CAIDP Update 4.01

September 12, 2022

AI POLICY NEWS

White House Introduces Big Tech Reform Principles

The White House released six principles for improving competition and tech platform accountability, including algorithmic transparency. According to a report of the meeting, the experts "explained that that lack of transparency means that the algorithms cannot be scrutinized by anyone outside the platforms themselves, creating a barrier to meaningful accountability." The White House group recommended "increased transparency about platform's algorithms and content moderation decisions and new efforts to stop discriminatory algorithmic decision-making."

The JURI (Legal) Committee of the European Parliament Votes on the EU AI Act

The Committee made several important changes that would apply to all AI systems. Among them is the need for all AI systems to be under human oversight and to respect human dignity. The Committee wants people to understand how the AI systems made a decision when it has a legal effect on them, including the reasoning behind it.

Korean Government Announced Digital Measures to Address Workplaces, Living Areas, and Catastrophic Situations

Through the use of sensors and AI, the government wants to ensure the stability of crucial infrastructures for the preemptive management of accidents. The government and Ministry of Employment and Labor will work together to develop new digital safety services using 5G networks and IoT sensors.

The UK's Equality Regulator Addresses AI Discrimination

The Equality and Human Rights Commission will monitor public bodies' use of artificial intelligence to prevent discrimination. The Commission published new guidance to help organizations avoid breaking the law on discrimination. The Guidance provides practical examples of how AI may cause discriminatory outcomes.

CAIDP ACTIONS

CAIDP Endorses US-U.K Privacy Enhancing Technologies (PETs) Prize Challenge

The US and UK launched a prize challenges for PETs to combat global societal challenges. In a statement to the Office of Science and Technology Policy, CAIDP emphasized that the term "PETs" refers to techniques that "minimize or eliminate the collection of personal data." The US-UK prize reflects this approach.

Artificial Intelligence and Democratic Values: Next Steps For the United States

For the Council on Foreign Relations, Marc Rotenberg, CAIDP President, and Merve Hickok, CAIDP Research Director, write that the United States must move forward the AI Bill of Rights, proposed by the US Office of Science and Technology Policy. They state, "absent a legislative agenda or clear statement of principles, neither allies nor adversaries are clear about the U.S. AI policy objectives."

Artificial Intelligence and Democratic Values: Next Steps for the United States

China and the European Union have both moved to create comprehensive artificial intelligence policy. U.S. policymakers should move forward the AI Bill of Rights to keep pace.

AI AND DEMOCRATIC VALUES INDEX 2021

CAIDP's [Artificial Intelligence and Democratic Values Index](#) evaluates national AI policies and practices.

Country Focus: Japan

Japan is a pioneer in the field of AI policy. The Conference toward AI Network Society, established in 2016, is broadly influential. The Japanese R&D Guidelines provided the basis for the OECD AI Principles. Japan also hosted the G20 Leaders' meeting in Osaka in 2019 at which time the G20 nations endorsed the OECD AI Principles. Former Prime Minister Shinzo Abe promoted the concept of Data Free Flow with Trust (DFFT), a core concept for human-centric AI, that carries forward in the policy recommendations of the OECD, the G20, and the European Commission.

CAIDP NEWS

CAIDP Research Director Merve Hickok recognized as a Responsible AI Leader of the Year by Women in AI Awards 2022.

Saniye Gülser Corat Joins CAIDP

CAIDP welcomes [Saniye Gülser Corat](#). Currently, Corat is a Strategic Advisor at Coopersmith Law + Strategy. Most recently, she served as UNESCO's Director of Gender Equality from September 2004 to August 2020. She led the landmark 2019 study "I'd Blush if I Could: Closing Gender Divides in Digital Skills in Education", which found widespread inadvertent gender bias in the most popular artificial intelligence tools.
