# The Effect of Remote Working on Cyber Crime

The average cost of

a data breach was

47% of individuals fall for

a phishing scam while working from home.

\$1.07 million higher where remote work was a factor in causing

the breach.

It takes organisations with a remote workforce

58 days longer to identify and contain

a breach than office-based organisations.

of organisations

have experienced a breach because of a remote worker.

of cyber attacks are aimed

By looking back at the cyber threats of past years, and ahead to those of the future,

we will help your MSP to deliver the strongest possible cyber security services.

at small businesses, but only 14% are prepared to defend themselves.

of small businesses

have experienced a cyber attack in the past 12 months.

of small businesses say that cyber attacks

are becoming

more targeted.

A Year in Cyber Crime: The Threats of 2022

**Phishing attacks** account for over 90% of all data breaches.

In 2022, ransomware

accounted for around 20% of all cyber crimes.

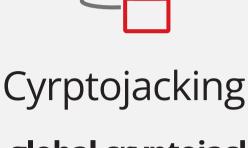

**Nearly 57,116 DDoS** 

attacks were reported in 2022.

**85%** of free VPNs have permissions or functions that could compromise

a user's privacy.

The global cryptojacking

volume went up 30% year-over-year in 2022.

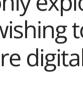

**Looking Ahead: The Encroaching Threats** 

## Targets enterprises using human operated scripts and malware to

Ransomware

encrypt and exfiltrate data.

### IoT commonly exploited by cyber criminals wishing to gain access to secure digital systems.

Internet of

Things Attacks

Supply Chain

**Attacks** 

Aimed at software developers and

suppliers: cyber criminals attempt

## A cyber criminal intercepts data being transferred through a connection

between two points/people.

### Current and ex-employees with access to the corporate network pose insider threats. Can be

malicious or accidental.

## Deep Fake **Threats** Hackers use deep fake

technology to bypass multi-factor

and biometric authentication and

access confidential data.

# to infect legitimate code, updates or applications with malware.

**Prepare for Upcoming Threats** 

# Configure

Configure software, hardware and

# encrypt and exfiltrate data.

Protect

and inventory

Targets enterprises using human

operated scripts and malware to

Audit

and recover Enforce data protection,

backup, and recovery measures and implement multifactor authentication.

## network infrastructure. Monitor network ports, protocols and services.

and monitor

Secure and defend

Perform sandbox analysis with Trend Micro Email Security, and enable advanced detection

technologies (like Vision One).

# and applications.

and update

Conduct patching and

update operating systems

Patch

Train

Perform security skills

assessments and training

regularly and conduct red-team

exercises and penetration tests.

Taking the next step: Risk Management

Investing in Attack Surface Risk Management solutions will help you mitigate encroaching threats. At Trend Micro, our focus on

the value of cybersecurity risk management and concerns means that our MSP partners can ensure:

and test

### across the attack surface with and recovery to maintain protection far beyond the business continuity. endpoint in one solution.

## Consumer confidence and maintained reputation by avoiding breaches that create distrust and financial loss.

Advanced visibility

of a choice of solution based on business risk and customer use-cases.

Delivery

Efficient response
