

# Cloud Readiness Review

- Baselines your organization's current cloud capabilities (processes, skills, and value realization)
- Progresses up the maturity curve by aligning to key industry standards
- Identifies pockets of existing good capabilities and creates action plan to address gaps and weaknesses
- Helps build unified view and team spirit through teamwork of cross functional stakeholders

## Common challenges

Organizations adopt cloud, multi-cloud, and hybrid operating models to reduce cost, minimize risk, increase security and to ultimately enable agility and innovation.

But successful cloud adoption is complex!

- How do I get my operations ready?
- What is the most proven way to strip out costs in my business?
- How do I factor in sustainability and our net zero commitments?
- How can I align my security to an industry standard?

All valid questions covering both business perspectives (sustainability, FinOps, people, governance) as well as technical perspectives (security, DevOps, platform, operations), critical for successful migration programs.

**The Cloud Readiness Review is an essential tool for any organization transitioning to the cloud. It helps maximize success and accelerate the journey.**

With our Cloud Readiness Review you:

**Optimize cost, agility and quality**  
to ensure your organization is efficient  
today and flexible for the future

**Save**

**Scale**

**Serve**

"I need...

...a clear view of  
how to optimize  
my IT spending."

...a flexible  
technology  
environment that  
enables agility."

...to deliver  
and easily manage  
high-quality digital  
services for customers."

## Our offering

The Cloud Readiness Review is a comprehensive, accurate and proven way to develop maturity in key areas for a more productive, lower risk cloud adoption journey – irrespective of organization size, sector or stage of adoption.

Cloud Readiness Review comprises:

- **Pre-workshop** overview meeting
- **Workshop** (1 day or 2 half-days)
- **Post-workshop** presentation of results and roadmap of recommended actions

**1 Day**  
workshop with  
Fujitsu Subject  
Matter Experts

**Focused**  
on most critical  
cloud aspects  
for success

**Balanced**  
business & technology,  
people & processes  
approach

**Zero**  
obligation or  
commitment

## Why Fujitsu?

### **A transformation partner**

Using our comprehensive range of capabilities and services, proven methods, and accredited experts, focusing on your business and technical imperatives.

### **Global capability for cost-effective delivery**

We combine industry know-how with broad technology expertise in all cloud aspects. Working with dedicated teams to provide a consistent and highly efficient approach.

### **Breadth of cloud portfolio and experience**

We provide years of experience with end-to-end assessment, transforming and ongoing management and optimization.

### **Security and compliance at the heart**

Firmly integrated into all transformation recommendations and play an integral role to our transformation planning.

Want to assess the maturity curve of your organization?  
Reach out to our experts to accelerate your cloud journey!
