

## **Highlights**

The look of brick, sandblasted stone, concrete block, cut stone, and other surface treatments were all created by one contractor using Dryvit's Outsulation System and a number of finish effects.

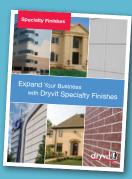

"We even created 'fake' shuttered windows, dock doors, boarded facades, all in Dryvit Outsulation, to give the building a two-story character."

- Jeff Price, Architect

Can new construction match 19<sup>th</sup> century charm? MAIN STREET CINEMA 8

# Of course it can.

# Dryvit Outsulation System Seamlessly Integrates New Construction with Historic Charm

"We made grooves and aesthetic joints by cutting directly into the 1½ inch EPS used in the Outsulation System... to simulate window sills, shutters and window boxes."

- Jeremy Deter, Applicator

B&B Theatres, Hannibal, MO

J. Price Architect, Liberty, MO

### **DRYVIT SYSTEM & FINISHES:**

Outsulation® and Custom Brick™ Finish

### **DRYVIT APPLICATOR:**

Entrup Painting & Drywall, Quincy, IL

### **DRYVIT DISTRIBUTOR:**

Ceiling Supply, St. Louis, MO

# The story:

# **Challenges**

Transform a vacant lot into a new movie theater when:

- The building needs to blend into the historic character of Mark Twain's home town
- A high water table limits the carrying capacity of the structure's shell
- Budget limitations further preclude the use of brick and other traditional materials

### Solution

Use Dryvit Outsulation System to effectively mimic aesthetics of masonry and other materials without the weight and cost of masonry.

### Result

A building that respects its historic brick-building neighbors and the budget of its owners.

### Location

Hannibal, MO – the historic boyhood home of Mark Twain, on the banks of the Mississippi.
