

Thales Cogent LiveScan Cabinet

Identity & Biometric Solutions

Product Description

The Cogent LiveScan Cabinet is a ruggedized housing cabinet compatible with our complete FBI-certified palm print and tenprint livescan products.

The solid steel construction and ergonomic design features a 19 inch touch screen monitor, retractable steel livescan platen cover, keyboard drawer, and a lockable compartment to house the computer and uninterruptible power supply (UPS). A large work surface provides space to install additional input devices, such as a signature capture pad or a magnetic stripe reader, or to place processing documentation. The cabinet can also be equipped with a camera mounting stand to add document issuance and mugshot capabilities.

The LiveScan Cabinet is available in two configurations: adjustable height and stationary-height models. Both can be equipped with built-in foot pedals for operation convenience throughout the capture process.

Designed for flexibility, the LiveScan Cabinet offers various components that can be easily incorporated to create a range of applications such as applicant fingerprint processing, border control, or inmate booking.

SPECIFICATIONS

Weight (empty)	353 lb (160 kg)	399 lb (181 kg)
Overall Dimensions	31.5 x 26.8 x 55.1 in (800 x 680 x 1400 mm)	31.5 x 26.8 x 51.1 in (800 x 680 x 1300 mm)
Platen Height	38.9 in (988 mm)	35.4 ~ 47.2 in (900 mm ~ 1200 mm)
Power	110V or 220V (Custom Factory)	110V or 220V (Custom Factory)

MONITOR SPECIFICATIONS

Weight with case/mounting bracket	30.6 lb (13.89KG)
Maximum Operating Temperature	0 ~ +40°C
Humidity	5 ~ 90%RH non-condensing
Inputs	VGA (15-Pin)
Monitor Type	LED
