Journey to Zero Injuries

Dear Colleagues

We are pleased to report the significant reduction in Loss Time Injuries (LTIs) and Loss Time Injury Frequency Rate (LTIFR). At the end of October 2019, we have a LTIFR of 0. This means Zero lost time injuries and reflects a positive improvement in the SABS Health and Safety performance for the year.

This achievement was made possible by each and every employee's effort and/or contribution to Health and Safety. The SABS LTIFR statistics reflects everyone's cooperation and commitment to making SABS a safer and healthier place to work.

Protecting the health and safety of everyone in the workplace is of vital importance to the SABS. The Occupational Health and Safety Act 85 of 1993 states that everyone must be able to work in a safe and healthy work environment.

A big thank you to all of you for this accomplishment. This is something worth celebrating, we are most definitely on the right track and covering more ground than we thought.
