

substance abuse?" These questions will be addressed primarily using the CSAP core measures, a data collection activity already approved by the Office of Management and Budget (OMB) under control number 0930-0230. In addition to the core measures, data already being collected by SAMHSA's National Survey on Drug Use and Health (NSDUH; OMB No. 0930-0110) will be examined.

The process evaluation will focus on three questions: (1) "Did States attain the SIG Program's two main goals of coordinated funding streams and revitalized comprehensive prevention strategies and how were these goals attained?" (2) "What other substance abuse prevention programming has the State implemented?" and (3) "Did SIGs meet the criterion of supporting science-based programs fifty percent of the time, and what array of prevention activities were supported?"

Four instruments are needed to collect process information about SIG activities at the State, community, and program levels: (1) Semi-Annual Report; (2) a Final Report; (3) Site Visits; and (4) Telephone Interviews.

The Semi-Annual Report has three components. The first component, the SIG Semi-Annual Report Narrative Protocol will provide a structured report of SIG activities accomplished during the previous six months. The second

component, the SIG Management Information Form (SMIF) will be a web-based, structured form. Following the first submission, selected items (less likely to change over time) will be pre-filled for subsequent reporting periods. The third component, the Sub-recipient Checklist (SCRL) will be a web-based form that contains two sections. The first section relates to the sub-recipient, the organization that actually has a fiduciary relationship with the state to engage in SIG activities at the local level. This section will gather information on the characteristics of that organization. The second section will focus on the actual prevention intervention(s) delivered by that organization.

At the conclusion of the grant, SIG awardees will be required to submit a Final Report which is designed to be a synthesis of findings from the grantee, addressing what changes occurred at the state and community levels as a result of SIG.

The community site visits will be conducted in randomly selected sample of sub-recipient communities in Cohorts I-III that have submitted pre-post matched outcome data that includes comparison data. The SIG Community Site Visit Protocol will collect data at the sub-recipient and program levels on the following topics: degree of monitoring by the State, selection

processes of interventions, evaluation strategies, technical assistance provided by the State, level of guidance by the State in program selection, and evaluation.

The sampling frame for the telephone interviews will include all active sub-recipients in Cohorts I-V that are collecting outcome data at the intervention level. Sub-recipient communities selected for site visits will be excluded from the sampling frame. The SIG Community Telephone Interview Protocol will collect data on the processes for selection and implementation of interventions and the approach to evaluation of these interventions.

OMB approval has been received for the process evaluation in the first four cohorts (N = 28 states) and for states to submit previously collected outcome data for secondary analysis. This request will add the more recently funded SIG jurisdictions (Cohorts V-VII) to the process evaluation (N = 16 states) and address the burden on states (Cohorts VI-VII) to submit previously collected outcome data (N = 23 states). Included in this request are revised burden estimates based on actual experience, and a request for an extension of the period of OMB approval for the SIG cross-site evaluation by three years.

Estimated annual burden is as follows:

Instrument	Number of respondents	Responses per respondent	Hours per response	Annual burden hours
Semi-annual Report:				
Narrative	23	2	30	1,380
SMIF	23	2	1.5	69
SRCL	23	50	4	4,600
Final Report	23	1	80	1,840
Site Visits:				
State contacts	10	1	1	10
Subrecipient contacts	10	1	1	10
Site visit interviews (10 per site)	80	1	1.5	120
Telephone Interviews	81	1	1.5	122
Total	273	8,151
