

Doll Tote Design Tips

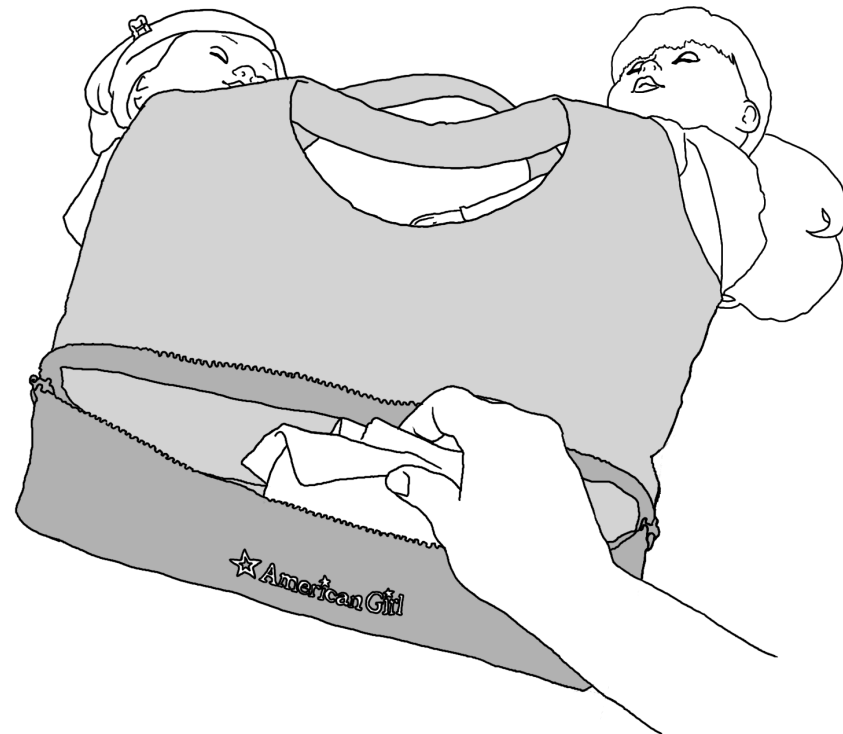

1. With the tote standing upright, place an 18" American Girl doll in a sitting position with her legs together. Be sure the doll's back is directly against the side of the tote and her arms are tucked inside.

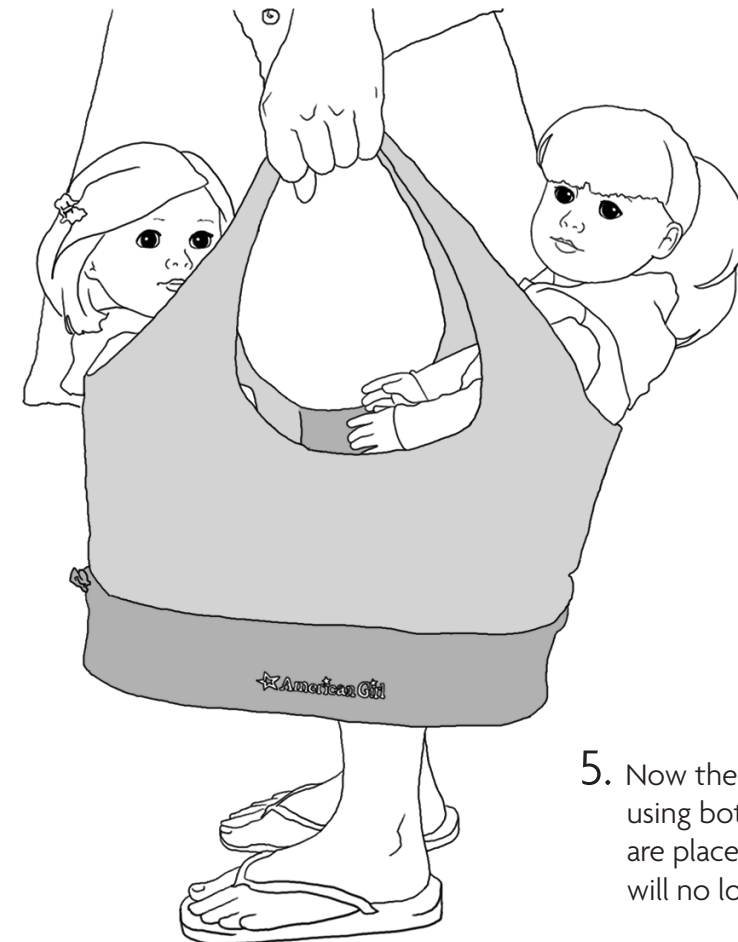

2. Place the second 18" doll in a sitting position into the tote opposite the first doll. Her legs will be on top of the first doll's legs. Make sure the second doll's back is directly against the tote and her arms are also tucked inside.

3. Lift the handles and adjust both dolls downward into the tote so that they fit snugly. Fasten the center strap across the doll's legs to secure them in place.

4. After both dolls are secured, you can access the lower storage compartment by placing the tote on its side.

5. Now the tote is ready to travel! You can carry it in one hand using both handles. Please note: Once outfits and accessories are placed inside the zippered storage compartment, the tote will no longer stand on its own.
