Explanatory comments

This checklist is intended to provide users with a summary of the required climate-related disclosures as set out in IFRS Sustainability Disclosure Standards (the ISSB Standards) and the related guidance as issued by the International Sustainability Standards Board (ISSB). Entities should refer directly to the relevant ISSB Standards for the comprehensive disclosure requirements and additional context.

An entity that prepares sustainability-related financial disclosures in accordance with the ISSB Standards must always apply IFRS S1 *General Requirements for Disclosure of Sustainability-related Financial Information* (IFRS S1). IFRS S1 identifies the essential elements of a complete set of sustainability-related disclosures and sets out the qualitative characteristics of useful sustainability-related financial information. That is, an entity will apply IFRS S1 in preparing and reporting sustainability-related financial disclosures for the full 'universe' of sustainability-related information. IFRS S2 *Climate-related disclosures* (IFRS S2) further specifies the information an entity is required to disclose about climate-related risks and opportunities. IFRS S1 and IFRS S2 must always be applied together. Therefore, this checklist includes disclosure requirements from both IFRS S1 and IFRS S2. For the purposes of this checklist, the wording of the related paragraphs in IFRS S1 has been amended from the more generic term 'sustainability-related financial information' to the more specific term 'climate-related financial information' to avoid confusion. Note that the paragraph references related to the disclosure requirements in IFRS S1 have been retained, so that the user of the checklist can refer directly to IFRS S1 for more information. **Note that, even though this checklist includes the relevant disclosure requirements from IFRS S1, it does not address the disclosures of any other sustainability risks and opportunities, apart from climate.** This checklist is updated annually, to include any amendments to IFRS S1 or S2 that may have been made by the ISSB.

Entities applying the ISSB Standards under a local endorsement mechanism must consider the relevant local effective dates.

Materiality and judgement

The checklist does not address the appropriateness or clarity of the disclosures, for instance, the format and the structure of the notes and the tailoring of the information. These are matters of judgement based on the individual facts and circumstances of the entity.

ISSB Standards set out minimum disclosure requirements. However, the minimum disclosure requirements only apply to the extent that the event or item to which the disclosure requirement applies, is material to the entity, as clarified in paragraph B25 of IFRS S1. Therefore, in applying the checklist, the user should carefully assess the materiality of the information. The disclosure of immaterial information may, in some circumstances, reduce the relevance of the climate-related financial disclosures. In such circumstances, entities must ensure that the immaterial information does not obscure the material information in accordance with paragraph 62 of IFRS S1.

Entities need to consider paragraphs B20 up to and including B28 of IFRS S1 to identify which material climate-related financial information to disclose. As mentioned in paragraphs B20 and B21 of IFRS S1, entities must apply the requirements of IFRS S2 to identify material climate-related financial information. In assessing whether information is material, an entity must consider both quantitative and qualitative factors. For example, an entity might consider the magnitude and the nature of the effect of a climate-related risk or opportunity on the entity.

The ISSB Standards contain several paragraphs which state that the entity is required to: (1) use all reasonable and supportable information that is available to it at the reporting date without undue cost or effort; and/or (2) use an approach that is commensurate with the skills, capabilities and resources that are available to the entity for preparing climate-related financial disclosures. For the purposes of this checklist, these requirements are assumed to have been met. Therefore, no specific questions related to this are included in this checklist.

Paragraph 10 of IFRS S1 states that climate-related financial information prepared in accordance with the ISSB Standards must be relevant and faithfully represent what it purports to represent. These are fundamental qualitative characteristics of useful climate-related financial information, which is enhanced if the information is comparable, verifiable, timely and understandable. For the purposes of this checklist, it is assumed the requirements from paragraphs 11 up to and including 16 of IFRS S1 have been met. Therefore, no specific questions related to fair presentation are included in this checklist.

Transition reliefs

The ISSB Standards include some transition reliefs, which can be found in Appendix E of IFRS S1 and Appendix C of IFRS S2. Paragraph E5 of IFRS S1 states that, in the first annual reporting period in which an entity applies IFRS S1, an entity may elect to disclose information only on climate-related risks and opportunities, and defer disclosing the full 'universe' of sustainability-related information until its second year of application. This relief is known as the 'climate-first' relief. If an entity elects the climate-first relief, the entity only needs to apply IFRS S2 along with IFRS S1 in its first year of application, in order to provide climate-related financial disclosures. If an entity elects the climate-first relief, it must disclose that fact. Note that if an entity does not elect the climate-first relief, the entity must provide sustainability-related financial information for the full universe of its sustainability-related risks and opportunities, in addition to climate-related financial disclosures. Note that this checklist applies whether or not an entity has elected the climate-first relief in the first annual reporting period in which it applies IFRS S1, because the disclosures for climate-related information will be the same. **Note that, even though this checklist includes the relevant disclosure requirements from IFRS S1, it does not address the disclosures of any other sustainability risks and opportunities, apart from climate.**

Ticking the right boxes

Each item should be answered with a tick in the appropriate column:

- ▶ Yes = Disclosure has been made. Reference can be made in the 'Comments' column to the section (or page) of the climate-related financial disclosures in which the related disclosure has been made.
- ▶ No = Disclosure is applicable but has not been made. Any item marked 'No' should be explained, giving the reason for the omission on the checklist or on a separate working paper, including disclosures that are omitted because they are deemed by management to be immaterial, and also - when applicable - including the amounts or percentages involved, to assist in the assessment of compliance with the ISSB Standards.
- ▶ N/A = The question is not applicable to the entity, for instance, because the transaction, event or item referred to in the question does not apply to the entity.

Metrics and targets

General requirements

The objective of climate-related financial disclosures on metrics and targets is to enable users of general purpose financial reports to understand an entity's performance in relation to its climate-related risks and opportunities, including progress towards any climate-related targets it has set, and any targets it is required to meet by law or regulation (S2.27).
