Printer for your in-branch Issuance

# Gemalto Instant Card

## Effortless & Reliable Direct to Card Desktop Printer for your in-branch Issuance

### Banking & Payment Services

Cloud Ready | Effortless | Secure | Stress Free set up & use

Gemalto Instant Issuance is by far the most convenient way to get your card into the hands of your customers guaranteed, securely & without risk.

Consumers are looking for better experiences in their everyday lives, so to be able to conveniently walk into a local branch and walk out with a working card is by far a best experience to provide them.

Our Thales Gemalto Instant Issuance Solution provides exactly this, with the bonus of being a hosted service means financial institutions can deploy our service quicker than ever, immediately reaping the fundamental financial and consumer benefits.

We have now complimented this world class service with our Gemalto Instant Card direct to card Desktop Printer. Cloud ready, this compact printer is effortless to deploy & use guaranteeing that you are stress free and able to focus on a superior customer service and branch profitability over trying to update and maintain your in-branch issuance machines.

### Gemalto Instant Card – The only Printer for your in-Branch Issuance needs

#### Cloud Ready:

Embedded with our client software means that the Gemalto Instant Card printer immediately removes the aggravation an issuer may initially find when running Instant Issuance. Firstly it's 3 simple steps to get started - **connect, activate and print**. Secondly due to the embedded software no longer is there a requirement to purchase and run an additional PC, with the added bonus of a secure connection to our datacentre.

#### Effortless

Built for daily operations, the printer has a direct network connection so removes the need of High Level IT resources and relinquishes the risk and conflict of IT policy and compliancy. The built in touch screen is more than a control panel and is skilfully able to track all ribbon and consumables. Not only a tracker, when dust congregates in the printer, it will prompt to be cleaned so you avoid waste and experience bad quality printing.

#### Secure

The touch screen also boosts the security with an Electromechanical Locking System, this prevents none registered users to access to the cards, ribbon, and internal parts of the machine.

Gemalto Instant Card also has a built in **Ribbon Masking** mechanism to ensure NO residual data is left after personalization (card holder data) to eliminate any Fraud. **This Patented Kineclipse®** technology removes the need for costly & time consuming secure destruction of the ribbons once used as well as the daily complicated requirement to remove ribbons and lock away securely.

#### Compact & powerful

Designed to be Portable & lightweight, Gemalto Instant Card takes minimal space in any branch, can be moved around when needed with very little effort. Customizable 300 x 600 dpi resolution for both colour and monochrome printing means this desktop printer delivers the highest quality cards in the most unproblematic way.

### The compact and secure solution for issuing Financial Cards in your branches

- Manual feeder
- Color touch-screen display
- 100 cards Automatic feeder (lockable)
- 10 cards Reject compartment (lockable)
- 50 cards Output hopper
