

## Senior Scientific Researcher - Personalized Cancer Vaccines

Job ID: 3401676755

### Job Function

Other Development

### Schedule

Full-time

### Location

United States - California  
South San Francisco

### Job type

Regular Employee

### Company/Division

Pharmaceuticals

### Job Level

Individual Contributor

---

## The Position

The Department of Oncology Biomarker Development within Development Sciences at Genentech Research is seeking a highly motivated Senior Scientific Researcher to contribute to the development of predictive/pharmacodynamic biomarkers in support of Genentech's extensive Early Development oncology portfolio. The successful candidate will work closely with an interdisciplinary team, including colleagues from research, bioinformatics and clinical sciences.

### Responsibilities

You will be responsible for translational research to enable the development of biomarkers and assays for use in the clinical development of personalized cancer vaccines. Experimental strategies will include application of cellular immunology in developing immune monitoring assays. Specific responsibilities will include processing and analyzing clinical trial samples, data analysis and presentation, and contributing to experimental design and planning.

## Who You Are

- MS, or PhD degree with at least 4 years of experience in immunology
- The position requires experience with human immunological assays including flow cytometry, genomics and functional assays.
- Demonstrated accomplishments with first authored publications in in the field of Immunology/tumor immunology
- Outstanding written and oral communication skills as the candidate will present results at intra- and inter-departmental meetings
- Adept at independently designing, executing and interpreting experiments
- Expertise in immunology techniques including immune cell isolation, flow cytometry (8 colors), T cell stimulation assays, antigen presentation assays, monitoring of T cell responses.
