Cleaning

- Cellular, Roller, Solar and Roman Shades are easy to keep looking fresh and new for years. Regular dusting with a feather duster is recommended. When necessary, fabric can be lightly vacuumed with a brush attachment.
- If the Cellular Shade becomes soiled with topical dirt (i.e. dirt that is resting on the surface of the fabric), we recommend that the shade be spot cleaned using a soft cloth or sponge, a mild detergent and warm water. Do not use strong detergents or spot removers. Allow the shade to dry completely before raising.
- Extra care should be used when cleaning Cellular blackout fabric as the fabric could become permanently creased.
- Professional blind cleaners use a variety of methods to clean blinds and vary in their capabilities. While Springs Window Fashions knows that many of our window treatments can be safely cleaned using the appropriate ultrasonic or injection/extraction cleaning methods, we cannot guarantee the outcome of any cleaning services provided by an independent company.
- For assistance in locating a certified blind cleaner that services your area, please visit www.blindcleaners.net or contact Customer Service at 1-800-221-6352.
- Dry cleaning is not recommended and will void the warranty.

Roller Shade with scallop

- When you receive your shade, there may be a slight curl to the scallop. Fully lower the shade and allow to hang for 24–36 hours. This should remove the curl from the scallop.

Roller Shade fabric

- After installing your shade, you may notice slight creases in fabric. Fully lower the shade and allow to hang for 24–36 hours. If creases are still noticeable, gently steam the materials using a fabric steamer. Allow the shade to dry completely before raising.
