Location

Several trees were blown down. A stalled front extended from the Texas Panhandle into northern Oklahoma. As easterly upslope winds strengthened during the evening hours of the 6th, scattered storms developed over the Panhandles and moved southeastward. A complex of storms intensified, aided by a strong low level jet, as it moved across western Oklahoma late on the 6th into the morning hours of the 7th. Numerous occurrences of severe wind and hail accompanied this complex as it moved across Oklahoma.
