

Take the work out of business travel →

Streamline expense reporting and gain control and visibility by connecting Uber for Business to SAP Concur, with coverage in more than 600 cities across 60 countries.

Seamless setup

Give your employees access to all the benefits of Uber for Business and SAP Concur by combining them with just a few clicks.

Enhanced safety

From mask policies to verification technology, Uber's [Door-to-Door Safety Standard](#) is designed to help protect the health and safety of everyone who uses our platform.

Simplified management

Set travel parameters like time, location, budget, and ride/meal type. Use automated roster syncing to add new employees to your company's travel program and offboard former employees.

Improved visibility

Gain insight into how your travelers use Uber for Business. Review spending habits and usage trends at the individual, team, and organization levels. Monitor usage, compliance, and overall spending across rides and meals with easy tracking and reporting.

Dedicated support

Access Uber's 24/7 support team and SAP Concur's Locate to gain near-real-time visibility into the last ride dropoff location and other details of your travelers' trips, to meet duty of care.

Make business trips easier for travelers →

Time better spent

Give employees time back after a business trip by having Uber-related business expenses flow directly into SAP Concur expense reports, streamlining receipt attachment requirements.

Consistent experience worldwide

With ride options like Uber Comfort and Uber Green, [enhanced airport travel](#), and over 825,000 restaurant and merchant partners worldwide, employees can know what to expect when it comes to business rides and meals wherever they're traveling.

Peace of mind

Uber support is available 24/7, and our [Door-to-Door Safety Standard](#) is designed to help protect the health and safety of everyone involved. Plus, Uber for Business provides a single dashboard where travel and security administrators can see trip details like cost, time, city information, and more.

Frequently asked questions: SAP Concur integration →

How is this Uber for Business integration different from the Uber integration?

The Uber for Business + SAP Concur integration is for organization-wide, automatic e-receipt forwarding. Activating the integration means employees will no longer need to connect their individual SAP Concur accounts to their personal Uber accounts to get the benefit of e-receipt forwarding. Administrators also get a dashboard for visibility into ground transportation and meal delivery spending and a more complete view of their organization's travel activity.

Why should I use Uber for Business if some of my employees already use the e-receipt integration with Concur?

Using the Uber for Business + SAP Concur integration gives your company a whole new level of visibility into trips and meals ordered for work. Administrators get a single dashboard where they can see trip details (like cost, time, city information, and more). Additionally, by integrating with SAP Concur, an organization's employee roster can be updated automatically within Uber for Business.

How do I get the integration, and what does it cost?

There is no cost to access the Uber for Business + SAP Concur integration. To get started, visit the [Uber for Business listing](#) in the Concur App Center.

Where is this integration available?

Uber for Business is available in over 80 countries globally.

Where can clients learn more?

Clients can visit [Uber for Business in the Concur App Center](#) for details and to complete an inquiry form. Their account manager will contact them when the integration is complete.
