2R(2), ‘*debt securities* issued by central governments or *central banks*’ include –

- (1) *debt securities* issued by regional governments or local authorities *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *public sector entities* which are treated as *exposures* to central governments in accordance with BIPRU 3.4.24R;
- (3) *debt securities* issued by *multilateral development banks* to which a 0% *risk weight* is assigned under the *standardised approach*; and
- (4) *debt securities* issued by *international organisations* which are assigned a 0% *risk weight* under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.4 R For the purposes of BIPRU 5.4.2R(3), ‘*debt securities* issued by *institutions*’ include:

- (1) *debt securities* issued by regional governments or local authorities other than those *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *public sector entities*, *exposures* to which are treated as *exposures* to a *credit institution* under the *standardised approach*;
- (3) *debt securities* issued by *multilateral development banks* other than those to which a 0% *risk weight* is assigned under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.5 R *Debt securities* issued by *institutions* which *securities* do not have a credit assessment by an *eligible ECAI* may be recognised as eligible collateral if they fulfil the following criteria:

- (1) they are listed on a *recognised investment exchange* or a *designated investment exchange*;

- (2) they qualify as senior debt;
- (3) all other rated issues by the issuing *institution* of the same seniority have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures to institutions* or short term *exposures* under the *standardised approach*;
- (4) the *lending firm* has no information to suggest that the issue would justify a credit assessment below that indicated in (3); and
- (5) the *firm* can demonstrate to the *FSA* that the market liquidity of the instrument is sufficient for these purposes.

[**Note:** *BCD Annex VIII Part 1 point 8*]

- 5.4.6 R (1) Units in *CIUs* may be recognised as eligible collateral if the following conditions are satisfied:
- (a) they have a daily public price quote; and
 - (b) the *CIU* is limited to investing in instruments that are eligible for recognition under *BIPRU 5.4.2R* to *BIPRU 5.4.5R*.
- (2) The use (or potential use) by a *CIU* of derivative instruments to hedge permitted investments shall not prevent units in that *CIU* from being eligible.

[**Note:** *BCD Annex VIII Part 1 point 9*]

- 5.4.7 R In relation to *BIPRU 5.4.2R(2)* to (5):
- (1) where a *security* has two credit assessments by *eligible ECAs*, the less favourable assessment must be deemed to apply;
 - (2) in cases where a *security* has more than two credit assessments by *eligible ECAs*:
 - (a) the two most favourable assessments must be deemed to apply; or
 - (b) if the two most favourable credit assessments are different, the less favourable of the two must be deemed to apply.

[**Note:** *BCD Annex VIII Part 1 point 10*]

- 5.4.8 R (1) In addition to the collateral set out in *BIPRU 5.4.2R* to *BIPRU 5.4.7R*, where a *firm* uses the *financial collateral comprehensive method*, the following financial items may be recognised as eligible collateral:
- (a) equities or *convertible* bonds not included in a main index but traded on a *recognised investment exchange* or a *designated investment exchange*;
 - (b) units in *CIUs* if the following conditions are met:
 - (i) they have a daily public price quote; and
 - (ii) the *CIU* is limited to investing in instruments that are eligible for recognition under *BIPRU 5.4.2R* to *BIPRU 5.4.5R* and the items mentioned in (a).
- (2) The use (or potential use) by a *CIU* of derivative instruments to hedge permitted investments shall not prevent units in that *CIU* from being eligible.

[**Note:** *BCD Annex VIII Part 1 point 11*]

Minimum requirements

- 5.4.9 R For the recognition of financial collateral and gold, the following conditions must be met:
- (1) the low correlation conditions in *BIPRU 5.4.10R*
 - (2) the legal certainty conditions in *BIPRU 5.4.11R*; and
 - (3) the operational requirements in *BIPRU 5.4.12R*.

[**Note:** *BCD Annex VIII Part 2 point 6*]

- 5.4.10 R The low correlation conditions referred to in *BIPRU 5.4.9R(1)* are as follows:
- (1) (a) the credit quality of the obligor and the value of the collateral must not have a material positive correlation; and
 - (b) *securities* issued by the obligor, or any related *group* entity are not eligible.

- (2) notwithstanding (1)(b), the obligor's own issues of *covered bonds* falling within the terms of *BIPRU 3.4.107R* to *BIPRU 3.4.109R* may be recognised as collateral for *repurchase transactions*, provided that (1)(a) is complied with.

[**Note:** *BCD Annex VIII Part 2 point 6(a)*]

5.4.11 R The legal certainty conditions referred to in *BIPRU 5.4.9R(2)* are as follows:

- (1) a *firm* must fulfil any contractual and statutory requirements in respect of, and take all steps necessary to ensure, the enforceability of the collateral arrangements under the law applicable to its interest in the collateral;
- (2) in accordance with the general principle in *BIPRU 5.2.2R*, a *firm* must have conducted sufficient legal review confirming the enforceability of the collateral arrangements in all relevant jurisdictions; and
- (3) a *firm* must re-conduct such review as necessary to ensure continuing enforceability.

[**Note:** *BCD Annex VIII Part 2 point 6(b)*]

5.4.12 R The operational requirements referred to in *BIPRU 5.4.9R(3)* are as follows:

- (1) the collateral arrangements must be properly documented, with a clear and robust procedure for the timely liquidation of collateral;
- (2) a *firm* must employ robust procedures and processes to control risks arising from the use of collateral – including risks of failed or reduced credit protection, valuation risks, risks associated with the termination of the credit protection, concentration risk arising from the use of collateral and the interaction with the *firm*'s overall risk profile;
- (3) a *firm* must have documented policies and practices concerning the types and amounts of collateral accepted;
- (4) a *firm* must calculate the market value of the collateral, and revalue it accordingly, with a minimum frequency of once every six months and whenever the *firm* has reason to believe that there has occurred a significant decrease in its market value; and
- (5) where the collateral is held by a third party, a *firm* must take reasonable steps to ensure that the third party segregates the collateral from its own assets.

[**Note:** *BCD Annex VIII Part 2 point 6(c)*]

- 5.4.13 R In addition to the requirements set out in *BIPRU 5.4.9R*, for the recognition of financial collateral under the *financial collateral simple method* the residual maturity of the protection must be at least as long as the residual maturity of the *exposure*.

[**Note:** *BCD Annex VIII Part 2 point 7*]

The financial collateral simple method: General

- 5.4.14 R *BIPRU 5.4.17R - BIPRU 5.4.22R* set out the calculation of the effects of *credit risk mitigation* under the *financial collateral simple method*.

- 5.4.15 R The *financial collateral simple method* is available only where *risk weighted exposure amounts* are calculated under the *standardised approach* to credit risk.

[**Note:** *BCD Annex VIII Part 3 point 24 (part)*]

- 5.4.16 R A *firm* must not use both the *financial collateral simple method* and the *financial collateral comprehensive method*.

[**Note:** *BCD Annex VIII Part 3 point 24 (part)*]

The financial collateral simple method: Valuation

- 5.4.17 R Under the *financial collateral simple method*, recognised financial collateral is assigned a value equal to its market value as determined in accordance with *BIPRU 5.4.12R*.

[**Note:** *BCD Annex VIII Part 3 point 25*]

The financial collateral simple method: Calculating risk-weighted exposure amounts

- 5.4.18 R The *risk weight* that would be assigned under the *standardised approach* to credit risk if the *lending firm* had a direct *exposure* to the collateral instrument must be assigned to those portions of claims collateralised by the market value of recognised collateral. The *risk weight* of the collateralised portion must be a minimum of 20% except as specified in *BIPRU 5.4.19R* to *BIPRU 5.4.21R*. The remainder of the *exposure* receives the *risk weight* that would be applied to an unsecured *exposure* to the counterparty under the *standardised approach*.

[**Note:** *BCD Annex VIII Part 3 point 26*]

The financial collateral simple method: Repurchase transactions and securities lending or borrowing transactions

- 5.4.19 R A *risk weight* of 0% must be assigned to the collateralised portion of the *exposure* arising from transactions which fulfil the criteria enumerated in *BIPRU 5.4.62R* or *BIPRU 5.4.65R*. If the counterparty to the transaction is not a *core market participant* a *risk weight* of 10% must be assigned.

[**Note:** *BCD Annex VIII Part 3 point 27*]

The financial collateral simple method: financial derivative instruments subject to daily mark-to-market

- 5.4.20 R A *risk weight* of 0% must, to the extent of the collateralisation, be assigned to the *exposure* values determined under *BIPRU 13* for *financial derivative instruments* and subject to daily marking-to-market, collateralised by cash or *cash-assimilated instruments* where there is no currency mismatch. A *risk weight* of 10% must be assigned to the extent of the collateralisation to the *exposure* values of such transactions collateralised by *debt securities* issued by central governments or *central banks* which are assigned a 0% *risk weight* under the *standardised approach*.

[**Note:** *BCD Annex VIII Part 3 point 28 (part)*]

- 5.4.21 R A 0% *risk weight* may be assigned where the *exposure* and the collateral are denominated in the same currency, and either:

- (1) the collateral is cash on deposit or a *cash assimilated instrument*; or
- (2) the collateral is in the form of *debt securities* issued by central governments or *central banks* eligible for a 0% *risk weight* under the *standardised approach*, and its market value has been discounted by 20%.

[**Note:** *BCD Annex VIII Part 3 point 29*]

- 5.4.22 R For the purposes of *BIPRU 5.4.20R* and *BIPRU 5.4.21R* '*debt securities* issued by central governments or *central banks*' must include:

- (1) *debt securities* issued by regional governments or local authorities *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *multilateral development banks* to which a 0% *risk weight* is assigned under or by virtue of the *standardised approach*; and
- (3) *debt securities* issued by *international organisations* which are assigned a 0% *risk weight* under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 28 (part)]

The financial collateral comprehensive method: General

5.4.23 R *BIPRU 5.4.24R - BIPRU 5.4.66R* set out the calculation of the effects of *credit risk mitigation* under the *financial collateral comprehensive method*.

5.4.24 R In valuing financial collateral for the purposes of the *financial collateral comprehensive method*, volatility adjustments must be applied to the market value of collateral, as set out in *BIPRU 5.4.30R* to *BIPRU 5.4.65R*, in order to take account of price volatility.

[Note: BCD Annex VIII Part 3 point 30]

5.4.25 R Subject to the treatment for currency mismatches in the case of *financial derivative instruments* set out in *BIPRU 5.4.26*, where collateral is denominated in a currency that differs from that in which the underlying *exposure* is denominated, an adjustment reflecting currency volatility must be added to the volatility adjustment appropriate to the collateral as set out in *BIPRU 5.4.30R* to *BIPRU 5.4.65R*.

[Note: BCD Annex VIII Part 3 point 31]

5.4.26 R In the case of *financial derivative instruments* covered by netting agreements recognised under *BIPRU 13*, a volatility adjustment reflecting currency volatility must be applied when there is a mismatch between the collateral currency and the settlement currency. Even in the case where multiple currencies are involved in the transactions covered by the netting agreement, only a single volatility adjustment may be applied.

[Note: BCD Annex VIII Part 3 point 32]

5.4.27 R In the case of a *firm* using the *financial collateral comprehensive method*, where an *exposure* takes the form of securities or *commodities* sold, posted or lent under a *repurchase transaction* or under a *securities or commodities lending or borrowing transaction*, and *margin lending transactions* the *exposure* value must be increased by the volatility adjustment appropriate to such securities or *commodities* as prescribed in *BIPRU 5.4.30R* to *BIPRU 5.4.65R*.

[Note: BCD Article 78(1), third sentence]

The financial collateral comprehensive method: Calculating adjusted values

- 5.4.28 R (1) The volatility-adjusted value of the collateral to be taken into account is calculated as follows in the case of all transactions except those transactions subject to recognised master netting agreements to which the provisions set out in *BIPRU 5.6.5R* to *BIPRU 5.6.29R* are to be applied:

$$C_{VA} = C \times (1 - H_C - H_{FX})$$

- (2) The volatility-adjusted value of the *exposure* to be taken into account is calculated as follows:

$$E_{VA} = E \times (1 + H_E), \text{ and in the case of } \textit{financial derivative instruments} \\ E_{VA} = E.$$

- (3) The fully adjusted value of the *exposure*, taking into account both volatility and the risk-mitigating effects of collateral is calculated as follows:

$$E^* = \max \{0, [E_{VA} - C_{VAM}]\}$$

Where:

- (a) E is the *exposure* value as would be determined under the *standardised approach* if the *exposure* was not collateralised.
 - (b) E_{VA} is the volatility-adjusted *exposure* amount.
 - (c) C_{VA} is the volatility-adjusted value of the collateral.
 - (d) C_{VAM} is C_{VA} further adjusted for any maturity mismatch in accordance with the provisions of *BIPRU 5.8*.
 - (e) H_E is the volatility adjustment appropriate to the *exposure* (E), as calculated under *BIPRU 5.4.30R* to *BIPRU 5.4.65R*.
 - (f) H_C is the volatility adjustment appropriate for the collateral, as calculated under *BIPRU 5.4.30R* to *BIPRU 5.4.65R*.
 - (g) H_{FX} is the volatility adjustment appropriate for currency mismatch, as calculated under *BIPRU 5.4.30R* to *BIPRU 5.4.65R*.
 - (h) E^* is the fully adjusted *exposure* value taking into account volatility and the risk-mitigating effects of the collateral.
- (4) For the purpose of (3)(a), for a *firm* calculating *risk weighted exposure amounts* under the *standardised approach* the *exposure* value of off-balance sheet items listed in *BIPRU 3.7* must be 100% of its value rather than the percentages indicated in *BIPRU 3.2.1R* and *BIPRU 3.7.2R*.

[Note: BCD Annex VIII Part 3 point 33]

The financial collateral comprehensive method: Calculation of volatility adjustments to be applied: General

- 5.4.29 R *BIPRU 5.4.30R - BIPRU 5.4.65R set out the calculation of volatility adjustments under the financial collateral comprehensive method.*
- 5.4.30 R Volatility adjustments may be calculated in two ways: the *supervisory volatility adjustments approach* and the *own estimates of volatility adjustments approach*.

[Note: BCD Annex VIII Part 3 point 34]

- 5.4.31 R A *firm* may choose to use the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* independently of the choice it has made between the *standardised approach* and the *IRB approach* for the calculation of *risk-weighted exposure amounts*. However, if a *firm* seeks to use the *own estimates of volatility adjustments approach*, it must do so for the full range of instrument types, excluding immaterial portfolios where it may use the *supervisory volatility adjustments approach*.

[Note: BCD Annex VIII Part 3 point 35 (part)]

- 5.4.32 R Where the collateral consists of a number of recognised items, the volatility adjustment must be

$$(H = \sum_i \alpha_i H_i)$$

where:

- (1) α_i is the proportion of an item to the collateral as a whole; and
- (2) H_i is the volatility adjustment applicable to that item.

[Note: BCD Annex VIII Part 3 point 35 (part)]

The financial collateral comprehensive method: Supervisory volatility adjustments approach

- 5.4.33 R *BIPRU 5.4.34R - BIPRU 5.4.43R set out the calculation of volatility adjustments under the supervisory volatility adjustments approach.*
- 5.4.34 R The volatility adjustments to be applied under the *supervisory volatility adjustments approach* (assuming daily revaluation) are those set out in the tables in *BIPRU 5.4.35R - BIPRU 5.4.38R*.

[Note: BCD Annex VIII Part 3 point 36]

Table: Volatility adjustments for debt securities described in BIPRU 5.4.2R(2) and (3) – (4)

5.4.35 R This table belongs to *BIPRU* 5.4.34R .

<i>Credit quality step</i> with which the credit assessment of the <i>debt security</i> is associated	Residual Maturity	Volatility adjustments for <i>debt securities</i> issued by entities described in <i>BIPRU</i> 5.4.2R(2)			Volatility adjustments for <i>debt securities</i> issued by entities described in <i>BIPRU</i> 5.4.2R(3) and (4)		
		20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)	20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)
1	≤ 1 year	0.707	0.5	0.354	1.414	1	0.707
	<1 ≤ 5 years	2.828	2	1.414	5.657	4	2.828
	> 5 years	5.657	4	2.828	11.314	8	5.657
2-3	≤ 1 year	1.414	1	0.707	2.828	2	1.414
	> 1 ≤ 5 years	4.243	3	2.121	8.485	6	4.243
	> 5 years	8.485	6	4.243	16.971	12	8.485
4	≤ 1 year	21.213	15	10.607	N/A	N/A	N/A
	> 1 ≤ 5 years	21.213	15	10.607	N/A	N/A	N/A
	> 5 years	21.213	15	10.607	N/A	N/A	N/A

Table: Volatility adjustments for debt securities described in BIPRU 5.4.2R(5)

5.4.36 R This table belongs to *BIPRU* 5.4.34R.

<i>Credit quality step</i> with which the credit assessment of a short term debt security is associated	Volatility adjustments for <i>debt securities</i> issued by entities described in <i>BIPRU</i> 5.4.2R(2) with short-term credit assessments			Volatility adjustments for <i>debt securities</i> issued by entities described in <i>BIPRU</i> 5.4.2R(3) and (4) with short-term credit assessments		
	20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)	20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)
1	0.707	0.5	0.354	1.414	1	0.707
2-3	1.414	1	0.707	2.828	2	1.414

Table: Volatility adjustments for other collateral or exposure types

This table belongs to *BIPRU* 5.4.34R.

5.4.37

Gold	21.213	15	10.607

Table: Volatility adjustments for currency mismatch

5.4.38 R This table belongs to *BIPRU 5.4.34R*.

Volatility adjustment for currency mismatch		
20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)
11.314	8	5.657

- 5.4.39 R (1) For *secured lending transactions* the liquidation period is 20 business days.
- (2) For *repurchase transactions* (except insofar as such transactions involve the transfer of *commodities* or guaranteed rights relating to title to *commodities*) and *securities lending or borrowing transactions* the liquidation period is 5 business days.
- (3) For other *capital market driven transactions*, the liquidation period is 10 business days.

[**Note:** *BCD Annex VIII Part 3 point 37*]

5.4.40 R In the tables in *BIPRU 5.4.35R - BIPRU 5.4.38R* and in *BIPRU 5.4.41R to BIPRU 5.4.43R*, the *credit quality step* with which a credit assessment of the *debt security* is associated is the *credit quality step* with which the external credit assessment is associated under the *standardised approach*. For the purposes of this *rule*, *BIPRU 5.4.7R* also applies.

[**Note:** *BCD Annex VIII Part 3 point 38*]

5.4.41 R For non-eligible *securities* or for *commodities* lent or sold under *repurchase transactions* or *securities or commodities lending or borrowing transactions*, the volatility adjustment is the same as for non-main index equities listed on a *recognised investment exchange* or a *designated investment exchange*.

[**Note:** *BCD Annex VIII Part 3 point 39*]

5.4.42 R For eligible units in *CIUs* the volatility adjustment is the weighted average volatility adjustments that would apply, having regard to the liquidation period of the transaction as specified in *BIPRU 5.4.39R*, to the assets in which the fund has invested. If the assets in which the fund has invested are not known to the *firm*, the volatility adjustment is the highest volatility adjustment that would apply to any of the assets in which the fund has the

right to invest.

[Note: BCD Annex VIII Part 3 point 40]

- 5.4.43 R For unrated *debt securities* issued by *institutions* and satisfying the eligibility criteria in BIPRU 5.4.5R the volatility adjustments are the same as for *securities* issued by *institutions* or *corporates* with an external credit assessment associated with *credit quality steps* 2 or 3.

[Note: BCD Annex VIII Part 3 point 41]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: General

- 5.4.44 R BIPRU 5.4.45R - BIPRU 5.4.60R deal with the calculation of volatility adjustments under the *own estimates of volatility adjustments approach*.

- 5.4.45 R A *firm* complying with the requirements set out in BIPRU 5.4.50R to BIPRU 5.4.60R may use the *own estimates of volatility adjustments approach* for calculating the volatility adjustments to be applied to collateral and *exposures*.

[Note: BCD Annex VIII Part 3 point 42]

- 5.4.46 R When *debt securities* have a credit assessment from an *eligible ECAI* equivalent to investment grade or better, a *firm* may calculate a volatility estimate for each category of *security*.

[Note: BCD Annex VIII Part 3 point 43]

- 5.4.47 R In determining relevant categories, a *firm* must take into account the type of issuer of the *security* the external credit assessment of the *securities*, their residual maturity, and their modified duration. Volatility estimates must be representative of the *securities* included in the category by the *firm*.

[Note: BCD Annex VIII Part 3 point 44]

- 5.4.48 R For *debt securities* having a credit assessment from an *eligible ECAI* equivalent to below investment grade and for other eligible collateral the volatility adjustments must be calculated for each individual item.

[Note: BCD Annex VIII Part 3 point 45]

- 5.4.49 R A *firm* using the *own estimates of volatility adjustments approach* must estimate volatility of the collateral or foreign exchange mismatch without taking into account any correlations between the unsecured *exposure*, collateral and/or exchange rates.

[Note: BCD Annex VIII Part 3 point 46]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: Quantitative Criteria

5.4.50 R In calculating the volatility adjustments, a 99th percentile one-tailed confidence interval must be used.

[Note: BCD Annex VIII Part 3 point 47]

5.4.51 R The liquidation period is 20 *business days* for *secured lending transactions*; 5 *business days* for *repurchase transactions* except insofar as such transactions involve the transfer of *commodities* or guaranteed rights relating to title to *commodities* and *securities lending or borrowing transactions*; and 10 *business days* for other *capital market driven transactions*.

[Note: BCD Annex VIII Part 3 point 48]

5.4.52 R A *firm* may use volatility adjustment numbers calculated according to shorter or longer liquidation periods, scaled up or down to the liquidation period set out in *BIPRU* 5.4.51R for the type of transaction in question, using the square root of time formula:

$$(H_M = H_N) \sqrt{T_M/T_N}$$

where:

- (1) T_M is the relevant liquidation period;
- (2) H_M is the volatility adjustment under T_M ; and
- (3) H_N is the volatility adjustment based on the liquidation period T_N .

[Note: BCD Annex VIII Part 3 point 49]

5.4.53 R A *firm* must take into account the illiquidity of lower-quality assets. The liquidation period must be adjusted upwards in cases where there is doubt concerning the liquidity of the collateral. A *firm* must also identify where historical data may understate potential volatility, e.g. a pegged currency. Such cases must be dealt with by means of a stress scenario.

[Note: BCD Annex VIII Part 3 point 50]

5.4.54 R The historical observation period (sample period) for calculating volatility adjustments must be a minimum length of one year. For a *firm* that uses a weighting scheme or other methods for the historical observation period, the effective observation period must be at least one year (that is, the weighted average time lag of the individual observations must not be less than 6 months).

[Note: BCD Annex VIII Part 3 point 51]

5.4.55 G The *FSA* may also require a *firm* to calculate its volatility adjustments using a shorter observation period if, in the *FSA's* judgement, this is justified by a

significant upsurge in price volatility.

- 5.4.56 R A *firm* must update its data sets at least once every three months and must also reassess them whenever market prices are subject to material changes. This implies that volatility adjustments must be computed at least every three months.

[**Note:** *BCD* Annex VIII Part 3 point 52]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: Qualitative Criteria

- 5.4.57 R The volatility estimates must be used in the day-to-day risk management process of a *firm* including in relation to its internal *exposure* limits.

[**Note:** *BCD* Annex VIII Part 3 point 53]

- 5.4.58 R If the liquidation period used by a *firm* in its day-to-day risk management process is longer than that set out in *BIPRU* 5.4 for the type of transaction in question, the *firm's* volatility adjustments must be scaled up in accordance with the square root of time formula set out in *BIPRU* 5.4.52R.

[**Note:** *BCD* Annex VIII Part 3 point 54]

- 5.4.59 R A *firm* must have established procedures for monitoring and ensuring compliance with a documented set of policies and controls for the operation of its system for the estimation of volatility adjustments and for the integration of such estimations into its risk management process.

[**Note:** *BCD* Annex VIII Part 3 point 55]

- 5.4.60 R An independent review of a *firm's* system for the estimation of volatility adjustments must be carried out regularly in the *firm's* own internal auditing process. A review of the overall system for the estimation of volatility adjustments and for integration of those adjustments into the *firm's* risk management process must take place at least once a year and must specifically address, at a minimum:

- (1) the integration of estimated volatility adjustments into daily risk management;
- (2) the validation of any significant change in the process for the estimation of volatility adjustments;
- (3) the verification of the consistency, timeliness and reliability of data sources used to run the system for the estimation of volatility adjustments, including the independence of such data sources; and
- (4) the accuracy and appropriateness of the volatility assumptions.

[Note: BCD Annex VIII Part 3 point 56]

The financial collateral comprehensive method: Scaling up of volatility adjustments

- 5.4.61 R The volatility adjustments set out in *BIPRU 5.4.34R* to *BIPRU 5.4.43R* are the volatility adjustments to be applied where there is daily revaluation. Similarly, where a *firm* uses its own estimates of the volatility adjustments in accordance with *BIPRU 5.4.45R* to *BIPRU 5.4.60R*, these must be calculated in the first instance on the basis of daily revaluation. If the frequency of revaluation is less than daily, larger volatility adjustments must be applied. These must be calculated by scaling up the daily revaluation volatility adjustments, using the following ‘square root of time’ formula:

$$(H = H_M \sqrt{(N_R + (T_M - 1)) / (T_M)})$$

where:

- (1) H is the volatility adjustment to be applied;
- (2) H_M is the volatility adjustment where there is daily revaluation;
- (3) N_R is the actual number of business days between revaluations; and
- (4) T_M is the liquidation period for the type of transaction in question.

[Note: BCD Annex VIII Part 3 point 57]

The financial collateral comprehensive method: Conditions for applying a 0% volatility adjustment

- 5.4.62 R In relation to *repurchase transactions* and *securities lending or borrowing transactions*, where a *firm* uses the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* and where the conditions set out in (1) - (8) are satisfied, a *firm* may, instead of applying the volatility adjustments calculated under *BIPRU 5.4.30R* to *BIPRU 5.4.61R*, apply a 0% volatility adjustment:

- (1) both the *exposure* and the collateral are cash or *debt securities* issued by central governments or *central banks* within the meaning of *BIPRU 5.4.2R(2)* and eligible for a 0% *risk weight* under the *standardised approach*;
- (2) both the *exposure* and the collateral are denominated in the same currency;
- (3) either the maturity of the transaction is no more than one day or both the *exposure* and the collateral are subject to daily marking-to-market or daily remargining;

- (4) it is considered that the time between the last marking-to-market before a failure to remargin by the counterparty and the liquidation of the collateral is no more than four business days;
- (5) the transaction is settled across a settlement system proven for that type of transaction;
- (6) the documentation covering the agreement is standard market documentation for *repurchase transactions* or *securities lending or borrowing transactions* in the *securities* concerned;
- (7) the transaction is governed by documentation specifying that if the counterparty fails to satisfy an obligation to deliver cash or *securities* or to deliver margin or otherwise defaults, then the transaction is immediately terminable; and
- (8) the counterparty is a *core market participant*.

[**Note:** BCD Annex VIII Part 3 point 58 (part)]

5.4.63 R The option in *BIPRU* 5.4.62R is not available in respect of a *firm* using the *master netting agreement internal models approach*.

[**Note:** BCD Annex VIII Part 3 point 58 (part)]

5.4.64 R *Core market participant* means the following entities:

- (1) the entities mentioned in *BIPRU* 5.4.2R(2) *exposures* to which are assigned a 0% *risk weight* under the *standardised approach* to credit risk;
- (2) *institutions*;
- (3) other financial companies (including insurance companies) *exposures* which are assigned a 20% *risk weight* under the *standardised approach*;
- (4) regulated *CIUs* that are subject to capital or leverage requirements;
- (5) regulated pension funds; and
- (6) a *recognised clearing house* or *designated clearing house*.

[**Note:** BCD Annex VIII Part 3 point 58 (part)]

5.4.65 R If under the *CRD implementation measure* for a particular *EEA State* with respect to point 58 of Part 3 of Annex VIII of the *Banking Consolidation Directive* (Conditions for applying the 0% volatility adjustment) the treatment set out in that point is permitted to be applied in the case of *repurchase transactions* or *securities lending or borrowing transactions* in *securities* issued by the domestic government of that *EEA State*, then a *firm*

may adopt the same approach to the same transactions.

[**Note:** *BCD* Annex VIII Part 3 point 59]

Financial collateral comprehensive method: Calculating risk-weighted exposure amounts

5.4.66 Under the *standardised approach* E^* as calculated under *BIPRU* 5.4.28R must be taken as the *exposure* value for the purposes of *BIPRU* 3.2.20R to *BIPRU* 3.2.26R. In the case of off-balance sheet items listed in *BIPRU* 3.7, E^* must be taken as the value to which the percentages indicated in *BIPRU* 3.2.1R and *BIPRU* 3.7.2R must be applied to arrive at the *exposure* value.

[**Note:** *BCD* Annex VIII Part 3 point 60]

5.5 Other funded credit risk mitigation

Deposits with third parties: Eligibility

- 5.5.1 R Cash on deposit with, or *cash assimilated instruments* held by, a third party *institution* in a non-custodial arrangement and pledged to a *lending firm* may be recognised as eligible credit protection.

[Note: BCD Annex VIII Part 1 point 23]

Deposits with third parties: Minimum requirements

- 5.5.2 R To be eligible for the treatment set out at *BIPRU 5.5.3R*, the protection referred to in *BIPRU 5.5.1R* must satisfy the following conditions:

- (1) the borrower's claim against the third party *institution* is openly pledged or assigned to the *lending firm* and such pledge or assignment is legally effective and enforceable in all relevant jurisdictions;
- (2) the third party *institution* is notified of the pledge or assignment;
- (3) as a result of the notification, the third party *institution* is able to make payments solely to the *lending firm* or to other parties with the *lending firm's* consent; and
- (4) the pledge or assignment is unconditional and irrevocable.

[Note: BCD Annex VIII Part 2 point 12]

Deposits with third parties: Calculating the effects of the credit risk mitigation

- 5.5.3 R Where the conditions set out in *BIPRU 5.5.2R* are satisfied, credit protection falling within the terms of *BIPRU 5.5.1R* may be treated as a guarantee by the third party *institution*.

[Note: BCD Annex VIII Part 3 point 79]

Life insurance policies: Eligibility

- 5.5.4 R Life insurance policies pledged to a *lending firm* may be recognised as eligible credit protection.

[Note: BCD Annex VIII Part 1 point 24]

Life insurance policies: Minimum requirements

- 5.5.5 R For life insurance policies pledged to a *lending firm* to be recognised the following conditions must be met:
- (1) the party providing the life insurance may be recognised as an eligible unfunded credit protection provider under *BIPRU 5.7.1R*;
 - (2) the life insurance policy is openly pledged or assigned to the *lending firm*;
 - (3) the party providing the life insurance is notified of the pledge or assignment and as a result may not pay amounts payable under the contract without the consent of the *lending firm*;
 - (4) the declared surrender value of the policy is non-reducible;
 - (5) the *lending firm* must have the right to cancel the policy and receive the surrender value in a timely way in the event of the default of the borrower;
 - (6) the *lending firm* is informed of any non-payments under the policy by the policyholder;
 - (7) the credit protection must be provided for the maturity of the loan; and
 - (8) the pledge or assignment must be legally effective and enforceable in all jurisdictions which are relevant at the time of the conclusion of the credit agreement.

[**Note:** *BCD Annex VIII Part 2 point 13 (part)*]

- 5.5.6 R Where it is not possible for a *firm* to meet the condition set out in *BIPRU 5.5.5R(7)*, because the insurance relationship ends before the loan relationship expires, the *firm* must ensure that the amount deriving from the insurance contract serves the *firm* as security until the end of the duration of the credit agreement.

[**Note:** *BCD Annex VIII Part 2 point 13 (part)*]

Life insurance policies: Calculating the effects of the credit risk mitigation

- 5.5.7 R Where the conditions set out in *BIPRU 5.5.5R* are satisfied, credit protection falling within the terms of *BIPRU 5.5.4R* may be treated as a guarantee by the party providing the life insurance. The value of the credit

protection recognised must be the surrender value of the life insurance policy.

[Note: BCD Annex VIII Part 3 point 80]

Instruments purchased on request: Eligibility

- 5.5.8 R Instruments issued by third party *institutions* which will be repurchased by that *institution* on request may be recognised as eligible credit protection.

[Note: BCD Annex VIII Part 1 point 25]

Instruments purchased on request: Calculating the effects of the credit risk mitigation

- 5.5.9 R Instruments eligible under *BIPRU* 5.5.8R may be treated as a guarantee by the issuing *institution*.

[Note: BCD Annex VIII Part 3 point 81]

- 5.5.10 R For the purposes of *BIPRU* 5.5.9R, the value of the credit protection recognised is the following:

- (1) where the instrument will be repurchased at its face value, the value of the protection is that amount; or
- (2) where the instrument will be repurchased at market price, the value of the protection is the value of the instrument valued in the same way as the *debt securities* specified in *BIPRU* 5.4.5R.

[Note: BCD Annex VIII Part 3 point 82]

Credit linked notes

- 5.5.11 R Investments in credit linked notes issued by a *lending firm* may be treated as cash collateral.

[Note: BCD Annex VIII Part 3 point 3]

5.6 Master netting agreements

Eligibility

- 5.6.1 R (1) For a *firm* adopting the *financial collateral comprehensive method*, the effects of bilateral netting contracts covering *repurchase transactions, securities or commodities lending or borrowing transactions*, and/or other *capital market-driven transactions* with a counterparty may be recognised.
- (2) Without prejudice to *BIPRU 14* to be recognised the collateral taken and *securities or commodities* borrowed within such agreements must comply with the eligibility requirements for collateral set out at *BIPRU 5.4.2R* to *BIPRU 5.4.8R*.

[**Note:** *BCD Annex VIII Part 1 point 5*]

Minimum requirements

- 5.6.2 R For master netting agreements covering *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market driven transactions* to be recognised for the purposes of *BIPRU 5*, they must:
- (1) be legally effective and enforceable in all relevant jurisdictions, including in the event of the bankruptcy or insolvency of the counterparty;
- (2) give the non-defaulting party the right to terminate and close-out in a timely manner all transactions under the agreement upon the event of default, including in the event of the bankruptcy or insolvency of the counterparty; and
- (3) provide for the netting of gains and losses on transactions closed out under a master agreement so that a single net amount is owed by one party to the other.

[**Note:** *BCD Annex VIII Part 2 point 4*]

- 5.6.3 R In addition the minimum requirements for the recognition of financial collateral under the *financial collateral comprehensive method* set out in *BIPRU 5.4.9R* must be fulfilled.

[**Note:** *BCD Annex VIII Part 2 point 5*]

Calculation of the fully adjusted exposure value: the supervisory volatility

adjustments approach and the own estimates of volatility adjustments approach

5.6.4 R *BIPRU 5.6.5R to BIPRU 5.6.11R set out the calculation of the fully adjusted exposure value under the supervisory volatility adjustments approach and the own estimates of volatility adjustments approach.*

5.6.5 R In calculating the ‘fully adjusted exposure value’ (E^*) for the exposures subject to an eligible master netting agreement covering *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions*, a firm must calculate the volatility adjustments to be applied in the manner set out in *BIPRU 5.6.6R to BIPRU 5.6.11R* either using the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* as set out in *BIPRU 5.4.30R to BIPRU 5.4.65R* for the *financial collateral comprehensive method*. For the use of the *own estimates of volatility adjustments approach* the same conditions and requirements apply as under the *financial collateral comprehensive method*.

[Note: BCD Annex VIII Part 3 point 5]

5.6.6 R A firm must calculate the net position in each type of *security* or *commodity* by subtracting from the total value of the *securities* or *commodities* of that type lent, sold or provided under the master netting agreement, the total value of *securities* or *commodities* of that type borrowed, purchased or received under the agreement.

[Note: BCD Annex VIII Part 3 point 6]

5.6.7 R For the purposes of *BIPRU 5.6.6R*, type of *security* means *securities* which are issued by the same entity, have the same issue date, the same maturity and are subject to the same terms and conditions and are subject to the same liquidation periods as indicated in *BIPRU 5.4.30R to BIPRU 5.4.65R*.

[Note: BCD Annex VIII Part 3 point 7]

5.6.8 R A firm must calculate the net position in each currency other than the settlement currency of the master netting agreement by subtracting from the total value of *securities* denominated in that currency lent, sold or provided under the master netting agreement added to the amount of cash in that currency lent or transferred under the agreement, the total value of *securities* denominated in that currency borrowed, purchased or received under the agreement added to the amount of cash in that currency borrowed or received under the agreement.

[Note: BCD Annex VIII Part 3 point 8]

5.6.9 R A firm must apply the volatility adjustment appropriate to a given type of *security* or cash position to the absolute value of the positive or negative net position in the *securities* of that type.

[Note: BCD Annex VIII Part 3 point 9]

- 5.6.10 R A *firm* must apply the foreign exchange risk (fx) volatility adjustment to the net positive or negative position in each currency other than the settlement currency of the master netting agreement.

[Note: BCD Annex VIII Part 3 point 10]

- 5.6.11 R E^* must be calculated according to the following formula:

$$E^* = \max \{0, [(\sum(E) - \sum(C)) + \sum(|\text{net position in each security}| \times H_{\text{sec}}) + (\sum|E_{\text{fx}}| \times H_{\text{fx}})]\}$$

where:

- (1) (where *risk weighted exposure amounts* are calculated under the *standardised approach*) E is the *exposure* value for each separate *exposure* under the agreement that would apply in the absence of the credit protection;
- (2) C is the value of the *securities* or *commodities* borrowed, purchased or received or the cash borrowed or received in respect of each such *exposure*;
- (3) $\sum(E)$ is the sum of all Es under the agreement;
- (4) $\sum(C)$ is the sum of all Cs under the agreement;
- (5) E_{fx} is the net position (positive or negative) in a given currency other than the settlement currency of the agreement as calculated under *BIPRUI 5.6.8R*;
- (6) H_{sec} is the volatility adjustment appropriate to a particular type of *security*;
- (7) H_{fx} is the foreign exchange volatility adjustment; and
- (8) E^* is the fully adjusted *exposure* value.

[Note: BCD Annex VIII Part 3 point 11]

Calculation of the fully adjusted exposure value: the master netting agreement internal models approach

- 5.6.12 R *BIPRU 5.6.16R* to *BIPRU 5.6.28G* apply to a *firm* that has a *master netting agreement internal models approach permission* and set out the calculation of the effects of *credit risk mitigation* under the *master netting agreement internal models approach*.

- 5.6.13 G A *firm* that wishes to use the *master netting agreement internal models approach* will need to apply to the *FSA* for a *master netting agreement internal models approach permission*. *BIPRU* 1.3 sets out the requirements and procedures relating to those applications.
- 5.6.14 G A *master netting agreement internal models approach permission* will amend, to the extent set out in the *master netting agreement internal models approach permission*, *BIPRU* 5.6.1R so as to provide that, with the exceptions provided in *BIPRU* 5.6, a *firm* must use the *master netting agreement internal models approach* for the purposes of the calculations specified in *BIPRU* 5.6.
- 5.6.15 G A *firm* which has been granted a *VaR model waiver* will still need to make an application to the *FSA* for a *master netting agreement internal models approach permission*. However, the application should generally be straightforward as a *firm* which is able to satisfy the requirements for a *VaR model waiver* should usually also be able to satisfy the requirements for a *master netting agreement internal models approach permission*.

[Note: *BCD* Annex VIII Part 3 point 14]

- 5.6.16 R The *master netting agreement internal models approach* is an alternative to using the *supervisory volatility adjustments approach* or the *own estimates volatility adjustments approach* in calculating volatility adjustments for the purpose of calculating the ‘fully adjusted exposure value’ (E*) resulting from the application of an eligible master netting agreement covering *repurchase transactions, securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* other than derivative transactions. The *master netting agreement internal models approach* takes into account correlation effects between security positions subject to a master netting agreement as well as the liquidity of the instruments concerned. The internal model used for the *master netting agreement internal model approach* must provide estimates of the potential change in value of the unsecured *exposure* amount ($\sum E - \sum C$).

[Note: *BCD* Annex VIII Part 3 point 12 (part)]

- 5.6.17 R A *firm* may also use the internal model used for the *master netting agreement internal model approach* for *margin lending transactions* if the transactions are covered under the *firm’s master netting agreement internal models approach permission* and the transactions are covered by a bilateral master netting agreement that meets the requirements set out in *BIPRU* 13.7.

[Note: *BCD* Annex VIII Part 3 point 12 (part)]

- 5.6.18 R A *firm* may use the *master netting agreement internal models approach* independently of the choice it has made between the *standardised approach* and the *IRB approach* for the calculation of *risk weighted exposure amounts*. However, if a *firm* uses the *master netting agreement internal models approach*, it must do so for all counterparties and *securities*, excluding immaterial portfolios where it may use the *supervisory volatility adjustments*

approach or the *own estimates volatility adjustments approach* as set out in BIPRU 5.4.30R to BIPRU 5.4.65R.

[Note: BCD Annex VIII Part 3 point 13]

- 5.6.19 R
- (1) A *firm* must be able to satisfy the *FSA* that the *firm's* risk management system for managing the risks arising on the transactions covered by the master netting agreement is conceptually sound and implemented with integrity and that, in particular, the minimum qualitative standards in (2) – (11) are met.
 - (2) The internal risk-measurement model used for calculation of potential price volatility for the transactions is closely integrated into the daily risk-management process of the *firm* and serves as the basis for reporting risk *exposures* to senior management of the *firm*.
 - (3) The *firm* has a risk control unit that is independent from business trading units and reports directly to senior management. The unit must be responsible for designing and implementing the *firm's* risk-management system. It must produce and analyse daily reports on the output of the risk-measurement model and on the appropriate measures to be taken in terms of position limits.
 - (4) The daily reports produced by the risk-control unit are reviewed by a level of management with sufficient authority to enforce reductions of positions taken and of overall risk *exposure*.
 - (5) The *firm* has sufficient staff skilled in the use of sophisticated models in the risk control unit.
 - (6) The *firm* has established procedures for monitoring and ensuring compliance with a documented set of internal policies and controls concerning the overall operation of the risk-measurement system.
 - (7) The *firm's* models have a proven track record of reasonable accuracy in measuring risks demonstrated through the back-testing of its output using at least one year of data.
 - (8) The *firm* frequently conducts a rigorous programme of stress testing and the results of these tests are reviewed by senior management and reflected in the policies and limits it sets.
 - (9) The *firm* must conduct, as part of its regular internal auditing process, an independent review of its risk-measurement system. This review must include both the activities of the business trading units and of the independent risk-control unit.

- (10) At least once a year, the *firm* must conduct a review of its risk management system.
- (11) The internal model used for the *master netting agreement internal model approach* must meet the requirements set out in *BIPRU* 13.6.65R to *BIPRU* 13.6.67R.

[**Note:** *BCD* Annex VIII Part 3 point 16]

- 5.6.20 R The calculation of the potential change in value must be subject to the following minimum standards:
- (1) at least daily calculation of the potential change in value;
 - (2) a 99th percentile, one-tailed confidence interval;
 - (3) a 5-day equivalent liquidation period, except in the case of transactions other than *securities repurchase transactions* or *securities lending or borrowing transactions* where a 10-day equivalent liquidation period should be used;
 - (4) an effective historical observation period of at least one year except where a shorter observation period is justified by a significant upsurge in price volatility; and
 - (5) three-monthly data set updates.

[**Note:** *BCD* Annex VIII Part 3 point 17]

- 5.6.21 R The internal risk-measurement model must capture a sufficient number of risk factors in order to capture all material price risks.

[**Note:** *BCD* Annex VIII Part 3 point 18]

- 5.6.22 R A *firm* may use empirical correlations within risk categories and across risk categories provided that it is able to satisfy the *FSA* that the *firm's* system for measuring correlations is sound and implemented with integrity.

[**Note:** *BCD* Annex VIII Part 3 point 19]

- 5.6.23 G The *FSA* will not grant a *master netting agreement internal models approach permission* if it is not satisfied that the standards in *BIPRU* 5.6.19R to *BIPRU* 5.6.22R are met.

- 5.6.24 R The fully adjusted *exposure* value (E^*) for a *firm* using the *master netting agreement internal models approach* must be calculated according to the following formula:

$$E^* = \max \{0, [(\sum E - \sum C) + (VaR \text{ output of the internal models})]\}$$

where

- (1) (where *risk weighted exposure amounts* are calculated under the *standardised approach*) E is the *exposure* value for each separate *exposure* under the agreement that would apply in the absence of the credit protection;
- (2) C is the value of the *securities* borrowed, purchased or received or the cash borrowed or received in respect of each such *exposure*;
- (3) $\sum (E)$ is the sum of all Es under the agreement; and
- (4) $\sum (C)$ is the sum of all Cs under the agreement.

[Note: BCD Annex VIII Part 3 point 20]

- 5.6.25 R In calculating *risk weighted exposure amounts* using the *master netting agreement internal models approach*, a *firm* must use the previous *business day's* model output.

[Note: BCD Annex VIII Part 3 point 21]

- 5.6.26 G No changes should be made to the internal model used for the *master netting agreement internal model approach* unless the change is not material. Material changes to such a model will require a variation of the *master netting agreement internal models approach permission*. Materiality is measured against the model as it was at the time that the *master netting agreement internal models approach permission* was originally granted or, any later date set out in the *master netting agreement internal models approach permission* for this purpose. If a *firm* is considering making material changes to such a model then it should notify the *FSA* at once.

- 5.6.27 G If a *firm* ceases to meet the requirements of *BIPRU 5* in relation to the *master netting agreement internal models approach*, the *firm* should notify the *FSA* at once.

- 5.6.28 G The *FSA* is likely to revoke a *master netting agreement internal models approach permission* if a *firm* ceases to meet the requirements of *BIPRU 5* in relation to the *master netting agreement internal models approach*.

Calculation of risk weighted exposure amounts under the standardised approach

- 5.6.29 R (1) A *firm* must under the *standardised approach* calculate *risk-weighted exposure amounts* for *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* covered by master netting agreements under this *rule*.

- (2) E^* as calculated under *BIPRU* 5.6.5R to *BIPRU* 5.6.25R must be taken as the *exposure* value of the *exposure* to the counterparty arising from the transactions subject to the master netting agreement for the purposes of *BIPRU* 3.2.20R to *BIPRU* 3.2.26R.

[**Note:** *BCD* Annex VIII Part 3 point 22]

5.7 Unfunded credit protection

Eligibility

5.7.1 R The following parties may be recognised as eligible providers of *unfunded credit protection*:

- (1) central governments and *central banks*;
- (2) regional governments or local authorities;
- (3) *multilateral development banks*;
- (4) *international organisations exposures* which are assigned a 0% *risk weight* under the *standardised approach*;
- (5) *public sector entities, claims* on which are treated as claims on *institutions* or central governments under the *standardised approach*;
- (6) *institutions*;
- (7) other corporate entities, including *parent undertakings, subsidiary undertakings* and affiliate corporate entities of the *firm*, that have a credit assessment by an *eligible ECAI* associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures to corporates* under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 26]

Types of credit derivatives

5.7.2 R The following types of credit derivatives, and instruments that may be composed of such credit derivatives or that are economically effectively similar, may be recognised as eligible;

- (1) credit default swaps;
- (2) total return swaps; and
- (3) credit linked notes to the extent of their cash funding.

[Note: BCD Annex VIII Part 1 point 30]

5.7.3 R Where a *firm* buys credit protection through a total return swap and records the net payments received on the swap as net income, but does not record offsetting deterioration in the value of the asset that is protected (either

through reductions in fair value or by an addition to reserves), the credit protection must not be recognised as eligible.

[Note: BCD Annex VIII Part 1 point 31]

Internal hedges

- 5.7.4 R When a *firm* conducts an internal hedge using a credit derivative - i.e. hedges the credit risk of an *exposure* in the *non-trading book* with a credit derivative booked in the *trading book* - in order for the protection to be recognised as eligible for the purposes of *BIPRU 4.10* or *BIPRU 5* the credit risk transferred to the *trading book* must be transferred out to a third party or parties. In such circumstances, subject to the compliance of such transfer with the requirements for the recognition of *credit risk mitigation* set out in *BIPRU 4.10* or *BIPRU 5*, the *rules* for the calculation of *risk weighted exposure amounts* and *expected loss amounts* where *unfunded credit protection* is acquired set out in *BIPRU 4.10* or *BIPRU 5* must be applied.

[Note: BCD Annex VIII Part 1 point 32]

Minimum requirements: General

- 5.7.5 R *BIPRU 5.7.6R* to *BIPRU 5.7.10R* deal with requirements common to guarantees and credit derivatives.
- 5.7.6 R Subject to *BIPRU 5.7.9R*, for the credit protection deriving from a guarantee or credit derivative to be recognised the following conditions must be met:
- (1) the credit protection must be direct;
 - (2) the extent of the credit protection must be clearly defined and incontrovertible;
 - (3) the credit protection contract must not contain any clause, the fulfilment of which is outside the direct control of the lender, that:
 - (a) would allow the protection provider unilaterally to cancel the protection;
 - (b) would increase the effective cost of protection as a result of deteriorating credit quality of the protected *exposure*;
 - (c) could prevent the protection provider from being obliged to pay out in a timely manner in the event that the original obligor fails to make any payments due; or
 - (d) could allow the maturity of the credit protection to be reduced by the protection provider; and

- (4) it must be legally effective and enforceable in all jurisdictions which are relevant at the time of the conclusion of the credit agreement.

[Note: BCD Annex VIII Part 2 point 14]

- 5.7.7 G For the purposes of *BIPRU 5.7.6R(3)(a)*, payment of premiums and other monies due under the contract is within the control of the *lending firm*. So a clause that allows the protection provider unilaterally to cancel the contract after a reasonable period due to non payment of such monies will not mean that the condition in that *rule* is not met.

Minimum requirements: Operational requirements

- 5.7.8 R A *firm* must be able to satisfy the *FSA* that it has systems in place to manage potential concentration of risk arising from the *firm's* use of guarantees and credit derivatives. The *firm* must be able to demonstrate how its strategy in respect of its use of credit derivatives and guarantees interacts with its management of its overall risk profile.

[Note: BCD Annex VIII Part 2 point 15]

Minimum requirements: Sovereign and other public sector counter-guarantees

- 5.7.9 R Where an *exposure* is protected by a guarantee which is counter-guaranteed by a central government or *central bank*, a regional government or local authority or a *public sector entity* claims on which are treated as claims on the central government in whose jurisdiction they are established under the *standardised approach*, a *multilateral development bank* to which a 0% *risk weight* is assigned under or by virtue of the *standardised approach*, or a *public sector entity* claims on which are treated as claims on *credit institutions* under the *standardised approach*, the *exposure* may be treated as protected by a guarantee provided by the entity in question provided the following conditions are satisfied:

- (1) the counter-guarantee covers all credit risk elements of the claim;
- (2) both the original guarantee and the counter-guarantee meet the requirements for guarantees set out in *BIPRU 5.7.6R*, *BIPRU 5.7.8R* and *BIPRU 5.7.11R*, except that the counter-guarantee need not be direct; and
- (3) the *firm* is able to satisfy the *FSA* that the cover is robust and that nothing in the historical evidence suggests that the coverage of the counter-guarantee is less than effectively equivalent to that of a direct guarantee by the entity in question.

[Note: BCD Annex VIII Part 2 point 16]

5.7.10 R The treatment of *BIPRU 5.7.9R* applies, also, to an *exposure* which is not counter-guaranteed by an entity listed in that *rule* if the *exposure's* counter-guarantee is in its turn directly guaranteed by one of the listed entities and the conditions listed in *BIPRU 5.7.9R* are satisfied.

[**Note:** *BCD Annex VIII Part 2 point 17*]

Additional requirements for guarantees

5.7.11 R For a guarantee to be recognised the following conditions must also be met:

- (1) on the qualifying default of and/or non-payment by the counterparty, the *lending firm* must have the right to pursue, in a timely manner, the guarantor for any monies due under the claim in respect of which the protection is provided;
- (2) payment by the guarantor must not be subject to the *lending firm* first having to pursue the obligor;
- (3) in the case of *unfunded credit protection* covering residential mortgage loans, the requirements in *BIPRU 5.7.6R(3)(c)* and in this *rule* have only to be satisfied within 24 months;
- (4) the guarantee must be an explicitly documented obligation assumed by the guarantor;
- (5) subject to (6), the guarantee must cover all types of payments the obligor is expected to make in respect of the claim; and
- (6) where certain types of payment are excluded from the guarantee, the recognised value of the guarantee must be adjusted to reflect the limited coverage.

[**Note:** *BCD Annex VIII Part 2 point 18*]

5.7.12 R In the case of guarantees provided in the context of mutual guarantee schemes recognised for these purposes by another EEA *competent authority* under a *CRD implementation measure* with respect to point 19 of Part 2 of Annex VIII of the *Banking Consolidation Directive* or provided by or counter-guaranteed by entities referred to in *BIPRU 5.7.9R*, the requirements in *BIPRU 5.7.11R(1) – (3)* will be satisfied where either of the following conditions are met:

- (1) the *lending firm* has the right to obtain in a timely manner a provisional payment by the guarantor calculated to represent a robust estimate of the amount of the economic *loss*, including losses resulting from the non-payment of interest and other types of payment which the borrower is obliged to make, likely to be incurred by the *lending firm* proportional to the coverage of the guarantee; or

- (2) the *lending firm* is able to demonstrate to the *FSA* that the loss-protecting effects of the guarantee, including losses resulting from the non-payment of interest and other types of payments which the borrower is obliged to make, justify such treatment.

[Note: *BCD* Annex VIII Part 2 point 19]

Additional requirements for credit derivatives

- 5.7.13 R For a credit derivative to be met the following conditions must also be met.
- (1) Subject to (2), the credit events specified under the credit derivative must at a minimum include:
 - (a) the failure to pay the amounts due under the terms of the underlying obligation that are in effect at the time of such failure (with a grace period that is closely in line with or shorter than the grace period in the underlying obligation);
 - (b) the bankruptcy, insolvency or inability of the obligor to pay its debts, or its failure or admission in writing of its inability generally to pay its debts as they become due, and analogous events; and
 - (c) the restructuring of the underlying obligation involving forgiveness or postponement of principal, interest or fees that results in a credit loss event (i.e. value adjustment or other similar debit to the profit and loss account).
 - (2) Where the credit events specified under the credit derivative do not include restructuring of the underlying obligation as described in (1)(c), the credit protection may nonetheless be recognised subject to a reduction in the recognised value as specified in *BIPRU* 5.7.16R.
 - (3) In the case of credit derivatives allowing for cash settlement a robust valuation process must be in place in order to estimate loss reliably. There must be a clearly specified period for obtaining post-credit-event valuations of the underlying obligation.
 - (4) If the protection purchaser's right and ability to transfer the underlying obligation to the protection provider is required for settlement, the terms of the underlying obligation must provide that any required consent to such transfer may not be unreasonably withheld.
 - (5) The identity of the parties responsible for determining whether a credit event has occurred must be clearly defined. This determination must not be the sole responsibility of the protection provider. The

protection buyer must have the right/ability to inform the protection provider of the occurrence of a credit event.

[Note: BCD Annex VIII Part 2 point 20]

- 5.7.14 R A mismatch between the underlying obligation and the reference obligation under the credit derivative (i.e. the obligation used for the purposes of determining cash settlement value or the deliverable obligation) or between the underlying obligation and the obligation used for purposes of determining whether a credit event has occurred is permissible only if the following conditions are met:
- (1) the reference obligation or the obligation used for purposes of determining whether a credit event has occurred, as the case may be, ranks pari passu with or is junior to the underlying obligation; and
 - (2) the underlying obligation and the reference obligation or the obligation used for purposes of determining whether a credit event has occurred, as the case may be, share the same obligor (i.e., the same legal entity) and there are in place legally enforceable cross-default or cross-acceleration clauses.

[Note: BCD Annex VIII Part 2 point 21]

Unfunded credit protection: Valuation

- 5.7.15 R *BIPRU 5.7.16R to BIPRU 5.7.19R* set out the provisions applying to the valuation of *unfunded credit protection*.
- 5.7.16 R
- (1) The value of *unfunded credit protection* (G) is the amount that the protection provider has undertaken to pay in the event of the default or non-payment of the borrower or on the occurrence of other specified credit events.
 - (2) In the case of credit derivatives which do not include as a credit event restructuring of the underlying obligation involving forgiveness or postponement of principal, interest or fees that result in a credit loss event (e.g. value adjustment, the making of a value adjustment or other similar debit to the profit and loss account):
 - (a) where the amount that the protection provider has undertaken to pay is not higher than the *exposure* value, the value of the credit protection calculated under (1) must be reduced by 40%; or
 - (b) where the amount that the protection provider has undertaken to pay is higher than the *exposure* value, the value of the

credit protection must be no higher than 60% of the *exposure* value.

[**Note:** BCD Annex VIII Part 3 point 83]

- 5.7.17 R Where *unfunded credit protection* is denominated in a currency different from that in which the *exposure* is denominated (a currency mismatch) the value of the credit protection must be reduced by the application of a volatility adjustment H_{FX} as follows:

$$G^* = G \times (1 - H_{FX})$$

where:

- (1) G is the nominal amount of the credit protection;
- (2) G^* is G adjusted for any *foreign currency* risk; and
- (3) H_{fx} is the volatility adjustment for any currency mismatch between the credit protection and the underlying obligation.

[**Note:** BCD Annex VIII Part 3 point 84 (part)]

- 5.7.18 R Where there is no currency mismatch:

$$G^* = G$$

[**Note:** BCD Annex VIII Part 3 point 84 (part)]

- 5.7.19 R The volatility adjustments to be applied for any currency mismatch may be calculated based on the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* as set out in BIPRU 5.4.30R to BIPRU 5.4.65R.

[**Note:** BCD Annex VIII Part 3 point 85]

Calculating risk weighted exposure amounts and expected loss amounts

- 5.7.20 R BIPRU 5.7.21R to BIPRU 5.7.28R set out the provisions applying to the calculation of *risk weighted exposure amounts*.

Calculating risk weighted exposure amounts: Partial protection – tranching

- 5.7.21 R Where a *firm* transfers a part of the risk of a loan in one or more *tranches*, BIPRU 9 applies. Materiality thresholds on payments below which no payment shall be made in the event of loss are considered to be equivalent to

retained first loss positions and to give rise to a *tranch*ed transfer of risk.

[Note: BCD Annex VIII Part 3 point 86]

Calculating risk-weighted exposure amounts : The standardised approach

- 5.7.22 R *BIPRU 5.7.23R to BIPRU 5.7.25R set out the provisions applying to the calculation of risk weighted exposure amounts under the standardised approach in the case of unfunded credit protection.*

Calculating risk weighted exposure amounts: standardised approach: Full protection

- 5.7.23 R For the purposes of *BIPRU 3.2.20R to BIPRU 3.2.26R*, *g* shall be the *risk weight* to be assigned to an *exposure* which is fully protected by *unfunded credit protection* (G_A), where:

- (1) *g* is the *risk weight* of *exposures* to the protection provider as specified under the *standardised approach*; and
- (2) G_A is the value of G^* as calculated under *BIPRU 5.7.17R* further adjusted for any maturity mismatch as laid down in *BIPRU 5.8R*.

[Note: BCD Annex VIII Part 3 point 87]

Calculating risk weighted exposure amounts: Standardised approach: Partial protection – equal seniority

- 5.7.24 R Where the protected amount is less than the *exposure* value and the protected and unprotected portions are of equal seniority – ie the *firm* and the protection provider share losses on a pro-rata basis, proportional regulatory capital relief is afforded. For the purposes of *BIPRU 3.2.20R to BIPRU 3.2.26R* *risk weighted exposure amounts* must be calculated in accordance with the following formula:

$$(E-G_A) \times r + G_A \times g$$

where:

- (1) *E* is the *exposure* value;
- (2) G_A is the value of G^* as calculated under *BIPRU 5.7.17R* further adjusted for any maturity mismatch as laid down in *BIPRU 5.8R*;
- (3) *r* is the *risk weight* of *exposures* to the obligor as specified under the *standardised approach*; and

- (4) g is the *risk weight* of *exposures* to the protection provider as specified under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 88]

Calculating risk weighted exposure amounts: standardised approach:
Sovereign guarantees

- 5.7.25 R A *firm* may apply the treatment provided for in *BIPRU 3.4.5R* to *BIPRU 3.4.7R* to *exposures* or parts of *exposures* guaranteed by the central government or *central bank*, where the guarantee is denominated in the domestic currency of the borrower and the *exposure* is funded in that currency.

[Note: BCD Annex VIII Part 3 point 89]

Calculating risk-weighted exposure amounts and expected loss amounts:
Basket CRM techniques

- 5.7.26 R *BIPRU 5.7.27R* to *BIPRU 5.7.28R* set out the provisions applying to the calculation of *risk weighted exposure amounts* and *expected loss* amounts where basket *credit risk mitigation* techniques are used.

First-to-default credit derivatives

- 5.7.27 R Where a *firm* obtains credit protection for a number of *exposures* under terms that the first default among the *exposures* will trigger payment and that this credit event will terminate the contract, the *firm* may modify the calculation of the *risk weighted exposure amount* and, as relevant, the *expected loss* amount of the *exposure* which would in the absence of the credit protection produce the lowest *risk weighted exposure amount* under the *standardised approach* or the *IRB approach* as appropriate in accordance with *BIPRU 4.10* or *BIPRU 5*, but only if the *exposure* value is less than or equal to the value of the credit protection.

[Note: BCD Annex VIII Part 6 point 1]

Nth-to-default credit derivatives

- 5.7.28 R Where the *n*th default among the *exposures* triggers payment under the credit protection provided by a credit derivative, a *firm* purchasing the protection may only recognise the protection for the calculation of *risk weighted exposure amounts* and, as relevant, *expected loss* amounts if protection has also been obtained for defaults 1 to *n-1* or when *n-1* defaults have already occurred. In such cases the methodology must follow that set out in *BIPRU 5.7.27R* for first-to-default derivatives appropriately modified for *n*th-to-default products.

[**Note:** *BCD* Annex VIII Part 6 point 2]

5.8 Maturity mismatches

- 5.8.1 R For the purposes of calculating *risk weighted exposure amounts*, a maturity mismatch occurs when the residual maturity of the credit protection is less than that of the protected *exposure*. Protection of less than three months residual maturity, the maturity of which is less than the maturity of the underlying *exposure*, must not be recognised.

[Note: BCD Annex VIII Part 4 point 1]

- 5.8.2 R Where there is a maturity mismatch the credit protection must not be recognised where the original maturity of the protection is less than 1 year.

[Note: BCD Annex VIII Part 4 point 2 (part)]

Definition of maturity

- 5.8.3 R Subject to a maximum of 5 years, the effective maturity of the underlying is the longest possible remaining time before the obligor is scheduled to fulfil its obligations. Subject to *BIPRU 5.8.4R*, the maturity of the credit protection is the time to the earliest date at which the protection may terminate or be terminated.

[Note: BCD Annex VIII Part 4 point 3]

- 5.8.4 R Where there is an option to terminate the protection which is at the discretion of the protection seller, the maturity of the protection must be taken to be the time to the earliest date at which that option may be exercised. Where there is an option to terminate the protection which is at the discretion of the protection buyer and the terms of the arrangement at origination of the protection contain a positive incentive for the *firm* to call the transaction before contractual maturity, the maturity of the protection must be taken to be the time to the earliest date at which that option may be exercised; otherwise such an option may be considered not to affect the maturity of the protection.

[Note: BCD Annex VIII Part 4 point 4]

- 5.8.5 R Where a credit derivative is not prevented from terminating prior to expiration of any grace period required for a default on the underlying obligation to occur as a result of a failure to pay the maturity of the protection must be reduced by the amount of the grace period.

[Note: BCD Annex VIII Part 4 point 5]

Valuation of protection: Transactions subject to funded credit protection - financial collateral simple method

- 5.8.6 R *BIPRU 5.8.7R* sets out the calculation for the valuation of transactions

subject to *funded credit protection* under the *financial collateral simple method*.

- 5.8.7 R Where there is a mismatch between the maturity of the *exposure* and the maturity of the protection, the collateral must not be recognised.

[Note: BCD Annex VIII Part 4 point 6]

Valuation of protection: Transactions subject to funded credit protection - financial collateral comprehensive method

- 5.8.8 R *BIPRU 5.8.9R* sets out the calculation for the valuation of transactions subject to *funded credit protection* under the *financial collateral comprehensive method*.

- 5.8.9 R (1) The maturity of the credit protection and that of the *exposure* must be reflected in the adjusted value of the collateral according to the following formula:

$$C_{VAM} = C_{VA} \times (t-t^*) / (T-t^*)$$

where:

- (a) C_{VA} is the volatility adjusted value of the collateral as specified in *BIPRU 5.4.28R* or the amount of the *exposure*, whichever is the lowest;
 - (b) t is the number of years remaining to the maturity date of the credit protection calculated in accordance with *BIPRU 5.8.3R* to *BIPRU 5.8.5*, or the value of T , whichever is the lower;
 - (c) T is the number of years remaining to the maturity date of the *exposure* calculated in accordance with *BIPRU 5.8.3R* to *BIPRU 5.8.5*, or 5 years, whichever is the lower; and
 - (d) t^* is 0.25.
- (2) C_{VAM} must be taken as C_{VA} further adjusted for maturity mismatch to be included in the formula for the calculation of the fully adjusted value of the *exposure* (E^*) set out at *BIPRU 5.4.28R*.

[Note: BCD Annex VIII Part 4 point 7]

Valuation of protection: Transactions subject to unfunded credit protection

- 5.8.10 R *BIPRU 5.8.11R* sets out the calculation for the valuation of transactions subject to *unfunded credit protection*.

- 5.8.11 R (1) The maturity of the credit protection and that of the *exposure* must be reflected in the adjusted value of the credit protection according to the following formula:

$$G_A = G^* \times (t-t^*) / (T-t^*)$$

where:

- (a) G^* is the amount of the protection adjusted for any currency mismatch;
 - (b) G_A is G^* adjusted for any maturity mismatch;
 - (c) t is the number of years remaining to the maturity date of the credit protection calculated in accordance with *BIPRU 5.8.3R* to *BIPRU 5.8.5R*, or the value of T , whichever is the lower;
 - (d) T is the number of years remaining to the maturity date of the *exposure* calculated in accordance with *BIPRU 5.8.3R* to *BIPRU 5.8.5R*, or 5 years, whichever is the lower; and
 - (e) t^* is 0.25.
- (2) G_A is then taken as the value of the protection for the purposes of *BIPRU 5.7.16R* to *BIPRU 5.7.25R*.

[**Note:** *BCD Annex VIII Part 4 point 8*]

- 5.9 Combinations of credit risk mitigation in the standardised approach
- 5.9.1 R In the case where a *firm* calculating *risk weighted exposure amounts* under the *standardised approach* has more than one form of *credit risk mitigation* covering a single *exposure* (e.g. a *firm* has both collateral and a guarantee partially covering an *exposure*), *the firm* must subdivide the *exposure* into parts covered by each type of *credit risk mitigation* tool (e.g. a part covered by collateral and a portion covered by guarantee) and the *risk-weighted exposure amount* for each portion must be calculated separately in accordance with the provisions of the *standardised approach* and *BIPRU 5*.
- [**Note:** *BCD Annex VIII Part 5 point 1*]
- 5.9.2 R When credit protection provided by a single protection provider has differing maturities, a similar approach to that described in *BIPRU 5.9.1R* must be applied.
- [**Note:** *BCD Annex VIII Part 5 point 2*]

- 6 Operational risk
- 6.1. Operational risk: Application and purpose
- Application
- 6.1.1 R *BIPRU 6* applies to a *BIPRU firm* except for:
- (1) a *BIPRU limited licence firm*; and
 - (2) a *BIPRU limited activity firm*.
- 6.1.2 G A *BIPRU limited licence firm* or *BIPRU limited activity firm* that wishes to calculate an *operational risk capital requirement* in accordance with this chapter for the purposes of its *capital resources requirement* should apply for a *waiver* to modify *GENPRU 1.1* or seek a variation to its *permission* so that it is treated as a *full scope BIPRU investment firm*.
- Purpose
- 6.1.3 G The purpose of *BIPRU 6* is:
- (1) to detail the requirement to hold capital to cover *operational risk* losses and have appropriate systems and controls in place to manage *operational risk*; and
 - (2) to explain how to calculate the *operational risk capital requirement*, or *ORCR*.
- 6.1.4 G *BIPRU 6* implements:
- (1) Articles 102 to 104;
 - (2) Article 105, in part; and
 - (3) Annex X;
- of the *Banking Consolidation Directive*.
-

6.2 Operational risk: Methodologies and systems

The definition of ORCR

6.2.1 R The *operational risk capital requirement (ORCR)* for a *firm* is an amount calculated in accordance with:

(1) the *basic indicator approach* (see *BIPRU* 6.3); or

(2) the *standardised approach* (see *BIPRU* 6.4).

[Note: *BCD* Article 102(1)]

6.2.2 G The simplest method of calculating the *ORCR* is the *basic indicator approach* and a *firm* should use this approach if it does not, or is not permitted to, use another approach.

6.2.3 G A *firm* does not need a *waiver* to use the *standardised approach*. However there are eligibility conditions that a *firm* should satisfy if it is to use this approach. If it does not satisfy them, it should not use this approach.

6.2.4 G A *firm* may apply to the *FSA* for a *waiver* from *BIPRU* 6.2.1R in order to use its own *advanced measurement approach* for the calculation of its *ORCR* (see *BIPRU* 6.5). If the *waiver* is granted, the *ORCR* will be an amount determined in accordance with such *waiver*.

[Note: *BCD* Article 105(1)]

Restrictions on changing the approach used for calculating ORCR

6.2.5 R A *firm* that calculates its *ORCR* using the *standardised approach* must not change to calculating its *ORCR* using the *basic indicator approach*.

[Note: *BCD* Article 102(2) (part)]

6.2.6 G A *firm* may apply to the *FSA* for a *waiver* from *BIPRU* 6.2.5R where it can demonstrate good cause for changing to the *basic indicator approach*.

[Note: *BCD* Article 102(2) (part)]

6.2.7 R A *firm* that calculates its *ORCR* using an *advanced measurement approach* must not change to calculating its *ORCR* using the *standardised approach* or the *basic indicator approach*.

[Note: *BCD* Article 102(3) (part)]

6.2.8 G A *firm* may apply to the *FSA* for a *waiver* from *BIPRU* 6.2.7R where it can demonstrate good cause for changing to *standardised approach* or the *basic indicator approach* as the case may be.

[Note: BCD Article 102(3) (part)]

Combination of different methodologies

- 6.2.9 R Without prejudice to any other conditions that may be imposed by a *firm's AMA permission*, where a *firm's AMA permission* allows it to use an *advanced measurement approach* in combination with either the *basic indicator approach* or the *standardised approach*, the *firm* must comply with the following conditions:
- (1) all *operational risks* of the *firm* are captured;
 - (2) the *firm* must be able to satisfy the *FSA* with respect to the methodology used to cover different activities, geographical locations or other relevant divisions determined on an internal basis; and
 - (3) *BIPRU 6.4.1R* and *BIPRU 6.5.6R* must be complied with for the part of activities covered by the *standardised approach* and *advanced measurement approaches* respectively.

[Note: BCD Article 102(4) and Annex X, Part 4 point 1]

- 6.2.10 G Where a *firm's AMA permission* allows it to use an *advanced measurement approach* in combination with either the *basic indicator approach* or the *standardised approach*, the *FSA* may impose additional conditions on a case by case basis as follows:
- (1) on the date of implementation of an *advanced measurement approach*, a significant part of the *firm's operational risks* are captured by the *advanced measurement approach*; and
 - (2) the *firm* is obliged to roll out the *advanced measurement approach* to a material part of its operations within a time schedule set out in its *AMA permission*.

[Note: BCD Annex X, Part 4 point 2]

- 6.2.11 R A *firm* applying for an *AMA permission* to use a combination of different approaches must be able to show that:
- (1) at the date of implementation of the *advanced measurement approach*, approximately 50% (or more) of the *firm's operational risk* is captured under the *AMA*; and
 - (2) the *firm* has committed to roll out the *advanced measurement approach* for around 85% (or more) of its *operational risk*, subject to the remaining percentage not being concentrated in a single operation, within a timescale set out in the *AMA permission*.

- 6.2.12 R For the determination of its *ORCR*, a *firm* must not use any of the following combinations of methodologies:
-

- (1) the *basic indicator approach* with the *standardised approach*;
- (2) the *basic indicator approach* with the *alternative standardised approach*; or
- (3) the *standardised approach* with the *alternative standardised approach* for the same business line.

6.2.13 G A *firm* may apply to the *FSA* for a *waiver* from *BIPRU* 6.2.12R(1) and (2) in exceptional circumstances, such as the recent acquisition of new business, which require a transition period for the roll out of the *standardised approach* (or the *alternative standardised approach*). In this event, a *firm* will need to make a commitment to roll out the *standardised approach* (or the *alternative standardised approach*) within a time schedule agreed with the *FSA*.

[**Note:** *BCD* Annex X, Part 4 points 3 and 4]

6.3 Operational risk: Basic indicator approach

ORCR

- 6.3.1 R The *ORCR* under the *basic indicator approach* is equal to 15% of the relevant indicator defined in this section.

[**Note:** *BCD* Article 103 and Annex X, Part 1 point 1]

Relevant indicator: General

- 6.3.2 R (1) The relevant indicator is the three-year average of the sum of:
- (a) a *firm's* net interest income; and
 - (b) a *firm's* net non-interest income.
- (2) The three-year average must be calculated on the basis of the last three yearly observations at the end of the financial year. When audited figures are not available, business estimates may be used.
- (3) If for any given observation, the sum of a *firm's* net interest income and net non-interest income, is negative or equal to zero, this figure must be excluded from both the numerator and denominator when calculating the three year average. The relevant indicator must be calculated as the sum of the positive figures divided by the number of positive figures.

[**Note:** *BCD* Annex X, Part 1 points 2 to 4]

Relevant indicator: An example calculation

- 6.3.3 G If a *firm* has: . . .
- (1) two positive yearly relevant indicators of £20 each; and
 - (2) the final yearly observation shows a negative figure of £5; then
- the relevant indicator is calculated as £20, being £40 (sum of positive figures) divided by 2 (number of positive figures).

Relevant indicator: Insufficient income data

- 6.3.4 G A *firm* that does not have sufficient income data to meet the three-year requirement (e.g. a start-up) may use its forecasted gross income projections for all or part of the three year time period when calculating its relevant indicator.

Relevant indicator: Application of accounting categories

- 6.3.5 R (1) This *rule* applies to a *firm* that is subject to the *Bank Accounts Directive*.
-

- (2) Based on accounting categories for the profit and loss account of *credit institutions* under Article 27 of the *Bank Accounts Directive*, the relevant indicator in *BIPRU* 6.3.2R must be expressed as the sum of the elements listed in the table in *BIPRU* 6.3.6R.
- (3) Each element in the table in *BIPRU* 6.3.6R must be included in the sum with its positive or negative sign.

[Note: *BCD* Annex X, Part 1 point 5]

- 6.3.6 R Table: Relevant indicators
This table belongs to *BIPRU* 6.3.5R

1	Interest receivable and similar income
2	Interest payable and similar charges
3	Income from shares and other variable/fixed-yield securities.
4	Commissions/fees receivable
5	Commission/fees payable
6	Net profit or net loss on financial operations
7	Other operating income

- 6.3.7 G Income from a *participation* held in an *undertaking* by the *firm* or a *subsidiary undertaking* of the *firm* should not be included in the relevant indicator calculations, to ensure that intra-group dividends and other intra-group income flows are not double counted.
- 6.3.8 G Income received under an operating lease should be included as gross income less depreciation, not as gross rental income.
- 6.3.9 G (1) If a *firm* considers that, due to exceptional circumstances, using a three year average to calculate the relevant indicator would lead to a major overestimation of its *ORCR*, the *firm* may apply for a *waiver* from *BIPRU* 6.3.2R.
- (2) Exceptional circumstances might include stopping or selling a major business line.

Qualifications

- 6.3.10 R (1) The relevant indicator for the *basic indicator approach* must be calculated before the deduction of any provisions and operating expenses.

- (2) Operating expenses must include fees paid for outsourcing services rendered by third parties which are not a *parent undertaking* or *subsidiary undertaking* of the *firm* or a *subsidiary undertaking* of a *parent undertaking* which is also the *parent undertaking* of the *firm*. Expenditure on the outsourcing of services rendered by third parties may reduce the relevant indicator if the expenditure is incurred by an undertaking subject to supervision under, or equivalent to, the *Banking Consolidation Directive*.

[Note: *BCD Annex X, Part 1 point 7*]

- 6.3.11 G The definition of 'outsourcing' for the purposes of *BIPRU 6.3.10R(2)* is set out in detail in a Joint Forum paper of the Basel Committee on Banking Supervision entitled "Outsourcing in Financial Services" dated February 2005 and can be summarised as meaning a *firm's* use of a third party to perform activities on a continuing basis that would normally be undertaken by the *firm*, now or in the future and can be the initial transfer of an activity (or part of that activity) from the *firm* to a third party or a further transfer of an activity (or part thereof) from one third party service provider to another.
- 6.3.12 R The following elements must not be used in the calculation of the relevant indicator:
- (1) realised profits/losses from the sale of *non-trading book* items;
 - (2) income from extraordinary or irregular items; and
 - (3) income derived from insurance.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

- 6.3.13 R When revaluation of trading items is part of the profit and loss statement, revaluation may be included in the calculation of the relevant indicator.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

- 6.3.14 R When Article 36(2) of the *Bank Accounts Directive* is applied, revaluation booked in the profit and loss account must be included in the calculation of the relevant indicator.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

- 6.3.15 R When a *firm* is subject to an accounting framework different from the one established by the *Bank Accounts Directive*, it must calculate the relevant income indicator on the basis of internal data that best reflect the definition in this section.

[Note: *BCD Annex X, Part 1 points 6 and 9*]

General risk management standards

- 6.3.16 G In common with all *BIPRU firms*, a *firm* calculating its *ORCR* using the *basic indicator approach* is required to meet the general risk management standards set out in *SYSC 4.1.1R* to *SYSC 4.1.2R* and *SYSC 7.1.15R*.
-

6.4 Operational risk: Standardised approach

Eligibility

- 6.4.1 R (1) To be eligible for the *standardised approach*, a *firm* must meet the qualifying criteria set out in this *rule*, in addition to the general risk management standards set out in SYSC 4.1.1R to SYSC 4.1.2R and SYSC 7.1.15R.
- (2) A *firm* must have a well-documented assessment and management system for *operational risk* with clear responsibilities for the system assigned within the *firm*. The system must identify the *firm's* exposures to *operational risk* and track relevant *operational risk* data, including material loss data.
- (3) A *firm's operational risk* assessment and management system must be subject to regular independent review.
- (4) A *firm's operational risk* assessment system must be closely integrated into the *firm's* risk management processes. Its output must be an integral part of the process of monitoring and controlling the *firm's operational risk* profile.
- (5) A *firm* must implement a system of management reporting that provides *operational risk* reports to relevant functions within the *firm*. A *firm* must have procedures in place for taking appropriate action in response to the information contained in such reports.

[Note: BCD Article 104(6) and Annex X, Part 2 point 12 (part)]

- 6.4.2 R A *firm* must comply with the criteria in BIPRU 6.4.1R having regard to the size and scale of its activities and to the principle of proportionality.

[Note: BCD Annex X, Part 2 point 12 (part)]

Business lines

- 6.4.3 R Under the *standardised approach*, a *firm* must divide its activities into a number of business lines as set out in this section.

[Note: BCD Article 104(1)]

- 6.4.4 G The list of activities in BIPRU 6.4.15R is not a complete definition of the activities within a business line and it may be possible for an activity to be allocated to a business line other than the one to which it is attributed in BIPRU 6.4.15R.

- 6.4.5 R For each business line, a *firm* must calculate a capital requirement for *operational risk* as a certain percentage of a relevant indicator, in accordance with the *rules* in this section.

[Note: BCD Article 104(2)]

ORCR calculated using the standardised approach

- 6.4.6 R The *ORCR* under the *standardised approach* is the average over three years of the risk weighted relevant indicators calculated each year across the business lines in 6.4.15 R.

[Note: BCD Annex X, Part 2 point 1 (part)]

- 6.4.7 R In each year, a negative capital requirement in one business line, resulting from a negative relevant indicator, may be imputed to the whole. However, where the aggregate capital charge across all business lines within a given year is negative, then the input to the average for that year must be zero.

[Note: BCD Annex X, Part 2 point 1 (part)]

- 6.4.8 G (1) If a *firm* considers that, due to exceptional circumstances, using a three year average to calculate the relevant indicator would lead to a major overestimation of its *ORCR*, the *firm* may apply for a *waiver* from *BIPRU* 6.4.5R.
- (2) Exceptional circumstances might include stopping or selling a major business line.

Relevant indicator

- 6.4.9 R The three year average in *BIPRU* 6.4.6R must be calculated on the basis of the last three twelve monthly observations at the end of the financial year. When audited figures are not available, business estimates may be used.

[Note: BCD Annex X, Part 2 point 2]

Principles for business line mapping

- 6.4.10 R A *firm* must develop and document specific policies and criteria for mapping the relevant indicator for current business lines and activities into the framework for the *standardised approach*. The criteria must be reviewed and adjusted for new or changing business activities and risks as appropriate.

[Note: BCD Annex X, Part 2 point 4 (part)]

- 6.4.11 R (1) The principles for business line mapping that a *firm* must meet are set out in this *rule*.
- (2) All activities must be mapped into the business lines in a mutually exclusive and jointly exhaustive manner.
-

- (3) Any activity which cannot be readily mapped into the business line framework, but which represents an ancillary function to an activity included in the framework, must be allocated to the business line it supports. If more than one business line is supported through the ancillary activity, an objective mapping criterion must be used (e.g., proportional allocation of the indicators).
- (4) If an activity cannot be mapped into a particular business line then the business line yielding the highest charge for the *firm* must be used. The same business line equally applies to any associated ancillary activity.
- (5) A *firm* may use internal pricing methods to allocate the relevant indicator between business lines.
- (6) The mapping of activities into business lines for *operational risk* capital purposes must be consistent with the definitions of business lines used by the *firm* for credit and market risks.
- (7) Senior management must be responsible for the mapping policy.
- (8) The mapping process to business lines must be subject to independent review.

[Note: BCD Annex X, Part 2 point 4 (part)]

- 6.4.12 G A *firm* that is mapping activities to a business line should take into account:
- (1) the activities listed in respect of each business line in the table in *BIPRU* 6.4.15R; and
 - (2) the organisation of the *firm's* business in respect of that business line.
- 6.4.13 G A *firm* should take into account its business and organisation when mapping activities to the business lines in the table in *BIPRU* 6.4.15R.
- 6.4.14 R For the purposes of *BIPRU* 6.4.11R(5), costs generated in one business line which are imputable to a different business line may be reallocated to the business line to which they pertain, for instance by using a treatment based on internal transfer costs between two business lines.
- [Note: BCD Annex X, Part 2 point 4 (part)]
- 6.4.15 R Table: Percentages applying to the income indicator of individual business lines
This table belongs to *BIPRU* 6.4.3R

Business line	List of activities	Percentage
Corporate finance	<ul style="list-style-type: none"> • Underwriting of financial instruments and/or placing of financial instruments 	18%

Business line	List of activities	Percentage
	<p>on a firm commitment basis</p> <ul style="list-style-type: none"> • Services related to underwriting • Investment advice • Advice to <i>undertakings</i> on capital structure, industrial strategy and related matters and advice and services relating to the mergers and the purchase of <i>undertakings</i> • Investment research and financial analysis and other forms of general recommendation relating to transactions in financial instruments 	
Trading and sales	<ul style="list-style-type: none"> • Dealing on own account • Money broking • Reception and transmission of orders in relation to one or more financial instruments • Execution of orders on behalf of clients • Placing of financial instruments on a best efforts basis • Operation of <i>multilateral trading facilities</i> 	18%
Retail brokerage (Activities with individual physical persons or with a <i>retail SME</i> as defined under the <i>standardised approach</i> to credit risk)	<ul style="list-style-type: none"> • Reception and transmission of orders in relation to one or more financial instruments • Execution of orders of behalf of clients • Placing of financial instruments without a firm commitment basis 	12%
Commercial banking	<ul style="list-style-type: none"> • Acceptance of deposits and other repayable funds • Lending • Financial leasing 	15%

Business line	List of activities	Percentage
	<ul style="list-style-type: none"> • Guarantees and commitments 	
Retail banking (Activities with an individual physical persons or with a <i>retail SME</i> as defined under the <i>standardised approach</i> to credit risk)	<ul style="list-style-type: none"> • Acceptance of deposits and other repayable funds • Lending • Financial leasing • Guarantees and commitments 	12%
Payment and settlement	<ul style="list-style-type: none"> • Money transmission services • Issuing and administering means of payment 	18%
Agency services	<ul style="list-style-type: none"> • Safekeeping and administration of financial instruments for the account of clients including custodianship and related services such as cash/collateral management 	15%
Asset management	<ul style="list-style-type: none"> • Portfolio management • UCITS management and other forms of asset management 	12%

The alternative standardised approach

- 6.4.16 G Under the *alternative standardised approach*, a *firm* using the *standardised approach* may use alternative indicators for retail banking and commercial banking business lines if it complies with *BIPRU* 6.4.17R to 6.4.21R.

[Note: *BCD* Annex X, Part 2 point 3]

Eligibility for the alternative standardised approach

- 6.4.17 R To be eligible to use the *alternative standardised approach*, a *firm* must meet the following conditions, in addition to the general risk management standards set out in *SYSC* 4.1.1R to *SYSC* 4.1.2R and *SYSC* 7.1.15R:

- (1) the *firm* must meet the eligibility criteria for the *standardised approach* in *BIPRU* 6.4.1R;
- (2) the *firm* must be overwhelmingly active in retail and/or commercial banking activities, which must account for at least 90% of its income; and

- (3) the *firm* must be able to demonstrate that a significant proportion of its retail and/or commercial banking activities comprise loans associated with a high *probability of default*, and that the *alternative standardised approach* provides an improved basis for assessing the *operational risk*.

[Note: BCD Article 104(3) and Annex X, Part 2 points 5 and 8 to 11]

- 6.4.18 G In relation to BIPRU 6.4.18R(3), the FSA's view is that a high *probability of default* is equal to or greater than 3.5%.

ORCR calculated using the alternative standardised approach

- 6.4.19 R (1) The relevant indicators under the *alternative standardised approach* are the same as for the *standardised approach* except for the two following business lines:
- (a) retail banking; and
 - (b) commercial banking.
- (2) For retail banking and commercial banking, the *ORCR* must be calculated as a normalised income indicator equal to the three-year average of the total nominal amount of loans and advances multiplied:
- (a) by 0.035, and then
 - (b) by the appropriate business line percentage set out in BIPRU 6.4.15R.

[Note: BCD Annex X, Part 2 point 6]

- 6.4.20 R For the retail and/or commercial banking business lines, the loans and advances must consist of the total drawn amounts in the corresponding credit portfolios.

[Note: BCD Annex X, Part 2 point 7 (part)]

- 6.4.21 R For the commercial banking business line, the securities held in the *non-trading book* must also be included.

[Note: BCD Annex X, Part 2 point 7 (part)]

6.5 Operational risk: Advanced measurement approaches

Application

6.5.1 R *BIPRU 6.5 applies to a BIPRU firm with an AMA permission.*

AMA permissions: general

6.5.2 G The *rules* in *GENPRU* and *BIPRU* do not allow a *firm* to use the *advanced measurement approach*. A *firm* that wishes to use an *advanced measurement approach*, based on the *firm's* own *operational risk* measurement systems, for the calculation of its *ORCR* should therefore apply for *AMA permission* to use the *advanced measurement approach* as explained in *BIPRU 1.3*.

6.5.3 G The *FSA* will not grant a *firm* an *AMA permission* to use the *advanced measurement approach* if the *firm* does not meet the standards in *BIPRU 6.5.5R*.

6.5.4 G An *AMA permission* will generally modify *BIPRU 6.2.1R* (Calculation of *ORCR*) by amending, to the extent set out in the *AMA permission*, the calculation of the *ORCR* of the *firm* to be calculated in accordance with *BIPRU 6.5*.

Minimum standards

6.5.5 R A *firm* must be able to satisfy the *FSA* that it meets:

- (1) the general risk management standards in *SYSC 4.1.1R* to *SYSC 4.1.2R* and *SYSC 7.1.15R*;
- (2) the qualitative standards set out in this section; and
- (3) the quantitative standards set out in this section.

[**Note:** *BCD* Article 105(2) and Annex X Part 3 point 1]

Qualitative standards

- 6.5.6 R
- (1) This *rule* sets out the qualitative standards that a *firm's operational risk* measurement system must meet.
 - (2) A *firm's* internal *operational risk* measurement system must be closely integrated into its day-to-day risk management processes.
 - (3) A *firm* must have an independent risk management function for *operational risk*.
 - (4) There must be regular reporting of *operational risk* exposures and loss experience. The *firm* must have procedures for taking appropriate corrective action.
 - (5) A *firm's* risk management system must be well documented. The *firm* must have a routine in place for ensuring compliance and policies for the treatment of non-compliance.
-

- (6) A *firm's operational risk* management processes and measurement systems must be subject to regular reviews performed by internal and/or external auditors.
- (7) A *firm* must ensure that in respect of its *operational risk* measurement system:
 - (a) its internal validation processes are operating in a satisfactory manner; and
 - (b) the data flows and processes associated with the risk measurement system are transparent and accessible.

[Note: BCD Annex X Part 3 points 2 to 7]

- 6.5.7 G For the purposes of *BIPRU* 6.5.6R(2), a *firm* should be able to show that:
- (1) its *operational risk* measurement systems and processes provide benefits to the *firm* and are not limited to determining regulatory capital;
 - (2) the *operational risk* measurement system and framework forms part of the systems and controls it has in place; and
 - (3) the *operational risk* measurement system and framework are capable of adapting to the changes in the business of the *firm* and evolving as the *firm* gains experience of risk management techniques.
- 6.5.8 G For the purposes of *BIPRU* 6.5.6R(3), a *firm* should be able to show that the independent risk management function is sufficiently separate from the business units of the *firm* to allow its professional judgement and recommendations to be effective and impartial.
- 6.5.9 G For the purposes of *BIPRU* 6.5.6R(4), a *firm* should ensure that:
- (1) its *governing body* or *designated committee* (where one is used) possesses a general understanding of the *firm's AMA*; and
 - (2) its senior management possesses a good understanding of the *firm's AMA* and its operation.
- 6.5.10 G
- (1) A *firm's governing body* or *designated committee* may choose to approve only material aspects of the *firm's AMA* and material changes to the *firm's AMA*.
 - (2) Where a *firm's governing body* or *designated committee* chooses to approve only material aspects of the *firm's AMA* and material changes to the *firm's AMA*:
-

- (a) the *firm's governing body* or *designated committee* should define the *firm's* overall approach to the *AMA* and approve a policy statement defining that approach; and
- (b) the *firm* should define and document the process for approval of non-material aspects of the *firm's AMA*.

6.5.11 G For the purposes of *BIPRU* 6.5.6R(7), a *firm* should develop and adopt an internal validation methodology of its *operational risk* measurement system and management processes that:

- (1) is proportionate and appropriate to the business of the *firm*;
- (2) takes into account changing market and operating conditions of the *firm*;
- (3) encompasses both quantitative and qualitative methods of the *firm's operational risk* measurement system;
- (4) is periodically assessed by the *firm*;
- (5) is subject to regular independent review to ensure effective implementation; and
- (6) is clearly documented;

Quantitative standards: process

- 6.5.12 R
- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to process.
 - (2) A *firm* must calculate its capital requirement as comprising both expected loss and unexpected loss, unless the *firm* can demonstrate that expected loss is adequately captured in its internal business practices.
 - (3) The *operational risk* measure of a *firm* must capture potentially severe tail events, achieving a soundness standard comparable to a 99.9% confidence interval over a one year period.
 - (4) The *operational risk* measurement system of a *firm* must have certain key elements to meet the soundness standard set out in (2) and (3). These elements must include the use of internal data, external data, scenario analysis and factors reflecting the business environment and internal control systems as set out in *BIPRU* 6.5.21R to *BIPRU* 6.5.25R.
 - (5) A *firm* must have a well documented approach for weighting the use of the four elements in (4) in its overall risk measurement system.
 - (6) A *firm's* risk measurement system must capture the major drivers of risk affecting the shape of the tail of the loss estimates.
-

- (7) A *firm* must only recognise correlations in *operational risk* losses across individual *operational risk* estimates to the extent they are set out in its *AMA permission*. The *firm* must validate its correlation assumptions using appropriate quantitative and qualitative techniques.
- (8) A *firm's* risk measurement system must be internally consistent and must avoid the multiple counting of qualitative assessments or risk mitigants recognised in other areas of the capital adequacy framework.

[**Note:** *BCD* Annex X Part 3 points 8 to 10, 11 (part) and 12]

- 6.5.13 R For the purposes of *BIPRU* 6.5.12R(7), the *firm* must be able to show that its system for measuring correlations is sound, implemented with integrity, and takes into account the uncertainty surrounding any such correlation estimates, particularly in periods of stress.

[**Note:** *BCD* Annex X Part 3 point 11 (part)]

- 6.5.14 G A *firm* should be able to satisfy the *FSA* that it has considered the following with respect to its *operational risk* measurement systems:
- (1) whether the choice of distributions used provides both a good fit with the data and an ability adequately to account for rare events;
 - (2) whether the estimated parameters and capital numbers used for the simulated inclusion or exclusion of unusually large losses are sufficiently robust;
 - (3) the co-dependency, or independency, of assumptions governing the relationships between risk types and between business lines;
 - (4) the number of simulations or iterations required during model execution to provide reasonably stable capital results;
 - (5) the emergence of different data types, such as the combination of internal and external loss data, based on different degrees of credibility; and
 - (6) the methodologies used for the purposes of achieving a soundness standard comparable to a 99.9% confidence interval.

- 6.5.15 G For the purposes of *BIPRU* 6.5.12R(2), a *firm* should be able to show that its *operational risk* measurement systems that capture expected loss are:
- (1) clearly documented;
 - (2) sound, implemented with integrity and consistently applied, and take into account uncertainty surrounding expected loss;
 - (3) subject to regular reviews by the *firm* of the reasonableness of the expected loss estimates and comparisons with subsequent outcomes; and
-

- (4) based on justifiable assumptions for capturing and reviewing the reasonableness of the expected loss estimates.
- 6.5.16 G For the purposes of *BIPRU* 6.5.15G, the *firm* should use the business management definition it uses for the purposes of identifying an expected loss.
- 6.5.17 G Where a *firm* is using a combination of budgeting and pricing for the purposes of the *operational risk* measurement system for capturing expected loss, a *firm* should be able to show that:
- (1) the process is transparent, can be repeated and provides support to the *firm's* management of its business;
 - (2) to a reasonable degree of certainty, budgeted resources for the relevant year cover budgeted expected losses;
 - (3) its forecasting takes into account both historic performance and drivers which may affect future trends; and
 - (4) the forecasting in (3) is monitored on a periodic basis and adjusted as appropriate.
- 6.5.18 G For the purposes of *BIPRU* 6.5.12R(3), a *firm* should be able to show that in respect of its *operational risk* measurement system:
- (1) the methodology for obtaining a soundness standard comparable to a 99.9% confidence level is practical and appropriate;
 - (2) it has assessed its overall model outputs as sufficiently robust; and
 - (3) it reviews its methodology on an ongoing basis.
- 6.5.19 G For the purpose of developing and reviewing its methodology for obtaining a soundness standard comparable to a 99.9% confidence level, a *firm* should consider whether any of the following are appropriate:
- (1) stress testing;
 - (2) sensitivity analysis;
 - (3) scenario analysis;
 - (4) back testing; and
 - (5) boot-strapping techniques.
- 6.5.20 G Where a *firm* is using scaling for the purposes of the *operational risk* measurement system, it should be able to show that the methodology used is robust and based on assumptions that are meaningful and credible.

Quantitative standards: internal data

- 6.5.21 R (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to internal data.
- (2) A *firm's* internally generated *operational risk* measures must be based on a minimum historical observation period of five years. When a *firm* first moves to the *advanced measurement approach*, a three year historical observation period may be used.
- (3) A *firm* must be able to map its historical internal loss data into the business lines defined in *BIPRU 6.4.15R* and into the event type categories defined in *BIPRU 6.5.25R*, and must be able to provide this data to the FSA upon request. The *firm* must have documented, objective criteria for allocating losses to the specified business lines and event types. A *firm's operational risk* losses that are related to credit risk and have historically been included in the internal credit risk databases must be recorded in the *operational risk* databases and be separately identified. Such losses will not be subject to the *ORCR*, as long as they continue to be treated as credit risk for the purposes of calculating the *capital resources requirement*. *Operational risk* losses that are related to market risks must be included in the scope of the capital requirement for *operational risk*.
- (4) A *firm's* internal loss data must be comprehensive in that it captures all material activities and exposures from all appropriate sub-systems and geographic locations. A *firm* must be able to demonstrate that any excluded activities or exposures, both individually and in combination, would not have a material impact on the overall risk estimates. A *firm* must define appropriate minimum loss thresholds for internal loss data collection.
- (5) Aside from information on gross loss amounts, a *firm* must collect information about the date of the event, any recoveries of gross loss amounts, as well as some descriptive information about the drivers or causes of the loss event.
- (6) A *firm* must have specific criteria for assigning loss data arising from an event in a centralised function or an activity that spans more than one business line, as well as from related events over time.
- (7) A *firm* must have documented procedures for assessing the ongoing relevance of historical loss data, including those situations in which judgement overrides, scaling or other adjustments may be used, to what extent they may be used and who is authorised to make such decisions.

[**Note:** *BCD Annex X Part 3 points 13 to 18*]

Quantitative standards: external data

- 6.5.22 R (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to external data.
-

- (2) A *firm's operational risk* measurement system must use relevant external data, especially when there is reason to believe that the *firm* is exposed to infrequent, yet potentially severe, losses. A *firm* must have a systematic process for determining the situations for which external data should be used and the methodologies used to incorporate the data in its measurement system. The conditions and practices for external data use should be regularly reviewed, documented and subject to periodic independent review.

[**Note:** BCD Annex X Part 3 point 19]

Quantitative standards: scenario analysis

- 6.5.23 R
- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to scenario analysis.
 - (2) A *firm* must use scenario analysis of expert opinion in conjunction with external data to evaluate its exposure to high severity events. Over time, such assessments must be validated and re-assessed through comparison to actual loss experience to ensure their reasonableness.

[**Note:** BCD Annex X Part 3 point 20]

Quantitative standards: business environment and internal control factors

- 6.5.24 R
- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to business environment and internal control factors.
 - (2) A *firm's firm-wide* risk assessment methodology must capture key business environment and internal control factors that can change its *operational risk* profile.
 - (3) A *firm* must be able to justify the choice of each factor as a meaningful driver of risk, based on experience and involving the expert judgment of the affected business areas.
 - (4) The sensitivity of risk estimates to changes in the factors and the relative weighting of the various factors must be well reasoned. In addition to capturing changes in risk due to improvements in risk controls, the framework must also capture potential increases in risk due to greater complexity of activities or increased business volume.
 - (5) A *firm* must document this framework and make it subject to independent review within the *firm* and make it available for review by supervisors.
 - (6) Over time, a *firm* must validate and re-assess the process and the outcomes through comparison to actual internal loss experience and relevant external data.

[**Note:** BCD Annex X Part 3 points 21 to 24]

Loss event type classification

Table: Loss event type classification

6.5.25 R This table belongs to BIPRU 6.5.21R(3).

Event-Type Category	Definition
Internal fraud	Losses due to acts of a type intended to defraud, misappropriate property or circumvent regulations, the law or company policy, excluding diversity/discrimination events, which involves at least one internal party
External fraud	Losses due to acts of a type intended to defraud, misappropriate property or circumvent the law, by a third party
Employee Practices and Workplace Safety	Losses arising from acts inconsistent with employment, health or safety laws or agreements, from payment of personal injury claims, or from diversity/discrimination events
Clients, Products & Business Practices	Losses arising from an unintentional or negligent failure to meet a professional obligation to specific clients (including fiduciary and suitability requirements), or from the nature or design of a product
Damage to Physical Assets	Losses arising from loss or damage to physical assets from natural disaster or other events
Business disruption and system failures	Losses arising from disruption of business or system failures
Execution, Delivery & Process Management	Losses from failed transaction processing or process management, from relations with trade counterparties and vendors

[**Note:** BCD Annex X Part 5 Table 3]

Impact of insurance and risk transfer mechanisms

6.5.26 R (1) *A firm may recognise the impact of insurance for the purposes of its operational risk measurement system subject to the conditions set out in this rule and BIPRU 6.5.27R.*

- (2) The provider must be authorised to provide insurance or re-insurance.
- (3) The provider must have a minimum claims paying ability rating by an *eligible ECAI* associated with *credit quality step 3* or above under the rules for the risk weighting of exposures to *firms* under the *standardised approach* to credit risk .

[Note: BCD Annex X Part 3 points 25 to 26]

- 6.5.27 R
- (1) A *firm* must ensure that its insurance and its insurance framework meet the conditions in this *rule*.
 - (2) The insurance policy must have a initial term of no less than one year. For policies with a residual term of less than one year the *firm* must make appropriate haircuts to reflect the declining residual term of the policy, up to a full 100% haircut for policies with a residual term of 90 days or less.
 - (3) The insurance policy must have a minimum notice period for cancellation of the contract of 90 days.
 - (4) The insurance policy must contain no exclusions or limitations based upon supervisory actions or, in the case of a failed *firm*, that preclude the *firm*, its receiver or liquidator from recovering for damages suffered or expenses incurred by the *firm*, except in respect of events occurring after the initiation of receivership or liquidation proceedings in respect of the *firm*. The insurance policy may exclude coverage for any fine, penalty or punitive damages resulting from actions by a *competent authority* or *third country competent authority*.
 - (5) The risk mitigation calculations must reflect the insurance coverage in a manner that is transparent in its relationship to, and consistent with, the actual likelihood and impact of loss used in the overall determination of the *ORCR*.
 - (6) The insurance must be provided by a third party entity. In the case of insurance through captives and affiliates, the exposure must be laid off to an independent third party entity, for example through reinsurance that meets the eligibility criteria.
 - (7) The framework for recognising insurance must be well reasoned and documented.
 - (8) The methodology for recognising insurance must capture the following elements through discounts or haircuts in the amount of insurance recognition:
 - (a) the residual term of a policy, where less than one year, as noted in (2);
 - (b) a policy's cancellation terms, where less than one year;
 - (c) mismatches in coverage of insurance policies; and
-

(d) the uncertainty of payment.

- (9) The capital alleviation arising from the recognition of insurance must not exceed 20% of the capital requirement before the recognition of risk mitigation techniques.

[Note: BCD Annex X Part 3 points 27 to 29]

- 6.5.28 G For the purposes of *BIPRU* 6.5.27R(7), a *firm* should be able to demonstrate that the mitigating effect of the insurance is appropriate and relevant to the *firm's* business.
- 6.5.29 G For the purposes of *BIPRU* 6.5.27R(9), a *firm* should be able to set out clearly how it made its assessment of the appropriate level of capital alleviation, including any assumptions made by the *firm* and how the insurance has been factored into the *firm's* risk measurement system.
- 6.5.30 R A *firm* may recognise a risk transfer mechanism other than insurance to the extent that a noticeable risk mitigating effect is achieved and the risk transfer mechanism is included in the *firm's AMA permission*.

Use of an advanced measurement approach on a groupwide basis

- 6.5.31 R Where an *EEA parent institution* and its *subsidiary undertakings* or an *EEA parent financial holding company* and its *subsidiary undertakings* use an *advanced measurement approach* on a unified basis for the *parent undertaking* and its *subsidiary undertakings*, the qualifying criteria set out in *BIPRU* 6.5 may be met by the *parent undertaking* and its *subsidiary undertakings* considered together where permitted by the *AMA permission*.

[Note: BCD Article 105(4)]

- 6.5.32 G Where the *AMA* is used on a unified basis for the *parent undertaking* and its *subsidiary undertakings*, and approval and reporting of the *AMA* are carried out at the group level, the qualifying criteria in *BIPRU* 6.5 may be met if:
- (1) the *subsidiary undertakings* have delegated to the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* responsibility for approval of the *AMA*;
 - (2) the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* approves either:
 - (a) all aspects of the *AMA*, and material changes; or
 - (b) all aspects of the *AMA* that are material in the context of the group, and material changes to those, and a policy statement defining the overall approach to the *AMA*.

- 7 Market risk
- 7.1 Application, purpose, general provisions and non-standard transactions
- Application
- 7.1.1 R This chapter applies to a *BIPRU firm*.
- Purpose
- 7.1.2 G The purpose of this chapter is to implement Annexes I, III, IV and V of the *Capital Adequacy Directive*.
- General provisions: Obligation to calculate PRR
- 7.1.3 R A *firm* must calculate a *PRR* in respect of:
- (1) all its *trading book positions*;
 - (2) all *positions* falling within *BIPRU 7.5.3* (Scope of the foreign exchange PRR calculation), whether or not in the *trading book*; and
 - (3) all *positions* in *commodities* (including *physical commodities*) whether or not in the *trading book*;
- even if no treatment is provided for that *position* in the other sections of this chapter.
- 7.1.4 R A *firm* must calculate a *PRR* for any *position* falling into *BIPRU 7.1.3R* using:
- (1) the *PRR* calculations contained in *BIPRU 7*; or
 - (2) another method provided the *firm* is able to demonstrate that in all circumstances the calculation being employed results in a higher *PRR* for the *position* than would be required under (1).
- General provisions: Non-trading book items
- 7.1.5 G *Positions* in instruments which are *non-trading book* items should be treated under *BIPRU 3* (Standardised credit risk), *BIPRU 4* (The IRB approach) or *BIPRU 13* (Financial derivatives, SFTs and long settlement transactions) unless deducted as an *illiquid asset*. If they fall into *BIPRU 7.1.3R(2)* or (3) they also give rise to a *PRR charge*.
- General provisions: Frequency of calculation

- 7.1.6 R A *firm* must be able to monitor its total *PRR* on an intra-day basis, and, before executing any trade, must be able to re-calculate *PRR* to the level of detail necessary to establish whether or not the *firm's capital resources* exceed its *capital resources requirement*.
- 7.1.7 G A *firm* may rely on intra-day limits for the purposes of *BIPRU 7.1.6R*.
Purpose of rules for non-standard transactions and instruments for which no *PRR* treatment has been specified
- 7.1.8 G The methodologies which have been developed for calculating *PRR charges* have been based on existing instruments and assume instruments with standard characteristics. However, as a result of innovation and because there are instruments which, although based on a standard contract, contain structural features which would make the *rules* in the rest of this chapter inappropriate, flexible *rules* are required. The *rules* in this section about transactions for which no *PRR* treatment has been specified and non-standard transactions are designed to address this.
Instruments for which no *PRR* treatment has been specified
- 7.1.9 R Where a *firm* has a *position* for which no *PRR* treatment has been specified, it must calculate the *PRR* for that *position* in accordance with *BIPRU 7.1.12R - BIPRU 7.1.13R*.
- 7.1.10 R If *BIPRU 7.1.9R* applies, a *firm* must document its policies and procedures for calculating the *PRR* for that *position* of that type in its *trading book policy statement*.
- 7.1.11 G Under *BIPRU 1.2.30R(2)* a *firm* should notify the *FSA* as soon as is reasonably practicable if its *trading book policy statement* is subject to significant changes. Therefore if a *firm* makes a change in accordance with *BIPRU 7.1.10R* it should consider whether it is necessary to report it to the *FSA*.
- 7.1.12 R A *firm* may calculate the *PRR* for a *position* falling into *BIPRU 7.1.9R* by applying by analogy the *rules* relating to the calculation of the *interest rate PRR*, the *equity PRR*, the *commodity PRR*, the *foreign exchange PRR*, the *option PRR* or the *collective investment undertaking PRR* if doing so is appropriate and if the *position* and *PRR item* are sufficiently similar to those that are covered by those *rules*.
- 7.1.13 R Where a *firm* has a *position* for which no *PRR* treatment has been specified and it is not applying *BIPRU 7.1.12R*, it must calculate a *PRR* of an appropriate percentage of the current value of the *position* calculated under *GENPRU 1.3 (Valuation)*.
Instruments in non-standard form
- 7.1.14 R (1) If a *firm* has a *position*:

- (a) in a *PRR item* in non-standard form; or
- (b) that is part of a non-standard arrangement; or
- (c) that, taken together with other *positions* (whether or not they are subject to *PRR charges* under *BIPRU 7*), gives rise to a non-standard *market risk*;

the *firm* must notify the *FSA* of that fact and of details about the *position*, *PRR item*, arrangements and type of risk concerned.

- (2) Except as (1) provides to the contrary, (1) applies to a *position* that is subject to a *PRR* under *BIPRU 7.1.3R*.
- (3) The question of what is non-standard for the purposes of (1) must be judged by reference to the standards:
 - (a) prevailing at the time the *rule* is being applied; and
 - (b) of *firms* generally who carry on business which gives rise to *PRRs* under *BIPRU 7* rather than merely by reference to the *firm's* own business.

7.1.15 R If a firm has a *position* or combination of *positions* falling into *BIPRU 7.1.14R* and the *PRR* relating to that *position* or *positions* materially underestimates the *market risk* incurred by the *firm* to which they give rise, the *firm* must calculate the *PRR* for that *position* or *positions* under *BIPRU 7.1.13R*.

Meaning of appropriate percentage for non-standard transactions

- 7.1.16 E
- (1) In *BIPRU 7.1.13R* and, to the extent that that *rule* applies *BIPRU 7.1.13R*, *BIPRU 7.1.15R*, an "appropriate percentage" is:
 - (a) 100%; or
 - (b) a percentage which takes account of the characteristics of the *position* concerned and of discussions with the *FSA* or a predecessor regulator under the Banking Act 1987 or the Financial Services Act 1986.
 - (2) Compliance with (1) may be relied on as tending to establish compliance with *BIPRU 7.1.13R* or, insofar as it incorporates the requirements relating to an appropriate percentage, *BIPRU 7.1.15R*.
 - (3) Contravention of (1) may be relied on as tending to establish contravention with *BIPRU 7.1.13R* or, insofar as it incorporates the requirements relating to an appropriate percentage, *BIPRU 7.1.15R*.

7.2 Interest rate PRR

General rule

- 7.2.1 R (1) A *firm* must calculate its *interest rate PRR* under *BIPRU 7.2* by:
- (a) identifying which *positions* must be included within the *interest rate PRR* calculation;
 - (b) deriving the net *position* in each debt *security* in accordance with *BIPRU 7.2.36R - BIPRU 7.2.41R*;
 - (c) including these net *positions* in the *interest rate PRR* calculation for *general market risk* and the *interest rate PRR* calculation for *specific risk*; and
 - (d) summing all *PRRs* calculated for *general market risk* and *specific risk*.
- (2) A *firm* must calculate its *interest rate PRR* by adding the amount calculated under (1) to the amount calculated under the basic *interest rate PRR* calculation under *BIPRU 7.3.45R*.
- (3) All net *positions*, irrespective of their signs, must be converted on a daily basis into the *firm's base currency* at the prevailing spot exchange rate before their aggregation.
- (4) Net *positions* must be classified according to the currency in which they are denominated. A *firm* must calculate the capital requirement for *general market risk* and *specific risk* in each individual currency separately.
- 7.2.2 G The *interest rate PRR* calculation divides the interest rate risk into the risk of loss from a general move in market interest rates, and the risk of loss from an individual debt *security's* price changing for reasons other than a general move in market interest rates. These are called *general market risk* and *specific risk* respectively.

Scope of the interest rate PRR calculation

- 7.2.3 R A *firm's interest rate PRR* calculation must:
- (1) include all *trading book positions* in debt *securities*, preference *shares* and *convertibles*, except:
 - (a) *positions* in *convertibles* which have been included in the *firm's equity PRR* calculation;

- (b) *positions* fully deducted as a *material holding* under the calculations under the *capital resources table*, in which case the *firm* may exclude them; or
 - (c) *positions* hedging an *option* which is being treated under BIPRU 7.6.26R (Table: Appropriate treatment for equities, debt securities or currencies hedging options);
- (2) include notional *positions* arising from *trading book positions* in the instruments listed in the table in BIPRU 7.2.4R; and
- (3) (if the *firm* is the transferor of *debt securities* or guaranteed rights relating to title to *debt securities* in a *repurchase agreement* or the lender of *debt securities* in a *debt securities* lending agreement) include such *debt securities* if those *debt securities* meet the criteria for inclusion in the *trading book*.

7.2.4 R Table: Instruments which result in notional positions
This table belongs to BIPRU 7.2.3R(2)

Instrument	See
<i>Futures, forwards</i> or <i>synthetic futures</i> on <i>debt securities</i>	BIPRU 7.2.13R
<i>Futures, forwards</i> or <i>synthetic futures</i> on <i>debt indices</i> or <i>baskets</i>	BIPRU 7.2.14R
<i>Interest rate futures</i> or <i>forward rate agreements (FRAs)</i>	BIPRU 7.2.18R
<i>Interest rate swaps</i> or <i>foreign currency swaps</i>	BIPRU 7.2.21R
<i>Deferred start interest rate swaps</i> or <i>foreign currency swaps</i>	BIPRU 7.2.24R
The interest rate leg of an <i>equity swap</i> (unless the <i>firm</i> calculates the <i>interest rate PRR</i> on the instrument using the basic <i>interest rate PRR</i> calculation in BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives))	BIPRU 7.2.27R
The cash leg of a <i>repurchase agreement</i> or a <i>reverse repurchase agreement</i>	BIPRU 7.2.30R
Cash borrowings or deposits	BIPRU 7.2.31R

<i>Options on a debt security, a basket of debt securities, a debt security index, an interest rate or an interest rate future or swap (including an option on a future on a debt security) (unless the firm calculates a PRR on the option under BIPRU 7.6 (Option PRR))</i>	<i>BIPRU 7.2.32R</i>
Dual currency bonds	<i>BIPRU 7.2.33R</i>
<i>Foreign currency futures or forwards</i>	<i>BIPRU 7.2.34R</i>
Gold futures or forwards	<i>BIPRU 7.2.34R</i>
<i>Forwards, futures or options (except cliquets) on an equity, basket of equities or equity index (unless the firm calculates the interest rate PRR on the instrument using the basic interest rate PRR calculation in BIPRU 7.3)</i>	<i>BIPRU 7.2.34R</i>
Credit derivatives	<i>BIPRU 7.11</i>
A warrant must be treated in the same way as an option	

- 7.2.5 G *BIPRU 7.2.3R(1) includes a trading book position in debt security, preference share or convertible that is subsequently repo'd under a repurchase agreement or lent under a stock lending agreement. Clearly, if the security had initially been obtained via a reverse repurchase agreement or stock borrowing agreement, the security would not have been included in the PRR calculation in the first place.*
- 7.2.6 G *BIPRU 7.2.3R(1) includes net underwriting positions or reduced net underwriting positions in debt securities.*
- 7.2.7 G *Firms are reminded that the table in BIPRU 7.6.5R (Table: Appropriate PRR calculation for an option or warrant) divides options and warrants on interest rates, debt securities and interest rate futures and swaps into:*
- (1) those which must be treated under *BIPRU 7.6 (Option PRR)*; and
 - (2) those which must be treated under either *BIPRU 7.2* or *BIPRU 7.6*, the *firm* being able to choose whether *BIPRU 7.2* or *BIPRU 7.6* is used.
- 7.2.8 G *Cliquets on equities, baskets of equities or equity indices do not attract an interest rate PRR. The table in BIPRU 7.2.4R excludes them from the scope of the interest rate PRR calculation in BIPRU 7.2 and BIPRU 7.3.45R excludes them from the basic interest rate PRR calculation in BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives).*

7.2.9 G The table in *BIPRU 7.2.4R* shows that *equity derivatives* are excluded from *BIPRU 7.2's PRR* calculation if they have been included in the basic *interest rate PRR* calculation in *BIPRU 7.3* (see *BIPRU 7.3.45R*).

Derivation of notional positions: General approach

7.2.10 G *BIPRU 7.2.11R - BIPRU 7.2.35R* convert the instruments listed in the table in *BIPRU 7.2.4R* into notional *positions* in:

- (1) the underlying debt *security*, where the instrument depends on the price (or yield) of a specific debt *security*; or
- (2) notional debt *securities* to capture the pure interest rate risk arising from future payments and receipts of cash (including notional payments and receipts) which, because they are designed to represent pure *general market risk* (and not *specific risk*), are called *zero-specific-risk securities*; or
- (3) both (1) and (2).

7.2.11 R (1) For the purposes of calculating *interest rate PRR*, unless specified otherwise, a *firm* must derive the value of notional *positions* as follows:

- (a) notional *positions* in actual debt *securities* must be valued as the nominal amount underlying the contract at the current market price of the debt *security*; and
- (b) *positions* in *zero-specific-risk securities* must be valued using one of the two methods in (2).

(2) A *firm* must use one of the following two methods for all *positions* arising under (1)(b) and must use the same method for all *positions* denominated in the same currency:

- (a) the present value approach, under which the *zero-specific-risk security* is assigned a value equal to the present value of all the future cash flows that it represents; or
- (b) the alternative approach, under which the *zero-specific-risk security* is assigned a value equal to:
 - (i) the market value of the underlying notional *equity position* in the case of an *equity derivative*;
 - (ii) the notional principal amount in the case of an interest rate or *foreign currency swap*; or
 - (iii) the notional amount of the future cash flow that it represents in the case of any other *CRD financial instrument*.

7.2.12 R A *firm* must use *BIPRU 7.2.11R(2)(a)* in respect of any *positions* that it includes in the *interest rate duration method*.

Derivation of notional positions: Futures, forwards or synthetic futures on a debt security

7.2.13 R *Futures, forwards* or *synthetic futures* on a single debt *security* must be treated as follows:

(1) a purchased *future, synthetic future* or *forward* is treated as:

- (a) a notional long *position* in the underlying debt *security* (or the cheapest to deliver (taking into account the conversion factor) where the contract can be satisfied by delivery of one from a range of *securities*); and
- (b) a notional short *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the expiry date of the *future* or *forward*; and

(2) a sold *future, synthetic future* or *forward* is treated as:

- (a) a notional short *position* in the underlying *security* (or the cheapest to deliver (taking into account the conversion factor) where the contract can be satisfied by delivery of one from a range of *securities*); and
- (b) a notional long *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the expiry date of the *future, synthetic future* or *forward*.

Derivation of notional positions: Futures, forwards or synthetic futures on a basket or index of debt securities

7.2.14 R *Futures, forwards* or *synthetic futures* on a basket or index of debt *securities* must be converted into *forwards* on single debt *securities* as follows (and then the resulting *positions* must be treated under *BIPRU 7.2.13R*):

(1) *futures, synthetic futures* or *forwards* on a single currency basket or index of debt *securities* must be treated as either:

- (a) a series of *forwards*, one for each of the constituent debt *securities* in the basket or index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant debt *security* in the basket; or
- (b) a single *forward* on a notional debt *security*; and

(2) *futures, synthetic futures* or *forwards* on multiple currency baskets or indices of debt *securities* must be treated as either:

- (a) a series of *forwards* (using the method described in (1)(a)); or
- (b) a series of *forwards*, each one on a notional debt *security* to represent one of the currencies in the basket or index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant currency in the basket.

7.2.15 G Under *BIPRU 7.2.14R(2)(b)*, a *forward* on basket of three Euro denominated debt *securities* and two Dollar denominated debt *securities* would be treated as a *forward* on a single notional Euro denominated debt *security* and a *forward* on a single notional Dollar denominated debt *security*.

7.2.16 R The notional debt *securities* in *BIPRU 7.2.14R* are assigned a *specific risk PRA* and a *general market risk PRA* equal to the highest that would apply to the debt *securities* in the basket or index.

7.2.17 G The debt *security* with the highest *specific risk PRA* within the basket might not be the same as the one with the highest *general market risk PRA*. *BIPRU 7.2.16R* requires a *firm* to select the highest percentages even where they relate to different debt *securities* in the basket or index, and regardless of the proportion of those debt *securities* in the basket or index.

Derivation of notional positions: Interest rate futures and forward rate agreements (FRAs)

7.2.18 R Interest rate *futures* or *FRAs* must be treated as the two notional *positions* (one long, one short) shown in the table in *BIPRU 7.2.19R*.

7.2.19 R Table: Interest rate futures and FRAs
This table belongs to *BIPRU 7.2.18R*

	A short <i>position</i> in a zero coupon <i>zero-specific-risk-security</i>	A long <i>position</i> in a zero coupon <i>zero-specific-risk-security</i>
Where the <i>firm</i> buys an interest rate <i>future</i> or sells an <i>FRA</i>	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>)	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>) plus the maturity of the notional borrowing/deposit

Where the <i>firm</i> sells an interest rate <i>future</i> or buys an <i>FRA</i>	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>) plus the maturity of the notional borrowing/deposit	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>)
----------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

- 7.2.20 G (1) The following example illustrates *BIPRU* 7.2.18R and *BIPRU* 7.2.19R in conjunction with *BIPRU* 7.2.11R (the last *rule* determines the value of notional *positions*). A *firm* sells £1mn notional of a 3v6 *FRA* at 6%. This results in:
- (a) a short *position* in a *zero-specific-risk-security* with a zero coupon, three month maturity, and a nominal amount of £1million; and
 - (b) a long *position* in a *zero-specific-risk-security* with a zero coupon, six month maturity, and nominal amount of £1,015,000 (i.e. notional plus interest at 6% over 90 days).
- (2) If a *firm* were to apply the approach in *BIPRU* 7.2.11R(2)(a) the two nominal amounts would have to be present valued.

Derivation of notional positions: Interest rate swaps or foreign currency swaps

7.2.21 R Interest rate *swaps* or *foreign currency swaps* without deferred starts must be treated as the two notional *positions* (one long, one short) shown in the table in *BIPRU* 7.2.22R.

7.2.22 R Table: Interest rate and foreign currency swaps
This table belongs to *BIPRU* 7.2.21R

	Paying leg (which must be treated as a short <i>position</i> in a <i>zero-specific-risk security</i>)	Receiving leg (which must be treated as a long <i>position</i> in a <i>zero-specific-risk security</i>)
Receiving fixed and paying floating	Coupon equals the floating rate and maturity equals the reset date	Coupon equals the fixed rate of the <i>swap</i> and maturity equals the maturity of the <i>swap</i>

Paying fixed and receiving floating	Coupon equals the fixed rate of the <i>swap</i> and maturity equals the maturity of the <i>swap</i>	Coupon equals the floating rate and maturity equals the reset date
Paying floating and receiving floating	Coupon equals the floating rate and maturity equals the reset date	Coupon equals the floating rate and maturity equals the reset date

- 7.2.23 G For a *foreign currency swap*, the two notional *zero-specific-risk securities* would be denominated in different currencies. A *foreign currency swap* is also included in the *foreign exchange PRR* calculation.

Derivation of notional positions: Deferred start interest rate swaps or foreign currency swaps

- 7.2.24 R Interest rate *swaps* or *foreign currency swaps* with a deferred start must be treated as the two notional *positions* (one long, one short) shown in the table in *BIPRU 7.2.25R*.

- 7.2.25 R Table: Deferred start interest rate and foreign currency swaps
This table belongs to *BIPRU 7.2.24R*

	Paying leg (which must be treated as a short <i>position</i> in a <i>zero-specific-risk security</i> with a coupon equal to the fixed rate of the <i>swap</i>)	Receiving leg (which must be treated as a long <i>position</i> in a <i>zero-specific-risk security</i> with a coupon equal to the fixed rate of the <i>swap</i>)
Receiving fixed and paying floating	maturity equals the start date of the <i>swap</i>	maturity equals the maturity of the <i>swap</i>
Paying fixed and receiving floating	maturity equals the maturity of the <i>swap</i>	maturity equals the start date of the <i>swap</i>

- 7.2.26 G An example of *BIPRU 7.2.24R* is as follows. A *firm* enters into a five year *swap* which starts in two year's time. The *firm* has contracted to receive 6% and pay six month Libor on a principal amount of £1million. This results in a long *position* in a 7 year debt *security* and a short *position* in a 2 year debt *security*. Both have a coupon of 6%. *BIPRU 7.2.24R* deals with the capital treatment of the delayed start date; once the *swap* has started, *BIPRU 7.2.21R* applies.

Derivation of notional positions: Swaps where only one leg is an interest rate leg (e.g. equity swaps)

- 7.2.27 R A *firm* must treat a *swap* with only one interest rate leg as a notional *position* in a *zero-specific-risk security*:
- (1) with a coupon equal to that on the interest rate leg;
 - (2) with a maturity equal to the date that the interest rate will be reset; and
 - (3) which is a long *position* if the *firm* is receiving interest payments and short if making interest payments.

- 7.2.28 G *BIPRU 7.2.27R* includes *equity swaps*, *commodity swaps* and any other *swap* where only one leg is an interest rate leg.

Derivation of notional positions: Cash legs of repurchase agreements and reverse repurchase agreements

- 7.2.29 G *Firms* are reminded that for the purposes of *BIPRU 7.2.30R*, a *repurchase agreement* includes a sell/buy back or stock lending; and a *reverse repurchase agreement* includes a buy/sell back or a stock borrowing.

- 7.2.30 R The forward cash leg of a *repurchase agreement* or *reverse repurchase agreement* must be treated as a notional *position* in a *zero-specific-risk security* which:
- (1) is a short notional *position* in the case of a *repurchase agreement*; and a long notional *position* in the case of a *reverse repurchase agreement*;
 - (2) has a value equal to the market value of the cash leg;
 - (3) has a maturity equal to that of the *repurchase agreement* or *reverse repurchase agreement*; and
 - (4) has a coupon equal to:
 - (a) zero, if the next interest payment date coincides with the maturity date; or
 - (b) the interest rate on the contract, if any interest is due to be paid before the maturity date.

Derivation of notional positions: Cash borrowings and deposits

- 7.2.31 R A cash borrowing or deposit must be treated as a notional *position* in a zero coupon *zero-specific-risk security* which:

- (1) is a short *position* in the case of a borrowing and a long *position* in the case of a deposit;
- (2) has a value equal to the market value of the borrowing or deposit;
- (3) has a maturity equal to that of the borrowing or deposit, or the next date the interest rate is reset (if earlier); and
- (4) has a coupon equal to:
 - (a) zero, if the next interest payment date coincides with the maturity date; or
 - (b) the interest rate on the borrowing or deposit, if any interest is due to be paid before the maturity date.

Derivation of notional positions: Options and warrants

- 7.2.32 R
- (1) Where included in the *PRR* calculation in *BIPRU* 7.2 (see the table in *BIPRU* 7.2.4R), *options* and *warrants* must be treated in accordance with this *rule*.
 - (2) An *option* or *warrant* on a debt *security*, a basket of debt *securities* or a debt *security* index must be treated as a *position* in that debt *security*, basket or index.
 - (3) An *option* on an interest rate must be treated as a *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the sum of the time to expiry of the *option* and the length of the period for which the interest rate is fixed.
 - (4) An *option* on a *future* – where the *future* is based on an interest rate or debt *security* – must be treated as:
 - (a) a long *position* in that *future* for purchased call *options* and written put *options*; and
 - (b) a short *position* in that *future* for purchased put *options* and written call *options*.
 - (5) An *option* on a *swap* must be treated as a deferred starting *swap*.

Derivation of notional positions: Bonds where the coupons and principal are paid in different currencies

- 7.2.33 R
- Where a debt *security* pays coupons in one currency, but will be redeemed in a different currency, it must be treated as:
- (1) a debt *security* denominated in the coupon's currency; and

- (2) a *foreign currency forward* to capture the fact that the debt *security's* principal will be repaid in a different currency from that in which it pays coupons, specifically:
- (a) a notional forward sale of the coupon currency and purchase of the redemption currency, in the case of a long *position* in the debt *security*; or
 - (b) a notional forward purchase of the coupon currency and sale of the redemption currency, in the case of a short *position* in the debt *security*.

Derivation of notional positions: Interest rate risk on other futures, forwards and options

7.2.34 R Other *futures, forwards, options* and *swaps* treated under *BIPRU 7.2* must be treated as *positions* in *zero-specific-risk securities*, each of which:

- (1) has a zero coupon;
- (2) has a maturity equal to that of the relevant contract; and
- (3) is long or short according to the table in *BIPRU 7.2.35R*.

7.2.35 R Table: Interest rate risk on other futures, forwards, options and swaps
This table belongs to *BIPRU 7.2.34R*.

Instrument	Notional <i>positions</i>	
<i>Foreign currency forward</i> or <i>future</i>	a long <i>position</i> denominated in the currency purchased	and a short <i>position</i> denominated in the currency sold
<i>Gold forward</i> or <i>future</i>	a long <i>position</i> if the <i>forward</i> or <i>future</i> involves an actual (or notional) sale of gold	or a short <i>position</i> if the <i>forward</i> or <i>future</i> involves an actual (or notional) purchase of gold
<i>Equity forward</i> or <i>future</i> , or <i>option</i> (unless the <i>interest rate PRR</i> is calculated under the basic <i>interest rate PRR</i> calculation in <i>BIPRU 7.3</i>)	A long <i>position</i> if the contract involves an actual (or notional) sale of the underlying <i>equity</i>	or A short <i>position</i> if the contract involves an actual (or notional) purchase of the underlying <i>equity</i>

Deriving the net position in each debt security: General

- 7.2.36 R The net *position* in a debt *security* is the difference between the value of the *firm's* long *positions* (including notional *positions*) and the value of its short *positions* (including notional *positions*) in the same debt *security*.

Deriving the net position in each debt security: Netting positions in the same debt security

- 7.2.37 R (1) A *firm* must not net *positions* (including notional *positions*) unless those *positions* are in the same debt *security*. This *rule* sets out the circumstances in which debt *securities* may be treated as the same for these purposes.
- (2) Subject to (3) long and short *positions* are in the same debt *security*, and a debt *security* is the same as another if and only if:
- (a) they enjoy the same rights in all respects; and
 - (b) are fungible with each other.
- (3) Long and short *positions* in different tranches of the same debt *security* may be treated as being in the same debt *security* for the purpose of (1) where:
- (a) the tranches enjoy the same rights in all respects; and
 - (b) the tranches become fungible within 180 days and thereafter the debt *security* of one tranche can be delivered in settlement of the other tranche.

Deriving the net position in each debt security: Netting the cheapest to deliver security with other deliverable securities

- 7.2.38 R A *firm* may net a short notional *position* in the cheapest to deliver *security* arising from a short *future* or *forward* (see *BIPRU* 7.2.13R(2)(a)) under which the seller has a choice of which debt *security* it may use to settle its obligations against a long *position* in any deliverable *security* up to a maximum of 90% of the common nominal amounts. The residual long and short nominal amounts must be treated as separate long and short *positions*.

- 7.2.39 R The netting permitted by *BIPRU* 7.2.38R only relates to where the *firm* has sold the *future* or *forward*. It does not relate to where the *firm* has bought a *future* or *forward*.

Deriving the net position in each debt security: Netting zero-specific-risk securities with different maturities

- 7.2.40 R A *firm* may net a notional long *position* in a *zero-specific-risk security* against a notional short *position* in a *zero-specific-risk security* if:

- (1) they are denominated in the same currency;
- (2) their coupons do not differ by more than 15 basis points; and
- (3) they mature:
 - (a) on the same day, if they have residual maturities of less than one month;
 - (b) within 7 days of each other, if they have residual maturities of between one month and one year; and
 - (c) within 30 days of each other, if they have residual maturities in excess of one year.

Deriving the net position in each debt security: Reduced net underwriting positions in debt securities

7.2.41 R A *firm* must not net a *reduced net underwriting position* in a *debt security* with any other *debt security position*.

7.2.42 G *BIPRU 7.2.41R* only relates to *reduced net underwriting positions*.

Specific risk calculation

7.2.43 R (1) A *firm* must calculate the *specific risk* portion of the *interest rate PRR* for each *debt security* by multiplying the market value of the individual net *position* (ignoring the sign) by the *appropriate PRA* from the table in *BIPRU 7.2.44R* or as specified by *BIPRU 7.2.45R - BIPRU 7.2.47R*.

(2) Notional *positions* in *zero-specific-risk securities* do not attract *specific risk*.

7.2.44 R Table: specific risk PRAs
This table belongs to *BIPRU 7.2.43R*.

Issuer	Residual maturity	<i>PRA</i>
Debt <i>securities</i> issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities which would qualify for <i>credit quality step 1</i> or which would receive a <i>0% risk weight</i> under the <i>standardised approach</i> to credit risk.	Any	0%

Issuer	Residual maturity	PRA
<p>(A) Debt <i>securities</i> issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities which would qualify for <i>credit quality step 2</i> or <i>3</i> under the <i>standardised approach</i> to credit risk.</p>	Zero to six months	0.25%
	over 6 and up to and including 24 months	1%
<p>(B) Debt <i>securities</i> issued or guaranteed by <i>institutions</i> which would qualify for <i>credit quality step 1</i> or <i>2</i> under the <i>standardised approach</i> to credit risk.</p>	Over 24 months	1.6%
<p>(C) Debt <i>securities</i> issued or guaranteed by <i>institutions</i> which would qualify for <i>credit quality step 3</i> under <i>BIPRU 3.4.34R</i> (Exposures to institutions: Credit assessment based method) or which would do so if it had an original effective maturity of three months or less.</p>		
<p>(D) Debt <i>securities</i> issued or guaranteed by <i>corporates</i> which would qualify for <i>credit quality step 1</i> or <i>2</i> under the <i>standardised approach</i> to credit risk.</p>		
<p>(E) Other <i>qualifying debt securities</i> (see <i>BIPRU 7.2.49R</i>)</p>		

Issuer	Residual maturity	<i>PRA</i>
<p>(A) Debt <i>securities</i> issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities or <i>institutions</i> which would qualify for <i>credit quality step 4</i> or <i>5</i> under the <i>standardised approach</i> to credit risk.</p> <p>(B) Debt <i>securities</i> issued or guaranteed by <i>corporates</i> which would qualify for <i>credit quality step 3</i> or <i>4</i> under the <i>standardised approach</i> to credit risk.</p> <p>(C) Exposures for which a credit assessment by a <i>nominated ECAI</i> is not available.</p>	Any	8%
<p>(A) Debt <i>securities</i> issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities or <i>institutions</i> which would qualify for <i>credit quality step 6</i> under the <i>standardised approach</i> to credit risk.</p> <p>(B) Debt <i>securities</i> issued or guaranteed by <i>corporates</i> which would qualify for <i>credit quality step 5</i> or <i>6</i> under the <i>standardised approach</i> to credit risk.</p> <p>(C) An instrument that shows a particular risk because of the insufficient solvency of the issuer or liquidity. This paragraph applies even if the instrument would otherwise qualify for a lower <i>PRA</i> under this table.</p>	Any	12%
<p>Note: The question of what a <i>corporate</i> is and of what category a debt <i>security</i> falls into must be decided under the <i>rules</i> relating to the <i>standardised approach</i> to credit risk.</p>		

- 7.2.45 R To the extent that a *firm* applies the *IRB approach*, to qualify for a *credit quality step* for the purpose of the table in *BIPRU 7.2.44R* the obligor of the exposure must have an internal rating with a *PD* equivalent to or lower than that associated with the appropriate *credit quality step* under the *standardised approach* to credit risk.
- 7.2.46 R A debt *security* issued by a non-qualifying issuer must receive a *specific risk PRA* of 8% or 12% according to the table in *BIPRU 7.2.44R*. However a *firm* must apply a higher *specific risk PRA* to such a *debt security* and/or not recognise offsetting for the purposes of defining the extent of *general market risk* between such a *security* and any other debt *securities* to the extent that doing otherwise would not be a prudent treatment of *specific risk* or *general market risk*.
- 7.2.47 R A *securitisation exposures* that would be subject to a deduction treatment under the treatment set out in *GENPRU 2.2* (Capital resources) or *risk weighted* at 1250% as set out in *BIPRU 9* (Securitisation) is subject to a capital charge that is no less than that set out under those treatments. *Unrated* liquidity facilities are subject to a capital charge that is no less than that set out in *BIPRU 9*.
- 7.2.48 G *BIPRU 7.2.43R* includes both actual and notional *positions*. However, notional *positions* in *zero-specific-risk securities* do not attract *specific risk*. For example:
- (1) interest rate *swaps*, *foreign currency swaps*, *FRAs*, interest rate *futures*, *foreign currency forwards*, *foreign currency futures*, and the cash leg of *repurchase agreements* and *reverse repurchase agreements* create notional *positions* which will not attract *specific risk*; whilst
 - (2) *futures*, *forwards* and *swaps* which are based on the price (or yield) of one or more debt *securities* will create at least one notional *position* that attracts *specific risk*.

Definition of a qualifying debt security

- 7.2.49 R A debt *security* is a *qualifying debt security* if:
- (1) it qualifies for a *credit quality step* under the *standardised approach* to credit risk corresponding at least to investment grade; or
 - (2) it has a *PD* which, because of the solvency of the issuer, is not higher than that of the debt *securities* referred to under (1) under the *IRB approach*; or
 - (3) it is a debt *security* for which a credit assessment by a *nominated ECAI* is unavailable and which meets the following conditions:
 - (a) it is considered by the *firm* to be sufficiently liquid;

- (b) it is of investment quality, according to the *firm's* own discretion, at least equivalent to that of the debt *securities* referred to under (1); and
 - (c) it is listed on at least one *regulated market* or *designated investment exchange*; or
 - (4) it is a debt *security* issued by an *institution* subject to the capital adequacy requirements set out in the *Banking Consolidation Directive* that satisfies the following conditions:
 - (a) it is considered by the *firm* to be sufficiently liquid;
 - (b) its investment quality is, according to the *firm's* own discretion, at least equivalent to that of the assets referred to under (1) above; or
 - (5) it is a debt *security* issued by an *institution* that is deemed to be of equivalent or higher credit quality than that associated with *credit quality step 2* under the *standardised approach* to credit risk and that is subject to supervision and regulatory arrangements comparable to those under the *Capital Adequacy Directive*.
- 7.2.50 R A *firm* must not treat a *debt security* as a *qualifying debt security* if it would be prudent to consider that the *debt security* concerned is subject to too high a degree of *specific risk* for it to be treated as a *qualifying debt security*.
- 7.2.51 G The manner in which a *firm* assesses a *debt security* for the purpose of treatment as a *qualifying debt security* will be subject to scrutiny by the *FSA*. The *FSA* may take action to overturn the *firm's* judgement if it considers that the *debt security* should not be treated as a *qualifying debt security*.
- General market risk calculation: General
- 7.2.52 R A *firm* must calculate the *general market risk* portion of the *interest rate PRR* for each currency using either:
- (1) the *interest rate simplified maturity method*;
 - (2) the *interest rate maturity method*; or
 - (3) the *interest rate duration method*.
- 7.2.53 R *BIPRU 7.2.52R(3)* is subject to *BIPRU 7.2.54R*.
- 7.2.54 R A *firm* must not use the *interest rate duration method* for index-linked *securities*. Instead, these *securities* must:
- (1) be attributed a coupon of 3%; and

- (2) be treated separately under either the *interest rate simplified maturity method* or the *interest rate maturity method*.

General market risk calculation: Simplified maturity method

- 7.2.55 G The *interest rate simplified maturity method* weights individual net *positions* to reflect their price sensitivity to changes in interest rates. The weights are related to the coupon and the residual maturity of the instrument (or the next interest rate re-fix date for floating rate items).
- 7.2.56 R Under the *interest rate simplified maturity method*, the portion of the *interest rate PRR* for *general market risk* equals the sum of each individual net *position* (long or short) multiplied by the *appropriate PRA* in the table in *BIPRU 7.2.57R*. A *firm* must assign its net *positions* to the appropriate maturity bands in the table in *BIPRU 7.2.57R* on the basis of residual maturity in the case of fixed-rate instruments and on the basis of the period until the interest rate is next set in the case of instruments on which the interest rate is variable before final maturity.
- 7.2.57 R Table: general market risk PRAs
This table belongs to *BIPRU 7.2.56R*).

Zone	Maturity band		PRA
	Coupon of 3% or more	Coupon of less than 3%	
One	0 ≤ 1 month	0 ≤ 1 month	0.00%
	> 1 ≤ 3 months	> 1 ≤ 3 months	0.20%
	> 3 ≤ 6 months	> 3 ≤ 6 months	0.4%
	> 6 ≤ 12 months	> 6 ≤ 12 months	0.7%
Two	> 1 ≤ 2 years	> 1.0 ≤ 1.9 years	1.25%
	> 2 ≤ 3 years	> 1.9 ≤ 2.8 years	1.75%
	> 3 ≤ 4 years	> 2.8 ≤ 3.6 years	2.25%
Three	> 4 ≤ 5 years	> 3.6 ≤ 4.3 years	2.75%
	> 5 ≤ 7 years	> 4.3 ≤ 5.7 years	3.25%
	> 7 ≤ 10 years	> 5.7 ≤ 7.3 years	3.75%
	> 10 ≤ 15 years	> 7.3 ≤ 9.3 years	4.5%
	> 15 ≤ 20 years	> 9.3 ≤ 10.6 years	5.25%

Zone	Maturity band		PRA
	Coupon of 3% or more	Coupon of less than 3%	
	> 20 years	> 10.6 ≤ 12.0 years	6.00%
		> 12.0 ≤ 20.0 years	8.00%
		> 20 years	12.50%

General market risk calculation: The maturity method

- 7.2.58 G The *interest rate maturity method* builds on the *interest rate simplified maturity method* by partially recognising offsetting *positions*. *BIPRU 7.2.61G* provides an illustration of the *interest rate maturity method*.
- 7.2.59 R Under the *interest rate maturity method*, the portion of the *interest rate PRR* for *general market risk* is calculated as follows:
- (1) Step 1: each net *position* is allocated to the appropriate maturity band in the table in *BIPRU 7.2.57R* and multiplied by the corresponding *PRA*;
 - (2) Step 2: weighted long and short *positions* are matched within:
 - (a) the same maturity band;
 - (b) the same zone (using unmatched *positions* from (a)); and
 - (c) different zones (using unmatched *positions* from (b) and matching between zones 1 and 2 and 2 and 3 before zone 1 and 3); and
 - (3) Step 3: the portion of the *interest rate PRR* for *general market risk* is the sum of:
 - (a) 10% of the total amount matched within maturity bands;
 - (b) 40% of the amount matched within zone 1 under (2)(b);
 - (c) 30% of the amount matched within zones 2 & 3 under (2)(b);
 - (d) 40% of the amounts matched between zones 1 and 2, and between zones 2 and 3;
 - (e) 150% of the amount matched between zones 1 and 3; and
 - (f) 100% of the weighted *positions* remaining unmatched after (2)(c).

7.2.60 G The table in *BIPRU 7.2.57R* distinguishes between debt *securities* with a coupon of less than 3% and those with coupon in excess of 3%. However, this does not mean that the *firm* has to do a separate *general market risk* calculation for each; it merely ensures that when allocating debt *securities* to a particular band, their coupons are taken into account as well as their maturities. So for example, a 21 year 6% debt *security* falls into the same band as an 11 year 2% debt *security*. They are both weighted at 6%, and can be matched under *BIPRU 7.2.59R(2)(a)* (the first part of step two of the *interest rate maturity method* calculation) because they fall within the same band.

7.2.61 G This paragraph sets out an example of a calculation under the *interest rate maturity method*. In this example, a firm with a £ sterling base currency is processing its euro denominated positions.

Weight each position

Zone	Totals of:		PRA		Weighted longs within each band	Weighted shorts within each band
	net longs within the band	net shorts within the band				
1	€100	€50	0.00%		0	0
	€250	€0	0.20%		0.50	0
	€200	€0	0.40%		0.80	0
	€0	€0	0.70%		0	0
2	€140	€0	1.25%		1.75	0
	€200	€300	1.75%		3.50	5.25
	€0	€400	2.25%		0	9
3	€0	€0	2.75%		0	0
	€200	€200	3.25%		6.50	6.50
	€300	€0	3.75%		11.25	0
	€200	€300	4.50%		9	13.50
	€0	€14.30	5.25%		0	0.75
	€300	€0	6.00%		18.00	0
	€0	€0	8.00%		0	0
	€0	€0	12.50%		0	0

Match weighted positions

same band		same zones		different zones	
Long	Short	Long	Short	Long	Short

Calculate the general market risk

Matched within bands	19	@	10%	=	1.9
Matched within zone 1	0	@	40%	=	0
Matched within zones 2&3	7	@	30%	=	2.1
Matched between zones 1&2 and 2&3	9	@	40%	=	3.6
Matched between zones 1&3	0	@	150%	=	0
Unmatched after 2(c)	16.30	@	100%	=	16.30
total = € 23.90					
<i>general market risk PRR (if €1=£0.60) = £14.34</i>					

General market risk calculation: Duration method

7.2.62 G The *interest rate duration method* produces a more accurate measure of interest rate risk than the maturity methods but it is also more complex to calculate.

7.2.63 R (1) A *firm* must use the following formula to calculate modified duration for the purpose of the *interest rate duration method*:

$$\text{Modified duration} = \frac{D}{(1+r)}$$

(2) For the purposes of the formula in (1):

$$D = \frac{\sum_{t=1}^m \frac{tC_t}{(1+r)^t}}{\sum_{t=1}^m \frac{C_t}{(1+r)^t}}$$

(3) For the purpose of the formulae in (1) and (2):

(a) C_t = cash payment at time t

(b) m = total maturity

(c) r = yield to maturity. In the case of a fixed-rate debt *security* a *firm* must take the current mark to market of the debt *security* and thence calculate its yield to maturity, which is the implied discount rate for that instrument. In the case of a floating rate instrument, a *firm* must take the current mark to market of the debt *security* and thence calculate its yield on the assumption that the principal is due on the date that the interest rate can next be changed.

(d) t = time

7.2.64 R Under the *interest rate duration method*, the portion of the *interest rate PRR* for *general market risk* is calculated as follows:

(1) Step 1: allocate each net *position* to the appropriate duration zone in the table in *BIPRU 7.2.65R* and multiply it by:

(a) its modified duration (using the formula in *BIPRU 7.2.63R*); and

(b) the appropriate assumed interest rate change in the table in *BIPRU 7.2.65R*;

- (2) Step 2: match weighted long and short *positions*:
 - (a) within zones; and
 - (b) across zones (using unmatched *positions* from (2)(a) and following the process in *BIPRU 7.2.59R(2)(c)*); and
- (3) Step 3: calculate the portion of the *interest rate PRR* for *general market risk* as the sum of:
 - (a) 100% of the weighted *positions* remaining unmatched after (2)(b);
 - (b) 2% of the matched weighted *position* in each zone;
 - (c) 40% of the matched weighted *position* between zones 1 and 2, and between zones 2 and 3; and
 - (d) 150% of the matched weighted *position* between zones 1 and 3.

7.2.65 R Table: Assumed interest rate change in the interest rate duration method
This table belongs to *BIPRU 7.2.64R*

Zone	Modified Duration	Assumed interest rate change (percentage points)
1	$0 \leq 12$ months	1.00
2	> 12 months ≤ 3.6 years	0.85
3	> 3.6 years	0.70

7.2.66 R If a *firm* uses the *interest rate duration method* it must do so on a consistent basis.

7.3 Equity PRR and basic interest rate PRR for equity derivatives

General rule

- 7.3.1 R (1) A *firm* must calculate its *equity PRR* by:
- (a) identifying which *positions* must be included within the *PRR* calculation (see *BIPRU 7.3.2R*);
 - (b) deriving the net *position* in each *equity* in accordance with *BIPRU 7.3.23R*;
 - (c) including each of those net *positions* in either the *simplified equity method* (see *BIPRU 7.3.29R*) or, subject to *BIPRU 7.3.27R*, the *standard equity method* (see *BIPRU 7.3.32R*); and
 - (d) summing the *PRR* on each net *position* as calculated under the *simplified equity method* and *standard equity method*.
- (2) All net *positions*, irrespective of their signs, must be converted on a daily basis into the *firm's base currency* at the prevailing spot exchange rate before their aggregation.

Scope of the equity PRR calculation

- 7.3.2 R A *firm's equity PRR* calculation must:
- (1) include all *trading book positions* in *equities*, unless:
 - (a) the *position* is fully deducted as a *material holding* under the calculations under the *capital resources table*, in which case the *firm* may exclude it; or
 - (b) the *position* is hedging an *option* or *warrant* which is being treated under *BIPRU 7.6.26R* (Table: Appropriate treatment for equities, debt securities or currencies hedging options);
 - (2) include notional *positions* arising from *trading book positions* in the instruments listed in the table in *BIPRU 7.3.3R*; and
 - (3) (if the *firm* is the transferor of *equities* or guaranteed rights relating to title to *equities* in a *repurchase agreement* or the lender of *equities* in an *equities* lending agreement) include such *equities* if those *equities* meet the criteria for inclusion in the *trading book*.

7.3.3 R Table: Instruments which result in notional positions
This table belongs to *BIPRU 7.3.2R(2)*

Instrument		See
Depository receipts		<i>BIPRU 7.3.12R</i>
<i>Convertibles</i> where:	(a) the <i>convertible</i> is trading at a market price of less than 110% of the underlying <i>equity</i> ; and the first date at which conversion can take place is less than three months ahead, or the next such date (where the first has passed) is less than a year ahead; or	<i>BIPRU 7.3.13R</i>
	(b) the conditions in (a) are not met but the <i>firm</i> includes the <i>convertible</i> in its <i>equity PRR</i> calculation rather than including it in its <i>interest rate PRR</i> calculation set out in <i>BIPRU 7.2</i> (Interest rate PRR).	
<i>Futures, forwards, CFDs</i> and <i>synthetic futures</i> on a single <i>equity</i>		<i>BIPRU 7.3.14R</i>
<i>Futures, forwards, CFDs</i> and <i>synthetic futures</i> on a basket of <i>equities</i> or <i>equity</i> index		<i>BIPRU 7.3.15R</i>
<i>Equity</i> legs of an <i>equity swap</i>		<i>BIPRU 7.3.19R</i>
<i>Options</i> or <i>warrants</i> on a single <i>equity</i> , an <i>equity future</i> , a basket of <i>equities</i> or an <i>equity</i> index (unless the <i>firm</i> calculates a <i>PRR</i> on the <i>option</i> or <i>warrant</i> under <i>BIPRU 7.6</i>).		<i>BIPRU 7.3.21R</i>

- 7.3.4 G *BIPRU 7.3.2R(1)* includes a *trading book position* in an *equity* that is subsequently repo'd under a *repurchase agreement* or lent under a stock lending agreement. Clearly, if the *equity* had initially been obtained via a *reverse repurchase agreement* or stock borrowing agreement, the *equity* would not have been included in the *trading book* in the first place.
- 7.3.5 G *BIPRU 7.3.2R(1)* includes *net underwriting positions* or *reduced net underwriting positions* in *equities*. *BIPRU 7.3.27R* requires a *firm* to use the *simplified equity method* in the case of *reduced net underwriting positions*. In the case of *net underwriting positions* that have not been reduced according to *BIPRU 7.8.27R* (Calculating the reduced net underwriting position), there is no such restriction; a *firm* can choose which of the two *equity* methods to use.
- 7.3.6 G *Firms* are reminded that the table in *BIPRU 7.6.5R* (Table: Appropriate PRR calculation for an option or warrant) divides *equity options* and *warrants* into:
- (1) those which must be treated under *BIPRU 7.6* (Option PRR); and
 - (2) those which must be treated under either *BIPRU 7.3* or *BIPRU 7.6*, the *firm* being able to choose whether *BIPRU 7.3* or *BIPRU 7.6* is used.
- 7.3.7 G The table in *BIPRU 7.3.3R* does not require every *convertible* to be included in *BIPRU 7.3's* PRR calculation. Where a *convertible* is not included in this PRR calculation, *BIPRU 7.2.3R(1)* (Scope of the interest rate PRR calculation) requires that it be included in the *BIPRU 7.2* PRR calculation.
- 7.3.8 G Some of the instruments listed in the table in *BIPRU 7.3.3R* are also included in a *firm's* interest rate PRR calculation. For simplicity, a *firm* may use the *interest rate PRR* calculation in *BIPRU 7.3* rather than the calculation in *BIPRU 7.2* (Interest rate PRR). *BIPRU 7.3.44G* explains this in more detail.
- Derivation of notional positions: General approach
- 7.3.9 G *BIPRU 7.3.10R - BIPRU 7.3.21R* convert the instruments listed in the table in *BIPRU 7.3.3R* into notional *positions* in individual *equities*, *equity* baskets or *equity* indices.
- 7.3.10 R Unless specified otherwise, the value of each notional *equity position* equals the quantity of that *equity* underlying the instrument multiplied by the current market value of the *equity*.
- 7.3.11 G (1) An example of *BIPRU 7.3.10R* is as follows. The current market value of a particular *equity* is £2.50. If a *firm* contracts to sell this *equity* in five year's time for £3 it would treat the notional short *equity position* as having a value of £2.50 when calculating the *equity PRR*.

- (2) In effect, the forward *position* has been treated as being equivalent to a spot *position* for the purposes of calculating *equity PRR*. To capture the risk that the forward price changes relative to the spot price, forward *equity positions* are included in the *firm's interest rate PRR* calculation (see *BIPRU 7.3.45R* or the table in *BIPRU 7.2.4R* (Table: Instruments which result in notional positions)).

Derivation of notional positions: Depository receipts

- 7.3.12 R A depository receipt must be treated as a notional *position* in the underlying *equity*.

Derivation of notional positions: Convertibles

- 7.3.13 R Where a *convertible* is included in *BIPRU 7.3's PRR* calculation (see the table in *BIPRU 7.3.3R*):

- (1) it must be treated as a *position* in the *equity* into which it converts; and
- (2) the *firm's equity PRR* must be adjusted by making:
- (a) an addition equal to the current value of any loss which the *firm* would make if it did convert to *equity*; or
- (b) a deduction equal to the current value of any profit which the *firm* would make if it did convert to *equity* (subject to a maximum deduction equal to the *PRR* on the notional *position* underlying the *convertible*).

Derivation of notional positions: Futures, forwards and CFDs on a single equity

- 7.3.14 R A *future* (including a *synthetic future*), *forward* or *CFD* on a single *equity* must be treated as a notional *position* in that *equity*.

Derivation of notional positions: Futures, forwards and CFDs on equity indices or baskets

- 7.3.15 R A *future* (including a *synthetic future*), *forward* or *CFD* on an *equity* index or basket must be treated as either:

- (1) a *position* in each of the underlying *equities*; or
- (2) the *positions* shown in the table in *BIPRU 7.3.16R*.

7.3.16 R Table: Instruments which result in notional positions
This table belongs to *BIPRU 7.3.15R(2)*

	Under the <i>simplified equity method (BIPRU 7.3.29R)</i>	Under the <i>standard equity method (BIPRU 7.3.32R)</i>
Only one country in the index or basket (see <i>BIPRU 7.3.32R</i>)	One <i>position</i> in the index or basket	One <i>position</i> in the index or basket
More than one country in the index or basket	One <i>position</i> in the index or basket	Several notional basket <i>positions</i> , one for each country or One notional basket <i>position</i> in a separate, notional country

7.3.17 G An example of *BIPRU 7.3.16R* is as follows. A *firm* decides to treat a FTSE Eurotop 300 *future* under the *standard equity method*, and furthermore, chooses to treat it as one notional *position*. The table in *BIPRU 7.3.16R* requires that this notional *position* be treated as if it were from a separate notional country rather than any of the countries to which the underlying *equities* are from.

7.3.18 R The notional *positions* created under *BIPRU 7.3.15R* have the following values:

- (1) where only one notional *position* is created, it has a value equal to the total market value of the *equities* underlying the contract; or
- (2) where more than one notional *position* is created, each one has a value which reflects the relevant *equity's* or country's contribution to the total market value of the *equities* underlying the contract.

Derivation of notional positions: Equity legs of equity swaps

7.3.19 R The *equity* leg of an *equity swap* must be treated as a *position* in the underlying *equity*, *equity* basket or *equity* index, which is:

- (1) long, if the *firm* has contracted to receive any increase and pay any decrease in the value of the underlying *equities* or *equity* index; and
- (2) short, if the *firm* has contracted to receive any decrease and pay any increase in the value of the underlying *equities* or *equity* index.

- 7.3.20 G The interest rate leg of an *equity swap* is included in a *firm's interest rate PRR* calculation (see the table in *BIPRU 7.2.4R* (Table: Instruments which result in notional positions)) unless it is treated under *BIPRU 7.3.45R*.
- Derivation of notional positions: Options
- 7.3.21 R If included in *BIPRU 7.3's PRR* calculation (see the table in *BIPRU 7.3.3R*), *options* must be treated as follows:
- (1) an *option* on a single *equity* must be treated as a notional *position* in that *equity*;
 - (2) an *option* on a basket of *equities* or *equity* index must be treated as a *future* on that basket or index; and
 - (3) an *option* on an *equity future* must be treated as:
 - (a) a long *position* in that *future*, for purchased call *options* and written put *options*; and
 - (b) a short *position* in that *future*, for purchased put *options* and written call *options*.
- Deriving the net position in each equity
- 7.3.22 R The net *position* in each *equity* is the difference between the value of the *firm's long positions* (including notional *positions*) and the value of its short *positions* (including notional *positions*) in the same *equity*.
- 7.3.23 R
- (1) When deriving the net *position* in each *equity*, a *firm* must not net long and short *positions* except in accordance with this *rule*.
 - (2) Subject to (3), a *firm* may net long and short *positions* in the same *equity*. Two *equities* are the same if and only if they:
 - (a) enjoy the same rights in all respects; and
 - (b) are fungible with each other.
 - (3) Long and short *positions* in different tranches of the same *equity* may be treated as being in the same *equity* for the purpose of (1), where:
 - (a) the tranches enjoy the same rights in all respects; and
 - (b) the tranches become fungible with each other within 180 days, and thereafter the *equity* of one tranche can be delivered in settlement of the other tranche.
- 7.3.24 R A *firm* must not net a *reduced net underwriting position* with any other *equity position*.
- 7.3.25 G *BIPRU 7.3.24R* only relates to *reduced net underwriting positions*.

Simplified and standard equity methods

- 7.3.26 G *BIPRU 7.3.1R(1)* requires that the net *position* in each *equity* be included in either the *simplified equity method* or the *standard equity method*, subject to the restriction in *BIPRU 7.3.27R*. A *firm* does not have to use the same method for all *equities*.
- 7.3.27 R A *firm* must use the *simplified equity method* for *reduced net underwriting positions*.
- 7.3.28 G A *firm* may use either method for a *net underwriting position*; *BIPRU 7.3.27R* only relates to *reduced net underwriting positions*.

Simplified equity method

- 7.3.29 R Under the *simplified equity method*, the *PRR* for each *equity*, *equity index*, or *equity basket* equals the market value of the net *position* (ignoring the sign) multiplied by the *appropriate PRA* from the table in *BIPRU 7.3.30R*. The result must be converted into the *firm's base currency* at current spot *foreign currency* rates.
- 7.3.30 R Table: simplified equity method PRAs
This table belongs to *BIPRU 7.3.29R*

Instrument	<i>PRA</i>
Single <i>equities</i>	12%
<i>Qualifying equity indices</i> (see <i>BIPRU 7.3.38R</i>)	8%
All other <i>equity indices</i> or baskets	12%
If it is necessary to distinguish between the <i>specific risk PRA</i> and the <i>general market risk PRA</i> , the <i>specific risk PRA</i> for the first and third rows is 4% and that for the second row is 0%. The rest of the <i>PRA</i> in the second column is the <i>general market risk PRA</i> .	

Standard equity method

- 7.3.31 G The *standard equity method* divides the risk of loss from a *firm's equity positions* into the risk of loss from a general move in a country's *equity market* and the risk of loss from an individual *equity's price* changing relative to that country's *equity market*. These are called *general market risk* and *specific risk* respectively.
- 7.3.32 R Under the *standard equity method*, a *firm* must:

- (1) group *equity positions* into country portfolios as follows:
 - (a) a *position* in an individual *equity* belongs to:
 - (i) the country it is listed in;
 - (ii) any of the countries it is listed in, if more than one; or
 - (iii) the country it was issued from, if unlisted;
 - (b) a *position* in an *equity* basket or index that is treated under *BIPRU 7.3.15R(2)*, is allocated to one or more country portfolios based on the countries to which the underlying *equities* belong to under (a) or a notional country provided for in the table in *BIPRU 7.3.16R*; and
- (2) sum:
 - (a) the *PRRs* for *specific risk* calculated under *BIPRU 7.3.33R*; and
 - (b) the *PRRs* for *general market risk* for each country portfolio as calculated under *BIPRU 7.3.41R* and *BIPRU 7.3.42R*.

Standard equity method: Specific risk

7.3.33 R Under the *standard equity method*, a *firm* must calculate a *PRR* for *specific risk* based on the net *position* in each *equity*, *equity* index or *equity* basket by multiplying its market value (ignoring the sign) by the *appropriate PRA* from the table in *BIPRU 7.3.34R*.

7.3.34 R Table: PRAs for specific risk under the standard equity method
This table belongs to *BIPRU 7.3.33R(1)*

Instrument	<i>PRA</i>
<i>Qualifying equities</i>	2%
<i>Qualifying equity indices</i> (see <i>BIPRU 7.3.38R</i>)	0%
All other <i>equities</i> , <i>equity</i> indices or <i>equities</i> baskets	4%

Definition of a qualifying equity

7.3.35 R A *qualifying equity* is one that satisfies the following conditions:

- (1) it belongs to a country portfolio that satisfies the following conditions:

- (a) no individual *position* exceeds 10% of the portfolio's gross value; and
 - (b) the sum of *positions* (ignoring the sign) which individually represent between 5% and 10% of the portfolio's gross value, does not exceed 50% of the portfolio's gross value;
- (2) it is not of an issuer that has issued only traded debt *securities* that currently attracts an 8% or 12% *PRA* in the table in *BIPRU 7.2.44R* (Specific risk *PRA*) or that attract a lower requirement only because they are guaranteed or secured; and
- (3) it is a constituent of an index in the table in *BIPRU 7.3.39R*.

7.3.36 G

- (1) The following example illustrates *BIPRU 7.3.35R(1)*.
- (2) A country portfolio has a gross value of £100 and is made up of *positions* in 29 different *equities* (some are long *positions*, others are short *positions*). Not all the *equities* are constituents of an index used to create the FT All-World Index (this criterion only becomes relevant once a *firm* has determined whether the country portfolio meets the test in *BIPRU 7.3.35R(1)*).
- (3) Six *positions* exceed the 5% threshold. The following diagram shows the *composition* of the portfolio.

- (4) Part (a): the portfolio meets the first part of the test because no individual *position* is worth more than 10% of the portfolio's value.
- (5) Part (b): the portfolio fails the second part of the test because the sum (ignoring the sign) of the six relevant *positions* is £52; this exceeds 50% of the portfolio's value.

- 7.3.37 G (1) A country portfolio can be split into two sub-portfolios if this enables one sub-portfolio to meet the requirements in *BIPRU* 7.3.35R(1). Individual *positions* may be sub-divided between sub-portfolios.
- (2) Continuing the example above, one of the largest *positions* is taken out of the portfolio and put into a new portfolio. The new portfolio fails the two tests, but the amended portfolio meets both tests:
- (a) Part (a): no single remaining *position* exceeds £9.10.
- (b) Part (b): the sum of the five relevant *positions* is £43, this is less than 50% of the new portfolio's value of £91.

Definition of a qualifying equity index

- 7.3.38 R A *qualifying equity index* is one which is traded on a *recognised investment exchange* or a *designated investment exchange* and:
- (1) is listed in the table in *BIPRU* 7.3.39R; or
- (2) is not listed in the table in *BIPRU* 7.3.39R, but is constructed in such a way that:
- (a) it contains at least 20 *equities*;
- (b) no single *equity* represents more than 20% of the total index; and

(c) no five *equities* combined represent more than 60% of the total index.

7.3.39 R Table: Qualifying equity indices
This table belongs to *BIPRU 7.3.38R*

Country or territory	Name of index
Australia	All Ordinaries
Austria	Austrian Traded Index
Belgium	BEL 20
Canada	TSE 35, TSE 100, TSE 300
France	CAC 40, SBF 250
Germany	DAX
European	Dow Jones Stoxx 50 Index, FTSE Eurotop 300, MSCI Euro Index
Hong Kong	Hang Seng 33
Italy	MIB 30
Japan	Nikkei 225, Nikkei 300, TOPIX
Korea	Kospi
Netherlands	AEX
Singapore	Straits Times Index
Spain	IBEX 35
Sweden	OMX
Switzerland	SMI
UK	FTSE 100, FTSE Mid 250, FTSE All Share
US	S&P 500, Dow Jones Industrial Average, NASDAQ Composite, Russell 2000

Standard equity method: General market risk: General

- 7.3.40 R Under the *standard equity method*, a *firm* must apply approach one, as set out in *BIPRU 7.3.41R*, to each country portfolio (or part portfolio) unless the conditions in *BIPRU 7.3.42R(3)* are met, in which case the *firm* may instead apply approach two, as set out in *BIPRU 7.3.42R*, to the relevant country portfolios (or part portfolios).

Standard equity method: General market risk: Approach One: No offset between different country portfolios

- 7.3.41 R Under approach one as referred to in *BIPRU 7.3.40R*, the *PRR* for *general market risk* equals the net value (ignoring the sign) of the country portfolio multiplied by 8%.

Standard equity method: General market risk: Approach Two: Limited offset between different country portfolios

- 7.3.42 R (1) Under approach two as referred to in *BIPRU 7.3.40R*, the *PRR* for *general market risk* is calculated using the following formula:

$$\sqrt{(8\% * CP_1)^2 + (8\% * CP_2)^2 + (8\% * CP_3)^2 \dots \dots \dots (8\% * CP_n)^2}$$

- (2) In the formula in (1) CP_i denotes the net value of *i*th country portfolio (converted to the *firm's base currency* using current spot *foreign currency* rates).

- (3) The conditions referred to in *BIPRU 7.3.40R* that must be met for a *firm* to be able to use approach two as referred to in *BIPRU 7.3.40R* are as follows:

- (a) at least four country portfolios are included (that is: $n \geq 4$);
- (b) only country portfolios for countries which are full members of the *OECD*, Hong Kong or Singapore are included;
- (c) no individual country portfolio comprises more than 30% of the total gross value of country portfolios included; and
- (d) the total net value of country portfolios included equals zero, that is:

$$\sum_1^n CP_i = 0$$

- 7.3.43 G In order to meet *BIPRU 7.3.42R(3)(d)*, it is likely that part of a country portfolio will have to be excluded from approach two under *BIPRU 7.3.42R* (and therefore included in approach one under *BIPRU 7.3.41R*), even if that country portfolio meets *BIPRU 7.3.42R(3)(a) - (c)*.

Basic interest rate calculation for equity instruments

- 7.3.44 G A basic *interest rate PRR* calculation is included in *BIPRU 7.3* for a *firm* that does not wish to use the calculation in *BIPRU 7.2* (Interest rate PRR). However, it tends to result in higher charges than the methods in *BIPRU 7.2*, largely because the *interest rate PRR* is calculated on each notional *equity position* separately and then summed without offsetting long and short *positions*.
- 7.3.45 R This *rule* applies to a *firm* that does not include a *forward, future, option* or *swap* on an *equity, basket of equities* or *equity index* in the calculation of its *interest rate PRR* calculation under *BIPRU 7.2* (Interest rate PRR). However it does not apply to *cliquet* as defined in *BIPRU 7.6.18R* (Table: Option PRR: methods for different types of option). A *firm* must calculate the *interest rate PRR* for a *position* being treated under this *rule* as follows:
- (1) multiply the market value of the notional *equity position* underlying the instrument by the appropriate percentage from the table in *BIPRU 7.3.47R*; and
 - (2) sum the results from (1), ignoring the sign.
