BILLING CODE 4820-02-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Wildlife and Plants; 90-Day Finding on Petition To Delist the Stephens' Kangaroo Rat and Initiation of a 5-Year Review

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 90-day petition finding and initiation of status review for the 12-month finding and 5-year review.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 90-day finding for a petition to remove the Stephens' kangaroo rat (*Dipodomys stephensi*) from the Federal List of Threatened and Endangered Wildlife and Plants pursuant to the Endangered Species Act (Act) (16 U.S.C. 1531 *et seq.*). We find that the petition presents substantial information and are initiating a status review to determine if delisting this species is warranted. We are requesting submission of any new information (best scientific and commercial data) on the Stephens' kangaroo rat since its original listing as an endangered species in 1988. Following this status review, we will issue a 12-month finding on the petition to delist. Because a status review is also required for the 5-year review of listed

species under section 4(c)(2)(A) of the Act, we are electing to prepare these reviews simultaneously. At the conclusion of these simultaneous reviews, we will issue the 12-month finding on the petition, as provided in section 4(b)(3)(B) of the Act, and make the requisite finding under section 4(c)(2)(B) of the Act based on the results of the 5-year review.

DATES: The 90-day finding announced in this document was made on March 24, 2004. To be considered in the 12-month finding on this petition, comments and information should be submitted to us by June 21, 2004.

ADDRESSES: Comments, material, information, or questions concerning this petition and finding should be sent to the Field Supervisor, Carlsbad Fish and Wildlife Office, U.S. Fish and Wildlife Service, 6010 Hidden Valley Road, Carlsbad, California 92009. The petition and supporting information are available for public inspection by appointment during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jim Bartel, Field Supervisor, Carlsbad Fish and Wildlife Office, at the above address (telephone: 760/431-9440; fax: 760/431-9618).

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(A) of the Act requires that we make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. To the maximum extent practicable, this finding is to be made within 90 days of receipt of the petition, and the finding is to be published promptly in the **Federal Register**. If we find substantial information is present, we are required to promptly commence a review of the status of the species (50 CFR 424.14). "Substantial information" is defined in 50 CFR 424.14(b) as "that amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted." Petitioners need not prove that the petitioned action is warranted to support a "substantial" finding; instead, the key consideration in evaluating a petition for substantiality involves demonstration of the reliability and adequacy of the information supporting the action advocated by the petition.

When considering an action for listing, delisting, or reclassifying a species, we are required to determine whether a species is endangered or threatened based on one or more of the

five listing factors as described at 50 CFR 424.11. These factors are given as: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; and (E) other natural or manmade factors affecting the continued existence of the species. Delisting a species must be supported by the best scientific and commercial data available and only considered if such data substantiates that the species is neither endangered nor threatened for one or more of the following reasons: (1) The species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error.

We received two similar petitions from Mr. Robert Eli Perkins requesting us to delist the Stephens' kangaroo rat from the Federal List of Threatened and Endangered Wildlife and Plants pursuant to the Act. The first petition, submitted on behalf of the Riverside County Farm Bureau (RCFB), was received on May 1, 1995. We subsequently sent a letter on June 12, 1995, to the RCFB acknowledging the receipt of the petition. On August 13, 1997, the RCFB sent us an inquiry regarding the status of the delisting petition and requesting clarification as to whether we had the funds or staff to respond with a 90-day finding to the petition. We sent another letter to the RCFB on August 26, 1997, stating that we were unable to review the petition and publish our 90-day finding due to limited resources. We also provided the RCFB with additional information concerning our Listing Priority Guidance for Fiscal Year 1997, which indicated that delisting petitions ranked as a low-priority Tier 3 action and that higher priority work took precedence. We received a resubmittal of the first petition to delist the Stephens' kangaroo rat from Mr. Perkins on February 25, 2002, and sent a letter acknowledging the receipt of the second petition to Mr. Perkins on August 6, 2002. The second petition repeated the same information as the first petition, and also stated that delisting is warranted as a result of the Riverside County Habitat Conservation Agency's conservation measures.

The petition provides information on the species' range, habitat requirements, population size, population density, reproductive ability, ability to persist in small patches, and colonization capability, and states that this
