Storm Data and Unusual Weather Phenomena - May 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>A landspout tornado was observed developing south of Interstate 40 southwest of Hydro. The tornado moved northeast damaging a billboard and destroying a highway sign. The tornado struck a historic Route 66 service station as it crossed interstate 40 causing roof damage. An adjacent office at the site of a historic Route 66 motel also suffered significant roof damage. Tree damage was also noted in the southeast part of the town of Hydro before the landspout tornado dissipated.</p>

SEMINOLE COUNTY --- 5.1 WSW SEMINOLE [35.20, -96.76], 1.9 SE SEMINOLE [35.21, -96.65]				

Storm Data and Unusual Weather Phenomena - May 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	05/02/22 18:52 CST		0.15M	Tornado (EF1, L: 6.30 mi , W: 700 yd)
	05/02/22 19:10 CST		0	Source: NWS Storm Survey

The first damage took the form of broken branches about 5.5 miles west southwest of Seminole and less than a mile east of the Pottawatomie County line. The most intense damage occurred along EW1250 road east of NS3510 Rd where numerous oak trees were snapped and uprooted with large limbs blown downwind. A house in the vicinity lost several courses of shingles which appeared to be higher than the typical quality of shingles. An outbuilding near the residence was leveled and debris blown downwind. Farther east on NS3550 Rd, a small stretch of trees exhibited the most intense damage with roughly 50% of them uprooted or snapped. Finally, the last tree damage occurred one mile southeast of downtown Seminole.

SEMINOLE COUNTY --- 0.6 E SEMINOLE [35.23, -96.67]

05/02/22 19:06 CST	0	Hail (4.00 in)

POTTAWATOMIE COUNTY --- 4.0 N ST LOUIS [35.13, -96.86], 1.6 N MAUD [35.15, -96.78]				
	05/04/22 17:23 CST		0.10M	Tornado (EF0, L: 4.60 mi , W: 100 yd)
	05/04/22 17:33 CST		0	Source: NWS Storm Survey
A tornado developed under a strengthening supercell , first spotted as a narrow columnar condensation to the ground by media helicopter and storm chasers. The tornado likely formed about 4 miles west of Maud and then moved northeast. EF0 damage was found to trees on highway 9 A 1.5 miles northwest of Maud. Other trees were damaged on Johnson Rd. Numerous greenhouses and storage sheds were damaged with debris being lofted east of Johnson Rd as observed by storm chasers and media helicopter about one mile northwest of Maud. The tornado weakened after moving north of Maud.				
<hr/>				
POTTAWATOMIE COUNTY --- 2.1 NNW MAUD [35.16, -96.79], 2.8 N MAUD [35.17, -96.78]				
	05/04/22 17:37 CST		0	Tornado (EFU, L: 1.00 mi , W: 100 yd)
	05/04/22 17:40 CST		0	Source: NWS Employee
An off-duty NWS meteorologist and Oklahoma City TV station helicopters observed a tornado north of Maud after the initial tornado dissipated . The location of this tornado was estimated as it produced no known damage.				
<hr/>				
SEMINOLE COUNTY --- 4.4 SW SEMINOLE [35.19, -96.74], 4.6 ESE LITTLE [35.32, -96.60]				
	05/04/22 17:44 CST		0.30M	Tornado (EF2, L: 12.50 mi , W: 1760 yd)
	05/04/22 18:14 CST		0	Source: NWS Storm Survey
A long track tornado began between Maud and Seminole , before making a north to northeast path of damage across Seminole County. The most extensive damage was to buildings just east of downtown Seminole, as well as near the Seminole Academy. Buildings had the roofs removed from the tornado, and some buildings had exterior walls damaged. As the tornado moved to the northeast, it produced sporadic damage to mainly rural areas northeast of Seminole.				
<hr/>				
SEMINOLE COUNTY --- 5.3 NE SEMINOLE [35.28, -96.61], 5.5 ESE LITTLE [35.31, -96.59]				
	05/04/22 18:01 CST		0	Tornado (EF0, L: 2.00 mi , W: 175 yd)

Storm Data and Unusual Weather Phenomena - May 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
The NWS storm survey observed tree damage associated with a second tornado path parallel to the primary Seminole tornado path to the northeast of Seminole.				
SEMINOLE COUNTY --- 3.8 SW CROMWELL [35.30, -96.50], 0.9 NNE CROMWELL [35.35, -96.44]				
	05/04/22 18:21 CST		0.10M	Tornado (EF1, L: 4.70 mi , W: 700 yd)
	05/04/22 18:30 CST		0	Source: NWS Storm Survey
This tornado touched down southwest of Cromwell with the first damage noted near the intersection of county roads NS3660 and EW 1180 where tree limb damage was produced. The tornado moved northeast causing scattered tree damage before moving into Cromwell. The tornado had grown to be around 600 yards wide by the time it reached Cromwell and damage was noted over a wide area of the town. The roof and walls of one mobile home was destroyed and other mobile homes were damaged, an RV was flipped over, and at least one house suffered roof damage. There was also significant tree damage at various locations in town. The tornado moved northeast through town, and then turned toward the east-northeast and entered Okfuskee County (see separate entry for Okfuskee County from the NWS office in Tulsa) along and north of State Highway 99A.				
HARMON COUNTY --- 2.3 E MADGE [34.90, -99.92]				
	05/04/22 18:54 CST		0	Hail (1.75 in)
	05/04/22 18:54 CST		0	Source: Public
POTTAWATOMIE COUNTY --- 1.6 E BROOKSVILLE [35.20, -96.94], 3.8 SSE TECUMSEH [35.21, -96.90]				
	05/04/22 19:07 CST		10K	Tornado (EF1, L: 2.30 mi , W: 100 yd)
	05/04/22 19:22 CST		0	Source: NWS Storm Survey
Damage was found along US-177 to the south of Tecumseh as the tornado moved to the north and northeast. Additional tree damage was found by the survey crew along Harrison Road before the tornado dissipated just west of Skagg City Road.				
POTTAWATOMIE COUNTY --- 0.9 SSE EARLSBORO [35.26, -96.80], 0.5 SE EARLSBORO [35.26, -96.80]				
	05/04/22 19:28 CST		0.20M	Tornado (EF2, L: 3.40 mi , W: 150 yd)
	05/04/22 19:35 CST		0	Source: NWS Storm Survey
This tornado touched down initially just southeast of the town of Earlsboro and made a looping path striking Earlsboro. The tornado initially moved northeast, then north about one-half mile west of the Pottawatomie-Seminole County line, then turned northwest and west along and north of Bob Crouch Road to the northeast of Earlsboro. The tornado then moved southeast and south across the east side of Earlsboro moving down Willie Stargell Avenue. The most significant damage was near the end of the path a mobile home, metal buildings and a outbuilding were destroyed.				
POTTAWATOMIE COUNTY --- 0.7 SSE EARLSBORO [35.26, -96.79], 1.7 SE EARLSBORO [35.26, -96.78]				
	05/04/22 19:35 CST		10K	Tornado (EF1, L: 1.00 mi , W: 175 yd)
	05/04/22 19:38 CST		0	Source: NWS Storm Survey
The second Earlsboro tornado began nearly in the same spot that the first one developed (and dissipated). The first damage to trees and buildings was noted just east of the Union Pacific tracks along SH-9/US-270. The tornado then moved to briefly to the southeast before turning to the east. The tornado moved into Seminole County near SH-9/US-270.				
SEMINOLE COUNTY --- 5.7 WNW SEMINOLE [35.26, -96.78], 2.9 NW SEMINOLE [35.26, -96.72]				
	05/04/22 19:38 CST		0	Tornado (EF0, L: 3.52 mi , W: 150 yd)
	05/04/22 19:50 CST		0	Source: NWS Storm Survey
The second Earlsboro tornado moved into Seminole County near SH-9/US-270 and moved east and then east-northeast. The tornado produced light damage in Seminole County before dissipating near SH-3E just northwest of Seminole.				
SEMINOLE COUNTY --- 3.4 WNW SEMINOLE [35.25, -96.74]				
	05/04/22 19:45 CST		0	Thunderstorm Wind (EG 65 kt)
	05/04/22 19:45 CST		0	Source: NWS Storm Survey
While the second Earlsboro tornado was passing to the north, winds associated with the rear-flank downdraft produced damage to an outbuilding and a utility pole along SH-9/US-270.				
SEMINOLE COUNTY --- 3.5 WSW CROMWELL [35.33, -96.51], 2.1 W CROMWELL [35.34, -96.49]

Water rescue performed.				
<p>Several rounds of storms occurred on the 4th as a large trough approached the region. Initially several storms developed across northwest Oklahoma with large hail, with new storm development then occurring along and south of a warm front in central Oklahoma during the afternoon. These storms produced several tornadoes, along with hail and damaging wind gusts. Another round of storms moved in from the Texas panhandle during the evening of the 4th, bringing more tornadoes, hail, and wind. Localized flooding was also reported due to storms training over the same areas.</p>

South of the tornado that passed south of Hollister, very strong winds associated with the rear-flank downdraft area of the storm also produced significant damage. A power pole was damaged near the intersection of county roads E 1880 and N2280. Farther east, a trailer was rolled and blown into the road along SH-54. A storm chaser in the vicinity of this location estimated RFD winds of approximately 100 mph.

Powerlines downed.				
Storms developed along a stationary boundary in northwestern Oklahoma into the Texas panhandle during the afternoon and evening of the 31st. Slow storm motions led to very heavy rainfall and flooding in some locations. Intense winds close to 80 mph, large hail, and a few tornadoes were also reported.				
TEXAS, Western North				
(TX-Z083) HARDEMAN, (TX-Z084) FOARD, (TX-Z085) WILBARGER, (TX-Z086) WICHITA, (TX-Z087) KNOX, (TX-Z088) BAYLOR, (TX-Z089) ARCHER, (TX-Z090) CLAY				
	05/01/22 00:00 CST		0	Drought
	05/31/22 23:59 CST		0	

While drought magnitude lessened over the course of the month with numerous rounds of rainfall, at least severe drought persisted across western north Texas by month's end.

Storm Data and Unusual Weather Phenomena - May 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
WICHITA COUNTY --- 2.4 WSW WICHITA FALLS [33.90, -98.53]				
	05/02/22 20:50 CST		0	Thunderstorm Wind (MG 56 kt)
	05/02/22 20:50 CST		0	Source: Trained Spotter

A dryline was the main focus for storm development during the afternoon of the 2nd as a compact upper wave crossed the area. Most of the storms were across Oklahoma but a few storms made it into western north Texas where a severe wind gust was recorded.

FOARD COUNTY --- 19.7 WSW CROWELL [33.84, -100.02], 18.9 WSW CROWELL [33.84, -100.01]				
	05/04/22 18:15 CST		0	Tornado (EFU, L: 0.82 mi , W: 100 yd)
	05/04/22 18:19 CST		0	Source: Storm Chaser

Storm chasers observed this tornado that initially developed in northern King County TX (see separate entry for King County from NWS Lubbock TX) before moving northeast into the far southwest corner of Foard County. A storm survey observed no damage as this tornado occurred in open ranchland with few roads, so the specific location is estimated.

FOARD COUNTY --- 12.8 SW CROWELL [33.87, -99.90], 5.8 SSW CROWELL [33.90, -99.75]				
	05/04/22 18:40 CST		0	Tornado (EF0, L: 9.30 mi , W: 100 yd)
	05/04/22 18:56 CST		0	Source: NWS Storm Survey

This tornado developed southwest of Crowell and was observed by many storm spotters and storm chasers. Although information from storm chasers indicate that the tornado initially formed farther to the west-southwest in open ranchland, the damage found in a storm survey was generally confined to mesquite tree limb damage observed on FM-263 about 3 miles west of State Highway 6. Numerous storm chaser videos and observations show that the tornado turned more to just south of east after crossing FM-263 and narrowly missed wind turbines along FM-263 just west of Highway 6 before turning to the northeast and crossing State Highway 6 before dissipating.

FOARD COUNTY --- 5.3 SSW CROWELL [33.91, -99.76]				
	05/04/22 18:55 CST		0	Thunderstorm Wind (EG 61 kt)
	05/04/22 18:55 CST		0	Source: NWS Storm Survey

While surveying the tornado path that crossed south of Crowell, storm surveyors noted tree damage along State Highway 6 and along County Road 340 to the north of the tornado path.

FOARD COUNTY --- 2.7 SSE CROWELL [33.94, -99.71], 3.4 SSE CROWELL [33.94, -99.69]				
	05/04/22 19:11 CST		0	Tornado (EFU, L: 1.00 mi , W: 50 yd)
	05/04/22 19:13 CST		0	Source: Storm Chaser

Storm chasers reported a tornado southeast of Crowell at 811 pm CDT. No damage is known to have occurred and the location is estimated based on the chasers' viewpoints.

FOARD COUNTY --- 5.3 SW THALIA [33.94, -99.62], 3.9 ESE THALIA [33.96, -99.48]				
	05/04/22 19:25 CST		0	Tornado (EF0, L: 8.40 mi , W: 200 yd)
	05/04/22 19:45 CST		0	Source: NWS Storm Survey

The Lockett tornado was observed by storm spotters and storm chasers to have developed in eastern Foard County to the southwest of Thalia . This tornado moved east and then northeast before crossing into Wilbarger County and eventually moving through Lockett TX . In Foard County, only tree damage was observed along County Road 183, otherwise the tornado moved through open or inaccessible ranchland.

WILBARGER COUNTY --- 10.2 SW LOCKETT [33.96, -99.48], 3.3 N LOCKETT [34.13, -99.38]				
	05/04/22 19:45 CST		0.10M	Tornado (EF3, L: 14.70 mi , W: 600 yd)
	05/04/22 20:23 CST		0	Source: NWS Storm Survey

The long-lived Lockett tornado moved into Wilbarger County from Foard County and continued to move northeast. As the tornado approached County Road 138, the tornado created significant tree damage and roof damage to a home, and destroyed an outbuilding. Along County Road 138, at least seven large steel electrical transmission towers were bent over, with the western most tower blown to the south. Roof damage occurred to another home just north of County Road 138 an another outbuilding was heavily damaged along County Road 83. The tornado then turned to the north and damaged another house, destroyed a barn and broke wooden utility poles along County Road 85 to the south of Lockett.

The tornado continued to move north and moved through mainly the eastern portion of the town of Lockett where it produced roof and wall damage to a number of homes and businesses, as well as tree and power pole damage. The tornado continued to veer in direction and moved north-northwest in areas north of Lockett before dissipating.

Storms moved in from the Texas panhandle during the evening of the 4th, bringing tornadoes to western sections of north Texas.
