

plans to collect information from pipeline operators of all sizes in the course of conducting these PCSRs.

Use of Results

This program provides TSA with real-time information on current security practices within the pipeline mode of the surface transportation sector. This information allows TSA to adapt programs to the changing security threat, while incorporating an understanding of the improvements owners/operators make in their security measures. Without this information, the ability of TSA to perform its security mission would be severely hindered.

Additionally, the relationships these face-to-face contacts foster are critical to the Federal government's ability to reach out to the pipeline stakeholders affected by the PCSRs. The relationships foster a sense of trust and a willingness to share information with the Federal

government. TSA assures respondents that the portion of their responses that is deemed Sensitive Security Information (SSI) will be protected in accordance with procedures meeting the transmission, handling, and storage requirements of SSI set forth in 49 CFR parts 15 and 1520.

The annual hour burden for this information collection is estimated to be 100 hours. While TSA estimates a total of 2,200 potential respondents, this estimate is based on TSA conducting 12 visits per year and each visit lasting 8 hours. There is no cost burden to respondents.
