Dust Storms

Public Safety Response to Adverse Weather Conditions

Definition of Dust Storm:

A meteorological phenomenon common in arid and semi-arid regions that arise when strong winds blow loose sand and dirt from a dry surface area.

Quick Facts:

- Each year, one to three storms will affect the phoenix area, according to the National Oceanic and Atmospheric Administration (*NOAA, 2013*).
- According to NOAA, in the last 10 years, more than 100 dust storms were reported in the state of Arizona (*NOAA, 2013*).
- In Arizona, from 2008-2013, dust has been involved in 566 collisions, 14 fatalities, and 394 injuries (*ADOT, 2013*).

Traffic Operations Center's Function

- Reduce traffic congestion and secondary collisions
- Monitor active incidents and mobilize effective responses faster
- Camera Verification of incidents
- Reduce response times of first responders
- DPS CAD access
- Timely updates to police, fire and other first responders
- Point of Contact (First Responders, Media, Public)

DPS Strategies to mitigate the inherent dangers of dust storms:

- Notify Support Agencies
 - ✓ ADOT (TOC, ALERT)
 - ✓ Local Law Enforcement
 - ✓ Fire
 - ✓ EMS
- Rolling Traffic Breaks
- Class A or B Roadblocks
 - ✓ Traffic Control
 - ✓ Full or Partial Road Closures

Public Awareness – Media Resources

- Dynamic Messaging Boards

- AZDOT.gov and AZ511.gov

- Press Releases
 - ✓ Radio
 - ✓ Television

- Social Media (e.g., Twitter, Facebook)
 - ✓ DPS and ADOT PIO's

Motoring Public's Response:

1. **DO NOT** enter a dust storm!
2. Pull off the pavement as far as possible and turn off lights.
3. Go slow, with lights and sound horn periodically.
4. **DO NOT** stop in the roadway!
5. Check local media to determine safe travel routes.
(Radio, Internet, Weather Apps, 511, etc.)
