

Palo Alto Networks is the world's cybersecurity leader, providing next-gen security to protect and enable transforming enterprises. We secure more than **85,000 customers** globally, including **9 of the Fortune 10**. We partner to help our customers adopt a proactive cybersecurity strategy so they can:

- + **Understand the ever-evolving** threat landscape and know what's at stake.
- + **Be equipped to prevent, detect and effectively respond to all threats** across every vector—network, cloud, endpoints and the software supply chain.
- + **Maximize security efficacy** while optimizing total cost of ownership.

We secure enterprises' transformations through industry-leading threat research and intelligence, a complete portfolio of best-in-class product innovation, and expert services to support every step of the transformation journey. Our best-of-breed cybersecurity platforms deliver comprehensive Zero Trust, including:

Network Security

Best-in-class network security platform across hardware, software and SASE—securing the hybrid workforces and complex infrastructures of today.

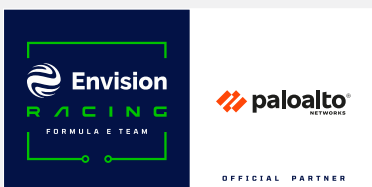

Cloud Security

Comprehensive cloud native application protection platform from development to runtime, across multicloud and hybrid environments.

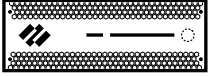

Security Operation

Next-generation SOC platform with unparalleled threat visibility, detection and response through best-in-class data integration, analytics and automation.

A Winning Team: Envision Racing & Palo Alto Networks

Envision Racing relies on a wide selection of best-of-breed hardware and software products from Palo Alto Networks portfolio to protect their innovations and keep them speeding ahead, including:

PA-440 NEXT-GEN FIREWALL

The world's first ML-powered NGFW. Best-in-class, comprehensive network security with no-compromise performance.

“The PA-440 Next-Gen Firewall has been a great solution for Envision Racing because, prior to our partnership, we didn’t have the capability to monitor network threats and vulnerabilities in an easy way.”

VM-SERIES

Best in-class network security that is virtual not vulnerable. Cloud integrated, automated, and easy to manage.

“The VM-Series is the ideal solution for Envision Racing as this provides all of the benefits the Next-Gen Firewalls bring, but with no physical footprint, and can run on the team’s existing virtual infrastructure.”

PANORAMA™

Easy-to-implement, centralized management features that provide insight into network-wide traffic. Unified policy management. Centralized visibility. Automated threat response.

“Panorama gives us great visibility into our network health and makes it extremely easy to use.”

CORTEX® XDR™

Proven endpoint protection. Stops attacks with the power of AI and full visibility. Laser-accurate detection. Lightning-fast investigation and response.

“Having Cortex XDR installed on all of our endpoints, we can be sure that we have the best protection against known or zero-day exploits/attacks.”

Coming soon to Envision Racing ...

PRISMA® CLOUD

The next evolution of cloud security. Best-of-breed capabilities. Fully integrated. Full stack, full lifecycle security for any cloud.
