Thanks Barb.

I'll swap out the figures from the BA (the ones with WOA in them) that I used in the American effects section with these now.

Cathy, I know we talked about someone else doing that, but I know where they go and should only take a few minutes.

Hi Barb and Cathy,

The following are attached:

- Reclamation_ROConLTO_Trend_Reporting_rev02cy_Temp_3sty_ELtQ5_HEC5Q_RECTEMP__WO A11_COS6_PA5(woVSA)_011519_BiOps.xlsm
 - Trend reporting Excel file with added output parameters (Clear Creek below Whiskeytown, Clear Creek at Igo, and Clear Creek at Mouth).
- ROConLTO - 16 Amer R at Watt Temperature Exceedance_SameScale.pdf
 - PDF with exceedance plots of COS 011319 and PA 011519 at American River at Watt temperature for April through September. These plots all have the same y-axis range (52 to 84 degrees Fahrenheit).
- ROConLTO - 16 Amer R at Watt Temperature Exceedance_MonthByMonthScale.pdf
 - PDF with exceedance plots of COS 011319 and PA 011519 at American River at Watt temperature for April through September. The y-axis range is focused to the resultant range for each month.

Please let me know if you have any questions.

Best,

Steve

Subject: [EXTERNAL] Plots / Temp help

Hi Steve -

See attached for some requested modified plots and additional temperature outputs from Clear Creek for the ROC on LTO analysis for NMFS. If you could send these back to Barb and Cathy at NMFS that would be great.

Thank you!

Katrina Harrison
