Size guide

Rings – How to measure your size

Kindly read through below thoroughly before you decide the size on your ring

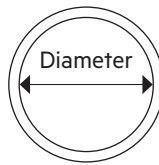

- Avoid to measure your finger when its cold
 - Have in mind that the ring should be able to slip over the knuckle
 - A wide ring often requires a larger size than a smaller one
 - Be careful when you measure since 1 mm equals one size
-

1) Access to a printer

- Choose a ring you often use
- Put the ring on one of the circles below
- When your ring covers one of the circles, you have found your right size
- If your ring comes in between two sizes, choose the larger one

Printing

- Print the size guide in .pdf
- Measure the line below, it should be 50 mm or 2 inches long when the .pdf is printed
- Please see circle below as an example for diameter

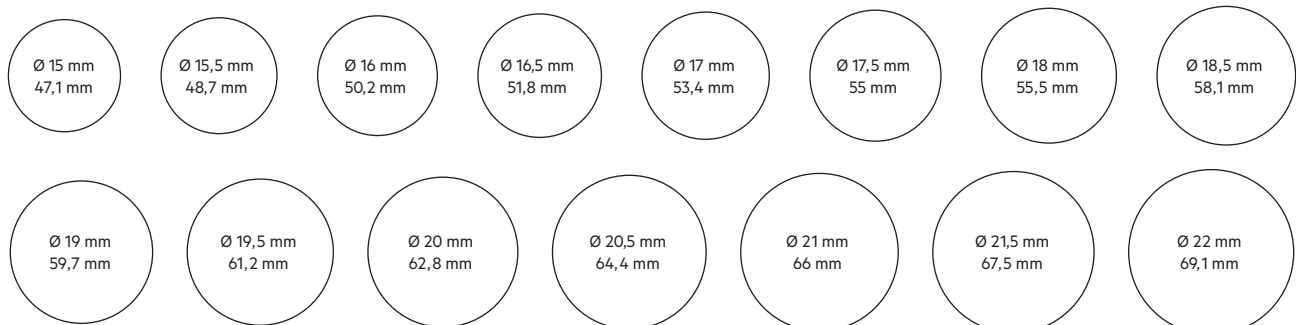

2) No access to a printer

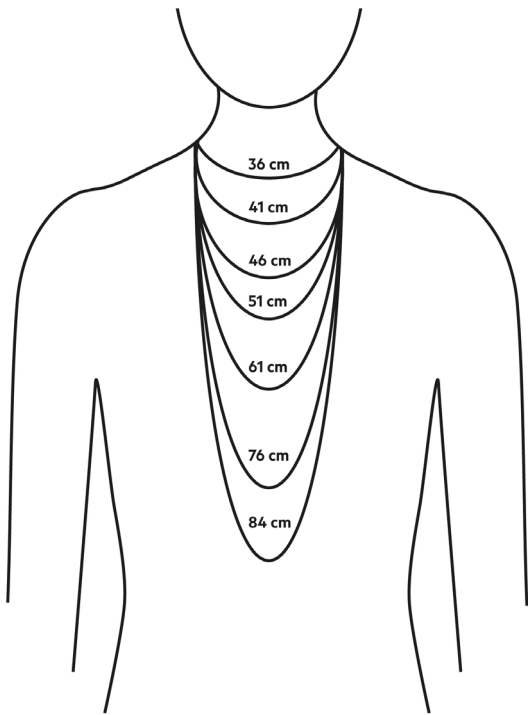

- Choose a ring you often use
- Use a ruler with millimeter measurements
- Put the ring on an even foundation and measure the ring where it's the widest. You will then get the ring's diameter
- Number of millimeter equals your size

If you don't have any ring to measure:

- Twin a piece of ribbon around your finger
- Measure the ribbon where the circle closes and lay it out on a ruler
- Number of millimeter equals your size
