The ICR describes the nature of the information collection and its expected burden. TSA published a **Federal Register** notice, with a 60-day comment period soliciting comments, of the following collection of information on August 16, 2013, 78 FR 50077.

Specifically, the collection involves the submission of contact information for a pipeline company's primary and alternate security manager and the telephone number of the security operations or control center, as well as data concerning pipeline security incidents.

**ADDRESSES:** Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to Desk Officer, Department of Homeland Security/TSA, and sent via

electronic mail to [oira\\_submission@omb.eop.gov](mailto:oira_submission@omb.eop.gov) or faxed to (202) 395-6974.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation is available at <http://www.reginfo.gov>. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

- (1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

\* \* \* including security responsibilities \* \* \* over modes of transportation that are exercised by the Department of Transportation." As the lead Federal agency for pipeline security, it is important for TSA to have contact information for company security managers and knowledge of security incidents and suspicious activity within the mode. This issue was addressed in the TSA Pipeline Security Guidelines developed in consultation with TSA's Federal partners and relevant industry stakeholders. Additionally, to facilitate the exchange of security information in a timely fashion, contact data is necessary for pipeline operators' security operations or control centers.

#### Endangered and Threatened Wildlife and Plants; Revised Recovery Plan for the Black-Footed Ferret

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) announces the availability of a revised recovery plan for the black-footed ferret (*Mustela nigripes*). This species is federally listed as endangered under the Endangered Species Act of 1973, as amended (Act).

**ADDRESSES:** Electronic copies of the recovery plan are available online at <http://www.fws.gov/endangered/species/recovery-plans.html>. Paper copies of the revised recovery plan are available by request from the National Black-footed Ferret Conservation Center, U.S. Fish and Wildlife Service, P.O. Box 190, Wellington, CO 80549; telephone 970-897-2730.

**FOR FURTHER INFORMATION CONTACT:** Pete Gober, National Black-footed Ferret Recovery Coordinator, at the above address or telephone (see **ADDRESSES**).

**SUPPLEMENTARY INFORMATION:**

#### Background

Recovering an endangered or threatened animal or plant to the point where it is again a secure, sustainable member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service prepares recovery plans for the federally listed species native to the United States where a plan

will promote the conservation of the species. Recovery plans describe site-specific actions necessary for the conservation of the species; establish objective, measurable criteria which, when met, would result in a determination that the species no longer needs the protection of the Act (16 U.S.C. 1531 *et seq.*); and provide estimates of the time and cost for implementing the needed recovery measures.

The Act requires recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f)(4) of the Act requires that public notice and opportunity for public review and comment be provided during recovery plan development. We made the draft recovery plan available for public comment and peer review from April 23, 2013, to June 24, 2013 (78 FR 23948). We have considered all information received during the public comment and peer review period in the preparation of the final revised recovery plan for the black-footed ferret. The Service and other Federal agencies will take these comments and reviews into consideration in the course of implementing the final approved recovery plan for the black-footed ferret. In this final revised plan, we have summarized and responded to the issues raised by both the public and the requested peer reviewers in an appendix to the plan, and incorporated changes to the plan as appropriate.

The black-footed ferret (*Mustela nigripes*) was historically found throughout the Great Plains, mountain basins, and semi-arid grasslands of North America wherever prairie dogs occurred. The species was listed as endangered in 1967 (32 FR 4001, March 11, 1967) under the Endangered Species Preservation Act of 1966 and again in 1970 under the Endangered Species Conservation Act of 1969 (35 FR 8491, June 2, 1970). On January 4, 1974, the black-footed ferret was listed under the Endangered Species Act of 1973 (39 FR 1171). The ferret's close association with prairie dogs was an important factor in the ferret's decline. From the late 1800s to approximately the 1960s, prairie dog-occupied habitat and prairie dog numbers were dramatically reduced by the effects of both temporal and permanent habitat loss caused by conversion of native grasslands to cropland, poisoning, and disease. The ferret population declined precipitously as a result.

The recovery of the black-footed ferret will be achieved by establishing a number of ferret populations where appropriate habitat exists and by
