

# An ID revolution in your smartphone

## What is a Digital ID Wallet?

Digital ID Wallet is a secure gateway to next-generation digital identity services, credentials, privacy and Government-to-Citizens (G2C) engagement

## Benefits of a Digital ID Wallet

### 1 TAKING CITIZENS' PRIVACY TO NEW HEIGHTS

Each digital document is segregated from the others, no data leakage

Citizens control which data to share & who to share it with

Data is encrypted

Data sharing is always based on user consent

### 2 AN ARRAY OF À-LA-CARTE ID SERVICES FOR A FRICTIONLESS USER EXPERIENCE

#### Entitlement/verification

Citizens, patients, and drivers can prove their rights and entitlements

#### Identity Proofing

Citizens can prove who they are, anytime and anywhere, either online or in person

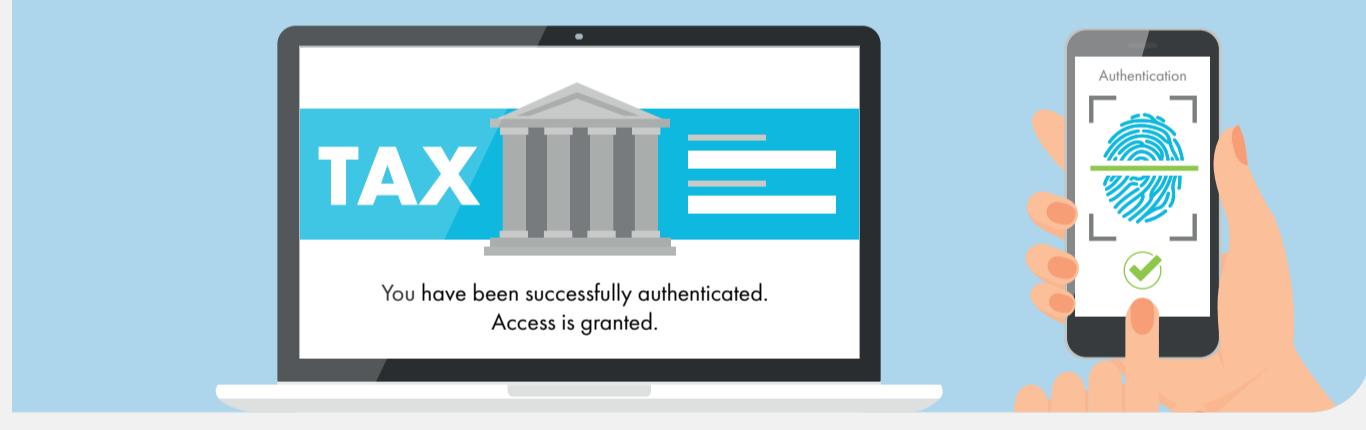

#### ID attribute sharing

Citizens can share those ID attributes they choose, such as their age or place of residence, without having to reveal all their personal information

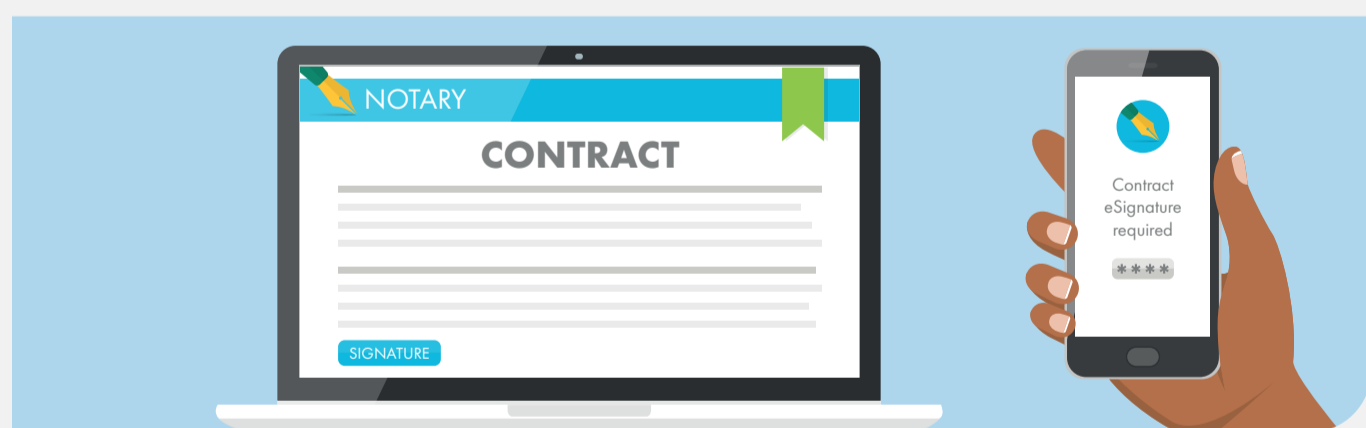

#### Secure access to online services

Facilitates and secures access to online services that require proof of identity

#### Digital Signature

Enables citizens to sign forms and contracts digitally and remotely

### 3 BRINGING GOVERNMENTS AND CITIZENS CLOSER TOGETHER

The Digital ID Wallet opens a direct and secure communication channel to any government department or agency that supports it

### 4 CONVENIENT

#### Your phone is always with you:

In fact, people are more likely to notice they forgot their phone than their wallet.

90%

of users have a mobile device within reach at all times.

#### A single Digital ID Wallet for all documents:

All your official digital ID documents are in one place, no need to have an app per service provider.

### 5 SECURE

#### Data accuracy

Since the Digital ID Wallet is updated in real time, those wishing to verify citizens' identities, such as law-enforcement officers, healthcare professionals, and retailers, know they are always accessing the most up-to-date information.

#### Over-the-air revocation

In the event of a phone being lost or stolen, digital ID documents can be remotely deactivated in near real time and wiped from the phone, making them unusable.

#### Dynamic Security

The Digital ID Wallet is protected by multi-layered high-end security mechanisms\* which enable the wallet to combat the most sophisticated attacks.
