# Blueprint for a successful cloud migration

**Migrating to the cloud? Smart move. Here's why:**

**61%**
of businesses migrated their workloads to the cloud in 2020.[1]
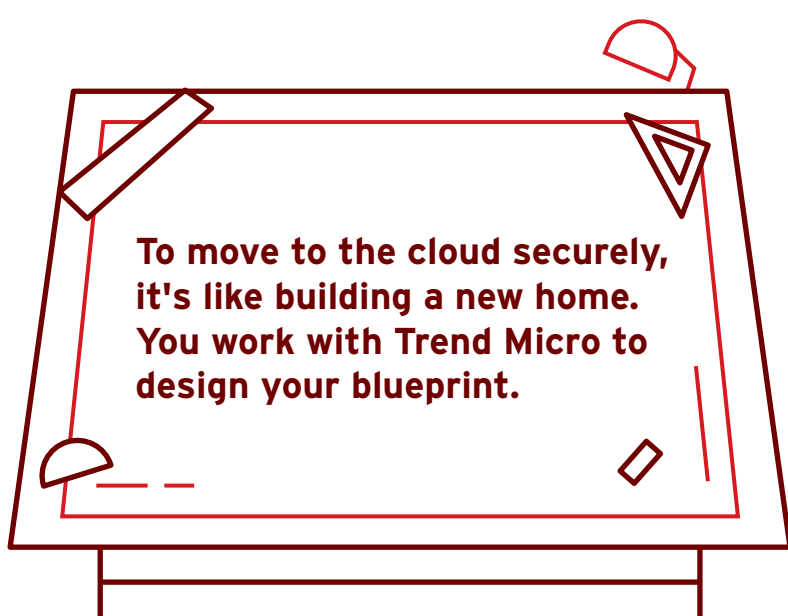

**43%**
of IT decision-makers said greater platform and service flexibility were the top benefits of using public cloud services.[2]

**41%**
of companies say that a major benefit of moving to the public cloud is improved business continuity.[3]

Security is different in the cloud. All cloud solution providers have a Shared Responsibility Model. It secures the cloud infrastructure, and you secure the workloads, applications, and data you run in the public cloud. That's where Trend Micro comes in.

We are ranked #1 in worldwide hybrid cloud security market share and protect millions of workloads in the cloud.[4]

To move to the cloud securely, it's like building a new home. You work with Trend Micro to design your blueprint.

### Trend Micro Cloud One™ Workload Security
**The doors**
In the same way doors keep intruders out, agent-based security monitoring detects and locks out potential threats.

### Trend Micro Cloud One™ Network Security
**The walls**
Like walls that ensure you're safe inside, a layered security approach ensures your network is protected from harm.

### Trend Micro Cloud One™ File Storage Security
**The garage**
Just as a garage protects your interior from damage, anti-malware keeps threats from getting into an Amazon S3 bucket or Azure Blob file storage and causing damage or issues downstream.

### Trend Micro Cloud One™ Conformity
**The foundation**
Just like a slab foundation and pillars keep your house from sinking into the ground, a solid foundation for your migration provides checks and balances that help you build in the cloud with confidence.

Trend Micro Cloud One™, a security services platform for cloud builders, is an automated, flexible, and all-in-one security option for building in the public cloud cloud. According to Forrester Consulting, projected savings are between 2,100 and 6,200 hours for security administration and 19% to 27% for costs of threat detection and response.[5]

**Ready to roll out your cloud migration blueprint?**
**Get started with a free, 30-day trial of Trend Micro Cloud One.**
