SUPPLEMENTARY INFORMATION:

Title: National Cooperative Geologic Mapping Program—EDMAP (NCGMP—EDMAP).

OMB Control Number: 1028—NEW.

Correction: This notice was originally published on August 19, 2008, Volume 73, number 161, pages 48388–48389. The corrections are as follows: the day to submit comments was incorrect and should have given the public 60 instead of 30 days to respond to this notice. The second correction further justified the estimate burden for the project added the estimated number of grant recipients and that the overall burden would not be increased because the recipients will not prepare final reports as a requirement of this award.

Abstract:

EDMAP is the component of the NCGMP that trains the next generation of geologic mappers. The NCGMP allocates funds to colleges and universities in the United States and Puerto Rico through an annual competitive grant process. Every Federal dollar that is awarded is matched with university funds. Geology professors, who are skilled in geologic mapping, request EDMAP funding to support undergraduate and graduate students at their college or university in a one-year mentored geologic mapping project that focuses on a specific geographic area.

Since 1996, more than \$4 million from the NCGMP have supported geologic mapping efforts of more than 600 students working with more than 214 professors at 131 universities in 44 states, the District of Columbia, and Puerto Rico. Funds for graduate projects are limited to \$15,000 with undergraduate project funds limited to \$7,500. These funds are used to cover field expenses and map production, but not faculty salaries. The college or university matches the EDMAP funding. The authority for the program is listed
