The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by removing Amendment 39–15467 (73 FR 21220; April 21, 2008), and adding the following new AD:

DORNIER LUFTFAHRT GmbH: Docket No. FAA–2009–0284; Directorate Identifier 2009–CE–016–AD.

Comments Due Date

(a) We must receive comments by April 29, 2009.

Affected ADs

(b) This AD supersedes AD 2008–08–15, Amendment 39–15467 (73 FR 21220; April 21, 2008).

Applicability

(c) This AD applies to Dornier 228–100, Dornier 228–101, Dornier 228–200, Dornier 228–201, Dornier 228–202, and Dornier 228–212 airplanes, all serial numbers, that:

- (1) Are certificated in any category; and
- (2) Have had the rudder and/or elevator replaced or repaired at Fairchild Dornier or RUAG between the year 2000 and 2005. The concerned rudder and elevator part numbers and serial numbers are listed on page 7 of RUAG Aerospace Defence Technology Dornier 228 Service Bulletin No. SB–228–270, Rev. No. 1, dated November 28, 2008.

Subject

(d) Air Transport Association of America (ATA) Code 51: Standard Practices/Structures.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

The manufacturer reported findings of missing primer on the internal of the elevator and rudder of aircraft S/N 8200. The aircraft S/N 8200 was with RUAG for maintenance purposes. Investigation performed by RUAG showed that the paint removal procedure for the rudder and elevator was changed from a paint stripping with brush and scraper to a procedure where the parts were submerged in a tank filled with hot liquid stripper. The stripper is called TURCO 5669 from Henkel Surface Technologies. The stripping process is described in the Technical Process Bulletin No. 238799 dated 09/01/1999. This paint stripping process change was not communicated to and not approved by the TC-Holder.

Corrosion damage can occur through insufficient surface protection. Consequently, the MCAI requires a detailed visual inspection of the inner structure of the rudder and elevator for signs of corrosion, debonded primer (yellow-green), and any deviation of surface protection. If the inspection results show corrosion beyond the acceptable level or areas with de-bonded primer, the inspection results have to be reported to RUAG Aerospace Services GmbH for further decisions. If necessary, repair the affected parts in accordance with the applicable repair instruction obtained from RUAG Aerospace Services GmbH.

Actions and Compliance

(f) Unless already done, do the following actions:

(1) Within 2 months after the effective date of this AD, do a detailed visual inspection on the inner structure of the rudder and elevator for signs of corrosion, debonded primer (yellow-green), and any other deviation of surface protection following RUAG Aerospace Defence Technology Dornier 228 Service Bulletin No. SB–228–270, Rev. No. 1, dated November 28, 2008.

(2) If you find corrosion or areas with debonded primer as a result of the inspection required by paragraph (f)(1) of this AD, before further flight, do the following:

(i) Report the inspection results to RUAG Aerospace Services GmbH, Dornier 228 Customer Support, P.O. Box 1253, 82231 Wessling, Federal Republic of Germany, telephone: +49 (0) 8153–30–2280; fax: +49 (0) 8153–30–3030 and request FAA-approved repair instructions following RUAG Aerospace Defence Technology Dornier 228 Service Bulletin No. SB–228–270, Rev. No. 1, dated November 28, 2008.

(ii) Repair corrosion following FAA-approved repair instructions obtained from RUAG Aerospace Services GmbH.

FAA AD Differences

Note: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office,

FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

SUPPLEMENTARY INFORMATION: The PBGC Office of Inspector General (OIG) conducts criminal, civil and administrative investigations and compiles and maintains case files containing identifying information about potential subjects and sources. PBGC is proposing a new system of

records subject to the Privacy Act of 1974, *as amended*, 5 U.S.C. 552a ("Privacy Act"), entitled "PBGC-17, Office of Inspector General Investigative File System—PBGC." (PBGC's notice of a new system of records appears elsewhere in today's **Federal Register**.) The proposed new system of records will cover only the files of investigation that identify by name, or other personal identifier, individuals who are subjects or sources of information. The system of records is necessary to the investigative functions performed by the OIG under the authority of the Inspector General Act of 1978, as amended, 5 U.S.C. App. 3. The files may contain information about criminal, civil or administrative wrongdoing, or about fraud, waste or mismanagement, or other violations of law or regulation. This information could be the basis for referrals to appropriate prosecutorial authorities for consideration of criminal or civil prosecution or to PBGC management for administrative corrective action. The collection and maintenance of these types of records that are subject to this system are not new; however, in the past they have not been retrieved by a name or other personal identifier. OIG is implementing an electronic records management system from which records will be retrieved by name or other personal identifier.

Proposed Regulatory Changes

Exemptions

PBGC is proposing to amend its regulations implementing the Privacy Act (29 CFR part 4902) to exempt, under 5 U.S.C. 552a(j) and (k), certain records that will be maintained in PBGC-17 from the access, contest, and certain other provisions of the Privacy Act. The amendment would protect the information gathered to carry out OIG's law enforcement mission to investigate criminal, civil, and administrative matters. The exemptions relate to records maintained by OIG pertaining to the enforcement of criminal laws (see 5 U.S.C. 552a(j)(2)) and investigatory material compiled for law enforcement generally (see 5 U.S.C. 552a(k)(2)), and for determining individuals' eligibility or qualifications for Federal employment or Federal contracts (see 5 U.S.C. 552a(k)(5)).

Other Changes

Section 411 of the Pension Protection Act of 2006, Public Law 109-280, amended section 4002(a) of ERISA to state that PBGC is to be administered by a Director appointed by the President, subject to Senate confirmation. Thus, PBGC proposes to replace all references
