

Old and new frontiers of the ESRB: Systemic risk, non-banks and data analysis

8th Annual Conference of the European Systemic Risk Board Frankfurt

Olli Rehn, First Vice-Chair of the ESRB Governor of the Bank of Finland

27 September 2024

The ESRB's track record & new frontiers

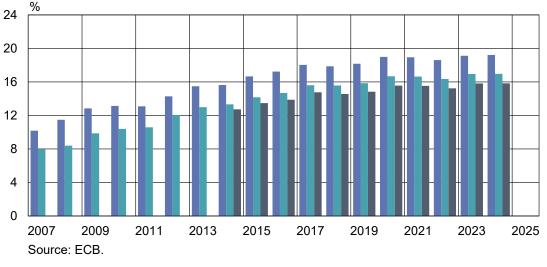

- 1 ESRB at 15: an adolescent with a solid track record
- 2 Review of the ESRB mandate and workings
- 3 New frontiers: non-banks & data analysis

Sturdy capital buffers provide resilience

Capital adequacy of euro area banking sector, 2007-2024/I

- Total capital ratio %
- Tier 1 ratio %

Key risks for EU financial stability

- Risks remain elevated amid heightened geopolitical risks and the still fragile recovery of the European economy
- Risk of disorderly market correction, possibly amplified by non-banking sector
- Deteriorating asset quality and funding risk of the banking sector

ESRB's members reflect on its future – ATC survey

- ESRB members especially value:
 - ESRB's work in analysing the systemic risk and building up macroprudential policy frameworks
 - Holistic view of systemic risks in the EU
 - Active and fruitful cooperation with European Supervisory Authorities
- Evolution not revolution:
 - New, emerging risks and vulnerabilities need to be better understood
 - Non-bank systemic risks and interconnections need greater attention
 - Increasing speed of the financial system is a challenge for timely risk assessment

Three priorities in the way we work

- Enhance our analytical capacity by making better use of data and research
- 2. Bring into use new analysis methods and technologies
- 3. Focus on our core activities

Analysis based on data and research – a key priority

- The importance of analysis based on data and research cannot be overemphasized
- The ESRB's access to data can be divided into two frameworks:
 - The ESRB has *ex ante access* to data on a regular, ongoing basis, i.e. as soon as it is reported
 - The ESRB only has *ex post access* to some important datasets, through ad hoc requests – these include granular datasets collected by the ESAs
- To fulfil its mandate properly, the ESRB needs better access to the data collected by the European Supervisory Authorities (ESAs)

Thank you!
