(d) (1) *Distribution of Operation and Maintenance Costs.* For the purpose of ensuring a proportional distribution of operation and maintenance cost to each user, commercial and Industrial Users and bulk customers shall be subject to a surcharge for discharging wastewater which is defined as having the following concentrations (milligrams per liter - mg/l):

- (i) Biochemical Oxygen Demand at 5 days at 20 degrees C, abbreviated BOD5 - 250 mg/l
  - (ii) Total Suspended Solids, abbreviated TSS - 220 mg/l
- (2) Each commercial and Industrial User and bulk customer that is determined to discharge wastewater having pollutants in excess of normal wastewater shall pay a charge dependent on water volume consumed or wastewater discharged and measured by a wastewater flow meter. These pollutant surcharges are as follows:
    - (i) BOD5 - ~~\$0.16~~**17** per pound/month
    - (ii) TSS - ~~\$0.43~~**45** per pound/month
  - (3) Pollutants in excess of normal wastewater shall be determined from periodic laboratory analysis of the user's wastewater. Laboratory analysis of the wastewater shall be conducted as outlined in the latest publication of the Standard Methods for the examination of Water and Wastewater, or American Society for Testing and Materials, Part 31, Water, or the U.S. Environmental Protection Agency Methods.
  - (4) In the event that a commercial or Industrial User or bulk customer discharges certain wastes containing inordinate oxygen demanding substances, the City reserves the right to substitute Chemical Oxygen Demand (COD) or Total Organic Carbon (TOC) test instead of BOD5. An evaluation of the user's discharge and the cost of treatment will be established for such substances. If an Industrial User chooses or elects COD, then the ratio of COD to BOD must be 2:1. In the event an Industrial User requests to use TOC, then his proposed methodology shall be submitted to the City for approval prior to it being used as a basis for charging for this particular pollutant. It shall be the responsibility of industrial and commercial users and bulk customers to notify the City of changes in the pollutant and contribution of their wastewater.
  - (5) For purposes of determining commercial and industrial sewer charges, each user's water consumption or wastewater discharged and measured by a wastewater flow meter shall be taken as that metered water volume consumed during the current month.
  - (6) If any user can prove to the satisfaction of the City that substantial amounts of metered water do not enter the wastewater collection system, the sewer bill will be reduced accordingly.
  - (7) Notwithstanding any other provision of this ordinance, if the City determines that wastewater services provided any commercial or Industrial User or bulk customer significantly differs from that upon which the rate structure set forth in subsection (A) of this article, the City may enter into a separate agreement with any such user to discharge sewer into the public sewer under such rates, terms, and conditions as may be reasonable under the circumstances.
- (e) Each user that discharges any toxic pollutants which cause an increase in the cost of managing the effluent or the sludge treatment works shall pay for any such increased cost.

- (f) Rates are to be adjusted annually, based on the adopted budget for the wastewater system. This annual review and adjustment shall be the result of studies that reflect any change in the proportionate contribution of wastewater flow or pollutant by any class of user. The adjusted rate or rates, whether by increase or decrease, shall be reflected in each subsequent billing period by the amount of such change. This annual review will ensure a proportional distribution of operation and maintenance, and renewal and replacement, and other costs to each user including major and minor industrial, commercial, and residential users.
- (g) The City of Panama City Beach from time to time and as often as shall be necessary will revise rates, fees and charges of the wastewater collection, transmission, treatment, and disposal system in order to comply with revenue needs of operating, maintenance, capital costs, debt service, and reserve requirements and other costs associated with any properly issued and approved utility related debt then outstanding.
