★ Better experiences

Remove the need for employees to submit receipts for work trips, and give them a consistent, seamless, and familiar option when they're traveling for work.
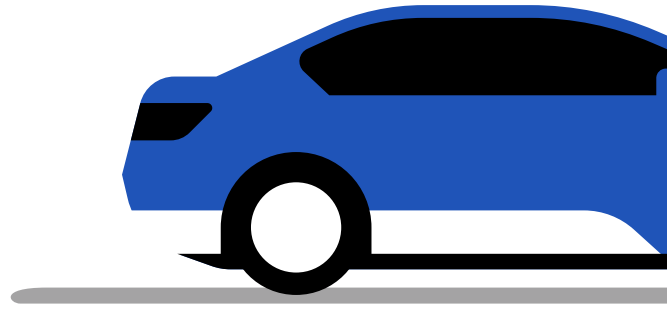

Simplified management

Customize permissions for your teams, and link with your existing employee management systems. Leverage expense codes and in-app prompts for one-tap compliance.

Improved visibility

Gain insights into how your travelers use Uber—including at trip, team, and organization levels—to monitor usage, compliance, and overall spend.

Make work trips even easier for everyone →

A smoother traveler experience

Effortless expensing

Eliminate the need for travelers to submit Uber receipts or wait for reimbursement for eligible work trips. Use one central payment method.

One global app

Travelers can use the same Uber app to request rides in over 60 countries around the world, without worrying about language or currency barriers.

Safety and support

Uber support is available 24/7, and our safety technology helps put peace of mind at your traveler's fingertips— including GPS-tracked trips, an in-app Safety Center, and more.

Easy management, all in one place

Your travel hub

Easily add and remove employees, implement new programs, review individual trips, manage business billing, and more—all from one dashboard.

Built-in flexibility

Build custom programs for your teams, and access other features to request or sponsor rides with Uber for guests, event attendees, and more.

Business-grade features

From a dedicated support team and monthly billing options to integrations that support your duty of care obligations, Uber is built for business.
