

Data Protection and Management Solutions

Veeam Service Provider Console

Easily scale a managed Veeam-powered BaaS and DRaaS business

Challenge

When it comes to backup and disaster recovery, more and more organizations are leveraging the expertise, predictable spend and resource optimization that service providers bring to the table. To take advantage of this lucrative opportunity, service providers need an automated, flexible, and centralized platform that makes it easy to scale their managed backup business.

Veeam Service Provider Console is a free product that gives service providers centralized monitoring and management capabilities for their customers' Veeam-protected workloads, including Microsoft 365 and public cloud workloads.

- Maintain visibility into the health and security of customers' Veeam-protected workloads.
- Consolidate business operations such as licensing, reporting, and billing into one centralized platform.
- Accelerate productivity with key integrations and powerful APIs.

Why Choose Veeam Service Provider Console

54% of organization's servers within datacenters are protected by BaaS or DRaaS

88% want to protect or are likely to protect their servers with BaaS or DRaaS

34% of users recognized BaaS as a web-based management portal

Key capabilities

Monitoring and Management

Achieve complete visibility of your customers cloud, physical and virtual workloads across remote and hosted infrastructure.

Multi-Tenant Serviceability

Scale your business from a central location with the confidence of knowing all your customers' data is secure and separated.

Self-Service Portals

Deploy self-service portals to your customers and resellers with the ability to set unique privileges and security measures.

Automation and APIs

Provide seamless integration into your existing workflows with a deep API interface that introduces numerous actions, endpoints, and requests.

Customer Onboarding and Billing

Simplified onboarding and integrated billing options via robust APIs.

Licensing and Usage Reporting

Generate and deploy customer licenses while providing automated monthly reporting with a powerful usage reporting and licensing engine.

Streamline Support Ticket Creation

Open support cases directly in Console's UI with automated log collection, bundling and uploads.

Enhance Malware Detection

Gain a holistic view of customers' security vulnerabilities and alerts from Veeam ONE in a single UI.
