

on the draft background document, and announced the styrene expert panel meeting. The RoC Office convened an eleven-member expert panel of scientists from the public and private sectors to evaluate styrene. The expert panel met on July 21–22, 2008, in a public forum at the Radisson Governors Inn, Research Triangle Park, North Carolina. The panel was charged to peer review the draft background document for styrene and then to make a recommendation on its listing status in the 12th RoC and to provide a scientific justification for that recommendation. Details about the meeting, including public comments received and the expert panel reports, are available on the RoC Web site (<http://ntp.niehs.nih.gov/go/29682>). The expert panel report for styrene contains two parts: Part A contains the peer-review comments on the draft background document and Part B is the recommendation on listing status and its scientific justification. The expert panel recommended that (1) styrene be listed in the 12th RoC as reasonably anticipated to be a human carcinogen. The panel's recommendation on listing status and its scientific justification are now being released for public comment.

Request for Comments

The RoC Office invites written public comments on the expert panel's recommendation on listing status for styrene and the scientific justification for the recommendation. All comments received will be posted on the RoC Web site. Persons submitting written comments are asked to include their name and contact information (affiliation, mailing address, telephone and facsimile numbers, e-mail, and sponsoring organization, if any) and send them to Dr. Lunn (see **ADDRESSES** above). The deadline for submission of written comments is October 23, 2008.

Next Steps

The RoC Office is in the process of finalizing the background document for styrene based upon the expert panel's peer review comments and the public comments received (73 FR 29139). Persons can register free-of-charge with the NTP listserv (<http://ntp.niehs.nih.gov/go/231>) to receive notification when the final background document is posted on the RoC Web site (<http://ntp.niehs.nih.gov/go/10091>). As part of the RoC review process, two government groups will also conduct reviews of styrene; these meetings are not open to the public. Upon completion of these reviews, the NTP will (1) draft a substance profile for styrene, which contains its listing

recommendation for the 12th RoC and the scientific information supporting that recommendation; (2) solicit public comment on the draft substance profile; and (3) convene a meeting of the Board of Scientific Counselors to peer review the draft substance profile.

Background Information on the RoC

The RoC is a Congressionally mandated document that identifies and discusses agents, substances, mixtures, or exposure circumstances (collectively referred to as "substances") that may pose a hazard to human health by virtue of their carcinogenicity. The RoC follows a formal, multi-step process for review and evaluation of selected chemicals. Substances are listed in the report as either known or reasonably anticipated human carcinogens. The NTP prepares the RoC on behalf of the Secretary of Health and Human Services. Information about the RoC and the review process is available on its Web site (<http://ntp.niehs.nih.gov/go/roc>) or by contacting Dr. Lunn (see **FOR FURTHER INFORMATION CONTACT** above).
