Financial Report

Corporate Director
Senior Executive Vice President: Yukio Saeki

Summary of Interim Financial Results for the Fiscal Year Ending March 31, 2025

Year-on-Year Comparison: Decrease in sales and income

Net sales
Ordinary income
Net income attributable to owners of the parent

6.7% decrease
1.7% decrease
5.4% decrease

Compared to the interim earnings forecast

Net sales +1.6% Ordinary income +11.8% Net income attributable to owners of the parent +13.3%

Summary of Financial Results: Comparison with Prior Year

(million yen)

	FY2024 Interim	FY2025 Interim	Change	FY2025 Forecast Announced Apr. 30
Net sales	119,698	111,712	(7,986)	110,000
Cost of sales	101,686	95,288	(6,398)	
Gross profit	18,011	16,423	(1,588)	
Selling, general & administrative expenses	10,858	10,131	(727)	
Operating income	7,153	6,292	(860)	
Non-operating income Non-operating expenses	185 1,085	203 348	17 (737)	
Ordinary income	6,253	6,147	(106)	5,500
Interim net income	4,551	4,305	(245)	3,800
Number of employees	1,352	1,387	35	

^{*} Interim net income is quarterly net income attributable to owners of the parent.

5

Summary of Financial Results : Change in Net Sales

In the segment categories, the PB Business is included in the EC Business. The PB Business includes Tokyo Electron Device Nagasaki Limited and FAST CORPORATION.

Sales and Income by Segment

- CN Business: Equipment sales and security products were strong. Maintenance and monitoring services
 also increased.
- EC Business: Despite expansion of customer commercial rights, weak performance due to prolonged stagnation in the Chinese market, etc.
 (million yen)

	FY2024 Interim		FY2025 Interim			
	Net Sales	Segment Income	Net Sales	Change	Segment Income	Change
Computer Networks (CN) business	14,353	1,263	17,687	3,333	2,168	905
Electronic Components (EC) business	105,344	4,990	94,024	(11,319)	3,978	(1,011)
Total	119,698	6,253	111,712	(7,986)	6,147	(106)

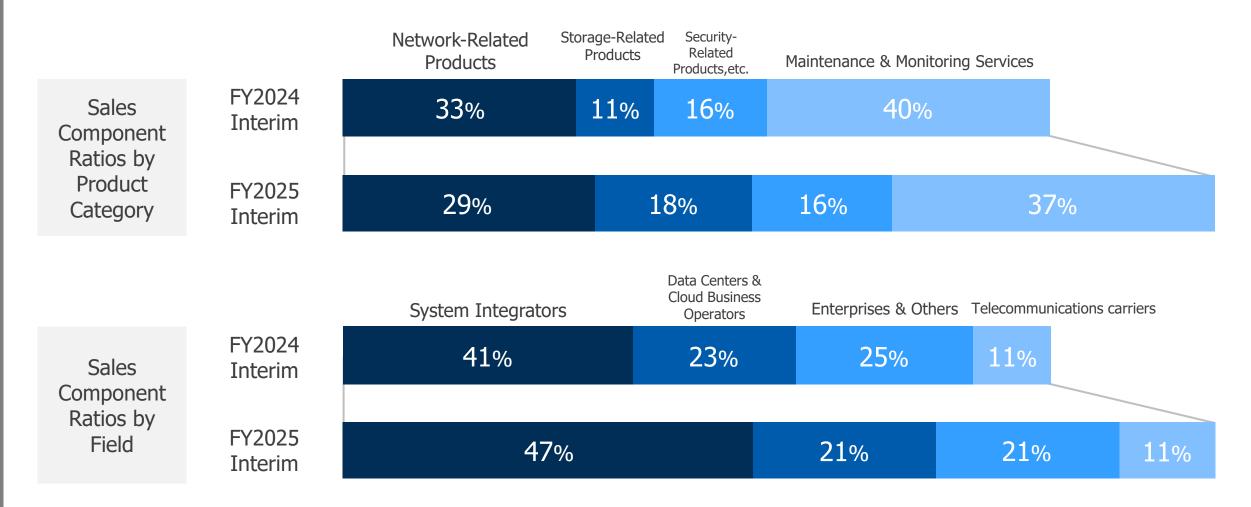

^{*} Segment income is ordinary income

^{*} In the segment categories, the PB Business is included in the EC Business

Segment Information: CN Business

- Storage-related products: Sales to system integrators were strong.
- Security-related products, etc.: System integrators and enterprise customers performed well.
- Maintenance and monitoring services: It was steady.

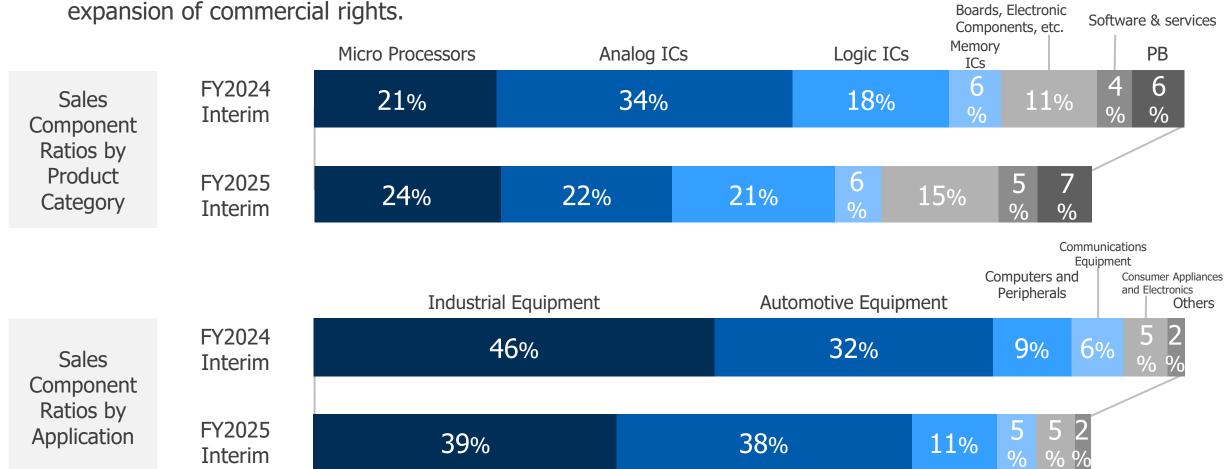

Segment Information: EC Business

• Industrial equipment: Customer inventories remained high. Sales were also weak due to a decrease in analog ICs as shift to direct manufacturer to customer sales.

• Automotive equipment: Processors, logic ICs, boards, electronic components, etc. increased due to the expansion of commercial rights

Consolidated Overseas Subsidiaries: Net Sales—EC Business

Recovery trend in computer and peripheral equipment applications

	FY2024 Interim	FY2025 Interim	Change	Rate of Change
Consolidated overseas subsidiaries net sales (million yen)	25,876	26,406	530	2.0%
Consolidated overseas subsidiaries net sales ratio	24.6%	28.1%		
Consolidated overseas subsidiaries net sales (M\$)	183	172	(10)	(5.8%)
Exchange rate (yen)	141.06	152.78		

^{*} The net sales ratio is the ratio to EC Business net sales.

PB Business: Net Sales (EC Business)

TED : Design and manufacturing services were at the same level as the previous year.

Increased due to full-scale delivery of wafer inspection systems.

TED Nagasaki : Industrial and power equipment applications were steady, but semiconductor production

equipment applications were weak.

• FAST : Inspection systems were steady.

(million yen)

	FY2024 Interim	FY2025 Interim	Change	Rate of Change
PB business net sales	6,776	6,986	209	3.1%
Net sales ratio	6.4%	7.4%		

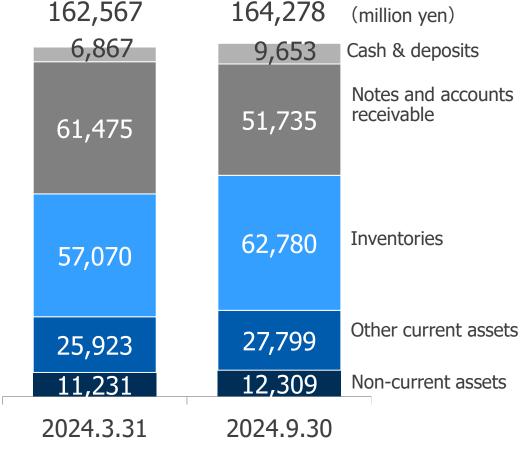

^{*} The net sales ratio is the ratio to EC Business net sales.

Balance Sheet

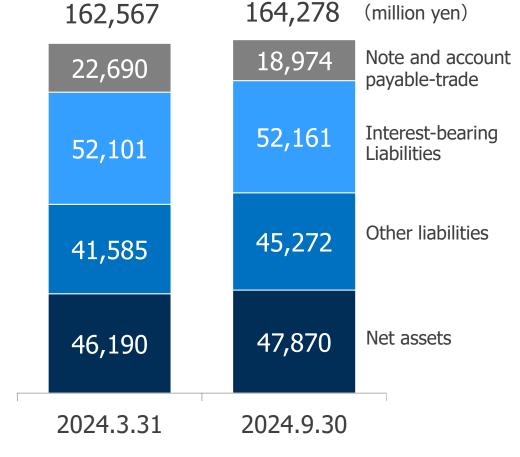

Assets

- Sales decreased compared to the previous 4Q, and accounts receivable decreased.
- Inventories increased with expansion of commercial rights, etc.

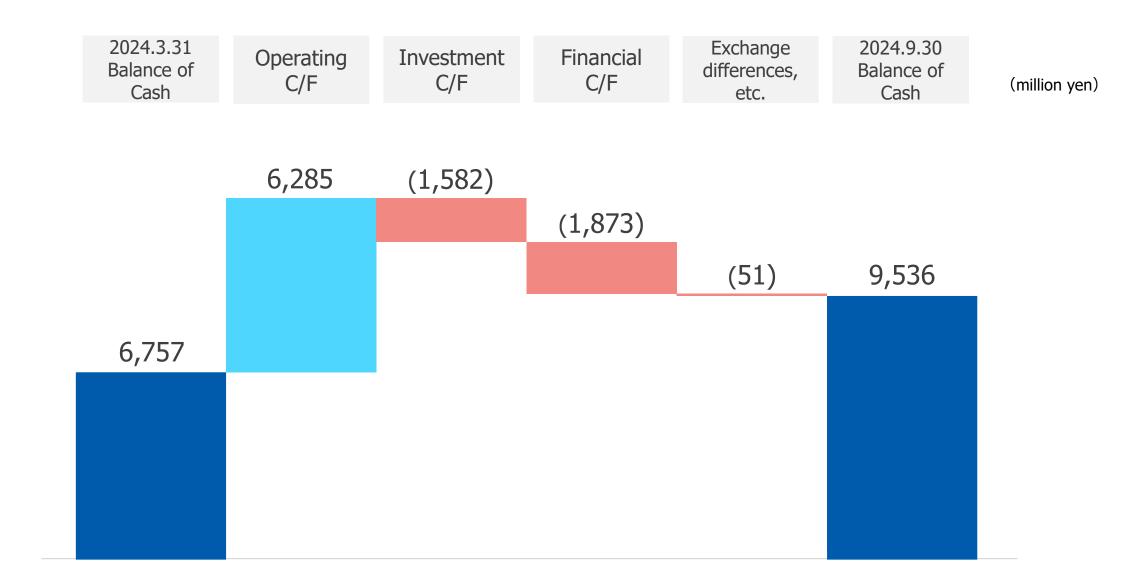

Liabilities & Net Assets

- In line with the decrease in purchases, notes and accounts payable-trade decreased.
- Due to growth in maintenance services, advances received increased.

Statement of Cash Flows

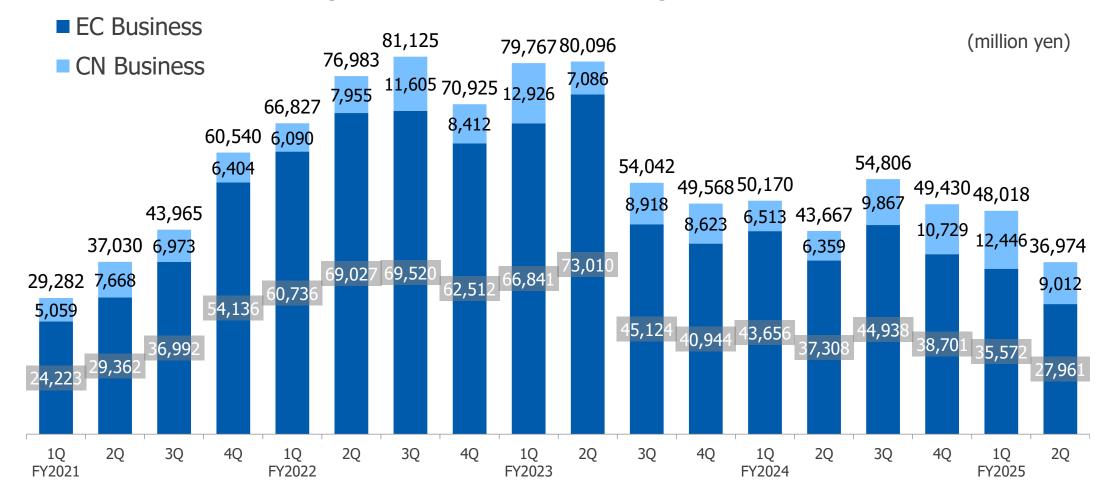

Changes in Orders Received

- CN Business: IT investments were strong. There were large projects in FY2024/3Q and beyond. Orders for security products were strong.
- EC Business: Rebound from long-term orders and continued high levels of customer inventories.

Connect Beyond Forecast for the Fiscal Year Ending March 31, 2025

19

In the segment categories, the PB Business is included in the EC Business. The PB Business includes Tokyo Electron Device Nagasaki Limited and FAST CORPORATION.

Initiatives for Profitable Growth

Promotion of promising businesses with a focus on strengthening manufacturer functions and service business

CN Business

Start handling new products

Expand stock business

- In-house services
- Technical consulting services

EC Business

Expand handling of products

Promote solutions business (coordination with PB)

Strengthen cloud AI and edge AI business

 Provide services and solutions with Microsoft as the core

PB Business

Strengthen wafer inspection systems business

- •Full-scale start of wafer inspections systems delivery
- Technology sharing
- •Sales promotion to wafer manufacturers in Japan and overseas

Strengthen TED Nagasaki manufacturing line

Strengthen Vision automation system

CN Business: Expansion of solution areas

Technology and product initiatives that anticipate change

Technical and market research

Product Research Verification technical training Confirmation of domestic needs

handling

Work with overseas offices to constantly research the latest technologies and find the best solutions

Security

Network

Storage

Cloud

ΑI

21

Expansion of the areas to be addressed (e.g., security)

Cloud Security

Network & Application

Zero Trust Security

Endpoint Security

SaaS Security

Attack Surface Management

Secret Management and Operational Automation

Security Information Event Management

CN Business: Strengthen service business

Planning Assessment assistance

Design Construction

Maintenance operation monitoring

Postintroduction support

Technical assistance training for customers

PoC/PoV support

Support for verification of implementation effectiveness, technology, and other customer objectives

Onboarding

Training aimed at maximizing effectiveness in the early stages of implementation

Cloud integration

Technical support for customer phases of migration to the cloud

Install

Construction work by experienced certified engineers

Maintenance and technical support

Hardware Maintenance help desk Technical information on the support site

Operation and monitoring

24-hour, 365-day "one-stop" operation and monitoring SOC service NOC service

ZenOne

Customer success

Visualization and analysis of usage conditions and support for implementation of measures to further increase the effectiveness of introduction

Account service

Dedicated engineers help customers solve a variety of issues they face

GrowthMarkets & ChangingNeeds

R&D

New measurement and inspection techniques

Manufacturing

Infrastructure

Development, production, and system infrastructure resilience

M&A

Accelerating business growth

Semiconductor wafer Liquid crystal panel

- Si/compound wafers (wafer fabrication)
- Advanced packaging process (device manufacturing)
- Steadfastly maintain business with existing customers

Electronic parts (components)

Unresolved inspection needs within the manufacturing process

Enhancement and acceleration

Optimization

New development

Wafer inspection system

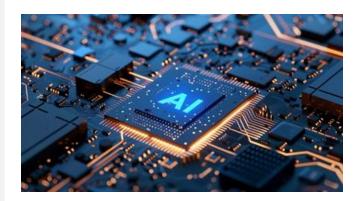

Panel inspection equipment

Business Topics

Execution of sales agent agreement with Qualcomm

Qualcomm

We sell SoCs with embedded highperformance, low-power consumption NPUs, as well as modules and circuit boards with embedded SoCs.

Promoting the use of edge AI in the industrial equipment sector

* NPUs : processor dedicated to AI

Developed own large-scale language model using Cerebras' CS-3

We have developed a large-scale language model for Japanese that utilizes our own data. We will be building use cases for generative AI in the future.

Supporting companies' development of independently generated AI

Absorption-type merger with FAST CORPORATION

We restructure the development system by maximizing the efficiency of management resources and consolidating human capital

Reinforcement of technology development infrastructure

Review and Outlook of the Medium-Term Management Plan Onect Beyond

VISION2020

FY2016 - FY2021

Technology trading company Manufacturer functions

Building a growth engine

(FY2021 Results)

Net Sales: ¥143.2 billion

Ordinary Income ratio: 3.2 %

ROE: 11.4 %

VISION2025

FY2022 - FY2025

To become a manufacturer with technology trading company functions

Launch growth businesses

(FY2024 Results)

Net Sales: ¥242.8 billion

Ordinary Income ratio: 5.7 %

ROE: 25.1 %

VISION2030

FY2026 - FY2030

Solve social issues with the power of being a manufacturer and technology trading company

Accelerate profit growth

(FY2030 Target Amount)

Net Sales: $4300.0 \sim 4350.0$ billion

Ordinary Income ratio: ≥8.0 %

ROE: ≥20.0 %

Medium-Term Management Plan VISION 2025: BUSINESS ENVIRONMENT and OUR MISSION

BUSINESS ENVIRONMENT

Society 5.0 to Arrive

Highly efficient smart society amid Slow Economic Growth

OUR MISSION

DRIVING DIGITAL TRANSFORMATION

Providing products and services that can achieve digital transformation, thus contributing to the sustainable development of a highly efficient smart society

To become a manufacturer with technology trading company functions

Evolving technology trading company functions

- Business model that will generate profits from data, service, and stock businesses
- Maintain and expand customer base that contributes toward growth of business as a manufacturer
- Build a base for stable income

The kind of manufacturer we want to be

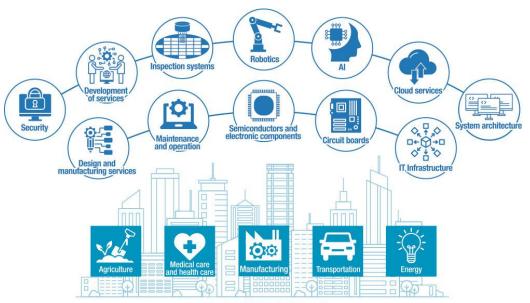

- Manufacturing system manufacturer
- Original design manufacturer (ODM)
- Design development division based on providing solutions to issue
- Highly efficient smart factories

Medium-Term Management Plan VISION2030: OUR MISSION and VISION

MISSION

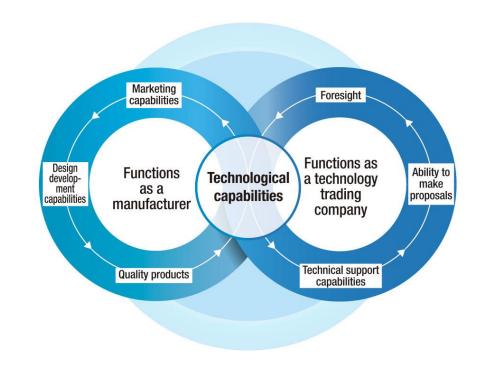

To address social issues through leading-edge technology, primarily semiconductors and IT, and to contribute to the sustainable development of society by offering solutions to those issues that have value beyond expectations

Latent Social Issues

VISION

A company that solves latent social issues with the capabilities of a manufacturer and a technology trading company

VISION2030: Companywide Policy and Management Policy by Business

Aim to solve latent social issues (customer issues) with the capability of being a manufacturer and technology trading company

All business units will work on in-house products (services) development and create Group synergies to propose solutions to problems with value that exceeds expectations
 The Technology Trading Company Department will acquire new distributor agreements and customer commercial rights to strengthen marketing to address potential issues
 Actively utilize M&A to quickly establish a business foundation that enables problem-solving

Take actions that contribute to sustainable profit growth

Actively invest in in-house products (services) development that can differentiate the Company's products Transition from a flow-type to a stock-type service business Invest to increase medium- to long-term profit (research and development, human resources recruitment, employee training, etc.)

CN Business

- Understand customer needs and offer solutions and services that support customer's DX
- Support customer's use of digital technology and increase customer satisfaction

EC Business

- Focus on growth markets such as industrial equipment, automotiverelated equipment, cloud services, and the OT security field
- Leverage specialized semiconductor knowledge and develop a solutions-based business

PB Business

- Provide products centered on wafer inspection systems globally with measurement and inspection technology at the core
- Strengthen medical ODM and board OEM services by leveraging semiconductor-related technology and high-quality development and manufacturing infrastructure

VISION2030: Financial Model and Capital Policy

Financial Model (Target Management Indicators)

Pursuing Sustainable Profit Growth (Profit Growth Outpacing Revenue Growth)

Fiscal 2030

- Net sales ¥300.0 ∼ ¥350.0 billion
- Ordinary income ratio ≥ 8 %
- ROE (Shareholders'equity) ≥ 20 %

	Percentage of total sales	Ordinary income ratio
CN Business	15 %	12 %
EC Business	75 %	7 %
PB Business	10 %	10 %

Capital Policy

Further improvement of enterprise value through sustainable profit growth

Growth Investment

Investment for sustainable growth

- Aggressive investment for technology development and business expansion (including M&A)
- Investment in internal and external DX to strengthen competitiveness
- Actively invest in human resource development

Shareholder Return

Long-term high returns due to profit growth

- Achieve sustainable profit growth and improve enterprise value
- Shareholder returns according to financial results (dividend payout ratio: 40% target)

Financial Soundness

Strengthen financial structure and appropriate financial leverage

- Equity ratio: 40% or more
- ROE: 20% or more
- Maintain appropriate inventory levels

VISION2030: Sustainability Initiatives

Fundamental Policy

- Contribute to the sustainable development of a more prosperous society by providing a variety of solutions through our business activities.
- Aim for the sustainable development of the Group and the enhancement of corporate value by engaging in solutions to material issues

Material issues

- 1.Leverage the resources that the Company has accumulated with a focus on electronics and IT to contribute to the realization of a sustainable society
- 2. With respect for fundamental human rights at the core, create work environments and personnel systems that facilitate work and provide meaningful work and pursue the sustainable development of the Company
- 3. Mitigate environmental burdens (environmental risks) that occur as a result of business activities and strive to maintain a sustainable relationship between society and the Company

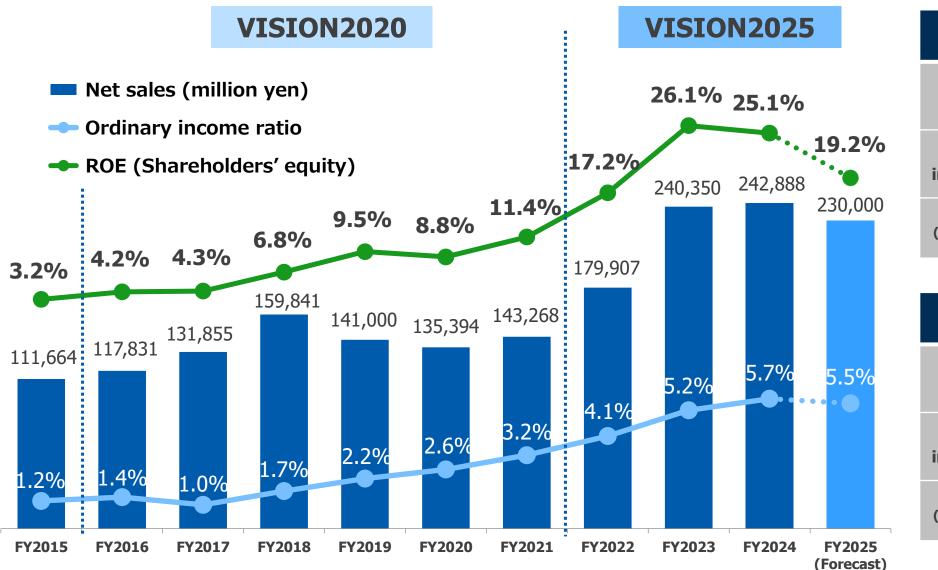

Human Capital / Diversity	Climate Change
 Develop human resources who can pursue customer	 Aim for carbon neutrality in FY2050 and set target for
satisfaction from a global perspective	FY2030 (50% reduction compared to FY2021)
 Create an environment that supports employees' desire to	 From October 2023, the Engineering Center (Tsuzuki,
improve and develops their individual abilities	Yokohama) will switch to electricity derived from virtually
 Focus on developing next generation leaders 	renewable energy.

CN Business: Sales Component Ratios by Product Category

Product	Rate of Change	Main Causes	Main Suppliers
Network-related products	8.0%	There was an increase due to large projects for system integrators.	Arista Networks F5
Storage-related products	96.5%	There were large projects for system integrators due to demand for AI, etc., and business was strong.	Pure Storage
Security-related products, etc.	26.3%	Cloud security for system integrators and enterprises was strong.	Netskope SentinelOne Nutanix
Maintenance & monitoring services	14.4%	Maintenance of network-related products for system integrators and storage-related equipment for telecommunications carriers was strong.	TED

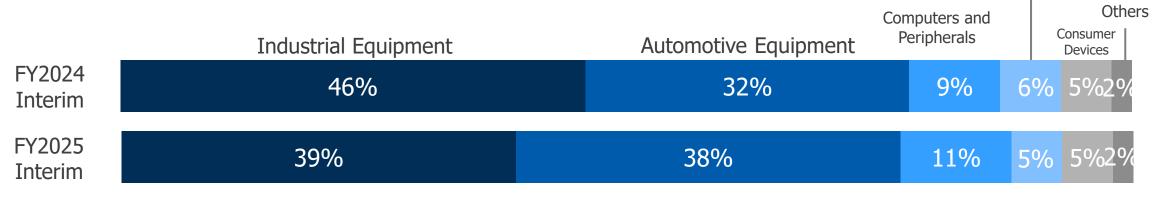

EC Business: Sales Component Ratios by Product Category Boards, Electronic

	Micro Processors	Analog ICs		Logic IC	Cs M				tware & Serv	rices
FY2024 Interim	21%	34%		18%		6%	11%	4	% 6%	
FY2025 Interim	24%	22%	2	1%	6%	1	5%	5%	7%	

Product	Rate of Change	Main Causes	Main Suppliers
Micro processors	(0.6%)	Although there was a significant increase in sales of automotive equipment due to the expansion of commercial rights, there was a slight decrease due to the shift to direct manufacturer to customer sales and a decrease in demand for telecommunications equipment.	Infineon / NXP / TI / Intel
Analog ICs	(42.8%)	Due to shift to direct manufacturer to customer sales, sales of industrial equipment, automotive equipment, and communication equipment decreased.	TI / NXP / ams-OSRAM AG
Logic ICs	7.1%	Despite the impact of shift to direct manufacturer to customer sales, sales of automotive equipment have increased due to the expansion of commercial rights.	Infineon / NXP / TI / Lattice / MaxLinear
Memory ICs	(12.5%)	Demand decreased in fields other than automotive equipment equipment.	Infineon / Everspin
Boards, electronic components, etc.	22.2%	Sales of automotive equipment increased due to the expansion of commercial rights. Sales of industrial equipment such as semiconductor manufacturing equipment were slow.	NXP / Western Digital / PFU / Intel / ams-OSRAM AG / ABAL DATA
Software & services	21.5%	Sales of security products for cloud services and embedded devices increased.	Microsoft / DELL / Trellix
PB	3.1%	Increased due to contribution of wafer inspection systems. Design and manufacturing services remained at the same level as the previous year.	TED / TED Nagasaki / FAST

EC Business: Sales Component Ratios by Application

Application	Rate of Change	Main Uses	Sales Trends
Industrial equipment	(23.5%)	Medical and analyzing equipment, Semiconductor production equipment, FA equipment, Industrial robots, Fabricating equipment, Measuring equipment, Control systems, Electrical component mounting equipment, Inverters	Decrease in demand for FA and semiconductor manufacturing equipment, etc. Decrease in analog ICs due to direct sales by manufacturers. Increase in PB due to contribution of wafer inspection systems.
Automotive equipment	6.9%	Car navigation systems, Automobile instruments, Advanced Driving Assistant systems, Displays, Automobile electronic control units (ECUs), Lithium ion batteries, Automobile inverters	Processors, logic ICs, and electronic components increased due to transfer of commercial rights Analog ICs are decreasing due to direct sales by manufacturers.
Computers and peripherals	10.1%	Multifunctional printers, POS systems, Storage, Server, Projectors, PCs and peripheral devices	Increase in processors for PCs and inspection equipment for printers.
Communications equipment	(33.1%)	5G base stations, Optical transmission equipment, Satellite communications equipment, Wireless IP network equipment	Decrease in processors for communication base stations Analog ICs also decreased due to direct sales by manufacturers.
Consumer appliances and electronics	(20.6%)	Electronic musical instruments, Home gaming consoles, Digital cameras, Air conditioners, TVs and HDD recorders, Residential fuel cells	Decrease in analog ICs for cameras due to direct sales by manufacturers Electronic components for logic ICs for electronic musical instruments also decreased.

Communications Devices —

Product Categories

	Category	Main Products	Functions
	Network-related products	Network load distribution devices Ethernet switches	Distribute Internet connection loads Switching hubs
CN	Storage-related products	Flash storage	Connect to and store large volumes of data at high speed
Business	Security-related products, etc.	End points, networks, cloud	Protect computer systems, networks, data, etc. from attacks, damage, and unauthorized access
	Maintenance & monitoring services	Device maintenance services and security monitoring services	
	Micro processors	CPUs, DSPs	Brains of electronic devices, calculation and control functions
	Analog ICs	Analog ICs	ICs used in common in various applications
	Logic ICs	Image processing ICs Communications and network applications ICs ASIC, PLD	ICs with packaged logic circuits, special-purpose ICs made for particular applications, special ICs made according to customer specifications
EC	Memory ICs	SRAM, FRAM, MRAM Flash memory	Memory ICs, readable/writable memory products, read-only products
Business	Boards, electronic components, etc.	Boards, power supplies, optical components	ICs on printed circuit boards, power supplies, products with mounted connectors and other components (boards)
	Software & services	Software, cloud services	Software embedded in industrial equipment for enterprises Provision of subscription services
	PB	Design and mass production contract services, private brand products	Design, development and mass production of boards according to customer specifications Devices for manufacturing industries
