The European Central Bank (ECB) tendered the transportation and disposal of soil, including contaminated soil related to the construction of the new ECB premises. The new ECB premises will be built on the site of the former wholesale market hall in the eastern part of D-Frankfurt-on-Main (Sonnemannstraße). The site comprises approximately 120 000 m².
During the construction of the new ECB premises soil from anthropogenic and geogenic origin (partly contaminated) will be excavated at a number of locations all over the project site during several building phases.

The successful tenderer shall transport and dispose of soil excavated by the contractor for the preliminary building works (Tender T069 responsible in particular for the construction pit) of up to approximately 90 000 m³. The ECB will have the option to commission the successful tenderer with transport and disposal of soil excavated by the general contractor (Tender T070, ongoing) who executes all remaining construction works on site.

The total volume excavated sums up to approximately 255 000 m³, of which 210 000 m³ have to be transported for off-site disposal and/or utilisation following the progress of excavation.
