Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

Section Editors-in-Chief

Prof. Dr. Luis Martínez López
Prof. Dr. Wade Trappe
Dr. Arkaitz Zubiaga

Aims

Information (ISSN 2078-2489) is an international, scientific open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restrictions on the maximum length of manuscripts. The full experimental details must be provided so that the results can be reproduced. There are, in addition, unique features of this journal:

- manuscripts regarding research proposals and research ideas will be particularly welcomed
- electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material
- we also accept manuscripts communicating to a broader audience with regard to research projects financed with public funds
- copies of source codes (if any) might be deposited

Scope

Information theory and methodology, including, but not limited to:

- coding theory (including data compression, error-correction and cryptographic algorithms)
- information-theoretic security
- quantum information
- philosophy/ethics of information
- post quantum computing

Information intelligence, including, but not limited to:

- knowledge management
- social media and social networks
- big data and cloud computing
- artificial intelligence
- internet of things/internet of everything

Information processes, including, but not limited to:

- digital signal processing
- data mining
- information extraction

Information applications, including, but not limited to:

- human-machine interface
- information in society and social development
- business process management
- blockchain and emerging technologies

Information and communications technology, including, but not limited to:

- communication systems and networks
- wireless sensor network
- mobile communication services

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Journal Rank

CiteScore - Q2 (*Information Systems*)

Coverage by Leading Indexing Services

Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases

Rapid Publication

A first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2024)
