

SUSTAINABILITY ACCOUNTING STANDARDS BOARD (SASB)

ACCOUNTING METRICS	DISCLOSURE & REFERENCE
Greenhouse Gas Emissions	
<p>EM-MD-110a.1</p> <p>Gross global scope 1 emissions, percentage methane, percentage covered under emissions-limiting regulations</p>	<ul style="list-style-type: none"> • Scope 1 CO₂e - 4,984,885.96 MT CO₂e • 9.44% Methane Emissions • Scope 1 emissions total does not include hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride, and nitrogen trifluoride <p>0% of scope 1 emissions are covered under emissions-limiting regulations</p> <p><i>Reference the "Emissions" section of the 2022 Performance Data Chart for more information.</i></p>
<p>EM-MD-110a.2</p> <p>Discussion of long-term and short-term strategy or plan to manage scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets</p>	<p>In May 2021, EnLink announced emissions reduction targets including:</p> <ul style="list-style-type: none"> • Achieving a 30% reduction in scope 1 methane emissions intensity in our operations by 2024, as compared to 2020 levels • Pursuing a path to reach a 30% reduction in our scope 1 CO₂e emissions intensity in our operations by 2030, as compared to 2020 levels <p>In 2022, EnLink made progress on these goals, as detailed in our 2022 Sustainability Report's Energy Use and Emissions page. Through year-end 2022, we are 63% complete with our 2024 target.</p> <p><i>Reference the "Energy Use and Emissions" section of the 2022 Sustainability Report for more information.</i></p>
Air Quality	
<p>EM-MD-120a.1</p> <p>Air emissions of the following pollutants: (1) NO_x (excluding N₂O), (2) SO_x, (3) volatile organic compounds (VOCs), and (4) particulate matter (PM₁₀)</p>	<ul style="list-style-type: none"> •NO_x emissions: 3,050.52 MT •SO₂ emissions: 141.47 MT •VOC emissions: 2209.66 MT •PM emissions: 306.79 MT <p>•These criteria pollutant quantities include only sources that we are required to report to state and federal agencies.</p> <p><i>Reference the "Emissions" section of the 2022 Performance Data Chart for more information.</i></p>

Ecological Impacts	
<p>EM-MD-160a.1</p> <p>Description of environmental management policies and practices for active operations</p>	<p>EnLink's environmental performance is driven by our core values, which focus on safety, integrity, people, excellence, and innovation, and includes both managerial oversight and employee ownership. We follow the continuous improvement process of plan-do-check-act to ensure that environmental standards and considerations are a priority in project planning, emergency response planning, and employee training.</p> <p>EnLink takes an environmentally sound approach to biodiversity for operation of new and existing assets and construction projects. We prioritize avoiding environmentally sensitive areas in the project design process; secondly, we minimize our impact to land, water, air, and wildlife; thirdly, we restore impacted habitats or other environmentally sensitive areas when avoidance is not practicable; and lastly, we operate our assets in a manner that respects the environment and minimizes the potential for ecological disruption. We strive to communicate and coordinate with community members, landowners, and regulators on conservation approaches and efforts.</p> <p>Examples of how EnLink may minimize our impact when planning, constructing, or operating projects include narrowing right of way and construction workspace widths, using horizontal directional drilling to avoid surface impacts, and restoring the environment when impacts are unavoidable through replanting of vegetation or offsetting the impact by acquiring wetland mitigation credits from government and environmental agencies.</p> <p><i>Reference the "Environmental Performance & Stewardship" section of our 2022 Sustainability Report.</i></p>
<p>EM-MD-160a.2</p> <p>Percentage of land owned, leased, and/or operated within areas of protected conservation status or endangered species habitat</p>	<p>By year-end 2022, approximately 85.53% of facilities and assets owned and operated by EnLink were outside of critical habitats, as defined by the International Union for Conservation of Nature (IUCN), U.S. Fish and Wildlife Service (USFW), and Protected Areas Database of the United States (PADUS).</p> <p>Additionally, in 2022, only 0.34% of EnLink's assets were in or near a "direct critical habitat" and approximately 14.4% were in or near an "indirect critical habitat." SASB EM-MD-160a.2 defines "near" as being "within 5 kilometers of the boundary of an area of protected conservation status or an endangered species habitat to the boundary area of the entity's facilities and/or operations."</p>

<p>EM-MD-160a.3</p> <p>Terrestrial acreage disturbed; percentage of impacted area restored</p>	<p>EnLink currently does not track this metric.</p>
<p>EM-MD-160a.4</p> <p>Number and aggregate volume of hydrocarbon spills, volume in the Arctic, volume in Unusually Sensitive Areas (USAs), and volume recovered</p>	<ul style="list-style-type: none"> • 7 hydrocarbon spills with a total volume of 50.8 BBL, of which 3.26 BBL were recovered (recovered ~5%). • EnLink does not have any operations in the Arctic • No reportable quantity spills occurred in Unusually Sensitive Areas
<p>Competitive Behavior</p>	
<p>EM-MD-520a.1</p> <p>Total amount of monetary losses as a result of legal proceedings associated with federal pipeline and storage regulations</p>	<p>\$0</p>
<p>Operational Safety, Emergency Preparedness, & Response</p>	
<p>EM-MD-540a.1</p> <p>Number of reportable pipeline incidents, percentage significant</p>	<ul style="list-style-type: none"> • Zero gas pipeline incidents, reportable or significant • Zero liquid pipeline incidents, reportable or significant • 0% of reportable incidents were significant: None of the events met the reportable quantity (RQ) standard; therefore, there were no incidents that met the criteria of "significant."
<p>EM-MD-540a.2</p> <p>Percentage of (1) natural gas and (2) hazardous liquid pipelines inspected</p>	<ul style="list-style-type: none"> • 6% of natural gas pipelines inspected • 15% of hazardous liquid pipelines inspected <p><i>Reference the "Environmental Performance" section of the 2022 Performance Data Chart for more information.</i></p>
<p>EM-MD-540a.3</p> <p>Number of (1) accident releases and (2) non-accident releases (NARs) from rail transportation</p>	<p>0</p>

<p>EM-MD-540a.4</p> <p>Discussion of management systems used to integrate a culture of safety and emergency preparedness throughout the value chain and throughout project life cycles</p>	<p>EnLink is committed to providing safe, responsible, and ethical operations that uphold our commitment to employees, the environment, communities in which we operate, and our unitholders.</p> <p>EnLink promotes our safety-centric culture by measuring key performance indicators focused on risk management, compliance, process improvement, and employee knowledge and development. EnLink's Short-Term Incentive Program includes a "Safety and Sustainability Scorecard" – weighted at 15% of the 2022 STI program – that rewards employees for achievement of key metrics directly tied to safety and environmental targets, including preventing incidents, managing risks, training our teams, and improving safety and environmental compliance.</p> <p>EnLink continues our "GoalZERO" program, providing tools and encouragement to help employees always strive for zero injuries, zero vehicle accidents, zero spills and releases, and zero line strikes.</p> <p>EnLink maintains the experience, skills, and resources necessary to appropriately respond to an emergency situation, should one arise. We are prepared to activate our comprehensive emergency response plan and work closely with local responders to keep the public and our employees safe.</p> <p><i>Reference the "GoalZERO Safety" and "Emergency Preparedness" sections of our 2022 Sustainability Report.</i></p>
<p>Activity</p>	
<p>EM-MD-000.A</p> <p>Total metric ton-kilometers of: (1) natural gas, (2) crude oil, and (3) refined petroleum products transported, by mode of transport</p>	<p><i>Reference the "Assets & Volumes" section of our 2022 Performance Data Chart for pipeline miles and throughput volumes.</i></p>

The information and data (collectively, Information) provided in EnLink's 2022 Sustainability Report (Report) reflects content as of and for the period ending December 31, 2022, unless otherwise indicated. Such Information in this Report is for informational purposes only. EnLink does not make, and hereby expressly disclaims, any representation or warranty as to the accuracy or completeness of the Information contained herein. This Report is being published on August 1, 2023, and EnLink has no obligation or duty to (1) update or correct the Information, (2) provide additional details regarding the Information, or (3) continue to provide the Information, in any form, in the future. EnLink reserves the right, in its sole discretion, to modify, update, change, delete, or supplement the Information from time to time without notice. The Information should not be interpreted as any form of guaranty or assurance of future results or trends. EnLink is not expressly incorporating by reference any of the Information into any filing of EnLink made with the United States Securities and Exchange Commission or in any other filing, report, application, or statement made by EnLink to any federal, state, or local governmental authority. This Report contains information based upon EnLink's role in the broader economy, environment, and society and for the purpose of responding to issues that are important to a wide range of interested parties. While events, scenarios, and efforts discussed in this report may be significant, any significance should not be read as necessarily rising to the level of materiality of the disclosures required under U.S. federal securities laws, which have distinct and specific concepts of materiality.
